ASSAM

NOWGONG

DISTRICT CENSUS HANDBOOK

Edited

By

R. B. VAGHAIWALLA, I.C.S.,

Superintendent, Census Operations, Assam, Tripura and Manipur.

CONTENTS

	Pages
1. Introducing the District	i—vi
2. Introducing the Statistics	vi—viii
3. The Primary Census Abstract (showing distribution of population by livelihood classes, number of occupied houses and small-scale industries in villages and wards).	1—57
4. A.—*General Population Tables*—	
I.—Area, Houses and Population	58
II.—Variation in population during fifty years	58
III.—Towns and villages classified by population	59
IV.—Towns classified by population with variation since 1901...	60
V.—Towns arranged territorially with population by livelihood classes ...	61
5. E.—Summary figures for the District and Thanas	62—63
6. B.—*Economic Tables*—	
I.—Livelihood Classes and Sub-Classes	64—69
II.—Secondary Means of Livelihood — For total population	70—81
II.—Secondary Means of Livelihood — For displaced persons	82—91
III.—Employers, Employees and Independent Workers by Industries and Services, Divisions and Subdivisions.	92—123
7. C.—*Household and Age (Sample) Tables*—	
I.—Household (Size and Composition)	124—125
II.—Livelihood Classes by Age Groups — For Sample population	126—130
II.—Livelihood Classes by Age Groups — For Displaced persons	131—136
III.—Age and Civil Condition	137—145
IV.—Age and Literacy	146—151
V.—Single Year Age Returns For Sample population	152
8. D.—*Social and Cultural Tables*—	
I.—(*i*) Mother-Tongue	153—155
(*ii*) Bilingualism	156—164
II.—Religion	165
III.—Scheduled Castes, Scheduled Tribes and Anglo-Indians...	166
IV.—Migrants	167—177
V.—Displaced Persons by district of origin and year of arrival in India ...	178—183
VI.—Non-Indian Nationals	184
VII.—Livelihood Classes by Educational Standards	185—192
9. F.—(*i*) Tribes by Religion	193—196
(*ii*) Indegenous Persons Land Holding	197—201
10. *Census Abstract of Small-scale Industries*—	
I.—Distribution of Small-scale Industrial Establishments by thanas	202
II.—Employment in Textile Establishments for Census Tracts	202—203
III.—Employment in Non-Textile Establishments for Census Tracts	204—207
11. *Index of Non-Agricultural Occupations*	208—215

NOWGONG

INTRODUCING THE DISTRICT

The district of Nowgong has no subdivision. It consists of the thanas of Lahorighat, Dhing, Rupahihat, Koilabor, Samaguri, Nowgong, Roha, Marigaon, Jamunamukh and Lumding, and has only two towns in it, Nowgong and Lumding. Nowgong is the district headquarter, whereas Lumding is an important railway junction with a large railway and refugee population. The district is bounded on the north by the Brahmaputra ; on the east by Sibsagar; on the south by the Naga, North Cachar and Jaintia Hills, and on the west by the United Khasi and Jaintia Hills and Kamrup. Previously, the district included the Mikir Hills Tract within its boundaries, which has now been separated to constitute the United District of Mikir and North Cachar Hills since 19th November 1951.

Physical Aspects

The greater part of the district is a level plain intersected by numerous rivers and water courses, broken by a few hills and elevated tracts and dotted over with *bils* and marshes. It might be roughly described as a tract of level country bounded on the north by the Brahmaputra and surrounded on the three remaining sides by hills. The surface is for the most part low lying land, slightly undulating, and covered with tall grass jungle. During the rains, nearly the whole country is laid under water. The level does not rise continuously from the Brahmaputra to meet the hills which form the southern boundary of the district but rather slopes towards the west following the general inclination of the Assam Valley. The general appearance of the district is extremely picturesque. On a clear day in winter the view to the north is bounded by the blue ranges of the outer Himalayas, behind which snowy peaks glisten brightly in the sun ; while to the south and east lie range upon range of lower hills whose sides are clothed with the luxuriant vegetation of a tropical forest. The level rice fields, after the crop has been carried and stubble alone remains, might perhaps seem tame and uninteresting, were it not for the groves of slender palms and feathery bamboos with which they are broken up. During the rains this portion of the district is covered with a rich green carpet which gradually turns to gold, and on every side are swamps and rivers, hills and woods, to lend variety to the scene.

Mountain System —After the exclusion of the Mikir Hills Tract, the only mountain system of the district is, on the south and west, the outlying spurs which project from the Assam Range into the Brahmaputra Valley. Their highest peak is Lusuri in Duar Amla mauza, attaining 2,400 feet above sea-level.

Apart from this main system, there are numerous isolated hills dotted over the surface of the plain of Nowgong. In Silghat, there are two, one called Kamakhya and the other Hathimur, which overhangs the Brahmaputra. The mauzas of Jamunamukh and Garubat between the Mikir and the Khasi Hills contain, as is only natural, a few outlying hills.

River System.—The principal river of Nowgong is the Brahmaputra which flows along the whole of the northern boundary and into which all the drainage of the district ultimately finds its way. At Silghat and Tezpur, there are rocks and hills to give permanence to the channel. Lower down, the river spreads itself during the rains over the marshy country on either side and, when in flood, the distance between one bank to the other is very great. Between its main banks there is a wide sandy stretch in which it constantly oscilliates from side to side, for a breadth of about six miles on either side of the stream, throwing out here and there divergent channels which, after a time, rejoin the parent stream or get silted up. The waters of the river are heavily surcharged with suspended matter and the smallest obstruction in the current is liable to give rise to an almond shaped chapari, but the next flood may wash this chapari away or may increase its size by fresh deposits of sand, covered with reeds and jungle grass in a few seasons. These operations of alluvium and diluvium are continually being carried on in a gigantic scale by the Brahmaputra.

The north-east corner of the district is drained by the Diphlu, the Gatonga and its tributary, the Deopani. About eight miles north-east of Silghat, the Kalong takes off from the Brahmaputra and, after flowing a tortuous course through the centre of the district, passes Koliabor, Nowgong, Roha and Jagi, rejoins that river at Kajalimukh about 15 miles above Gauhati. The Kalong receives the drainage of the north-western slopes of the Mikir Hills in the Misa and Diju, which join it in the upper portion of its course, whereas the Nanai or Hari falls into it at Roha. Here too it is connected by a channel with the Kapili, which brings to it the drainage of North Cachar and the eastern slopes of the Jaintia Hills, but the main stream of that river turns to the west and after receiving the Borpani and the Umiam or Killing falls into the Kalong at Jagi. A little to the west of Jagi, the Kalong forms the boundary between the districts of Kamrup and Nowgong, and not far from its junction with the parent stream, it receives the Digru on its left bank. By acting as a receiver for the Brahmaputra, it fills a most important place in the drainage system of the district.

The Kapili rises in the Jaintia Hills and enters the district at Panimur. From here, it flows a north north-westerly course till a little below its confluence with the Jamuna, where it takes a turn to the west and flows past Roha. Here it is connected by a branch channel with the Kalong, but it is not till Jagi is reached that it finally falls into that stream. The principal tributaries of the Kapili on the right bank are the Doiang which joins it at Panimur, the Langajan and the Jamuna, which is swelled by the following streams:—the Dimoru, the Dighalpani, the Horgati and the Buriganga. On the left bank, the Kapili receives the Kalonga, the Borpani and the Umiam or Kiling, the two latter being themselves considerable rivers.

Marshes.—Nowgong is dotted all over with *bil*· and marshes, many of which formed in the beds of rivers which had changed their courses. These *bils* or marshes are sold as public fisheries. They are especially numerous in the *chapari* or low land near the Brahmaputra, but none are conspicuous size or importance. The largest are, perhaps, the Mora Kalong and the Kachudhara, which have formed in the old bed of the Kalong. These *bils* are very pleasant places during the cold weather.

Soil.—The soil of the plain is of alluvial origin and consists of a mixture of clay and sand in varying proportions, ranging from pure sand on the banks of the Brahamputra to a stiff clay, which is quite unfit for cultivation. Little is known about the southern slopes of the Khasi and Jaintia Hills, but they are said to be of gneissic origin.

Climate.—The climate of Nowgong does not differ materially from that of the rest of Assam proper. From the middle of November till the end of February, the weather is all that could be desired. In March, the temperature begins to rise but the copious showers of April when from 5 to 6 inches of rainfall, effectually prevent the development of anything in any way resembling the hot weather of Upper India. Between May and September the rainfall is fairly heavy, the air becomes surcharged with moisture and the damp heat is very trying. It is seldom that a thermometer rises about 90° F but in an excessively humid atmosphere like that of Nowgong even such a moderate degree of heat has a relaxing effect upon the constitution.

Rainfall.—Over the greater portion of the plains, the average fall is abont 75" in the year, but in the Kapili Valley it is considerably less and at Lanka it is only 42"—a rainfall which phenomenonly low for Assam.

Storm, Floods and Earthquakes.—Nowgong is seldom visited by violent and destructive storms though an interval of dry weather in the rains is often closed by a thunder shower, which at once relieves the oppressiveness of the atmosphere and is thus extremely welcome. The harvest is often injured by the floods of the Kapili and the Brahmaputra.

Nowgong, like the rest of Assam, has always been subject to earthquakes and suffered severely in the great visitation of June 12,1897. The Circuit house, court house and Deputy Commissioner's bungalow were rendered unfit for habitation, parts of the Jail wall collapsed and the metalled road along the side of the Kalong was split up with yawning fissures. Some damage was also done in the masonry building of the district, but fortunately the loss of life was very small, and only 3 deaths were actually attributed to the earthquake.

Fauna.—Wild animals are fairly common and include elephants, rhinoceros, bison, tigers, leopards, bears, wild pigs and different kinds of deer of which the principal varieties are sambar, bara-singha, hog-deer and barking deer. Elephants are fairly common, especially near the hills and when the crops are ripening, do much damage unless the numbers of the herds are regularly kept down by mela shikhar operations. Rhinoceros live in the swamps that fringe the Brahmaputra and are now becoming very scarce. They breed slowly and as the horn is worth more than its weight in silver and the flesh prized as food, they present a tempting mark to the hunters. Forty square miles of uninhabited jungle land near Laokhoa have been reserved and constituted as a Sanctuary for game. Small game include wild geese and duck, snipe, florican, black and marshy partridge, pheasants, jungle fowls and hares.

FORESTS

The Forest Reserves of the Nowgong District comprise an area of about 530 square miles. In addition there are approximately 260 square miles of Unclassed State Forests. Proposals for constitution of another 59 square miles as Forest Reserve are pending. It has to be mentioned that the bulk of the Unclassed State Forest comprise of hill areas which are subject to the practice of shifting cultivation by hill tribes.

Sal forests occur over about 6 square miles. In addition to sal forests there are forests occurring in the alluvial flats of streams, the important timber species occurring therein being Koroi (Albizzia procera), Ajhar (Lagerstroemia flos Reginae), Simul (Bombax malabaricum), Khokan (Duabanga sonneratioides). The bulk of the forests however belong to the dry type occurring in the hills and the principal useful spices occurring in such forests are Sonaru (Cassia firtula), Gomari (Gmelina arborea), and Thutmala (Garugapinnata). There are also extensive areas in the hills occupied by Kako bamboo (Dendro-calamus hamiltonü) with rarely Bhaluka (Bambusa balcooa) and Jati (Bambusa tulda) bamboos In the belts of evergreen forests are found Amari (Amoora wallichii), Gonsarai (Cinnamomum cecicodaphne) and Sopa (Talauma phellocarpa). Grassland savannaha occur extensively in the plains of Laokhowa, Hojai and other Reserves.

Timber is extracted from the forests to the stations of the Assam Bengal Railway by road and timber and bamboos are rafted down along the Kopili and Kolong rivers.

There about 3 square miles of plantations created in the different Reserves of the Division and about 300 acres of plantations and taungyas are being created in the Forest Reserves annually.

The Forests of the Division produce annually about five lakhs of rupees as gross revenue.

About 1 square mile of paddy land is cultivated inside the Forest Reserve of the Division while about 150 acres of forests land is cultivated in the hills annually under the agri-forestry system whereby forests tree species are planted by the villagers in their jhum.

After World War II great strides have been made in the improvement of road communication inside Forest Reserves and connecting Forest Reserves with Railway Stations, the most important project completed being the Lanka-Lumding road of about 22 miles in length completed in 1949-50.

Elephants abound in these forests particularly in the Daboka area while there are few rhinoceroses in the Laokhowa Reserve.

HISTORY

It is doubtful whether at any period the whole of the country which is now known as the district of Nowgong was a separate polity under its own ruler It was originally included in the ancient Hindu Kingdom of Kamrup mentioned in the Mahabharata For many centuries, the history of the district is involved in great obscurity and we have no definite information about the fortunes of its people, either immediately before or after the visit of the great Chinese traveller Hiuen-tsiang. In 1640 A. D., Hiuen-tsiang visited Assam and the record of his travels affords a momentary glimpse of the condition of the country. It seems to have advanced some distance on the path of civilisation. The soil was deep and fertile ; the towns surrounded by moats, the people fierce in appearance but upright and studious. Hinduism was the national religion and though Buddhism was not prohibited, its milder tenets had comparatively few followers. About the 10th century A. D., the northern part of the district seems to have formed part of the territories of a powerful and civilised line of Pala Kings. But even at that date, the Kachari Princes were ruling in the Kapili Valley and though they were conquered by the Ahoms in the 16th century, they continued to hold this portion of that district as feudatory chiefs till it passed into the hands of the British with the rest of Assam in 1826. In the middle of the 16th century, the northern part of Nowgong began to pass into the sphere of Ahom influence, though, for a time, at any rate, it was over-run by the Koches and the Muslims, and it was not till about 1685 A. D., that the Ahoms finally expelled the Muslims from Kamrup and established their rule over the upper districts of the Assam Valley, including Nowgong. Some light is thrown upon the internal conditions of Nowgong, a thousand years ago, by the inscription on a copper plate which was dug up on the banks of the Kalong, opposite Puranigudam, and which on paleographical grounds has been assigned to the latter end of the 10th century A. D. The inscription on the plate suggests that Nowgong was administered by a well organised and civilised government.

At the beginning of the 13th century, when the Ahoms first made their appearance in the Assam Valley, the Kacharis seem to have been a powerful tribe occupying the valleys of the Dhansiri and the Kapili and ruling over the western portion of the Sibsagar and the southern and eastern portions of Nowgong. The first collision between the Ahoms and the Kacharis occurred in 1490 A. D., then the Ahom King Suhangpha was defeated and driven across the Dikho. Their successes were not, however, of long duration. War soon broke out again and in 1536 A. D., the Ahoms advanced up the Dhansiri, killed the Kachari Raja Detsung and sacked his capital at Dimapur. From this time onward, the Kachari princes occupied the position of feudatory chiefs of the valley of the Kapili till it was finally annexed by the British in 1826 A. D. Whatever may have been the fate of the Kapili Valley, the northern portion of Nowgong came, for a time at any rate, under the Koch Kings of Kamrup. The founder of the Koch Kingdom was a Mech, named Biswa Singha who was succeeded in 1534 A. D., by his son Malla Deo under the name of Nara Narayan (1534-1584 A. D.). His reign represents the zenith of the Koch power, which however declined as rapidly as it arose and at the beginning of the 17th century, Nowgong was harried by the wars between the Muslims and the Ahoms.

The Ahoms preceded the British in the sovereignty of the district. They were a Shan tribe from the kingdom of Pong in the upper valley of the Irrawaddy, who, at the beginning of the 13th century, crossed the Patkoi and settled in the south of the territory now forming the districts of Sibsagar and Lakhimpur. They first overthrew the Chutia Kingdom at Sadiya by 1523 A. D. and afterwards the Kachari Kingdom at Dimapur by 1536 A. D. At the beginning of the 17th century, the Ahoms were again involved in war with the Muslims. Most of the fighting took place in Lower Assam. In 1658, the Ahoms took advantage of the confusion that ensued in the deposition of Shah Jahan to extend their rule to the Sankosh, but three years later, they were driven back by Mir Jumla, the Nawab of Dacca, who occupied Gargaon, the capital of the Ahoms. The later history of Mir Jumla's expedition is not unlike that of Nepoleon's ill-fated eruption into Russia. Rain and fever did for the Ahoms what frost and snow did for the Russians. After March, the rains set in with a severity exceptional even in that rainy land, converting the country into one huge swamp, and making military operations impossible. Disease caused havoc among the Muslims crowded together in their water-logged camp. The commencement of the cold season enabled Mir Jumla to resume offensive operations, but the determination of his followers not to remain another rainy season in Assam was so

strong that he patched up a peace with the Ahom Raja Sutumla, otherwise known as Jaidhwaj Singh and retreated down the valley of the Brahmaputra. Mir Jumla himself did not survive the failure of his expedition and died on the river about a mile from Dacca. By 1667, however, the Ahoms had again established themselves at Gauhati. Godadhar Singh (1681-95) was the first Ahom King to definitely annex Kamrup to his territories, but the zenith of their power was reached in the reign of his successor Rudra Singh (1695-1714) who founded a new capital at Rangpur and waged successful war against the Rajas of Cachar and Jaintia. He was the first of the Ahom Kings to publicly adopt Hinduism. By the middle of the 18th century, the Ahom power began to decline. Luxmi Singh's reign (1769-80) was signalised by the outbreak of the Moamaria Insurrection. After initial successes, the Moamarias were defeated and very cruelly dealt with. He was succeeded by his son, Gauri Nath (1780-95), in whose reign the Moamaria Insurrection broke out anew with increased violence. At first the king's troops met with some measure of success and orders were issued outlawing the rebels and authorising any person to kill any Moamarian he might meet, regardless of time, place. sex or age. According to the Ahom Chroniclar, "the villagers thereupon massacred the Moamarians with their wives and children without mercy." The rebels in their turn were not slow to make reprisals ; they plundered the country on every side and "the burning villages appear like a wall of fire". The ordinary operations of agriculture were suspended, no harvest could be raised and famine killed those whom the sword had spared. "The price of a katha of rice rose to one gold mohur and men starved in crowds under the trees, forsaking their wives and children". In 1786, the Moamaria rebels under Bharat Sing inflicted a decisive defeat upon royal troops and took the capital Rongpur by storm. The desolation of the country brought about by the Moamarians is thus described by the Ahom Chroniclar. "The Mataks harried the temples and the idols of the gods and put to death all the sons and daughters of our people. For a great length of time our countrymen had no home, some took shelter in Bengal, some in Burma, some in the Dafla hills". In 1792, a small British force under the command of Captain Welsh was sent to the assistance of the Ahom King, who re-occupied Rongpur in 1794 after a decisive victory over the insurgents. Soon after, Gouri Nath died and was succeeded by his son Kamaleswar Singh, in whose reign the country remained in a state of great disorder due chiefly to the attacks of the Daflas. He was succeeded by his brother Chandra Kanta Singh in 1809. The Bor Phukan or the Viceroy of Gauhati incurred the suspicion of the Bura Gohain or Prime Minister and fled to Burma *via* Calcutta. At the beginning of 1816 , Burmese army crossed the Patkai, re-instated the Bor Phukan ; but shortly after their withdrawal. Chandra Kanta was deposed and Purandar Singh appointed in his stead. The banished monarch appealed to the Burmese, who, in 1818, returned with a large force and replaced him on the throne. They soon, however, made it clear that they intended to retain their hold in Assam. They were guilty of gross atrocities during their occupation of the country. The inhuman policy of the Burmese depopulated the country of its more than half its population, which had already been thinned by successive civil wars and Moamaria insurrections. Chandra Kanta fled to Golapara and from British territory began a series of abortive attempts to recover his lost kingdom. In the mean time, however, causes of quarrel arose between the British and the Burmese and in 1824 war was declared by British Government and a force sent up the Valley of Brahmaputra. The Burmese evacuated Gauhati without striking a blow, such fighting as there was taking place in the district of Sibsagar and Nowgong. Rongpur was occupied in 1825 and in the following year, by the treaty of Yandaboo, Assam was ceded to the East India Company.

Passing into British hands, Nowgong was first administered with Kamrup and Darrang as the Lower Assam Division, but in 1833 it was formed into a separate district with the headquarters at Puranigudam and subsequently to Rangagara before they were finally removed to Nowgong in 1839. Few events of historical interest have occurred in Nowgong during the British period. As recently as November 1951, its Mikir Hills tract was separated from the district to create the new district of the United Mikir and North Cachar Hills.

POPULATION

The public health of the district though not bad suffers greatly in comparison with other districts. In the past Nowgong suffered more than any other district from *kala-azar* which has now gradually declined due to the application of modern treatment. During the decade the number of deaths from this disease has shown a considerable decline as can be evinced by the total number of deaths, 133 in 1941 to 128 in 1943, 100 in 1945, 81 in 1949 and 74 only in 1950. During the decade sporadic outbreaks of cholera occurred every year generally along the banks of the Kapili and the Kolong rivers. The total mortality from cholera alone in 1942 and 1943 was as high as 3,361 and 1,214 respectively. Still the vigilance of the Public Health and mass inoculation prevented it from assuming epidemic proportion. The district also suffered from an epidemic of small-pox in 1943, which was responsible for a total mortality of 580, followed by a greater epidemic in the next year which carried off as many as 1,709 persons. The second half of the decade was almost wholly free from this disease. The district also suffered from a number of natural calamities during the decade, for example sudden high floods in the Kapili and the Brahmaputra damaging crops and cattle, which has become almost an annual feature, hail-storm, damage caused by insects and draught. These natural calamities virtually converted this heavily surplus

area into a deficit one. Government have taken steps for the prevention of floods by irrigation project, drainage works and sluice gates.

Nowgong has now a population of 954, 283 less than that of any other district of Assam Plains Division except Darrang, which however, had a higer population than Nowgong in 1941. This change in Nowgong's rank in the 1951 Census is only apparent being due to the removal of 61,728 persons from the district to be included under the new United Mikir and North Cachar Hills district. Nowgong will retain the same relative position even if we compare the population of the plains districts of Assam *minus* the displaced persons. The population of Nowgong has increased by 237,883 during the last decade (against a seemingly low increase of 86,491 in 1941). This is the largest increase recorded by any district during the present census and is also higher than that recorded by any other district during any of the preceding censuses with the solitary exception of Kamrup whose increase of 287,454 during 1931-41 is an all-time record so far. Nowgong retains its present proud position in the matter of overall increase during the decade even if we compare the total increase *minus* the displaced persons shown by various districts of Assam.

This huge total increase has enabled the district to register a percentage increase (36·65 per cent.) which is higher than that of any other district in Assam Plains Division and higher than that of any other district of Assam excepting Balipara Frontier Tract of the North-Eastern Frontier Agency. In 1921-31, the district registered the phenomenal increase of 41·35 per cent. the highest rate of increase among all districts of Assam. During 1931-41. Nowgong shows a percentage increase of only 15·37 per cent. which is less than that of Kamrup, Darrang and Lakhimpur. This is, however, only apparent, being entirely due to the omission of 61,728 persons inhabiting the Mikir Hills areas which are now excluded from the district. If we include them, the increase in the population of Nowgong during 1931-41 will be to the tune of 148,219 against the recorded variation of 86,491, thus giving a percentage increase of 34·25 which will again be highest among all the districts of Assam, hill or plain, with the solitary exception of the small Balipara Frontier Tract. Its mean decennial growth rate for the present decade is 30·97 per cent. against 34·27 per cent. in 1921-30, only 14·28 per cent. in 1931-40 on account of the exclusion of Mikir Hills areas.

In density Nowgong with its 409 persons per square mile stands second to Cachar only, which has the highest density of any district in Assam, 415. In this respect, Nowong has registered a terrific increase of 110 over density at the last census. At the last census, however, the density of Nowgong was only 299, which was lower than not merely that of Cachar 333 but also of Goalpara 328 and Sibsagar 301.

The densest part of the district is more or less in its centre, lying on the left of the Kolong. The police station of Nowgong 850, Dhing 795, Rupahihat 777, are among the most thickly populated areas in the whole of the State. Lahorighat 525, and Roha 432 are other thickly populated thanas of the district. Among the sparsely populated thanas of the district are Morigaon with a density of only 239, Koliabor 321 and Jamunamukh 317. Every thana has shared in this huge increase of population of the district during the decade. Ignoring the exceptional case of the truncated Lumding thana which gives the tremendous rate of 382 per cent. Jamunamukh shows the highest increase of 98·1 per cent. followed by 39 per cent. of Koliabor, 33·4 per cent. of Morigaon, 31 per cent. of Lahorighat and 27 per cent. of Roha. The Dhing thana has registered the least increase but that too is as high as 18 per cent. We must, however, remember that the huge rate of percentage increase registered by Jamunamukh thana is deceptive, being due to the omission of 29,252 persons from the thana from its 1941 population due to the creation of the new district of United Mikir & North Cachar Hills.

Along with the extraordinary rise in density of the district there have been considerable changes in Nowgong regarding the respective proportions of its area and population under particular density groups. In 1941 no part of the district excepting Lumding had a density less than 150 or over 750 per square mile, nor did any part of its area or population came in the density group 450-600. Its two thanas of Jamunamukh and Morigaon covering 39 per cent. of the area of the district inhabited by 22·23 per cent. of its population were still in the density group 150-200. Only Koliabor and Samaguri thanas came in the group 200-300, whereas the thanas of Roha and Lahorighat containing 17·82 per cent. of the area and 22·52 per cent. of the population were in the group 300-450. The highest density group was still 600-750 only consisting of Nowgong, Rupahihat and Dhing police stations together containing only 17·77 per cent. of the area but as large as 39·92 per cent. of the population of the district. Thus in 1941 one half of the district supported less than one-fourth of its population, whereas the remaining nearly three-fourths of its population had to remain content with occupying the other half of the district, to put it differently less than sone-fifth of the area supported two-fifths of the population while the remaining four-fifths of the area gave sustenance to the remaining three-fifths of the population.

The position in 1951, however, is vastly different. The large proportion of the area and population of the district, 39 per cent. and 22·23 per cent. respectively, in the group 150-200 has now completely disappeared, Morigaon sweeping itself to the next higher group 200-300, whereas Jamunamukh has gone a step still further by being included in the group 300-450. This group, 300-450, shows an enormous expansion of the area of the district and population contained within it, *viz.*, 32 per cent. and 32 per cent. respectively. In contrast with 1941 when there was no area of the district or population in the group 450-600, at the present census we have as large a proportion of the district as 19·26 per cent. of the area and 20·31 per cent. of the population in this group. The group 600-750 which contained the entirety of the high density area and population of the district in the 1941 census now shows blank, as the entire population and area have swept themselves over to the next higher group of 750 and over with a total area and population of 21·13 and 37·69 per cent. respectively. We now no longer witness such striking contrasts in 1951 as we have seen above in case of the previous decade; in 1951 only one-fifth of the area supports one-third of the total population of the district, while the remaining two-thirds have as much as the remaining four-fifths of the area.

Displaced Persons: As we have seen above, the huge increase of 237,883 of Nowgong during the last decade is partly due to the presence of 38,599 refugees within the district. Among them 10,563 were censused within the urban tract of Nowgong and Lumding, the rest of the district accounting for 28,036. The rural tract of Jamunamukh and Lumding have 13,291 displaced persons forming nearly 45 per cent. of the total number of refugees in the rural areas of the district. Rupahihat-Koliabor show the next largest figure 5,238, followed by Lahorighat-Dhing 3,755, Roha-Morigaon 3,448, and Samaguri-Nowgong 2,304.

The displaced persons, however, cannot be the sole explanation for the huge increase of 237,883 registered by the district during the present decade as they form less than one-sixth of the overall increase. The real causes are the natural increase of population and the vast immigration of land hungry Muslims from across the border, especially during the first half of decade. The Deputy Commissioner reports large scale immigration of the East Bengal Muslims in search of cultivable land during the decade. The area settled with immigrants during the last decade was 645,881 acres as against 184,451 acres during the previous decade 1931-41. There was also a certain amount of immigration from Sylhet and Cachar. People from these two districts settled in considerable numbers in mauzas Namati, Hojai, Lanka, Jamunamukh, Garobat and Sahari.

Introducing the Statistics

In the past, village statistics for each district used to be printed after the Census, giving the population of each village and showing the distribution of communities and of literate persons. In view of the importance of the 1951 Census, at which in addition to the usual population data, valuable information was collected concerning the social and economic life of the people, it was decided to publish a District Census Handbook containing the more important Census abstracts and tables.

The Primary Census Abstract gives the details of each village by the 8 Livelihood Classes. There are five general population tables of the "A" Series, three economic tables of the "B" Series, five household and age (samples) tables of the "C" Series, seven social and cultural tables of the "D" Series and one table "E" giving summary figures for the district and Thanas. As far as possible, these tables furnish district data with break-up for Census tracts within the district.

At the 1951 Census, the economic classification was substituted for the classification based on *religion*. The people have been divided into two broad livelihood categories, namely, the agricultural classes and the non-agricultural classes. There are four agricultural classes defined as below:—

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly un-owned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

There are similarly four non-agricultural classes defined as persons including dependants who derive their principal means of livelihood from—

V. Production other than cultivation.

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

The above eight classes have been referred to as livelihood classes.

Each of the above eight livelihood classes has been divided into three sub-classes with reference to the economic status as below:—

(*i*) Self-supporting Persons;

(*ii*) Non-earning Dependants; and

(*iii*) Earning Dependants.

(*i*) A 'Self-supporting Person' is one who earns an income in cash or kind sufficient at least for his own maintenance.

(*ii*) A 'Non-earning Dependant' is a person who has no income of his own either in cash or in kind.

(*iii*) An 'Earning Dependant' is a person who earns a regular (not casual) income not sufficient even for his own maintenance. It includes seasonal income also.

All self-supporting persons are, ordinarily, economically active. But there are certain classes and groups which constitute an exception to this rule. These are mentioned below :—

(*i*) All self-supporting persons of Agricultural Class IV.

(*ii*) The following groups of self-supporting persons who are included in non-Agricultural Class VIII, and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :—

(*a*) Non-working owners of non-agricultural property,

(*b*) Pensioners and remittance holders,

(*c*) Persons living on charity and other persons with unproductive occupations, and

(*d*) Inmates of penal institutions and asylums.

Economically active persons engaged in industries and services are classified in economic table B-III into the ten divisions and 88 subdivisions mentioned above, and are further divided into three sections, namely :—

(*i*) Employers,

(*ii*) Employees, and

(*iii*) Independent Workers.

A person should be treated as an 'Employer' only if he has necessarily to employ any person in order to carry on the business from which he secures his livelihood, provided that employee is regularly employed and derives his Principal Means of Livelihood by such employment. Part-time or casual employment which does not provide the Principal Means of Livelihood of the employee should not be taken into account. A person employing a cook or other servants for domestic services is not an employer.

An 'Employee' is a person who ordinarily works under some other person for a salary or wage in cash or kind, as the means of earning his livelihood. Managers, Superintendents, Agents, etc., and all Government servants should be recorded as employees only even though they may have power of employing or appointing subordinate officers or assistants.

An 'Independent Worker' means a person who is not employed by anyone else and who does not employ anybody else in order to earn his livelihood.

The Age (Sample) tables were prepared from the original enumeration slips by taking a ten per cent. sample in accordance with the following instructions of the Registrar General, India.

The 'D' Series social and cultural tables include Table D-V relating to the displaced persons giving particulars about their arrival into India. Table D-VI gives details of the non-Indian nationals and Table D-VII is designed to show the distribution of educated man-power among the different livelihood classes.

Important population data for the district and the thanas have been summarised in Table 'E' which also gives the classification of the people by livelihood classes.

The main Report of the 1951 Census for the States of Assam, Tripura and Manipur will be found in two parts entitled "Census of India 1951—Volume XII—Assam, Manipur and Tripura". Part I. Contains an analysis of the statistics collected and Part II. Statistics arranged in different tables for the States, their natural divisions and districts.

In addition to these Volumes there are National Registers of Citizens prepared for every village and ward and maintained in manuscript giving important census details for each person. These registers are preserved as permanent records in the district headquarters.

From the data collected at the Census of the Small-scale Industries, three tables were prepared which are included in the Hand book, giving village or wardwise distribution of small-scale industrial establishments, employment in textile establishments for Census tracts and employment in non-textile establishments for the same tracts.

While the accuracy in respect of the details actually recorded by the Enumerators during the Census of the Small-scale Industries has been reported to be good, the District Officers were of the view that there was tendency towards under-enumeration of the establishments, due to the failure of the enumerating staff to make *intensive afforts to discover all establishments* within the areas allotted to them. The figures in the tables for the Small-scale Industries should, therefore, be regarded as *illustrative* of the nature of small industries prevalent in the different parts of the district and should not be relied upon as giving *accurate number* of specific type of establishments in different localities.

INSTRUCTIONS FOR TABULATION OF VILLAGE NOTES

Important information for every village was separately recorded on printed forms and has been incorporated in columns 3 and 4 of Primary Census Abstract using the symbols given below :—

1. *Floods.*—"*f*" if it is liable to flood of any category.

2. *Epidemics.*—For entries like Cholera, Small-pox, Kala-azar, Malaria, *write* Ch. Sp. Ka. or Mal. For all other epidemics mentioned in this column, enter it in full.

3. *Water Supply.*—
A.—The village has a source of water supply provided by the Government or Local Board.
B.—Natural sources of supply like rivers and bils.
C.—Private supply.
D.—Acute scarcity.
Underlined, it will indicate that quality of dringking water is bad.
4. *Medical Facilities.*—
a.—The village has a Local Board or Government regular dispensary within 5 miles radius.
b.—There is no regular dispensary but a Public Health Dispensary within 5 miles radius.
c.—There is no dispensary but a private qualified doctor within 5 miles radius.
d.—No medical facilities of any sort.
5. *Educational Facilities.*—
1. Served by a Local Board or Government School within 2 miles radius.
2. Served by a Private Venture School only within 2 miles radius.
3. No educational facilities of any kind (Mission Schools have been generally treated as private schools although in some areas where they get grant-in-aid they have been shown as Government Schools by Enumerators).

CENSUS TRACT—SAMPLE POPULATION AND DISPLACED PERSONS

Census statistics of the urban and rural population can be studied in various ways. The results of such studies in comparing the conditions and characteristics of the urban and rural people in the matter of births, deaths, sex composition, sanitation, levels of living, etc., would be of great value in economic planning and development of social welfare work in the State and its different parts.

Each district was therefore, divided for purposes of the Census into a number of rural and urban tracts according to the size of the population.

Preparatory to the sorting and tabulation of census information, rural and urban areas of a district were grouped into Census Tracts on the basis of instructions issued by the Registrar General of India. With his approval, the following rural and urban tracts were formed in the case of Nowgong District.

Rural

Tract No.R.24 Lahorighat thana,
Dhing thana,
R.25 Rupahihat thana,
Koliabor thana,
R.26 Samaguri thana,
Nowgong thana,
R.27 Roha thana,
Marigaon thana,
R.28 Jamunamukh thana,
Lumding thana.

Urban

U.8 Nowgong town,
Lumding town.

In several Tables the term "Sample Population" has been used. This sample was drawn according to the following instruction of the Registrar General of India. Enumeration was done on pads of 100 slips each, a slip containing the record of an individual.

"Break each pad and stack the slips of the pad ; and "cut" the stack as in a card game. Place the lower portion above the upper portion and then deal the slips into the pigeon holes. You should deal the slips into pigeon holes *in the order* of 1, 2, 3, 4, 5, 'S', 6, 7, 8 and 9 successively. All the time, you should watch the slips of 'Displaced Persons'. If you come across any slip of a displaced person deal it in the pigeon hole separately labelled for 'Displaced Persons'. Thus there were three bundles ; (*i*) General Slips, *i.e.*, Slips combined for holes labelled for 1, 2, 3, 4, 5, 6, 7, 8 and 9, (*ii*) Sample Slips, *i.e.*, Slips in the hole marked 'S' and (*iii*) Displaced Persons.

Hence it will be seen that the sample is not a sample of the total population but of the latter excluding the 'Displaced Population'.

The check factors for the sample population are :—

1,000 S/G Rural Total=110·98.
1,000 S/G Urban Total=110·95.
1,000 S/G District Total=110·98.

A 'Displaced Person' was defined by the Registrar General of India as follows :—

"A 'Displaced Person' means any person who has entered India having left or being compelled to leave his or her home in Western Pakistan on or after the 1st March, 1947 or his/her home in Eastern Pakistan on or after the 15th October, 1946 on account of civil disturbances or the fear of such disturbances or on account of the setting up of the two Dominions of India and Pakistan".

PRIMARY CENSUS ABSTRACT

Number and name of district—8 Nowgong. Number and name of thana—8.1 Lahorighat.
