STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

District Census Hand-books for each of the 43 Districts in Madhya Pradesh

PREFACE

The publication of District Census Hand-books, which was begun in the 1951 Census, represents a significant step in the process of making census statistics available for the smaller territorial units basic to executive and developmental administration. Apart from the fact that the proper implementation of policy depends on the ability of the administrative authorities concerned to quantify accurately the variables involved, it is at these levels that policies get really thoroughly tested; also, policies can fail—and probably have failed—because their statistical basis was weak. It is undoubtedly necessary that gaps in statistics at lower levels be filled as rapidly as possible. It was not possible at this Census to base all census statistics on the development block as the unit mainly because in 1961 there were many areas not till then covered by blocks. The coverage had become complete by about the middle of 1963 and it is not unlikely that the 1971 Census will recognise the block as the basic field unit as much for purposes of presentation as for operational purposes.

2. What we have tried to do in the 1961 Census Hand-books is to make them more informative by the inclusion of as many categories of non-census statistics as possible; some of these are climate, agriculture, co-operation, industry, banking, education, health etc. There is also an introductory note to each Hand-book high-lighting the more striking fea ures. It has not been possible for the Census Organisation to check the accuracy of the figures supplied by various authorities; it is to be hoped that some other organisation, better equipped for the purpose, will take up this task.

3. For the seventeen districts of Mahakoshal (Part of erstwhile Madhya Pradesh) and for Panna and Tikamgarh districts of erstwhile Vindhya Pradesh, which are part of the present State of Madhya Pradesh, the area figures for districts and tahsils furnished by the Director of Land Records and presented in Table A-I are internally inconsistent in the sense that the tahsil areas do not add up to the district area. This inconsistency arose from the fact that, in the case of these districts, the district area includes, but the tahsil areas exclude, 'forest' area for which the tahsilwise breakup was not then available. Later on, while this Hand-book was in the press, the Director of Land Records brought out revised area figures for the year 1962-63 for tahsils and districts, which among other improvements, do not suffer from the defect of internal

inconsistency even in case of these nineteen districts. Revision of Table A-I on the basis of these area figures was not feasible at this late stage; the only alternative was to print these revised area figures also in this Hand-book.

4. One unfortunate fact about these Hand-books is that they became available to the users rather late in the decade. This is partly due to the considerable time required for the collection of information from various authorities and partly to difficulties in printing. Owing to the fact that State presses, with a heavy back-log of printing weighing down on them, would find it impossible to print all the District Census Hand-books themselves, arrangements have been made for printing them in private presses. If these Hand-books are to have a useful life of more than four or five years of inter-censal decennium, more expeditious methods for the collection of non-census statistics, for the preparation and checking of the manuscripts and for printing will have to be devised.

5. The Census Organisation is grateful to the Government of Madhya Pradesh for having been so kind as to undertake the publication of these Hand-books and to the Superintendent, Government Printing and his organisation—particularly the Assistant Superintendent, Printing, Government Regional Press, Indore and his staff—for the printing arrangements made. The inspiration behind this ambitious venture is that of our indefatigable Registrar General, Shri Asok Mitra, to whom we are all deeply grateful. Our thanks are also due to the various authorities who supplied us with all the necessary statistics.

G. JAGATHPATHI

NOTES AND EXPLANATIONS

This note gives the meanings and explanations of terms and concepts used in this Handbook. This is necessary because, without a proper grasp of the meanings of such simple concepts as building, house, household, worker, etc., it is not possible to appreciate the data presented in the Handbook. Thus, one who does not know that an unpretentious hut in the thick of Bastar forests with unplastered bamboo walls and a thatch roof and with space hardly enough for two cots is not a whit less of a building than the Indian versions of the skyscrapers in one of the metropolitan cities, or that a central jail housing all manner of criminals and shady characters is as much a household as the household of the most pious and god-fearing citizen in the State, may not be able to appreciate what exactly the figures represent. Besides explaining the terms and concepts, the note also contains brief notes on the salient and peculiar features of some of the Census tables presented in this Handbook.

Census.—The Census in India is a decennial operation taking place in February-March of the first year of every decade. It ensures coverage of *all* members of the population irrespective of age. The operations constituting a *Census* involve, besides counting of heads, the counting of numerous attributes of the person counted. These are demographic, social, economic and cultural in nature. The number of these attributes regarding which information is recorded has been increasing from census to census and is limited only by considerations of cost, time and organisation.

Population.—The important thing about a population is that it is dynamic. It is a constantly changing entity. These changes take place by the natural processes of birth and death as well as by migration. A statement of population has therefore little sense unless the point of time to which it relates is also stated. A population figure is correct only for a particular point of time; and, even though in practice one may omit to indicate this point of time, one should none the less be clear about it. The population figures presented herein refer to the sunrise of 1st March, 1961, unless otherwise stated.

Rural-Urban Classification:—Data collected at a Census is usually presented separately for the rural and urban areas. A 'town' or a 'town-group' constitutes an urban area. A 'town' in the 1961 Census was either (i) a municipality, cantonment or corporation; or (ii) a habitation with a population at least of 5,000 with atleast three-fourths of the adult male population being engaged in non-agricultural pursuits. The rural-urban classification, being operationally cardinal and prior in point of time to the census count, had to be tackled earlier and a list of 219 towns in the State was therefore, prepared much earlier than the census proper. This included 28 habitations which were tentatively treated as towns, the intention being that, after the 1961 Census data became available, their cases would be re-examined. Later on, however, no modification was made in the list, even though 7 towns did not satisfy either the minimum population criterion or the one based on the ratio of non-agricultural adult males being 75% or greater. These are Gogaon in West Nimar, Datla Bandhi in Chhindwara (both under 5,000 in population); and, Icchawar, Patan, Pendra, Akaltara, Arang respectively in Sehore, Jabalpur, Bilaspur, Bilaspur, and Raipur Districts (not satisfying the economic criterion). The reason for not disturbing the original list of towns was that as many as 14 habitations which did not satisfy one or the other of the criteria laid down earlier managed to sneak into the list of towns as municipalities, and inclusion of seven more such towns was not supposed to introduce greater demographic distortion than was already present. The cases of Chachaura-Binaganj town in Guna District and Sardarpur-Rajgarh in Dhar District are peculiar in that each of these two municipal towns consists of two distinct habitations separated by 2 miles in the first and 3 miles in the second case.

All areas, which were not urban were rural. They consisted of 'villages'. A very large majority of the census villages were 'revenue villages', which had well demarcated or recognised boundaries, and which included not only the inhabited portion (or portions) but also agricultural land and uninhabited waste (or other) lands. The census village was thus not synonymous with a habitation or a dwelling; in fact, a village could contain two or more distinct habitations separated by considerable distances known variously as 'tola' or 'mazra' or 'para'. Besides, in many districts there were forest villages, situated inside Reserved forests and without clearly demarcated boundaries. The areas entered against these villages in the Village Directory are thus only approximate. It is to be noted that being, as observed by Martin [Census Superintendent (old) Madhya Pradesh, 1911 and Census Commissioner for India, 1921] arbitrary and irregular units of

area, carved out chiefly for revenue and administrative purposes, there are many revenue villages which do not have any habitation. They are not, therefore, of much demographic interest, and their inclusion in the Village Directory is only for a proper tally of area aggregates.

A—General Population Tables:

There are four main tables and three appendices in this series.

Table A-1.—This table presents the basic figures relating to area, houses and population separately for the rural and urban areas of each district, each tahsil, and for each city, towngroup or town. The area figures used in the table for the district and the tahsils are those furnished by the State Director of Land Records. In case of the district, the area figures furnished in 1962 by the Surveyor-General, India are also given. The Surveyor-General does not furnish area figures for tahsils. In case of cities and towns the area figures are furnished by the local urban authority (if any) in charge of the municipal administration, or by the local revenue authorities. Except in case of Raipur and Sagar districts, there is no agreement between the area figures for the district furnished by the Director of Land Records and the Surveyor-General, India. These differences arise principally from the differences in the methods adopted by the two agencies in measuring and computing the area.

In the case of eighteen districts (Bastar, Raipur, Durg, Raigarh, Bilaspur, Surguja, Balaghat, Seoni, Chhindwara, Mandla, Narsimhapur, Jabalpur, Sagar, Hoshangabad, Betul, East Nimar, Tikamgarh and Panna), only the district 'total' and 'rural' figures for area include the forest area; the figures for forest area were not available for individual tahsils in these districts, and hence the tahsilwise area figures for these districts do not include forest area. This fact is important particularly for appreciating the district and tahsil population density figures of these districts. The population density (*i.e.*, persons per square mile) given in column 4 of the table is calculated on the basis of the figures of area supplied by the State Directorate of Land Records.

Occupied Residential House.—This is a Census house which was actually occupied at the time of enumeration for residential purposes either partly or fully. The concept of 'Census house' together with the allied concepts of 'building' and 'household' are dealt with later in this note.

Town Group.—The introduction of the concept of "towngroup" is a new feature of the 1961 Census. One kind of 'towngroup' has its basis in what may be called demographic prognosis, this being that a particular group of towns is situated in such a way, and exhibits some interconnecting features of such a kind, that they can be considered a single demographic entity whose organic nature is likely to become more and more evident in the future. Examples are: Bhopal City with Bairagarh in the West and Heavy Electricals Township in the East; and Durg Town and Bhilai Industrial Township. The other type of towngroup is a group only in name in the sense that it represents a group of localities which geography unites but definition separates. Examples are Sagar Towngroup consisting of Sagar Municipality and Sagar Cantt., and Jabalpur Towngroup (consisting of Jabalpur Corporation, Jabalpur Cantt. and Khamaria). In both these instances, the urban complex is single and continuous, but as each corporation or cantonment is a separate town by definition, it gets split up in the Census into more than one town. In Madhya Pradesh there are six towngroups in all; three of them belong to the first type: Bhopal in Sehore District: Murwara in Jabalpur District and Durg in Durg District; the other three belong to the second type, Pachmarhi in Hoshangabad District, Sagar in Sagar District and Jabalpur in Jabalpur District.

Houseless & Institutional Population:—"Houseless population" means those who did not live and were not enumerated, in Census-houses at the last Census. Obviously these swell the ranks of the social destitutes who, to speak in every day parlance do not have even a roof over their heads, but live under the shade of trees or bridges or on pavements. "Institutional population" means the population that was enumerated in institutions at the last census *i.e.*, in hostels, jails, boarding houses, hospitals etc.

Class of Towns.—Towns are classified into six classes as below according to their population sizes:—

Class	*Population range*
I	100,000 and above
II	50,000—99,999
III	20,000—49,999
IV	10,000—19,999
V	5,000—9,999
VI	Below 5,000

Towns of Class I are also known as Cities.

"Status" of a town means the authority in charge of its local urban administration. Thus a town could have a Municipal Corporation; a Municipality, a Cantonment Board, a Gram Panchayat, a Town or Notified Area Committee, etc.

B—(*i*) *General Economic Tables.*—This series includes 22 tables containing information on certain economic aspects of the population. The concepts involved have undergone significant changes as compared with the 1951 and earlier Censuses. In the 1951 and earlier censuses or at any rate in the last few censuses income or economic independence (and dependence) were treated as the criteria for denoting the economic status of a person. Separate account used to be taken of all persons who were economically independent and of those who were economically dependent. An intermediate category of economic semi-independence was also introduced in the 1931 Census. This consisted of the 'earning dependents' of the 1951 Census and even there the element of income was present. This income-based classification seems to have not infrequently resulted in a suppression of information relating to those who worked in household economic activities but did not actually earn any income like men other than the head of the household and women of the family or children working at the family cultivation or cottage industry but not earning any incomes. The 1961 Census introduced the concept of work and totally abandoned the 'income' approach. Thus all people who worked (*i.e.*, were "economically active") including family workers who were not in receipt of any income, & working children who did not earn enough for their maintenance were treated as workers. On the other hand such persons as a receiver of rents on immovable property, or of interest on securities deposited in a bank, and doing no other work, were treated as non-workers. Persons professionally engaged in anti-social activities (*i.e.*, thieves, robbers, prostitutes, beggars, etc.) were, however, not treated as workers. The approach to the concept of "work" was pragmatic and numerous illustrations were given to clarify the concept. The basis of work was held to be satisfied in the case of seasonal work *i.e.*, work at cultivation, livestock, dairying or household industry if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work was satisfied if the person was employed during any of the fifteen days preceding the day on which he was visited by the Census enumerator. A person who was working but was absent from his work during those fifteen days or for a longer period owing to illness or other causes was treated as worker. Work included not only actual physical work but also effective supervision and direction of work.

The Working Categories:—The primary classification of the population is by means of a simple dichotomy into workers and non-workers. The former is further sub-divided into nine sub-classes or working categories of the Census. These are listed below; the correspondence with the Standard National Industrial Classification is also indicated.

	CENSUS WORKING CATEGORY	CORRESPONDING DIVISION OR MAJOR GROUP OR MINOR GROUP OF NIC
I	Workers in cultivation	Minor Groups 000, 001, 002, 003, 004,
II	Agricultural Labourers ...	The same as in I above
III	Workers in mining, quarrying, live-stock, forestry, fishing, hunting and plantations, orchards and allied activities	Major Groups 01, 02, 03 and 04 and Division 1; Minor Groups 005, 006, 007, 008, 009 (if not classifiable as household industry)
IV	Workers in household industry ...	Minor Groups 005 to 009, 013, 014, 015, 020 to 026, 031, 032, 040 to 048, 107, Divisions 2 & 3 (excepting Minor Groups 201, 217, 218, 232, 252, 260, 290, 324, 325, 338 and 380) if on a household scale
V	Workers in manufacturing other than household industry ...	Divisions 2 & 3
VI	Workers in construction ...	Division 4
VII	Workers in Trade and Commerce ...	Division 6
VIII	Workers in Transport Storage and Communications ...	Division 7
IX	Workers in other services	Divisions 5, 8 & 9

The only term requiring explanation is household industry, the others being self-explanatory. As regards household industry, a three-fold test was laid down, *viz*:—

(a) "Household Industry" should consist of manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) "Household Industry" should be on the household scale where the workers mainly will be the Head of the household himself and/or members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a *registered factory* but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such free movement is not possible, and therefore, for household industry in urban areas we should consider only those industries which are located or at least the major part of whose work is located at home.

Class of Worker:—A worker, other than a cultivator, agricultural labourer or a worker at household industry could be: (i) an Employer, that is, who hires one or more persons in his work; (ii) an Employee, that is, who does his work under others for wages or salary in cash or kind; (iii) a Single Worker, that is, who is doing his work without employing others, except casually, and without the help of other members of the family, except casually (this includes workers working as members of a co-operative); and (iv) a Family Worker, that is, who is doing his work in his own family without wages or salary in cash or kind. A person could be an employee in a household industry also.

PRINCIPAL AND SECONDARY WORKER:

Table B-VII Part A and Part B involve the concepts of principal and secondary work. For every worker the principal work had to be indicated in the case of a person who was engaged in more than one work, and also the secondary work if he was engaged in two or more than two productive activities. The concepts of primary and secondary work had nothing to do with the income accruing to a person from his work. The principal work of a person was that activity which took up most of his time; similarly the secondary work (in case a person was engaged in two or more than two kinds of work) was that which took up less time than the principal work but greater than the other kinds of work. Unless specifically stated to the contrary in the table heading itself the tables in the Handbook are based on the principal work of a person.

Non-workers:—The non-working section of the population also was divided into eight classes according to the nature of their activities. Thus a non-worker could be (i) a full time student or child attending school, (ii) a person engaged in home duties (like a housewife or other adult female who does no other work) (iii) dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old-age; (iv) a retired person who is not employed again, rentier, a person living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work and who does no other work; (v) a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence; (vi) a convict (not an undertrial who was to be recorded for the work he did before being admitted to Jail); (vii) persons who were seeking employment for the first time; and (viii) persons who previously had worked, but were out of employment, and were again seeking work.

Education Levels:—A person was treated as illiterate if he did not satisfy the test of literacy, this meaning the ability both of reading and writing. The test of reading was held to be satisfied if a person could read printed matter or easily legible manuscripts. The test of writing was the ability to write a simple letter. The minimum educational level is primary or junior basic, and this includes all persons who have passed this examination but have not passed the next higher level examination *i.e.*, matriculation or higher secondary. Persons who had formal schooling but had not passed the primary or junior basic level examination were literates without any educational levels. A person belonging to any particular educational level means a person who has passed the examination denoting that level.

INDUSTRIAL AND OCCUPATIONAL CLASSIFICATION OF WORKERS:

Workers have also been classified according to their occupation and industry. The concepts of 'industry' and 'occupation' are of fundamental importance in connection with all economic activity and it is necessary that they should not be confused with each other. By "industry" is meant the sector of economic activity in which a worker is engaged *e.g.*, the textile industry, mining industry, etc., whereas by 'occupation' is meant the exact function that a worker performs in that sector *e.g.*, fitter, carpenter, typist, etc. Occupation thus is "a trade, profession or type of work performed by an individual independent of the worker's industry, status or years of experience"

THE INDIAN STANDARD INDUSTRIAL CLASSIFICATION (I. S. I. C.):

The industrial classification used in some of the economic tables of this hand-book is the 'Standard Industrial Classification' prepared by the Ministry of Labour and Employment, Government of India. Under this scheme of classification, the whole range of economic activity is divided into nine 'divisions', and a code number is given to each. The first digit of the code number of any specific economic activity stands for the 'Division' under which that activity is classified. Each division is then divided into a number of major groups not exceeding ten. The first and second digits of the code number represent the division and the major group into which an economic activity is classified. Each major group is again sub-divided into a number of minor-groups not exceeding ten, and the first, second and third digits in the code number of any economic activity represent the division, the major group and the minor group into which it is classified. To illustrate, the industrial 'code', '261', represents an economic activity corresponding to minor group 261 in major-group 26 of Division 2. A reference to the Standard Industrial Classification will show that the minor group code stands for the economic activity 'Dying and bleaching of silk' in the major group 'Textiles Silk' of the Division: 'Manufacturing'. The 'Divisions', 'Major Groups' and 'Minor Groups' of the Standard Industrial Classification are printed immediately after this note as Appendix I.

NATIONAL CLASSIFICATION OF OCCUPATIONS (NCO):

Table B-V gives the occupational classification by sex of persons at work other than cultivation. This classification is based on the 'National Classification of Occupations' prepared by the Ministry of Labour and Employment, Government of India. Each *occupation* is represented by a code number containing a number of digits (extending in the NCO upto 5). We have used only the three digit Code number for classifying occupation. All occupations are divided into ten divisons to each of which a digit is allotted. The first digit of the code number of an occupation stands for the 'Division' into which it is classified. Each division is then sub-divided into a number of groups not exceeding ten. The first and second digits of the code number represent the 'Division' and 'Group' into which an occupation is classified. Each group again is divided into a number of families not exceeding ten and the first three digits of the code number stand for the division, group and family into which an occupation is classified. To illustrate, the code number 911 stands for the family 911 (Cooks, cook-bearers, domestic and institutional) included in the Group 91 (Housekeepers, Cooks, Maid and related workers) included in the 'Division' 9 (Service, Sport and Recreation workers). The Divisions, Groups, and Families of the National Classification of Occupations are printed after this note as Appendix II.

It may be mentioned that the three digit industrial code can easily be extended into a four-digit code on the principles illustrated earlier to secure greater precision in the classification of the economic activitity of a worker. This has in fact been done in case of workers at household industry, and these four-digit code numbers have been used in Table B XIV Part B.

B—(ii) Household Economic Tables:—Tables belonging to this series differ from others in two respects: (i) they have been prepared from information recorded on the household schedules, while the other tables are prepared from information recorded on the individual slips; (ii) whereas the other tables are based on the total population, the tables in this series are prepared from the data contained in a 20% sample of all households. The instructions for selecting the sample are reproduced below:—

"Every fifth household from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tahsil/taluka and for urban areas of a district *i.e.*, households left over in a household pad should be carried over to the next household schedule pad for the selection of sample households.

"Before making the sample households the household schedule pads should be arranged in the order of location code numbers of villages in a Taluka or Tahsil in the case of a rural area and in the order of location code numbers of towns in a district for urban areas. The first sample household should be chosen randomly among the first five households in the first household schedule pad and stamped (s) as selected. This random number (random start) should be chosen separately for rural areas of each taluka/tahsil and for

the urban area of the district. From the first random household every fifth household should be continuously stamped as selected..... The sample should be continuously marked for all the pads of villages in a tahsil and urban areas in a district. If in a particular household schedule pad at the end, some households (these will be four or less) are left after marking of the sample household, the housedolds left over should be carried over to the next household schedule pad and the appropriate household in that pad should be marked as a sample household".

C.—Social and Cultural Tables:

This series contains 8 tables of which Table C-1 is prepared from data abstracted from the 20% sample of households.

Marital Status:—As regards marital status a person could be (i) never married, (ii) married, (iii) widowed and (iv) divorced or separated. The figures given do not necessarily indicate the legal position. Thus, persons who lived together as man and wife and who were regarded as such by society were treated as 'married' even though there might not be any legally valid marriage between them.

Age.—The age of a person was recorded in completed years as on the last birth day at the time of enumeration, so that a child who had not completed a year of its existence was recorded as of age '0' Inspite of the best efforts, distortion of ages is common phenomenon in Indian Census. This distortion is ascribable to the combined effect of a variety of causes like, for example, digit-preference, age-bias and estimation error and its most obvious manifestation is the heaping of the ages at digits ending in 0 or 5 and in even rather than in odd numbers.

Mother Tongue:—Mother tongue is the language spoken in childhood by a person's mother to the person, or mainly spoken in the household.

Religion:—Separate figures are given only for the six main religions: Hindu, Muslim, Jain, Sikh, Christian and Buddhist. Figures for persons professing other religions have been clubbed together under the head: Other Religions and persuasions'

Scheduled Castes and Scheduled Tribes:—In view of the constitutional safeguards guaranteed to persons belonging to scheduled castes and scheduled tribes with a view to ameliorate their social and economic condition, basic census figures are for the first time being published separately for each scheduled caste and scheduled tribe. A scheduled caste or a scheduled tribe means a caste or a tribe included in the Order issued by the President of India under Articles 341 (1) and 342 (1) of the Constitution, amended, if necessary in accordance with Articles 341 (2) and 342 (2) thereof. It should be remembered that the population of a particular scheduled caste or tribe as given in the tables does not necessarily mean the entire population of that caste or tribe in the district. This is so because scheduling of a caste or tribe under the Constitution is *territorial* so that a caste or a tribe scheduled in a district, (or a tahsil or tahsils of a district) is not necessarily a scheduled caste in other districts (or other tahsils of the same district). Thus Gond is a scheduled tribe in all tahsils of Jabalpur District except Jabalpur Tahsil so that the figures for Gond population in Jabalpur District exclude the Gonds of Jabalpur Tahsil. Secondly, some of the scheduled tribes have not been given independent status in some parts of the State by the Order but have been clubbed together with some major tribe, while, in other parts of the State, they have not been so clubbed but have been included as distinct scheduled tribes. Thus, in the districts of the Mahakoshal region of the State, the tribe Agaria has been clubbed, along with many another, with Gond as the latter's sub-tribe. In these districts, therefore, figures relating to Agaria tribe, whose ethnic identity with Gond is controversial, do not appear independently in the tables of these districts, but are included in the figures for Gond. In the Vindhya Pradesh region, however, Agaria is Scheduled tribe in its own right and in the districts belonging to that region Agaria population appears separately in the relevant tables.

Religion of Scheduled Castes and Tribes:—A scheduled caste can exist only in Hindu and Sikh religions and in no other religion. A scheduled tribe, however, may be found in any religion.

E—Housing Tables:—The Handbook includes five tables on housing. In using these tables, it should be remembered that they are prepared from the data on households abstracted from the 'Houselists'. Tables E-I and E-III are based on the full count while table E-II, E-IV and E-V are prepared from a 20% sample of households entered in the Houselists. Houselisting was non-synchronous with census proper, having taken place in the month of September-October, 1960, about five month before the reference date of the Census. Also, the population of households entered in the houselists is not necessarily identical with the population of households in respect of which household schedules were filled at the time of the Census. Thus the samples of households drawn from the household schedule, and from the house lists are different samples.

The instruction for drawing the 20% sample of households from the houselists are reproduced below:—

"Before marking the sample households the Houselists should be arranged in order of location code numbers in the case of rural areas for tahsil etc., and in the case of urban areas other than towns with population of 50,000 and over. In the case of towns with population of 50,000 and over the Houselists should be arranged in order of blocks. The first sample household should be chosen randomly among the first five households in the first Houselist. From that every fifth household from the first random household should be continuously marked..... The sample should be marked continuously for all the Houselists. If in a particular Houselist at the end two households are left after the marking of the sample households then these households should be carried over to the next Houselist and the third household in that list should be marked as sample households".

Census House and Census Households:—The concepts of "building" "house" and "household" are important and differ somewhat from their connotations in common speech. A building refers to the entire structure on the ground. A census house is a structure or part of structure inhabited or vacant or a dwelling, a shop, a shop-*cum*-dwelling or place of business, workshop, school etc., with a separate entrance. A census house was thus a building, or part of a building with a separate entrance. A census house could have a variety of uses, residential as well as non-residential; or it might be vacant (at the time of houselisting).

A household was defined as "a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so." A household necessarily lived in a census house or part of a census house. The definition of a household was broad enough to include all persons living together in a census-house and dining from the same kitchen, even if they were not related to one another. Such were the institutional households, like jails, hostels, hospitals etc. The house in which a household lived could either be owned or rented. All census-houses which were not owned by the households living in them were treated as 'rented' even though no rent was being actually paid.

"Factory" and "Workshop":—As is clear from its definition, a Census house could be a workshop. A workshop is a place where some kind of production, repair or servicing goes on, or where goods or articles are made and sold. A bigger workshop which was either registered under the Indian Factories Act or was of the scale of a registered factory was returned as a factory. For a manufacturing, repairing or servicing establishment to be registered under the Indian Factories Act, it should have ten or more workers if using power and twenty or more workers if not using power.

VILLAGE DIRECTORY AND ITS APPENDICES:

Village Directory:—The Village Directory corresponds to the Primary Census Abstract of the 1951 Census. It gives for each village of the district: (a) information relating to area, census houses, households, scheduled castes and scheduled tribes and literacy; and (b) the classification of the population into workers and non-workers, and again 'workers' into their 'Industrial Categories' separately for both the sexes. For facilitating comparison with the Census Handbook of 1951 the serial number at which the village is to be found in 1951 Handbook is also given. A new feature introduced in this Census is the presentation of additional information about each village relating to schools, hospitals, child and maternity welfare centres, medical practitioners, electricity, post and telegraph offices etc. This has been done by entering symbols against the name of each village. Another novel feature is the presentation in eleven appendices of useful information relating to villages and towns *i.e.*, industrial establishments, places situated on bus routes, or within five miles of a railway station, places having pucca wells, markets, public reading rooms, drains etc.

To enable the reader to locate the village in the Village Directory without much difficulty, an alphabetical index of village names is given. This gives for each village the 1961 location code number of the village (in the Village Directory, villages are arranged according to their Location Code Numbers); and its location code number in the 1951 Hand-book.

APPENDIX—I

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The divisions, major groups and minor groups with their Code numbers are listed below.

Major Group (Code)	Description	Minor Group (Code)
	Division O—Agriculture, Livestock, Forestry, Fishing and Hunting.	
00	Field Produce and Plantation Crops:—	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines & orchards	006
	Production of wood, bamboo, cane reeds, thatching grass etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 & flowers) not covered above	009
01	Plantation Crops:—	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	Forestry and Logging:—	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	Fishing:—	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	Livestock and Hunting:—	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax, and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047

Major Group (Code)	Description	Minor Group (Code)
	Production of other animal husbandry products such as skin, bone, ivory & teeth	048
	Division 1—Mining and Quarrying:—	
10	Mining and Quarrying:—	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and Quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt	109
	Division 2 & 3—Manufacturing:—	
20	Foodstuffs:—	
	Production of rice, atta, flour, etc. by milling, Dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201
	Production of indigenous sugar, gur, from sugarcane or palm juice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils *(other than hydrogenated oil)*	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweet-meat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	Beverages:—	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	Tobacco Products:—	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacoo	225
	Manufacture of other tobacco products	226
23	Textile—Cotton:—	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239

Major Group (Code)	Description	Minor Group (Code)
24	Textile—Jute:—	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	Textile—Wool:—	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile	256
26	Textile—Silk:—	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	Textile—Miscellaneous:—	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of water-proof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding, and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	Manufacture of Wood and Wooden Products:—	
	Sawing and planing of wood	280
	Manufacture of wooden furniture & fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	Paper and paper Products:—	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	Printing and Publishing:—	
	Printing and publishing of newspapers and periodicals	300
	Printing and publishing of books	301

Major Group (Code)	Description	Minor Group (Code)
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stiching, sizing and other allied work connected with binding industry	303
31	Leather and Leather Products:—	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather foot-wear	314
	Repair of all other leather products except footwear	315
32	Rubber, Petroleum and Coal Products:—	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	Chemicals and Chemical Products:—	
	Manufacture of basic industrial chemicals such as acids, alkalis & their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic, resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals & chemical products not covered above (including inedible oils and fats)	339
34	Non-metallic Mineral Products other than Petroleum and Coal:—	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery:—	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357

Major Group (Code)	Description	Minor Group (Code)
35	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	Basic Metals and their products except Machinery and Transport Equipment:—	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating, (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369
37	Machinery (All kinds other than transport) and Electrical Equipment:—	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	Transport Equipment:—	
	Manufacture, assembly and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats, and manufacture of marine engines	386
	Manufacture & repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	Miscellaneous manufacturing Industries:	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of Musical Instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, pen-holder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	Division 4—Construction	
40	Construction:—	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells	403
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	Electricity and Gas:—	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of Gas in gas works and distribution to domestic and industrial consumers	502
51	Water Supply and Sanitary Services:—	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511
	Division 6—Trade and Commerce	
60	Wholesale Trade:—	
	Wholesale trading in cereals and Pulses	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish dairy products eggs, poultry and other foodstuff (not covered else where)	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
62	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
63	Wholesale trading in paper and other stationery goods	630

Major Group (Code)	Description	Minor Group (Code)
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64	Retail Trade:—	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in food stuffs like sweetmeats, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrellas, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobiloil and allied products	655
66	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and papers	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
67	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo cane, bark and thatches	672
	Retail trading in other building materials	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689

Major Group (Code)	Description	Minor Group (Code)
69	Trade and Commerce Miscellaneous:—	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
Division 7.—Transport, Storage and Communication:		
70	Transport:—	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Animal transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc. by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	Services incidental to transport such as packing, carting travel agency	710
72	Storage and Ware Housing:—	
	Operation of storage such as warehouses	720
	Operation of storage such as cold-storage	721
	Operation of storage of other type	722
73	Communication:—	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
Division 8.—Services:		
80	Public Services (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing & operation of financial institution each of which is classified in the appropriate industry groups):—	
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public Service in Navy	801
	Public Service in Air Force	802
	Public Service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of Quasi-Government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments	809
81	Educational and Scientific Services:—	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	Medical and Health Services:—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic particulars	820
	Veterinary services rendered by organisations and individuals	821

Major Group (Code)	Description	Minor Group (Code)
83	Religious and Welfare Services:—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organisations	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for promotion of welfare of the community such as relief societies red-cross organisation for the collection and allocation of contribution for charity	832
84	Legal Services:—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organizations and individuals	841
85	Business Services:—	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as of those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	Community Services and Trade and Labour Associations:—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political, and fraternal organisations such as rate payers association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens etc.	862
87	Recreation Services:—	
	Production of motion picture and allied services such as processing editing etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor etc. racing.	873
88	Personal Services:—	
	Services rendered to households such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, (this includes all types of cleaning, dyeing, bleaching, dry cleaning services)	883
	Hair dressing, other services rendered by organisation and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commericial photographic studios	885
89	Services (not elsewhere classified):—	
	Services rendered by organisations or individuals not elsewhere classified	890
	Division 9—Activities not adequately described:	
90	Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified	900
	Fresh entrants to the Labour Market	**999**

APPENDIX—II

NATIONAL CLASSIFICATION OF OCCUPATIONS

(**Code Structure**)

Which classifies occupations into

331 Occupational Families (three-digit code numbers)

75 Occupational Groups (two-digit code numbers)

11 Occupational Divisions (one-digit code numbers)

Note I.—The Classification does not provide separate code numbers for Apprentices, Foremen and Instructors (in-plant only). These may be classified by giving the prefixes of "A", "B", or "C" respectively before the code number of the occupation which is being learned, supervised or instructed.

Note II.—n. e. c.—not elsewhere classified.

DIVISIONS, GROUPS AND FAMILIES

0 *Professional, Technical and Related Workers*:

00 Architects, Engineers and Surveyors:—

- 000 Architects
- 001 Civil Engineers (including overseers)
- 002 Mechanical Engineers
- 003 Electrical Engineers
- 004 Chemical Engineers
- 005 Metallurgical Engineers
- 006 Mining Engineers
- 007 Surveyors
- 009 Architects, Engineers and Surveyors, n. e. c.

01 Chemists, Physicists, Geologists and other Physical Scientists:—

- 010 Chemists, except Pharmaceutical Chemists
- 011 Pharmaceutical Chemists
- 012 Physicists
- 013 Meteorologists
- 014 Geologists and Geophysicist
- 015 Mathematicians
- 019 Chemists, Physicists, Geologists and other Physical Scientists, n.e.c.

02 Biologists, Veterinarians, Agronomists & Related Scientists:—

- 020 Biologists and Animal Scientists
- 021 Veterinarians
- 022 Sliviculturists
- 023 Agronomists and Agricultural Scientists
- 029 Biologists, Veterinarians, Agronomists and Related Scientists, n.e.c.

03 Physicians, Surgeons and Dentists

- 030 Physicians and Surgeons, Allopathic
- 031 Physicians, Ayurvedic
- 032 Physicians, Homeopathic
- 033 Physicians, others
- 034 Physiologists
- 035 Dentists
- 039 Physicians, Surgeons and Dentists, n.e.c.

04 Nurses, Pharmacists and other Medical & Health Technicians:—

- 040 Nurses
- 041 Midwives and Health Visitors
- 042 Nursing Attendants and Related Workers
- 043 Pharmacists and Pharmaceutical Technicians
- 044 Vaccinators
- 045 Physiotherapists, Masseurs and Related Technicians
- 046 Sanitation Technicians
- 047 Optometrists and Opticians
- 049 Medical and Health Technicians, n.e.c. (excluding Laboratory Assistants see 091).

05 Teachers:—

- 050 Teachers, University
- 051 Teachers, Secondary Schools
- 052 Teachers, Middle and Primary Schools
- 053 Teachers, Nursery and Kindergarten Schools
- 059 Teachers, n.e.c.

06 Jurists:—

- 060 Judges and Magistrates
- 061 Legal Practitioners and Advisers
- 062 Law Assistants
- 069 Jurists, and Legal Technicians (including Petition Writers)

07 Social Scientists and Related Workers:—
- 070 Economists
- 071 Accountants and Auditors
- 072 Statisticians and Actuaries
- 073 Geographers
- 074 Psychologists
- 075 Personnel Specialists
- 076 Labour and Social Welfare Workers
- 077 Sociologists and Anthropologists
- 078 Historians, Archeologists, Political Scientists and Related Workers
- 079 Social Scientists and Related Workers, n.e.c.

08 Artists, Writers and Related Workers:—
- 080 Authors
- 081 Editors, Journalists and Related Workers
- 082 Translators, Interpreters and Language Specialists
- 083 Painters, Decorators and Commercial Artists
- 084 Sculptors and Modellers
- 085 Actors and Related Workers
- 086 Musicians and Related Workers
- 087 Dancers and Related Workers
- 089 Artists, Writers and Related Workers n.e.c.

09 Draughtsmen, and Science and Engineering Technicians, n.e.c.
- 090 Draughtsmen
- 091 Laboratory Assistants
- 099 Science and Engineering Technicians, n.e.c.

0X Other Professional, Technical and Related Workers:—
- 0X0 Ordained Religious Workers
- 0X1 Non-ordained Religious Workers
- 0X2 Astrologers, Palmists and Related Workers
- 0X3 Librarians, Archivists and Related Workers
- 0X4 Geographers
- 0X9 Other Professional, Technical and Related Workers, n.e.c.

1 *Administrative, Executive and Managerial Workers*:

10 Administrators and Executive Officials, Government:—
- 100 Administrators and Executive Officials, Central Government (All Defence Services Personnel to be included in this family)
- 101 Administrators and Executive Officials, State Government
- 102 Administrators and Executive Officials, Local Bodies.
- 103 Administrators and Executive Officials, Quasi-Government
- 104 Village Officials
- 109 Administrators and Executive Officials, Government, n.e.c.

11 Directors and Managers, Whosesale and Retail Trade:—
- 110 Directors and Managers, Wholesale Trade
- 111 Directors and Managers, Retail Trade

12 Directors, Managers and Working Proprietors, Financial Institutions:—
- 120 Directors, Managers and Working Proprietors, Banks
- 121 Directors, Managers and Working Proprietors, Insurance
- 129 Directors, Managers and Working Proprietors, Financial Institutions,

13 Directors, Managers and Working Proprietors, other:—
- 130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
- 131 Directors, Managers and Working Proprietors, Construction
- 132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary.
- 133 Directors, Managers and Working Proprietors, Manufacturing
- 134 Directors, Managers and Working Proprietors, Transport and Communication
- 135 Directors, Managers and Working Proprietors, Recreation, Entertainment and Catering Services
- 136 Directors, Managers and Working Proprietors, Other Services
- 139 Directors, Managers and Working Proprietors, n.e.c.

2 *Clerical and Related Workers*:

20 Book-keepers and Cashiers:—
- 200 Book-keepers, Book-keeping and Accounts Clerks
- 201 Cashiers
- 202 Ticket Sellers and Ticket Inspectors including ushers and Ticket Collectors (excluding those on moving transport)

21 Stenographers and Typists:—
- 210 Stenographers
- 211 Typists

22 Office Machine Operators:
- 220 Computing Clerks and Calculating Machine Operators
- 221 Punch Card Machine Operators
- 229 Office Machine Operators, n.e.c.

28 Clerical Workers, Miscellaneous:—
- 280 General and other Ministerial Assistants and Clerks
- 289 Miscellaneous Office Workers including Record keepers, Moharrers, Diaphers, Packers and Binders of office papers.

29 Unskilled Office Workers:—
- 290 Office Attendants, Ushers, Hall Porters etc. n.e.c.

3 *Sales Workers*:

30 Working Proprietors, Wholesale and Retail Trade:—
- 300 Working Proprietors, Wholesale Trade
- 301 Working Proprietors, Retail Trade

31 Insurance and real estate salemen, salesmen of securities and services, and auctioneers:—
- 310 Agents and Salesmen, Insurance
- 311 Agents, Brokers and Salesmen, Real Estate
- 312 Brokers and Agents, Securities and Shares
- 313 Auctioneers
- 314 Valuers and Appraisers
- 319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services, and Auctioneers, n.e.c.

32 Commercial Travellers and Manufacturers' Agents:—
- 320 Commercial Travellers
- 321 Manufacturers' Agents
- 329 Commercial Travellers and Manufacturers' Agents, n.e.c.

33 Salesmen, Shop Assistants and Related Workers:—
- 330 Salesmen and Shop Assistants, Wholesale and Retail Trade
- 331 Hawkers, Pedlars and Street Vendors
- 339 Salesmen, Shop Assistants and Related Workers, n.e.c.

34 Money-Lenders and Pawn-Brokers:—
- 340 Money-Lenders (including Indigenous Bankers)
- 341 Pawn-Brokers

4 *Farmers, Fishermen, Hunters, Loggers and Related Workers*:

40 Farmers and Farm Managers:—
- 400 Cultivators (Owners)
- 401 Cultivators (Tenants)
- 402 Farm Managers, Inspectors and Overseers
- 403 Planters and Plantation Managers
- 404 Farmers and Farm Managers, Animals, Birds and Insects Rearing
- 409 Farmers and Farm Managers, n.e.c.

41 Farm Workers:—
- 410 Farm Machinery Operators
- 411 Farm Workers, Animals, Birds and Insects Rearing
- 412 Gardeners (malis)
- 413 Tappers (Palm, Rubber trees, etc.)
- 414 Agricultural Labourers
- 415 Plantation Labourers
- 419 Farm Workers, n.e.c.

42 Hunters and Related Workers:—
- 420 Hunters
- 421 Trappers
- 429 Hunters and Related Workers, n.e.c.

43 Fishermen and Related Workers:—
- 430 Fishermen, Deep Sea
- 431 Fishermen, Inland and Coastal Waters
- 432 Conch and Shell gatherers, Sponge and Pearl Divers
- 439 Fishermen and Related Workers, n.e.c.

44 Loggers and other Forestry Workers:—
- 440 Forest Rangers and Related Workers
- 441 Harvesters and Gatherers of Forest Products including lac (except logs)
- 442 Log Fellers and Wood Cutters
- 443 Charcoal Burners and Forest Product Processors
- 449 Loggers and other Forestry Workers, n.e.c.

5 *Mines, Quarrymen and Related Workers*:

50 Miners and Quarrymen:—
- 500 Miners
- 501 Quarrymen

502 Drillers, Mines and Quarries
503 Shot Firers
509 Miners and Quarrymen, n.e.c.

51 Well Drillers and Related Workers:—
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas

52 Mineral Treaters:—
520 Mineral Treaters

59 Miners, Quarrymen and Related Workers, n.e.c.:—
590 Miners, Quarrymen and Related Workers, n.e.c.

6 *Workers in Transport and Communication Occupations*:

60 Deck Officers, Engineer Officers and Pilots, Ship:—
600 Deck Officers and Pilots, Ship
601 Ship Engineers

61 Deck and Engine-room Ratings (Ship), Barge Crews and Boatmen:—
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship

62 Aircraft Pilots, Navigators and Flight Engineers:—
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators

63 Drivers and Firemen, Railway Engine:—
630 Drivers
631 Firemen

64 Drivers, Road Transport:—
640 Tramcar Drivers
641 Motor Vehicle and Motor Cycle Drivers
642 Cycle Rickshaw Drivers and Rickshaw Pullers
643 Animal Drawn Vehicle Drivers
649 Drivers, Road Transport, n.e.c. (including Palki and Doli Bearers)

65 Conductors, Guards and Brakesmen (Railway):—
650 Conductors
651 Guards
652 Brakesmen

66 Inspectors, Supervisors, Traffic Controllers, Despatchers, Transport:—
660 Inspectors, Supervisors and Station Masters
661 Traffic Controllers
662 Signalmen and Pointsmen

67 Telephone, Telegraph and Related Telecommunication Operators:—
670 Telephone Operators
671 Telegraphists and Signallers
672 Radio Communication and Wireless Operators
673 Teleprinter Operators
679 Telephone, Telegraph and Related Tele-Communication Operators, n.e.c.

68 Postmen and Messengers:—
680 Postmen
681 Messengers (including Dak Peons)

69 Workers in Transport and Communication Occupations, n.e.c.
690 Ticket Sellers, Ticket Inspectors, including Ushers and Ticket Collectors on moving Transport
691 Conductors, Road Transport
692 Workers in Transport Occupations, n.e.c.
693 Inspectors, Traffic Controllers and Despatchers, Communications
694 Workers in Communication Occupation, n.e.c.

7-8 *Craftsmen, Production Process Workers, and Labourers not elsewhere classified*:

70 Spinners, Weavers, Knitters, Dyers and Related Workers:—
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
702 Spinners, Piecers and Winders
703 Warpers and Sizers
704 Drawers and Weavers
705 Pattern Card Preparers (excluding Printers)
706 Bleachers, Dyers and Finishers
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers and Related Workers, n.e.c.

71 Tailors, Cutters, Furriers and Related Workers:—
- 710 Tailors, Dress Makers and Garment Makers
- 711 Hat and Head-gear Makers
- 712 Furriers
- 713 Upholsterers and Related Workers
- 714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
- 715 Sewers, Embrioderers and Darners, Textile and Fur Products
- 719 Tailors, Cutters, Furriers and Related Workers, n.e.c.

72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers:—
- 720 Shoe Makes and Shoes Repairers
- 721 Cutters, Lasters, Sewers, Footwear and Related Workers
- 722 Harness and Saddle Makers
- 729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n.e.c.

73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers:—
- 730 Furnacemen, Metal
- 731 Annealers, Temperers and Related Heat Treaters
- 732 Rolling Mill Operators, Metal
- 733 Blacksmiths, Hammersmiths and Forgemen
- 734 Moulders and Coremakers
- 735 Metal Drawers and Extruders
- 739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers n.e.c.

74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers:—
- 740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
- 741 Jewellers, Goldsmiths and Silversmiths
- 742 Jewellery Engravers

75 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers:—
- 750 Fitter-Machinists, Tool-makers and Machine Tool Setters
- 751 Machine Tool Operators
- 752 Fitter-Assemblers and Machine Erectors (Except Electrical and Precision Instrument Fitter-Assemblers)
- 753 Mechanics-Repairmen (Except Electrical and Precision Instrument Repairmen)
- 754 Sheet Metal Workers
- 755 Plumbers and Pipe Fitters
- 756 Welders and Flame Cutters
- 757 Metal Plate and Structural Metal Workers
- 758 Electro-Platers, Dip-Platers and Related Workers
- 759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Delated Workers, n.e.c. (including Metal-engravers other than printing)

76 Electricians and Related Electrical and Electronics Workers:—
- 760 Electricians, Electrical Repairmen and Related Electrical Workers
- 761 Electrical and Electronics Fitters
- 762 Mechanics-Repairmen, Radio and Television
- 763 Installers and Repairmen, Telephone and Telegraph
- 764 Linemen and Cable Jointers
- 769 Electricians and Related Electrical and Electronics Workers, n.e.c.

77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers:—
- 770 Carpenters, Joiners, Pattern Makers (Wood)
- 771 Shipwrights and Body Builders
- 772 Sawyers and Wood Working Machinists
- 773 Coach and Body Builders
- 774 Cart Builders and Wheel Wrights
- 775 Cabinet Makers
- 779 Carpenters, Joiners, Cabinet Makers, Coopers. and Related Workers, n.e.c.

78 Painters and Paper Hangers:—
- 780 Painters and Paper Hangers

79 Bricklayers, Plasterers and Construction Workers n.e.c.:—
- 790 Stone Cutters, Stone Carvers and Stone Dressers
- 791 Bricklayers, Plasterers, Masons
- 792 Glaziers

793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n.e.c.

80 Compositors, Printers, Engravers, Book-Binders and Related Workers:—
800 Type-setting Machine Operators
801 Compositors
802 Proof-Readers and Copy Holders
803 Printers (Paper)
804 Printers (Textile)
805 Photo-Litho Operators, Photo-lithographers
806 Engravers, Etchers & Block Makers (Printing)
807 Stereotypers
808 Book Binders
809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n.e.c.

81 Potters, Kilnmen, Glass and Clay Formers and Related Workers:—
810 Furnacemen, Kilnmen and Ovenmen
811 Potters, and Related Clay Formers
812 Blowers and Benders, Glass
813 Moulders and Pressers, Glass
814 Grinders, Cutters, Decorators and Finishers
815 Pulverisors and Mixers, Cement, Clay and other Ceramics
819 Potters, Kilnmen, Glass and Clay Formers and Related Workers, n.e.c.

82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers:—
820 Millers, Pounders, Huskers and Parchers, Grains and Related Food Workers
821 Crushers and Pressers, Oil Seeds
822 Dairy Workers (Non-Farm)
823 Khandsari, Sugar and Gur Makers
824 Bakers, Confectioners, Candy and Sweetmeat Makers
825 Makers of Aerated Water and Brewers
826 Food Canners, Preservers and Related Workers
827 Butchers
828 Coffee and Tea Blenders and Related Workers
829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, n.e.c.

83 Chemical and Related Process Workers:—
830 Batch and Continuous Still Operators
831 Cookers, Roasters and other Heat Treaters, Chemical and Related Processes
832 Crushers, Millers and Calenderers Chemical and Related Processes
833 Paper Pulp Preparers
834 Paper Makers
839 Chemical and Related Process Workers, n.e.c.

84 Tobacco Preparers and Products Makers:
840 Curers, Graders and Blenders, Tobacco
841 Cigarette Machine Operators
842 Cheroot, Cigar and Bidi Makers
843 Snuff and Zarda Makers
849 Tobacco Preparers and Product Makers, n.e.c.

85 Craftsmen and Production Process Workers n.e.c.
850 Basketry Weavers and Related Workers
851 Tyre Builders, Vulcanisers and Related Rubber Products Makers
852 Plastics Products Makers
853 Tanners, Fellmongers, Pelt Dressers and Related Workers
854 Photographic Dark Room Workers
855 Makers of Musical Instruments and Related Workers
856 Paper Products Makers
859 Craftsmen and Production Process Workers, n.e.c.

86 Testers, Packers, Sorters and Related Workers:—
860 Checkers, Testers, Sorters, Weighers and Counters
861 Packers, Labellers and Related Workers

87 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers:—
870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen
872 Crane and Hoist Operators
873 Riggers and Cable Splicers
874 Operators of Earth-moving and Other Construction Machinery, n.e.c.
875 Materials-handling Equipment Operators
876 Oilers and Greasers, Stationary Engines, Motor Vehicles and Related Equipment
879 Stationary Engine, and Excavating and Lifting Equipment Operators and Related Workers, n.e.c.

89 Labourers, n.e.c.:—
890 Loaders and Unloaders
899 Labourers, n.e.c.

9 *Service, Sports and Recreation Workers.*

90 Fire Fighters, Policemen, Guards and Related Workers:—
900 Fire Fighters and Related Workers
901 Police Constables, Investigators and Related Workers
902 Customs Examiners, Patrollers and Related Workers
903 Watchmen and Chowkidars
909 Fire Fighters, Policemen, Guards, and Related Workers, n.e.c.

91 House Keepers, Cooks, Maids and Related Workers:—
910 House Keepers, Matrons, Stewards (Domestic and Institutional)
911 Cooks, Cook-Bearers (Domestic and Institutional)
912 Butlers, Bearers, Waiters, Maids and other Servants (Domestic)
913 Ayas, Nurse-maids
919 House-Keepers, Cooks, Maids, and Related Workers, n.e.c.

92 Waiters, Bartenders and Related Workers
920 Waiters, Bartenders and Related Workers (Institutional)

93 Building Care-Takers, Cleaners and Related Workers:—
930 Building Care-Takers
931 Cleaners, Sweepers and Watermen

94 Barbers, Hairdressers, Beauticians and Related Workers:—
940 Barbers, Hairdressers, Beauticians and Related Workers

95 Launderers, Dry Cleaners and Pressers:—
950 Laundrymen, Washermen and Dhobies
951 Dry-cleaners and Pressers

96 Athletes Sportsmen and Related Workers:
960 Athletes, Sportsmen and Related Workers

97 Photographers and Related Camera Operators:—
970 Movie Camera Operators
979 Other Photographers

99 Service, Sports and Recreation Workers, n.e.c.:—
990 Embalmers and Undertakers
999 Service, Sport and Recreation Workers, n.e.c.

X *Workers not Classifiable by occupation*

X0 Workers without occupations:—
X00 Workers without occupations: Matriculates and above
X08 Workers without occupations: Literates
X09 Workers without occupations: Others

X8 Workers Reporting Occupation Unidentifiable or Unclassifiable:—
X80 Workers reporting occupations unidentifiable or unclassifiable

X9 Workers not Reporting Occupation:—
X90 Workers not Reporting occupation.

MADHYA PRADESH CENSUS, BHOPAL.

INTRODUCING THE DISTRICT

by

K. C. Dubey

Deputy Superintendent of Census Operations, Madhya Pradesh

Surguja district, which was constituted in 1951 after the merger of feudatory states, is the second largest district in the State in respect of area. It is situated in the north-eastern corner of the State between latitudes 22° 38′ and 24° 6′N and longitudes 81° 35′ and 84° 51′ E. The greatest width of the district from east to west is about 152 miles and the greatest length from north to south is about 104 miles, the area according to the figures furnished by the Surveyor-General being 8,626 Sq. miles (22,341 sq. Kms.). There is a little difference between this and the area-figures furnished by the State Survey Department. According to the latter source, the area of the district is 8,493 Sq. miles (21996.87 Sq. Kms.). Obviously because of improvements in estimation the area figures furnished by the Surveyor General show some variation from Census to Census e.g., the area of Surguja district (i.e., of the three constituent ex-feudatory states) in 1931 is found to be 8,592 Sq. miles and 8613 Sq. miles in 1941 and 1951.

Surguja district is one of the 'recent' districts of the State in the sense that it was constituted in 1951 subsequent to the merger of the erstwhile feudatory states-Surguja, Chang Bhakhar and Korea. The biggest of these Surguja has given its name to the district. The etymology of the term Surguja is obscure though according to some people it might have come from two words *sur* and *gunja* meaning 'land where the gods revelled'. Anyway, there is no place in the district with this name.

Till 1905 the three constituent erstwhile feudatory states Surguja, Chang Bhakhar and Korea were, alongwith Udaipur and Jashpur, included in the Chhota Nagpur states of Bengal. In that year rearrangement of territorial administration was effected between Bengal and Central Provinces, according to which five Oriya states-Bamra, Rairakhol, Patna, Sonpur and Kalahandi were transferred to Bengal receiving in return the aforementioned five states of the Chhota Nagpur Agency.

The district is bounded on the north by Mirzapur district (U.P.) and Sidhi district, on the east by Palamau district (Bihar), on the south by Raigarh and Bilaspur districts and on the west by Shahdol district. In its general shape on the map the district looks like the skull of a fox with its mouth towards the west.

Administrative Divisions :

Surguja district is divided into 7 tahsils. In the constitution of these tahsils, the areas of erstwhile feudatory states have not been disturbed-former Chang Bhakhar state constitutes the present Bharatpur tahsil; the former Korea state has been split up into two tahsils Baikunthpur and Manendragarh and the rest of the four tahsils comprise the former Surguja state.

Surguja is one of the most difficultly accessible districts of the State. The only railway line in the district is a branch of the Bilaspur-Katni line of the South-Eastern Railway branching off from it at Anuppur Junction in Shahdol district. The convenient railway station for reaching the district headquarters—Ambikapur—is Manendragarh from where buses ply to Ambikapur via Baikunthpur and Surajpur. The other access to the district is from Raigarh via Gharghoda and Dharamjaigarh. Some basic statistics of the district are given below:—

Name of tahsil	Area in* Sq. mile	Area in* Sq. Kms.	Area in Sq. kms. Rural	Area in Sq. kms. Urban	No. of villages In-habited	No. of villages Uninha-bited	Towns	Population Total	Population Males	Population Females

Ambikapur	196	8,106	976	4	6	8	112	5.12	62.70
Samri	119	..	972	2	3	3	31	5.10	73.44
Surguja District	*116*	*6,507*	*955*	*19*	*29*	*28*	*355*	*5.81*	*55.59*

It may be seen from here that the biggest tahsil-Surajpur—having an area of 2,172 Sq. miles[1] is bigger than 7 districts of the State viz. Bhind, Gwalior, Datia, Tikamgarh, Ratlam, Indore and Narsimhapur. The most difficultly accessible tahsil is Pal whose head-quarters—Ramanujganj—becomes almost inaccessible during monsoon and can only be approached from Bihar. Ambikapur (population 15,240) the district headquarters is situated in the south-eastern part of the district on latitude 23° 7′ N and longitude 83° 12′ E.

Geology :

Metamorphic and igneous rocks like granites, gneisses and schists with their basic intrusives, the dolerite dykes, occur extensively in the eastern regions of the district constituting the hill ranges and the tableland. These rocks, which are the oldest geological formations in the district are overlain in the central lowland region by the carboniferous rocks of the Bisrampur coal fields but again crop out in the higher region to the west of this lowland. The Main-

Excludes forest area.

1 Includes forest area.

pat plateau in the south-east is composed of two different series of formations. Its southern face is composed of granites and gneisses whereas the northern face is composed of sandstone.

To the west of the central lowland region in Baikunthpur and Manendragarh tahsils, the rock-formations are coarse sandstones and coal-bearing series. These rocks are referable to three groups-Talchir Series, Damodar Series (Barakar Group) and Upper Sandstone (possibly Mahadevas). It is in these formations —the Lower Gondwana formations, as they are referred to—that the coal-fields are located. These coal-fields belong to the Chhattisgarh group as distinct from the Satpura group. The coal-fields of the district were surveyed during the later half of the last century and a general account of them may be found in Vol. LIX of the Memoirs of the Geological Survey of India.

The various coal-fields of the district are Tatapani-Ramkola, Jhilmili, Sonhat, Jhagrakhand, Kurasia, Koreagarh, Bisrampur, Bansar, Lakhanpur and Panchbhaini.

The carbon-content in the coals found in the district is from 45.5% to 57.7%. Apart from coal, the only other economical geological deposit is building stone and road-metal. In a paper on the antiquities of Surguja, Colonel Ouslay had mentioned the occurrance of coal, iron, gold, ochre, marble and lime. None of these, except coal, have any economic significance. During the last century an attempt was made to open a lead mine in the central part of the district where some good specimens of lead were found but the enterprise proved a failure.

There is a group of mineral springs at Tatapani (literally meaning hot water) in the northern part of the district bordering on Palamau district of Bihar. The springs bubble up in the middle of small streams of running water and the highest recorded temperature of these is 184° F.

Geography :

Physiographically Surguja district is just a great tableland consisting of numerous hills and plateaus. Except a low-lying basin in southern-central region, the entire district is a continuous stretch of plateau dotted with hills. The eastern part of the district consists of an undulating tableland about 2,500 feet high and continuous with, but slightly higher than, the Chhota Nagpur plateau. From this table land, isolated hill-ranges and the peculiar physiographic formations locally known as *pat* rise to elevations of 3,500-4,000 feet, forming on the north the boundary with Palamau district and blending on the south with the hill-system of Jashpur tract of Raigarh district. In the valley of the Kanhar, there is an abrupt descent of about 900 feet from the tableland of the east to the fairly level country of the district around Ambikapur.

The peculiar *pat* formations consist of big plateauland capped with horizontal strata of Trap rock and are thus comparatively more protected from erosion by the action of rain and wind. The two such prominent physiographic features of the district are the Mainpat and the Jamirpat. The Mainpat is a magnificent tableland 18 miles long and from 6 to 8 miles broad, rising to a height of 3,781feet. This plateau forms the southern boundary of the district with Raigarh district. The Jamirpat is a long winding range, not more than 2 miles wide, forming part of the eastern boundary of the district with Bihar. From Jamirpat isolated hill ranges and high plateaus rise to elevations of 3,500 to 4,000 feet.

Towards the west of Jamirpat and north of Mainpat, the ground assumes the form of low basin through which the Rihand and its tributaries flow. This low-lying region is in the form of an inverted triangle and its base in the north may roughly be formed by drawing a line from Baikunthpur to Partappur through Patna and Jhilmili. The apex of this triangle may be taken to be Lakshamanpur. This fairly level land divides itself into two broad stretches of fertile and closely-cultivated land, one running south towards Udaipur tahsil of Raigarh separating the lofty Mainpat from the wild uplands of Khuria in Jashpur tahsil of Raigarh and the other trending to the west. This latter stretch is more fertile and more closely cultivated.

West of this fertile basin, the terrain again becomes hilly in nature and here, as one goes westwards, three distinct steps may be marked out: the first from Srinagar on the east to the lowlands of Patna and Khargawan, the second from thence to the uplands around Sonhat and the third beyond Sohnat to about the height of 3,370 feet. The average elevation of the two lower 'steps' is 1800 and 2477 feet. Still westwards i.e., in Bharatpur tahsil, the hill ranges take a serpentine sweep from north-east to south-west and rise in occasional peaks to more than

3,000 feet. The northern and southern boundaries of the western region of the district rise into bold cliffs above the undulating tablelands of Sidhi and Shahdol districts.

The highest peak in the district is Mailan (4,024'). Other peaks are Jam (3,827'), Partagharsa (3,804'), Kandadara (3,770') ,Chutai (3,713'), Karo (3,628'), Bamhan (3,505'), Gungru (3,491'), Benda (3,473'), Ghunsa (3,424'), Bhuramurio (3,390'), Bijatili (3,215'), Ambera (3,183'), Murargarh (3,027') and many others which are between 2,000-3,000 feet in elevation.

In general the slope of the district is towards the north and it is in this direction that most of the rivers flow. There are, however, two southward flowing rivers the Hasdo and the Gej. These northerly and southerly rivers form parts of two distinct drainage systems: the northward rivers form the drainage system of the Son whereas the southward rivers form part of the drainage system of the Mahanadi. The principal rivers of the district are the Kanhar, the Rihand, the Morna, the Mahan, the Geur, the Gager, the Gopath, the Neur and the Banas and the southward flowing the Hasdo and Gej.

The Kanhar rises in Jashpur tahsil of Raigarh district and flowing northwards, forms the eastern boundary of the district. The Rihand, also referred to as the Rend, rises in the region south-west of the Mainpat plateau and flows north roughly through the central part of the district. Its principal tributaries are the Mahan,the Geur, the Gager and the Morna. The Gopath rises in the Sonhat plateau and flows north till it reaches the northern boundary of the district, where it turns to the west for a little distance and then again assumes a northerly course. Its principal tributary is the Neur which rises in the hilly regions of Bharatpur tahsil. The Banas rises in the central hilly region of Bharatpur tahsil flowing roughly west-north-west and then consitituting part of the western boundary of the district with Shahdol district. The Hasdo rises in the eastern part of the Sonhat plateau and flows southwards, into Bilaspur district. Its tributaries are the Gej, the Jhink and the Atem. The Gej rises in the first hilly, 'step' west of the central lowlands and flows south, forming the boundary of the district for a short while and joins with Hasdo in Bilaspur district. The Mand, another tributary of the Mahanadi, rises in the south-eastern hilly region north-east of the Mainpat plateau and flows south into Raigarh district.

Climate and Rainfall :

High tableland that it is the district is generally cool and the heat even in the hottest of months is not oppressive. May is the hottest month and December is the coldest. The temperature records for 7 years maintained by the meteorological observatory at Ambikapur show that in May, the temperature is about 2° C lower than that of Raigarh and Raipur and approximates nearer to that of Pendra in Bilaspur district. Roughly speaking, the temperature in June in the district is something like that of March in Raipur and Raigarh district. This summer temperature is somewhat lower on the top of Mainpat which may easily be called the summer resort of the district.

The maximum temperature in May ranges from 39° C to 40° C and that in December ranges between 21° 5' C to 25° 5' C. The winter temperature in Ambikapur is easily about 2° C lower than that recorded in the State capital.

The district lies in the heavy rainfall belt of the State and the average rainfall exceeds 55". In the hilly and wooded regions the rainfall is usually more copious.

Flora :

The topography, climate and rainfall of the district are ideally suited for a rich and variegated flora. This is, however, not so and the forest wealth of the district is below expectation. The district lies in the *sal* forest belt and this is the predominant species. It was noted in the beginning of this century that the *sal* trees of the district are generally stunted in growth because of continuous exploitation of resin from them. The *Sal* (*Shorea robusta*) is also known locally as *Sakhua*. Other accompanying species in the forests are *Saja* or *asan* (*Terminalia tomentosa*), *Dhawra* (*Anogeissus latifolia*), *Tendu* (*Diospyros melanoxylon*), *Amla* (*Phyllanthus emblica*), *Bahera* (*Terminalia belerica*), *Harra* (*Terminalia chebula*), *Char* (*Buchanania latifolia*), *Khair* (*Acacia catechu*), *Kauha* (*Terminalia arjuna*), *Palas* (*Butea frondosa*), *Kusum* (*Schleichera trizuga*) and other ususal species.

During the erstwhile feudatory states regime in Surguja, large blocks of forest areas were kept reserved for the chief as hunting reserves. These

blocks contain good forest and fine timber trees. The trees found near village sites are the usual ones.

Fauna :

The district was the home of wild elephants in the past. A *Statistical Account of Bengal Vol. XV* (1877) contains the following mention about Surguja, "wild elephants have lately immigrated into the jungles and *khedda* operations have been carried on with some success by the Manager of the State.' Similarly the Gazetteer of erstwhile Korea state mentions; "Tigers and wild elephants at one time were numerous and committed serious depredations. They caused the desertion of many small villages, but their numbers have now been considerably reduced." About the erstwhile Chang Bhakhar state the Gazetteer states; "The ravages of wild elephants were at one time so serious as to cause the entire abandonment of village-sites till a lagre number were captured but at the present date no wild elephants are to be found in the State." Thus even as early as 1909, wild elephants had started being scarce for in 1877 (*A Statistical Account of Bengal, XV*) wild elephants were reported to be abounding in Chang Bhakhar. There are no wild elephants in Surguja district now.

The district is one of those few areas in the State where bison and wild buffalos are found but these have become very scarce now. Tigers (*Felis tigris*), panthers (*Felis pardus*) and bears (*Malasus*) are commonly met in the forest and hill areas. Other common wild animals are *Sambhar* (*Cervus unicolor*), *Nilgai* (*Bos Elephas tragocamelus*), Ravine deer, (*Gazella bennetti*), Hog deer and Mouse deer.

The Livestock Census, 1961 shows that there were in all 913,628 cattle (cows and bullocks) and 1,078,431 buffalos. It is seen that though the number of buffalos in Surguja district is more than that of Raigarh district, the number of 'males over 3 years used for work only' is less in Surguja than in Raigarh and total number of he-buffalos is less in Surguja whereas the number of she-buffalos is much greater in Surguja than in Raigarh. This indicates that (i) buffalos are not as popular here as in Chhattisgarh as plough cattle and (ii) Surguja district produces larger quantity of milk and milk-products. It appears that she buffalos are retained and he-buffalos exported outside the district.

As compared to other five districts of Raipur and Bilaspur divisions, Surguja district has very few sheep though the number of goats is highest here in Bilaspur Division. The district has the largest number of horses and ponies (16,961) in the State.

History :

The early history of the district is obscure. Because of its hills and forests and lying away from the routes of invading armies, the area now constituting the district escaped the usual turmoil. This tract appears to have been unknown to the Mughal Government. From the remains of extensive rock excavations supposed to be temples and monasteries-discovered in village Harchouka in Bharatpur tahsil, in 1870-71, it appears probable that in early times (i.e. before the Gonds and Kols took over) that part of the district was occupied by a civilized race. Who these people were and what the period of their stay was remains unknown.

It is likely that the district was divided up into many petty principalities each under its own chief who were constantly at war with one another, In his *A Statistical Account of Bengal* (*Vol. XV*,1877) Hunter describes the history of erstwhile Surguja state as follows: "For many generations, however, the Kol and Gond territories of eastern and western Surguja have been united under the present reigning family, who call themselves Raksel Rajputs. According to a local tradition in Palamau, the Raksel Rajputs governed that part of the country upto 1613 A. D., when they were ousted by the Cheros in a strange fashion. In 1612, Bhagwant Rai, the head of the Chero tribe, then a fugitive from Chainpur, took service with a large body of Chero retainers under Man Singh, the Raksel Raja of Palamau, intending, on the first opportnnity, to seize the supreme power. In the following year, Man Singh went to Surguja to celebrate the marriage of his son with the daughter of the Surguja Chief. In his absence, Bhagwant Rai rose with all his followers, murdered Mansingh's family and made himself the first Chero Raja of Palamau. Man singh made no attempt to regain his kingdom, but in his turn murdered the Surguja Chief and took possession of the Raj. This was the origin of the present Raksel dynasty. As against this the *Chhattisgarh Feudatory States Gazetteer* (1909) states: "These petty chiefs carried on internecine wars one with another and finally some 1700 years ago were

attacked by a Raksel Rajput from Kundri in Palamau district who invaded thei territories and reduced them to subjection". If the latter source is to be taken for granted the Raksel dynasty started in Surguja in about 200 A. D. which appears to be very unlikely. The account given in the *Feudatory States Gazetteer* may be based on traditions kept by the Raksel dynasty extended to the south as far as the banks of the Mahanadi. Be that as it may, it may be likely that in early times the Chief of Surguja exercised a feudal authority reaching beyond the limits of erstwhile Surguja State. At one time the Surguja Chief was overlord of other neighbouring States Jashpur, Udaipur, Korea and Chang Bhakhar.

The erstwhile Korea state is said to have originally belonged to a Kol Chief who lived in Koreagarh, a hill 6 miles to the west of Chirmi, on which ruins of a tank and blocks of stones may still be seen. This Kol Chief was ousted by Raja Dharmal Shah who was passing through the State on his return from Jagannathpuri.

Authentic history of the district commences about the year 1758, when a Maratha army in progress to the Ganges overran the eastern half of the district (i.e. Surguja State) and compelled the Chief to acknowledge himself a tributary of the Berar Government. But beyond this and imposing a heavy fine they did not do anything else. In 1792 the attention of the British Government was directed towards Surguja because of the Surguja Chief's annexation of a pargana of Chhota Nagpur and subsequently aiding a rebellion in Palamau against the British. This led to an expedition into Surguja by one Colonel Jones. A treaty was however effected later between the British and the Berar Government i.e., the Marathas. But after the British withdrew there was some disorder which again prompted the British to interfere. Things, however, did not improve much and lawless state prevailed until 1818. In this year the three erstwhile feudatory states,which constitute the present district, were ceded to the British Government under the provisional agreemennt with Appa Sahib Bhonsla. The British force under Captain Sinnock restored order and Amar Singh was declared Raja of Surguja.

Between this period and 1951 when the three feudatory states merged with Madhya Pradesh there was nothing of any historical importance to be mentioned here.

Archaeology

As pointed out earlier, there are some signs that prior to the advent of Gonds and Kols, this part of the country was inhabited by a more civilized race. At village Harchouka situated on the Muwahi river, there are extensive rock-excavations supposed to be temples. These were discovered in 1870-71. There is a cave known as *Sitamarhi* near village Ghogra situated on Dauna river. The cave contains two monoliths said to be Mahadeo. Similar *Sitamarhis* are found in the jungles of Kanjia and Chhataunda. On the Koreagarh hill, 6 miles west of Chirmi, remains of a tank and some stone blocks which probably once formed dwellings, are seen.

The most striking of the archaeological sites are the temples of the Ramgarh hill. This hill is a rectangular mass of a sandstone, rising abruptly from the plains about 8 miles to the west of village Lakhanpur and 39 miles away from Ambikapur. There is a natural tunnel here known as *Hathpor* or *Hathipol* and near this there are two caves known as *Sita-bengara* and *Jogi Madha*. In each of these caves there is an inscription in Pali characters belonging to about 2nd century B. C. These inscriptions probably indicate that these caves were used as pleasure-resorts for poets' gatherings and for dance perfomances. In the hill, there is a remnant of a very old stone gateway, the lintal of which is sculptured with an image of God Ganesha. A little higher up there is another gateway, which, instead of flat lintal, contains an arch. On the top of the hill the nucleus of what once might have been a big temple is seen consisting of some statues which Dalton identified as Vishnu and his wives and Ball as Laxman, Balsundari, Janki and Janak.

About the two caves—*Sita begnara* and *Jogi Madha*, there is a tradition as mentioned by Hunter. It is said that it was here that Rama halted with Sita and Laxman during his wanderings and it was from the larger cave that Sita was kidnapped by Ravana. The two deep groovs in the rock in front of the larger cave is said to be the portion of line Laxman drew for Sita's protection,

About 6 miles east of the Ramgarh hill on the bank of the Kehar, there are the remains of about

12 temples. In 1864, Colonel Dalton got some excavation made on the banks of the Kehar and discoverd foundations of three large temples dedicated to Siva and Durga. Most of broken images discovered were believed to be so done by human agency. Close to the temples, there was a stone-faced tank. At Srinidhi 6 miles to the west of these ruins there are remains of another temple of which the dome and part of the vestibule were standing at the time of Dalton's visit.

On the northern boundary, there are ruins of a fort at Juba, 2 miles south-east of Manpura village in Pal tahsil. Some ruins of temples are also seen here. 8 miles north-west of Manpura inscription was found bearing the data 1239 A. D.

Thus, though the early history of the district is not clearly known, these archaeological remains point to the possibility of this area having an advanced civilization prior to the advent of Gonds and Kols.

The Population and the People :

Though the second largest district in size, Surguja is the 7th in respect of population and because of this disparity, the district is sparsely populated with a density of 122 persons per sq. mile as against the State density of 190. The district had a population of 405,672 persons in 1901. The percentage decade variations of the population are given below : for comparison State and Division figures have also been furnished :

Region	1901-11	1911-21	1921-31	1931-41	1941-51	1951-61
Madhya Pradesh	+15.30	—1.38	+11.39	+12.34	+ 8.67	+24.17
Bilaspur Division	+27.28	+3.48	+18.29	+13.15	+10.39	+19.83
Surguja District	+27.01	—7.09	+28.71	+13.59	+17.45	+26.12

The percentage decade variation of 27.01 during 1901-11 in the population of the district is a little lower than the division average but is more than 75% higher than the population increase in the State as a whole. This large increase was to a large extent due to, apart from natural growth and immigration, increased accuracy in enumeration. The following mention is made about the 5 feudatory states of the Chhota Nagpur Division (i.e. Chang Bhakhar, Korea, Surguja, Jashpur and Udaipur) in the Census Report of 1911 (Vol.X, Pt. I, p.44).

"The large increase of 29 per cent in these states which varies from 77 per cent in Korea to 25 per cent in Chang Bhakhar is in some part admittedly due to improvement in enumeration. At the same time the decade has been extremely favourable, the aboriginal inhabitants are naturally prolific and the states have profited by the immigration from neighbouring states to the north and east of traders, cultivators and graziers. Beyond these somewhat vague generalisations it is almost impossible to go. Even in the case of the two states of Korea and Udaipur which have been under management the Superintendents have little to say in comment on the large rise in population, and it would be useless to attempt to form any estimate as to the value of the three factors of increased accuracy, natural growth of population and immigration".

It appears, therefore, that increased accuracy of enumeration in the erstwhile feudaroty states exaggerated the real expansion of population due to immigration and natural growth during 1901-11.

During the decade 1911-21, the population of Surguja district decreased by 7.09 per cent whereas the division population registered an increase. Though there was a decrease of 1.38% in the overall State population, the decrease in the district population was more marked. One cause of this decrease may lie in the scarcity conditions, fulminating influenza epidemic and plague in the period preceding the enumeration of 1921. Another cause connected with the above was the preponderance of deaths over births during 1911-20; there were 57,370 births and 60,268 deaths. Added to this was emigration from Surguja. 4,000 Gonds from the Surguja state came into Mungeli and Katghora tahsil of Bilaspur and permanently settled there (Vol.X, Pt. I p.6). It is also seen that in 1921 there were 45,073 emigrants from the district as against 34,149 in 1911. These factors may

have been responsible for causing the sharp decrease of 7.09% during 1911-1921.

During 1921-31, the population of the district recorded a high increase of more than two-and-a-half times more than the percentage increase in the State and more than one-and-a-half times the increase in Bilaspur Division. This high increase was facilitated, as everywhere else, by favourable conditions. The population increase in the three erstwhile states Chang Bhakhar, Korea and Surguja was 6.9,14.8 and 32.2 per cent respectively. Vital statistics during 1921-30 show that there were 111,158 births and 72,325 deaths and thus there was an excess of 38,833 of births over deaths, by itself accounting for 8.1 per cent growth in the population. Added to this was the immigration and Census Report of 1931 states (Vol. XII Pt. I, p. 98). "It must be mentioned that three of the Chhota Nagpur States Korea, Chang Bhakhar and Surguja form part of the northern frontier of the province and the figures of immigration to the States from the United Provinces (4,789 males and 3,558 females)and Rewa State(9,286 males and 8,049 females) are of interest. In each case males are in excess and the indication is that a lagre proportion of the migrants come to obtain employment, or for purposes of trade and cultivation". Whereas there was sufficient room for expansion by immigration, emigration of any kind was strongly opposed by the administration of erstwhile Surguja State. These factors may have contributed to the high increase of population in the district during 1921-31

During the decade 1931-41, the population of the district increased almost in the same proportion as that of the Division and only little more than that of the State. The decade 1931-41 was fairly normal except towards the end when there were partial failures of crop and the outbreak of the World War. In the decade 1941-51, the population increase in the district again outmatched the growth trend in the State and the Division and again the reason of this appears to be more accurate enumeration, immigration and high birth-rate. Writing about, 'the backward districts of the east Madhya Pradesh Divisions the Census Superintendent of 1951 states :"The backward districts are a problem in themselves. These are sparsely populated areas and naturally therefore there is ample room for expansion. Secondly, the geographical conditions, means of communications and almost utter illiteracy in these areas tend to encourage under-enumeration during the Censuses and with increased efforts better records are obtained at each successive Census. The abnormal growth is, therefore, partly due to the probable under-enumeration in the past."

In 1951-61, the district recorded the high growth of 26.12%, second highest inter-censal growth in this century; 1901-11 growth was 27.01%. This high growth rate is on the lines of the general pattern and the State population growth has been 24.17%. It is, however, seen that the growth in Surguja district has been the highest in Bilaspur Division. Apart from greater accuracy in enumeration, this high growth rate has been due to a cumulative effect of many schemes undertaken during the decade like Malaria Eradication Programme, increasing medical facilities, increase in means of communication, development of coal-mines and so on. It is also observed that tribal areas have been showing large increases throughout the last six decades. The high growth may also be due to immigration as is faintly reflected in the Migration Tables. Taking only the contiguous districts of the State into considerarion, the following picture comes out:—

No. of persons born in Surguja District and enumerated in		No. of persons enumerated in Surguja whose birth place is in	
District	No. of persons	District	No. of persons
Bilaspur	6,672	Bilaspur	9,993
Raigarh	13,385	Raigarh	11,722
Shahdol	4,469	Shahdol	7,432
Sidhi	2,026	Sidhi	8,402
Total	*26,552*	*Total*	*37,549*

Density of Population:—Notwithstanding the high growth of population, Surguja is the second most sparsely populated district in the State, (the most sparsely populated district being Bastar) and the density of population i.e. number of persons per square mile is 122 as against 194 for the Division and 190 for the State. Bharatupur tahsil of the district is the most sparsely populated tahsil of the State with a population density of only 24. During the last 90 years or so, the density of population in Bharatpur tahsil (former Chang Bhakhar State) has always been very low and there does not appear to have been any

substantial change in the population density of this tahsil during the last 60 years. The erstwhile States of Surguja and Korea (i.e., the rest 6 tahsils) have, however, registered continuous rise. This is shown in the table belows:—

Former Status	Present Status	Density of population per Sq. mile							
		1872	1891	1901	1911	1921	1931	1951	1961
Chang Bhakhar State	Bharatpur Tahsil	10	20	21.5	27	24	26	20	24
Korea State	Baikunthpur Tahsil Manendragarh Tahsil	13	22	21	38	49	56	117	167
Surguja State	Surajpur Tahsil Pal Tahsil Ambikapur Tahsil Samri Tahsil	30	53	57	71	62	83	110	133

The tahsilwise density of population in 1951 and 1961 has been as below :

Bharatpur (20; 24), Baikunthpur (135; 166), Surajpur (108; 125); Pal (67; 77), Manendragarh (105;168), Ambikapur (150; 193) and Samri (95; 119).

Whereas other areas of the district have room for expansion and development in respect of cultivation and mineral resources Bharatpur tahsil is just a "tangled and dense mass of hills, ravines and plateau", offering practically no incentive to growth of population by immigration

Rural-Urban Population--Villages and Towns:

In 1961, the proportion of rural urban population in Surguja district is 95.8 : 4.2 . There are in all 2,397 inhabited villages and 6 towns in the district. Looking to the size and the character of the population (an appreciable segment of which is tribal) the number of uninhabited villages is very small—44 in number. There are two towns in the district with a population of less than 5,000 and 1 village with a population of more than 5,000 (Kurasia Colliery Chirmiri 8,194). 71.25% of the villages belong to what may be called as 'small sized' group i.e., those having less than 500 population and 93.82% of villages come in the category of villages having population upto 1,000. Below is shown the variation in the percentages of villages according to population size.

Class of Villages according to population	Percentage of no. of villages in this class to total no. of villages in	
	1951	1961
Less than 500	81.44	71.25
500—999	15.47	22.57
1,000—1,999	2.88	5.68
2,000—4,999	0.17	0.46
5,000—9,999	0.04	0.04

As the rural population increases (the 1951-61 increase was 24.00%), it is to be expected that 'there will be normally a decrease in the proportion of the smallest villages because, in the first place, the total number of villages changes very little and, in the second place, many of the largest among the smaller villages of the previous Census will, at the succeeding Census, move into the next higher range. Small-size villages i.e., those having population less than 500, have decreased in 1951-61 by 12.5% and the increases in the next four classes shown above have been 45.9, 97.2 and 170.5 and 0.0 per cent respectively. The increases in the third and fourth classes have become exaggerated since the number of villages in those categories are small. Surguja district has the largest proportion of villages of population range below 500 in Bilaspur Division (66.63% for Division) though the proportion of such villages in the district is less than the State percentage (75.26%).

There were no towns in Surguja district upto 1931 Census. The classification of towns in 1941, 1951 and 1961 is shown below:—

Name of Town	Classification of Town in 1941	1951	1961
Baikunthpur	..	VI	VI
Ramanujganj	..	VI	VI
Manendragarh	V	V	V
North Jhagrakhand Colliery	V	..	V
Chirmiri Colliery	IV	..	V
Ambikapur	V	IV	IV

(Class IV—Population range 10,000—19,999;
Class V—5,000—9,999 and Class VI—Less than 5,000)

During the decade 1941-51 the urban population of the district decreased by 26.00% because the two towns of class IV and V became declassified in 1951 while two class VI towns were treated as towns for the first time. This classification of bigger towns and addition instead of small towns is probably responsible for the decrease in urban population in 1941-51. The increase of 105.91% in the urban population of the district in 1961 is due to reinclusion of the two colliery areas as towns.

Age and Sex-Composition : The age and sex-structure of the population is presented in the table below; corresponding data for the State is also given for comparison—

Distribution of 100 persons of all ages into age-groups by sex

Age-group	Percentage of population in the age-group					
	Surguja District			M. P. State		
	Persons	Males	Females	Persons	Males	Females
0— 4	15.9	15.3	16.6	16.4	16.0	16.7
5— 9	14.4	14.1	14.8	14.3	14.2	14.4
10—14	10.0	10.6	9.4	10.1	10.7	9.5
0—14	*40.3*	*40.0*	*40.8*	*40.8*	*40.9*	*40.6*
15—19	7.2	7.1	7.4	7.9	8.0	7.8
20—24	8.5	7.6	9.3	8.6	8.1	9.1
25—29	9.9	10.2	9.6	8.8	8.9	8.7
30—34	7.9	8.3	7.4	7.3	7.6	7.1
15—34	*33.5*	*33.2*	*33.7*	*32.6*	*32.6*	*32.7*
35—39	6.0	6.4	5.5	5.8	6.0	5.6
40—44	5.1	5.3	4.9	5.3	5.3	5.3
45—49	4.1	4.3	3.9	4.2	4.4	4.1
50—54	3.8	4.0	3.6	4.0	4.1	3.9
55—59	2.0	2.0	1.9	2.1	2.1	2.0
35—59	*21.0*	*22.0*	*19.8*	*21.4*	*21.9*	*20.9*
60—64	2.5	2.4	2.5	2.4	2·2	2.5
65—69	0.8	0.8	0.9	0.9	0.9	1.0
70+	1.9	1.5	2.2	1.8	1.5	2.2
60+	*5.2*	*4.7*	*5.6*	*5.1*	*4.6*	*5.7*
Age not stated	0.0	0.1	0.1	0.1	0.0	0.1

The age-data given above are based on ungraduated ages and though the quinquennial groupings adopted suppress to some extent the distorting effects of age-heapings at multiples of 5, still the data is not fit enough to permit analysis by quinquennial age-groups unless corrected or smoothed. It would therefore, be safer to confine the scrutiny to the broad age-groups 0-14, 15-34, 35-59 and 60+ which may

also be roughly described as children, young persons, middle-aged persons and old persons.

Broad age-groupwise distribution of the population of Surguja district follows the same trend as in case of the State i. e., the proportion of children (0-14 years) is the highest followed by that of young persons (15-34 years), middle-aged persons (35-59 years) and old persons (60+ years). But comparing the respective proportions in these age-groups in the district population vis-a-vis that in the State, it is seen that out of every 1,000 persons the district has 5 persons less in the age-group 0-14 years, 9 persons more in the age-group 15-34 years, again 4 persons less in the age-group 35-59 and 1 persons more in the age-group 60+. Taking the age-group 0-34 years which will become age group 10-44 in 1971,the district has, however,4 persons more than what they are in the State, and, if only the age-group 5-34 years is considered, the district has 9 per 1,000 persons more than in the State. This age-group 5-34 years would become the fertile age-group after 10 years and the trend therefore suggests probabilities of higher growth as compared to the State population as a whole. The proportion of females especially in the age-group 15-34 is also higher in the district by 13 per 1,000. This also suggests a higher growth rate of the population during the next decade as compared to the State.

Bilaspur district in the south of Surguja district which is the most thickly populated district in the State, presents less hopeful picture as far as population growth is concerned. In Bilaspur district, the proportion of persons in the lower age-groups up to 34 years is much less than in the State and 711 per 1,000 as against 738 of Surguja district and 734 of the State. As compared to the State and the most populous district of the State, Surguja district has more *youthful* population and its prospects of greater growth during coming years are brighter. In the age-group 40+ the district has 5 persons per 1,000 less than in the State. This age-group, in the coming decade, would become economically inactive or less active : its smaller proportion in the district also speaks of its *youthful* character and more economically active populatioin

Changes in Age-distribution since 1951 :

Changes in the age-composition of a population, if measured satisfactorily, provide indications of the likely trends of its growth. In the table inset below is shown the percentage distribution of 100 persons in the district into four broad age-groups in 1951 and 1961. The data for 1951, is, however, based on a 10% sample of the population and in making comparison with the 1961 data which is based on whole population, it is assumed that the 1951 sample represented the universe.

Precentage distribution of 100 persons in 1951 and 1961 into broad age-groups

Age-group	1951			1961		
	P	M	F	P	M	F
0—14	40.5	40.9	40.0	40.3	40.0	40.8
15—34	31.7	31.2	32.3	33.5	33.2	33.7
35—64	25.6	26.1	25.1	23.5	24.4	22.3
65+	2.2	1.8	2.6	2.7	2,3	3.1
Age not stated	0,0	0.0	0.0	0.0	0.1	0.1

As seen from the above there is a decrease by 0.2 per cent in the age-group 0-14 years whereas an increase by 1.8 per cent in the age-group 15-34 years. In the age-group 35-64 years, there is a decrease of 2.1 per cent and in the case of older persons (i.e. age-group 65+) there is a small increase of 0.5 per cent.

This table also shows that in the age-group 0-14 years, the proportion of males has decreased from 40.9 to 40.0 whereas that of females has increased from 40.0 to 40.8: the proportions of males and females in this age-group during 1951-61 have become inverse. On the one hand,it suggests that there is a tendency for the sex-ratio to increase with the birth of more female children, whereas on the other hand it suggests a growing population because about half of this age-group becomes reproductive age-group by the next Census. The same tendency is also indicated by the increased proportion of females in the age-group 15-34, though here the proportion of males has also increased. The increase of proportions of males and females in the age-group 15-34 is very significant because it suggests increased birth-rate during the coming decade. In the higher age-groups, the increased proportion in the age-group 65+ is again indicative of greater longevity imparted possibly because of increased medical facilities.

Compared with the other two districts of Bilaspur division-Bilaspur and Raigarh, Surguja has a greater proportion of females in the age-groups 0-14 and 15-34. This is also true for the proportion of males in these age-groups. It thus appears likely that the population of Surguja district may increase at a faster rate than that of Bilaspur and Raigarh during the coming decade.

Sex-ratio and Sex Distribution by Age :

The changes in the proportion of sexes in Surguja district during 1901-61 are shown below:

	1961	1951	1941	1931	1921	1911	1901
Total Population	955	954	950	964	959	966	970
Rural Population	963	957	953	964	959	966	970
Urban Population	807	850	894	..	..	..	..

Surguja district has the least sex-ratio in the eastern Madhya Pradesh. In respect of sex-ratio the district is more alike its northern and western neighbours—Sidhi and Shahdol—than the southern neighbours—Raigarh and Bilaspur. Between 1901 and 1931, the sex-ratio fell from 970 to 964, and then dropping sharply to 950 in 1941 has again shown a tendency towards increase.

This low sex-ratio has been commented upon in the earlier Census Reports. Census Report of 1911 states that none of the factors of infant marriage and enhanced dangers of child-birth "serve to explain the comparative deficiency of women among the primitive aboriginal population of the Chhota Nagpur States. There are no vital statistics available for these States, but a scrutiny of proportions at different age-periods makes it clear that while the proportion of females at birth is above that of other divisions, the ratio declines from about the 15th year of life, so that in the later age-periods there is a marked depletion in the ranks of women. Beyond the fact that the extraordinary fertility of these people may be accompanied by a a more than proportionate death-rate of women in child-birth," no other explanation appeared to be possible. The Report of 1921 stated : "As at last Census, the Chhota Nagpur States present statistics of sex which would appear to be abnormal. The population which inhabits these states consists largely of aborigines, and a preponderance of females might be expected. To judge by the proportion of female infants below one year of age, 992 to 1,000 males, the excess of male over female births must be very small, but the total excess of males over females is the highest in the province except in the Nerbudda Valley division. If we exclude the period from 20-30, when the number of females is artificially swollen as in other divisions by incorrect statements as to age, it is not until the last age-period that the number of females is in excess. A similar phenomenon is to be observed in Bastar, and unless there is something exceptional about the local tribes, who are ethnologically distinct from their neighbours, it is probable that omissions to enumerate women in this wild and sparsely inhabited country are sufficiently numerous to affect the statistics in a manner that would be impossible in more settled tracts." In the 1931 Report, it was pointed out the areas registering high immigration figures generally have lower sex-ratio. But this was not so in case of the Chhota Nagpur states. The suggestion put forth in the 1931 Report was that the distribution of tribes probably has much effect upon the sex-figures of backward tracts. "The principal tribes of the Chhota Nagpur Plateau are Korwas, Bhuinhars, Oraons, and Kawars..... a slight excess of female Korwas is balanced by a similar excess of male Bhuinhars. Kawars show a marked excess of females for the Province but Oraons, the most numerous tribe in Jashpur, show a deficit of 35 females to every thousand males among those following tribal religions and of 24 among Christians. Whether it is in the climate and situation of the tracts in which these tribes live or the physical characteristics of the tribes themselves which affects the figures is a matter which merits separate research".

In 1961, the sex-ratio in the tahsils of the district is as follows:—Bharatpur (922), Baikunth-Pur (940), Surajpur (987), Pal (970), Manendragarh (803), Ambikapur (976) and Samri (972). Thus, the lowest sex-ratio in the district obtains in Manendragarh tahsil and this may possibly be due to two factors:—

(1) This tahsil has two colliery areas-North Jhagrakhand and Chirmiri (Sex-ratios 709 and 791).

(2) This tahsil has the largest urban population.

It is a well-known fact that urbanization and industrialization generally go with a change in the sex-ratio adversely to the females. These factors only partly account for the low sex-ratio, in Manendragarh tahsil for even in the rural areas of this tahsil, the sex-ratio is only 843. Therefore as commented on in the 1931 Census Report, this subject calls for some research before any definite conclusion could be put forward.

A discussion of the sex-ratio would, however, be incomplete if no consideration is given to the ratios in different age-groups. This would also enable us to find out if the remarks of the Census Superintendent (1911), quoted earlier, apply to this day. For this purpose it would be useful to compare the sex-ratio in different age-groups in this district with the other two districts of the division.

Age group	Sex-ratio (i.e. number of females per 1,000 males)			
	Madhya Pradesh	Surguja	Bilaspur	Raigarh
0— 4	966	1,042	1,021	1,041
5— 9	966	1,000	1,038	1,014
10—14	847	846	858	869
0—14	*974*	*976*	*985*	*985*
15—19	929	1,000	984	948
20—24	1,069	1,168	1,209	1,241
25—29	939	898	989	1,004
30—34	897	843	978	990
15—34	*959*	*968*	*1,037*	*1,040*
35—39	878	817	927	881
40—44	950	877	1,069	946
45—49	886	857	993	1,013
50—54	908	862	981	920
55—59	903	907	1,091	1,139
35—59	*905*	*856*	*999*	*952*
60—64	1,080	1,016	1,253	1,157
65—69	1,157	1,173	1,326	1,384
70+	1,373	1,414	1,523	1,453
60+	*1,190*	*1,170*	*1,362*	*1,298*
Age not stated	898	829	765	824
Sex ratio all ages	953	955	1,024	1,010

In overall picture, the sex-ratio pattern of the district more resembles the State pattern rather than the pattern exhibited by the other two districts of the division. Some salient variations from the State pattern are—

(i) As compared to the State, the district has a larger number of female children.

(ii) The sex-ratio in the age-group 15-24 is appreciably higher in the district as compared to the State.

(iii) The sex-ratio in the age-group 25-44 is very low in the district as compared to the State.

These features can be viewed in the light of the observations referred to earlier made in 1911 Census Report. It is clear from the table given above that there is a preponderance of female children at birth but the depletion in sex-ratio starts, not from the age-group 15 onwards but in 25-44. What exact cause of this depletion is cannot be stated but the obvious cause appears to be large proportion of death in child-birth. In the age-group 15-19, the district actually has a greater sex-ratio than the State figures and figures of Bilaspur and Raigarh districts.

Comparison of the figures of sex-ratios of this district with its neighbouring districts yields another important result. Whereas the proportion of females at birth is much higher in Surguja than in Bilaspur and equal to that in Raigarh, the sex-ratio falls in the very next age-group —5-9, which indicates that though their proportion is higher at birth, the chances of survival of females are poor in Surguja district and a large proportion of female infant mortality is suggested. This is again a point which may need a special study.

As compared to Bilaspur and Raigarh districts, the sex-ratio in the age-groups beyond 20 is much less in Surguja. In the higher age-groups (i.e 60+) also the proportion of females is not as much in the district as it is in Bilaspur and Raigarh.

Religion :

Hindus form the great majority in the population of the district. Next in numerical importance are the Muslims. The proportions of followers of various religions in Surguja district are : Hindu (97.34%), Muslims (1.66%), Christians (0.85%), Sikhs (0.10%), Jains (0.04%) and others (0.01%). A comparison with the statistics of 1951 shows that the proportion of Hindus has decreased a little whereas that of other religions has gone up.

	Proportion of				
Period	Hindus	Muslims	Christians	Jains	Sikhs
1951	98.57	1.29	0.07	0.02	0.02
1961	97.34	1.66	0.85	0.04	0.10

There has been a significant increase in the number of Christians; in actual numbers the increase during 1951-61 has been from 545 (301 Males, 244 Females) to 8,785 (4,531 males, 4,254 females). This high increase is a direct impact of vigorous Christian missionery activities in the district.

Mother tongue :

There are in all 61 languages and dialects spoken in the district. The percentage of speakers of the important languages/dialects to the total population is —Hindi (77.44%), Kurukh/Oraon (9.58), Chhattisgarhi (6.69%), Korku (1.45%), Urdu (0.74%), Bengali (0.76%) and Korwa (0.67%). Actually speaking, the proportion of persons speaking the Chhattisgarhi dialect is much more than what is reflected in the statistics. This Chhattisgarhi dialect of Surguja district is a little different from that spoken in Bilaspur and Raipur. As is well-known the home of pure Chhattisgarhi is the districts of Raipur and Bilaspur. As one goes north, the dialect gradually merges more and more into the form of Bhojpuri spoken in Chhota Nagpur. In Surguja district and in the adjoining parts of Raigarh district, the Chhattisgarhi spoken can be distinguished as a true sub-dialect based in the main on Chhattisgarhi but possessing many of the characters of Bhojpuri of Chhota Nagpur. To be more correct, the Chhattisgarhi of Surguja district may be called Surgujia. In the present Census, however, separate returns have come for Surgujia (1,918 speakers) and Chhattisgarhi (69,334 speakers): both of these are one and the same dialect.

The Chhattisgarhi dialect of Surguja differs from the standard Chhattisgarhi in the following principal respects—

1. *Pronunciation :*

There is some tendency to pronounce a final or unaccented short *i* in the preceding syllable. There are many examples of this e.g. *mainse* for *manise*, a man; *bait* for *bati*, having divided; *kuid* for *kudi*, having run, and *kair* for *kare* in *kair-ahau*, I have done. There is the same tendency to contraction of the present definite tense which prevails in standard Chhattisgarhi, as in *rakhthe*, they place and *Kathe* for *kahat he*, he says.

2. *Nouns*:

Instead of *ka*, we have *ke* for the sign of the dative-accusative, as in *oke*, to him. The sign of the genitive is sometimes as in Bhojpuri of Chhota Nagpur e.g. *kar* instead of *ke*, as in *mainse-kar*, of a man, *muluk-kar* of the country.

The nasal is often omitted in the locative postposition *man*, so that we have *ma*. We also find the Bhojpuri locative in *e* which is used indifferently as an instrumental, or as a locative, as in *Bhukha*, by hunger; *ghare*, in the house; *pithe*, on the back.

3. *Pronouns :*

'We' is *hame-man*, with a long *a* in the first syllable. So also the word for 'own' is *apan* with a similar prolongation of the same syllable.

4. *Verbs :*

The same tendency to lengthen the first syllable is seen in the verb substantive, the present tense of which is taken bodily from the Chhota Nagpur dialect, with a lengthening of the initial *a* as in *ahau*, I am; *ahe*, he is; *ahai*, they are. The finite verb is usually conjugated as in standard Chhattisgarhi, but there are isolated forms from Chhota Nagpur dialect as *karlo*, I did; *hoal* for *hoe-la*, it becomes and *karek-lagin* they began to make.

Scheduled Castes and Scheduled Tribes :

Surguja is the fourth biggest district in the State in respect of proportion of scheduled tribes and 55.59% of its population consists of scheduled tribes: the three preceding districts in this respect are Jhabua (48.72%), Bastar (72.27%) and Mandla (61.81%). The proportion of scheduled castes to total population is 5.81% . The proportion of scheduled castes/tribes in rural and urban areas and in tahsils is as under:—

	Percentage of			
	Scheduled Castes		Scheduled Tribes	
	M	F	M	F
Surguja District				
Rural	5.62	5.93	56.78	58.43
Urban	6.83	6.73	11.16	9.17

Tahsil	Percentage of Scheduled Castes	Percentage of Scheduled Trlbes
Ambikapur	5.12	62.70
Manendragarh	7.12	46.99
Bharatpur	15.21	55.30
Baikunthpur	7.31	43.80
Samri	5.10	73.44
Pal	5.10	60.20
Surajpur	5.14	47.13

According to the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956 there are 15 castes (including their synonymous groups) which have been treated as scheduled castes in the district and 32 tribes (including their sub-tribes and synonymous groups) which are scheduled in the district. The proportions of scheduled castes and scheduled tribes to total population of the district in 1951 were 0.95% and 46.2% respectively. While comparing the 1951 and 1961 figures of scheduled castes and scheduled tribes it may be remembered that in 1951 the enumeration of these castes and tribes was done on the basis of the Constitution Scheduled castes and Scheduled Tribes) Order, 1950 whereas in 1961, the enumeration of scheduled castes/tribes was done strictly according to the Modification Order, 1956, referred to earlier.

The numerically important scheduled castes of the district are-Chamar (27,882), Ghasia (17,562), Basor (4,632), Chikwa (3,358) and Rohidas (1,119).

The scheduled tribes which are numerically important are-Gond (2,22,278), Oraon (1,06,186), Kawar (92,132), Nagesia (28,172), Korwa (20,414),Khairwar (19,460),Pando (18,707), Kodaku or Koraku (14,768), Majhwar (10,096), Agaria (9,552), Baiga (7,480) and Bhuinhar (7,713).

The people:

Ethnically the eastern part of the district is similar to Chhota Nagpur plateau whereas the western part is akin to Shahdol, Sidhi and Bilaspur districts. Describing the ethnic groups in the erstwhile Surguja state, Hunter states in his *A Statistical Account of Bengal, Vol.XVII:* "It is a difficult matter to determine what section of the existing population of Surguja is descended from the earliest settlers in the State. Colonel Dalton, however, is of opinion that the first settlers either belonged to, or were absorbed into, the Kolarian tribes. During the period of Kol ascendancy the Aryans appeared, coming probably at first as propagandist and colonists rather than as invaders. But whatever may have been their position, they exercised a strong influence over the religion, habits and language of the earlier inhabitants; and thus it is that the Kolarian tribes of Surguja, with the exception of those who have isolated themselves in mountain fastnesses, are more or less Hinduized, and speak a rude dialect of Hindi. At a later period the Gonds invaded the country, and settling in the lowland of western Surguja, enslaved or drove out the Kol population".

Gonds:— The Gonds are by far the most numerous of the scheduled tribes of the district. They are believed to have come here as a conquering race after the break-up of the Gond Kingdom in the Central Madhya Pradesh, The Gonds of Surguja are principally cultivators and a small proportion of them are agricultural labourers. More than 90% of the working population of the tribe in rural areas is engaged in agriculture (cultivation and agricultural labour) among males 85% of the workers are engaged as cultivators and 8.9% as agricultural labour; among females 85.7% of the workers are engaged as cultivators and 11.8% as agricultural labour. The Gonds of the district are also sometimes referred to as *kisan* (agriculturist) by other tribal groups. The percentage

of literacy in the tribe is still very low; 90.6% males and 99.2% of females in the rural areas and 70.4% males and 95.7% of females in urban areas are illiterate.

Oraon:— Oraon are the second most preponderant scheduled tribe and constitute 18.43% of the scheduled tribe population of the district. The various names by which they are known are Oraon, Uraon, Kurukh, Dhanka, Dhangar, Kuda and Kisan. All these terms in some way or another mean cultivator or farm-servant: Oraon and its variant Orao means a farm-servant and so does Dhangar; Kuda means a digger and Kisan means a cultivator. The Oraons have no proper sub-castes, but the Kudas, having a distinctive name and occupation, sometimes regard themselves as separate bodies and decline intermarriage with other Oraons. Colonel Dalton has stated about them: "The oraons, if not the most virtuous, are the most cheerful of the human race.....I believe they relish work if the taskmaster be not over-exacting.....The Oraon youths, though with features very far from being in accordance with the statutes of beauty, are of a singularly pleasing class, their faces beaming with animation and good humour".

In 1931, there were no Christian Oraons in Surguja district. Now 5.1% of them have returned Christianity as their religion. The position with regard to literacy is slightly better in their case than in the case of Gonds: 89.1% of male and 99.1% of females in the rural areas and 49.2% of males and 78.5% of females in the urban are illiterate. As referred to earlier, the name of the tribe denotes occupation of farm servant. The present statistics, however, show that the Oraons are principally cultivators : Of the total workers 89.7% males and 90.3% females in the rural areas and 30.6% of males and 17.9% of females in the urban areas are cultivators; 5.6% of males and 4.9% of females in the rural areas and 28.9% of males and 56.6% of females in the urban areas are agricultural labourers. 21.0% of males and 20.7% females in the urban areas are engaged in other services.

Kawar:—In the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order* 1956, the various synonymous groups of this tribe are Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar and Chattri, and the population of these groups in 1961 is as below: Kanwar (68,935), Kaur (304), Cherwa (22,893). The Kawars trace their origin from the Kaurvas of the Mahabharata. They have actually speaking, eight endogamous divisions-Tanwar, Kamalbanshi, Paikara, Dudh Kawar, Rathia, Chanti, Cherwa and Rautia. The Kawars are an important land holding section of the tribal population and are very much advanced as compared to other tribal groups. They also hold an important status in the historical past. The chief counsellors of the Haihaibanshi dynasty of Ratanpur were Kawars and it was to them that the Haihaibanshis entrusted the hill fortress of Bilaspur. The assistance rendered by the Kawars in the conquest of south of Raipur and Bastar was rewarded by large grants of land which they held as zamindars. Between Partabpur and Jhilmili in Surguja district, there is a *sati* shrine ascribed to a woman of this tribe.

Literacy has not made much headway in the tribe and 89.5% males and 98.9% of females in the rural areas and 72.6% of males and 91.6% of females in the urban areas are illiterate. Cultivation is the predominat occupation of the tribe in the rural areas and of the workers 91.9% of males and 91.7% of females are returned as cultivators. In the urban areas the predominating occupation is 'other services'.

Nagesia:—One of the points of confusion in recognising the tribes in this district is that many tribes refer to themselves as *kisan*. The Oraons and Nagesia both refer to themselves as *Kisan* which is probably regarded to be a honorific term. The Nagesia, however, say that they are the true *kisans* whereas the Oraons are only so by occupation. The name of the tribe is derived from *nag* or cobra. The tribe is divided into Telhas, Dhuria and Senduria groups. Of these, the Telhas and Dhurias intermarry but the Sendurias regard themselves as superior. One interesting point about the Telha Nagesia is that they do not have any exogamous septs or *gotra* (*got*).

Korwa:— 'This people', writes Colonel Dalton in his *Ethnology of Bengal*, 'take up the dropped links of the Kolarian Chain, and carry it on west, over the Surguja, Jashpur and Palamau highlands till it reaches another cognate tribe, the Kurus or Muasis of Rewa and the Central Provinces'. The typical Korwa inhabit the tableland of Khuria in adjoining Jashpur tahsil of Raigarh district. The Korwas are divided into a number of sub-tribes- the Agaria Korwa, the Bhadiya Korwas. It is not known as to which of these sub-tribes are principally found in this district.

In general, the Korwa of Surguja are more civilized than their brethren in Jashpur tract.

The extent of literacy is very low: only 1.9% males and 0.2% females in the rural areas and 5.9% males in the urban areas are literate. As compared to Gonds, Oraons and Kawars, the proportion of cultivators is less: in the rural areas 73.3% males and 70.5% of females are cultivators and 18.4% of males and 23.0% of females are agricultural labourers. 5.6% of males and 4.0% of females in the rural areas are engaged in category III i.e., Mining, Quarrying, Hunting and collection of forest prdouce etc. In the urban areas, the proprtion of persons engaged in 'other service' is more than that in others categories. Of the different sub-tribes, the Paharia Korwas are most backward. The Diharias claim to be Hindus and have no connection with the Paharias and water is accepted by the Hindus from the hands of the Diharia Korwas.

Kodaku : The name of this tribe is also spelt as Koraku and possibly because of similarity between this name and the Korkus, the Kodakus of Surguja have been wrongly classified as Korku in the Census tables. In the tables therefore, the figure of 14,768 Korkus in Surguja district may be taken to represent the Kodakus.

The Kodakus have been regarded to be a sub-tribe of the Korwas and in his 1931 Report, Shoobert stated : "The Khoraku is not found in Jashpur or Udaipur and is apparently confined to Surguja". The Kodakus, however, consider themselves a different people from the Korwas but admit that the difference is not great. In appearance it is difficult to distinguish one from the other. As a rule, the Kodakus are somewhat better-clad than the Korwas and have perhaps a slightly more civilized appearaance ..... The Kodakus repudiate that they intermarry with the Korwas."

Pando : 95.4% of the population of this tribe is concentrated in this district alone. Though in the *Scheduled Castes and Scheduled Tribes Lists (Modification) Order*,1956, the Pandos have been clubbed with Bhuinhar-Bhumia, they do not acknowledge any connection with them. Hiralal regarded them to be akin to the Kawars but Shoobert noticed a marked similarity between them and the Korwas. The Pandos have two territorial subdivisions which are self-explanatory-the Utarha and the Surgujiha. Their chief deity is Baraithan.

The percentage of literacy in the tribe is 3.0% for males and 0.2% for females. 69.3% of the males and 64.9% of the females are returned as cultivators; 17.6% of males and 23.4% of females are agricultural labourers; 7.5% of males and 6.2% of females are engaged in household industry and 0.8% of males and 1.3% of females are engaged in forestry and collection of forest produce etc. The common household industry of the Pandos is basket-making from bamboo.

Majhwar : The Majhwar tribe is also known as Manjhi. The word Manjhi means the headman of a tribal sub-division. It also means a boatmen or a ferryman and the traditional occupation of the tribe is fishing. In Surguja, the Manjhis appear to be of Munda and Santhal rather than of Gond origin. They have no sub-divisions but have only totemic septs. In the rural areas of the district, the Majhwars have given up their traditional occupation and have taken to cultivation and agricultural labour, but in urban areas fishing is still the predominant occupation of the tribe.

Bhuinhar: Thc Bhuinhars are mostly met with in the Ramkola tappa and Colonel Dalton describes them as the lowest type of human being that he ever came across. Hunter stated in his *A Statistical Account of Bengal*(1872) that the tribe was rapidly dying out. In 1931 there were 14,577 Bhuinhars in Surguja district but in 1961, the population of the tribe is only 7,713. What the reasons of this phenomenon are. is a difficult matter to say here.

In addition to these, there are the Agarias, the indigenous, iron-smiths; the Baigas bordering on Shahdol and Bilaspur districts and the Muwasis or Kols in Bharatpur tahsil.

Social and Religious Movements :

During the last two decades or so, a number of socio-religious movements have sprung up in Surguja

district and nearby areas. These movements may be described as Rajmohini, Birsa Bhagat, Mahua Dev and Gahira Guru movements. All these have been sometimes collectively referred to as *Bhagti Movements.* At least two theories have been put forth regarding the origin of these movements in these areas. Fuchs (*Social Origins*) and some others opine that they come about as a direct result of oppression which had been going on under different money lenders, overbearing or corrupt officials and autocratic rulers. According to others the movements started as a direct result of mass conversion of tribals to Christianity. In the present note it is not possible to hazard any definite opinion on the subject.

These various Bhagti movements started essentially as religious movements but subsequently took the shape of social reforms also. For example, the Mahua Dev movement, starting as a religious movement preached and demonstrated the efficacy of the tribal gods and deities but subsequently helped to remove the fear of witch-craft, prohibited drinking of liquor and eating of meat, enjoined daily bath and cleanliness on its followers and so on. One such movement which is spreading at present is the Gahira Guru movement, and this has taken the shape of a strong socio-religious reform. The movement has also reached a stage of elaborate organizational work and there is no doubt that it is a very potent factor among the tribals of the district.

The currents of Satnami movement which started in Chhattisgarh in about 1820-30 do not seem to have reached here nor have the Chandrabanshi and Surjyabanshi movements yet impinged on the scheduled castes of the district. The only movement which seems to have tried to retrieve members of scheduled castes in the district is the Rohidas movement and in the tables we find return of 1,119 population of Rohidas, a synonymous group of Chamars.

Social Life and Customs :

In some of the tribes of the district, notably in the Oraons and Pandos, the institution of 'bachelors dormitory' prevailed formerly but it can not be stated here if it now persists or not. For this some local enquiry will have to be conducted. Among the Pandos, the bachelors used to live in a separate house called the *Bhangra.* The unmarried girls also lived in a separate *Bhangra* or *Derwa Kuria.* Dalton has mentioned that in Surguja the Oraons had a common dormitory for boys and girls known as *Dhumkuria* but it appears that by 1930 the common dormitory system was abolished for Shoobert in his note on the Oraons (1931 Report) states that the bachelors quarters or the *dhumkurias* are separate for boys and girls.

A system of entering into ritual friendship prevails among many tribes and castes of the district. By this the ties of friendship are made almost as binding as those of marriage. It may be remembered that a system of ritual friendship prevails in almost the whole of Chhattisgarh. Among the Oraons, the offering of flowers by a boy to a girl is considered to be an expression of deep love and Dalton has stated in this connection: "A young man makes a demonstration of his affection for a girl in a similar fashion. He sticks flowers in the mass of her back hair, and if she subsequently return the compliment, it is concluded that she desires a continuance of his attention. The next step may be an offering to his lady love of some nicely grilled field mice, which the Oraons declare to be the most delicate of food. Tender looks and squeezes whilst both are engaged in the dance are not much thought of. They are regarded merely as the result of emotions naturally arising from pleasant contiguity and exciting strains; but when it comes to flowers and field mices matters look serious".

Liasions between boys and girls of the same village (in case of some of the tribes like the Oraons) seldom end in marriage, as it is considered more respectable to bring home a bride from a distance. Among the tribes it is somewhat uncommon for a man to have two wives. Divorce is permitted and widow remarriage is a regular practice. The tribals generally practise adult marriages but in some of the scheduled castes the practice of pre-puberty marriages prevails.

Very few villagers have any idea about the population of their villages, but all of them can tell the number of houses in the village and given time, almost the exact number of houses or families belonging to different castes and tribes can be got. The simple rule to arrive at a fair estimate of the

village population is to multiply the figure of the number of houses by four or five.

Village-names :

Village names in Surguja district provide a very interesting study. It is observed that the impact of higher culture has been sufficient and there is perceptible a greater tendency in this district than in other neighbouring districts to adopt modern and refined village names. What, if any, were the original names of these villages and the period since when these new names came to be adopted, can not be found out here but it is evident that many of these names like Kantiprakashpur, Madaneshwarpur, Manikprakashpur, Tripureshwarpur and the like, were inspired from the personages of the ruling family.

Village names in the district seem to be derived from different sources-Hindi and Chhattisgarhi, Gondi and Kurukh/Oraon and Oriya. Urdu names are absent because of the fact that this part of the country has never been under effective Muslim rule.

The common terminations of village names based on Hindi and Chhattisgarhi are *pur* as Jagdishpur, Kanchanpur, Kapildeopur, Jaswantpur, Hastinagpur and the like; *garh* as in Ramgarh, Chargarh, Nawagarh and the like; *nagar* as in Ramnagar, Dwarikanagar, Kanchannagar and so on; *gaon* as in Dhangaon, Badakagaon, Bargaon, and so on; *ganj* as in Maharajganj, Mahabirganj, Devigganj and the like. It appears that these names are all influenced by Hindi whereas the village names terminating in *dih*, *para*, *sara* and *dand* are probably influenced by Chhattisgarhi. Village names influenced by Dravidian languages generally do not have any terminations, e.g. Libra, Okra, Parsa, Labgi, Lapna, Khajuri, Kulhadi and so no. But even these names are sometimes affected by the dominant Hindi/Chhattisgarhi and have terminations e.g. Parsagadi, Parasdiha, Semardih and so on. Village names affected by Oriya generally have terminations like *thar*, *pali* ant *dand*, though it is difficult to say whether terminations are not due to Hindi and Chhattisgarhi influence.

The village names of the district can be studied from another angle also. One set of terminations (*dih*, *para*, *pur*, *gaon* etc.) mean villages or hamlets. Another common set of terminations refer to water. these are *pani*, *tara*, *sara*, *bod* and *dabri*. The third type of terminations refer to land ; these are *khar*, *kachhar*, *tikra*, *kona* etc,

Quite a good proportion of names would be based on trees, animals and castes. Of these those based on trees are probably in the greatest frequency. Some examples of these names may be given-

On trees— Jamuniya, Khajuri, Khairi, Piparkhar, Chhindiya, Parsa, Pakardih, Harratola, Baheradih, Kerakachhar, Goreyapipar, Amgaon, Belkona, Karra, and so on.

On animals— Hathichewa, Baghdari, Chitabahara, Chita, Parewa, Bhediya, Syahi, Baghihin and so on.

On castes— Bhuinharpura, Tilsara, Tilaidand and so on.

On household- and agricultural implements Kulhadi, Kudari, Ranpa, Kepat, Khirki, Kudara, Chutki.

On the nature of land Lalmati, Karimati, Chikhladih Ghatgaon and so on.

The peculiar sounds emanating from water or other causes and similar associations in certain places seem to have given onomatopoeic names such as Silsila, Khusmusi, Silfili, Charchari, Chunchuna, Chhipchhipi, Bhukbhuki and so on. It is also interesting to note that names of other places have also been adopted as village names. Examples of such cases are Rameshwaram, Bhuwaneshwar, Vindhyachal, Annapurna, Amritdhara, Hastinapur, Gangotri and the like.

A very rough sorting of village-names on the basis of terminations revealed that frequency of terminations influenced by Hindi and Chhattisgarhi is greater in the area of erstwhile Surguja state than in other areas of the district. Again, it is in the erstwhile Surguja state that modern names preponderate. In the erstwhile Chang Bhakhar and Korea states, there is a preponderance of old names and Dravidian names are most preponderant in the erstwhile Chang Bhakhar State (Bharatpur Tahsil). It appears very likely that village names were

changed en bloc during some period of feudatory State regime. Following is given the result of an approximate sorting—

Former Status	Present tahsil	Total No. of villages	No. of villages based on terminations in							% of village names with terminations in *pur, garh* and *nagar*
			Pur	Garh	Nagar	Dih	Gaon	Para	Dand	
Surguja	Ambikapur	676	103	8	6	31	13	13	7	17.30
	Surajpur	558	148	2	26	5	8	12	7	31.54
	Pal	345	73	..	19	18	3	2	1	26.66
	Samri	195	34	1	10	21	2	1	..	23.07
Korea	Baikunthpur	253	25	1	..	1	3	27	10	10.27
	Manendragarh	231	25	1	1	1	..	5	10	11.68
Chang Bhakhar	Bharatpur	183	6	2	..	1	1	..	1	4.37

Village-forms, houses and living conditions

It is a matter of general observation that in the non-tribal areas of the State, the characteristic village form is a shapeless cluster. This form changes somewhat in the 'tribal districts'. It is found that in Surguja district the typical village forms are usually 'Rectangular' and 'Dispersed Clusters'. Isolated homesteads are sometimes seen in the Pahari Korwa tracts but these do not form any significant proportion. The rectangular form of villages are encountered in Pal, Samri and Ambikapur tahsils and dispersed clusters are found in Surajpur Baikunthpur, Pal and Ambikapur tahsils.

For determining the typical locational patterns of villages a random sample was drawn from the notional maps prepared at the time of house listing operations. This sample was in the nature of a stratified one for each Commissioner Division separately, the stratum being the different size classes of villages excluding those having population of 2,000 and above.

There are now 202, 183 residential houses (191, 684 rural, 10,499 urban) and 210,888 households (200,008 rural; 10, 880 urban) in the district. Thus whereas the district is bigger in area than its southerly neighbour Bilaspur, the number of households and residencial houses are about the half of those in Bilaspur district. Majority of houses in the district are built of mud. If tahsilwise distribution of houses by wall and roof material is compiled it is seen that 7.0% of houses in the rural areas and 17.3% of them in the urban areas have walls of grass, leaves, reeds or bamboo. On the face of it, this looks like a paradox for one would normally expect better housing in the urban areas. The fact is that in the industrial areas of the collieries which have been treated as urban, the temporary sheds for labour are mostly built of bamboo or thatch and it is these that inflate the figures of such houses in the urban areas. The position becomes clear if the data is sorted out tahsilwise.

Bharatpur (37.4% R), Baikunthpur (6.9%R), Surajpur, (2.0%R), Pal (19.5%R), Manendragarh (19.4% R, 29.6% U), Ambikapur (1.3%R) and Samri (0.1% R).

It is thus seen that in urban areas such houses are found only in Manendragarh tahsil which is the main colliery area. In the rural area, the largest figure is from Bharatpur tahsil and in a way reflects on the economic backwardnesss of that tahsil. Though in the rural areas Manendragarh tahsil also shows a fairly appreciable percentage (19.4%) of such houses, this may be precisely for the same reason : firstly the houses of the collieries may be extending outside the area treated as urban and secondly there are collieries even outside the urban areas. That this appreciable percentage of bamboo and thatch-wall houses does not reflect the true economic condition in Manendragarh tahsil is clear from the fact that it is in this tahsil that one observes the largest proportion of houses with walls built of burnt bricks (Surguja district 2.2 R, 31.2 U;

Bharatpur 1.4 R; Baikunthpur 1.4 R, 30.1 U; Surajpur 0.3 R, Pal 0.3 R, 30.3 U; Manendragarh 16.6 R, 37.3 U; Ambikapur 0.2 R, 21.3 U and Samri 0.2 R). Again, it is only in Manendragarh tahsil of the district where in the urban areas *there are 3 houses in every 1,000 residential houses* with walls of C. I. sheets or other metal sheets.

Whereas, in respect of wall material Bharatpur tahsil presents the largest proportion of houses with thatch, reed or bamboo walls, the condition is different if the proportion is calculated by roof material, for here, Pal tahsil has more houses with roofs of grass, leaves, thatch or shingle (Bharatpur 19.7, Pal 26.8—both rural only). Thatch or leaves in a roof are not as strong a pointer towards economic backwardness as they are in the wall-material. In this respect the Feudatory States Gazetteer, 1909 states about erstwhile Surguja state: "In the *tappas* mentioned above, there are several large villages with many houses substantially built though lacking tiled roofs. Keeping thatch roof is a common practice even in many of more advanced areas of the State where easy availability of these materials is also a consideration. But normally, even a slightly well-off person tries to build a house with mud walls : thatch or leaf walls probably, point to a lower level of development and culture, These features are discussed in greater detail in the State Report on Housing and Establishments and shown in Subsidiary Housing Tables E-IV. I and 2.

Working force and occupation :

Out of the total population of the district 618, 324 persons are workers and 418,414 persons are non-workers. In other words 59.6% of the population of the district is economically active (66.3% males, 52.7 females). This proportion of economically active population in the district is above the proportion in Bilaspur division and in the other two districts of the division and it is also substantially higher than the proportion of such population in the State. This feature is shown in the table below :

	% of workers and non-workers					
	Workers			Non-Workers		
Area	Total	Male	Female	Total	Male	Female
Madhya Pradesh	52.3	60.2	44.0	47.7	39.8	56.0
Bilaspur Division	57.5	63.2	51.8	42.5	36.8	48.2
Surguja District	59.6	66.3	52.7	40.0	33.7	47.3
Bilaspur District	56.7	61.6	52.0	43.3	38.4	48.0
Raigarh District	56.9	63.0	50.7	43.1	37.0	49.3

It is a matter of general observation that a higher participation rate, or, what may also be called a lower dependency ratio, is more often than not, a fairly reliable index of economic backwardness rather than of developed economy. (Balaghat and Bastar are the only two districs in the State where the participation rate is higher than in Surguja). It has been stated in Part II-A (1961 Census) : "It does not appear that the participation rate is in any sense a relaible index of the State of the economy; in fact, as has already been observed in other studies, a higher participation rate is more often an index of backwardness.....The trouble is that this rate lacks all the necessary dimensions —the total time of participation and the earnings or productivity per unit of time. Two general conclusions, however, seem possible ; first, the existence of a large working force in the more agricultural areas is at least an indication that unwillingness to work is less important and the productivity factor is more important; second, the dependency ratio seems to increase with development though whether this is due to lack of opportunities or greater social or other inhibitions is not clear."

From this point of view it would be of interest to look at the participation rate in the tahsils of the district.

Tahsil		% of Workers and Non-Workers					
		Workers			Non-workers		
		Persons	Male	Female	Persons	Male	Female
Bharatpur	R	61.61	64.81	58.14	38.39	35.19	41.86
Baikunthpur	T	61.35	67.07	55.27	38.65	32.93	44.73
	R	62.36	67.63	56.79	37.64	32.37	43.21
	U	36.39	54.39	13.56	63.61	44.61	46.44
Surajpur	R	63.71	67.61	59.76	36.29	32.39	40.24
Pal	T	59.86	64.55	55.01	40.14	35.45	44.99
	R	60.53	64.85	56.07	39.47	35.15	43.93
	U	36.25	54.30	16.37	63.75	45.70	83.63
Manendragarh	T	52.91	67.28	35.62	47.09	32.72	64.38
	R	56.04	68.29	41.53	43.96	31.71	58.47
	U	39.39	63.06	8.73	60.61	36.94	91.27
Ambikapur	T	57.47	65.68	49.06	42.53	34.32	50.94
	R	58.62	66.38	50.73	41.38	33.62	49.27
	U	32.82	51.80	10.33	67.18	48.20	89.67
Samri	R	62.34	65.30	59.30	37.66	34.70	40.70

This table generally confirms the conclusions already reached before but there is one point worth mention. It is not in Bharatpur tahsil where the participation rate is highest but in Surajpur tahsil for total population and Baikunthpur tahsil in case of males. In case of females again the highest figure is reached in Surajpur tahsil. What the exact cause of this feature is cannot finally be said here. It, however, appears that the tendency of high participation probably charactarises areas of rice cultivation. In an area where the agricultural sector is limited by nature and where there is no scope for employment elsewhere, the participation rate also decreases. It would thus appear that whereas a high participation rate generally indicates backwardness, a higher dependency ratio also points to relative backwardness. The cases of Surajpur and Bharatpur tahsils are illustrative of the tentative conclusion.

Except in Manendragarh and Ambikapur tahsils, the female participation rate in other tahsils is higher than the rate for the district. The participation rate in Manendragarh is even smaller than the State rate. Notwithstanding the urban areas, in the rural areas also the female participation rate is smaller whereas the male participation rate in the rural areas is the highest in the district. The cause of this becomes clear by looking at the Primary Census Abstract. In rural areas of this tahsil, in Category I and II, the female participation rate is not bad but in Category III there suddenly springs up a great gap—10,019 males 1,117 females. This is mainly because coal extraction is not suited to female workers.

Distribution of workers into Industrial Categories

The table-inset below shows the percentage distribution of persons in the different Industrial Categories of workers : for comparison figures for the State, Division and the two other districts of the Division are also given :

Area	Workers		I		II		III		IV		V		VI		VII		VIII		IX	
	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F	M	F
Madhya Pradesh	60.2	44.0	35.8	29.6	8.4	9.0	2.3	0.7	3.2	2.0	1.8	0.2	0.9	0.2	2.1	0.3	0.9	N	4.8	2.0
Bilaspur Division	63.2	51.8	43.3	38.5	8.5	8.8	2.7	0.7	2.5	1.9	0.6	0.2	0.6	0.2	1.2	0.3	0.7	N	3.1	1.2
Surguja District	66.3	52.7	48.8	42.5	5.9	6.6	4.6	0.9	2.0	1.4	0.3	0.1	1.0	0.3	0.9	0.2	0.5	N	2.3	0.7
Bilaspur District	61.6	52.0	40.2	37.0	9.8	10.8	2.5	0.5	2.4	1.8	0.7	0.3	0.5	0.1	1.5	0.4	1.0	N	3.0	1.1
Raigarh District	63.0	50.7	43.4	37.7	8.7	7.1	1.3	0.7	3.0	2.7	0.7	0.2	0.3	0.1	1.1	0.3	0.4	N	4.1	1.9

This table shows that in the proportion of workers Surguja has greater proportion in both males and females. In cultivation, mining and quarrying and construction also Surguja district has a larger proportion than in Bilaspur and Raigarh districts. But the proportion is less in Categories II, IV, V, VII, VIII and IX. The proportion of agricultural labourers in Surguja ditsrict is even less than the State and Division figure. In areas of predominantly paddy cultivation, larger agricuitural sector, in the present state of things, indicates advanced cultivation because all the operations like *biasi*, *nindai* and so on require manual labour. The general participation rate being higher a depletion in the proportion of this category indicates that movement has probably taken place from the agricultural sector to industrial (i.e. mining) sector and to construction. Unless labour requirements in agriculture are reduced either by better organization or through some sort of mechanization or propagation of labour saving devices, large-scale withdrawal of population from rural areas to man the mines and factories would in all probability react adversely on agricultural productivity. Though, it can not be stated that the movement has been large in Surguja district, still, to what extent, if any, it has reacted on the agricultural productivity is a subject which would merit separate intensive research and is outside the scope of the present note.

Out of total workers, 87.2% are enagaged in agriculture (76.7% as cultivator; 10.5 as agricultural labour). Precentage distribution of workers in other industrial categories in the district and tahsils is as under :—

Unit	I	II	III	IV	V	VI	VII	VIII	IX
Surguja District	76.7	10.5	4.6	2.9	0.4	1.0	0.9	0.4	2.6
Bharatpur	68.7	17.3	4.6	3.3	1.0	0.2	0.4	0.1	4.4
Baikunthpur	76.5	9.0	3.6	2.4	0.1	2.4	0.7	0.5	4.8
Surajpur	84.8	9.7	0.8	2.6	0.1	0.3	0.5	0.1	1.1
Pal	65.5	24.5	3.6	2.4	0.4	0.1	0.7	0.1	2.7
Manendragarh	46.4	8.2	24.6	3.3	1.0	6.7	2.5	2.5	4.8
Ambikapur	82.1	7.5	2.9	3.2	0.3	0.2	1.0	0.2	2.6
Samri	83.8	7.6	2.0	3.6	0.5	0.0	0.7	0.1	1.7

From the above the tahsilwise proportion of persons engaged in agriculture (i.e. as cultivators and agricultural labourers) works out as—Bharatpur(86.0), Baikunthpur (85.5), Surajpur (94.5), Pal (95.0), Manendragarh (54.2), Ambikapur (89.6) and Samri (91.4). Thus, except in Manendragarh tahsil, more than 80% of the workers in other tahsils are dependent only on agriculture. Except Manendragarh tahsil, therefore, scant diversification and overwhelming concentration in the agriculture is again a reflection of economic backwardness and of a poor industrialisation and urbanisation. The proportions become more accentuated if urban and rural areas are considered separately.

The largest proportion of cultivators are seen in Surajpur tahsil and the least in Pal tahsil excepting, of course, Manendragarh tahsil, which is a mining area. It is in Pal tahsil that the largest proportion of agricultural labourers are met with. This increased proportion of agricultural labourers and less of cultivators suggests concentration of land only in the hands of fewer persons and relatively bigger size of holdings. As can be expected, the proportion of persons engaged on agriculture in Manendragarh tahsil is less because of the impact of mining industry.

Considered as a whole, after cultivation the next important industrial category in the district is mining, quarrying, livestock, hunting, fishing etc. and the largest proportion of workers in this category are found in Manendragarh tahsil. The least proportion is seen in Surajpur tahsil which incidentally is the tahsil with the largest proportion of workers absorbed in cultivation. Industrial Category III is a composite category including such divergent industries as mining and hunting and fishing. The figures therefore do not necessarily show the proportion of persons engaged in mining. Thus, whereas in Manendragarh tahsil this category may show the proportion of persons engaged in coal mining, in Pal tahsil it may show those of them that are engaged in forestry, collection into forest produce etc. Table B-IV-C shows the break up of the industrial categories into major groups and it is seen that 15,317 persons are engaged in mining

and quarrying and 13,815 persons are engaged in forestry and logging, fishing and livestock rearing and hunting. In Surajpur tahsil, which seems to be agriculturally most advanced, a very minor proportion of workers are found in Category III. Category IX i.e. 'other service' is also important and absorbs substantial proportion of workers.

Household Economy :

Tables B-X to B-XVI given in this Handbook present the economy treating household, and not individual, as the unit. All these tables are prepared from a 20% sample which is big enough and the results deducible from them may be considered to be fairly representative of the total population.

Table B-X shows that 71.7% of the households (75.2% in rural, 8.0% in urban areas) are engaged in household cultivation only;1.8% of the households (1.6% in rural, 4.7% in urban areas) are engaged in household industry only while 7.8% of the households (8.2% in rural, 0.8% in urban areas) are engaged both in household cultivation and industry. Thus, 79.5% of the households (83.4% in rural, 8.8% in urban areas) are engaged in household cultivation and 9.6% (9.8% in rural, 5.5% in urban areas) are engaged in household industry. 18.5% of the households are engaged in some economic activity other than household cultivation and household industry.

Table B-XI shows sample housholds engaged in cultivation classified by interest in land and size of land cultivated in rural and urban areas separately. It is seen from this table that 83.5% of the cultivating households, practise their cultivation on lands belonging to them, 13% on lands partly be longing to them and partly held on lease from others while 3.4% cultivate on lands belonging to others. Of the cultivating households 43.3% cultivate on lands of less than 5 acres in size (3.7% on less than 1 acres; 15.7% on from 1.0 to 2.4 acres and 23.9% on 2.5 to 4.9 acres). This proportion of cultivating households may therefore be said to be cultivating uneconomic holdings. Actually speaking, irrigation is negligible in Surguja district and lands less than 7 acres may be taken to be uneconomic. 62.9% of cultivating households cultivate on lands below 7.4 acres in size. Only 2.6% of the households have lands over 30.0 acres in size. Table B-XI, however, does not confirm the observation made earlier that in Pal tahsil there are big holdings concentrated in the hands of a few landlords only. What therefore, appears is that the size-pattern in Pal tahsil is the same as for the district (with a little higher proportion of those cultivating less than 1 acres). It is more probable that the greater part of the land being poor, the cultivator of these have agricultural labour as their primary work.

Agriculture :

Soil-types and position-classes :

Some local variation is found in soil terminology. The terms prevalent in the eastern half of the district are the same as those current in Raigarh district and other areas of Chhattisgarh i. e. *matasi* (a yellowish clay soil), *kanhar* (black soil), *dorsa* (mixture of *kanhar* and *matasi*). *palkachhar* (an alluvial soil), *patparakchhar* (a sandy alluvium) and *bhata* (poor laterite detritus).The commnest soil type in the eastern half is *matasi* which is well adopted for growing rice. The black soils *dorsa* and *kanhar* are not frequently met with. The *bhata* and *patparkachhar* contain an admixture of pebbles and require frequent fallows. They are usually found on high-lying ground.

In Baikunthpur and Manendragarh tahsils the soil-terminology differs : *mair* is a blackish soil on which good-class crops such as paddy and wheat will grow. In a general way this may be equated with the *kanhar* soil of the eastern areas; *dudia* is a greyish soil on which paddy and wheat can grow but the soil being inferior the yield is poor; *balka* is a mixture of clay and sand, generally of a reddish hue. This *balka* soil is almost confined to high-lying lands (*tanr* and *tikra*).

As one goes westwards from the central low-lying region, the quality of soil goes on deteriorating till in Bharatpur tahsil a "tangled and dense mass of hills, ravines and plateaux" is encountered. In this tahsil the soil is stony and difficult to plough and the share rarely enters the soil to a depth of seven inches or so.

For paddy cultivation the position of a plot appears to be considered more important than its soil and the various terms for position of land are *bahara, chaura, dand* or *gora, tanr* and *tikra, gabhar, nar, darha, sitai, dandi* and *balasthal.*

The *bahara* land, also known as *kanhar* or *dhondhi* is considered to be the best land for paddy cultivation. *Chaura* and *sitai* are the second-class paddy lands. *Tanr* and *tikra* are the high-lying lands, not considered suitable for paddy. *Dand, darha, dandi* or *gora* is the third-class paddy land and *balasthal* is the most unsuitable kind of land in Bharatpur tahsil which, in the erstwhile feudatory state regime was held free of rent. *Nar* is the term for small *baharas* and *gabhar* is the term for a flat land. The *bahara* is considered to be the best-position land because it is the land down which the water flows i.e. it is the hollowest part of the *land* receiving drainage from three side.

Agricultural implements :

As one crosses the district from east to west the plough goes on being lighter and lighter The plough in the eastern part of the district is a light pattern of the *churia hal* met with in Udaipur tahsil of Raigarh district. In Baikunthpur-Manendragarh tahsils the plough is somewhat lighter than this and in Bharatpur it becomes an extremely light one. The characteristics of the plough in this district are that it is entirely made of *sal* wood and bamboo is not used in its making and the stock and handle are in one piece. An extreme light variety of plough is seen in some areas of Baikunthpur tahsils where it is hardly more than a stick and in some cases only a roughly shaped bough.

The chief feature of the plough is the shape of the share which resembles a spear head fitting into a correspondingly shaped slot in the head of the plough stock. At the point of entrance an iron band passes over the slot in the stock and keeps the share in place. The portion of the share which is exposed measures eight to nine inches. For *rabi* cultivation the stock has a hole pierced in it just above where the share ends and in this hole is placed a funnel of bamboo with a spreading mouth known as *paitanra*.

A peculiar feature in the plough used in Bharatpur tahsil may be noted here. On the *jua* (the uppper bar of the yoke made of *kamar* wood) there are three raised and curved pieces of wood to strengthen the yoke at the parts where the greatest strain comes upon it viz., over the neck of the oxen between the two pegs, and over the centre of the *jua* where it is attached to the pole; these raised pieces are known as *mahadeo* (as in Chhattisgarh). The upper end of the pole is pierced by three holes into which pegs known as *harelia* are inserted. A thong of leather or rope is brought over the centre *mahadeo* of the *jua* and fastened over one of the pegs; the rope is called the *nanda*. By this means the yoke is fastened to the pole; the rope is fastened to the first peg when the strain is light, and to the second or third according to the tension. The plough has a peculiarly shaped handle (*muthia*) projecting at the back. This feature of the double rope and means of fastening it to the pole and the shape of the handle are peculiar to this tahsil. It is probably necessitated by the nature of the soil here which is stony and difficult to plough,

Land records statistics given elsewhere in this Handbook show net area sown has recorded an increase from 983,992 acres in 1951-52 to 1,219,067 acres in 1960-61 (i.e. 23.%8 increase). There is also 74.4% increase in the area sown more than once during this period. There does not appear to have been any significant increase in the area under paddy, which, between 1951-52 to 1960-61, has increased only by 15.%. Area under maize has increased by 19.8% . In 1951-52, Surguja district had only 7,204 acres under wheat. This has more than doubled during 10 years and in 1960-61, the area under this crop was 15,227 acres. Sugarcane cultivation seems to be on the way out and the area under sugercane has dwindled from 1,262 acres to 766 acres. Decrease is also noticed in the area under cotton.

Because of poverty of soils, absence of irrigational facilities and less advanced methods of cultivation, the yeild of crops in Surguja district is poorer than Bilaspur and Raigarh districts and is more on a par with the yields of Bastar district.

Irrigation ;

In the *Chhattisgarh Feudatory States Gazetteer* (1909), the following remarks are made regarding irrigation in the three erstwhile feudatory states-Surguja, Korea and Chang Bhakhar. "Generally speaking the cultivators of the State seem somewhat

lacking in energy and enterprise. It may be said that irrigation is practically unknown. The rice fields are of course terraced and embanked, but there is no irrigation on any regular system". (Surguja). "Irrigation is practically unknown in the State" (Korea). "There is no irrigation of any kind to be met with in the State, though the paddy fields, of course, are terraced." (Chang Bhakhar).

The statistics of irrigation show that in 1960-61, only 0.6% of the net area sown was under irrigation and during 1951-52 to 1960-61, the area under irrigation has not recorded any significant increase. Actually speaking there has been a decrease in all the years after 1951-52 till 1960-61. Of the area irrigated, 56.0% is irrigated by wells,3.2% by tanks and the rest by other sources. There is as yet no canal irrigation in the district and it is probably not feasible looking to the topography. Minor irrigation works, however, may have a future in the district as everywhere else.

Other Industries—Comparison with 1951 :

Strictly speaking there is no direct comparability between 1951 and 1961 figures but the following figures may be given here to show the trend during the decade. In compiling the figures given below, some rearrangement of 1951 figures needs to be done e.g. major group 04 of the Standard Industrial Classification adopted in 1961 is equal to sub-divisions 0.1 plus 0.5 of 1951.

Industry	No. of persons employed in 1951	1961
Livestock and Hunting	2,154	11,717
Forestry and logging	594	2,034
Fishing	2	64
Coal-mining	7,444	15,165
Stone-quarrying, clay and sand—extraction	160	152
Construction and maintenance of buildings	722	915
Construction and maintenance of roads, bridges etc.	333	5,449
Water supply and Sanitation Services	79	479
Trade and Commerce-Whole sale and Retail	2,982	5,558
Transport, storage and communication	2,208	2,672
Medical and Health Services	257	738
Educational and Scientific Services	807	2,356
Legal and Business Services	22	124
Recreation Services	194	402
Cotton ginning, pressing & weaving	894	1,970
Manufacture of Tabacco products	24	115
Manufacture & processing of foodstuffs	839	1,749
Miscellaneous textiles like wearing apparels	360	711
Manufacture and making of leather products	469	1,405
Wood and wooden products and furniture and fixtures	2,007	4,493

This table indicates that except in some industries like stone-quarrying, construction and maintenance of building and transport, storage and communication, there has been during the decade 1951-61, phenomenal increase in the number of persons employed in other groups; in some cases e.g. construction and maintenance of roads, bridges and culverts the increase has roughly been 16-fold. Coal-mining now has double the number of persons of what it had in 1951; there are 6 times more persons employed in water supply and sanitation services; number of persons in medical and health services, educational and scientific services, recreation services and legal and business services has increased roughly from 3 to 5 times, and manufacturing industries (household and others) are now employing two to three times more persons than in 1951. This is an evidence of the development that the district has made during the decade. The statistics, however, show that construction of buildings and houses has not registered the same increase as other fields.

Communications :

As on 31.3. 1961, Surguja district has 577 miles and half-a-furlong of road length out of which a little more than 200 miles are Class I road (including 4 miles and 2 furlongs of black topped road). The district headquarters is connected which Raigarh (distance 123 miles) and also with Bilaspur (distance 128 miles). The shortest road connection from Ambikapur, the district headquarters, to Bhopal, the State headquarters is via Bharatpur. From Bharatpur the road passes into Shahdol district and thence to Jabalpur district to join the Jabalpur-Rewa road. The communications are poor in the northern

and southern parts of the district and some areas like Ramanujganj and Kusmi become almost inaccessible during the rainy season.

The only railway that is there in the district is a branch-line from Anuppur junction on Bilaspur- Katni line of the south-eastern railway.

The following note is found in the 1909 Gazetteer about the communications in the erstwhile Surguja state : "The natural features of the country lend themselves easily to road construction, and the roads could easily be made passable at all times of the year for carts except when any of the larger streams are in flood; but at present carts are little used because the passes leading out of the State are very difficult.....The north of the State has practically nothing that could be called a road." similarly, the Gazetteer has the following to mention about erstwhile Korea and Chang Bhakhar states which now form Baikunthpur, Manendragrh and Bharatpur tahsils respectively: "There are no regular roads of any kind in the State" (Korea). "There are no made-roads it the Chang Bhakhar State. Two hill-passes lead into Chang Bhakhar from the north-one near Harchoka and the other at Kamarji". Looking to the condition which thus existed in 1909, the district can well be proud of the achievements made.

According to the *Statistical Abstract of Madhya Pradesh* 1961-62, the road length in the district from 1948 to 1961 was—

1948 (554 miles), 1952 (568.4 miles), 1956 (593 miles), 1960 (534.6 miles). As stated earlier the road length in 1961 was 577 miles and some. Why has the road length decreased in 1960 is not clear.

Public Health : As every where else there has been during the decade, expansion of medical and public health services in the district. At present there are 1 hospital (60 beds), 13 Primary Health Centres (73 beds) and 9 dispensaries. In the beginning of this decade—in 1951—there were 2 hospitals and 12 dispensaries and the difference in the number of these and those at present is due to their conversion into PHC. In addition to these there are 9 Family Planning Clinics and 1 V. D. Clinic.

Though 3 Family Planning Clinics were started as early as 1958 and their number increased to 9 in 1961, the number of vasectomy and tube tying operations performed and the number of persons to whom contraceptives have been issued is negligible. BCG compaign was launched in the district from February to April 1956 covering 75 villages in Ambikapur, Manendragarh and Surajpur tahsils.

Literacy: Half-a-century ago i.e. about 1909, there were in this district only 24 primary schools including one girls school and there were in all about 1,611 students. In some areas, as in Chang Bhakhar state (present Bharatpur tahsil) the people were definitely hostile to education and the *Chhattisgarh Feudatory States Gazetter* (1909) has the following to state in this connection "Education is very backward in the State. The aborigines are averse to sending their boys to school and the boys themselves are reluctant to attend. The result is that three out of four schools, which were opened in the State, had to be closed for lack of support. In 1907, however, a primary school was opened at the headquarters of the State and is making fair progress" (Chang Bhakhar). There are only five primary schools in the State with 389 scholars on the rolls. Education is very backward here." (Korea). "The institutions are making fair progress, but education in this State cannot be looked upon as anything but backward and it is only within the last three or four years that any serious attempts have been made to teach the people." (Surguja)

As against this there are now (i. e. 1960) 953 primary and junior basic schools, 52 middle schools, 11 higher secondary and senior basic schools and 2 arts, science and commerce colleges. Also, there are 3 professional institutions. There are in all 55,389 students in these various institutions.

In percentage of literacy, the district occupies the lowest position in Bilaspur Division and as regards literacy in rural areas, Surguja district is the fifth least literate district in the State. The percentages of literacy for the State, Division and the districts of Bilaspur Division are shown below ;

Unit	Rural Urban	% literate and educated Total	Males	Females
Madhya Pradesh	R	12.73	21.81	3.36
	U	43.52	56.51	28.35
Bilaspur Division	R	13.02	22.61	3.55
	U	43.92	58.89	27.01
Surguja District	R	7.81	13.62	1.78
	U	39.44	52.25	23.57
Biiaspur District	R	15.70	27.51	4.31
	U	46.00	61.34	28.97
Raigarh District	R	13.24	22.78	3.85
	U	41.35	57.11	23.85

The position regarding literacy is that, while literacy among males has shown substantial progress during the last ten years, the overall position regarding literacy among women continues to be bad in spite of the great strides made. Below is given the percentages of literacy in rural and urban areas for the tahsils of Surguja district in 1951 and 1961. It may be remembered that 1951 proportions are based on table C-IV of 1951 Census which was based on only 10% sample and it is assumed that this represented the universe ;

Tahsil	Rural Urban	1951 Total	Males	Females	1961 Total	Males	Females
Bharatpur	R	6.47	10.60	1.84	10.20	17.08	2.75
Baikunthpur	R	6.14	11.17	0.80	11.72	19.86	3.12
	U	41.39	57,16	21.03	48.95	62.93	31.22
Surajpur	R	0,68	1.27	0.10	6.08	11.03	1.06
Pal	R	2.47	4.57	0.23	6,11	11.09	0.98
	U	23.05	38.83	5.32	33.70	48.58	17.29
Manendragarh	R	9.60	14.83	2.92	15.91	24.87	5.31
	U	25.31	35.14	14.10	34.94	45.78	20.90
Ambikapur	R	2.41	4.44	0.22	6.27	11.15	1.30
	U	27.07	39.39	12.46	45.13	60.38	27.04
Samri	R	1.78	3.27	0.17	7.84	13.84	1.67

It is seen from the above that in the rural areas Surajpur tahsil is most backward at present and in the urban areas Pal tahsil has the lowest proportion of literacy.

Community Development and National Extension Service :

There are 21 development blocks in the district —Ambikapur tahsil (5), Surajpur tahsil (4),Baikunthpur tahsil (2), Manendragarh tahsil (2), Bharatpur tahsil (1), Samri tahsil (2) and Pal tahsil (3). The community development movement was launched in the district on 2nd October 1953 by the inauguration of 5 blocks. Yearwise growth of this movement is shown below:

Date	No. of blocks opened
2-10-1953	5
2-10-1956	3
1-4-1957	1
1-4-1958	1
2-10-1958	1
2-10-1959	1
1-4-1960	1
2-10-1960	1
1-4-1961	1
2-10-1961	1
1-4-1962	1
2-10-1962	2
2-10-1963	2

Out of these 1 block is SMPT, 10 blocks are TD and the rest are the ordinary blocks. Classified according to stages-there are 7 stage I blocks, 3 stage II blocks, 4 stage, I TD blocks, 3 stage II TD blocks, 3 stage III TD blocks and 1 stage II SMPT block. The details regarding coverage etc. are given elsewhere in this Handbook.

Religion, Fairs and Festivals :

As elsewhere in this area, the religion followed by the people in the rural areas of the district is a mixture of the primitive tribal belief and the greater Hindu tradition. The beliefs in supernatural spirits and witch-craft still persist and the various names by which these supernatural spirits are known are *bhoot, churel, bhoola, murkuri, chordewa,* and so on. Ancestral worship, probably the most primitive concept of religion, is practised by all the tribes. The Mainpat plateau is regarded to be the father-land and god by some tribes, e. g. the Saontas. The Oraons acknowledge a supreme god called Dharmi, Dharmesh and Anna Kuwari or Mahadharmi, Dulha Deo, Thakur Deo, Satbahinia etc. are the godling's of other tribes in the rural areas.

In all, 17 fairs are held in the district, 4 of which are known as Ganga Dasahara held in May-June. Some of the festivals peculiar to the district are the Karma, the Sarhul and the Kanihari,

The Karma festival is celebrated when the time arrives for planting out the rice grown in seed beds and is observed by many tribes and particularly by the Oraons. At the Karma festival a party of young people of both sexes proceed to the forest and cut a young Karma tree (*Nauclea parviflora*) or the branch of one; they then plant this in the centre of the *akhara* or the dancing arena in front of the *dhumkuria.* Young people dance around this tree or branch as the case may be. Dalton in his *Descriptive Ethnology of Bengal* (1872) states that the authority for observing it is contained in the *Bhavishya Purana.* If that is so, the celebration of this festival in the manner it is done in the district is an example of the parochialisation of the great traditions. Be as it may, the Karma festival is celebrated even in Bilaspur distrtct by some castes, and the belief is that the festival is a fertility -imparting one both to crops and to human beings. For examples in Bilaspur town some people, who do not have issues, celebrate this festival.

At the Sarhul festival the marriage of the sun-god and earth-mother is celebrated, and this cannot be done till the *Sal* (*Shorea robusta*) tree gives flowers for the ceremony. As such the festival is celebrated about the beginning of April. On this day the people go to the *Sarna* or the sacred grove where *Sarna buhri* is believed to residing. From there flowers of *sal* tree are collected. After some ceremonies during the day, young people of both sexes assemble for the all-night dance.

The Kanihari festival is held previous to the threshing of paddy and threshing-floors are not prepared, unless it is observed. The festival can only be held on a Tuesday. In the celebrations dancing is the most important item. This festival is particulary observed by the Oraons. In addition, the Oraons also have the great annual dance celebration known as *Jatra.*

SUMMING UP

Surguja is the second largest district in the state in respect of area and also the second most sparsely populated one. If the population-growth during 1901-61 is taken into account, Surguja district occupies the fourth rank from the top. Curiously enough, all the districts which show high population growth during this period are predominantly tribal areas (Jhabua 232. 91%, West Nimar 197. 22%, Bastar 184.64%, Surguja 155. 56%.)

Nature has been very kind to Surguja not only in providing coal seams in its geological foundations but also substantial forest reserve yielding bamboo and timber as well as forest produces like lac, resin and gum. But for these coal reserves, the district would have been a poorly known backwater of the mainstream of Madhya Pradesh: the exploitation of coal has turned it into an important mining district of the State.

Though second largest in area and showing the fourth highest population growth during this century, Surguja district occupies the seventh place in the State in respect of the size of its 1961 population. Overall population density is 122 per sq. mile as against the State density of 190. There are, how-

ever, indications that during the next ten years the population of the district would grow by the larger proportion than the overall State population.

Surguja district has the least sex ratio in the eastern Madhya Pradesh though one would expect a higher sex ratio in this region. As stated in 1921 Census Report, this deficiency started at birth: in O-year age there were 992 females for every 1,000 males. It, however, appears that the phase of high masculine birth has passed over: at present for every 1,000 males in the age 0-1 and 2, the number of females are 998, 1002 and 1060 and for the broader age-group 0-4, the sex-ratio is 1,042. This feature and the change noticeable in the age-distribution pattern since 1951 suggests a tendency towards increasing sex-ratio. Normally, decreasing sex-ratio is one indication of urbanisation and industrialisation. Seen from this viewpoint, the case of Manendragarh tahsil is easily explained. But Bharatpur tahsil (Sex-ratio 922) still eludes explanation. The problem here is to discover the causes of low sex-ratio in the district which is situated in an area of high sex-ratio. This problem, as aptly stated by the Census Superintendent in 1931 is whether it is in the climate and situation of the tracts where the tribes of Surguja live or the physical characteristics of the tribes themselves which affects the figures. In any case this subject merits separate research.

Surguja district is one of the areas where the impact of social and and religious movements is perceptible. Spread of Christianity is seen in the increase in the followers of that religion from 545 in 1951 to 8,785 in 1961. Along with this is going on a socio-religious movement— the Gahira Guru Movement— the overall impact of which can only be guaged after some passage of time.

Surguja is one of the 'tribal district's of the State, having a number of tribal groups which form the ethnic link between Chhota Nagpur plateau on the one hand and Central India region on the other. Some of these tribes like the Pandos, the Kodakus and the Korwas deserve detailed ethnological research to furnish bench-mark data for their development.

As seen from the proportion of workers and non-workers, the participation-rate in Surguja district appears to be on the high side : it is higher than the State and the division rate as well as the participation rate of Bilaspur and Raigarh districts. This high participation rate, or in other words, lower dependency ratio, is more often than not a fairly reliable index of economic backwardness. Balaghat and Bastar are the only two districts in the State where the participation-rate is higher than that obtaining in Surguja.

87.2 % of the workers are engaged in agriculture either as cultivators or as agricultural labourers. The economy is thus predominantly agricultural and the scant diversification in the economy of district is again a reflection of its economic backwardness and poor urbanisation. It is seen that 62.2% of the cultivating households practise their cultivation on land of below 7.4 acres in size which may be, looking to the terrain of the country and lack of irrigation, called uneconomic holdings. 3.4% of the cultivating households practise their cultivation on lands which do not belong to them. Agricultural implements and practices continue to be backward and irrigation has not made any headway. Other industries seem to have expanded two to five fold and the largest increase is seen in the sector of construction and maintenance of roads, bridges and culverts.

There has been expansion in the public health and medical services but in some spheres like family planning, the district has yet to make a good beginning. Literacy, has made progrees as everywhere but the overall position regarding literacy among women continues to be bad in spite of great strides made. As compared to Bilaspur district the proportion of literates in the rural areas of the district are less than half.

There are many directions in which the district may push forward industrially. Endowed by nature as it is, Surguja may develop in forest- based industries like organized *katha*-making, myrobalan extract, gum and resin industry, bidi industry and lac. When the district starts marching in this direction and when sustained efforts in community development start producing more results, the district may soon come forward in the line of its other counterparts in the State.

Notes—1 Under columns 3 (a) and 3(b);(a) represents the area figures furnished by the Surveyor General of India; (b) represents the area figures furnished by the State Survey Department. The area figures of tahsils, total and rural are based on the figures of the State Survey Department.

2 The urban area figures are collected by the Census Organisation.

3 Population per square mile has been calculated on area figures furnished by the State Survey Department.

4 M—Stands for Municipality.

TABLE A—I

AREA, HOUSES AND POPULATION

APPENDIX I

Statement showing 1951 Territorial Units constituting the present set up (Only those names/areas which have undergone changes since 1951 have been shown below)

District/ Tahsil	1951 Territorial Units	Details of gain in territories: Brief description	Area in Sq. miles	Area in Sq. km.	Details of loss in territories: Brief description	Area in Sq. miles	Area in Sq. km.	Net Area Gain (+) Loss (—) Sq. miles	Net Area Gain (+) Loss (—) Sq. km.
1	2	3	4	5	6	7	8	9	10
SURGUJA DISTRICT	Baikunthpur Tahsil	One village transferred from Manandragarh Tahsil	0.3	0.8	(No inter District transfer) ..	..	..	+0.3	+0.8
Manendragarh Tahsil	Manendragarh Tahsil	..	155.2	401.9	One village transferred to Baikunthpur Tahsil	0.3	0.8	—0.3	—0.8

Note—Village West chirmiri colony (L. C. No. of 1951 Census—222) with an area of 188 acres was transferred from Manendragarh Tahsil to Baikunthpur Tahsil.

APPENDIX—II

Number of villages with a population of 5,000 and over and towns with a population under 5,000

APPENDICES TO TOWN & VILLAGE DIRECTORY

CONTENTS

S. No.		*Pages*
Appendix	I—Industrial Establishments ..	391-401
Appendix	II—Towns and Villages served by metalled roads (All villages having roads in the village itself or within one mile of the village are included in the Appendix) ..	402-403
Appendix	III—Towns and Villages having railway stations within five miles ..	403-404
Appendix	IV—Towns and Villages having bus-stops ..	405
Appendix	V—Towns and Villages having public libraries	406
Appendix	VI—Towns and Villages having public reading rooms .	407
Appendix	VII—Towns and Villages having pucca wells for the supply of drinking water together with their number ..	408-412
Appendix	VIII—Towns and Villages having public latrines ..	413
Appendix	IX—Towns and Villages having drains ..	414
Appendix	X—Towns and Villages in which weekly or fortnightly markets are held together with the days on which held ..	415
Appendix	XI—Towns and Villages having Co-operative Societies together with the description of the society .	416-417

APPENDIX I

INDUSTRIAL ESTABLISHMENTS

Note:—This appendix has been prepared from information abstracted from the houselists. It is arranged first districtwise; that is, under the name of the district have been arranged the industries in ascending order of minor groups; showing the total number of establishments within brackets next to each minor group. The information has been shown by total, rural and urban separately. The figures for the tahsil follow the figures for the district as a whole. The total, rural and urban figures for each tahsil for each minor group of industry showing the number of establishments in each in brackets have been presented first. Then follows the list of the villages in the order of their location code numbers with the location code number appearing first, followed by the name of the village. Against each village is shown the minor group or minor groups of industry found in the village with the number of establishments in that minor group shown within brackets against each minor group. For towns, figures have been presented separately for each ward, the number of ward being given first, followed by the industrial code numbers etc. as in the case of villages.

The following examples will make the above Note clear :—

Surguja District Total 200 (28) signifies that there are 28 establishments in Surguja District pertaining to Minor Group 200, which stands for "Production of rice, atta, flour etc. by milling dehusking and processing of crops and foodgrains". Bharatpur Tahsil Total 207 (18) signifies that there are eighteen establishments in Bharatpur Tahsil pretaining to Minor Group 207, which stands for "Production of edible fats and oils (other than hydrogenated oil)," Village 6 Bela 311 (3). signifies that in Village Bela which has 6 as its Location code number there are three establishments pertaining to Minor Group 311 which stands for "Manufacture of shoes and other leather footwear". Baikunthpur town, Ward No. 1 212 (1) signifies that there is one establishment located in Ward No. 1 of Baikunthpur Town pertaining to Minor Group 212 which stands for "Production of indigenous liquor such as toddy, liquor from Mahua palm juice."

SURGUJA DISTRICT

Urban

Location code number and name of town :

IV AMBIKAPUR

Ward No. 4 (C.C.S.), (M.P.S.), (O).

Rural

Location code number and name of village :

49 Rewatpur (C.C.S.), 50 Dhandhapur C.C.S.), 74 Akhora Khurd (C.C.S.), 131 Sonagachi (Sakalo) C.C.S.), 149 Sargawan (C.C.S.), 150 Asola (C.C.S.), 151 Deogarh (C.C.S.), 152 Rajpuri Khurd (C.C.S.), 391 Bilaspur (O), 498 Birimkela (C.C.S.), 499 Maheshpur (C.C.S.), 500 Nakna (C.C.S.), 523 Kapat Bahari (C.C.S.), 546 Balampur (C.C.S.), 618 Sitapur (C.C.S.), 645 Sheonathpur (C.C.S.), 646 Sarga (O), 657 Petla (C.C.S.).

7 SAMRI TAHSIL

Urban

Nil

Rural

Location code number and name of Village ;

15 Chando (M.P.S.), 132 Kusmi (C.C.S.), (M.P.S.).

PART II

OTHER DISTRICT STATISTICS

This part contains some useful official statistics pertaining to the district collected and compiled from various agencies (the agency or source is indicated below each Table or Statement) and from official publications. These are presented under the following heads :—

1 Rainfall and Temperature

2 Economic Statistics—

- (a) Agricultural
- (b) Prices and Wages
- (c) Live-stock and Taccavi
- (d) Co-operation, Banking and Insurance

3 Administrative Statistics

4 Progress of Community Development Programme

5 Educational Statistics

6 Health, Medical and Vital Statistics—

- (a) Health and Medical
- (b) Vital Statistics

7 Communications

8 Miscellaneous
