3.	Flora and Fauna	34
4.	Reprint of Extract	40

PART II

SERIES 1—GENERAL POPULATION TABLES

1.1 A-I	Area, Houses and Population	51
1.2 App I	Statement showing territorial units constituting the present set up of the district	52
1.3 App I	Number of villages with a population of 5,000 and over and Towns with a population under 5,000	52
1.4	House less and Institutional population	53
1.5 A-II	Variation in population during sixty years	53
1.6 A-III	Villages classified by population	53
1.7 A-IV	Towns (and town-groups) classified by population in 1961 with variation since 1901	54

GENERAL ECONOMIC TABLES

1.8 B-I	Workers and non-workers classified by sex and broad age groups	55
1.9 B-III Part A	Industrial classification of workers and non-workers by educational levels in urban areas only	57
1.10 B-III Part B	Industrial classification of workers and non-workers by educational levels in rural areas only	59
1.11 B-IV Part A	Industrial classification by sex and class of workers of persons at work at household industry	62
1.12 B-IV Part B	Industrial classification by sex and class of workers of persons at work in non-household industry, trade, business, profession or service	63
1.13 B-IV Part C	Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation	67
1.14 B-V	Occupational classification by sex of persons at work other than cultivation	72
1.15 B-VI	Occupational Divisions of persons at work other than cultivation by sex, broad age groups and educational levels in urban areas only	81

		Pages
1.16 B-VII Part -A	Persons working principally (*i*) as cultivators (*ii*) as agricultural labourers or (*iii*) at household industry classified by sex and by secondary work (*i*) at household industry (*ii*) as cultivator or (*iii*) as agricultural labourer	84
1.17 B-VII Part -B	Industrial classification by sex of persons working in non-household industry, trade, business, profession or service who are also engaged in household industry	86
1.18 B-VIII Part-A	Persons unemployed aged 15 and above by sex, broad age groups and educational levels in Urban areas only	91
1.19 B-VIII Part-B	Persons unemployed aged 15 and above by sex and educational levels in Rural areas only	92
1.20 B-IX	Persons not at work classified by sex, broad age groups and type of activity	92
1.21 B-X	Sample households (*i*) engaged neither in cultivation nor household industry, (*ii*) engaged either in cultivation or in household industry but not in both and (*iii*) engaged both in cultivation and household industry for all areas	94
1.22 B-XI	Sample households engaged in cultivation classified by interest in land and size of land cultivated in Rural and Urban areas separately	95
1.23 B-XII	Sample households engaged in cultivation only classified by size of landfcultivated and number of family workers and hired workers in rural and urban areas separately	96
1.24 B-XIII	Sample households engaged both in cultivation and household industry showing size of land cultivated classified by principal household industry in Rural and Urban areas separately	100
1.25 B-XIV Part -A	Sample households engaged only in household Industry classified by principal household Industry in all areas—Households classified by major groups of principal household Industry and number of persons engaged	102
1.26 B-XIV Part -B	Sample households engaged only in household Industry classified by principal household Industry in all areas—Households classified by minor groups of principal household Industry	105
1.27 B-XV	Sample households engaged both in cultivation and household industry classified by size of land in rural and wrban areas separately	106
1.28 B-XVI	Sample principal household industry classified by period of working and total number of workers engaged in household industry in all areas	110
1.29 B-XVII	Sample households, classified by (*i*) number of male and female members by size of households and (*ii*) engagement (*a*) neither in cultivation nor in industry (*b*) in Household industry only and (*c*) in cultivation sub-classified by size of land cultivated	118
	SOCIAL AND CULTURAL TABLES	
1.30 C-I	Size and composition of sample households—composition of sample house holds	120
1.31 C-II	Age and Marital Status	121
1.32 C-III Part-A	Age, Sex and Education in all areas	126
1.33 C-III Part-B	Age, Sex and Education in Urban areas only	127
1.34 C-V	Mother tongue (alphabetical order)	128
1.35 C-VII	Religion	137

PREFACE

It has taken years of efforts in compiling, checking and rechecking of our material before these are printed and come in the hands of readers. My colleagues and I have spent quite a few years going around the district and collecting informations. I hope this comes upto the expectations of readers as a single best source of information on the Sirmur District.

Considerable material has been collected over several years to make this a comprehensive reference book. In the words of Ibbetson in his preface to his very famous Punjab Census Report of 1881, "A Census Report is not meant merely for the information of the Secretariat; it is intended to be constantly referred to in every office of the Province. The mere results would ill serve this end in the absence of an interpreter. It is of but small advantage to cast voluminous tables of naked figures at the heads of District Officers, without at the same time explaining what they represent, which can be done by no one but him who compiled them, and drawing from them the more important conclusions to which they lead, which few will draw but he whose special business it is to do so".

This comprehensive reference book has to be a handy reference book for the administrators, Planners and Scholars. It is not meant to be taken up for leisurely reading but to obtain some specific information. Therefore, it is very necessary that this should be complete, should be brief and should be very relevant and precise. We have collected material from many sources and many old records had to be consulted and then checked and re-checked over long period.

It is the keenness of Shri Asok Mitra, ICS, Registrar General, India to have guided us in this work. His devotion to the Census Organisation is only matched by his versatility and many of us have only achieved a certain degree of completeness in our work because of his interest and guidance.

Different parts of the volume present the village-wise statistics and brief write-ups on Education, Industry, Health, Community Development, Animal Husbandry and Co-operation. Apart from certain data, most of the other data, particularly regarding village directory is collected by us from 1961 Census Schedules. I have heavily leaned on old records, files, notes and reference books and have also toured this Pradesh fairly extensively year-after-year. Sirmur is the District which has undergone some very obvious changes. There are some good roads, hospitals, educational facilities, agricultural practices have all given this District surprises which many people had never anticipated. The interior and inaccessible areas continue to receive due attention.

In this book I have been assisted by devoted and hard working colleagues. They have burnt their mid-night oil and have toiled on their holidays apart of being to difficult areas over the Pradesh. And with the kind help that I have received from the Government of India Press, Simla, it gives me a great pleasure and silent pride to see this report completed. This report should have been printed much earlier but for a number of reasons beyond control.

Right from the highest to the humblest I and my colleagues have received appreciable considerations. With well over nearly 50 publications in hand, readers would realise that it was a pretty arduous and at times seemed back breaking. This was an opportunity once in our life time and we were obsessed to produce something of enduring value. I do not know how far we have succeeded and leave this to my readers to judge. I hope my readers would find this of interest.

Boswell Simla-5

RAM CHANDRA PAL SINGH

PART I

INTRODUCING THE DISTRICT

Sirmur District comprises of the erstwhile Sirmur State, which merged into Himachal Pradesh on the 15th April, 1948. This did not involve any change of boundaries. The district contains four tehsils—Pachhad, Rainka, Nahan, and Paonta; with headquarters at Nahan. According to 1961 Census, the population is 1,97,551 persons. This represents 108,093 males and 89,458 females. Sirmur stands fourth in order of population and fifth in order of area among the districts of Himachal Pradesh. There are 974 villages, of which 965 are inhabited. The remaining 9 are uninhabited. The village, with the highest population according to 1961 Census is Bhangani in Paonta Tehsil with a population of 2,125 followtd by Gundahan in Rainka Tehsil with a population of 1920 and Shampur Gorkhuwala in Paonta Tehsil with a population of 1,458.

There are two towns, Nahan and Paonta, having a population of 12,439 and 1,833. Nahan has been a town since 1881. Paonta was declared a town in 1951.

The Statement given below shows the Size and Population of each Tehsil

District/Tehsil	Area in Sq. Km.	No. of villages		Population per Sq. mile	Population
		Inhabited	Uninhabited		
1	2	3	4	5	6
Sirmur District	2,957·0	965	9	173	197,551
Pachhad Tehsil .	820·0	399	2	127	40,124
Rainka Tehsil .	886·8	230	2	186	63,655
Nahan Tehsil .	554·3	149	4	152	32,527
Rural .	543·9	149	4	96	20,088
Urban .	10·4	..	..	3,110	12,439
Paonta Tehsil .	695·9	187	1	228	61,245
Rural .	694·3	187	12	222	59,412
Urban .	1·6	..	..	2,864	1,833

*It is believed that the name Sirmur was derived from the senior position which the State enjoyed among the neighbouring States, the literal side of this theory being that the word "Sir" in vernacular means "head".

* 1. Sirmur State Gazetteer, Part A.

2. 1951 Census, District Census Handbook, Sirmur.

The early history of Sirmur State with its legends has been described in full details in "Sirmur State Gazetteer, Part A, 1934", published by the Punjab Government in 1939. Extracts from it are reproduced at Appendix III for the interest of readers.

Physical Aspects

The district lies in the outer Himalayas. It is situated between 77°01'12" and 77°49'40" East longtitude and 30°22'30" and 31°01'20" North latitude. Its extreme length from North to South as the crow *flies* is about 50 miles and its width from East to West measures about 43 miles. The area according to the Surveyor General of India is 1,095 square miles.

Boundaries—It is bounded on the north by the Mahasu District and on the East by the Tons river, dividing it from Dehradun District of Uttar Pradesh. The Jamuna river also separates it on the south-east; and on the south by the Ambala District of the Punjab. On the West, it is bounded by the Punjab, while on the North-West by Mahasu District.

Configuration—Broadly speaking, the district is hexagonal in shape. The entire tract is mountainous save for a valley in Paonta Tehsil, commonly known as Kiarda Dun. This valley is about 25 miles long and 6 to 13 miles broad and is mostly flat and plain. The mountainous portion is characterised by deep valleys lying between ranges of varying elevations.

Hills—The hills and mountains that intersect or exist in the district are a part of the outer Himalayan ranges. The range runs from 1,500 feet to 11,982 feet in altitude. The rise from the lowest point to the highest is not abrupt. There is, to begin with the plain of Kiarda Dun, which registers but a mild rise in parts. Then low hills begin and these are succeeded by higher hills, with breaks in between. These lead upto the Chur range and the Chur peak, the highest of them all. The main hill ranges and ridges are:—

Cis-Giri

1. Sain Dhar or range which lies parallel to the Giri and runs from north-west to south-east;

2. The Dharti or little range which forms with the Sain Dhar, the basin of the Jalal river;

3. The low range which runs from near Kala Amb to the south of Nahan and forms with the Dhartian open valley through the western half of which flows the Markands.

Trans-Giri

1. The Chur peak, 11,982 feet high;

2. The Dhar-taproli-jadol, with its westerly spurs, the Dhar Pain Kuffar and Dhar Deonthi running to north and north-west of Chur Dhar;

3. The Dhar Nauhra towards south-east to Haripur fort 8,802 feet;

4. The Dudhan Dhar which runs north-west from the Chur peak;

5. The Dhar Nigali runs from the Chur Dhar. From Haripur fort it runs southwards under the name of Dhar Nigali;

6. Dhar Kamrau is a continuation of Dhar Nigali and on its turning to east it is called Dhar Kamrau;

7. Dhar Shilai runs north of and parallel to the Dhar Kamrau. The valley of Neweli or Naira river lies between these hills.

River System

Leaving apart small and insignificant streamlets that flow here and there, there are six streams, big and small deserving mention.

1. *The Jamuna*—The Jamuna rises from the Jamnotri glacier in the Himalayas at a height of 26,000 feet. It flows on the eastern boundary of the district for a distance of about 14 miles, from Majri to Kaunch and then enters Uttar Pradesh. It separates Kiarda Dun from the Dehradun and forms the boundary line between this district and the Uttar Pradesh.

Within the boundary of this district the estimated maximum width of the river is 300 feet and the depth about 20 feet but this limit is far exceeded during the rainy season.

The Hindus consider it a sacred river and take a dip in its holy waters on certain auspicious occasions.

The main tributories of the river in the district are the Tons, Giri and Bata.

In 1924 the Jamuna rose to a record height and several villages were damaged and arable lands swept away in Paonta Tehsil.

2. *The Giri*—The greater portion of the district is drained by the Giri or its tributories.

It takes its rise in the hills of Kotkhai and flows through the hills of Jubbal and Ratesh parts of Mahasu District and enters the district on its south-west side at village Keonthal. It continues its course for about 25 miles, forming the boundary with the Keonthal area of the Mahasu District. At village Nandoplasa, it takes south-east direction and divides the district into two parts. It flows in the district for a distance of about 55 miles and falls in the Jamuna at Rampur Ghat in Paonta Tehsil.

3. *The Tons*—The source of this river lies in the Jamnotri mountain. After coursing through the territories of Jubbal and Jaunsar, it enters the district near village Koti. separating it from the Jaunsar area. It flows in the district for about 30 to 33 miles and joins the Jamuna near Khodar Majri. The principal tributories of the Tons are Bhagal, Neweli or Nair and Sainj.

4. *The Jalal*—The Jalal rises near village Bani below Nehi in Tehsil Pachhad. It forms a dividing line between the Sain and the Dharti. It falls into the Giri River at Dadahu. It is generally fordable and rarely unpassable except when in floods which pass way soon.

Important tributories of the Giri are the Jala, which joins it at Dadahu below Sati Bagh, Nait and Palar, which rise on the southern slopes of the Chur peak.

The river Giri has a legend regarding its origin. The saying is that in the heary part, some saint was wandering from place to place in the Himalayas with Ganges-water in his "Karmandal". When he reached the place where the Giri rises, the Karmandal miraculously fell from his hand spilling over its contents. Shocked over the spilling out of the holy Ganges water, the saint exclaimed. "Ganga Giri". Instantly, the legend goes. there sprang at that spot a spring of water and this spring was named after this incident and after this exclamation, as Giri "Ganga", later to be simply called "Giri".

5. *The Markanda*—Rises at Baraban in the hill of Katasan pass below the temple of Katasan Devi. It flows from south-east to south-west for about 15 miles within the district and then passes on to Ambala District at Kala Amb where it is quite wide. During floods it causes loss to the land.

6. *The Bata*—This river arises from Siori spring in the Dharti range in Nahan Tehsil. After taking an easterly direction opposite to the course of the Markanda and dividing Kiarda Dun into two parts, it joins the Jamuna at Bata Mandi. It is a perennial stream. Usually fordable except during rains.

Lakes

The only lake in the district is at Rainka. This is associated with Rainka Devi, mother of Parashuram, an incarnation of God. This sacred lake slumbers in picturesque surroundings, in the northern area of Giri Par. It is situated close to Dadahu, mirroring in its still waters, the heavens and the mountain wilderness that surrounds it.

Balgobind quotes in the "Life of Raja Sir Shamsher Prakash":—

> "To the banks of his lake, all wildness and mystery, all peace and silence, where no voice is heard but that of the music of winds and leaves, world-weary men and women, longing for the rest and beauty of passionless eternal things,—come age after age and still come on long pilgrimages to drink deep of solitude and mediation and return heart healed and renovated to the plains, their homes."

The lake is about 1½ to 2 miles long and the breadth varies at different places, the average being about 100 feet. The estimated depth of the lake in the central portion is anything from 36 to 70 feet.

To the north of the lake stands the high hill of "Jamdagnia-Tibba". The altitude ranges from five to six thousand feet. On top is a small hearth or fire-place believed to be the "Hawan-kund" of the Jamdagni Rishi who used to practise 'Tapasya' there. The colour of earth of this place or for that matter of the whole hill approximates to grey ash. It is about six miles from the lake approachable through a path running via Jammu village. Nothing but grass grows on the hill.

At the foot to the south of this lake lies another small lake known as "Parshuram Tal", fed by the main Rainka lake. This generally dries up in summer. To the south of this Tal is the temple of Parshuram. A fair takes place during Kartika, after Diwali, commencing from 11th day of the light half of the moon to the 15th day. Besides the local population, people from the plains visit the fair and take a dip in the waters of the holy lake. The gathering of the fair goes upto 10,000 or more. More than 600 temporary stalls are set up by shop-keepers. A brisk trade in metal wares, cloth and other sundry goods is carried on. The hill people bring giner, chillies, walnuts, maize, flour, urd and ghee to sell.

Legend has it that Parshuram killed his mother Rainka by command of his father Jamdagni. But she was again restored to life. It is the same Parashuram, who is said to be the sixth incarnation of Vishnu and extripated the Kashtrya race twenty-one times with the help of his mighty axe. A little above the lake and the smaller Tal, three miles, in Jammu village, stands another temple of Parashuram. In fact, Parashuram is the protecting deity of Sirmur and it is in him that high and low have supreme faith.

Climate—The district possesses a variety of climate varying according to elevation, summer months are exceedingly hot in Dun and water is scarce. The hilly areas have a temperated climate, though the Dharti range is hot. The Trans-Giri tract, Pajhota and Sain are cool even in the hot weather. In Trans-Giri area snow falls every winter and occasionally in Sain, while in Dharti it falls rarely.

The following statement taken from the Forest Working Plain shows the maximum and minimum temperature recorded at Nahan and Paonta from 1952 to 1954:—

Month	Nahan						Paonta					
	1952		1953		1954		1952		1953		1954	
	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum

(a)—data not available.

/P(N)3HPGovt.—3(a)

Table giving the highest, lowest, mean maximum and mean minimum temperature recorded at Dhaulakuan during 1960.

Season-wise distribution of rainydays

1. Nahan
2. Paonta
3. Dadahu
4. Sarahan
5. Dhaula Kuan
6. Bagthan
7. Banethi
8. Sangrah

The following table gives the distribution of annual rainfall over different tehsils since 1951:—

Year	Nahan	Paonta	Rainka	Pachhad (in inches)
1951 . .	53.12	54.09	54.13	48.61
1952 . .	45.10	55.31	35.13	43.53
1953 .	51.48	71.58	61.84	63.40
1954 . .	64.40	79.06	93.66	64.91
1955 . .	65.42	66.32	76.59	80.12
1956 . .	71.97	77.50	91.75	79.32
1957 . .	56.07	60.80	78.13	60.65
1958 . .	23.01	79.42	62.62	75.96
1959 . .	127.16	102.90	67.11	49.24
1960 . .	65.18	97.56	61.66	57.07

The table gives an idea of season-wise mean rainfall for the district, as also for the individual rain gauge stations:—

Seasion-wise Mean Rainfall (inches)

Raingauge Station	Hot Weather (March-May)	Monsoon Weather (June-Septem-ber)	Post Monsoon weather (October-December)	Winter (Janu-ary-Feb-ruary)	Total
1	2	3	4	5	6
Nahan .	2.45	49.05	5.24	4.67	62.52
Paonta . .	3.02	63.15	6.84	4.16	77.18
Dadahu .	3.79	52.99	7.02	5.75	69.55
Sarahan .	3.77	46.88	6.79	5.95	63.40
Dhaulakuan .	1.92	59.10	4.01	5.51	69.54
Bagthan .	2.50	32.61	2.54	6.76	44.41
Average for the District 1951—59 .	3.05	53.88	5.95	5.00	67.88

*Quarterly Bulletin of Statistics (quarter ending September1960).

The following is the table of season-wise number of rainy days in respect of six rain-recording stations:—

Season-wise distribution of rainydays

Raingauge Station	Hot weather (March-May)	Monsoon weather (June-Septem-ber)	Post Monsoon weather (October December	Winter (Janu-ary-Feb-ruary)	Total
1	2	3	4	5	6.
Nahan . .	5	47	5	8	65
Paonta . .	6	48	5	7	66
Dadahu .	6	47	5	7	64
Sarahan .	8	47	6	8	71
Dhaulakuan .	4	49	4	7	64
Bagthan .	6	36	4	8	55
Average for District 1951-59	6	47	5	7	65

*Quarterly Bulletin of Statistics (quarter ending September, 60).

The rainy season usually begins in June and lasts till the middle of September. A shower or two are received in April and May. The April and May rains may also bring hailstorms.

It would be observed from the tables that of the total mean annual rainfall of 67.88 inches the district, about 53.88 inches or 79 per cent is recorded during monsoons. Of the rest, post monsoon period accounts for 9 per cent (5.95 inches) winter season 7 per cent (5 inches) and the hot weather 5 per cent (3.05 inches).

During monsoons, rains are more active during July and August. These months account for 80 percent of the rainfall during the season. Except Sarahan which receives more rainfall in July, all other stations have registered higher rainfall for August.

Forests

The area under forests in the district is 566.25 sq. miles. According to "Forests types of India and Burma" by H. G. Champion, the belts and patches of forests that can be recognised in the tract are Dry Siwalik Sal, Moist Siwalik Sal, Moist high level Alluvial Sal, Sub-Tropical pine (Chir forests), Khair-sissu forests and Ban Oak forests.

Forest Working Plan—Dry Siwalik Sal is ill distributed and is met with all over the Siwaliks in sand and conglomerate outcrops at an elevation of 1,000 to 2,500 feet. Moist Siwalik Sal also occurs mainly in Siwaliks where the soil and moisture conditions are better. This type is found at altitudinal range of 1,000 to 3,500 feet. Moist high level Alluvial Sal is found mainly on deep, rich and old soil of the Dun and is well represented

by forests like Gorakhpur Rajban, Lamotua, Kukron and Bias. Khair Sissu forests are found along all the big rivers like Jamuna and Giri on new sandy or alluvium soil. Ban Oak forests occur at an elevation of 5,000 to 6,000 feet. There is a wide overlap in sheter wood places with sal and in spurs with chir at altitudes from 300 to 5,000 feet. Chir pine forests are found on the Dharti ridge which runs parallel to the Sain Dhar in the south. Chir pine by its nature forms almost pure forests of its own. In shady places, low level Oak Casia fistula, Ano-grassus latifolla and other broad leaved species are found, though its universal associates are Carrissa Spinarum and Adhatoda Vasica.

To the south of Chur Dhar, high level forest containing for the most part Oaks, Firs, Yew, Birch and Blue Pine form a belt of about 20 miles length and of width varying from 1 to 5 miles. They provide some grazing for the buffaloes of the right holders.

Deodar forests mixed with Kail, Oak and Chir Pine are found to the south of the alpine forests and to the north of the Giri stream. Sain Dhar forests are situated between the Giri stream in the north and the Jalal stream in the south. The spur is generally denuded of the valuable forests and is covered with scrub jungle, chir pine being found in small patches.

The timbers mostly in demand are Sal, Sain, Chir, Sissu, Tun and Khair, Sal and Sain scantlings are transported through the neighbouring hill streams or through the Jamuna river to Abdullahpur depot. Bamboos are used locally in villages for making mats, baskets and furniture.

Resin extracted from the chil forests is supplied to the Himachal Rosin and Turpentine Factory, Nahan. Other minor forests products are bhabbar grass, gum, hides, horns and munj grass.

Flora and Fauna—Flora and Fauna found in the district have been given at Appendix II.

Geology

Except the north-eastern and south western corners of the district, the entire district has been surveyed. The formations of the area belong to the sub-Himalayan and Himalayan groups. Sub-Himalayan group comprises of unmetamorphosed Tertiary rocks and the Himalayan group contains metamorphosed formations of pre-tertiary age ranging down to Archaeans. Order of super-position of the formations exposed into the district is as follows:—

Sub-Himalayan Group		Recent and Sub-recent	Alluvium, flood plain Terrance formation, gravels and dun, deposits.
	Diocene to Pleistocene	Upper Siwaliks	Boulder conglomerate, Pinjor Sandstones. Sand-rock and pebble bed.
	Lower to Middle Miocene	Lower Siwaliks	Coarse to medium micaceous Sandstones, red clays, calcareous pene-contemporaneous conglomerate and pebble beds.
		Kasauli stage	Freshwater grey sandstone often micaceous, minor Clay intercalation usually of grey or violet colour with fragmentary plant remains.
	Lower Miocene	or (Gansa Limestone)	Purple and green sandstones, bright pink clay, pisolitic clay conglomerates lower part occasionally fossiferous.
		Dagshai stage	Sandstones and class of brackish water origin with clay conglomerates and gypeous nodules.
	Eocene	Subathu stage	Red clays and sandstones, olive grey and green splintery shales, imperiastent shelly limestones, carbonaceous bedds, tin bands of impure unmulitic pshelly limestones, ferruginous sandstones.
Himalaya Group	Permocarboniferous	Krol series	Basic dykes and sills, Calcarious states often sheared. Dolo mitic beds and limestones. Critty slates and quartzites. carbonacceous shales with quartz veins.
	Carboniferous	Infrakrol	Limeitons and slates.
		Blaini series	Boulder beds, Limestone and bleached slates.
			Deoban and shalli limestone and slates.

Himalaya Group	Devonian	Jaunsar Series (Chaundpur slates, schistose phylite and quartzite)	
	Pre-cambrian	Simla slates Chail Series	
	Archæan Group	Jutogh Series	Boileaugunge quartzites
		Jutogh Series	Casbonaceous Schist and limestones.
		Granites (Chor granites) (Late Palaeozoic age)	Granites and genissose Genissose grantie

Himalayan Formations—The area around Rajgarh (31°51′ : 77°18′) is unique in several respects. Here the entire section from Blaini to Jutogh series is exposed. The local thrust faulting in the Blaini beds (imbricate structure) the unconformity at the base of the Jutogh series, the repitition of the carnonaceous beds in the Jutogh beds by recumbent folding, and the 'Window' structure in the Gatogara nala showing the Blaini resting on the Jaunsar series, with the Chail Series thrust over both of them are some of the important geological features of this area. This area is also remarkably broken up by normal faulting and a number of faults are located near Rajgarh.

All the faults tend to be parallel running in a SW-NE direction, and mostly have a downthrow to the south-east. Their aggregate throw not less than 609.6 meters (2,000 feet).

The Jaunsar Series and Jaunsar thrust, so well developed on either side of the Giri Valley above Kargaun are gradually overlapped by the Chail Series up to Ranaghat. At Dhar they have been entirely cut out. Towards further north-east, the Jaunsar thrust re-appears beneath the Chail thrust at Kufar (30°59′ : 77°25′) with Jaunsar Series attaining their normal thickness.

The Blaini beds on the north-east of Chala (30°57′ : 77°21′) gradually become schistose. The dense limestone undergoes little change but dies out beyond Ghur Dhar (30°59′ : 77°24′). The boulders in the boulder bed are crushed and flattened out. The bleach slates show a prominent cleavage, often markedly oblique to the bedding.

On the north-eastern side of the Chur granite, the Jutogh Series and the Chail Series are typically developed. Owing to the gentle dip the boundaries are very sinuous, the Jutogh-Chail boundary roughly following the course Batewri Chaupal, Khagna, Purwa, Kakra, Dhar, Bhalu, Chiama and Kulag. It is of interest to note that the lowest horizon of the Chail Series, characterised by a dark blue banded limestone, which is such a marked feature of the Chail's to the west of Kalka-Simla railway line appears intermittently at the base of the Chail's at the Chaupal spur and further south.

On the Chaupal spur and in the Hamal Khud the Chail Series overlie Jaunsar beds. Below these occurs a considerable thickness of beds of doubtful age, which overlie the main outcrop of the Deoban limestone at Nerua (30°49″ 77°38′).

Further south, at Tikkar (30°49′ : 77°35′) on the E. S. E. side of the Chor, the Chail Series directly overlie the Deoban formations. In the intervening area of the Deoban beds are overlain by a fairly prominent but rather inconsistent boulder bed. It closely resembles the Blaini boulder bed, but there is no limestone bed associated with it.

The Deoban Series, consisting mainly of massive limestone with some interbedded shales, have a great thickness. It has on the whole a very gently north to north-westerly dip and shows no signs of folding up to the Tone river. From Isu Tibba (30°52′ : 77°41′) the Series extend north-eastwards as a wide band.

At Chur mountain, hornablende schists and amphibolites occur as dykes cutting the Jutogh beds and less commonly as sills parallel to the bedding of Jutogh sedimentary formations. They do not appear to invade the Chor granite and are never seen cutting the underlying Chail or Jaunsar Series. Their extent is very limited rarely exceeding 91 meters (100 yards). They neither have any particular direction nor horizon.

The peak of the Chur mountain 3,647 meters (11,996 feet) form a prominent feature south-east of Simla and is composed of a genissose-granite, the Chor granite which is probably of late Palaezoic-age. On the northern slopes, the Jutogh beds dip away in a north-easterly direction.

On the southern side, the Jutogh beds dip at about 30° towards north-east under the granite. Towards the east the dip of the beds and the foliation dip of granite become vertical. The granite is though to have intruded along the synclinal axis in Jutogh Series.

Sub-Himalayan formations—The Subathu beds are represented mainly by grey splintery shales, green clay shades, red, clays, sandstones and shelly nummulitic at Banog (30°34′ : 77°18′) thin bands of calments of fresh water origin. Lithologically

limestones. Other members are olivergreen shales, calcareous slates and impure quartzites.

The Subathu beds have a general NE-SW strike or occurs as discontinuous outcrops of inliers in the Dagshai beds. At Dagshai and Kasauli, they occur amongst Sirmur formation due to infolding.

East of Dabsu (30°38′ : 77°9′) the Subathus like unconformably over pre-Bocene pisolitic sandstones. Along the road section at Banog (30°34′ : 77°18′) thin bands of calcareous quartzite which appear to belong to the pre-Eocene sequence occur as impricate outliers in the crushed Subathu shales.

The Subathus of the outermost band close to the Main Boundary thrust contain very little sandstone bands whereas in the north-eastern bands, cream coloured and ferruginous sandstones are frequently developed. Similarly red clays are more pronounced in the inner outcrops.

Fossil shells are usually indistinctly preserved. The following identified specomens are characteristic of the group.

Ostrea flemingid' Arch *Turbinella of* Subathuensis d' Arch, *Cardita* H.Sp. and *Strombus* Sp.

The formations of the Dagshai stage are characterized by the presence of purple sandstones and clays with pink pisolitic clay-conglomerate (pseudo-conglomerate) at the base. These formations are unfossiliferous.

The Dagshai rocks are sparsely fossiliferous, consisting of plant impressions, imperfectly preserved plant stems and worm tracts. In the clay-conglomerates of the lower and middle Dagshais, fragmentary impressions of grassy leaf are sometimes seen.

The Kasauli beds consist principally of massive or bedded grey sandstones and violet or grey clays. The sandstones predominate over the argillaceous formations. The basal clay acts as an impermeable bed and is responsible for the formation of spring.

The rocks of the Lower Siwalik Nahan stage consist of alternate bands of soft, coarse-grained, micaceous sandstones and pink or grey shales. The Siwalik formations are exposed south-west of the Main Boundary Fault (Nahan Thrust) and consists essentially of a vast thickness of fluvitile sediments of fresh water origin. Lithologically, they are indistinguishable from the Upper Dagshais and Lower Kasaulis.

To the north-west the Nahans terminate near the nala to the east of Nibwala (30°37′ : 77°11′) and exposures of these beds again commence at the Majhyar-ki-Nadi section, north-east of Kaulonwala bud (30°36′ : 77°12′).

The Upper Siwalik formations are divisible into two conformable stages namely Pinjor Sandstone pebble bed and the upper Boulder conglomerate stage. The thrust contact with Nahan formation is known as the Pinjor thrust.

The following localities were fossiliferous horizon occur are—

Baldwala (30°36′:77°9′)
Turan (30°35′:77°9′)
Gumti (30°34′:77°11′)
Pallon (30°34′ :77°11′)

1.6 kilometre (one mile) south-west of Tilokpur (30°32′ : 77°13′).

West of Moginand (30°31′: 77°14′).

Saketi (30°31′ : 77°14′).

South-west of Khera (30°31′ : 77°16′).

.8 Kilometres (½ mlie) East of Matar (30°29′: 77°21′).

The well preserved vertabrate molars identified from a collection from Turan and Gumti areas are as follows—

Bovidae—Pachyportax Sp., proamphibos Sq., Proamphibos lachrymans, Pilg; Tragoceras Sq. Bos. Sq., Selenoportax.

Proboscaedea—Stegondon Sq., Stegodon insignis, Elephas Sq., Archidiskodon planifrons.

Reptilea—Crocodilus Sq., Grarialis Sq.

Artiodactyla—Hippopotanius sivalensis, Falc and Cant.

One lower right mandible of a Giraffe sivatheriam Sq. was obtained from Matar. Another wornout molar of Stegodon Sq. was collected from Tilokpur.

The fossible from Saketi are as follows—

Bos. Sq., Tragoportax Sq., Crocodilus Sq., and the dorsal scute of a chelonian.

Vertebrate remains and bone fragments occur in two more localities from Pinjor formations laying perhaps in continuation of the same zone. One band runs between Dudhgarh (30°41′30″ : 77°0′15″) and south of Palasra (30°41′15″ : 77°3′) while the other one

is 1.6 kilometres (1 mile) north-east of Jauli (30°35'30" : 77°7').

The fossils are Elephas (Archdiskondon) Panifrons. bos. Sq. Astragalus (?), Naviculo Cuboid (?).

Minerals

1. *Barytes*—It occurs in the form of veins, lenses and pokets in the Upper Krol limestone.

(1) *Kanti* (30°37': 77°39')—The baryte deposit is situated about .8 kilometres (½ mile) S.S.E. of Kanti on the northern slope of the hill. The mineral occurs in a steep dipping vein associated with the Krol limestone. The vein is traceable for a distance of about 53 metres (175 feet) with an average width of about 7.6 metres (25 feet). Besides this, there are two or three other outcrops in the area slightly to the east but they are comparatively small.

The mineral is white in colour and fine-grained. The reserves are estimated at 18,900 metric tonnes.

Some samples from these deposits have analysed and the results are as follows:—

Constituents	1	2	3
SiO_2 . . .	0·16	Trace	0·88
R_2O_3 . . .	0·42	0·30	0·30
Mgo . . .	0·19	0·11	0·15
CaO . . .	Trace	Trace	Trace
SO_3 . . .	33·75	34·00	33·18
BaO . . .	64·40	64·88	64·24
Loss on gnition . .	0·44	0·22	0·39
Total .	99·36	99·36	99·37

(2) *Tatyana* (30°38'30": 77°38')—The Tatyana baryte deposit is situated about .8 kilometres (½ mile) south-east of Tatyana. The zone of baryte is confined to an area of about 366 metres×122 metres (1200'×400') on the slope of the hill. It is found as lenticular deposits at three or four places in the neighbourhood of Tatyana. The mineral is associated with dolomite at these places.

The analyses of some baryte samples are as follows:—

Constituents	1	2	3	4
SiO_2 .	0.38	0.20	0·06	0·04
R_2O_3 .	0.59	0.34	0·50	0·63
NgO .	12.45	14.44	4·16	12·89
CaO .	18.07	20.90	6·31	18·69
SO_3 .	14.29	11 10	27·49	13·49
BaO .	25 97	20.79	51·15	24·99
Loss on igniti n	27.31	31.64	9·36	28 78
Total	99.06	99.41	99·03	99·51

(3) *Rajpur* (30°32'30": 77°44')—A thin vein of barytes occurs in the Infrakrol shales, about .8 kilometres (½ mile) north of Rajpur. The reserves are estimated at 127 metric tonnes (125 tons).

(4) *Khajar* (30°37': 77°40')—About 1.6 kilometres (a mile) south of Khajar, there is a small deposit of barytes in the Upper Krol limestone. Here the mineral occurs associated with crystalline dolomite and calcite. These deposits are not of any commercial importance.

2. *Copper*—Malachite (copper carbonate) stains are noted at the junction of Blaini boulder bed and Subathus in a nala east of village Sataun (30°33': 77°38').

3. *Coal*—Very small lenticles and stringers of coal and carbonised plant remains occur mainly in the green sandstone and occasionally in shales near Khairi (30°30': 77°30'30"), and Sirmur. Tal (30°32'30":77°38') in Paonta Tehsil of Sirmur District. These occurrences are too small to be of any economic importance.

4. *Gypsum*—A number of fairly large pockets of gypsum are recorded from the formation of Krol Series at Korga, Bharli, Shilorna and Ridana.

Out of these, Korga and Bharli deposits are of considerable extent. Working of these deposits need the removal of enormous portion of dolomite and shale.

(1) *Korga* (30°36': 77°35')—It is reported that quantity of the material with 60% gypsum is about 951,000 metric tonnes. (936,000 tons).

(2) *Bharli* (30°33′:77°45′)—The deposit occurs about 1.6 kilometres (1 mile) north-west of Bharli located at a height of 1332.89 metres (4,373 feet). The reserves of Bharli are 1.2 million tons (1.23 million tonnes) of ore with average gypsum content of 41.71%. The pure gypsum available will be of the order of .5 millions tons (.51 million tonnes).

A number of samples from this deposit has been analysed and the average gypsum content of the deposit is 40% with high percentage of magnesia. Because of its low grade, the deposit is unsuitable for the manufacture of ammonium sulphate.

Analysis

Constituents	Range of composition From	To
	%	%
Insolubles	·28	10.85
R_2O_3 Al_2O_3 Fe_2 Ce_3	Trace	3.40
CaO	16.50	31.93
NgO	1.78	20.62

H_2O	Trace	13.56
CO_2	18.24	43.82
Galculated Gypsum	7.00	64.76

5. *Iron-pyrites*—Occurrences of pyrite are recorded in the form of lenses and veins in the limestone and slates at Sayasu (30°41′: 77°45′) and at Diyandon (30°43′: 77°43′).

(1) *Deposit at Sayasu*—At Chamri about 1.6 Kilometres (1 mile) N.N.E. of Sayasu, the deposit is situated on the western side of Tons river. The pyritiferous band is exposed in the bed of river Tons for a distance of about 152 metres (500 feet) in a NNW-SSE direction, Pyrite is found associated with the carbonaceous slates and limestone. It occurs as veins, patches and lenses generally admixed with carbonaceous shales.

Assuming the average thickness of the vein to be .9 metres (3 feet) about 2,032 metric tonnes (2,000 tons) of pyrite may be expected for every 3 metres (10 feet) depth from the exposed part of the deposit.

Average Sulphur content is about 38% Arsenic is absent. The analyses are given below:—

Constituents	1	2	3	4
Fe.	35.33	32. 4	34.06	35.19
S.	38.84	36.75	38.06	38.58

As.	Trace	Trace	Trace	Trace
Ni.	Trace	Trace	Trcce	Trace

(2) *Deposit at Diyandon*—This deposit is situated at Anyar, 3.2 kilometres (2 miles) north-east of Diyandon (30°43′:77°43′) on the right bank of the Tons river. There are three or four abundoned pits. Pyrite occurs in shales and limestones. The thickness of the pyritiferous band is hardly .6 metres (2 feet) and is not traceable for long distance. The Sulphur content is 34.12%.

The analysis are given below—

Constituents	1	2
Fe.	31.13	29.69
S.	34.12	32.77
Cu.	Trace	30.10

As.	Trace	Trace
Ni.	Trace	Trace

6. *Iron Ore—At Kanjari* (30°47′: 77°21′ 30″), the iron ore occurrences were exploited by ancient smelters. But these deposits are too small to be of any economic importance.

7. *Limestone*—Occurrences of high grade limestone at Naura (30°49′: 77°25′ 30″). Bhangari (30°47′: 77°24′ 30″) and Jarag (30°50′: 77°21′30″), From Jutog Series are recorded. The reserves of Naura deposit alone exceed 17,272,000 metric tonnes (17,000,000 tons). Deposit of limestone suitable for the manufacture of cement occurs in the Giri-river Valley of Sirmur District near Sataun (30°34′: 77°38′30″). Bhatrog (30°33′: 77°40′) and Kyari (30°34′: 77°34′ 30″).

The thickness of the exposed limestone varies in different parties of the deposit but a thickness of about 60 metres (200 feet) can safely be taken as an average for the entire deposit.

Te limestone is massive in nature. It is usually grey in colur but at place is also brownish. The grey limestones are of superior quality whereas the brownish limestone is dolomit. A characteristic feature of this limestone is the presence of ramifying veins of calcite as noted in the area between Bhatrog and Sataun.

Samples of Sataun limestone and of Mandhali limestone were analysed and the results are as follows:—

Analysis of Sataun Limestone

The range in composition of 25 analysis is given below:—

Insolubles	R_2O_3	Cao	Mgo	SO_3	Loss
2.94-17.30 %	75-6.24%	38-17-53 .65%	Trace 7.7%	Trace	32.85 52.22

Average of 25 samples is given below:—

Insolubes	R_2O_3	CaO	MgO	SO_3	Loss
6.92	2.13	49.51	0.97	Trace	39.52

Analysis of Mandhali Limestone

Range and average of five samples are given below:—

Constituents	Range	Average
Insoluble	9.28—32.90%	20.28%
R_2O_3	2.00—12.67%	4.87%
CaO	30.72—47.04%	39.79%
MgO	0.44—2.81%	1.42%
Loss on ignition	26.72—38.83%	32.78%

For calculating the reserves of the limestone in this area, the whole belt has been divided into four parts given below:—

1. Sataun (30°34′ : 77°38′30″) to Bhatrog (30°33′ : 77°40′)
2. Sataun (30°34′ : 77°38′30″) to Nadi (30°34′ : 77°38′)
3. Nadi (30°34′ : 77°38′) to Dadua (30°34′ : 77°35′30″)

Sataun to Bhatrog—The limestone is traceable from the junction of the Bhitarka-Khala with the Giri river to Bhatrog, a distance of about 8 kilometres (½ a mile). The elevation difference is about 121.9 metres (400 feet) from the level of Giri river.

Assuming the average thickness of limestone to be 60 metres (200 feet), the reserves of limestone are estimated at 15 million tons (15.2 million tonnes).

Sataun to Nadi—The deposit of limestone is exposed for a short distance on both banks of the Giri river. An average thickness of about 60.96 metres (200 feet) is assumed. The reserves are estimated at 5.6 million tons (5.7 million tonnes).

Nadi to Kyari—Between Nadi and South of Manal (30°34′; 77°37′) limestone is not exposed, but further to the west limestone forms steep ascarpments on the southern side of the Giri river. In places, the limestone rises for more that 304.8 metres (1,000 feet) above the bed of the river. The thickness varies at different places but an average of 61 metres (200 feet) is assumed and the reserves are estimated at 75 million tons (76.6 million tonnes).

Dadua to Kyari—In this area the limestone band rises to a height of 91 to 122 metres (300 to 400 feet) above the Giri river valley level but in some places it is exposed in the bed of the river as at Bajhon.

The reserves are estimated at 45 million tons (45.7 million tonnes).

The total reserves of the entire belt are estimated at 141 million tons (143 million tonnes). The Sataun limestone is suitable for the manufacture of cement. The Mandhal limestone, in places, is siliceous but it can be blended with Sataun limestone to make it suitable for cement.

Other high grade limestone occurrences are at Naura (30°49′ : 77°25′30″), Bhangari (30°47 : 77°21′30″). The limestone beds at Naura and at Bhangari are traceable for a distance of 10-11 kilometres (6-7 miles) each. The average analysis of six analysis of samples from the Naura area is given below:—

Insolubles	R_2O_3	Cao	Mgo	Loss	Calculated $CaCO_3$
1·19%	0·70%	54·09%	1·11%	42·80%	96·59

Several other limestone bands are recorded from Jalmuse-Ka-Khala, Kansar area and Khair areas in the district.

Jalmuse-Ka-Khala Band—Outcrops of limestone occur about 1,280 metres (1,400 yards) east of the confluence of Jalmuse-Ka-Khala and Daghera-Ka-Khala and W.S.W. of Bharthal village, in the bed of Jalmuse-Ka-Khala.

The average analysis of four analysis of samples from this band is given below:—

SiO_2	6·78
R_2O_3	2·72
MgO	1·79
CaO	48·24
Loss on ignition	40·21

The reserves of the band over a strike length of 3,700 feet (1.127 meters) are estimated at 3.7 million tons (3.76 million tonnes).

Daghera-Ka-Khala Band—In the Daghera-Ka-Khala section, a 7.62 metres thick band of limestone is seen to continue to the west to the Tina village for about .4 kilometres (¼ miles).

The analysis of a sample obtained from the Daghera bed is given below:—

SiO_2	$_O_3$	MgO	CaO	Loss on ignition	Total
7·48	1·60	0·56	49·07	40·66	99·37

Kansar Deposit—The main Kansar band is in the nature of an avoid outcrop exposed as a prominent crag in full view of the traveller reaching the village from the west. The western extremity of the band starts as a thin band on the eastern precipitous slope above the Shila-Ka-Khala. A maximum thickness of about 213 metres (700 feet) is attained at the prominent ridge between the Khala and Kansar.

The analysis of samples are given below:—

SiO_2	R_2O_3	MgO	CaO	Loss on ignition	Total
3·52	2·10	1·48	50·67	41·98	99·75
3·52	0·90	1·19	51·68	42·56	99·75
2·60	1·60	2·03	50·28	42·52	99·03

The reserves are estimated at 15 million tons (15.2 million tonnes).

Another small band is exposed about 365 metres (400 yards) west of the village. The analysis of the sample is given below:—

SiO_2	R_2O_3	MgO	CaO	Loss on ignition	Total
2·86	0·50	Trace	53·09	43·20	99·55

Khair Deposit—South-east of Khair limestone form a spur. Analysis of the sample is given below:—

SiO_2	R_2O_3	MgO	CaO	Loss on ignition	Total
8·08	3·60	1·22	47·01	39·92	99·83

The reserves of this 411 metres (450 yards) long band are estimated at 7.72 million tonnes (7.6 million tons).

Population

According to 1961 Census, the population of the district is 197,551 persons. There are 108,093 males and 89,458 females. This forms about 12.5 per cent of the total population of the Pradesh. There are only two towns in the District—Nahan and Paonta. Population of Nahan town is 12,439 persons, males 7,158 and females 5,254 while that of Paonta town is 1,833 persons; males 1,048 and females 785. Remaining 93 per cent of the population lives in villages. This is made up of 99,860 males and 83,419 females. The Statement given below shows the changes, member of villages and population in the district from 1911 to 1961:—

Area, inhabited villages and population from 1911 *to* 1961.

Year	1961	1951	1941	1931	1921	1911
Area in Sq. miles	1095	1094	1091	1198	1198	1198
Population	197551	166077	156026	148568	140448	138520
No. of Inhabited villages	965	928	965	965	1012	962

Sixty years ago, in 1901, the population of the area now comprising Sirmur district was 135,687 persons: 75,461 males and 60,226 females. The trend of population during these sixty years is reflected by the following data:—

Year	Persons	Males	Females
1901	135,687	75,461	60,226
1911	138,520	76,044	62,476
1921	140,448	77,003	63,445
1931	148,568	82,384	66,184
1941	156,026	85,837	70,189
1951	166,077	92,271	73,806
1961	197,551	108,093	89,458

The following statement shows the variation in population during the last sixty years:—

Year	Variation			Percentage Variation		
	Total	Males	Females	Total	Males	Females
1911	2,833	583	2,250	+2·09	+ 0·77	+ 3·74
1921	1,928	959	969	+1·39	+ 1·26	+1·55
1931	8,120	5,381	2,739	+5·78	+6·99	+4·32
1941	7,458	3,453	4,005	+5·02	+4·19	+6·05
1951	10,051	6,434	3,617	+6·44	+7·50	+5·15
1961	31,474	15,822	15,652	+18·95	+17·15	+21·21

There has been an absolute increase of 45.59 in population during the period from 1901 to 1961. The highest increase of 18.95 per cent was registered during the decade 1951—1961, followed by 6.44 per cent during 1941 to 1951 and 5.78 per cent during 1911 to 1921. It will be observed that the population has shown a rising trend in all the decades from 1901 to 1961.

The following statement shows the changes in the proportion of sexes from 1901 to 1961:—

Year	Total	Rural	Urban
1901	798	801	732
	822	825	744
1921	824	826	777
1931	830	809	703
1941	818	820	770
1951	800	806	719
1961	828	835	734

According to 1961 Census, the district has 828 females to 1,000 males, while in 1901 this ratio was only 798. For rural areas sex ratio is 835 females to 1,000 males. This ratio was 801 in 1901. For urban areas the sex ratio has gone up from 719 in 1931 to 734 in 1961, being minimum in 1931 where there were only 703 females for 1,000 males. In 1961 Census sex ratio in Nahan town was found to be 576 females for 1,000 males, while in Paonta town it was 749 females for 1,000 males.

The following statement shows the changes in the density of population in the district from 1911 to 1961:—

Year	Population per Sq. mile
1911	116
1921	117
1931	124
1941	143
1951	152
1961	180

Density of population per square mile was 116 in 1911. It increased to 117 in 1921 and steadily rose to 180 in 1961. In fact the rate of increase of density became more pronounced during 1951 to 1961, when it rose from 152 in 1951 to 180 in 1961.

The district contains 2 towns and 965 villages. The following statement shows the percentage of population living in villages and towns of various population sizes with reference to the total population in the district 1961:—

Less than 200	32·2
200 to 499	36·5
500 to 999	22·5
1,000 to 1,999	7·6
2,000 and above	1·2

The majority of villages in the district thus fall in the population group of less than 500 persons per village. There is only one village having a population of 2129, which falls in the population group of 2000 to 4999. There is no village which claims a population of 5000 or more. The district is highly rural in character. The number of persons per occupied house in the rural areas is about 6, while it is 5 in towns. The density of households per square mile is 29 in rural areas and 631 in urabn areas.

The People

The predominating castes in the district are Kanets and Bhats, who claim descent from Rajputs and Brahmins. They are presumed to have lost their original castes. The advanced members of these communities have begun to resent being called as Kanets and Bhats. The other proprietory castes are Rajputs, Mians and Dewas and Dehties. The tenant classes are represented by Kolis, Dumnas, Chamars, Lohars and Dhakis some of whom worm the menial village servants.

The Rajputs of Sirmur follow the customs of Rajputana rather than those of Kangra and have less scruple about ploughing. They prefer to marry their daughters into a class higher than their own but they do not doom them to remain unwed, if no such alliance offers.

Only pure and khas Kanets are found in the district. Khas Kanets generally inhabit in Trans-Giri tract. Each group claims superiority, but the former are more civilized. Intermarriage between these group is unusual. The Nahan Kanets prefer to marry their daughters in a higher family, if they can. They wear the sacred thread, immitate Rajput customs and stand higher socially than the other Kanets. A Kanet by marrying a Brahmin girl remains a Kanet, but if he marries a low caste woman, he is outcasted. Some Kanet families, by performing the duties of priests, have acquired the sect name of Dewa or Negi. A Dewa will generally marry in a Dewa and a Negi in a Negi family.

The Brahmins, mostly adh-Gaurs are confined to the places inhabited by immigrants from the plains. The Gaurs have two divisions, pure Gaurs and Gattas, the latter of illegitimate descent. The highest section among the Trans-Giri Brahmins is the Pabuch. The Pabuch refrain from killing any animal and abstain from eating flesh. They do not intermarry with Bhats. Bhats are by origin Brahmins. Trans-Giri Bhats intermarry with Kanets. The Bhats of Nahan

retain Brahmin customs but in the interior they have adopted those of the Kanets.

Other sections of the people consist of Jats, Sainis, Labanas, Banjaras, Bahtis and Gujjars. These are all immigrants and have settled in and colonised the Kiarda Dun. Most of them are Sikhs.

Name of religion	Person	Percentage to total population
Buddhists	104	0·85
Christians	221	0·11
Hindus	185,020	93·66
Jains	64	0·03
Muslims	8,203	4·15
Sikhs	3,867	1·96
Indefinite Beliefs	72	0·04

There are a good number of temples at Nahan, the important ones being Laxmi Narain temple, Kalisthan and Thakur Dwara. There is a Gurdwara for Sikhs, while the Muslims have two mosques, one at Kacha Tank and the other in Kalisthan-street. There are two temples at Rainka, the old temple on the shores of the lake, and the other built on a hillock on the bank of the Parshu Ram tank. The former has a single image of Ganeshji made of stone. The hillock temple has now been completely rennovated and houses under a canopy a single image of Parshuram on a small marble slab. Previously the old temple before rennovation contained seventeen images two of Parashuram, one each of Jamdagni Rishi, Rainkaji, Ganesh, Shivji, Durga, Khetrpal, Digpal, Kidar Bhairan, Pawalia and five images of Pandwas. There is a temple of Parashuram at Jambu, a village at a distance of about 4 miles from the Rainka lake said to be the birth place of this god.

There is a temple of Lai Devi on the hill of Lai near village Moginand built by Bhera Rangar, the famous robber. Worship is performed here on the Sankrants and every Sunday and Nauratras in Asvina and Chaitra. Nagarkoti Devi has a temple at Shaya Pajhota and Sharauli, which it is widely believed was built by the Pandwas. The goddess Katasan has a temple at Baraban, eleven miles south of Nahan on the road to Paonta. There is a temple of Devi Bala Sundri at Tirlokpur. A large fair is held there in her honour in the month of Chaitra. She is worshipped by the hillmen as also by the people of plains. There are two temples at Sarahan, the old temple of Shirgul Devta and the other of Laxmi Narain.

The Kolis believe in Gugga Pir and a temple for him always exists in a Koli village. But in Shillai hamlet, Gugga is also worshipped by the Kanets of the villages turn by turn to avert snake bite or fatal results in case anyone is bitten. An annual fair is held on Gugga Naumi's day after Janam Ashtami.

Garib Nath is a well known shrine in Paonta Tehsil on a hill on which there is a temple with two wells. It is probably supposed that there are in reality four wells near this temple, but two of them are invisible except to those who have faith in Garib Nath. At the foot of the hill the Pujaris have built a second temple to which also five wells are attached. If a woman who is barren or whose children die in infancy, bathes in the waters of these wells, her prayers are supposed to be granted.

The Sikhs have a number of Gurdwaras in the district. The most famous of all is the Gurdwaras at Paonta, where the tenth Guru Gobind Singh, lived for nearly five years. The Gurdwara is on the bank of the Jamuna and was built in Samvat 1882. The second Gurdwara is at Bhagani, eight miles from Paonta and commemorates the victory of Guru Gobind Singh over the combined forces of Rajas of Bilaspur and Garhwal. A third Gurdwara is at Nahan, where the Guru once halted. A Gurdwara also exists at village Tokah.

Food and Dress

Maize and wheat are the staple food of the people. They also take rice occasionally. In hot weather, they use maize sattus—maize grains parched before grinding. People take three or four meals a day. The morning meal is called 'Jathalru', the mid-day one 'checli' and supper 'bailu'. Sattu is eaten twice a day during the hot weather but it is used at all time in the Sain and Dharti illaquas, where bread made of maize flour is eaten. Butter milk and curds are always used. Meat and fish are also taken. Patande is much liked in the hills. It is practically the same as the mande or pura of the plains, but contains no sugar or salt, is prepared on festive occasions.

In Tehsil Nahan and Cis-Giri tract the dress of the people is usually the same as

in the plains. In Trans-Giri the traditional dress of a man consists of a white woollen unbuttoned coat called Lobiya, black woollen tight pyjama and a woollen cap but the majority go without pyjamas wearing only a small loin cloth. They have now switched over to shirt and pyjama and instead of the woollen cap, gandhi cap is more in use. The women have now taken to Salwar and Kamiz instead of the Lehnga and Kurti which they used in the past. Similarly they are gradually changing over to Dopattas as head gear instead of the triangular piece of coloured cloth called Dhattu. The Dhattu is, however, still largely used, and is copected to hold its own against Dopatta because of its economical and colourful value.

Housing and Furniture

Tables of E-Series except E.III in Part II produce statistical data on the different aspects of housing in and urban areas of the district. There were 83,460 Census houses in the district of which 95.44 per cent are in the rural and 4.56 per cent in the urban. In rural areas 12.64 per cent census houses were vacant at the time of house listing, 39.66 per cent dwellings, 3.19 workshop-cum-dwellings, 2.12 per cent factories, workshops and worksheds, 40.23 per cent are others which include cow-sheds. The remaining are hotels, sarais, shops and government institutions. As regards urban areas there were 63.36 per cent dwellings, 9.51 per cent shops excluding eating houses and 3.02 per cent factories workshops and worksheds. 9.06 per cent houses were vacant in the urban at the time of house listing. The remaining fall in miscellaneous categories.

The density of occupied residential houses per square mile is about 32 and population per square mile is 173 of which 161 are in the rural and 3.076 in the urban.

E-II gives the information of owned and rental houses. 93 per cent houses are owned and 7 per cent rented. Owned houses in the rural are 95 per cent and 60 per cent in the urban. Thus 40 per cent houses are rented in the urban.

E-IV gives the detail of materials used for walls and roof. About 77 per cent houses have been built by stones, 16 per cent by mud and 4 per cent by timber in the rural. The remaining 3 per cent walls are constructed by bricks, cement and other materials. 81 per cent walls have been built by stones and 15 percent by burnt bricks in the towns. Thus stone is predominant both in rural and urban areas.

Out of the materials of roof, slates are predominant in the district with a proportion of 44 percent. Slates are less common in the urban areas as their proportion in the urban is 2 per cent against 47 per cent in the rural areas. Corrugated iron zinc or other metal sheets are very common with 29 per cent in the towns against 5 per cent in the rural. Roofs of grass leaves, thatch wood or bamboo are 26 per cent in the rural and 3 per cent in the urban areas.

33.7 per cent households are occupying one room dwellings 31.3 two rooms 15.1 three rooms 10.4 four rooms and 9.4 five and more rooms. The number of persons per room is 2.3 in the rural and 1.7 in the urban.

Generally speaking that in Nahan tehsil houses are made of bricks, stones and mud. These are usually of one storey and are built contiguous to one another in Abadis. But besides the houses in Abadi, many Zamindars also possess an outlying dwelling house near their fields. The cattleshed or Obra is a separate buildings and is usually built at some little distance from the Abadi as there is no danger of cattle lifting.

In Trans-Giri area, the houses are of a different type. These are built of squared stones on a rectangular foundation, beams of deodar or some other timber being inserted after every foot or so to ensure strength. These houses are two or three storeyed.

The household furniture consists of cots and mats of rice stalks or date palms. Very few in the rural areas keep chairs, tables or modern item of furniture. Utensils are of brass, bronze and aluminium. One or two wooden boxes or steel trunks are also kept and used for keeping valuables and clothes. Radio sets, sewing machines, oil stoves and similar items are steadily finding their way into well-to-do families in the rural areas. Many villages have been electrified and table lamps and electric irons are also found here and there.

Scheduled Castes—Table SCT-I Part A shows the population and its distribution by workers and non-workers for each Scheduled Castes by sex in the rural and urban

areas. 52 castes have been notified as Scheduled Castes in the Pradesh but 35 have been returned in the district. Significant castes having more than one hundred population are: —

Name of Scheduled Castes	Population, 1961			
	Rural		Urban	
	Males	Females	Males	Females
All Scheduled Castes .	33,377	28,597	1,594	1,306
1. Badhi or Nagalu .	1,200	979	19	15
2. Balmiki or Jamadar	237	199	372	349
3. Banjara .	472	447	1	..
4. Barad . .	120	111	..	..
5. Chamar or Ramdasi	4,073	3,452	267	181
6. Chanal . .	916	727	..	..
7. Chhimbe . .	140	119	64	52
8. Dhaki or Toori .	761	637	4	3
9. Doom or Mahashe .	3,112	2,633	4	4
10. Dhumne or Bhanjre	75	114	3	2
11. Kabirpanthi or Julaha . . .	200	161	11	7
12. Koli . . .	19,877	17,514	515	415
13. Lohar . . .	928	821	61	54

Out of these castes the largest number is of Kolis. Chamars occupy second place and Doom or Mahashe third. The proportion of the Scheduled Castes is 32.8 per cent of the total population of the district which is highest in the Pradesh.

Education

Tables SCT-III Parts A(i) and B(i) shows the literacy and educational levels for each scheduled caste. It appears that both males and females of Scheduled Castes are taking full advantage of the educational facilities and concessions available to them in the district. The literacy among the Scheduled Castes is increasing considerably. The following statement shows the proporiton of literacy in the district and among the Scheduled Castes.

	Percentage of Literacy			
	Rural		Urban	
	Males	Females	Males	Females
Himachal Pradesh .	25·19	4·62	63·48	43·79
District average .	20·01	3·70	63·63	42·79
All Scheduled Castes	10·51	1·44	44·92	13·38

785 persons have received education upto Primary or Junior Basic and 48 persons are Matriculates in the rural areas. 42 males and 2 females have passed Matriculation or Higher Secondary Examination. One Ad-dharmi, one Ramdasi and one Koli has received University education.

Economic Activity

Agriculture is the main occupation of the Scheduled Castes as it engages about 83.34 per cent of the working population. Household Industry occupies the second place. The following statement shows the industrial classification of persons at work and non-workers for the district average and all Scheduled Castes: —

	Percentage of Workers in Categories				
	Cultivator	Agricultural Labourer	Household Industry	All other Activities	Non-Workers
District Average	47	1	4	7	41
All Scheduled Castes .	49	2	6	4	39
1. Badhi .	38	..	15	4	43
2. Chamar .	32	2	14	6	46
3. Doom .	55	5	6	1	33
4. Koli .	56	2	4	2	36

The proportion of workers for all the Scheduled Castes is more or less the same as the average for the district.. The proportion of Badhi and Chamar is lower in cultivation and higher in household industry whereas the proportion of Doom and Koli is higher in cultivation than the average for the district. The percentage of Doom is considerably high in respect of agricultural labourer. This is due to the fact that their proportion in other activities is very low. Some of them have small lands. Those who have neither land nor skill for crafts have to work as agricultural labourer.

Size of land Cultivated--Table SCT-V Part A shows broad classification of cultivating households by size of cultivated land. There are 2036 cultivation households of which 534 have owned land or held from the Government. 1092 households have the land from the private persons for payment in money, kind or share and the remaining 410 households partly held from Government and partly from private persons for payment in money, kind or share. The fol-

lowing statement shows the households engaged in cultivation by size of land in acres:—

Size of land	No. of Households				
	Owned or held from Govt.	Held from private persons on payment	Partly held from Govt. and partly from private persons	Total	Percentage
1. Less than 1 acre	127	296	66	489	24
2. 1·0—2·4 .	228	529	175	932	46
3. 2·5—4·9 .	132	223	126	481	24
4. 5·0—7·4 .	24	33	26	83	4
5. 7·5—9·9 .	5	6	10	21	1
6. 10·0 and above .	18	5	7	30	1
Total	534	1,092	410	2,036	100
Percentage of all households	26	54	20	100	..

24 per cent of the cultivating households of the Scheduled Castes are cultivating less than one acre land in the district. The percentage of the households having land 1.0 to 2.4 acres is the highest among the Scheduled Castes. 83 households or 4 per cent have land 5.0 to 7.4 acres. There are only 30 households having more than 10 acres of land. It reveals that the Scheduled Castes have mostly small size of land even then their participation in agriculture is more or less the same as for the average of the district.

Scheduled Tribes—Table SCT-I Part B shows the population and its distribution by workers and non-workers for each Scheduled Tribe. Five Scheduled Tribes were reported in the district in the 1961 Census. The distribution of their population with percentage of each Scheduled Tribe is:—

Name of Scheduled Tribe	Population			Percentage
	Males	Females	Total	
All Scheduled Tribes .	1,521	1,318	2,830	100·00
1. Gaddi . . .	19	12	31	1·10
2. Gujjar . .	1,414	1,221	2,635	93·11
3. Jad, Lamba etc. .	2	..	2	0·07
4. Kanaura . .	73	45	118	4·17
5. Lahaula . .	2	..	2	0·07
6. Unclassifiable .	2	40	42	1·48

The population of the Gujjars is considerably high in the district among the Scheduled Tribes. The proportion of the Scheduled Tribes is 1.43 per cent of the total population of the district which is very low of the Pradesh proportion of 8.01 per cent. These Scheduled Tribes live in the rural areas. Only 16 Gujjars have been reported in the towns.

Social Welfare—The subject of Welfare of Scheduled Castes, Tribes and Backward Areas is in the purview of Social Welfare Department. This Department did not have its First Five Year Plan but Government of India, Ministry of Home Affairs, provided supplementary funds for Schemes for welfare of Scheduled Castes on year to year basis.

District-wise break-up of the financial and physical targets and achievements of the First Five Year Plan are not available. However the following Schemes for the welfare of the Scheduled Castes were taken up.

1. *Drinking Water Supply*—According to this scheme water was made available to the villagers of Nabgarh Kharana in Pachhad Tehsil.

2. *Educational*—These include schemes of granting tuition, examination fees and scholarships. Another Scheme is of running or assisting hostels.

3. *Housing*—This covers the scheme of providing assistance in cash or kind for repairs of houses. Subsidy for purchasing G.I. Sheets for roofing was granted to about 25 families.

4. *Economic Uplift*—These include schemes of granting loan-cum-subsidy for cottage industries. About 16 wheels were distributed among the Scheduled Castes.

5. *Medical Aid*—According to this scheme medicine is distributed through dispensaries.

6. *Removal of Untouchability*—These include various schemes of publicity against untouchability. Harijan days were celebrated and propoganda for removal of untouchability was made through films, addressing large gathering at fairs and other places by the paid propagandists.

Besides five Welfare Extension Centres were started during the First Plan.

Second Five Year Plan—In regard to the welfare of the Scheduled Castes this plan was framed in the light of the experiences

gained in the First Five Year Plan. The Plan outlay of the district was Rs. 3.93 lakhs and expenditure Rs. 3.74 lakhs. The following statement shows the financial and physical targets and achievements during the Second Five Year Plan:—

Name of the Scheme	Welfare of Scheduled Castes during Second Five Year Plan			
	Expenditure incurred	Name of the executing agency	Targets achieved	Units
	Rs.			
STATE SECTOR				
I EDUCATION				
1. Award of Scholarships	33,600	Deputy Commissioner	701	Students
2. Award of stipends	26,030	Deputy Commissioner	351	,,
3. Supply of books & stationory	20,600	Deputy Commissioner	2,602	,,
II AGRICULTURE				
1. Distribution of plants and seeds	8,705	Director of Agriculture	13,506	Plants
2. Agricultural Implements distributed	6,253	Director of Agriculture	116	Cane crushing
3. Purchase of Agricultural land	6,880	Director of Agriculture	29	Families
III CO-OPERATION				
1. Subsidy to N.P. Societies	6,630	Registrar Co-operative Societies	8	Societies
2. Training in spinning and weaving	2,721	Harijan Sewak Sangh	25	Trainees
3. Purchase of spinning wheels and looms	7,070	Director of Industries	115	Looms
4. Sewing machines distributed	3,340	Director of Industries	22	Machines
IV HOUSING				
1. Subsidy for construction and repair of houses	35,810	Deputy Commissioner	111 118	Villages Families
CENTRAL SECTOR				
1. Award of stipends to Scheduled Castes for training, spinning and weaving	18,925	District Industries Officer	13	Trainees Weaving Centre Nihalgarh
2. Free distribution of Sewing machines, hand looms and other equipment for cottage industries	20,700	District Industries Officer	4 43 48	Machines Looms Wheels

More provision has been made in the Third Plan. The Schemes which were already in operation before the Third Five Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan Schemes. There are in addition some more Schemes sponsored by the Central Government.

DISTRICT ADMINISTRATION

The Deputy Commissioner is the administrative head of the district. He is responsible for general administration and maintenance of law and order. He is assisted by a Treasury officer, a Revenue Assistant and Compensation Officer. There is an Assistant District Planning and Development Officer.

For administrative convenience, the district had been divided into four tehsils, 9 Kanungo Circles and 78 Patwar Circles. Each tehsil is under the charge of a Tehsildar.

The district police force is under the charge of a Superintendent of Police. There are 2 Inspectors, 8 Sub-Inspectors, 10 Assistant Sub-Inspectors, 42 Head Constables and 176 Constables under him. There are 4 police stations at Nahan, Paonta, Sarahan and Dadahu and 8 outposts at Kacha tank, Ghunu Ghat, Kala-Amb, Singhpura, Majra, Shillai, Nohra and Rajgarh.

The District makes one forest circle under the charge of a Conservator of Forests. There are two forest divisions each under the charge of a Divisional Forest Officer. There are 6 forest ranges.

There is an Executive Engineer of the Public Works Department. He is assisted by 4 Sub-Divisional Officers and a number of Overseers. There is also a Sub-Divisional officer electricity posted in the district.

The District Medical Officer is the Controlling Officer in respect of all the medical and public health institutions in the dis-

trict. The District Inspector of Schools is the head of Office for Primary and Middle Schools, the Headmasters are the controlling officers in respect of High and Higher Secondary Schools.

Besides this every department maintains its staff at the district level to implement the schemes which pertain to that department.

In 1957 some departments were transferred to the control of the Territorial Council under section 28 of the Territorial Councils Act, 1956. The departments transferred to the Council were Education upto Higher Secondary stage, Medical and Public Health, Veterinary Services and Construction and maintenance of mule paths. These departments were again taken over by the Government at the time of formation of Ministry in 1962.

EDUCATION

The district has made substantial progress in the field of education. The literacy percentage during the past decade has gone up from 7.1% in 1951 to 15.63% in 1961 Census. As a result of opening of a net work of school, the literacy was found to be 12.58% in the rural areas. It was found to be as high as 54% in the urban areas. The number of literates in the district was recorded at 30,888, males 25,216 females 5,672. The village Directory printed at the end of this volume shows the number of literate males and females for each village and town. The number of literates by males and females in each tehsil are:—

Serial	Name of Tehsil	No. of literates		
		Total	Males	Females
1	Pachhad . .	6,949	5,797	1,152
2	Rainka .. .	5,031	4,547	484
3	Nahan . .	9,808	7,190	2,618
4	Paonta . .	9,100	7,682	1,481

The number of educational institutions and scholars in the district in 1956-57 and 1960-61 were:—

Kinds of Institutions	No. of institutions				No. of scholars			
	1956-57		1960-61		1956-57		1960-61	
	Men	Women	Men	Women	Men	Women	Men	Women
Colleges	1	..	1	..	85	20	75	40
High Schools	6	1	10	1	1,510	662	2,676	949
Middle & Lower Middle Schools	11	1	22	..	705	291	1,802	485
Primary Schools	126	4	180	..	5,019	1,096	5,277	1,380
Total .	144	6	213	1	7,319	2,069	9,830	2,854

There has been good increase in the number of institutions during the period 1956-61. Their number rose from 150 in 1956-57 to 214 in 1960-61. During the same period the number of scholars increased from 9,388 in 1956-57 to 12,684 in 1960-61. There is co-education in Primary Schools as well as College stage. There is also a girls higher secondary school at Nahan.

There is a district library at Nahan. Besides this every educational institution maintains its library. Some books are also stocked by the Panchayats.

The Govt. College of Arts, Nahan was started in 1962. Instructions in the various arts and crafts are provided there. At present it is situated near the Lytton Memorial in the Nahan town. It provides instructions in the following courses of study:—

Courses of Studies

Course	Duration
1. Vocal Music	5½ Years
2. Instrumental Music—Tabla . . .	Do.
3. Instrumental Music—Sitar . . .	Do.
4. Dancing	Do.
5. Drawing and painting	5 years
6. Commercial Art	Do.
7. Clay Modelling and Sculpture . . .	Do.
8. Art and Craft-Teachers Course . . .	2 years

The College possesses all materials and sports articles. The students take part in the annual Youth Festivals held at state level

of Government Colleges in Himachal Pradesh. The students go on short excursions and find places and ideals for sketches and paintings.

Application for admission addressed to the Principal on the prescribed form are submitted in the first week of July every year. The candidates must have passed the Matriculation examination or its equivalent. Admission fee for all classes is Rs. 2/- and tuition fee does not exceed to Rs. 5/- per month.

MEDICAL AND PUBLIC HEALTH

Common diseases found among the poeple are dysentery and diarrhoea; respiratory; eye and nutritional disease, goitre, anaemia and V.D.

Raja Shamsher Prakash opened a small dispensary at Nahan in 1872 where allopathic treatment was given. The women hospital was started in 1896 and was housed in a spacious building providing sufficient accommodation both for outdoor and indoor patients. In 1902 the Civil Hospital was shifted to a new building called the Jubilee hospital. After the formation of Himachal Pradesh, the hospital was shifted to a new spacious building near the Circuit House. This was given the name of Vallabh Chikitsalya. Before the formation of Himachal Pradesh seven allopathic and 5 ayurvedic dispensaries existed in the district at:—

Allopathic

1. Nahan (civil hospital)
2. Sarahan
3. Paonta
4. Dadahu
5. Sangrah
6. Rajgarh
7. Ghinni

Ayurvedic

1. Majra
2. Rajpura
3. Dhamla
4. Bhawai
5. Shillai

The medical and public health facilities were liberally extended in the district after 1948. The institutions functioning in the district on the 31st March, 1961 were:—

1. District Hospital	1
2. Civil Hospital	2
3. Allopathic Dispensaries	13
4. Ayurvedic Dispensaries	15
5. Primary Health Centres	2
6. T.B. Clinic	1
7. Dental Clinics	2
8. Ayurvedic Mobile Dispensaries	2
9. Maternity and Child Welfare Centres	6
10. Ayurvedic Pharmacy	1
11. V.D. Clinics	3
12. Leprosy Subsidiary Centre	1
13. Family Planning Centres	2

More dispensaries are being started under the Third Five Year Plan and the existing services in the hospitals are being augmented by the addition of staff and equipment.

The number of patients treated in the various hospitals and dispensaries was 126,146 in 1951-52. It increased to 546,708 in 1960, indoor patients being 64,227 and the rest being outdoor.

Family Planning Centres exist at Nahan and Paonta. Advice in family planning is also available at all the dispensaries and Primary Health Centres.

National Malaria Control Programme was started in the district 1953. The Control Programme was switched over to Eradication in 1958. As a result of mass D.D.T. spraying, the incidence of this disease has been considerably reduced. The disease is expected to be completely wiped out of the Pradesh by the end of the Third Five Year Plan.

A V.D. Clinic with a laboratory was attached to the District Hospital, Nahan in 1950. During 1960, 2 more V.D. clinics have been opened at Rajgarh and Dadahu, where incidence of V.D. was found to be high. Field tours are also conducted by the V.D. teams for the examination and treatment of V.D. patients. A V.D. unit has also been attached to the Primary Health Centre, Paonta under the Third Five Year Plan.

Leprosy Subsidiary Control with 30 indoor beds was started at Nahan in 1959 for the treatment of leprosy patients. Five subunits are functioning under this Centre at Shillai, Chokar, Paonta, Sarahan and Rajgarh. Patients detected during the survey are referred to the Centre for admission and regular treatment. Domiciliary treatment is also provided.

Goitre survey was started in the district in 1959. 5,544 patients were examined in Paonta and Rainka tehsils out of which 2,277 were found to be suffering from Goitre. Patients suffering from this disease are given treatment at the hospitals and dispensaries.

Iodised salt is being distributed free of charge to the patients suffering from goitre.

A T.B. clinic is functioning at Nahan. Health visitors appointed under the scheme "T.B. Survey and Domiciliary Care" conduct the tour of the villages. Indoor facilities also exist at T.B. Clinic, Nahan.

Small-pox Eradication Programme has been started in the district under the Third Five Year Plan. Mass vaccination is being carried out to eradicate this disease.

AGRICULTURE

Agriculture is the main occupation of the people in the district as it engages about 81 per cent of the working population. Most of the others depend directly or indirectly upon it. As the terrain throughout the district except Paonta tehsil is hilly and holdings are very small and scattered, the yields of various crops are much lower than in the plains and scope for increasing production is rather limited. Sirmur district by virtue of its varied altitude and agro climatic conditions possesses vast potentialities for growing a wide variety of temperate fruits and cash crops like ginger, potato, vegetables and chillies.

Major food crops are grouped in three categories viz., cereals, pulses and other food crops like chillies, ginger, sugarcane and turmeric. Non-food crops are divided into two sectors of oil seeds and other non-food crops such as, cotton tabacco and fodder crops.

Cultivating Seasons—As in the other parts of the Pradesh there are two agricultural seasons namely Kharif and Rabi. Ginger, maize, millets, potato, pulses, ragi, rice and turmeric are the main crops grown in Kharif season. Barley, mustard, tobacco and wheat are grown in Rabi season. The district has earned a name for itself as a producer and supplier of ginger. Major food crops grown in each agricultural season are—

Agricultural Season	Sowing period	Harvesting season
(a) *Kharif*—		
1. Rice	May—June	October—November
2. Maize	June—July	September—October
3. Ragi	June—July	October—November
4. Millets	June—July	October—November
5. Potato	March—April	September—October
6. Ginger	May—June	October—November
(b) *Rabi*—		
1. Wheat	October—Nov.	April—May
2. Barley	Oct.—Nov.	April—May
3. Gram	Oct.—Nov.	March—April

Land Utilisation—The pattern of land utilisation in the district is shown here. All the figures are based on average for five preceding years:—

Classification	Area in figures in 1,000 acres 1941	1951	1961
1. Total Geographical area	739·575	699·673	708·010
2. Area of Forests	312·774	133·378	127·070
3. Barren and Unculturable land	Not measured	4·355	15·203
4. Land put to non-agriculturable uses	110·892	106·645	14·720
5. Culturable Waste	218·374	24·457	35·232
6. Permanent Pastures and other grazing land	Not measured	152·778	188·615
7. Land under miscellaneous trees crop and groves	Not measured	36·893	68·197
8. Current fallows	5·425	6·472	4·459
9. Other fallow land	Not measured	0·611	1·061
10. Net area sown	92·109	92·138	98·636
11 Area sown more than	59,644	62·929	69·359
12. Total cropped area	115·753	155·067	166·995

*Areas under different crops during 1960-61

Name of crop	Area in acres
Rice	14,113
Wheat	58,783
Barley	8,149
Maize	53,021
Millets	7,614
Pulses	10,524
Sugarcane	2,492
Fruits and Vegetables	4,344
Cotton	248
Fibres	402
Oil seeds	2,410
Ginger	2,693

*Annual Season and Crop Report 1960-61

Sowing is generally done by broad-cast method. Improved method of paddy cultivation has been introduced and more people are adopting this. Fields are manured with farm manure. Some fertilisers have been introduced. Agriculture is carried on by old types of implements.

Before the formation of Himachal Pradesh there was one agriculture farm at Dhaulakuan. It had to cater to the needs of the entire tract in the matter of supplies of improved seeds and quality graft of fruit plants.

During the First Plan, three nurseries were started at Dabria and Shivpuri in Nahan tehsil and Sinhari in Pachhad tehsil. One Potato development Station was established at Kwagdhar. This Potato Development Station served as a seed multiplication centre both for potatoes and improved wheat varieties which are suitable for sowing at higher elevations. Under the Second Five Year Plan, four seed multiplication farms were started at Bubi and Andheri in Rainka tehsil, Bhagani in Paonta tehsil and Bagthan in Pachhad tehsil. A Potato Development Station has been started at Kheradhar in Paonta tehsil and a Ginger Development Station at Harlo in Rainka tehsil. Besides, five progeny orchards have been established at Rajgarh, Kwagdhar and Bagthan in Pachhad tehsil, Dhaulakuan in Paonta tehsil and Shrumyla in Rainka tehsil. The Dhaulakuan farm has been greatly extended in area and converted into a State level Regional Research Station for research on crops. Sub-tropical fruits are grown. An enhanced programme of seed-multiplication of important crops like wheat, paddy oil-seeds and sugarcane was carried out. 6,401 maunds of crop seeds and 27 maunds of vegetable seeds were distributed among the growers during the decade 1951—61. Horticultural loans amounting to Rs. 140,330 were also distributed among the cultivators upto 1960-61.

To protect the crops from pests, a plant protection scheme was started in the district under the Second Five Year Plan. Progress made under the scheme upto 31st March, 1961 as:—

(i) Area sprayed under fruit plants—812 acres

(ii) Area sprayed under crops—2,547 acres

(iii) Area baited against field rats—18,904 acres

(iv) Plant protection equipment distributed—42 acres

ANIMAL HUSBANDRY

In 1951, the livestock population in the district was 328,248. According to 1961 livestock census, the number of livestock comes to 393,658. Cows and oxen take the first place and are 221,455. Buffaloes are about 30,107. Goats are 89,329 and sheep 49,524. The number of horses, ponies, mules and donkeys is only 2,249.

There are veterinary hospitals at Nahan, Paonta, Sarahan. Dadahu, Rajgarh, Rajpur and Shillai. Veterinary dispensaries are functioning at Kala Amb, Sungra, Sangrah and Sataun. Two more veterinary dispensaries have been started at Mangarh and Dhamla in 1962 under the Third Five Year Plan.

Seven Bull Centres have been established at Paonta, Dadahu, Dhaula Kuan, Rajpura, Baraghat, Kala Amb and Sarahan. Pedigree bulls have been provided in these centres for breeding and upgrading of local cattle. These bull centres have been located in the vicinity of veterinary hospitals so that proper care of pedigree bulls is taken and maximum and scientific use of the bulls is made.

Key village scheme was launched under the Second Five Year Plan. Centres were started at Maira Paonta, Bata-mandi, Rampur-Banjaran and Kolar. This scheme has also been extended to villages Singhpura, Ajoli, Shivpur and Salwala under the Third Five Year Plan.

A cattle dairy farm has been started at Dhaulakuan under the Third Five Year Plan for evolving a new breed with the introduction of superior germ plasm and to cater for the requirements of milk for Nahan. A nucleus stock of two dozens of Holstein and Jersey cross breed cows have been procured and are being bred in the farm. Six stray Haryana heifers have been Procured from Chandigarh and are being bred at the farm with Jersey blood. The aim is to acclimatise these Haryana Cattle in this region. Cows of well known breeds like Friesian and Sahiwal have been maintained in the farm.

In 1962-63, 27,991 litres of milk was produced at the farm and supplied to Nahan town.

Liver fluke control scheme was started in the district under the Third Five Year Plan. This disease used to cause havoc and affect the livestock adversely. Three centres for the control of this disease were established at Shivpur, Batamandi and Rampur Banjaran in the first instance and the control programme was concentrated around these centres. The entire district has now been covered under the scheme.

A Central Poultry Farm has been opened at Kansiwala near Nahan during 1960. This farm makes available better eggs and birds for distribution to farmers. This farm has

been converted into Poultry Development Block under the Third Five Year Plan. The main function is to set up the co-operatives of poultry breeders, to supply them the stock and also to train them adequately in poultry keeping. A poultry unit was also attached to the veterinary hospital at Sarahan under the Second Five Year Plan.

Two duck breeding centres have been opened at Nahan at Ranital garden and Rainka under the Second Plan. The aim of these centres is to produce ducks for breeding and for the table.

PANCHAYATS

There was no regular system of Panchayats in the district before the formation of the Pradesh. Some traditional Panchayats existed which were not connected with the administration. These Panchayats covered either a village or a group of villages communities. The functions of these Panchayats were confined only to settling simple disputes. They were normally not doing anything regarding village uplift.

In 1949, Punjab Village Panchayat Act of 1939 was enforced and Panchayats of Dadahu, Sarahan and Majra were established. These Panchayats were to perform certain municipal as well as judicial function without any reservation of seat for women or Scheduled Castes. The Himachal Pradesh Panchayat Raj Act was passed in 1952. Under this Act, the principle of election to Gram Panchayats on adult suffrage consisting of all adults ordinarily residing within its jurisdiction, was accepted and these Panchayats were established in each patwar-circle. A special feature of the system was the reservation of seats for women and Scheduled Castes. The first elections were held in 1954 and 1607 office bearers were elected for 63 Panchayats. Under the act there was a provision to establish tehsil Panchayats. Accordingly 3 tehsil Panchayats were established by the end of 1956 through indirect elections. The membership of the tehsil Panchayats varies between 10 and 40. These are required to ensure for efficient running of and proper control over the activity of the Panchayats (b) hold Panchayat Sammelans (c) arrange for adult education (d) establish and maintain libraries and reading rooms and (e) organize centres for the training of Panches. For the proper administration of tehsil Panchayats, 25 per cent of the members are nominated by the Himachal Pradesh Government.

Second elections to the Gram Panchayats were completed during 1957-58. In 1958, 73 Nyaya Panchayats consisting of 15 members each were established. Elections of Panches to Nyaya Panchayats were held. The number of Panchayats existing in the district on the 31st March, 1961 were:—

Serial No.	Kind of Panchayats	Name of Tehsil	Number
1	Gram Panchayats	Pachhad	26
		Rainka	27
		Nahan	8
		Paonta	12

The Nyaya Panchayats enjoy power to hear civil and revenue suits upto the value of Rs. 100. On the criminal side, minor cases can be referred to them. Samjhota Samities have been established for bringing about compromise between rival parties, because under the Panchayat Act, civil suits or criminal cases, before they could be filed in the Nyaya Panchayats, were to be referred to Samjhota Samities.

The main activities of the Panchayats have been constructed and repair of village paths and roads, bowlies, kuhls, bridges, schools and other buildings, digging of compost pits and planting of trees. Panchayats are to look after village sanitation, maintenance of public wells and prevention of drinking water from pollution. In the field of social services and other allied activities, Panchayats look after education recreation, social welfare, libraries, reading rooms and organise fairs and festivals. Panchayats are also responsible for the efficient management of the registration of births and deaths. In fact, as far as possible all local development works in the rural areas are being executed through the Panchayats.

The institution of village Panchayats have been taking deep roots in the district. They should come to play a vital role in the fulfilment of targets and aims of the Plans and other welfare programme.

LOCAL BODIES

There are two local bodies in the district; one is at Nahan and the other at Paonta. Shamsherpur Cantonment, which was treated as a separate urban unit in 1931 and 1941 with population of 949 and 803 persons respectively was subsequently declassified in 1951 has been merged with Nahan Municipal Committee. During 1931-32 there were two local bodies viz. District Board and Municipal Board at Nahan which have been described in "Sirmur State Gazetteer Part A, 1934" as—"The District Board and Municipal Board were constituted in the years 1898 and 1868, respectively.

The amalgamated offices of the District Board and Municipal Committee are called the District and Municipal Board. The President of the Municipal Committee is ex-officio Vice-President of the District Board and is in charge of the Board.

"The District Board has a President, a Vice-President and 27 members, out of which seven are nominated and twenty elected who hold office for 3 years. There is only one District Board for the whole State.

The only municipality is Nahan which has a President and nine members, of which three are nominated and six elected. They also hold office for three years. The Municipal income from octroi duty in 1931-32 was Rs. 15,924-4-0 giving an incidence of Rs. 2-3-0 per head of the town population." The District Board was abolished in the year 1953.

Municipal Committee, Nahan—This is a class IV town having a population of 12,439 persons. The committee comprises of 3 officials and 9 non-official members. Election is held on the basis of adult franchise. One seat is reserved for Scheduled Castes. The main source of income of the committee is octroi duty, water taxes and sanitation taxes. It enjoys a sound financial position having annual income to the tune of Rs. 2,43,377/- in 1961. Its sources of income are—

1. Grant-in-aid by the Government.
2. Interest on investments.
3. Land rents.
4. Licences fees.
5. Municipal properties.
6. Octroi.
7. Sale of trees and forest.
8. Slaughter house tax,
9. Show tax.

Annual receipts and expenditure of the committee for the decade has been given in table 11.1 of Part III.

The committee maintains a library, reading room and a dispensary. The amenities of public hydrants, street lighting and drainage have been extended to the citizens.

Small Town Committee, Paonta—According to 1961 Census this is a class VI town having a population of 1,833 persons. Paonta was declared as an urban area for the first time in 1951 when a Notified Area Committee was constituted there. Now this locality has a small town committee. It consists of one official and 6 non-official members. Election is held on the basis of adult franchise. Annual income of the committee was Rs. 28,866/- and expenditure Rs. 22,203/- in 1960. Its financial resources are octroi, rent of lands and buildings, water supply and grant-in-aid by the Government.

The committee maintains streets and roads of the town. Drainage system has been introduced in the town. It maintains a library, a small garden and a pavillion on the banks of River Jamuna.

CO-OPERATIVES

Co-operative movement in the district dates back to 1937, when Sirmur Durbar constituted a rural uplift committee to study the economic and social condition of the masses in the State. After careful study of the conditions prevailing at that time, the committee suggested that Refaisien's type of credit societies should be organised to save the village folks from the clutches of the money lenders. In 1939 a programme for the organisation of 80 thrift and credit societies was launched in Nahan and Paonta tehsils in the first instance. Services of a Registrar Co-operative Societies and an Inspector were secured from Uttar Pradesh for the purpose. This programme was completed in 1940 and later on the scheme was introduced in Rainka and Pachhad tehsils. The work was at first restricted to the organisation of credit societies only but later on purchase and sale societies were also organised.

Before the formation of Himachal Pradesh, there were 596 agricultural credit, 3 non-agricultural credit and 14 purchase and sale societies with a membership of 12,715 and working capital of Rs. 4,32,000. There was no institution which could provide credit to the Co-operative Societies. To remove this handicap, the bank of Sirmur re-

gistered under the Special Act on the direction of Sirmur Durbar was asked to provide finances to Co-operative Societies. This bank was merged with the Himachal Pradesh State Co-operative Bank Ltd. in 1954-55.

First Five Year Plan

Credit societies established during the state regime were very small in size. Some of them did not fulfil the minimum standards of membership as required under the rules and act. To remove this defect and to strengthen the movement, small societies were amalgamated to form bigger societies. As a result of amalgamation, the number of societies at the end of 1955-56 was reduced from 596 to 101; multipurpose 89 and 14 thrift and credit societies. There were 632 societies on the 30th June, 1952 with a membership of 12,731, share capital of Rs. 20,100 and working capital of Rs. 7,25,000. By the end of the First Plan, the number of societies was 130 with a membership of 14,236, share capital of Rs. 2,52,000 and working capital of Rs. 11,32,000. Subsidies amounting to Rs. 1,52,000 were granted to various societies for appointment of staff, construction of buildings and as working capital.

Second Five Year Plan

The following statement shows the schemes implemented for the development of Co-operatives in the district and expenditure incurred during the Second Plan:—

Serial No.	Name of the Scheme	Targets achieved	
		Physical	Financial
			Rs.
1	Staff subsidies to marketing societies	3	8,000
2	Subsidy to credit societies	4	5,000
3	Loans and subsidies for the construction of godowns	6	90,000
4	Subsidy for the purchase of trucks	1	93,000
5	Share capital contribution in marketing societies	2	26,000
6	Share capital contribution in credit societies	4	20,000
7	Revitalisation of small sized societies	80	30,000
8	Organisation of service societies	40	17,000
9	Subsidy for the hiring of godowns	2	7,000
	Total		206,000

The progress of the movement in the district during 1959-60 to 1961-62 is indicated by the figures given below:—

Year	Number of societies	Membership	Share Capital
			Rs.
1959-60	154	15,661	368,000
1961-62	168	17,234	409,000

The number and kind of societies functioning in the district on the 30th June, 1962 were:—

Serial No.	Kind of societies	Number
1	District Marketing Federation	1
2	Tehsil Unions	3
3	Agricultural credit societies	141
4	Non-agricultural credit societies	9
5	Industrial societies	9
6	Purchase and sale societies	4

A branch of the Himachal Pradesh State Co-operative Bank was opened at Nahan in 1955. Branches of this bank are also functioning at Paonta, Sarahan and a pay office at Rajgarh.

The following schemes are being implemented in the district under the Third Five Year Plan:—

Serial No.	Name of the Scheme	Plan Outlay	
		Physical	Financial
			Rs.
1	Staff subsidy to village societies organised/re-organised during the Second Plan	120	51,000
2	Organisation of new societies	11	7,800
3	Share capital contribution to village societies	14	7,000
4	Co-operative farming	2	24,000
5	Rural Godowns	10	100,000
6	*Marketing*—		
	(*a*) Share capital contribution to marketing societies	1	5,000
	(*b*) Managerial subsidy	3	4,000
	(*c*) Godown for marketing societies	1	20,000
	Total		218,800

INDUSTRIES

There are two large factories in the district—Nahan Foundry and Rosin and Turpentine Factory, Nahan—both in public sector.

Nahan Foundry

Nahan Foundry was established in 1875 by the then Maharaja of Sirmur State and was known for the manufacture of weights. This item of manufacture was not enough to keep the concern going. The Maharaja

therefore decided to produce wrought iron by utilising the large deposits of iron ore found in the Lana Cheta area of Rainka tehsil. Accordingly, machinery was imported from England and for the first time, a blast furnace was erected for the Foundry. The iron ore proved to be of exquisite magnetic quality containing no sulphur or phosphorous, with the result that despite higher cost of production on account of charcoal being used as fuel, the iron produced eqalled the best swedish brands. This, however, could not continue for long as the swedish iron was replaced by the English mild steel at a greatly reduced price and the foundry had to shift to the manufacture of cane crushers.

At the time of formation of Himachal Pradesh, the Foundry was treated as jointly owned by the Maharaja and the Government of India on a 50 : 50 basis. A local board consisting of the Maharaja, the Chief Commissioner of Himachal Pradesh and some of the officials of Himachal Pradesh was looking after the affairs of the Foundry. In March, 1952 the Government of India purchased the Maharaja's half share in the Foundry and since then it is fully owned by the Government of India. A private limited company namely "Nahan Foundry Limited" was registered in October, 1952, and the company took over the administration of the Foundry from 1st January, 1953.

The low production during the years 1953-54 and 1954-56 was due to the accumulation of stock on account of the general depression in the market. The Foundry produced 2,932 tons of castings in 1961-62 as against 3,182 tons in 1960-61 and 3,067, tons in 1959-60. Value of the production during 1961-62 amounted to Rs. 26.64 lakhs against 25.36 lakhs in 1960-61 and 22.05 lakhs in 1959-60. Details of production are given below: —

Items	*1961-62	*1960-61	*1959-60
1	2	3	4
Cane Crushers ..	5,285	4,967	1,365
Juice Pans	211	261	723
Rod Roller Bottom	..	55,303	35,500
Rod guide stands	63,185	139,220	14,000
Brake blocks	875	42,871	10,800
C.I. Sleepers	..	228	1,100
C.I. Manhole Covers	379	360	856
C.I. Steps	848	7,365	3,600
C.I. Metric Weights	668 sets	2,700 sets	..
Bearing plates	4,100	..	..
Electric Motors	30	..	..
Horizontal Power Crusher	5	..	..

The Foundry finds market for its cane crushers etc. in Uttar Pradesh, Punjab and lower parts of Himachal Pradesh, where it has provided agencies for repair work, some of which are run departmentally while others are on commission basis. It also supplies cane crushers through the All India Khadi and Village Industries Commission.

The entire income to the Foundry comprises not only of the sales of cane crushers, accessories, miscellaneous articles and stores but also of the hiring charges of cane crushers. The following figures reveal the total receipts of the Foundry through sales and hirings during the year 1952-53 to 1961-62: —

Year	*Sales Rs. in lakhs	*Hirings Rs. in lakhs
1952-53	3·63	3·07
1953-54	6·00	4·42
1954-55	6·05	7·38
1955-56	10·30	7·85
1956-57	11·67	9·11
1957-58	13·81	7·62
1958-59	12·20	8·58
1959-60	19·31	11·13
1960-61	20·56	10·29
1961-62	23·38	9·70

While the sale proceeds continued to depict a rising trend upto 1957-58, a fall of 11.7 per cent during 1958-59 in comparison to previous year is due partly to a diminution of outside orders for casting and partly to lesser number of cane crushers being manufactured. The decline in receipts from hiring during 1957-58 was due to poor cane crop, establishment of new sugar mills and shortage of juice boiling pans. The sales during 1961-62 was Rs. 23.38 lakhs against Rs. 20.56 lakhs in 1960-61 and Rs. 19.30 lakhs in 1959-60. Hiring income during 1961-62 amounted to Rs. 9.70 lakhs against Rs. 10.29 lakhs in 1960-61 and Rs. 11.13 lakhs in 1959-60.

The Foundry employs a total staff of about 700 at its works and agencies. In addition, about 150 to 200 workers are engaged on a temporary basis during the cane-crushing season. To meet the Foundry's requirements of skilled personnel, an apprenticeship training scheme with three trainees was started during 1958-59. This number rose to 4 in 1959-60 and 17 in 1961-62. The Foundry has also a small printing press which besides meeting the requirements of the Foundry, undertakes work from public on payment.

1. Quarterly bulletin of statistics (quarter ending June, 1960).
2. Reports and anuual accounts Nahan Foundry Ltd., 1961-62.

Rosin and Turpentine Factory

Plan to set up this factory was finalised and approved by the Sirmur Durbar in 1945. Thereafter, the construction work started which was completed by 1948. The factory came into production only in 1948-49.

The Sirmur Durbar had entered into an agreement with M/s. Gopal Singh & Sons, who were to act as Managing Agents for the factory for twenty years upto 1965. Due to certain reasons, the Managing Agents gave up taking interest in the factory from 1957 onwards. The affairs of the factory thereafter were handled directly by the Factory Manager under the control of the Director of Industries, Himachal Pradesh. The Factory was placed with the Forest Department for management with effect from April, 1959.

Rosin tapping is done by contractors as well as departmentally. The contractors who undertake to work State forests are required to supply fixed load of raw material to the factory.

The factory started with an initial capital of Rs. 6,44,390. Due to a spell of continuous losses, this factory had a cumulative loss of Rs. 28,57,605 upto 1958-59 as detailed below:—

	Rs.
Upto March, 1953	239,903
1953-54	512,835
1954-55	348,779
1955-56	68,585
1956-57	419,859
1957-58	605,951
1958-59	661,693
Total .	2,857,605

The factory started earning profits from 1959-60. The table below will throw light upon the profits earned by the factory from 1959-60 to 1961-62:—

Year	Gross profit	Net profit
1959-60	486,574	422,845
1960-61	514,481	411,832
1961-62	558,103	74,741

The factory is now processing about 100,000 maunds of rosin as against 60,000 maunds being processed in the past. Varnishes of different varieties, disinfectants, phenyle and sealing was the main subsidiary products being manufactured in the factory. Chief market for the rosin is Bombay and Calcutta. The industries dependable upon rosin are mainly soap, paints, varnishes and disinfectants.

The fatcory has a strength of 115 workers classified into skilled, semi-skilled and unskilled workers. Factory foremen and supervisors are on a regular cadre.

Government Leather Training Centre, Paonta

This centre started in the year 1954, trained about forty persons till February, 1962 and six trainees were under training. Out of the passed out trainees, thirty-six had already been rehabilitated. Total production of the centre since its inception till about the end of 1961 was worth Rs. 50,140.76 whereas sale proceeds of the finished goods for the same period amounted to Rs. 37,460.35. The centre was manned by a technical staff of three persons headed by a leather expert.

Government Tanning Training Centre, Paonta

This centre was opened in the year 1955. About twenty-eight hands had been trained till the beginning of 1962 while six persons were under training. Out of the trained persons, sixteen had been rehabilitated. The centre, since its inception had shown a production of the value of Rs. 26,333.58 whereas its sale proceeds were worth Rs. 17,551.57 during the same period. The centre had a strength of four persons headed by one tanner.

Government Tanning and Flaying Demonstration Centre, Sangrah

This centre, was started in the year 1960 by the Block agency but subsequently transferred to Industries Department with a strength of two technical persons headed by a tanning and flaying master craftsman.

Government Pottery Training Centre, Paonta

The centre was started in the year 1954 and by February, 1962, fifty-five trainees had already been trained thereof which six trainees had found employment in the centre and thirty-four rehabilitated elsewhere in the trade. The remaining nineteen were out of trade. The centre provides for training in glazed pottery. Till February, 1962 total production of the centre was of the value of Rs. 31,793.46 whereas the sale proceeds of the centre were Rs. 25,752.70 and capital investment amounted to Rs. 39,561. The staff demonstrates improved tech-

niques to the village potters. The centre had a strength of eight technical persons headed by a superintendent of pottery. Raw material is imported from the Punjab and the Uttar Pradesh. The main manufactures of the industry are crockery, toys and electric instruments, sold locally, in the sales shop, Simla and in various exhibitions. Suitability of Paonta as a site for the establishment of a pottery centre and the future prospects of the industry there, is not free from question and doubt at least or the present, as would appear from a relevant extract of the account contained in the Industrial Survey Report of Himachal Pradesh, 1955-56 (pages 68-69) which runs that in the periphery of Paonta in the district of Sirmur abundant reserves of clay are found viz., at Rajpur and Kandi. The quantity and quality of these deposits are yet to be investigated for assessing their suitability for the manufacture of glazed pottery.

Government Tailoring Centre, Paonta

This Centre came into being in the year 1955 and had trained about sixty hands till the early part of 1962. Out of them forty one were out of trade. The centre has a strength of two technical persons headed by a head tailor mistress. Total production of the centre since its inception, was worth Rs. 5,231.14 whereas the sale of the products was estimated at Rs. 1,530.91 for the period under review.

Government Tailoring Centre, Dadahu

It started in the year 1961 and in February, 1962, there were fifteen trainees under training. Its strength consisted of two technical persons headed by a head tailor mistress.

Government Tailoring Centre, Sangrah

It started functioning in the year 1957 and by the beginning of 1962 had trained about twenty-five persons out of whom thirteen were plying their trade in their homes. There is only one technical person incharge of the centre.

Government Tailoring Centre, Sangarh

A tailoring centre was started at Sangrah in 1961 where nine persons received the training till February, 1962. There is only one technical person imparting the training.

Government Tailoring Centre, Rajgarh

This centre was started in the year 1960 and has trained only two persons, till the end of February, 1962, when eleven persons were under training. This centre had a strength of two technical persons headed by a head tailor mistress.

Government Weaving Demonstration Centre, Naura

This centre was started by the block agency in the year 1960 but has been recently transferred to the Industries Department. It has a strength of two technical persons headed by a weaving master.

Government Weaving Centre, Sarahan

This centre was started in the year 1960 and till about February, 1962 has trained four persons. A batch of four persons was also under training. This centre has a staff strength of three technical persons headed by a weaving master.

Government Gur Making Demonstration Centre, Paonta

This centre was started in the year 1958. Its function is to propagate improved techniques in Gur making in the Dun Valley. About two hundred villages had been benefited by this centre till February, 1962.

Government Carpentry Centre, Rajgarh

This centre was started in the year 1960 and in February, 1962 there were twelve persons under training. This centre had a strength of two technical persons headed by an assistant supervisor (Carpentry).

BANKING AND COMMERCE

The credit facilities available are:—

1. Commercial Banks.
2. Commission Agents.
3. Co-operative Credit Societies.
4. Government.
5. Industries Department.
6. Professional Money Lenders.
7. Relatives.
8. Village Banias.

A branch of the Punjab National Bank Limited was opened on 17-8-1948 at Nahan and the State Bank of India started functioning there in 1955. The Branches of the Himachal Pradesh State Co-operative Bank Limited (Non Scheduled) were opened at Nahan, Paonta, Rajgarh, (Pay Office) and Sarahan on 26-2-1955 by integration of the Bank of Sirmur. These afford credit to the Co-operative Societies which further ad-

vance loans to the individual members. The Bank charges interest at the rate of 6 per cent from its member co-operative societies which become eligible for loans by purchasing shares of the value of Rs. 100/-. Besides Government advances Taccavi loans to the rural public for purchase of bullocks, improved seeds, fertilizers, horticulture, construction of house and buying orchards.

The Co-operative Societies play an important role in the sphere of rural credit and marketing. There is a District Marketing Federation which arranges for the marketing of agricultural produce of the member societies. It also procures all required commodities to the societies from the outside market. Three Tehsil Co-operative Unions are functioning as the primary marketing societies.

There is at least one small market at the headquarters of each tehsil. The main markets are Banethi, Dadahu, Kamrau, Ludhiana, Majra, Nahan, Paonta, Rajgarh Sarahan and Sataun. The articles of exports are Anardana, chillies, ghee, medicinal herbs, ginger, potatoes, and walnuts. Timber is also exported. Major imports consist of cement, cigarettes, coal, consumers goods, domestic utensils, fabrics, iron goods, kerosene, salt, sugar and tea.

In the interior there are small shops at least one shop in one big village. The shopkeeper stocks every variety of goods with due regard to the consumers taste and requirements. A list of important markets alongwith their business has been given at table 18.2 of part III.

COMMUNICATION AND ROAD DEVELOPMENT

Before the formation of Himachal Pradesh, there were very few roads in Sirmur. The main motorable routes were:—

1. Nahan Kala Amb Road	11 miles
2. Nahan Paonta Road	28 miles
3. Paonta Rajban Road	7 miles
4. Nahan Dadahu Road	24 miles
5. Nahan Sarahan Road	25 miles
6. Road from Bata to Punjab Boundary.	5 miles

With the exception of Nahan Kala-Amb road all these roads were only fair weather roads with practically no bridges over streams. During rainy season, tehsil headquarters were not easily accessible from Nahan. On the formation of Himachal Pradesh a systematic and phased programme of road construction was taken up.

By the end of the Second Five Year Plan, the district had 167 miles of motorable roads. This figure is expected to go upto 291 by the end of the Third Five Year Plan period. The roads below existed in the district at the end of the Second Five Year Plan:—

1. *Simla-Nahan-Paonta-Dehradun Road*:—This road was already motorable between Nahan and Sarahan and Nahan and Paonta. It was extended to join Simla Kalka road at Kumarhatti. The section from Sarahan to Paonta was also improved considerably.

A permanent double lane bridge was constructed across Markanda river and Nahan was connected with Simla by a shorter route. It also connects Nahan with Dehradun. The length of this road is 81 miles.

There is a proposal to construct a high level bridge over River Jamuna near paonta on this road. The road will be made 24 ft. wide with 12 ft. wide metalled and tarred road crust, as it is being developed as a State Highway.

2. *Jagadhari-Paonta Rajban-Rohru Road*:—This road from Jagadhari to Rajban was already motorable. The length in Sirmur district is 12 miles. This road is being extended upto Rohru in Mahasu district. Total length of this road in Sirmur and Mahasu districts is 60 miles, out of which about 30 miles were motorable by the end of the Second Plan period. It is proposed to make it motorable throughout with permanent bridges over streams during the Third Plan period. A suspension bridge over river Giri at Sataun has been recently completed.

3. *Nahan-Dadahu-Sataun Road*:—The road from Nahan to Dadahu though already motorable was improved to 15 ft. width. A jeepable track has been cut on the left bank of river Giri from Dadahu to join Jagadhari-Paonta-Rajban-Rohru Road near Sataun. It is being made motorable during the current Plan period. Permanent bridges over Jala river and Giri river at Dadahu will be constructed during the Third Plan.

4. *Solon-Minus Road*:—This road will connect Pachhad and Rainka Tehsils with Kalka-Simla-Road at Solon at one end and Jagadhari-Paonta-Rajban-Rohru road at the other. The road was opened to traffic from Solon to Rajgarh 26 miles during the Second Plan. The rest of 50 miles from Rajgarh to Minus will be made jeepable during the Third Plan period. A permanent bridge across river Giri has also been completed.

The work on the following roads was also started during the Second Plan and these will

be made motorable by the end of the Third Plan.

5. Rajgarh-Jamta Road:—26 miles.

6. Rajgarh-Neri Sainj Road (Section Jajgarh to Neri): 35 miles.

7. Kolar-Bilaspur Road—9 miles.

8. Kala Amb-Trilokpur Road—4 miles.

The following roads will be made jeepable during the Third Plan.

1. Dadahu-Haripur Dhar-Chaupal Road (Section Dadahu to Haripur Dhar) :—37 miles.
2. Sataahan Chandigarh Road—35 miles.
3. Ochhghar-Narag Road:—8 miles.

LAND REVENUE AND LAND TENURE

Before Samvat 1870 the land revenue in Sirmur State was realised by combined system of cash and kind collections known as kara and katla on the basis of appraisement. The unit was the kain—the amount of land which could be sown by a given amount of seed. Usually this was four kacha maunds of seed grain. This unit was not constant. Moreover, the kain itself varied being sometimes five or even six kacha maunds. The kain unit was, however, uniformally assessed at one rupee in cash or two kacha maunds of grains in kind.

Raja Fateh Parkash introduced the system of cash assessment in most of the State in Samvat 1883. Except in the khols of Haripur and Nahan, where revenue in kind was collected by the Bhandari, the khol villages continued to pay on the old system upto Samvat 1902, when the cash assessments were also introduced there. In Samvat, 1902; the revenue of Samvat 1883 was increased by twenty per cent.

The first regular settlement was carried out under the orders of Raja Shamsher Parkash in 1935 Bikrami by Lala Nand Lall. The assessment was fixed for a period of fifteen years. A survey was carried out throughout the State and regular revenue records were drawn up. In addition to the revenue demand, lambardari and patwar cesses and local rates were imposed. The State was divided into four tehsils: Nahan, Majra, Pachhad and Palwi (Rainka). The settlement operations were opposed by the people of Rainka who thought that their interests were threatened. The Zamindars were ignorant of the precise amount of the demand and were mere puppets in the hands of the agitators. Cash assessment amount to Rs. 1,501.54.

A revised settlement was accordingly ordered in Samvat 1944—Bikrami under the direction of Rai Parameshari Sahai and completed in 1949 Bikrami. The Zamindars offered no opposition to it. Only tehsils Paonta and Nahan and waziris Sain in Tehsil Pachhad and Karli in tehsil Rainka were re-surveyed and Zaildars were appointed. The cesses were increased by one per cent of bandari dues.

For administrative convenience, the State was divided into Waziries. Each Waziri was incharge of A guldar. The waziries were divided into Bhojes. Each Bhoj used to be under a Siana or Lambardar. The Siana had under him his deputies called locally as Dhamdar. For two or more bhojes, there used to be a Chauntru or Zaildar. The responsibility for collection of the State demand lay upon officials. These officials had powers with them and the rise and the fall of the demand depended upon their integrity. The Waziri system was in force upto Samvat 1922 when Raja Shamsher Parkash abolished this system and the system of regular tehsils was substituted. The other agencies, the Zaildars, Lambardars and Dhamdars continued even after that unchanged, but the agency of Zaildar was abolished with the formation of Himachal Pradesh. At present the Lambardars are held responsible for collection of the land revenue demand. The tehsil revenue-officers are also to assist them in this work.

The District Land Revenue Administration is headed by the Collector who is the Deputy Commissioner. He is assisted by Revenue Assistant, four Tehsildars, one Sadar Kanungo, field Kanungoes and Patwaries.

At the first regular settlement, the cultivated area of Tehsil Paonta was Rs. 20,775. Pucca bighas, most of it being barren waste and the number of cultivators was small. At the revised settlement it was measured as 39,065 bighas. In order to increase the number of kuhls the state decided to levy water rate for two years on every new kuhl which had cost less than one hundred rupees, and for five years on those which had cost more. The revised settlement worked well on the whole. The state demand fixed in this assessment was Rs. 236,660. There was an increase of Rs. 86,506 over the previous assessment.

The state was again brought under settlement in Samvat 1984. The settlement was conducted only in Nahan, Paonta and Rainka tehsils. In Pachhad tehsil, there was only revision of records and settlement could not be carried out for paucity of funds.

The land revenue demand assessed in this settlement stood as below:—

	Rs.
1. Nahan Tehsil	24,566
2. Paonta Tehsil	68,195
3. Rainka Tehsil	117,148
4. Pachhad Tehsil	101,575
Total .	311,484

Land Tenure

There are three kinds of land tenures prevalent in the Pradesh. These are:—

1. Zamindar
2. Battidari (a) Perfect or Mukkammil
   (b) Imperfect or Gair Mukkammil
3. Bhaichara (a) Perfect or Mukkammil
   (b) Imperfect or Gair Mukkammil

Zamindari system of land tenures are those which are either owned by a single proprietor or jointly by more than one. Pattidari are those in which each proprietor owns not the particular fields which he cultivates, but a specific ancestral share in the whole estate. Perfect or Mukkammil pattidari tenures are those in which all the lands are divided and held in severally among the different proprietors in proportion to ancestral or other customary share in the revenue paid. All the co-shares are jointly responsible in the event any one among them fails to fulfil his obligations or liabilities to the government. Imperfect or Gair-mukkammil pattidari are those in which part of the land is held in severally and part on commodity. The interests of the land owners in both correspond to the customary shares.

In Bhaichara system of land tenure, every man is the owner of only as much land as is in his possession or as it is commonly put, "possession is the measure of rights" in such system. In perfect Bhaichara tenures, all the lands are held in severally, but customary shares, if they ever existed, have disappeared. Each holding or rather the portion of total revenue which a land owner pays has become the sole measure of his rights and liabilities. An imperfect Bhaichara differs from a perfect Bhaichara system in exactly the same manner as an imperfect pattidari differs from a perfect pattidari estate.

In Sirmur district "bhaichara system" of land tenure is prevalent.

PRICE TRENDS

The wholesale prices of important staple food-stuffs are collected from four stations Nahan, Paonta, Rainka and Sarahan by the Directorate of Economics and Statistics. Data for four years from 1957 to 1960 has been given in table 4.1.

Under the Five Year Plans agricultural production is receiving the highest priority. Agriculture Department and the Block agency have made an appreciable headway in bringing more and more areas under improved seeds and fertilizers. The Extension Officer (Agriculture) through the assistance of Village Level Workers holds extensive agricultural demonstrations. Consequently the agricultural production is increasing considerably but the rising tendency in the wholesale prices of important food-stuffs cannot be ignored.

Wheat—The wholesale price of wheat was between Rs. 14.00 and Rs. 19.00 per maund from 1957 to 1960 except 1959 when its price rose to Rs. 22.25 per maund at Paonta in March, 1959. The minimum price of wheat during these four years was Rs. 14.00 in October, 1957 at Paonta and Rs. 15.00 per maund in December, 1960 at Nahan.

Rice—The maximum price of coarse rice was Rs. 25.00 per maund in January and April 1958 at Paonta and its minimum price was Rs. 15.50 at the same centre in April, 1957.

Gram—The lowest wholesale price of gram red variety was Rs. 10.00 per maund at Paonta in May, 1958, and Rs. 10.31 at Nahan in February 1958. Its highest price was recorded in February 1959 when it was sold at Rs. 22.75 per maund at Nahan.

The following statement will give an idea of the wide variation of prices of some commodities in March of each year:—

Year	Centre	Wheat	Rice	Gram	Maize	Mash
		Rs.	Rs.	Rs.	Rs.	Rs.
1	2	3	4	5	6	7
1957	Nahan	17·00	17·50	14·30	12·56	22·25
	Paonta	16·25	17·05	13·88	12·19	23·25
1958	Nahan	15·50	20·25	10·44	11·12	19·00
	Paonta	15·66	21·23	10·63	10·67	20·00
1959	Nahan	21·25	22·25	21·00	17·80	20·88
	Paonta	22·25	21·75	20·50	18·00	22·00
1960	Nahan	17·09	21·10	13·06	12·56	20·56
	Paonta	19·75	20·50	14·50	12·50	23·00

The wholesale prices of wheat, rice, gram and maize were highest in 1959. In 1960 the prices again came down.

COMMUNITY DEVELOPMENT

The community development programme was launched in the district on 2nd October, 1953 when Paonta and Pachhad blocks were inaugurated. Rainka tehsil being the biggest in the district was covered by two blocks one each at Shillai and Sangrah. These blocks were started on 2nd October, 1956. The area of Nahan tehsil is covered by Paonta block.

The following statement shows the size and population of each block:—

Name of Block	Category of block	Year of start	Area in Sq. Km.	No. of villages	Population
1. Paonta	II	2-10-53	1550·2	336	93,772
2. Pachhad	II	2-10-53	820·0	339	40,124
3. Sangrah	I	2-10-56	886·8	230	63,655
4. Shillai	I	2-10-56			
	Total		2,957·0	965	197,551

By the end of 1960-61 four blocks were functioning and the district was fully covered by the Community Development Programme. The programme aims at rapid increase in agricultural production, promotion of education, improvement in health and rural sanitation and expansion in employment opportunities. The programme has made considerable development in the field of Agriculture, Animal Husbandry, Health and Rural Sanitation, Social Education and Communications. Progress made under these heads during 1959-60 and 1960-61 is:—

Item	Unit	Years 1959-60	Years 1960-61
Agriculture			
1. Distribution of improved seeds	Mds.	3,460	988
2. Chemical fertilizers distributed	Mds.	1,008	907
3. Agricultural demonstrations held	Nos.	223	392
4. Compost its dug	Nos.	619	445
5. Area brought under Japanese method of Cultivation	Acres	255	87
Animal Husbandry			
1. Improved animals supplied	Nos.	2	4
2. Improved birds supplied	Nos.	..	122
3. Animals castrated	Nos.	1,838	2812
4. Animals Artificially inseminated	Nos.	..	99
Health and Rural Situation			
1. Primary Health Centres started	No.	..	1
2. Rural latrines constructed	Nos.	..	5
3. Pucca drains constructed	Yds.	427	533
4. Village lanes paved	Sq. Yds.	212	197
5. Drinking water wells/bowlies constructed	Nos.	13	17
6. Drinking water wells/bowlies disinfected	Nos.	301	562
Social Education			
1. Literacy centres started	Nos.	20	352
2. Adults male literate	Nos.	23	5246
3 Cultural film shows organised	Nos.	411	559
4. Youth clubs started	Nos.	3	4
5 Gram Sahayak's camps organized	Nos.	19	18
6. Functional leaders trained	Nos.	468	525
7. Mahila Samities	Nos.	11	22
8. Women camps held	Nos.	..	29
Communications			
1. Kacha roads constructed	Miles	18	4
2. Kacha roads improved	Miles	82	203
3. Culverts constructed	Nos.	3	10

People have made contributions in the form of voluntry labour cash and materials.

APPENDIX I

GAZETTEER OF IMPORTANT PLACES

A. Places of Historical Interest

1. *Nahan*—In Sambat 1678 Raja Karam Prakash founded Nahan. Situated on an isolated ridge in the Shiwaliks at an elevation of 3,057 feet above sea level it is a picturesque town. It can be approached either from Ambala City or Brara Railway Station which are connected with Nahan by motorable roads and daily bus service is available. The Ambala-Nahan road is 40 miles in length and Brara to Nahan is 38 miles. A direct bus from Ambala Cantt. to Nahan is also available which comes via Shahabad.

It is believed that the hill, on which the town now stands, was once the stronghold of Bhera Rangar, a notorious dacoit. There is a proverb, *"Bhera Lai na chaure Kaunts aur Saher"*, which means that the cattle seized by Bhera had a Kund or pit of stone on the Lai hill, where he used to light a fire of cotton seeds and oil. After his raids the beacon guided him back to his lair. He built a Devi Temple on the summit of this hill which still exists. His cattle shed lay by the Kacha tank in the town.

Bawa Banwari Das, a well known Sadhu, lived on this hill. Once Raja Karam Prakash arrived at this hill from Kalsi for hunting. The Bawa advised him to build a town at this place. The Raja did so and constructed a baradari on the spot where the Sadhu lived. The baradari stood on a high Tibba. In those days tigers abounded in Nahan, and the Bawa had reared several of them. The name Nahan is derived either from 'Nahan' which in sanskrit means 'Tiger', or Nah (King) and ain (abode).

Now there are: A Degree College, an Arts college, a Girls Higher Secondary School, a High School for boys, Industrial Technical Institute, a District Hospital, a Veterinary Hospital, Police Station, and District Police Lines, Post and Telegraph Office, Nahan Foundry and Rosin and Turpenting Factory. There exist Circuit House, a Rest House and a Sarai for the visitors, besides a Municipal Rest House. On a clear night after rains, one can have an excellent panoramic view of the plains sprawled at the foot of the Shiwaliks, so much so that lights of paper mills at Abdullapur are also clearly visible.

2. *Sirmuri Tal*—Sirmuri Tal is situated about 10 miles north west of Paonta on the right bank of river Giri. It is the site of the ancient Capital of Sirmur. The ruins of the town, which is believed to have been destroyed in 1139 Bikrami are still visible. Close by is a Tank which is now under cultivation. Rajaban lying about a mile to the south east of the ruins of this town was made the capital of the state in 1095 A.D. by Raja Subhansh Parkash, the founder of the ruling family of Sirmur. It is also now in ruins. Among the ruins of Sirmur Tal is a stone with a deep hole, lying on the top of the small hillock on the southern bank of the Giri. In this hole the pole is said to have been fixed for the rope on which the Juggler girl, by whose curse the town was destroyed, danced. The legend has been given in appendix III. A similar stone is pointed out on the other side of the Giri.

3. *Majra*—Majra lies about 20 miles east of Nahan. It was the headquarters of the tehsil till 1893 when it was transferred to Paonta. The famous Jambu Khala bungalow is close by. It was originally built for Lord Lytton who came here on a tiger hunt.

4. *Rajgarh*—Rajgarh fort is situated in tehsil Pachhad on a natural terrace. It is square, with a tower at each corner about forty feet high.

It was nearly demolished by Gurkhas in 1814, about half mile from the fort is the Rajgarh village. Rajgarh is the headquarters of the forest division of that name. There is a post office, a high school and a dispensary.

5. *Haripur*—Haripur was formerly a fort on the border of the Jubbal State. The height of the place is 8,802 feet.

6. *Jaiak*—The fortress of Jaitak is now in ruins. During the war in 1814, the Gurkhas occupied this position with a garrison of 2200 men. They were attacked by two British detachments but without success. It was not until after a tedious series of operations that the fort was finally captured in the following year.

B. Places of Religious Interest

1. *Rainka Lake*—The sacred lake of Rainka is an important place of religious and tourist interest. It is situated at a distance of about 26 miles from Nahan, and is linked by an all weather motorable road. The sacred Parashuram Tal (Tank) is located near

the lake. There is a rest house, tourist inn, a forest sanctuary and pretty surroundings.

2. *Paonta*—Paonta is situated at a distance of about 28 miles from Nahan on the Nahan-Dehra Dun road. It is an important pilgrim centre for the Sikhs. Guru Gobind Singh, the 10th Guru of Sikhs, resided here for about three years from 1742 to 1745 Bikrami and therefore the place is considered sacred. The town contains a famous Gurdwara where fairs are held on the occasion of Hola in March and Baisakhi in April. The Gurdwara is visited by thousands of pilgrims on the occasion of the Hola festival. It also has a fine Hindu temple, built by the daughter of Raja Fateh Parkash on the bank of the Jamuna. By her request she was cremated here and a fine temple was built on the spot.

3. *Tirlokpur*—Tirlokpur is situated on an isolated hillock at a distance of about 8 miles from Nahan. The place is famous for its temple— of Goddess Bala Sundari, who is manifested with Shakti. An annual fair is held at this place in April in her honour.

4. *Katsan Devi*—The Katsan Devi pass lies at a distance of 9 miles from Nahan. The elevation of the place above sea level is 2,500 feet. The Devi's temple lies in a thick forest of sal trees with no habitation near it. The place was once a resort of tigers, but none are now found.

5. *Mangarh*—Mangarh is a village in tehsil Pachhad about ten miles off Sarahan. It possesses an ancient Hindu temple which traditionally connects with the Pandwas.

6. *Baghani*—Situated about eight miles from Paonta, Baghani is another centre of religious interest to Sikhs. Guru Gobind Singh is said to have defeated the combined forces of some hill Rajas there after a grim battle.

C. Places of Tourist Interest

1. *Sarahan*—Sarahan is headquarters of tehsil Pachhad and Community Development Block and lies on Simla-Nahan road. There is a High School, a Primary Health centre a Post Office, a Weaving Centre, a Tailoring Centre, a Police Station, and a Rest House. The village is electrified.

2. *Dadahu*—Dadahu is worthy of special mention by virtue of its being headquarters of Rainka tehsil. The place has a Higher Secondary School, a Dispensary, a Police Station and bazar. It is a big marketting place for potatoes, green ginger and chilies.

3. *Sangrah*—Sangrah was the headquarters of Palvi tehsil till 1948 Bikrami. It lies between 77°25′ north latitude and 30°40′ east latitude. It commands a fine view of the Sain range. The place has a Primary School, a Post Office and a Police Post.

4. *Dhaulakuan*—Dhaulakaun is about sixteen miles east of Nahan on the Nahan—Paonta road. Its agricultural, horticultural and sericultural farms have carried out several successful experiments in their respective fields.

5. *Kolar*—is a village in tehsil Paonta about 5 miles from Nahan. There is a Middle School and a branch Post Office.

6. *Kala Amb*—is situated at a distance of 11 miles from Nahan. It has a Middle School, a Veterinary Dispensary and a Police Post.

7. *Rajana*—is a village situated in tehsil Rainka at a height of 5,500 feet and at a distance of 9 miles from Dadahu. It has a population of 850 persons. There is a Primary School and a branch Post Office.

8. *Kamrao*—is a village in tehsil Paonta, about 45 miles from Nahan and 18 miles off Paonta. It has a population of 1,390 persons according to 1961 Census. There are: a Primary School, a Branch Post Office and a Ayurvedic Dispensary.

9. *Mahipur*—It is about sixteen miles from Nahan. It has some pretty water falls to the south. It is situated on a plateau between lofty hills on three sides. The plateau is intersected by a hill stream which makes it very fertile.

10. *Banethi*—is situated on the Sarahan road at a distance of 12 miles from Nahan. The place commands a fine view of the Nahan Shiwaliks. It lies at an elevation of 4,643 feet above sea level.

11. *Bhujjal*—is of interest merely by virtue of being a camping ground. It lies on a plateau and commands a fine view of the Jubbal hills. The chur peak has two stages from this camping ground.

12. *Shillai*—is a big village in tehsil Rainka at a distance of 28 miles from Paonta. Headquarters of Shillai Community Development Block are located here. It has an Allopathic Dispensary, a Post Office and a High School.

13. *Chur Peak*—Also called Chur Chandni i.e., the peak of Silver bangle is 11,982 feet high. It is the highest summit among the mountains which occupy the Sub-Himalayan Tract. At the foot of the peak, there is a temple and a spring. The peak remains snow clad from December to April and in clear days it is visible even from Ambala.

APPENDIX III

EXTRACTS FROM SIRMUR STATE GAZETTEER, PART A 1934

History

The early history of Sirmur is mingled with legend. In 1139 Sambat, Madan Singh, a Surajbansi Rajput, was King of Sirmur. Sirmur was his capital, and the kingdom was known as Sirmur or Silmur after it. During Madan Singh's reign, a woman, expert in necromancy, presented herself before the Raja and boasted of her skill. He was sceptical of her powers and challenged her to cross the Giri between the Toka and Poka ranges by means of an acrobat's rope, called bharat in the tumbler's language, promising her half his kingdom if she crossed the river and returned by this means. She Succeeded in crossing, and was returning on the rope when one of the Raja's officials treacherously cut the rope to prevent her claiming half the kingdom, and the woman fell into the river and was drowned. This act of treachery resulted in a flood which swept away the town, and the Raja with all his kin perished. The country was thus left without a ruler.

In Sambat 1152 Ugar Sain Rawal, of Jaisalmer, visited Hardwar, and there met Hoshang Rai Nath, a Bhat by caste, of Sirmur, who sang his praises and invited him to assume the sovereignty of the kingdom. The Rawal sent a force under his son Sobha Rawal to conquer Sirmur. Sobha subdued the country, and made Rajban his capital[2], taking the title of Subhans Parkash. His rule lasted only four years, and he died in Sambat 1156. His successors are shown in the following list:

Head Office List			Length of Reign	Mahant's list	Name of Raja
Sambat	Name of Raja	A.D.	Years		
1152—1156	Subhans Parkash	1059—1099	4		Subhans Parkash

78

The earliest mention of Sirmur by the Muhammadan historians occurs in the Tabaquat-i-Nasiri under the year 634 H., when the Nizam-ul-Mulk, Muhammad Junaidi, who had rebelled against the Sultana Raziyya, the daughter of Altamas, took refuge in the hills of Sirmur-Bardari[2], where he died.

The chronicles of the State do not mention the events of 655-H., when Qutlugh Khan in his retreat from Hindustan to Lahore sought a refuge in Santur-garh[2] and the Hindu Chief's afforded him an asylum. Thereupon Mahmud Shah I attacked Santu and Ulugh-khan-Azam penetrated as far as the fort and territory of Silmur and devastated the Koh-i-Silmur of hill tract of Sirmur. The fort and territory of Sirmur were then apaprently in possession of that great Rai, Rana Ranpal of Santur, and he fled before the Muhammadans who plundered the marketplace and town of Sirmur. The historian observes that before this time no Muhammadan army had ever penetrated this territory.[3]

In the year 781 H., the Sultan Firoz Shah III made a progress through Ambala and entered the hills of Saharanpur. After taking tribute from the Rais of Sirmur and other hill States he returned to Delhi.

The next event of importance was the invasion of Taimur. In his autobiography Taimur says; "On the 14th of Jamadi-ul-Awal I crossed the Jumna with the baggage and encamped in another part of the Siwalik hills. Here I learnt that in this part of the Siwalik there was a raja, of great rank and power, by name Ratan Sen". A road had to

*A legend recounts that Mahi Parkash demanded a daughter in marriage from Rup Chand of Keonthal. This admission of subjection was resisted and the forces of both States met on the Besu Dhar. Sirmur was defeated but aided by his father-in-law, the Raja of Goler, Mahi Parkash attached Hat Koti whereupon Rup Chand was defeated and his son gave him his sister in marriage.

The chronology of the Rajas of Sirmur offers a few difficulties. It is drawn from two sources—One list of the Rajas kept in the State archives, the other a list in the custody of the mahant of Jagannath, at Nahan. The former list shows the dates of each raja's accession and death the latter only the length of his reign. The few discrepancies are most marked in the first few reigns (1099—1127), and for the period 1127—1583 the two lists are in strict accord with one or two exceptions. But with the reign of Bakhat Parkash a period of confusion begins. The mahant's list omits Bhupat Parkash but makes Bakhat's reign 32 years instead of 22, making the total number of years from Bakhat's accession to Ude Chand's demise 33, as in the State list. From 1616 to 1754 both lists give a total of 138 years, but there are numerous discrepancies in the lists of the probably point to dynastic troubles or interference in the succession on the part of the Mughal Emperors to which the State Chronicles do not allude. Lastly, there is a discrepancy in the reign of Karam Parkash who abdicated in 1815.

1. Baradar is probably Bhadra Tibba in Saharanpur.

2. The ruins of Santur or Santur lie at a place called Sindhubara, near chhachhrauli, capital of the modern state of Kolsia in the Ambala District.

3. S.T.N. pages 706 and 839—40.

4. E.H.I., IV, Page 14.

be cleared through the jungle, and on the 15th of the month Taimur found himself between two mountains, one the Siwalik and the other Koka mountain. "The hills on both sides raised their heads to the clouds. In the front of this valley Raja Ratan Sen had drawn out his forces as numerous as ants or locusts". But the Hindus broke and fled at the first onset, many being killed in the pursuit, and the victors obtained a great booty.

Cunningham identifies Ratan Sen of this account with Raja Rattan Parkash, who reigned from 1460 to 1490, but Taimur invaded India in 1398-99. The chronological difficulty appears insoluble, but it is certain from Taimur's account that he invaded the Kiarda Dun.

The Raja Malhi Parkash was a good ruler, religious and charitable. He wrested the fort of Malda from the Raja of Srinagar in Garhwal. Raja Udit Parkash removed his capital from Rajban to Kalsi in Dehra Dun, and abdicated his throne in favour of his son. Raja Somer Parkash captured the fort of Ratesh, now in Keonthal, and made it his capital, but Suraj Parkash returned to Kalsi, where-upon his subjects rose in revolt and attacked his palace, which was vigorously defended by his daughter, who fell in the struggle. Upon this Suraj Parkash hastened from Kalsi and subdued the rebels and also overcame the Thakars of Jubbal, Balsan, Kumharsain, Ghond, Sahri, Theog, Rawain and Kotguru, making them pay tribute, and appointing his brother Kalyan Chand to their charge. Kalsi continued to be the capital of the State. Raja Bir Sal Parkash abdicated the throne in order to devote himself to a religious life. Under Raja Jagat Parkash the Thakars of Jubbal, Balsan, Kumharsain, Sahri, Rawain and other chiefs revolted, owing to the Raja's mal-administration, but Bir Parkash, an energetic ruler, reduced them to obedience, and built the fort of Hath-Koti on the boundary of Sahri, Rawain and Jubbal. Wakat Parkash made Neri his capital, but Garbh Kot and Gajari in Ratesh pargana the seats of Government, and they so continued until Bubhal. Parkash removed to Kalsi. Karam Parkash founded Nahan. In 1678 Sambat this Galiant chief became the spiritual disciple of Bawa Banwari Das, whose descendants still hold the temple of Jagannath at Nahan. In the 8th year of the reign of Shah Jahan, Nijabat Khan, faujdar of the country at the foot of the Kangra hills, offered to conquer Srinagar, in Garhwal, and asked for 2,000 horses to effect this object. These the emperor gave him, and accompanied by the army of the Raja of Sirmur, Nijabat Khan marched on Srinagar. On the way he took the fort of Shergar which had been erected by the Zamindar of Srinagar[1] on the bank of the Jumna in his own territory. He also took the fort of Kalsi[2] and made it over to the Zamindar of Sirmur, its rightful owner, who complained that the fort of Bairat had also been wrested from him by the Zamindar of Srinagar, and declared that if a force were given to him he could recover it. Troops were accordingly given to him, and the fort was taken and made over to him. Nijabat Khan then marched on, took Santur and entrusted it to jagtu, the Zamindar of Lakhanpur with 100 horses and 1,000 foot.

Nijabat Khan's troops met with disaster in his invasion of Garhwal. He lost his mansab and jagir, which were bestowed upon Mirza Khan, son of Shah Nawaz Khan and grandson of Abdu-ur-rahim Khan, Khan Khanan, who become faujdar in his stead.

Raja Mandhata was a contemporary of the emperor Shah Jahan, who by a firman, dated 28th Jamat-us-Sani 1064 H., advised the Raja that he has deputed Iraj Khan Faujdar of Jammu and Kangra to conquer Srinagar in Garhwal and invited the Raja and the Zamindars of the hills to assist, promising that the adjacent territories of Kamaun should be conferred upon the Zamindars of that country, and those adjacent to his own dominions upon the Raja in addition to his own possessions, while the Dehra Dun was to be added to the imperial dominions. By a second firman of dated the 24th Moharram 1065 H., Khalil-ullah Khan was nominated commander, vice Bairam Khan, 10,000 troops being placed under his command.[3] Srinagar was conqured in the reign of Subhag Parkash, who, in recognition of his services received a firman, dated the 11th of

1. The Raja of Garhwal. The hill Rajas were ordinarily styled zamindars by the Mughal emperors. But the rulers of Sirmur have always been addressed as Rajas.

2. Kalpi or Kalsi

3. Khalil-ullah's campaign occurred in 1065 H., according to th Shah Jahan-nama, which adds the Zamindar of Sirmure had never before allied himself with the Delhi empire, and that on his joining the imperial forces he was distinguished by the issue of an edict confferring on him the title of Subhag (Subhak) Parkash, The compaign is fully described in the Shaha Jahan-nama, E.H.I., E.H.I. viz, pages 106-07.

Rabu-us-Sani, 1065. H., confirming the promised grant of territory and granting the Raja whatsoever Khalil-ullah might propose in his favour. In consequence by an imperial firman, dated the 22nd of Jamad-ul-Awal, 1065 H., the Raja was granted the ilaqa of Kotaha, and the Raja accordingly expelled the Zamindar of Kotaha and annexed that territory. Before his accession in 1068 H., Alamgir sent the Raja a firman, through Prince Mohammad Sultan, to notify his resumption of power. This firman bears the seal of Alamgir as prince, not as emperor.

In 1069 H., Alamgir sent a second firman calling upon the Raja to prevent and intercept all correspondence between Sulaiman Shikoh, then at Srinagar, and his father, Dara Shikoh, passing through the State. This firman also conveys news of the defeat of Shuja, and states that Sultan Mohammad, through whom it was sent, had been despatched in pursuit. Another firman of this year reiterates the request that the guards placed to prevent the correspondence in question should be carefully supervised, and states that Raja Raj Rup[1] had been deputed to chastise the Zamindar of Srinagar and that the Raja should assist in the extirpation of his enemy. the Zamindar. A further firman informs the Raja that Raj Rup Would attack Srinagar from one side, and Rajad Khan from the other, and that the Raja should cooperate with the later.[2]

This Raja, Subhag Parkash, was a good administrator, and improved and encouraged agriculture. This led the emperor Alamgir to confer upon him in the third year of his reign the ilaqa of Kalakhar by firman, on the ground that its Zamindars had mismanaged it. This would seem to be the modern ilaqa of Kolagadh, which lies near Dehra Dun, and is still held by the State in proprietorship.

Raja Subhag Parkash left two sons, Behari Mal and Hari Singh, of whom the former succeeded him under the title of Budh or Bidhi Chand Parkash. receiving a firman, dated 10th Safar in the 10th year of the reign of Alamgir (1078 H.) in which that emperor recognised his succession. By a firman, dated 11th Zulhij, in the 16th year of his reign (1084 H.), the emperor asked him to permit a contractor to take sal timber from the Kalakhar forest free of charge and to refund to him my dues which had been levied. Timber worth Rs. 8,000 was, in consequence, taken for imperial use.

By a firman, dated the last day of Safar in the 17th year of Alamgir's reign (1085 H.), the Raja was required to expel Suraj Chand, a son of the late Zamindar who had usurped the Pinjaur pargana which formed part of the estate of Nawab Fida Khan[3] the emperor's foster-brother. This firman was duly executed by the Raja, who took possession of Pinjaur, Sahwana, and the forts of Jagatgarh and Muzaffargarh, now in the Ambala District. The firmans addressed to Suraj Chand appear to have been taken in these operations, for they are preserved in the State archives. In 1098 H., the Raja represented to the Emperor that the Raja of Srinagar had seized some of his parganas, and the Emperor accordingly despatched force to aid him in recovering them. In consequence, the Raja of Srinagar surrendered the fort of Bairath Kalsi to Raja Budh Parkash. In 1100 H., the Raja received a firman acknowledging his letter of thanks and directing him not to interfere with the Raja of Srinagar in future. The Raja also carried on a curiously interesting correspondence with the Begam Jahan Ara to whom he used to send musk, wild pomegranates and game, receiving valuable Khillats in return. The Begum's fondness for jungle fowl and pheasant is expressed in her letters. Ice or snow was also sent to her, being stored at the foot of the hills in ice-pits, and thence sent to Delhi in the hot weather. The Begam once complains of its bad quality, and in reply is told by the Raja that her darogha (steward) is careless and omits to pay the labourers honestly, whereupon the Begum warns the darogha.[4]

Jog Raj, son of Budh Parkash, succeeded Bidhi Chand under the title of Mat or Medni Parkash, receiving recognition and a khillat from the Emperor. In his reign Guru Govind Singh came to Paunta in this State, and made it his residence.

The Guru resided in Anandpur, then in the Kahlur State, but on refusing to surrender an elephant to Raja Bhim Chand and Hari Chand of Bilaspur he was compelled by them

1. Uncle of Raja Jaswant Singh of Jodhpur.

2. The firmans of Alamgir address the Raja by the title of Qudwat-ul-Imsal thus showing that the ranked higher than Raja Rup who is addressed as Zubdat-ul-Imsal.

3. For a Fidal Khan, see E.H.I., vi, 418-20, 425-27.

4. The ice was stored in Sirmur and thence carried by porters to Dhamras on the banks of the Jumna. There it was packed in boxes and sent in rafts to Daryapur in Pargana Khizarabad, and thence again in boats to Delhi. The journey from Daryapur to the capital occupied three days. E.H.I., vii, page 106.

to quit that place and went to Toka. Thence he was brought to Nahan by the Raja, Mat Parkash, and from there he proceeded to Paunta, Meanwhile the Raja of Kahlur had gone to Srinagar to celebrate the marriage of his son with the daughter of Fateh Shah. Raja of Srinagar, and found that the Guru had sent wedding presents to Raja Fateh Shah. These presents he compelled the latter to return as the Guru was his enemy. Upon this the Guru, made ready for war, and Hari Chand, with Fateh Shah, advanced to attack him. The opposing forces met at Bhangani on the Jumna, and the Guru was completely victorious, both Fateh Shah and Hari Chand being slain—the latter, it is said, by an arrow from the Guru's own bow. The Ranis of both the fallen leaders became sati, and their eight tombs are still shown at Bhangani. The Guru pitched his flag of victory here also, and a Gurudawara still marks the spot. Mat Parkash died childless in 1761 Sambat. Hari Parkash, the second son of Budh Parkash, now ascended the throne, being recognised by the firman, of Alamgir, dated the 2nd of Rabu-ul-Akhir, 1115 H. His reign of only eight years ended in 1769 sambat, and he was succeeded by his son Bija Parkash a title which he chose in preference to that of Bhim Parkash suggested to him by the Emperor Bahadur Shah. He was succeeded in 1793 Sambat, by Partap Parkash, whose weak rule caused his feudatories to rebel. His eldest son and successor, Kirat Parkash, effected great reforms. He was victorious over the Raja of Srinagar, and after routing him turned his arms against the Sikhs, taking Naraingarh, Rampur, Thanadara, Ramgarh, Morni, Pinjaur and Jagatgarh. Having consolidated his power and secured internal peace, he entered into an alliance with Raja Amar Singh of Patiala, and recovered Saifabad for that ruler when it had been lost to him in the rebellion headed by his vazir, Ganga Ram. Again, when Ghulam Quadir Khan, Rohilla, invaded Kahlur, Kirat Parkash sent an army to its assistance, and he led his forces in person to aid the Garhwal Raja against the Gurkhas. In this campaign, however, his ally abandoned the field, leaving the Sirmur forces without provisions, but Kirat Parkash was, nevertheless, able to make headway against the Gurkhas singlehanded, and concluded with them a treaty which fixed the Ganges as the boundary between their kingdoms. Unhappily the Raja died suddenly on the return march at Lakarghat in Sambat 1827.

He was succeeded by his sons Jagat Parkash and Dharam Parkash. The latter's reign was an eventful one. Raja Ram Singh of Nalagarh encroched on the lands of his tributaries, and Dharam Parkash marching against him made the Rana, Jagat Chand, of Bhagal, prisoner, and halted at Pinjaur where he levied the tribute due from his feudatories. There he received intelligence that Kanwar Prakram Shah of Srinagar had seized the fort of Khushalpur near the Dehra Dun, and despatched an army under Kanwar Isri Singh to recover it. This was affected after a pitched battle in which Prakram Shah was wounded.

About this time Sansar Chand, Katoch, the Raja of Kangra, invaded the dominions of Maha Chand, of Kahlur, and took possession of his strongholds north of the Sutlej. Maha Chand thereupon sent men to Dharam Parkash to solicit help promising to pay him a lakh of rupees as nazrana, and Dharam Parkash accordingly marched at the head of his own troops and those of Kahlur, with his Thakar allies and Ram Singh of Hindur, to Chararatu on the north bank of the Sutlej and on the boundary of the Katoch territory. In the engagement which ensued he met Sansar Chand in single combat and fell by his hand. This event occurred in 1850 Sambat.[1]

Dharam Parkash left no issue and was succeeded by his brother Karam Parkash, whose indolence and inexperience were disastrous to the State. The most influential of Dharam Parkash's officials, Ajib Singh, Prem Singh and Kishen Singh, conspired with Kanwar Ratan Singh, the Raja's brother, whom they desired to place on the throne. They besieged the Raja at Kangra, a fort, now in ruins, in the Dun, some 32 miles from Nahan. In the fighting that ensued, one Cholu Mian, who closely resembled Karam Parkash in appearance, was killed and the rumour spread that the Raja had been slain. Taking advantage of this the Raja managed to escape with his family from the fort and reached Tanoru, whence, aided by Jhanju headman, he fled to Kalsi. Ratan Parkash then seized the throne, but Karam Parkash appealed to Kaji Ranjor Thapa, the Gurkha chief, for aid, promising to acquiesce in the Gurkha's seizure of the Dehra Dun, though

1. For a legend, in which Ratan Parkash is represented as Sansar Chand's opponent, see Temple's Legends of Punjab, II, Page 144.

it lay west of the Ganges. The Gurkhas promptly seized their opportunity and invaded Sirmur, expelled Ratan Parkash and established their own government, leaving Karam Parkash in no better position than before. The officials of Kotaha, Ramgarh, Laharpur, Morni, Pinjaur, Jagatgarh and other places threw off their allegiance to the State, and these chifs were thus lost to it for ever. Kanwar Gopal Singh, the heir-apparent, died about this time, but the Goler Rani bore three sons, named Fateh Parkash, Man Singh and Jai Singh, to the Raja, and thus saved his line from extinction. The Raja was at this period a refugee in Subathu in the ilaqa of Ramgarh, which had been granted for faithfull service to Khushal Singh, but his sons Maldeo and Narain wazir, Mauji Ram Mahta, was compelled to seek an asylum at Buria. The Goler Rani, a wise and courageous woman now took upon herself the direction of the Raja's affairs and appealed to Colonel Ochterlony, then political agent at Ludhiana.

This appeal coincided with the British declaration of war against the Gurkhas, and a force advanced to recover Nahan from them. Having driven the enemy out of Kalingar fort in the Dun the British encamped at Nahan, while Kaji Ranjor Thapa shut himself up in Jaitak, a fort which stood on a lofty peak, seven miles from Nahan. On the 7th December 1814, the British attacked this strong hold. The Gurkha evacuated, but fell suddenly upon the British troops exhausted and disorganised by the difficulties of the ascent. The result was a servere reverse for the British, whose loss was heavy. Jaitak held out for four months until Kaji Ranjor evacuated it in pursuance of the treaty entered into by the Nepal Government with the British in 1815.

Sirmur was in the same year restored to its ancient rulers, but Karam Parkash was not reinstated, the sanad being granted to his son Fateh Parkash and the Goler Rani being appointed regent during his minority. The pargana of Jaunsar, with the forts of Morni, Jagatgarh, and the Kiarda Dun were, however, retained by the British Government, and that of Hanro Gurchari made over to Keonthal.

Karam Parkash continued to reside at Buria till his death in 1826. He had four daughters, one married to Sukhdarshan Shah of Garhwal two to Raja Bije Chand of Nalagarh and the fourth to Raja Kharak Chand of Bilaspur. The proposed marriage of Raja Fateh Parkash with a daughter of the Raja of Garhwal was not carried out as the expense would have been too great, and General Ochterlony had stopped the levy of the phant-biahlari or benefice, levy to meet the cost of marrying the Raja's children. Under the Goler Rani's regency the affairs of the State were not well administered, owing to the self-seeking apathy of the officials, but Mian Devi Singh and Dalip Singh, sons of the Mian Khushal Singh and Ram Deo, of Ramgarh, executed a deed of allegiance in 1823, thus attaching of Ramgarh firmly to the State. In 1827 Fateh Parkash was invested with full powers under a proclamation of General Ochterlony, and in 1838 the Kiarda Dun was restored to him on payment of Rs. 50,000.

In 1938 the Raja offered a contingent for the 1st Afghan war and was thanked by Government for this offer.

The First Sikh War

On the outbreak of the Ist Sikh War the Raja sent a contingent under Dhiraj Singh Khwas to join the British at Hari-ki-Pattan, where it rendered good service.

Raja Fateh Parkash died in Jeth, Sambat 1907, after a reign of thirty-five years, twenty-three of which have subsequent to his minority. He was an able administrator. He was succeeded by his elder son Raja Raghbir Parkash. Raja Raghbir Parkash left three sons, of whom the youngest Kanwar Devi Singh (an illegitimate son) became an Extra Assistant Conservator of Forests, and two daughters, of whom the younger is the mother of Major Raja Jai Chand of Lambagraon.

The next Raja, Shamsher Parkash, inaugurated a new era in the State. During his minority the administration was carried on by the State officials. He was married to a daughter of the Raja of Keonthal, a lady of great beauty and ability, who used to conduct the judicial and administrative business of the State in his absence. On her death he abandoned the palace, making the Shamsher Villa, which he had built, his residence. In her memory he laid out the gardens known as the Rani Tal Bagh at Nahan.

Raja Shamsher Parkash's policy was to modernise the administration of the State. He toured incognitio throughout India, making himself minutely acquainted with the administration of public offices. He established regular police, judicial and revenue

courts, a district board and a public works department, and gave Nahan a municipality. Dispensaries, schools and post-offices were opened and an attempt made to develop the iron mine at Chehta, but this proving unremunerative he established the foundry at Nahan where the well-known sugarcane mills are manufactured. His greatest achievment, however, was the colonization of the Kiarda Dun, hitherto a wild and densely forested tract. The land revenue of the State was also settled and properietary rights conferred on the zamindars. The forests were preserved and became a source of revenue. These and his other reforms will be found fully described in the sections relating to the various State Departments.

Raja Shamsher Parkash received a khillat for services rendered in 1857. In Lord Lytton's Viceroyalty he was appointed a member of the Imperial Legislative Council. He received the K.C.S.I. in 1876 and the G.C.S.I. in 1886, his salute being raised to 13 guns as a personal distinction. He was also accorded the honour of a return visit from the Viceroy. In 1896 the State was removed from the political control of the Superintendent, Simla, Hill States, and placed under that of the Commissioner of Delhi.

After a reign of forty-two years, during the last three of which he suffered from ill-health induced by his strenuous devotion to his State, Raja Shamsher Parkash died in October, 1898. He was succeeded by Raja Surendra Bikram Parkash, who was installed by Sir Mackworth Young on October, 27th of that year. The Raja had been carefully educated in the late Raja's time. Born in 1867, he had been raised by degrees to the position of Muawan of the State and had married a daughter of the late Raja of Suket by whom he had one son Maharaja Amar Parkash and one daughter. In 1901 the Raja received the K.C.S.I. and in 1902 he was appointed a member of the Imperial Legislative Council. The Raja made a present of 20,000 lbs., of tea to the Government for the soldiers engaged in the South African War, and at later date he detailed his Sappers at Khushalgarh in Kohat Frontier, where they were usefully employed for a period of one year in the extension of Railway. He was a strict disciplinarian and effectively checked bribery and corruption by his personal vigilance. Cleanliness and order were his watch-words and the reforms enunciated during Raja Shamsher Parkash's rule were polished during his time. Accounts of his various reforms will be found in the accounts of the Department concerned but out of many the inauguration of the Water Works and the installation of Plague Posts at the frontier are the most prominent. After a reign of 12½ years Raja Sir Surendra Bikram Parkash died after about 3 months illness, at Mussoorie on 4th July, 1911. His remains were taken to Hardwar where they were cremated with due solemnity, the British Government having shown their last homage by firing of 11 Guns at Dehra Dun, when the remains were entrained there for Hardwar.

Maharaja Amar Parkash assumed the Gaddi on the death of his father in July, 1911 and was formally installed by Sir Louis Dane, Lt.-Governor of the Punjab, on the 24th October, 1911. He was educated by private tutors of ability and character under the personal supervision of his father and was trained in the administrative work during his fathers life time. He was married in 1910 to the eldest daughter of His Excellency Maharaja Deb Shamsher Jung Bahadur of Nepal, the Maharani who is distinguished for her high education, sharp intellect, polished manners and Charitable disposition. He was blessed with one son and two daughters from the Maharani. After this one of the Maharani's daughters Mahima Kumari Devi died in 1929. The Mahima Library which owes its origin to the munificence of the Maharani, was constructed in 1930 and stands as a memorial after her name.

Maharaja Amar Parkash maintained the policy of the reforms introduced by his distinguished grand-father. Anxious to promote the welfare and prosperity of his subjects and to keep his administration up to a high level, he practically accomplished what his predecessors had started and developed. Out of the many qualities of head and heart of His Highness, his simple living, his great frankness, his punctuality, his hardworking nature and his love to do justice, between man and man rank uppermost. The Maharajas's relations with the other ruling Chiefs were cordial and his loyalty to the British Crown was unrivalled.,

During the Great War, he offered his personal services together with all the resources of his State to the British Government. His smart little army 400 strong, of Sappers and Miners was sent in 1914 to Mesopotamia to fight for the King Emperor. They were besieged by the Turks at Kutal-amarah while fighting heroically for the Crown under Lieut. F. Mayo who was then Assistant Commander of the Forces. A second corps

was then organised and sent as a relief on active service. As a reward for their good services many members of the Sirmur Regiment received distinctions, Lieut. F. Mayo receiving M. C. and the rank of Captaincy in the British Army.

The Supreme Government was not slow to appreciate his Highness service and honour after honour came to him in quick succession. In 1915 the Maharaja received the distinction of K.C.S.I. in 1918 he was made a Lieut. Col. and was the recipient of the hereditary title of Maharaja, the distinction which places him uppermost in the long line of rulers of Sirmoor. In 1921 he earned the title of K.C.I.E., and in 1931 his salute was raised from 11 Guns to 13 as a personal distinction.

Of the many improvements and reforms introduced during the Maharaja's reign are the completion of the Surendra Water Works, Nahan, inaugurated by his father, the grant of free Primary education throughout the State, the building of hostel for the students, the additions to the High School buildings, the inauguration of the Mahima Library and the metalling of Nahan Kala Amb road which was completed in the year 1927. One of the important events of his rule is the Revision of the Settlement completed in 1931 which had been overdue for more than 10 years and which has not only given the State a reliable and upto-date record of rights, but has increased the land revenue of the State by over 25 per cent.

On the 13th August, 1933, Maharaja Amar Parkash breathed his last far from home in foreign land beyond the seas under tragic circumstances.

Maharaja Rajendra Parkash the present Ruler was born on 11th January, 1913. He has been educated at home under eminent private tutors and has had the advantage of having an educated and talented mother. He is a great sportsman and is specially fond of Hockey, Polo, Cricket and Tennis. He also received Military training in the State forces. During his father's absence in Europe His Highness worked with the Council of Administration and gained administrative experience. On the demise of his father he succeeded to his ancestral Gaddi and was installed on the 22nd November, 1933, by the then Agent to Governor General. He was married to a sister of Raja Mahendra Singh Ju-Dev Bahadur of Nago State. (Central India) on the 15th April, 1936.

The Maharaja of Sirmoor ranks sixth among the Punjab Princes and is the senior of the Rajput Rulers of the Simla Hills.

PART II

CENSUS TABLES

These include General Population, Economic, Social and Cultural, Housing and Special Tables for Scheduled Castes and Scheduled Tribes.

TABLE 1·1-A-I—AREA, HOUSES AND POPULATION

2. Annual Season and Crop Reports.

NOTE—The relevant data for each Census year is the average of data for 5 agricultural years with the Census year as the mid year. The Census year 1961 is however, exception to this. For this year, five years average consists of the average of the data for the years 1956-57 to 1960-61.

TABLE 14·1—NUMBER OF LIVESTOCK, POULTRY AND AGRICULTURAL IMPLEMENTS DURING 1951—1956

Particulars of Livestock, Poultry and Agricultural Implements	Number during the years 1951	1956
I. CATTLE (Cows, Bulls etc.)		
(*a*) Males over 3 years		
(*i*) Breeding	164	148
(*ii*) Working	55,910	60,629
(*iii*) Others	1,448	1,450
TOTAL (*a*)	57,522	62,227
(*b*) Females over 3 years		
(*i*) Breeding—		
(1) In milk	34,290	26,959
(2) Dry and not calved	26,331	29,341
(*ii*) Working	36	16
(*iii*) Others	127	515
TOTAL (*b*)	60,784	66,831
(*c*) Young Stock	71,527	82,369
TOTAL CATTLE	1,89,833	2,11,427
II. BUFFALOES		
(*a*) Males over 3 years—		
(*i*) Breeding	413	499
(*ii*) Working	61	74
(*iii*) Others	20	26
TOTAL (*a*)	494	599
(*b*) Females over 3 years		
(*i*) Breeding:		
(1) In milk	7,440	8,960
(2) Dry and not calved	8,830	8,885
(*ii*) Working	5	5
(*iii*) Others	36	372
TOTAL (*b*)	1,3611	18,222
(*c*) Young Stock	9,682	10,839
TOTAL BUFFALOES	26,487	29,660
III. YAK		
(*a*) 3 years & under	..	..
(*b*) Above 3 years	..	..
(1) Male	..	..
(2) Female	..	..
TOTAL (*b*)	..	..

PART IV
VILLAGE DIRECTORY
DISTRICT SIRMUR

ABBREVIATIONS AND SYMBOLS USED

The following abbreviations have been used in the village directory:—

A. IN COLUMN HEADINGS

SC for Scheduled Castes.

ST for Scheduled Tribes.

M For Males.

F for Females.

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Constructions.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications .

IX Working in other Services.

B. IN NOTATIONS

P for Primary School.

M for Middle School.

H for High School.

C for Higher Institutions including Colleges.

L for Library.

W for Place of Worship.

PM for place of ancient monuments.

T for Technical Institutions.

D for Dispensaries.

RHC for Rural Health Centres.

Hos for Hospitals,

Phc for Public Health Centre.

Mcw for Maternity and Child Welfare Centre.

Po for Post Offices.

To for Telegraph Office.

Rh for Rest House

R for connected by Road (upto 5 miles distance approximate).

Rly for connected by Railway (upto 5 miles distance approximate).

S for safe or protected water supply including pipes.

E for Electricity.

INDUSTRIAL CLASSIFICATION

Industrial Code number	Household Industry
200	Production of rice, atta, floor, etc. by milling de-husking and processing of crops and foodgrains.
201	Production of sugar and syrup from sugarcane in mills.
205	Production of bread, buscuits, cake and other bakery prodcuts.
206	Production of butter, ghee, cheese and other dairy products.
207	Production of edible fats and oils other than hydrogenated oil.
210	Production of distilled spirits, wines, Liquor from alcoholic malt, fruits and malts in distillery and brewery alcoholic malt, fruits and malts in distillery and brewery.
214	Production of aerated and mineral water.
236	Manufacturing of khadi textile in handlooms.
239	Manufacturing of cotton, cordage, rope and twine.
255	Wool weaving in handloom.
262	Spinning of silk other than in mills.
270	Manufacture of carpet and all other similar type of textile products.
271	Manufacture of hosiery and other knitted fabrics and garments.
273	Making of textile garmets including raincoats and headgear.
278	Manufacture of umbrellas.
280	Sawing and planning of wood.
281	Manufacture of wooden furniture and fixtures.
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows.
284	Manufacture of other wooden products such as utensils, toy artwares.
288	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.
302	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry.
311	Manufacture of shoes and other Leather footwear.
333	Manufacture of ammunition, explosives and fire works.
340	Manufacture of structural clay products such as bricks, tiles.
342	Manufacture of lime.
343	Manufacture of structural stone goods, stone dressing and stone crushing.
350	Manufacture of earthenware and earthen pottery.
356	Manufacture of earthen toys and artwares except those covered by Code No.355.
362	Manufacture of armaments.
365	Manufacture of brass and bell metal products.
369	Manufacture of sundry hardwares such as G.I. pipe wire net, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classifiede in major groups 36,37,38 and 39.)
378	Manufacture of electronic equipment such as radio microphone.
384	Repairing and serving of motor vehicles.
388	Repairing of bicycle and tricycles.
392	Assembling and repairing of watches and clocks.
393	Manufacture of jewellery, silverware and wares using gold and other precious metals.

			NAHAN TEHSIL			
1	Tilokpur (C 36 H 124)	4 miles	Devi Temple	800 years	Hindu	7000 An ancient and historical temple constructed in the times of Raja Pardip Parkash of Sirmur in Samvat 1230 of Goddess Bala Sundri having been inviting a gathering not less than 7,000 per year on the occassion of its annual fair held on 'Chaitra Choudash' commencing near April. The temple located at a separate hillock is about 8 miles by bridle path via salani. It is also approachable from Kala amb by a cart road of 4 miles. This road is very shortly being made motorable.
2	Mirpur-Gurdwara (C 35 H 136)	3 miles	Toka-Gurudwara	300 years	Hindu, Sikh	Situated on the bank of the Roon Nadi, is about 12 miles west of Nahan. The tenth Guru of the Sikhs, Guru Gobind Singh jee when was on visit to this area had to spend some time at this place. To keep the memory ever fresh a Gurudwara was constructed.
3	Nahan Town (C 71 H 46)	On main road	(i) Kalishthan temple	250 years	Hindu	2000 This temple was established in 1787 B.K. The queen of Raja Vijai Parkash was the worshipper of Kali Devi. After her marriage she brought it with her and laid the foundation of the temple of Kali Devi, Vishnu Devi and Durga-Devi. At the time of Dushera festival about 2000 people visited this place in the month of Asauj on the Ashtami and Naumi during the state time.
			(ii) Jagan Nath temple	400 years	Hindu	Jagan Nath temple is situated in the Bara Chowk, Nahan, near Palace. In 1609 B. K. this temple was established by Maharaj Mohi-Inder Singh when the was fearing from he Gorkhas palatan and he came to Bawa Banwari Dass, a well known Sadhu of that time for help. He gave his place including two lions etc. for help. A fair is held every year on Bawan Dwadshi and Janam Ashtmi in which local people assemble in good number.

			(iii) Gurdwara	300 years	Hindu, Sikhs	2000 This Gurdwara was established when Guru Gobind Singh visited this place to help Maharaja Madni Parkash in 1742 B. K. A well was also constructed there by Guru Gobind Singh. Every year 2000 visitors visited this place. A light fair is being held at the time of Guru Parab.
4	Uttam Wala (C 140 H 110)	10 miles	Katasan Mandir		Hindu	On Nahan-Paonta motor road and a distance of about 10 miles east of Nahan, Katasan Mandir is situated in a thickly grown jungle, abounding in wild games both big and small recalling the days of Maharaja Jagat Parkash by whom the foundation was laid on account of victory won by him against Gulam Kadar Rulehia in a feverish battle occurred at this place.
5	Shambhu Wala (C 145 H 118)	1 mile	Markanda deity.		Hindu	At a mile distance from Nahan is a temple of Markanda duty. A fair is held every eyear on Baisakhi in which local people assemble in good number to have a holy dip in the Markanda river, The place is known as 'Dhimki'.

LIST OF FAMOUS TEMPLES OR PLACES OF RELIGIOUS IMPORTANCE (ANCIENT MONUMENTS)—contd.

Serial No.	Name of town	Name of temple	Descriptions
		SIRMUR DISTRICT	
1	Nahan town . .	(*i*) Kalishthan temple	This temple was established in 1787 B.K. The queen of Raja Vijai Parkash was the worshiper of Kali devi. After her marriage she brought it with her and laid the foundation of the temple of Kali Devi, Bishnu Devi and Durga Devi. At the time of Dushera festival about two thousands people visit this place.
		(*ii*) Jagan Nath temple	Jagan Nath temple situated in the Bara Chowk Nahan, near palace. In 1609 B.K. this temple was established by Maharaj Mohinder Singh when he was fearing from the Gorkhas paltan and he came to Baba Banwari Dass, a well known Sadhu of that time for help. He gave his place including two lions etc. for help. A fair is held every year on Bawan-Dwadshi and Janam Ashtmi in which local people assemble in good number.
		(*iii*) Gurdwara Nahan	This Gurdwara was established when Guru Gobind Singh visited this place to help Maharaja Madni Parkash in 1742 B.K. A well was also constructed there by Guru Gobind Singh. Every year 2000 visitors visit this place. A light fair is being held at the time of Guru Parab.
		(*iv*) Shivpuri temple	
		(*v*) Mosque	
2	Paonta town	(*i*) Devi temple	This temple was established in the year 1889 Bikrami.
		(*ii*) Gurudwara	Guru Gobind Singh once sanctfied the town by his stay. Here now stands majestically an impressive Gurudwara.
		(*iii*) Shitla Devi temple	
		(*iv*) Bhagwan temple	
		(*v*) Mosque
