Map of the District		xii

PART I

The District

1.	Introducing the District, Physical Aspects, Population, The People, District Administration, Education, Medical and Public Health, Agriculture, Fisheries, Animal Husbandry, Panchayats, Local Bodies, Co-operative Societies, Banking, Industries, Employment Service, Communications and Road Development, Land Revenue and Land Tenure, Price Trends, Community Development	1
2.	Gazetteer of Important Place Names	52
3.	Flora and Fauna	55
4.	Reprint of Extract	74

PART II

Series 1—General Population Tables

I·1-A-I	Area, houses and population	83
1·2 App-II	Number of villages with a population of 5,000 and over and towns with a population of under 5,000	83
1·3 App-III	Houseless and institutional population	84
1·4 A-II	Variation in population during sixty years	84
1·5 A-III	Villages classified by population	85
1·6 A-IV	Towns (and town groups) classified by population in 1961 with variation since 1901	85

General Economic Tables

1·7 B-I	Workers and Non-workers classified by sex and broad age groups	86
1·8 B-III Part A	Industrial classification of workers and non-workers by educational levels in Urban areas only	88
1·9 B-III Part B	Industrial classification of workers and non-workers by educational levels in Rural areas only	90
1·10 B-IV Part A	Industrial classification by sex and class of worker of persons at work at household industry	94
1·11 B-IV Part B	Industrial classification by sex and class of worker of persons at work in non-household industry, trade, business, profession or service	96
1·12 B-IV Part C	Industrial classification by sex and divisions, major groups and minor groups of persons at work other than cultivation	102

		PAGE
1·13 B-V	Occupational classification by sex of persons at work other than cultivation	105
1·14 B-VI	Occupational divisions of persons at work other than cultivation classified by sex broad age groups and educational levels in Urban areas only	118
1·15 B-VII Part A	Persons working principally (i) as cultivators (ii) as agricultural labourers or (iii) at household industry classified by sex and by secondary work (i) at household industry (ii) as cultivator or (iii) as agricultural labourer	122
1·16 B-VII Part B	Industrial classification by sex of persons working in non-household industry, trade, business profession or service who are also engaged in household industry	126
1·17 B-VIII Part B	Persons unemployed aged 15 and above by sex and educational levels in Rural areas only . . .	130
1·18 B-IX	Persons not at work classified by sex, broad age groups and type of activity	131
1·19 B-X	Sample households (i) engaged neither in cultivation nor household industry (ii) engaged either in cultivation or household industry but not both and (iii) engaged both in cultivation and household industry for all areas	135
1·20 B-XI	Sample household engaged in cultivation classified by interest in land and size of land cultivated in Rural and Urban areas separately	137
1·21 B-XII	Sample households engaged in cultivation only classified by size of land cultivated and number of family workers and hired workers in Rural and Urban areas separately	138
1·22 B-XIII	Sample households engaged both in cultivation and household industry showing size of land cultivated classified by principal household industry in Rural and Urban areas separately . . .	142
1·23 B-XIV Part A	Sample households engaged only in household industry classified by principal household industry in all areas—Households classified by major groups of principal household industry and number of persons employed	144
1·24 B-XIV Part B	Sample households engaged only in household industry classified by principal household industry in all areas—Household classified by minor groups of principal household industry	147
1·25 B-XV	Sample households engaged both in cultivation and household industry classified by size of land in Rural and Urban areas separately	148
1·26 B-XVI	Sample principal household industry classified by period of working and total number of workers engaged in household industry in all areas	152
1·27 B-XVII	Sample households classified by (*i*) number of male and female members by size of households and (*ii*) engagement (*a*) neither in cultivation nor in industry (*b*) in household industry only and (*c*) in cultivation sub-classified by size of land cultivated	159
	SOCIAL AND CULTURAL TABLES	
1·29 C-I	Composition of sample households by relationship to head of family classified by size of land cultivated	161
1·29 C-II	Age and Marital status	162
1·30 C-III Part A	Age, Sex and Education in all areas	167
1·31 C-III Part C	Age, Sex and Education in Urban areas only	168
1·32 C-V	Mother-tongue (Alphabetical order)	169
1·33 C-VII	Religion	174
1·34 C-VIII Part A	Scheduled Castes and Scheduled Tribes—classification by literacy and industrial category of workers and non-workers among Scheduled Castes	175
1·35 C-VIII Part B	Scheduled Castes and Scheduled Tribes—classification by literacy and industrial category of workers and non-workers among Scheduled Tribes	176

		Page
	Housing Tables	
1·36 E-I	Census Houses and the uses to which they are put	177
1·37 E-II	Tenure Status of Sample Census households living in Census houses used wholly or partly as dwellings	178
1·38 E-III	Census houses used as factories and workshops classified by industry power and no power used and size of employment	179
1·39 E-IV	Distribution of Sample households living in Census houses used wholly or partly as dwellings by predominent material of wall and predominant material of roof	184
1 40 E-V	Sample households classified by number of members and by number of rooms occupied	185
	Special Tables for Scheduled Castes and Scheduled Tribes	
1·41 SCT-I Parts A & B	Industrial Classification of persons at work and non-workers by sex for Scheduled Castes and Scheduled Tribes	186
1·42 SCT-II Parts A & B	Age and marital status for Scheduled Castes and Scheduled Tribes	194
1·43 SCT-III Part A	Education in Urban areas only for Scheduled Castes and Scheduled Tribes	202
1 44 SCT-III Part B	Education in Rural areas only for Scheduled Castes	204
1 45 SCT-IV Parts A & B	Religion for Scheduled Castes and Scheduled Tribes	205
1·46 SCT-V Parts A & B	Sample households engaged in cultivation classified by interest in land and size of land cultivated in Rural and Urban areas only for Scheduled Castes and Scheduled Tribes	208
1·47 SC-I	Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes	210
1·48 ST-I	Mother-tongue and Bilingualism for Scheduled Tribes	211
1 49 ST-II	Persons not at work classified by sex and type of activity for Scheduled Tribes	216
	Series 2—Vital Statistics	
2·1	Births record, 1951-52 to 1960-61	219
2·2	Deaths registered from various causes, 1951-52 to 1960-61	220
	Series 3—Agriculture	
3·1	Rainfall and Rainy day, 1951—60	221
3·2	Normals of temperature and relative humidity	226
3·3	Mean maximum and highest Mean minimum and lowest temperatures 1952—62	227
3·4	Monthly snowfall and number of fall days 1952—62	231
3·5	Meteorological Data (*a*) for storms, (*b*) for Foggy days	232

		Page
3·6	Land utilisation statistics 1951—61	234
3·7	Area under different crops 1951-52 to 1960-61	237
3·8	Production of different crops 1951-52 to 1960-61	239
3·9	Gross irrigated area (crop-wise) 1951—61	241
3·10	Gross irrigated area (source-wise), 1951—1961	242
3·11	Medium and minor irrigation projects including *Kuhls*	243
3·12	Yield rates of principal crops 1949—60	244
3·13	Agricultural wages 1951—60	248
3·14	Crop cutting experiments	252
3·15	Gratuitous relief provided by the revenue department from 1954-55 to 1960—61	263

SERIES 4—PRICES OF STAPLE FOOD STUFFS

4·1	Price of staple food stuffs month by month 1957—60	264

SERIES 5—INDUSTRY

5·1	Growth of factories, 1957—60	268
5·2	Labour working in factories 1957—60	269
5·3	Joint stock companies in Himachal Pradesh as on 1st April, 1961	270
5·4	Industrial technical institutes and training cum production centres	271
5·5	Registered factories	272
5·6	Registered firms	273
5·7	Registered Trade Unions	274
5·8	Slate quarries	275
5·9	Electric connections supplied to industries	277

SERIES 6—ADMINISTRATION

6·1	Tax—revenue 1951—60	278
6·2	Number and description of registered documents and value of properties transferred	279
6·3	Civil Justice—number of suits instituted and decided 1951—60	280
6·4	Strength of Police, 1951—60	281
6·5	Population in jails, 1951—60	282
6·6	Income tax 1951—60	283
6·7	Number of co-operative societies, 1951—60	284
6·8	Number of members of co-operative societies, 1951—60	285

		Page
6·9	Share capital, co-operative societies, 1951—60	286
6·10	Working capital, co-operative societies, 1951—60	287
6·11	Loans issued by co-operative societies to members and other societies, 1951—60	288
6·12	Loans recovered by co-operative societies from the loanees, 1951—60	289
6·13	Criminal justice—number of criminal cases tried and persons convicted	290
6·14	Government treasuries and sub-treasuries as on 1-4-1961	291
	SERIES 7—EDUCATIONAL STATISTICS	
7·1	Number of educational institutions (including aided institutions), 1951—60	292
7·2	Teachers in educational institutions, 1951—60	293
7·3	Scholars in educational institutions, 1951—60	294
7·4	List of schools, training institutions and colleges	295
	SERIES 8—STATISTICS OF PUBLIC ENTERTAINMENT PRESS AND JOURNALS	
8·1	Cinema houses, tickets sold and sale proceeds, 1951—60	298
8·2	Press and journals	299
	SERIES 9—EMPLOYMENT	
9·1	Occupational distribution of applicants on live register of employment exchanges	300
9·2	Registeration and placing work done by the employment exchanges	301
9 3	Distribution of Himachal Pradesh employees in the district as on the 31st March, 1960	302
	SERIES 10—MEDICAL AND PUBLIC HEALTH	
10·1	Number of hospitals and dispensaries (both allopathic and ayurvedic), 1951—61	303
10·2	List of medical and public health institutions	304
	SERIES 11—LOCAL BODIES	
11·1	Constitutions of local bodies with income and expenditure, 1951—60	307
11·2	Gram panchayats and judicial panchayats	308
11·3	Criminal cases tried and civil suits instituted in nayaya panchayats	311
	SERIES 12—TRANSPORT AND COMMUNICATIONS	
12·1	Village roads	312
12·2	List of rest houses	315
12·3	List of towns and villages electrified in district	316
12·4	Nationalised transport services, passenger vehicles, 1951—60	317

		Page
12·5	Nationalised transport services, goods vehicles, 1951—60	318
12·6	Motor vehicles on roads, 1951—60	319
12·7	Road accidents, 1951—60	320
12·8	Transportation rates, 1951—60	321
12·9	Telephone, telegraph and wireless facilities	322
12·10	Number of post offices and telegraph offices 1951—60	323
12·11	Estimated numbers of postal articles handled in post offices, 1951—60	324
12·12	Money orders and postal orders issued and paid in post offices, 1951—60	325
12·13	Broadcasting receiver licenses issued in post offices	326
	Series 13—Banks, Insurance and Small Savings	
13·1	Scheduled and non-scheduled banks	327
13·2	Savings bank facilities at post offices	328
13·3	Life insurance statistics	329
	Series 14—Livestock and Fisheries	
14·1	Number of livestock, poultry and agricultural implements, 1951—1956	330
14·2	Livestock mortality from contagious diseases, 1955—60	333
14·3	Veterinary aid provided by the veterinary assistant surgeons on tour, 1951—60	334
14·4	Veterinary aid provided in the district 1951—60	335
14·5	Veterinary institutions	336
14·6	Fisheries department activities in the district, 1951—60	337
14·7	Licensed fishermen and fish production in district, 1951—60	338
14·8	Offences committed against wild animals and birds, 1951—60	339
	Series 15—Calendar of Important Events	
15·1	Calendar of important events	340
	Series 16—Statistics of Community Development	
16·1	Statistics of community development	341
	Series 17—Forests	
17·1	Forest area, 1951—60	343
17·2	Forest area closed and open to grazing, 1951—60	344
7·3	General progress of afforestation, 1951—60	345

		Page
17·4	Out-turn and value of major and minor irrigation projects, 1951—60	346
17·5	Offences against forest wealth, 1951—60	347
17·6	Pasture lands	348
17·7	Raw material useable in industries cultivated or growing wild in the district	349
17·8	Medicinal herbs and plants cultivated or growing in the district	350
17·9	Rights of timber	351

SERIES 18—MARKETS

18·1 to 18·5	List of markets	374

SERIES 19—MISCELLANEOUS

19·1	Number of ex-servicemen in district and relief provided to them by the official and non-official agencies	377
19·2	Lok Sahayak Sena Camps held in the district	378
19·3	Consumption of country spirit, opium and liquor from 1951-52 to 1960-61	379

PART IV

SERIES 20—VILLAGE DIRECTORY

20·1	List of villages arranged in alphabetical order	387
20·2	Village Directory	398

SERIES 21—STATISTICS OF FAIRS AND FESTIVALS

21	List of important fairs and festivals	685

S. No.	Chapter Heading	Source of Information
1	Introducing the District	
	(a) Physical aspect	Punjab Gazetteers, Mandi State, 1920.
	(b) Forests	Chief Conservator of Forests.
	(c) Rainfall and Rainy days	Quarterly Bulletin of Statistics (Sept., 1960).
	(d) Geology	Geological Survey of India.
2	People	Punjab Gazetteers, Mandi State, 1920.
3	Medical and Public Health	Director of Health Services.
4	Education	Director of Education.
5	Agriculture	Director of Agriculture.
6	Fisheries	Deputy Director of Fisheries.
7	Animal Husbandry	Director of Animal Husbandry.
8	Communications and Road Development	Chief Engineer P.W.D.
9	Mandi-Kulu Road Transport Corporation	General Manager, Himachal Transport.
10	Community Development	Development Commissioner.
11	Panchayats	Director of Panchayats.
12	Co-operative Societies	Registrar Co-operative Societies.
13	Land Revenue and Land Tenure	Agricultural Statistics of Himachal Pradesh.
14	Industries	Director of Industries.
15	Manpower and Employment Schemes	Director of Industries.
16	Banking	(1) State Bank of India. (2) Himachal Pradesh Co-operative Bank.
17	Price Trends	Director of Economics and Statistics.
18	Flora and Fauna	Chief Conservator of Forests.

PREFACE

Considerable material has been collected over several years to make this a comprehensive reference book. In the words of Ibbetson in his preface to his very famous Punjab Census Report of 1881—

"A Census report is not meant merely for the information of the Secretariat; it is intended to be constantly referred to in every office of the Province. The mere results would ill serve this end in the absence of an interpreter. It is of but small advantage to cast columnous tables of naked figures at the heads of District Officers, without at the same time explaining what they represent, which can be done by no one but him who compiled them, and drawing from them the more important conclusions to which they lead, which few will draw but he whose special business it is to do so."

This comprehensive reference book has to be handy reference book for the Administrators, Planners and Scholars.

It is not meant to be taken up for leisurely reading but to obtain some specific information. Therefore, it is very necessary that this should be complete, should be brief and should be very relevant and precise. We have had in 1951 a District Census Hand Book and it has proved to be very useful reference book indeed. We have collected material from many sources and many old records had to be consulted and then to check and recheck over long period. The 1961 record is being printed now because the Himachal Administration Press could not take up. It takes time to collect material to check and recheck and tabulate. Then it takes long periods to print this.

It is the keenness of Shri Ashok Mitra, ICS, Registrar General, India to have guided us in this work. His devotion to the Census Organisation is only matched by his versatility and many of us have only achieved a certain degree of completeness in our work because we had the honour to work under him.

Different parts of the volume present the village-wise statistics and brief write-ups on Education, Industry, Health, Community Development, Animal Husbandry and Co-operation. Apart from certain data, most of the other data, particularly regarding village directory is collected by us from 1961 Census Schedules.

Mandi is undergoing considerable big changes. We see some very good roads, better hospitals, colleges, considerable more tracks being covered by fruit cultivation and all this has led to economic betterment which one could never have visualised years ago.

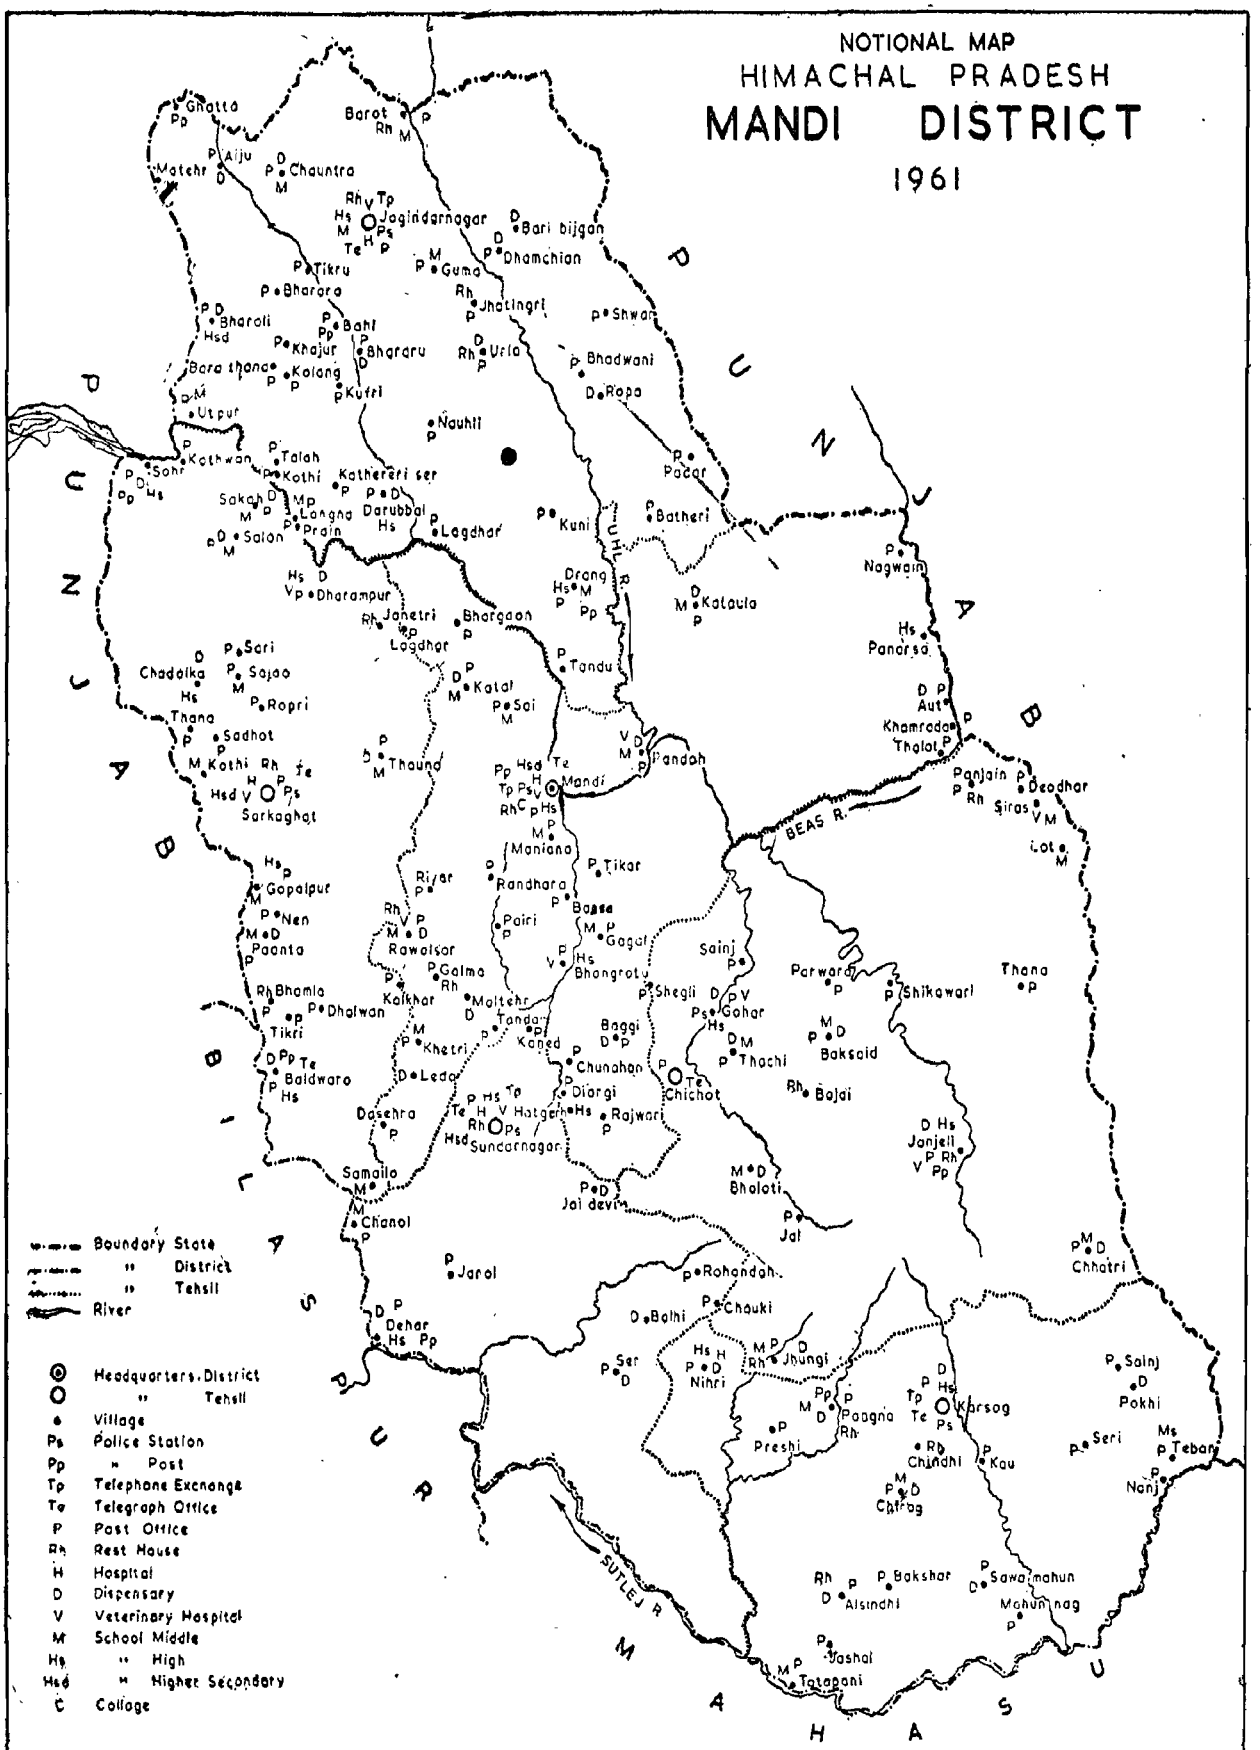

We have heavily leaned on old records, files, notes and reference books and have also toured this Pradesh fairly extensively year-after-year. Mandi is the District which has undergone considerable changes. There have been considerable changes than one would have expected in this Pradesh.

This is the work of a devoted and hard working lot of my colleagues. They have burnt their mid-night oil and have toiled on their holidays and have been to difficult areas over the Pradesh. And with the kind help that I have received from the Government of India Press, Simla, it gives me a great pleasure and silent pride to see this report completed. This report would have been completed much earlier had the Himachal Pradesh Government been able to give it to Private Presses.

It is a great kindness of Shri T.N. Bahel, IAS, Chief Controller of Printing and Stationery, Government. Right from the highest to the humblest, I and my colleagues have received appreciable considerations and courtesy. With well over nearly 50 publications in hand, readers would realise that it was a pretty arduous task. This was an opportunity once in our life time and we were obsessed to produce something of enduring value. I do not know how far we have succeeded and leave this to my readers to judge. I hope my readers would freely find this of interest as a single best source of information on Mandi District.

INTRODUCING THE DISTRICT

Mandi district was formed by the amalgamation of the erstwhile princely states of Mandi and Suket on the formation of Himachal Pradesh on the 15th April, 1948. This did not involve any change of boundaries. The district contains six tehsils Jogindarnagar, Mandi, Sarkaghat, Chichot, Sundarnagar and Karsog with headquarters at Mandi. According to 1961 Census, the population of the district is 384,259 persons. This represents 192,687 males and 191,572 females. Mandi district stands first in order of population and fourth in order of area among the districts of Himachal Pradesh. The area of the district is 1,620 square miles according to Land Records and population per square mile is 237. The village with the highest population according to 1961 Census is Mahadev in Sundarnagar tehsil with a population of 1,776 followed by Chhatar having a population of 1,699 and Bhaur with a population of 1,632 persons. Both the villages fall in Sundarnagar tehsil.

There are three towns Mandi, Sundarnagar and Jogindarnagar having a population of 13,034, 5,782 and 2,719 respectively. Mandi has been a town since 1881, Sundarnagar and Jogindarnagar since 1931.

The statement given below shows the size and population of each tehsil :—

District/ Tehsil	Area in Sq. miles	No. of villages		Population per sq. mile	Totals persons
		inhabited	un-inhabited		
1	2	3	4	5	6
Mandi district	1,620	4,454	364	237	384,259
1. Jogindarnagar .	445	1,038	94	154	68,572
2. Mandi .	202	1,032	68	461	93,083
3. Sarkaghat .	202	611	11	419	84,625
4. Chichot .	351	948	41	164	57,518
5. Sundarnagar	168	200	7	253	42,479
6. Karsog .	252	625	143	151	37,982

Jogindarnagar is the biggest tehsil in order of area followed by Chichot and Sundarnagar is the smallest tehsil. From density point of view Mandi is the most thickly populated tehsil. Karsog is the smallest tehsil in order of population.

The district comprises of 4,818 revenue villages of which 364 are un-inhabited. The definition of a village as given in Part II-A Report is—

(*a*) for which a separate record of rights has been made, or

(*b*) which has been separately assessed to land revenue or would have been so assessed, if the land revenue had not been realised, compounded for or redeemed, or which the local Government may, by general rule or special order, declare to be an estate.

The concept of a village in hills is somewhat different from the plains. The cultivation of land in this tract is scattered and people live generally in isolated hamlets on their fields. Life and property has been comparatively secure and the necessity for numbers of people grouping together in strong collective homesteads has not arisen as in the plains. The centres of trade, which were previously identical with the capitals of the erstwhile princely states supplied the needs for exchange of goods. As a result of this, groups of varying magnitude have, at different times, been taken as equivalent to the term "Village".

The term village as used in the Himachal Pradesh 1961 Census returns denotes a revenue village throughout except in the two areas of Tehsil Sundarnagar (partly) and Tehsil Karsog. No settlement of the present uniform pattern of land in these two areas has so far taken place and a collection of hamlets has been grouped into revenue circles. The various hamlets in a revenue circle have population varying from 20 to 600 in each like many other revenue villages in the Pradesh. For purposes of census, these revenue circles were broken down and a hamlet or a collection of hamlets bearing a distinct name was taken to be a census village. It is expected that when settlement of these areas takes place and the present day revenue circles are abolished, there will be little or no difference between the present census villages and the future revenue village.

It is believed that the name Mandi was derived from Mandav Rishi who devoted his time to meditation at Kilsar—a place about one mile to the east of present Mandi town. The place of Mandav Rishi was called 'Mandavaya' and Mandi is corrupted form of Mandavaya.

Mandi district takes its name from its own capital. Mandi is a Hindi word meaning 'market'. The place has long been a market for goods of Yarkand and Ladakh. It is said that Raja Ajbar Sen founded the town of Mandi in 1827 and before this period nothing is known.

Mandi was a major hill state of the Punjab at the time of merger. Its last ruler was Major His Highness Raja Joginder Sen Bahadur, K.C.S.I. who ascended the *gadi* at the tender age of eight but was invested with full ruling powers in 1925 A.D. The rulers of Mandi are descendants of Chanderbansi clan of Rajputs. It is traditionally asserted that their fore-fathers were at one time rulers at Delhi.

PHYSICAL ASPECT

The district is situated between 31° 13′ 50″ and 32° 04′ 30″ North and 76° 37′ 20″ and 77° 23′ 15″ East. Its area is 1,620 square miles.

Boundaries: It is bounded on three sides—east, north and west by the Kangra district of Punjab and on the south and south-west by the Mahasu aad Bilaspur districts.

Configuration: It resembles a sitting lion looking behind. The district is entirely hilly except Bahl area which is a fine and fertile valley. The main ranges of the district are :

(1) *Dhaola Dhar* : This range runs with the eastern boundary of the district from north to south. Nargu is the highest peak with an elevation of 13,249 feet. Near Kamrunag, it gives off ranges which are thickly wooded. This range covers more than half of the Suket territory. As this range reaches the Sutlej river it runs towards the north-east and joins the Kulu Hills.

(2) *Ghogar Dhar* : This is the second biggest range in the district. It enters the district at Harabagh. This is the most important range as it contains the salt quarries of Guma and Drang. It is well wooded and fertile.

(3) *Sikandra Dhar* : This range has been divided into two sub-ranges—Kamlah range and Lindi Dhar. It runs from north-west boundaries of Suket and Bilaspur. Its name is attributed to Sikandar Lodhi, who about 375 years before the reign of Akbar is supposed to have crossed it on his way to the conquest of Kangra.

Popular tradition assigns the crossing to a pass on the old road to Hoshiarpur situated a few miles from the Suket border. Sikandra is supposed to have built a cantonment close by, and a tank situated at a short distance from the pass and enclosing a prolific spring of water, is attributed to him. The people say that there was at one time a stone in the masonry of the tank bearing the inscription—"Shikari dhar *na war na par*". "The hill of Shikar dhar is not on this side nor that".

(4) *Dhar Vairkot*: This range starts from Rewalsar and extends to Suket. Some of its off shoots join Kangra and Sikandra Dhar.

Below are given the altitudes of various peaks and places in the district :—

Aiju Fort	4,892 Feet
Badhwani	6,700 ,,
Bhubu Pass	9,480 ,,
Bhamla	3,308 ,,
Bijahi	7,000 ,,
Chichot	4,690 ,,
Dhebi	4,000 ,,
Drang	3,615 ,,
Dulchi Pass	6,740
Galma	3,004
Gopalpur	3,300
Guman Village (above salt mine)	5,193
Jangartilla (West of Bhabu Pass)	11,447
Jhatingri	6,610
Jhungi	5,800
Kamlah Fort	4,477
Kandi Thana	6,500
Mariari Devi	6,743

Narwah Devi in Sikandar Dhar	6,665
Naina Devi	6,356
Nargu	13,249
Parashar Deo	8,740
Rawalsar	4,500
Sarkaghat	3,666
Sandhol	1,800
Shikar Devi	11,060
Shyama Kali temple in Mandi town	3,000
Urla	4,752
Bangra	6,664
Bamdli Tibba	6,946
Chauki	7,384
Chindhi	6,687
Chwari	8,459
Dehar	1,657
Ghiri	6,728
Kamand	7,034
Kangu	2,286
Kandi	6,494
Karsog	4,998
Kau	4,000
Mahun Nag	7,039
Mangarh	7,636
Mamel	4,500
Murari	6,140
Pangna	5,274
Ramgarh	8,084
Seri	6,524
Sundarnagar	3,006
Tikkar	6,953

River System

The Beas and the Sutlej are the two main rivers of this district.

(1) *The Beas* : This river enters the district near village Largi. Two streams Sainj and Tirhan join the Beas near this village. The Uhl, Luni and Rena are its principal tributaries which join it on the north bank. Bakhar, Son, Ranodi, Suketi, Jiuni, Jharjeli, Tirhan and Hansa join the Beas on the south bank. The waters of Uhl are used to generate electric powers at Jogindarnagar. There are two bridges to cross this river at Mandi and Pandoh. These are open for heavy vehiculars traffic.

(2) *The Sutlej* : It forms the boundary of the district towards the east and the south. It enters the district near village Farenu in the Chawasigarh and passes through the areas of Bugra, Mahunm Derahat, Batwara and Dehar. Then it flows into Bilaspur district. It runs between high banks and as the current is swift its waters cannot be used for irrigation. Practically the whole of the old Suket State except Balh and Jai Devi circles drains into the Sutlej. The principal streams which fall into this river are Khadel, Bhaghwati Bantrehr, Siwan, Behna, Kethu, Bogre, Imla Bimla, Pangna, Bahelu and Siun.

Climate

The district being mountainous the climate is temperate. The areas of Badar, Chohar, Seraj and Sonar receive heavy snow fall every year and are cut off from the other parts of the district. In the upper regions the climate remains cold throughout the year. The winter snow often comes down to 4,000 feet, but below 7,000 feet it does not lie long on the ground. In a normal year it disappears before the end of March from the places of less elevation than 10,000 feet. The Sutlej is responsible for the oppressive heat near the east and south borders. Tattapani and Dehar are the hotest places. The dense mist rising from the Suketi river in winter is the cause of pneumonia in this tract. In summer the whole valley is hot and the cultivation of rice gives rise to malaria.

The most unhealthy period of the year is the early autumn when the rice fields are still damp from artificial flooding. Malaria is common in het lower valleys. But in the hills this season is pleasant to being nippy.

Rainfall

This district receives the highest amount of rainfall in the Pradesh with a mean annual precipitation of 1646·05 millimeters. The annual

rainfall in the district has varied between 1594·3 and 1738·8 millimeters during 1957 to 1960. The following table shows the average rainfall from 1957 to 1960–

Year	Average rainfall (Millimeters]
1957	1738·8
1958	1607·7
1959	1643·4
1960	1594·3
Average for 4 years	1646.05

There are at present 12 rain recording centres in the district. Jogindarnagar or Sarkaghat on the north-western side receives the maximum rainfall while Karsog on the south-eastern side gets the minimum. Chichot tehsil situated in the middle of the district gets more than the average and Sundarnagar receives near about the average rainfall of the district. The rainfall in the different rain recording centres of the district varies between 887·4 and 2637·3 millimeters. The annual rainfall recorded at each station during 1959 and 1960 was—

Tehsil	Station	Annual rainfall during 1959 (Millimeters)	Annual rainfall during 1960 (Millimeters)
1	2	3	4
1. Jogindarnagar .	Jogindarnagar	2637·3	1853·6
2. Mandi Sadar .	1. Bhangrotu .	1511·4	1 96·5
	2. Kataula .	1763·3	1902·1
	3. Mandi .	1549·6	1662·0
	4. Sadar .	1449·9	1559·3
3. Sarkaghat . .	Sarkaghat .	2063·5	2045·5
4. Chichot . .	1. Chichot .	1829·6	2043·4
	2. Janjeli .	1423·3	1538·6
	3. Jhungi .	1452·0	1278·9
	4. Panjain .	1496·9	887·4
5. Sundarnagar .	Sundarnagar .	1618·5	1814·7
6. Karsog . .	Karsog .	925·8	949·6
District Average .		1643·4	1594·3

The monsoons bring heavy rains with them. The months of July and August account for the highest precipitation while rainfall is much lower in other months of the year. Sometimes rainy season starts in the end of June and lasts by the first week of September. During the post-monsoon weather, October accounts for the highest rainfall and November rarely receives any rain. January gets comparatively higher amount of rainfall during the cold weather. During hot weather. May receives the lowest rainfall.

Lakes

Rawalsar, the small beautiful lake with floating islands lies on motor road of 24 km. south-west of Mandi at a height of about 4,000 feet. It is sacred to Buddhists, Hindus and Sikhs alike. The rectangular lake is well-known for its seven floating islands and banks covered with green vegetation in contrast to bare mountains on all sides. According to a local legend these islands will keep floating till eternity. Padam sambhava, a Buddhist spent some time in the monastery here.

There is Buddhist monastery by the side of the lake. Thousands of Buddhist pilgrims from Kinnaur, Lahaul and Spiti visit this temple every year. A temple stands by the side of a lake and a Gurdwara just above the bathing ghat. The Hindus and Buddhists look on Rawalsar as the abode of Rishi Lomas. In his honour a fair is held there on 1st Vaisakha. Thousands of people visit this place to take holy dip in the sacred waters of the lake.

It is said that the tenth Guru Govind Singh spent a few years there. A simple stone-structure which stands about 500 feet above the lake was his abode. The Sikhs hold a fair during Vaisakha in his honour.

Parashar : A small lovely lake of Parashar is situated about 23 miles away in the north-east of Mandi town. It is at a height of 9,322 feet above the sea level. There is a small temple. A fair is held here in the month of June. Wool and blankets are sold in large quantity on this occasion.

Kamru Nag : This lake is situated in Chichot tehsil at a height of 9,500 feet. Its circumference is about 4 furlongs and depth 8 to 10 feet. There is a temple on the bank of this lake and a fair is held there in the month of June every year.

Forests

The forests play an important part in the life of the people. At the higher elevations wood is used to a large extent in building houses. Apart from grazing and timber, the forests meet the requirements of the people in many ways. Fodder

and bedding for their cattle, manure for their fields, firewood, grass, wood for agricultural instruments, charcoal for the lohars, tanning bark for the Chamars and wood for burning, the dead and for religious festivals are the main needs of the people for which forests are essential.

The forests are scattered throughout the district on the higher slopes. The most important forests are those lying in the Sutlej valley. The main species in deodar occurs in large compact blocks. Deodar forests are generally found at an altitude varying from 5,000 to 9,000 feet. The species is at its best in the Dhamoon forest at an altitude of about 7,000 feet.

Chil forests are found between 3,000 and 5,000 feet elevation. The oak forests are found at all aspects and at an altitude varying from 3,000 to 8,000 feet.

Fire has been the worst enemy of the forests. There is hardly any area in the entire of the chil forests where fire had not broken out in the past.

Total area under forests was 581 square miles in 1960-61 which is 36 per cent of the total area of the district. There has been slight increase of ·81 sq. mile in the forest area since 1951-52. The forest revenue was Rs. 34,27,611 in 1960-61 against Rs. 12,47,292 in 1951-52. Thus the revenue has increased by Rs. 21,80,319 in ten years.

During 1951-52 827,798 animals were grazed in the forest area against 811,548 animals in 1960-61 The total number of animals grazing in the forest areas remained more or less the same.

In 1951-52, 513 acres were brought under afforestation against 740 acres in 1960-61. In this sphere notable progress was made in 1953-54 when 2,849 acres land was afforested.

Flora and Fauna : The more prominent trees of this region are the *simbal* (bombax malabaricum), the mango (mangniferaindica), the tun (cedrela toana), several species of acacia and albizzia, the *salambra* (odina wodier), two species of terminalia and the *joman* (engenia jambolana). Associated with these is the large *tzur* (timber bauhinia vahlii), the leaves of which are used extensively as plates. The bamboo is indigenous in this region. It is largely planted by the people near their villages. The waste land is covered with thorny shrubs.

The chil may be considered the prevailing conifer up to 6,000 feet when it gives place to the deodar (cedrus deodara) and the blue pine (pinus excelsa,) which occur either pure, or more usually mixed, at all elevations from 5,000 to 8,000 feet. Above these come the spruce (picas morincla) from 7,000 to 9,000 feet and silver fir (abies pindrow) from 8,000 to 9,000 feet. Each of these zones possesses a characteristic oak. At the lower elevations the *ban* or white oak (quercusincana) is found. At 7,000 feet it is replaced by the *mouru* or holly oak (quercus dilatata) and the green oak (quercus glauca). Above 7,000 feet the flora is almost entirely temperate in character. The walnut, elm, horse-chestnut, maple, holly and poplar, often accompanied with a dense mass of undergrowth of hill bamboo, firns and shade-loving herbaceous plants. The most common shrubs at the higher elevations are the berberis, indigofera and desmodium.

The common fruit trees are banana, *ber*, *jaman*, mango, pears and *shahtoot*. Now the plants of almond, apple, apricot, cherry, peach and pear are being grown in the district. (Many apple orchards are coming up.

Wild animals : The district is well stocked in game. Black bears are common in the higher valleys while leopard are found throughout the district. Barking deer and gural are frequently found at medium elevations. The musk deer and the serao are to be found in certain localities. Among the other animals of the district are hill fox, the jackal, the porcupine, the pine marten, the langur and monkeys.

Birds : Black and grey partridge are commonly found throughout the district. There are several kinds of peasant generally found at medium heights of protected land. The chaukor is found throughout. Both the peacock and common jungle fowl are found even at higher altitude. During the winter large flocks of blue rock pigeon come down to the fields of the Bahl and Sandhol. The Himalayan wood pigeon can be seen in large numbers in the kail forests. Among the birds of prey the lammergier and the golden eagle are found only in the higher altitudes. Of all the smaller birds, fly-catchers, shrikes, cuckoos, wagtails, bulbuls, warblers, pipits are common. There are ducks and gees also.

More important flora and fauna have been given in appendices II and IV.

Wild Life Sanctuaries : The formation of sanctuaries is recognised as a practical method of resuscitation game animals and birds. In order to prospect and to ensure the survival of varivous

species of indigenous fauna sanctuaries are established.

Three Wild Life Sanctuaries have been established for various rare Himalayan birds and animals.

1. *Bandli Wild Life Sanctuary*: It was established on the lst October, 1962 at about 6 miles away from Sundarnagar. Goral, black bear, red jungle fowl and cheet pheasants are found there. It covers an area of 1,230 acres.

2. *Nargu Winch Camp Wild Life Sanctuary*: It covers an area of 33,465 acres. Musk deer, cheer pheasant, serow, goral tragopan and chakore are found there. Rest houses at Barot and Badhwani exist in the sanctuary where different facilities are provided to the visitors.

3. *Shikari Devi Wild Life Sanctuary* : This sanctuary was established on the 1st October, 1962. Its area is 52,849 acres. The musk deer, black beer, barking deer, monal, koklash, red jungle fowls, partridges and kalij pheasants are available in the sanctuary.

Wild Life Sanctuaries Rules have been enforced for better administration of the sanctuaries.

GEOLOGY

Geology : The rock formations found in the Mandi district lie in strike continuity of those found in the Simla Himalayas and can be classified into the sub-himalaya series, comprised of tertiary rocks and the himalyan series, comprised of unmetamorphosed sedimentary rocks and the metamorphic-cum-igneous rocks of pretertiary age.

Himalayan Series (Metamorphic-cum igneous Sub-himalayan Series (Unmetamorphosed).

The sequence of the geological formations is given below

Pleistocene	Older Alluvium (Upper Siwalik)	Brownish clays and sady bed with grave occasionaly pink coloured clay with rusty brown gravel.
	Pinjore stage (Upper Siwalik)	Thick boulder conglomerate interbedded with white or grey sand rock.
Middle Miocene to Pliocene	Lower Siwalik (Nahan)	Grey sandstone and shales (shales are red or purple in colour).
Lower Miocene	Kasaulis	Sandstones and shacs of a clear aspect, bluish clays.
	Dagshais	Deep purple and red shale and sandstone. Sandstones are medium to fine grained and often micaceous.
Eocene	Subathu	Nummulitic limestone
Permo-carboniferous.	Krol series	Limestone known as 'Cuma limestone'. Thin bedded and shows shaly parting base.
	Infra-Krols	Dolomitic limestone knows as 'Negal lime stone'.
Upper Carboniferous	Khaira quartzite	Maroon coloured shale interbedded with quarstzite.
Upper Cambrian		Red slaty shales known as 'Urla red slate'.
	Iron ore series (Chail)	Schists and quartzite[8] with Hematite and Magnetite.
Pre-Cambrian	Schist series (Jutogh)	Garnetiferous schist-quartzbiotite chlorite-schist and tough biotite schist.
Pre-Cambrian	Gneissosegranite	Grey felspathic geneiss' porphyritic granite with less muscovite, biotite and tourmaline which are intruded by aplitic venine.

The sub-himalayan series in Mandi are represented by a group of tertiary sedimentary rocks ranging in age from oligocene to Pleistocene. Dagshai beds are divided into Lower predominantly sandy zone and an upper red to maroon coloured clayey zone. These are succeeded by Kasaulies consisting essentially of sandstone and bluish clay.

The outermost foot hills in this area expose the Siwalik Series which consist of clays, sandstones and conglomerates.

The sequence of these formations is as follows:

	Sand Conglomerate	
	Urla boulder bed	304·8 metres (1,000 feet)
	Slate Conglomerate	457·2 metres (1,500 feet)
Upper Narla	Grey clays and sandstone.	182·88 metres (600 feet)
	Conglomerate	182·88 metres (600 feet)
Middle Narla	Light red clays with sandstone	304·8 metres (1,000 feet)
Lower Narla	Thick white sandstone with	
	Lignite	91·44 metres (300 feet)
	Clays	304·8 metres (1,000 feet)

In the northern Mandi, there are some slaty red slaty shales, which are known as Urla red slate of Upper Cambrian age.

These are succeeded by a maroon coloured shales with interbedded Khaira quartzites of upper carboniferous age which in turn are overlain by a series of massive dolomitic limestones known as the "Megal limestone". The dolomitic limestone are equivalent to the Infra-Krols of the Simla Himalaya.

The overlying, Krol rocks are represented by a series of limestone beds known as 'Guma Limestone'. They are thinly bedded and show slaty partings at the base.

The garnetiferous schists, quartzites and quartz schists outcrop as a syncline structure and are thought to be equivalent to the Chail and Jutogh series of the Simla Himalayas. The schists have provisionally been separated into :

(*a*) garnetiferous soft schists with subordinate gneise.

(*b*) quartz-biotite-chlorite schist.

(*c*) quartz-biotite schist with quartzitos.

Interbedded with these garnetiferous schists, specially in the upper parts, are bands of grey felspathic gneisses. In the lower horizon of the schist sequence quartz-biotite-schist, quart-zites and slaty schists are developed.

The granite rocks are porphuritic in nature with subordinate amounts of muscovite biotite and tourmaline and are intruded by thin aplitic veins. The rocks are well exposed near Mahot (32°4': 75°48')

Around Jogindarnagar (31°59'15" : 76°47'30") town, the formations of Krol Series, Kasaulis and the Upper iwaliks Sare exposed. The contacts of the formations are thrust planes. The town is situated on the Kasauli formations.

In the vicinity of Drang Masheran (31°48' : 76°57') Dagshai formations are also seen associated with Kasaulis and Upper Siwaliks. The oldest formations exposed in the vicinity of the town are Krol Series. The Upper Siwalik formations are exposed about 3 kilometres (2 Miles) north of the town.

The contact of Upper Siwalik and the Kasauli formations passes close to Sidhpur (31°51': 76°45' 15") in the Beas Valley.

In the Mandi town area, the formations of Krols, Dagshai and Kasaulis are exposed. The boundary between the Kasaulis and the Krol Series is a thrust contact.

Subathu formations are exposed around Sundarnagar (31°30'45": 76°48'). They occur in the form of thin bands.

Siwalik formations are exposed in the western part of the district between the longitudes 76°45' having NW-SE strike.

Only in the northern portion of the district, formations older than Krols have been mapped and are known as schist series, equivalent to Chail and Jutogh of Simla. Magnetite and Hematite bearing schists are known as Iron Ore Series and occur in the Upper portion of the schist series.

Minerals

1. *Coal*: Miron lenses of coal are recorded at Mansai (31°34':76°51'45"), south of 3355 hill (31° 32':76°52') east of village Talaren (31°31'27" 76°52'34"), Deri (31°26'30" : 76°50') and Julvandn. None of them is large enough to be exploited for local use.

2. *Dolomite* : Dolomites of Upper Krol Series occur extensively in the district. It is found associated with salt deposits at Maigal (31°45': 76°57'), Guma (31°57' : 76°51') and Drang (31°48' : 76°57').

3. *Iron Ores*: Deposits of Magnetite and Hematite occur as bands in schists and quartzites of Chail series in Kolikohar ridge, north of Jogindarnagar at Koharkhas (32°5' : 76°48') but the concentration of the ore is so low that it cannot be exploited economically. Deposits of iron also occur in Chichot Sub-Division of Mandi District near Thanag (31° 33'20" : 77°10') in Charyan dhar, Rayan dhar and Sangalwara area.

Iron ores occur mainly as disseminated crystals of magnetite and hematite in the phyllites and schists.

An iron ore bearing belt runs intermittently from Ramabhet (31°35'20" : 77°6') to Thanag (31°33'20" : 77°6') a distance of about 10 Kilometres (6 miles).

(*a*) *Charvan dhar area* : On this ridge the iron bearing zone has been traced from Thurjan to Pansir (31°35'20" : 76°6') striking approximately NW-SE.

At Hetand (31°34'40" : 77°7') there are old workings. Here out of a thickness of 9 metres of disseminated ore, massive magnetite band is only 1·5 metres thick, while E.N.E. of Ramabhet the thickness of massive band is only 0·3 metres in a disseminated 8 metres thick magnetite horizon. The thickness of the massive band diminishes towards north.

(*b*) *Ravan dhar Thainag Area*: The phyllites and schists at Sunas (31°34'30" : 77°8'30") are ferruginous and contain mostly disseminated hematite. No concentrated band has been found as far as Thanag. On the eastern side of the Debla nala, close to the village of Kalwande (31°33'10" : 77°10'24"), a narrow band of magnetite ore is seen in the old workings.

(*c*) *Sangalwara area* : Traces of ore commence from the ridge near Garaum (31°30'50" : 77°11'30"). But the maximum extent is between the villages of Jagir (32°29'50" : 77°12'30") and Janot (31° 29'40" : 77°12'50"). On the southern flank of the ridge 9 metres thick iron ore zone is seen.

As these occurrences are of minor nature and as they are in inaccessible region, they are not of any immediate economic importance.

The deposits of magnetite at Thanag in Mandi contains about 72% iron and is considered to be of high grade. The analysis of a magnetite schist from Mandi is as follows :

	Weight percent	Molecular proportion	Molecular proportion according to Niggle.
SiO_2	19·6	326	Si 53
TiO_2	0·924	11	al 38
$Al2^03$	24·44	239	m 61
$Fe2^03$	48·07	300	ci
Fe^0	5·53	76	
Mn^0	n.d.	6	alk 0
Ca^0	0·32	..	Fe content 37% approximately
Mg^0	..		
$Ma2^0$	..		
K_20	..		
H_20+	1·24		
$H_20=$	0·12		
Total	100·16	Sq. Gr. 6·04	

4. *Limestone*: Occurrence of limestone is recorded near Harabagh 5 Kilometres (3 miles) east of Jogindarnagar. The limestone found here is dolomitic.

5. *Salt*: The only economic mineral deposit in Mandi area is rock salt. Large reserves are found in Ghogar-ki-dhar range above the Mandi Palampur road.

A peculiar form of earth known as 'Lokhan' which is generally pink in colour but occasionally varying from ashy white to purple red is usually found over the rock salt bodies.

The main salt concentrations are the two plugs of Magal and Drang in the south and at Shilaswarkhad in the north.

The Guma 'dispir' deposit is a latter addition formed by the cracking of the anticlinal axis north west of Shilaswar.

The salt is of a dark purplish colour, quite opaque and with a large admixture of earthy impurities. Nests of pure crystalline salt are also found.

Recent investigations have indicated that the deposits are large enough for further developments. Brine chamber mining method for the salt mine is considered suitable by M/s Escher Wyas and Co. from Zurich with a view to produce 67073 metric tonnes (66,000 tonnes) of refined salt annually.

In all nine bore holes have been put down at Drang and about eighty samples from different depths have been analysed. The average NaCL content of the 80 samples is 72%.

THE COMPLETE ANALYSIS OF SOME SAMPLES FROM DRANG IS GIVEN IN THE FOLLOWING TABLE.

ANALYSIS

Bore Hole Number	Depth along borehold from which sample taken	SiO_2	al	Fe.	Ca.	Mg.	K.	Cl.	SO_4·1.	CO_3	Insolubles	NaCl%

N.B.—Iodide te,sted in samples of Bore Hole No. 4 has been found absent.

6. *Slate*: Roofing slates are quarried at many places in the distric. Slate quarries are in active operation near Pandoh, Chichot and Utter Sal areas of the district. Slate deposits are recorded at Pandoh and also in Chichot tehsil.

At Pandoh the slate deposits are situated about 5 kilometres (3 miles) on the Mandi-Kulu road, lying on both banks of the Beas river. The quarries lying on the northern bank are better developed being by the side of the motorable road.

POPULATION

According to 1961 Census, the population of this district is 384,259 persons. There are 192,687 males and 191,572 females. This forms 28·44 per cent of the total population of the Pradesh. The urban population of three towns Jogindarnagar, Mandi and Sundarnagar is 21,536 persons, 11,928 males and 9,607 females. It means that about 33·69 per cent of the population lives in towns and the remaining in the rural area.

Sixty years ago, 1901 the population of the area now comprising the district was 228,721 persons, 119,860 males and 108,861 females. The growth of population during the sixty years has been given in the following statement :—

Year	Persons	Males	Females
1901 .	228,721	119,860	108,861
1911 .	236,038	122,692	113,356
1921 .	239,376	123,833	115,543
1931 .	265,873	138,727	127,146
1941 .	303,685	159,227	144,458
1951 .	310,626	157,622	153,004
1961 .	384,259	192,687	191,572

It is clear from the data that the population increased in every decade.

The following table compares the variation in population in the district during the last sixty years :—

Year	Variation			Percentage variation		
	Total	Males	Females	Total	Males	Females
1	2	3	4	5	6	7
1911 ..	7,317	2,842	4,485	3·20	2·36	4·12
1921 ..	3,338	1,141	2,197	1·41	0·93	1·94
1931 ..	26,497	14,794	11,603	11·07	12·03	10·04
1941 ..	37,812	20,500	17,312	14·22	14·78	13·62
1951 ..	6,941	1,605	8,546	2·29	1·01	5·92
1961 ..	73,633	35,065	38,568	23·70	22·25	25·21
1901 to 1961	155,538	72,827	82,711	68·00	60·76	75·98

The pace of growth observed since 1911 has been more rapid after 1931. In 1951 the population increased slightly at a low rate of 2·29 per cent whereas the same increased at 14·22 per cent in 1941. The unprecedented growth of population between 1951—61 can be attributed to the decline in death rate one side and steady improvement in medical and public health services made available to the people on the other side. Male population decreased by 1·01 per cent during 1941—51 whereas female population increased by 5·92 per cent. in the same decade. This increase is abnormal though the percentage of female was higher than the males throughout the period except 1931 and 1941.

Changes in the proportion of sexes since 1901 to 1961 can be observed from the following table:—

Year	Females per 1,000 males		
	Total	Rural	Urban
1901 . . .	908	920	694
1911 . . .	924	936	619
1921 . . .	933	944	708
1931 . . .	917	950	514
1941 . . .	907	917	727
1951 . . .	971	976	881
1961 . . .	994	1,007	805

The variations in the sex ratio as given in the above statement are not abnormal. After 1941 females per 1,000 males are increasing at a high speed.

Villages classified by population.

There are 4,454 inhabited and 364 un-inhabited villages in the district. The total rural population is 362,724 giving an average of 81 persons per inhabited village.

Percentage distribution of rural population by size-group of villages, 1961:—

Size group	No. of villages	Percentage to total No. of villages	Rural population	Percentage to total rural population
1	2	3	4	5
Less than 200 ..	4,057	91·09	227,172	62·63
200—499	348	7·81	99,285	27·37
500—999	42	0·94	25,951	7·16
1000—1999	7	0·16	10,316	2·84
Total ..	4,454	100·00	362,724	100·00

About 91 per cent villages in the district fall in the population group of less 200 persons per village. Similarly the major portion of the population falls in the same range. The statement reveals that most of the villages are very small.

This district has the highest number of villages in the Pradesh. Jogindarnagar has 1,038, Mandi Sadar, 1,032 and other tehsils less than 950 villages. There are only 42 villages having population between 500 to 999. No village claims population above 2,000 persons. Mahadev in Sundarnagar is the biggest village having 1,776 persons. The district is mostly rural in character. The density of population per square mile is 237. Amongst the tehsils and sub-tehsils of the Pradesh the highest density has been recorded in Tehsil Mandi Sadar which has 461 persons per square mile including urban population of the tehsil.

The number of persons per occupied Census house in the rural areas is 5 and same in the towns. The density of households per square mile is 42 in rural areas and 478 in the urban.

Urban population.

Mandi and Sundarnagar towns have population of more than 5,000 persons. Jogindarnagar Town is small in size of population. The following statement shows the size and status of each town—

Town	Status of the town	Population		
		Persons	Males	Females
1	2	3	4	5
1. Mandi	M.C.	13,034	7,321	5,713
2. Sundarnagar	M.C.	5,782	3,039	2,743
3. Jogindarnagar	S.T.C.	2,719	1,568	1,151

Mandi has been a town since 1881. On the basis of 1961 population figures this town falls within Class IV and till 1951 it could be classified as Class V. Sundarnagar town comes under Class V and Jogindarnagar Class VI.

Sex ratio in urban areas :—

District/Town	Females per 100 males	
	1951	1961
1	2	3
District	97	81
1. Mandi	75	78
2. Sundarnagar	113	90
3. Jogindarnagar	95	73

The number of females per 100 is somewhat low in Mandi town because this is a commercial centre and a number of Government offices are situated there. Most of the employees recruited are males and they are natives of rural areas of Mandi, who reside without the families and thus swell the male population of the town. Sex ratio of Jogindarnagar town is close to the sex-ratio of the district.

Sex-ratio in Sundarnagar town is more than the district figures. In 1951 the number of females was more than males. The reason of this abnormal ratio is that most of the residents of this town are Banias and Brahmins. Males generally go out for their earnings and females remain behind. This accounts for the more females.

THE PEOPLE

The whole population with trifling exceptions is Hindu. The distribution of people according to religion recorded in 1961 Census is—

Name of Religion	Persons	Percentage to total population
1. Buddhists	140	0·04
2. Christians	28	0·01
3. Hindus	380,453	99·01
4. Jains	10	..
5. Muslims	1,868	0·49
6. Sikhs	1,759	0·45
7. Religion not stated	1	0
Total	384,259	100·00

The Muslims have second and the Sikhs third place in the district. The Muslims element is very small and consists partly of a colony of Pathans who have been settled there for many years and partly of Gujjars from Kangra who came there as graziers. The Gujjars either continued as such or settled down to agriculture. Namdhari Sikhs in the town and adjoining area have marriage link in far off places. Caste-wise figures have not been returned except for the scheduled castes and scheduled tribes.

A brief description of some of the more important Scheduled Castes and Scheduled Tribes is given here:—

Rajputs: There are many families of Rajputs in the district. Those who are descended from the junior branches of the ruling family are called

Mians. The near relations hold substantial jagirs, some enjoy service grants of one kind or the other. The Rajputs are of Katoch, Guleria, Sonkhla, Hathial, Pathania, Jamwalia, Jaswalia, Bhanyalia, Sibaya, Drol and Saroch. In the past some of these clans refused to drive a plough, but now owing to economic pressure, they have all taken to agriculture.

Brahmins: The Brahmins of this district may be divided into three groups. The first group professes to be descended from those Brahmins who accompanied Raja Bir Sen, the founder of the Suket ruling family from Bengal. They are pure Gaur Brahmins. The Pandit, Prohit, Upadhyaya, Lagwal and Dichhat are the Brahmins of first rank. They refuse to handle the plough. The second group comprises of Sarsut, Kankubj, Austi, Chhajwan, Ror and Siyat Brahmins. The third group is composed of Halbahi which is the agricultural class. The chief of them are Batahnun, Sarwanun, Katwal, Jamnauni, Harbiani, Bhatchru, Ladwal, Barwal, Asklu and Upade.

Brahmins of the first group are religious guides, astrologers, ministrants in temples and family priests.

Khatris: Khatris of Mandi are all socially equal. There Khatris are of mixed descent, Kayosthas of Hindustan and Khatris of Punjab having inter mingled. They have been for years the money lenders, accountants, clerks and court officials in the past as as well as now. The mental alertness and superior education of the Khatris resulted in their obtaining a predominating influence in the district.

Gujjars: The Gujjars in the district are exclusively a pastoral tribe and scarcely cultivate at all. They keep herds of buffaloes. They live on the sale of the milk, ghee and butter. There are some Hindu Gujjars in the district. They belong to Khatana, Chohan, Gursi, Didhar, Bhumbhale, Koli, Kantiya, Bhunch, Bargat, Kalas, Chhori, etc. They marry among themselves. Betrothal is settled by drinking liquor at the house of the bride's father. The widow of a deceased brother is claimed by the remaining ones. Widow re-marriage is also practised.

Some important Scheduled Castes are:—

Badhi or Nagalu: Badhis work as carpenters and masons. They are not skilled carpenters like those existing in town. They are quite well versed in constructing houses in villages. Nagalus prepare cane baskets. Their population in the district is 3,272 souls.

Chamar, Mochi, Ramdasi, Ravidasi or Ramdasia: This is the second biggest scheduled caste in the district. The numerical strength of this caste is 25,751 persons. They are spread over the district. Professionally they are engaged in leather work. They prepare local and old kinds of shoes. Though their profession offers better prospectus yet they work as agriculturists on small un-economic holdings. They prepare and repair shoes to meet the demand of local Zamindars in return of their customary wages in kind at the time of harvest.

Chanal: According to Sir Denzil Ibbetson "Chanal is perhaps the modern form of Chandala the outcast of the hills, so often mentioned in the Rajatarngiri and elsewhere". By religion they are Hindus and number 4,665 according to the latest count.

Daole and Daule: Daole and Daule have been enlisted separately in the list of scheduled castes but these are one and the same caste. These are usually engaged in water mills, fishing and were known for gold washing during State regime. Their population in the district is 203 persons.

Dhaogri or Dhuai: The following extract regarding Dhaogri caste taken from the Punjab Census Report, Vol. I, 1881 by Sir Denzil Ibbetson is reproduced below:

"These are the iron miners and smelters of the hills, an outcast and impure people, whose name is perhaps derived from Dhonkni "bellons"; and it is possible that their name is rather Dhonkri than Dhogri. Their status is much the same as that of the Chamar or Dumna. They are returned only in Kangra and Chamba". Dhaogris are Hindus. They are mainly engaged in preparing charcoal and blacksmithy. Their number in the district stand at 515.

Dumne (Bhanjre): They are akin to Doom or Doomna with the assumed name Dumne (Bhanjre) because of their profession as they prepare baskets and other articles or bamboo locally called 'bans'. They are 2,132 in number.

Jogi: The main occupation of this caste is agriculture. Some of them play musical instruments in the temples. Their population in the district is 1,288.

Kabirpanthi, Julaha or Keer and Julahe: Are mainly engaged in weaving. By religion they are mostly Hindus. Some Kabirpanthi are Sikhs. They are chiefly concentrated in this district and their population is 10,445.

Koli: Koli is the most numerous scheduled caste with a population of 36,984. They form about 32·51 per cent of the total population of the scheduled castes in the district. This caste is mainly engaged in agriculture.

Lohar: Lohar is an artisan caste scattered all over the district. Their main occupation is blacksmithy. They are also engaged in agriculture. The Lohar community of the villages is engaged in the household industries of making agricultural implements, certain minor utensils, and tools. They carry out repairs and alter old implements for which payment is made in kind. Mostly a Lohar has fixed perquisites depending upon the number of ploughs and bighas of land held by the household concerned. On festivals and marriages he is served with free meals.

Rehar: The following extract relating to Rehar caste culled out from "Census Report of the Punjab and its Feudatories Part I, 1891" by E. D. Maclagan is reproduced below :—

"Mr. Manuel from Kangra writes: The Rehara is an outcaste like the Dumna, Hali, Sepi, etc. but he is not a Dumna, with whom he will not eat. He has a distinct calling, making trinkets of the base metal for the Gaddi women".

They are Hindus by religion. They prepare baskets and kiltas. Some of them have taken to farming.

Food and Drinks: The agricultural class before going to the fields eat bread, made of maize, barley or coarse millets. This morning meal is called nuhari or Kalwar. The dopahri is eaten at mid-day. It consists of rice or cakes made of maize or millet. In the evening they have a supper which is called biali at which rice or roti and dal are used. Goats are slaughtered at ceremonies and festivals. At such occasions several kinds of dishes are prepared. Meat is eaten by men and women of all classes but widows abstain from it. Jhol is quite common among all classes. The people are very much fond of drinking Jhol which is prepared by boiling whey or butter milk with salt, ghee and spices at every meal.

All the lower classes are great consumers of liquor. The people of Bahl are much given to drinking. The men of Saraj and Sanor are more temperate. Previously the favourite drinks of the people at fairs was lugri and sur. No country liquor is used by the large numbers of people on festive occasions.

Dress: In the Bahl and Dehar area the women wear a kurti reaching to the knees, suthan and dopatta. Mostly widows wear a white dopatta. Women of upper hills wear jhaggi, a long woollen garment reaching to the knees tying a gachi or long cord of wool round their waist. They put on woollen pyjama, caps ornamented with flowers and pullas of fibre made in their homes. At fairs and large gathering they wear waist coats and blankets. Women of the better classes generally wear gold rings in their nose, silver rings in their ears, bangles, of brass or glass or of different metals on their wrists and a silver necklace round the neck. *Kangnu, balu, chak* and *pazeb* for the feet are other ornaments used by the women. At marriages and other festivals they put Surma or antimony in the eyes and bindi on the forehead. The use of balu is compulsory for a newly married woman at least for one year while it is absolutely forbidden for widows. The ordinary dress of a man consists of a chaubagla which is a sort of achkan, shirt and turban or cap. In Karsog tehsil the women wear a dhattu as a head dress. This is mostly a coloured piece of cloth for covering the head. Some of them wear cap as well.

Housing and Furniture: Tables of E series except E-III in Part II gives statistical data on the different aspects of housing in rural and urban areas of the district. Out of 15,193 Census houses in the district about 94 per cent are in the rural areas and 6 per cent in the urban. In rural areas 7 per cent Census houses were vacant at the time of house-listing 44 per cent dwellings, 3 per cent workshop cum-dewellings, 5 per cent factories workshops and worksheds and 39 per cent are others which include cow-sheds. The remaining are eating houses, sarais, shops and government institutions.

The density of occupied residential houses per square mile is about 95 houses and population per square mile is 237 of which 225 is in the rural and 2,276 in the urban. The number of persons per household in the rural areas is 5·3 and it is 4·7 in the urban. It reveals that there are more occupied residential houses in the urban areas than in the rural. The number of persons per house is higher in the rural areas due to the joint family system.

Classified by 'Owned' and 'Rented' Categories 95 per cent houses are owned and 9 per cent are rented. There are 97 per cent owned houses in rural areas against 63 per cent in urban areas. This indicates that 37 per cent houses are rented in the towns. E-IV gives the detail of materials used for walls and roof. About 86 per cent rural houses have been built with stone and 10 per cent with mud. The proportion of the remaining houses is negligible. Walls of 241 houses have been built with timber 193 with unburnt bricks and 39 with burnt bricks. Out of 946 houses in the towns walls of 896 houses or 95 per cent have been constructed with stone and 7 houses with timber. Thus stone is the predominant building material in rural and urban areas.

Out of the material used for roofing slates are predominant in the district with a proportion of 75 per cent. The use of slate is 81 per cent in the urban and 74 per cent in the rural. Grass leaves reads thatch wood or bamboo occupy second place with a proportion of 20 per cent in the rural and 14 per cent in the towns. Twenty per cent of households are occupying one room dwellings, 30 per cent two rooms, 13 per cent three rooms, 20 per cent four rooms and 18 per cent more than five and more rooms.

Scheduled Castes : Table SCT I Part A shows the population and its distribution by workers and non-workers for each Scheduled Caste by sex in rural and urban areas. Fifty two castes have been notified as Scheduled Castes in the Pradesh but 34 were reported in the district. Singnificant castes having more than 400 population are given here :—

Name of Scheduled Caste	Population 1961			
	Rural		Urban	
	Male	Female	Male	Female
All Scheduled Castes	55,310	54,476	2,070	1,892
1. Badhi or Nagalu .	1,622	1,602	27	21
2. Bhanjra (Mahanjara)	557	235	..	..
3. Chamar, Mochi, Ramdasi or Ravidasi	12,281	11,966	746	758
4. Chanal . .	2,333	2,272	32	28
5. Chhimbe (Dhobi) .	208	219	61	63
6. Dhaogri or Dhuai .	175	337	3	..
7. Doom or Doomna .	4,075	4,615	79	83
8. Dumne (Bhanjre) .	1,305	826	..	1
9. Hesi (Shahuai, Beda) . .	455	393	27	28
10. Jogi (Nath) . .	611	611	39	27
11. Julaho . .	1,785	2,786	32	28
12. Kabirpanthi, Julaha or Keer . .	3,094	2,272	237	21
13. Koli (Kolta, Chaamang) . .	18,400	18,251	194	339
14. Lohar (Katehle) .	7,297	6,986	326	299
15. Teli . .	370	361	50	45

Out of these Scheduled Castes the largest number is of Kolis. Chamars occupy second place and Lohars third. The population of the Scheduled Castes is 29·6 per cent of the total population of the district which is above than the Pradesh proportion of 27·4 per cent.

Education : Table SCT III Part A-1 and Part B-1 show the literacy and educational levels for each Scheduled Caste. It appears that both male and females are taking fuller advantage of the educational facilities and concessions available to them. The literacy standard among them is increasing. The following statement gives the proportion of literacy compared with state and district figures:—

	Percentage of Literacy			
	Rural		Urban	
	Male	Female	Male	Female
Himachal Pradesh .	25·19	4·62	63·48	43·79
District average . .	27·64	4·72	64·09	46·11
All Scheduled Castes .	14·49	1·01	32·13	12·96

In the rural areas 2,484 males and 86 females have received education upto primary and junior basic while 103 males and 1 female have passed matriculation examination. In the towns 277 males and 101 females have received education upto primary or junior basic while 29 males and 2 females have passed matriculation or higher secondary examination.

Scheduled Tribes : Table SCT 1 Part B presents the population and its distribution by workers and non-workers for each Scheduled Tribe. Six Scheduled Tribes have been returned in the district in 1961 Census. The distribution of their poispulation with

percentage of each tribe is given in the following statement :—

Name of Scheduled Tribe	Population			Percentage
	Male	Female	Total	
All Scheduled Tribes .	2,610	2,414	5,024	100 00
1. Gaddi . .	533	556	1,039	21·68
2. Gujjar . .	1,832	1,672	3,504	69·74
3. Jad, Lamba, Khampa and Bhot or Bodh .	58	49	107	2·13
4. Kanaura or Kinnara	134	69	203	4·04
5. Lahaula . .	46	39	85	1·69
6. Pangwal . .	2	..	2	0·04
Unclassifiable .	5	29	34	0·68

The percentage of the Gujjars is the highest in the district among the Scheduled Tribes followed by the Gaddis. The proportion of the other tribes is negligible. Total Scheduled Tribes are 1·31 per cent of the total population of the district which is very low comring to the Pradesh proportion of 8·01 per cent.

Union Table SCT-V Parts A and Part B give the number of Scheduled Caste and Scheduled Tribe workers classified by the nine industrial categories and the non-workers. The number of workers in industrial categories I of cultivators and II of agricultural labourers can be compared with the total workers of the corresponding categories in the State Table B-I to find out their percentage.

The following statement shows the ratio of persons working as cultivators, agricultural labourers, and in Mining Quarrying, Livestock, Forestry, and Fishing between the general population on the one hand and the Scheduled Castes and Scheduled Tribes on the other :—

Category	General Population		Scheduled Castes and Scheduled Tribes		Percentage of SC & ST to General Population	
	Male	Female	Male	Female	Male	Female
Population	192,687	1,91572	59,990	58,802	31·13	30·69
Workers	112,149	11,142	37,178	35,541	33·15	31·97
Cat. I .	89,894	105,634	29,259	32,193	32·54	30·47
Cat. II .	977	1,121	787	983	80·55	87·68
Cat. III .	1,110	217	363	132	32·70	60·82

There is no difference in the sexwise percentage of the Scheduled Castes and Scheduled Tribes to total males and females which stands at 31 per cent but sex disparity is evident in the percentage of category III. 81 per cent of the total males and 88 per cent of the female who are working as agricultural labourers (Category II) come from the Scheduled classes, which establishes that the majority of the female workers come from the Scheduled Classes. Similarly the predominance of Scheduled Caste and Scheduled Tribe workers is marked in III category of Mining and Quarrying where the proportion of females exceeds 60 per cent. The percentage of both the sexes as total workers and cultivators is about 33. These figures at the district level confirms their substantial contribution to the working force in both sexes.

Social Welfare : The subject of welfare of Scheduled Castes, Tribes and Backward Areas is in the purview of Social Welfare Department. This Department did not have any allocations in the First Five Year Plan but the Ministry of Home Affairs, provided supplementary funds for schemes for welfare of Scheduled Castes on year to year basis. The following schemes for the welfare of the Scheduled Castes were taken up during First Five Year Plan :

1. *Drinking Water Supply* : According to this Scheme water was made available to village Dan in Mandi Sadar.

2. *Educational* : These include schemes of granting tuition, examination fees and scholarships. Another scheme is of assisting hostels.

3. *Housing* : This covers the scheme of providing assistance in cash or kind for repairs of houses. Subsidy for purchasing G.I. Sheets for roofing was granted to about 25 families.

4. *Economic Uplift* : These include schemes of granting loan-cum-subsidy for cottage industries and Co-operative Societies organised by Harijans.

5. *Medical Aid* : According to this Scheme medicine is distributed through dispensaries.

6. *Removal of Untouchability* : There includes various schemes of publicity against untouchability. Harijan days were celebrated and propoganda for removal of untouchability was made through films, addressing large gathering at fairs and other places by the paid propogandists.

Besides five Welfare Extension Centres were started during the First Plan.

Second Five Year Plan : For the welfare of the Scheduled Castes this plan was framed in the light of the experiences gained in the First Five Year Plan. The plan outlay of the district was

Rs. 3·93 lakhs and expenditure Rs. 3·74 lakhs. The following statement shows the financial and physical targets and achievements during the Second Five Year Plan :

Name of the Scheme	Welfare of Scheduled Castes during Second Five Year Plan			
	Expenditure incurred	Name of the executing agency	Targets achieved	Units
1	2	3	4	5
STATE SECTOR				
I. EDUCATION				
1. Award of Scholarships	96,024	Deputy Commissioner	966	Students
2. Award of stipends	42,108	Do.	954	Do.
3. Supply of books and stationery	27,688	Do.	3,416	Do.
II. AGRICULTURE				
1. Distribution of plants and seeds	9,650	District Agricultural Officer	7,317	Plants
2. Agricultural Implements distributed	11,650	Do.	248	Implements
3. Purchase of Agricultural land	9,620	Do.	285	Families
III. Co-OPERATION				
1. Subsidy to M.P. Societies	8,700	Registrar, Co-operative Societies	20	Societies
2. Training in spinning and weaving	8,902	District Industries Officer	30	Trainees
3. Purchase of spinning wheels and looms	11,806	Do.	144	Looms
IV. HOUSING				
1. Subsidy for construction and repair of houses	66,930	Deputy Commissioner	375	Famiiles
CENTRAL SECTOR				
1. Award of stipends to Scheduled castes for training, spinning and weaving.	38,348	District Industries Officer	114 1	Machines Weaving Centre, Pangna.
2. Free distribution of Sewing machines, hand looms and other equipment for cottage industries.	41,255	Do.	5 33 75 1	Machines Looms Wheels New Centre started.

More provision has been made in the Third Plan. The schemes which were already in operation before the Third Five Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan schemes. There are in addition some more schemes sponsored by the Central Government.

DISTRICT ADMINISTRATION

Mandi and Suket States were combined to form Mandi district on 15-4-1948. The common ancestor of these two ruling houses was Raja Sur Sen of the ancient Gaur Dynasty of Bengal. From administration point of view Suket State has been divided in two tehsils Sundarnagar and Karsog and Mandi State into four tehsils Jogindarnagar, Mandi Sadar, Sarkaghat and Chichot. This district stands first in Himachal Pradesh in order of population. The following statement shows the area and population of each tehsil :

District/Tehsil	Area in square miles	Population
1	2	3
Mandi District	1,620	384,259
1. Jogindarnagar	445	68,572
2. Mandi Sadar	202	93,083
3. Sarkaghat	202	84,625
4. Chichot	351	57,518
5. Sundarnagar	168	42,479
6. Karsog	252	37,982

General Administration :—The administration of the district is run by the Deputy Commissioner with headquarters at Mandi. He is incharge of general administration, law and order, treasury, land revenue and civil supplies. He is assisted by Magistrates, a Treasury Officer, a Revenue Assistant, a Compensation Officer and an Assistant District Planning Development Officer. Each tehsil is under the charge of a Tehsildar. The District Medical Officer is the controlling officer in respect of all the medical and public health institutions in the district. The District Inspector of Schools is the head of office for Primary and Middle Schools. The Headmasters are the controlling officers in respect of High and Higher Secondary Schools.

Police : The district police force is under the charge of a Superintendent of Police. There were 2 Inspectors, 15 Sub-Inspectors, 12 Assistant Sub-Inspectors, 67 Head Constables and 319 Constables on 31st December, 1960.

The Police Stations and out-posts on 31st December, 1960 :

Police Stations	Police out-posts
1. Gohar	1. Balh
2. Jogindarnagar	2. Dhar
3. Karsog	3. Darang
4. Mandi Sadar	4. Hatli
5. Sarkaghat	5. Mandi Sadar
6. Sundarnagar	6. Pangna
	7. Sandhol
	8. Suraj

The law and order situation in the district remains satisfactory. There was a welcome decrease in all types of offences under the Indian Penal Code. The distribution of crime excluding cases under the Police Act during five years was as under :

Year	No. of crimes	Difference
1	2	3
1956	425	..
1957	391	—34
1958	323	—68
1959	310	—12
1960	272	—39

Justice : The District and Sessions Judge is the head of the Judicial Department in the district. He covers both Mandi and Chamba districts with headquarters at Mandi. There is one Senior Sub-Judge, One Additional Sub-Judge and one Magistrate First Class at Mandi. They attend to Civil and Criminal work both original and appellate. Judiciary is not separated from the Executive. The statistics of suits instituted and decided since 1951 to 1960 have been shown in Table 6·3 in Part III.

Consolidation of Holdings : The Director of land Records, Revenue Assistant and Tehsildars hold charge of the posts of Director of Consolidation of Holdings, Settlement Officers (Consolidation) and Consolidation Officers respectively, in addition to their own duties. The number of Kanungos, Muharrirs and Patwaris according to the sanctioned strength during 1963 was :—

1. Sadar Kanungo	1
2. Naib Sadar Kanungo ..	1
3. Office Kanungos	8
4. Field Kanungos	12
5. Muharrirs	3
6. Patwaris	134

The settlement operations were started in the district with effect from November 16, 1958. The cost of operations was estimated at Rs. 28 lakhs. It was expected that land revenue would be increased by Rs. 1,14,588 or more after the new settlement. During 1959-60 land-settlement operations were started in Jogindarnagar tahsil. The entire tehsil which has an area of 2,78,725 acres including uncultivated area and forests, was divided into 627 Mohals. The total amount spent on the settlement and record operations was Rs. 3,48,212 in 1958-59. Mandi Sadar was taken up for survey and settlement operation during 1960-61.

There are two forest divisions each under the charge of a Divisional Forest Officer and 8 Forest Ranges.

Offices of two Executive Engineers of the Public Works Department are located in the district. They are assisted by a Sub-Divisional Officers. There is a Superintending Engineer of the Department of Multipurpose Projects and Power at Sundarnagar.

Besides this every department maintains its staff at the district level to implement the schemes which pertain to that department.

Territorial Council : In 1957 some departments were transferred to the control of the Territorial Council under-section 28 of the Territorial Councils Act, 1956. Education upto Higher Secondary stage, Medical and Public Health, Veterinary Services and Construction and Maintenance of mule paths were transferred to territorial council. These departments were again taken over by the Government in 1962, when the Ministry was formed.

EDUCATION

The literacy figures show that the people of Mandi are getting more and more interest in sending their children to schools. The literacy percentage during the past decade has gone up from 5·2 per cent. in 1951 to 18·4 per cent. in 1961. According to 1961 Census 16·14 per cent. are literate and educated in the rural areas. Literacy among females is considerably low which stands at 4·72 per cent. whereas males are 27·64 per cent. literate. These figures are slightly higher than the Pradesh figures which are 25·19 and 4·62 % males and females respectively. In urban areas 56·1 per cent. population has been returned as literate and educated.

Percentage of literate and educated persons in the district and each town in 1961—

District/Town	Total	Males	Females
1	2	3	4
Mandi District . .	56·07	64·09	46·11
1. Mandi Sadar . .	63·50	70·22	54·89
2. Sundarnagar . .	43·50	52·35	33·69
3. Jogindarnagar	47·19	58·23	32·15

Mandi town leads in the district. As usual the percentage of literate and educated males is higher than the females but literacy among females does not lag behind in urban areas. The percentage of literate females in the urban is 46·11 against 4·72 in the rural areas.

With the inauguration of the First Five Year Plan education received a real fillip for its advanecment. The systematic schooling to the recognised standard in suitable premises and provision of sufficient number of trained and qualified teachers has been possible under the plan period. A number of educational institutions was opened in the district during the first and second Plan periods. In 1951-52 there were 5 High Schools, 35 Middle Schools and 125 Primary Schools against 20, 38 and 242 respectively in 1961. The following statement shows the number of institutions and scholars in 1951-52 and 1960-61:—

Type of Institutions	1951-52		1960-61	
	Institutions	Scholars	Institutions	Scholars
1	2	3	4	5
1. Colleges . .	1	231	1	318
2. High Schools . .	5	3,441	20	13,326
3. Middle Schools .	35	7,824	38	8,416
4. Primary Schools .	125	7,396	242	15,122

Facilities for the education of females have been extended. There were two high, two middle and two primary schools for girls in 1960-61.

The town has a Degree College since 1948. There were 252 boys and 66 girls in the College during 1960-61. In Sanskrit College at Sundarnagar, 27 male and 21 female students were getting education in 1960-61.

Government Polytechnic

The Government Polytechnic, Sundarnagar, first Technical Institute of its kind in Himachal Pradesh was started on 19th November, 1959.

The institution is intended to give practical and theoretical instruction in Civil, Mechanical, Electrical Engineering of the National Certificate course standard of all India Council for Technical Education. The examinations are conducted by the Board of Technical Education, Punjab and the diploma also awarded by it. The duration of the course is three years.

MEDICAL AND PUBLIC HEALTH

Before the formation of Himachal Pradesh there were following medical institutions in the district—

1. King Edward VII Hospital, Mandi.
2. Rani Kasum Kumari Women's Hospital.
3. Sarkaghat Hospital.
4. Silver Jubilee Hospital, Jogindarnagar.
5. Gohar Dispensary.
6. Sundarnagar Hospital.

King Edward VII Hospital was opened at Mandi on 21-8-1928. Ayurvedic Dispensaries were at Baggi, Chatri, Dharampur, Dehar, Hatli, Jhungi, Nihari, Rewalsar and Urla. Common diseases found among the people were dysentry, diarrohea, respiratory, eye and nutritional diseases, goitre, anaemia and V.D.

Medical Department was set up immediately after the formation of the district under the cont-

rol of a District Medical Officer to combat these diseases and to afford relief to the people. In addition to public health unit, institutions like Maternity and Child Welfare Centres were established at different places during the Plan periods.

Medical institutions of various types as on 31st March, 1961—

1.	Ayurvedic Dispensaries	32
2.	Ayurvedic Pharmacies	2
3.	Civil Dispensaries	7
4.	Civil Hospitals	4
5.	Dental Clinics	2
6.	District Hospital	1
7.	Family Planning Clinic	2
8.	Leprosy Clinics	1
9.	Maternity and Child Welfare Centres	7
10.	Motor Mobile Dispensary	1
11.	Primary Health Centres	6
12.	Rural Dispensaries	2
13.	T.B. Clinic	1
14.	V.D. Clinics	2

Besides a training school for Auxiliary Nurse Midwives was started at Mandi during the Secord Five Year Plan. 20 students are admitted there every year.

Special services and modern facilities of treatment like X-Ray have been introduced in some hospitals. More dispensaries are being opened. The existing services in the hospitals are being augmented by additior of staff and equipment.

V.D. Organisation : Intensive anti V.D. Campaign was initiated by the W.H.O. V.D. Demonstration Team in the Pradesh in 1949. This team worked for about 2½ years in all the districts. After the initial survey and from the reports of the W.H.O. personnel, the incidence of V.D. was found to be higher. It was considered essential to set up a permanent V.D. Organisation to control and eradicate V.D. in the district. In 1952 a V.D. clinic was opened at Mandi. Another clinic was established at Karsog in 1957. The treatment is given to the patients during field tours conducted by the V.D. teams every month.

Leprosy : The District is having a Leprosy Home which was opened during the State regime with a limited beds strength. This Leprosy Home was converted into a Leprosy subsidiary control centre with 30 indoor beds in October, 1958. Five Leprosy sub-units are functioning under this centre at Kataula, Sundarnagar, Janjeli, Urla and Dharampur. The Sub-Units are under charge of Non-Medical Assistant or Social worker who provides domiciliary treatment to the patients in the respective areas.

Malaria : The Malaria Control programme was started in the district in 1953. In 1958 the Malaria control programme was switched over to National Malaria Eradication Programme. As a result of mass spraying, the incidence of this disease has been considerably reduced.

Goitre : Under the goitre scheme iodised salt is distributed free to the patients for treatment of goitre. This scheme was started in the district in 1959.

Family Planning : Family Planning clinic exist at Mandi and Sundarnagar. Advice for family planning is available at all the dispensaries, and Primary Health Centres..

The number of patients treated in the various hospitals and dispensaries was 261, 306 in 1951-52. It increased to 690 869 in 1960-61, of which 75,065 were indoor and 615,804 outdoor patients. In 1960-61 there were 24 Doctors and 28 Vaids against 10 Doctors and 14 Vaids in 1951-52.

T.B. Clinic, Mandi was established in the year 1954 with 20 beds including 10 beds which has already existed before this period. In 1958 the beds strength was raised to 40 and in the year 1959 the beds strength was raised to 55, in the year 1964 the beds strength was raised to 85.

Domiciliary Treatment

The Domiciliary treatment was organised in the year 1959 and during the last 4 years, i.e. from 1961 to 1964 the patients receiving domiciliary treatment in the Mandi town and within a radius of 5 miles were as follows:—

Year	No. of patients under domiciliary care
1961	121
1962	180
1963	203
1964	240

The out door patients who were diagnosed to be suffering from Pulmonary Tuberculosis from the year 1961 to 1964 are as follows—

Year	No. of patients diagnosed as Pulmonary Tuberculosis
1961	353
1962	344
1963	477
1964	428

Opening of Sub-Centres

In view of the difficulties faced by the patients out side the domiciliary area to collect medicines regularly from this clinic, drug distribution centres in various tehsil headquarters/Primary Health Centres/Dispensaries/Ayurvedic Dispensaries were opened in the year 1962. The result of this experiment was encouraging and at present there are 36 drug distribution centres in whole of the district and 70-75% of the patients are regularly collecting the drugs or are taking regular treatment.

Radiographic Survey

A mass Radiographic Survey of Mandi Town was conducted in 1962 and about 69% of population were examined. The incident of T.B. was found 1·77% and only in one Harijan locality it was found to be 2·6%.

Control Programme

From Ist April, 1965 the National Control Programme has been implemented in the District and the diagnostic and treatment centres are under organisation.

Staff

At present there are two Doctors, 5 Health Visitors, One Laboratory Technician and one X-Ray Technician and two Staff Nurses only provided for this show.

Indoor

The Admission in the indoor from the year 1961 to 1964 have been 144, 122, 118 and 140 respectively. The patients who have been declared quiescent or who showed good recovery were 52, 50, 57 and 63 during the year, 1961, 1962 1963 and 1964 respectively.

Diet

The patient in the indoor are provided with whole-some free diet as about 3,600 callories per day.

Entertainments

There is a provision of Radio for the entertainment of the patients in the indoor wards and also the provision of indoor games like cards and carum board etc. Picture shows are arranged quite often.

Occupational and Divertional Therapy

The patients are provided occupational and divertional therapy during their stay in the ward. The female patients are engaged with knitting and sewing while the male patients take interest in gardening and painting etc.

Education

For illiterate patients the classes are held by the educated patients to educate, not only this but all the patients are educated as to how to live with their families and how to lead a regulated life.

Treatment Facilities

The latest modern treatment of T.B. is available to the patients including surgical intervention like resection etc. for the patients who required it and well equipped laboratory exists for sensitivity and culture.

All the patients are given free drugs and medicines. No charges made from the patients.

This clinic is not only attending the outdoor but has to perform multiple activities i.e. domiciliary, control and above all a well established laboratory and surgical unit for the treatment of T.B. patients.

AGRICULTURE

Agriculture is the main occupation of the people in the district as it engages about 80 per cent. of the working population. Most of the others depend directly or indirectly upon it. As the terrain through out the district is hilly and holdings are very small and scattered, the yield of various crops is much lower than in the plains and scope for increasing production is rather limited. Mandi district by virtue of its varied altitudes and agroclimatic conditions possesses vast potentialities for growing a wide variety of temperate fruits and crops like potato, ginger and vegetables,

Major food crops are grouped in three categories viz., cereals, pulses and other food crops. Non-food crops are divided into two sectors of oil seeds and other non-food crops such as cotton, tobacco and fodder.

Crops– Rice, maize, millets, ragi and pulses are the main crops grown in kharif season. Wheat, barley and gram are grown in rabi season.

Crop Calendar—Owing to varied climate the cultivation periods of crops differ more in this district. A crop calendar showing the sowing and harvesting times of principal crops is given here

Agricultural Season	Sowing Period	Harvesting Season
(a) *Kharif*		
1. Rice	March—July	October—November
2. Maize	May—July	September—October
3. Ragi	March—May	September—November
4. Millets	March—May	September—November
5. Potato	March—April	September—November
6. Ginger	March—July	September—November
7. Tobacco	April—June	September—November
(b) *Rabi*		
1. Wheat	September—November	April—June
2. Barley	September—November	April—June
3. Gram	September—November	April—June
4. Rape and Mustard	September—November	April—June

Land Utilisation

Elaborate and reliable statistics of land utilisation are a pre-requisite of planning for agriculture. The pattern of land utilisation in the district is shown below:

Classification	Area in Acres Year		
	1951-52	1956-57	1960-61
1. Total Geographical Area	977,216	974,720	974,854
2. Area of Forests	94,899	94,889	178,734
3. Barren and Uncultural Land	48,390	21,905	26,778
4. Land put to non-agricultural uses	..	15,448	14,696
5. Culturable waste	11,747	9,327	8,550
6. Permanent pastures and other grazing land	127,393	138,664	179,714
7. Land under Misc. trees crop and groves	911	..	5
8. Current fallows	7,589	5,600	5,507
9. Other fallow land	704	566	714
10. Net area sown	183,077	191,338	196,503
11. Area sown more than once	111,087	115,043	115,115
12. Total Cropped area	294,164	306,382	311,618

Out of all the Districts in Himachal Pradesh, Mandi has the largest area under food crops namely wheat, paddy and maize. The Balh, Jogindarnagar, Karsog and Baldwara valleys are fairly level and grow good crops. While higher altitudes, besides, growing potatoes, are suitable for the growing of fruit trees, pea, peach and walnut like apple, the valley areas can be brought under mango, litchi, citrus, guava, etc.

Prior to the merger of Mandi State in Himachal Pradesh, there was no Seed Farm in the area for the production of improved seeds. Even the fruit trees were few and those too, not of a good quality. After its merger in Himachal Pradesh the development of Agriculture was given due importance by the appointment of a District Agriculture Officer with three Agricultural Inspectors for District work. The real agricultural development work on planned basis was, however, taken in hand with the start of First Five Year Plan in 1951-52. The progress made under various schemes during the last decade is given below:

Multiplication and Distribution of Improved Seeds—The first step taken by the Department to help the cultivators to improve their crop yield was the establishment of Seed Multiplication Farms for the production of improved seeds of wheat, paddy, sugarcane and potatoes. Six Seed Multiplication Farms of cereal seeds and three Potato Development Stations were established in the district. In these Farms, Seeds of improved varieties, recommended by the Department of Agriculture, are cultivated under the supervision of qualified staff. This quality seed is then supplied to the registered growers for further multiplication in their holdings. The seed from the holdings of the registered growers, is further, supplied for general cultivation. The registered growers get a premium of Rs. 2 for every maund of seed supplied by them to the growers. The varieties of wheat which are being produced for general cultivation are N.P. 770 for high altitudes, Ridley and N.P. 809 for mid elevations and N.P. 829 for valley areas. Paddy varieties namely China 988 and China 4 and Sugarcane varieties COL 29 and COL 9 have become popular with the cultivators.

2. *Distribution of Fertilizers*—The fertilizers were, introduced in the district during the First Five Year Plan. The usefulness of these fertilizers was demonstrated by laying demonstration plots

on the cultivators' holdings. Simultaneously steps were taken to make the fertilizers available to the cultivators within easy reach and by subsidising the cost of internal transport. The cultivators have gradually started the use of two common fertilizers, namely, Ammonium Sulphate and Superphosphate. During the First Five Year Plan, only 37 tons of Ammonium Sulphate and 21 tons of Superphosphate were consumed in the district, in the Second Five Year Plan this figure rose to 445 tons and 150 tons respectively. The work of demonstration other types of fertilizers like Clacium, Ammonium Nitrate and Urea has also been taken in hand in recent years.

3. *Development of Local Manurial Resources*—It has been universally accepted that, the applications of compost and farm yard manure plays an important part in improving the soil texture and its fertility. A great stress has been laid on the production of more compost and farm yard manure in standard pits as well as in systematic heaps. The production of large quantities of compost is all the more necessary because for getting good results with the application of fertilizers, it is necessary that for every maund of fertilizers used, 40 maunds of compost or farm yard manure should be applied. The emphasis has also been laid on the use of green leaves of plant like Adhatoda-vesica (basuti), Vitex nigondoo (bana), Impomea cornea (vilaiti akk). The green manure crops like Sannhemp and Dhaincha have also been tried, but, the cost of green manure seed being prohibitive, no head way could be made towards this directions. Efforts are, however being made to persuade the cultivators to grow 'dhaincha" in the nooks and corners of the fields to enable them to raise their own seed for green manuring.

As a result of intensive propaganda, 30,000 tons of compost, by improved methods, was prepared during the First Five Year Plan period and 1,15,467 tons during the Second Five Year Plan period.

4. *Plant Protection Scheme*—Under the scheme necessary technical help and guidance is given to the cultivators for combating pests and diseases of crops, fruits and vegetables. For this purpose, insecticides and pesticides are made available to the cultivators at reasonable rates by subsidizing the cost of transport. Also plant protection equipment is supplied to the cultivators at 50 per cent of the cost price. The achievements made during the First and Second Plans under each items of work are as follows—

Serial No.	Particulars	Achievements	
		First Plan	Second Plan
(*i*)	Area baited against field rats (acres)	1,043	83,797
(*ii*)	Quantity of seed treated against seed borne diseases/ stored grains pests (mds.) .	2,552	36,879
(*iii*)	Fruit plants sprayed/dusted (nos.)	3,216	155,997
(*iv*)	Area treated against Epilachna beetle (Ac) . . .	..	457
(*v*)	Number of sprayers and dusters distributed . .	..	..

5. *Japanese Method of Paddy Cultivation*—The main features of Japanese Method of Paddy cultivation are raising of nurseries on raised beds, adequately manured, fertilized and transplanting the same in the fields which are well prepared and adequately manured at the time of puddling. To popularise this method during the Second Five Year Plan, seedlings raised in buffer nurseries were supplied free of such cultivators who undertook the plantation of nurseries by Japanese Method of Paddy Cultivation. The response was encouraging as is evident from the fact that out of total area of 58,000 acres under paddy, 3,773 acres were brought under Japanese Method of Paddy Cultivation during 1960-61.

6. *Development of Fruit Production*—As has been said earlier, there is great scope for the development of horticulture in this district. With a view to encourage the cultivators to grow more fruit plants, they were given long term loans at the rate of Rs. 500 per acre for planting new orchards. The total amount given on loan upto the Second Five Year Plan is Rs. 2·15 lakhs. The total area brought under new orchards during the decade during 1960-61 has been, 1,700 acres.

7. *Establishment of Progeny Orchards and Fruit Nurseries*—The Programme of establishing Progeny Orchards was, first, taken up in Himachal Pradesh. This has now been introduced in all the States in India under instructions from the Government of India. In these Progeny Orchards, fruit plants of known quality are planted on Scientific lines, which besides supplying bud wood for propagation, also serve as model orchard for the cultivators.

By the end of Second Five Year Plan, 9 Progeny Orchards-cum-Nurseries were established in the district. These orchards also produce fruit plants for supply to the cultivators.

8. *Development of Seed Potatoes*—As the higher altitudes of the districts are ideally suitable for the production of high quality seed potatoes, steps were taken to produce potato seed of recommended varieties by the establishment of Potato Development Stations. One of the Stations at Nihari was started as early as 1952 and the other Station at Phuladhar in 1957-58. In these Stations, disease free seed of Graige's defiance is produced for supply to the registered growers for further multiplication. There is a good demand of this seed in the adjoining plains of the Punjab.

Research

The Balh area of the district is suitable for honey production and a Northern Regional Bee Research Station has opened at Sundarnagar for carrying on the research on bees, under the scheme which is being financed by the I.C.A.R. Because of acarine disease which attacks all the colonies in the beginning, much head way could not be made in respect of research work. The disease has now been completely controlled and the research work on honey bees has been taken up in right earnest.

A crop Research Sub-Station has also been established at Sundarnagar at an elevation of 3,500 feet for research on cereals and for the production of recommended varieties of seed. The seed produced in this Sub-Station caters to the need of seed requirements of the Seed Multiplication Farms of the district.

Intensive Agricultural District Programme—An Intensive Agricultural District Programme has been put into operation in the district from 14th November, 1962. This is with the assistance of Federal Republic of West Germany to increase the agricultural production to sufficiently high level. A team consisting of seven German Experts on different subjects, has been deputed for guiding the Indian Workers in the field of Agriculture and Animal Husbandry for the Agricultural Development work. Indian counterparts of the German Experts have been appointed and the strength of the field workers has also been increased by about three fold. According to the agreement between the Government of India and Government of West Germany, machinery, equipment and livestock worth Rs. 27 lakhs is to be imported from Germany of which equipment and livestock worth Rs. 15 lakhs have already been received and the rest is to arrive in the near future.

The programme will operate, in all for a period of five years and the main emphasis would be given on the introduction of mixed farming practices in the district.

Centre of Agricultural Activities in Mandi District

Sl. No.	Agricultural Activity	Centre	Tehsil
1	Crop Research Station	Sundarnagar	Sundarnagar
2	Northern Regional Bee-Research Station	Sundarnagar	Sundarnagar

The Indo-German Agricultural Project

The Indo-German Agricultural Project was inaugurated on 14th November, 1962. In five

years they expect to double the yield. Emphasis is laid on mixed farming, dairying, animal husbandry, horticulture and vegetable cultivation. The manuring of fields—soil conservation has been included in this project.

The district comprises of six tehsils, ten development blocks, having 146 panchayats. There is cultivated area of about 2 lakh acres owned by 60,000 farm families residing in 3,946 villages having an average holding of 3·3 acres. Only 15 per cent of the area is irrigated by kuhls. The average annual rainfall is 63 inches of which 72 per cent comes during rainy season. The major crops of the district are wheat, maize and paddy which occupy an area of 1,17,884, 73,650 and 60,443 acres.

Farm Plans—The plans are filled in after discussing and explaining all the package of practices to the farmers. 1964-65 some of the farm plans will also be filled in personally by the District Level Officers, Block Development Officers and Block Level Extension staff. During 1963-64 and 1964-65, 34,723 and 53,520 farm plans were developed. During 1965-66, it is hoped to fill in the farm plans of all the 60,000 farm families of the district.

Designation of Officer	Responsibility
Gram Sewaks . . .	Filling of farm plans, assessing requirements and informin Block Development Officers.
Agricultural Inspectors .	Preparing of 10 farm plans in each Gram Sewak Circle of his area and checking of 20% farm plans by contacting farmers and ensuring timely supplies.
Co-operative Inspectors/ Sub-Inspectors.	Preparation of five farm plans in each Gram Sewak Circle. Checking of 20% farm plans and supply of credit in time.
Block Development Officer	Preparation of fifty farm plans in the block and checking of 5% farm plans and ensuring timely supplies.
District Level Officers .	Do.

Improved Seeds:—

Hybrid Maize—Hybrid maize Ganga 101 has proved useful in valleys and low lying areas of the district. There is an area of 24,000 acres in the district which is suitable for growing this variety of seed. Out of this area it is planned to cover 25 per cent area under this variety. It is expected that Hybrid Maize seed will be arranged from National Seed Corporation and supplied to the blocks according to their demand.

Paddy Seed—The total area under paddy crop is 61,290 acres. Out of this area it has been decided to saturate 66% of the area with improved seed 40,860 acres, over a period of five years. (This year it is planned to distribute 125 tons of paddy seed which will cover an area of 6,250 acres under improved seeds.)

Wheat Seed—The area under wheat is 1,17,884 acres in the district. A quantity of 30 tons of improved wheat seed will be available from the farms and 100 tons will be procured from the registered growers which will be distributed among the farmers. It will bring an additional area of 3,000 acres under improved seeds.

The following table shows the achievements made in the previous years and programme planned for the year 1965-66.

Quantity	Pre-package year (1962-63)	First year Package programme (1963-64)	Second year package Programme (1964-65)	Third year Package Programme (1965-66)
1. (*a*) Quantity of Hybrid Maize Ganga 101 seed distributed/to be distributed (m. tons)	Nil	1·3	26	36
(*b*) Area covered/to be covered (acres)	Nil	216	4,333	6,000
2. (*a*) Quantity of paddy China 988 seed distributed/to be distributed (m. tons) . .	30	22	31	125
(*b*) Area covered/to be covered.(acres)	1,500	1,100	1,550	7,750
3. (*a*) Quantity of wheat seed N.P. 829 N.P. 770 distributed/to be distributed (m. tons)	22	33	36	130
(*b*) Area covered/to be covered(acres)	594	891	972	3,510

Fertilizer distribution—Fertilizer distribution will continue to be the major activity of the programme.

The comparison of achievements made in the previous years and the programme planned for the year 1965-66 is reflected in the following table.

	Pre-package year (1962-63)	1st year Package Programme (1963-64)	2nd year Package Programme (1964-65)	3rd year Package Programme (1965-66)
1. Nitrogenous fertilizers distributed/to be distributed (m tons)	180	1,220	2,712	4,000
2. Phosphatic fertilizers distributed/to be distributed (m.tons) .	79	750	1,309	2,000
3. Other fertilizers distributed/to be distributed (m. tones) .	..	85	84	..
4. Fertilizer consumption per acre cultivated area (kgs.) . .	1·25	10	20·5	30

Demonstrations—Effective demonstrations play an important part in convincing the farmers about the superiority of improved practices over the local ones. During 1963-64 and 1964-65, 2055 and 2322 demonstrations were laid out and for the year 1965-66, 2556 demonstrations, will be laid out.

Local Manurial Resources—The requirement of organic manure of all the cultivated area of the district is 12 lakh m. tons. The cattle population of this district produces 8 lakh m. tons of raw dung annually. This raw manure is being conserved on scientific lines.

The following table contains the comparison of achievements made in the previous years on the above items and the programme planned for 1965-66

	Pre-package Year (1962-63)	1st year Package Programme (1963-64)	2nd year Package Programme (1964-65)	3rd year Package Programme (1965-66)
1. Compost prepared/to be prepared (m.tons)	95,117	2,07,737	2,54,000	3,00,000
2. Area green manured/to be green manured (acres) .	226	342	738	1,000

Supply of fruit plants—Approximately 2 lakhs deciduous and ever-green fruit plants will be supplied to the farmers from the departmental and registered growers nurseries on concessional rates. It will bring 2,000 acres of additional area under orchards. The farmers will be advanced loan of Rs. 4 lakhs at the rate of Rs. 750/- per acre for planting orchards.

To impart scientific knowledge of orchard management, orchardists will be trained by organising short duration courses.

Top-working of Kainth plants—There are a large number of wild growing Kainth trees in the district. These plants are proposed to be top-worked with improved varieties of pear. A target of 60,000 has been kept for this year, but it is doubtful if this would be achieved.

The comparison of achievements made in the previous years and the programme planned for the year 1965-66 on the above items is given in the following table.

	Pre-package year (1962-63)	1st year Package Programme (1963-64)	2nd year Package Programme (1964-65)	3rd year Package Programme (1965-66)
1. Loan distributed/to be distributed(Rupees)	1,50,000	2,88,950	3,50,000	4,00,000
2. Fruit plants distributed/to be distributed(Nos.)	44,252	1,52,000	1,87,000	2,00,000
3. Area brought/to be brought under orchards (acres) .	442	1,520	1,870	2,000
4. Plants top-worked/to be top-worked (Nos.) . .	Nil	29,801	53,000	60,000

III. Vegetable Development

It prepared further expand an area of 30 acres under vegetable at Gutkar, Nagwain, Sundarnagar, Goraru by adopting soil conservation measures and providing lift irrigation facilities and imparting practical training to the growers. Vegetable cultivation will be developed at Bali, Kolahra, Sadhiani and Baldwara in an area of 15 acres. All the vegetable seeds used to be brought from other states before package programme started. Vegetables seed production and distribution are planned at various farms in the district.

Potato Development—An area of 4,000 acres is under potato crop in Mandi district. It is prepared an area of 130 acres will be brought under improved strains by distributing 2,000 mds. of seed. The programme of seed procurement will be intensified and a target of procurement of 4,000 mds. of potato has been fixed. Potato crop has

recently been introduced in valley areas as a cash crop. The area under this crop has increased from 100 acres in 1963-64 to 250 acres in 1964-65. During 1965-66 an area of 500 acres will be brought under this crop.

IV. Plant Protection

The farmers are realising the importance of plant protection measures for the control of white grub, scale late blight of potato and other pests and diseases. The achievements of last three years and the targets for the year 1965-66 for the eradication of pests and diseases are given below.

Operations	Achievements			Targets
	1962-63	1963-64	1964-65	1965-66
1. Seed Treatment against diseases (tons)	190	230	1,239	1,760
2. Area treated/to be treated against pests, diseases and weeds other than Epilachna and late blight (acres)	N.A.	1,770	2,110	2,700
3. Stored grains treated/ to be treated (tons)	115	456	2,000	2,500
4. Epilachna and late blight control (acres)	N.A.	680	1,000	1,500
5. Orchards sprayed/ to be sprayed (acres)	N.A.	2,500	3,600	4,250
6. Field rate control (acres) . .	N.A.	53,000	42,150	70,000

V. Soil Testing

The farmers have now started realising the utility of soil testing services for the judicious use of fertilizers in their fields. 2,763 and 4,800 soil samples were analysed during 1963-64 and 1964-65 by the laboratories in Simla, Sundarnagar and where else.

It has been planned to make soil fertility maps block-wise and work on these lines has already been initiated. This year 6,000 soil samples will be analysed.

VI. Improved Agricultural Implements

The prototype improved hand tools and Agricultural Implements being produced by the local artisans and Nahan Foundry are becoming popular among the farmers. The following programme will be carried out under this scheme.

1. *Training*—A few local artisans will be selected for necessary training in welding, blacksmithy, tin smithy, lathe working etc. for a period of two years. After receiving training will settle in the villages and provide repair facilities to the farmers.

2. *Supply of improved tools and implements*—The farmers were supplied 2,519 hand tools, 251 ploughs and 24 peg tooth harrows during the year 1964-65. In 1965-66 they will be supplied 1,750 sets of improved hand tools consisting of hand cultivator, plain hoe, hand ridger, rake at 50 per cent subsidized rates. They will also be supplied 350 improved implements like furrow, turning plough and peg tooth harrow on similar conditions. The following will be responsible for the implementation of this programme:—

Designation	Responsibility
Research Engineer and Germans.	Training the local artisans and testing the quality of implements manufactured by firms.
District Agricultural Officer	Arranging supplies of hand tools and implements to the blocks.
Agricultural Inspectors/Manure Supervisors.	Collecting demand of implements from their circles and arranging supplies to the farmers.
Gram Sewaks .	Collecting demand of implements of the farmers of their circles and arranging timely supplies.

The Bench Mark and Assessment surveys intend to evaluate the increased production and other agronomic and agro-economic changes which are taking place as a consequence of adopting improved practices.

(*a*) *Crop-cutting experiments*—Based on crop cutting experiments, the yields obtained per acre of major crops in previous years are given in the following table:—

Crop	1962-63	1963-64	1964-65
1. Yield of maize (kgs.) . .	559	868	1,000
2. Yield of Paddy (kgs.) . .	338	697	763
3. Yield of wheat (kgs.) . .	284	336	..

This year too the experiments will be conducted in all blocks and also in three control blocks falling in the adjoining districts of Mahasu and Bilaspur viz. Ghamarwin, Bilaspur and Kunihar.

In all 900 experiments on each of three major crops maize, paddy and wheat will be conducted in the Mandi district and 25 experiments on each crop in each of the control blocks.

(*b*) *Training of Staff*—Every season gram sewaks will be imparted refresher training in conducting crop-cutting experiments.

Designation	Responsibility
Gram Sewaks . . .	Conducting Crop-cutting experiments.
Block Development Officers	To see that all the experiments are conducted successfully in their blocks.
Statistical Investigators .	Checking of 50% experiments at the selection stage and 33% experiments at the harvest stage.
Statistical Assistants .	Checking of 10% experiments at the harvest stage on each crop.
Assistant Agricultural Statistical Officer.	Overall responsibility of the survey.

(*c*) *Agronomic and Agro-economic Survey*—For this purpose the Mandi district is divided into six strata (tehsils as before). Twelve villages will be selected at random in each stratum of Mandi district and 16 villages in each of the control blocks. In each villages 8 cultivators will be selected at random and detailed enquiry will be made about them.

Designation	Responsibility
Statistical Investigators .	To conduct this enquiry in their respective stratum.
Block Development Officers	To see that the Investigators posted under them complete the enquiry in time.
Statistical Assistants .	To check 33% of the Schedules at the spot.

VIII. Mixed Farming and Animal Husbandry

The activities of mixed farming and animal husbandry will be expanded during 1965 and the following targets have been fixed for various items.

(*a*) *Poultry development*—The popularisation of poultry keeping will continue to receive top priority as this is the quickest way to introducing mixed farming on small holdings. The farmers were supplied 6,500 and 8,123 chickens in the ratio of 5 pullets to one cockrel during the year 1963-64 and 1964-65 respectively. They will be encouraged to start such like small poultry units consisting of five pullets and one cockrel by providing them 18,000 chickens and wirenetting at subsidized rates. It will cover 3,000 families.

Two more poultry extension centres at Padhar and Takoli will be established to meet the increasing demand of birds.

The following officers will be responsible for the execution of the scheme.

Designation	Responsibility
Poultry Development Officer	Producing of 18,000 healthy Chicks for supply to the poultry keepers.
District Animal Husbandry Officer S.M.S. (A.H.)	Arranging timely supplies after collecting demands from the blocks.
Extension Officer (A.H.)/ Stock Assistants.	Visiting the poultry units regularly and providing necessary technical guidance to the poultry keepers.
Gram Sewaks . . .	Collecting of demand from farmers and ensuring timely supply.

(*b*) *Cattle Development*—Two more artificial insemination sub Centres each with the existing Artificial Insemination Centres at Bhangrotu, Sarkaghat, Gohar, Jogindarnagar and Karsog will be established. A target of performing 500 inseminations is fixed for the year for each centre and two sub centres.

The programme for castration will continue as usual near about the artificial insemination centres and sub centres.

(*c*) *Dairying*—A dairy scheme to handle 10,000 litres of milk has been sanctioned at a total cost of Rs. 31 lakhs. The dairy plant and allied equipment worth Rs. 17·3 lakhs will be provided as aid by the West German Government. To feed this plant, collection of milk will be started from two additional places during this year and quantity of milk will be raised from 750 litres per day to 1,200 litres per day.

The Dairy Development Officer, alongwith his staff will be responsible for its implementation.

(*d*) *Sheep development*—The progeny of ten males and 18.female lambs of German land Merino flock will be kept for further breeding.

Two sheep breeding centres will be started at Bhangrotu and Takoli by maintaining four German Land Merino rams at each station. It is planned a few to cover four hundred sheep in the adjoining villages of the centre during the breeding season.

Fifty rams of improved breed will be distributed among the farmers for breeding purposes. They were supplied 11, 25 and 40 rams during the years 1962-63, 1963-64 and 1964-65 respectively.

(*e*) *Pig breeding*—It is planned to distribute 50 pairs of pigs at 50 per cent subsidized rates during the year. During the past three years they were supplied nearly 90 pigs.

Subject Matter specialist (Animal Husbandry) will be responsible for this programme.

(*f*) *Food and Fodder*—High yielding nutritious fodders like soyabean, cowpeas and berseem are being introduced in gram sewak circles. Every gram sewak will put in efforts to have at least two acres area under fodder cultivation in his circle in each sowing season. By this way it is calculated that an area of 600 acres will come under fodders.

After wheat, and low lying areas having perennial irrigation facilities such fodders are expected to be grown. A target of fifty acres has been fixed for the year.

The farmers will be persuaded to intercrop maize with soyabean and cowpeas with the second hoeing of maize crop.

With fertilizers spread out grass lands during the rains it is expected to get 2 cuttings from grass.

Interested farmers will be provided fodder seeds and fertilizers on 12½ per cent and 25 per cent subsidized rates.

IX. Soil Conservation and Water Management

A co-ordinated Soil Conservation programme of agriculture and forest lands has been taken up under which the following targets have been fixed for 1965-66.

1. Treatment of Agricultural lands with soil conservation measures (acres) .	1,050
2. Development of hay lands (acres) .	300
3. Development of grazing lands (acres)	900
4. Stream banking by providing check dams and spurs (miles) . . .	30
5. Afforestation on forest lands (acres) .	300
6. Road stabilization by vegetation plantation (miles)	12
7. Installation of lift pumps . .	20

Agricultural Co-operatives

Agricultural co-operatives include the providing of short and medium term loans, supply of agricultural and other production requirements and marketing of agricultural produce. Co-operatives would be increased to 60 per cent and attempts would be made to strengthen their capital base considerably during the coming year. The following targets have been fixed for 1965-66.

S. No.	Item	Target
1	Membership . .	6,000
2	Share-capital . .	Rs. 1·5 lakhs.
3	Working-capital . .	Rs. 4·6 lakhs.

(*a*) *Expansion of credit*—Another important feature of the programme will be the sizeable expansion of rural credit and laying special emphasis on recoveries. During the year, the co-operatives will be providing the following credit to the farmers keeping in view the cost of production and repaying capacity.

(*a*) Short Term Credit . .	Rs. 15 Lakhs
(*b*) Medium Term Credit . .	Rs. 5 Lakhs
	Rs. 20 Lakhs

The planned and organized efforts for recoveries will aim at reducing the percentage of overdues from 19 per cent to 10 per cent by the end of this year.

(*b*) *Marketing, processing and storage*—With the resultant increase in production the programme of marketing of agricultural produce, processing and storage also shall have to be accelerated and expanded. The targets fixed in this behalf are as under—

S. No.	Item	Target
1	*Marketing of*:	
	(*a*) Vegetables . . .	Rs. 20,000
	(*b*) Cereals	Rs. 1,00,000
	(*c*) Potatoes	Rs. 7,00,000
2	*Processing*:	
	(*a*) No. of units to be established	5
	(*b*) Quantity processed . .	40 m. tons
3	*Storage*:	
	(*a*) For marketing societies .	1
	(*b*) For village societies . .	6

(*c*) *Marketing of animal product*—The Co-operatives will be playing increasing role in the collection of milk by handling about 2 lakhs litres of milk of considerable value besides the marketing of eggs during the year 1965-66.

The following table shows the achievements made during the past three years.

	1962-63	1963-64	1964-65
1. Membership . .	17,301	21,840	30,188
2. Per cent of coverage of rural population . .	24	34	46
3. Short and medium term loans advanced (Rs.) .	2,94,771	6,06,047	10,25,790
4. Loans recovered (Rs.)	2,49,922	2,57,919	5,24,166
5. Maize marketed (mds.)	..	650	830/
6. Potato marketed (bags)	..	1,400	3,300
7. Paddy procured (mds.)	..	125	2,619
8. Wheat procured (mds.)	..	313	..

The following will be responsible for the execution of the programme.

Designation	Responsibility
D.C.S.O/Assistant Registrar (Co-operatives).	Ensuring timely supply of co-operative credit for fertilizer, seeds implements and purchase of bullocks and milch cattle to the farmers and organising recovery campaigns.
Co-operative Inspectors & Sub Inspectors.	Fulfilling of formalities for the supply of credit and enrolment of members and affecting recoveries in time.
Gram Sewaks . . .	Persuading the farmers for joining Co-operative societies and helping the co-operative staff in recoveries and completing of formalities of advancing loans.

XI. Agricultural Information

In this age well organised publicity plays a major role in changing the minds of the people. The publicity unit will, therefore, be organising ten exhibitions at the important fairs, in the district, and arranging 144 cinema shows during this year. A monthly bulletin will be published regularly starting from next month. Posters depicting improved agricultural practices will be produced and distributed amongst the farmers. Study tour of 33 farmers from each block to places of agricultural interest will be arranged.

BALH-Valley in Mandi is the biggest Valley in the district and second biggest in Himachal Pradesh.

1. *Topography*—This Valley is in the Middle-hill group at an average altitude of 2,500 ft. above the sea level. Gifted with scenic beauty and moderate climate, it has an area of 22,000 acres of fertile culturable land. The average rain fall is about 63 inches which is well distributed in the year with assured monsoon.

The Valley stretches from Gutker in the North to Sundarnagar in the South and Baggi in East and Galma in the West. The Suketi-Khad the greatest benefactor of the Valley divides the Valley roughly into two halves. The State highway also passes through the middle of the valley connecting Mandi and Simla and the Punjab plains and the rest of the country. The Valley has made big strides in the five year plans and the people have indeed woke-up from their slumber of centuries and the benefits intended through the five year plans have been fully availed of by the inhabitants. The important villages are Bhangrotu, Baggi and Ratti.

2. *Agriculture*—The Agriculture Department has made the greatest impact on the life of the Valley during the last 6 years and it will be in the fitness of things if this change is 9 termed as a *"Revolution in Agricultural field"*. The improved varieties of wheat, paddy, maize, potatoes and sugarcane have been fully adopted by the farmers.

Berseem fodder which was practically unknown about six years age, has been popularised and accepted by the farm people as a boon.

Similarly, in case of sugarcane—the C.O.L. 29 variety of sugarcane has fully saturised the Valley and the aspirations of the people for high yielding variety and early maturing type with quality of drought resistance have been achieved.

System of taking two crops wheat-paddy and wheat-maize has geared up the food production campaign. The farmers have taken up chemical fertilizers and getting the fullest benefits of demonstrations laid by the Agriculture Department in various fields viz *crop-raising*, fruitgrowing, animal breeding, vegetable growing, soil conservation and plant protection.

The outlook of the farmers has been modernised and the Agricultural productivity has almost been doubled during the last 6 years.

There is a big mixed farming demonstration centre at *Bhangrotu* depicting field demonstrations in various fields of agriculture. The workshop at Bhangrotu is the most modern one in the Northern India and the mechanised farming the upto-date one.

In the field of orcharding the nursery at Bhangrotu has delivered the goods and the improved varieties of stone fruits, peaches and plums have been appreciated throughout the country.

The Artificial insemination in cross-breeding of low-yielding hill cows and up grading of buffaloes is going on top speed. The benefits intended by the Veterinary units are being fully appreciated and availed of, by the farm people through the Indo-German Agricultural Package Programme which came into existence in 1962.

3. *Education*—Next to Agriculture the Valley has made striking progress in the field of education. There is a Higher Secondary School at Hotgarh and a High School at Bhangrotu and several middle and primary schools within the easy reach of the villagers. The literacy has gone up from 5 to 50 per cent within the last 10 years.

4. *Medical facilities*—There is a Civil Hospital at Ratti and several Primary Health Centres attached to it. The Malaria which once used to be a greatest menace in the Valley has almost been banished. The family planning and health education have shown the desired progress and changed the outlook of the people.

5. *Electrification*—Most of the villages have been electrified and the electricity for the development of agriculture is being pressed into service.

6. *Transport*—The construction of Suketi Bridge and all weather road between Mandi and Sundernagar has linked the Valley with other parts of the country and Simla and facilitated road transport.

FISHERIES

The district abounds in the natural water resources in the form of rivers, streams, lakes and ponds. The erstwhile Mandi State, in way was the most advanced State in sphere of fishery management among the other hilly states. So much so that Mandi State Fisheries regulation was in force since Samvat 1973 (A.D. 1916). There was a skeleton staff of one Fishery Inspector alongwith one Fishery Sub-Inspector and a team of three Fisheries Watchers to look after its fisheries interest. They were further assisted in their duties by a few fishing Headmen, who were paid 25 per cent of revenue collected in their jurisdictions. The staff was, however, mainly concerned with the conservation works of fisheries in the State. Fishing was allowed only under a license and license fees were imposed keeping in view the richness of the streams. A small hatchery unit for Trout Culture was also maintained at Barot. In the erstwhile Suket State, however, no fisheries regulations were in force and fishing was done on a contract basis.

After formation of Mandi district, a great stride has taken place to put its riverine health and to develop its other resources on firm footing based on scientific outlook. With the application of Fisheries Acts and rules framed under these, the fisheries in the district has shown remarkable progress. The Trout Farm at Barot which was in a most dilapidated condition has since been improved and enlarged to cater the needs of the Anglers in the Uhl and Lambadag rivers, once famous for quality trout. The staff has been strengthened and conservational measures tightened to preserve the fishery wealth in the district. The work on the development of Mirror carp has also been started and results obtained are encouraging.

Riverine Fisheries.

Mandi district with its net work of rivers and streams has vast potentiality for the development of in land fisheries. The riverine system falls broadly under two categories; viz. (*i*) Trout Waters, (*ii*) Other waters.

(*i*) *Trout Waters*—Trout (Salmo fario), an exotic species of game fish, was first introduced in this district from Kulu probably in thirtees. The (*i*) Uhl, (*ii*) Lambadag and (*iii*) Thirthan are the main streams for trout fishing. The streams are about 50 miles length in which trout is available.

(*ii*) *Other Waters*—There are two main rivers viz. river Sutlej and river Beas flowing through the territory of the district. River Sutlej, which runs for about 30 miles of its length course mainly flows through deep waters and narrow gorges except near Dehar, where the bank is quite spread and is broad and set with pebbles, making a good landing ground for Mahsir fishing. River Beas which presents the main fisheries of the district enters the district near Pandoh and leaves at Sandhol running about 60 miles of its length course in the district. The fisheries resources of the river are very rich. The river has a net work of tributaries viz. Thirthan, Bhakhli, Jeuni, Suketi, Uhl, Rana, Soon, Bhovhar and Binuan having 200 miles of water length.

Barbus tor (Mahsir), Labeo diplostomus (Gid), Labeo dyochelous (Kuni) and Oreigus sinuatus (Himalyan Barbel) for the main food fishery and are found in river Sutlej and river Beas and its tributaries. Barbus tor (Mahsir) and Trout (Salmo fario), both known for their sporting qualities form the game fish fauna. Trout is available in Uhl, Lambadag and Thirthan rivers. A trout Hatchery is maintained at Barot on river Uhl to keep the trout waters well stocked with trout.

The following places are well known for Mahsir landing viz. Pandoh, Mandi, Kun-ka-Tar, Sandhol Dehar, Barot, Puin Bridge, Kamand, Bhali Chowki and Mangalor are famous for trout fishing.

Fishing with nets is permitted only under a license which costs from Rs. 4 to Rs. 10 per annum for the waters other than trout depending upon the richness of the waters in the fish resources. There is a separate license for angling which cost Rs. 5 per annum. Trout Angling License, which is issued for trout waters only is for the season commencing from 1st March to 31st October for the fraction period and cost from Rs. 30 for the season to Rs. 10 per day.

Under the rules there is a size restriction on the catching of fish of important species such as Mahsir, Gid, Himalayan Barbel and trout. The use of dynamite, or explosive or poison for killing fish is prohibited. There is also a restriction on the size of mesh of net used which should not be more than 1" from knot to knot and 4" in all. Use of weirs, erection of dam and diversion of water with intention to kill fish is also prohibited.

Fishing is permitted throughout the year except in trout waters, where only angling is allowed from 1st day of March to the last day of October every year. The 1st day of November to last day of February is closed season in the trout waters. The waters specified below have been declared as 'Sanctuaries" and all fishing is prohibited in order to let the fishes propagate their species:—

(*i*) Portion of river Beas which extends for Sikh Gurdwara near Padal to its confluence with Suketi Khad.

(*ii*) Machhiali area in Suketi Khad i.e. part of Khad which is near mile one, furlong 2 on Mandi Bhamla road.

(*iii*) Suketi stream for Suketi Bridge at Mandi to its confluence with the river Beas.

(*iv*) All spring (Chhuroos) from their source for a distance of 300 Kadam down stream, or to their confluence (Domel) with a large river or stream whichever distance is shorter.

(*v*) Rawalsar lake.

(*vi*) The Rana river from its confluence with Mahol Khad to Bhararoo (or Bagh).

(*vii*) A stretch of 4 furlongs of Luni Khad in Jogindarnagar Tehsil starting from village Pati to its confluence with Rana stream (both banks).

(*viii*) Machhial area in Rana stream 100 Kadams upstream and 800 Kadams down stream from the bridge at village Jhalarg in Jogindarnagar Tehsil (both banks).

(*ix*) A stretch of 2 furlongs of Rana stream in Jogindarnagar Tehsil from the confluence of sukkar stream with it to the water flour mill (Gharat) in Rana stream below village Tikkru.

(*x*) Machhial area in Sukkar stream near temple in Jogindarnagar Tehsil (both banks).

There are P.W.D. Rest Houses at Barot, Jatinghiri and Kamand in the district where anglers interested in trout fishing can stay on nominal rent.

Pond Culture—Pond culture has received considerable attention in the district, and already Rawalsar lake, Sar, Niwani Devi, Nagchalla tank and Chamukha tank are the main centres of Mirror carp cultivation. The survey of other impounded waters has been undertaken and it is hoped to bring about 30—40 acres of waters under Mirror carp culture in the near future.

Management of Fisheries—The district for its fisheries management in the sphere of conservation and development of pond fisheries is under the control of Assistant Warden of Fisheries with headquarter at Barot. He is assisted in his field duties by Six Fisheries Watchers posted at places of fisheries importance. The Assistant Warden of Fisheries is empowered to issue licenses and to compound cases of illegal fishing under section 8 of the Punjab Fisheries Act, 1914 within his jurisdiction.

The Management of Trout Farm, Barot vests with the Fisheries Research Assistant with headquarter at Barot. He is assisted in his work by Laboratory Attendant and Trout Keeper and Watcher. He is also entrusted with the work of carrying out elementary research work in the field of trout culture, for which a hatchery unit exists and is being enlarged.

The fishing is mostly done in the district by means of cast nets, long line with hooks and rod and line. There is no organised fishing agencies as such no crafts are used. Fishing gears are old and primitive. The disposal of landed fish is done mainly through a barter system. No Fishermen co-operative Society at present functions in the district.

Socio-Economic—The fishermen are mostly poor belonging to Jeewar community who have other subsidiary income through Agriculture, water mills etc. beside fishing. There are about 370 registered fishermen on the roll of the department. The annual catch per fisherman comes to 7½ maunds valued at Rs. 300 to 375. The cost net fisherman ratio is 1:1. The fisherman is a poor and illiterate person and as such there is an ample need and scope for his education and upliftment.

ANIMAL HUSBANDRY DEPARTMENT

One of the major responsibilities of the Animal Husbandry Department is providing of veterinary aid and control of contagious diseases amongst the livestock. The major achievements made by the Animal Husbandry Department in this district from the time of formation of Himachal Pradesh are enumerated as under :—

(*a*) *Veterinary aid*—It is very essential that there should be adequate facilities for the protective treatment of cattle. Prior to the formation of Himachal Pradesh there were 4 Veterinary hospitals functioning in the district at (*i*) Mandi, (*ii*) Jogindarnagar, (*iii*) Sundarnagar and (*iv*) Sarkaghat. In order to expand these facilities the department opened 6 hospitals and 10 dispensaries more at the places noted below during 1st Plan, 2nd Plan and First 2 years of the third Plan :

1st plan	*2nd Plan*	*3rd Plan (61-62 & 63)*
Hospitals	*Hospitals*	*Hospitals*
1. Karsog	1. Gohar	1. Sandhle
2. Janjeli	2. Bhangrotu	2. Ladbharol
	Dispensaries	*Dispensaries*
	Balichauki	1. Mandi
		2. Nihri
		3. Chhatri
		4. Nagwani
		5. Dehar
		6. Leda
		7. Thachi
		8. Rawalsar
		9. Cheuni

The total number of hospitals and dispensaries functioning in Mandi district is 10 hospitals and 10 dispensaries and by the end of third plan the number is likely to go up to about 26 (12 hospitals and 14 dispensaries).

(*b*) *Poultry Development*—Poultry keeping is an important subsidiary industry of the poorer classes in the rural areas and can be a useful source of income to them. Eggs are valuable food and the population would benefit by adding poultry products in their food. Upto the end of first plan, the Poultry development in Mandi district did not receive any attention. Nevertheless, the department started two poultry extension centres during second five year plan each at (*i*) Mandi and(*ii*) Sundarnagar. The poultry Extension Centre at Sundarnagar has further been upgraded to the status of a Poultry Farm during the first year of third plan by increasing the livestock strength, brooding and hatching arrangements. Besides, one poultry unit has also been attached to Veterinary Hospital, Karsog during 1962-63.

The department also undertakes the work of distribution of improved breeds like white leghorn, Bhode Island Red and Black Minorca to the breeding breeders through block agencies in order to improve the ordinary village hen which is generally undersized and lays only about 50 undersized eggs in a year.

In addition to poultry, the department has also undertaken the work to popularise the duck breeding in Mandi district. Under this programme a duck breeding unit has been started at Rawalsar.

(*c*) *Cattle Development*—The hill cattle in Pradesh is generally non-descript type. In order to improve to the cattle breed, the department established one Cattle Breeding Farm, at Kamand situated at a distance of about 10 kilometres from Mandi town, with the object of evolving a suitable breed of cattle for hill areas and to investigate as to which breed would be most suitable for upgrading work in the hilly areas and to produce stud bucks to meet the requirement of this State. Originally it was proposed to cross-bread the indigenous cattle with jersey but due to non-availability of jersey bull in the initial stages, the work was started with Sindhi bulls and later on during the year, 1959-60 arrangements were made to receive jersey semen from Bangalore and the work of artificial insemination with this air-borne semen was taken in hand. Many difficulties were experienced in receiving air-borne semen from Bangalore, namely the time involved for its collection to insemination was about 48 hours with the result that conception rate with the semen was very low. Then it was decided to discontinue the supply of jersey semen and to procure two jersey bulls for the farm. After much efforts two jersey bulls were imported from Australia at a cost of Rs. 10,500/- during the year 1960-61. In order to meet the lacuna of jersey half bred caused due to non-availability of jersey bulls, the department purchased 17 half bred jersey hill cows/calves and thus one cattle generation has been saved and they are further crossed with pure jersey bulls.

In addition to above, the Government of India (I.C.A.R.) have also established one "Jersey breeding farm" at Kamand during 1961-62 with almost the same objectives for which cattle breeding farm has been established. The livestock consisting of 14 bulls and 40 heifers of jersey bred for the "Jersey breeding farm" has been imported from U.S.A. through the courtesy of "Heifer Project".

(*d*) *Bull Centres* — 15 Bull centres are also functioning in Mandi district where bulls of improved type such as Hariana, Jersey Sindhi, Brown Swiss, Sahiwal and Murrah have been located for covering the cows of the illaqua. These bull centres are serving a very useful purpose. Brown Swiss, Shhiwal and Marrah.

(*e*) *Feed and fodder development*—An important aspect of livestock improvement is the proper feeding and management of the animals. The effect of better breeding can be largely negative if the animals are not properly fed and looked after. Some experts think that feeding alone can bring about an increase of 30 per cent in milk production of cows. The supply of green fodder so necessary for the healthy upkeep of cattle and milk cows, is not only meagre but erratic. In order to improve the supply leguminous fodders such allucerne, berseem, cow peas and other fodder crops of high nutritive value, a feed and fodder development scheme has been started at Kamand with effect from first October, 1959.

(*f*) *Piggery Development*—To popularise the pork the department has started two pig breeding blocks at Kamand where Yorkshire, Large Middle-White breed of pigs are being maintained and multiplied. Besides, Large Russian Whire and Charmukha breed were also obtained from the

Govt. Dairy Farm, Aligarh and are being multiplied at Kamand farm. The profession of pig keeping is very adopted by more and more families. The department also undertakes the work of supplying the pigs to the public through block agencies.

(*g*) *Horse and mule breeding scheme*—Although much work has been done in road development and mechanised transport in this hilly area but still horses and mules are used for goods transport and conveyance. No doubt the hill ponies are quite hardy and have stood the challenge of climate, but still to further improve upon them, one horse, and mule breeding centre has been established at Kamand during 1961-62 where cross breeding work is in progress.

(*h*) *Disease control*—The benefit of improved breeds and better feeding are often obscured by the cattle falling a prey to other diseases, reduce the vitality and working efficiency of the animals considerably. The common animals diseases are Rinderpest, Haemorrhagic septicaemia, Black quarter, Anthrax of povines. Of all the diseases that effect the cattle, Rinderpest is the most fatal disease that is responsible for about 60 per cent of the total mortality. Almost entire cattle population of Mandi district was vaccinated during second five year plan agation Scheme" has also been started with head-quarter at Mandi to study the incidence and sevaity of the above named diseases and to help the field veterinarians in the diagnosis of different diseases by various laboratory tests. A Livestock Research Station has also been established at Mandi during 1961-62.

(*a*) *Cattle Improvement*—Cattle improvement will be intensified by establishing artificial insemination centres where the breeding work will be undertaken by cross breeding the indigenous cattle with German brown and German highlanders breeds of bulls. The herd of German brown and cattle consisting of 8 bulls and 25 pregnant heifers of both German breeds has been received in Mandi from West Germany during the month of December, 1963. The eight bulls will be located at the following centres and with each centre there will be attached two artificial insemination sub-centres :—

1. Jogindarnagar	One bull	German Brown breed.
2. Kataula . .	One bull	Do.
3. Gohar .	One bull	Do
4. Bhangrotu .	Two bulls	One German brown and One German high lander.
5. Sundernagar .	Two bulls	One German high lander.
6. Sarkaghat .	One bull	Do.

The heifers will be located at Bhangrotu and i Cattle Breeding Farm, Kamand to form foundation stock for the further requirement of pure stud bulls of the district.

(*b*) *Composite Milk Scheme*—A composite milk scheme has been sanctioned for the Mandi district by the Government of India and Planning Commission under package Programme. The scheme will help in collecting and marketing surplus milk produced in the rural areas. The scheme will encourage farmers to improve their stock management and feeding practices. A suitable site has also been selected for the erection of dairy plant in Mandi town. The dairy plant and equipment, the estimated cost of which comes to Rs. 17·418 lakhs, would be imported from West Germany free of cost. The survey work for the milk supply scheme is complete. Supply of milk will be arranged from nine areas viz. Bhambla, Galma, Gajnoha, Darang, Kataula, Pandoh, Sundarnagar, Baggi, and Slapper. Daily supply of about 4,000 litres of milk is expected from the above mentioned areas. Besides the supply of milk, arrangements for the conversion of surplus milk into milk products such as ghee, butter and cheese will also be made.

This scheme is expected to start from the commencement of next financial year i.e. 1964-65.

(*c*) *Poultry Development*—The poultry development is considered worth-while as it will improve the economic condition of the farmers without much labour and time. A small poultry unit consisting of 5 pullets and one cockrel will be given to each farmer. For starting these small units the farmers will be given the following attractive incentives :

1. 50% subsidy for the purchase of birds.
2. Subsidy for the purchase of wirenetting.
3. Loan for the purchase of poultry feed and poultry houses.
4. Free treatment and technical help at the door of the farmers.
5. Arrangement of free training at the block headquarters.

The poultry unit will be given to 3,000 farmers every year and it is expected that by the end of four years i.e. 1967-68, one out of every four families in Mandi district will be having a small poultry unit of its own.

Besides, in order to meet the increased requirements of poultry birds of the district and to provide demonstration facilities establishment of two poultry centres in addition to existing poultry centres is under way. The hatching and brooding equipment viz. incubateors six, infared bulbs 15, waterers 15, feeders 15 received from West Germany have been installed at poultry Farm Sundarnagar.

(*d*) *Piggery Development*—The pigs are very prolific breeders and very economical to keep. In order to popularise pig breeding two new pig breeding centres one at Jogindarnagar and other at Karsog are being opened.

(*e*) *Horse and mule breeding*—One Horse and mule breeding centre has been established at Bhangrotu from where breeding facilities are being extended to the farmers.

(*f*) *Sheep Development*—The sheep improvement work will be intensified by providing the sheep breeders with breeding rams. The West German Government have provided a flock of German land merino breed. This flock has been located at Sheep Breeding Farm, Chamba for further multiplication and breeding. In order to supplement the use of rams imported from Germany the rams will also be made available to the breeders in Mandi district through the block agencies.

Cattle Breeding Farm, Kataula, Mandi Sadar

Land worth Rs. 153,000 was acquired at Kataula in Mandi district for starting the Cattle Breeding Farm where cross breeding operations of local cows with Sindhi bulls and Jersey bulls will be conducted. Four Dexter cows and 2 bulls imported from U.K. by Kashmir Government were transferred to this administration together with their progeny.

A sum of Rs. 8·48 lakhs has been provided under the scheme for the Plan period to start a Cattle Breeding Farm at Kataula in Mandi district. The Farm was started during the year 1957-58 with a foundation stock of 153 animals. During, this year, eleven cross-breed calves were born and 14 cows A.I. inseminated with air-borne semen. A sum of Rs. 0·85 lakhs was spent during the year against the budget provision of Rs. 1 lakh.

For evolving a cattle breed suited for hills and at the same time for giving more milk, a Cattle Breeding Scheme is under implementation. Jersey and Red Sindhi bulls are being imported and kept in the Cattle Breeding Farm, Kataula which was set up in 1957-58. Besides providing cross breeding facilities, the farm also supplies milk for the Mandi town. In all, milk and milk-products worth Rs. 4,700 were sold during the year under review. As import of Jersey bulls could not be undertaken due to foreign exchange stringencies, artificial insemination was undertaken with air-borne Jersey semen from Bangalore.

Two Jersey bulls were imported from Australia and placed at the Kataula cattle farm. During the year, the scheme of artificial insemination with air-borne semen was abandoned as it did not yield adequate results. Eighteen half-bred Jersey heifers were purchased for demonstrating their body conformation, milk yield and age of maturity.

PANCHAYATS

Before the merger of the princely states in Mandi and Suket, there were 33 Panchayats were functioning under the Punjab Panchayat Act. The members of the Panchayats were nominated by the Government. Each Panchayat contained 3 to 5 members. The members were not free to express their opinions. They were agents of the Government. They were given certain judicial powers to settle petty disputes of the people.

These Panchayats ceased to function in 1954 when the Himachal Pradesh Panchayat Raj Act, 1952 (Act No. 6 of 1953) came in force. Under this Act, the principle of election to Gram Panchayats on adults sufferage consisting of all adults ordinarily residing within its jurisdiction was accepted. Special feature of the system of election was the reservation of seats for women and Scheduled Castes. In 1954, 116 Gram Panchayats, 20 Nyaya Panchayats, 6 Tehsils and 1 Zila Panchayat were formed. Due to reorganisation of Gram Sabha circles, the number of Gram and Nayaya Panchayats increased to 146 and 144 respectively. The Zila Panchayat ceased to function in 1957 on the formation of the Himachal Pradesh Territorial Council.

Gram Panchayats—A Gram Panchayat is constituted for every Gram Sabha which consists of entire adult population of the area. Each Gram Sabha elects from amongst its members an executive body called Gram Panchayat. The number of the Gram Panchayat varies from 7 to 15 according to its population with reservation for Scheduled Castes

and women upto 20 per cent of the total members. Gram Sabha exercises full control over the Gram Panchayat. The Gram Sabha passes the budget of the Gram Panchayat, imposes the taxes in its area with the approval of the Government, reviews the progress and the expenditure of the Gram Panchayat and has power to remove any office bearer of the Gram Panchayat. Gram Sabha is a body corporate having perpetual succession, whereas the Gram Panchayat is elected only for three years to carry out different functions assigned to it under sections 16 and 17 of the H.P. Panchayat Raj Act. The Gram Panchayat has varied functions such as construction, repair and maintenance of village paths, sanitation, registration of births, deaths and marriages, regulation of Melas and markets, establishment and management of grazing grounds, construction, repair and maintenance of public wells, tanks and bathing purposes and regulation of sources of water supply for drinking purposes, assisting the development of agriculture, commerce and industry. The Gram Panchayat can also represent to the Government for the welfare of the persons residing within its jurisdiction, recommend for the grant of trees and nautor lands. It can also recommend the appointment, transfer or dismissal of a guard of Forest Department, Patwari, Lambardar or Chowkidar serving in its area. The Gram Panchayat is also acting as the executing agency of all the programmes of the Community Development.

Gram Panchayat is empowered to entertain small suits upto the value of Rs. 100·00 and certain criminal cases, compoundable without the permission of the court for making compromises. These compromises are effected by Samjhautta Samiti consisting of 3 to 5 members constituted by the Gram Panchayat out of its members.

Tehsil Panchayats—A Tehsil Panchayat is established for each tehsil or sub-tehsil. At present there are 6 tehsil panchayats in this district. The Tehsil Panchayats were constituted for the first time in 1955 and then in 1958 for a term of 3 years in each case. A Tehsil Panchayat consists of 10 to 40 members as detailed below—

1. Members appointed by the State Government either by name or by official designation,
2. Elected members one member being returned by each Gram Panchayat Municipal Committee and Notified Area Committee of the Tehsil.

Nyaya Panchayats—A Nyaya Pachayat for every Gram Panchayat has generally been constituted consisting of 15 panches. At present 144 Nyaya Panchayats are functioning in this district. The Nyaya Panchayats are vested with criminal, civil and revenue powers. They can entertain civil suits upto the value of Rs. 100·00 and revenue proceedings in respect of defining the limits of the holdings, fields or estates and restoration of possession of land to the lawful occupant are also referred to them. Criminal cases under sections 160, 172, 174, 178, 228, 264, to 267, 277, 279, 263, 285, 286, 288, 289, 290, 294, 323, 334, 336, 341, 352, 354, 358, 403, 406, 411, 417, 426, 429, 497, 498, 504, 506, 509 and 510 P.C. are cognizable by the Nyaya Panchayats. Besides these certain offences under the cattle tresspass Act, vaccination Act, and the Prevention of cruelty to Animals Act are also heard by the Nyaya Panchayats. They also hear cases under sections 488 Cr. P.C. The Nyaya Panchayats are empowered to impose a fine upto Rs. 100·00, but cannot inflict a sentence of imprisonment either substantive or in default of payment of fine. The Nyaya Panchayats are vested with powers to demand security from any person if he is likely to commit a breach of peace or disturb public tranquility in the area.

Financial Resources—The financial resources of the Panchayats are very limited. Though the Panchayats are empowered to levy taxes, they are rather reluctant to do so in view of the unsound economic condition of the masses. The Gram Panchayats in the district have imposed the following taxes—

Tax	No. of Panchayats which have imposed the tax
1. House tax	14
2. Entertainment, birth and marriage tax	15
3. Tax on transfer of immovable property	13
4. Construction of building	7

Grant given by the Government is the main source of income which is to be utilized for the payment of pay to secretary, chowkidar, purchase of tools, organisation of training camps and Samelans. The Panchayats get grant in lieu of local rate, fees, fines and forfeiture amounting to Rs. 83,000·00 annually for all Panchayats and approximately Rs. 600 per Panchayat.

During the First Five Year Plan the Panchayats in the district completed the work of the value of Rs. 61,630·00. During the Second Five Year Plan people contributed Rs. 113,459·00 and completed the development works worth Rs. 245,219·00.

LOCAL BODIES

At present there are three urban areas in Mandi district of which two have Municipal Committees and the remaining town namely Jogindarnagar has no managing committee but possesses the characteristics of an urban area. The Municipal Committee Mandi was formed in 1881 and Sundarnagar in 1931.

These bodies are governed by the Municipal Act, 1911 as applied to Himachal Pradesh and the Small Towns Act, 1921 as extended to this Pradesh.

The size and population of each town according to 1961 census—

Name of Town	Status	Area in Sq.miles	Population		
			Persons	Males	Females
1	2	3	4	5	6
1. Mandi .	M.C.	4·00	13,034	7,321	5,713
2. Sundarnagar	M.C.	4·47	5,782	3,039	2,743
3. Jogindarnagar .	..	0·99	2,719	1,568	1,151

Election to local bodies are held on the basis of adult franchise and one seat in each local body is reserved for Scheduled Caste candidate. During 1958-59 elections were held at Mandi and Sundarnagar.

Under section 61 of the Punjab Municipal Act, 1911 as applied to Himachal Pradesh a Municipal Committee can impose these taxes—

(*a*) Professional tax

(*b*) A tax on building and land

(*c*) Tax on vehicles

(*d*) Sanitation tax

(*e*) Octroi tax

The other source of their income are:—

(1) Rent from Municipal property

(2) Composition fees

(3) Fee from Municipal licences

(4) Sale proceeds of manure and city sweepings

Besides the above, the Government sanctions grants for the various developments works to the local bodies. During the 2nd Five Year Plan a sum of Rs. 159,500 was allotted to M.C. Mandi and Rs. 62,000 to Small Town Committee Sundarnagar which is now Municipal Committee.

The main functions of the local bodies are—

(*a*) Construction of roads and pavements of street

(*b*) Construction of latrines and urinals

(*c*) Construction of shelter huts

(*d*) Installation of street light

(*e*) Construction of Municipal rest house, children parks and reading rooms.

Municipal Committee Mandi—This is one of the oldest local bodies in the Pradesh. It was formed in 1881. In the past it was one of the departments of the state and was governed by the Mandi State Municipal Act. Since its merger in Himachal Pradesh it is being governed by the Punjab Municipal Act, 1911 as applied to Himachal Pradesh.

This is a 2rd class Municipality consisting of a elected members and 3 nominated. The committee has the power to sanction any project upto the extent of Rs. 10,000/. Three sub-committees have been constituted to carry out the different functions which are—

(*a*) Finance and Octroi,

(*b*) Public Health and Education,

(*c*) Works and Building.

These sub-committees enjoy financial powers for any single work upto Rs. 200 only. Its annual income and expenditure during the last five years was—

Year	Income	Expenditure
1956	132,475	126,683
1957	161,009	126,619
1958	152,892	164,063
1959	227,082	188,547
1960	469,881	204,505

Mandi Town—According to the late Rahul Sanskrityana, this town was founded in the eleventh century. He quotes some edicts to support his claim. However, professor Man Mohan in his book 'A History of Mandi State' States it was founded, by Raja Ajbar Sen in about 1526 A.D. Vogel and

Hutchison interpreted the word Mandi as 'Market' and connected it with Ladakh trade, which passes on to Hoshiarpur through Mandi. Another belief is that the town was named after a Rishi (saint) Mandvya. He is reported to have performed Tapasya on a rock called 'Koleera' which is on the bank of river Beas below Shri Guru Gobind Singh Gurdwara near Padal. This attractive town lies by the banks of river Beas. Previously this was the capital of Mandi State. Now this is the headquarters of the district.

About this town F. St. J. Gore who visited Mandi town in about 1895 has described this town in his book 'Light and Shades of Indian Hill Life'. "Mandi is a wonderfully pretty little town, built just where the Suketi river joins the Beas in a deep gree pool. A fine iron suspension bridge (the Raja's 'Victoria Jubilee' offering) going the banks of the Beas, while a row of pointed-roofed Hindu temple with steep broad flights of steps down to the river, adds to the picturesque appearance of the place as you come in from the north. When this bridge was being built by Captain Hoskyns R.E., who was lent to the Raja for the purpose, it caused a great sensation in the neighbourhood, the natives declaring that it would be impossible to build a bridge from bank to bank. After some little delay, however, a couple of light wire ropes were stretched across, high above the river, from which a few single planks were slung, in order to facilitate the passing across of the suspension cables which were to form the bridge. Captain Hoskyns, having to absent himself for a few days just at this time, returned to find the hillmen making full use of this light and airy structure, imagining that the Sahib's work was done; their only complaint to him being that they could not get their sheep to across it".

This town used to be the capital of the Mandi State. Now it is the District head-quarter of Mandi District and Tehsil and is situated on the banks of river Beas. The town has a population of 13,034. During the decades 1901-11, 1911-21 and 1941-51 there was a fall of 3·05 per cent, 12·99 per cent and 1·31 per cent in the population of Mandi. A substantial increase of 46·30 per cent was recorded during the decade 1951-61. The town has a degree college since 1948, while the Silver Jubillee Technical Institute was opened in 1938. Higher Secondary Schools for boys and girls are also located. The Block Development Office is also located in this town. The District Library was opened in 1959. A Civil Hospital is in existence since 1928. Besides three Gun Factories (Vir Sing & Co., employing 17 workers, the Cousins employing 35 workers, and Hesbee and Co., employing 36 workers) are located here. A Government Weaving Centre is in existence since 1944. Other such centres are Government Design and Demonsetration Centre, Government Common Facility-cum-Tanning Training Centre, Common Facility-cum-Production Centre for Blankets and Tweeds, at Sales Depot or Emporium and a Crafts Institute for girls, have been started in this town. Silver and goldsmithy are other crafts of Mandi.

The town is a seasonal market of fruits like apricots, peaches, walnuts, apples and plums and of seed potato, pottery, wooden goods and jewellery. Branches of State Bank of India, Himachal Pradesh State Co-operative Bank and Punjab National Bank exist in the town.

A study of houses as revealed by the 'housing census' may be useful. In Mandi town there are 3,999 census houses out of which 2,304 are dwellings, 388 are shops excluding eating houses, and 76 are shop-cum-dwellings and 149 factories, workshops and worksheds. 61 per cent of all the households live in owned houses while remaining 39 per cent live in rented houses. Most of the houses have stone as the wall material whereas the most popular roof material is slate, claiming its use in 83 per cent of residential houses. Classifying the census, households according to number of rooms occupied it is observed that out of 1,000 sample census households 278 have 1 room each while 253 have 2 rooms each. Households with 5 rooms and more are 206 and those with 3 rooms and 4 rooms respectively are 168 and 95.

Thousands of people throng the town during Shivratri fair held annually for eight to ten days. It is believed that the fair was first held during the first quarter of sixteenth century, when Raja Ajbar Sen, the then ruler of Mandi State, shifted his capital from the right bank of river Beas to the left bank.

Sundarnagar Town—This town of 5,782 souls which was Capital of the erstwhile princely state of Suket, is the Tehsil headquarter of Sundarnagar Tehsil and has a Municipal Committee. Sundarnagar was declassified in the 1911 Census while it recorded decrease of 5·99 per cent. and 28·15 per cent decrease in population during the decades 1921-31 and 1931-41, respectively. However, in the following decade *i.e.*, 1941-51 an anbormal increase of 204·75 per cent was recorded.

There is a Civil Hospital in the town since pre-merger days, Higher Secondary Schools for boys and girls are located in Sundarnager. A polytechnic Institution was opened here in 1959. There is a Block Development Officer's Office, Production of woollen articles, leather goods, and silver and gold ornaments is carrried out on a small scale. Among Government Training-mcu-Production Centres of the Industries Department, there are the Government Leather Centre, Government Tanning Centre, Government Pashmina and Shawls Making Centre, Government Tailoring Centre, Government Common Facility-cum-Tanning Training Centre, Government Footwear Centre and Cluster type of training centres in Sundarnagar.

Nalwari fair is held at Sundarnagar from the 9th of Chaitra Vikrami to the 17th of Chaitra Vikrami (In the month of March). It is the biggest fair of its kind in these areas and thousands of heads of cattle worth lakhs of rupees are traded. There are other fairs and festivals throughout the year.

According to housing census there are 2,121 census houses in this town out of which 891 have been classified as dwellings, 212 workshop-cum-dwellings and 81 factories workshops and worksheds. Shop-cum-dwellings and shops claim 72 and 39 census houses respectively. The class of 'others' has 432 houses which are overwhelmingly the cattle sheds. A study based on 20 per cent of the sample census households reveals that 80 per cent of the sample households occupy owned houses while 20 per cent occupy rented ones. 94 per cent of the sample census households reside in census houses having stone as the predominent wall material while slate is the most popular roof material claiming as many as 74 per cent of such houses, grass, leaves, reeds, thatch wood or bamboo being next with 17 per cent. Out of 1,000 sample census households 323 reside in houses having 2 rooms each while 217 live in those having 1 room each. Households with 3, 4, and 5 rooms and more each are 106, 179 and 175 out of 1,000 sample census households.

People from far and near visit the holy temple of 'Mahamaya' which is the main shrine of this town. Other shrines are Surya Narain Temple Sukh Dev Batika Temple and Narsingh Temple.

Jogindarnagar Town—Jogindarnagar town came into existence after the name of His Highness Maharaja Joginder Sen Bahadur after the start of Barot Hydro Electric Scheme by the Punjab Government in 1924.

The Municipal limits of the present town consist of former 'Sakrauti' village or a very small township (now the main marketing area over the Railway Station on Mandi Pathankot Road) and Shanan village where the Hydro Colony and power House exists. It is growing town now and it will be much larger by the completion of the second stage, which is in progress, of former Hydro Electric Scheme completed in 1930.

With a population of 2,719 this is the smallest town in Mandi District, and is Tehsil Headquarter of Jogindarnagar Tehsil. Jogindarnagar is a railway terminus on the Pathankot-Jogindarnagar narrow gauge railway. This line was extended to Jogindarnagar from Baijnath in the neighbouring Kangra District of Punjab in 1929. It was first considered a town in the 1931 census, and recorded a decrease in population of the order of 53·9 per cent and 27·17 per cent in the following two decades, while during the decade 1951-61 an increase of 35·81 per cent was shown. There is a Civil Hospital since pre-merger days. A Higher Secondary School for boys and girls are located here. Himachal Government Ayurvedic Pharmacy (Medicine Manufactures) is also located in this town. Utensil making, jewellery and shoe making are the crafts practised on a very small scale in Jogindarnagar. A branch of the Himachal Pradesh State Co-operative Bank is located in this town. There is a big high Hydro-Electric power house constructed during 1926-1931.

A study of houses have been made on the bases of housing census, according to which there are 1,045 census houses in Jogindarnagar. Out of these 515 are dwellings. There are 65 shop-cum-dwellings and 38 shops excluding eating houses. 'Others' type of houses are 196 and these are mostly cattle sheds. 39 per cent of the 20 per cent sample households live in owned houses while 61 per cent. live in rented ones. 85 per cent of the sample households live in census houses having slate as the roof predominent material while 81 per cent have stone as the predominent material of wall. Out of 1,000 sample census households 358 have two rooms each while 350 have one room each. There are 139 households having 3 rooms each while those having four rooms and five rooms and more respectively, are 51 and 102, out of 1,000.

Two temples of Sanatan Dharam Sabha and Arya Samaj and a Gurudwara are located here.

CO-OPERATIVE MOVEMENT

1. *Origin of the Movement*—The Co-operative Movement in this district originated in the middle of first half of the 20th century when Mandi was a princely State. In the year 1929, 2 thrift and credit societies were organized in Mandi State. Prior to the amalgmation of 2 States of Mandi and Suket, there were also 4-co-operatives societies functioning in Suket State. There was no separate set up for administration and supervision of co-operatives during the State requires and no statistical data is, therefore, available. No targets were then fixed. From the record, it is revealed that the membership, share capital and working capital of these societies were 129, Rs. 902 and Rs. 3,659. In fact, there was no co-operative movement with the name in the State regime. It was only after the formation of Himachal Pradesh that organized efforts were made to develop co-operative movement in the District. For this purpose, separate staff was appointed. At the end of June, 1948, there were only 10 societies in the District with a membership of 1,088. In the year 1949, in order to meet financial needs of the co-operative societies functioning in the District, Mandi District Central Co-operative Bank was organized. This bank was later on, sometimes in the year 1954, merged with Apex Bank.

The scheme for the organization of new co-operative societies and reorganization of the existing co-operative societies was started during the same year.

2. *First Five Year Plan*—During the First Five Year Plan, efforts were made to strengthen the movement. For this purpose subsidies amounting Rs. 1·71 lakhs were granted, for various purposes to the co-operative societies of the District. The number of societies at the end of First Plan stood at 157, with a membership, share capital and working capital of 7,115 (7,087 individuals and 28 societies), Rs. 2.36 lakhs and Rs. 8·06 lakhs respectively as against 68 societies having membership at 2,460, share capital at Rs. 1.87 lakhs and working (2,430 individuals 30 societies) capital at Rs. 3·66 lakhs as on 30-6-52.

3. *Achievements during the Second Plan*—Statement given here indicates the schemes of Co-operative Development implemented and expenditure incurred in the district during the Second Five Year Plan.

Sl. No.	Name of the Scheme	Achievements made	
		Phy.	Fin. (in lakhs).
1.	Staff subsidies to marketing societies	3	0·11
2.	Subsidy to credit societies . .	6	0·08
3.	Loans and subsidies for construction of godowns	11	1·80
4.	Subsidy for purchase of trucks .	1	0·09
5.	Share capital contribution in marketing societies . . .	3	0·50
6.	Share capital contribution in credit societies	3	0·15
7.	Revitalisation of small-sized societies	80	0·30
8.	Organization of service societies .	40	0·17
9.	Subsidy for hiring of godowns .	3	0·01
	Total .		3·21

4. *Programme for the Third Five Year Plan*—During the Third Five Year Plan, the following schemes have been proposed to be implemented in Mandi District.

Sl. No.	Name of the Scheme	Plan outlay	
		Phy.	Fin.
1	Staff subsidy to village societies organized/reorganized during Second Plan	120	0·510
2	Organization of new societies .	25	0·17
3	Share capital contribution to village societies	25	1·25
4	Co-operative Farming . .	2	0·240
5	Rural Godowns . . .	16	1·600
6	*Marketing*:		
	(*a*) Share capital contribution to marketing societies .	1	0·050
	(*b*) Managerial subsidy .	4	0·040
	(*c*) Godown for marketing societies	1	0·200
	Total .		4·060

Each of the above schemes is discussed below—

1. *Village Societies Organized/re-organized*—During the Second Plan, 120 village societies were organized and revitalised in this District. A sum of Rs. 0·51 lakh has been proposed to be given to these societies as managerial subsidy on tapering scale, being spill over expenditure of Second Plan.

2. *Organization of new societies*—During the Plan period, 25 new service co-operative societies are proposed to be organized. A sum of Rs. 0·17 lakhs is proposed to be given as managerial subsidy on a sliding scale to these new societies over a period of five years.

3. *Share capital contribution to village societies*—The primary village societies form the foundation to the co-operative Movement. To strengthen the capital structure of these societies and to enable them to borrow larger amount of loans from the financing institutions in order to meet their evergrowing credit needs, share capital contributions from the Government side to the tune of Rs. 1·26 lakh have been proposed to be made in the share capital of 25 primary agricultural credit societies.

4. *Co-operative Farming*—Two farming societies have been proposed to be organized in this District. Assistance as under has been proposed to be given to each farming society—

	Rs.
(*i*) Managerial subsidy for a period of three years in the sliding scale as under:— . . .	1,200
1st year. 500/-	
2nd year. 400/-	
3rd year. 300/-	
(*ii*) Loans and subsidies for the construction of store-cum-cattleshed (Loan 75% subsidy 25%)	5,000
(*iii*) Government share capital contribution .	2,000
(*iv*) Medium and long term loan . . .	4,000

5. *Rural Godowns*—It is proposed to provide storage facilities to the members of the co-operative societies. For this purpose, assistance for the construction of sixteen godowns of the estimated cost of Rs. 10,000 each (out of which Rs. 7,500 will be as loan and Rs. 2,500 as subsidy) has been proposed to be given to the village level co-operative societies during the plan period.

6. *Marketing—Share capital contribution of Marketing Societies*—In this district, five Tehsil Co-operative unions are functioning. Out of these five Unions, share contributions to the tune of Rs. 30,000 was made in two Unions during the Second Plan and it is further proposed to participate in the share capital of another Union to the extent of Rs. 5,000 during the Third Plan. This assistance will strengthen the capital structure of the Union and provide larger opportunities for undertaking marketing operations in the area.

Managerial subsidy to Marketing Societies—In order to enable the above mentioned Union to engage the services of efficient and trained staff, it is proposed to grant managerial subsidy to the tune of Rs. 3,000 in the following scale—

1st year—1,500.
2nd year—1,000
3rd year—500.

In addition to this, a sum of Rs. 0·01 lakh has been provided to be given to three marketing societies, being spill over expenditure of the Second Plan.

Godown for Marketing Societies—During the Plan period, assistance for the construction of one godown costing Rs. 20,000 is proposed to be given to a marketing society of this District. This assistance as usual will include 75 per cent as loan and 25 per cent as subsidy.

In addition to above schemes, two peripatetic units are functioning in Mandi District for the training of office-bearers, members of the managing committee, members and prospective members of the Co-operaive Societies under the non-official education scheme.

Achievements made during the year 1961-62 and programme for 1962-63—

The statement below indicates the targets achieved during the year 1961-62 and programme for 1962-63 in this district.

Sl. No.	Name of the scheme	1961-62 Targets fixed Phy.	Fin.	Target achieved Phy.	Fin.	Programme for 1962-63 in progress Phy.	Fin.
1	Village societies organized/reorganized during second Plan . .	120	0·255	120	0·255	..	0·127
2	Organization of new societies . .	5	0·015	5	0·015	5	0·030
3	Share capital contribution to village societies . .	5	0·250	3	0·150	10	0·300
4	Co-operative Farming	1	0·115	1	0·115	..	0·004
5	Rural Godowns .	3	0·300	3	0·300	5	0·500
6	Share capital contributions in marketing societies .	1	0·050	1	0·050	..	..
7	Managerial subsidy to marketing society . .	4	0·032	4	0·032	1	0·010
8	Godowns for marketing societies .	1	0·200	1	0·200	..	..
	Total .		1·217		1·117		0·971

The progress of the movement during the past three years is indicated by the figures stated below:—

Year	No. of Societies	Membership	Share capital (in lakhs)
			Rs.
1959-60 . . .	218	17,606	5·81
1960-61 . . .	233	18,743	6·21
1961-60 . . .	245	20,021	7·47

The kinds of societies functioning in the district as on 30-6-1962 are:—

Sl. No.	Kind of Societies	Number as on 30-6-62
1	District Marketing & Supply Federation	1
2	Tehsil Unions	5
3	Agricultural Credit Societies . .	185
4	Non-Agricultural Credit Societies . .	16
5	Industrial Societies	23
6	Joint Farming	1
7	Consumer's Stores	1
8	Others	13
	Total .	245

In addition to these societies, there are 4 branches of the Himachal Pradesh State Co-operative Bank Ltd., functioning at Mandi, Jogindarnagar, Sundarnagar and Sarkaghat in Mandi District.

BANKING AND COMMERCE

In the past Sahukars and village Banias used to advance loans to the persons who stand in need of it. Relatives and Arhties also contributed their due shares to assist the agriculturists and the crafts men. The credit facilities available now are—

1. Commercial Banks.
2. Commission Agents.
3. Co-operative Credit Societies.
4. Government.
5. Professional money lenders.
6. Relatives.
7. Villages Banias.

A branch of the Punjab National Bank, Ltd. was opened at Mandi on 24th May, 1944, and the State Bank of India on 17th December, 1956. The Himachal Pradesh State Co-operative Bank, Limited, Mandi was opned on 2nd December, 1954 by integration of the Mandi Central Co-operative Bank. Its one branch was started at Jogindarnagar on 26th November, 1955 and another at Sundarnagar on 15th July, 1959. These, afford credit to the co-operative societies which further advance loans to the individual members. The bank charges interest at the rate of 6% from its member co-operative societies which bocome eligible for loans by purchasing at least one share of the value of Rs. 100·00. Besides Government advances Taccavi loans to the rural public for purchase of bullocks improved seeds, fertilisers, horticulture, construction of house and buying orchards.

The Co-operative Societies play an important role in the sphere of rural credit and marketing as well. The co-operative federation handles consumers goods worth lakhs of rupees every year.

There is at least one small market at the headquarters of each tehsil. The main markets are at Aut, Dehar, Jogindarnagar, Gohar, Karsog, Mandi, Pandoh, Rawalsar, Sarkaghat, Sundarnagar.

The functionaries in these markets deal in small groups consisting of collectors, wholesellers, retailers and commission agents. They also finance the cultivators for raising the crop and advance money against the standing crop. The commission agents mainly act as financiers of trade.

The articles of exports are potato, timber, ginger, walnuts, and medicinal herbs. Major imports consist of fabrics, sugar, salt, tea, foodgrains, consumer goods, cigarettes, domestic utensils, kerosene, coal, cement, iron and steel.

In the interior there are small shops at least one shop in one big village. The shopkeeper stocks every variety of goods with due regard to the consumers taste and requirements. The barter system prevails in some places.

A list of important markets alongwith their business has been given at table 18·2 of part III.

INDUSTRY

The most effective measure for the economic emancipation of the agriculturists would have been the organisation and setting up of large-scale industries which could divert a substantial proportion of the population from agriculture to industry. But owing to the conditions peculiar to the district chances for starting large scale industries in the near future are very dim. Though the district rich in forest, mineral, animal and horticultural resources, and has great potentialities in the shape of raw material for the establishment of cottage and small scale industries. These industries go a long way to supplement the income of many, besides being ancillaries to large scale industires. Such development would envisage the extension of work opportunities, raising of incomes and thereby the standard of living of the people and to bring about a more balanced and integrated rural economy. A start was given to this programme during the First Five Year Plan with the objects of:—

1. Utilising the raw materials available locally;
2. Providing employment and thereby improving economic condition of the people, especially in the rural areas; and
3. Increasing the production potential for meeting the basic needs of the people.

According to the Census 1961 the important household industries alongwith units returned in the district are:—

	Household Industry	Units
1.	Blacksmithy	895
2.	Basketry	451
3.	Carpentry	617
4.	Earthenware	384
5.	Flour grinding	5,915
6.	Goldsmithy	171
7.	Oil ginning	146
8.	Shoemaking	1,249
9.	Tailoring	944
10.	Weaving	831

Blacksmithy : The Lohars are important village artisans who, more or less, are indispensable. Lohar community of the villages is engaged in the housheold industries of making agricultural implements, certain minor utensils, ornaments and tools. They carry out repairs and amend old implements for which payment is made in kind. Almost a Lohar has fixed perquisites depending upon the number of ploughs and bighas of land held by the household concerned. On festivals and marriages he is served with free meals. There is an elaborate workshop and the furnace is fixed in one corner outside the house. The blacksmiths of villages Pipli, Hukkal, Tathan, Kot, Richhi, Patta, Sadhot and Dhagwani in Sarkaghat tehsil, Bagshad, Khanora., Janot, Nalu, Bara and Paroli in Karsog are known for their art.

Basketry : Bamboo utensils is a necessity for the agriculturists. The articles prepared out of bamboo are required by the villagers for their day-to-day use. Men carry agricultural produce, vegetable, pots full of water and cow-dung in Kiltas while women use small and big size baskets. Utensils of bamboo are helpful for storing grains and flour and distributing cooked things at the time of festivals. The Barars, Bhanjaras, Dumnas, Kilis, and Rehars are engaged in basketry but this is their subsidiary occupation. For raw materials they depend on the forest produce like bamboo and grass reeds. The craftsmen are paid at the time of harvest. Basketry work is done in the villages Behair, Dhar, Dhalwan, Kotah, Dalera, Chatraun Sudhot, Bhaln, Bararta and Kot in Sarkaghat, Luharli, Khamrala, Makri, Kathesh, Rehli, Sajh and Kalotha in Karsog, Maloh, Jai Devi and Dehar in Sundarnagar tehsil. Under the Scheme of imparting training to artisans and reviving this old art and giving new touch, a Basketware Training Centre, at Sajau Piplu has been established. According to a sanctioned strength this centre enrolls ten apprentices for a complete course of one year. For the first four months each trainee is paid a stipend of Rs. 30 per month. In the next four months stipend is reduced to Rs. 20 P.M. plus wages calculated on the basis of daily output. In the last four months the stipend is further reduced to Rs. 15 P.M. plus wages.

Carpentry : Carpenters prepare agriculture imlements. Industries department started a wood working centre at Mandi. For a full course of one year each trainee gets a stipend of Rs. 30 per month for the first four months. In the next four months this stipend is reduced to Rs. 20 per month plus wages worked out on daily output. In the last four months the stipend is further reduced to Rs. 15 per month plus wages.

Under the programme of rural arts and crafts in the Community Development Blocks, trainees are provided improved tools and implements on 50% subsidised rates from the block funds.

The aim of the Training Centre is to impart training and to afford common facilities to the local artisans.

Leather Work : The cobblers carry out their common hereditary profession. Though their profession offers better prospectus yet they work as agriculturists on tiny un-economic holdings. They prepare and repair shoes to meet the demand of local zamindars in return of their customary wages in kind at the time of harvest. Shoe makers in the urban areas are fully occupied throughout the year. Attractive leather goods are produced in the villages Jai Devi, Chambi, Dehar and Ghaganu in Sundarnagar tehsil, Alsindi, Kot, Tattapani, Tuali, Tipra and Shil in Karsog tehsil.

Tanning is carried on by the local shoe makers as a part time occupation. The leather tanned by them is mostly used for their own use. Leather tanning industry has not been developed on proper lines. Old and out dated methods are still in use. The known methods of flayings, salting and tanning are crude. Now the Government has established Tanning Centres at Ganai, Karsog and Sandhol. One Leather Training Centre is functioning at Panarsa. Some typical and attractive shoes are made at Sundarnagar.

Pottery : Pottery relics are often the only evidence of a by gone civilisations. The potter fulfills the daily needs of village folk. All goods are prepared from clay and a type of special clay is generally prepared. Sometimes the products are baked that gives a sort of blackish touch. Goods in clay contain water, pickles, foodgrains, oil, milk and ghee. These utensils are common features of every rural household, Chilam made of clay for smoking is very popular. Once a while the potters prepared Khaprails. These are house tiles used for roofing. The Kunihars are found in Darkhari, Jamnaun, Nobhai, Narola, Seo, Sidhpure, Takere and Tarambla in Sarkaghat tehsil, Khabal in Jogindarnagar, Bhanthal, Delog, Kao and Togra in Karsog, Dehar, Maloh and Salapar in Sundarnagar.

Pulla Making : Pullas are a sort of shoes made o sunn. The material is available in Karsog, Chichot[f] and Jogindarnagar tehsil. In the past these were used by a large number of people and sold at Tattapani, Seoni and Simla. These are put on in the Kitchen and religious occasions. Pullas are made particularly in Bara, Bhaka, Chirag, Limrah, Nihri and Taturi in Karsog, Baela, Jarol, Keolinal, Kuthah, Kataru and Majakhali in Chi hot.

Tailoring Centre : The main object of opening Tailoring Centres is to impart free training of sewing and cutting to the desirous candidates. One year course of tailoring has been introduced. Under the Pilot Project Areas Schemes Government Tailoring Centres have been opened at Sundarnagar, Karsog and Sajau Peplu.

Weaving : Weaving is practised since time immemorial to cater to the local needs. Different varieties of woollen articles such as pattus, pattis, blankets, tweeds, shawls and mufflers are produced in the district. The productivity of the workers is low because they work on pit-looms with throw shuttles. Government has distributed some looms among villagers. Weaving Training Centres have been opened at Mandi and Karsog. There are weavers in Batwara, Didwari, Dobha, Jabli and Thach in Chichot, Alsindi and Randol in Karsog, Maloh Samkal and Purana Bazar in Sundarnagar

There are a few other industries in the district but still there is good scope for setting up a number of industries. Stone utensils are made at Dhelu in Jogindarnagar, Brass Hukkas are made at Bahair and Pingla in Sarkaghat, musical instrument making and wood turning is done at Draum in Jogindarnagar.

Funds are made available to the Co-operative Societies and also to individuals under the "State Aid to Industries Act" by the Industries Department. The loans can be granted upto the minimum limit of Rs. 10,000/. The Interest is charged at the rate of Rs. 4½ per cent annually. Thus the Industries Department, collaborates financially with the private entrepreneures.

EMPLOYMENT SERVICE

The National Employment Service in India, as we all know, is the product of post-war demobilization. A large number of Service Personnel and War-Workers who were to be released had to be resettled in civil life. Considering the complexity of the problem, the Directorate General of Resettlement and Employment (Government of India) was established in July, 1945, and Employment Exchanges were gradually set up. In 1947, the colossal problem created by the rehabilitation of the refugees

from Pakistan resulted in the extension of the facilities offered by the Employment Service to the refugees and by 1948, the facilities were thrown open to all categories of workers in response to growing demands on it.

The Employment Exchanges are primarily engaged in registration and placing work. They register employment seekers and vacancies, match each other and find the right man for the right job. The following statement shows the registration and placing work done by the Employment Exchange in the district from 1960 to 1962:—

A. Registration	1960	1961	1962
1. Clerical	341	531	1,294
2. Skilled	521	1,042	1,065
3. Unskilled	5,695	5,879	3,569
Total	6,557	7,452	5,928
B.No. of vacancies registered	1,695	1,511	3,234
C. No. of candidates placed—			
1. Clerical	79	135	275
2. Skilled	68	154	149
3. Unskilled	694	762	473
Total	841	1,051	897

With the increase in the number of Employment offices, the facilities offered by them have been reaching the doors of an ever-increasing number of employment-seekers. Besides, executive orders of the Government which require all types of vacancies (except those that are to filled through the U.P.S.C. or by promotions) to be filled through the Employment Exchanges, have considerably helped in promoting the placement function.

The noticeable increase in the number of vacancies notified may well be referred to the Employment Exchanges. 'Compulsory Notification of Vacancies' Act, 1959 and Rules made thereunder in 1960 requiring all establishments in the public sector and those employing 25 or more persons in the private sector to notify all vacancies barring a few types, to the local Employment Exchanges.

Apart from the placement function, the Employment offices have, in the field of occupational information, been collecting materials for publications like the Hand Book Training Facilities, and distributing allied publications such as Guides to Careers, Occupational Information Series and Career Posters, for the use of administrators, Employment Officers, Guidance personnel, teachers, students, parents/guardians employers and general public. Information Rooms are set up in the Employment Exchanges, where these publications are displayed and sold.

In order to advise Employment Exchanges on matters relating to training at the district level, a District Committee on Employment, tripartite in character, is attached to the Exchanges. Resolutions and recommendations adopted by the committees are brought to the notice of the Director of Employment for examination.

Collection of Employment Market Information— Closely associated with the Act regarding the Compulsory Notification of Vacancies is the scheme for the collection of Employment Market information, every quarter, from employers both in the public and the private sectors through questionnaires prescribed in the Act. This along with data concerning the unemployed, vacancies notified and placements thrown up by Exchange operations is incorporated in a variety of reports and studies to disseminate information useful for manpower planning such as changes in the levels of total employment from quarter to quarter, occupational and industrial disposition of employed persons, manpower shortages, unemployment situation and related matters.

Scheme for Vocational Guidance : Information useful for employment-seekers isavailable at all the Employment Exchanges. In addition, vocational guidance to youths and employment counselling, to adults is made available to those who come to the Exchanges to seek employment assistance or guidance or both. A State Vocational Guidance Unit was wet up at the headquarters to assist the Director in the administration and coordination of the programme in the Employment Exchanges collaborating with the guidance service under the State Educational authorities, in course of time. The Vocational Guidance Officer visits the Employment Exchanges, Schools and Colleges for Vocational guidance and employment counselling; follows up and reviews progress of guided youths and adults; disseminates up-to-date information on occupations, training facilities, educational courses, employment trends and unemployment outlook to youths, teachers, parents and other groups; assists in placement of youths in institutions or in plant training centres, apprenticeship or in entry jobs and in securing retraining facilities and placement of adults.

Another Vocational Guidance Unit to be attached to the Employment Exchanges, Mandi has

been sanctioned by the Government of India. This Unit will look after the Vocational Guidance work in the districts of Mandi, Chamba and Bilaspur.

Craftsman Training Scheme : Based on the recommendations of 'The Training and employment Service Organisation Committee' (Shiva Rao Committee) the day-to-day administration of the only Industrial Training Centre in Himachal Pradesh at Mandi with 112 seats in four trades was taken over by the Himachal Pradesh Government with effect from 1st November, 1956.

The aim of training in the Industrial Training Institutes running under the Craftsmen Training Scheme sponsored by the Government of India, Directorate General of Employment and Training, Ministry of Labour and Employment is to equip the people with suitable industrial employment to promote Industrial bias among the people of the Pradesh and to mitigate unemployment among the educated.

The number of seats of each trade is—

Trade	No. of seats
Drafts-man (Civil)	32
Fitter	32
Carpenter	16
Cutting and Tailoring	16
Electrician	..
Welder (Gas and Electric)	..
Surveyor	..
Total	96

Duration of Training : The duration of training for engineering trade is 2 years, 1½ years institutional followed by 6 months in plant Apprenticeship training in factory or workshop. For non-engineering trades the training period is only one year institutional.

Qualifications for Admissions : For Draftsman (Civil), Electrician, Surveyor, Radio Mechanic, Stenography (English/Hindi) is Matriculation or equivalent. For the remaining trades educational qualification is upto Middle School standard (relaxable in suitable cases). Candidates between 16 to 25 years of age are normally admitted for training but the upper age-limit is relaxable for ex-servicemen, scheduled castes and scheduled tribes candidates, bonafide displaced goldsmiths and their children, and in other deserving cases.

Method of Selection : Candidates are selected on the basis of vivavoce and or written test by the Local Selection Committees constituted one in each of the six districts of the Pradesh. Seats are reserved as under —

Scheduled Castes	12½%
Scheduled Tribes	5%
Bonafide Displaced Goldsmiths and their children	5%
Women (for Stenography)	25%
Orphan	2%

Stipends : 33-1/8 per cent of the total trainees admitted are granted poverty-cum-merit monthly stipends at the rate of Rs. 25 per trainee with reservations of 12-1/2 per cent of the stipend for Scheduled Castes, 5 per cent for Scheduled Tribes, and 5 per cent for bonafide desplaced goldsmiths and their children. In addition ex-servicemen trainees got monthly stipend of Rs. 35 from the Ministry of Defence, and Himachali trainees coming from the C. D. Block areas of the Pradesh get stipend at the rate of Rs. 25 p.m. each from respective C. D. Block funds.

Other Facilities : (*i*) Free Training. (*ii*) From Workshop clothing once every four months to those who have to work on or near moving machinery and also in hazardous trades. (*iii*) Free facilities for recreation and medical treatment. (*iv*) Free hostel accomodation, where available. This will include free supply of food.

Prospects for passed-out Trainees : As has been stated earlier, the training equips young men for setting up their own work. It does not guarantee service to them, though every effort is made by the Employment Exchanges to find the trainees gainful employment in industries.

Apprenticeship Training : With the coming into force of the Apprentices Act, 1961 with effect from 1st March 1962 and in accordance with the Rules framed thereunder, arrangements have to be made in suitable industrial establishments for the apprenticeship training of the following three types :

(*a*) Short-term-6 month's for ex-trainees who have completed institutional training in the ITIs.

(*b*) Full Term. This will be of two types— 1-1/2 years for ITI boys to complete 3 years and 3 years for new apprentices.

The Director of Employment and Training has been appointed as State Apprenticeship Adviser and the Labour Officer as the Assistant Apprenticeship Adviser.

COMMUNICATION AND ROAD DEVELOPMENT

Upto 1961 there were very few motorable roads in this district. Pathankot Kulu Road which passed through the territory of Mandi District was constructed by the Punjab Government and was the only all weather road to the plains. Whatever other roads existed were fair weather roads. The interiors of this district has no roads at all. During 1st and 2nd Plan period the following roads were constructed and thrown open to vehicular traffic.

1. *Simla Mandi Road via Bilaspur*: The part of this road falling in Mandi district (27 miles) though motorable before, 1951 was only fair weather and narrow for most of its length. Out of 27 miles, 22 miles were widened to double lane width and a high level bridge was constructed across Suketi Khad.

The road is being developed as an all weather state Highway during the Third Plan. By the end of the Third Plan period the road will be capable of carrying double lane traffic. A high level bridge across river Sutlej at Slapper is expected to be completed by the end of the current year.

2. *Simla Mandi Road via Tattapani* (Section Tattapani to Suketi bridge Junction)—Total length of this road in Mandi district is 85 miles. The road bifurcates from Simla Mandi Road via Bilaspur near Suketi Khad crossing at distance of 9 miles 5 furlongs from Mandi towards Bilaspur and joins Simla Sooni Tattapani road at Tattapani. By the end of the Second Plan the road was made fit for single lane vehicular traffic for 75 miles and jeepable for the remaining length of 10 miles. The total length of this road was thrown open for one way vehicular traffic in the beginning of the Third Plan. A bridge across river Sutlej at Tattapani was also constructed. It is proposed to keep it as a fair weather road only during the Third Plan and metalling and Tarring on this road will be done during the Fourth Plan period.

3. *Sundarnagar Jai Devi Road*: The road from Sundarnagar to Jai Devi (12½ miles) was constructed and thrown open to fair weather one way vehicular traffic during the 2nd Plan period. It will be extended upto the Junction of Simla Mandi road via Tattapani during the Third Plan period, total length being 20 miles.

4. *Chail Gohar Pandoh Road*: This road bifurcates from Simla Mandi road via Bilaspur near Chail and connects Gohar with it. The distance from Chail junction to Gohar is 4 miles. These four miles were widened for single lane vehicular traffic extended upto Pandoh during the 3rd Plan. Total length of this road is 10 miles.

5. *Chail Janjehli Road*: This road was made fit for fair weather single lane vehicular traffic for 10 miles from its junction with Simla Mandi Road via Tattapani during the 2nd Plan period. The jeepable road will be extended upto Janjehli during the Third Plan period. It is proposed to make the entire road motorable during the 4th Plan period. Total length of this road is 35 miles.

6. *Uhal Valley Road*: This road bifurcates from Amritsar Pathankot Kulu Road near Mandi and was made fit for vehicular traffic for 7½ miles. It is proposed to make this entire road jeepable during the Third Plan period and motorable during the fourth Plan, total length being 48 miles.

7. *Karsog Link Road*: A 6⅓ miles long motorable link road to Karsog was constructed from Simla Mandi Road via Tattapani during the 2nd Plan period.

8. *Mandi Rawalsar Bhambla Una Road*: The construction of this road was started during the 1st Plan period. By the end of 2nd Plan, 15 miles of this road was ready for one way fair weather vehicular traffic. Two major bridges on this road have been completed. The entire road (30 miles) is proposed to be made motorable during the Third Plan period.

In addition to above the following motorable roads were improved during 1st and 2nd Plan period.

1. *Jogindarnagar Sarkaghat Ghamarwin Road*—(Section Jogindarnagar to Bilaspur boundary) The road from Bilaspur boundary to Sarkaghat were already motorable and was improved. The road was also widened to 16 ft. from Jogindarnagar onward for about five miles.

2. *Mandi Bhambala Road Section Ratti Ki Khad to Bhambla*: The road is about 9 miles in length from its junction with Simla Mandi Road via Bilaspur near Ratti upto its junction with Mandi Rawalsar Bhambla Una Road. This road was already motorable and was improved during the 2nd Plan period.

The work on the following roads was started during the 2nd Plan period and were finished upto the stage indicated against each. The position

of these roads anticipated at the end of the Third Plan is also indicated below:—

Serial No.	Name of Road	Total length in miles	Position at the end of 2nd Plan	Anticipated Position at the end of 3rd Plan
1	Karsog (Snarli) Nanj Road.	19½	Jeepable 15 miles.	Motorable 10 miles. Jeepabable 9½ miles.
2	Ghatasni Jhantingri Tuim Road.	7½	Jeepable 5 miles.	Motorable 3 miles. Jeepable 4½ miles.
3	Dhar Link Road.	5	Jeepable 5 miles.	Motorable 5 miles.

In addition to above the following roads are to be taken up during the Third Plan period and will be completed to the stage mentioned against each.

Serial No.	Name of Road	Total length in miles	Anticipated position at the end of 3rd Plan
1	Tattapani Slapper Road	31	Jeepable 31 miles.
2	Baijnath Kandapattan Laddbarol Langna Road.	26	Motorable—2 miles. Jeepable—5 miles. Track—19 miles.
3	Sarkaghat Tihra Sandhol Road.	30	Motorable—13 miles. Track—17 miles.
4	Ganpati Ki Sarak near Mandi Road.	12	Jeepable—5 miles. Track—17 miles.
5	Aut (Takoli) Prashar Lake Road.	22	Track—22 miles.
6	Sundar Nagar Loda Kalkhar Road.	12	Track—12 miles.
7	Drang Basahi Road	16	Track—16 miles.
8	Mandi Tungal Thana Dharampur Road.	25	Track—25 miles.
9	Rawalsar Pingla Thana Dharampur Road.	25	Track—25 miles.
10	Bali Sundarwani Ghaniar Godagossiani Chhatri Road.	30	Track—30 miles.
11	Banjar Godagossiani Road.	14	Track—14 miles.
12	Bakrot Janjehli Road	15	Track—15 miiles.
13	Tattapani Pandar Road via Anu Ki Khad.	20	Track—20 mies.
14	Keludhar Sainj Road	10	Track—10 miles.,
15	Keludhar Chhatri Road	20	Track—20 miles.
16	Nalsar Chunan Jaidevi Road.	10	Track—10 miles.
17	Janjehli Godagossiani Road.	10	Track—10 miles.
18	Pandoh Sarachi Road	8	Track—8 miles.
19	Thalot Shilli Baghi Lamba Thatch Road.	24	Track—24 miles.

The over all position of roads in Mandi District on 31st March 1961 and that anticipated on 31st March 1966 is given below—

Serial No.	Position on	Double lane roads in miles	Single lane roads in miles	Jeepable roads in miles	Less than jeepable in miles	Cross Drainage works in miles	Metalled roads in miles	Tarred roads in miles	Bridges in Nos.
1	31-3-61	22	168½	51	188	20	16½	16½	3
	31-3-66	27	240	126½	324½	31	..	31	11+11 in progress

MANDI-KULU ROAD TRANSPORT CORPORATION

Preliminary—The Governments of Punjab and Himachal Pradesh having regard to the advantages laid down in the Road Transport Corporations Act, 1950, agreed to establish a Road Transport Corporation namely the Mandi-Kulu Road Transport Corporation for operation of all road transport services on Pathankot-Manali hill road. As required by the provisions of the Road Transport Corporations, Act, the Central Government (through the Northern Railway Administration) has also participated as shareholder by contributing to the share capital of the Corporation and has been given representation in the Corporation. The Corporation came into being in 1958 and started plying of its services with effect from 18th September 1959.

Share Capital—The Corporation was started with an initial share capital of Rs. 30 lakhs contributed by the Governments of Punjab, Himachal Pradesh and Northern Railway in the ratio of 40 : 40 : 20 respectively. In the subsequent years the Corporation prepared its development plans, which were also subscribed to by the participating Governments in the said ratio. The paid up share of Himachal Pradesh Government on this count alone comes to Rs. 13·50 lakhs. There are no other parties subscribing to the share capital of the Corporation.

Constitution—The Corporation consists of five official members including the Chairman. Two of the members have been nominated by the Punjab Government, two by the Government of Himachal Pradesh and one by the Central Government. The senior most member of the two State Government is the Chairman of the Corporation.

Management—The management of the affairs of the Corporation is vested directly in the hands of the General Manager of the Corporation. He is assisted on the accounts side by the Chief Accounts Officer, on technical side by the Works Manager and on traffic side by the Traffic Manager (at present the post is vacant). The General Manager and Chief Accounts Officers are taken on deputation from either of the two State Governments and if appointment to one post is made by one Government, the other post is filled up by the other Government in rotation.

Transfer of Permits and Assets by Himachal Pradesh Government—With a view to enable the Corporation to start its services early, the Government of Himachal Pradesh transferred 48 route permits of Himachal Government Transport and 36 route permits of Kulu Valley Transport (in which Himachal Pradesh Government was the majority shareholder) subject to payment of suitable compensation for loss of business etc. The entire fleet of the K.V.T. and other physical assets, which were found suitable by the Corporation were also transferred to the Corporation on their book value. Likewise some vehicles and stores of H.G.T. as well were transferred to the Corporation on book value so that the Corporation did not experience any difficulty in rendering service to the people of the area in general and tourists in particular upto the required standard.

Scope of Activities—The Corporation is running goods services from Amritsar to Manali and passenger services on Pathankot-Manali, Pathankot-Dharamsala, Manali-Dharamsala, routes etc. The Corporation holds Northern Railway Out Agencies at important places like Dharamsala, Mandi, Manali etc. During recent years the Corporation has augmented its fleet considerably and its activities are expanding day by day. The Corporation has started its services on some new routes and more are being given to it.

Operation In Lahaul and Spiti Areas—In pursuance of the decision of the Punjab Government, the Corporation started its services in Lahaul and Spiti areas in early 1962. This operation was carried out with Willys Jeeps, Station Wagons and catered to the very remote areas like Gramphoo-Kelong, Gramphoo-Batal, Koksar-Kelong Sections. As compared to the very difficult conditions of operation in the area, the fare and freight fixed by the Punjab Government (25 Paise per passenger per mile) is on a low side and consequently the Corporation suffered heavy loss in this seasonal operation. The Punjab Government has, however, agreed to compensate the Corporation for the loss sustained in running the services in Lahaul and Spiti areas.

Budget, Accounts Audit—The Corporation follows the provisions of the Road Transport Corporation Act and the Prescribed accounting procedure in all financial matters. The annual budget is prepared and submitted to the State Governments concerned for approval. Besides the system of internal audit introduced in the Corporation, the audit of the accounts of the Corporation by the Accountant General, Punjab on behalf of the Comptroller and Auditor General of India is conducted annually in accordance with the provisions of the Act.

Profits—The operation of the Corporation has all along been profitable. With a view to providing opportunities of utilising more funds for the development of the Corporation and paying less taxes, the rate of interest on capital has been enhanced from 4½ per cent to 12 per cent with the approval of the Governments concerned. On the other hand various funds have also been created to which amounts are regularly debited in order to eliminate chances of raising loans, etc. for various development plans of the Corporation. As a consequence of this no profit has so far been declared and made over to the two State Governments for the purposes outlined in Section 30 of the Act. The working of the Corpo-

ration, however, is on a sound footing and but for the provisions made for various funds, enhancement of rate of interest etc. as stated above, the Corporation would have declared substantial profits.

Pay and Allowances and Service Rules—The pay-scales and allowances of the employees of the Corporation correspond to those of their counterparts in Himachal Government Transport. The officers on deputation are governed by the Rules and Regulations of their parent States. For all other employees the Corporation has its own Rules and Services Regulations as required by the Road Transport Corporations Act.

General—Mandi-Kulu Road Transport Corporation is the only Corporation in the country set up jointly by the two State Governments. It is operating services on very important joint routes. With the opening of new routes on which the Corporation proposes to operate its services and contemplated extension of the present operation, the future of the corporation seems to be bright.

LAND REVENUE AND LAND TENURE

Prior to 1912 there were Jaildars for recovery of land revenue. They used to collect the land revenue from Khewatdars by estimating standing crops and deposit the same in the Government Treasury. The regular land revenue settlement was carried out in 1912 in Jogindarnagar tehsil and thereafter in other tehsils. The land was classified in various classes. Revenue per bigha was assessed according to the soil and its fertility. In 1916-17 when all the cultivated and grass lands were measured the land revenue was collected on the approved rates. In fact it was not a permanent settlement of land revenue with the Ryots who cultivated or held the land. Only the revenue which the State was entitled to recover as its share from the occupier of the land was assessed on cultivated land at scales prevailing in the adjoining British Indian Territory, to guarantee permanent income in the form of cash from the land in future. In a way it was partly a Ryatwari and partly a quasi-zamindari system of settlement.

The assessment and management of the land revenue was being carried out by a regular Revenue Department of the State Administration on a similar system as prevailed in British India through the village agency of Lambardars. A bigha of land was taken as a standard measure of land for assessment of land revenue, which varied between 50 Paise and 25 Paise for dry land and between Rs. 1·25 and Rs. 0·75 Paise per bigha for wet land. The land revenue assessed already could not be changed till the next settlement takes place.

For the recovery of the land revenue Lambardars were appointed. They collect the land revenue rom each cultivator and deposit the same in the Government Treasury. 20 per cent of land revenue was assessed as local rates out of which 5 per cent is given to Lambardas as commission fee. The remaining 15 per cent is deposited into the Treasury. Now 15 per cent of the local rate is paid to the Gram Panchayats for development works.

Land Reforms—After 1951 the State Government has passed legislation according to which land owners get $\frac{1}{4}$ of the produce of the land. Previously they used to get $\frac{1}{2}$ or $\frac{1}{3}$ from their tenants. Relations between the landlords and the tenants are governed by the abolition of the Big Landed Estates and Land Reforms Act, 1953 which has secured the interest of the tenant class and enabled them to acquire proprietory rights over their tenancy land on payment of compensation at scheduled rates to the landlords.

Agrarian—There used to be minor kuhls for irrigation of land and mostly zamindars depended upon rains. Recently efforts are being made to provide facilities to the cultivators.

Revenue Administration—The district land revenue administration is headed by the collector who is also the Deputy Commissioner. He is assisted by the Revenue Assistant, six Tehsildars and other field staff. The land revenue collected in the district since 1957 to 1961 is—

	Rs.
1957	425,754
1958	426,298
1959	426,298
1960	427,207
1961	427,948

Land Tenures—There are three kinds of land tenures prevalent in the Pradesh. These are—

1. Zamindari
2. Pattidari .. (*a*) Perfect of Mukkammil
   (*b*) Imperfect of Gairmukkammil.

3. Bhaichara ..(*a*) Perfect of Mukkammil.
(*b*) Imperfect of Gairmukkammil.

Zamindari system of land tenures are those which are either owned by a single proprietor or jointly by more than one. Pattidari are those in which each proprietor owns not the particular fields which he cultivates, but a specific ancestral share in the whole estate. Perfect or Mukkammil Pattidari tenures are those in which all the lands are divided and held in severalty among the different proprietors in proportion to ancestral or other customary share in the revenue paid. All the co-sharers are jointly responsible in the event anyone among them fails to fulfil his obligations or liabilities to the government. Imperfect of Gairmukkammil Pattidari tenures are those in which part of the land is held in severalty and part on commonalty. The interests of the land owners in both correspond to the customary shares.

In Bhaichara system of land tenure, every man is the owner of only as much land as is in his possession or as it is commonly put. Possession is the measure of rights in such system. In perfect Bhaichara tenures, all the lands are held in severalty but customary shares, if they ever existed, have disappeared. Each holding or rather the portion of total revenue which a land owner pays has become the sole measure of his rights and liabilities. An imperfect Bhaichara differs from a perfect Bhaichara system in exactly the same manner as an imperfect Pattidari differs from a perfect Pattidari estate.

Price Trends

The wholesale prices of the selected commodities are collected through the revenue agencies and published by the Directorate of Economics and Statistics in the Quarterly Bulletin of Statistics. Prices are collected at three centres Jogindarnagar, Mandi and Sundarnagar. Data for four years from 1957 to 1960 has been given in table 4·1 of part III.

Mandi like other district is mainly a consuming market. In case of foodgrains it has to depend partly on supplies from neighbouring states. During four years under review the price situation depicted a mixed trend. The prices fluctuated within a large margine. Some commodities are discussed here.

Wheat : The minimum rate of wheat in four years was Rs. 15·70 at Jogindarnagar in May, 1958 and Rs. 16·00 per maund at Mandi in April, 1958. In 1959 the wholesale prices of wheat showed an upward trend in both the centres. Its maximum price was Rs. 27·33 per maund at Mandi in February, 1959. After April, 1959 its price began to decline and after Sept. its prices remained between Rs. 16·00 and Rs. 20·00 till the end of 1960 at Mandi and Jogindarnagar.

Rice Coarse : The wholesale price of rice coarse remained between Rs 16·00 and Rs. 23·00 per maund at Sundarnagar during four years. Heavy fluctuation has been recorded in its price at Mandi centre. Its prices were highest during June, July and August of each year. The maximum price of rice coarse was Rs. 27·50 per maund at Mandi in July, 1959. During 1960 its price remained more or less constant.

. *Gram* (Red variety) : The wholesale prices of gram (red variety) showed a mixed tendency since January, 1957 to August, 1958. Thereafter it showed an upward trend and reached a maximum of Rs. 28·00 per maund at Mandi in March, 1959. After May, 1959 its prices began to decline and came to the extent of Rs. 14·00 per maund. During 1960 its prices remained between Rs. 14·00 and Rs. 18·00 at Mandi and Sundarnagar.

Maize : The wholesale prices of maize showed a rising tendency after August, 1958. Its highest price of Rs. 19·66 per maund was recorded at Mandi in March, 1959. After May, 1959 its price began to decline and came down to Rs. 13·38 by the end of the year.

Pulses : The prices of pulses remained more or less steady with only minor fluctuations on either side.

The following table gives an idea of the wide variation of prices in March of each year—

Year	Centre	Commodities			
		Wheat	Rice	Grame	Maize
1957	Mandi . .	19·20	19·40	15·90	12·15
	Sundarnagar .	..	17·00	14·50	..
1958	Mandi . .	16·13	22·00	13·74	14·12
	Sundarnagar .	..	16·00	11·50	..
1959	Mandi . .	25·38	25·63	28·00	19·66
	Sundarnagar .	..	23·00	19·00	..
1960	Mandi . .	19·75	23·13	14·87	13·44
	Sundarnagar .	..	23·00	14·00	..

The wholesale prices of these commodities remained highest during 1959. In 1960 prices came down to the level of 1958.

Community Development

The Community Development programme was launched in the district on October 2, 1953, when Bahal Block was inaugurated. The National Extension Service was given a start by opening Chichot Block on 2nd October, 1953, with a view to intensifying the activities under the Community Development and National Extension Service programme. The Bahal Block was converted into Post Intensive block on 1st October, 1956. The National Extension Service Block, Karsog was inaugurated on 1st July, 1955, Sarkaghat on 2nd October, 1956 and Jogindarnagar block on 29th March, 1958.

The following statement shows the size and population of each block as on 31st March, 1962—

Name of Block	Category of Block	Year of start	Area in Sq. miles	No. of villages	Population.
1	2	3	4	5	6
1. Sundarnagar	Stage II	2-10-53	168·0	200	42,479
2. Chichot	Stage II	2-10-53	351·0	948	57,518
3. Karsog	Stage II	1-7-55	252·0	625	37,982
4. Gopalpur	Stage I	2-10-58	202·0	611	84,625
5. Dharampur	Stage II	2-10-56			
6. Drang	Stage I	29-3-58	445·0	1,038	68,572
7. Chauntra	Stage I	..			
8. Mandi Sadar	Stage I	1959-60	202·0	1,032	93,083
Total			1,620·0	4,454	384,259

By the end of 1961 eight blocks were functioning. The distance was fully covered by the Community Development programme. In the beginning one block was opened in each tehsil. At present there are two blocks each in Sarkaghat and Jogindarnagar tehsils. The programme aims at rapid increase in agriculture production, promotion of education, improvement in health and rural sanitation and expansion in employment opportunities. Considerable progress has been made in the field of Agriculture, Animal Husbandry, Social Education, and Communications. Progress made under these heads during 1959-60 and 1960-61 is—

Item	Unit	Years 1959-60	Years 1960-61
1	2	3	4
Agriculture			
1. Distribution of improved seeds	Mds.	6,234	5,144
2. Chemical fertilizers distributed	Mds.	4,895	5,102
3. Agricultural demonstrations held.	Nos.	624	871
4. Compost pits dug	Nos.	3,198	2,142
5. Area brought under Japanese method of cultivation	Acres	3,830	2,476
Animal Husbandry			
1. Improved birds supplied	Nos.	425	154
2. Animal castrated	Nos.	7,636	10,506
Minor Irrigation			
1 Net additional area irrigated	Acres	58	1,782
Health and Rural Sanitation			
1. Primary health centres started	Nos.	4	1
2. Rural latrines constructed	Nos.	21	29
3. Village lanes paved	Sq. Yds.	600	5,950
4. Soakage pits constructed	Nos.	241	159
5. Drinking water bowlies constructed	Nos.	29	124
6. Drinking water bowlies disinfected	Nos.	44	138
Social Education			
1. Literacy centres started	Nos.	46	80
2. Adults made literate	Nos.	465	591
3. Reading rooms and libraries started	Nos.	26	1
4. Cultural film shows organised	Nos.	1,099	860
5. Youth clubs started	Nos.	12	16
6. Functional Gram Sahayak's camps organised	Nos.	54	35
7. Functional leaders trained	Nos.	733	841
Women's Programme			
1. Mahila Samities	Nos.	19	23
2. Balwadis/Nurseries started	Nos.	1	3
3. Smokeless chullhas installed	Nos.	15	23
Communications			
1. Kacha roads constructed	Miles	56	34
2. Existing kacha roads improved	Miles	393	239
3. Culverts constructed	Nos.	6	1

M/B(N)3HPGovt.—6

APPENDIX I

Places of Interest

Aut—Situated onthe Mandi-Kulu road about 125 miles from Mandi town. It is a small but lovely place on the right bank of the Beas. A jeepable road takes on towards Rampur and Simla. There is a rest house, a police outpost and an ayurvedic dispensary.

Barot—Situated about 47 miles from Mandi town in Jogindarnagar teshil at a height of 5,950 feet above the sea level. It is a beautiful hill resort. It can be approached from Jogindarnagar either covering 12 miles on foot or in a rope-way trolly. The beautiful lake of hydel headwork and the Trout fish hatchery are worth seeing places there. There is a forest sarai, a post office, Middle school and a library.

Chauntra—It is a picturesque and lovely village six miles away from a terminus railway station Jogindarnagar. This sprawls over gentle and fertile hills. The surrounding are charmings with snow-capped mountains and pine forests. The village is inhabited by multi-community. The main occupation is agriculture and labour. Shopkeeping, basket making, weaving, carpentry and service are also there. The village is known for tea manufacturing. Black tea and Green tea are manufactured there. The annual yield of tea leaves from the mature plant grown in one acre of land is from 1,500 to 1,600 pounds which reduces to 380 to 400 pounds when manufactured. In Chauntra two varieties of plants, China plant and Assam plant are grown. The largest tea garden at Chauntra belongs to Raj Kumar of Mandi. The name of the estate is 'Shri Raj Kumar Sahib Chauntra and Dhelu Tea Estate'. It has its branch at Dhelu. The entire estate including Dhelu comprises of 180·39 acres and has about 400,000 tea plants.

Chirag—Situated on Simla-Karsog motorable road. This is a medium size village having a population of 457 persons. There is a middle school, a dispensary, a post office and a rest house.

Dehar—Dehar is situated on the right bank of the Sutlej. At Dehar there is a suspension bridge over the Sutlej. Besides a high school there is a rest house, post office and a dispensary. At Dehar there is an old fort which is situated in a picturesque site.

Guma—It is situated at a distance of 29 miles on the road from Baijnath-Mandi in the range called the Ghoghar-ki-Dhar. It is known for its salt quarries. Once it was a separate state under the rule of a Rana but was conquered by Raja Madan Sen of Suket in about 400 A.D. In the time of Raja Narayan Sen it was annexed to Mandi but Raja of Kulu captured it during reign of Raja Suraj Sen. It was again recaptured by Raja Sidh Sen of Mandi.

Jaroli—Midway between Sundarnagar and Dehar at Jaroli Bagh a temple has been built by H. Highness Rani Sirmuri of Suket. There is a Primary School and a post office.

Jogindarnagar—Situated at a distance of 35 miles from Mandi at a height of 4,000 feet. It is terminus of narrow gauge Pathankot-Jogindarnagar Railway. It is famous for its hydro-electric project which supplies about 48,000 kW of electrical energy to the Punjab. The rope-way rising to a height of 8,000 feet, the huge weirs on the Uhl river, the big reservoir and the 15,000 feet of tunnel which brings the water from the Uhl river to the Power House are remarkable for their engineering and are worth seeing. A visit to the electric works and the reservoir at Barot by the haulage way is a thrilling experience.

Beside tehsil offices there is a Higher Secondary School for girls, a High School for boys, a civil hospital, a temple of Shri Krishna and a rest house.

Janjeli—An attractive place for tourists and hikers It is situated at a distance of 42 miles from Mandi in Chichot tehsil. About half distance upto Gohar is motorable and rest is to be covered on foot. There is a forest rest house, a high school, a library, a dispensary and a post office.

Karsog—This is the headquarters of the tehsil of same name. It has a Higher Secondary School, Civil Hospital, Rest House and Block Offices. There is a temple of Lord Shiva.

Mandi—F. St. J. Gore has described Mandi town in his book 'Lights and Shades of Hill Life'.

"Mandi is a wonderfully pretty little town, built just where the Suketi river joins the Beas in a deep ghree pool. A fine iron suspension bridge (The Raja's Victoria Jubilee offering) joins the banks of the Beas, while a row of pointed-roofed Hindu temples, with steep broad flights of steps down to the river, adds to the picturesque appearance of the place as you come in from the north. When this bridge was being built by Captain Hoskyns, R.E., who was lent to the Raja for the purpose, it caused a great sensation in the neighbourhood, the natives declaring that it would be impossible to build a bridge from bank to bank. After some little delay, however, a couple of light wire ropes were stretched across, high above the river, from which a few single planks were slung, in order to facilitate the passing across of the suspension cables which were to form the bridge. Captain Hoskyns, having to absent himself for a few days just at this time, returned to find the hill men making full use of this light and airy structure, imagining that the Sahib's work was done; their only complaint to him being that they could not get their sheep to cross it".

It is situated on the river Beas, at a height of 2,400 feet. The Beas separates the old Mandi from the new town. The former is of little importance and interest. The temples and rock carvings by the edge of the river much to the natural picturesqueness of the entrance. Its ancient temples, beautifully carved and embellished are objects of historical and architectural interest. Bhutnath, Triloknath, Panchvaktra and Tarna are the famous temples of this town.

It is connected with Simla, Pathankot, Kulu and all tehsils of the district. Besides district offices there is a Degree College, a Higher Secondary School (Girls), a High School, District Hospital, a Circuit House, a P.W.D. rest house and few small hotels. The royal cemetery in which the barsela monuments are situated is just outside the town below the Mandi-Sundarnagar road.

Nalag—Is a medium-sized, multi-caste village in Tehsil Sundarnagar. Nalag, a revenue village, is surrounded by the four hamlets, all forming parts of it. To reach the village, the final part of journey has to be covered on foot. Nalag is about 7 miles North-West of Dehar, a bus terminus. Four castes of Brahmins, Rajputs, Chamars and Dumnas live in the village and according to the 1961 Census, the population is 530 comprising of 274 males and 256 females. The main and only occupation of the villagers is agriculture. A good many of them work in the cities either as domestic servants or rickshaw pullers. Some of them are also serving as soldiers in the Indian army.

Pangna—Pangna is also an important village. It was once the capital. The old palaces are still in exist nce. There is a fine well preserved fort which was built by Raja Bir Sen who established his capital there in the 13th century. There is a Middle School, a dispensary, library, a post office and a rest house. It is connected by road. There are temples of Kali and Shiva.

Parasar—Parasar is about 20 miles north-west of Mandi. It is a large lake with a pagoda-shaped wooden temple on its edge. This lake contains floating island. A large fair is held there in the month of June. Wool and blankets are largely sold.

Rawalsar—The Rawalsar lake is about 12 miles south-west of Mandi, at some 4,000 feet. The water of the lake is very deep and clear. The surface is broken by floating islands ascribed to the sanctity of Padma Samibhava. The islands on calm days usually cling close to the banks but a small breeze sets them in motion. The phenomena is regarded both by Buddhists and Hindus as a miracle of the presiding saint. It is a place of pilgrimage for Buddhists, Hindus and Sikhs.

Rawalsar is associated with snake worship. The Buddhists believe that beneath its waters are the mansions of the nags or Lus as they call them and they attribute an outlet or the lake to the part of one of these subterranean serpents.

Sundarnagar—Is situated at a height of about 3,000 feet above the sea level. This is a headquarter of the tehsil of the same name. This town comprises of four small bazars of Chatrokhari, Pung, Bhojpur and Purana Nagar. There is a post and telegraph office. There is a telephone system and electric institution in the town.

The main road in the town is quite picturesque. It was constructed by Raja Bhim Sen and was vastly improved later on. The important building in the town are the Courts, Hospital, Rest House, Higher Secondary School, Polytechnic Institution, the Palaces and Surajkund temple. One of the nicest places in the town

is the Sukhdev Batika the abode of the great Sukhdev Rishi. Several ornate plots have been laid out and many interesting zig zag paths have been constructed on the hill. At the foot stands the lovely "Retreat", a small but beautiful bungalow to which His Highness sometimes retires. There is a cave near the Retreat.

Tattapani—Situated on the right bank of the Sutlej. It contains hot water springs. They are medicinal springs and are used as a cure for gout and rheumatic pains. These springs are frequently visited by the thousands of visitors every year. It is linked by a motorable road and is about 35 miles from Simla—3 miles beyond Seoni.

APPENDIX II

FLORA

Mandi District

Serial No.	Scientific or botanical name	English name	Vernacular or local name	Altitudinal range		Remarks
				Lower Limit	Upper Limit	
1	2	3	4	5	6	7
			Belt No. 1			
1	Acacia Arabica	..	Kikar	..	3,000	Timber and fuel.
2	Acacia Cateehu	..	Khair	..	4,000	Do.
3	Adhatoda Vasica	..	Baikar, Bangha	..	4,000	
4	Albizzia lebbek	..	Siris	..	5,000	Timber and fuel.
5	Albizzia stipulata	..	Ohi	..	4,000	Do.
6	Arundinaria Falcata	..	..	..	5,000	
7	Bauhinia purpurea	..	Karlli	..	5,000	Leaves for fodder, fuel.
8	Bauhinia Variegata	..	Kachnar	..	4,000	Leaves for fodder, fuel.
9	Bauhinia Vahlii	..	Taur	2,000	5,000	Rope is made of the stem, the leaves are used as plates and made into umbrellas, wood burnt in temples.
10	Bombax malabaxicum	Silk cotton tree	Simbal, Simal	3,000	4,000	Valuable timber in the lower hills.
11	Butea frondosa	..	Plash, Plah	..	4,000	The leaves are used for fodder, as plates and for making umbrellas. A yellow dye is made from the flowers, a red astringent gum is obtained from the bark.
12	Cassia fistula	Indian laburnum	Alih, Ambal Tas	..	4,000	Seed used as a purgative.
13	Casearia tomentosa	..	Bheri	..	5,000	The fruit is used as a diuretic.
14	Cedrela Toona	Tun	Tuni	..	3,000	Timber used for building, furniture etc.
15	Colebrookia oppositifolia	..	Panera	1,657	4,000	
16	Dalbergia sissoo	Shisham	Sihan, Tali	..	4,000	Timber tree.
17	Dendro-calamus strictur	Bamboo	Bahanj	1,000	3,500	Used for building poles, sticks, mats.
18	Dodonaea Viscosa	..	Sanatta	..	4,500	
19	Ehretia laavis	..	Sakar	..	3,000	
20	Erythrina suberosa	..	Dhauldhak	..	4,000	
21	Eugenia Jambolana	..	Jamman, Jumni	..	5,000	Timber and fuel, fruits are eaten.
22	Ficus bengalensis	Banyan	Barkat	..	4,000	Usually planted as shadegiver
23	Ficus religiosa	Peepul	Pipal	..	5,000	Do.
24	Ficus roschurghii	..	Triambal	..	5,000	Fodder leaves, fruit eaten.
25	Flacourtia ramontchi	..	Kangu	..	4,000	
26	Flemingia congesta	..	..	3,000	5,000	

Mandi District—contd.

Serial No.	Scientific or botanical name	English name	Vernacular or local name	Altitudinal range		Remarks
				Lower Limit	Upper Limit	
1	2	3	4	5	6	
			Belt No. I—*contd.*			
27	Indigofera cordifolia	..	..	..	5,000	
28	Kydia calicina	..	Dhauldhak	..	4,000	
29	Machilus odoratissima	..	Chan	..	5,000	
30	Mallotus Philippinensis	..	Kambal	..	4,500	The crimson powder which covers the capsules is used for dyeing silk.
31	Mangifera Indica	Mango	Am, Amb	..	4,000	Timber used for building, fruit eaten.
32	Melia azedarach	The persian lilak	Drek	3,000	5,000	Oil as extracted from the fruit.
33	Murraya Koenigii	..	Gandheli	..	5,000	
34	Myetanthes arbertristia	..	Harsingar	..	4,000	
35	Odina wodier	..	Salambra	..	4,000	Used for building etc. A yellow gum is obtained from the bark and used for calicoprinting.
36	Ougenia-dalber-gioides	..	Sanan	..	4,000	Wood for furniture and agricultural implements, leaves for fodder.
37	Phyllanthus emblica	..	Ambla	..	4,500	Fruits are eaten, fuel.
38	Sapinudus Mukorossi	Soap-nut tree	Ritha, Doda	..	4,000	The fruit is used instead of soap for washing clothes.
39	Spondias mangifera	The hog plum tree	Ambara	..	5,000	Leaves for fodder, fruit eaten, wood for fuel.
40	Wood fordia floribunda	..	Dhawi	..	5,000	
41	Wrightia tomentosa	..	Dudhi	..	2,000	
42	Zabtho-xylum alatum	..	Timber, Timru	..	5,000	
			Belt No. II			
1	Acer oblongum	..	..	2,000	6,000	
2	Ainsliaea aptera	..	..	6,000	8,000	
3	Alnus nepalensis	Alder	Kosh	3,000	9,000	Timber, fuel, bark for tanning.
4	Anaphalis cinnamomea	..	..	5,000	9,000	
5	Arundinarai Falcata	Hill Bamboo	Nirgal	4,000	7,500	Stems are used for pipes, basket work etc.
6	Berberia lyeicum	Barbery	Kashmal	3,000	7,000	The fruit is eaten. Resaut, an extract prepared from the root is used as a febrifuge. Brush-wood used for fuel hedges etc.
7	Boennighausenia Albiflora	..	Pissumar	4,000	8,000	
8	Buddloia Paniculata	..	Chiti boi	2,500	8,000	
9	Buxus Sempervirens	..	Summa, Shamshad	5,000	9,000	Wood used for combs etc.
10	Carissa spinarum	..	Karunda	..	6,000	
11	Carpinus viminea	Hornbeam	Chir	5,000	9,000	Fuel and fodder.
12	Cedrela serrata	Hill Tun	Darli	4,000	8,000	Timber used for furniture.
13	Cornus Capitata	The strawberry	Thramal	3,500	7,000	Fruit edible.

				Lower Limit	Upper Limit	
1	2	3	4	5	6	7
			Belt No. II—*contd.*			
14	Cornus macrophylla	..	Kandar	4,000	8,000	
15	Desmndium floribunda	..	..	5,000	7,000	
16	Engel hardtia colebrookiana	..	Samma	..	6,000	
17	Ficus Palmata	..	Phagra		9,000	Fuel, fruit eaten.
18	Fragaria Indioa	..	Paljor	3,000	8,000	
19	Fraxinus floribunda	Ash	Angu	5,000	9,000	Timber, Manna exudes from the bark by in cision.
20	Grewia oppositifolia	..	Biyuhal, biul	..	6,000	Wood used for pole (tangri) of the field roller (mail), leaves for fodder. The fibres of the inner bark are made into roles. Dry branches are used for torch wood and fruit is eaten.
21	Hedera-Helix	..	Bankatkari	6,000	8,000	
22	Inula Cuspidata	..	..	4,000	7,000	
23	Litsea Umbrosa	..	Chirindi	3,000	9,000	
23A	Lizyphus Jujuba	..	Ber, Bere	..	6,000	Fruit edible.
24	Morus Indica	Mulberry	Tut	..	7,000	Fruit eaten, timber and fuel.
24A	Morus Serrata	Mulberry	Chumu	4,000	9,000	Domestic use, fodder tree.
25	Myrsine Africana	..	Bebrang, Shamshad	2,000	9,000	
26	Myrica Nagi	..	Kaiphal, Kafal	3,000	6,000	
27	Olea cuspidata	Olive	Kahu	2,000	6,000	Walking sticks, fuel and fodder.
28	Plectranthus Rugosus	..	Chhichhri	3,000	8,000	
29	Potentilla nepalansis	..	Rattanjot	5,000	9,000	
30	Prinsepia utilis	..	Bekhal	2,000	9,000	Oil obtained from the seeds is used for food, illumination and external application.
31	Prunnus Puddum	..	Paja	2,000	6,000	Fodder leaves and fuel.
32	Punica Granatam	Pomegranate	Anar, Daru	3,000	6,000	Fruit eaten, bark as a dye & for chutuey.
33	Pyrus pashia	..	Kainth, Segal	2,500	8,000	Wood used for Agricultural implements.
34	Quercus dilatata	Holly oak	Mehru	4,500	9,000	Agricultural implements, leaves for fodder, bark for tanning.
35	Quercus Glauca	Green oak	Banni	2,000	6,000	Fuel and fodder.
36	Quercus Iucana	White oak	Ban	3,000	8,000	Fuel, charcoal, fodder, bark for tanning, for building and agricultural implements.
37	Rhus cotinus	Venetian sumacu	Tung Titri	3,000	6,000	The wood is used for dyeing wool, orange or scarlet, the bark and leaves for tanning.
38	Rhus Punjabensi	..	Titri	4,000	8,000	The juice is highly corrosive and raises blisters on the skin. The heart wood is used for building furniture etc. Galls which form on the leaves known as kakri singhi are used for medicine.

Mandi District—contd.

39	Rhus Wallichi	..	Rikhal	5,000	8,000	The juice is highly corrosive and raises blisters on the skin. The heart wood is used for building furniture etc. Galls which from on the leaves known as kakri singhi are used for medicine.
40	Rosa Moschata	..	Tarui	4,000	8,000	
41	Rubus ellipticus	..	Aneha, Akha	2,000	7,000	
42	Rubus Paniculatus	Raspberry	Kalakha, Lisri	3,000	7,000	Fruit eaten.
43	Salix Babylonica	Weaping Willow	Maznun	..	9,000	Planted as shade giver.
44	Salvia glutinosa	..	..	6,000	9,000	
45	Sarcococea Pruniformis	..	..	5,000	9,000	
46	Spiraea Canescens	..	..	5,000	9,000	
47	Staphylea emodi	..	Nagdaun	6,000	9,000	Walking sticks made of this wood, orange or scarlet the bark and leaves for tanning.
48	Symplocos cretaegoides	..	Lajh, Lodar	2,000	8,000	A yellow dye is obtained from the leaves and bark.
49	Viola serpens	..	..	5,000	7,000	
50	Wiks-troemia canescens	..	..	5,000	9,000	
			Belt No. III 8,000 to 12,000			
1	Ables Pindrow	Silver fir	Tos	7,000	12,000	Timber trees.
2	Acer cassium	Indian horse chestnut	Khanor	4,000	12,000	Walking sticks made of this wood are supposed to keep off snakes.
3	Aesculus Indica	..	Khanor	4,000	10,000	The seeds are made into flour and eaten, the wood is used for domestic use.
4	Artemisia vulgaris	Elm	Chambra	5,000	12,000	
5	Arundinara Spathiflora	Yew	Garhi	7,000	10,000	Stems are used for pipes, basket work etc.
6	Berberis Coriaki	Berberry	..	6,000	10,000	The fruit is eaten. Rasant, a extract prepared from the root is used as febrifuge. Brush wood used for fuel hedges etc.
7	Berberis Lyoium	Berberry	..	6,000	10,000	Do.
8	Berberis vulgaris	Berberry	Kashmal	8,000	12,000	Do.
9	Caltha palustris	Marsh Mangold	Baringu	8,000	10,000	
10	Cedrus deodars	Deodar	Kelo	4,000	10,000	Timber tree.
11	Celtis australis	Elm	Khirk	4,000	10,000	Timber fuel and fodder.
12	Clematis montana	Elm	Ghantiali	4,000	12,000	
13	Cotoneastar Kacillaris	Apricot	Riuns	4,000	10,000	Used for walking sticks.
14	Cotoneaster Microphylla	Elm	Jinjru	4,000	10,000	
15	Daphne papyracea	Elm	Khirk	5,000	10,000	
16	Euonymus tingens	Berberry		6,000	10,000	
17	Geum urbanum	Herb bennet	Gashi	6,000	11,000

5	Thymus serphylum	..	..			
5	Thymus serphylum	..	Marho	5,000	13,000	
6	Viburnum nervosum		Amrola	10,000	13,000	
			Belt No. V (Miscellaneous)			
1	Micromeria biflorus	..	..	1,657	7,000	
2	Pinue longifolia	Chirpine	Chil	1,657	8,000	The resin is used as a dressing for sores.
3	Rhus pistacia intergerrima	..	Kakre, Kakar	1,657	8,000	

APPENDIX III

THE DIALECTS OF MANDI AND SUKET

BY

The Revd. T. Grahame Bailey, B.D., M.R.A.S.

INTRODUCTION

Mandi Suket are two important states lying between Simla and Kangra proper with Kulu for their eastern boundary. They form part of the central linguistic wedge between Camba and Simla States, it being noticeable that north of Kangra and south of Suket certain linguistic peculiarities are found which are not observed in the central area. The future in l alluded to in the Introduction to the Camba Dialects (see Appendix to Gazetteer of Camba State) is a good example of this. In the central wedge the future is in g or gh, whereas to the north and south and east it is in l.

The main Mandi dialect is rather widely spread. It is found with very little change over all the western and northern portions of the State. It is also spoken in the capital, and extends without much variation southwards into Suket. In the following pages a grammar of this dialect is given, followed by brief paradigms to illustrate the northern dialects. The centre of North Mandeali may be taken to be Jhatingri half-way between Sultanpur and Palampur. Chota Banghali, as alluded to in the following pages, is spoken in that portion of Chota Banghal which lies in the extreme northern portion of Mandi State. In the south-east portion of the State called Mandi Siraj the dialect spoken is still Mandeali, but it shows resemblances to inner Siraji, the dialect of the northern half of the Siraj Tehsil of Kulu.

In Mandeali the genitive is formed by the postposition ra, the Dative by jo, and the Ablative by ge or the.

Although the dialect shows many traces of the influence of Panjabi, it keeps clear of that influence in the Plural of nouns, which is in the Oblique generally the same as the singular except in the Vocative case. In parts of the State we have the special Fem. Oblique form for 3rd Pers. Pronouns so characteristic of Kulu and the Simla States. The future is either indeclinable in—ng or declinable in—gha.

The Pres. Part in composition is indeclinable, as kara ha, is doing, which reminds us of the Kashmiri participle karan. Another resemblance to Kashmiri is in the confusion between and eye. Thus we find tes used interchangeably with tyes, es with yes, etthi with ietthi (yetthi). The interchange of a and h finds frequent exemplification in the hill states, *e.g.*, in the Pres. Auxiliary ha and sa or asa. See the dialects passim.

Mandeali has a Stative Participle in—ira, thus paira, in the state of having fallen, pitira, in the state of having been drunk. The peculiarity of the Verb bahna, beat, has been alluded to under the Verb in Mandeali and Chota Banghali, and under the latter dialect will be found a reference to an interesting undeclined participle used in the Passive to give the sense of ability.

In Suket there are said to be three dialects—Pahar, Dhar and Bethal, but this is obviously an overr-efinement. I have not had an opportunity of studying them at first hand and therefore make the following remarks with some reserve.

The Singular of nouns is practically the same as in Mandeali but in the Plural Panjabi influence is shown in the Oblique termination—a. The Agent Plural, however, ends in—ie. the is used for the Ablative postposition, ge being generally kept for the purpose of comparison of Adjectives. The pronouns are almost the same as in Mandeali.

In Verbs we find that the Dhar dialect resembles Panjabi in the Pres. Part. in—da, and in its past Part. in—ea. The Bahal dialect has its Pres. Indic. like Mandeali, as mara hai but in the Imperfect has the peculiar double from, mara ha tha, he was beating, mara he the, they were beating. The Suketi dialects make their future in gh and

possible g or ng, and have the Stative Participle iɑ—cira, as mā'rira, in the stat of having been beaten. The Auxiliary Present and Past is the same as in Mandeali.

The system of transliteration is that of the Asiatic Society of Bengal. idenotes the sound half-way between in i and i, u italicised in a word printed in ordinary type is half-way between u and u; eu similarly italicised represents the sound of e in French je; c is the sound of ch in child, ch is the corresponding aspirate.

25th February, 1905. T. GRAHAME BAILEY

APPENDIX IV

EXTRACT FROM PUNJAB GAZETTEERS, MANDI STATE 1920

CHAPTER I. A

PHYSCIAL ASPECTS

Climate and rainfall

For the hill portion adjoining the Kulu sub-division, it may be said with certainty that the rainfall is greater than in Kulu proper, which is often without rain when Mandi has received good falls. For the tracts adjoining the Kangra district, the rainfall is certain better than for the Hamirpur tehsil, and in some parts is at least equal to that of the Palampur tehsil. It is, indeed, only in very exceptional years that the rainfall, either in the monsoon or cold weather, fails seriously. On the other hand, it is rare that the distribution is favourable to the agricultural conditions of all portions of the State.

The winter snow often comes down to 4,000 feet and has been known to fall in Mandi itself; but below 7,000 feet it does not lie long on the ground. In a normal year it disappears before the end of March from places of less elevation than 10,000 feet, and by the end of May it is found only on the highest peaks and in sheltered nullahs with a northern aspect.

The most unhealthy period of the year is the early autumn when the soil is drying after the rains and the rice fields are still damp from artificial flooding. Malaria is then common in the lower valleys and during August and September intermittent and bilious fevers and bowel complaints are prevalent. But in the hills this season is healthy and the hillmen greatly dislike coming down at that time to the lower valleys. They are very susceptible to malaria which they attribute to the smell of the ripening paddy.

GEOLOGY

The following note by Mr. H. H. Hayden is taken from the last edition of the Gazetteer:—

"The State lies partly on rocks belonging to the central Himalayan zone of unknown age and partly on Tertiary shales and sandstones. The rocks of the central zone consist of slates, conglomerates and limestones, which have been referred to the infra-Blaini and Blainin and Krol groups of the Simla area. The sandstones and shales of the sub-Himalayan zone belong to the Sirmur series of Lower Tertiary age and to the Siwalik series (Upper Tertiary). The most important mineral of the State is rock salt. The age of the salt is quite uncertain, but it appears to be connected with the Tertiary beds."

FLORA

The flora of Mandi has never been completely investigated. The greater part of the State closely resembles the Simla district, which has been very thoroughly dealt with in Collett's Flora Simlensis, and it is safe to assume that this describes equally well the flora of Mandi, except in the lower parts of the State, where the vegetation is more tropical, and species are found which have no place in the Simla flora. In this part of the State, the vegetation is characteristic of the lower hills of the western Himalayas and approaches very closely to that of parts of the Punjab plains. The more prominent trees of this region are the simbal (bombax malabaricum), the mango (mangifera Indica), the tun (cedrela toona), several species of acacia and albizzia, the salambra (odina Wodier), two species of terminalia, and the joman (eugenia jambolana), associated with these is the large taur climber (bauhinia Vahlii), leaves of which are used extensively as plates. The bamboo (dendro-calamus strictus) is also indigenous in this region and is largely planted by the people near their villages. The waste land is covered with thorny shrubs, but where the grazing is very heavy these are gradually being ousted by the euphorbia (often erroneously called cactus),

The first conifer begins at elevations between 2,000 and 3,000 feet, the chil (pinus longifolia) then gradually replacing the more tropical species. From here upwards, the tree-growth is distributed in more or less well marked climatic belts, the prominent elements of which are the conifers. Other factors besides elevation come into play, however, causing the characteristic trees of the successive zones to intermingle, especially near the limits of their distribution. Speaking generally, the chil may be considered the prevailing conifer up to 6,000 feet when it gives place to the deodar (cedrus deodara) and the blue pine (pinus excelsa), which occur either pure, or more usually mixed, at all elevations from 5,000 to 8,000 feet and often higher on the warmer slopes. Above these come the spruce (picea morinda) from 7,000 to 9,000 and the silver fir (abies Pindrow) from 8,000 to 10,000 feet. Each of these zones possesses a characteristic oak. At the lower elevations the ban or white oak (quercus incana) is not only mixed with the chil, deodar and blue pine, but in association with rhododendron arboreum and pieris ovalifolia also forms extensive forests of its own. At 7,000 feet it is replaced by the mohru or holly oak (quercus dilatata) and the green oak (quercus dilatata) while in the upper zone the red or kharsu oak (quercus semecarpifolia) intermingles with the spruce and fir.

Above 7,000 feet the flora is almost entirely temperate in character and there are few plants which do not belong to one of the European familie. On the colonnade of the higher hills many trees of European genera are found, such as the walnut, elm, horse-chestnut, maple, holly and poplar, often accompanied with a dense mass of undergrowth of hill bamboo, ferns and shade-loving herbaceous plants. The most common shrubs at the higher elevations are the berberis, indigofera and desmodium, while the sharp thorned bakhal (prinsepia utilis) is to be found growing on waste land throughout the State.

The herbaceous vegetation of Mandi, particularly at the higher elevations, contains many species of great beauty, which give to the country, except during the winter months, the aspect of a wild garden. The coming of spring brings with it the violet, larkspur, wild strawberry, and anenome and one of the wild geraniums, while in the high level forests primula denticulata and viburnum foetens burst into flower almost before the snow has had time to melt; then, as the weather becomes warmer, the wild rose and clematis cover the ugly shrub growth with a mass of flowers and the mohru woods are spread with a carpet of irises. With the break of the monsoon, the whole country becomes covered with luxriant vegetation. The grassy uplands are filled with potentilae, parnassus, balsams and other gaily coloured flowers; the oaks become covered with tree ferns, while the woods contain many species of ground orchid, cautleya and roscoea. It is in the autumn, however, that the country is at its best, when the foliage is changing colour and the bright red leaves of Virginia creeper cause even the sombre deodar and spruce to take on a cheerful appearance; at this season too appears the wild narcissus, the most delicate and sweet-scented of all nature's bounties.

Many of the plants of Mandi are of considerable value to the people and in the following list of the more important trees and shrubs brief notes are given on their economic uses:—

LIST OF THE MORE IMPORTANT TREES AND SHRUBS

Natural order	Botanical name	English name	Local name	Economic uses
Nerberidaceae	Berberis vulgaris, aristata, coriaria and lycium.	Barberry	Kashmal	The fruit is eaten. Rasaut, an extract prepared from the root is used as a febrifuge. Brush wood used for fuel, hedges etc.
Malvaceae	Bombax malabaricum	Silk cotton tree	Simbal, Simal	Valuable timber in the lower hills.
Tiliaceae	Grewia oppositifolia	..	Biyuhal, Biul	.. Wood used for the pole (tangris of the field roller (mai); leaves for fodder. The fibres of the inner bark are made into ropes. Dry branches are used for torch wood and the fruit is eaten.

LIST OF THE MORE IMPORTANT TREES AND SHRUBS—*contd.*

Natural order	Botanical name	Eglish name	Local name	Economic uses
Meliaceae	Melia Azedarach	The Persian Drek. Lilac.	Drek	Oil is extracted from the fruits.
	Cedrela serrata	Hill Tun	Darli	Timber used for furniture.
	„ Toona	Tun	Tuni	Timber used for building, furniture, etc.
Celastraceae	Euonymus tingens	..	..	The inner bark yields a yellow dye.
Rhamnaceae	Zizyprus jujuba	..	Ber beri	Fruit edible.
Sapindaceae	Aesculus indica	Indian horse chestnut.	Khanor	The seeds are made into flour and eaten; the wood is used for domestic use.
	Sapindus Mukorossi	Soap-nut tree	Ritha doda	The fruit is used instead of soap for washing clothes.
	Acer caesium Staphylea emodi.	..	Mandar Nagdaun	Walking sticks made of this wood are supposed to keep off snakes.
Anacardiaceae	Rhus continus	Venetian sumach	Tung Titri	The wood is used for dyeing wool orange or scarlet; the bark and leaves for tanning.
	„ Punjabensis	..	Titri	The juice is highly corrosive and raises blisters on the skin.
	„ Wallichi	..	Rikhal	
	„ Pistacia integerrima	..	Kakkar, Kakre.	The heartwood is used for building, furniture, etc. Galls which form on the leaves, known as Kakri singhi, are used for medicine.
	Odina Wodier	..	Salambra	Used for building, etc. A yellow gum is obtained from the bark and used for calico-printing.
	Spondias mangifera	The Hogplum tree	Ambola	Leaves for fodder, fruit eaten, wood for fuel.
	Mangifera indica	Mango	Am, Amb.	Timber used for building, fruit eaten.
Leguminosae	Rutea frondosa	..	Palas, Plah	The leaves are used for fodder, plates and for making umbrellas. A yellow dye is made from the flowers, a red astringent gum is obtained from the bark.
	Indigofera Gerardiana	..	Kythi	Leaves for fodder.
	Eugenia-dlabergioides	..	Sannan	Wood for furniture and agricultural implements, leaves for fodder.
	Dalbergia Sissoo	Shisham	Siham, Tali	Timber tree.
	Cassia fistula	Indian Laburnum	Alih, Ambaltas	Seeds used as purgative.
	Bauhinia purpurea	..	Karali	Leaves for fodder; fuel.
	Bauhinia variegata	..	Kachnar	Leaves for fodder; fuel.
	Baudhia Vahlii	..	Taur	Ropes made of the stem, the leaves are used as plates, and made into umbrellas. The seeds are roasted and eaten. The wood is burnt in temples.
	Acacia arabica	..	Kikar	Timber and fuel.
	„ eburnea.	..	Kikri	Do.
	„ catechu	..	Khair	Do.
	Albizzia lebbek	..	Siris	Do.
	„ Stipulata	..	Ohi	Do.
	„ Procera	..	Sirin	Do.

LIST OF THE MORE IMPORTANT TREES AND SHRUBS—*contd.*

Natural order	Botanical name	English name	Local name	Economic uses
Rosaceae	Prunus puddum	..	Paja	Fodder leaves and fuel.
	,, Padus	..	Jamun	Fuel.
	,, Armeniaça	Apricot	Aru	Fruit eaten.
	Prinsepia utilis	..	Bekhal	Oil obtained from the seeds, used for food, illumination and external application.
	Spiraea canescens	..	Khushti.	Fruit eaten.
	Rubus paniculatus	Raspherry	Kalakha, Lisri	Do.
	,, ellipticus	..	Anacha, akha	Do.
	Pyrus Pashia	..	Kainth, Segal	Wood used for agricultural implements.
	,, Lanata	..	Palo	..
	,, aucuparia	Rowan	Battal, rung grek	..
	Cotoneaster bacillaris	..	Riuns	Used for walking sticks.
Combretaceae	Terminalia belerica	..	Bahira	Fruit used for tanning and as a purgative.
	,, chebula	..	Harda	Do.
	,, tomentosa	..	Alsan	Building timber.
Mrtaceae	Eugenia Jambolana	..	Jaman, Jumni	Timber and fuel; fruits are eaten
Lythraceae	Punica granatum	Pomegranate	Anar, daru	Fruit eaten; bark as a dye and for chutney.
Samydaceae	Casearia tomentosa	..	Bheri	The fruit is used as a diuretic
Cornaceae	Fornus obpitata	The strawberry tree	Thramal	Fruit edible.
Ericaceae	Pieris valifolia Rhododendron arboreum.	..	Airan, bhiul brah	Fuel. Fuel. The flowers are made int. chutney and the wood int. agricultural implements and do mestic use.
	Campanulatum	..	Kashmiri patta	Leaves and flowers are made into snuff.
Styracaceae	Symptlocos cretaegoides	..	Lojh, todar	A yellow dye is obtained from the leaves and bark.
Oleaceae	Fraxinus floribunda	Ash	Angu	Timber, Manna exudes from the bark by incision.
	Olea cuspidata	Olive	Kahu	Walking sticks, fuel and fodder.
Apocynaceae	Wrightia tomentosa	..	Dudhi	..
Euphorbiaceae	Buxus sempervirens	Box	Summa, shanshad	Wood used for combs, etc.
	Phyllanthus emblica	..	Ambla	Fruits are eaten; fuel.
	Mallatus philippinensis	..	Kambal.	The crimson poder which covers the capsules is used for dyeing silk.
Urticaceae	Ulmus Wqllichiana	Elm.	Marihnu, maran	Timber.
	,, Villosa	Elm.	Do.	Planted as a roadside tree.
	Celtis australis	..	Khirk	Timber, fuel and fodder.
	Morus indica	Mulberry	Tut	Fruit eaten, timber and fuel.
	,, serrata	Do.	Chimu	Domestic use. Excellent fodder tree.
	Ficus bengalensis	Banyan	Barket	Usually planted as a shade-giver.
	,, religiosa	Peepul	Pipal	Do.
	Fius palmata	..	Phagra	Fuel; fruit eaten.
	,, Roxburghii	..	Triambal	Fodder leaves; fruit eaten.
Juglandaceae	Juglans regia	Walnut	Akhrot, khor	Timber for building, furniture etc., fruit eaten.

LIST OF MORE IMPORTANT TREES AND SHRUBS—*concld.*

Natural order	Botanical name	English name	Local name	Economic uses
Myricaceae	Myrica Nagi	..	Kaiphal, Kafal	Timber, fuel, fodder; fruit is eaten.
Cupuliferae	Betulla utilis	Birch	Bhojpatra	The bark is used as paper for writing and packing and also for umbrella covers.
	Alnus nepalensis nitida	Alder	Kosh	Timber; fuel; and bark for tanning.
	Quercus dilatata	Holly oak	Mohru	Agricultural implements; leaves for fodder, bark for tanning.
	„ glauca	Green oak	Banni thira	Fuel and fodder.
	„ incana	White oak	Ban	Fuel; charcoal; fodder; bark for tanning; agricultural implements and in places for building.
	„ semecar, pifolia	Red oak	Kharsu	As above.
	Carpinus viminea	Hornbeam	Chir	Fuel and fodder.
Salicaceae	Salix alba	White willow	Biuns	Planted as shade-giver.
	„ Babylonica	Weeping willow	Manjnun	Do.
	Populus oiliata	Himalayan poplar	Pahari pipal, chaluna	Planted as shade-giver fuel and fodder.
Coniferae	Pinus excelsa	Blue pine, Chir pine	Kail	Timber tree.
	„ longifolia	Chir pine	Chil	Do.
	Cedrus deodara	Deodar	Kelo	Do.
	Picea Morinda	Spruce	Rai	Do.
	Abies Pindrew	Silver fir	Tos	Do.
	Taxus beccata	Yew	Rakhali	Bark used for paper making.
Gramineae	Arundinaria falcata	Hill Bamboo	Nirgal	Stems are used for pipes, basket work etc.
	Arundisaria spathiflora	Do.	Garhi	Do.
	Dendro-calamus strictus	Bamboo	Bahanj	Used for building, poles, sticks, mats, chicks and basket making.

FAUNA

Wild Animals

Mandi is well stocked with game. Black bear are common in the higher valleys, while leopard are found throughout the State, and regularly take toll of the Gaddis and other flocks. Barking deer and gural are frequently found at medium elevations, the former usually inhabiting the shady nullahs in the oak and hard-wood forests, while the latter favour the precipitous slopes above the Beas. Pig are found throughout the lower parts of the State, and are occasionally met with as high as 7,000 feet. The inhabitants of the highlying spruce and fir forests, the musk deer and the serao, are to be found in certain localities, but are by no means plentiful. Among the other animals may be mentioned the hill fox, the jackal, the porcupine, the pine marten, the langur and Rhesus monkeys, the flying fox and flying squirrel and the wild cat, all of which are more or less common in different parts of the State.

Game Birds

Game birds are plentiful. There are five kinds of pheasant—the munal (the hen of which is known as the kardi), the horned pheasant (locally called the jujurana or phulgar), the koklas or kwaksa, the chir, and, the most common of all, the kalij, known locally as kalesar or kolsar. The chikhor is found in most parts of the State, and in certain localities quail also found. Both the black and the grey partridge are found, the former being common at medium elevations, while the latter is to be met with only in small numbers near the Kangra border at Sandhol. There is also one species of

wood partridge, whose habitat is the deodar and oak forests between 6,000 and 8,000 feet, while in the scrub forest of the lower hills both the peacock and common jungle fowl are plentiful. During the winter large flocks of blue rock pigeon come down to the fields of the Bahl and Sandhol, and the Himalayan wood pigeon can be seen in large numbers in the kail forests. Several species of duck pass through during the spring and autumn, resting on the lakes and streams on their way to and from their breeding grounds. The woodcock is also occasionally met with. The goshawk, which is valued for sporting purposes, is caught during the autumn and winter in nets stretched along the tops of oak-covered spurs.

A close season for all kinds of game is observed from the 15th March to the 15th September, and during the rest of the year shooting is allowed only with the permission of the State; but, as a large number of the villagers possess guns, a great deal of paoching is carried on. The shooting of the musk deer, munal, horned pheasant and peacock is prohibited at all times. A certain number of professional shikaris are employed to keep the Raja's kitchen supplied with game, while others have to present the State with a definite number of musk pods during the year.

Other Birds

No classification has yet been made of the birds of Mandi, but owing to the large range of altitudes, the number of species is very large and it may be safely assumed that it is at least as great as in Chamba where one observer counted two hundred and sixty-five varieties. Among the birds of prey the lammergeir and the golden eagle are found only in the higher altitudes; the vultures of the Punjab plains and the common kite are all found, there are several kinds of hawks and at least one falcon. Of the smaller birds, fly-catchers, shrikes, cuckoos, wagtails, bulbuls, warblers, pipits and many members of the thrush family are most common. Water birds, small and large, are numerous and many of them breed in the State. Mandi, in short, is an excellent field for the ornithologist.

Reptues

Poisonous snakes do not appear to be common except in the parts adjacent to Kangra where occasional deaths are reported from snake bite. The cobra is rare, but the karait is not uncommon and vipers are sometimes found. Non-poisonous species, and especially grass snakes are common, the best known being the nag which in the hills is not the cobra but a large grass snake light brown above and of light colour below ; it is worshipped by the people. Rock lizards are found everywhere during the hot weather; and in the rains some of the oak forests are infested with leeches.

Fish

The following note on the fisheries of the State was kindly supplied by Mr. G.C.L. Howell, C.S., late Director of Fisheries, Punjab :—

I examined the Beas and three of its typical tributaries in these States—the whole Suketi basin, the lower waters of the Uhl and the Uttarsal Khad in September 1913. Of the latter, the Uhl contains practically no marketable fish with the exception of the mountain barbel (sal). Both the Uhl and the Uttarsal might well be stocked with brown trout from Kulu. The Uttarsal, like most of the waters in both States, is regularly poisoned from the end of April to the break of the rains in July. The poison used is cactus juice; other poisonous plants are also used, sometimes in combination with cactus juice. They are called dudhla or balodar (ankar in Kangra), gandri (ganiri in Kangra) and sama. Casting nets are used all the year round with mesh of ½ to ¼ bar. measure; they kill fish of four inches long and over. The scoop net (jaltri) described below is also used. In September six chhips are erected regularly. If mountain brabel were less prolific (a 2¼ lb. female 15 inches long was found to contain 15,000 ova and the species breeds we know from April to December) there would not be fish in the Uttarsal The Uhl is hardly fished at all

"*The Suketi and its tributaries* —The whole of the Suketi valley is a vast breeding ground for fish. At one time no fishing of any sort or kind was allowed in the lower five miles of its course from the Suket boundary to the confluence with the Beas Fishermen down the river as far as Maushera have told me that so long as this order was enforced the Beas was full of fish. Then came a period during which this stretch was dynamited regularly and openly and all restrictions on fishing were withdrawn The effects were felt at once all down the river : and it is quite certain that the falling off in the stock of Beas Mahasir, which every angler and every netsman noticed, was due to the violation of this (the only effective) sanctuary on the Beas

"The breeding grounds consist of the main stream and five fairly important tributaries all fed by small perennial streams rising in hills averaging less than 6,000 feet in height. Their temperature rises to 80° and more, even in September. All abound in vegetation and in crabs (masakra), snails (phill) and other minute crustanceae, and the insent life. is most prolific. The bed is gravel from source to mouth. There are plenty of deep pools for big fish to lie in.

"The marketable species which spawn in these waters are :—

"(I) Mahasir (serr, serra, serdu, khakiaru, chitrahtu or pharku) — These fish push right up the river as soon as the rains break. I found their fry in a spring at Sadoth near Ledah on the Mandi-Hoshiarpur road on September 8th. This was at least 3,000 feet above the Suketi, and though I should never have believed that any fish, large or small, could find its way up some of the almost perpendicular places in its course. At every point from Ghojpur to Mandi I found mahasir. The water is incomparably the finest mahasir nursery I have seen. It should have swarmed with mahasir fry; but they had nearly all been destroyed by the insensate methods of fishing in vogue in both States

"(*ii*) Oreinus sinuatus—Mountain barbel (sal saloti, gugal, gungal, swali, chith) — These run up the Suketi in October–November and have found their way (by the outlet) into Riwalsar Lake. There they are protected rigidly, and breed freely during the autumn and early winter in these waters.

(*iii*) Labeo dipolstomus (gid or geor), which is common, though less common than mahasir

"As to the smaller species they are (especially toora and pata and pali) extremely good to eat, and local taste seems to think that the smaller the fish the better it is as food.

Fishing Castes—Practically every one is a fisherman who lives near the Suketi, and kills by fair means or foul every thing which swims I found that zamindars often knew just as much (or as little) about fish as jhiwars for instance

The methods of fishing, arranged in order of popularity are :—

"(*i*) Poison as described above. This destroys not only fish but all life in the water in which it is introduced. Its use is forbidden. But no adequate steps are taken to enforce the prohibition in either State, any more than there have been, until recent years, in British territory.

"(*ii*) Weirs (bar) which are built so as to block the run of spawners at the beginning and end of the rains

"(*iii*) Pakai—a huge triangular dip net rigged on three long bamboos with a mesh of 1/3 to ¼ inch in the height.

"(*iv*) Jaltri—a small elliptical dip net with a lifting line. The mush is never more than ¼' bar measure and generally less.

"(*v*) Chhip—a wicker platform trap set at the narrow end of a deflection in the stream to catch descending fish during the rains

"(*vi*) Jal—an ordinary casting net : the maximum mesh as a rule is ½ inch.

"(*vii*) Nilotu—a stake net set in shallows in July and August. This blocks the whole stream night and day.

"(*viii*) Bhall—a three-pronged fish spear used in shallows. It takes a good eye and a good wind to run down and spear the mighty maharis even in a shallow.

"(*ix*) Pathailu—an ordinary 'long line' with hooks and snoods. I am not sure that this is used in the Suketi, but know that it is in the Sutlej in Suket territory.

"Conclusions.—It would be quite easy to resuscitate the Mandi Suketi stream and its tributaries."

Species of fish found in Mandi Waters.

(1) Barbus for or Mahasir . .	Seer (big).
	Serra (Small).
	Sirdu (small).
	Khakiaru.

Pores on nose.	Totar.	Ova	Bati.

Since the above was not written, the Durbar has passed a Fisheries Regulation, and has taken measures to protect the fish resources from ruinous methods of destruction. Brown trout have also been introduced into the Uhl, the upper reaches of which should become an ideal stream for anglers.

SECTION B.—

ARCHAEOLOGY.—For the following account of objects of archaelolgical interest, the material has been derived mainly from officers of the Archaeological Survey of India, Northern Circle, and the Durbar is, in particular, under a debt of gratirude to Dr. Vogel and Pandit Hira Nand Shastri—

Budhism has left few monuments of interest. The gonpa, or Budhist shrine, at Rawalsar is of recent date, and differs little from similar sanctuaries found in Lahaul and Bushahr. On the outer wall are the Protectors of the Four Regions, Painted in harsh colours, two on each side of the entrance. On the walls of the verandah there are two other frescoes, one representing the Wheel of Existence and the second a Lama or ascetic. Within the shrine is an image of Padma Sambhava, the Chief object of worship, who has however, been confused by the Hindus with the Bishi Lomas. According to the Brahmans, the seven floating islands of the lake were created by Shiva, in reward for the ascetic devotion of this rishi, and an image of the saint is preserved in a low-roofed and primitive building on the bank of the lake. A fair is held in his honour on the first of Baisakh each year and is attended by several thousands of both sexes. An earlier fair takes place in Phagan, but this is essentially of Budhist interest, a considerable number of Tibetans, Lahulis and Kanawaris performing the pilgrimage each year. On the rocks above the lake there are many Tibetan inscriptions, the most striking being the figure of Padma Sambhava himself who is shown with the usual attributes a thunder bolt, a human skull and a trident crowned with three human heads.

Trilok Nath

Except at Riwalsar, no Budhistic monument exists in Mandi, unless indeed the shrines of Trilok Nath and Panchavaktra, which are now sacred to Shiva, can be regarded as of Budhistic association. Trilok Nath, as he is represented in the Chandrabhaga valley, has been indentified with the Bodhisat Avaloketeshwara and it has been suggested that the identity of Shiva with Trilok Nath in Mandi and parts of Kangra may be due to Budhistic influence [1].

The temple of Trilok Nath was built by Sultan Devi, the pious queen of Raja Ajbar Sen, in the Kali year 2264, corresponding with the Saka Samvat 1442 and with 1520 A.D. It is a Shiva temple erected in stone and in the Sikhara style. The cella (8 ′ 4″ square) contains a life-sized three faced, stone image of Shiva who is riding on a bull with Parvati in his lap. There is also a second image, probably of Shiva, which, however, is much worn. The porch measures 7′ 8″ by 3′ 6″, and the lintel rests on two fluted pillars and plasters. An attenddant, or door-keeper, is shown on each of the two plasters, and there are floral and animal carvings on the capitals of the pillars. Between the pillars is the trefoil arch characteristic of Mandi architecture. The workmanship throughout is good; but the carving has suffered much from neglect and is much worn owing to the soft nature of the sands stone employed, but it is still one of the finest monuments in the State. The image which it enshrines is connected with the rite of Sati. It is said that the woman whose fate it was to burn on the furneral pyre was brought to the temple before she mounted the pyre, and was there shown the face at the back of the idol. This was the last rite preparatory to immolation, the sight of the face being supposed to inspire the Sati with frenzied desire to plunge into the flames.

The Panchavaktra Temple

At the confluence of the Beas and Suketi is a stately Sikhara temple evidently of considerable

1 Note-Vide Journal Asiatic Society of Bengal, volume LXX., Part I No. I 1962.

age and dedicated to Shiva under the name of Panchavaktra (the five faced one). The main porch or mandap is supported on four heavy pillars, the capitals of which are carved in flower-pot design and the bases in rosettes or lotuses. The main image is of some interest, since the five faces are not placed in one row as is usually the case with polycephalic statues, but in such a way that the fourth face is on the reverse side of the slab which is otherwise quite plain and the fifth on the top of the image slab. Thus, then seen in front, only three faces are visible. The number of arms is ten. Such images of the five-faced shiva are not uncommon in Mandi, and since their attributes hear a definite resemblance of those of Avaloketesh-wara, it has been summarised that they owe their origin to Budhism.

Normal style of architecture

Of the ancient temples of Mandi town, it may be said in general that the architecture is good. They are chiefly in stone and in the style of Sikhara temples of the plains. They consist of a cella, surmounted by a spire and a porch usually decorated with carvings. The spire is of the usual type. In sanctuaries of a comparatively later time, however, it assumes the form of a dome, in consequent of which they appear more like mosques than Hindu temples. The larger and more important tamples are also furnished with an anteroom or mandap. The particular feature which distinguishes them from the temples of the adjoining States is the trefoil arch which generally decorates the facade or porch. It chiefly rests on the capital of the pillars or pilasters supporting the arch which are usually fluted. The brackets are often shaped as human figurines, seated on the head of an elephant and holding the trunk in their hands. The corners are sometimes ornamented with the figures of celestial musicians or gandharvas, and the whole combination produces a very pleasing effect.

The temple of Bhut Nath

The most popular shrine in Mandi is that of Bhut Nath who is venerated as the guardian of the town and represents Shiva in his attribute of Lord of Creatures. The legend relating to the discovery of the idol is as follows:—Formerly the land on the left Bank of the Beas, now occupied by the town of Mandi, was waste and there the local zamindars used to graze their cattle. One cow, though newly calved, failed to give milk for several days, and the owner keeping a watch on her, discovered that she gave her milk to a stone. The news reached the Raja Ajbar Sen—and shortly afterwards Shiva in a dream ordered him to dig beneath the image. The Raja did so and the idol now worhsipped in the temple of Bhut Nath was discovered. So the foundation of the present city was laid; for up to the time of Ajbar Sen the capital was on the right bank of the river.

The temple is of stone in the Sikhara style consisting of a small porch and a cella surmounted by spire. The sabha mandap in front is apparently an addition. The porch is supported by fluted pillars with capitals carved in elephants, the arch between being trefoil.

Of the more modern temples the finest form an artistic stand-point is the sanctuary of Adhnari, the stone image of which represents Shiva and his consort Parvati, the right half being devoted to the former and the left to the latter. Shiva is portrayed with knotted hair, a necklace of human skulls, a serpent, a musical instrument in one hand and a damru in the other. Parvati is shown wearing a diadem, and ear-ring and a nose-ring. To the main image is joined a slab on which the vehicles of the deities—the bull and lion are carved. The whole measures 4′ 4″ high by 3′ 3″ broad. On the right and left respectively are images of Bhairava and Hanuman. The building is ascribed to a kalesar Mian of Mandi, but is incomplete. It consists of a cella, porch and sabha mandap and the carvin throughout is rich and of considerable artitic beauty. Unfortunately, the shrine is in a poor state of preservation.

The Salaum rock inscription

The oldest archaeological record in the State is the inscription on a porch at Salaun about $1\frac{1}{2}$ miles from Mangalur which is ascribed to the fourth or fifth century. It simply records that a Maharaja Sri-Chandesvara-hastin, who was the son of a Maharaja Ishvara-hastin, and belonged to the family of Vatsa, conqurered in battle a Rajjila-bala and founded a town of which the name apparently was Salipuri, possibly the present village of Salri situated near the site of the inscription. These names are of no historical value as their relationship is unknown.

Archaeology art

The State Treasury contains a good collection of paintings of historical and mythical subjects. They are evidently the work of the Kangra School which flourished in the 18th century at the courts of

the Hindu princes of the Punjab hills and are remarkable for their brilliancy of colour, minuteness of decorative detail and delicacy of outline. Of the portraits that of Keswa Sen (A.D. 1595) is the oldest. The picture of William Moorcroft, though not old, has its own special interest.

Among the pictures dealing with mythological subjects, the most interesting are those representing the ten Mahavidyas, or forms of Durga. They illustrate faithfully the dyanas, or descriptions, which are given on the back of the pictures, and afford a clear idea of the aspects of the goddess as conceived by the Tantrikas or followers of witchcraft and black magic. Artistically, they exhibit the merits of the Indian pictorial art of the late Moghal period.

The third collection illustrate the Hindi poem—the Hamir-Hath (Saka) or obstinacy of Hamir—in which a legendary account is given of the fight between Hamir, the renowned Chief of Chittor, and Ala-ud-din Khilji. The pictures are twenty-one in number and are ascribed to Sajnu, a painter of the Kangra School, who flourished at the beginning of the 19th century. The same characters are introduced in many of the 19th century. The same character are introduced in many of the pictures and the painter has shown great skill in maintaining the identity of his subjects throughout the series. The detail is profuse and always of high finish.

On the back of the pictures is an account of the story they illustrate, but is authorship is unknown and it differs in some respects from other tents versions. An account of the Hamir-Hath by Pandit Hira Nand, Shastri, was published in the Journal of Indian Art and Industry, October 1915, with reproductions of the Mandi collection.

Section C—Extant

History

The Durbar is indebted to Dr. J. Hutchinson of Chamba and to Dr. Vogel for the following account of the political history of the States :—

The Mandi State, like most of the other Hill States, takes its name from its capital which is situated on the left bank of the Beas. Mandi is a Hindi word, meaning market and it may possibly be connected with the Sanskrit word "mandapika". meaning "an open hall or shed", and may be derived from the Sanskrit root mand, meaning "to adorn or distribute". If a conjecture as to the origin of the name may be offered, it probably took its rise from the fact that, in ancient times, as at the present day, the place was a centre of trade on the main route from Yarkand and Ladakh to Hoshiarpur and the plains. The earliest mention of the town is on the inscription at the Trilok Nath temple in Old Mandi, which is dated in the year 2264 of the Kaliyuga era, and the Saka year 1442, corresponding to A.D. 1520.

Tibetan association

Among the Tibetans, Mandi is known by the name of Zahor, and it has an interesting association with the great Budhist teacher and missionary, Padma Sambhava (A.D. 750-800), for it was from Zahor or Mandi that he went at the request of the Tibetan King, Srongide btzen, to preach the doctrines of Budhism in Tibet. Pandit Hira Nand Shastri, to whom we are indebted for this information, states that in his lamaist representations Padma Sambhava appears in the ancient Mandi garb, and the special head-dress worn by him is still called Zahorma. Many Tibetans come on pilgrimage from Tibet every year in winter to the holy lake of Riwalsar in Mandi, which they call Padma-can, and the spirit of the saint is believed to reside on the floating islands in the lake and is worshipped by them. They approach the lake from some distance on hands and knees. The Hindus look upon Riwalsar as the abode of Lomas Rishi whom they probably identify with Padma Sambhava. We are also told that many religious books were taken into Tibet in early times from Zahor; and during the reign of Landarma (C.A.D. 900), the Tibetan king who persecuted the Budhists, many books are said to have been brought to Zahor for safety, and are believed by the Tibetans to be still lying hidden somewhere in Mandi. These facts and traditions all go to prove the identity of Zohar with Mandi, or at any rate with the tract around Riwalsar.*[1]

History, Sources of information

As in the case of many of the other Hill States, Sir Alexander Cunningham was the first to institute inquiries into the history of the Mandi royal family and the results of his researches are to be found in the Reports of the Archæological Survey.[2]

*1 Vide A History of Western Tibet, p. 59.

1. Of Cunningham,, A.S.R., Vol. XIV, p. 123.

Unfortunately very little material of a historical character, in addition to the Vansavali, or genealogical roll of the Rajas, is available, and indeed one may say that no reliable history of Mandi in the modern sense of the term, exists anterior to the period of Sikh rule. For this blame may justly be laid at the door of the ancient Mandi rulers, in that they left no reliable historical records behind them; but in this respect they were in no way more blame worthy than most of the other rulers of the Hill States. Under such adverse circumstances the only sources of information to draw upon, in addition to the Vansavali, consist of monuments, coins, inscriptions and such other scattered materials as are available. A history of Mandi compiled chiefly from these sources, and referring to the period from A.D. 1200 to 1870, is to be found in Sir Lepel Griffin's "The Rajas of the Punjab", and an abridged history finds a place in Colonel Massy's "Chiefs and Families of Note in the Punjab". These have been utilized in preparing this history. A vernacular history in Tankri also exists, dealing with the period from the reign of Raja Ajbar Sen, A.D. 1500, to the present time, which contains much information of an interesting character. It was compiled in A.D. 1888 by Brikam Kaith from materials in the possession of an old Mandi family named Bisht. An Urdu work, the Majma towarikh riyasathai Kohistan-i-Panjab by Sardar Hardyal Singh also contains a history of Mandi.[1]

Rule of Ranas and Thakur

The early history of Mandi is similar to that of most of the other Punjab Hill States. In practically all of them we find traditions of a more or less authentic character, pointing to the rule in ancient times of petty chiefs called Ranas and Thakurs; the Ranas being Kshatriyas or Rajputs and the Thakurs of some lower caste. In Mandi, Suket and Kulu the latter were probably Kanets, or of some other allied castes. The title of 'Rana' is an abbreviation of Sanskrit rajanaka meaning "almost a King" and was widely used in the hills in ancient times. Frequent mention of it occurs in the Rajatarangini or History of Kashmir, written and compiled from older documents in the early part of the 12th century, by Kalhana, a Kashmiri Pandit. At that period in Kashmir the title had ceased to indicate an independent ruler, and was used only as a personal distinction conferred by the Raja of the time. The same is true of the title of 'Thakur', meaning "Lord", which was synonymous with Rana in its political signification.[2]

CHAP I.C. HISTORY—*Rule of Ranas and Thakur*

In Mandi and other parts of the hills outside Kashmir, these titles were used in their original meaning to indicate an independent or semi-independent ruler, though the territory owned by each of them was generally of small extent. Traditions of these ancient rulers date from very early times, and there can be little doubt that they were in power long anterior to the foundation of most of the Rajput States of later period. When this political organisation came into existence we have no authentic information to tell us, but its primitive character points to its having been the earliest form of government in force in the hills. The Ranas and Thakurs were numerous and powerful in Mandi, Suket and Kulu, and seem to have retained their independence to a much later period than in many other parts of the hills. Their subjection by the rulers of these and other States involved almost continuous warfare for many centuries, and even after yielding a nominal submission, they were ever on the alert for any opportunity that afforded a hope of regaining independence. The history of Mandi State affords abundant evidence of the truth of this statement. In many of the States they combined against the new ruler, who was in most cases an intruder in the hills, and tried to drive him out; as a rule, however, their mutual jealousies and strife made concerted action impossible; and they were in the end reduced to the position of subjects. Many of the descendants of these families are now common farmers with nothing but the title, which is now a caste name, to prove their former importance.[3]

Common ancestry of Mandi and Suket

The Chiefs of Suket and Mandi are descended from a common ancestor. They belong to the Atri gotra in the Chandarbansi line of Rajput and consequently claim descent from the Pandava family of Mahabharata. The ancestors of the

[1] We are also indebted to S. Sri Gopal, S.D.O. of Mandi State, for much help in preparing this paper. In addition to providing a good deal of new material he wrote the modern history of the State.

[2] Vide Journal Punjab Historical Society, Vol. III No. 1, p. 46.

[3] Vide Journal Punjab Historical Society, Vol. III, No. 1, p. 45.

line are believed to have ruled for 1,700 years in Indraprastha (Delhi), until one Khemraj—the last ruler of the early dynasty—was driven out by his Wazir, Bisarp, who then usurped the throne. Khemraj having lost the kingdom of Indraprastha fled away eastward and settled in Bengal, where thirteen of his successors are said to have ruled for 350 years. Their capital was at Lakshmanpuri on the banks of the Ganges. The most distinguished ruler of this dynasty was Lakshman Sen, who is said to have extended his conquests to Kanauj, Nepal and Orissa, and to have founded Gaur in Malda, naming it Lakhnauti after himself. One of his successors, named Balala Sen, chose Naddia (near the junction of the Bhagirathi and Jalangi rivers) as his capital.

According to Griffin's history of the State the dynasty continued to rule in Naddia until expelled in A.D. 1198-99 by Bakhtiyar, Khilji, one of the generals of Kutb-ud-din, the first Slave King of Delhi. Sur Sen, the last ruler of the dynasty, is said to have died in exile at Prayag or Allahabad, and his son, Rup Sen, then retired to Rupar near Ambala. There too the family was undertaken by the Muhammadans and Rup Sen was killed in A.D. 1210. His three sons fled to the hills for refuge, and after some time established themselves in separate principalities. Bir or Vira Sen became ruler of Suket, Giri Sen of Keonthal, and Hamir Sen of Kashtwar.[1] It is interesting to note that the four branches of the family, including Mandi, still preserve tradition of a common origin from the ruling family of Gaur, Bengal.

There is, however, reason to believe that Suket was founded at a much earlier period than Griffins allows. Sir A. Cunningham placed the foundation of the State in the latter part of the 8th century, and his conclusions are probably nearer the truth. He says[2]: "According to the accepted genealogy of the Mandi and Suket families, the real founder appears to have been Vira Sena, who was the first that bore their common title of Sena. From his time down to the separation of the families, under the two brothers—Sahu Sena and Bahu Sena—there were ten generations. Samudra Sena, the author of the Nirmand record, was the sixth in descent from Bahu Sena. From Samudra Sena down to Ajbar Sena, whose date is fixed by a copper plate inscription in Mandi in S. 1584 A.D. 1527, there were eleven reigns; and as Ajbar Sena is said to have died in A.D. 1534 his accession may be placed about A.D. 1500. The accession of Samudra Sena must therefore be fixed somewhere about A.D. 1500-360 A.D. 1140; allowing 30 years for a reign. Accepting the latter half of the 12th century as the date of Samudra Sena, the separation of the Mandi branch of the family, under Bahu Sena, may have taken place about A.D. 1000, and the original foundation of the family under Vira Sena about the middle of the 8th century. The dates of all the later Rajas are recorded on their Sati monuments".

An average of thirty years to a reign seems a little too high. In most of the other States it ranges from twenty to twenty-five years. On the other hand we have to bear in mind that some names may have dropped out of the Vansavali in the process of copying, especially in the early centuries. This was a thing of common occurrence, as we know from the records of other States. We therefore feel inclined to agree with Cunningham that the Suket State was founded not much later than A.D. 765. An incident in the Chamba annals lends fairly strong corroboration to this conclusion. There is related that towards the end of the 8th century, Brahmapura, the original capital, was invaded by a race of foreigners, called Kira—probably Tibetans—and the Raja was killed in battle. His Rani who was pregnant fled towards the outer hills, and on the way a son was born, who was named Mushan Varma. Ultimately the Rani is said to have found a refuge with the Raja of Suket, who made suitable provision for the young prince, and on his reaching manhood he was married to the Raja's daughter. On that occasion a jagir was granted as dowry in the parganas of Pangna, and from the Suket records we learn that Pangna was the original capital of the Suket. In any case we may safely conclude that Suket was founded not much later than A.D. 800.

---

[1] Kashtwar State was founded at a later date than Suket and the founder cannot have been a brother of Bir Sen, though probably from the same family, vide J.P. H.S.S., Vol. IV No. 1, p. 34.

[2] Vide Cunningham, A.S.R., Vol. XIV, p. 123.

[3] Chamba Gazetteer, p. 70. It is probable that there was an early Sena dynasty in Bengal, whose ancestor, Vira Sena reigney in the seventh century, from whom the later dynasty of Sena Rajas, as also the Suket family, have descended. Cf. Arch. Surve Report, Vol. IV, page 156.

2. Vide Suket Gazetteer, p. 5. In the Chamba records the name is Pangna, evidently a clerical error.

SECTION B—ARCHAEOLOGY

The following notes on the archaeology of the State are reproduced from the last edition of the Gazetteer—

Archaeological remains—Many of the old forts are still extant; some being in an excellent state of preservation. On a stone in Pai fort is an inscription of which the following is a translation—

"Pai fort was built on the 12th of Jeth, St. 71 kham by Raja Bikram Sen—

Brahman Agru	..	..	1
Palsra Paremon	..	..	1
Kahna Jaimal	..	..	1
Kothala Doglu	..	..	1

Narsinghji's Temple—In the town of Nagar, tehsil Bahl, there is a pacca-built temple dedicated to Narsinghji.....Inside the temple is an idol of Pakhan, like the idol of Salagramji found in the temples in the Punjab. The idol is kept locked up in a box of which the keys are entrusted to the pujari. There is a narrow hole in the murti Pakhan, and anyone desirous of seeing the idol closes one eye and peeps through the whole with the other to see the dreadful appearance of Narsinghji. It is said that those who see it are exposed to danger. The pujari who waits upon it bathes and feeds it daily, with eyes closed and face averted. As a rule no one can see Narsinghji, but if anyone wishes to do so, he has to get permission from the State. It is said that a sadhu, who was going to Manikarn, getting permission from the State, saw Narsinghji, and consequently died, and that once thieves made away with certain ornaments from the temple, but were struck blind at a short distance from it and were arrested.

Temple of Mahadeo—The temple of Mahadeo lies one mile north of Nagar town in Bahl tehsil. It is a stone building and the pindi (the upper part of Shiva Ling) of Mahadeo in it is made of black stone, nearly one span in height and about two feet in circumference.

The pujaris employed in the temple belong to the Kondal got of the Gaur Brahamans, and are called Rawals by the Hindus, because whenever a Hindu dies his relations make him give something, such as a cow, silver, gold, grain, etc., as alms before he expires, and the gift is, on his death, appropriated by these pujaris who take even the shroud that covers the corpse. They aver that their forefathers came with the ancestors of the rulers of Suket from Bengal and that the temple and its pindi already existed there. The story about the temple's foundation as told by their forefathers was that it was built in a single night by the order of a certain Raja of the Pandavas. The building, as it now exists, and the forms of the pillar and pindi of Mahadeo, clearly shew them to have been made in very ancient times, but the date and year of its foundation are not known.

The place on which the pindi stands has a great natural rock under it, out of which the pindi has been carved. The fretwork round the pindi is also of stone, and the floor all round it is paved with stones, while four large and four small columns of black stone rise on this pavement. The roof supported by these columns is so built that it is divided into small separate parts furnished with stone slabs....."

Jagan Nath's temple—This temple is in Nagar town. The building is of pacca masonry. The story about its origin is that about 250 years ago

a Bairagi faqir came here from Jagan Nath on the coast of Orissa. He had an idol of Jagan Nath made of sandal wood and the Suket Court hearing that he wished to sell it offered him Rs. 500 for it, but he refused the offer, saying that he was taking the idol to Kulu, the Raja of which had promised him Rs. 1,000. By chance the faqir died before he could set out for Kulu, and consequently the idol was, by the Raja's order, placed in the buildings previously used as a seraglio. He appointed pujaris to the temple and granted land for its maintenance, spending Rs. 500, the price of the idol, on the funeral ceremonies of the Bairagi, and built the temple at State expense.

Endeavours have been made to ascertain the date of the foundation of the temple, without success. The largest idol is that of Jagan Nath, which is a cubit in height. The nose, mouth, eyes and the hands (without fingers) are visible in it. At its right side is an idol of Balbadhar, and at its left one of Lakshmi. There are also other small idols, of Salig Ram, etc., in the temple. Its management is carried on by pujaris who belong to the Kondal got of Brahmans and possess only one house in the State. With the exception of the pujaris nobody may work in the temple. The bhog offered to Jagan Nath consists of rice, pulse, etc.; parshad is aslo distributed. The cost of the bhog is defrayed from the income accruing from the land granted by the State for the maintenance of the temple. One the second of Asar Sudi (the date on which the fair is held at Jagan Nath in Orissa) a fair is held here. A brief description of it is given below—

"Jagan Nath is supposed to become angry (with his wife) in consequence of some misunderstanding. The pujaris are unable to explain how the quarrel arose beyond saying that this is an imitation of what is done at the temple of Jagan Nath in Orissa. The pujaris and others assemble, put the idol in a palanquin and take it to the Jumga garden on the Ghangal Khad, one mile from the town, and stay there for a day. Food is prepared in the garden and served to those who accompany the procession or arrive during the day. There is an idol of Ram Chandra in the garden and Jagan Nath pays a visit to it, cardamoms and nuts being distributed. On the third day Lakshmi, the wife of Jagan Nath, goes to the garden and is reconciled with Jagan Nath".

The idol is then brought back, and placed in its temple where arti is performed. When Jagan Nath is taken to the Jumga garden, the procession is attended by the State officials, elephants and horses forming the retinue. Other people, with drums, flags and palkis, etc., also join it. The idol is brought back in full retinue. Sometimes His Highness the Raja also graces the procession with his presence while going to the garden and back. About 400 people attend the procession.

The Suraj Kund temple—The temple known as Suraj Kund is situated near the capital, at the foot of a hill, on the bank of a ravine. The courtyard is paved with stones and towards the west of it stands the temple building which is of stone. In front of the temple door is a masonry tank (kund) 25×25 feet, which adds to the beauty of the temple.

The temple and tank are surrounded by houses of wood and pacca masonry built by the State for the convenience of travellers. Sadhus visit it on pilgrimages to Mani-karan and other sacred places. .....
Inside the temple there is an idol of Suraj ji weighing about 36 pakka sers made of eight metals. It is of human form, but has four heads. It is flanked by two brass horses, each one balisht in height, thus giving the whole image the appearance of a chariot.

It is surrounded by several other idols of stone which represent Krishna, Radha, Ram, Balram, Hanuman, etc. It is said that the idol was made in the State by the brass workers of Chirag village. Affixed to the wall of the temple is a large piece of stone which bears an inscription, which runs:

"In the name of the deity, Ganesh."

"On the 28th Asar st. 1782, B. Maharaja Garus Sen and Siri Rani Panchamon Dei commenced to build the Suraj Kund temple in order to place the idol of the Sun there".

"The building was completed and the idol of the Sun placed in the temple on the 23rd Bisakh, st. 1785 B. He did so for religious purposes".

Section C—History

The following account of the political history of the State was written by Dr. J. Hutchison of Chamba—

Introduction—The Suket State at the present time is situated chiefly in the Sutlej Valley—which was its original nucleous, but a small portion, containing the capital, lies in the Suketi Nala, a tributary of the Beas. Its territory is limited

as compared with the wide expansion of former times, when it included almost all the area now in Mandi and a large portion of Kulu.

The origin of the name is uncertain, but it is probably a derivation of Sukshetra, "the good land"

Sir A. Cunningham was the first to draw attention to the vansavali of the ruling family, in his paper on the history of Mandi, in the Reports of the Archaeological Survey. More recently a vernacular history of the State has been published by Munshi Hardial Singh of Kangra, who acted for some time, first as Tehsildar and later as Superintendent of the State. It is called Tawarikh-i-Riyasat-hai-kohistan Punjab.

It seems to be almost the only authority available, and much of the material of this paper has been drawn from it. There are also references to Suket in the records of Mandi and Kulu as well as other States, which help to elucidate events. Suket does not seem to be referred to in the Rajatarangini and only once (in A.D. 1388) by any of the Mohammedan historians.

The early histroy of the State is similar to that of other parts of the hills. Previous to its foundation the whole tract was under the control of numerous petty barons bearing the titles of Rana or Thakur, the Ranas being Kshatriyas and the Thakurs of some lower caste, and the vernacular history gives a graphic account of their subjection by the early Rajas. This account fully coincides with what we know of the general political condition of the hills in former times, and down to a comparatively recent period. In the case of almost all the hill States whose histories are known to us, there is a similar record of long and continuous warfare between the Rajas and the petty chiefs. The Raja was an alien among them and it was only by superior force that he succeeded in gaining an ascendancy. Revolts were of frequent occurrence and the usual tribute money, the only symbol of subjection, was forthcoming only when there was no other alternative. The rule of these petty barons was of ancient origin; and if they ever acknowledged the supremacy of a paramount power before the advent of the Rajas, it must have been purely nominal. They bear an evil reputation traditionally as quarrelsome and contentious, and their unhappy feuds rendered them an easy prey to the invader, against whom they seem to have been unable to take concerted action. These feuds the Rajas fostered, and often succeeded in gaining by diplomacy what they had failed to acquire by force. Such was the condition of the tract now embraced in Suket and Mandi, when the founder of the dynasty first appeared upon the scene.

The Chiefs of Suket and Mandi are from a common ancestor of the Chandrabansi line of Rajputs, and they therefore claim descent from the Pandavas of the Mahabharata. Traditionally the origin of the line is carried back to a remote period. The original dynasty is said to have ruled in Delhi for 1,700 years, but this is highly improbable.

The last Raja, named Khemraj, was displaced by his Wazir and retired to Bengal. There he established a dynasty, and thirteen of his successors are said to have ruled for 350 years as the Sena kings of Eastern Bengal, with their capital at Lakshmanpuri on the Ganges. The most distinguished ruler of this dynasty was Lakshman Sen who is said to have extended his conquests to Kanauj. Nepal and Orissa, and to have founded the city of Gaur in Malda, calling it Laknauti after himself. The later capital was at Naddia, where they continued to rule till expelled by Bakhtiyar Khilji in A.D. 1198.

The last ruler of the dynasty retired to Prayag or Allahabad and died there. His son, Rup Sen, then went north to Ropar near Ambala, where he settled for a time. Having been attacked by the Muhammadans he was killed in battle, and his three sons fled into the hills, and after a time founded separate States. Bir Sen became ruler of Suket, Giri Sen of Keonthal, and Hamir Sen of Kashtwar.

It is not a little remarkable that the tradition of a common origin from the Rajas of Gaur Bengal, survives in the records of all these families. Kashtwar, however, must have been founded at a later date than Suket. The history of three brothers having each founded a kingdom is found in the annals of several of the ruling families of the hills.

The above is the traditional account of the origin of the family but general Cunningham assigns the foundation of Suket to a much earlier period (A.D. 765), which seems to be more in keeping with the available data. According to him it seems probable that there was an earlier Sena dynasty in Bengal,

whose ancestor, named Vira Sen, reigned in the seventh century, and from whom the later dynasty was descended. The founder of Suket may thus have been a cadet of the earlier Sena dynasty and the emigration from Bengal may have taken place at an early period.

A review of the data at our disposal seems to give support to this conclusion. The earliest approximately ascertained date is that for the reign of Arjun Sen, who was a contemporary of Bahadur Singh of Kulu (A. D. 1530—59).

From Arjun Sen to Ugar Sen (A.D. 1876) inclusive, there were eleven reigns in 376 years, giving an average of about 31 years to a reign. Again, Jit Sen (A.D. 1663) was a contemporary of Shyam Sen of Mandi (A.D. 1664), and from him to Ugar Sen there were six Rajas in 213 years giving an average reign of 35 years.

Now according to the Vansavali there were 35 reigns anterior to that of Arjun Sen, and allowing an average of 20 years to each we get 1530—700—A.D.830 as the approximate date for the foundation of the State.

Another computation over a longer period leads to much the same result. Assuming, as there are grounds for doing, that the separation of the Mandi branch took place about A. D. 1000, there were 37 reigns from that date to 1876—a period of 876 years; giving an average reign of 23 years which is the common average in most of the other hill States, whose vansavalis have been examined. Allowing this average to the eight reigns preceding the separation, we get 1000—184—A. D. 816. General Cunningham's conclusion, therefore, seems to be confirmed that the State was founded about A.D. 770. An examination of the vansavali also confirms this conclusion. We know that Arjun Sen (A. D. 1530), the 35th Raja in descent from Bir Sen, was a contemporary of Bahadur Singh of Kulu. Supposing the State to have been founded about A.D. 1200, in accordance with the accepted chronology, there are 35 reigns to be allowed for in about 300 years, which gives an average of only nine years to each. This is extremely improbable, as the average reign in the other States is seldom less than 20 years.

An interesting incident is on record in the Chamba vansavali, which lends support to the above conclusion. About A. D. 800, Brahmapura, the original capital and nucleus of the Chamba State, was invaded by a race of foreigners called "Kira," and the Raja was killed in battle. His queen who was enceinte was carried away for safety by the officials, and on the way to the outer hills a son was born, named Mushan Varman.

Ultimately the Rani and the young prince found an asylum with the Raja of Suket, who made liberal provision for them. On growing up to boyhood Mushan Varman was married to the Raja's daughter and received in dowry a jagir in Panga, evidently a clerical error for Pangna, which was then the capital and nucleus of the State. An army was also furnished, with which Mushan Varman expelled the Kiras and recovered his country.

Further corroborative evidence of the antiquity of the State is found in the chronicle of Bilaspur, where the following couplet occurs referring to the conquests of Raja Bir Chand of that State, who reigned about S. 800—A.D. 743.

Pahle Baghal jite Kunihar thakurai
Beja, Dhami markar Keonthal pai dhai.

"Having conquered Baghal, and the chiefships of Kunihar, Beja and Dhami, an advance was made against Keonthal".

From this it is obvious that the Keonthal State had been founded before the invasion took place; and, as in the case of the other chief ships named, that it was ruled by the same family as that still in power, which is descended from the same ancestor as that of Suket.

In the Kulu annals also we find still clearer corroborative evidence referring to events which probably happened not later than A. D. 850—900 and possibly earlier. At that time Raja Bhupal (Bhup Pal) was the ruler of Kulu, and in his reign the State was invaded by Suket and the Raja was taken prisoner. This reference is confirmed by the Suket Chronicle which ascribes the conquest to Bir Sen, the founder of the State, (c.A.D. 770—800), of whom Bhup Pal is said to have been a contemporary, but it may have been later. For three reigns thereafter, according to the Kulu annals, that country was subject to Suket. It then regained its independence for a short time but was again overrun and conquered by Suket, to which it was once more in subjection for three generations. These events must all have taken place previous to A.D. 1000 approximately.

Additional evidence of a later date is supplied by the history of Sirmaur (Vide Sirmaur Gazetteer p. 9 and footnote p. 10). We read that Raja Mahi Prakash (A.D. 1108—1117) of that State demanded

the daughter of Raja Rup Chand of Keonthal in marriage. This reference takes us back to nearly a century (anterior to the date A.D. 1198) of the alleged expulsion of the Suket family from Nadia by Bakhtiyar Khilji. All these references combine to prove that Suket State must have been founded not later than A. D. 800 and probably as early as A. D. 770.

The clan name of the Suket royal line is Suketi or Suketr, in accordance with ancient custom in the hills.

The suffix is 'Sen' but the younger members of the family take "Singh".

Vir or Bir Sen A. D. 770—800.—After crossing the Sutlej at Jiuri ferry, Bir Sen, the founder of the State, along with his followers, probably Rajput adventurers like himself, advanced into the interior and began the conquest of the country. The Ranas and Thakurs naturally resented the invasion of their domains and offered opposition, but their mutual jealousies rendered combined action impossible, and one after another yielded to his superior force.

The first to take the field against him was the Thakur of Karoli, whose state was called Darehat, and he was quickly subdued and his fort captured. Then Seri Mangal, the Rana of Batwara, who had come to help the Thakur of Karoli, was also attacked and overcome.

Following up his initial successes, Bir Sen then advanced against the Thakur of Nagra whose territory was Kot and Paranga. He was subdued, as also the Thakur of Chiragh, who ruled Batal and thana Chowindi. The Chinidiwala Thakur ruling Udaipur undertook to become tributary, and being at fued with the Rana of Sanyarto, who was the overlord of the district, the Raja was advised to attack and kill this latter chief, otherwise it would be impossible to extend his authority. Bir Sen, accordingly, proceeded against the Rana, and on his approach the Thakur of Khunu fled, and his fort was captured, and held for a long period. Sanyarto was then attacked and the thanas of Kajun and Dhyara Kot were taken after a severe contest, the Rana being captured. He was treated with consideration and set at liberty, a jagir being assigned for his support, which remained in the possession of his descendants till the reign of Shyam Sen (A. D. 1627—58).

Having subjected all the Ranas and Thakurs within a certain area, Bir Sen sent for his family, probably from the east of the Sutlej, and settled them in a palace which he had erected on the skirts of the Kunnu Dhar, which he made his first residence. The palace still bears the name of 'Narol' meaning "Privacy" owing probably to its seclusion.

Bir Sen then resumed the campaign against the petty chiefs, and with the help of a force from thana Kajun, which he had acquired from the Rana of Sanyarto, he attacked the Thakur of Koti Dehr, defeated him and seized the ilaqas of Nanj Salalu, Belu and thana Magra. He also built, forts at Kajun and Magra, which till then had only been open villages.

When Bir Sen had in this way conquered all the petty chiefs immediately to the west of the Sutlej he next invaded the territory of the Thakur of Kandlikot to the south-west, who offered no resistance. The next petty ruler to feel the weight of his hand was the Thakur of Surhi, who owned the thanas of Chandmari and Jahor and also the ilaqa of Pangna. The Thakur at once gave in his submission and urged the Raja to attack the Thakur of Haryara, with whom he was at feud. On hearing of the invasion, the Thakur fled and his territory was annexed, and a fort built which is called Tikar down to the present day. Bir Sen then selected a site in the Surhi ilaqa, at 5,000 ft. above sea level, called Pangna, where he built palace, and made it the capital of the State. The Pangna palace is still in a good state of preservation, but it is not known if the present building contains any portions of the original structure as it has never been examined by an expert.

Bir Sen then built the fort of Chawasi and also conquered the fort of Birkot on the borders of Kumharsen. With Chawasi as a base he then advanced into Saraj and captured the forts of Srigarh, Naraingarh, Raghupur, Janj, Madhupur, Banga, Chanjwala, Magru, Mangarh, Tung, Jalauri, Himri, Raigarh, Fatehpur, Bamthaj, Raisan, Godah and Koth-Manali from different Thakurs, who probably till then had been more or less under Kulu. He also invaded Parol, Lag, Rupi, Sari and Dhumhri, all of which are in Kulu. The Kulu Raja, called Bhupal probably Bhup Pal of the Kulu vanasavali, advanced to oppose him and was defeated and taken prisoner. Bhupal, however, was soon released and restored to power on condition of paying tribute.

After returning from the conquest of Kulu, Bir Sen captured Pandoh, Nachni and the following forts; Chiryahan, Raiyahan, Jurahandi, Satgarh, Nandgarh, Chachiot and Sawapuri.

Having overrun and subdued the northern portion of the State he next turned westward towards the Balh ilaqa, and advanced as far as the Sikandar ki

dhar, now in Mandi. The Rana of Hatli was defeated and a fort, named Birkot, founded to commemorate the event. The name is now Biharkot.

Thereafter Bir Sen fixed the foundry with Kangra by erecting a fort on the Sir-Khad, called Bira, now also in Mandi. The conquered tracts thus extended from the Sutlej on the south to the Beas on the north, and from the latter river on the east to the Sir-Khad on the west, forming the boundary with Kangra.

The extensive conquests ascribed to Bir Sen are hardly in keeping with what we know to have been the condition of things in other States, which were consolidated only after centuries of warfare. It seems probable, therefore, that many of these conquests should be referred to a later period in the history of the State.

Dhir Sen.—Bir Sen was succeeded by his son Dhir Sen, whose reign was short. He probably continued the struggle with the petty chiefs, but no details of his time have come down to us.

Bikram Sen the next Raja seems to have been of a religious disposition, for soon after his accession he installed his brother, Tribikram Sen, as regent of the State and took his departure on pilgrimage to Hardwar, and was absent for two years. Kulu which was still tributary, was then under the rule of Hast or Jait Pal, grandson of Bhup Pal. Tribikram Sen proved unfaithful to his trust and aimed at supplanting his brother. For this purpose he sought the help of the Kulu Chief, whom he freed from tribute on condition of receiving his support in the struggle with Bikram Sen, after the latter's return.

On learning of what had occurred, Bikram Sen went to his kinsman, the Raja of Keonthal, who furnished him with an army. The opposing forces met at Jiuri on the Sutlej and both Tribikram Sen and Hast Pal fell in the battle, and their forces were dispersed. Birkam Sen then resumed his position as Raja.

In revenge for the action of Hast Pal he invaded Kulu, subdued the country and appointed his own officers, assigning a jagir to Hast Pal's son, which was held by his descendants for three generations, during which they exercised no authority and were merely jagirdars.

On Bikram Sen's demise, his son Dhartari Sen succeeded, but there are no records of the events of his reign. He had two sons who both died during his own lifetime. Of these the younger was named Kharak Sen; and his son Lakshman Sen, a minor of two years of age, was installed as Raja on Dhartari Sen's death.

Lakshman Sen being of tender years the State was under the control of the officials, and Hashir (Hamir) Pal, the Raja of Kulu, took advantage of the opportunity to assert his independence. When Lakshman Sen came of age—fourteen years later—he invaded Kulu and overran the Waziris of Rupi, Lag Sari and a part of Parol, and again made the State tributary.

On Lakshman Sen's death, probably after a long reign of which we possess few details, he was followed by his son, Chander Sen, who also had a long reign and died childless. His brother Bijai Sen then came to the gaddi. He too seems to have reigned long, but the records tell us nothing of these reigns. We can only conjecture from the analogy of other States that the struggle between the Rajas and the petty barons went on as before, and was probably much the same in Suket as elsewhere.

PART II

CENSUS TABLES

These include General Population, Economic, Social and Cultural, Housing and Special tables for Scheduled Castes and Scheduled Tribes.

APPENDIX TO TABLE B-IV PART C

MANDI DISTRICT

Minor groups having less than 1% of workers of the respective divisions and less than 0·5% in case of minor groups of Division 283 only, have been shown in the appendix. The following abbreviations have been used.

HI=Household Industry.

NHI=Non-Household Industry.

M=Males. F=Females.

007 Total NHI (M-3); 009 Total HI (M-2), NHI (M-12), Urban NHI (M-1); 020 Total NHI (M-7), Urban NHI (M-2); 024 Total HI (M-1, F-2), NHI (M-1, F-10), Urban NHI (F-6); 025 Total NHI (M-8); 031 Total HI (M-3), NHI (M-16), Urban NHI (M-4); 042 Total NHI (M-1); 043 Total NHI (M-4), Urban NHI (M-2); 044 Total NHI (M-1); 045 Total HI (M-1), NHI (M-3, F-4), Urban NHI (M-2, F-4); 047 Total NHI (M-4); 202 Total HI (M-1); 205 Total HI (M-4), Urban HI (M-4); 206 Total NHI (M-1); 210 Total NHI (M-3); 214 Total NHI (M-2); 216 Total HI (M-2), NHI (M-4), Urban HI (M-2), NHI (M-3); 230 Total HI (M-5, F-4); 23/ Total HI (M-5, F-35), Urban HI (M-1, F-3); 232 Total NHI (M-8), Urban NHI (M-2); 235 Total HI (F-7) NHI (M-1); Urban HI (F-7) NHI (M-1), 250 Total HI (M-1, F-2), 251 Total HI (M-2, F-1); 260 Total NHI (F-1), Urban NHI (F-1); 261 Total HI (M-2), Urban HI (M-2); 264 Total NHI (F-1), Urban NHI (F-1); 270 Total HI (F-3), Urban HI (F-1); 272 Total HI (F-15); 276 Total NHI (M-1, F-6), Urban NHI (M-1); 279 Total HI (M-6, F-17). NHI (M-2), Urban HI (F-1); 283 Total HI (M-5); 289 Total HI (M-18), NHI (M-5); 289 Total HI (M-18), NHI (M-5); 292 Total HI (F-1), Urban HI (F-1); 300 Total NHI (M-5), Urban NHI (M-3); 301 Total NHI (M-1), Urban NHI (M-1); 302 Total NHI (M-2); 333 Total NHI (M-1); 335 Total HI (M-2), NHI (M-2), Urban NHI (M-1); 337 Total NHI (M-1), Urban NHI (M-1); 338 Total NHI (M-4), Urban NHI (M-3); 343 Total HI (M-11), NHI (M-27), Urban HI (M-1); 360 Total NHI (M-3); 362 Total HI (M-3), NHI (M-32), Urban HI (M-2), NHI (M-16); 365 Total HI (M-15), NHI (M-8), Urban NHI (M-4); 368 Total HI (M-3), NHI (M-1), Urban HI (M-3); 370 Total NHI (M-2), Urban NHI (M-1); 378 Total NHI (M-2), Urban NHI (M-2); 379 Total NHI (M-7), Urban NHI (M-3); 380 Total NHI (M-22) Urban NHI (M-16); 385 Total NHI (M-1), Urban NHI (M-1); 388 Total NHI (M-8), Urban NHI (M-8); 392 Total HI (M-2), NHI (M-13), Urban HI (M-2), NHI (M-12); 394 Total HI (M-1); 399 Total HI (M-2, F-1), NHI (M-3), Urban HI (F-1), NHI (M-2); 402 Total-NHI (M-1); 602 Total NHI (M-16), Urban NHI (M-10); 604 Total NHI (M-7), Urban NHI (M-7); 606 Total NHI (M-1), Urban NHI (M-1); 607 Total NHI (M-3); 610 Total NHI (M-1); 611 Total NHI (M-1) Urban NHI (M-1); 613 Total-NHI (M-2); 630 Total NHI (M-1), Urban NHI (M-1); 631 Total NHI (M-1); 634 Total NHI (M-5); 639 Total NHI (M-4), Urban NHI (M-2); 642 Total-NHI (M-10, F-1), Urban NHI (M-4); 643 Total NHI (M-1), Urban NHI (M-1); 646 Total NHI (M-9), Urban NHI (M-9); 647 Total NHI (M-10), Urban NHI (M-1); 652 Total NHI (M-17), Urban NHI (M-17); 653 Total NHI (M-11), Urban NHI, (M-10); 655 Total NHI (M-5), Urban NHI (M-1); 660 Total NHI (M-3), Urban NHI (M-3); 661 Total NHI (M-11), F-1); Urban NHI (M-10); 663 Total NHI (M-1), Urban NHI (M-1); 664 Total NHI (M-3); 672 Total NHI (M-1), Urban NHI (M-1); 680 Total NHI (M-1), Urban NHI (M-1); 681 Total NHI (M-1), Urban NHI (M-1); 682 Total NHI (M-1), Urban NHI (M-1); 683 Total NHI (M-3), Urban NHI (M-2); 686 Total NHI (M-2), Urban NHI (M-1); 687 Total NHI (M-3), Urban NHI (M-2); 688 Total -NHI (M-5), Urban NHI (M-2); 693 Total NHI (M-2), Urban NHI (M-1); 694 Total NHI (M-2); 695 Total NHI (M-6), Urban NHI (M-6); 703 Total NHI (M-5), Urban NHI (M-1), 705 Total NHI (M-4, F-1), Urban NHI (M-1, F-1); 706 Total NHI (M-7), Urban NHI (M-1); 709 Total NHI (M-1), Urban NHI (M-1); 710 Total-NHI (M-1); 805 Total NHI (M-51, F-1), Urban NHI (M-32); 810 Total NHI (M-20, F-5), Urban NHI (M-16, F-3); 812 Total-NHI (M-19), Urban NHI (M-16); 821 Total NHI (M-39), Urban NHI (M-11); 830 Total NHI (M-2), Urban NHI (M-2); 832 Total NHI (M-3), Urban NHI (M-3); 840 Total NHI (M-72), Urban NHI (M-62); 852 Total NHI (M-1), Urban NHI (M-1); 860 Total NHI (M-1); 861 Total NHI (M-27, F-1), Urban NHI (M-5); 862 Total NHI (M-1), Urban NHI (M-1); 871 Total NHI (M-13, F-1), Urban NHI (M-11, F-1); 873 Total NHI (M-8, F-1), Urban NHI (M-6, F-1); 881 Total NHI (M-5, F-1), Urban NHI (M-5, F-1); 885 Total NHI (M-8), Urban NHI (M-8).

APPENDIX TO TABLE B-V

MANDI DISTRICT

Families having less than 1% of the workers of respective divisions and less than 0·5% in case of division 7-8 only, have been shown in this appendix.

The following abbreviations have been used—

'M' for Males and 'F' for Females.

002 Total V (M-1), Urban V (M-1); 007 Total III (M-1), VI (M-19) IX (M-5), Urban VI (M-7), IX (M-2); 010 Total IX (M-1), Urban IX (M-1); 014 Total IX (M-3), Urban IX (M-3); 020 Total IX (M-3, F-1), Urban IX (M-1, F-1); 021 Total IX (M-4), Urban IX (M-2); 023 Total IX (M-4), Urban IX (M-2); 029 Total III (M-2), IX (M-2) Urban III (M-2), (IX-2), 032 Total IX (M-2), Urban IX (M-2); 033 Total IX (M-2) 035 Total IX (M-4), Urban IX (M-2); 044 Total IX (M-10, F-1); Urban IX (M-4, F-1); 049 Total IX (M-2), Urban IX (M-2); 053 Total IX (M-2); 060 Total IX (M-12, F-2), Urban IX (M-9, F-2); 071 Total IX (M-10), Urban IX (M-1); 072 Total IX (M-1), Urban IX (M-1); 076 Total IX (M-11, F-3), Urban IX (M-4, F-3); 079 Total IX (M-1), Urban IX (M-1); 083 Total IX (M-2), Urban IX (M-2); 087 Total IX (F-1); 090 Total VI (M-5), IX (M-22), Urban VI (M-4), IX (M-18); 091 Total III (M-1), IX (M-6); 099 Total VI (M-1), IX (M-3), Urban VI (M-1), IX (M-1); OX3 Total IX (M-7, F-1), Urban IX (M-4, F-1); OX9 Total V (M-2), Urban V (M-2), 102 Total IX (M-1, F-1), Urban IX (F-1), ; 103 Total IX (M-2), Urban IX (M-2); 110 Total VII (M-3), Urban VII (M-3); 111 Total VII (M-9), Urban (M-9); 120 Total VII (M-1); 130 Total III (M-1); 133 Total V (M-5, F-1), Urban V (M-4, F-1); 134 Total VIII (M-6), Urban VIII (M-4), 210 Total IX (M-14), Urban IX (M-12); 310 VII (M-3), Urban VII (M-1); 340 Total VII (M-2); 402 Total III (M-5), IV (M-11, F-2), Urban III (M-1), IV (M-3); 403 Total III (M-3), IV (M-1); 404 Total III (M-3), IX (M-2), Urban III (M-1), IX (M-2); 410 Total III (M-1); 419 Total III (F-3), Urban III (F-2); 421 Total III (M-4); 431 Total III (M-16), IV (M-3), Urban III (M-4); 610 Total VIII (M-7), Urban VIII (M-1) ; 630 Total VIII (M-1), Urban VIII (M-1); 631 Total VIII (M-3), Urban VIII (M-2); 660 Total VIII (M-6), Urban VIII (M-2); 670 Total VIII (M-4), Urban VIII (M-3); 671 Total VIII (M-2), Urban VIII (M-2) ; 672 Total VIII (M-3) ; 679 Total VIII (M-3), Urban VIII (M-2) ; 690 Total VIII (M-4) ; 692 Total VIII (M-7), Urban VIII (M-1) ; 694 Total VIII (M-1), Urban VIII (M-1); 700 Total IV (M-8, F-5), Urban V (M-1) ; 706 Total IV (M-2, F-1), Urban IV (M-1, F-1) ; 708 Total IV (F-2); 709 Total IV (M-1, F-1), Urban IV (M-1); 715 Total IV (F-15); 721 Total IV (M-5, F-3); 729 Total IV (M-1, F-9). V (M-1); 734 Total V (M-2); 740 Total IV (M-2), V (M-13), Urban IV (M-2), V (M-12); 751 Total V (M-2); 752 Total V (M-4); 754 Total V (M-5), Urban V (M-3); 755 Total V (M-1), IX (M-6), Urban IX (M-1); 756 Total IX (M-1); 757 Total IV (F-1); 758 Total IV (M-3), Urban IV (M-3); 759 Total IX (M-12), Urban IX (M-12); 761 Total IX (M-10), Urban IX (M-8); 762 Total V (M-3), Urban V (M-2); 769 Total IX (M-12), Urban IX (M-2); 780 Total IX (M-13, F-1), Urban IX (M-13, F-1); 799 Total VI (M-34, F-4), Urban VI (M-3); 801 Total V (M-2); 802 Total V (M-2); 803 Total V (M-3), Urban V (M-4); 810 Total IV (F-2); 819 Total IV (F-6), Urban IV (F-6); 821 Total IV (M-30, F-13), V (M-1), Urban IV (M-3); 822 Total IV (M-14, F-13), V (M-1); 823 Total IV (M-1); 825 Total V (M-2); 829 Total IV (M-2), V (M-2), Urban IV (M-2), V (M-2); 839 Total IV (M-2), V (M-1); 854 Total IX (M-1), Urban IX (M-1); 855 Total IV (M-1); 856 Total IV (F-1); 859 Total IV (M-1, F-12), V (M-1), Urban IV (M-1, F-3); V (M-1), 870 Total III (M-1), VI (M-5), IX (M-6); 876 Total IX (M-5), Urban IX (M-2); 890 Total VI (M-1), Urban VI (M-1); 909 Total IX (M-1); 913 Total IX (F-2), Urban IX (F-2); 951 Total IX (M-4), Urban IX (M-4); 979 Total IX (M-8), Urban IX (M-8); 999 Total IX (M-13, F-1), Urban IX (M-9, F-1).

TABLE 17·7—RAW MATERIAL USEABLE FOR INDUSTRIES, CULTIVATED OR GROWING OF ITSELF (GROWING WILD)

Serial No.	Name of raw material cultivated or growing of itself (growing wild)	Name of village and Tehsil where available	Remarks
1	2	3	4
1	Deodar wood for fencing and other wood preparations . .	....	
2	Kharsu wood for Bobbins	....	
3	Shisham wood for furniture	....	
4	Bamboos wood for furniture and basket and paper manufacture	....	
5	Semal wood for match industry	....	
6	Ritha for soap industries	....	
7	Resin for resin and turpentine oil, varnish etc. . . .	....	
8	Minor forest produce such as medical herbs, for use in preparation of medicines, dhoop for dhoop industry . . .	....	
9	Firewood for use in paper manufacture	....	
10	Wood for woollen cloth industry	....	
11	Bhang fibres for cottage industries for making foot wears locally in Mandi District	....	
12	Khanor wood for making wooden utensil, locally in illaqa Chohar	....	

TABLE: 17·8—MEDICAL HERBS AND PLANTS CULTIVATED AND GROWING OF ITSELF (GROWING WILD)

Serial No.	Name of medicinal herbs and plants	Name of village and Tehsil where cultivated or growing wild	Remarks
1	2	3	
1	Viola adorata	..	
2	Tinspora cordifolia	..	
3	Bacopa monuri	..	
4	Valeriana Wallichin	..	
5	Try chyspermum amoni	..	
6	Nardostachys Jatamansi	..	
7	Euphorbia hypercifolia	..	
8	Swertia chirata	..	
9	Witharnia Somniters	..	
10	Adhatoda Vasica	..	
11	Thymus serpyllum	..	
12	Colebroonea Oppositifolia	..	
13	Achyranthos aspera	..	
14	Acrus Calamus	..	
15	Saxifraga ligulata	..	
16	Cannabis Satina	..	
17	Terminalia Chebula	..	
18	Terminalia belerica	..	
19	Phyllanthus emblica	..	
20	Abrus	..	

TABLE: 17·9—RIGHTS ON TIMBER FOR VILLAGES

Serial No.	Name of Forest Range and Division	Name of Forest	Names of villages having timber rights in the forests specified in Col. 3 for the construction of houses and domestic use.
1	2	3	
1	Karsog Range, Suket Forest Division.	Shagach 8-E . . .	Bhanog, Kiavi, and D, Shil & D , Tehan & D, Parla & D, Chehar, Shala, Jai, Khaneog & D, Sakabel, Patog & D, Bhaudli, & D, Dumed & D, Summed & D, Loharlaand D.
2	Do.	Drael 9-E . . .	Narar, Gaurala, Tummen, & D, Mech, Khammon, Sarsun & D, Pasog, & D, Banoa, Sanj &D, Kanot, Chalaral &D, Khaneog and D, Dhar, Chakband, Gadeija, Thener, Thener, Khaner, Dogra Bhahal, Rudur, Kuphtoo, Patog, Baralo, & D, Pakhi & D, Bador, Tirij & D, Salog & D, Pharesh & D
3	Do.	Gadrau 10-E . .	Tirej & D, Jalog & D, Pharesh Chowasigarh.
4	Do.	Lotta 11-E . . .	Chowki, Phirnu & D, Sarahan & D, Koti & D, Jhaneota &D Ghaberi, Suin, Chekhu, & D, Dachhar, Sao & D, Bahota, Balot & D, Sarandi & D, Dirath & D, Dogri, Sagaher, Bakhan, Bag & D, Dher & D, Sursun & D, Rasag & D, Ban sa, Khamrala, Kharova, Saran Bagh, Palot, Navi & D-Kua Nal & D, Khaneot I D, Bhanli & D, Gogla, Muth, Dim, Basin, Duri, & D, Janot & D, Batal & D, Dhar & D, Bharor & D, Dhoba & D, Loharla, Thatch & D, Patog & D, Tiphru & D, Banol & D, Bagoon, Maheg & D, Lotta & D, Pali & D, Khatir & D, Gadala & D, Tikri, Badgala Badhon & D.
5	Do	Gurjob 12-E . . .	Ding & D, Charer, Ragahar, Katanda & D, Babi Chowasiigarh.
6	Do.	Katanda 13-E . . .	Bhanog, Kiavi & D, Shil & D, Tehan & D, Malog & D, Chelah & D, Mungar, Nerahan, and D, Saloha & D, Poia & D, Chehar, Shala & D, Jai, Chowki, Phirnu & D, Kontha, Suran & D, Sanag & D, Bhahata, Balot & D, Saranu, & D, Sanag & D, Dachhar, Khorla, Khamrala, Saran Bag, Palot, Khamrala II, Ding Dogra, Chabr, Raghar, Sill Ler & D, Porli Liri & D, Londu & D, Bheouri & D, Khaneor, Shesh & D, Nalohi & D. Gad in Cnowasiigarh.
7	Do.	Makra 19-E . . .	Bahata & D, Rasog & D, Banoha, Khamrola, Kharohe, Soran Bagh, Palot, Santhala.
8	Do.	Jakhol 21-E . . .	Kathir & D.
9	Do.	Sursun 23 E. . . .	Khamon & D.
10	Do.	Kundhloo 24-E . . .	....
11	Do.	Chahar 25-E . . .	Dregla & D.
12	Do.	Bhunda Shil 26-E. . .	....
13	Do.	Sundroo 30-E . . .	Khakhna & D, Pathri & D, Majhas, Babli & D., Bharthi & D, Charoon, Saneen, Paundroo in Ramgarh, Chalhath & D, Mathrana & D, Tharku, Thana & D, Bahal Dogra, Bhajwah & D, Bauran & D, Sardal & D, Dhar Katch & D, Sera D, Khalan & D, Khatrai & D, Serar & D, Basrail & D, Bhalat & D, Basrail & D, Jol Dalog Dogra, Dral & D, Chatol, Dhanrla & D, Soja, Santhala, Bhewan Kamohar Jhulli & D, Soral, Kanera & D, Sanech & D, Bedi Dhar & D, Palatha, Giankaloo.
14	Do,	Ghanech 34-E . . .	Takrol & D, Dhongli, & D, Sawan, Ghalog, Bakhrouli Supa Ler, Bannu & D, Narol, Naroli, Danor, Kanda, Got Kara in Karsog-Garh.

VILLAGE DIRECTORY

EXPLANATORY NOTE TO VILLAGE DIRECTORY

1 The Village Directory renders an account of each village and town in the district. It gives the location code number, name of each village, area in acres, number of occupied residential houses, number of households, total population and its break up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures of workers are further split up by sex and by a broad classification of industrial activity in nine categories.

2 In the village directory, the villages are presented tehsilwise. The villages have been arranged in the ascending order of their location code numbers. These code numbers had been assigned to them for organizing 1961 Census work and follow a regular hadbast number. An Alphabetical list of villages will be found facing each tehsil. It shows the code and hadbast number of each village. This will facilitate location of any village in the village directory as well as on the spot.

3 A village having no population or Forest villages have been shown with the words "uninhabited" against them.

4 Survey of India maps, previous Census Handbooks and many other official sources have been taken into consideration to secure accurate coverage and to get the correct spellings of village names.

5 In Himachal Pradesh urban areas or towns are places which either have a Municipality or Small Town Committee or Notified Area Committee. Census figures for all these towns are presented town-wise after the completion of rural portion.

6 The village figures have been extracted directly from Census records. The figures presented in the village directory tally with the tehsil and district Census tables perfectly.

7 Information contained in column (2) immediately after the village name is based on the information supplied by the various departments concerned. The symbols indicate the general pattern of distribution of some basic amenities within village or town. There were more useful items of information on the villages which could not be presented in the village directory for want of space. The only important symbols have been *shown in the village directory.*

8 The area figures in column (3) have been obtained from the Director of Land Records.

9 In column (4) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes e.g. shop-cum-dwellings.

10 Columns (9) to (12) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

11 For columns (13) and (14) a "literate" is a person who knows both reading and writing.

12 The villagewise figures for industries have been presented in a separate table showing their industrial code number and number of unit in brackets. A list of Co-operative Societies, and fairs and festivals have been given at the end of this directory.

Abbreviations and Symbols Used

A. In Column Headings :

SC	For Scheduled Castes
ST	For Scheduled Tribes
M	For Males
F	For Females
I	Working as Cultivator
II	Working as Agricultural labourer
III	Working in Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities
IV	Working at Household Industry
V	Working in Manufacturing other than Household Industry
VI	Working in Constructions
VII	Working in Trade & Commerce
VIII	Working in Transport, Storage and Communications
IX	Working in Other services

B. In Notations

P	For Primary School
M	For Middle School
H	For High School
C	For Higher Institutions including Colleges
L	For library
W	For place of worship
Pm	For place of ancient monuments
T	For Technical Institutions
D	For Dispensaries
Hos	For Hospitals
Rhc	For Rural Health Centres
Phc	For Primary Health Centres
Mcw	For Maternity Child Welfare Centres
Po	For Post Office
To	For Telegraph Office
Rh	For Rest Houses
R	For connected by Road (upto 5 miles distance approximate).
Rly	For connected by Railway
S	For safe or protected water supply including pipes, tube wells, etc.
Ei	For Electricity in industrial use
Ed	For Electricity in Domestic use
E	For Electricity

Where figures like 2P or 2H or 2C etc. occur they denote that the village or town has two Primary Schools or two High Schools or two Higher Institutions including Colleges etc.

TABLES OF INDUSTRIAL ESTABLISHMENTS

INDUSTRIAL CLASSIFICATION

Description	Minor Group (Code)
20 Food stuffs—	
Production of rice, atta, flour, etc. by milling dehusking and processing of crops and food-grains	200
Production of sugar and syrup from sugarcane in mills	201
Production of indigenous sugar, gur from sugar, cane or palm juice and production of candy	202
Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
Slaughtering, preservation of meat and fish and canning of fish	204
Production of bread, biscuits, cake and other bakery products	205
Production of butter, ghee, cheese and other dairy products	206
Production of edible fats and oils (other than hydrogenated oil)	207
Production of hydrogenated oil (Vanaspati)	208
Production of other food products such as sweet *meat and condiments, muri, murki, chira, khoi, * cocoa, chocolate, coffee, lozenge	209
21 Beverages—	
Production of destilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
Production of country liquor	211
Production of indigenous liquor such as toddy, liquor from mahua, palm juice	212
Production of other liquors not covered above	213
Production of aerated and mineral water	214
Production of ice	215
Production of ice cream	216
Processing of tea in factories	217
Processing of coffee in curing works	218
Production of other beverages	219
22 Tobacco Products—	
Manufacture of bidi	220
Manufacture of cigars and cheroots	221
Manufacture of cigarette and cigarette tobacco	222
Manufacture of hookah tobacco	223
Manufacture of snuff	224
Manufacture of jerda and other chewing tobacco	225
Manufacture of tobacco products	226
23 Textile—Cotton—	
Cotton ginning, cleaning, pressing and baling	230
Cotton spinning, (Other than in mills)	231
Cotton spinning and weaving in mills	232
Cotton dyeing, bleaching	233
Cotton weaving in power looms	234
Cotton weaving in handlooms	235
Manufacturing of khadi textile in handlooms	236
Printing of cotton textile	237
Manufacturing of cotton nets	238
Manufacturing of cotton cordage, rope and twine	239
24 Textile-Jute—	
Jute pressing and baling	240
Jute spinning and weaving	241
Dyeing and bleaching of jute	242
Printing of jute textile	243
Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25 Textile—Wool—	
Wool baling and pressing	250
Wool cleaning and processing (scouring)	251
Wool spinning and weaving in mill	252
Wool spinning other than in mills	253
Wool weaving in power loom	254
Wool weaving in handloom	255
Embroidery and art work in woollen textile	256
26 Textile—silk—	
Spinning and weaving of silk textile in mill	260
Dyeing and bleaching of silk	261
Spinning of silk other than in mills	262
Weaving of silk textile by power loom	263
Weaving of silk textile by handloom	264
Printing of silk textile	265
Manufacture of silk cordage, rope and twine	266
27 Textile—Miscellaneous—	
Manufacture of carpet and all other similar type of textile products	270
Manufacture of hosiery and other knitted fabrics and garments	271
Embroidery and making of crepe lace and fringes	272
Making of textile garments including raincoats and headgear	273

Description	Minor Group (Code)
27—Textile: Miscellaneous—cpntd.	
Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags	274
Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
Manufacture of coir and coir products	277
Manufacture of umbrellas	278
Processing and manufacture of textile products not covered above	279
28 Manufacture of Wood and Wooden Products—	
Sawing and planing of wood	280
Manufacture of wooden furniture and fixtures.	281
Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
Manufacture of other wooden products such as utensils, toys artwares	284
Manufacture of veneer and plywood	285
Manufacture of plywood products such as tea chest	286
Manufacture of boxes and paching cases other than plywood	287
Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
Manufacture of other wood and allied products not covered above	289
29 Paper and paper Products—	
Manufacture of pulp from wood, rags, waste-paper and other fibres and conversion of such pulp into any kind of paper and paper board in mill	290
Manufacture of pulp from wood, rage, waste-paper and other fibres and conversion of such pulp into any kind of paper and paper board handmade	291
anufacture of products such as paper bags, M[illegible]oxes, cards, envelopes and moulded pulp goops from paper, paper board and pulp	292
30 Printing and Publishing—	
Printing and publishing of newspapers and periodicals	300
Printing and publishing of books	301
All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
All types of binding, stitching, sizing and other allied work connected with binding industry	303
31 Leather and Leather Products—	
Currying, tanning and finishing of hides and skins and preparation of finished leather	310
Manufacture of shoes and other leather foot wear	311
Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
Repair of shoes and other leather footwear	314
Repair of all other leather products except footwear	315
32 Rubber, Petroleum and Coal Products—	
Manufacture of tyres and tubes	320
Manufacture of rubber footwear	321
Manufacture of rubber goods used for industrial purpose	322
Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
Production of coaltar and coke in coke oven	325
Manufacture of other coal and coaltar products not covered elsewhere	326
33 Chemicals and Chemical Products—	
Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
Manufacture of dyes, paints, colours, and varnishes	331
Manufacture of fertilizers	332
Manufacture of ammunition, explosives and fire works	333

Description	Minor Group (Code)
33 Chemicals and Chemical Products—contd.	
Manufacture of matches	334
Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparation except soap	335
Manufacture of soap and other washing and cleaning compounds	336
Manufacture of turpentine, synthetic resin, and plastic products and materials (including synthetic rubber)	337
Manufacture of common salt	338
Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34 Non-metallic Mineral Products other than Petroleum and Coal—	
Manufacture of structural clay products such as bricks, tiles	340
Manufacture of cement and cement products	341
Manufacture of lime	342
Manufacture of structural stone goods, stone dressing and stone crushing	343
Manufacture of stonewares, other than images	344
Manufacture of stone images	345
Manufacture of plaster of paris and its products	346
Manufacture of asbestos products	347
Manufacture of mica products	348
35 Manufacture of earthenware and earthen pottery	350
Manufacture of chinaware and crockery	351
Manufacture of porcelain and its products	352
Manufacture of glass bangles and beads	353
Manufacture of glass apparatus	354
Manufacture of earthen image, busts and statues	355
Manufacture of earthen toys and artwares except those covered by code No. 355	356
Manufacutre of glass and glass products except optical and photographic lenses and glass products covered above	357
Manufacture of other non-metallic mineral products not elsewhere specified	359

Description	Minor Group (Code)
36 Basic Metals and their Products except Machinery and Transport Equipment—	
Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
Manufacture including smelting, refining of nonferrous metals and alloys in basic forms	361
Manufacture of armaments	362
Manufacture of structural steel products such as joist, rail, sheet, plate	363
Manufacture of iron and steel furniture	364
Manufacture of brass and bell metal products	365
Manufacture of aluminium products	366
Manufacture of metal products (other than of iron brass, bell metal and aluminium) such as tin can	367
Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products	368
Manufacture of sundry hardwares such as G.I. pipe, wire, net bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38, and 39)	369
37 Machinery (all kinds other than Transport) and Electrical Equipment—	
Manufacture and assembling of machinery (other than electrial) except textile machinery	370
Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors	371
Manufacture of machine tools	372
Manufacture of textile machinery and accessories	373
Manufacture of heavy electrical machinery and equipment such as motor, generators, transformers	374
Manufacture of electric lamps and fans	375
Manufacture of insulated wires and cables	376
Manufacture of all kinds of battery	377
Manufacture of electronic equipment such as radio, microphone	378
Manufacture of electric machinery and apparatus appliances not specified above	379

Description	Minor Group (Code)
38 Transport Equipment—	
Manufacture, assembly and repairing of locomotives	380
Manufacture of wagons, coaches, tramways, and other rail road equipment other than that covered by code No. 363	381
Manufacture and assembling of motor vehicles all types (excepting motor engines)	382
Manufacture of motor vehicles engines, parts and accessories	383
Repairing and servicing of motor vehicles	384
Manufacture of bicycles and tricycles and accessories such as saddle, seat, frame, gear	385
Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
Repairing of bicycles and tricycles	388
38 Transport Equipment—contd.	
Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39 Miscellaneous Manufacturing Industries—	
Manufacture of optical instrument and lenses, ophthalmic goods and photographic equipment and supplies	390
Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
Assembling and repairing of watches and clocks	392
Manufacture of jewellery, silverware and wares using gold and other precious metals	393
Manufacture and tuning of musical instrument	394
Manufacture of stationery articles not covered eleswhere such as pencil, penholder, fountain pen	395
Manufacture of sports goods	396
Manufacture and repair work of goods not assignable to any other group	399
