Motif :—

Jullundur—made Sports Goods For Olympics— 1976

Hockey at the Montreal Olympics, 1976, will be played with balls manufactured in at Jullundur.

Jullundur has nearly 350 sports goods manufacturing units of various sizes. These small units export tennis and badminton rackets, shuttlecocks and several types of balls including cricket balls.

The nucleus of this industry was formed by skilled and semi-skilled workers who came to India after Partition. Since they could not afford to go far away and were lodged in the two refugee camps located on the outskirts of Jullundur city in an underdeveloped area, the availability of the skilled workers attracted the sports goods manufacturers especially from Sialkot which was the centre of sports industry before Partition.

Over 2,000 people are at present employed in this industry. Started from scratch after partition, the industry now exports goods worth nearly Rs. 5 crores per year to the Asian and European Commonwealth countries, the last being our biggest importers.

CENSUS OF INDIA, 1971

A—CENTRAL GOVERNMENT PUBLICATIONS

The 1971 Census Reports on Punjab will bear uniformly Series No. 17 and will be published in the following parts:—

PART I-A	General Report.
PART I-C	Subsidiary Tables.
PART II-A	General Population Tables.
PART II-B	Economic Tables.
PART II-C(i) and V-A	Distribution of Population by religion and scheduled castes
PART II-C(ii)	Social and Cultural Tables (Table C-I to C-VI) and Fertility Tables
PART II-D	Migration Tables
PART-III	Establishment Report and Tables
PART-IV	Housing Report and Tables
PART VI-A	Town Directory
PART VI-B	Special Survey Reports on Selected Towns
PART VIII-A	Administration Report—Enumeration (For official use only)
PART IX	Census Atlas
PART IX-A	Administrative Atlas

B—STATE GOVERNMENT PUBLICATIONS

PART X District Census Handbook for each district in parts—

PART A—Village and Town Directory

PART B—Village and Townwise Primary Census Abstract

PART C—District Census Tables and Administrative Statistics

Note—Parts A and B of the District Census Handbooks have been printed in one volume.

PREFACE

The publication of District Census Handbook was first initiated at 1951 Census with a view to make Census Statistics available from the smaller territorial units. This publication was continued at 1961 Census. The 1961 District Census Handbook compared to 1951 was much more informative as it contained additional data about level of development and social amenities in villages. At 1971 Census the District Census Handbook was decided to be split up in to three convenient parts. Part A and B of the District Census Handbook incorporating the primary data down to the village and town level has been published in one volume and that was released in record time. Part A contains the Village and Town Directories and Part B contains Primary Census Abstract for all villages and towns.

2. The present volume Part C of District Census Handbook has been divided in to three sections.

Section I—District Census Tables.

Section II—Tables on village Directory and P.C.A.

Section III—Administrative, Welfare and Development Statistics.

3. The data incorporated in Section III have been collected and compiled from concerned State/Central Government departments and their publications. An indication regarding the source of data has been provided under each table. This volume also contains a very short note analysing the decadal changes in the decade.

4. This Report, as at the last Census, contains to be a State Government publication as it is financed by them. Its compilation and write-up have been done by the Census Directorate at Chandigarh on behalf on the State Government.

The collection of Census data is a huge and messive affair. It involves Coop. of a large number of functioneries at various levels. First and foremost we are grateful to the ordinary citizen who sportingly responds to varied and hacknied questionaire which is basic source of our basic data. The various agencies involved in the collection of data-an army of enumerators - mostly teachers and revenue officials in villages and staff of local bodies in urben areas a number of supervisors from amongst teachers, revenue officials and local bodies staff - and the District administration. We are immensely grateful to all of them. All our own level the entire staff of our organisation was actively involved in this operation and they have all given their unstinted help and cooperation at all times and even at odd hours.

Various Census tables incorporated in this volume were prepared in various sections of our office headed by different officers for different series. These tables have already been published in various State volumes pertaining to these series. In particular a mention has to be made of Shri G. S. Pabla, A. D. C. O, Shri D. P. Jain T. O. who spared no efforts in accomplishing this task. Shri A. S. Dhillon T. O. and Shri Charan Singh, S.T.A. and Shri G. S. Gill, T. O. (now investigator), were also associated with the prepartion of these Census Tables. We place on record our deep sense of appriciation for their generous contribution. The job of collecting and compiling administrative statistics was ably handled by Shri N. S. Bhadoria duly assisted by Shri Maikit Singh S.A. and other members of staff of his section under the able guidance of Shri K.C. Suri, A D. C. O. (now DDCO H. P.).

This publication is being brought out giving only a few important administrative statistics and Census tables leaving the analysis and inferences to be drawn by readers and scholars. At this stage of editing and compilation Shri Bhadoria did a commendable job under the able guidance of Shri S.P. Grover who joined us as Assistant Director of Census Operations in Oct, 1977. Shri R.K. Singh Assistant Director of Census Operations who joind us in May, 1978 has also helped us immensely by going through the edited material at the crucial stage. I am extremely grateful to all of them.

We are beholden to the master planners and architects of 1971 census Shri A. Chandra Shekhar, the then Registrar General of India, his worthy successor Shri R.B. Chari and the present Registrar General Shri P. Padamanabha for their valuable guidance and encouragement at all times. We are also greatly indebted to Shri K. K. Chakravarty, Assistant Registrar General for his valuable guidance, kind suggestions and benevolent help made available to us from time to time. Our record of acknowledgements would remain incomplete without a mention of my worthy predecessor Shri H. S. Kawatra whose encouragement, help and guidance are luckily redily available to us at all times.

We are extremely grateful to Shri P. S. Walia, Controller Printing & Stationery Deptt. Punjab, whose kind cooperation has enabled us to get this volume printed so well and in record time.

(P. C. Sharma)
Deputy Director,
Census Operations, Punjab.

DISTRICT DURING THE DECADE

Jullundur is one of the most progressive districts of Punjab State. It lies between 30°—58 and 31°—37' North latitude and between 75°—03' and 76°—15' East longitude in the apex of the Bist Doab—The territory lying between the Sutlej and the Beas rivers. It is bounded on the north by Hoshiarpur district, on the South by Ferozpur and Ludhiana districts on the east by Ludhiana and Hoshiarpur districts and on the West by Kapurthala district. The area of Bist Doab is mostly divided between Jullundur and Kapurthala and is an expanse of rich aluvial soil considered to be the grainery of Punjab.

The district comprises of four tahsils namely Jullundur, Nakodar, Nawashahr and Phillaur having 1273 villages (including 64 uninhabited villages) and 12 towns. The headquarters of the district are at Jullundur which is also the headquarters of the Division. According to the Surveyor General of India, the area of the district is 3,399 sq. Kms. ranking ninth in term of order of Size of districts in the State,

During the decade of 1961-71, Vide Punjab Govt. notification No. 564-Rg-I-70/727 dated the 17th March, 1970, Nakodar tehsil of the district gained 3 villages (7.7 Km^2) from Zira tahsil of Ferozpur district and lost 18 villages 31.7 Km^2) to Zira tahsil and 12 villages 38.3 Km^2) to Jagraon tahsil of Ludhiana district. The net result is that Jullundur district lost 62.3 Km^2. area to neighbouring districts of Ferozpur and Ludhiana.

The climate of the district resembles in general to that of Punjab plains i. e. extremly hot during summers and severe cold during winters, mercury shooting upto 114.4°F during May-June and trumbling to the minimum of 28.4° F in the months of December and January. The average rain-fall during the five years from 1970-74 is 63.76 Cms. most of it occuring during June-Sept.

As in other districts of the state, agriculture is an important means of subsistence for the majority of the people in this district. At the 1971 Census 50.7 percent of the total working force was engaged in agricultural pursuits as against 42.4 percent in 1961- Census. The area of the district is intensively cultivated being well irrigated. In 1971-72, 83 percent of the total cropped area was irrigated as compared to the State figure of 76.5 percent. The main sources of irrigation in the district are wells (including tube-wells and pumping sets) and canals. Failure of crops for want of rains has become a thing of the part. The agriculture is increasingly getting commercialized instead of a way of llfe as hithertofore. Farmers plan for the cultivation of such crops that should give them maximum return in money value with the minimum inputs. Main crops of the district are Wheat, grain and potatoes during the Rabi season and maize, paddy, ground-nut, sugar cane and cotton during the Kharif season. With the introduction of package programme in the district it has made long strides in the field of Agriculture.

The district occupies a place of pride on the industrial map of Punjab. It has multifarious industrial activities and has earned a name at home and abroad in sports goods, brass and chromium fittings, machine tools, steel furniture, rubber goods leather products, surgical instruments, autoparts, agricultural implements, ball bearings, motor body buildings, electrical appliances, household appliances and valves etc. It has also the privilege of having two sugar mills in the co-operative sector at Bhogpur and Nawanshahr. Jullundur city is a newspaper capital of Northern India. At present newspapers in nine important languages arebeing published from here. The district flourishes in trade and commerce and this can be attributed primarily to its location on National Highway. As per censns records of 1971, there were 690 regis-tered factories, 10,146 unregistered workshops and 3,851 house hold industries in the district. The exports from this district have been progressively increasing. There are about 3,000 small scale and 15 medium and large scale industrial units, Besides, there are also about 3,600 other units such as Khadi, leather and soap making etc. About 50,000 persons are engaged in these activities. The number of commercial banking offices in the district as on 31st March 1971 was 116. The districtis extensively served with a network of railway lines and pucca roads. The postal, telegraph and telephone services are adequate. There has been a tremendous progress over the decade inthe net work of metalled roads. Total road length in the district was 1,058 Kilometre mettalled and 170 Kilometre unmettalied in 1970-71. About half of the villages in the district are linked by a metalled roads. Efforts are being made to connect all the villages by pucca roads in near future.

The population of Jullundur district as per 1971 Census stands at 1,454,501 comprising of 772,416 males and 682,085 females and occupies the third ranking in order of size of population the districts in the State. The district claims the highest density of 428 persons per Sq. Km. (361 in 1961) in the State, This is significantly higher the State's density of 269 and can be attributed to remarkable industrial progress made by the district and consequent much better employment

opportunities. The number of females per thousand males in 1971 Census works out to 883 as against 873 in 1961 and 862 in 1951. In fact there has been an overall increase in sex ratio in this district since 1911 when it was 783 females per 1,000 males. The district has registered the highest ever growth rate of 18.62 per cent during the decade 1961-71 whereas during the decade 1951-61 the percentage increase was 16.32. The proportion of urban to total population of the district works out the 30.06 per cent in 1971 as against 28.5 per cent in 1961-Census. The change in the proportion of urban population is mainly due to expansion of Jullundur city which has witnessed a spectacular growth of industry, trade and commerce during the last decade. The decade 1961-71 has been a significant era for the spread of literacy in the district which has shot up from 33.7 per cent in 1961 to 41.3 per cent in 1971. The district occupies the second position with regard to literacy rate among all districts of the State, the first being occupied by Ludhiana district (42.63 per cent).

Hindus constitute 53.90 per cent and Sikhs 44.90 per cent of the total population of the district. The scheduled castes population increased to 32.85 per cent in 1971 against 29.61 per cent reported in 1961-Census. It may be noted that Scheduled Castes people are found both amongst Hindus as well as Sikhs. It has also registered a substantial higher growth rate of 31.62 per cent in the decade 1961—71 as against the 18.62 per cent for the total population in the corresponding period. Punjabi and Hindi are the two principal mother-tongues reported by the district forming 74.8 and 24.9 per cent of the total population respectively. The remaining languages are spoken only by 0.3 percent of the population. Work participation rate in the district comes to 27.10 percent in 1971 Census as against 28.7 percent reported in 1961-Census. The fall in work participation rate in 1971 is mainly due to changes in definition of worker at 1971 census. The decline (following all India trend) is reflected mainly in the case of female workers. The female participation rate returned at the 1971-Census is as low as 1.4 per cent compared to 4.0 per cent in 1961-Census. Despite fast pace of urbanisation, Cultivators and Agricultural labourers together constitute about 51 per cent of the total number of workers in the district in 1971-Census. The other important categories which account for sizeable number of workers are Household Industry and non-household Industry (17.54%) other services (14.26%) and Trade and Commerce (9.94%). The workers in the three sectors of economy Primary, secondary and tertiary constitute 51.31%, 20.35% and 28.34% respectevely.

INTRODUCTORY NOTE ON DISTRICT CENSUS HANDBOOK

It is a census tradition to present data, separately, for rural and urban areas. Village or town is recognised as the basic area of habitation. In all censuses throughout the world the dichotomy of rural and urban area is recognised and the data are generally presented for the rural and urban areas separately. Since 1951, the census organisation is publishing the Village Directory as a part of District Census Handbook. These directories furnish information about the civic amenities available in each village along with its demographic characteristics viz., size of population by sex, houses and households, literacy, scheduled castes and scheduled tribes population and distribution of population by broad industrial categories. The maps given in the Handbooks showing the boundaries of all villages as well as some important physical features like road, rivers, etc., help to plan and undertake different types of socio-demographic and econo-demographic field studies. The data at district/tahsil-level provide a deep insight into the infra-structure prevailing in each district and facilitate the task of district and State planners and civil administrators. It also provides material for undertaking techno-economic appraisal of the resources available, the structural changes which have taken place during the past decade and the inter-regional disparities within the district could be properly investigated with the help of statistical data which have been presented in these volumes.

2. HISTORY OF THE DISTRICT CENSUS HANDBOOK

1. Since 1951, the census organisation has been publishing the District Census Handbook on behalf of the State Government. It was the unique achievement of the 1951 Census to bring out these handbooks giving the Primary Census Abstract (PCA) and important census tables for every district of the State. The basic census figures incorporated in PCA relate to area of the village, number of houses and households, total population, literates, workers classified by broad industrial categories and the non-workers. The 1951 District Census Handbooks, however, varied in contents and coverages from state to state depending upon the availability of resources with the State Government. At the 1961 Census, it was decided to bring out a certain minimum statistical data maps and other useful information, in a uniform manner throughout the country. The census data of the 1961 handbooks covered villages and town wise information of certain amenities like educational facilities, supply of drinking water and availability of electricity. The introductory chapter of the 1961 handbook was almost a Gazetteer—giving detailed information on physical, historical, geological and administrative aspects of the district. Besides, demographic, economic, social and cultural aspects the information was also given about the amentities like education, medical and post office in each village which was further supplemented by a list of events of the preceding decade and a statement giving details of fairs and festivals held in the district. The District Census Handbooks of the 1961 Census were published in a few States as late as 1971. The handbooks had to wait till the complete tabulation programme was got through and these outdated publications undoubtedly detract from their value. At the 1971 Census, it was emphasised to make available the census data to the users as quickly as possible after the census count. With this object in view, the District Census Handbooks of 1971 have been divided into three convenient parts. Of which parts A and B combined together incorporating essential village and town-wise data, were released quickly.

3. SCOPE OF 1971 DISTRICT CENSUS HANDBOOK :

In order to obivate delay in the publication of 1971 District Census Handbooks, this publication therefore, has been split up into parts A, B and C, two of which (A & B) have been combined in one volume and Part C, forms the present volume. The details of the contents of each part are as follows :—

Part-A : Village and Town Directory :

Part A—presents village and town directories. The village directory gives information about the area in acres, amenities like education, medical, power supply, drinking water, communication, post and telegraph, staple food, land—use pattern i.e. area under forest, irrigated and unirrigated land, cultivable waste and area not available for cultivation, day or days of the Market/Hat, if any, held in the village and the particulars of places of religious, historical or archaeological interest. Information about the nearest town and its distance from the village has also been incorporated.The Town Directory has been included for the first time at the 1971 Census. It presents data with the aid of seven different statements giving (I) the status of the town, its decadal population growth, since 1901 and the functional category, (II) Physical aspects and location of town, 1969, (III) Municipal Finance, 1968-69, (IV) Civic and other amenities, 1969, (V) Medical, Education, Recreational and Cultural Facilities in towns, 1969 (VI) Trade, Commerce, Industry & Banking, 1969, and (VII) Population by religion, 1971.

Part-B : Village and town-wise Primary Census Abstract :

This Part incorporates the village and urban block-wise Primary Census Abstract. The Primary Census Abstract (PCA) furnishes the basic census data i.e., area, number of houses and households

total population by sex, scheduled castes and scheduled tribes population, workers classified into nine industrial categories based on National Classification of Industries 1970 and non-workers by sex.

The District Census Handbook without district and tahsil maps seems incomplete. We have, therefore, included these maps in Part (A & B) of the handbook. The district map shows the tahsil boundaries location of towns and large villages with population size 5,000, important railway lines and roads rivers etc., and an inset map showing the position of the district in the State. A tahsil map ha s been placed before the alphabetical list of villages showing the location of each village in the respective tahsil. The tahsil map indicates the boundaries of each village alongwith location code number and towns with in the tahsil. The villages and urban areas have been shown by various population sizes. The inset map shows the position of the tahsil in the district.

Part-C : District census tables, tables on village directory and primary census abstract and administra tive statistics.

With a view to present in a systematic and uniform manner, various census tables relating to a district have been pooled together and presented in this volume—DCH Part—C and in order to enable the reader to co-relate the demographic aspects of the district with other environmental aspects of the district, basic administrative statistics have also been presented in this volume. The data incorporated in this part have been divided into three sections:—

Section A : District Census Tables

Section B : Tables on village directory and PCA data.

Section C : Administrative, welfare & developmental statistics.

Besides it contains a brief description of the district during the decade, bring out broad changes in demographic & socio-economic characteristics of the population.

4. DEFINITIONS AND CONCEPTS :

In census, the terms block village, town, house, household scheduled caste and scheduled tribe, literate, worker and non-worker are frequently used. These terms are defined below :

4.1 '*Village*'—The village in the Punjab State is the smallest unit of habitation with definite surveyed and fixed boundaries. The definition of the village adopted in census is identical with that of 'Mauza' given under Section 3(i) of the Punjab Land Revenue Act, 1887. It is the revenue Estate determined as such for the purpose of levy and collection of the land revenue. The revenue estates is defined in the Act *ibid* as an area of which a separate record of rights is maintained or which has been separately assesssed to land revenue or would have been so assessed if the land revenue had not been realised or compounded or redeemed or which the State Government has otherwise declared as an estate. The village is thus not merely the *abadi deh* (red lined area) for census taking but the entire land coming within the fixed boundaries of each village in terms of the Act *ibid.*

4.2. '*Town*'—There is no universally acceptable definition of urban areas. National differences in the characteristics distinguish urban or rural areas at the international level. At the 1971 Census we have adopted the following definition of a town. Incidentally it is anologous to the one adopted at the 1961 Census :—

(a) All places with a municipality, corporation or cantonment or a notified town area

(b) All other places which satisfy the following criteria :—

(i) a minimum population of 5,000,

(ii) at least 75% of the male working population engaged in non-agricultural activities;

(iii) a density of population of at least 400 per sq. km.

However, the Directors of Census Operations of the respective States were given some discretion in marginal cases to include in consultation with the State Government a place that had other distinct urban characteristics, or to exclude an underserving place from being treated as 'urban'.

4.3 '*Ward/Urban block*'—Wards have been devised by the local bodies for conducting municipal committee/cantonment elections. Ward is the smallest unit for administering the affairs of the urban area in a town/cantonment board. To conduct the census the enumeration blocks were carved out within each ward in the urban areas. It was decided normally to form a block with approximately 600-750 population or 120-150 households, with some marginal adjustments. It was emphasised that in the process of fo[illegible]n of urban blocks the municipal ward boundaries should not cut across. For the purpose of c[illegible], it was essential that the urban block should neccessarily be co-terminus with municipal

ward boundaries i.e., no census block should cut across the ward boundaries.

4.4. *'House'*—Occupied residential house is a dwelling house and includes a house used partly as a dwelling and partly for some other purpose like shop, workshop, factory, etc., but does not include a 'vacant house' where no person was found to be residing at the time of census. 'Census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for residential or non-residential purpose or both.

4.5. *'Household'*—Is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. It may be made up of related or unrelated persons. A servant, friend or a guest residing and eating with the household during the census period has been treated as a member of the household. On the other hand a son or daughter residing in a hostel has not been treated as a member of the household. Their enumeration was done at the place of their usual residence i.e., hostel. A hotel or hostel where a number of persons live together is recognised as an institutional household. So is a jail.

4.6 *'Scheduled Caste'*—Is such a caste, race or tribe or an ethnic group within such a caste, race or tribe as declared to be a caste by the Presidential orders issued under Article 341 of the Constitution of India.

4.7 *'Scheduled Tribe'*—Is such a tribe or tribal community as is declarecd to be scheduled tribe under Article 342 of the Constitution of India. There is no scheduled tribe in the present Punjab State. The following castes have been declared as Scheduled Castes in Punjab (notified in Government of India, Ministry of Home Affairs, Communication No. SRO 2477-A dated the 29th October, 1956) and published as the Scheduled Castes and Scheduled Tribes lists (Notification) Order 1956.

List of scheduled castes (adopted at 1971 Census)

1. *Throughout the State* :
   1. Ad Dharmi
   2. Bangali
   3. Barar, Burar or Berar
   4. Batwal
   5. Bauria or Bawaria
   6. Bazigar
   7. Balmiki, Chura or Bhangi
   8. Bhanjra
   9. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi or Ravidasi
   10. Chanal
   11. Dagi
   12. Dhanak
   13. Dumna, Mahasha or Doom
   14. Gagra
   15. Gandhila or Gandil Gondola
   16. Kabirpanthi or Julaha
   17. Khatik
   18. Kori or Koli
   19. Marija or Marecha
   20. Mazhabi
   21. Megh
   22. Nat
   23. Od
   24. Pasi
   25. Perna
   26. Pherera
   27. Sanhai
   28. Sanhal
   29. Sansi, Bhedkut or Manesh
   30. Sapela
   31. Sarera
   32. Sikligar
   33. Sirkiband

2. *Through out the State except the districts of Patiala, Bhatinda, Mohindergarh, Kapurthala and Sangrur*:
   1. Darain
   2. Bhogri, Dhangri or Siggi
   3. Sansoi

3. *In the districts of Patiala, Bhatinda, Mohindergarh, Kapurthala and Sangrur.*

Deha, Dhaya or Dhea.

Note:—District Mohindergarh has been transferred to Haryana State.

3.8. *'Literate'*—A 'Literate' is defined as a person who can both read and write with understanding in any language. A person who can merely read but cannot write has not been considered as literate.

4.9. *'Worker and Non-Worker.*-In the 1971 Census,every individual was asked to declare what according to him was his 'main activity',i.e., how he engaged himself mostly.Accordingly,all persons were divided into two broad streams of main activity as 'worker' and 'non-worker'. A 'worker' was defined as a person whose main activity' was participation in any economically productive work by his physical or mental activity. For that matter' 'work' involved not only actual work but also effective supervision or direction of work. The reference period was one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during the week preceding the day of enumeration and this had been returned as his 'main' activity' the person was classified as a 'worker' and categorised accordingly. A person who normally but had been incapacitated due to illness or travel, holiday, temporary break down, strike etc., was treated as engaged in regular work in which he would have otherwise been engaged. Persons under training such as apprentice with or without stipend or wages were considered as economically active and recorded as working. A person who was offered work but did not actually join it was not treated as a worker. In case of seasonal work like cultivation, livestock keeping, plantation, some types of household industry etc. a person's main activity was ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration.

The workers at the 1971 Census have been further classified into nine broad industrial categories based on National Industrial Classifications as under:—

I. Cultivators

II. Agricultural labourers

III. Livestock, forestry, fishing, hunting and plantations, orchards and allied activities

IV. Mining and quarrying

V. Manufacturing, processing, servicing and repairs.-
   (a) Household industry
   (b) Other than household industry.

VI. Construction

VII. Trade and commerce

VIII Transport, storage and communications

IX Other services.

In 1971, a person was treated basically as a 'non-worker' if he or she did not come under any of the above categories of 'worker'. Thus a person engaged primarily in household duties such as cooking for one's own household, or performing one's own household duties, or student attending an institution, or rent receiver was classified as such for his main activity and was treated as non-worker'. If he was also engaged in some economic activity, obviously not to the same extent as a full time worker,that activity was mentioned under 'secondary work'. The secondary, work if any, of those who were basically classified as 'worker' was also ascertained. Besides, the dependents, beggers and vagrants, convicts in jails or inmates of a penal, mental or charitable institution and job-seekers were clubed under the head of 'non-worker'.

SECTION—A

DISTRICT CENSUS TABLES

SECTION A—DISTRICT CENSUS TABLES

Introductory note

The 1971 Census enumeration was conducted in March-April with sun-rise of 1st April as the reference date. The enumeration commenced on 10th March and ended on 31st March with a revisional round from April 1 to April 3 to make the data upto date as on sun-rise of 1st April, 1971.

The following schedules were canvassed universally in the country :

(a) Houselist

(b) Establishment schedule

(c) Individual slip.

Another schedule called as Population Record was compiled from the Individual slips. In 1971 Census an attempt was made to collect comparable statistics to meet the requirement of basic data by different Ministries of Government of India, the State Government, other bodies and associates and research scholars.

As in the past, house numbering and houselisting preceded the actual census count. Following the 1961 tradition a uniform houselist was canvassed during 1970. In the houselist, data on housing such as material of wall and roof, number of rooms, whether household lives in a rented or owned house, as also the purpose to which the house was used, were collected.

At the 1971 Census a separate establishment schedule was canvassed along with the houselist. Establishment schedule collected, a variety of information about manufacturing, trade as well as allestablishments run in a census house.

The Individual Slip has the usual demographic questions viz., name, relationship to head, sex, age, marital status and birth place. At the 1971 Census two new questions were asked, viz, (i) age at a marriage and whether any child born during the last one year to each currently married women so as to yield useful data on fertility differentials and (ii) particulars of last residence. The social questions followed the usual pattern as in 1961 Census except that the question on nationality was dropped this time. In the field of economic data a significant departute was made at 1971 Census.

Processing of census data on electronic computers has been considered as the unique feature of 1971 Census. In the past Censuses, the data were processed manually except that in 1961, when household economic data were processed on a sampling basis. In 1971, the following series were adopted for preparing of various census tables;

A—Series: General Population Tables

B—Series: Economic Tables

C—Series: Social and Cultural Tables

D—Series: Migration Tables

E—Series: Establishment Tables

F—Series: Fertility Tables (State level)

G—Series: Special Tables for Degree Holders and Technical personnal (State level)

H—Series: Housing Tables.

The details of tables under each of the series are as under:—

A-SERIES :-GENERAL POPULATION TABLES

A—1: – **Area, houses and population**: This is the basic population table for the census and furnishes data for district/tahsil/city/town/urban agglomeration for total, rural and urban areas separately. It presents area in sqkm, density of population per sq km., number of inhabited and the un-inhabited villages number of towns, number of occupied residential houses, households and population by males and females. As in 1961, there are three appendices to this table.

Appendix I :—This appendix shows 1961 territorial units constituting the present set up of each unit. This appendix has been supplemented with an annexure showing particulars of areas for 1961 and 1971 for those towns which have under gone changes in area since 1961 and shows population for the transferred area aoccording to the 1961 and 1971 Censuses.

Appendix II:—One of the criteria for a place to be declared as town is that it should normally have a population of 5,000 and over.For various reasons many places with a population of 5,000 and over are not treated as town while a number of places with less than 5,000 population are treated as towns. This appendix, as in 1961, gives the number of such places with their population.

Appendix III: This appendix is intended to furnish figures for the number of houseless and institutional households and houseless and institutional population by sex, separately.

A-II—Decadal variation in population Since 1901:—

This table is identical to the 1961 Census and furnishes data of population from 1901 to 1971. This is a very important table as it gives the growth of population from decade to decade.

The appendix to this table as in 1961, spells out the adjustments necessary to bring the 1961 Census population of the district to the jurisdiction of the district as at 1971 Census.

A-III—Villages classified by population :—

This table as in 1961 gives figure for the number of villages, and their population upto 1,000 persons and above. The first two broad groups are further sub-divided into smaller size sub-groups as indicated below and the number of villages with their nomenclature and the population covered under each sub-group is indicated below:—

(i) less than 200 persons	diminutive village
(ii) 200-499 persons	very small village
(iii) 500-999 persons	small village
(iv) 1,000-1,999 persons	medium village
(v) 2,000-4,999 persons	large village
(vi) 5,000-9,999 persons	very large village
(vii) 10,000 and above	special village

This is supplemented with an appendix to show the sub-totals of broad groups of villages viz., 500-1,999, 2,000-4,999 and 5,000 and above.

A-IV—Towns and urban agglomeration classified by population in 1971 with variation since 1901: —

This table corresponds to table A-IV of 1961 and gives information about each town since 1901. This also furnishes the area of the town at the 1971 Census in sq.kms. As in 1961 all towns were divided into six classes according to the population size as shown below:

Size class	Population
I	over 100,000
II	50,000-99,999
III	20,000-49,999
IV	10,000-19,999
V	5,000-9,999
VI	less than 5,000

A town with a population exceeding 1,00,000 is termed as a city. The 1961 census concept of town group has been substituted by 'Urban Agglomeration' in 1971 table. The table furnishes decadal percentage variations of the population of each town and city. Besides the town, figures for urban agglomerations have also been presented. As against one appendix in 1961 this is supplemented by two appendices.

Appendix I is the same as in 1961 i.e., showing new towns added in 1971. It is further supplemented with two lists 'A' and 'B' showing places with a population under 5,000 treated as town for the first time in

1971 and those ommitted from the list of towns in 1971 but which were treated as towns in 1961.

Appendix II: which is a new one introduced at the 1971 Census shows the reasons for the change area of towns between 1961 and 1971.(Given at Page No, 23) Sub-appendix to Appendix I

B—SERIES: ECONOMIC TABLES

B—I Part A: Workers and non-workers according to main activity classified by sex and age groups :—
This is the basic economic table giving the distribution of workers and non-workers according to activity classified by sex and broad age groups. The table is based on full count of the census and presents data by total, rural and urban population separately for each district.

Workers have been classified into nine categories of main activity:—

I Cultivators

II Agricultutral labourers

III Livestock, forestry, fishing, hunting and plantation, orchards and allied activities

IV Mining and quarrying

V Manufacturing, processing, servicing and repairs-

(a) Household indusrtry
(b) Other than household industry

VI Construction

VII Trade and commerce

VIII Transport, storage and communications

IX Other services.

Except for two minor changes, the classification of workers by different industrial categories follows almost of the same classification as was adopted at the 1961 Census.

Mining and quarrying has been accorded a separate category IV at the 1971 Census while it was only a constituent of category III comprising of mining, quarrying, livestock, hunting and plantations, orchards and allied activities in 1961. The household industry which formed category IV in its own right for the 196 1 census has been treated as sub-category V(a) of manufacturing,processing, servicing and repairs in 1971Census.

Table B—II—Workers and non-workers in cities and non-city urban areas as according to main activity classified by sex and age-groups :—
This table based on full count has been culled out from table B-I Part A. It displays the same data as is contained in table B-I Part A,further distributing the total district urban figures. These figures have again been distributed into cities, towns and urban agglomerations arranged according to their population sizes. The table will be of particular interest to local bodies as it furnishes data on employment by nature of industry in different age-groups.

Table B—III—Parts A & B Classification of workers and non-Workers according to main activity by educational levels :—
This table gives the distribution of population by level of education for each category of workers and non-workers. This is presented in two parts the first Part-A for urban area and the other Part-B for rural areas. For uniformity at all India level only Part A is in corporated in this volume.

Unlike Table B-I Part A and Table B-II (based on full count) this table is based on 20 per cent urban and 10 per cent rural enumeration slips.

The educational levels adopted in Part A urban areas are :—

Primary
Middle
Matriculation or higher secondary

Non-technical Diploma or certificate not equal to degree
Graduate degree other than technical degree,
Postgraduation degree

Technical degree or diploma equal to degree or post-graduate degree.

Engineering and technology, medicine, agriculture veterinary and dairying, teaching and others.

B-IV Part A :Industrial classification of persons at work other than at cultivation as main activity by sex and divisions, major groups and minor groups :—

The table presents the distribution of working population other than that engaged in cultivation by division, major group and minor group of the National Industrial Classification codes as given in appendix to Part II B-Economic Tables, 1971 Census.

A similar table B-IV prepared for 1961 Census was based on Indian Standard Industrial Classification (I.S.I.C) which was evolved by Directorate General of Employment and Training in 1958.

The figures for each district have been presented by males, females and persons for the total and urban areas only.

The table is supplemented by an appendix which corresponds to table B-IV Part C of 1961. The appendix gives the distribution of workers engaged in manufacturing, processing, servicing and repairs by household industry and other than household industry. The figures are given for males, females and persons for each district for the total and urban areas.

This table will be of great use to the planners as it provides data up to the minor group NIC for various sectors of economy bringing out the differentials between rural and urban areas.

Table B-IV-Part D Industrial classification by sex and class of workers of persons at work in non-household industry/trade/business, profession for service as main activity—

The table gives the distribution of all workers other than those engaged in cultivation and household industry. The data in the table are cross tabulated by class of workers on one side and the divisions, major groups of National Industrial Classification on the other. In the 1971 Census workers were grouped into four classes of employment.

The table displays figures by males and females separately. The presentation is by total and urban areas only and this table corresponds to table B-IV Part B of 1961.

Table B—VI Part A(i) & Part A(ii)

Part A(i) and Part B(ii) :—Occupational classification of persons at work according to main activity other than cultivation classified by sex, age groups and educational levels.

The table B-VI has four parts-PartA(i) and (ii) relate to non-agricultural urban workers and part B(i) and (ii) to non-agricultural rural workers.

Part A (i) and Part A(ii) display the distribution of non-agricultural workers by age groups:-0-14,15-19 20-24, 25-29, 30-39, 40-49, 50-59, and 60+ for each group of National Classification of Occupation, 1968 (N.C.O.) incorporated as an appendix to Part II B. Economic Tables 1971 Census. The age distribution has been aggregated and presented for the division level of N.C.O. before its presentation for groups for each of the N.C.O. divisions. The presentation is by males, females and persons separately for the district. Part A(ii) and Part B(ii) display the distribution of non-agricultural workers by educational levels. The levels of education in respect of part A (ii) dealing with urban areas are:—

Primary

Middle

Matriculation or higher secondary

Non-technical diploma or certificate not equal to degree

Technical diploma or certificate not equal to degree

Graduate degree other than technical degree

Post-graduate degree other than technical degree

Professional degree or diploma equal to degree or post-graduate degree
Engineering and technology, medicine, agriculture, veterinary or dairying, teaching and others;
The level of education in respect of Part B (ii) dealing with rural areas are:—
Primary
Middle

Matriculation or higher Secondary

Graduate and above

In this table educational levels (i) non-technical diploma certificate not equal to degree and (ii) Technical diploma or certificate not equal to degree of table B-III, Part B, have been accounted for under the heading Matriculation or Higher Secondary level. The distribution of levels of education has been presented for each group of N.C.O. and is preceded by distribution at division level. The presentation is by males and females, separately for the district as a whole.

In 1961 similar information was contained in table B-VI which gave figures for urban areas only at division level and by major age groups : 0—14, 15—34, 35—59, and 60+

Table B-VII : Secondary work for persons having main activity (i) Cultivators, (ii) Agricultural labourers, (iii) Household Industry, *(iv)* non-household industry, trade, business or service and (v) Non-workers classified by sex and by secondary work (i) Cultivators, (ii) Agricultural labourers, (iii) Household industry, (iv) Non—household industry, trade, business or Service :

At the 1971 Census a question was asked from persons whether he was engaged in any economically productive work as an ancillary to his main activity, be it economically productive or not. Thus, persons performing household duties or students who might not have been engaged in an economically productive work as main activity and still participated in some economic activity such as helping the household in several items of work as in cultivation or in household industry or looking after the cattle were accounted for as secondary workers. Besides, the persons who had reported themselves as workers for their main activity might have been engaged in a subsidiary work.

The table gives the distribution of persons engaged in secondary work cross-classified by their main activity. The secondary work has been classified by cultivators. agricultural labourers, households industry and other than household industry, trade, business or service.

The presentation of the data is by sex for the total, rural and urban areas.

Table B-VIII : Persons classified as non-workers according to main activity cross-classified by sex, age groups and type of activity :

The table gives the distribution of male workers by main activities cross-classified by age groups : 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, and 60+ The main activities into which the non-workers have been distributed are students, household duties, dependents and infants, retired rentier and persons of independent means,beggers, vagrants, etc., inmates of penal, mental and charitable institutions and 'others'. The last category of "others" comprises mainly of persons seeking work.

The table corresponds to table B-IX of 1961 with two variants, firstly the age groups for 1961 table were 0—14, 15—34, 35—59, and 60 + and secondly the'Others' category of non—workers in 1971 corresponds to the sum of the two categories of 1961 persons seeking employment for the first time and persons employed before, but now out of employment and seeking work.

C—SERIES : SOCIAL AND CULTURAL TABLES

All tables of C—Series except C-V, C-VII and C-VIII have been prepared on 10% sample (Rural). and 20% sample (Urban) basis. The table C-V, C-VII and C-VIII have been prepared on full count

Table C-I Part A (based on 20% Sample)

Part A—Members of household by relationship to head of household classified by age-groups.

Table C-I Part A is based on population record and has been compiled on a two phase sampling technique. In the first phase 20% of the blocks were selected and from such selected blocks a sample of 20% households was drawn in the second phase by random sampling. Part A of this table has been prepared for total/rural/urban population at the district level. It gives the composition of the households by relationship to the head of the households, classified by three broad age groups viz., less than 30, 30—49 and 50+. Age not stated is included in all ages. Related and unrelated members of the households and the single member of the households have been shown separately. The relationship to the heads of the households has been shown for son, brother, daughter, sister, father, mother and other male and female members, separately in this table for married persons and for other marital status combined.

This table is of great sociological interest indicating the extent of the joint family system. The age distribution of heads of the households and their relations classified by marital status will further help in the study of the future trend of joint family. At the last census, its corresponding table C-1 was prepared on 20% sample basis for rural, urban and total population separately.The relationship

to the head of the household was shown as married sons and 'other married relations' but were not classified by broad age groups.

Table C-III : Age , sex and education :

Part A—Age, sex and education in all areas.

Part B—Age, sex and education in urban areas only.

This table corresponds to table C-III, Part A and B of the 1961 Census with slight difference in educational standards and age grouping cross-tabulated into literates. In the 1961 Census, this table was prepared on a full count but in the 1971 Census on 10% sample of rural slips and 20% sample of urban slips. This table has been, prepared, separately for total and urban population as part A and part B respectively. It measures the growth of literacy in the total population as well as in the different age groups.

The test for literacy adopted at the 1971 Census was 'the ability to read and write with understanding in any language'. A person who fulfilled this test was taken as literate. In case he had attained any educational standard, the highest examination passed was recorded. In part A, the educational qualifications thus recorded have been classified into six educational levels for the total population cross-tabulated by age groups 0—4, 5—9, 10—14, 15—19, 20—24, 25—34, and 35+. These six educational levels are :

1. Primary
2. Middle
3. Matriculation or Higher Secondary
4. Non-technical diploma or certificate not equal to degree
5. Technical diploma or certificate not equal to degree.
6. Graduates and above.

Part B of this table contains figures of post-graduate degree holders, technical degree holders and technical personnel, further divided into five sub-groups engineering and technology, medicines, agriculture, veterinary and dairying. teaching and others.

Table C-V : Mother Tongue :

Part A: Distribution of Languages inclusive of mother tongues grouped under each, specified in Schedule VIII to the Constitution of India.

Part B Speaker of languages/mother tongues (inclusive of mother-tongues where grouped), other than those specified in Schedule VIII to the Constitution of India.

Table C-V Part A : has two sections (i) Showing the distribution of speaker of languages (inclusive of mother tongues grouped under each) specified in Schedule VIII to the Constitution of India for district separately for total, rural and urban areas cross-classified by sex and (ii) showing the distribution of speakers of these languages for district/tahsil/town for total areas only cross-classified by sex.

Table C-V Part B presents speakers of languages/mother tongues (inclusive of mother-tongue where grouped) other than those shown under Part A for district, This table has also been presented in two sections (i) showing the speaker of these languages/mother tongues for district for total rural and urban areas cross classified by sex and *(ii)* showing the distribution of these languages, mother tongue for total areas of district/tahsil and towns classified by sex. In both parts A and B mother tongues have been grouped in some cases under the relevant language. This has been done on the basis of information readily available or in the light of studies already made. These identifiable mother tongues which returned 10,000 or more speakers each at all India level have been grouped in Parts A and B as shown below.

Part A Hindi : Awadhi, Bhojpuri, Brajbhasha, Garhwali, Hindustani, Kangri, Kumauni, Maithili, Malvi, Marwari, Mewati, Pahari, Rajasthani, Marathi—Kamari, Punjabi & Bagri

Part B Bhili/Bhilodi—Kokna/Kokni/Kukna

Lahnda—Multani

All other mother—tongues falling under part B and which returned less than 10,000 speakers each at the all India level or were not identifiable have been included in the category, 'others' last entry in Part A.

Pahari : Is a combination of various speaches spoken over long, stretches of areas where the speakers prefered to give a general name as Pahari. Similar is the case with Kuki appearing in Table C—V Part B marked by asterik there in.

Table C—VII Religion

This table corresponds to tables D—II of 1951 and C—VII of 1961 Censuses. It has been prepared for districts/tahsils, urban agglomeration, and city/town separately on full count. Information has been given for total, rural and urban areas cross—classified by sex. This table gives information in respect of persons professing six main religions separately (Buddhists, Christians, Hindus, Jains, Muslims and Sikhs) along with other religions and persuations and religions not stated.

Table C—VIII : Scheduled Castes and Scheduled Tribes :

Part A : Classification by literacy and industrial category of workers and non-workers according to main activity among scheduled castes :

This table corresponds to table D-III of 1951 Census and table C-VIII Part A of the 1961 Census.In 1961 Census, information was given up to the district level whereas in 1971 the details are shown down to tahsil/urban agglomeration city/town level.The table is prepared for total, rural and urban population separately on full count, cross-classified by sex. This table gives total population of the scheduled castes and their distribution by illiterates, literates and educated persons workers and non-workers. The workers are further classified into nine industrial categories. This is the main table which provides broad socio-economic data about the scheduled castes.

This table has been split up into two parts. Part A covers scheduled castes andPart B, scheduled tribes. Since there is no scheduled tribes in Punjab State, obviously, Part B has not been presented.

Information in respect of scheduled castes classified by literate and educated persons and illiterates is given in the appendix to this table.

In addition to this a number of special tables showing data for each scheduled castes are also given.

Special Tables on Scheduled Castes :

There are six special tables relating to scheduled castes which have been compiled on full count. These are the micro tables portraying a crystal picture of the socio-cultural and socio-economic conditions of the scheduled castes in respect of district and may be of great value in safe-guarding and promoting interests of this weaker section of the population.

For presenting data in these special tables, all scheduled castes (37 in number) have been arranged in alphabetical order.

All such persons who did not return the name of the caste to which they belonged and have supplied vague returns like 'Harijan', Achhut etc., in the Individual Slip, were clubbed together under 'Unspecified'.

Table SC-I : Industrial classification of persons at work and non-workers by sex for scheduled castes (for each caste separately)

Part A : Rural
Part B : Urban
Part A of this table corresponds to data given in table SCT-I for the 1961 Census.

The table has been prepared for all scheduled castes at district level. Persons of each scheduled castes have been classified into workers under nine industrial categories and separately as non-workers under category X.

Workers have been further classified into four broad categories :—

i) Cultivators

ii) Agricultural Labourers

iii) Household Industry, and

iv) Other Workers.

All persons who were workers but not engaged in cultivation, agricultural labour or household industry have been classified as 'other workers',this would include factory worker those working in trade,transport, all government servants, municipal employees, teachers,mining workers,political and social workers, building labourers etc. In fact all types of economic activity not being covered by cultivation, agricultural labour or household industry comes under 'other' category. Worker engaged in plantation or forestry have not been treated cultivators or agricultural labourer but as 'other' category of workers. Part B of this table contains information for urban areas on the same pattern as in Part A for rural areas.

Table SC-II : Age and marital status for scheduled castes (Castewise)

This table corresponds to table SCT-II Part A of 1961. Age data for each caste has been shown in broad age groups of 0—14, 15—44 and 45 and above by sex further classified according to marital status viz., never married, married, widowed, divorced or separated and unspecified status. The abbreviations used are :—

N.M. : Never married
M. Currently married

W : Widowed
S : Separated or Divorced.

The castes for which there have been no returns, have been omitted in this table.

Table SC-III : Education for scheduled castes (Castewise) :

Part A : Urban

Part B : Rural

Part A of this table corresponds to table SCT-III Part A(i) for the 1961 Census. The data have been presented for each district for urban areas only.

The classification of educational level as adopted at the 1971 Census is given below :

1. Literate (without educational level)
2. Primary or junior basic
3. Matriculation or higher secondary
4. Non-technical diploma not equal to degree
5. Technical diploma not equal to degree
6. University degree post-graduate degree other than technical degree
7. Technical degreee or diploma equal to degree or post-graduate degree.

Part B of this table corresponds to table SCT-III Part B(i) for the 1961 Census. The data have been presented for rural areas. On the same jurisdictional units as shown in Part A for the urban areas. Literates in rural areas have been divided into the following four educational levels :

1. Literate (without educational level)
2. Primary or junior basic.
3. Matriculation and above but below graduate
4. Graduate and above.

Figures for illiterate have also been shown in this table.

Table SC-IV : persons not at work classified by sex type of activity and educational levels for scheduled castes (not castewise) :

The table corresponds to table SC-1 of the 1961 Census and covers all the scheduled castes population unlike the previous tables giving separate information for each scheduled caste. The data are presented for total, rural and urban areas separately for the district.

The non-workers have been classified as per 1971 Census concepts according to their main activity as follows :

1. Student
2. Household duties
3. Dependents and Infants
4. Retired, rentier and persons of independent means
5. Beggars, vagrants, etc.
6. Inmates of penal, mental and charitable institutions.
7. Others.

Various categories of non-workers have been further classified according to their educational levels as indicated below ;

1. Literates (without educational level)
2. Primary or Junior basic

3. Matriculation and above but below graduate.

4. Graduate and above.

Figures for illiterate are also given in the table.

D—SERIES MIGRATION TABLES :

This series presents data on migration. The data have been incorporated at district level :

Table D-I : Population classified by place of birth :

Data with reference to place of birth have been furnished in table D-I. Its two appendices give a break-up of population by sex and rural urban status of the places of enumeration in the district as also that of the places of birth. In 1961 it was considered rural or urban as at the time of enumeration, whereas in 1971 it was considered rural or urban as at the time of birth of the respondent.

There are two appendices which give information about inter-district and inter-state migration.

The total includes age-groups 0—14. 60+ and age not stated.

Table D-V : Migrants workers and non-workers according to main activities classified by place of last residence :

This table corresponds to table D-VI of the 1961 Census which was prepared with reference to the place of birth whereas at the 1971 Census (place of last residence) is considered more relevant for presenting this table. The table shows sex-wise distribution of migrant workers and non-workers in each of the nine broad industrial categories according to the place of last residence in rural and urban areas in the case of our country's residents. In the case of migrants whose last place of residence is outside India only total figures are shown.

All migrants have been divided into two broad streams of main activity namely (1) as workers and (2) as non-workers according to their main activity.

This table indicates the industrial categories attracting migrants and also the movement of migrants from rural to urban areas and vice-versa. The table presents data for total and urban areas only

Table D-VI : Migrants classified by place of last residence, age-group, duration of residence and marital status :

This is a new table included in the 1971 Census tabulation plan which portrays the sociological aspects of the migrant population. It gives sexwise distribution of migrants by place of last residence according to age-group, marital status and duration of residence. The table presents data for district and city urban agglomeration. The distribution pattern of migrants according to last residence is the same as given in table D-II with the modification that data about countries beyond India have been clubbed together under the heading 'outside India'. The duration of residence is classified into less than 1 year, 1—9 years, and 10 years and above and the age-groups adopted are 0—14, 15—19, 20—24, 25—49, 50 years and age not stated. The marital status has been classified as :

1) Never married

2) Married

3) Widowed and divorced

E—SERIES : ESTABLISHMENTS TABLES

All the tables in this series have been prepared on full count basis.

Table E-I : Distribution of establishment by broad types

This is a new table prepared for the first time at 1971 Census. It has been prepared for total, rural and urban areas and gives distribution of all establishments by three broad types viz. (i) manufacturing, processing or servicing establishments, (ii) trade or business establishments and other, (iii) establishments in each of the government or quasi government, private and co-operative sectors of the economy.

The manufacturing, processing or servicing establishments have been further classified as registered factories, unregistered workshops and household industries. The trade or business establishments have been classified as whole sale retail or others. Lastly the 'other establishments' have been further classified as educational institutions, public health institutions and others.

Table E-II, Part A : Distribution of manufacturing, processing or servicing establishment other than household Industries, classified by registered factories, unregistered workshops and size of employment :

This table shows distribution of manufacturing, processing or servicing, establishment other than household industries for total, rural and urban areas separately. It gives useful information about the size of employment and the number of units under each of three categories (a) registered factories, (b) unregistered workshops, (c) household industries in each division/major group of NIC 1970.

Table E-II, Part B : Distribution of manufacturing, processing or servicing establishment other than household industries classified by industry fuel/power or manual used and size of employment :

Table E-II, Part C : Distribution of households industry establishment classified by industry fuel/power used and size of employment :

In this table, the number of factories and workshops has been furnished for total, rural and urban areas and by division/major group of N.I.C. 1970 and by size of employment. This also gives information about the kind of fuel or power used by broad employment size groups in total, rural and urban areas separately.

All these tables i.e., E-II Parts A, B & C correspond to E-II of 1961 Census table.

Table E-III : Distribution of trade/commercial establishments classified by the type of business or trade size of employment :

This is a new table and has been prepared for the trade/commercial establishments, classified by the type of business or trade and size of employment for total, rural and urban areas.All trade/commercial establishments have been further classified under each division/major group of N.I.C. 1970.

Table E-IV : Distribution of establishment (other than manufacturing, processing, servicing or business and trade establishments) by size of employment for total, rural and urban area in each division/major group of N.I.C. 1970 :

This table has been attempted for the first time in 1971 Census. It provides frame for the establishment not covered by table E-II Parts A and B and E-III.

H-SERIES HOUSING TABLES

Tables in this series are based on 20% sample of census houses. There are four tables based on houselisting data out of which the following tables have been processed on computor and presented in this publication.

Table H-I : Census houses and the uses to which they are put :

The data given in this table relate to Census houses and the uses to which they are put separately for rural and urban areas. Total number of census houses is given in column 3.

This table more or less corresponds to table E-I of 1961 Census. However, the data in table E-I of 1961 Census were presented down to tahsil level but at the 1971 Census it has been given only at the district level. Data have also been presented separately for each city, this time.

Table H-II : Distribution of census houses by predominant material of wall and predominant material of roof :

This table has been prepared for the same units as in table H-I. It gives structural condition of the houses according to type of material used for wall and roof. This table corresponds to table E-IV of 1961 with the difference that in 1971 this table has been prepared for census houses whereas in 1961 households living in census houses were cross-classified by material of wall and roof. The table has been supplemented with an appendix (Appendix to Table H-II) which cross classifies material of wall and roof.

Table H-III : Households classified by number of rooms occupied :

This table corresponds with table E-V of 1961 except that additional information for households with unspecified number of rooms is given in 1971. Institutional households have not been taken into account for purposes of compliation of this table.

TABLE A-1—AREA, HOUSES AND POPULATION

District/Tahsil/Urban Agglomeration/City or Town	Total Rural Urban	Area in km²	Population per km².	No. of Villages		No. of Towns	No. of Occupied Residential Houses	No. of Households	Population

Notes.— 1. The density figures of urban areas of Tahsil/District have been worked out using the area figures corrected up to two places of decimals obtained by adding the areas of the towns in the respective units and not using the area figures given in the table. For total and rural, the density is worked out on area figures corrected up to one place of decimal.

2. Total area figures given in Col. 3 against district represent provisional "Geographical Area" figures supplied by Surveyor-General. The Urban area figures are based on the area figures of individual towns supplied by local bodies. The rural area for a district has been arrived at by substracting the urban areas from the provisional "Geographical Area" supplied by the Surveyor General. The rural area figures of units lower than the District do not add up to the area figures of the District because the rural areas of the units lower than the district have been computed from the "Land use" area supplied by the State Director of Land Records.

3. For arriving at Tahsil/District urban area figures, the area of statutory towns have been taken into account since the area of out-growths were not available in case of urban Agglomerations. The area of out-growths have been accounted for in rural. Further, the density at Tahsil/District levels have been worked out on the areas so obtained. The area/density of urban agglomeration have been shown "N.A."

4. The following abbreviations have been used for the status of a town :—

M.C. — Municipal Committee.
C.B. — Cantonment Board.
N.A. — Not Available.

5. Towns treated as such for the first time in 1961 Census which continue as town in 1971 Census are shown with an asterisk on its left.

6. Towns treated as such for the first time in 1971 Census are printed in italics.

TABLE A-1.—AREA, HOUSES AND POPULATION

APPENDIX I

Statement showing the 1961 Territorial units constituting the present set up of the District

District/Tahsil (1971 Census)	1961 Territorial Unit	Area Added		Name of District/ Tahsil from which area is subtracted	Area which has been subtracted		Name of District/ Tahsil to which Area is added	Net gain/loss +(Gain) —(Loss) in km².
		Name	Area in km².		Name	Area in km².

Notes.—(1) @ Jullundur cantonment in 1901, population 13,280 (8,391 M, 4,889F), in 1911, population 13,964 (9,277 M, 4,687F), in 1921, population 11,923@ 7,531M, 4,329F), in 1931 population 14,735 (9,798M 4,937F); and in 1941, population 24,314(17,827M, 6,487F) was a part of Jullundur M.C. The Combined population of Jullundur M.C. and Jullundur Cantonment for 1901 to 1941 has been shown against Jullundur M.C.

(2) Town treated as such for the first time in 1961 Census which continue as town in 1971 Census is shown with an asterisk (*) on its left.

(3) Town treated as such for the first time in 1971 Census is printed in italics.

(4) The following abbreviations have been used for the status of a town :—

M.C.—Municipal Committee
C.B.—Cantonment Board
M.—Municipality
C.L.—Civil Lines
S.T.C.—Small Town Committee
N.A.—Not available

SECTION—B

TABLE ON VILLAGE DIRECTORY

AND

PRIMARY CENSUS ABSTRACT

FLY LEAF

SECTION B:—*Tables on Village Directory and P.C.A. Data*

This section incorporates ten tables based on village level data. These tables were generated by the Data Processing Division. Office of Registrar General, India, New Delhi from the punched cards, punched from the village Directory and Primary Census Abstract published in District Census Handbook (Part A and B) which has already been released. The list of these tables is furnished below:

Table 1—Distribution of villages with reference to area.

Table 2—Distribution of villages by select amenities, infrastructure and land-use data with reference to distance from nearest town.

Table 3—Distribution of villages by select demographic characteristics and distance range from nearest town.

Table 4—Average size of village by distance range from the nearest town by size class.

Table 5—Distribution of villages by size class of population having select servicing institutions and demographic chracteristics.

Table 6—Distribution of villages by number of hamlets and percentage of Scheduled Caste and scheduled Tribe population.

Table 7—Distribution of villages by density of population per hectare.

Table 8—Distribution of villages by proportion of S.C. and S.T. population.

Table 9—Villages by percentage of irrigated area to total cultivated area and density of population per hectare.

Table 10—Villages by percentage of literacy having and not having telephone with reference to nearest town.

SECTION—C

ADMINISTRATIVE WELFARE

AND

DEVELOPMENT STATISTICS

FLY LEAF

Section C: Administrative, Welfare and Development Statistics

In this section 51 tables which were uniformally available for all the districts have been incorporated. The list of table given below :—

List of tables on administrative, welfare and development statistics.

Sl. No.	Reference No.	Particular of Table
1.	1.01	Minimum and maximum temperature by month during 1961-71.
2.	1.02	Rainfall statistics in mm. by months and years.
3.	3.102	Length of roads (by nature of materials) as maintained by Public Authorities.
4.	3.103	Major Roads, 1970.
5.	3.106 3.107	Polymetric table of distances (in kms.) of towns.
6.	3.110	Circuit Houses & Dak Bungalow.
7.	3.111	Railway stations in the district, amenities provided and distance from district head quarters.
8.	3.201	Sources of irrigation.
9.	3.203	Gross area (by crops) irrigatied (in hectares).
10.	3.206	Towns and villages connected by electricity.
11.	3.401	Banks and their branches, 1970.
12.	3.501	Medical and Public Health Institutions.
13.	3.501 (a)	Hospitals/Dispensaries and related statistics 1970.
14.	3.502	Medical and para-medical personnel.
15.	3.504	Public Health Activities (vaccination, Maleria Control, B.C.G.)
16.	3.506	Drinking water.
17.	3.506 (a)	Villages by sources of drinking water as in 1969-70.
18.	3.602	Collegiate and technical institutions (including Arts, Science, Commerce, industrial schools and Agriculture) together with the strength of teachers and students.
19.	3.604	Library and Reading Room facilities in the district.
20.	3.706	Newspapers, magazines and periodical published in the district, 1970.
21.	4.101	Land-use pattern as in 1970-71.
22.	4.102	Single and Double cropped area.
23	4.103	Area and out-turn of principal crops.
24.	4.104	Crop and irrigation.
25.	4.108	Total Rural and Urban population per 100 hectare of area under food-grains and net area sown during last three decades.
26.	4.109	Density of cultivators and agricultural labourers per 100 hectares of net area sown in 1961 and 1971.
27.	4.110	Rainfall, area sown, irrigated and density in 1970-71.
28.	4.114	Agricultural tools and implements.
29.	4.201	Livestock.
30.	4.202	Animal husbandry and poultry farm.
31.	4.204	Veterinary institutions 1970-71.
32.	4.207	Livestock morbidity/mortality by diseases.
33.	4.401	Forest area by category of control.

FLY LEAF

Section C: Administrative, Welfare and Development Statistics

List of tables on administative, welfare and development statistics.

Sl. No.	Reference No.	Particular of Table
34.	4.404	General Progress of afforstation .
35.	4.406	Major and minor forest products.
36.	4.702	Jointstock companies as on 31st March, 1970.
37.	4.704	Hats and markets.
38.	4.705	Number of shop-cum-residence, business and commercial houses in 1970 (on the basis of houselist).
39.	5,101	Land revenue and collections.
40.	5.102	Land tenure.
41.	5.103	Consolidation of holdings.
42.	5.108	Distribution of holdings by size group, 1970.
43	5.501	Criminal justice and details of selected offences.
44.	5.601	Civil justice.
45.	5.701	Machinery for maintenance of law and order—police stations.
46.	5.702	Strength of police force in the district during 1961-70.
47.	5.901	Excise and Motor spirit tax.
48.	5.902	Receipt of sales tax, & entertainment tax.
49.	6.101	Local bodies and organs of democratic decentralisation.
50.	6.106	Receipt and expenditure of Gram Panchayat.
51.	6.202	Income and expenditure of Municipalities yearwise.
