adopted in the past. The people were divided into two broad livelihood categories, the Agricultural and the Non-Agricultural. Four agricultural classes and four non-agricultural classes were prescribed as shown below :—

Agricultural Classes—

I. Cultivators of land, wholly or mainly owned, and their dependants.

II. Cultivators of land, wholly or mainly unowned, and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

Non-Agricultural Classes—

Persons (including their dependants) who derive their principal means of livelihood from—

V. Production other than cultivation,

VI. Commerce,

VII. Transport, and

VIII. Other services and miscellaneous sources.

Each of the above eight livelihood classes were divided into three sub-classes with reference to their economic status as below :—

(i) Self-supporting persons,

(ii) Non-earning dependants, and

(iii) Earning dependants.

These livelihood sub-classes have been defined in detail in the fly-leaf notes attached to Economic Table B-I included in this Handbook.

All non-earning dependants are economically passive, all earning dependants are economically semi-active. All self-supporting persons are ordinarily economically active, but the classes and groups specified below constitute an exception to this rule :—

(1) Self-supporting persons of Agricultural Class IV,

(2) Self-supporting persons of Livelihood Class VIII, who derive their principal means of livelihood from any source other than through economic activity, viz.—

(*a*) Non-working owners of non-agricultural property,

(*b*) Pensioners and remittance holders ;

(*c*) Persons living on charity and other persons with unproductive occupations ; and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in cultivation are either cultivators or cultivating labourers. Economic Table B-I gives particulars of the population classified according to the eight livelihood classes and the three sub-classes mentioned above.

Economically active persons engaged in industries and services have been classified with reference to the nature of the commodity produced or service performed. They are further divided into three sections, viz., Employers, Employees and Independent Workers.

Economic Table B-III gives particulars of the economically active persons classified under the divisions and subdivisions of industries and services of the Indian Census Economic Classification Scheme.

Table C-I, included in this Handbook, covers the population of sample households and Tables C-II and C-IV cover a ten per cent sample population. The method adopted for extracting these samples has been described in detail in the fly-leaf notes attached to the relevant tables.

3. *Scheme of the Census Handbook.*—The Handbook has been divided into two parts ; Part I consists of three sections, namely, Section (i) containing the General Population Tables (A series), the Economic Tables (B series), Summary figures for Taluks (Table E), Tables I, II and III relating to Small-scale Industrial Establishments and Table L showing the Incidence of Leprosy, Section (ii) containing the Rural Statistics, and Section (iii) containing the Urban Statistics, and Part II containing the Household (size) (Table C-I) and Tables showing Livelihood Classes and literacy by Age-groups (C-II and C-IV), the Social and Cultural Tables (D series) and an abstract of non-agricultural occupations in the district. Among the tables included in the Handbook, Table A-IV—Towns classified by population with variations since 1901, Economic Table B-II—Secondary means of livelihood under each livelihood class and Table C-II—Livelihood classes by age-groups furnish information at the district level. The other population tables in the A series, the summary figures for taluks (Table E) and the infirmity Table L showing the incidence of leprosy furnish information for each taluk in the district with a district total. The rural statistics in Part I—Section (ii) furnish basic information in respect of every village and town arranged according to census tracts. In addition to the total population of the villages, and its distribution among the eight livelihood classes, information regarding the number of literates, the cultivated area, the number of small-scale industrial establishments under categories, textile and non-textile and the number of leprosy cases and doubtful cases has been included.

The urban statistics in Part I, Section (iii) furnish similar information except that relating to cultivated area in respect of every unit classified as city or census town in the district with ward-wise data. All other tables included in the Handbook provide information for units called census tracts with totals for the district.

4. *Census Tracts.*—A distinctive feature of the census statistics is its rural urban break-up designed with a view to compare the conditions and characteristics of the rural and urban population. The rural areas of each district were therefore kept distinct from the urban areas. For facilitating tabulation these areas were divided into a number of rural and urban tracts. As far as possible, the rural area in each taluk was constituted into a single rural tract. In a few cases however where the taluks were small in size with reference to their population, the rural areas of more than one taluk were taken together as a single rural tract. The urban tracts have been formed out o areas declared as cities and census towns in each district. Every city was treated as a separate tract. Towns other than cities were grouped together to form non-city urban tracts. Wherever possible, the towns in each taluk were constituted into a single non-city urban tract. In cases where the towns in a taluk had a population of less than 50,000 the towns in more than one taluk were grouped together to form a non-city urban tract. All the rural tracts in the State have been assigned

numbers in one series, the non-city urban tracts in another series and the city tracts in a third series. In all the tables where the data have been furnished for tracts, the tracts have been denoted by numbers that have been assigned to them. A list of tracts into which the district has been divided and the areas comprised in each are furnished in the fly-leaf note to economic Table B-I relating to the district.

The districts, taluks and villages mentioned in the Tables and Abstracts have been shown along with the census location code numbers assigned to them for purposes of census operations.

The numbers given to the Tables in this publication correspond to those given in the State Census Report.

Elaborate notes explaining the scheme of each Table have been introduced in the fly-leaf attached to each with a view to enable the reader to get a precise idea of the data furnished in the Table.

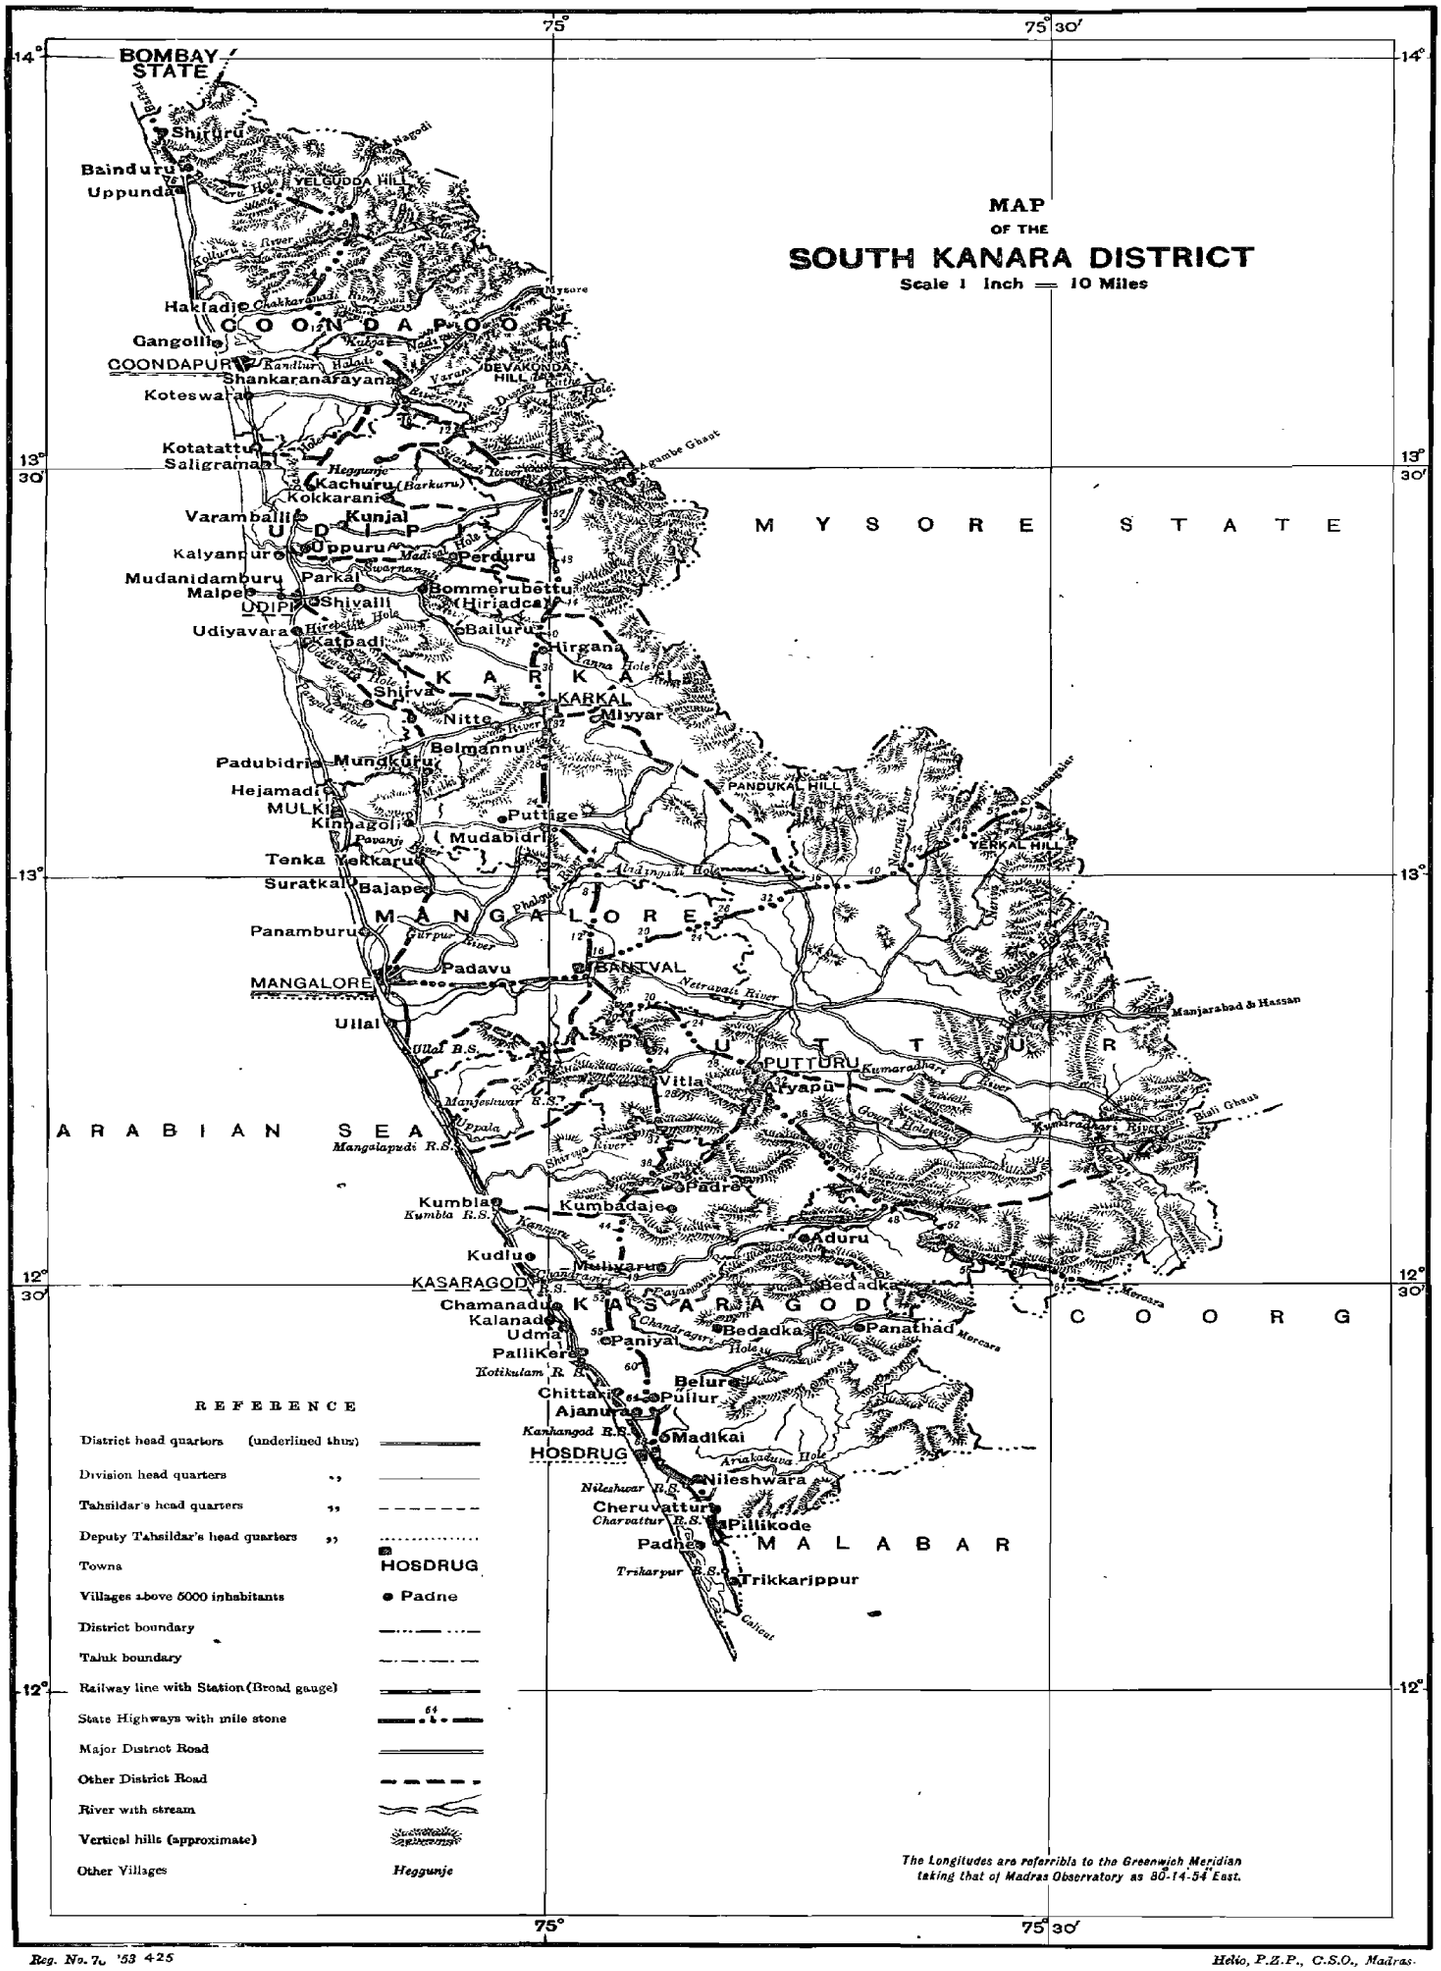

5. *Tables relating to Small-scale Industries.*—In the year 1950 a census of Small-scale Industries was instituted under the orders of the Government. The object was to get some idea about small industries, such as, cottage and home industries, small establishments, workshops, etc., where articles were produced, repaired or otherwise treated for sale, use or disposal and small mines. The enquiry was confined to establishments to which the Factories Act was not applicable. Individuals who worked on their own and did not employ other people were left out of account. From the data collected three Tables were prepared and they have been included in the Handbook. Information giving village-wise and ward-wise details of Small-scale Industries have been incorporated in the rural and urban statistics The details collected and embodied in the Tables are not to be considered accurate or exhaustive, as the enumeration staff employed had not been trained for the purpose and some cases of under-enumeration were noticed. However, the figures given in the Tables may be sufficient to give an insight into the nature of the industries prevalent in the different parts of the district.

6. Opportunity has been taken to put in a short introductory note detailing the salient points connected with the district, such as the physical features, climate, rainfall, irrigation and drainage facilities, roads and other communications, crop statistics, education, industries and other matters of general interest. The information contained in the introductory note is based on the materials furnished by Collectors of districts and Departments of Government. The District Gazetteer was also freely referred to. The relevent paragraph of the 1951 Census Report discussing the growth of population in the district has also been incorporated in the proper place.

A district map showing taluk boundaries, physical features, important roads and places with a population exceeding 5,000 is also attached.

It is hoped that this Handbook will serve as a book of reference on matters relating to the district and that it will be found useful both by Departments of Government and the public.

INTRODUCTION
TO
SOUTH KANARA DISTRICT

I. (*a*) *Situation and physical characteristics.*—South Kanara is the northern of the two districts of the Madras State on the west coast. It lies between 12° and 14° of the north latitude, and 74° 43′ and 75° 45′ of the east longitude. The district has the North Kanara district of the Bombay State on its north, the Mysore and Coorg States on its east, the Malabar district on its south and the Arabian Sea on its west. It is about 150 miles long and 25 miles broad except for a bulge towards the east in the taluk of Puttur on the south where the district is about 50 miles broad. Five small islands of the northernmost Laccadives group called the Amindivi islands are attached to the district. The five islands forming the Amindivi group are (1) Amini, (2) Kadamath, (3) Kiltan, (4) Chetlat and (5) Bitra. The revenue divisions in the district and the taluks comprised in them are given below :—

Name of revenue division.	Headquarters of the division.	Name of taluk.	Area of the taluk (in square miles).	Headquarters of taluk.
Coondapur	Coondapur	Coondapur	600	Coondapur.
		Udipi	357	Udipi.
		Karkal	629	Karkal.
Mangalore	Mangalore	Mangalore	406	Mangalore.
		Amindivi islands	3	
Puttur	Puttur	Puttur	1,246	Puttur.
		Kasaragod	766	Kasaragod.
		Total ..	**4,007**	

The villages of Hebbige, Nagodi and Kotishirur which formed part of Coondapur taluk till recently were transferred to the Mysore State in 1950. Coondapur is the northernmost taluk of the district. Karkal taluk bordering on Mysore State and Udipi taluk in the west bordering the coast lie to the south of Coondapur taluk. Mangalore taluk is situated to the south of Udipi and Karkal taluks, and Puttur taluk spreads itself to the east and south of Mangalore taluk. The southernmost taluk of the district is Kasaragod flanked by the Arabian Sea on the west, the Malabar district on the south and Coorg State and Puttur taluk on the east. The Amindivi islands forming the northern group of the Laccadives are 170 to 200 miles off the coast.

The district is a broken low plateau spreading from the foot of the Western Ghats of Mysore and Coorg to the sea, and forms a long and narrow strip of country with rapid flowing rivers. The Ghats occupy the eastern part of the district from north to south with heights ranging from 2,000 feet to 3,000 feet with peaks rising up to 6,000 feet. The Ghats are very near the sea in the north, but recede inland as they proceed south, especially in Puttur taluk. At the extreme south, the Ghats again approach the sea, but in a broken and irregular manner. In Coondapur and Karkal taluks the Ghats are precipitous and in the south they run as parallel ridges intersected by deep river valleys. A spur of the Ghats runs from Kudure-mukha, the highest peak to Jamalbad in Puttur taluk, and another spur runs up to Dharmastala in the same taluk. There are detached low hills all over the district and they are less numerous as the coast is approached. The eastern portions of Coondapur, Karkal, Puttur and Kasaragod taluks are hilly regions.

The five islands constituting the Amindivis are situated on coral shoals. Their surface is flat and not more than 10 feet to 15 feet above sea level. Coral reefs fringe the islands.

(*b*) *Rivers.*—On account of the situation of the Ghats on the eastern part of the district the rivers of South Kanara necessarily flow from east to west. The rivers and streams are numerous and with the heavy rainfall of the south-west monsoon, the volume of water is very great and the current rapid at times.

The Chakranadi, Kollur, Shirur, Uppunda, Gangoli, and the Halady are the chief rivers of Coondapur taluk.

The Sitanadi and Swarnanadi are the longest rivers flowing in Karkal and Udipi taluks. The other main rivers in Karkal and Udipi taluks are the Kalyanpur, the Udiavar and the Malukal.

The river Netravati rises in the Ghats east of Kuduremukha hills in Puttur taluk and is joined by the Kumaradhari river near Uppinangadi in Puttur taluk. The combined river under the name of Netravati flows westwards into Mangalore taluk and reaches the sea at Mangalore. At Mangalore the

Netravati joins the Gurpur river flowing to the north of it and both discharge their combined waters into a backwater forming a common estuary to the two rivers. The rivers Mulki and the Pavanje are other rivers in Mangalore taluk.

River Payaswani rises in the Ghats and flowing through Puttur taluk, joins the Chandragiri river flowing south of it, proceeds westwards across Kasaragod taluk, and reaches the sea a little to the south of Kasaragod. The other main rivers flowing across Kasaragod taluk are the Uppala, the Shiriya, the Kumbla, the Mogral, the Bekal, the Chittari and the Kariyangote. A river known as the Kavvai forms the boundary between the Kasaragod taluk and the Malabar district.

There are broad estuaries and backwaters at the mouths of the rivers. The estuary at Mangalore, at the mouth of the Netravati river, another at Coondapur at the mouth of the Gangoli, the one north of Udipi at the mouths of the Sitanadi and the Swarnanadi and the one south of Kasaragod at the mouth of the Chandragiri river are the important ones.

The Netravati is very broad at Mangalore and is studded with small islands called Kudrus which are very fertile.

(*c*) *Forests.*—The area of forests in the district is 998·80 square miles comprising nearly a fourth of the area of the district. About a third of the area of Coondapur and Puttur taluks is covered with forests. Of the total area of forests, 801·80 square miles consists of reserved forests and the rest private forests. The forests contain deciduous type with a mixture of evergreen species on the side of the Ghats. The taluk-wise distribution of the area of forests is given below :—

Name of taluk.	Area of reserve forests. Sq. miles.	Area of private forests. Sq. miles.	Total. Sq. miles.

(*d*) *Climate and rainfall.*—The district gets the benefit of both the south-west and the north-east monsoons. It has an average rainfall of 128·37 inches by the south-west monsoon from June to September and 20·79 inches during the rest of the year. The rainy season is from June to September and the cold season between October and January. Coondapur taluk situated in the north is colder in winter than the other taluks. Steep variations of temperature occur in the taluks of Puttur and Karkal. The rainfall is heavier in the hilly taluks of Karkal, Coondapur and Puttur than in the other taluks. A statement showing the normal average annual rainfall and the average number of rainy days in a year for the taluks of the district is given below :—

Name of taluk.	Average annual rainfall (inches).	Number of rainy days in a year.
Coondapur	151·08	116·5

(*e*) *Soils.*—The district contains numerous ravines and valleys of rich alluvial soil. The soils of the district are ferruginous or arenaceous and are useful for wet, dry and garden cultivation. The distribution of the soils in each taluk is given below in thousands of acres.

(*f*) *Irrigation and drainage facilities and liability to famine.*—The rainfall by itself is sufficient to ensure one crop even on lands where there are no facilities for storing water. Cultivation of second and third crops is obtained on low lying lands with the aid of the water available in spring ponds or tanks near the fields and from rivulets and rivers by the construction of temporary dams. Before 1947 there were no irrigation works in the district. In 1947 some irrigation works were started with the object of giving assured supply to the second crop. The construction of four dams and one major tank has since then been completed by the Public Works Department. One hundred and fifteen minor irrigation works such as improving spring ponds and old ruined tanks were also taken up and completed. Sixty more works are in progress.

In the district the extent under first crop which is entirely rainfed is about 369,800 acres while the extent under the second and third crops is 152,000 and 12,000 acres respectively. All the lands under the second and third crops are under minor irrigation sources or public or privately owned wells or ponds. Water got by bunding up streams is also used for raising second and third crops.

The lie of the country is generally conducive to natural drainage, although in some of the river valleys the drainage facilities are inadequate. Sometimes the backwaters swell up and inundate the rich paddy fields and cause damage. It is necessary to prevent the ingress of salt water from the sea into the fields.

Coondapur taluk.—Irrigation is usually done by the help of rain water. There are five major irrigation sources serving a total ayacut of 255 acres. Seventeen works relating to spring ponds and tanks have been completed bringing an additional 302 acres under cultivation. The taluk is not susceptible to famine.

Udipi taluk.—Crops are raised with rain water. Sixty-four minor irrigation works have been completed during recent years bringing an additional 475 acres under cultivation. Three major irrigation sources irrigate a total extent of 310 acres. An anicut across the Mulky river is under construction as a result of which 720 acres will be served in Udipi and Mangalore taluks. The taluk is not liable to famine.

Karkal taluk.—Due to heavy rainfall there is no dearth of water for the crops. One irrigation work recently completed provides irrigation for 17 acres. The taluk is not liable to famine.

Mangalore taluk.—A dam across the Pavanje river is under construction. This project will irrigate an extent of 220 acres. The construction of an anicut across the Mulky river at Palimar is in progress. This will serve an extent of 500 acres in this taluk. There is sufficient rain for agricultural purposes. Twenty-one minor irrigation works irrigating an additional extent of 340 acres have been completed. The taluk is not liable to famine.

Puttur taluk.—Enough water is available for irrigation. One work has recently been completed affording irrigation for 10 acres. There has never been famine in this taluk.

Kasaragod taluk.—Shiriya anicut system benefiting 549 acres is a new project completed in 1951. Eleven minor irrigation works giving additional irrigational facilities for 296 acres have been completed in recent years. This taluk is thickly populated and is not self-sufficient in regard to rice. Its requirements in rice are supplemented by imports from outside.

(*g*) *Area cultivated with food and commercial crops.*—The district abounds in garden lands on which cocoanuts, arecanuts, and peppervine are grown. The cocoanut grows best on sandy soil. Almost all bunds of wet lands except those close to the Ghats are grown with cocoanut palms. They are grown also on banks of rivers and on the islands in the rivers. Cocoanut is the chief product of the Amindivi islands. Pepper is grown in Kasaragod and Puttur taluks. The Vittal Magane in Puttur taluk and the north eastern portion of Kasaragod taluk, the belt of lands lying close to the ghats in Puttur and Karkal taluks are famous for arecanut palms. Jack tree is found everywhere. Tapioca is also extensively grown. The jack and tapioca are the poor man's food.

The chief food crop is paddy. Some ragi is also grown. Samai is grown mainly in Kasaragod taluk. Greengram, blackgram and horsegram are the pulses grown in all the taluks of the district. Chillies and sugarcane are the commercial crops. Gingelly, cotton and tobacco are cultivated on limited extents in some taluks.

The area cultivated with food crops, pulses and commercial crops cultivated in the various taluks of the district in 1949-50 which is the most recent normal year for the district is given in the sub-joined statement.

(*h*) *Communications*—(i) *Roads.*—A road running almost parallel to the coastline proceeds to the North Kanara district of the Bombay State. Communications between the district and the country above the ghats to Mysore and the Coorg State are maintained by several good roads. A road leads to Kozhikode in Malabar district.

Beginning from south to north the first Ghat road from Madras to Mangalore through Bangalore and Mercara goes through the Sampaji Pass entering the district in the southern corner of Puttur taluk. A road from Manjrabad and Hassan in Mysore State comes down the Siradi Ghat and runs west across Puttur taluk to Mangalore joined by the Bislighat road at Uppinangadi in Puttur taluk. A road from Chikmagalur in Mysore State comes down Charmadi or Kodekal Pass in the north eastern part of Puttur taluk and runs up to Mangalore. A road from the Agumbe Ghat in Mysore, branches itself at Someswar in Karkal taluk, one branch running across Karkal taluk up to Mangalore and the other going up to Coondapur. In Coondapur taluk two roads from Mysore come through the Hyderghur Ghat and the Kollur Pass.

The district has 1,536 miles of roads comprising 273 miles of provincial highways, 503 miles of major district roads, 284 miles of other district roads, 408 miles of village roads and 68 miles of municipal roads. Their talukwise distribution except in the case of municipal roads is furnished below :—

The condition and adequacy of the roads are described below :—

Coondapur taluk.—The length of the roads is above one mile for every 3.12 square miles of the taluk. The provincial highway roads are of little use for through communication except for about 4 months on account of the absence of bridges across the large streams intersecting them. The absence of roads is felt more in the area adjoining the foot of the Ghats. Most of the village roads are unmetalled and the surface is firm only in the hot season when it is also dusty.

Udipi taluk.—There is one mile of road for every 1.8 square miles of the country. The village roads and the unmetalled district roads get slushy in the rainy season and dusty in the hot season. Most of the roads require bridges at river crossings, particularly near the coast.

Karkal taluk.—Each mile of the road has to serve 2.8 square miles of the country. The length of the roads is not adequate. The absence of proper

communications is felt more in the hilly Malnad area. The existing roads in this area are cut up by a large number of streams rendering them useless during the rainy season.

Mangalore taluk.—There is one mile of road for every 1·8 square miles of the country. The length of the roads is adequate. On account of numerous streams which are not bridged the roads cannot be made use of all the year round.

Kasaragod taluk.—There is only one mile of road to every 2·76 square miles of the taluk. Road communications are not adequate. The condition of the roads is generally poor. There is no sufficient local labour to work on them. The Nileshwar area has no thorugh road communications at all because of unbridged rivers in the north and the south and inaccessible hills in the east.

Puttur taluk.—Each mile of the road serves 3.29 square miles of the country. Road communications are inadequate. The condition of the roads is comparatively fair. A large number of streams require to be bridged as in other taluks. The Malnad area at the foot of the ghats suffers from deficiency of road communications.

(ii) *Railways.*—There is rail link only on the coast from Tricarpur in Kasaragod taluk up to Mangalore for a distance of 59¾ miles. Mangalore is the terminus of the Southern Railway on the west coast. There is a parcels and goods out-agency at Udipi served by the Mangalore Railway station. Kasargod and Mangalore are the only taluk headquarters which are rail heads. The other taluks do not have railway.

(iii) *Post and Telegraphs.*—There is one head post and telegraph office at Mangalore. There are 25 sub-post and telegraph offices, 25 non-combined sub-post offices and 327 branch post offices in the district. Their talukwise distribution is given below :—

Name of taluk.	Branch Offices.	Non combined Post Office.	Pest and Telegraph Head Office.	Post and Telegraph Sorting Office.

II. (*a*) (i) *Growth of population.*—The particulars of population of the district and taluks in 1941 and 1951 and the percentage of variation are furnished below :—

Name of the district and taluk.	Population. 1941.	1951.	Percentage of variation.
South Kanara district ..	1,522,016	1,748,991	14·9
Coondapur taluk	157,740	174,415	10·6
Udipi taluk	250,347	290,559	16·1
Karkal taluk	153,479	171,919	12·0
Mangalore taluk	391,271	451,055	15·3
Amindivi Islands ..	6,177	7,043	14·0
Puttur taluk	220,701	242,969	10·1
Kasaragod taluk	342·301	411,031	20·1

As against the growth of population of 14·4 per cent for the Madras State in the decade 1941–1951, the growth for the district is 14·9 per cent. The Amindivi islands have registered an increase of 14 per cent which is about the same as that registered by the Malabar Islands, where conditions are exactly similar. The Increase in the mainland taluks has ranged from 10·1 per cent in Puttur taluk to 20·1 per cent in Kasaragod taluk. The large increase in Kasaragod taluk is due to the fact that undeveloped areas in this taluk which had been practically fallow till 1941, attracted during the decade, a large number of settlers from Travancore-Cochin State. The increase of 15·3 per cent in Mangalore taluk is nothing surprising, seeing that the headquarters of this taluk, viz., Mangalore is also the district headquarters and also a Port with considerable trade and industrial activity. Next to Mangalore, Udipi is the most important place in the district and the taluk is a prosperous one. There has been some industrial development in this taluk, and next to Mangalore it is the most advanced taluk in the district. Udipi town, apart from being a famous religious centre, is also an educational centre and a meeting point of roads leading to Coondapur in the north, Mangalore in the South and Karkal and Puttur in the south east. The increase of 16.3 per cent in Udipi taluk is thus fully explicable. Karkal, Puttur and Coondapur contain more hilly areas and the villages near the Ghats are malarious. This explains the smaller increases, viz., 10.1 per cent in Puttur taluk, 12 per cent in Karkal taluk and 10.6 per cent in Coondapur taluk.

(Extracted from Census Report—Part I.)

(ii) *Vital statistics.*—A statement showing the statistics of births and deaths and deaths due to various causes in the district according to the vital statistics for the decennium 1941–50 is furnished in Annexure I.

The average birth rate registered in the district, viz., 35·5 per mille is higher than that for the State, (31·7) while the average death rate of 19·5 per mille is less than that for the State (21·5). The survival rate is therefore large and indicates the rapid increase in population. The registered birth rates in the district after a steady decline from 1941 to 1945, show a rise while the death rates show a downward trend except for 1944. The comparatively high mortality in 1944 was partly due to increased incidence of fever mortality. The average mortality rate from fevers represents about 32 per cent of total deaths and decreased from 7·4 per mille in 1941–45 to 5·1 in 1946–50. The death rates from other principal diseases are normal. The maternal deaths during the last four years in the decade have steadily decreased from 8·26 per 1,000 births in 1947 to 4·23 in 1950.

(*b*) *Medical relief.*—A list of hospitals and dispensaries and the beds available in them in the various taluks of the district is furnished below :—

V. *Items of general importance.*—Mangalore and Udipi are the two municipalities in the District.

Mangalore is a sea port. Passenger and cargo steamers plying in the West Coast between Bombay and Cochin call there during fair weather. Tile, cashewnuts, pepper, cardamom, arecanuts and coffee are exported on a large scale. Malpe and Hungercetta are two natural ports in Udipi taluk. There is a lighthouse at Kaup in Udipi taluk.

There are three agricultural research stations for cocoanut farming at Nileshwar, Pilicode and Kasaragod. There is also a paddy breeding station at Jeppinamogru near Mangalore.

The district possesses several interesting architectural remains, chief among them being the Jain temples and huge stone statues. Some of the structures resemble those in Nepal and Tibet. The Statue of Gomateshwara at Karkal is 41½ feet high and is estimated to weigh 80 tons. Another statue at Venur is 35 feet high. At Hiriangadi there is a huge stone pillar (Manastamba) with exquisite carvings. At Mudabidri there is a Jain temple with 1,000 stone pillars ; and several other Jain temples. This place is a famous pilgrim centre for Jains. The place is as scared to the Jains as Banares is to the Hindus.

At Mangalore, the headquarters of the district, there is the famous temple of Mangaladevi from which the town derives its name and the historic temple of Sri Manjunath at Kadri Hills with its eight tanks of spring water, the monastery, and the caves of contemplation for the ascetic order founded by Guru Machendranath and Goraknath. On the north-western corner of the town is a miniature fortress called Sultan's

Battery built by Tippu Sultan. In the heart of the town is another monument called the Idgah built by Tippu Sultan. Near this lies the magnificent pile of buildings of the St. Aloysius College with a beautiful chapel which contains excellent specimens of Italian paintings.

At Barkur in Udipi taluk there are traces of the ruins of the palaces of the Bairava Arasus (Jain Kings). The famous temple of Sri Krishna founded by the famous Saint and Philosopher Sri Madhavacharya attracts a large concourse of pilgrims throughout the year.

The famous temple of Sri Mukambika founded by Sri Sankaracharya is situated in Kollur village of Coondapur taluk. The other two famous temples of the district are those of Sri Subramanya in Subramanya village and Sri Kshetra Dharmastala in Dharmastala village of Puttur taluk. There is a fort at Bekal in Kasaragod taluk reputed to have been built by Ikkeri kings.

A—GENERAL POPULATION TABLES

A-I—Area, Houses and Population.

This table shows for the rural and urban areas of each taluk and for the district, the area, the number of inhabited villages and towns, occupied houses and the total population with distribution by sex.

2. The district area shown in column (2) of this table is that supplied by the Surveyor-General of India. Area figures furnished by the Central Survey Office, Madras, have been adopted for the taluks. The total area of the taluks as furnished by the Central Survey Office, Madras, shown within brackets in column (2) differs from the area of the district furnished by the Surveyor-General.

3. "Village" is the revenue administrative unit within defined boundaries. This table gives particulars in respect of all villages containing one or more groups of habitations. Villages with no habitations are not included in this table.

4. "Town" is a place of usually not less than 5,000 inhabitants, possessing distinct urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated.

5. "House".—Every dwelling with a separate main entrancehas been treated as a house for census purposes.

25. SOUTH KANARA DISTRICT.

A-II—Variation in Population during fifty years.

This table compares the population of the district and of each taluk in the district as ascertained at the Census of 1951 with the corresponding figures of the five previous censuses. The figures recorded at the previous censuses have been adjusted for subsequent territorial changes, if any, in order to afford a correct basis for comparison. The adjusted figures show the population of taluks and the district as constituted at present.

2. The main territorial changes that occurred during the decade is the transfer of the following villages to Mysore State from South Kanara district :—Hebbige, Nagodi and Kotishirur.

The district total affected on account of the transfer represents a deduction of 1,500 persons (843 males and 657 females).

This table shows the population and distribution of sex of cities and towns of the district at each of the last six enumerations.

2. Mangalore is the only town which has been treated as city for the 1951 Census.

3. The cities and towns have been arranged in this table according to their population in 1951 under the following six classes :—

Class.	Limits of population.
I	1000,000 and over.
II	50,000 to 100,000.
III	20,000 to 50,000.
IV	10,000 to 20,000.
V	5,000 to 10,000.
VI	Under 5,000.

4. Where possible, the former population of places treated for the first time as towns in 1941 and at this Census, has been extracted from Village Statistics. Where this could not be done, the columns have been left blank.

5. The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area.

6. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C), respectively within brackets.

7. Towns newly appearing at the Census have been printed in *italics*.

25. SOUTH KANARA DISTRICT.

A-V—Towns arranged taluk wise with Population by Livelihood Classes.

This table shows the analysis of the Urban population in towns by *livelihood classes, instead of by communities* as in the previous censuses.

2. Under the Indian Census Economic Classification Scheme, the people have been divided into two broad livelihood categories, viz., the agricultural classes and the non-agricultural classes. There are four agricultural classes and four non-agricultural classes as shown below :—

(i) *Agricultural classes.*

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly unowned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

(ii) *Non-agricultural classes.*

Persons (including dependants) who derive their principal means of livelihood from—

V. Production (other than cultivation).

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

3. In this table the figures for the agricultural livelihood classes I to III are not given separately but have been clubbed together.

4. The towns in each taluk of the district are arranged in the order of their population as in Table A-IV.

5. Municipality, Panchayat and Cantonment are indicated by the use of the letters (M), (P), (C).

6. For the definition of a "Town" see fly-leaf to Table A-I.

7. Towns newly appearing at this census have been printed in *italics*.

E—Summary Figures by Taluks.

The data contained in this table have been given for each taluk in the district.

2. The areas shown in column (2) of the table for the district and the taluk "total" are the latest figures furnished by the Central Survey Office, Madras. The areas given for "Urban" are those furnished by the District Officers. The areas for "Rural" have been obtained by deducting the figures for "Urban" from those for district and taluk "Total".

3. The district area furnished by the Surveyor-General, India, which has been shown in Table A-I, could not be adopted in this table as talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ in varying degrees from those furnished by the Central Survey Office, Madras.

4. Previous census figures of population have been adjusted with reference to the transfer of enclaves. The rural and urban population figures have been taken as they were at the 1941 and 1931 Censuses and as they are at the present Census, regardless of the changes of rural areas into urban areas and *vice versa* from census to census, for the purpose of calculating percentage variation between 1931 and 1941 and between 1941 and 1951. For calculating density for "Rural" and "Urban" for 1941, the areas of the towns newly formed at the present census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for "Rural", in the districts and taluks where new towns have been recognized.

5. In respect of Amindivi Islands which have no urban areas the figures represent the total alone.

25. SOUTH KANARA DISTRICT.

B—ECONOMIC TABLES.

B-I—Liveli hood Classes and S-ubclasses.

This table shows by rural/urban break-up for each census tract in the district the distribution of population, sex-wise, among the eight livelihood classes and the three sub-classes, viz., self-supporting persons, non-earning dependants and earning dependants under each livelihood class into which the economic characteristics of the people have been classified under the I.C.E.C. Scheme—vide fly leaf to Table A-V.

2. The areas comprised in each of the Census tract into which this district has been delimited for the purposes of Census tabulation are given below :—

City Tracts.

No. 36—Mangalore city in Mangalore taluk.

3. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

4. " The principal means of livelihood " is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting person, it is the only means of livelihood.

5. A person has been regarded as " Self-supporting " if the income secured by the person is sufficient at least for his (or her) own maintenance at the level of living and adopted by him (or her) at the time of the Census. The income secured may be in cash or kind. Anyone who is not a " Self-supporting " person in this sense has been regarded as a dependant. An " earning " dependant is a person who secures an income which is not sufficient to support him (or her). A person who does not secure any income either in cash or kind, is a " non-earning dependant "

6. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include " unpaid family workers " or persons who take part along with the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

7. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B-III :—

(1) Persons living principally on income from non-agricultural property ;

(2) Persons living principally on pensions, remittances, scholarships and funds ;

(3) Inmates of jails, asylums, alms houses and recipients of doles ;

(4) Beggars and vagrants ; and

(5) All other persons living principally on income derived from non-productive activity.

B-II—Secondary means of Livelihood.

This table gives for the district the number of persons, in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood ; and cross classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants and self-supporting persons who have no secondary means of livelihood are excluded from this Table.

25. SOUTH KANARA DISTRICT.

B-III—Employers, Employees and Independent Workers in Industries and Services by Divisions and Subdivisions.

This table gives figures for each Census tract in the district. The areas comprised in each census tract denoted by its number in Column (1) have been specified in the fly-leaf to Table B-I. In this Table the self-supporting persons in the four Non-agricultural classes given in Economic table B-I are distributed in the various divisions and subdivisions of Industries and Services under the Indian Census Economic Classification Scheme, according to their secondary Economic Status, namely, employer, employee and Independent worker.

2. (An) Employer (is) a person who employs other persons in order to carry on the business from which he secures his livelihood and pays them a salary or wage in cash or kind.

3. (An) Employee (is) a person who ordinarily works for some other person for a salary or a wage, whether in cash or in kind in order to earn his livelihood.

4. (An) Independent worker (is) a person who works on his own without being employed by anyone for a salary or wage and who does not also employ anyone else in order to earn his livelohood.

5. Under the New Indian Census Economic Classification Scheme all Employers and Independent workers have been classified with reference to the Commodity produced or services performed by them individually. As regards Employees, all persons engaged in Production, Commerce or Transport (and not being Domestic servants) have been classified with reference to their own activity. and without reference to that of their employer. Domestic servants have been classified in one subdivision without reference to the nature of their work. All other Enployees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every discription) have been classified with reference to the commodity produced or services rendered by their Employers.

6. The Non-agricultural classes classified in Economic Table B-I, correspond to the divisions and subdivisions into which they are distributed in this table as follows :—

Livelihood class.	Divisions and Subdivisions of the Indian Census Economic Clasification Scheme.
Class V—Production other than cultivation.	Division 0—Primary industries not elsewhere specified.
	Division 1—Mining and quarrying.
	Division 2—Processing and manufacture of foodstuffs, textiles, leather and products thereof.
	Division 3—Processing and manufacture—Metals,c hemicals and products thereof.
	Division 4—Processing and manufacture—Not elsewhere specified.
Class VI—Commerce	Division 6—Commerce.
Class VII—Transport	Subdivision 7·0 to 7·4 of Division 7—Transport, storage and communications.
Class VIII—Other services and miscellaneous sources.	Division 5—Construction and utilities.
	Division 7—Transport, storage and communications with the exception of subdivisions 7·0 to 7·4.
	Division 8—Health, education and public administration.
	Division 9—Services not elsewhere specified.

Class VIII also includes persons who derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity), e.g., income from investments, Pensions and family remittances, proceeds of begging and other un-productive activities. These are not however, included in this table as it is limited to economically active persons engaged in Industries and Services. Hence there will be difference to this extent between the total self-supporting persons of the Non-Agricultural class in Economic Table B-I and the total of this table. The reconciliation will be effected by adding the figures given in the next paragraph.

SMALL-SCALE INDUSTRIES.

I—Distribution of Small-scale Industries by Tracts.

This table gives for each Census tract, the number of small-scale industrial establishments under categories; non-textile and textile, with details for perennial and seasonal establishments.

2. The table covers only those establishments, to which the Factories Act does not apply. It relates, therefore, to all associate activities, where articles are produced, repaired or otherwise treated for sale, use or for disposal. Small mines not covered by the Indian Mines Act have also been included. The table does not include plantation industries of any kind.

3. The areas covered by each Census tract in the district have been given in the fly-leaf to Table B-I.

Tract No.	Total number of establishments.			Number of non-textile establishments.				Number of textile establishments.

Section (ii)

Rural Statistics.

This is an abstract giving a complete list of villages and towns in each taluk in the district with sex-wise distribution of population in each livelihood class in the villages alone. Among the other items of statistical information furnished, those relating to occupied houses, households, inmates of institutions and houseless persons and literates, were obtained from the National Register of Citizens prepared for each village from the information recorded in the enumeration slips. Village-wise statistics of textile and non-textile establishments collected in the course of the Census of Small-scale Industries and the number of leprosy cases and doubtful cases are also given in the abstract.

2. For detailed explanation of the livelihood classes I to VIII see fly-leaf of general population Table A-V.

3. The areas concerned in each Census tract in the district has been specified in the fly-leaf to Table B-I.

4. A list of villages with a population exceeding 5,000 but treated as rural is given below: —

C-IV—Age and Literacy.

This is yet another table prepared in respect of the ten per cent samples of the general population (vide fly-leaf to Table C-II).

2. Age-groups 0 and 1 to 4 given in Table C-II have been combined into one age-group, and the age-group 5 to 14 has been split into two sub-groups 5 to 9 and 10 to 14. Persons of age-group 0 to 4 are treated as illiterate.

3. The figures are given for each Census tract (vide fly-leaf to Table B-I) in the district, but not analysed by religion as in the previous Censuses.

4. 'Literates' are those who are able to read and write any simple letter in any language.

5. Persons who are partly literate, i.e., persons who are able to read only, have been included among the illiterates. Details for such persons are given below:—
