FOREWORD

THE State of Orissa represents 4·9 per cent of the area and 4·02 per cent of the population of India. Nature has been generous in providing the State with untold wealth in minerals, water, fertile land and forest. The rich alluvial soil in the deltaic areas as well as along the river basins, as also most of the uplands are capable of producing a large variety of crops. The water-shed areas of the major rivers and hill tracts are covered with vast forests of great economic value. The State has roughly half the mineral wealth of India hidden underground awaiting exploitation. Vast quantities of water flow down the rivers which, fortunately for Orissa, are strategically dispersed over the intire State, and, if harnessed properly, will banish the twin spectre of floods and droughts haunting vast areas of culturable lands, and at the same time provide water for irrigating millions of acres in the coastal areas and upland and for generating large quantities of hydro-electric power for use in industry, and also make available hundreds of miles of irrigation-*cum*-navigation waterways for inland transport, and large areas for fish culture, recreation and tourism. These bounties of nature, the variety of picturesque landscapes and the long seacoast have attracted people from different parts of the country so that through the centuries a fine blend of human material and culture has developed. The ancient maritime achievements and the artistic stone edifices of great archaeological value stand out as symbols of the glorious past heritage.

The Census Operations during the past two decades have revealed many interesting statistical details. The Census Report of 1961 embodied in a number of Handbooks, each devoted to one of the 13 districts of the State, contains descriptive and statistical accounts intended to facilitate comprehensive study of conditions obtaining in a district as well as in the smallest village unit within it. I am happy to note that the plan and the scope of the Handbooks have been so designed as to make them useful books of reference.

The narrative account of each district covering geography, political history, population, education, economic activities, industries, agriculture and many other subjects, present a graphic picture of the district. This, along with the latest Census Tables, giving the social, economic, cultural and demographic data of the district, give an extensive array of statistical record.

A notable feature is the detailed statistics given in the Village Directory in the Handbook for each district, containing various items of information relating to each one of the 46,466 inhabited villages. They furnish very valuable information, which would provide indispensable material required by research scholars, anthropologists, social workers and people engaged in rural and regional planning.

Another feature of the District Handbooks is that they have been further enriched by inclusion of maps of the districts as well as maps of all the police stations in the district, giving location, boundary and survey and alignment of each village within a police station. Combination of the maps with the informative data will indeed be very useful and is commended as a utility publication of a high order.

I congratulate the Superintendent, Census Operations, Orissa, Shri M. Ahmed, I.A.S., and his colleagues, staff and others who have helped him in producing the Census Reports in the form of Handbooks through remarkable perseverance and zeal. These Census Reports will rank as outstanding works of public utility.

A. N. KHOSLA
Governor of Orissa

PREFACE

AMONG the many gifts of the Census of India, one is the scheme of preparation and publication of the District Census Handbook which was first introduced in 1951. The Registrar General, India recommended to State Governments that the publication of the District Census Handbooks containing the Census data of 1951 for each district of the State be undertaken by them. In response, a number of States in India undertook the printing of the Handbooks relating to their respective districts at their own cost. In Orissa, however, the printing was not undertaken for reasons possibly of financial nature, but the Census Organization completed its task of preparing manuscript volumes of all the 13 districts of the State. Apprehending that the vast amount of labour and energy spent in the preparation of the complete set of Handbooks for the State would go to waste if printing was not undertaken, the Superintendent of Census Operations took resort to the alternative of cyclostyling about 100 copies of the Handbooks of each district, a measure which ultimately turned out to be no less burdensome than printing, in view of the great bulk of the volumes. These sets were distributed to the State Government, the Central Government and to important institutions and organizations. But it was found shortly afterwards that the demand from various sources was too large to be satisfied with the available number of cyclostyled sets. It was a mistake indeed not to have printed the books.

At the commencement of the Census of 1961, the Registrar General, India recommended to all the Chief Secretaries of State Governments in India in his letter No. 27/1/60-RG., dated the 21st November 1960 that the State Governments take into consideration the great importance of the series of detailed statistics available up to the level of village for purpose of rural and regional planning, and agree to print at their own cost the District Census Handbooks of all the districts. The matter was given full consideration and ultimately the Revenue Department in their memo. No. VC—19/61-13593-R., dated the 13th March 1962 requested the Superintendent of Census Operations, Orissa, to arrange for preparation of the Handbooks and to send the manuscripts to the Orissa Government Press for printing in due course. The compilation of the present Handbook was undertaken by the Census Organization under the circumstances.

The Handbook as now presented is more elaborate than its counterpart in 1951. The main items of its contents were laid down in the scheme of the Registrar General with a view to ensure as far as possible uniformity of subject matter to be embodied in the Handbooks of all the States in India. According to the scheme, the Handbook is divided into 3 parts. Part I contains a Chapter, namely, 'Introducing the District ', which is a descriptive account of the district relating to various aspects which a reader might feel inclined to look for before he enters into the vast array of statistics that follow. Subjects such as, history, physical features, natural calamities, communication, public health, calendar of events and a multitude of others have been dealt with in a brief but comprehensive scale, relevant for a publication of this nature. Part II of the Handbook contains a series of statistical Tables relating to 1961 Census in their great variety and details. Part III contains many official statistics obtained from various Departments of Government. Names of the Departments furnishing the information are mentioned at the bottom of the text.

A considerable portion of this Handbook could not have been compiled but for the co-operation and assistance of the State Government and the respective Departments. The Departments concerned extended their unfailing co-operation in furnishing whatever notes or information were required from time to time. I wish to record my appreciation and thanks for all the co-operation thus received from the Departments of the State Government, particularly from the State Gazetteer Section and the Statistical Units of the Directorates of Health, Public Instruction, Agriculture and Food Production as well as from the offices of the Chief Conservator of Forests, the Registrar of Co-operative Societies, the Director of Community Development and Panchayati Raj and the Regional Director of National Savings, Orissa. I am grateful to the Ministry of Defence, Government of India for having permitted the publication of the maps contained in this volume, and to the Registrar General, India for giving an outline of the scheme according to which the Handbook has been prepared and for giving general guidance from time to time.

I am glad to place on record my unstinted appreciation of the zeal and perseverance with which the Officers of this organization contributed to the preparation of the Handbook. Many of the facts and figures embodied herein had to be built up with a great amount of diligence from raw materials, some of which were recovered by contact with the lower administrative units and some picked up and screened from a mass of reports and annual returns lying unchecked with the topmost departmental authorities. This was entrusted to Shri Shivakinkar Das, Tabulation Officer, who completed the task with admirable resourcefulness. The

compilation of the Tables in Part II entailed strenuous work on the Central Tabulation Branch of my office, headed by Shri V. Rajeswar Rao, Deputy Superintendent who took pains for their systematic collation and presentation. Shri Binoy Charan Mohanty, another Tabulation Officer of the Organization, was useful in examining economic, industrial and some similar aspects of the district. The text of the political history of the district has been contributed by Dr. N. K. Sahu, M.A., Ph. D., a reputed scholar on the history of Orissa. I am thankful to him for taking trouble to provide an authoritative and illuminating account of the district. Finally, I can visualize the amount of strain which will have to be undergone by the officer, who may eventually remain in charge of proof reading and printing, when the stage comes. Without the sincere co-operation of all these officers and the staff under them, it would have been hardly possible to present the formidable array of statistics and many other materials of non-census and census origin which fill the pages of this volume within the scheduled time.

INTRODUCING THE DISTRICT

Contains

Notes on Location, Boundaries, Physical features, History, Area and Population, Housing, Administration, Natural calamities, Communications, Education, Literacy, Economic activities, Industries, Agriculture, Irrigation, Animal Husbandry, Public Health, Community Development, Panchayati Raj, Co-operation, National Savings, Places of interest and Calendar of important events.

INTRODUCING THE DISTRICT—SUNDARGARH

LOCATION

Sundargarh, a district in the northern extremity of Orissa lies between 21° 35′ N and 22° 32′ N latitudes and between 83° 32′ E and 85° 22′E longitudes. Its boundaries, in the north, extend to Ranchi and Singhbhum districts of Bihar, in the south, to Sambalpur district, in the west, to Raigarh district in Madhya Pradesh and in the east, to Keonjhar district.

PHYSICAL FEATURES

The district is formed extensively of hills and dales. There are two conspicuous river valleys, namely, the valley of the Ib in the western part and the valley of the Brahmani in the eastern part. There is an open well-cultivated plain country along the valley of the Ib, particularly in the south. The rest of the Sadar subdivision consists of undulating table-land about 700 feet in average height, dotted here and there with hills and peaks rising to nearly 2,000 feet in the westernmost tract of Hemgir police station. In the north there is a gradual rise to the table-land of Chhotnagpur. The portion occupied by Bonai subdivision to the south-east has rugged forest-clad hills intersected by gorges and passes and having a narrow valley of the Brahmani and its tributaries. The country is broken up by many hill streams which sweep down in the rainy season with rapid torrents cutting off communications f r brief spells of time. The east and the west of the Brahmani valley is filled with high ranges of mountains principal among which are Mankarnacha (3,639 ft), Chheliatoka (3,308 ft) and Bichakani (2,964 ft) in the east. The last named hill has acquired great importance by yielding millions of tons of iron-ore for use in the Rourkela Steel Plant, which is transported by a new railway line running to the foot of the hill at Dumaro. The hill ranges to the west of the Brahmani valley are less useful and are lower in height, their peaks varying from 2,000 to 2,650 feet in height. The forests of the district which cover 2,083 sq. miles are of northern tropical dry deciduous type, mainly containing *sal*, *assan* and *kurum*. Among forest produce of lesser importance are bamboo, lac and gum. There is a stretch of coal bearing rock along the valley of the river Ib. Manganese, limestone, iron, kaolin and fire-clay mines are now worked extensively, giving a strong industrial bias to the economic activity of the people.

*Climate and rainfall

There is no meteorological observatory in the district. The description of climatic conditions given herein is based on records of the observatories in the neighbouring districts. The climate of the district is characterised by a hot dry summer and well distributed rainfall in the south-west monsoon season. The hot season starts with the beginning of March and continues till May which is usually the hottest month of the year with the mean daily maximum temperature recorded at 41° C (105·8° F) and the mean daily minimum temperature of 27° C (80·6° F). The heat in May and in early June is intense. The onset of rains brings relief although when the spells of rain cease, the weather reverts to oppressive character which is due to the high moisture content in the air. In September the day temperature continues to be unpleasant due to breaks in monsoon. The nights become cooler from October and in November there is a drop in temperature both at day and at night. December is the coldest month of the year with the mean daily maximum temperature of 27°C (80·6° F) and the mean daily minimum temperature of 12° C (53·6° F). In the wake of western disturbances passing across northern India in the cold season, the district is sometimes affected by cold waves when the minimum temperature may go down to 4° C or 5° C (40° F).

* Adapted from notes of Deputy Director General of Observatories (Climatology and Geophysics), India Meteorological Department, Poona.

The average annual rainfall in the district is 1647·6 mm (64·86″). The rainfall is fairly uniform in the whole district. About 86 per cent of the annual rainfall is received during the monsoon months from June to September, July being the month with the heaviest rainfall. The variation in the annual rainfall from year to year is not large. On an average there are 78 rainy days in the year in the district.

Relative humidities are high in the south-west monsoon season. Later the humidity decreases and during the winter season the air is fairly dry. Winds are generally light to moderate, assuming some amount of force during the summer months. Storms and depressions from the Bay of Bengal during the monsoon season pass across the district, causing heavy rainfall and strong winds. Thunderstorms occur during most of the months of the year, the frequency being the least in November and December and the highest during the monsoon season.

*GEOLOGY

The oldest rock formations found in Sundargarh district are those belonging to the Gangpur series which are prevalent in the former Gangpur State. The major rock types of the Gangpur series are phyllites, mica-schists, carbon phyllites, calcitic and dolomitic marbles which are followed by the rock formations belonging to the iron-ore series *viz.*, mica-schists, phyllites and quarzitic rocks with occasional beds of carbon phyllites. Rocks belonging to the iron-ore series are well developed in Bonai area, especially in the eastern parts and also partly in the central and western parts.

The typical rock types of the iron-ore series are found in the eastern part of Bonai area which consist of the phyllites, banded hematite quartzites, cherts, tuffs and lavas.

A greater portion of the area in the centre occurring between Birmitrapur, Gatitanagar, Jaraikela, Dharuadihi, Lephripara and Sundargarh, is occupied by the rocks of the Gangpur series. Shales, phyllites and mica-schists underlie the soil and alluvium-covered plain country throughout the area and are exposed along stream and river sections. A few thin beds and lenses of lateritised gonditic rocks carrying manganese-ore occur amidst these along a narrow zone between Kinjirma and Bargaon at the western part and through Pandrisila in the middle of the area. The majority of the ridges and hills between Birmitrapur, Panposh and Jaraikela are formed of carbon phyllites. Bands of limestone and dolomite generally occur in the plain country. The country lying to the north of Birmitrapur and Hathibari around Jaraikela and south of the railway line between Jaraikela and Bamra is underlain by mica-schists and shyllites belonging to the iron-ore series.

The area around Sundargarh and to its north and north-east is occupied by gneisses and granites which form the continuation southward of the Ranchi granites. Pegmatites and quartz veins traverse these gneisses and granites. There are also occasional veins and dykes of quartz amidst the mica-schists and phyllites in the area.

To the west of the Ib river coal-bearing Gondwana Sandstone occurs. The low mounds and hills occurring here and there amidst the plains are capped with laterite derived from the weathering of the underlying rocks.

*Economic Minerals

The important minerals of economic value in the district are iron-ore, manganese-ore, limestone and dolomite which are being exploited on a large scale.

* Adapted from the notes of the Superintending Geologist, Geological Survey of India, Calcutta.

Iron-ore

The most important groups of deposits of iron-ore in India occur in Singhbhum-Keonjhar-Bonai belt. The deposits form a series of ridges with a NNE-SSW strike. Out of the 48 kms strike length of this belt, only 23 kms fall in Bonai area.

The rocks exposed in this region consist of a series of pre-cambrian sedimentary formation known as the iron-ore series. The most important member of the iron-ore series, from an economic point of view, is the banded hematite-jasper.

The proved and probable reserves of the Singhbhum-Keonjhar-Bonai region are of the order of 1,072 and 8,128 million tonnes respectively, out of which the estimated reserve of Bonai area alone is 658 million tonnes.

Some of the important occurrences of iron-ore in Bonai area are the following :

1. Singhbhum-Keonjhar boundary to Samaj *Nadi* gorge
2. Samaj *Nadi* gorge to B. H. break (about 5 kms)
3. B. H. Q. break to path north of Salaibar Pahar (2 kms)
4. Dandrahar Pahar
5. Raisua-Lusipath to Jhubka-Dinakora path
6. East of Mankaranacha peak

Manganese

The manganese deposits of the Singhbhum-Keonjhar-Bonai area occur in highly folded shales of the iron-ore series and in the gently folded sandstones and shales of the Kolhar series which overlie unconformably in the rocks of the iron-ore series. The rocks associated with the deposits are intensely weathered and the area is largely covered with laterite and red ferruginous soil, and by chert. The deposits in the iron-ore series are tabular bodies conformably enclosed by shales whose upper extension and outcrop is capped by laterite and by chert. The manganese deposits that are associated with the rocks of the Kolhar series and their weathering products, occur as small lenses and layers conformably enclosed in shales, as cross-cutting stringers in shale, and as pockets in laterite. Low grade manganese-ore also occurs as small stringers and pockets in purple sandstones interbedded with the shales. The tabular and lenticular deposits associated with rocks of the iron-ore series are the largest of the deposits and are the most important source of ore in the Singhbhum-Keonjhar-Bonai area.

The deposits consist of manganese oxides that commonly are cavernous and exhibit botryoidal and mamillary structures. Veins of crystalline manganese oxides, with a metallic lustre, commonly traverse massive, dull cryptocrystalline-oxides and such oxides are typical of the veins that cut shale, chert or laterite. The grade of ore, even in individual deposits, has a wide range. Only about 30 per cent of the ores of the area contain more than 40 per cent manganese. Some deposits yield small amounts of chemical and battery grade ore containing up to 97 per cent manganese dioxide. Iron-oxides are the chief adulterants of the ores.

Important deposits in Bonai belt are located in Malda, Koira, Kalmang, Patmunda and Bhutra. The manganese deposits of the Gangpur area are in mica-schist and phyllite. The rocks are highly folded, and the deposits occur in the core of an east, plunging anticlinorium, in a belt about 64 kms in length. They are tabular conformable bodies. Most of the deposits are typical gondites composed of quartz and spessartite with subordinate amounts of primary braunite, rhodonite and other manganese silicates. Pyrolusite and psilomelane type oxides and hollandite are the principal supergene minerals.

The total estimated reserves in the Singhbhum-Keonjhar-Bonai belt are of the order of 4·6 million tonnes of all grades of which 30 per cent is

estimated to have manganese contents of 40 per cent or more. Probable reserves are of the order of 20·3 million tonnes of all grades. No separate figures of ore reserves are available for Bonai belt of Sundargarh district.

The reserves of the Gangpur area are not known but are probably small in-as-much-as no deposits are being worked during the present period of relatively high demand.

Limestone and Dolomite

Limestone and dolomite form an important horizon in the rocks of the Gangpur area. In majority of the exposures, limestone and dolomite are associated with each other, dolomite forming the lower member over which the limestone is superposed. The width of the outcrops varies from place to place depending on the topography, dip of the bands and also the degree of folding, the strata have undergone at each place. The average width of the band is between 610 m. and 760 m of which the dolomite forms nearly 365 m to 455 m. and limestone about 240 m. to 360 m. The general strike of the bands varies from EW to ENE-WSW. The dip of the formations is generally steep. The limestone is fine to medium grained and is grey in colour. There is transition from pure crystalline limestone to calcareous phyllites. About ⅓rd of the limestone reserves in the area is of good quality and of a composition suitable of flux. In the Gangpur limestone with the increase in the percentage of insolubles and silica there is no corresponding increase in the percentage of alumina and mangnesia. This makes it possible to utilize mary of the slightly impure silica-rich bands by blending with good material to suit the requirements for flux. The minerals occur at various parts of the district, such as, Birmitrapur, Hathibari, Orduapani, Gatitanagar, Limbra, Lanjiberna, Ludhkutoli, etc.

The economic minerals of lesser importance found are gold, coal, kyanite and sillimanite, lead-ore, mica, pyrites, building materials, kaolin and fire-clay.

HISTORY

The present district of Sundargarh comprised in ancient time the territory of South Kosala. In about 350 A. D. Samudragupta the famous Gupta monarch defeated king Mahendra of South Kosala. It is not definitely known whether the kingdom of South Kosala was then incorporated in the Gupta empire or not. It may, however, be pointed out that the Gupta cultural influence was strongly felt in that territory as known from the use of Gupta era in the official records and the issue of immitation Gupta coin types by some of the rulers of that territory. The Arang plate of Bhimasena reveals the names of a series of rulers who ruled over Kosala during the 5th and 6th centuries A. D. But it cannot definitely be said whether the political influence of these rulers extended up to the present district of Sundargarh or not. Early in the 6th century A. D. a new dynasty called the Sarabhapuriyas raised its head in Kosala region. The dynasty is named after the founder Sarabha raja and their capital located at Sarabhapura is identified with Sarafgarh in the present Sundargarh district. The son and successor of Sarabharaja was Maharaja Narendra who flourished in the early part of the 6th century A. D. The next great ruler was Maharaja Prasanna Matra who was the first independent ruler of the dynasty and his name is found at the beginning of the family genealogy furnished by the records of the later monarchs of the dynasty. Prasanna Matra is known to have struck gold and silver coins of his own. His son Jayaraja ruled for a short time and was succeeded by his brother's son Sudeva Raja. The last king of the line was Prabararaja, brother of Sudevaraja and this king is known to have effected transfer of capital from Sarabhapura to Sripura. He was defeated and killed by the Panduvamsi king Tivara Deva who occupied Sarabhapura and built an extensive empire which comprised present Sundargarh district. After Tivara Deva the important kings

of the dynasty were Chandragupta, the brother of Tivara Deva, Harsagupta, the son of Chandragupta and Mahasivagupta Balarjuna, the son and successor of Harsagupta. Balarjuna was ousted from the Sirpur region of Kosala by the Kalachuris and continued to rule over the Sambalpur region including probably Sundargarh area. His son Mahabhavagupta Janamejaya was an ambitious king and from his time onwards the family was popularly known as the Somavamsi. During his rule the kingdom extended from the present district of Sundargarh in the north to Kalahandi in the south and Baudh region in the east. By that time the Bhaumas ruled over the coastal regions of Orissa and in between the Somavamsi and Bhauma kingdoms a number of petty principalities flourished owning allegiance mostly to the Bhaumas. One such principality was that of the Mayura family who ruled over the modern Bonai region. The earliest known ruler of this family was Udita Baraha who hailed from Chitrakuta in Rajastan, and founded the rule of his family in Bonai region under the suzerainty of the Bhaumas. He was succeeded by his son Teja Baraha after whom Udaya Baraha, who styled as Maharaja Ranaka, ruled over the territory called Bonai Mandala. Udaya Baraha was a devout Buddhist as known from his epithet Parama Saugata and the emblem of his seal was the peacock. Subsequently, the Mayura rulers of Bonai region were supplanted by the Bhanjas of Khijinga Kotta (Khiching). The Bhanjas adopted the peacock emblem of the Mayuras and called their territory as Mayurbhanj.

In the meantime the Gangapur area of the district passed through many political changes. The Somavamsi power of Kosala came to an end in 1022 A. D. after which the Kalachuris sem to have occupied the Gangapur area. The Kosala region was occupied by the Gangas during the time of Anangabhima Deva III (1211-1238 A. D.) and with that the modern Sundargarh district came under the Ganga rule.

Khijinga Kotta of the Bhanjas was destroyed by the army of Sultan Firuz Shah who invaded Orissa in 1361 A. D. and after that the Bhanjas who had by that time political influence over Bonai region, shifted towards the east and confined themselves to round about their new headquarters, Haripur. It was about that time that the Kadambas became the rulers of Bonai.

During the rule of the Gangas a new feudatory family having Kesari epithet became powerful in the Gangapur region. They had their headquarters at Masabira and ruled over a small territory apparently under the suzerainty of the Gangas. The last king of this line named Kesari Deva was murdered in course of a rebellion organized by the Zamindars of the kingdom headed by the Dewan, Madan Padhan, an influential Bhuyan leader of Kirmadand. After that the kingdom became anarchical and chaotic as the chiefs quarrelled among themselves to grab power and influence. It was by that time that one Gangadhar Sekhar Deb, the younger brother of the Raja of Sikharbhum in Manbhum, belonging to the old Paramar family of Dharanagar came to that territory. It is said that he had a quarrel with his elder brother and was passing through the Kesari kingdom on his way to Surguja. The Majhi of Saragipali, one of the feudal chiefs who were quarrelling for power, met Gangadhar and both of them joined hands to subjugate the feudal chiefs. Prince Gangadhar, being successful in removing the chaotic state of affairs, was acknowledged by all to be the king. He founded a new capital town on the bank of the river Ib which was named after him as Gangadharpur later on as Gangapurgarh. His kingdom was known as Gangapur after the name of the headquarters town. Raja Gangadhar Sekhar Deb is known as Hati Hambar Sekhar Deb in some records. The Sekhar family ruled over Gangapur peacefully for some time. Early in the 19th century during the rule of Raja Indra Sekhar Deb, Pratap Majhi of Sargipalli organized a rebellion o oust him from power and Indra Sekhar had to remove his headquarters from Gangapurgarh to Rayabogagarh as the Gartia of Rayabogagarh promised

him help against the Majhi of Sargipalli. Parsuram Sekhar Deb, the son and successor of Indra Sekhar, shifted his capital to Nabarangpur, also called Lyinggarh near Rajgangpur. He defeated and killed Pratap Majhi of Sargipalli at a place called Kupsingha. Parsuram Sekhar received Sanad from the British Government in 1827. He was succeeded by his son Jagadeo Sekhar Deb who further removed the capital to a place called after him as Jagatgarh. After him his cousin brother Chandrabhanu came to the Gadi and as he died childless in 1847 there was dispute for succession and the British Government decided the matter in favour of Janardan Sekhar Deb, a nephew of the deceased Raja. But Janardan was killed by the family priest in 1858 and was succeeded by his grandson Raghunath Sekhar Deb who was then a minor. Gajaraja Sekhar, the uncle of the minor ruler managed the kingdom, but he attempted to defame the minor king for his own interest. Raghunath was entangled in a murder case, but was subsequently acquitted. He ruled the state for a long time and died on the 10th June, 1917 when he was succeeded by his grandson Bhawanisankar Sekhar Deb. The new ruler was inclined towards western culture and introduced various reforms in administration. He died on the 9th May, 1930 and was succeeded by Birmitra Partap Sekhar Deb who was a minor. He died in London on the 26th June 1938 and was succeeded by his younger brother Uditpratap Sekhar Deb who was also then minor. This state merged with Orissa on the 1st January 1948.

In the ex-state of Bonai the Kadamba royal family continued for a long time till the merger of the state. The state made considerable improvement from the time of Raja Chandrasekhar Chandra Deo Deb whose son Raja Dayanidhi Indra Deo Deb was a popular ruler and died in 1898. He was succeeded by his son Nilambar Chandra Deo Deb who was a contemporary of Maharaja Krishna Chandra Bhanja of Mayurbhanj. After the death of Nilambar in 1902 his son Dharanidhar Indra Deo Deb ruled Bonai from February, 1902 till the merger of the state on 1st January, 1948. He died in July, 1949.

AREA AND POPULATION

Area

Sundargarh district, which is ranked tenth in area among all the districts in the State, extends over an area of 3,788·0 square miles according to the estimate of local revenue authorities. Neither the jurisdiction nor the district boundaries have undergone any change during the decade 1951-61. But according to the latest report of the Surveyor General, India, the area of the district is 3,751 square miles. It is difficult to reconcile the difference of 37 square miles as the Surveyor General does not maintain the record of areas of administrative units below the district level. The area of smaller administrative units as ascertained from the local authorities is added to get the total area of the district as mentioned above. This figure is adopted for calculation of density of population and similar other purposes. The different methods of survey employed by the Surveyor General, India and by the local authorities may account for the divergence between the two figures.

Aera of the lower units

The district is divided into three subdivisions and nineteen police stations for administrative convenience. Table A-I of the General Population Tables gives the particulars of area, density, villages, towns, houses, households and sexwise population of each of the administrative units. However, the area of each subdivision together with the number of police stations contained in it is given below :

District/Subdivision	Area in		No. of police stations
	Sq. miles	Sq. K/ms.	
Sundargarh District ..	3,788·0	9,810·9	19
Sadar Subdivision ..	1,781·5	4,614·1	7
Panposh Subdivision	710·5	1,840·2	5
Bonai Subdivision ..	1,296·0	3,356·6	7

Urban and Rural areas

The district had an urban area of 7 square miles in 1951 which has increased to 69·7 square miles in 1961. The addition of two new towns during the decade contributed to this tremendous urban growth. The rural area has correspondingly declined from 3,781 square miles in 1951 to 3,718·3 square miles in 1961 covering 1,632 villages in all. The urban and rural areas in each of the subdivisions are given below :

District/Subdivision	Urban		Rural	
	Area in sq. miles	No. of towns	Area in sq. miles	No. of villages
Sundargarh District	69·7	4	3,718·3	1,632
Sadar Subdivision	19·3	2	1,762·2	714
Panposh Subdivision	50·4	2	660·1	372
Bonai Subdivision	..	..	1,296·0	546

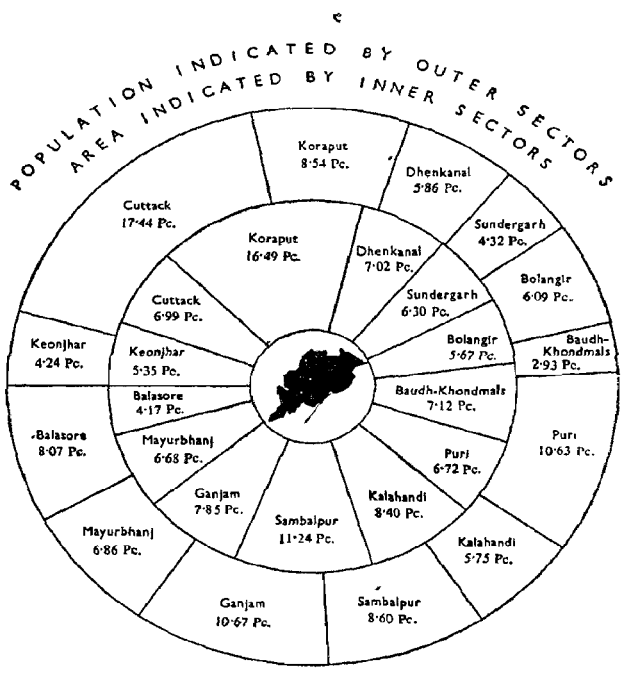

Territorial changes

In 1951 Birmitrapur PS had two outlying OPs, namely, Raiboga and Hatibari. These two OPs were separated from Birmitrapur PS. The area of Raiboga OP was constituted into a new police station of the same name, while Hatibari OP was merged with Bisra PS. As a result of the establishment of the Steel Plant and construction of the township at Rourkela, a police station was specially established for controlling law and order within the area of the Plant and the township.

Comparison with other districts

Sundargarh district, which is ranked tenth in area and eleventh in population among all the districts has 6·30 per cent of the State's area and 4·32 per cent of the State's population. The following diagram gives an impression of the size and population of the district compared with other districts.

PERCENTAGE OF POPULATION AND AREA OF DISTRICTS

Towns

A town is a continuous group of houses inhabited usually by not less than 5,000 persons which, having regard to the character of the population, the relative density of dwelling, the importance of the place as centre of trade, administration and human associations, the Census authorities decide to treat as a town for Census purposes. One important test with regard to the character of the population is that there must be a considerable preponderance of inhabitants dependent on non-agricultural professions as means of livelihood.

Two industrial localities, namely, Rourkela and Rajgangpur have been declared as new towns in accordance with the above definition during 1961 Census. Their inclusion has increased the total number of towns in the district to 4. The classification of the towns by population in 1961 Census with variation from 1941

are given in Table A-IV of the General Population Tables. However, the towns with their class-sizes are given below :

Class of town	Name of town	Persons	Males	Females
Class II	Rourkela	90,287	58,734	31,553
Class III	Birmitrapur	20,301	10,752	9,549
Class IV	Rajgangpur	13,843	7,833	6,010
Class IV	Sundargarh	11,329	5,968	5,361

Village

A village means a revenue village or mauza other than that which is absorbed within the area of a town or a city. It may contain one or many groups of houses or hamlets or on the other hand contain no houses at all. The number of inhabited villages which initially decreased from 1,638 in 1941 to 1,631 in 1951 has further declined to 1,588 during the decade ending with 1961. The number of uninhabited villages has increased from 43 in 1951 to 44 in 1961. The percentage of the villages by various population-sizes and the percentage of the population living in them in 1951 and 1961 are given below along with the respective figures for the State for comparative study :

Village with population of	Census Year	Sundargarh		Orissa	
		Percentage of No. of villages to total No. of villages	Percentage of population to total population	Percentage of No. of villages to total No. of villages	Percentage of population to total population
Less than 500 ..	1951	80·75	51·08	84·00	51·70
	1961	74·94	43·43	77·80	41·66
500—999 ..	1951	15·33	31·64	12·09	28·69
	1961	18·58	32·41	15·78	30·30
1,000—1,999 ..	1951	3·68	14·98	3·41	15·24
	1961	5·73	19·48	5·41	20·24
2,000—4,999 ..	1951	0·24	2·30	0·49	4·25
	1961	0·75	4·68	0·97	7·25
5,000—9,999 ..	1951	...	..	0·01	0·12
	1961	...	..	0·04	0·55

The decline in the percentage of small villages and in the percentage of population living in them and the corresponding increase in the percentage of medium-sized villages with population of 500 to 1,999 which is evident from the above statement compares favourably with the respective percentages in the entire State. Although the percentage of villages with population of 2,000—4,999 and the percentage of the population living in them increased during the decade, they are much below the respective figures of the State. The non-existence of a single village with population above 5,000 denotes the under-developed character of the rural areas in spite of the progress noticed during the decade, 1951-1961. The details of the villages classified by population-sizes are given in Table A-III of the General Population Tables.

Density of population

The density of the district, which is 200 persons per square mile, is much below the State average of 292 persons per square mile. The density of 146 persons per square mile in 1951 was equally low compared with the growth of population during the earlier decade. The rural and urban densities are 168 and 1,948 persons respectively per square mile. Column 4 of Table A-I gives the density of each administrative unit in the district. The density of each police station compared with those of the district and of the State is given below along with the density of 1951.

Police stations with density below that of the district			Police stations with density above that of the district but below that of the State			Police stations with density above that of the State		
Name of PS	1951	1961	Name of PS	1951	1961	Name of PS	1951	1961
1	2	3	4	5	6	7	8	9
Lephripara ..	145	182	Sundargarh ..	174	218	Birmitrapur ..	246	337
Hemgir ..	82	103	Bhasma ..	242	284	Bisra ..	259	311
Talsara ..	149	185	Bargaon ..	184	216	Rourkela ..	..	2,453
Raghunathpali ..	151	185	Rajgangpur ..	205	261			
Banki ..	61	79	Raiboga ..	206	214			
Gurundia ..	41	56	Bonaigarh ..	183	242			
Sarasara Balang ..	48	59						
Mahulpada ..	60	76						
Koira ..	81	99						
Kamarposh Balang	82	114						

The ten police stations in column 1 are the sparsely populated areas of the district and their density continues to be lower than that of the district in spite of the increase noticed during the decade ending 1961. The six police stations in column 4 whose densities have recorded considerable rise compared to 1951 are below the State average. Thus these sixteen police stations with low densities account for the lower density of the district than that of the State. However, three other police stations as shown in column 7 have exceeded the density of the State.

Growth of population

The statement below shows the growth of population of the district from decade to decade.

Year	Population	Percentage of variation
1901	277,173	..
1911	362,138	+30·7
1921	377,449	+ 4·2
1931	436,860	+15·7
1941	490,708	+12·3
1951	552,203	+12·5
1961	758,617	+37·4

Sundargarh district has steady increase of population and suffered no decrease of population in any of the decades since the beginning of Census. The growth of population during the decade 1901-1911 is quite high amounting to 30·7 per cent. This is not only due to the fact that there was satisfactory natural growth among the prolific people of the district where the material condition was good enough to act as a stimulus, but also to the fact that there was ample room for agricultural expansion which encouraged immigration from neighbouring areas. The construction of the Bengal Nagpur Railway line through the district brought it in direct contact with the outside world. The produce of the district could now find better markets outside and this brought about a rise in the price of agricultural produce to the prosperity of the large section of agricultural people. This resulted in influx of settlers from Chhotnagpur in large number. In 1908 Bonai was in the grip of a great famine due to failure of crops but in all other years the harvest was plentiful and large extent of waste lands were reclaimed.

In the decade 1911-21 public health was good for the first seven years but in 1918 along with

a bad harvest in Sundargarh and Panposh subdivisions, the influenza epidemic spread throughout the district. In 1919, cholera and smallpox took a heavy toll of life but as the district is inhabited mostly by Scheduled Tribes who have a high birth rate and as there was immigration from Chhotnagpur Division, the district instead of showing a decrease of population as many other districts did, showed a surplus, though small of 4·2 per cent over the population of 1911. The increase of population was also partly the result of opening the dolomite and limestone quarries in Rajgangpur and Raghunathpali.

In the decade 1921-31, the loss suffered earlier in the shape of low increase of population was quickly recouped to an extent of 15·7 per cent. Public health continued to be exceptionally good throughout the decade except probably in 1921 when the effects of influenza were still lingering in Bonai. There was great agricultural prosperity both in the shape of good harvests and by way of extension of cultivation by reclamation of waste lands and forests. The harvest of 1926-27 in Bonai was not quite satisfactory but this is probably the singular case of low outturn of crop in the whole decade. Material prosperity was increased owing to the extension of the Railway line to Birmitrapur in 1922. The limestone and manganese quarries further developed during the decade. The district also gained considerably due to execss of inward flow of migration.

The decade 1931-41 was a period of general peace and prosperity for the district. The general health of the people was good throughout the decade. Agricultural conditions in sadar and Bonai subdivisions were very favourable but in Panposh subdivision the outturn of crop was not satisfactory in some years. There was poor rainfall in 1932, 1935 and 1938 when the outturn of crop was lower than in other years but no scarcity was felt. As a result, the population grew steadily to the extent of 12·3 per cent during the decade.

During 1941-51, the district achieved one of the highest percentages in increase of population This is specially because the harvests were good. throughout and there were no natural calamities or any type of severe epidemics. In 1943, the highest flood in living memory was seen in the river Brahmani when 66 villages were affected and some damage to crops and houses resulted. But this is probably the singular incident of calamity during the decade. The material condition of the district was affected on account of general reasons such as war-time and merger of the states with Orissa. But these did not seriously affect the people except in the matter of high price by which they were hit hard. In the Census of 1951, the district made an addition of 61,495 persons to the population it had in 1941.

The last decade 1951-61 is remarkable in the history of the district. Industrial advancement has outweighed agriculture. A Cement Factory and allied industries were set up at Rajgangpur while a Steel Plant was commissioned into production at Rourkela. The construction of a Fertilizer Plant is also nearing completion. The mining area in Birmitrapur has been developed fully.

A college for general education at Sundargarh and an Engineering college at Rourkela for technical education were opened. Besides large scale industrialization which has provided incentive for participation by people from all over India, the major part of the district is covered by National Extension Service Blocks. Agricultural prosperity combined with large scale industrialization and the absence of natural calamities have contributed to the highest growth of population accounting to 37·38 per cent in 1961 Census. The percentage growth in each of the police stations is indicated below:

Up to 9·9 per cent			10—19·9 per cent			Above 20 per cent		
Name of PS		Percentage	Name of PS		Percentage	Name of PS		Percentage
Raiboga	..	3·94	Bhasma	..	17·50	Talsara	..	23·69
			Bargaon	..	17·17	Bisra	..	20·10
						Raghunathpali	..	22·82
						Sarasara Balang	..	23·82
						Koira	..	23·30
						Sundargarh	..	25·23
						Lephripara	..	25·53
						Hemgir	..	26·09
						Rajgangpur	..	27·68
						Mahulpada	..	27·04
						Birmitrapur	..	36 95
						Bonaigarh	..	31·97
						Banki	..	30·73
						Gurundia	..	37·45
						Kamarposh Balang	..	38·18
						Rourkela	..	480·18

Growth of urban population

The statement below shows the growth of urban population during the decade 1951-1961:

Year	Persons	Decade variation	Percentage decade variation	Males	Females
1951	15,367	..	..	8,077	7,290
1961	135,760	+120,393	783·45	83,287	52,473

Sundargarh and Birmitrapur were declared as towns for the first time in 1951. Two more towns, namely, Rourkela and Rajgangpur were added in 1961. The declaration of these two industrial areas as towns has substantially contributed to the growth of urban population during the decade as will be evident from the above statement. However, the sex ratio of the urban areas has declined from 903 females per 1,000 males in 1951 to 630 females per 1,000 males in 1961.

Age

In 1951 Census the Age Tables were tabulated on 10 per cent sample basis. But a departure has been made in the present Census by compiling the Tables on full count basis. The sexwise population according to the broad age-groups in this district based on 1961 Census is given below:

Age-group		Persons	Percentage of District population	Males	Percentage of District population	Females	Percentage of District population
All ages	..	758,617	100·0	396,214	52·2	362,403	47·8
0—14	..	292,998	38·6	146,748	19·3	146,250	19·3
15—34	..	268,372	35·4	145,516	19·2	122,856	16·2
35—59	..	160,777	21·2	87,879	11·6	72,898	9·6
60+	..	35,417	4·7	15,719	2·1	19,698	2·6
Age not stated	..	1,053	0·1	352	N	701	0·1

Children below 14 years constitute 38·6 per cent of the total population while persons in the working age groups of 15—34 and 35—59 together constitute 56·6 per cent. The high percentage of the persons in the working age-groups in the district is due to the large scale concentration of workers in the industrial areas. Persons above 60 years are only 4·7 per cent, while 0·1 per cent could not state their age. While there is no sex disparity in the age-groups 0—14 and 60+,the percentage of males in the age-groups 15—34 and 35—59 is much in excess of the females which has resulted in the adverse sex ratio of the district, 915 females per 1,000 males.

Sex

The sex ratio of the district from 1901 to 1961 is given below:

Year	Sundargarh			Orissa		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	959	959	..	1,037	1,039	967
1911 ..	988	988	..	1,056	1,058	947
1921 ..	1,004	1,004	..	1,086	1,089	963
1931 ..	1,013	1,013	..	1,067	1,071	924
1941 ..	1,017	1,017	..	1,053	1,058	914
1951 ..	1,012	1,016	903	1,022	1,029	881
1961 ..	915	990	630	1,001	1,015	807

The sex ratio of the district has been much lower than that of the State in all the decades. The ratio of 959 females per 1,000 males in 1901 steadily increased from decade to decade till it reached the maximum of 1,017 females per 1,000 males in 1941. Thereafter, downward trend set in, when the sex ratio declined to 1,012 in 1951 and 915 in 1961. The urban sex ratio in 1951 was above that of the State but in 1961 the ratio which came down to 630 is beyond comparison with the State.

Marital Status

The marital status of all persons in the district by their broad age-groups is given in Table C-II of the Cultural Tables. The proportion of 1,000 persons of each sex to general population compared with the previous censuses of 1941 and 1951 is shown below:

Marital Status	Males			Females		
	1961	1951	1941	1961	1951	1941
Never Married	504	448	NA	457	422	NA
Married	467	519	NA	449	440	NA
Widowed	23	33	NA	87	138	NA
Divorced/Separated	5	NA	NA	6	NA	NA
Unspecified	1	NA	NA	1	NA	NA

NA=Not Available

The proportion of unmarried persons in both the sexes in 1961 has shown considerable increase compared to 1951. Although the proportion of male married persons declined during

the decade ending 1961, no such trend is noticed in the case of females. The proportion of widows in both the sexes has assumed downward trend in 1961. The distribution of 1,000 married persons in each sex by their age-groups is given below:

Age-group	Males			Females		
	1961	1951	1941	1961	1951	1941
0—14	3	38	..	9	26	..
15—34	494	486	..	609	547	..
35—54	398	376	..	312	346	..
55 and above	*104*	*110*	..	*68*	*80*	..
Age not stated	1	..	..	2	1	..

The declining proportion in the age-group 0—14 of both sexes is an indication of the gradual disappearance of child marriage. The highest proportion of married persons in both the sexes is found in the age-group 15—34. While the proportion of male married persons in the age-groups 35—54, and 55 and above has increased during the decade ending 1961, the proportion of females has declined during the corresponding period.

Religion

The distribution of population by religion is given in Table C-VII of the Cultural Tables.

(*i*) Persons born at place of enumeration	..	466,085 (61·4%)	285,637 (72·1%)	180,448 (49·8%)
(*ii*) Persons born elsewhere in the district of enumeration	..	170,909 (22·5%)	47,283 (11·9%)	123,626 (34·1%)
(*iii*) Persons born in other districts of the State	..	46,287 (6·1%)	24,266 (6·1%)	22,021 (6·1%)
(*iv*) Born in other States in India	..	71,149 (9·4%)	36,822 (9·3%)	34,327 (9·5%)
(*v*) Born in countries outside India	..	2,677 (0·4%)	1,733 (0·5%)	944 (0·2%)
(*vi*) Unclassifiable	..	1,510 (0·2%)	473 (0·1%)	1,037 (0·3%)
Total	..	758,617	396,214	362,403

As it appears from the above Table, 61·4 per cent of the population of the district are enumerated at their birth places. 72·1 per cent of the total males and 49·8 per cent of the total females are born at the places of enumeration, which suggests that the female emmigrants, constituting 50·2 per cent, are more numerous than their male counterparts, who constitute only 27·9 per cent. The above statement discloses that 22·5 per cent of persons are born

The distribution of 1,000 persons in all the principal religions of the district from 1941 to 1961 is shown below :

	1961	1951	1941
Hindus	845	860	826
Muslims	14	9	9
Christians	140	130	162
Sikhs	1	1	N
Others	N	N	3

N=Negligible

The proportion of Hindus, which recorded *an increase in 1951, has again declined in 1961.* The proportion of Muslims, which was constant in 1941 and 1951, has shown small increase in 1961. The proportion of Christians, which temporarily declined in 1951, has again resumed the upward trend in 1961. The Sikh population has also increased during the decade ending 1961.

Migration

The movement of population within the district or from one district to another within the State, or beyond the State is generally necessitated by economic and social reasons. The record of place of birth determines if there has been any migration. The following statement gives the necessary information in terms of absolute figures and percentage :

elsewhere in the district of enumeration, 6·1 per cent in other districts of the State, 9·4 per cent in other States of India and 0·4 per cent outside India. 0·2 per cent are treated as unclassifiable. There is no marked sex disparity in the percentages of the immigrants coming from outside the State and outside the country. Majority of the female immigrants are from within the district, which establishes that their movement from one village to another or from one police station to another is restricted in nature, being generally consequent to their marriage, while economic pursuits play less significant role. The male immigrants are inclusive of those born in the houses of thier grand-parents having come to their parents' houses later, besides those who have gone out for economic reasons.

The influence of immigration has had considerable effect on the growth of population during the decade. Some of the police stations, which have recorded high percentages of growth above 25 per cent, are already mentioned. If the percentage-growth is analysed, the extent of immigration in each police station could be detected. The analysis for ten police stations in the district is given below after excluding the immigrants living for more than ten years in order to estimate the percentage of immigrants during the decade, 1951-61.

Name of police station	Percentage increase of population 1951—1961	Percentage of immigrants to total population of police stations, who are born			Percentage of rural immigrants to rural population
		Within the same district	Outside the district but within the same State	Outside the State	
Kamarposh Balang ..	38·18	10·63	1·15	8·58	20·36
Gurundia ..	37·45	13·04	1·93	1·24	16·21
Birmitrapur ..	36·95	11·01	0·53	0·98	24·00
Bonaigarh ..	31·97	9·92	1·61	2·51	14·04
Banki ..	30·73	13·38	2·03	3·85	19·25
Rajgangpur ..	27·68	11·63	0·44	0·81	15·85
Mahulpada ..	27·04	6·94	2·10	1·89	10·93
Hemgir ..	26·09	10·60	3·75	2·42	16·76
Lephripara ..	25·53	10·76	1·23	2·18	14·17
Sundargarh ..	25·23	8·56	1·08	0·38	12·79

The immigrants from within the district constitute the highest percentage in all the above police stations. While the percentage of immigrants from outside the district but within the State is higher in Gurundia, Mahulpada, Hemgir and Sundargarh police stations, the immigrants from outside the State are higher in the remaining police stations. As the district adjoins the neighbouring States of Bihar and Madhya Pradesh, the influx from outside the State appears to be considerable.

Duration of residence throws some light regarding the purpose of immigration. The following statement shows the periods of residence of all immigrants in the district.

Duration of residence	Born elsewhere in the district of enumeration		Born outside the district but within the State of enumeration		Born outside the State but within the country		Born outside the country	
	Males	Females	Males	Females	Males	Females	Males	Females
Less than 1 year ..	6,401	9,579	4,208	2,608	5,663	3,987	169	204
1—5 years ..	13,504	27,742	7,801	8,424	13,177	11,594	478	431
6—10 years ..	5,865	18,265	2,655	3,227	5,917	5,908	374	113
11—15 years ..	4,777	16,800	2,228	2,216	3,555	3,943	218	55
16 years and over ..	13,313	42,535	6,745	4,801	7,978	7,312	464	108
Period not stated ..	3,423	8,705	620	745	532	1,583	30	33

The 'unclassifiable' persons have been excluded from the above statement due to their meagre number. 39,278males and 77,770 females have lived for more than a decade and are to be deemed as semi-permanent or permanent migrants. The immigration of a large number of females is partly due to their marriage and partly due to accompaniment with the male immigrants. The male immigrants, in search of better economic pursuits mostly trade and commerce, appear to have moved with their families and to have established semi-permanent or permanent residences. Males and females born in the district of enumeration constitute the overwhelming majority. Out of 14,811 male and 27,513 female immigrants, who have lived for periods varying between 6--10 years, 5,865 males and 18,265 females are from within the district. Their movement is confined mostly to the adjoining villages or police stations. While marriage can be the main reason for female immigration, the males may have to be regarded as job immigrants. 34,969 males and 48,191 females have stayed for periods varying between 1-5 years, of whom 13,504 males and 27,742 females are from within the district. 16,441 male and 16,378 female immigrants have resided for less than a year. Immigration of males for short periods is motivated by availability of educational facilities and better economic pursuits. Although some of the female immigrants are economically active, marriage is by far the single largest factor leading to immigration.

The classification of immigrants into nine industrial categories of workers and non-workers is given below:

Industrial category	Born elsewhere in the district of enumeration		Born in other districts of the State		Born outside the State	
	Males	Females	Males	Females	Males	Females
Workers						
I As Cultivator ..	14,099	41,190	2,545	2,905	3,990	6,302
II As Agricultural Labourer ..	4,743	8,949	688	722	985	871
III In Mining, Quarrying, Live-stock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities ..	822	706	563	134	699	459
IV At Household Industry ..	1,599	3,722	908	656	1,164	827
V In Manufacturing other than Household Industry ..	2,148	480	1,906	371	8,890	570
VI In Construction ..	371	53	813	158	2,394	533
VII In Trade and Commerce ..	567	234	703	64	2,027	82
VIII In Transport, Storage and Communications	1,319	207	1,480	227	2,059	358
IX In Other Services ..	7,053	8,180	8,646	1,748	10,351	3,869
Non-workers ..	14,562	59,905	6,014	15,036	4,263	20,456

Immigrants from outside the country are not included as they constitute a small fraction. The participation of large number of females from within the district in Categories I, II, IV and IX shows that they are economically active along with their male partners. The female immigrants from outside the district but within the State and from outside the State are not in excess of the male workers in any of the industrial categories except Category I. The participation of females in all the industrial categories is an indication of their awareness of economic hardships. However, the non-working females constitute the largest number.

The in and out migration figures from the selected States and countries in order of their numerical importance are given below so far as they relate to Sundargarh district.

State/Country	Immigration		Emigration	
	Males	Females	Males	Females
Andhra Pradesh	1,686	748	..	..
Assam ..	1,450	462	2	..
Bihar ..	17,214	23,633	1,149	3,180
Kerala ..	1,020	291	Not available	
Madhya Pradesh ..	3,500	4,064	Not available	
Madras ..	809	512	Not available	
Punjab ..	1,486	1,065	6	5
Rajasthan ..	792	135	..	..
Uttar Pradesh ..	1,680	916	Not available	
West Bengal ..	4,110	1,969	Not available	
Outside India:				
Pakistan ..	665	633	Not available	
Nepal ..	677	221	Not available	
Germany ..	329	75	Not available	

The industrial characteristic of the district is responsible for the large number of immigrants from almost all the major States of India and from outside India. As the district adjoins Bihar and Madhya Pradesh, the large number of immigrants in both the sexes have come from these two States. The predominance of the females may be on account of marriage. A small number of persons in both sexes have also gone out to Bihar while the figures of emigration to other States are not available. As the information is not received from most of the States, it has not been possible to estimate the net migration of the district.

Scheduled Tribes

A person is said to belong to a Scheduled Tribe, if he comes under any one of the tribes specified, in the ScheduledCastes and Scheduled Tribes Lists (Modification) Order, 1956. There is no clear indication of the criterion for specifying Scheduled Tribes. But it appears that the following aspects were taken into consideration, namely, (*i*) tribal origin, (*ii*) primitive way of life and habitation in remote and less accessible areas and (*iii*) general backwardness. 62 tribes are notified as scheduled for this State, of whom 40 are found in this district. As the list of tribes changed from Census to Census the variation of their population from decade to decade is not a pure index of the growth of tribal population. In 1951 Census, there were only 42 tribes in the State. According to the Scheduled Castes and Scheduled Tribes List (Modification) Order 1956, one tribe, namely, Gorait was omitted from the 1951 list and 21 new tribes were added. These new tribes are Bhottada or Dhotada, Bhumia, Bhunjia, Bhumij, Desua-Bhumij, Dharua, Didayi, Gandia, Holva, Kandha Gauda, Kol, Kotia, Lodha, Madia, Matya, Omanatya, Parenga, Pentia, Rajuar, Shabar or Lodha, and Saunti The inclusion of these new tribes has contributed to the increase of the tribal population during 1951—61.

The tribal population of the district has increased from 312,639 in 1951 to 440,910 in 1961. The sex composition and percentage to the total population of the district in both the censuses are given below:

Census Years	Tribal population of the district	Percentage to total population	Males	Females
1951 ..	312,639	56·6	154,663	157,976
1961 ..	440,910	58·1	220,058	220,852

The phenomenal growth of 41·0 per cent of the Scheduled Tribes can be partly attributed to the addition of new tribes in 1961 Census. The sex-ratio has declined from 1,021 females in 1951 to 1,004 females in 1961 for 1,000 males.

Thirteen tribes which are numerically important in the district are listed below together with their sexwise distribution.

Name of the Tribe	Persons	Males	Females
Bhuiya or Bhuyan ..	45,168	22,664	22,504
Bhumij ..	4,288	2,278	2,010
Binjhia or Binjhoa ..	2,140	1,157	983
Gond, Gondo ..	34,849	18,127	16,722
Kharia or Kharian ..	53,243	26,578	26,665
Khond, Kond or Kandha including Nanguli Kandha and Sitha Kandha ..	3,329	2,000	1,329
Kisan ..	50,632	24,146	26,486
Kolha ..	4,099	2,150	1,949
Mahali ..	1,474	690	784
Munda, Munda-Lohara or Munda-Mahalis ..	113,431	56,338	57,093
Mundari ..	3,094	1,892	1,202
Oraon ..	114,103	56,098	58,005
Santal ..	2,262	861	1,401
Total ..	432,112	214,979	217,133

The above thirteen tribes constitute 98 per cent of the total tribal population of the district, Bhumij tribe is a new addition in the present Census.

The industrial classification of the tribal population in the district is given below:

	Industrial category	Males	Females
	WORKERS		
I.	As Cultivator ..	92,602	55,542
II.	As Agricultural Labourer	17,848	13,120
III.	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities ..	1,690	1,147
IV.	At Household Industry ..	2,577	3,624
V.	In Manufacturing other than Household Industry ..	2,675	1,066
VI.	In Construction ..	1,022	578
VII.	In Trade and Commerce	151	150
VIII.	In Transport, Storage and Communications ..	1,420	661
IX.	In Other Services ..	14,838	12,491
	NON-WORKERS ..	85,235	132,473

Majority of the tribal working population are found in agricultural occupations, household industries and other services. The industrial classification for each of the tribes is given separately for rural and urban areas in Table SCT-I Part B.

The non-workers constitute 38·7 per cent of the males and 60·0 per cent of the females. Their classification is given below:

Classification	Males	Females
Total Non-workers ..	85,235	132,473
Full-time students ..	17,735	8,038
Persons seeking employment for the first time ..	50	10
Persons employed before but now out of employment and seeking work ..	26	..
Others ..	67,424	124,425

The number of full-time students is very low compared to the total number of non-workers.

As the number of persons seeking jobs is negligible, majority of the non-workers in both sexes appear to be devoted to household duties.

The marital status of the tribal population is furnished below:

Marital status	Age-groups 0—14		15—44		45+		Age not stated	
	Males	Females	Males	Females	Males	Females	Males	Females
Never married ..	90,973	90,721	26,564	13,147	390	208	68	164
Married ..	331	483	66,772	75,206	27,428	23,090	26	147
Widowed ..	..	..	2,323	4,063	4,055	12,597	1	16
Divorced/Separated ..	..	..	1	713	636	194	250	.. 2
Unspecified status ..	..	..	4	98	79	122	38	.. ..

Separate information for each of the tribes is given in Table SCT-II Part B. The number of married persons in both the sexes is the highest in the age-group 15—44, while the maximum number of widowed persons is found in the age-group 45+. The small number of married persons in the age-group 0—14 establishes the existence of child marriage in spite of the social reforms to eradicate it completely.

Scheduled Castes

A person is said to belong to a Scheduled Caste, if he comes under any one of the castes specified in the Scheduled Castes and Scheduled Tribes Lists (Modification) Order, 1956. 93 castes are notified as scheduled for this State in the said Order, of whom 53 castes are found in this district. As in the case of Scheduled Tribes, no definite test has been prescribed for the specification of Scheduled Castes. But it appears that originally the prevailing notion of untouchability, though now abolished and forbidden under Article 17 of the Constitution, was the guiding factor in drawing up the list of untouchables or depressed classes, which is more or less equivalent to the present day Scheduled Castes. The castes having professions which involve physical handling of dirty and putrefying matter and other so called unclean jobs, such as, skinning and tanning of hides, sweeping of streets, scavenging, etc., were grouped under this class of backward population. The objective was to confine the list to the section of population, which, on account of its traditional position in the society, suffered from various religious and social disabilities, such as, prohibition from entry into temples, or drawing water from the village wells or admitting their children into village schools. It was recognised that the criterion of calssification of such backward population should gradually change from religious or social considerations to the degree of backwardness in economic and educational spheres.

As the lists of Scheduled Castes changed from Census to Census, the growth of Scheduled Caste population cannot be properly estimated. There were 92 Scheduled Castes at the time of 1951 Census. By the time 1961 Census took place, the list had been revised by the Scheduled Castes and Scheduled Tribes Lists (Modification) Order 1956. Seven castes, namely, Bhumij, Desua Bhumij, Dharua, Ghogia, Kumbhar, Pradhan and Sukuli from the 1951 list were omitted, two castes, namely, Mochi or Muchi and Satnami were merged with Chamar and ten castes, namely, Bhoi, Chakali, Chandhai Maru, Gorait or Korait, Kummari, Musahar, Namasudra, Sauntia (Santia), Tanla and Ujia were added to the list.

The Scheduled Caste population of the district has increased from 72,591 in 1951 to 73,134

in 1961. Their sex composition and percentage to total population of the district are given below :

Census Years	Scheduled Caste population of the district	Percentage to total population	Males	Females
1951	72,591	13·1	33,573	33,018
1961	73,134	9·6	37,172	35,962

The decline in the relative percentages of the Scheduled Castes and the meagre numerical growth in 1961 can be attributed to the changes in the list of Scheduled Castes. The male population has fallen below the level of 1951, which has led to the increase in the sex ratio from 834 females in 1951 to 967 females in 1961 for 1,000 males.

Ten castes, which are numerically important, are given below with their sexwise distribution :

Name of Caste	Persons	Males	Females
Badaik ..	2,979	1,510	1,469
Chamar, Mochi, Muchi or Satnami ..	2,517	1,429	1,088
Dhoba or Dhobi ..	4,884	2,756	2,128
Dom, Dombo or Duria Dom ..	1,335	617	718
Ganda ..	21,322	10,473	10,849
Ghasi or Ghasia ..	4,065	2,159	1,906
Pan or Pano ..	17,209	8,205	9,004
Pantanti ..	9,549	4,711	4,838
Pap ..	1,026	549	477
Turi ..	1,634	827	807
Total .	66,520	33,236	33,284

The above ten castes constitute 91 per cent of the total Scheduled Castes population. As the castewise distribution of population of the previous Censuses are not available, it is not possible to indicate the increase or decrease of a particular caste during this decade.

The classification of the Scheduled Castes into nine industrial categories of workers and non-workers is given below :

Industrial category	Males	Females
WORKERS		
I. As Cultivator ..	9,455	4,864
II. As Agricultural Labourer	3,665	2,437
III. In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities	530	339
IV. At Household Industry	2,263	1,548
V. In Manufacturing other than Household Industry ..	801	294
VI. In Construction ..	207	52
VII. In Trade and Commerce	183	76
VIII. In Transport, Storage and Communications	433	110
IX. In Other Services ..	5,235	2,979
UNWHOLESOME ACTIVITIES:		
(*i*) Tanning, Currying of Hides and Skins ..	275	69
(*ii*) Scavenging ..	108	31
NON-WORKERS ..	14,400	23,263

Majority of the Scheduled Caste workers in both the sexes are engaged in agricultural occupations, household industries and other services. The industrial classification of each caste is given in Table SCT-I Part A separately for rural and urban areas. Numbers of persons engaged in unwholesome activities are also shown above.

The non-workers constitute 38·7 per cent of the males and 64·7 per cent of the females. Their classification is given below :

Classification	Males	Females
Total Non-workers ..	14,400	23,263
Full-time students ..	2,430	1,696
Persons seeking employment for the first time. ..	34	1
Persons employed before but now out of employment and seeking work ..	20	1
Others .	11,916	21,565

Persons seeking employment are very few, while the number of full-time students is exceedingly low. Majority of the non-workers in both sexes appear to be engaged in household duties.

The marital status of the Scheduled Castes population by their broad age-groups is shown below :

Marital Status	Age-groups							
	0—14		15—44		45+		Age not stated	
	Males	Females	Males	Females	Males	Females	Males	Females
Never married	14,058	14,485	3,683	1,621	79	12	4	18
Married	77	420	12,504	12,379	5,290	3,433	4	19
Widowed	..	6	500	964	598	2,307	-	1
Divorced/Separated	..	..	259	203	60	69	-	1
Unspecified status	3	1	18	14	35	9	..	..

The gradual disappearance of child marriage among the Scheduled Castes is evident from the small number of married persons in age-group 0—14. The highest number of married persons is found in the age-group 15—44 and the highest number of widows, in the age-group 45+. Details for each individual caste are given in Table SCT-I Part A.

Language

Out of 58 languages returned in the State, 36 are spoken in the district. The number of speakers of each language sexwise is given in Table C-V of the Cultural Tables. However, the distribution of 1,000 persons by mother-tongue, compared with the proportions for the State, is given in the following statement:

Language	Sundargarh			Orissa		
	Total	Rural	Urban	Total	Rural	Urban
1. Bengali ..	18	3	89	7	5	44
2. Bhuiya/Bhuyan, Oriya ..	N	N	N	N	N	N
3. Bhumij .	4	4	N	5	5	5
4. Birjia/Brijia, Binjhia	1	1	.	N	N	
5. Dhelki-Oriya ..	N	1	N	N	N	N
6. English	N	N	1	N	N	1
7. French .	N	.	N	N	..	N
8. German ..	1	N	3	N	N	N
9. Gondi ..	N	N	N	1	1	N
10. Gujarati .	1	N	5	1	N	7
11. Hindi ..	62	24	233	10	5	87
12. Ho ..	9	11	2	12	12	3
13. Kannada ..	N	N	1	N	N	N
14. Karmali ..	1	1	N	1	1	1
15. Kashmiri ..	N	N	..	N	N	..
16. Kharia ..	48	54	23	3	3	3
17. Khond/Kondh ..	N	N	..	8	9	2
18. Kisan ..	33	32	35	3	3	7
19. Koda/Kora	1	1	..	N	N	N
20. Kol .	9	10	2	3	3	2
21. Kui ..	4	4	2	29	31	1
22. Kurukh/Oraon	64	76	7	3	3	1
23. Laria ..	22	26	6	3	3	1
24. Mahili ..	N	N	..	N	N	N
25. Malayalam	3	1	16	N	N	4
26. Marathi ..	N	N	N	N	N	1
27. Marwari .	N	N	2	N	N	1
28. Mirdha-Kharia ..	N	N	..	N	N	N
29. Mundari ..	85	100	15	7	8	3
30. Nepali ..	1	N	5	N	N	1
31. Oriya ..	607	648	420	823	834	644
32. Punjabi ..	3	N	16	1	N	5
33. Tamil ..	2	N	11	N	N	4
34. Telugu ..	6	1	30	23	17	99
35. Turi ..	N	N	N	N	N	N
36. Urdu ..	15	2	76	12	9	66

Although Oriya speakers have the highest proportion in rural and urban areas of the district, they are much below the respective proportions for the State. The tribal languages Mundari and Kurukh/Oraon are next in importance in spite of the low proportion of speakers. Hindi language is more popular in urban areas as will be evident from its high proportion next only to Oriya language. The proportions of speakers of the remaining languages are too small to be commented upon.

HOUSING

Housing Census

For the first time in India, a housing census was conducted in 1960 to take a stock of all existing structures, residential and non-residential houses. Various useful information about roof and wall materials, tenure status, number of rooms per household, number of persons per room, and in case of factories and workshops, some other essential data like line of production, number of employees, and kind of fuel or power used were also collected during this count. The total number of houses recorded in this Housing census in the district is 162,164 out of which 4,810 were vacant at the time of house-listing. The following Table indicates the distribution of various types of houses.

Type of Census house	Census houses	
	Number	Percentage to total No. of Census houses
Total number of Census houses	162,164	100
Census houses vacant at the time of house listing	4,810	2·97
Dwelling	143,186	88·30
Shop-*cum*-dwelling	2,132	1·31
Workshop-*cum*-dwelling	5,977	3·69
Hotels, sarais, tourist homes and inspection houses ..	653	0·40
Shops excluding eating houses ..	959	0·59
Business houses and offices ..	680	0·42
Factories, workshops and worksheds ..	268	0·16
Schools, and other educational institutions including training classes, coaching and shop classes ..	793	0·49
Restaurants, sweetmeat shops and eating places ..	31	0·02
Places of entertainment and community gathering (Panchayat Ghar). ..	235	0·14
Public health and medical institutions, hospitals, health centres, Doctors' clinics, dispensaries, etc.	123	0·08
Others	2,317	1·43

By far, the majority of houses, as in other parts of the State, are the dwelling houses. Workshop-*cum*-dwellings constitute the second largest group and the least number is that of restaurants, sweetmeat shops and eating places.

As to the tenure status of the houses, it is recorded that out of every 100 houses in the State, 4 are hired out and 96 are occupied by their owners. This general pattern of owning residence obtains in the district. Houses under owner's occupation and those given on rent are in the ratio of 88 : 12. The following Table makes a comparison of tenure status of houses in rural and urban areas of the district with those of the State as a whole.

	Rural		Urban	
	Sundargarh	Orissa	Sundargarh	Orissa
	(Per 100 total houses)			
1. Houses under occupation of owners ..	97·36	98	54·2	62
2. Houses hired out	2·64	2	45·8	38

The feature of hiring residence is thus relatively more prominent than in case of the State as a whole.

Density of dwellings

Out of 143,186 dwellings in the district, 111,315 are in rural areas and 31,871 are in urban area of the district. We thus come across 3,780 dwellings in every 100 square miles of area of the district. The density of dwellings per 100 square miles for rural and urban areas are, however, 2,994 and 45,726 respectively.

Materials of walls and roofs

Houses with mud walls and tiled roofs are commonly found in the district. Walls of mud

are found in majority, particularly in the rural areas. On the other hand, houses with brick walls form the highest number in the urban areas. Only about 8·7 per cent of total houses in rural areas have brick walls or walls of C. I. metal sheets, cement concrete etc., but in towns these walls are found on 53·5 per cent of houses.

Similarly, roofs made of corrugated iron, zinc or other metal sheets, asbestos sheets, bricks and lime, concrete are rarely seen in rural areas, but they can be found on nearly 48·5 per cent of houses in the towns. About 81·9 per cent of houses in rural areas and 30·3 per cent of houses in urban areas have tile, slate and shingle roofs. Thatched roofs or those with grass, leaves, reeds, wood or bamboo cover only 15·7 per cent of houses in the rural areas and 21·2 per cent of houses in urban areas.

Number of rooms and persons residing per room

One-roomed houses form the majority in the district constituting 54·7 per cent of total houses. About 30·0 per cent of the houses have two rooms The remaining are houses with 3 rooms and more The number of persons per room calculates to be 2·42 in rural areas and 1·78 in urban areas. The State average for rural and urban areas is 2·08 and 2·00 respectively.

ADMINISTRATION

The District Magistrate and Collector, who is usually an officer belonging to the cadre of I.A. S., remains in charge of the general administration of the district. He also looks after civil supplies, treasury and development schemes within the district. He is assisted in his work by an Additional District Magistrate, who belongs to Class I of Orissa Administrative Service. At the district headquarters, Officers from Orissa Administrative Service, Class II and Subordinate Administrative Service are in immediate charge of various subjects. The sanctioned strength of such officers is 5 and 3 respectively. The district has three subdivisions, which are each in charge of a Subdivisional Officer, manned generally by officers of the State's Administrative Service. The administrative officers are vested with the powers of a Magistrate in first, second or third class according to their experience. The subdivisions are divided into a number of police stations, which are the lowest administrative units. There are 19 police stations in the district. Separation of the judiciary from the executive having been given effect to here, the Judicial Magistrates perform judicial functions in criminal cases. They are subordinate to the District and Sessions Judge, Sambalpur-Sundargarh judgeship who is assisted in this work by an Additional District Magistrate (Judicial) stationed at Sambalpur. The sanctioned* strength of these judicial and excutive Magistrates in the 3 subdivisions of the district is as follows:

Sub-divisions	No. of Judicial Magistrates	No. of Deputy Collectors and Deputy Magistrates	No. of Sub-Deputy Collectors and Sub-Deputy Magistrates
Sadar	1	1	4
Panposh	2	3	3
Bonai	1	1	3

The Revenue Divisional Commissioner Northern Division, who holds his office at Sambalpur has jurisdiction over the district.

Police

For police administration, the district is divided into two Police-districts, each of which is under a Superintendent of Police, normally belonging to the Indian Police Service. One of the Police districts has jurisdiction over Rourkela town and Raghunathpali poilce station, and the Superintendent of Police is stationed at Rourkela. The Superintendent of Police, Sundargarh is in

*Government of Orissa, Revenue Department Resolution No. 29459-III ER-75/64 R dated 8-5-64 and letter No. 8200 XXIX-1/63 dated 24-12-1963 from High Court, Orissa

charge of the remaining area of the district. Each of the Superintendents of Police is assisted by a Deputy Superintendent. There are two units of armed police reserve at Sundargarh, the headquarters town and at Rourkela under a Sergeant Major each. A police station is under the charge of a senior Sub-Inspector of police and he is assisted by other Sub-Inspectors, Assistant Sub-Inspectors and Constables. The work of a number of police stations is supervised by a Circle Inspector. The total strength of the police-force in the district in 1960 was 737. On an average, each one of the police-force caters to the needs of law and order of approximately 5·14 square miles and 1,029 persons. The expenditure on police in the district during 1960 was Rs. 8,90,777 and the *per capita* expenditure works out to Rs. 1·17 P. The strength of poilce-force under various categories during the years 1951, 1956 and 1960 are given in a Table in Part III.

The Deputy Inspector General of Police, Northern Range who has his headquarters at Sambalpur has jurisdiction over the entire district of Sundargarh.

***Crimes and Criminal Justice**

During the decade, 1951-60, the criminal offences reported to the Courts in the district were 35,580. On an average 3,558 cases are filed each year. The number of cases reported each year, cases tried, persons acquitted, discharged or committed are given in a Table in Part III. Majority of crimes committed in the district during this decade was theft, the second highest number being burglary. Of such crimes as dacoity, robbery and murder, the highest number was that of murder, and dacoity was rarely reported.

Judiciary

The district of Sundargarh forms a part of Sambalpur-Sundargarh Judgeship. The District and Sessions Judge, stationed at Sambalpur has accordingly jurisdiction over, besides the district of Sambalpur, Sundargarh district too. There is only one Sub-judge for the whole district, and he holds his office at Sundargarh. No munsif is stationed at any place within the district. The District Judge and the Sub-Judge try civil suits of any pecuniary limit.

Parliamentary and Assembly Constituencies

The district has been delimited into one Parliamentary constituency and 5 Assembly constituencies under the Delimitation of Parliamentary and Assembly Constituencies Order, 1961. The Parliamentary constituency and four of the five Assembly constituencies are reserved for Scheduled Tribes. The last mid-term general elections for the Parliament were held in 1962 and those for the State Assembly, in 1961.

Treasury

The District Treasury is at Sundargarh. It also serves the needs of Sadar subdivision. Besides the two outlying subdivisions, namely, Panposh and Bonai have sub-treasuries. The banking business at the District Treasury and the sub-treasury at Panposh are transacted by the State Bank of India. The other sub-treasury does its own banking transactions. The District Treasury is under the charge of a Treasury Officer, who belongs to Orissa Finance Service and he functions under the administrative control of the District Collector.

Jails

There is one district jail at Sundargarh and two sub-jails at Rourkela and Bonaigarh. The capacity of these jails, as on December 1962, was as follows :

Sundargarh district jail	..	154
Rourkela special sub-jail	..	123
Bonaigarh sub-jail	.	67

*Notes on crimes based on Table 6·2 of Quarterly bulletine of Statistics of Bureau of Economics & Statistics, Orissa for June, 1961

Commercial Taxes

There is one Commercial Tax Circle for the district since April 1957 which deals with assessment and collection of Sales Tax for the entire district. The circle is under the charge of a Commercial Tax Officer, who belongs to Orissa Finance Service. He is assisted in his work by an Additional Commercial Tax Officer belonging to Orissa Finance Service and four Assistant Commercial Tax Officers who come from Orissa Finance Service (Junior Branch). Separate figures of Sales Tax collected in the district for the period after formation of a separate circle are available and these are given in a Table in Part III. The collections have shown a tendency to rise in recent years. From an income of Rs. 11,54,000 in 1957-58 it has gone up to Rs. 36,10,000 during 1960-61.

Stamps, Documents registered and Properties transferred

The figures relating to sale-proceeds from stamps for all the years of the past decade under report are not avilable. The incomes for various years are given in a Table in Part III. The highest annual sale of stamps in the decade was Rs. 2,65,404 in the year 1951-52.

There are 3 sub-registration offices in the district at Sundargarh, Panposh and Bonai. Except at Sundargarh, there are no full-time Sub-Registrars in other stations. The work of these offices at Bonai and Panposh are looked after by part-time officers of the Revenue Department. The Additional District Magistrate, Sundargarh functions as the District Registrar of the district. During the period, 1951—60, a total number of 24,356 documents was registered, the value of properties thereby transferred being Rs. 6,02,24,274. The number of registration is increasing. The number of documents registered and the value of properties transferred in each of these years have been given in a Table in Part III.

Entertainment Tax

A Table in Part III of this Handbook shows the collections for 1951-52 and for the years from 1955-56 onwards. The income is on rise.

Excise Revenue

The Excise administration of the district is in charge of a Superintendent of Excise, who has his headquarters at Sundargarh. Excise revenue dropped down considerably in the year 1952-53. The revenue, which stood at Rs.12,61,596 in 1950-51 has gone up to Rs. 29,38,220 in the year 1960-61. The anunal collections for the period from 1950-51 to 1960-61 are given in a Table in Part III. The highest of collections during this period was Rs. 29,38,220 in the year 1960-61.

Municipalities and Notified Area Councils

The district has four towns, namely, Rourkela, Birmitrapur, Rajgangpur and Sundargarh. Sundargarh town has a Municipality whereas others have a Notified Area Council each. The years of start and number of Councillors of these local bodies are as follows:

Municipality/ Notified Area Council	Year of start	No. of Councillors
1. Rourkela ..	1953	10
2. Birmitrapur ..	1950	11
3. Rajgangpur ..	1957	10
4. Sundargarh ..	1951	13

The entire urban population of the district thus enjoy benefit of either a Municipality or Notified Area Council. At the head of each of the Municipalities and Notified Area Councils, is a Chairman. There is an Executive Officer to discharge the executive functions of the Municipality or Notified Area Council. Among the obligatory functions of these local bodies, are public health including vaccination, maintenance of public tanks and wells, roads, libraries, street lighting and scavenging. The income accrues from taxes or

holdings, carriages, etc., lighting and latrine taxes, licence fees, from pounds and municipal properties, government grants, etc.

Land Revenue

The land revenue system of Gangpur ex-state is in vogue in Sadar and Panposh subdivisions. In Bonai subdivision, however, the land revenue system of Bonai ex-state is in force. There is no Act specifying the land revenue system in these two ex-States. But general principles of the revenue administration have been noted in Gangpur and Bonai Gounti Patta. The land revenue is being collected through Ganjhus and Gountias who are paid commission at the rate of 25 per cent in Gangpur ex-state area and 12½ per cent in Bonai ex-state area. They also enjoy Bhogra lands.

There are mainly two classes of land tenures in this district. These are Royati and Service lands. The Service lands comprise Bhogra and Jagir lands of village servants, such as Choukidari Jagir, Kalo Jagir, Negi Jagir, Brahmottar Debottar, etc. There are also some Khamar lands of ex-rulers and Nijchas lands of Khorposhdars.

There were nine Zamindaries in the district of which seven have since been abolished from the year 1954. The rest two Zamindaries, namely Hemgir and Saraphagarh are under the management of the Receiver as the Zamindars of these estates filed petitions before the Supreme Court against the applicability of the Orissa Estates Abolition Act to their estates.

In the area of Gangpur ex-state, the tenure of last Settlement expired in 1956 and that in Bonai ex-state area, in 1933. Settlement operation was not taken up in the district during the past decade.

Annual collections from land revenue are shown in a Table in Part III. Figures for the years 1950-51 and 1951-52 are not available. Among the subsequent years, the highest collection was in the year 1959-60. The year 1957-58 recorded the lowest collections, being Rs.2,30,532,

NATURAL CALAMITIES

1908	..	Bonai subdivision was in the grip of a severe famine due to failure of crops.
1918	..	A bad harvest in Gangpur state combined with influenza epidemic caused loss of life and severe economic distress.
1919	..	Cholera and smallpox took a heavy toll of life.
1926-27	..	The harvest was poor in Bonai causing economic distress.
1943	..	The highest flood in living memory was seen in the river Brahmani affecting 66 villages with damages to crops and houses.
1954	..	Inadequate rainfall caused drought. Outturn of crops was on an average, 38 to 50 per cent.
1955		Rainfall was freakish and not enough for transplantation or interculture of paddy plants. Average crop outturn was 50 per cent of the normal yield.
1958	..	Smallpox epidem occurred.

COMMUNICATION

Roads

The District Headquarters is easily reached on road from Jharsuguda, a junction railway station on the main Howrah-Bombay route. One of the subdivisional headquarters, viz., Panposh is also on the same railway route. But to reach the headquarters of the other subdivision, namely Bonai, one has to travel by bus from Panposh. Among the important roads of the district is the State Highway, Sambalpur-Sundargarh-Panposh-Darjing-Koira-Bhadrasahi. This Highway is an all weather road which connects Jharsuguda with Sundargarh and passing, via Koira goes to Keonjhar district. The mileage under State Highway 162 miles major district roads, other district roads, roads under local bodies and important revenue roads are 218 miles, 15 miles 2 furlongs, 38 miles and 7 miles 2 furlongs respectively. The total road mileage of the district thus comes to 440 miles and 4 furlongs, the density of road mileage per square mile of the area of the district being 0·12 miles against the State average density of 0·36 miles. The district has the lowest density of road mileage in the State. With the exception of roads belonging to local bodies and revenue roads, all other roads are maintained by the State P. W. D. These are looked after by an Executive Engineer, who has his headquarters at Sundargarh. The roads of the local bodies are maintained by the concerned Municipality and Notified Area Council. The important revenue roads are similarly maintained by the Revenue Department.

Direct communication on road is maintained between Sundargarh and Panposh all the year round. But communication on road up to Bonai is broken by the river Brahmani at Rajamunda where a ferry service is maintained. During the rainy season, direct road communication with Hemgir, Lephripara, Gurundia, Mohulpada and Banki police stations are cut off by many streams on the way. The towns have rickshaws and taxis, whereas common mode of conveyance in rural areas is the bullock cart. Public bus services are also made use of in rural areas, where the villages lie on bus routes. By the end of December 1961, as many as 531 cars, 918 buses and trucks and 19 taxis were registered in the district.

Road Transport Services

In addition to the private bus services, the State Transport Service operates on the important routes in the district. The district headquarters is connected with Cuttack through a regular daily Express Bus Service running between Rourkela, the Steel Town and Cuttack. Another bus service also connects Rourkela with Ranchi (Bihar State). The State Transport buses also connect the subdivisional headquarters and the towns of Jharsuguda and Sambalpur in the adjoining district. Some of the buses have two classes of accommodation, upper and lower classes, whereas others have only one uniform class. Fares charged are 6½p, 5p and 6½p respectively for upper, lower and uniform classes.

Railways

In the matter of railway communication, the eastern part of the district is better served than the western part. The total railway mileage in the district is 177 kms which gives 1·80 kms of railway per 100 sq. miles of area. Happily, the density is higher than the State average, which is 0·96 km per 100 square miles. Within the district, there are 24 railway stations, some of which were not opened to passenger traffic. A list of the stations is given in a Table in Part III. Among the stations which handle passenger traffic, Rourkela is the busiest. All the railway stations handling passenger traffic are provided with waiting halls. The stations at Rajgangpur, Rourkela and Birmitrapur have waiting rooms and Rourkela has a Refreshment room too. The working of these stations is controlled by the Divisional Superintendent, South Eastern Railways from Kharagpur.

* **Posts and Telegraphs**

The Superintendent of Post Offices of Sambalpur Division is also in charge of the Postal administration of the district. Against only 19 Post Offices and 6 Telegraph Offices including combined Post Offices in 1951, the district had in April 1961, 137 Post Offices and 13 Telegraph Offices. 25 of these Post Offices have Savings Bank facilities. The expansion could be possible due to execution of various development schemes during the past two Plan periods. There is now a Post Office at every Panchayat Samit headquarters. There are 2 Telephone Exchanges, one at Rourkela and the other at Sundargarh. Rourkela has an Auto Exchange with capacity of 1,800/2,001 lines whereas at Sundargarh the Exchange has got a capacity of only 100 lines being a Satelite Auto-Exchange. There is a Public Call Office with extension to Subdivisional Officer at Bonaigarh. The State Police Department have installed 3 Wireless Stations at Sundargarh, Bonai and Rourkela for their use.

EDUCATION AND LITERACY

In 1947-48, before the two ex-states of Gangpur and Bonai merged with Orissa, there were two High Schools, 17 M.E.Schools and 181 Primary Schools. The number of such institutions increased to 3 High Schools, 19 M.E. Schools and 251 Primary Schools in 1950-51. The spread of educational facilities during the previous decade has been very fast, so much so that there are now 3 colleges in the district, one of which is an Engineering College. The number of other institutions also inceased to 15 High Schools, 66 M.E. Schools and 832 Primary Schools. Various Professional and Special Schools were also opened. The details of educational facilities now available are as follows:

Primary Education

The 832 Primary Schools existing during 1960-61 included 6 schools specially meant for girls' education.811 of these schools are recognised by the Government, the rest being unrecognised. The area and population served by a Primary School during 1960-61 work out to be 4·55 square miles and 912 persons respectively against the State average of 2·9 square miles and 850 persons. Though the district has made much headway during the previous decade in the matter of spread of primary education, there is scope for further improvement. During First and Second Five Year Plan periods, effective steps were taken to spread primary education throughout the State. Enrolment drives were conducted and to attract pupils in still greater number to the schools, supply of free mid-day meals, grant of various scholarships such as those for merit, merit-*cum*-poverty, for proficiency in arithmetic (to those who secure more than 90 per cent of marks in arithmetic) and for maintenance of students in hostels were introduced. Additional facilities to girl students were made available in order to encourage women's education. Some of these were the appointment of school-mothers to look after girl students in schools, the introduction of attendance scholarships or free supply of dress for regular attendance in the school and the appointment of lady teachers through simpler selection methods.

The Zilla Parishads and Panchayat Samitis are now responsible for management of primary education in their respective areas. In Community Development Blocks, the Panchayat Samitis maintain primary schools, but those in other places are managed by the Zilla Parishad directly. Government grants for primary education are now made over to Zilla Parishad. In towns, the Municipality or Notified Area Council is responsible for primary education.

The scales of pay of primary school teachers, both under the Government and under non-Government management, have also been revised during 1961. Depending upon their qualifications primary school teachers now get pay in different grades in the scale Rs. 65—85 for Upper Primary,

* Based on Letter No. Est.—Plg—1/ch, dated 15-7-1963 from the Director, Posts and Telegraphs, Orissa

Lower Elementary trained or Middle English trained and in the scale Rs. 100—155 for Matric trained. In addition, they also get usual dearness allowance.

Secondary Education

There was remarkable expansion in the field of secondary education during the past 10 years. The number of high and middle schools increased from 2 and 17 in 1950-51 to 15 and 66 in 1960-61. Out of these fifteen high schools 6 are Government managed, and 3 are aided by Government, the remaining six being without any aid from Government. One of these high schools admit only girls, while others take in students of both sexes. Agriculture as an optional subject is taught in two of these high schools. For every 252·5 square miles of area and 50,574 population in the district, we thus have only one high school against the State average of one high school for 164·4 square miles and 47,948 persons.

Up to the 1956 annual examination, Utkal University conducted the examinations at the high school stage. The Board of Secondary Education, Orissa took it over with effect from 1956 supplementary examination. During 1960, 12 of these high schools sent up students for the High School Certificate Examinations. The number of students appearing in these examinations and those passing therefrom together with percentage of success between 1956 (supplementary) and 1960 (supplementary) are given in a Table in Part III of this publication.

Out of the existing 66 middle schools only five are exclusively meant for girls. But 65 of them are recognised by the Government. The examination at the end of middle school standard was till recently conducteed by the concerned District Inspector of Schools. It has now been taken over by the Board of Secondary Education, Orissa.

To encourage secondary education a number of merit and merit-*cum*-poverty scholarships at Middle and high school stages are now given to both boys and girls. The girl students are not required to pay any school fee up to Class VII. At the high school stage, half fees are charged only from those girl students whose guardians pay income-tax or agricultural income-tax. Others continue to enjoy free-studentship. Award of attendance scholarships and maintenance stipends is also continued.

The scales of pay of secondary school teachers underwent a revision in 1961. They now draw pay in six different scales depending upon their qualification. An untrained matriculate gets pay in the scale, Rs. 80—135 in Government schools and Rs. 80—125 in non-Government schools, whereas a trained graduate teacher draws pay in scales, Rs. 185—325 and Rs. 175—300 respectively in Government and non-Government schools.

College Education

The progress made during the previous decade is the opening of the three colleges, two of which are at Rourkela, the third one being at Sundargarh. One of the colleges at Rourekla is a Regional Engineering College which coaches up to Degree standard in Civil, Electrical, Mechanical and Metallurgical Engineering. It is managed by Government. So also is the Science College at Sundargarh. The other, Rourkela Science College is, however, under private management.

Professional and Special Schools

A list of Professional and Special School and a list of Sevashrams and Ashram School are given in Part III of this Handbook. The professional and special schools existing in the district are four elementary training schools, two industrial schools and a dai training centre. For education of students belonging to the Scheduled Castes and Scheduled Tribes, 82 Sevashrams, 9 Ashram schools and 4 upgraded

Sevashrams have been set up at different parts of the district and at places mostly inhabited by such population. All these are run by Government. There are also four Government managed basic schools, a list of which is given in Part III.

Libraries and Reading Rooms

A list of the more important libraries and reading rooms in the approved list of the Director of Public Instruction, Orissa has been given in a Table in Part III of this Handbook. All these libraries receive grants from the Government.

Newspapers and Journals

Four journals are published from Rourkela and Sundargarh. Those published from Sundargarh are magazines of high schools. Out of the other two papers, Rourkela Review, an English monthly has the largest circulation. A list of the publications is given in a Table in Part III.

Literacy

The total number of literates returned for the district during 1961 Census is 149,546, of whom 120,487 are males and 29,059 females. The percentage of literacy thus works out to 19·7 comprising 15·9 males and 3·8 females against the State averages of 17·4 and 4·3 respectively. In 1951 Census, the percentage of literacy was 10·3. Thus there has been an increase in the percentage of literacy by 9·4 during the decade . Among the males, the percentage of literacy works out to 30·4, whereas among the females the said percentage is 8·0. The corresponding figures of 1951 for males and females are 17·8 and 2·9 respectively. Of the total literates, 116,483 do not have any educational qualification, 21,658 have read up to primary or junior basic standard, and the rest are either matriculates or have higher education.

Persons aged 4 years or less, generally do not have any chance of acquiring literacy. If such persons are excluded from the total population, the percentage of literacy for the district becomes slightly higher. The following Table compares the percentages worked out on this basis for the two censuses of 1961 and 1951.

Census	Percentage of Literacy		
	Persons	Males	Females
1961 ..	23·0	18·5	4·5
1951 ..	11·8	10·1	1·7

Thus in the Census of 1961, an improvement is noticed to the extent of 11·2 per cent in the total population above the age-group 0-4 years,

Besides providing facilities in the usual manner for improving the literacy and educational standard of the district, an intensive adult education programme was undertaken in recent years. The scheme runs under the aegis of Education and Community Development Department. The adult literacy centres are mainly run at nights by the primary school teachers and volunteers, who get as remuneration a sum of Rs. 5 per adult made literate during a period of six r onths. There has been a progressive increase in the number of adult literacy centres from year to year. The total number of such centres exsting in 1960-61 was 612 out of which 79 were run by the Education Department and 533 by the Community Development Department in various Blocks.

The percentage of literacy in the district is above the State average. The rate of literacy, during the decade has risen abruptly from 10·3 in 1951 to 19·7 in 1961 as against the increase from 15·8 in 1951 to 21·7 in 1961 in the State. In no other district, the is rise so high. This district has been developing very fast due mainly to development of several industrial towns like Rourkela and Rajgangpur.

The total number of literates found in each subdivision and police station of the district

together with the percentage of literacy in each is furnished in the statement below:

District/Subdivision Police Station	Total No. of literates	Percentage of literacy
Sundargarh District ..	149,546	19·7
Sadar Subdivision ..	62,176	17·7
Panposh Subdivision ..	65,239	24·3
Bonai Subdivision ..	22,131	15·9
Sundargarh PS ..	10,463	20·0
Lephripara PS ..	6,251	16·9
Hemgir PS ..	5,917	16·1
Bhasma PS ..	10,342	23·4
Talsara PS ..	9,445	16·8
Bargaon PS ..	7,380	14·4
Rajgangpur PS ..	12,378	16·8
Rourkela Town ..	39,724	44·0
Birmitrapur PS ..	7,132	16·8
Raiboga PS ..	3,002	13·0
Bisra PS ..	10,051	13·3
Raghunathpali PS ..	5,330	14·6
Bonaigarh PS ..	12,693	21·1
Banki PS ..	1,410	13·5
Gurundia PS ..	2,753	13·4
Sarasara Balang PS ..	1,227	13·3
Mahulpada PS ..	637	7·3
Koira PS ..	1,115	8·6
Kamarposh Balang PS ..	2,962	13·7

The rate of literacy is the highest in the Panposh subdivision and the lowest in Bonai subdivision. Of all the police stations, Rourkela Town PS records the highest percentage, whereas Mahulpada PS has the lowest rate of literacy.

Literacy among Scheduled Castes and Scheduled Tribes

The Scheduled Castes and Scheduled Tribes of the district respectively comprise 9·6 per cent and 58·1 per cent of the total population of the district. The statement below shows the total number of literates found amongst them and the percentage of literacy.

Caste/Tribe	Total S. C./ S. T. population	Total literates amongst the S. C./S. T.	Percentage of literacy
Scheduled Castes ..	73,134	8,476	11·6
Scheduled Tribes ..	440,910	45,008	10·2

Although the standard of literacy among both the Scheduled Castes and Scheduled Tribes is below the district average, the rate of literacy among the Scheduled Tribes is not quite unsatisfactory compared to other tribal districts.

For improving the educational standard of the tribal people, special facilities are being provided by establishing Sevashrams and Ashram schools. The number of such institutions stood at 98 in the year 1961. Provision has been made for imparting free education and free supply of reading and writing materials to the students who read in these institutions. For education outside their locality, stipends and lump grants are given to them in high schools, middle schools and upper primary schools. Reading and writing materials like books, slates, pencils, etc. are also supplied to them at primary education stage. A list of Sevashrams and Ashram schools is furnished in Part III.

ECONOMIC ACTIVITIES

The economic classification adopted in the last Census has undergone a substantial change this time to facilitate collection of more comprehensive data. In the last Census, the chief criteria for such classification were "economic dependence" and "income" which have been given up in the present Census. According to the economic classification scheme adopted in the Census of 1961, the population has been divided into two broad classes viz. "workers" and "non-workers".

The term "workers" include all persons working as well as the working children irrespective of their earning income.

Workers

The working population has further been grouped into nine broad industrial categories, namely,

I As Cultivator;
II As Agricultural Labourer;
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities;
IV At Household Industry;
V In Manufacturing other than Household Industry;
VI In Construction;
VII In Trade and Commerce;
VIII In Transport, Storage and Communications; and
IX In Other Services.

There are 383,029 workers in the district comprising 252,755 males and 130,274 females. The workers thus constitute 50·5 per cent of the total population. Table B-I of the General Economic Tables shows the total number of workers in each industrial category along with the break-up for each sex and broad age-group. The proportionate distribution of 1,000 persons, males and females, under each industrial category in the district as well as in the State with rural and urban break-up is furnished below for facility of comparison:

Category of workers		Sundargarh			Orissa		
		Total	Rural	Urban	Total	Rural	Urban
Total population ..	M	1,000	1,000	1,000	1,000	1,000	1,000
	F	1,000	1,000	1,000	1,000	1,000	1,000
Total workers ..	M	638	618	713	608	610	572
	F	360	382	228	266	274	131
I As Cultivator ..	M	345	429	29	363	387	42
	F	216	250	15	133	140	9
II As Agricultural Labourer ..	M	65	81	3	92	98	12
	F	51	60	1	57	60	4
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities	M	9	4	29	11	11	16
	F	5	2	21	4	4	5
IV At Household Industry ..	M	21	22	17	33	32	34
	F	21	24	4	28	29	19
V In Manufacturing other than household Industry	M	50	2	232	8	2	88
	F	5	1	27	2	1	9
VI In Construction ..	M	13	1	57	3	2	25
	F	2	N	14	N	N	2
VII In Trade and Commerce ..	M	16	5	59	13	9	68
	F	2	1	4	4	4	11
VIII In Transport, Storage and Communications	M	16	3	63	6	2	50
	F	3	N	17	N	N	4
IX In Other Services ..	M	103	71	224	79	67	237
	F	55	44	125	38	36	68
Non-workers ..	M	362	382	287	392	390	428
	F	640	618	772	734	726	869

M=Males F=Females

Proportion of workers in the rural area of Category I is above the State average which indicates that majority of rural population greatly depend on agriculture. The rate of participation in Categories V, VI and VIII above the State average, specially in the urban areas, signifies that the district has advanced considerably in the field of industry. In other categories the proportion of workers is below the corresponding State average.

Primary, Secondary and Tertiary Sectors

The nine industrial categories of workers are classed into three sectors, viz., Primary, Secondary and Tertiary. Primary Sector consists of workers in Categories I and II representing the agricultural classes together with Category III excluding those working in mines and quarries. Categories IV to VI together with those working in mines and quarries of Category III and gas and electric supply of Category IX form the Secondary sector. All the remaining Categories, namely, VII, VIII and IX excluding the workers in gas and electricity supply comprise the Tertiary sector. The distribution of 1,000 persons in each of these sectors for rural and urban areas of the district and the State is furnished below:

Industrial sector	..	Sundargarh			Orissa		
	..	Total	Rural	Urban	Total	Rural	Urban
Total population	..	1,000	1,000	1,000	1,000	1,000	1,000
Primary Sector	..	343	412	29	328	348	43
Secondary Sector	..	64	27	232	39	34	102
Tertiary Sector	..	98	62	264	70	59	230
Non-workers	..	495	499	475	563	559	625

Majority of workers in rural areas are concentrated in Primary sector, whereas in urban areas concentration of large porportion of workers is noticed in Tertiary sector. This signifies predominantly agricultural character of rural, and diversified economic activities of urban areas.

Sex ratio of workers

The sex ratio (number of females per 1,000 males) among total workers and each industrial category of workers is furnished below for the district and and the State.

	Industrial category		Sundargarh			Orissa		
			Total	Rural	Urban	Total	Rural	Urban
	Total workers	..	515	612	201	438	456	185
I	As Cultivator	..	573	578	320	367	368	179
II	As Agricultural Labourer	..	722	726	247	619	622	296
III	In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities		499	584	455	375	391	242
IV	At Household Industry	..	894	1,046	155	858	890	444
V	In Manufacturing other than Household Industry		87	597	73	181	469	79
VI	In Construction	..	157	152	158	60	61	59
VII	In Trade and Commerce	..	89	244	40	321	436	130
VIII	In Transport, Storage and Communications		152	31	171	53	27	69
IX	In Other Services	..	491	609	351	479	545	232

Higher proportion of female workers exceeding the State average is noticed in all the categories except Categories V and VII in the total and rural areas of the district. The urban ratios in Categories I, III, VI, VIII and IX are also above the corresponding State averages.

Classification according to ISIC and NCO

The Indian Census Economic Classification adopted at the 1951 Census was neither a purely industrial nor occupational classification but was a combination of both. There were only 10 divisions and 88 subidivisions of industries and services. This scheme has been given up in the present Census and separate tabulation of industries and occupations based on Indian Standard Industrial Classification and National Classification of Occupations was attempted for the first time. As this is the first occasion when a work of great magnitude, such as, this classification is under taken, marginal errors in classification, if any, have to be ignored as they do not impair the general trend presented by the Tables. This two-fold classification, though primarily intended to secure more detailed classification of the sectors of production and services and of personal talents and skills, will also serve well to maintain comparability of the present with the past.

Indian Standard Industrial Classification

The nine industrial categories of workers described above almost correspond to the nine broad divisions of the Indian Standard Industrial Classification. The divisions, major groups and minor groups of Categories III to IX are given in Tables B-IV, Parts A, B and C of the General Economic Tables. The following Table gives the figures of their distribution per 10,000 males and 10,000 females in each division for the district and the State, with total and urban break-up.

Division of I. S. I. C.			Sundargarh (per 10,000)		Orissa (per 10,000)	
			Males	Females	Males	Females
All Divisions	..	T	10,000	10,000	10,000	10,000
		U	10,000	10,000	10,000	10,000
Division 0 Agriculture, Livestock, Forestry, Fishing and Hunting	..	T	256	323	1,005	657
		U	117	39	248	249
Division 1 Mining and Quarrying	..	T	291	458	128	151
		U	346	967	103	266
Division 2 & 3 Manufacturing	..	T	2,989	2,543	2,265	3,606
		U	3,625	1,458	2,316	2,227
Division 4 Construction	..	T	571	243	218	26
		U	833	670	473	153
Division 5 Electricity, Gas, Water and Sanitary Services	..	T	92	2	50	2
		U	137	6	156	13
Division 6 Trade and Commerce	..	T	713	173	834	537
		U	862	177	1,313	930
Division 7 Transport, Storage and Communication	..	T	677	278	367	39
		U	933	814	969	366
Division 8 Services	..	T	4,402	5,980	5,106	4,970
		U	3,147	5,869	4,421	5,795
Division 9 Activities not adequately described		T	9	..	27	12
		U	..	..	1	1

T=Total U=Urban

Proportions of male workers in both total and urban areas of the district in divisions 1, 2 & 3, 4 and in the total of divisions 5 and 7 are above the State averages, which indicates large scale participation of male workers in different economic activities of the district. Proportions of female workers in divisions 1, 4, 7 and 8 are also above the corresponding State averages.

National Classification of Occupations

Classification of workers according to divisions, groups and families of the National Classification of Occupations is given in Table B-V of the General Economic Tables. The following Table shows the proportionate distribution in each division for 10,000 males and 10,000 females along with the State figures.

Division of N. C. O.		Sundargarh (per 10,000)		Orissa (per 10,000)	
		Males	Females	Males	Females
All Divisions	T	10,000	10,000	10,000	10,000
	U	10,000	10,000	10,000	10,000
Division 0					
Professional, Technical and Related workers	T	548	148	717	106
	U	509	224	770	461
Division 1					
Administrative, Executive and Managerial workers	T	429	17	210	13
	U	547	43	353	62
Division 2					
Clerical and Related workers	T	805	35	451	36
	U	999	79	1,161	354
Division 3					
Sales workers	T	949	171	838	527
	U	1,238	173	1,327	810
Division 4					
Farmers, Fishermen, Hunters, Loggers and Related workers	T	267	328	1,025	668
	U	131	52	386	250
Division 5					
Miners, Quarrymen and Related workers	T	89	138	109	107
	U	24	5	49	3
Division 6					
Workers in Transport and Communication Occupations	T	531	184	308	19
	U	699	555	729	215
Division 7-8					
Craftsmen, Production Process workers and Labourers, n.e.c.	T	5,432	8,689	5,008	7,595
	U	4,640	8,470	3,842	6,349
Division 9					
Service, Sports and Recreation workers	T	802	280	833	615
	U	992	369	1,190	1,439
Division X					
Workers not classifiable by occupation	T	148	10	501	314
	U	221	30	193	53

T=Total U=Urban

The largest proportion of both male and female workers is found to be concentrated in division 7-8 . The respective figures for the State are lower than that of the district. In division 1 and in the total of divisions 2, 3 and 6, proportions of male workers is also above the State averages. In case of female workers higher proportion is noticed in divisions 5, 6, 7 and 8, and in the total of divisions 0 and 1.

Craftsmen and Production Process Workers

The following Table shows the total number of workers in ten selected crafts, in order of their numerical importance. Their proportion to 10,000 persons of the respective divisions severally for total and females are also furnished below:

	Number of Artisans			Proportion per 10,000 of		
	Total	Males	Females	Total	Males	Females
1. Millers, bakers, brew masters and related food and beverage workers ..	5,756	3,696	2,060	465	409	616
2. Spinners, weavers, knitters, dyers, and related workers ..	4,815	3,531	1,284	389	390	384
3. Blacksmiths, hammersmiths and forgemen ..	3,294	2,420	874	266	268	261
4. Basketry weavers and related workers ..	2,912	928	1,984	235	103	594
5. Potters and related clay formers ..	2,503	1,897	606	202	210	181
6. Jewellers, goldsmiths and silversmiths ..	1,908	1,852	56	154	205	17
7. Leather cutters, lasters and sewers (except gloves and garments) and related workers ..	1,650	1,562	88	133	173	26
8. Tool makers, machinists, plumbers, welders, plasters and related workers ..	1,339	1,299	40	108	144	12
9. Tailors, cutters, furriers and related workers ..	948	833	115	77	92	34
10. Carpenters, joiners, cabinet makers, coopers and related workers ..	466	466	..	38	52	..

Non-workers

All those who do not come under the nine industrial categories of workers are treated as non-workers. There are 375,588 non-workers constituting 49·5 per cent of the population of the district. The details of these non-workers are furnished in the Table below:

Classification of non-workers	Persons	Males	Females
Total non-working population ..	375,588	143,459	232,129
1. Full-time students ..	54,679	37,074	17,605
2. Household duties ..	104,549	5,333	99,216
3. Dependants, infants and disabled ..	212,287	97,711	114,576
4. Retired, rentier or independent means ..	676	362	314
5. Beggars, vagrants, etc.	1,162	781	381
6. Inmates of penal, mental and charitable institutions ..	143	132	11
7. Perons seeking employment for the first time	988	965	23
8. Persons employed before, but now out of employment and seeking work ..	1,104	1,101	3

Among the non-workers, dependents, infants and disabled persons constitute the highest number while persons doing household duties come next. Of those doing household duties, the males number 5,333 which may not be deemed as an abnormal feature, as in some households male members look after the up-keep of the house, tend the cattle and take care of the children, while the womenfolk are busy in the market place or go out in an economic pursuit, such as, hawking garden fruits and vegetables or eatables made at home, such as, *chura*, *murhi*, etc. In few large families, some male members are not interested to find out jobs due to their preoccupation at home, which is mostly in the form of assisting the elderly members. Such members are classed as persons doing household duties.

The details of non-workers are furnished in Table B-IX.

Industrial Establishments

A comprehensive housing census was undertaken for the first time in 1960 to collect various details about different types of houses existing in

the State along with their mode of construction, accommodation, etc. The most valuable of all the details so collected relates to different kinds of industrial establishments beginning from a large-sized factory like Rourkela Steel Plant to a very small-scale unit carried in the household. These industries are classified according to the power used, viz., factories and workshops run by (*i*) electricity, (*ii*) liquid fuel, (*iii*) coal, wood and bagasse, (*iv*) other power and (*v*) no power. Statistics have also been collected to further classify these industries by size of employment, viz., factory employing one person, 2—5 persons, 6—9 persons, 10—19 persons, 20—48 persons, 50—99 persons and 100 persons or more. The data so compiled are furnished in the Table E-III in Part II of this report.

In this district, there are 6,245 houses which are used as workshops, factories or workshop-*cum*-dwellings, of which 249 are in urban areas and the rest in rural areas. Number of factories found in the district according to power used and size of employment is furnished below:

Factories classified by power :	Number
Factories run by electricity ..	41
Factories run by liquid fuel ..	12
Factories run by coal, wood and bagasse	1,950
Factories run by other power ..	385
Factories run with no power ..	3,857
Factories classified by size of employment:	
Factories employing one person .	1,860
Factories employing 2—5 persons ..	4,090
Factories employing 6—9 persons ..	246
Factories employing 10—19 persons ..	31
Factories employing 20—49 persons .	4
Factories employing 50—99 persons ..	4
Factories employing 100 persons and above	10

These industries have been grouped according to the classification made by the I.S.I.C. scheme, according to which there are 60 different kinds of industries in the district. The following statement shows a few industries of the district according to their numerical importance.

Name of industry	Total number of establish-ments
1. Manufacture of materials from cork, bamboo, cane, leaves and other allied products ..	1,446
2. Cotton weaving in handlooms ..	1,157
3. Manufacture of sundry hardwares ..	932
4. Manufacture of earthenware and earthen pottery ..	711
5. Production of edible fats and oils (other than hydrogenated oil) ..	385
6. Cotton spinning other than in mills ..	339
7. Manufacture of shoes and other leather footwear ..	271
8. Manufacture of structural wooden goods, such as, beams, posts, doors, windows..	261

Workers employed in Household Industries

15,948 persons in the district, composed of 8,420 males and 7,528 females, are employed in household industries. They constitute 2·1 per cent of the total population and 4·2 per cent of the total workers as against the State averages of 3·0 per cent and 6·9 per cent respectively Of the total persons employed in household industries, 1,655 belong to the urban areas and the rest, to the rural areas. Household industries like weaving and basketry making have engaged majority of such workers.

Small-scale Industries

According to the survey conducted by the Director of Industries in 1961, there are 93 small industrial units in the district, of which 16 have a capital investment of Rs. 50,000 or more in

each case. The break-up of these industries according to the line of production is furnished below :

Line of production		Number
Chemical industries		9
Wood engineering industries	..	27
Printing industries	..	4
Plastic and lac industries	..	2
Iron and steel processing industries	..	10
Leather and footwear industries	..	1
Pottery and ceramic industries	..	2
Consumer industries	..	21
Tobacco tooth paste	..	5
Tailoring shops	..	2
Servicing industries	..	10

Most of them are found in the towns of Rourkela and Rajgangpur.

Factories

Section 2 (*m*) of the Factories Act, 1948 defines a factory as follows :

"Factory" means any premises including the precincts thereof

(*i*) whereon ten or more workers are working, or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on, or

(*ii*) whereon twenty or more workers are working or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on but does not include a mine, subject to the operation of the Mines Act (XXXV of 1952) or a railway running shed".

Section 85 of the said Act, however, authorises the State Government to declare by notification any place wherein a manufacturing process is carried on, to be a factory within the meaning of the Factories Act, although it does not fulfil the above requirement of law.

A list of such factories existing in the district in 1951 and in 1961 has been given separately. Out of 8 registered factories existing in 1951, 2 units were closed by 1961 and 24 new units started functioning during the decade, thus bringing their total number to 30 in 1961.

Supply of Electricity

Electricity is supplied to the district from the Hirakud Hydroelectric Project. All the towns of the district including two villages have been electrified so far. They are Sundargarh, Rourkela, Rajgangpur, Birmitrapur, Uditnagar and Beheramal. It is proposed to electrify 8 more villages during the Third Plan.

Trade and Commerce

7,025 persons, consisting of 6,448 males and 577 females, are engaged in trade and commerce. They constitute 0·9 per cent of the total population. Of them, 187 persons deal in wholesale trade and 6,701 in retail trade. The remaining 137 workers carry on miscellaneous trade. Of the total wholesale traders, 186 are in urban areas and the rest, in rural areas. Of the total number of retail traders, 3,054 or 45·6 per cent of them deal in cereals and pulses.

The district has a total number of 3,122 shops including shop-*cum*-dwellings, restaurants, etc., out of which 835 are in rural and the balance in urban areas.

Fairs

The main fairs and festivals of the district are Ratha Jatra, Dola Jatra, Makar Jatra and Shivaratri. The gathering in these fairs sometimes rises as high as 5,000. The main attractions in these fairs are 'Pala', 'Daskathia', and local Adivasi music and dances. Brass and bell-metal utensils, ornaments of silver and articles made of bamboo are generally sold and purchased in these fairs.

AGRICULTURE AND IRRIGATION

The agricultural programmes of the district are looked after by a District Agricultural Officer stationed at Sundargarh. He is subordinate to the Director of Agriculture and Food Production, Orissa, who holds his office at Bhubaneswar. For each Community Development Block, there is an Agricultural Extension Officer to execute agricultural extension programmes.

Land utilization

The utilization of land under different categories of uses in the district as in 1959-60 may be compared with that in the State as a whole, as per the following Table. One of the Tables in Part III contains these statistics for each year during the period, 1952—60. Sundargarh district, was formed after merger of the princely states in 1948 by joining the two ex-state areas of Gangpur and Bonai. Agricultural statistics prior to this year are not available. Thus the scope of comparative study of these statistics is confined to the past decade only.

The soil of Sundargarh subdivision is very fertile being situated in the Ib valley towards the south, and here the skilful and industrious 'Agarias' make the most of their land. In the northern portion which is inhabited by tribal people, the soil is less fertile. The cultivators are also at a disadvantage, owing to the ravages of wild animals and to their own ignorance of good agricultural practices. The regularly cultivated areas in Panposh and Bonai subdivisions are along the river valleys . The crops depend mostly on natural rainfall for water-supply. The other sources are tanks, 'Bandhas' and 'Katas'. The age-old practices and primitive implements are still in use.

	Sundargarh		Orissa	
	Area in acres	Percentage to total area	Area in acres	Percentage to total area
Total geographical area ..	2,424,320	100	38,509,952	100
(1) Forests ..	887,680	36·62	8,908,558	23·1
(2) Barren and unculturable land ..	46,895	1·93	3,819,723	9·9
(3) Land put to non-agricultural uses ..	239,522	9·88	3,382,752	8·8
(4) Culturable waste ..	194,532	8·02	2,128,127	5·5
(5) Permanent pasture and grazing land ..	171,915	7·09	1,556,709	4·0
(6) Miscellaneous tree crops and groves ..	90,103	3·72	1,695,687	4·4
(7) Current fallow ..	48,484	2·00	1,654,615	3·8
(8) Other fallow land ..	17,890	0·74	509,924	1·3
(9) Net area sown ..	727,299	30·00	14,695,526	38·2
(10) Non-reporting area ..	..	..	347,330	1·0

According to reports of the Forest Department, forests cover 55·01 per cent of area of the district whereas in the statistics of Agriculture Department, only 36·62 per cent of the area are shown under forests. Apparently, the two Departments do not follow the same connotation for 'forests'.

The percentages of areas under forests, land put to non-agricultural uses, culturable wastes and permanent pasture and grazing land in the district are greater than the State averages. On the other hand, the net area sown is much lower than that in the State as a whole.

Cropping pattern

The total cropped area of the district in 1959-60 was 734,544 acres, out of which cereals were grown on 666,835 acres, the chief crop being paddy, which was grown on 552,060 acres of land. Land under cultivation of cereal crops constituted 91·69 per cent of the total cropped area of the district. Among these, paddy was grown on 75·2 per cent. Pulses covered only 7,516 acres of land constituting 1·02 per cent of the gross cropped area.

Areas under cultivation of various crops during the period from 1952-53 to 1959-60 are shown in a Table in part III of this Handbook. The following Table makes a comparison of the area under some of the important crops with the State totals and their percentages, based on the statistics for the year 1959-60.

Crops	Sundargarh		Orissa	
	Gross cropped area in acres	Percentage to gross cropped area	Gross cropped area in acres	Percentage to gross cropped area
Paddy ..	552,060	75·2	9,907,301	62·6
Ragi ..	820	0·1	188,721	1·2
Wheat ..	600	0·1	20,640	0·1
Maize ..	5,417	0·7	86,210	0·5
Sugar-cane ..	1,227	0·2	66,318	0·4
Gram ..	1,500	0·2	70,558	0·4
Black gram	2,950	0·4	125,138	0·8
Groundnut	9,000	1·2	130,536	0·8
Red gram ..	956	0·1	114,803	0·7
Sesamum ..	18,500	2·5	252,325	1·6
Kodo ..	13,598	1·9	251,484	1·6
Common millet ..	2,800	0·4	56,775	0·4
Rape ..	2,000	0·3	213,611	1·3

The percentages of area under cultivation of paddy, maize, groundnut, sesamum and kodo in the district are greater than the State averages.

Cultivating season

The chief crop of the district is paddy. Three varieties of paddy are grown. The periods of sowing and havest for paddy and a few other important crops of the district are indicated below:

Crops	Sowing period	Harvesting period
1. Paddy (Autumn)	June-July	October-November
(Winter)	July-August	December-January
(Summer)	January-February	April-May
2. Maize	June-July	September-October
3. Wheat	November-December	March
4. Groundnut	June-July	October-November

Workers on land

The density of population, proportion of workers on land to total workers, and gross area sown per worker on land in the district are compared in the following Table with the State averages, as also with those in the adjoining districts of Sambalpur, Dhenkanal and Keonjhar.

State/District	Density of population per square mile	Total workers	Workers on land (cultivator and Agricultural labourer)	Percentage of workers working on land to total workers	Gross cropped area in acres	Gross cropped area per wroker on land
Orissa ..	292	7,661,529	5,656,523	73·8	15,829,316	2·8
Sundargarh ..	200	383,029	259,145	67·7	734,544	2·8
Sambalpur ..	223	789,421	578,992	73·3	1,784,697	3·1
Dhenkanal ..	243	425,260	311,329	73·2	834,959	2·7
Keonjhar ..	231	334,911	271,301	81·0	672,554	2·5

Cultivators and agricultural labourers constitute 67·7 per cent of the total working population of the district. The percentage is lower than the State average. It is also lower than that in the three adjoining districts. On the other hand, gross cropped area available per worker in the district is the same as the State average. It is lower than that in Sambalpur district. But a worker in Sundargarh has more cropped area than his counterpart in Dhenkanal and Keonjhar.

Irrigation

The total area under irrigation, according to season and crop report, was 27,226 acres during 1959-60. The following Table makes a comparison of area under irrigation and percentage of irrigated area to net cropped area of the district with those for the State and the neighbouring districts.

State/District	Area under irrigation (acres)	Percentage of irrigated area to net area sown
Orissa .	2,409,667	16·4
Sundargarh .	27,226	3·8
Sambalpur .	603,042	34·4
Dhenkanal .	214,059	26·6
Keonjhar ..	32,271	4·9

The above Table brings out how utterly inadequate is the irrigation facility in the district as compared with its neighbourhood. The following Table makes a comparison of gross cropped area, area sown more than once and their percentages.

State/Districts	Gross cropped area	Area sown more than once	Percentage of area sown more than once to gross cropped area
Orissa	15,829,316	1,133,790	7·2
Sundargarh ..	734,544	7,245	1·0
Sambalpur .	1,784,697	30,853	1·7
Dhenkanal ..	834,959	29,215	3·5
Keonjhar ..	672,534	10,075	1·5

Here again, low percentage of area given to more than one crop speaks of inadequacy of irrigation facilities.

Area under irrigation through different sources for the years 1952-53 to 1959-60 is given in a Table in Part III of this publication. A list of minor irrigation projects with ayacut area of 100 acres and more is also given in another Table.

Agricultural farms

People in this part have not yet taken to improved methods of agriculture, including use of better and modern agricultural implements. There are only a few farms in the district, which function mostly as demonstration and seed multiplication farms. Such farms exist at Sundargarh, Bargaon, Kuliposh, Kendudihi, and Bandhaberna.

Agricultural implements and machineries

A census of agricultural implements and machineries existing in the district was taken during each of the livestock censuses of 1945, 1957 and 1961. These were the only three such censuses taken after formation of Orissa into a separate province. As pointed out already, the district was not in existence at the time of first livestock census. Therefore, the results of the counts in 1957 and 1961 only are given in a Table in Part III. Between 1957 and 1961, the number of ploughs, both wooden and iron, and carts increased whereas the sugar-cane crushers came down from 969 to 534. The number of irrigation pumps, tractors and 'ghanis' also went up.

ANIMAL HUSBANDRY AND VETERINARY

The Animal Husbandry and Veterinary Services of the district is in charge of a District Animal Husbandry and Veterinary Officer whose headquarters is at Sundargarh. There were in 1961 only one veterinary hospital, 12 veterinary dispensaries and 45 stockman centres in the district. Under the poultry development schemes, one regional farm with a strength of 500 birds and rearing stock capacity of 10,000 has been set up to meet the requirements of poultry in the districts of Sundargarh, Sambalpur and Bolangir. One demonstration farm with a strength of 100 birds also runs side by side with this Regional farm. Expanded nutrition programme to supply eggs for feeding expectant and nursing mothers is also worked out in one Community Development Block. There is no artificial insemination centre in the district. There are however 7 stud-bull centres. The common cattle diseases are haemorrhagic septicemia, black-quarters impasion tympany & worm infections. No serious epidemic of any cattle disease broke out in the district during the last decade. The total livestock was recorded at 731,330 in 1957 and 803,594 in 1961. There has been increase in number of all livestock except pigs and camels, whose number went down from 20,647 to 3,457 and from 19 to 6 respectively in the last census. There has been an appreciable increase in the number of goats, that from 204,096 in 1957 to 227,875 in 1961.

PUBLIC HEALTH

Administration

The public health activities and medical services in the district are under the charge of a District Health Officer and a Civil Surgeon respectively. Buth of them are stationed at Sundargarh. Their jurisdiction covers the entire district. The district, had, by April 1961, 13 hospitals, 6 dispensaries and 8 primary health centres. A total of 409 beds for indoor patients are available in these hospitals and primary health centres, which had altogether 17 doctors and 5 Kavirajs in position. Treatment at the government institutions is given free. six family planning centres were opened in the district, the earliest of them being the one at the town of Sundargarh, started during 1956.

Vital Statistics—Registration system

Vital statistics were not being regularly collected previously in the ex-state areas, which now constitute the district. After merger of the states, an interim arrangement was made with effect from July, 1948 to collect weekly figures of attacks and deaths from cholera and smallpox in the district with a view to take preventive measures against epidemics. This was the fore-runner of the systematic collection of vital occurrences, which began with effect from the 1st January 1952. The whole of the district is now under registration system. The Bengal Births and Deaths Registration Act (Act IV of 1873) is followed in the matter of collection of these events. The agency of chowkidars is employed for collection of vital occurrences in rural areas. According

to the defined procedure, the village chowkidars are to collect information about births and deaths during their rounds in villages and report them at the police stations on their weekly or fortnightly parade-days. The Thana Officers are to consolidate the reports thus recorded for a month and send monthly returns to the District Health Officer. In practice, however, the illiterate, and ignorant Chowkidars took this work as an imposition on them rather than one falling within their legitimate sphere of duty and consequently neglected it more often than not. The Thana Officers, busy as they were in ever-increasing problems of law and order hardly had a tendency to check omissions in order to obtain accuracy in the reports received. Thus the entire structure of vital statistics was built on the reports of the Chowkidars, that were anything less than satisfactory. Further, the transfer of Chowkidars to the pay-roll of Grama Panchayats during the later part of the past decade was another set back to this system. After this transfer, the Chowkidars avoided coming to parades at the Thanas regularly, and consequently collection of vital statistics suffered a still greater neglect at their hands. An attempt is now being made to collect these statistics through the Grama Panchayats and Panchayat Samitis. Suitable provision exists in the Orissa Grama Panchayat Act, 1964 for such collection.

The urban area of the district, for purposes of collection of vital statistics consists of Sundargarh and Birmitrapur towns. There are 4 towns in the district according to 1961 Census. Rajgangpur and Rourkela towns did not report separate collections during the past decade. Thus the reports of Sundargarh Municipality and Birmitrapur Notified Area Council have been taken under urban area statistics. Vital events collected for Sundargarh town was with effect from 1952, but for Birmitrapur town the collections started only from 1959. The vital occurrences in these towns are collected by the health staff of the Municipality and Notified Area Council.

Monthly reports of events recorded are sent to the District Health Officer both by the rural and urban units. Having received these monthly reports from the Thana Officers and the local bodies, the District Health Officer compiles his monthly return of births and deaths and forwards the same to the Director of Health Services, Orissa for compilation of State figures. During the decade under report, the system worked more in its breach. Defaults were noticed in collection, reporting and compilation, that led to under registration. The available records are, therefore, to be studied against this background of inaccuracies and utilized with due care for drawing conclusions.

Births and deaths

During the 9 years from 1952 to 1960, according to the registration figures, a total death of 81,899 occurred and 139,146 births took place in the district. Thus only 57,247 souls are assumed to have added to the population of the district during these nine years, of which 27,909 are males and 29,338 females. The increase of population between 1961 and 1951 censuses has, however, been 206,414. Allowing due allowance for the year 1951 during which the registration machinery did not function, the difference between the figures of increase in population indicated by these two sources is great and cannot be explained to be migration gain. The vital statistics are incomplete and do not represent the true picture.

Registration rates

The birth and death rates for the 9 year period 1952-1960 are 23·3 and 13·7 respectively, which are slightly less than the State rates. The annual birth and death rates for these 9 years are as follows:

Year	Birth rate per 1,000 population			Death rate per 1,000 population		
	Total	Rural	Urban	Total	Rural	Urban
1952 ..	28·8	29·0	16·6	18·2	18·4	5·8
1953 .	27·3	27·4	17·5	15·9	15·9	10·4
1954 .	25·3	25·4	16·4	15·4	15·5	9·2
1955 .	28·4	28·5	25·3	15·4	15·4	13·9
1956 ..	23·2	23·3	19·3	14·2	14·2	11·4
1957 ..	21·7	21·6	22·8	14·0	13·9	14·6
1958 ..	17·1	17·0	22·9	12·8	12·8	14·4
1959 ..	21·2	21·1	23·3	10·0	10·1	7·3
1960 ..	19·6	19·3	25·2	9·6	9·6	10·8
1952—60 ..	23·3	23·4	22·4	13·7	13·8	10·4

The birth rate has gone down from 28·8 in 1952 to 19·6 in 1960 indicating a loss of 9·2 points within a period of nine years. In 1958 it had touched a still lower level, *i.e.*, 17·1. Death rate has also gone down by nearly 9 points from 18·2 in 1952 to 9·6 in 1960. Though the various public health and medical facilities may have succeeded in controlling births and bringing down deaths during the previous years, the incompleteness of vital statistics records itself has played a greater part in showing declining rates towards the later part of the decade. Death rate in urban area which went down to be as low as 5·8 in 1952 and 7·3 in 1959 are other instances of under-registration.

Causes of death

According to recorded causes of mortality, deaths from various diseases and their proportion to total deaths during these 9 years were as follows:

Diseases	Deaths	Percentage to total deaths
1. Cholera .	427	0·52
2. Smallpox .	1,084	1·32
3. Fever .	54,106	66·07
4. Dysentery and diarrhoea ..	5,188	6·33
5. Respiratory diseases .	3,265	3·99
6. Wounds and accidents	1,661	2·03
7. Other causes	16,168	19·74
Total ..	18,899	100

Fever

Fever and the diseases classified under "other causes" were, as usual, two largest killers during the decade. The next in order were dysentery and diarrhoea, and respiratory diseases. The mortality on account of fever is recorded to have constituted 66·07 per cent of total deaths during the past decade. The primary collectors of vital occurrences possess very little knowledge as to the causes of death other than some of the specific and well-known diseases like smallpox and cholera. They often misclassify deaths due to several other diseases under fever although deaths may not have been caused by fever in all such cases. There is thus some misclassification of deaths but all the same it cannot be denied that fever takes the highest toll. About 55 per cent of the area of the district are hilly tracts, which possess an unhealthy and malarial climate. Malaria, the principal disease among fevers is endemic and causes majority of deaths. Deaths from fever were reported all the year round, but mortality generally went up in rainy season. A total number of 314,439 malaria cases were reported to have been treated at the hospitals and other medical institutions in the district during the past decade. Happily, the attendance of such patients at hospitals has fallen down from 1958 onwards.

Other causes

Next to fever, the largest mortality has been on account of "other causes". The group "other causes" combine various diseases other than cholera, smallpox, fever, dysentery and diarrhoea, respiratory diseases, and wounds and accidents. All these except cholera and smallpox are heterogenous and include diseases, some of which differ from each other in their characteristics. The two specific causes for which records are maintained are cholera and smallpox.

Cholera

Cholera rather made rare appearances. It was practically absent during the years 1953—55. Only sporadic cases of death due to it were reported in

1952, 1956 and 1957. But casualties in the year 1958 were much greater, being 350. During this year, deaths began to be reported in large number from March and in August and September casualties were as many as 88 and 104 respectively. In the subsequent months, it also took some tolls though smaller in number. Casualties in the last two years of the decade were not much but stray cases of death were reported in almost all the months.

Smallpox

Unlike cholera, smallpox was endemic during all the nine years, spread out on the twelve months. It caused 123 deaths in 1952, but in succeeding years up to 1957, casualties reported were fewer in number. The greatest mortality of the decade due to it, was in the year 1958, being 531. The disease appeared in the district in November, 1957 and continued to take tolls till the end of September 1960. The largest number of deaths in any month during this period was 109 in July,1958.

Infant deaths

The total infant mortality in the district during 1952—60 was 14,781 and constituted 18·05 per cent of total deaths. The highest number of deaths was recorded in the year 1952. 32·86 per cent of deaths during this decade was of children of pre-school going age. The decennial infant death rate for the district was 106·2 per mille of live births, that was lower than the State rate of 145·6.

COMMUNITY DEVELOPMENT AND PANCHAYATI RAJ

Community Development

The Community Development programme, that aims at all round development of rural areas, was inaugurated in Orissa in October, 1952. The original pattern was to have Community Projects and Community Development Blocks with total budgetary allotments of Rs. 65 lakhs and Rs. 15 lakhs respectively and a period of operation of 3 years each. This pattern changed quickly and from 1954 it was replaced by 3 stages of Development Blocks, namely, National Extension Service Blocks, Community Development Blocks and Post-Intensive Blocks which were to run seriatim. The period of operation of an N. E. S. Block was ordinarily 3 years. After recording a certain standard of development and the Block having done a minimum of about 2 —2½ years as N. E. S., it was to get converted into a Community Development Block. On completion of the Community Development term the Block was to enter Post-Intensive phase under which a provision of Rs. 30,000 was available annually for expenditure on local works and social education for a period of 3 years. The N. E. S. Block had an allotment of Rs. 4 lakhs for 3 years of its term and the expenditure in Community Development phase inclusive of the amounts spent in N. E. S. stages was limited to Rs. 12 lakhs. This pattern also did not last long and the 3 stages of development were concised into 2 stages, namely, Intensive Development called Statge I and Post-Intensive Development, namely, Stage II. Each of these phases lasts 5 years and the total financial allotments are Rs. 12 lakhs and Rs. 5 lakhs respectively for Stage I and Stage II periods. The Stage I period is preceded by a Pre-extension period of one year during which a sum of Rs. 18,000 is made available for expenditure on activities exclusively in the field of agriculture. The expenditure thus incurred on the Pre-extension phase is ultimately adjusted against Stage I budget. This revised programme came into operation with effect from the 1st April 1958 and is still in force. All the N. E. S. Blocks existing then were taken under Stage I and the Post-Intensive Blocks under Stage II. The Community Development Blocks were allowed to complete their full term and then revert to Stage II. With the revision in programme, the number of Blocks increased and the entire State was to be covered by Blocks by October, 1963.

The normal population coverage of a Block is 66,000 for plains areas and 25,000 to 30,000 for tribal areas. On this basis, Sundargarh district has been delimited into 16 Blocks. The first allotment to this district was a C. D. Block at Sundargarh inaugurated on the 2nd October 1953. At the end of the Second Plan period in March, 1961, the district had, through different allotments, 10 Blocks in all covering a total area of 2,475 square miles. Of these Blocks, 8 were in Stage I and 2 in Stage II.

The Block programme is executed through the agency of Grama Panchayats. After introduction of the Panchayati Raj, Panchayat Samitis are now solely responsible for planning and execution of the Block programme according to the outlines indicated by Government and the felt needs of the community. Block funds are placed at the disposal of Panchayat Samitis as grants-in-aid and loans for implementation of these development schemes. Although the emphasis is on agriculture and industry, priority is given in the Block programme for provision of supply of water for irrigation and drinking purposes, education, medical and communication facilities. A total expenditure of Rs. 64,31,738 was incurred on the Community Development programme in the various Blocks of the district up to the end of 1960-61, the break-up of which under broad heads is as follows:

	Rs.
1. Staff and contingencies and Block buildings ..	16,65,963
2. Animal husbandry and agricultural extension ..	4,57,089
3. Irrigation .	12,32,124
4. Health and rural sanitation ..	7,79,346
5. Education	4,47,314
6. Social education .	4,15,623
7. Communication .	6,22,040
8. Rural arts, crafts and industries ..	2,08,597
9. Housing .	6,03,642

Among the achievements under the Community Development programme up to the end of 1960-61 important ores are the undertaking or completion of 53 minor irrigation projects, functioning of 233 co-operative societies and opening of 8 primary health centres. As a part of social education programme 92 Mahila Samitis were started and 13,025 adults were made literate. The achievements under communications programme are laying of 435 miles of roads and construction of 29 bridges and culverts.

Grama Panchayats

At beginning, Grama Panchayats in Orissa were responsible mostly for municipal functions in rural areas. As years went by, their activities extended to execution of development schemes. Under the Community Development programme which was initiated during the First Five-Year Plan period, Grama Panchayats were given a more active role in execution of development activities in their areas. To begin with, they functioned as agencies of the Government for execution of development programmes, but towards the later part of the Second Plan period, they began to plan and execute their own programmes of development. These changes of democratic decentralization of power subsequently brought in the present Panchayati Raj, which is a 3-tier system with the Grama Panchayat at the village level and he Zilla Parishad at the district level, the intermediate level being taken by the Panchayat Samitis.

A Grama Panchayat normally covers 5,000 persons, but the limit is relaxed in special cases. The constitution of Grama Panchayats is regulated by the Orissa Grama Panchayats Act, 1948. A Sarpanch is at the head of a Grama Panchayat, and is assisted by a Naib Sarpanch. The Grama Panchayat members are elected by the villagers on the basis of adult franchise, and from amongst them are elected a Sarpanch and a Naib Sarpanch all of whom hold their office for a period of 3 years. A paid Secretary maintains the accounts and records of the Grama Panchayat. The Grama Panchayat fund is made up of grants and loans

received from the Government, as also of taxes and other internal incomes arising out of various schemes, such as, pisciculture, co-operative societies, poultry development, markets, ferries, etc. The fund is usually lodged in a Savings Bank account at the nearest Post Office. Village sanitation, maintenance of public roads, lighting and public tanks, scavenging, public health, registration of births and deaths are some of the important functions of a Grama Panchayat.

There were 40 Grama Panchayats in the district during 1951-52 and their number increased to 80 in 1956-57. All these Grama Panchayats continued up to end of 1959-60. With the increase in number, the income and expenditure of the Grama Panchayats have also gone up. From the total income of only Rs. 2,95,135 and expenditure of Rs. 65,691 during 1953-54, the amounts went up to Rs. 6,34,929 and Rs. 6,11,830 respectively in the year 1959-60. Taxes alone yielded a total revenue of Rs. 35,844 during the year 1959-60, the highest collections being from taxes on vehicles which amounted to Rs. 7,692. From other sources i. e., lease of market sheds, fees from cattle pounds, irrigation, pisciculture, ferries and ghats, licence fees, etc., the Grama Panchayats got Rs. 87,954 during 1959-60. Government grants during the year amounted to Rs. 4,66,181 out of which Rs. 4,03,971 were from Kendu leaf grant alone. Loans to the tune of Rs. 45,250 including paddy loans for Rs. 10,000 and loans for pisciculture amounting to Rs. 31,250 were also received from the Government. The expenditure included pay and allowances of staff and contingencies being Rs. 99,295 and the costs of development and other works being Rs. 5,12,534.

The Grama Panchayats in the district maintained village police, the total number of which was 1,220 during 1959-60. Seventeen Adalati Panchayats were functioning during this year. In a period of seven years from 1953-54 to 1959-60, these Adalati Panchayats handled as many as 3,379 cases, out of which disposal was 2,992. The highest numbers of cases brought up and disposed of in a year were 690 and 647 in 1959-60.

The yearwise details of numbers of Grama Panchayats and villages covered by them, number of Adalati Panchayats and cases handled by Adalati Panchayats, number of village police maintained by Grama Panchayats, income and expenditure of Grama Panchayats for the years 1951-52 to 1959-60 have been given in a Table in Part III.

Panchayat Samitis

In accordance with the provisions of the Orissa Panchayat Samitis and Zilla Parishad Act, 1959, Panchayat Samitis have been established all over the State. Sundargarh district has had 16 Panchayat Samitis with effect from the 26th January, 1961. A Panchayat Samiti is coterminous with a Development Block. Of these Panchayat Samitis, 10 were in as many Development Blocks functioning already and the remaining 6 were in Shadow Blocks, that is, areas demarcated to have Development Blocks in due course.

The Panchayat Samitis are largely elected bodies and consist of both official and non-official members, the official members being the Block Development Officer and the representatives of various Departments of the State Government ordinarily stationed at the Panchayat Samiti level. The non-official members are Sarpanchs of Grama Panchayats and an additional representative elected from each Grama Panchayat area not being a member of the Grama Panchayat. Due representation of women and Scheduled Castes and Scheduled Tribes is secured in membership of the Samiti. Both official and non-official members take part in the discussions of the Samiti meetings, but the official members are not entitled to vote. Non-official members of the Panchayat Samiti hold their office for a period of 4 years. At the head of the Samiti is a Chairman, who is assisted by a Vice-Chairman, and both of them are elected from among the non-

official members. The Chairman generally presides over meetings of the Panchayat Samiti, and in his absence the Vice-Chairman takes the chair. The Panchayat Samiti meets in the minimum once in every alternate month. The Chairman gets an honorarium of Rs. 100 per mensem and is provided with rent-free accommodation or Rs. 50 as houserent allowance in lieu thereof.

A Panchayat Samiti plans, executes and supervises over all development programmes in its area. It is also responsible for control and spread of primary education, management of trusts and endowments, which the Government may entrust, vaccination, registration of births and deaths and supervision over the work of the Grama Panchayats within its jurisdiction. Keeping in view the felt needs of the people and broad outlines of the schemes indicated by the Government, the Panchayat Samiti prepares its annual budgets and proposals, and submits them to the Zilla Parishad for approval. The schemes are executed after Zilla Parishad has sanctioned them. There is a Panchayat Samiti Fund is fed by grants and loans from the Government as also aids from All-India bodies and institutions, donations and contributions, etc., and it is lodged at the nearest Government Treasury. The Block Development Officer as the Executive Officer of the Panchayat Samiti draws on this fund, as and when necessary, by issue of cheques. The main sources of income of the Panchayat Samiti are the loans and grants from the Government which are generally routed through the Zilla Parishad. The Community Development funds are, however, directly paid to the Samiti. The work and accounts of the Panchayat Samiti are open to audit and inspection by the Government officials.

Zilla Parishad

A Zilla Parishad is the highest institution immediately below the State level in the Panchayati Raj. Like Panchayat Samiti, the Parishad has both official and non-official members. The official members are the Collector, the Subdivisional Officers and the District Heads of different Departments of the State Government. The Chairman of all the Panchayat Samitis in the district, M.Ps., M. L. As, and Members of Rajya Sabha elected from the district are the non-official members of the Zilla Parishad. One of the non-official members should be a female. The Parishad is headed by a Chairman, who is assisted by a Vice-Chairman and both of them are elected from amongst its non-official members. The tenure of office of all non-official members including the Chairman and the Vice-Chairman is 4 years. The Parishad is required to meet at least once in every 3 months and all such meetings are generally presided over by the Chairman and in his absence, by the Vice-Chairman. Official members take part in the discussions in the meetings of the Parishad but have no right to vote. The Chairman of Zilla Parishad gets an honorarium of Rs. 200 and houserent allowance of Rs. 50 per mensem.

The Zilla Parishad mainly approves of the schemes and budgets of Panchayat Samitis, distributes funds among them and supervises over the execution of the various schemes. The day-to-day work of the Parishad is managed by an Executive Officer who belongs to Orissa Administrative Service, Class I. The Zilla Parishad has also a fund to which the grants and loans from the Government, aids from All-India bodies and internal incomes are credited. The money is lodged in an account at the Government Treasury. The Executive Officer of the Zilla Parishad functions as drawing and disbursing officer in respect of this fund.

The Zilla Parishad for Sundargarh district was constituted with effect from the 6th February 1961 and its headquarters is at Sundargarh.

CO-OPERATION

The co-operative movement plays an important part in providing credit on reasonable terms and conditions to the local people. The re-organization of credit co-operative societies at all levels and the strengthening of credit structure with State-participation in the share capital is one of the most important features of the co-operative movement during the past decade. The weaker units were provided with share capital contribution and were given subsidy for maintaining trained and efficient managerial staff. Several new schemes were put into operation and old societies were re-vitalized.

The agricultural co-operative societies advance loans both in cash and kind. Most of them give loans on short term basis, whereas there are others to advance medium term credits. There is provision for grant of long term loans also. Short term loans generally include cash, nucleus paddy seeds, green manure seeds, chemical fertilizers and other production pre-requisites including insecticides, agricultural implements, etc. Funds required for sinking or repair of wells, purchase of cattle and agricultural machineries and cost of minor improvements to land are some of the items classified under medium term loan. The non-agricultural co-operative societies do not, however, advance any loan.

The co-operative movement in the district has made steady progress during the past few years. There were 272 primary co-operative societies with a total membership of 43,435 and a working capital of Rs. 30,46,971 during 1960-61. We thus come across one member of co-operative society in every 17 persons in the district. The average amount of working capital available per member works out to Rs. 70·15 Paise. The Central Bank at Sundargarh is the financing agency for all the primary societies. Its membership and working capital in 1960-61 were 241 and Rs. 12,64,320 respectively.

*NATIONAL SAVINGS

The National Savings movement was at first started during the earlier years of the Second World War, being then called the Defence Savings Scheme. Its objectives were to collect money for defence purposes and to fight inflation. During the post-war period, the activities of this movement were directed towards inculcating the habit of thrift among the people so as to obtain savings for augmentation of the resources for financing the Five-Year Plans. In recent years, it is also helping in collecting funds to strengthen he defence in the National Emergency. The scheme was more or less on an experimental basis till 1948. In 1949 it was spread over to all the districts in the State including Sundargarh.

The various National Savings securities which are available now are the12-Year National Defence Certificate,the 10-Year DefenceDeposit Certificate, the 15-Year Annuity Certificate, the Premium Prize Bonds, the Cumulative Time Deposit Scheme and the Post Office Savings Bank Accounts. The securities are available in different denominations and carry varying rates of interest. The gross and net sale proceeds from all the National Savings securities in the district during the past 3 years are given below:

Years	Gross sale	Net sale
	(in thousands of rupees)	
1960-61 ..	53,06	24,17
1961-62 .	67,25	33,01
1962-63 .	98,15	60,30

The targets and achievements in the sale of National Savings securities in the district during these 3 years were as follows:

Years	Target	Achievement)
	(in thousands of Rs	
1960-61	23,00	24,17
1961-62 ..	30,00	33,01
1962-63 ..	50,00	60,30

* Letter No. 3906, dated 2-6-1964 from the Regional Director, National Savings Organization, Cuttack

PLACES OF INTEREST

Sundargarh

It is the district headquarters town having all modern amenities, such as, electricity, cinema, etc. Being located at the foot of small hillocks, the town presents a beautiful view. It was formerly the seat of the ruling chief of Gangpur State. The town is 20 miles from Jharsuguda railway station which lies on Howrah-Bombay route. Regular daily bus services run from Jharsuguda to this place. One of the State Highways passing through the heart of the town provides all-weather road communication with the neighbouring districts as also some of the far-away districts of the State. Regular bus services are also run to Rourkela and Ranchi in Bihar State. The town has a Municipality. Its population according to the 1961 Census was 11,329.

Panposh

Also locally called Uditnagar, it is the headquarters of Panposh subdivision. The town has grown in importance on account of the Rourkela Steel Plant being set up in its vicinity. It lies on the road between Sundargarh and Rourkela, and is also easily reached by railways. It is the headquarters of a Superintendent of Police. A suburban town enjoying all modern amenities, it has a busy market. The confluence of the two rivers, Koel and Sankh, at nearby Vedavyasa is one of the prettiest spots in the district.

Bonaigarh

Headquarters of Bonai subdivision, it is situated on the bank of the river Brahmani. Formerly it was the headquarters of the ruling chief of Bonai state. It is situated at a distance of 38 miles from Panposh and is reached by road. One has to cross the river Brahmani to reach this place which presents a picturesque sight and is about 505 feet above sea level. Its population in 1961 was 3,065.

Vedavyas

One of the prettiest spots in the district, it is situated one mile from the Panposh railway station at the confluence of the rivers Sankh and Koel, that originates the river Brahmani. The sage Vyasa, compiler of the Mahabharat is said to have been born here. A temple of Siva has been built at the spot. There is a large congregation of people here on Sivaratri day. A picturesque place and a good pic nic spot, it is accessible by motor vehicles.

Khandadhar Waterfall

Situated about 10 miles from Bonaigarh town in the village Nandapani under Bonai police station, it is a place of scenic beauty and is surrounded by thick jungles. The height of the fal is nearly 1,500 feet. There is a revenue restshed at the place.

Rourkela

The Steel Town, it is 413 kms. away from Calcutta on the main railway line between Calcutta and Bombay. In collaboration with West German Government, the Government of India have set up the Rourkela Steel Plant. The Plant was commissioned into working on the 3rd February, 1959. The target is for one million tons of crude steel to be rolled into 7,20,000 tons of plates, sheets and strips. The capacity of the plant can be expanded with a few additions to 1·3 million tons with the construction of the Rourkela Steel Works. The town has all modern amenities of cinema, restaurants, etc. The township is spread over a large area and there is separate bus service within the township. The place is also connected by regular bus services with Sambalpur, Cuttack, Sundargarh (district headquarters). The local people around are Adivasis, but the town has become cosmopolitan due to appointments in the Steel Plant. Its population in 1961 Census was 90,287. It has a Notified Area Council.

Rajgangpur

It is on the main railway line from Calcutta to Bombay, 443 kms. away from Calcutta. There is a cement factory which produces cement and cement products and employs about 415 workers. The factory is about four furlongs away from the railway station. The place falls on the road from Sundargarh to Rourkela. The local people around are Adivasis. Its population in 1961 was 13,843. The town has got a Notified Area Council.

Birmitrapur

A town with a population of 20,301 (1961 Census), it is famous for the limestone quarries. The town has a Notified Area Council and can by reached by train on the branch line which starts from Rourkela and terminates at Birmitrapur.

Mandira Dam

Providing a storage reservoir on the river Sankh, it was built at Mandira to supply drinking water to Hindusthan Steel Factory and other industrial units nearby. Taken up for execution in 1957, the work was completed in September, 1959. Total length of the Dam is 1,365 feet and the height of the earth dam is 90 feet. Its gross storage capacity is 264,000 acre-feet.

* CALENDAR OF IMPORTANT EVENTS

1856	..	Abhoy Singh, the younger brother of Maharaja Arjun Singh of Porahat who had joined hands with Surendra Sai, chief of Sambalpur against the British was murdered by the Zamindar of Nagra with the help of other Bhuyan Head Ganjus under them while Abhoy Singh was offering prayer at Khuramanjan Nullah near Bisra.
1865	..	Systematic preparation of Zamabandi was taken up for the first time in Gangpur state.
1905	..	Gangpur state remained under the control of Commissioner of Chhotnagpur up to 1905 when it was transferred to Bihar and Orissa and one Political Agent was appointed for the State.
1907	..	The first systematic Land Revenue Settlement was taken up in the state of Gangpur.
1928	..	Nagra Zamindari was made a full-fledged subdivision with its headquarters at Kalunga.
1929	..	The revisional Land Revenue Settlement of Gangpur state was started. This is the second Land Revenue Settlement which was completed in 1936 and it is still in force in Gangpur ex-state area.
1935	..	The Agent to the Governor General, Eastern States Agency conferred on the Rani Saheba the status of Regent and transferred to her full administrative control of certain Departments of Gangpur state.

*Source : District Census Officer, Sundargarh

1936 .. Full Regency powers were conferred on the Rani Saheba. The administration of the state was divided into two branches, viz. Judiciary and Executive. The Chief Judge became the Head of Judiciary and the Dewan became the Head of the Executive.

1938 .. Death occurred to Raja Birmitra Pratap Sekhar Deo. He was succeeded by his younger brother Raja Bir Udit Pratap Sekhar Deo. Gangpur state Police had to open fire on a mob of Jharkhand Party which started agitation at Simko.

1944 .. The subdivisional headquarters shifted to Panposh from Kalunga.

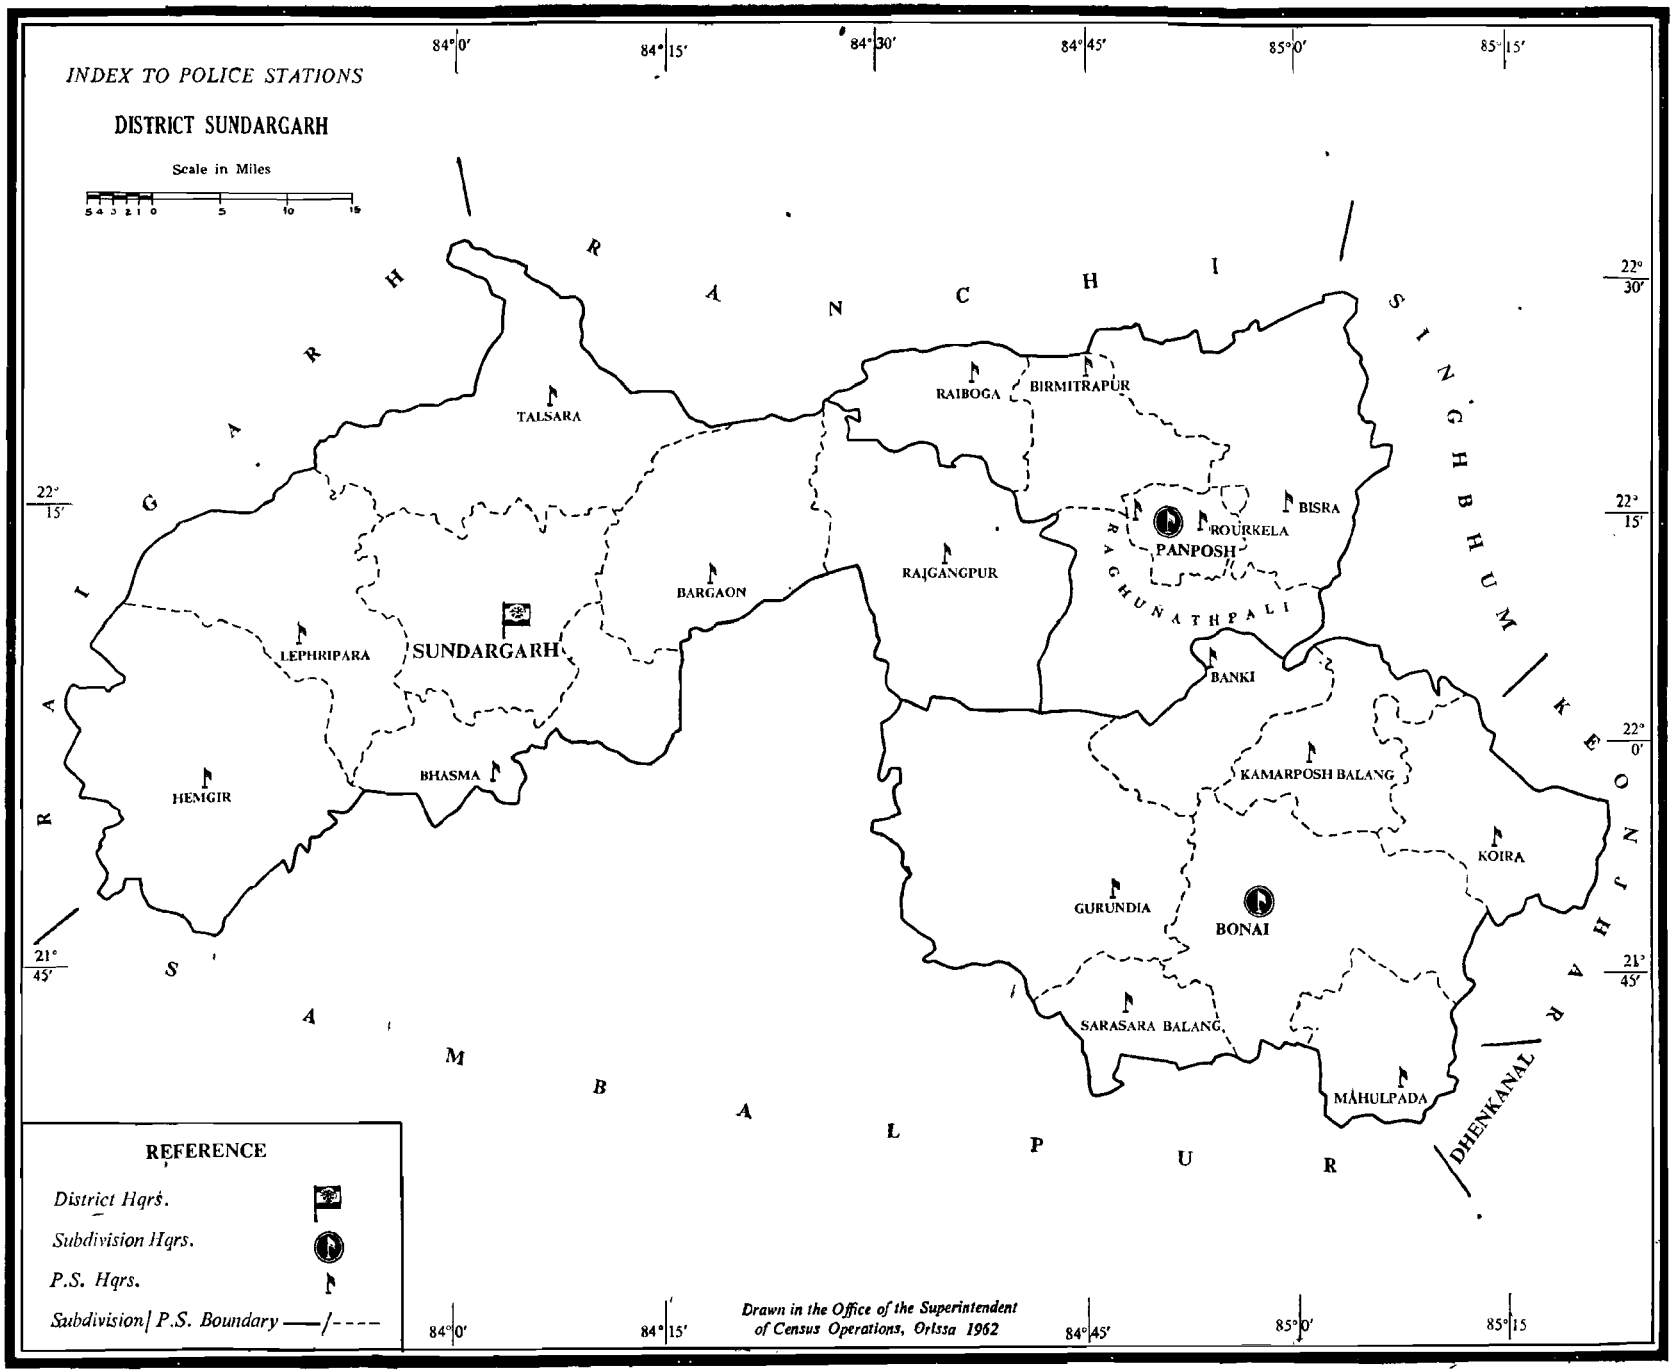

1947 .. Gangpur state got back its paramount power from the British Government.

1948 .. Merger of ex-states of Gangpur and Bonai with the State of Orissa

1952 .. Zamindary of Nagra and Raiboga vested in the Government of Orissa.

1955 .. Establishment of the Steel Plant at Rourkela

1958 .. A Science College was established at Sundargarh town, the first one in the district.

PART II

CENSUS TABLES

Contains.

General Population Tables—A-I to A-IV with appendices, General Economic Tables—B-I and B-III to B-IX, Household Economic Tables—B-X to B-XVII, Social and Cultural Tables—C-I, C-II, C-III, C-V, C-VII and C-VIII, Housing and Establishment Tables—E-I to E-V, Tables on Scheduled Castes and Scheduled Tribes—SCT-I to SCT-V, SC-I, ST-I and ST-II, Villagewise List of Industries and List of Fairs and Festivals.

TABLE-A SERIES

GENERAL POPULATION TABLES

General Poupulation Tables comprise four Tables, A-I to A-IV which are briefly described below:

2. **Table A-I—Area, Houses and Population**—This Table supplies information regarding area, number of inhabited and uninhabited villages, number of towns and sexwise population for each police station and subdivision in the district.

3. The area shown in Col. 3 (*a*) is based on the figures received from the local revenue authorities who also maintain the area figures relating to smaller units, such as, police stations. The Surveyor General, India has not got area figures for units below the district and so the area of the district as received from him has not been adopted. The area in square kilometres, shown in Col. 3 (*b*) has been calculated at the rate of 1 square mile= 2·590 square kilometres.

4. **Definitions**—The definitions of the terms village, town, house, occupied residential house, houseless persons and institutional population are given in the fly-leaf to Table A-I in the Census Report of 1961, Vol. XII (Orissa), Part II-A.

5. There are three appendices to this Table which are as follows:

(*i*) Appendix I shows the changes in the jurisdiction of the Police Stations and Subdivisions since 1951. The annexure to this Appendix gives the names of all villages which are transferred from the jurisdiction of one police station to another.

(*ii*) Appendix II gives the number of villages with population of 5,000 and over and towns with population under 5,000.

(*iii*) Appendix III gives the houseless and institutional population in each police station and subdivision.

6. **Table A-II—*Variation in population during* sixty years**—This Table furnishes data on the variation of population for seven censuses from 1901 to 1961. Its importance lies in the fact that it gives the growth of population from decade to decade. In the absence of reliable vital statistics or any other source of information it forms the main source of estimation of population. The percentage variation from decade to decade is also shown in this Table.

7. **Table A-III—Villages classified by population**—This Table gives the number and population of groups of villages in the various population sizes, namely, less than 200, 200 to 499, 500 to 999, 1,000 to 1,999, 2,000 to 4,999, 5,000 to 9,999 and 10,000 and above.

8. The information is furnished for each suddivision and police station in the district.

9. **Table A-IV—Towns classified by population with variation since 1941**—This Table shows the growth of each town in this district since the Census of 1941. The area of the town at the 1961 Census, both in square miles and square kilometres is also given. The term 'Town' has already been defined in the fly-leaf to Table A-IV published in Part II-A of the Census Report of Orissa.

Foot Notes—(1)† The Suqare Kilometres and density figures of Urban areas of Police Station/Subdivision/District are worked out using the area figures corrected up to two places of decimales obtained by adding the areas of the Towns in the respective units and not using the area figures given in the Table. In addition to this, the figures relating to Square Kilometres are further adjusted to make the Police Station/Subdivision/District totals tally.

(2) Towns treated as such for the first time in 1951 Census which continue as towns in 1961 Census are shown with asterisk (*) on their left.

(3) Towns treated as such for the first time in 1961 Census are printed in italics.

The following abbreviations have been used :—

T for Total	PS for Police Station
R for Rural	M for Municipality
U for Urban	N A C for [Notified Area Council

TABLE-B SERIES

GENERAL ECONOMIC TABLES

The contents of the General Economic Tables which are presented in this volume are briefly explained below:

2. Table B-I—Workers and Non-workers classified by sex and broad age-groups—This is a summary Table prepared from the Primary Census Abstract giving the total population, the nine industrial categories of workers and also the number of non-workers. Sex split-up is shown in each case. Each category is divided into four broad age-groups, viz., 0—14, 15—34, 35—59 and 60+. The classification of workers and non-workers by age-groups is a special feature of 1961 Census. These age-groups correspond to different stages of life which have special significance with reference to capacity to work, viz., children, young persons, middle-aged persons and elderly persons. Classification of non-working population has not been provided in this Table to avoid unwieldiness, but is given in another Table.

3. Table B-III—Industrial Classification of Workers and Non-workers by Educational Levels—This Table is presented in two parts. Part A relates to Urban areas and Part B to Rural areas. The educational levels which are given in both the parts are shown below:

Part A

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation or Higher Secondary
Technical diploma not equal to degree
Non-technical diploma not equal to degree
University degree or Post-graduate degree other than technical degree
Technical degree or diploma equal to degree or Post-graduate degree in the following branches:
Medicine
Agriculture
Veterinary and Dairying
Technology
Teaching and Others

Part B

Illiterate
Literate (without educational level)
Primary or Junior Basic
Matriculation and above

4. The nine industrial categories of workers and also the non-workers are cross-tabulated by literacy and educational standards mentioned above.

5. Table B-IV Part A—Industrial Classification by sex and class of worker of Persons at work at Household Industry—The distinction between household industry and non-household industry is drawn for the first time during the current Census. This part deals with workers engaged in household industry only. The data up to Divisions and Major Groups are shown separately for Total, Rural and Urban for this district.

6. Table B-IV Part B—Industrial Classification by sex and class of worker of Persons at work in Non-household Industry, Trade, Business, Profession or Service—This part deals with categories III, V, VI, VII, VIII and IX. All these categories are sorted into 'Divisions' and 'Major Groups' according to the nature of the industry. They are further cross-tabulated according to the class of worker, namely, employer, employee, single worker and family worker. The data up to Divisions and Major Groups are shown separately for Total, Rural and Urban for the district.

7. Table B-IV Part C—Industrial Classification by Sex, Divisions, Major Groups, and Minor Groups of Persons at work other than Cultivation—As the Minor Groups are not shown in the Tables A and B, this Table combines both in order to give the Minor Groups in addition to the Divisions and Major Groups. Separate columns are provided for the workers at household industry and non-household industry.

8. Minor Groups having less than 1 per cent of workers of the respective Divisions (less than 0·5 per cent in case of Minor Groups of Division 2 & 3), have not been shown in this Table. Divisions thus affected are marked with an asterisk(*). They are given separately in the Appendix.

9. Complete Code description of Divisions, Major Groups and Minor Groups according to I. S. I. C. are given below for reference as they are used in many Tables :

Major Group (Code)	Description	Minor Group (Code)
	Division 0—Agriculture, Livestock, Forestry, Fishing and Hunting	
00	*Field Produce and Plantation Crops*	
	Production of cereal crops (including Bengal gram), such as, rice, wheat, jowar, bajra, maize ..	000
	Production of pulses, such as, arhar, moong, masur, urd, khesari, other gram ..	001
	Production of raw jute and kindred fibre crops ..	002
	Production of raw cotton and kindred fibre crops ..	003
	Production of oil-seeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above ..	005
	Production of fruits and nuts in plantations, vines and orchards ..	006
	Production of wood, bamboo, cane, reeds, thatching grass, etc. ..	007
	Production of juice by tapping palms ..	008
	Production of other agricultural produce (including fruits and nuts not covered by code No. 006 and flowers) not covered above ..	009
01	*Plantation Crops*	
	Production of tea in plantation	010
	Production of coffee in plantation ..	011
	Production of rubber in plantation ..	012
	Production of tobacco in plantation ..	013
	Production of ganja, cinchona, opium ..	014
	Production of other plantation crops not covered above ..	015
02	*Forestry and Logging*	
	Planting, replanting and conservation of forests ..	020
	Felling and cutting of trees and transportation of logs ..	021
	Preparation of timber ..	022
	Production of fuel including charcoal by exploitation of forest ..	023
	Production of fodder by exploitation of forests ..	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests ..	025
	Production and gathering of other forest products not covered above .	026
03	*Fishing*	
	Production of fish by fishing in sea ..	030
	Production of fish by fishing in inland waters including the operation of fish firms and fish hatcheries ..	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond ..	032

Major Group (Code)	Description	Minor Group (Code)
04	*Livestock and Hunting*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power, such as, cow, buffalo, goat ..	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter), such as, pig ..	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey ..	044
	Rearing of silk worms and production of cocoons and raw silk ..	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products, such as, skin, bone, ivory and teeth..	048
Division 1—Mining and Quarrying		
10	*Mining and Quarrying*	
	Mining of coal ..	100
	Mining of iron-ores ..	101
	Mining of gold and silver ores	102
	Mining of manganese ..	103
	Mining of mica ..	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone ..	107
	Mining of chemical earth, such as, soda ash ..	108
	Mining and quarrying of non-metallic products not classified above, such as, precious and semiprecious stones, asbestos, gypsum, sulphur, asphalt	109
Division 2 & 3—Manufacturing		
20	*Foodstuffs*	
	Production of rice, atta, flour, etc., by milling, dehusking and processing of crops and food grains ..	200
	Production of sugar and syrup from sugar-cane in mills ..	201
	Production of indigenous sugar, gur from sugar-cane or palm juice and production of candy	202
	Production of fruit products, such as, jam, jelly, sauce and canning and preservation of fruits ..	203
	Slaughtering , preservation of meat and fish and canning of fish ..	204
	Production of bread, biscuits, cake and other bakery products ...	205
	Production of butter, ghee, cheese and other dairy products ..	206
	Production of edible fats and oil (other than hydrogenated oil) ..	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products, such as, sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge ..	209
21	*Beverages*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery ..	210

Major Group (Code)	Description	Minor Group (Code)
	Production of country liquor..	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice ..	212
	Production of other liquors not covered above ..	213
	Production of aerated and mineral water ..	214
	Production of ice ..	215
	Production of ice-cream ..	216
	Processing of tea in factories..	217
	Processing of coffee in curing works ..	218
	Production of other beverages	219
22	*Tobacco Products*	
	Manufacture of bidi ..	220
	Manufacture of cigars and cheroots ..	221
	Manufacture of cigarette and cigarette tobacco ..	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff ..	224
	Manufacture of jerda and other chewing tobacco ..	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling ..	230
	Cotton spinning (other than in mills) ..	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching ..	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms ..	235
	Manufacturing of Khadi textile in handlooms ..	236
	Printing of cotton textile ..	237
	Manufacturing of cotton nets ..	238
	Manufacturing of cotton cordage, rope and twine ..	239
24	*Textile—Jute*	
	Jute pressing and baling ..	240
	Jute spinning and weaving ..	241
	Dyeing and bleaching of jute ..	242
	Printing of jute textile ..	243
	Manufacture of other products like rope, cordage from jute and similar fibre, such as, hemps, mesta ..	244
25	*Textile—Wool*	
	Wool baling and pressing ..	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill ..	252
	Wool spinning other than in mill ..	253
	Wool weaving in powerloom ..	254
	Wool weaving in handloom ..	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk ..	261
	Spinning of silk other than in mills ..	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom ..	264
	Printing of silk textile ..	265
	Manufacture of silk cordage, rope and twine ..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products ..	270
	Manufacture of hosiery and other knitted fabrics and garments ..	271
	Embroidery and making of crepe, lace and fringes ..	272
	Making of textile garments including raincoats and headgear ..	273
	Manufacture of made up textile goods except wearing apparel, such as, curtains, pillow cases, bedding materials, mattress, textile bags ..	274

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of waterproof textile products, such as, oil cloth, tarpaulin ..	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling ..	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas ..	278
	Processing and manufacture of textile products not covered above ..	279
28	*Manufacture of Wood and Wooden Products*	
	Sawing and planing of wood ..	280
	Manufacture of wooden furniture and fixtures ..	281
	Manufacture of structural wooden goods (including treated timber), such as, beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipement, such as, bobbin and similar equipment and fixtures ..	283
	Manufacture of other wooden products, such as, utensils, toys and artwares ..	284
	Manufacture of veneer and ply-wood ..	285
	Manufacture of ply-wood products such as, tea chest ..	286
	Manufacture of boxes and packing cases other than ply-wood ..	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products ..	288
	Manufacture of other wood and allied products not covered above ..	289

Major Grhup (Code)	Description	Minor Group (Code)
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper b ard in mill ..	290
	Manufacture of pulp from wood, rags, waste paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade ..	291
	Manufacture o f products, such as, paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp ..	292
30	*Printing and Publishing*	
	Printing and publishing of newspapers and periodicals ..	300
	Printing and publishing of books ..	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry ..	302
	All tpes of binding, stitching, sizing and other a.lied work connected with binding industry ..	303
31	*Leather and Leather Products*	
	Currying, tanning and finisihing of hides and skins and preparation of finished leather ..	310
	Manufacture of shoes and other leather footwear. ..	311

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur ..	312
	Manufacture of leather products (except those covered by code Nos. 311 312), such as, leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles ..	313
	Repair of shoes and other leather footwear ..	314
	Repair of all other leather products except footwear ..	315
32	*Rubber, Petroleum and Coal Products*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat ..	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries ..	324
	Prouction of coal-tar and coke in coke oven ..	325
	Manufacture of other coal and coal-tar products not covered elsewhere ..	326
33	*Chemicals and Chemical products*	
	Manufacture of basic, industrial chemicals, such as, acids, alkalis and their salts not elsewhere specified ..	330
	Manufacture of dyes, paints, colours and varnishes ..	331
	Manufacture of fertilizers ..	332
	Manufacture of ammunition, explosives and fire works ..	333
	Manufacture of matches ..	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap ..	335
	Manufacture of soap and other washing and cleaning compounds ..	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber) ..	337
	Manufacture of common salt..	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats) ..	339
34-35	*Non-metallic Mineral Products other than Petroleum and Coal*	
	Manufacture of structural clay products, such as, bricks, tiles	340
	Manufacture of cement and cement products ..	341
	Manufacture of lime ..	342
	Manufacture of structural stone goods, stone dressing and stone crushing ..	343
	Manufacture of stonewares other than images ..	344
	Manufacture of stone images ..	345
	Manufacture of plaster of paris and its products ..	346
	Manufacture of asbestos products	347
	Manufacture of mica products..	348
	Manufacture of earthenware and earthen pottery ..	350
	Manufacture of chinaware and crockery ..	351
	Manufacture of porcelain and its products ..	352
	Manufacture of glass bangles and beads ..	353
	Manufacture of glass apparatus	354

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of earthen images, busts and statues ..	355
	Manufacture of earthen toys and artwares except those covered by code No. 355 ..	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above ..	357
	Manufacture of other non-metallic mineral products not elsewhere specified ..	359
36	*Basic Metals and their Products except Machinery and Transport Equipment*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms, such as, billets, blooms, tubes, rods ..	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms ..	361
	Manufacture of armaments ..	362
	Manufacture of stuctural steel products, such as, joist, rail, sheet, plate ..	363
	Manufacture of iron and steel furniture ..	364
	Manufacture of brass and bell-metal products ..	365
	Manufacture of aluminiumproducts ..	366
	Manufacture of metal produets (other than of iron, brass, bell-metal and aluminium), such as, tin can ..	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products ..	368
	Manufacture of sundry hardwares, such as, G.I. pipe, wire net, bolt, screw, bucket, cutlery (this will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39) ..	369
37	*Machinery (All kinds other than Transport) and Electrical Equipment*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers other than electrical equipment, such as, diesel engines, road-rollers, tractors ..	371
	Manufacture of machine-tools..	372
	Manufacture of textile machinery and accessories ..	373
	Manufacture of heavy electrical machinery and equipment, such as, motors, generatirs, transformers ..	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery ..	377
	Manufacture of electronic equipment, such as, radio, microphone ..	378
	Manufacture of electric machinery and apparatus, appliances not specified above ..	379
38	*Transport Equipment*	
	Manufacture, assembling and repairing of locomotives ..	380

Major Group (Code)	Description	Minor Group (Code)
	Manufacture of wagons, coaches, tramways and other railroad equipment other than that covered by code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines) ..	382
	Manufacture of motor vehicles engines parts and accessories ..	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories, such as, saddle, seat-frame, gear ..	385
	Building and repairing of water transport equipment, such as, ships, boats and manufacture of marine engines ..	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines ..	387
	Repiaring of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above, such as, animal,-drawn and hand-drawn vehicles ..	389
39	*Miscellaneous Manufacturing Industries*	
	Manufacture of optical instruments and lenses, ophthalmic goods and photographic equipment and supplies ..	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies ..	391
	Assembling and repairing of watches and clocks ..	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals ..	393
	Manufacture and tuning of musical instruments ..	394
	Manufacture of stationery articles not covered elsewhere, such as, pencil, penholder, fountain pen ..	395
	Manufacture of sports goods ..	396
	Manufacture and repair work of goods not assignable to any other group ..	399
Division 4—Construction		
40	*Constructon*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations ..	400
	Construction and maintenance of roads, railways bridges, tunnels ..	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of waterways and water-reservoirs, such as, bund, embankments, dam, canal, tank, tubewells, wells ..	403
Division 5—Electricity, Gas, Water and Sanitary services		
50	*Electricity and Gas*	
	Generation and transmission of electric energy ..	500
	Distribution of electric energy..	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers ..	502
51	*Water-Supply and Sanitary Services*	
	Collection, purification and distribution of water to domestic and industrial consumers..	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation ..	511

Major Group (Code)	Description	Minor Group (Code)
Division 6—Trade and Commerce		
60—63	*Wholesale Trade*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere) ..	601
	Wholesale trading in all kinds of fabrics and textile products, such as, garments, hessian, gunny bag, silk and woollen yarns, shirtings, suitings, hosiery products ..	602
	Wholesale trading in beverages, such as, tea (leaf), coffee (seed and powder), aerated water ..	603
	Wholesale trading in intoxicants, such as, wines, liquors	604
	Wholesale trading in other intoxicants, such as, opium, ganja, etc ..	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products ..	606
	Wholesale trading in animals ..	607
	Wholesale trading in straw and fodder ..	608
	Wholesale trading in medicines and chemicals ..	610
	Wholesale trading in fuel and lighting products, such as, coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware ..	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings ..	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products ..	617
	Wholesale trading in other household equipment not covered above ..	618
	Wholesale trading in bricks, tiles and other building materials ..	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products ..	621
	Wholesale trading in paper and other stationery goods ..	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical ..	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb ..	632
	Wholesale trading in all kinds of transport and storage equipment ..	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eyeglasses, frames ..	635
	Wholesale trading in hardware and sanitary equipment ..	636
	Wholesale trading in scientific, medical and surgical instruments ..	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery ..	638
	Wholesale trading in all goods not covered above ..	639

Major Group (Code)	Description	Minor Group (Code)
64—68	*Retail Trade*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry ..	640
	Retail trading in beverages, such as, tea (leaf), coffee (seed and powder), aerated water ..	641
	Retail trading in intoxicants, such as, wines, liquors ..	642
	Retail trading in other intoxicants, such as, opium, ganja, etc. ..	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products. ..	644
	Retail trading in fuel, such as, coke, coal, firewood and kerosene ..	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits, etc. ..	646
	Retail trading in animals ..	647
	Retail trading in straw and fodder ..	648
	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, slik and other textile and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles) ..	650
	Retail trading in toilet goods, perfumes and cosmetics ..	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head gear, such as, hats, umbrellas, shoes and chappals ..	653
	Retail trading in tyres,, tubes and allied rubber products..	654
	Retail trading in petrol, mobil oil and allied products ..	655
	Retail trading in wooden, steel and other metallic furniture and fittings ..	660
	Retail trading in sationery goods and paper ..	661
	Retail trading in metal, porcelain and glass utensils ..	662
	Retail trading in earthenware and earthen toys ..	663
	Retail trading in other household equipment not covered above ..	664
	Retail trading in bricks, tiles and other building materials..	670
	Retail trading in hardware and sanitary equipment ..	671
	Retail trading in wood, bamboo, cane, bark and thatches ..	672
	Retail trading in other building materials ..	673
	Retail trading in agricultural and industrial machinery equipment, tools and appliances ..	680
	Retail trading in transport and storage equipment ..	681
	Retail trading in electrical goods like electric fan, bulb, etc. ..	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear ..	683
	Retail trading in clock and watch, eye glass, frame ..	684
	Retail trading in scientific, medical and surgical instruments ..	685
	Retail trading in precious stones and jewellery ..	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing ..	687
	Book-selling ..	688
	Retail trading in goods unspecified ..	689

Major Group (Code)	Description	Minor Group (Code)
69	*Trade and Commerce—Miscellaneous.*	
	Importing and exporting of goods and commodities ..	690
	Real estate and properties ..	691
	Stocks, shares and futures ..	692
	Providents and insurances ..	693
	Money lending (indigenous) ..	694
	Banking and similar type of financial operation ..	695
	Auctioneering ..	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods, such as, electric fan, microphone, rickshaw, etc. ..	699
Division 7—Transport, Storage and Communications		
70-71	*Transport*	
	Transporting by railways ..	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus) ..	702
	Transporting by road through other means of transport, such as, hackney carriage, bullock cart, ekka ..	703
	Animal transporting by animals, such as, horse, elephant, mule, camel ..	704
	Transporting by man, such as, carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving ..	705
	Transporting by boat, steamer, ferry, etc., by river, canal ..	706
	Transporting by boat, steamer, ship, cargo boat, by sea or ocean ..	707
	Transporting by air ..	708
	Transporting by other means not covered above ..	709
	Services incidental to transport, such as, packing, carting travel agency ..	710
72	*Storage and Warehousing*	
	Operation of storage, such as, warehouses ..	720
	Operation of storage, such as, cold storage ..	721
	Operation of storage of other type ..	722
73	*Communications*	
	Postal, telegraphic, wireless and signal communications ..	730
	Telephone communication ..	731
	Information and broadcasting	732
Division 8—Services		
80	*Public Services (This does not include Government, Quasi-Government or local body activities other than administrative, in such fields as, transport, communications, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institutions each of which is classified in the appropriate industry groups)*	
	Public Services in Union and State army including territorial corps and volunteer corps ..	800
	Public Service in Navy ..	801
	Public Service in Air Force ..	802
	Public Service in Police ..	803
	Public Service in administrative departments and offices of Central Government ..	804

Major Group (Code)	Description	Minor Group (Code)
	Public Service in administrative departments and offices of Quasi-Government organizations, municipalities, local boards, etc. ..	805
88	Public Service in administrative departments and offices of State Governments ..	809
81	*Educational and Scientific Services*	
	Educational services, such as, those rendered by technical colleges, technical schools and similar technical and vocational institutions ..	810
	Educational services, such as, those rendered by colleges, schools and similar other institutions of non-technical type ..	811
	Scientific Services and research institutions not capable of classification under any individual group ..	812
82	*Medical and Health Services*	
	Public health and medical services rendered by organizations and individuals, such as, by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners ..	820
	Veterinary services rendered by organizations and individuals ..	821
83	*Religious and Welfare Services*	
	Religious services rendered by religious organizations and their establishments maintained for worship or promotion of religious activities, this includes missions, ashrams and other allied organizations ..	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk ..	831
	Welfare services rendered by organizations operating on a non-profit basis for the promotion of welfare of the community, such as, relief societies, red-cross organisation for the collection and allocation of contributions for charity ..	832
84	*Legal Services*	
	Legal services rendered by barrister, advocate, solicitor, mukhtar, pleader, mukurie, munshi ..	840
	Matrimonial services rendered by organizations and individuals ..	841
85	*Business Services*	
	Engineering services rendered by professional organizations or individuals ..	850
	Business services rendered by organizations of accountants, auditors, book-keepers or like individuals. ..	851
	Business services rendered by professional organizations or individuals, such as, those of advertising and publicity agencies ..	852
	Business services rendered by professional organizations or individuals, such as, those rendered by news agency, newspaper correspondents, columnists, journalists, editors, authors ..	853

Major Group (Code)	Description	Minor Group (Code)
86	*Community Services and Trade and Labour Associations*	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organizations ..	860
	Services rendered by civic, social, cultural, political and fraternal organizations, such as, ratepayers' association, club, library ..	861
	Community services, such as, those rendered by public libraries, museums, botanical and zoological gardens, etc. ..	862
87	*Recreation Services*	
	Production of motion picture and allied services, such as, processing, editing, etc. ..	870
	Recreation services rendered by cinema houses by exhibition of motion pictures ..	871
	Recreation services rendered by organizations and individuals, such as, those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals..	872
	Recreation services rendered by indoor and outdoor sports by organizations and individuals including horse, motor, etc., racing ..	873
88	*Personal Services*	
	Services rendered to households, such as, those by domestic servants, cooks ..	880
	Services rendered to households, such as, those by governess, tutor, private secretary..	
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organizations to provide lodging and boarding facilities ..	882
	Laundry services rendered by organizations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning services ..	883
	Hair dressing, other services rendered by organizations and individuals, such as, those by barber, hair dressing saloon and beauty shops ..	884
	Services rendered by portrait and commercial photographic studios ..	885
89	*Services (not elsewhere classified)*	
	Services renedred by organizations or individuals not elsewhere classified ..	890
Division 9—Activities not adequately described		
90	*Activities unspecified and not adequately described, (This includes new entrants to the labour market)*	
	Actieities unspecified and not adcquately duscribed including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified ..	900
	Fresh entrant to the Labour Market ..	999

10. **Table B-V—Occupational Classification by Sex of persons at work other than cultivation—** This Table gives the occupational classification of persons who are working in non-agricultural occupation, separately for Total and Urban. Divisions, Groups and Families according to National Classification of Occupations are shown in it. Information regarding persons working in household industry and non-household industry is also supplied.

11. Families having less than 1 per cent of the workers of the respective Division (less than 0·5 per cent in case of families of Divisions 7-8), have not been shown in this Table, but are given in the Appendix. Divisions thus affected are marked with an asterisk(*).

12. Code description of families not appearing in this Table are given below:

000 Architects
004 Chemical Engineers
005 Metallurgical Engineers
006 Mining Engineers
010 Chemists except Pharmaceutical Chemists
011 Pharmaceutical Chemists
012 Physicists
013 Meteorologists
014 Geologists and Geophysicists
015 Mathematicians
019 Chemists, Physicists, Geologists and other Physical Scientists, n. e. c.
020 Biologists and Animal Scientists
021 Veterinarians
022 Silviculturists
023 Agronomists and Agricultural Scientists
029 Biologists, Veterinarians, Agronomists and Related Scientists, n. e. c.
031 Physicians, Ayurvedic
032 Physicians, Homeopathic
033 Physicians, Other
034 Physiologists
035 Dentists
039 Physicians, Surgeons and Dentists, n. e. c.
041 Midwives and Health Visitors
042 Nursing Attendants and Related Workers
044 Vaccinators
045 Physiotherapists, Masseurs and Related Technicians
046 Sanitation Technicians
047 Opticians and Optometrists
049 Medical and Health Technicians, n. e. c. (excluding Laboratory Assistants see 091)
050 Teachers, University
053 Teachers, Nursery and Kindergarten Schools
060 Judges and Magistrates
061 Legal Practitioners and Advisers
062 Law Assistants
069 Jurists and Legal Technicians, n. e. c. (including Petition Writers)
070 Economists
071 Accountants and Auditors
072 Statisticians
073 Geographers
074 Psychologists and Actuaries
075 Personnel Specialists
076 Labour and Social, Welfare Workers, Social Workers who are not elected Officials
077 Sociologists and Anthropologists
078 Historians, Archeologists, Political Scientists and Related Workers
079 Social Scientists and Related Workers, n. e. c.
080 Authors
081 Editors, Journalists and Related Workers,
082 Translators, Interpreters and Language Specialists
084 Sculptors and Modellers
085 Actors and Related Workers
086 Musicians and Related Workers
089 Artists, Writers and Related Workers, n. e. c.
099 Science and Engineering Technicians n. e. c.
0X2 Astrologers, Palmists and Related Workers

0X3 Librarians, Archivists and Related Workers
0X8 Political Workers(who are not elected Officials)
0X9 Other Professional, Technical and Related Workers, n. e. c.
102 Administrators and Executive Officials, Local Bodies
103 Administrators and Executive Officials, Quasi-Government
109 Administrators and Executive Officials, Government, n. e. c.
110 Directors and Managers, Wholesale Trade
111 Directors and Managers, Retail Trade
120 Directors, Managers and Working Proprietors, Banks
121 Directors, Managers and Working proprietors, Insurance
129 Directors, Managers and Working Proprietors, Financial Institutions, n. e. c.
130 Directors, Managers and Working Proprietors, Mining, Quarrying and Well Drilling
132 Directors, Managers and Working Proprietors, Electricity, Gas, Water and Sanitary
139 Directors, Managers and Working Proprietors, n. e. c.
210 Stenographers
211 Typists
220 Computing Clerks and Calculating Machine Operators
221 Punch Card Machine Operators
229 Office Machine Operators, n. e. c.
310 Agents and Salesmen, Insurance
311 Agents, Brokers and Salesmen, Real Estate
312 Brokers and Agents, Securities and Shares
313 Auctioneers
314 Valuers and Appraisers
319 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers, n. e. c.
320 Commercial Travellers
321 Manufacturers' Agents

329 Commercial Travellers and Manufacturers' Agents, n. e. c.
340 Money-lenders (including Indigenous Bankers)
341 Pawn-Brokers
400 Cultivators (Owners)
401 Cultivators (Tenants)
402 Farm Managers, Inspectors and Overseers
409 Farmers and Farm Managers, n. e. c. (vegetable and fruit growers)
410 Farm Machinery Operators
411 Farm Workers, Animals, Birds and Insects Rearing
413 Tappers (Palm, Rubber trees, etc)
414 Agricultural labourers
415 Plantation labourers
419 Farm Workers, n. e. c.
420 Hunters
421 Trappers
429 Hunters and Related Workers, n. e. c.
430 Fishermen, Deep Sea
432 Conch and Shell gatherers, Sponge and Pearl Divers
443 Charcoal Burners, Kattha Makers and Forest Product Processers
503 Shot Firers
509 Mines and Quarrymen, n. e. c.
510 Well Drillers, Petroleum and Gas
511 Well Drillers, other than Petroleum and Gas
520 Mineral Treaters
600 Deck Officers and Pilots, Ship
601 Ship Engineers
610 Deck Ratings (Ship), Barge Crews and Boatmen
611 Engine-Room Ratings, Firemen and Oilers, Ship
620 Aircraft Pilots
621 Flight Engineers
622 Flight Navigators
640 Tramcar Drivers
649 Drivers, Road Transport, n. e. c. (including Palki and Doli Bearers)
661 Traffic Controllers
671 Telegraphists and Signallers

672 Radio Communication and Wireless Operators
673 Teleprinter Operators
693 Inspectors, Traffic Controllers and Despatchers, Communication
700 Fibre Preparers, Ginners, Cleaners, Scourers, etc.
701 Blow-room Workers and Carders
703 Warpers and Sizers
705 Pattern Card Preparers
706 Bleachers, Dyers and Finishers (excluding Printers)
707 Knitters and Lace Makers
708 Carpet Makers and Finishers
709 Spinners, Weavers, Knitters, Dyers, makers of Rope and Related Workers n. e. c.
711 Hat and Head-gear Makers
712 Furriers
713 Upholsterers and Related Workers
714 Pattern Makers, Markers and Cutters, Textile Products, Leather Garments and Gloves
715 Sewers, Embroiderers and Darners, Textile and Fur Products
719 Tailors, Cutters, Furriers and Related Workers, n. e. c.
721 Cutters, Lasters, Sewers, Footwear and Related Workers
722 Harness and Saddle Makers
729 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers, n. e. c.
730 Furnacemen, Metal
731 Annealers, Temperers and Related Heat Treaters
732 Rolling Mill Operators, Metal
734 Moulders and Coremakers
735 Metal Drawers and Extruders
739 Furnacemen, Rollers, Drawers, Moulders and Related Metal-Making and Treating Workers, n. e. c.
740 Precision Instrument Makers, Watch and Clock Makers and Repairmen
742 Jewellery Engravers
750 Fitter-Machinists, Tool-Makers and Machine Tool Setters
751 Machine Tool Operators, Knife Makers
752 Fitter-Assemblers and Machine Erectors (except Electrical and Precision Instrument Fitter-Assemblers)
754 Sheet Metal Workers
755 Plumbers and Pipe Fitters
756 Welders and Flame Cutters
757 Metal Plate and Structural Metal Workers
758 Electoro-Platers, Dip Platers and Related Workers
759 Tool-Makers, Machinists, Plumbers, Welders, Platers and Related Workers n. e. c. (including Metal-Engravers other than Printing)
760 Electricians, Electrical Repairmen and Related Electrical Workers
761 Electrical and Electronics Fitters
762 Mechanics-Repairmen, Radio and Television
763 Installers and Repairmen, Telephone and Telegraph
764 Linemen and Cable Jointers
769 Electricians and Related Electrical and Electronics Workers, n. e. c.
771 Shipwrights and Boat Builders (Woods)
772 Sawyers and Wood Working Machinists
773 Coach and Body Builders
774 Cart Builders and Wheel Wrights
775 Cabinet Makers
779 Carpenters, Joiners, Cabinet Makers, Cooper and Related Workers, n. e. c.
780 Painters and Paper Hangers
792 Glaziers
793 Cement Finishers and Terrazzo and Mosaic Workers
794 Hut Builders and Thatchers
795 Well Diggers
799 Bricklayers, Plasterers and Construction Workers, n. e. c.
800 Type-setting Machine Operators
801 Compositors
802 Proof Readers and Copy Holders

803 Printers (Paper)

804 Printers (Textile)

805 Photolitho Operators, Photolithographers

806 Engravers, Etchers and Block Makers (Printing)

807 Stereotypers

808 Book Binders

809 Compositors, Printers, Engravers, Book-Binders and Related Workers, n. e. c.

810 Furnacemen, Kilnmen and Ovenmen

812 Blowers and Benders, Glass

813 Moulders and Pressers, Glass

814 Grinders, Cutters, Decorators and Finishers

815 Pulverisors and Mixers, Cement, Clay and Other Ceramics

819 Potters, Kilnmen, Glass and Clay formers and Related Workers, n. e. c.

821 Crushers and Pressers, Oil-seeds

822 Dairy Workers (Non-Farm)

823 Khandsari, Sugar and Gur Makers

825 Makers of Aerated Water and Brewers

826 Food Canners, Preservers and Related Workers

827 Butchers

828 Coffee and Tea Blenders and Related Workers

829 Millers, Bakers, Brewmasters and Related Food and Beverage Workers, Makers of Ice, n. e. c.,

830 Batch and Continuous Still operators

831 Cookers, Roasters and Other Heat Treaters, Chemical and Related Processes

832 Crushers, Millers and Calendrers, Chemical and Related Processes

833 Paper Pulp Preparers

834 Paper Makers

839 Chemical and Related Process Workers, n. e. c.

840 Curers, Graders and Blenders, Tobacco

841 Cigarette Machine Operators

842 Cheroot, Cigar and Bidi Makers

843 Snuff and Zarda Makers

849 Tobacco Preparers and Product Makers, n. e. c.

851 Tyre Builders, Vulcanisers and Related Rubber Products Makers

852 Plastics Products Makers

853 Tanners, Fellmongers, Pelt Dressers and Related Workers

854 Photographic Dark Room Workers

855 Makers of Musical Instruments and Related Workers

856 Paper Products Makers

859 Craftsmen, Makers of Scent and Attar, Garlands of Natural flowers or Beads used by Sanyasis, Surma Makers, Cow-dung Cake Makers, Makers of Rubber Stamp, Makers of Lack Bangles and Production Process Workers, n. e. c.

860 Checkers, Testers, Sorters, Weighers and Counters, Weighmen

861 Packers, Labellers and Related Workers

870 Operators, Stationary Engines and Related Equipment

871 Boilermen and Firemen

873 Riggers and Cable Splicers

874 Operators of Earth-moving and other Construction Machinery, n. e. c.

875 Materials-handling Equipment Operators

879 Stationary Engine and Excavating and Lifting Equipment Operators and Related Workers, n. e. c.

900 Fire Fighters and Related Workers

909 Fire Fighters, Policemen, Guards and Related Workers, n. e. c.

910 House Keepers, Matrons, Stewards (Domestic and Institutional)

913 Ayas, Nurse-maids

919 House Keepers, Cooks, Maids and Related Workers, n. e. c.

920 Waiters, Bartenders and Related Workers (Institutional)

930 Building Care-takers

951 Dry-cleaners and Pressers

960 Athletes, Sportsmen and Related Workers

970 Movie Camera Operators

979 Other Photographers

990 Embalmers and Undertakers

999 Service, Sport and Recreation Workers, n. e. c.

X00 Workers without Occupations, Matriculates and above

X08 Workers without Occupations, Literates

X09 Workers without Occupations, Other

13. **Table B-VI—Occupational Divisions of persons at work other than at cultivation, classified by sex, broad age-groups and educational levels in Urban Areas only**—This Table gives the data up to Divisions of the National Classification of Occupations for all the Urban areas in the district. It deals with literate workers other than those who work as cultivators and as agricultural labourers. The population under each Division is classified by four broad age-groups 0—14, 15—34, 35—59, 60+ and Age not stated, which are further cross-tabulated according to the educational levels.

14. **Table B-VII Part A—Persons working principally (*i*) as Cultivators, (*ii*) as Agricultural Labourers or (*iii*) at Household Industry classified by sex and by secondary work (*i*) at Household Industry, (*ii*) as Cultivator or (*iii*) as Agricultural Labourer**—This Table is a cross-tabulation in the case of persons whose principal and secondary work are any two of (*i*) cultivation, (*ii*) agricultural abour or (*iii*) household industry. This is an important Table as it shows the extent to which cultivation is supplemented by household industry and *vice versa*. The type of household industries for the district are shown in Divisions and Major Groups of I.S.I. C. separately for Total Rural and Urban.Major Groups having secondary workers less than 5 per cent of the Principal workers are omitted from this Table and shown in Appendix. The affected Divisions are marked with an asterisk*.

15. **Table B-VII Part B — Industrial Classification by sex of persons working in Non-household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry**—This Table gives the data on the basis of cross-tabulaion in the case of persons who are principally engaged in non-household industry, etc. It shows the principal workers in each Division and Major Group followed by additional workers in each Division and Major Group. It is presented separately for Total, Rural and Urban.

16. **Table B-VIII Parts A and B—Persons unemployed aged 15 and above by sex, broad age-groups and educational levels**—This Table which deals with the classification of unemployed presons by their educational standards and age-groups is presented in two parts: Part A for the Urban areas and Part B for the Rural areas in this district. Both these Parts give separate data in respect of those who are seeking employment for the first time and for those persons who were employed before but are now out of employment and are seeking work. In the first case the broad age-groups are 15—19 20—24, 25—29, 30—34, 35+ and in the latter case 15—19, 20—24, 25—34, 35—44, 45—59 and 60+. The educational levels given in Table B-III, Parts A and B are followed in these Tables respectively for finding out the educational qualifications of the unemployed persons in the respective age-groups.

17. **Table B-IX—Persons not at work classified by sex, broad age-groups and type of activity**—This Table deals with the categorization of non-workers according to their eight-fold activities. The data for the broad age-groups are given separately for Total, Rural and Urban in respect of the district; but for each subdivision and police station it is supplied for Rural only. The study of age-groups with reference to age-tables will throw light on the children of school going age who are not attending school and persons in working age-groups who are not working.

APPENDIX TO TABLE B-IV PART C

Minor groups having less than 1 per cent of the workers of the respective divisions, (less than 0·5 per cent in case of minor groups of Division 2 & 3) which have been omitted in the Table B-IV Part C are shown in this Appendix. The figures of these minor groups giving the number of minor group and the number of male and female workers separately for household industry and non-household industry are shown in run on lines.

006 T-NHI (M-7, F-0)	U-NHI (M-5, F-0)
015 T-NHI (M-3, F-0)	
022 T-NHI (M-1, F-0)	U- NHI (M-1, F-0)
023 T-HI (M-0, F-1)	NHI (M-18, F-7)

238 T-HI (M-7, F-1)	
239 T-HI (M-6, F-0)	
241 T-HI (M-3, F-0)	U-HI (M-3, F-0)
256 T-HI (M-0, F-1)	NHI (M-1, F-0)
U-HI (M-0, F-1)	NHI (M-1, F-0)
261 T-HI (M-1, F-0)	
262 T-HI (M-3, F-3)	NHI (M-0, F-2)

2. The follwing abbreviations are used :—

H. I.	..	Household Industry
N. H. I.	..	Non-household Industry
T	..	Total
U	..	Urban
M	..	Males
F	..	Females

3. The three digit code number which represents the minor group is follwed by household industry or non-household industry with the respective male and female workers within brackets.

	U-NHI (M-0, F-2)
264 T-HI (M-7, F-3)	U-HI (M-4, F-3)
271 T-HI (M-0, F-3)	U-HI (M-0, F-3)

APPENDIX TO TABLE B-V

Families having less than 1 per cent of the workers of the respective Divisions, (less than 0·5 per cent in case of families of Divisions 7-8), which are omitted in Table B-V have been shown in this Appendix.

2. Abbreviations—The following symbols and abbreviations are used:

III—In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV—At Household Industry

V—In Manufacturing other than Household Industry

VI—In Construction

VII—In Trade and Commerce

VIII—In Transport, Storage and Communications

IX—In Other Services

M—Males F—Females

3. The three digit code number which represent the occupational family is followed by the industrial category in roman figures with their respective number of male and female workers inside the brackets.

005 T-IX (M-9 F-0)	U-IX (M-7, F-0)
010 T-V (M-25, F-0)	U-V (M-25, F-0)

APPENDIX TO TABLE B-VII PART A

This Appendix shows the Major Groups of Household Industry where persons having Secondary work are less than 5 per cent of the persons at the Principal work. The two digit Code numbers stand for the Major Groups of I. S. I. C. The figures in brackets represent the male and female workers under the Major Groups shown before the brackets.

The following abbreviations have been used in this appendix :—

T—Total	M—Male
R—Rural	F—Female
U—Urban	
II—As Cultivator	
III—As Agricultural Labourer	

22 T II (M-1, F-1), III (M-1, F-0),	R II (M-1, F-1), III (M-1, F-0),
24 T II (M-0, F-1),	R II (M-0, F-1)

TABLE-B SERIES

HOUSEHOLD ECONOMIC TABLES

Household Economic Tables are compiled for the first time in 1961 Census. The contents of each Table appearing in this volume are briefly explained below:

2. **Table B-X—Sample Households (*i*) engaged neither in Cultivation nor Household Industry, (*ii*) engaged in Cultivation or Household Industry, but not in both and (*iii*) engaged both in Cultivation and Household Industry for All areas—**

This Table is prepared on a 20 per cent sample of households and for Total, Rural and Urban households. All the households are divided into four categories:

(*i*) Households engaged neither in Cultivation nor in Household Industry
(*ii*) Households engaged in Cultivation only
(*iii*) Households engaged in Household Industry only
(*iv*) Households engaged both in Cultivation and Household Industry

This Table is important as it divides all the households into three main sectors of economic activity. The information is supplied for the district and each police station in the district.

3. **Table B-XI—Sample Households engaged in cultivation classified by Interest in Land and Size of Land Cultivated in Rural and Urban areas separately**—This Table, which is prepared on a 20 per cent sample of households for Rural and Urban areas separately, presents a more detailed examination of the Cultivating Households which have been separated in the previous Table. Households engaged in Cultivation are classified according to the size of land cultivated. The holding sizes in acres are less than 1 acre, 1·0—2·4, 2·5—4·9, 5·0—7·4, 7·5—9·9, 10·0—12·4, 12·5—14·9, 15·0—29·9, 30·0—49·9,and 50+acres. It is further cross-tabulated by interest in land, namely, (*i*) land owned or held from Government, (*ii*) held from private persons or institutions for payment in money, kind or share and (*iii*) partly held from Government and partly from private persons for payment in money, kind or share. This Table gives useful information on the size of the holdings in this district and also in each police station.

4. **Table B-XII—Sample Households engaged in Cultivation only classified by Size of Land Cultivated and number of Family Workers and Hired Workers in Rural and Urban areas separately**—This Table, which is compiled on a 20 per cent sample of households, has made further study of households engaged in Cultivation. Each household having a particular size of holding mentioned in Table B-XI has been corss-tabulated with reference to number of persons working in cultivation. Cultivating households according to number of persons of either sex engaged in cultivation are classified into five groups, namely, 1 person, 2 persons, 3—5 persons, 6—10 persons and more than 10 persons. The hired workers are separated from family workers whose sex-composition is also given. This is an important Table as the size and scale of agricultural enterprise in the Rural and Urban areas of this district and in theRural areas of each police station can be deduced from it.

5. **Table B-XIII—Sample Households engaged both in Cultivation and Household Industry showing Size of Land Cultivated classified by Principal House hold Industry in Rural and Urban areas separately**—This Table which is prepared on a 20 per cent sample of households for Rural and Urban areas, deals with households engaged both in Cultivation and Household Industry. The nature of Household Industry in which cultivating households with a particular size of holding are engaged, are presented in this Table. The nature of the Household Industry is indicated by Divisions and Major Groups of I. S. I. C. This Table throws light on Household Industries which are carried on as ancillary to cultivation. It endeavours to establish correlation between size and scale of Cultivation with that of Household Industry.

6. **Table B-XIV—Sample Households engaged only in Household Industry classified by Principal Household Industry in All areas—**

PART A—Households classified by Major Groups of Principal Household Industry and number of persons engaged,

PART B—Households classified by Minor Group Principal Household Industry—

This Table which relates to households engaged in Household Industry only is prepared on a 20 per cent sample of households. It is presented in two parts. Part A deals with households classified by Major Groups of Principal Household Industry and number of persons engaged. The number of persons engaged in each Industry are grouped under 1, 2, 3—5, 6—10 and more than 10 persons. This information is supplied for Divisions and Major Groups of I. S. I. C. separately for Total, Rural and Urban. Part B deals with households classified by Minor Groups of Household Industry. Number of households engaged in Household Industry under each Minor Group are shown in it for All areas.

7. **Table B-XV—Sample Households engaged both in Cultivation and Household Industry classified by Size of Land in Rural and Urban areas separately**—This Table which is prepared on 20 per cent sample of households shows the households engaged both in Cultivation and Household Industry by size of holdings in Rural as well as Urban areas. An analysis has been made of persons working in these households with refe-, rence to the size of the holdings. In cases where more than 1 person are employed, the number of family workers and hired workers are separated. This Table establishes correlationship between the scale of Household Industries and the sclae of Cultivation.

8. **Table B-XVI—Sample Principal Household Industry classified by period of working and total number of workers engaged in Household Industry in All areas**—This Table which is confined to Principal Household Industry only, is prepared separately for Total, Rural and Urban areas of this district on the basis of 20 per cent sample of households. It gives data in respect of households engaged both in Household Industry and Cultivation or in Household Industry without Cultivation. Household Industries dealt in this Table are shown by Divisions and Major Groups. As many of the Household Industries are seasonal, this Table indicates the number of households engaged in industrial occupations for different periods in the year ranging from 1—3 months, 4—6 months, 7—9 months and 10 months to 1 year.

9. **Table B-XVII—Sample Households classified by (*i*) number of male and female members by size of Households and (*ii*) engaged (*a*) neither in Cultivation nor in Industry, (*b*) in Household Industry only and (*c*) in Cultivation sub-classified by size of land cultivated**—This Table which is compiled on a 20 per cent sample of households gives data for Total, Rural and Urban areas of this district. It is intended to show family sizes distributed according to one member, 2—3 members, 4—6 members, 7—9 members and 10 members and over. This is cross-tabulated by households of Rural areas engaged (*i*) neither in Cultivation nor in Household Industry, (*ii*) in Household Industry only and (*iii*) in Cultivation. Households of Rural areas engaged in Cultivation are further classified according to the sizes of the holdings, i.e., less than 1 acre, 1·0—2·4, 2·5—4·9, 5·0—7·4, 7·5—9·9, 10·0—12·4, 12·5—14·9, 15·0—29·9, 30·0—49·9 and 50+acres. This Table is important as it endeavours to correlate the size of the household with the economic activity of the household, particularly in the Rural areas.

10. The total number of households and its sexwise population of this district is given below :

Total Rural Urban	Total No. of Households	Total Household Population		
		Persons	Males	Females
1	2	3	4	5
Total	153,374	757,526	395,541	361,985
Rural	119,064	621,766	312,254	309,512
Urban	34,310	135,760	83,287	52,473

TABLE B-X—HOUSEHOLDS (*i*) ENGAGED NEITHER IN CULTIVATION NOR HOUSEHOLD INDUSTRY, (*ii*) ENGAGED EITHER IN CULTIVATION OR HOUSEHOLD INDUSTRY BUT NOT IN BOTH AND (*iii*) ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY *FOR ALL AREAS*

APPENDIX TO TABLE B-XIII

Major Groups of Household Industry having less than 10 per cent of the respective Divisions, which are omitted from the main Table, are shown in this Appendix. Major Group code numbers followed by the size of land and the number of households within brackets are shown in run on lines.

The following symbols are used in the Appendix :—

Less than 1 acre	..	A	
1·0—2·4 acres	..	B	
2·5— 4·9	acres	..	C

APPENDIX TO TABLE B-XIV PART A

Major Groups of Household Industry having less than 10 per cent of the figures of their respective Divisions, which are omitted from the main Table, are shown in this Appendix. The Major Groups having the number of Households and number of persons engaged in each Household Industry are shown within brackets and are presented in run on lines.

The following symbols are used in this Appendix :—

1 Person	.. A
2 Persons	.. B
3—5 Persons	.. C
6—10 Persons	.. D
More than 10 Persons	.. E

Total—02 (A-1) ; 21 (A-3, B-1, C-1); 22 (A-2, D-1) ; 24 (A-1, B-2, C-1) ; 27 (A-17, B-7, C-1) ; 31 (A-11, B-10, C-2) ; 33 (C-1) ; 38 (A-4 ; 39 (A-21, B-11, C-1).

Rural—00 (A-1); 21 (A-3, B-1, C-1); 22 (A-2) ; 24 (A-1, B-2, C-1) ; 27 (A-11, B-4); 31 (A-9, B-10, C-1); 38 (A-3) ; 39 (A-21, B-10, C-1).

Urban—22(D-1) ; 27 (A-6, B-3, C-1) ; 31 (A-2, C-1) ; 33 (C-1) ; 38 (A-1) ; 39 (B-1).

(Based on 20 per cent sample)

PARTS B—HOUSEHOLDS CLASSIFIED BY MINOR GROUP OF PRINCIPAL HOUSEHOLD INDUSTRY

Code No. of I. S. I. C.	Household Industry Minor Group (Description)	Number of Households		
		Total	Rural	Urban
1	2	3	4	5
	All Industries ..	**644**	**588**	**56**
0252	Production of lac ..	1	1	..
0310	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries..	20	20	..
0402	Rearing of buffalo for milk and animal power ..	2	2	..
0403	Rearing of cows for milk and animal power ..	20	19	1
0405	Production and rearing of livestock mainly for milk and animal power, n. e. c. ..	1	..	1
2002	Hand pounding of rice by Dhekhi or Ukhal ..	6	6	..
2006	Parching of grains ..	1	1	..
2070	Oil pressing ghani, kolhu or by small machines ..	7	7	..
2092	Making of sweetmeats, laddu, peda, barphi, batasa, etc. ..	12	5	7
2094	Making of chura or chira, muri, murki, khoi ..	52	52	..
2097	Making of other food products for residuary snacks ..	1	..	1
2121	Production of indigenous liquor, such as, liquor, toddy, neera from mahua and palm trees ..	5	5	..
2200	Manufacture of bidi ..	3	2	1
2310	Cotton spinning (by charkha and takali) ..	1	1	..
2350	Cotton cloth weaving in handlooms ..	68	64	4
2442	Making of rope and cordage, out of jute ..	4	4	..
2732	Traditional garments ..	25	15	10
2810	Manufacture of wooden furniture and fixtures ..	8	..	8
2820	Manufacture of structural wooden goods (including treated timber), such as, beams, posts, doors, windows ..	15	15	...
2883	Making of mats, handfans and umbrellas from palm leaves ..	26	25	1
2885	Making of baskets and broomsticks ..	93	93	..
2889	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products , n. e. c. ..	2	..	2
3111	Making of leather boots, shoes or chappals (slippers, sandals) ..	23	20	3
3361	Manufacture of soap and washing soda ..	1	..	1
3401	Making of bricks ..	4	4	..
3440	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone ..	1	1	..
3500	Making of earthenware, such as, pottery, etc. ..	57	49	8
3651	Making of utensils of brass and bell-metal ..	9	9	..
3655	Making of other brass and bell-metal products, n. e. c. ..	1	1	..

APPENDIX TO TABLE B-XVI

Major Groups of Household Industry having less than 10 per cent of the figures of their respective Divisions which are omitted from the main Table are shown in this Appendix. These Major Groups followed by number of households together with the period of working within brackets, are given in run on lines. It is prepared separately for Total, Rural and Urban areas.

The following symbols are used:—

With Cultivation

1 to 3 months	..	A
4 to 6 months	..	B
7 to 9 months	..	C
10 to 12 months	..	D
Months not stated	..	X

Without Cultivation

1 to 3 months	..	E
4 to 6 months	..	F
7 to 9 months	..	G
10 to 12 months	..	H
Months not stated	..	Y

Total—02(F-1); 21(B-1, F-1, H-3, Y-1);22(A-1, D-1, H-3); 24 (D-1, F-1, H-3); 26 (A-2); 27 (A-1, D-13, X-5; G-1, H-19, Y-5); 31 (A-1, E-7, C-2, D-18, X-6, F-1, G-1, H-15, Y-6); 33(D-1, H-1); 38(C-1, F-1, H-3); 39(B-3, D-12, X-5, F-3, H-29, Y-1).

Rural—02(F-1); 21(B-1, F-1, H-3, Y-1); 22(A-1, D-1, H-2); 24(D-1,F-1, H-3); 26(A-2); 27(A-1, D-13, X-5, H-10, Y-5); 31(A-1, B-7, C-2), D-18, X-6, F-1, G-1, H-12, Y-6); 33(D-1); 38(F-1, H-2); 39(B-3, D-11, X-5, F-2, H-29,Y-1).

Urban—22(H-1); 27(G-1, H-9); 31(H-3); 33(H-1); 38(C-1, H-1,); 39(D-1, F-1).

TABLE-C SERIES
SOCIAL AND CULTURAL TABLES

The contents of the Social and Cultural Tables appearing in this volume are briefly explained below:

2. Table C-I—Composition of Sample Households by Relationship to Head of Family classified by size of land cultivated (Based on 20 per cent sample)—This Table shows the family composition of households engaged in different occupations, namely, (*i*) households engaged neither in cultivation nor in household industry, (*ii*) households engaged in household industry and (*iii*) households engaged in cultivation. The last category of households is further split up according to the size of the land cultivated by them. It is presented separately for Total, Rural and Urban.

3. This Table gives the sex composition of the members in a household. Heads of households and their spouses, family members and unrelated persons are shown separately. Heads of households can be males or females. Married relations are separated from unmarried family members and among the former the married sons are shown distinct from other married relations. This Table may be of sociological interest indicating the strength of the joint family system.

4. The Heads of households are shown as less than the total number of households in some areas on account of the fact that some enumerators had apparently not indicated any person as the Head of household in the 'Population Record' where the conventional Head of household was absent from the household at the time of enumeration and had not been enumerated in that household.

5. Table C-II—Age and Marital Status—This Table shows the marital status of all enumerated persons by their age-groups and sex-wise, separately for Total, Rural and Urban. The age-groups conform to international requirements. This is an important demographic Table from which it can be ascertained whether proportions in various marital status conditions have increased or decreased since the last Census and whether any trend is observed in the age of marriage. The data on married females by age-groups can be utilized for forecasting the future births from age specific birth rates.

6. Table C-III—Age, Sex and Education—This Table is presented in three parts:

Part A—Age, Sex and Education in All areas

Part B—Age, Sex and Education in Urban areas only

Part C—Age, Sex and Education in Rural areas only

The information which is supplied for broad educational levels is given for five-yearly age-groups up to 34, one age-group 35—44, another for 45—59 and still another for 60+. The educational levels are different for Urban and Rural areas. They are the same as given in Table B-III Parts A and B. This Table is important as it measures the growth of literacy in the total population as well as in different age-groups since last Census.

7. Table C-V—Mother-tongue (Alphabetical order)—This Table shows the large number of languages and dialects spoken in the district.

8. Table C-VII—Religion—This Table shows the distribution of population according to Religion. It is prepared for Total and Rural areas only.

9. Table C-VIII—Scheduled Castes and Scheduled Tribes:

Part A—Classification by literacy and industrial category of Workers and Non-workers among Scheduled Castes

Part B—Classification by literacy and industrial category of Workers and Non-workers among Scheduled Tribes

This Table which gives separate data for Total, Rural and Urban is presented in two parts. Part A relates to the Scheduled Castes and Part B to the Scheduled Tribes. Both the parts show the distribution of population of Scheduled Castes and Scheduled Tribes respectively by literacy and classification of workers into nine industrial categories and the total number of non-workers. This is a general Table prepared for the first time.

TABLE C-I—COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

(Based on 20 per cent sample)

TABLE-E SERIES

HOUSING AND ESTABLISHMENT TABLES

Table E-I—Census Houses and the uses to which they are put—This Table gives details of Census Houses according to their use. It is based on full count figures and furnishes data in respect of the district as a whole. Figures relating to smaller administrative units, viz., subdivisions and police stations with rural and urban break-up will be available in the Report on Housing and Establishments (Census of India, 1961, Vol. XII—OrissaPart IV-B).

2. Census Houses which did not contain any household during house-listing operation have been shown as vacant in this Table. Occupied Census Houses have been classified into various categories as furnished in the Table, such as, dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings, etc.

3. To facilitate study of the Table, definitions of terms used are furnished below :

Census House—A Census House means a structure or a part of a structure inhabited or vacant or a dwelling, a shop-*cum*-dwelling or a place of business, workshop, school, etc., with a separate main entrance.

Shop and shop-cum-*dwelling*—A shop is a place where articles are sold for cash or for credit.

When a part of the Census House is used as shop and the other part as dwelling it is termed as shop-*cum*-dwelling.

Workshop, factory and workshop-cum-*dwelling*—A Census House is considered to be a factory or a workshop if some kind of production, processing, repair or servicing is undertaken therein or if goods or articles are made and sold. The definition is broad enough to cover all kinds of work premises beginning from a big factory to a petty workshed where activities connected with production, processing, etc., are undertaken, however meagre the scale might be.

When a part of the workshop is used as residence, the Census House is treated as workshop-*cum*-dwelling.

Business Houses—Business Houses are those that are meant for transactions in money or Commercial commodities, e.g., bank, exchange, etc.

4. **Table E-II—Tenure Status of Sample Census Households living in Census Houses used wholly or partly as dwelling**—This Table furnishes details in respect of tenure status of households living in Census Houses used wholly or partly as dwelling. It has been prepared on the basis of 20 per cent sample. It gives figures for the district as a whole. Statistics in respect of smaller units, such as, subdivisions and police stations with rural and urban break-up are given in the Report on Housing and Establishments. The total, rural and urban break-up have been further sub-classified according to the tenure status of Census Households.

The term "Census Household" occurring in this Table means a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

"Shop-*cum*-dwelling" and "Workshop-*cum*-dwelling" have been explained in the fly-leaf to Table E-I.

5. **Table E-III—Census Houses used as Factories and Workshops classified by industry, power and no power used and size of employment**—This Table gives the distribution of workshops and factories in the district with rural and urban break-up by different kinds of fuels used. Factories and workshops are divided into five categories according to the fuel used, viz., factories and workshops run by—

(*i*) Electricity

(*ii*) Liquid fuel

(*iii*) Coal, wood and bagasse

(*iv*) Other power and

(*v*) No power

Factories and workshops classified by different kinds of fuels as above, have further been sub-divided by size of employment, viz., factories employing—

1 Person

2—5 Persons

6— 9 Persons

10—19 Persons

20—49 Persons

50—99 Persons and

100 Persons and above

6. Size of employment has been determined on the basis of average number of persons employed per day in a factory or workshop. The average number of persons working per day has been worked out from the total number of workers including apprentices, either paid or unpaid employed in the factory or workshop including the owner or proprietor and any of his family members (if working) who were employed during the week preceding the date of enumerator's visit.

7. Figures furnished in Col. 1 of this Table relate to broad group of industries coded under the Indian Standard Industrial Classification Scheme. Further break-up of these industries is available in the Report on Housing and Establishments. The system of notation adopted in the scheme of classification of industries has been explained elsewhere in this volume for convenience of reference.

8. **Table E-IV—Distribution of Sample Households living in Census Houses used wholly or partly as dwelling by predominant material of wall and predominant material of roof**—Like Table E-II, this Table has also been prepared on 20 per cent sample. The number of sample households living in Census Houses used wholly or partly as dwelling has been furnished in this Table separately for each type of predominant materials of wall and of roof. The figures shown are for the district as a whole. Statistics in respect of smaller territorial units, such as, subdivisions and police stations will be available in the Report on Housing and Establishments. This Table classifies various types of predominantly used wall materials into nine categories, viz.,

(1) Grass, leaves, reeds or bamboo

(2) Timber

(3) Mud

(4) Unburnt bricks

(5) Burnt bricks

(6) C. I. sheets or other metal sheets

(7) Stone

(8) Cement concrete

(9) Other materials

9. Likewise, the matrials which predominantly compose the roof have been shown under seven different classes, viz.,

(1) Grass, leaves, reeds, thatch, wood or bamboo

(2) Tiles, slate or shingle

(3) Corrugated iron, zinc or other metal sheets

(4) Asbestos cement sheets

(5) Brick and lime

(6) Concrete and stone

(7) Other materials

'Roof' means the outer surface of the roof exposed to weather but not the ceiling. In case of multistoreyed building, the intermediate floors have been treated as the roofs of the corresponding lower floors.

10. **Table E-V—Sample Households classified by number of members and by number of rooms occupied**—This Table, which has been prepared on 20 per cent sample relates to households classified by number of members by males and females separately and by number of rooms occupied. It gives the break-up of the total sampled households, into households either having no regular room or, each having one room, two rooms, three rooms four rooms and five rooms or more. The figures furnished in the Table are in respect of the district as a whole. Statistics in respect of smaller territorial units, such as, subdivisions and police stations have been furnished in the Report on Housing and Establishments.

11. A room is defined as a structure which usually has four walls with one door way at least and with roof overhead and is wide and long enough for a person to sleep in, i.e., it should be at least 6 ft. long. Unenclosed verandah, kitchen, store, garage, cattleshed and latrine are not treated as rooms.

TABLE-SCT SERIES

TABLES ON SCHEDULED CASTES AND SCHEDULED TRIBES

Special Tables have been devised during the Census of 1961 to give the population figures for each Scheduled Caste and Scheduled Tribe by their religion, age, marital status, education, etc. The contents of each Table appearing in this volume are briefly described below.

2. Table SCT-I—Industrial Classification of Persons at work and of Non-workers by sex—This Table is presented in two parts:

Part A—Industrial Classification of Persons at work and of Non-workers by sex for Scheduled Castes only

Part B—Industrial Classification of Persons a work and of Non-workers by sex for Scheduled Tribes only

This Table gives the population of each Scheduled Caste and Scheduled Tribe separately for Rural and Urban. It also shows in which section of industry, members of each Scheduled Caste and Scheduled Tribe are working. Information regarding each caste and tribe which are often required for drawing up various welfare schemes are given in this Table.

3. The total population of the Scheduled Castes and Scheduled Tribes in the district, each subdivision and police station are given in the statement below.

District/Subdivision/Police Station		Scheduled Castes			Scheduled Tribes

4. Table SCT-II—Age and Marital Status—This Table is presented in two parts ;

Part A—Age and Marital Status for Scheduled Castes

Part B—Age and Marital Status for Scheduled Tribes

This Table which corresponds to Table C-II supplies information regarding the marital status of the individual Scheduled Caste and Scheduled Tribe in the broad age-groups of 0—14, 15—44, 45+ and Age not stated.

5. Table SCT-III Part A—(*i*) Education in Urban areas only for Scheduled Castes, (*ii*) Education in Urban Areas only for Scheduled Tribes ; Part B—(*i*) Education in Rural areas only for Scheduled Castes, (*ii*) Education in Rural Areas only for Scheduled Tribes—The literacy and educational levels for each Scheduled Caste and Scheduled Tribe are shown in this Table. The different educational levels for Urban areas and Rural areas are given below:

Urban areas	Rural areas
Illiterate	*Illiterate*
Literate (without educational level)	Literate (without educational level)
Primary or Junior Basic	Primary or Junior Basic
Matriculation or Higher Secondary	Matriculation and above
Technical diploma not equal to degree	
University degree or Post-graduate degree other than technical degree	
Technical degree or diploma equal to degree or Post-graduate degree	

6. Table SCT-IV—Religion—This Table is given in two parts : Part A relates to the Scheduled Castes and Part B to the Scheduled Tribes. Scheduled Castes may belong to either Hindu or Sikh religion only. None of the members of Scheduled Castes in this State have returned themselves as Sikh. As all the Scheduled Castes are Hindus and as their population is already available in SCT-I Part A, the corresponding portion of this Table is omitted.

7. Part B shows the Scheduled Tribes who may belong to any Religion. The religions returned in this State are Christian, Hindu and Sarna.

8. Table SCT-V Part A—Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only for members of Scheduled Castes (Based on 20 per cent sample) and Part B—Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only for members of Scheduled Tribes (Based on 20 per cent sample)—This Table which corresponds to Household Economic Table B-XI gives useful information regarding the size of holding of Scheduled Castes and Scheduled Tribes separately for Rural areas only. The interest in land is classified into three categories mentioned below:

(*i*) *Owned or held from Government*

(ii) Held from private persons or institutions for payment in money, kind or share

(iii) Partly held from Government and partly from private persons for payment in money, kind or share

Each of the above categories is cross-tabulated according to the size of the land cultivated by each household.

9. Table SC-I—Persons not at work classified by Sex, Type of Activity and Educational Levels for Scheduled Castes—This is a special Table prepared for total Scheduled Castes and not for individual caste. Three categories of non-working population, namely, full-time students, persons seeking employment for the first time and persons employed before but now out of employment and seeking work are shown in this Table along with the total non-workers in this district. It gives useful information regarding students and unemployed persons among the Scheduled Castes.

The above categories of non-workers are further classified according to their broad educatinoal levels indicated below:

Illiterate

Literate (without educational level)

Primary or Junior Basic

Matriculation or Higher Secondary

Above Matriculation or Higher Secondary

10. **Table ST-I—Mother-tongue and Bilingualism for Scheduled Tribes**—This is one of the Special Tables meant for Scheduled Tribes only This table displays the peculiar languages and dialects of the tribal population. The dialect of each of the tribes is given. Those members of the tribes who have moved out of their homes and speak some other language in addition to the mother-tongue as a result of their contact with local population are also shown in this Table. This Table is very useful for the linguistic study of tribal population. It also helps to find out as to how many of the tribes have forgotten their original language after coming in contact with the local language or the language of the majority. Secondary languages having speakers less than 0·1 per cent of the population are omitted.

11. **Table ST-II—Persons not at work classified by Sex and Type of Activity for Scheduled Tribes**—This is the second Special Table for the Scheduled Tribes corresponding to SC-I for the Scheduled Castes. It differs from the latter Table in as much as it gives the data for each Scheduled Tribe but does not show the broad educational levels. Besides the total non-working population of each tribe, three categories of non-workers, namely, full-time students, persons seeking employment for the first time and employed before but now out of employment and seeking work are presented in it for this district.

LIST OF INDUSTRIES IN THE DISTRICT OF SUNDARGARH

The Table furnished hereafter gives a list of industries conducted in the Urban and Rural areas of district Sundargarh. The list has been prepared in the following manner:

Various industries existing in a particular village were enlisted at first. The villages were then arranged in the order in which they appear in the Village Directory. In this manner the list of villages within one particular police station was completed. This was followed by similar lists of other police stations, one after the other.

Indication of the existence of a particular industry is given against the village concerned, not by mentioning the descriptive name of the industry, but by recording the code number of the industry, as prescribed under the Indian Standard Industrial Classification Scheme. This code number is followed by another figure enclosed in brackets which represents the total number of establishments relating to that particular industry existing within the village concerned.

In presenting the consolidated list of a police station, first of all the aggregate list of industries for the police station as a unit has been given. This aggregate list is then broken up into a consolidated list for rural areas and a similar list for urban areas, if the police station has got both rural and urban areas. Similar procedure has been adopted in presenting the consolidated list for the district. Lastly comes the individual village list, indicating all such villages as may have one or more industries. Names of villages which have no industry of any approved type, have been omitted from the list.

The industrial code numbers have been exhibited against a village (or police station or district as the case may be) in ascending order. For example Division "0" of the I. S. I. C. Scheme appears first, followed by Division "2 & 3".

A list of code numbers showing against each, the name of the industry to which it relates is furnished in the note to Table-B Series (General Eco-nomic Tables) for convenience of reference.

AGGREGATE LIST FOR DISTRICT

TABLE ON FAIRS AND FESTIVALS IN THE DISTRICT OF SUNDARGARH

This Table gives a list of villages where important fairs or festivals of the district are held. The names of the villages have been arranged police stationwise according to their serial numbers in the Primary Census Abstract. The list includes only those fairs which attract a large number of people of the village or outside.

Column 1 of the Table gives the name of the village together with its serial number. The name of the fair or festival held in the village is furnished in Column 2, while Columns 3 and 4 respectively furnish the name of the month in which such fair is held and the approximate number of persons attending the fair.

The list is prepared on the basis of information furnished by the primary school teachers of the locality concerned to whom a list of questionnaire was circulated by post with request to furnish the replies. The number of people gathering at the fair is based on eye estimation and may, therefore, be treated as approximate. Name of the month in Column 3 is in terms of English calendar month which does not exactly coincide with the Oriya month. The name of the English month, when the festival usually falls, has therefore, been furnished in this column.

Besides the above information, a few more details were collected through the agency of the primary school teachers. Such details will be available in another volume where the Fairs and Festivals of Orissa are proposed to be published in an elaborate manner.

PART III

OFFICIAL STATISTICS

Contains

Statistics relating to Rainfall, Agriculture, Public Health, Vital Events, Administration, Police, Jails, Co-operative Societies, Revenues, Community Development, Grama Panchayat, Education, Animal Husbandry, Mines, etc.

OFFICIAL STATISTICS

This part contains statistics relating to different Departments of the State Government, such as, agriculture, public health and vital statistics, administration including police and jails, co-operative societies, revenues from different sources, educational institutions, community development grama panchayats, mines and minerals, etc., which are embodied in 40 Tables. The statistics were collected from different offices, mostly by deputing staff from this organization. Except only in a few cases where it was possible to take out the figures from published reports of the Departments concerned, most of these had to be gathered from the various offiical registers and manuscript reports. The names of the Departments from which the statistics were obtained are indicated below the Tables. The Tables pertaining to different subjects given in this part may be broadly classified as follows:

Subjects	Table Nos.
1. Rainfall ..	1— 2
2. Agriculture ..	3— 9
3. Public health including vital statistics ..	10—14
4. District administration ..	15—19
5. Education ..	20—28
6. Community Development ..	29—31
7. Grama panchayats and Panchayat Samitis	32—33
8. Animal Husbandry ..	34
9. Co-operation ..	
10. Miscellaneous ..	36—40

The district of Sundargarh, comprising the territories of the ex-states of Gangpur and Bonai, came into being with effect from 1st November, 1949 after the merger of the two states with the State of Orissa in 1948. Statistical records for the pre-merger period of these two ex-states are not available. Hence the collection and production of various official statistics in this part are limited to the previous decade only. The various Tables presented are briefly explained as follows: -

Tables 1-2—Rainfall—Two Tables concerning rainfall are presented. Tables 1 (a) and 1(b) give the monthly rainfall and number of rainy days for only 2 rain recording stations in the district for different years of the decade, 1951-60. The district has 16 rain recording stations out of which only two stations, namely, Talsara and Bonai were found to be having relatively a more complete record than the others. These are reproduced in two separate statements, one for each station. The records of Talasara may represent the position for Sadar Subdivision and those of Bonai, for Bonai Subdivision. The records for Bonai may also be taken to roughly represent the conditions prevailing in Panposh Subdivision, the third subdivision of the district. The figures reproduced in this Table (Table 1) have been taken from the rainfall statistics maintained by the Director of Agriculture and Food Production, Orissa some of which were published in the Orissa Gazette.

Table 2—It gives the normals of monthly rainfall and rainy days based on the records of the aforesaid 2 rain recording stations of the district during the period from 1901 to 1950. These have been taken from the Memoirs of the Indian Meteorological Department, Volume XXXI-Part III. This Table also shows the annua rainfall and number of rainy days for the district for each of the years during the past decade based on the records maintained by the Director of Agriculture and Food Production, Orissa.

The rain recording stations work under the responsibility of local officials of various departments who might be conveniently available at the same station , namely, Thana Officers, Medical Officers, School Teachers, or subordinate Revenue Officers. They are expected to record daily rainfall, if any, and submit monthly reports direct to the Director of Agriculture and Food production, Orissa. According to the approved arrangements, this report should reach the Directorate of Agriculture and Food production Orissa by the 21st of the month following the one to which it relates, but in actual practice many stations default or delay inordinately in despatching the report. Such default or delay results either due to the post of the Officer-in-charge of

the station lying vacant for a considerable length of time, or due to the rain-recording instruments remaining unattended to or unreplaced after damage or loss in some way. For these reasons, the rainfall records of most of the stations in this district were not maintained regularly or properly.

Tables 3-9—Agriculture—In the undermentioned seven Tables, agricultural statistics relating to the district are given.

Table Nos.	Particulars
3 ..	Land utilization and area under crops
4 ..	Classification of area by sources of irrigation
5 ..	List of minor irrigation projects with ayacut area of 100 acres or more
6 ..	Estimated yield rates of principal crops
7 ..	Average wholesale price quotations in respect of staple foodgrains and other important crops
8 ..	Statistics of wages and working hours
9 ..	Agricultural implements and machineries

The compilation of primary agricultural statistics of a district is done by the Collector of the district. He furnishes annual statements in prescribed proforma called the Season and Crop Reports to the Director of Agriculture and Food Production, Orissa who is responsible for compilation and presentation of these statistics at the State level. It was noticed that submission of these annual returns during the past decade was delayed or neglected by the Collectors. Further, most of the returns sent lacked accuracy. An attempt was made to collect these statistics through a second channel, i. e., the Community Development Blocks. By the end of 1959-60, however, only 57·8 per cent of area of the State was covered by the Blocks and so complete data for any district through this channel was not available.

Out of the above 7 Tables, Tables 3 and 4 contain agricultural statistics, taken from the Season and Crop Reports for the concerned years. None of these reports except the one for 1952-53 was published by the time this Handbook went to press. The reports for 1950-51 and 1951-52 could not be traced and hence the Tables 3 and 4 contain statistics for only 8 years from 1952-53 to 1959-60.

Table 3—Area under the nine categories of land utilization, namely, forests, land put to non-agricultural uses, barren and unculturable land, pastures and grazing land, land under miscellaneous tree crops and groves not included in net area sown, culturable wastes, fallow other than current and net area sown are given in Table 3. This Table also gives the area under some of the important crops, and the total area given to cultivation of food crops, cereals, pulses, non-food crops, etc. The classification of land adopted in this Table is as follows:

(1) *Forests*—These include all the actually forested areas on the land classed or administered as forests under any legal enactment dealing with forests, whether State-owned or private.

(2) *Land put to non-agricultural uses*—These include all land occupied by buildings, roads and railways or under water, e. g., rivers and canals and land put to uses other than agricultural.

(3) *Barren and unculturable land*—All barren and unculturable land like mountains, etc., are shown under this head. The land which cannot be brought under cultivation except at an exorbitant cost are classed as unculturable, whether such land are in compact blocks or within cultivated holdings.

(4) *Culturable wastes*—These include land available for cultivation, whether or not taken up for cultivation or abandoned after a few years for one reason or another. Such land may be either fallow or covered with scrubs and jungles which are not put to any use. They may be assessed or unassessed to rent, and may lie in isolated blocks or within cultivated holdings. Land once cultivated, but not cultivated for 5 years in succession, are also included in this category.

(5) *Fallow other than current*—All land which were taken up for cultivation but are temporarily out of cultivation for a period not less than one year and not more than 5 years are included

under this heading. These lands may have been kept fallow for one or more reasons, namely, poverty of the cultivators, inadequate supply of water, malarial climate, silting of canals and rivers and unremunerative nature of farming.

(6) *Pasture and grazing land*—These include all grazing land whether they are permanent pastures and meadows or not. Village commons and grazing lands within forest areas are also included under this head.

(7) *Miscellaneous tree crops and groves not included in net area sown*—These include all cultivable land which are not included in "net area sown" but are put to some agricultural use.

(8) *Net area sown*—These represent net area sown with crops and orchards, the area sown more than once during a year being counted once only.

(9) *Current fallows*—These represent cropped area which are kept fallow during the current year. For example, if any plot having grown seedlings is not cropped again in the same year it may be treated as current fallow.

(10) *Total cropped area*—These represent the total area covered with crops, i. e., the sum of areas covered with all individual crops, areas sown with crops more than once during the year being counted as separate areas for each crop.

(11) *Area sown more than once*—These represent the area on which crops are grown more than once during the agricultural year. The acreage is generally obtained by deducting those under "net area sown" from those under "total cropped area".

Table 4—This Table shows the areas benefiting from different sources of irrigation, namey, canal, tanks, wells and other sources for the 8 years from 1952-53 to 1959-60.

Table 5—A list of minor irrigation projects with ayacut area of 100 acres or more and their irrigation potentiality are given in this Table. There are many more smaller projects in the district, but only the bigger ones are included in the list. The list was obtained from the Rural Engineering Organization which is responsible for execution of various minor irrigation works all over the State. Besides executing their own projects, the Rural Engineering Organization is meant to help the Panchayati Raj institutions in the execution of minor irrigation projects costing not more than Rs. 10 lakhs or having ayacut up to 4,000 acres.

Table 6—This Table gives the estimated rates of yield of 16 principal crops per acre of land in the district for each year from 1951-52 to 1959-60. The rates are based on estimated area and production of different crops. The basic data were obtained from the Directorate of Agriculture and Food Production, Orissa, on which the estimated yield rates have been worked out. The estimated yield rates may not be equal to the actual yield rates.

Table 7—It relates to wholesale price quotations in respect of some of the important crops grown in the district and has been compiled from the published reports of the Directorate of Marketing, Orissa. Rates per standard maund or 37·25 Kgs are given in this Table. The information given are for Sundargarh and Rajgangpur centres both of which are located in Sadar Subdivision. Annual price quotation for the period from 1957 to 1959 and both annual and monthly price quotations for the year 1960 have been reproduced in this Table. Figures for earlier years are not available and those for the years subsequent to 1960 were not published by the time this Handbook went to the press.

Table 8—It shows the average rates of wages and hours of employment of certain categories of skilled and unskilled workers during the period from 1957 to 1960. The terms "agricultural labourer" and "subsidiary agricultural labourer" used in this Table are explained at the bottom of the Table.

Table 9—Number of agricultural machineries and implements recorded in 1957 and 1961 Livestock Censuses are given in this Table. These were collected from the Livestock Census Reports of the Director of Animal Husbandry and Veterinary Services, Orissa. After formation of the separate Province of Orissa in 1936 Livestock Censuses were conducted on three occasions during 1945, 1957 and 1961. At the time of 1945 Livestock Census, the district had not been formed and the area, being administered by princely rulers then, did not come under the purview of that Census. Hence the statistics recorded in the Censuses of 1957 and 1961 alone are given in this Table.

Tables 10-14—Public health and vital statistics—The following five Tables on this subject are given:

Table Nos.	Particulars
10	.. Number of live births, still births and deaths in each year during 1952—60 according to sex, for rural and urban areas
11	.. Deaths according to causes, for rural and urban areas in each year during 1952—60
12	.. Deaths by sex, and accordign to age during 1952—60
13	.. Number of births and deat in each month during 1952—60
14	.. List of hospitals, dispensaries and primary health centres

Tables 10-13—The birth anddeath statistics given in these Tables were collected from the registers maintained in the Statistical Unit of the Health Directorate, Orissa. The registiation system for recording births and deaths was extended to this district with effect from January 1952 and hence the records from 1952 onwards have been maintained. The first three Tables, *viz.*, Table Nos. 10, 11 and 12 present only annual figures, whereas the fourth Table (Table 13) contains monthly records. Table 10 gives the number of live and still births and deaths by sex separately for Rural and Urban areas. Deaths under the seven broad heads under which they are classified in vital statistics records, namely cholera, smallpox, fever, dysentery and diarrhoea, respiratory diseases, wounds and accidents and other causes are shown in Table 11 for Rural and Urban areas. Deaths of males and females in different age-groups are shown in Table 12. Live and still births and deaths due to the seven causes noted above in each month during 1952-60 are given in Table 13.

The terms "Live Birth" and "Still Birth" used in these Tables are defined as follows:

Live birth—Live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life,such as beating of heart, etc.

Still birth—Birth of the already dead or very nearly dead child is considered still birth.

Table 14—A list of hospitals, dispensaries and primary health centres as on 31-3-1961 showing their location, years of start and the number of beds in them is given in Table 14. These details were supplied by the Health Directorate, Orissa.

Tables 15-19—District administration—Five Tables have been given with statistics on this subject. They are as follows:

Table Nos.	Particulars
15	.. Number of criminal cases reported to different courts, tried and disposed of during 1951-60
16	.. Strength of district police during the years 1951, 1956 and 1960
17	.. Statistics of jails
18	.. Receipts relating to land revenue and excise revenue, sales tax, entertainment tax and stamps during 1951-61
19	.. Number of documents registered and value of property transferred during 1951—60

The statistics in Table 15 have been partly collected from the published annual reports on *criminal justice of the High Court, Orissa* and partly from the statement supplied by them in absence of any printed annual reports for the concerned years.

The Inspector-General of Police, Orissa supplied the strength of police in various ranks in the district for each year during 1951—60. The Table 16, however, shows their number only for 3 years, *viz.*, 1951, 1956 and 1960. Per-capita expenditure on police, and area and persons served by a policeman shown in this Table are worked out on the basis of 1961 Census population.

The statistics pertaining to jails supplied by the Inspector-General of Prisons, Orissa are given in Table 17, which shows the number of jails and sub-jails, the capacity of the district jail and its strength of staff.

Table 18 contains the amounts of revenue collected in each year in the district during the past decade under some of the important heads of receipts, namely, land revenue, excise revenue, sales tax, entertainment tax and stamps. These statistics were obtained from various Departments of the State Government. The names of the Departments and offices who supplied the figures are shown at the bottom of this Table.

Table 19 shows the number of documents registered and value of property transferred between 1951 to 1960. These were collected from the office of the Board of Revenue, Orissa.

Tables 20-28—Education—Nine Tables are given as following :

Table Nos.	Particulars
20	.. List of Colleges and High Schools
21	.. Number of students appearing at and passing the High School Certificate Examinations during 1956—60
22	.. Number of Primary Schools existing during 1955-56 and 1960-61
23	.. Number of Middle English Schools existing during 1955-56 and 1960-61
24	.. List of Professional and Special Schools
25	.. List of Sevashrams and Ashram Schools
26	.. List of Basic Schools
27	.. List of newspapers and journals
28	.. List of important libraries and reading rooms

The statistics given in these Tables were collected mostly from the office of the Board of Secondary Education, Orissa and the Statistical Unit in the office of the Director of Public Instruction, Orissa. Except a published list of high schools and Annual Report of Registrar of Newspapers for India from which lists of high schools, newspapers and journals were taken, the statistics for none of the other items were available from any published report. The information given had, therefore, to be collected from the concerned offices.

Table 20 gives a list of colleges and high schools in the district. The number of students appearing at the High School Certificate Examinations together with the number of successful students and the percentage of success at various examinations conducted during 1956—60 are given in Table 21. Table 22 shows the number of primary schools existing in the district during 1955-56 and 1960-61, the last years of the first and second Five-Year Plans. Similar information concerning middle schools is given in Table 23. A list of professional and special schools, *viz.*, Elementary Training schools, Industrial schools, Basic Training schools, and Gramasevak Talim Kendra will be found in Table 24. Table 25 gives a list of Sevashrams and Ashram schools together with the names of the police stations under whose jurisdiction they lie. Table 26 contains a list of Basic schools.

Tables 27 and 28 give lists of newspapers and journals, and libraries and reading rooms respectively. Table 27 contains a complete lists of newspapers and journals issuing from the district. But only the bigger libraries and reading rooms of the district in the approved list of the Education Department are shown in the Table 28. The location, dates of establishment and the number of books held by each of these libraries, besides the annual Government grant received by them are given in this Table.

Tables 29-31—Community Development—The following 3 Tables present the achievements of the Community Development Blocks during the past decade:

Table Nos.	Particulars
29 ..	List of Blocks with their areas and coverage of villages, Grama Panchayats
30 ..	Achievements in the Community Development Blocks to the end of 1960-61
31 ..	Expenditure incurred under broad heads of development in the Community Development Blocks in each year during 1954—61

The first allotment to this district was Sundargarh Block inaugurated in October, 1953. The statistics given in the above 3 Tables, therefore, relate to the period from 1953-54 onwards. The expenditure figures have been compiled from the registers maintained in the office of the Financial Adviser, Community Development and Panchayati Raj Department and the statistics relating to physical achievements are taken from the reports of the Administrative Intelligence Unit of the same Department. Table 29 gives a list of Community Development Blocks in existence on the 31st March 1961, together with their dates of start, the location of their headquarters, number of villages, Grama Panchayats and area covered by each. Table 30 shows physical achievements under some of the important items of the Block programme to the end of 1960-61. The achievements against a few of these items do not relate to all the Blocks as complete information in respect of all of them was not available and tabulated in the Department. Such items have been distinguished from the rest.

Details of expenditure under broad heads of the programme, such as, Block headquarters staff and contingencies, animal husbandry and agricultural extension, irrigation, health and rural sanitation, education, social education, communication, rural arts, crafts and industries and housing for all the blocks together for each year between 1952-53 and 1960-61 are given in Table 31. The Blocks submit their monthly expenditure returns to the Financial Adviser's section of the Community Development Department where these are compiled and verified with the Accountant Generals' actuals before adoption of final figures. The statistics given in this Table have been taken from the expenditure registers thus maintained in the Financial Adviser's office.

Tables 32-33—Grama Panchayats and Panchayat Samitis—Table 32 giving a list of Panchayat Samitis and Grama Panchayats existing in December, 1960 and Table 33 which shows the number of Grama Panchayats with their income and expenditure and number of Adalti Panchayats during the past decade are the only two Tables given on this subject. The information given in Table 32 were collected from a published notification of the State Government and the statistics in Table 33 have been taken from their Annual reports.

Table 34—Animal Husbandry—Table 34 gives the number of different categories of main livestock recorded in the two Livestock Censuses of 1957 and 1961. The numbers for 1961 counts show the livestock belonging to Government, Semi-Government and other institutions aetually found living on 15th April 1961 at sunrise. The Census was conducted by the Director of Animal Husbandry and Veterinary Services, Orissa.

Table 35—Co-operation—The number of co-operative societies in different categories, namely, Central Bank, small-sized, large-sized, multi-purpose, grain golla, marketing, non-agricultural credit, housing, weavers and other industrial co-operative societies together with their membership and working capital between 1957-58 and 1961-62 are given in Table 35. These statistics were supplied by the office of the Registerar of Co-operative Societies, Orissa.

Tables 36-40—Miscellaneous—These Tables contain statistics on the following items:

Table Nos.	Particulars
36 ..	List of cinemas and printing presses
37 ..	List of railway stations
38 ..	List of mines with their locations, dates of start and production during 1957—61
39 ..	List of Industries with capital investment of Rs. 5 lakhs, and above
40 ..	List of registered factories in 1951 and 1961

The headings of Tables 36 to 39 are self-explanatory. Table 40 contains a list of the more important registered factories in the district. This has been compiled from the lists obtained from Chief Inspector of Factories, Orissa. The terms 'factory' and 'worker' used in this Table are defined as follows:

Factory means any premises including the precints thereof

(*i*) Whereon ten or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on, or

(*ii*) whereon twenty or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on, but does not include a mine, subject to the operation of the Mines Act 1952(ActXXXV of 1952), or a railway running shed.

Section 85 of the said Act, however, authorises the State Government to declare by notification any place wherein a manufacturing process is carried on, to be a factory within the meaning of the Factories Act, 1948 although it does not fulfil the above requirement of law provided that the manufacturing process is not being carried on by the owner only with the aid of his family.

Worker is defined to mean a person employed, directly or through any agency, whether for wages or not,in any manufacturing process,or in cleaning any part of the machinery or premises used for a manufacturing process or any other kind of work incidental to, or connected with the manufacturing process, or the subject of the manufacturing process.

Table 30—Achievements in the Community Development Blocks to the end of 1960-61

Number of Blocks in existence—10

Total area covered by Blocks—2,475 Sq. Miles

Activities	Units	Achievements to the end of 1960-61
1	2	3
I. Agriculture including irrigation		
1 Total cultivable area	.. Acres ..	512,816
2 Total area under paddy cultivation during 1960-61	.. Acres ..	403,227
3 Area covered by Japanese method during 1960-61	.. Acres ..	3,524
4 Total area fit for Rabi cultivation	.. Acres ..	315,769
5 Area brought under Rabi cultivation in 1960-61	.. Acres ..	24,132
6 Area benefited by soil conservation measures	.. Acres ..	287
7 Minor Irrigation Projects taken up or completed	.. Numbers ..	53
8 Net Additional area brought under irrigation	.. Acres † ..	15,499
9 Improved paddy seeds distributed during 1960-61	.. Maunds ..	1,410
10 Chemical fertilizers distributed during 1960-61	.. Maunds* ..	4,856
11 Improved implements distributed	.. Numbers* ..	1,502
II. Animal Husbandry		
1 Veterinary Dispensaries and Hospitals	.. Numbers* ..	7
2 Stockman Centres	.. Numbers* ..	21
3 Artificial Insemination Centres		
(*a*) Main centres	.. Numbers* ..	..
(*b*) Sub-centres	.. Numbers* ..	..

Activities	Units	Achievements to the end of 1960-61
1	2	3
III. Fisheries		
1 Tanks brought under pisciculture by Panchayats	.. Numbers ..	192
IV. Co-operation		
1 All types of Societies	.. Numbers ..	233
2 Membership in Co-operative Societies	.. Numbers ..	34,814
V. Health and Rural Sanitation		
1. Rural latrines constructed	.. Numbers* ..	708
2 Drains constructed	.. Yards* ..	462,752
3 Soakage Pits constructed	.. Numbers* ..	2,484
4 Primary Health Centres	... Numbers ..	8
5 Rural Dispensaries	.. Numbers ..	15
6 Maternity and Child Welfare Centres	.. Numbers* ..	6
7 Family Planning Centres	.. Numbers* ..	1
8 Cases treated during 1960-61		
(*a*) In Primary Health Centres	.. Numbers* ..	19,842
(*b*) In Rural Dispensaries	.. Numbers* ..	24,606
(*c*) In Maternity and Child Welfare Centres	.. Numbers* ..	1,018
(*d*) In Family Planning Centres	.. Numbers* ..	NA
9 Drinking water wells constructed and renovated	.. Numbers* ..	1,408
10 Somkeless *Chullas* installed	.. Numbers* ..	92
VI. Education		
1 Total number of Schools	.. Numbers ..	683
VII. Social Education		
1 Mahila Samitis	.. Numbers ..	92
2 Membership of Mahila Samitis	.. Numbers ..	1,677
3 Literacy adult centres started	.. Numbers ..	533
4 Adults made literate	.. Numbers ..	13,025
5 Village leaders trained	.. Numbers ..	8,404
6 Reading rooms and libraries functioning	.. Numbers* ..	79
7 Youth Clubs	.. Numbers* ..	183
8 Farmers Unions	.. Numbers* ..	62
VIII. Communications		
1 Mileage of roads executed	.. Miles ..	435
2 Bridges and culverts constructed	.. Numbers ..	292

VILLAGE DIRECTORY

VILLAGE DIRECTORY

The Village Directory which gives the Primary Census data in respect of each inhabited village according to the Census of 1961, shows the area in acres, number of occupied residential houses and households, total number of persons enumerated including inmates of institutions and houseless persons, population of Scheduled Castes and of Scheduled Tribes, number of literate and educated persons and the total number of workers and non-workers. In addition to these Census data, information regarding some amenities available in each village like educational institutions, medical facilities, Postal and Telegraphic facilities, protected drinking water supply, rural electrification and road communications are indicated in abbreviations after the name of each village. This information was obtained from different Departments of the State Government and the Director of Posts and Telegraphs, Orissa Circle.

2. The inhabited villages in each police station are serially arranged and numbered. The names of uninhabited villages are also listed separately with serial number and shown at the end of each police station.

3. Relevant extract from the Primary Census Abstract showing the summary figures for the district is given at the commencement of the Table. The summary figures for each subdivision are also furnished at the beginning of each subdivision and similar figures for each police station precede the village directory of the respective police station.

4. **Area**—The area figures supplied by the local revenue authorities are adopted in column 3. They are shown in acres for each inhabited village. For other units like town, police station, subdivision, and the district, they are shown in square miles.

5. **Definitions**—Terms appearing in the column headings are defined as follows :

(*i*) *House*—A house means a 'Census House', that is to say, a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., with a separate main entrance.

(*ii*) *Occupied Residential House*—An occupied residential house is a Census House which is partly or wholly used for purpose of residence at the time of Census enumeration.

(*iii*) *Household*—A household means the entire group of persons who commonly live together and take their meals from a common mess unless the exigencies of work prevented any of them from doing so.

(*iv*) *Scheduled Castes and Scheduled Tribes*—A person is said to belong to a Scheduled Caste if he belongs to any one of the castes specified in the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1956. A person is said to belong to a Scheduled Tribe, if he belongs to any one of the tribes specified in the Scheduled Castes and Scheduled Tribes Order (Amendment) Act, 1956.

(*v*) *Literate and Educated Persons*—A person is said to be literate if he can read and write a simple letter. An educated person is one who has passed a written examination of a recognised educational standard.

(*vi*) *Worker*—A worker is one who is engaged in economic activity of the following nine categories. "Work" includes not only actual work but also effective supervision and direction of work. The nine categories of economic activities mentioned above comprise persons who are engaged—(I) as Cultivator, (II) as Agricultural Labourer, (III) in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities, (IV) at Household Industry, (V) in Manufacturing other than Household Industry, (VI) in Construction, (VII) in Trade and Commerce (VIII) in Transport, Storage and Communications and (IX) in Other Services.

I. Cultivator—A cultivator is a person who is engaged either as employer, single worker or family worker in (*a*) cultivation of land, or supervision or direction of cultivation of land owned by himself or by a member of his household or held from Government ; (*b*) cultivation of land or supervision or direction of cultivation of

land held from private persons or institutions for payment in money, kind or share.

II. Agricultural Labourer—An agricultural labourer is a person who works in another person's land in lieu of wages in cash, kind or share without exercising any right of supervision or direction in matters connected with cultivation.

III. In Mining, Quarrying, Livestock, Forestry Fishing, Hunting and Plantations, Orchards and Allied activities—This category is not defined as it is selfexplanatory.

IV. Household Industry—A household industry is an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in Rural areas and only at home in Urban areas The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in Rural areas. In the Urban areas the industry should be confined to the house. It should relate to production, processing, servicing, repairing and making and selling of goods. It does not include professions, such as, pleader or doctor or barber or washerman or astrologer.

V. Manufacturing other than Household industry,
VI. In Construction,
VII. In Trade and Commerce,
VIII. In Transport, Storage and Communications and
IX. In Other Services.

These categories of workers are not defined separately as they are self-explanatory.

(*vii*) *Non-worker*—A person is said to be not working if he or she does not come under any of the categories of "Worker" mentioned above. A person who has been offered work but has not actually joined it is treated as a non-worker. The activities of non-workers have been classified into the following eight categories :

(*a*) a full-time student or child attending school who does no other work,

(*b*) a person engaged in unpaid house duties (like housewife or other adult female) who does no other work nor help regularly even part-time in family cultivation, industry, trade or profession,

(*c*) a dependent, including an infant or child not attending school or a person permanently disabled from work because of old age or illness

(*d*) a retired person, a rentier, a person living on agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work,

(*e*) a beggar, a vagrant, or an independent woman without indication of source of income or a person of unspecified source of existence,

(*f*) a convict in jail or an inmate of a penal mental or charitable institution,

(*g*) a person who has not been employed before but is seeking employment for the first time, and

(*h*) a person employed before but now out of employment and seeking employment.

6. **Abbreviations**—The following abbreviations have been used in the Table :

I. *Educational Institutions*—

P for Primary Schools
M for Middle Schools
H for High Schools
C for Higher Institutions including Colleges
T for Technical Institutions

II. *Medical and Public Health facilities*—

D for Dispensaries
RHC for Rural Health Centres
HOS for Hospitals
MP for Medical Practitioners
MCW for Maternity and Child Welfare Centres

III. *Drinking Water facilities*—

S for Safe or protected water supply including pipes, tube-wells, etc.

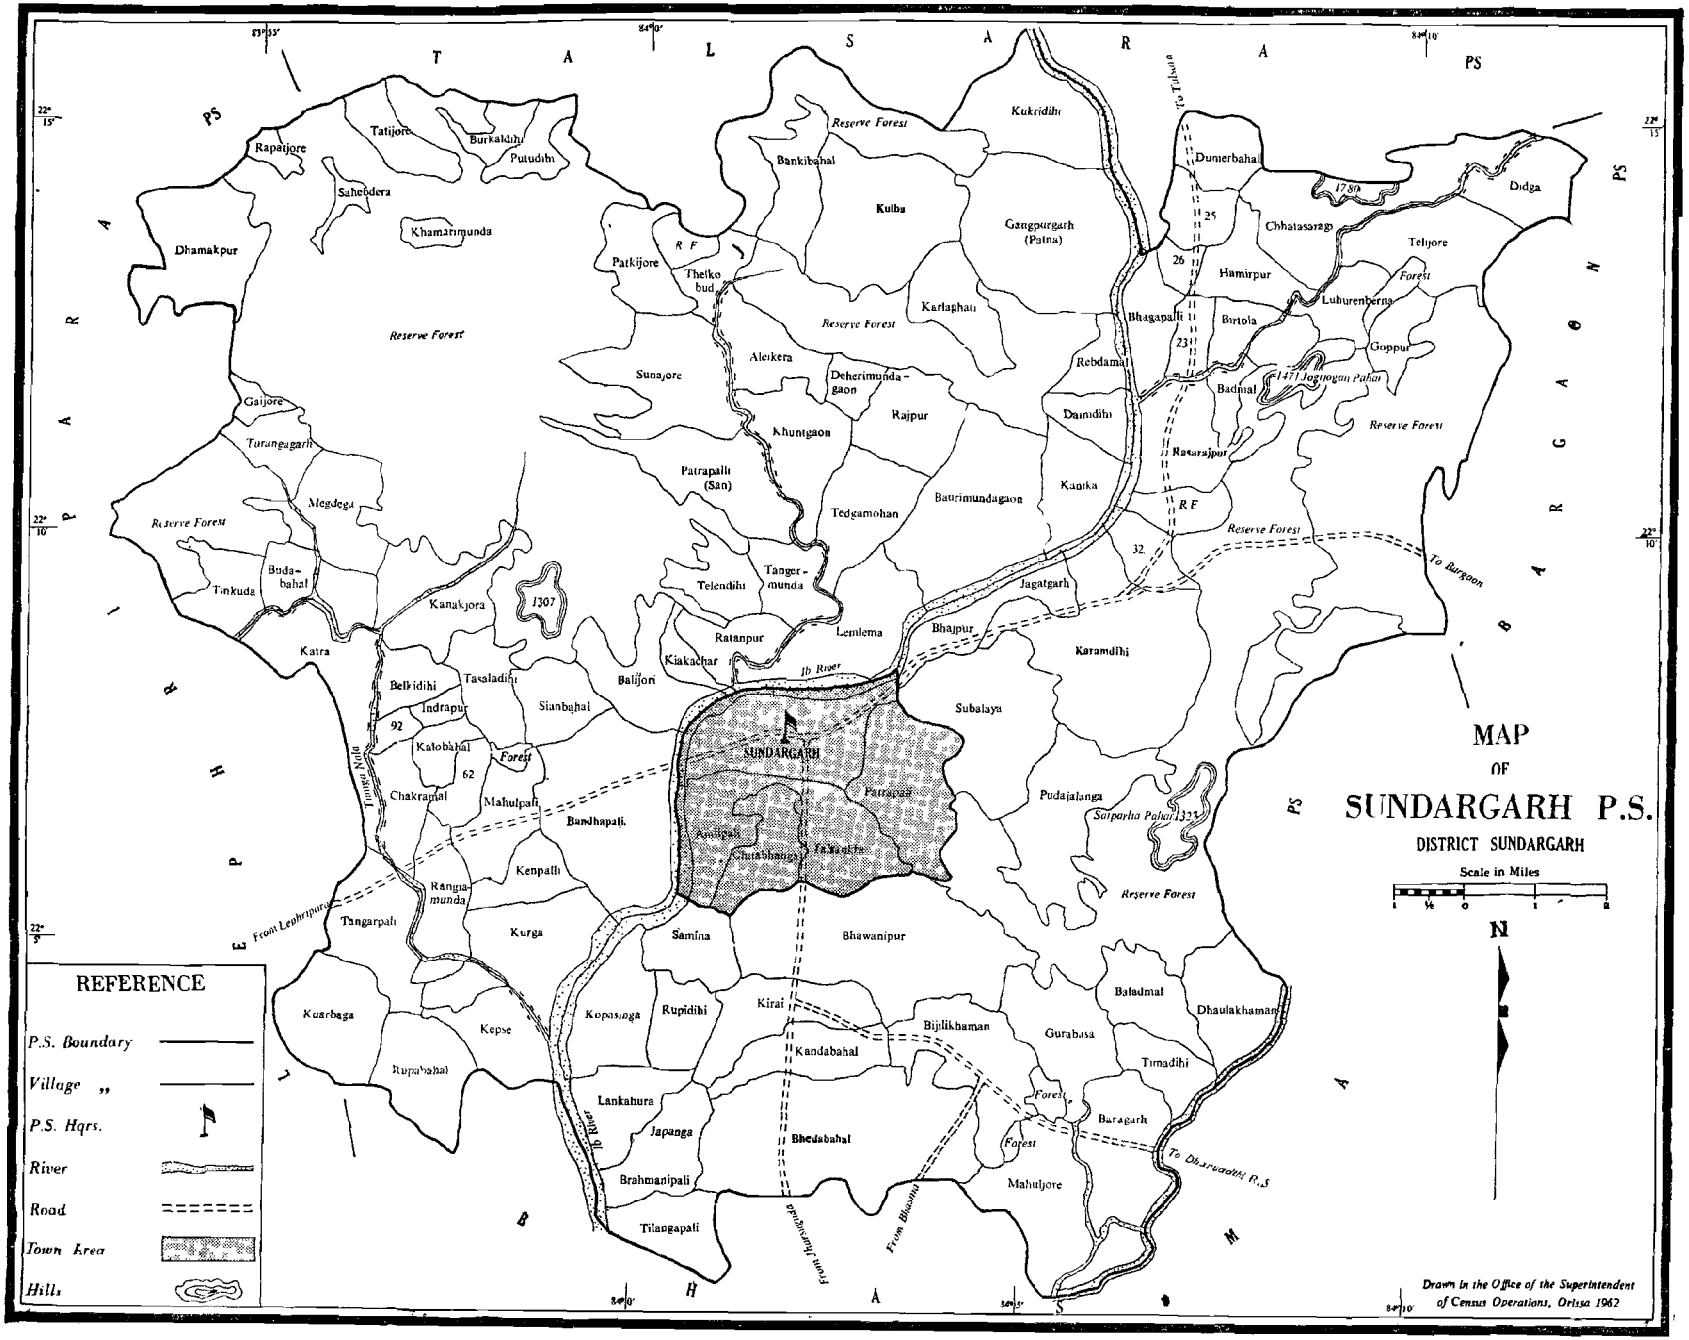

IV. *Communication and Transport facilities*—

Po for Post office without telegraph office
Pto for Post office combined with telegraph office.
Pco for Public call office
PoTo for Post office and Telegraph office separately
R for Connected by Road

V. *Rural Electrification*—

E for Electricity

7. The total number of persons enumerated as shown in columns 6 to 8 include the inmates of institutions and houseless persons.
