G.P.Z.P. 1964, H-293-650

PREFACE

On the suggestion of the Census Commissioner, India, the Government of Maharashtra decided to publish the District Census Handbooks on the basis of the material collected during the 1961 Census for all the districts in Maharashtra. A Committee consisting of the Executive Editor and Secretary of the *District Gazetteers (Revision) Editorial Board*, the Superintendent of Census Operations, Maharashtra, and the Director, Bureau of Economics and Statistics, Maharashtra, was appointed to determine the contents and review the drafts of each volume. This is one of the twenty-five volumes compiled in the Maharashtra Census Office and published under that scheme.

District Handbooks had been published from the 1951 Census data also. As in the past, the present volume contains a set of 1961 Census Tables for the district and also presents basic demographic and economic information for each village separately. The following improvements have, however, been made in the 1961 series :—

(i) The addition of a comprehensive note introducing the district ;

(ii) The four-coloured map of the district ;

(iii) Taluka maps showing the location of each village in the district supplemented by alphabetical lists of villages ;

(iv) Supplementary information showing basic amenities available for each village ; and

(v) Addition of Part III containing 33 Tables on other official statistics.

These new features will make the volume a valuable reference for the Central and State Governments, District Administrators, departments engaged in planning and development work, legislators, private trade and business. Need for such material is far greater today as the functions of planning and implementation of development schemes have now percolated to district, taluka and village levels.

Marathi version of this volume is also being issued separately.

Part I of the volume presents villagewise statistics, Part II contains the 1961 Census Tables prepared for the district and Part III contains official statistics on Climate, Rainfall, Agriculture, Industry, Education, Health and a few other aspects. An explanatory note is added at the beginning of each part to describe the layout of the Tables and the terms or concepts used. Parts I and II are based entirely on the data collected at the 1961 Census. Part III is based on the material furnished by the District Statistical Officer and the officers of the departments concerned. Villagewise populations shown in Part I are valid for Sunrise of 1st March 1961 and are not adjusted for seasonal migration to or from other areas.

The introductory note at the beginning of the volume describes the present administrative set-up and some of the socio-economic facets of life in the district. It will illustrate how the statistics presented in the volume could be used for economic accounting or as controls of plan achievements in the district. For this note, we have drawn heavily on the District Gazetteers

Survey and Settlement Reports, Annual Administration Reports and other Government publications. Some Heads of Departments also supplied the latest available material for the volume. We are indebted to them all.

Any views expressed in the introductory note or elsewhere in the volume are personal and the Government is not responsible for them.

In the Census Office, every one has done something for this stupendous task of compilation and collation of statistics, preparation of notes and reading of proofs. I should specially mention Shri N. Y. Gore, Tabulation Officer, for his sincere and thorough work on compilation and proof-reading of Part I, Shri G. S. Gokarn, Tabulation Officer, for his painstaking work on MSS and proofs of Parts II and III, Shri S. K. Deshpande, Shri R. E. Chowdhary for assistance in preparing the introductory note, Shri S. Y. Pradhan and Shri B. M. Nagarkar, Draughtsmen, for Maps, Charts and Diagrams. Shri S. G. Deshpande of our office at Nagpur looked after the layout of the Tables and printing of the volume. Shri R. G. Phadke and Shri D. V. Rangnekar, Deputy Superintendents of Census Operations, and Shri G. M. Rajadhyaksha, Tabulation Officer, made valuable contributions at all stages and specially in the preparation of notes. Acknowledgments are due to Shri S. R. Desai, Manager, Government Press and Book Depot, Nagpur, and Shri J. D. Gandhi, Manager, Government Photo-zincographic Press, Poona. In spite of heavy pressure of work on their presses they did their best to print this volume speedily.

I am obliged to Shri Asok Mitra, I.C.S., Census Commissioner, India, for valuable suggestions for improving this volume. I am also indebted to Shri Setu Madhava Rao and Shri M. A. Telang, Members of the District Census Handbook Committee, who not only supplied useful material from their departments but also read through the MSS and encouraged us through this venture.

INTRODUCING THE DISTRICT

This note describes the administrative set-up and some socio-economic facets of life in the district

THE DISTRICT IN MAHARASHTRA

FIG. 2

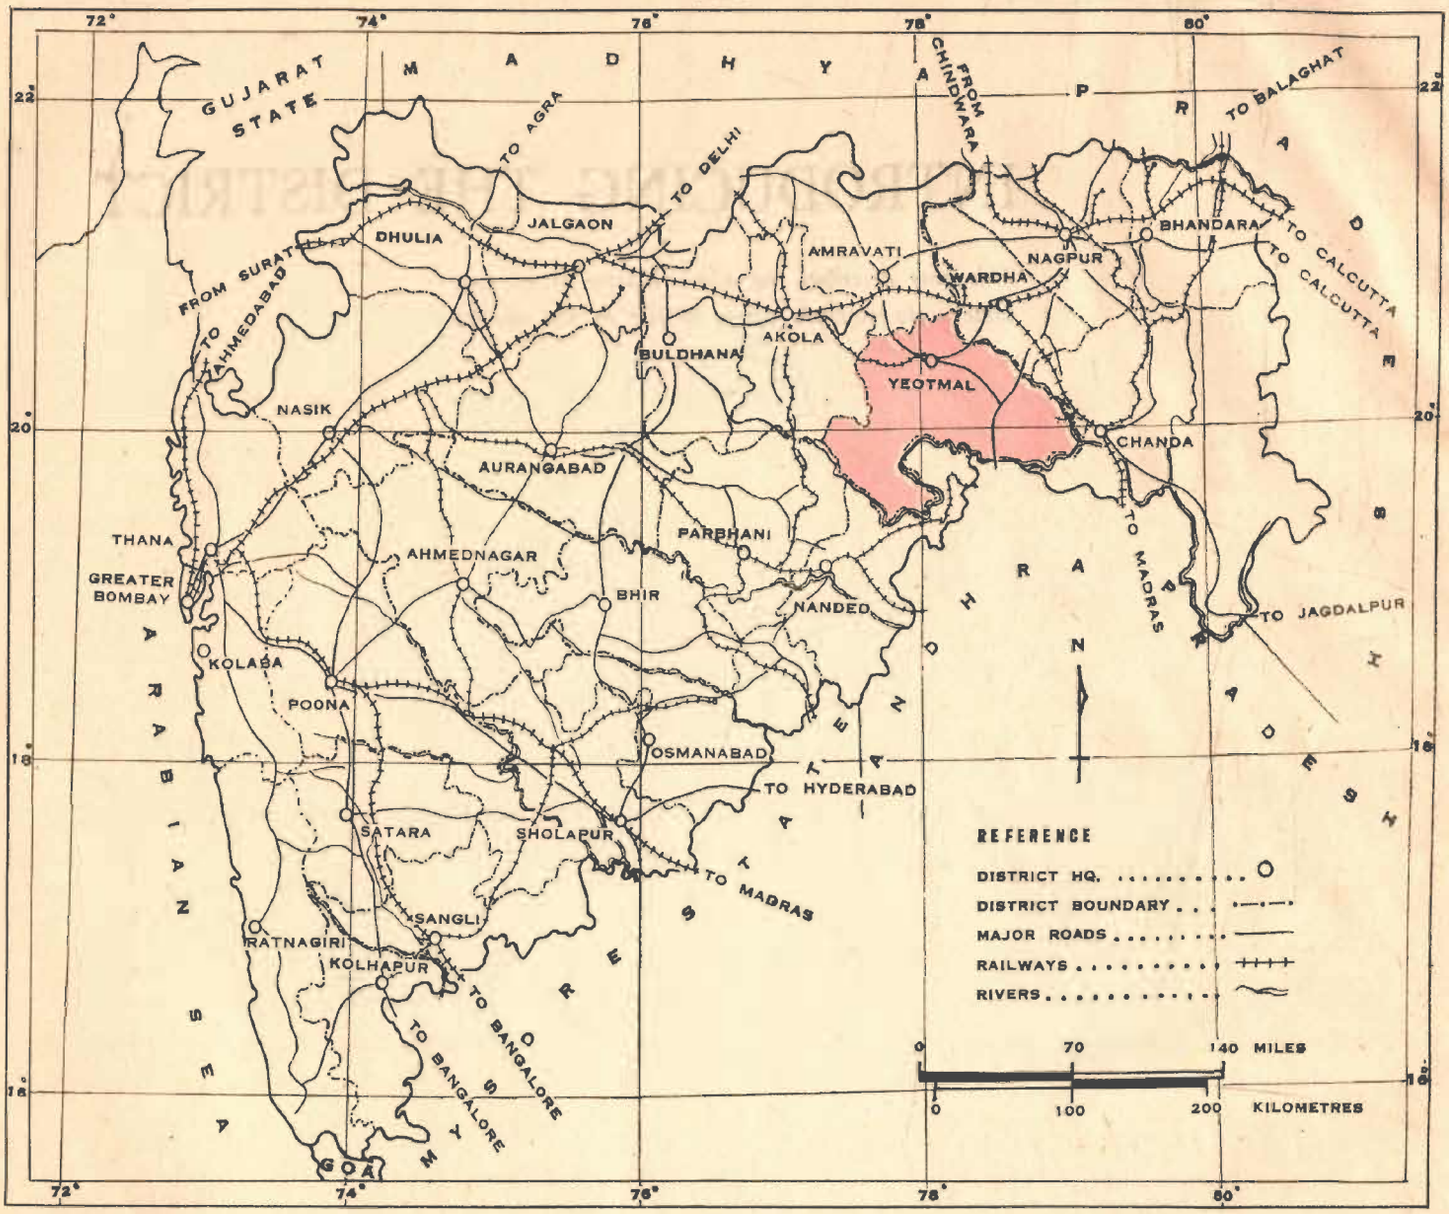

FIG. 3

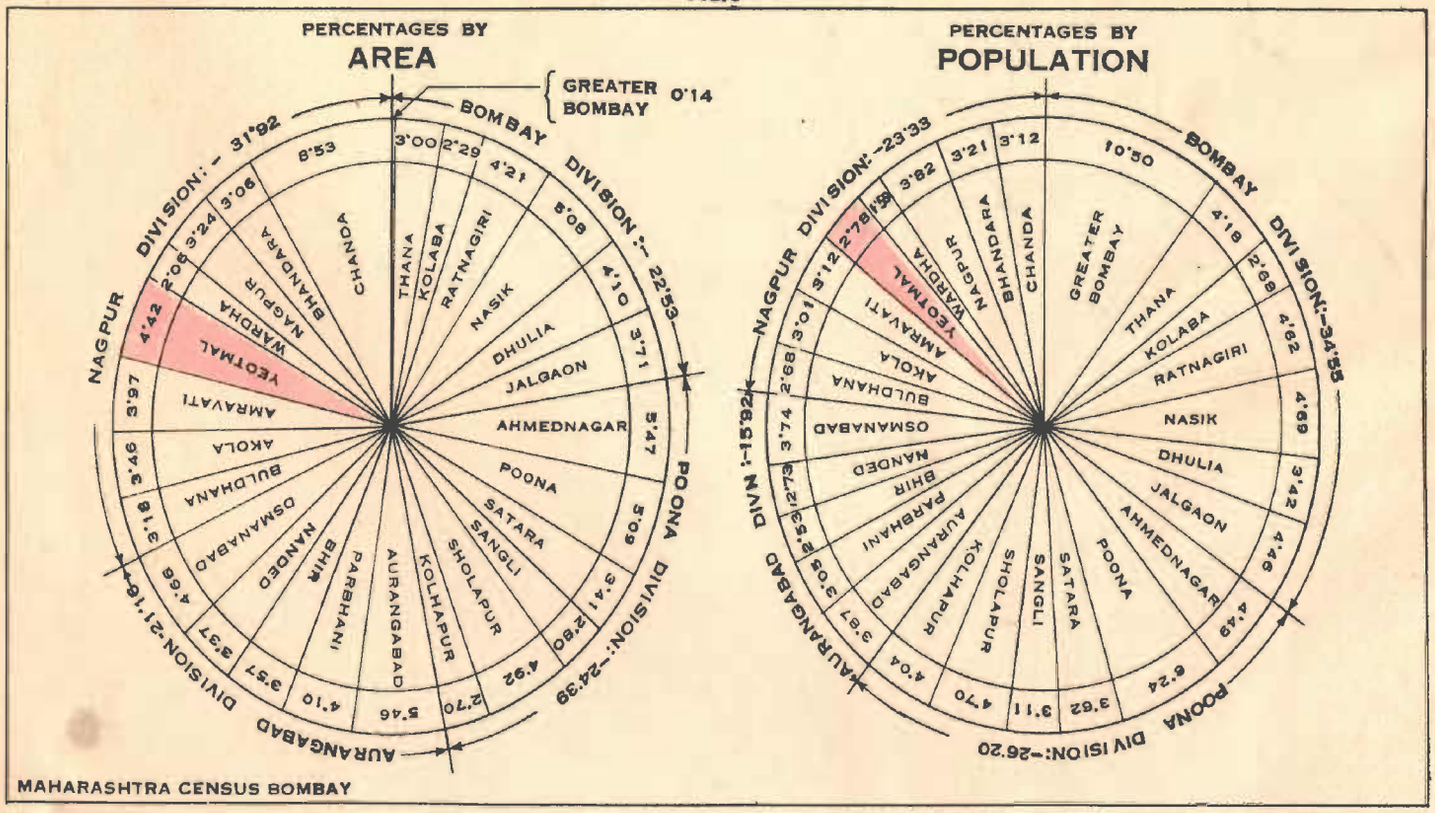

MAHARASHTRA CENSUS BOMBAY

G. P. Z. P. POONA-1962

INTRODUCING THE DISTRICT

PHYSICAL FEATURES

Most of the district belongs to the Balaghat, i.e., the southern plateau of Berar. On the north it extends into the Payanghat, i.e., the Berar valley and includes a small part of it which is a belt of plain from five to fourteen miles in breadth along the north of Yeotmal and Darwha talukas. This narrow belt is continued in the Wardha valley across the north of Kelapur taluka and the northern and eastern sides of Wani taluka.

Similarly, the Penganga river gives a strip of plain in many parts of its course on the southern border of the district. The tributaries of the Penganga again have formed valleys often some miles in breadth through the hilly country.

The district lies between 19° 26′ and 20° 42′ N. latitude and 77°18′ and 79° 9′ E. longitude. It is surrounded by Amravati district in the north, Chanda and Wardha districts in the east, Nanded district and Andhra Pradesh in the south and Akola and Parbhani districts in the west.

The area of the district is 5,219 square miles and its population in 1961 is 1,098,470. In terms of area and population it represents 4·41 per cent and 2·78 per cent of the State, respectively. The Figures facing this page show the position of the district in the State.

Hill Ranges

The main system of hills is the Ajanta mountains. The whole district is occupied by small east-west ranges of these mountains. The central portion of the district is a plateau with steep ghats, having an elevation of 1,000′—1,500′ above mean sea level. The offshoots of the Ajanta ranges are at places broken by the broad valleys of the tributaries of the Penganga.

Important Rivers

The chief rivers of the district are the Wardha and the Penganga, both of which flow respectively along the northern and southern boundaries of the district. Each has numerous small tributaries.

The bed of the Wardha is broad and deep but the banks are sometimes overflowed in very large floods. The Wardha has two important tributaries, *viz.*, the Bembala and Nirguda, both of them maintain flow throughout the year. The Bembala flows across the north of Yeotmal taluka below the ghats. The entire course of the Nirguda is in Wani taluka.

Penganga has six important tributaries, *viz.*, the Pus, Arunavati, Adan, Waghadi, Khuni and Vidarbha. The Pus river flows through Pusad taluka, the Arunavati and Adan through Darwha taluka, the Waghadi through Yeotmal and Kelapur talukas, the Khuni through Kelapur taluka and the Vidarbha through Wani taluka. These rivers maintain flow for the greater part of the year.

Climate

Monthly temperature records are available only for the station at Yeotmal (Table 1 in Part III).

The rainy season starts from June and lasts up to the end of October. It is followed by winter from November to February and summer from March to May. The climate is in general hot and dry with moderately cold winters. There is generally a breeze in hot season thus rendering it tolerable and pleasant.

Rainfall

Table 2 in Part III shows figures of monthly rainfall and number of rainy days for ten years from 1951 to 1960.

Rainfall is not uniform in all parts of the district. It increases from west to east. It is heaviest at Wani in the eastern region which gets an average of 1,125 mm. and lowest in Darwha in the west which gets 889 mm. of rain. The central region comprising Yeotmal taluka gets 1,099·5 mm.

The rains start about the beginning of June and last till the end of October. The intensity of rainfall is heaviest in August.

Dependability of Rainfall and Scarcity Areas

Mean rainfall at Pusad and Yeotmal is 928·88 mm. and 1,074·93 mm. respectively. The standard deviation is 231·39 mm. and 239·52 mm. respectively. Coefficient of variability is 24·92 per cent and 22·29 per cent. Rainfall reliability is measured by the coefficient of variability. Variability is, in fact, inverse to reliability. The degree of reliability at these two stations in the district may, therefore, be said to be slightly high. The Fact-Finding Committee appointed by the Government of Bombay in 1960 had also reported that there is no tract in the district which can be regarded as a chronic scarcity or precarious area.

Soils

The soils of the district as a whole are uniformly good in texture and vary in colour from black to dark brown. They are, however, slightly inferior in productive capacity to those in Akola and Amravati districts. Three defects are common all over the soils of the district, *viz.*, (1) a mixture of pieces of *chunkhadi* (limestone), (2) sloping surface and (3) an excessive admixture of sand. However, the

soil varies from very fertile alluvial tracts in valleys to hilly and hard parts on the plateaus. The type of soil generally found in different parts of the district is detailed below :—

In Wani taluka, the soil is of uniform but coarse texture and of a reddish colour.

In Kelapur taluka and central and southern parts of Yeotmal taluka and hilly parts of Pusad taluka, the soil is of coarse gravelly or loose friable texture and of a colour varying from light brown to grey.

In western part of Yeotmal taluka and middle portions of Darwha and Pusad talukas, rich fertile alluvial soils are found.

Minerals

Coal and limestone are the only important minerals found in this district. There is a coalfield extending about 12 square miles in a tract starting from Pisgaon in Wani taluka and ending in Warora taluka in Chanda district. The reserves are estimated at 240 million tonnes. In 1960, about 68,000 tonnes of coal were mined in this taluka. Deposits of limestone also occur in Wani taluka. In 1960, about 122,000 tonnes of limestone were mined. In 1954 a third mineral was explored and that was *farashi* stone. The *farashi* stone is located in Kelapur taluka and the production was about 13,000 tonnes in 1958.

Forests

The forest area is spread in large patches over all the talukas of the district. The total area under forests in the district is 1,510·18 sq. miles and accounts for nearly 29 per cent of the total geographical area of the district. The area under forests in the district is approximately 38 per cent of the total area under forests in Amravati Circle. Out of the total area of 1,213·97 sq. miles under the Forest Department in 1961-62, the area under reserved forest was 1,141·02 sq. miles and unclassed forest was 72·95 sq. miles. An area of 296·21 sq. miles was under the Revenue Department.

The important forest produce of the district is teak, bamboo, grass and firewood.

Natural Zones

The district can be divided into three broad natural regions : (i) the Bembala-Wardha basin in the north, (ii) the plateau portion at the centre and in the south-west of the district, and (iii) the plain fertile lands of the Pusad-Penganga basin in the south.

The plateau has generally hard *barad* soils and grows cotton, tur and jowar. Both the valleys have very fertile soils and grow rich harvests of cotton and wheat.

ADMINISTRATIVE SET-UP

Brief History

Up to 1863, Yeotmal was a part of the East Berar district. Talukas of Yeotmal, Darwha, Kelapur and Wun were separated from that district in 1864 to make a new district termed at first South-East Berar and afterwards Wun (Wani) district.

In 1905, the taluka of Pusad was transferred from Basim district to Wun district. The name of the district was changed in the same year from Wun to Yeotmal. Headquarters of the district had, however, always been at Yeotmal.

There were no major changes in the boundaries of the district or its talukas between 1911 and 1955.

With the reorganisation of States in 1956, the district was transferred from Madhya Pradesh to Bombay State. The district forms a part of Maharashtra since 1st May 1960.

Present Set-up

For administrative purposes, the district is at present divided in five talukas. The area, number of inhabited villages, number of towns, 1961 population and the position in the district by percentages of area and population for each taluka are as shown in the table below.

General Administration and Revenue

The Collector is in charge of general administration, law and order, treasury, land revenue and civil supplies. He is assisted by a Resident Deputy Collector in his office and five Deputy Collectors (working as Sub-Divisional Officers) who hold charge of the five revenue divisions and have their headquarters at Darwha, Yeotmal, Pusad, Kelapur and Wani, respectively. Each revenue division comprises one tahsil (taluka) which is in charge of a Tahsildar. The Tahsildar is assisted by some Naib-Tahsildars.

District/Taluka	Name of Head quarters	Area in sq. miles	No. of inhabited villages	No. of towns	1961 population	Percentage of area	Percentage of population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
YEOTMAL DISTRICT	Yeotmal	5,219	1,629	8	1,098,470	100·0	100·0
1 Darwha Taluka	Darwha	1,078	336	2	255,132	20·7	23·2
2 Yeotmal Taluka	Yeotmal	908	317	1	207,366	17·4	18·9
3 Pusad Taluka	Pusad	1,285	319	2	265,033	24·6	24·1
4 Kelapur Taluka	Pandharkaoda	1,086	336	2	197,270	20·8	18·0
5 Wani Taluka	Wani	862	321	1	173,669	16·5	15·8

Land Revenue Settlements

The original Revenue Survey and Settlement of different talukas in the district was completed between 1873 and 1877. The First Revision Settlement was completed between 1903 and 1910. The land revenue rates have not been revised though the guarantee period expired in 1934 and 1940.

In the original settlements, lands were assessed separately on the basis of individual soil classification, though the general level of assessment was fixed empirically with reference to the dependability of rainfall, crop pattern, average yields, prices, levels of rent, nearness to the markets, facilities of communications and other similar factors observed from tract to tract. Individual lands were never re-classified during the revision settlements and landholders were generally allowed the benefits of improvements effected by them during the term of settlement untaxed. The comparative incidence of land revenue from field to field is thus generally the same as it was at the time of the first revision settlement and the enhancements made from settlement to settlement were brought about only by raising the levels of land revenue assessments over a tract uniformly.

The method of land revenue assessments is broadly the same as in the other districts of Maharashtra. In the case of lands irrigated by wells and small *bandharas*, the land revenue is integrated and is inclusive of the charge for water supplied.

Table 24 in Part III shows demand and collection of land revenue during the ten years 1951 to 1960 for the district and each taluka separately.

The areas and number of villages for each taluka in the district have varied from settlement to settlement. Inam or Jagir villages had not been covered by most of them. In fact, some of the Inam or Jagir villages were unsurveyed and unsettled as late as in 1947. That work has now been completed. Because of such recently settled villages and because of the territorial changes in the taluka boundaries from time to time, most of the talukas today have a more varied pattern of land revenue assessments than what is seen in the reports of earlier settlements. Even then the maximum rates fixed at each settlement or revision settlement or the average land revenue rates per acre should be quite reliable indices of the incidence of land revenue as obtaining in the district from taluka to taluka or in the same taluka from settlement to settlement. Those rates for dry, garden or rice lands for each taluka are as follows :—

Taluka (1)	Original Settlement or Revision Settlement (2)	Year (3)	Guarantee period (4)	Number of villages (5)	Average land revenue per acre (6)	Group (7)	Maximum rates per acre: Dry lands (8)	Garden lands (9)	Rice lands (10)

Assembly and Parliamentary Constituencies

Since 1957 the district has eight Assembly constituencies. In 1957, Pusad and Wani constituencies were double-member constituencies with one of the two seats from Pusad reserved for Scheduled Castes and one of the two seats from Wani reserved for Scheduled Tribes. After abolition of the double-member constituencies in 1961, the seat from Umarkhed is reserved for Scheduled Castes and the seat from Yelabara is reserved for Scheduled Tribes.

The number of voters on rolls for each Assembly constituency in 1961 was as follows :—

Assembly Constituency	No. of voters on rolls
1. Kelapur	64,783
2 Yeotmal	65,027
3. Darwha	71,405
4. Digras	73,039
5. Pusad	71,205
6. Umarkhed	61,542
7. Wani	75,199
8. Yelabara	75,603
Total ..	557,803

In the 1962 General Elections, the Assembly constituencies of Kelapur, Yeotmal, Darwha, Digras, Pusad and Umarkhed together made one Parliamentary constituency called Yeotmal constituency and the remaining Assembly constituencies of Wani and Yelabara combined with Assembly constituencies of Hinganghat, Wardha, Pulgaon and Arvi from Wardha district made another Parliamentary constituency called Wardha constituency.

The total number of voters on rolls in the district in 1961 was 557,803. The total population aged 21 years and above according to 1961 Census is 548,246. Comparison can, however, be only approximate as the two figures relate to two different dates in the year 1961.

Administration of Justice

The District and Sessions Judge is the head of the Judicial Department in the district. The judiciary is entirely separated from the executive. The Collector continues to be the District Magistrate and the Deputy Collectors and Tahsildars are vested with magisterial powers. But those powers are limited to security proceedings under Chapter VIII, unlawful assembly under Chapter IX, public nuisances under Chapters X and XI and disputes as to immovable property under Chapter XII of the Criminal Procedure Code, and none of them ever tries any criminal case. The District Magistrate does not have any administrative control over the other magistrates who try criminal cases in the district. This separation of the judiciary from the executive has been brought about in the district in the year 1959.

The District and Sessions Judge is assisted by one Civil Judge (Senior Division). He has jurisdiction over the entire district. He has unlimited civil jurisdiction in the district.

There are five Civil Judges (Junior Division) and First Class Judicial Magistrates with headquarters at different taluka places. They have civil jurisdiction up to Rs. 10,000 and criminal powers.

Police

The Police force in the district functions under the (District) Superintendent of Police who is assisted by two Deputy Superintendents and two Circle Police Inspectors. There are 23 Police Stations in the district. Their headquarters and jurisdictions are shown below :—

	Police Station Headquarters	No. of Villages
Darwha Taluka ..	1. Darwha	96
	2. Digras	60
	3. Ladkhed	70
	4. Arni	77
	5. Ner	102

	11. Jawla	53
	12. Mahagaon	99
	13. Umarkhed	74
	14. Bittargaon	71
Kelapur Taluka ..	15. Pandharkaoda ..	119
	16. Wadki	53
	17. Ralegaon	75
	18. Ghatanji	59
	19. Parwa	80
Wani Taluka ..	20. Wani	83
	21. Shirpur	84
	22. Maregaon	111
	23. Patan	100

Average number of villages and population per police station in the district is 83 and 47,760 against 69 and 62,547 in the State, respectively.

Crime statistics for the district for the years 1950, 1955 and 1960 have been shown in Table 28 in Part III.

Municipalities

All the eight towns in the district have Municipal Committees established under the Central Provinces and Berar Municipalities Act, 1922. The year of establishment, the year of the last general election, the term of the elected body, the total number of elected councillors and the number of seats reserved for Scheduled Castes and Scheduled Tribes and for women are shown below for each Municipality separately.

The municipality at Yeotmal is the oldest of all. It is more than sixty years old.

The eight municipalities together cover the entire urban population or 12·61 per cent of the total 1961 population of the district.

The taxation level of each of the municipalities is shown below :—

Name of the Municipality	1961 Population	Year 1961-62 Total Receipts	Receipts from Municipal taxes	*Per capita* Municipal tax
		Rs.	Rs.	Rs. nP.
1 Darwha ..	11,540	17,745	93,583	8 10
2 Digras ..	15,525	3,09,374	81,141	5 23
3 Yeotmal ..	45,587	9,22,078	3,88,330	8 52
4 Pusad ..	18,002	5,55,636	2,55,023	14 17
5 Umarkhed ..	12,647	2,18,923	97,490	7 71
6 Ghatanji ..	6,443	1,69,806	38,934	6 04
7 Pandharkaoda	10,605	2,71,905	1,10,935	10 46
8 Wani ..	18,176	7,73,552	3,20,702	17 64

Serial No.	Name of the Municipality	Year of establishment	Year of the last General Election	Statutory term in years	1961 Population	Total No. of Municipal Councillors	Seats reserved for Scheduled Castes	Seats reserved for Scheduled Tribes	Seats reserved for Women

ZILLA PARISHAD AND PANCHAYAT SAMITIS

With a view to promoting development of democratic institutions and securing greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralisation of powers and functions, a Zilla Parishad and 14 Panchayat Samitis have been established in the district in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samitis Act of 1962. The area under the jurisdiction of the Zilla Parishad corresponds to the district boundaries except for the eight Municipal towns which are not covered by them. The Zilla Parishad covers 92·20 per cent of the area and 87·39 per cent of the total population of the district. The Zilla Parishad covers the entire rural population and does not include any urban population. The number of villages and population included under the Zilla Parishad and each Panchayat Samiti are shown on page (6). The position of each Panchayat Samiti in the Zilla Parishad is also shown separately by percentages of area and population in 1961.

(1)	Name of Headquarters (2)	Area in sq. miles (3)	No. of inhabited villages (4)	No. of non-municipal towns (5)	Population in 1961 (6)	Percentage by area (7)	Percentage by population (8)

NOTE.—The area figures in column (3) are according to Blockwise Census Abstract and do not agree with the figure given in Primary Census Abstract, Part II-A of the Maharashtra Census Report. The difference may be due to the inclusion of reserved forest areas in the latter.

Constitution

The Zilla Parishad has 49 directly elected councillors. Out of these 49 seats, 2 seats are reserved for Scheduled Castes and 5 for Scheduled Tribes. In addition, a woman councillor has been co-opted by the elected councillors. There are five associate councillors who are chairmen of five federal co-operative societies conducting business in the district. The elected chairmen of 14 Panchayat Samitis (block committees) are also *ex-officio* councillors.

At the Block level, the Panchayat Samiti consists of all elected and co-opted councillors from the area of the Block and a chairman of a co-operative society conducting the business of purchase and sale of agricultural produce in the area of the Block as an associate member and a chairman of a co-operative society conducting the business in agriculture in the area of the Block as a co-opted member. Sarpanchas elected by members of Village Panchayats are also elected members of the Panchayat Samiti. Their number is at the rate of two for each electoral division in the area of the Block.

Elections were held in the year 1962. The term of office of the councillors is five years. The Zilla Parishad has elected the President and Vice-President from amongst the elected councillors.

An officer in the senior scale of I.A.S. works as the Chief Executive Officer to the Zilla Parishad. The Parishad is also assisted by various departments and the heads of those departments at the district level are officers of Class I or Class II Service under the State Government. At the Block level, the Panchayat Samitis have elected Chairmen and Deputy Chairmen. The Block Development Officers work as Secretaries to the Panchayat Samitis. The executive authority for the purpose of carrying out the provisions of the Maharashtra Zilla Parishad and Panchayat Samitis Act vests in the Chief Executive Officer and the Block Development Officers. The Deputy Chief Executive Officer works as Secretary to the Zilla Parishad.

Committees and Office-bearers

The Zilla Parishad functions through a Standing Committee presided by the President and six Subject Committees for Finance, Works, Agriculture,

Co-operation, Education and Health. Two Subject Committees are presided by the Vice-President and four by two Chairmen elected by the Zilla Parishad to preside over two specified Subject Committees each. The Deputy Chief Executive Officer works as Secretary of the Standing Committee, while the District Heads of Departments work as Secretaries to the Subject Committees concerned. Co-ordination between the Subject Committees is achieved through the Standing Committee which includes the Chairmen of all the Subject Committees as members.

The Panchayat Samitis do not have Subject Committees.

The elected President of the Zilla Parishad is paid an honorarium of Rs. 500 per month. The Vice-President and the two Chairmen of the Subject Committees are paid an honorarium of Rs. 300 per month. The elected Chairmen and Deputy Chairmen of the Panchayat Samitis are paid an honorarium of Rs. 300 and Rs. 150 per month, respectively. All these persons are also provided with rent-free accommodation as is deemed suitable for them by the Zilla Parishad.

Functions

The Divisional and State Officers of the Government continue to exercise technical supervision and give guidance to Zilla Parishad and Panchayat Samitis. The State Government has powers to give direction to the Zilla Parishad regarding works and schemes in the interest of National or State Development Plans. Inspection and supervision are carried out by the Divisional Commissioners.

Except for a few safeguards, the developmental and administrative functions of Government are now, with the creation of these democratic bodies at the district and block level, devolved on them. In other words, the State Government has divested itself of the responsibility of local activities which are now left to the people's initiative and resources.

The developmental and administrative subjects transferred to the Zilla Parishad and Panchayat Samitis have been listed in Schedules I and II to the Maharashtra Zilla Parishad and Panchayat Samitis Act. By and large, all functions of Government administration including development activities at the district level, but excluding matters relating to law and order, judicial and quasi-judicial functions and development functions involving high technical skill like Research Stations, etc., have been devolved on the Zilla Parishad and Panchayat Samitis. All Class III and Class IV employees of the Government Departments now transferred to the Zilla Parishads have been absorbed as employees of the Parishad. The Village Talati (or Patwari) and the entire village establishment of the Revenue Department have been transferred to the Parishad through the Village Panchayats, though for collection of land revenue and maintenance of Record of Rights they continue to work under the Revenue Officers.

The Zilla Parishad has replaced the erstwhile statutory bodies known as Janapad Sabhas and District Panchayat Mandal. The functions of non-statutory body known as the District Development Board have of course been absorbed. Municipalities, however, remain unaffected as municipal areas are excluded from the jurisdiction of the Zilla Parishad.

Finance

The law provides for levy of a cess at the rate of twenty naye paise on every rupee of land revenue and at a rate not exceeding nineteen naye paise per rupee of water rate. The Zilla Parishad can levy taxes on profession, trade, calling or employment and taxes on water supply, public entertainments, amusements and pilgrims, special tax on land and buildings and other taxes. The stamp duty on transfer of certain immovable properties may be increased by one-half per cent by Government for payment to the Zilla Parishad.

The financial assistance given by the State Government includes 70 per cent of the land revenue collected within the area of the Parishad. When, however, the amount of land revenue payable falls short of the amount arrived at on the basis of two rupees *per capita* of the population of the district as appearing in the Census of 1961, an equalisation grant covering the difference will be paid to the Zilla Parishad. Government also pays what are called purposive grants being grants for specific works and development schemes transferred to the Zilla Parishad at the rate of not less than 75 per cent of the expenditure. An establishment grant equal to 75 per cent of the average annual cost on account of salaries and allowances is paid in respect of the posts held by the staff of Government transferred to the Parishad which are included in the District Technical Service (Class III) and District Service (Class III) and District Service (Class IV). The other grants include a deficit adjustment grant payable at full rates during the first five years and to be progressively reduced in the next ten years after which it will not be payable, incentive grants calculated to achieve speedier development and grants for Plan schemes. If in pursuance of the proposal of a Zilla Parishad or a Panchayat Samiti, a cess on land revenue at a rate in excess of the minimum rate prescribed by the Act is levied by the State Government in the whole of the district or in block, the Zilla Parishad or the Panchayat Samiti, as the case may be, shall be paid every year by the State Government a grant called the local cess matching grant.

The total revenue receipts of the Zilla Parishad for the year 1963-64 are Rs. 128 lakhs. The major portion of the receipts is of receipts from Government. These are 97·5 per cent and the Zilla Parishad receipts are 2·5 per cent of the total revenue receipts. Major items of Zilla Parishad's receipts are local fund cess, cess on water rates and profession tax.

The total revenue expenditure is Rs. 132 lakhs. Following are the major items of expenditure :—

	Per cent
General Administration	3·6
Education	49·8
Community Development Project	10·9
Buildings and Communications ..	10·0
Miscellaneous	10·2
Other items	15·5

The Zilla Parishad did not levy any new taxes in the first year in the budget for the year 1963-64 It has, however, considered to levy the following taxes in the near future :—

Tax on—

(1) profession, trade, callings ; and

(2) entertainment and amusements.

Similarly the Parishad has decided to collect fees in the public markets in the district and it would share the revenue from this source with the respective Gram Panchayats in the ratio of 40:60.

Per capita annual expenditure of the Zilla Parishad on different development heads is as follows :—

	Rs.
General Administration	0·49
Education	6·78
Community Development ..	1·49
Buildings and Communications ..	1·36

Establishment

The establishment of the Zilla Parishad comprises the gazetted and the non-gazetted staff. The non-gazetted staff consists of the employees of the former local bodies and those of the various State Government Departments now transferred to the Zilla Parishad.

There are 5 Class I and 38 Class II Gazetted Officers working under the Zilla Parishad. The total strength of the non-gazetted employees of Class III and Class IV categories is 7,663. Moreover, an establishment of 1,112 Gram Sevaks, 783 Talatis and 122 Village Panchayat Secretaries has been transferred from the Revenue Department to the Zilla Parishad.

VILLAGE PANCHAYATS

The number of independent village panchayats in each taluka, the names of blocks in each taluka, the number of group village panchayats and the number of villages covered by group village panchayats are shown below :—

Taluka	Block	No. of inhabited villages	No. of independent village panchayats	No. of group village panchayats	No. of villages covered by group village panchayats
(1)	(2)	(3)	(4)	(5)	(6)
1 Darwha	Darwha ..	93	139	71	253
	Ner ..	129			
	Digras ..	144			
2 Yeotmal	Yeotmal ..	82	110	60	235
	Babhulgaon	97			
	Kalamb ..	138			
3 Pusad ..	Pusad	105	148	50	139
	Mahagaon ..	105			
	Umarkhed ..	109			
4 Kelapur	Pandharkaoda	105	114	86	282
	Ralegaon	112			
	Ghatanji ..	119			
5 Wani ..	Wani ..	131	78	69	197
	Maregaon ..	190			
	Total ..	1,629	589	336	1,106

NOTE.—The figures in column (6) perhaps include hamlets. entries in columns (4) and (6) will not, therefore, tally with the entries in column (3).

The break-up of the total annual income of all the village panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in' 000)	Percentage of total income
	Rs.	
Grants	842	62·46
Taxes on houses and properties	149	11·05
Octroi	*Nil*	..
Other taxes	355	26·34
Total taxes	504	37·39
Income from other sources	2	0·15
Total Income	1,348	100·00

The first item includes the Government grant of 30 per cent of the land revenue collected in the village or one rupee per head of population whichever is more.

The village panchayats also get the entire local fund cess collected in the village. At present it is collected at 20 nP. per rupee of land revenue. The village panchayats can raise it with Government approval up to 100 nP. per rupee of land revenue.

All the 925 village panchayats have imposed taxes on houses and properties.

The break-up of the total annual expenditure of all the village panchayats in the district for the year 1961-62 is as follows :—

Item	Amount (in '000) Rs.	Percentage of total expenditure
Administration	204	16·87
Health and Sanitation	87	7·20
Public Lighting	64	5·29
Other items	854	70·64
Total Expenditure	1,209	100·00

Other items include improvement of village roads, construction of new drinking water wells or repairs to old wells, construction of Panchayat Ghars, schools and such other buildings.

Functions of the Talati (Patwari), Village Panchayat Secretary and Assistant Gram Sevak are now combined in one official who now works under the Village Panchayat.

POPULATION

Table A-I in Part II shows the 1961 population of the district and each taluka for total, rural and urban areas separately. Definition of rural and urban areas may be seen in paragraphs 8 and 9 of the Explanatory Note to Part II. Table A-II shows the district population and its variation at each Census since 1901 and the variation in population for each taluka during 1951—1961.

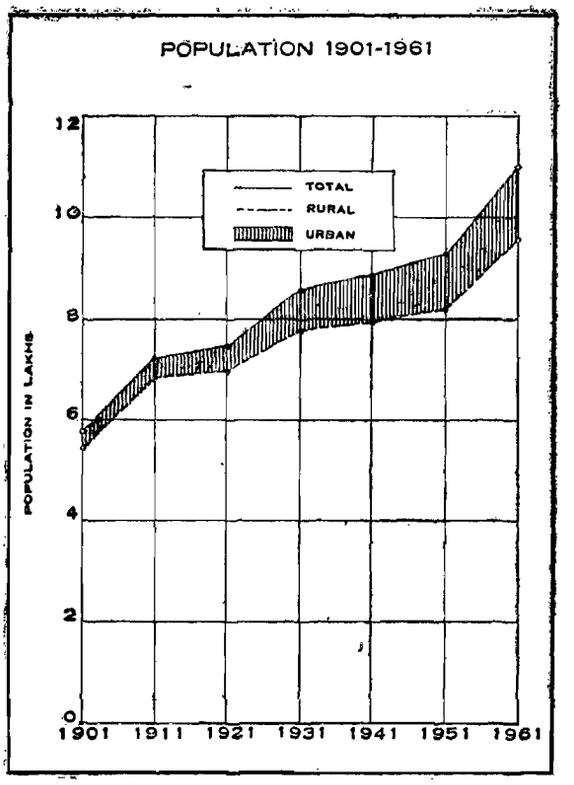
Variation

The population of the district and decade variation rates since 1901 are as follows :—

Year	Population	Decade Variation	Rate of Variation
1901	577,101	..	..
1911	724,410	+147,309	+25·53
1921	748,959	+24,549	+3·39
1931	857,288	+108,329	+14·46
1941	887,738	+30,450	+3·55
1951	931,982	+44,244	+4·98
1961	1,098,470	+166,488	+17·86

The Figure in the next column shows the total, rural and urban population of the district for the last seven Censuses.

During the decade 1901—11 the population of the district had increased by 25·53 per cent. It was the highest percentage increase ever recorded in the district and was perhaps due to a recovery from the effects of severe famines in the earlier decade when people had migrated to neighbouring areas in very large numbers. In the following decade the influenza epidemic of 1918-19 took a heavy toll of life which is revealed by the small increase of 3·39 per cent in the population of the district. Recovery from influenza epidemic and fairly good agricultural seasons in the decade 1921—31 contributed to an increase of the population by 14·46 per cent. In the following decades 1931—41 and 1941—51 the



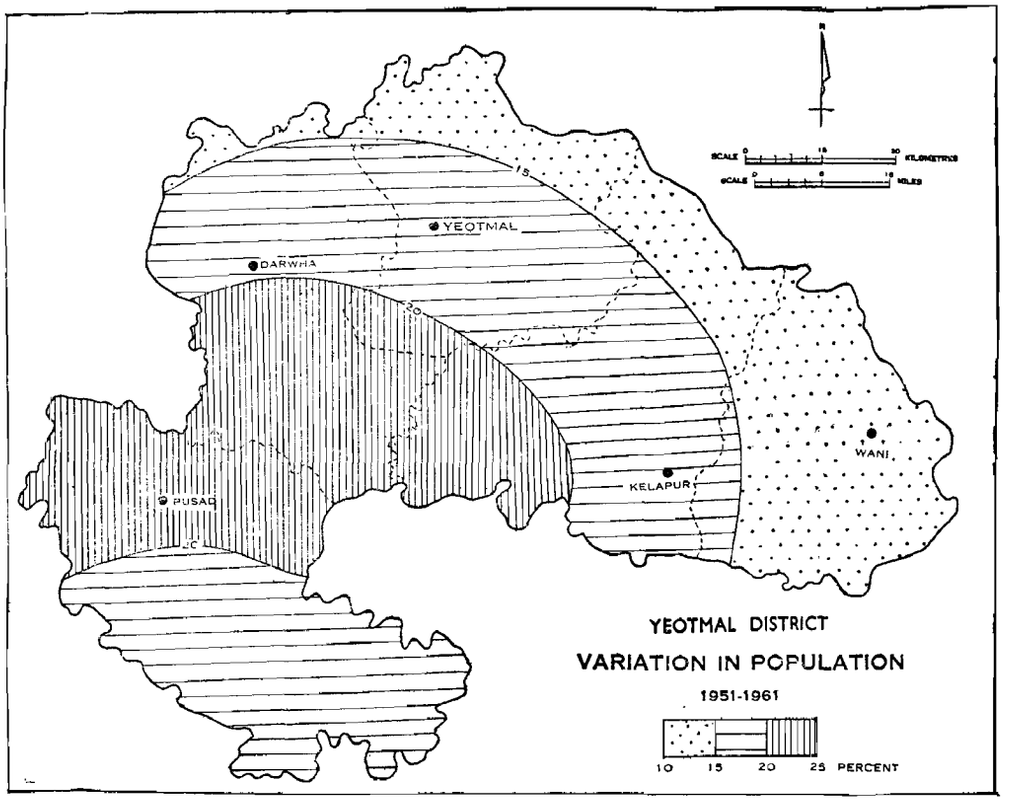
population increased at 3·55 and 4·98 per cent which were comparatively very low rates. In the last decade it has increased by 17·86 per cent.

The 1951—61 decade variation for the district and each of the talukas is as follows :—

	Percentage Variation 1951—61
YEOTMAL DISTRICT	+17·86
1 Darwha Taluka	+20·77
2 Yeotmal Taluka..	+16·85
3 Pusad Taluka	+19·61
4 Kelapur Taluka	+18·32
5 Wani Taluka	+12·07

Figure to the right shows the areawise pattern of 1951—61 growth of population within the district.

There are wide differences in the decade rates of variation of different talukas. Darwha taluka has recorded the highest increase (20·8 per cent) while Wani taluka had the lowest increase (12·1 per cent) over 1951. Darwha, Pusad and Kelapur talukas are above the district average and Yeotmal and Wani talukas are below that average.



The net percentage increase since 1901, 1921 and 1951 for the district and the State has been as follows:—

	Yeotmal District	Maharashtra
1901—1961	90·34	103·97
1921—1961	46·67	89·71
1951—1961	17·86	23·60

The district growth rates have always been lower than Maharashtra averages. A distinct feature of variation in population of the district is that it has slowed down in the post 1921 period. The rapid growth before 1921 was perhaps partly due to the opening up of forest areas and immigration into the district in order to takeup land previously uncultivated. This had stopped in the post 1921 period. Malarious climate had perhaps kept population growth in check. Things have improved considerably in the 1951—61 decade because of the malaria eradication and other public health campaigns.

Density of Population

The densities of population for Maharashtra, Yeotmal district and its talukas for 1951 and 1961 are as shown in the next column.

	Density per square mile		Percentage of district population in 1961
	1951	1961	
MAHARASHTRA ..	271	334	..
YEOTMAL DISTRICT ..	179	210	100·00
1 Darwha Taluka	196	237	23·22
2 Yeotmal Taluka	195	228	18·88
3 Pusad Taluka	172	206	24·13
4 Kelapur Taluka	154	182	17·96
5 Wani Taluka	180	201	15·81

The Figure on page (11) shows the approximate contours of density of population in 1961 within the district.

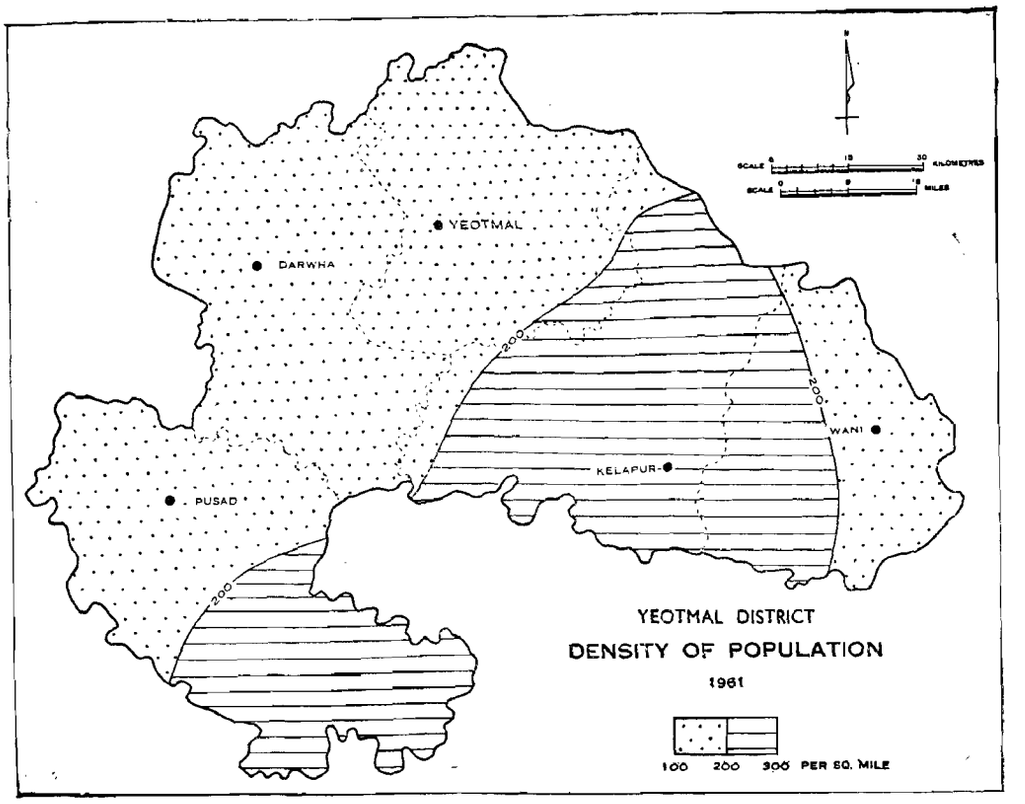
The density of population has increased sharply from 144 to 210 during the last forty years. The density in Yeotmal district has always been lower than the State average.

Density of population varies from 237 persons per square mile in Darwha taluka to 182 persons per square mile in Kelapur taluka. The differences correspond to those of topography and land utilisation.

The talukas which have high percentage of the district population are also the areas of relatively higher density.

Urban Population

Urban population of the district at each Census and its variation since 1901 are shown in Table A-IV in Part II. The same table also shows the variation in population for each town in the district. The number of towns, the rate of decade variation in urban population and the percentage of urban population to total population at each Census since 1901 for the district and the State are as follows :—



Year	Yeotmal District			Maharashtra		
	No. of towns	Rate of variation in urban population	Percentage of urban population to total population	No. of towns	Rate of variation in urban population	Percentage of urban population to total population
1901 ..	5	..	6·00	219	..	16·59
1911 ..	6	+23·94	5·92	232	+0·99	15·13
1921 ..	6	+24·41	7·12	238	+18·72	18·50
1931 ..	8	+53·72	9·57	258	+15·54	18·60
1941 ..	8	+11·48	10·30	266	+27·11	21·11
1951 ..	8	+22·21	11·99	383	+62·42	28·75
1961 ..	8	+23·98	12·61	266	+21·32	28·22

In the Figure on page (9) the actual urban population of the district since 1901 is shown by the shaded portion between the two lines. The net growth in urban population of the district over that of 1901 is 300·38 per cent as against 246·96 per cent for the State.

The district is much less urbanised than Maharashtra State. The proportion of urban population had slightly decreased in 1911 both for the district and the State. Since then it has steadily increased up to 1961. The proportion of urban population for Maharashtra has slightly declined but in the last decade it did not decline in the district. The number of towns in the district has not changed since 1931.

Yeotmal is an important town. Its population has increased by 332·3 per cent over 1901 and 164·5 per cent over 1921. The population of Darwha, Digras, Pusad and Wani towns taken together has also increased by 162·9 per cent since 1901.

Rural Population

The rates of variation in rural population and the percentages of rural population to total population of the district and the State since 1901 are as follows :—

Year	Yeotmal District		Maharashtra	
	Rate of variation in rural population	Percentage of rural population to total population	Rate of variation in rural population	Percentage of rural population to total population
1901 ..	..	94·00	..	83·41
1911 ..	+25·63	94·08	+12·68	84·87
1921 ..	+2·07	92·88	−6·77	81·50
1931 ..	+11·45	90·43	+14·77	81·40
1941 ..	+2·71	89·70	+8·54	78·89
1951 ..	+3·01	88·01	+7·72	71·25
1961 ..	+17·03	87·39	+24·51	71·78

The net increase in rural population of the district has been 76·95 per cent over that of 1901 and 38·00 per cent over that of 1921. The corresponding figures for the State are 75·53 per cent and 67·08 per cent, respectively.

The rural population has had three peaks of rapid growth during the last 60 years. The first was in 1911, the second in 1931 and the third in 1961. These peaks represent recovery from famines in 1911, from influenza in 1931 and from the ill effects of malaria in 1961. These peaks were preceded by periods of very low growth.

Size of Villages

Table A-III in Part II shows for the district and for each taluka the number of inhabited villages and their population for each class of villages. The distribution of population by size of villages for the district and the State is as follows :—

Size Class	Yeotmal District		Maharashtra	
	Percentage of the number of inhabited villages to total number of inhabited villages	Percentage of population to total rural population	Percentage of the number of inhabited villages to total number of inhabited villages	Percentage of population to total rural population
Less than 500 ..	56·11	24·37	47·72	15·02
500—999 ..	28·54	34·49	28·55	25·71
1,000—1,999 ..	12·52	27·52	16·62	28·55
2,000—4,999 ..	2·58	11·11	6·18	22·40
5,000 and over ..	0·25	2·51	0·93	8·32

Villages with less than 1,000 population are 84·65 per cent of the total number of villages in the district and have 58·86 per cent of the rural population. Villages with more than 1,000 population are 15·35 per cent of the total number of villages and account for 41·14 per cent of the rural population.

The area, number of inhabited villages, total rural population, average population per inhabited village and the number of inhabited villages per 100 square miles of rural area are shown below for the State, district and each taluka separately.

Average population per inhabited village in 1961 is 589 in the district against 792 in Maharashtra. The average population per village within the district varies from 484 in Wani taluka to 735 in Pusad taluka. The number of inhabited villages per 100 square miles is 32 in the district and 31 in Maharashtra. In the western talukas there are large villages away from each other while in the central and eastern talukas there are smaller villages situated close to each other.

State/District/Taluka	Area in sq. miles (Rural)	Number of inhabited villages	Rural population	Average population per inhabited village	No. of inhabited villages per 100 sq. miles of Rural area
(1)	(2)	(3)	(4)	(5)	(6)
MAHARASHTRA	115,736·3	35,851	28,391,157	792	31
YEOTMAL DISTRICT	5,164·4	1,629	959,945	589	32
1 Darwha Taluka	1,061·6	336	228,067	679	32
2 Yeotmal Taluka	904·8	317	161,779	510	35
3 Pusad Taluka	1,261·1	319	234,384	735	25
4 Kelapur Taluka	1,080·1	336	180,222	536	31
5 Wani Taluka	856·8	321	155,493	484	37

Age Distribution

Tables C-II and C-IV in Part II show the distribution of the district population by five-year age-groups and by single year ages, respectively. Broad age-groups are also shown in Tables B-I, B-II and C-III. The proportions of population by broad age-groups in 1961 for the district and the State are shown in the next column separately for males and females compared with the corresponding proportions for 1951.

Age-group	Percentages of population by age-groups					
	1951 District Total		1961 District Total		1961 Maharashtra	
	Males	Females	Males	Females	Males	Females
0—4 ..	13·32	13·32	15·48	16·08	14·65	15·39
5—14 ..	25·57	25·59	24·86	24·90	25·55	25·77
0—14 ..	38·89	38·91	40·34	40·98	40·20	41·16
15—34 ..	30·98	32·59	32·33	32·89	32·70	33·13
35—59 ..	24·45	22·15	22·64	20·40	22·09	20·16
15—59 ..	55·43	54·72	54·67	53·29	54·79	53·29
60+ ..	5·68	6·37	4·99	5·73	5·01	5·55
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

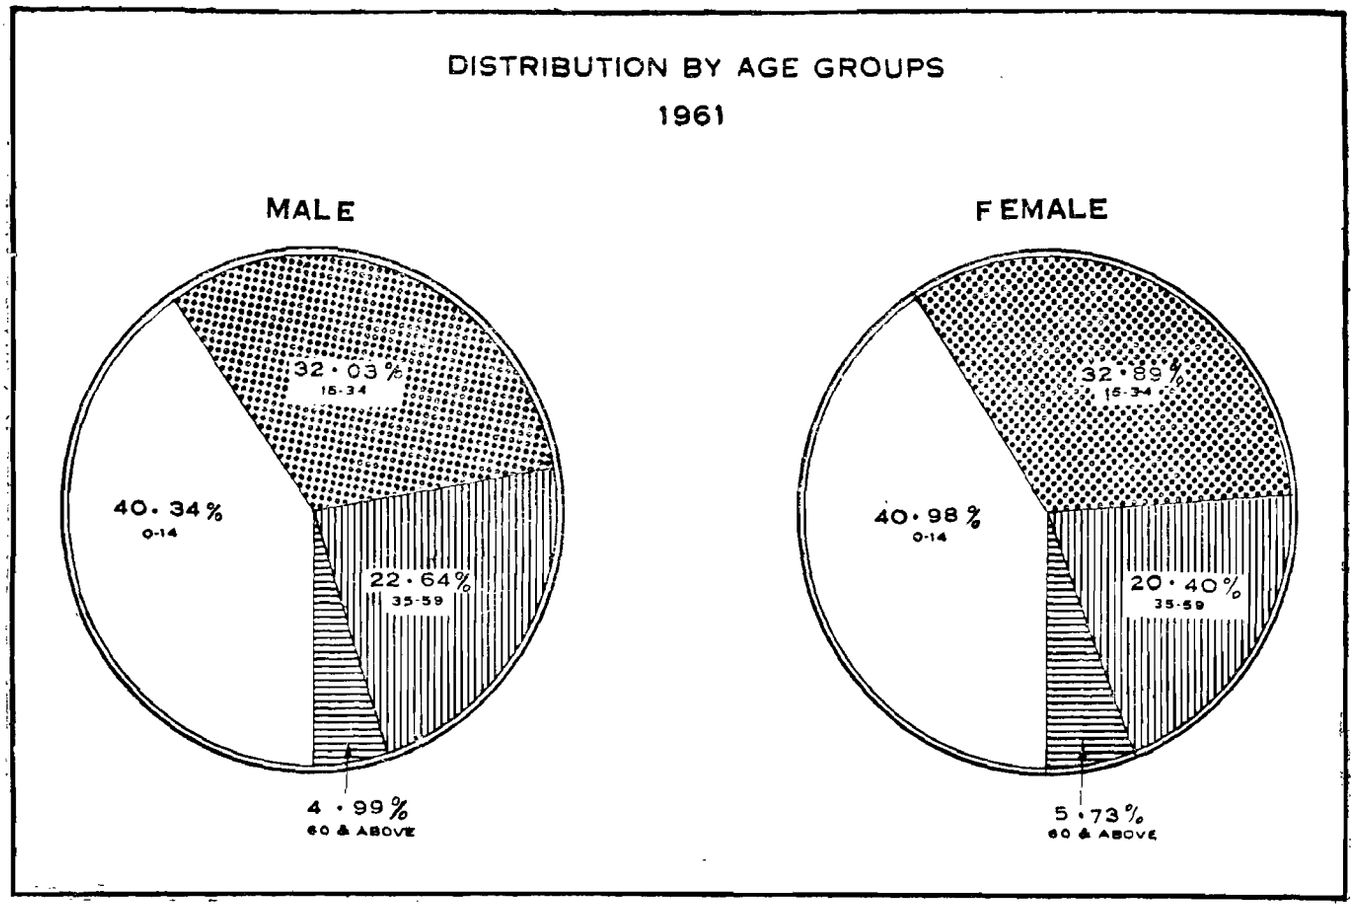


Figure above shows the distribution of the district population by broad age-groups for males and females separately.

During the last decade the proportion of children aged 0—4 increased from 13·32 per cent to 15·48 per cent for males and from 13·32 per cent to 16·08 per cent for females. The same trend is seen for age-group 0—14. In contrast, the proportion for 15—59 age-group decreased from 55·43 to 54·67 per cent for males and from 54·72 to 53·29 per cent for females. Similarly, the proportions for older age-group have decreased both for males and females. The pattern of age distribution in the district is thus similar to that of the State as a whole.

Dependency Ratio

The ratio between dependants (age-groups 0—14 and 60+) and 100 of supporting (age-group 15—59) population has an economic significance. The dependency ratios and their two components of youth (0—14) and aged (60+) groups are shown below for 1951 and 1961 for the district and the State, separately :—

	Yeotmal District			Maharashtra		
	Youth	Aged	Total	Youth	Aged	Total
1951 Total ..	70·6	10·9	81·5	69·9	9·3	79·2
1961 Total ..	75·3	9·9	85·2	75·2	9·7	84·9
Rural ..	75·9	10·0	85·9	80·6	10·8	91·4
Urban ..	71·3	9·3	80·6	63·1	7·3	70·4

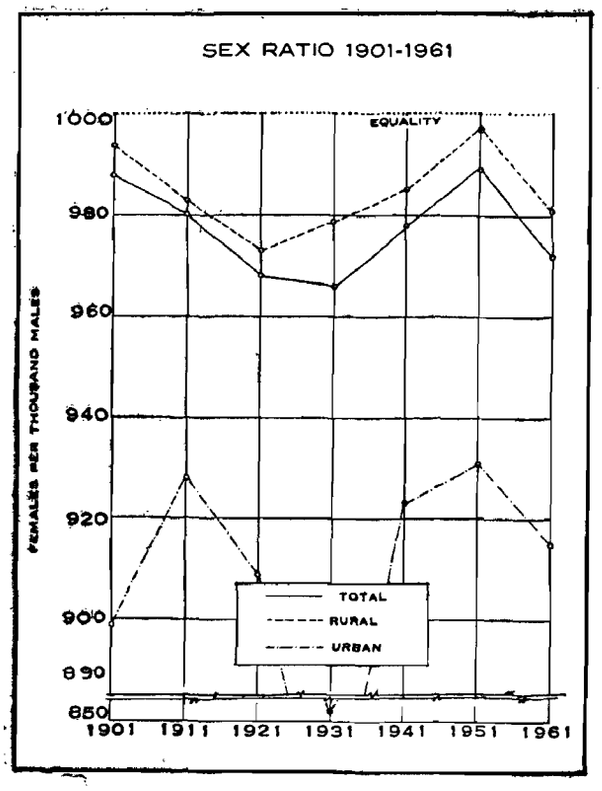
The dependency ratios are higher in the district than those for Maharashtra. Both the components of youth and aged are lower than those of the State for rural areas. The dependency ratios for the State and the district are both higher in 1961 than those of 1951. Although youth dependency has increased the other component of dependency has decreased over 1951. The increase in dependency may be the result both of high fertility and declining mortality. The 1961 population in the district thus has a larger load of dependants than that of 1951. The dependency load is, moreover, larger in rural areas than urban areas. It is the effect of the differences in age structures of rural and urban population resulting from the migration of working age (15—59) people from rural to urban areas within and outside the district.

Sex Ratios

The following have been the sex ratios (number of females per 1,000 male population) for the district and the State since 1901 for total, rural and urban areas separately :—

Year	Yeotmal District			Maharashtra		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	988	994	899	978	1,002	866
1911 ..	980	983	928	966	1,000	796
1921 ..	968	973	909	950	994	776
1931 ..	966	979	852	947	987	790
1941 ..	978	985	923	949	990	810
1951 ..	989	997	931	941	1,000	807
1961 ..	972	981	915	936	995	801

Figure below shows the variation in the sex ratios since 1901 for the district total, rural and urban areas separately :—



Since 1901, the sex ratio of the population of the district varied between 966 and 989 while that of Maharashtra varied between 936 and 978. At each Census, the district has had a higher sex ratio than the State average. The district had the highest sex ratio of 989 in 1951.

Following are the sex ratios for different age-groups of population for the district total, rural and urban areas :—

Age-groups	Total	Rural	Urban
0—14	988	991	963
15—34	998	1,019	874
35—59	876	878	857
60+	1,118	1,121	1,099
All ages	972	981	915

For all the age-groups, the sex ratios are higher in rural areas compared to those in urban areas. It is only for the older age-group that the sex ratio is higher than equality both for rural and urban areas. The higher rural sex ratio in the age-group 15—34 may indicate the out-migration of males to urban areas within and outside the district.

The sex ratios for each taluka in the district for total, rural and urban areas separately are as follows :—

	Total	Rural	Urban
YEOTMAL DISTRICT ..	972	981	915
1 Darwha Taluka	963	967	931
2 Yeotmal Taluka	957	976	896
3 Pusad Taluka	974	980	926
4 Kelapur Taluka	995	1,003	916
5 Wani Taluka	975	981	922

Only Kelapur taluka has a sex ratio which is near equality. Sex ratios of other talukas are close to each other. Urban sex ratio is least for Yeotmal taluka which contains the largest town of the district.

Marital Status

Table C-II in Part II shows the distribution of population by marital status by five-year age-groups. The percentages of population for broad age-groups classified by marital status are shown below compared to those of 1951 :—

Year	Age-group	Total	Marital Status							
			Never married		Married		Widowed		Divorced or separated	
			Males	Females	Males	Females	Males	Females	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
1951	0—14	100	98·06	90·05	1·86	9·79	0·05	0·14	0·03	0·02
	15—34..	100	33·61	7·74	63·46	87·20	2·37	4·46	0·56	0·60
	35—54..	100	1·95	0·82	87·91	70·42	9·39	28·32	0·75	0·44
	55+	100	2·62	0·36	69·61	27·00	25·23	72·47	2·54	0·17
	All ages	100	49·17	37·75	45·39	48·52	4·89	13·43	0·55	0·30
1961	0—14..	100	99·64	96·44	0·35	3·47	0·01	0·04	Negligible	0·05
	15—34..	100	35·39	5·05	61·67	90·47	1·80	2·91	1·14	1·57
	35—54..	100	1·56	0·18	89·20	69·34	7·94	29·08	1·30	1·40
	55+	100	1·04	0·14	75·37	22·27	22·56	77·08	1·03	0·51
	All ages	100	51·95	41·25	43·45	45·50	3·90	12·42	0·70	0·83

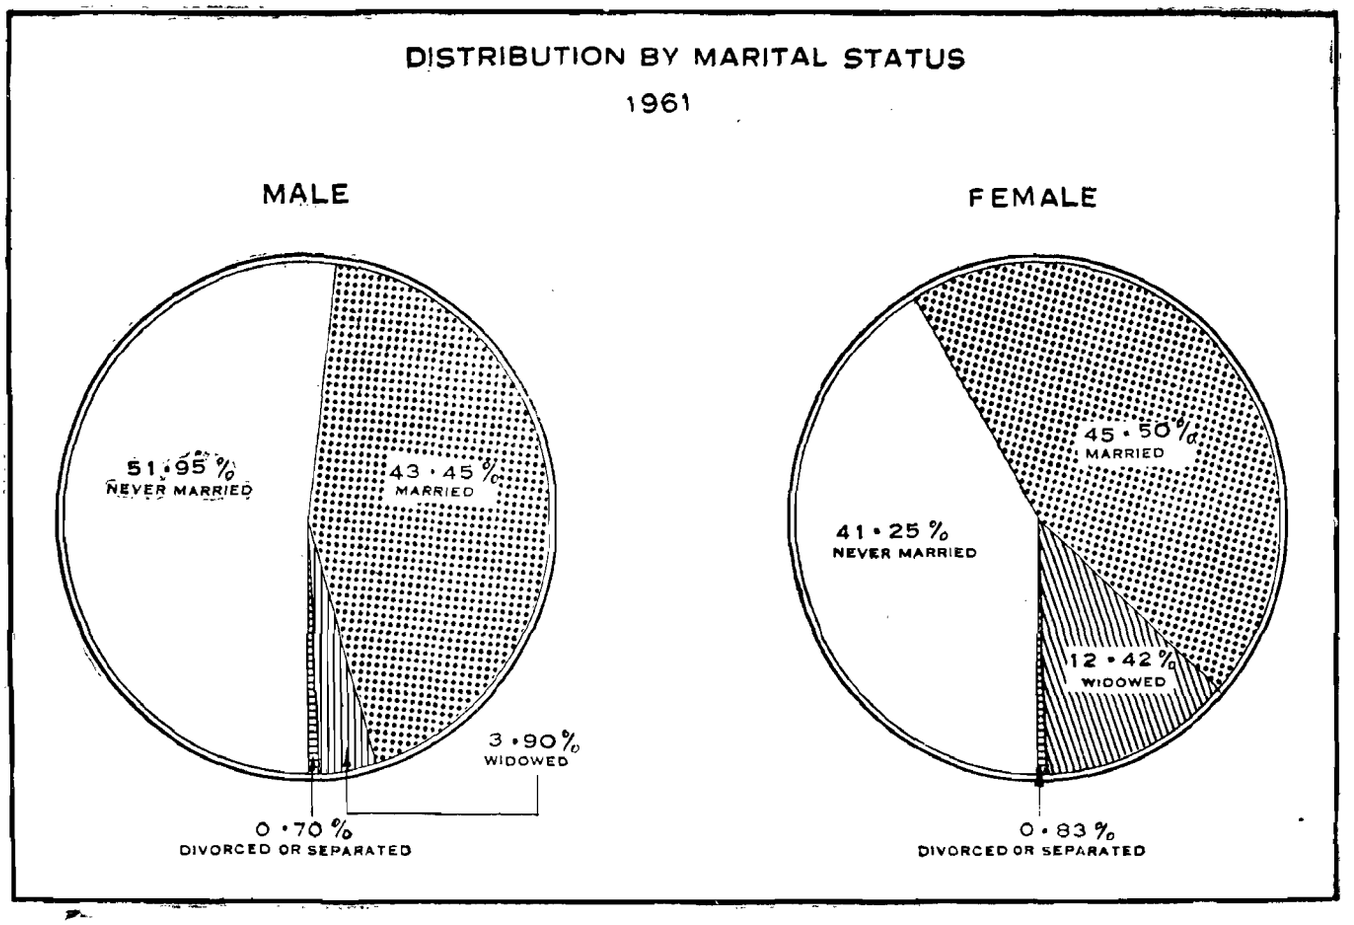


Figure above shows the distribution of the district population by marital status for males and females separately.

During the 1951—61 decade, the proportion of never married has increased both for males and females. There had been a decrease in the proportion of widowed both for males and females. The proportion of divorced or separated showed an increase but the difference is not of any numerical importance. As may be expected, the proportions of married and widowed are higher in rural than in urban areas and the proportion of never married is higher in urban than rural population. It may be explained by the slightly higher age at marriage and the more youthful population in urban areas. The rise in the age at marriage of the total population may be seen from the marital status distribution by age-groups. The proportion of never married in age-group 0—14 has increased both for males and females while for age-group 15—34 it has increased for males alone. It shows that the age at marriage has been lifted up to 14 years for females and much above 14 for males.

Child Woman Ratio

The Table in the next column shows the child woman ratios for 1951 and 1961, i.e., the number of children 0—4 years age-group for every 1,000 women of 15—44 years age-group as well as for every 1,000 married women of 15—44 years age-group. The proportion of widows of 15—44 years age-group to 1,000 married women of 15—44 years age-group is also shown for comparison :—

	Number of children 0—4 years age-group per 1,000 women of 15—44 years age-group	Number of children 0—4 years age-group per 1,000 married women of 15—44 years age-group	Number of widows per 1,000 married women (both in 15—44 years age-group)
1951 District Total ..	595	702	103
1961 District Total ..	737	841	77
Rural ..	745	843	78
Urban	686	826	72

The child woman ratio for rural areas is higher than that for urban areas even when standardised for married women of 15—44 years age-group. This may indicate either a higher fertility or a higher survival rate in rural areas of the district. Over the decade, the ratio has increased from 595 to 737. It may be due both to a substantial reduction in infant mortality.

The number of widows per 1,000 married women in the age-group 15—44 is reduced from 103 in 1951 to 77 in 1961. The incidence of widowhood is higher in rural areas than in urban areas.

Migration

The 1961 Census showed the proportions of population enumerated at places of birth and other places as shown below :—

	Total population	In place of enumeration	Elsewhere in the district	Outside the district but in Maharashtra	Outside Maharashtra
	(1)	(2)	(3)	(4)	(5)	(6)
Persons	1,098,470	597,526	358,938	119,368	20,413
Males	557,010	353,324	148,120	44,714	9,897
Females	541,460	244,202	210,818	74,654	10,516
Percentage to total population—					
Persons	100·00	54·51	32·74	10·89	1·86
Males	100·00	63·54	26·64	8·04	1·78
Females	100·00	45·21	39·03	13·82	1·94

54·51 per cent of the population was enumerated at place of birth. This percentage for males is 63·54 but for females it is only 45·21. The difference is due to women married outside their places of birth. This movement of females on marriage appears to be mostly within the district. Even among persons born in other districts and outside Maharashtra, females, however, have higher proportions.

The sex ratios in the district population by five-year age-groups for total, rural and urban areas are as follows :—

Age-group	Sex Ratios		
	Total	Rural	Urban
All ages	972	981	915
0—4	1,010	1,011	997
5—9	1,016	1,019	991
10—14	920	925	892
15—19	915	953	733
20—24	1,217	1,258	990
25—29	997	1,007	924
30—34	864	863	871
35—39	850	849	855
40—44	917	920	900
45—49	893	898	851
50—54	893	898	861
55—59	809	813	778
60+	1,118	1,121	1,099

The rural-urban differentials of sex ratios are less in younger and older age-groups, though rural sex ratio is almost always higher than urban sex ratio. These differences are more significant in adult age-groups, among which the age-group 20—24 has the highest ratio. The high sex ratio in the age-group 20—24 may be due to the movement of young adult males in search of jobs or for higher education outside the district. The balance is nearly attained in older age-groups. The sudden drop in the sex ratio for age-group 55—59 for total, rural and urban population may also be partly due to misreporting of ages of women of that group in the higher age-group.

The percentage distribution of male population born at the place of enumeration, born elsewhere within the district and born outside the district by nine categories of economic activity and non-workers is shown below. An explanation of the nine categories will be found in the Explanatory Note to Part II, paragraphs 42 to 52.

	Categories of Workers									Non-workers
	I	II	III	IV	V	VI	VII	VIII	IX	
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
District Total	21·71	25·12	1·51	2·21	1·40	0·50	2·62	0·64	4·55	39·74
Born at place of enumeration	21·80	20·97	1·20	1·74	1·09	0·32	2·06	0·44	2·67	47·71
Elsewhere in the district	23·08	35·90	2·17	2·67	1·36	0·68	2·36	0·66	6·39	24·73
Outside the district	17·46	22·81	1·75	4·08	3·49	1·20	6·93	1·87	11·67	28·74

The percentage of non-workers is lower in the population born elsewhere and outside the district. The percentage of agricultural labourers is higher among the people born elsewhere in the district. People born outside the district are engaged more in tertiary sector.

Size of the Household

Table C-I-A in Part II shows the distribution of sample households classified by size. Percentage proportions of different types of households are as follows :—

	Total	Rural	Urban
Single member	7·33	6·97	9·93
2—3 members..	27·37	27·34	27·54
4—6 members..	46·47	47·17	41·45
7—9 members..	15·10	14·96	16·18
10 members and more ..	3·73	3·56	4·90
All sizes	100·00	100·00	100·00

Among the different size groups, households with 4 to 6 members are more common (46·5 per cent) than others. The percentage distribution of rural and urban households by their size shows that only medium size households are more (47 per cent) in rural areas than in urban areas (41 per cent). The average size of household is 4·6 in rural areas and 4·7 in urban areas.

Household Composition

Table C-I-B in Part II shows the distribution of sample households by the type of their composition. The percentage distribution of population of sample households by relationship for the district is shown in the Table below.

38·95 per cent of the males are heads of households as against 3·82 per cent females. Married sons are 5·96 per cent of the total males. The largest groups are the never married, widowed or divorced relations (males—50·7 per cent and females—50·83 per cent). Proportion of unrelated persons is 0·68 per cent for males and only 0·17 per cent for females. Nearly 34 per cent females are spouses of heads of households. High proportion of females in other married relations includes the daughters-in-law and daughters or sisters of the heads. The heads of the households and their spouses have a higher proportion in rural areas. The proportion of married sons is less in urban areas. It may indicate that the joint family is being replaced by the biological family more in urban areas. Unrelated persons have a higher proportion in urban areas.

	Total		Rural		Urban	
	Males	Females	Males	Females	Male	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
(1) Heads of households	38·95	3·82	39·16	3·78	37·51	4·18
(2) Spouses of heads of households	0·08	33·76	0·08	33·97	0·08	32·20
(3) Married sons	5·96	..	6·14	..	4·76	..
(4) Other married relations	3·63	11·42	3·67	11·55	3 35	10·41
(5) Never married, widowed or divorced relations ..	50·70	50·83	50·48	50·57	52·16	52·72
(6) Unrelated persons	0·68	0·17	0·47	0·13	2·14	0·49
Total ..	100·00	100·00	100·00	100·00	100·00	100·00

Population Projections

On the basis of analysis of demographic data obtained in the 1961 Census, Professor K. V. Ramchandran of the Demographic Training and Research Centre, Chembur, Bombay, has on our request worked out projections for the total population, population in school-going ages (6—11 years) and the labour force (15—59 years) for the district for years 1966, 1971, 1976 and 1981. His projected estimates are shown in the next column.

	Total population (in '000)	Population in school-going ages 6—11 (in '000)	Labour force age-group 15—59 (in '000)
Actual 1951	932	149*	513*
Actual 1961	1,098	173	593
Projected 1966.. ..	1,233	178	664
Projected 1971.. ..	1,376	201	749
Projected 1976.. ..	1,544	215	858
Projected 1981.. ..	1,745	229	989

*Estimated figures taken from 1951 Sample Census Tables.

LANGUAGES

Table C-V in Part II shows the population by nine major languages for the district and each taluka and town separately. The distribution of languages by rural and urban areas of the district is as follows :—

Language	Percentage to total population			Percentage of each language in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Banjari ..	9·40	10·72	0·30	99·60	0·40
(2) Gondi ..	4·37	4·89	0·78	97·74	2·26
(3) Gujarati ..	0·61	0·25	3·13	35·60	64·40
(4) Hindi ..	2·82	1·64	10·95	51·00	49·00
(5) Kolami ..	3·09	3·54	0·04	99·84	0·16
(6) Marathi ..	70·53	71·60	63·07	88·72	11·28
(7) Sindhi ..	0·16	0·01	1·23	3·14	96·86
(8) Telugu ..	3·06	3·07	2·97	87·75	12·25
(9) Urdu ..	5·60	3·98	16·78	62·19	37·81
(10) Others ..	0·36	0·30	0·75	73·54	26·46
All languages ..	100·00	100·00	100·00	87·39	12·61

Marathi is the principal language and is the mother-tongue of nearly 70·5 per cent of the population. In rural areas Marathi speakers account for 71·6 per cent of the population. They make 63·1 per cent of the population in urban areas. Banjari has the second largest number of speakers. Its speakers account for 9·4 per cent of the total population of the district. It is spoken more in rural areas where its speakers are as much as 10·7 per cent against only 0·3 per cent in urban areas. The proportions of Gondi and Kolami speakers are higher in rural areas while the proportions of Gujarati, Hindi, Sindhi and Urdu speakers are higher in urban areas. Telugu speakers are fairly distributed over rural and urban areas.

The comparative position of the languages in 1901, 1951 and 1961 is as follows :—

Language	Percentage to total population		
	1901	1951	1961
(1) Banjari	7·72	9·56	9·40
(2) Gondi	11·89	5·46	4·37
(3) Gujarati	0·23	0·54	0·61
(4) Hindi	1·71	2·88	2·82
(5) Kolami	..	3·39	3·09
(6) Marathi	68·94	69·35	70·53
(7) Sindhi	..	0·12	0·16
(8) Telugu	4·93	3·04	3·06
(9) Urdu	4·50	5·09	5·60
(10) Others	0·08	0·57	0·36
All languages	100·00	100·00	100·00

The proportion of Marathi speakers has increased slightly. The proportion of Banjari speakers increased from 7·72 per cent in 1901 to 9·56 per cent in 1951, but declined slightly to 9·40 per cent in 1961. Gondi speakers showed a decrease in the last sixty years. Gujarati, Hindi and Telugu speakers have more or less retained their respective proportions during the last decade. Proportion of Urdu speakers has increased during the last sixty years. The comparison with the 1901 proportions should however be made cautiously because the 1901 language proportions are pertaining to the Yeotmal district (then called Wun district) as it existed in 1901. The addition of Pusad in 1905 obviously improved the proportions of all languages except Gondi.

RELIGIONS

Table C-VII in Part II shows the population by religions for the district and each taluka and town separately. The distribution of religions by rural and urban areas of the district is as follows :—

	Percentage to total population			Percentage of each religion in	
	Total	Rural	Urban	Rural Areas	Urban Areas
(1) Buddhists ..	8·82	9·61	3·40	95·14	4·86
(2) Christians ..	0·11	0·06	0·43	49·15	50·85
(3) Hindus ..	84·19	85·35	76·19	88·59	11·41
(4) Jains ..	0·51	0·33	1·71	57·49	42·51
(5) Muslims ..	6·32	4·61	18·14	63·80	36·20
(6) Others ..	0·05	0·04	0·13	59·57	40·43
All Religions ..	100·00	100·00	100·00	87·39	12·61

84·2 per cent of the population reported their religion as Hindu. Buddhists account for 9·61 per cent in rural areas and 3·40 per cent in urban areas. Muslims are only 4·61 per cent in rural areas but make as much as 18·14 per cent in urban areas. Christians are more numerous in urban areas. The Hindus and the Buddhists are more numerous in rural than in urban areas. The Christians are the most urbanised group and the Buddhists the least urbanised.

The comparative position of the religions in 1901 and 1961 is as follows :—

	Percentage to total population	
	1901	1961
(1) Buddhists	..	8·82
(2) Christians	0·04	0·11
(3) Hindus	78·83	84·19
(4) Jains	0·39	0·51
(5) Muslims	4·71	6·32
(6) Others	16·03*	0·05
All Religions	100·00	100·00

*In 1901 out of 74,845 persons included in others 74,750 reported their religion as "Animist".

Christians, Jains and Muslims have higher percentages in 1961 than in 1901. The 1901 percentages however applied to the boundaries of the district as it existed then. Hindus had a lower percentage in 1901 compared to 1961, probably because the Tribal people had been classified as "Animists" and included in the group of "Others" which made 16·03 per cent in 1901. The combined percentage of Hindus and others in 1901 got substantially reduced in 1961 due to the conversion of large numbers from the erstwhile Hindu Scheduled Castes to Buddhism.

Sex ratio for each religion is as follows :—

Buddhists	1,016
Christians	838
Hindus	971
Jains	887
Muslims	940
All religions	972

Higher sex ratio for Buddhists indicates that more females were converted to Buddhism than males probably due to fear of losing concessions or opportunity of contesting elective posts available only for (Hindu) Scheduled Castes.

SCHEDULED CASTES

Table SCT-I—Part A in Part II shows the population and its distribution by workers and non-workers for each Scheduled Caste by sex for the district and each taluka separately. Actually, 16 castes are notified as Scheduled Castes in the district but only 10 were reported in the district in 1961.

The distribution of the Scheduled Castes population by rural and urban areas of the district is as shown below.

The remaining six Scheduled Castes for which no one was returned in the district in 1961 are as follows :—

(1) Balahi, (2) Dom, (3) Ganda, (4) Ghasi, (5) Katia, (6) Sansi.

Out of the ten Scheduled Castes reported in the district, the largest number is of Mangs who are concentrated in Pusad, Darwha and Yeotmal talukas. The second largest group is of Mahars who come mostly from the talukas of Darwha, Pusad, Kelapur and Wani. Chambhars formed the third group and are concentrated in Darwha, Pusad and Wani talukas while Madgis who are mostly from Kelapur and Wani talukas are the fourth. Bhangis and Khatiks are fifth and sixth respectively. The remaining Scheduled Castes together form about 0·1 per cent of the total population. Bhangis are mostly concentrated in urban areas, which may be attributed to the scavenging and sweeping services with which they are traditionally associated.

Name of Scheduled Caste	Population		Percentage to total population of the district	Percentage of each Scheduled Caste population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Castes	21,333	21,190	3·87	81·27	18·73
(1) Bahna	9	6	N	100·00	..
(2) Basor	432	437	0·08	44·65	55·35
(3) Bhangi	697	638	0·12	11·61	88·39
(4) Chambhar	3,160	3,029	0·56	82·37	17·63
(5) Dohor	21	44	0·01	43·08	56·92
(6) Kaikadi	76	73	0·01	57·05	42·95
(7) Khatik	610	657	0·12	66·85	33·15
(8) Madgi	2,364	2,507	0·44	92·18	7·82
(9) Mahar	6,539	6,185	1·16	79·60	20·40
(10) Mang†	7,424	7,614	1·37	88·60	11·40

*Inclusive of persons from the Scheduled Castes who have not reported their individual caste.

†Includes Mang-Garudi also. "N" denotes very negligible figure.

The comparative position of the Scheduled Castes population in 1951 and 1961 within the district is as follows :—

	Percentage to total population in		
	Total Areas	Rural Areas	Urban Areas
All Scheduled Castes—			
1951	13·93	14·26	11·48
1961	3·87	3·60	5·75

The reduction of their proportion from 13·93 per cent in 1951 to 3·87 per cent in 1961 is the result of a large number of persons from the Mahar Caste returning their religion in the 1961 Census as Buddhists. Because of the change of religion they are not enumerated as Scheduled Castes, as the Scheduled Castes can be from Hindu and Sikh religions only. But for the change of religion, the total population of the Scheduled Castes would have made over 14 per cent of the district population in 1961.

Literacy

Tables SCT-III—Parts A (i) and B (i) in Part II show the literacy and educational levels for each Scheduled Caste.

The percentages of literacy for the district total population, for all Scheduled Castes and each Scheduled Caste are as shown below:—

The Scheduled Castes as a group are not much behind in literacy than the general population of the district. Mangs, who are the predominant Scheduled Caste of the district, do not seem to have made much progress in literacy compared to the other major Scheduled Castes in the district. It does, however, appear that the Scheduled Castes are also taking advantage of the educational facilities and concessions available in the district.

Name of Scheduled Caste	Rural			Urban		
	Total	Males	Females	Total	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)
District Average	20·30	31·80	8·56	45·52	59·04	30·74
All Scheduled Castes	13·91	24·13	3·75	23·71	37·70	8·75
(1) Bahna	No Literates			..	..	..
(2) Basor	11·60	20·86	2·99	28·48	40·82	15·68
(3) Bhangi	23·87	38·10	7·04	25·51	42·41	7·23
(4) Chambhar	17·40	29·59	4·72	23·28	37·08	8·68
(5) Dohor	10·71	27·27	No Literates	21·03	30·00	25·93
(6) Kaikadi	9·41	20·59	1·96	35·94	52·38	4·55
(7) Khatik	25·27	40·47	9·59	21·67	37·22	10·00
(8) Madgi	5·17	9·65	0·91	4·72	9·55	0·49
(9) Mahar	19·91	33·68	5·88	31·01	45·70	13·02
(10) Mang	10·23	18·24	2·44	14·53	25·82	3·26

Economic Activity

The industrial classification of persons at work and non-workers for the district average, all Scheduled Castes and for each Scheduled Caste is as follows :—

	Percentage of workers in categories			
	Cultivation	Agricultural Labour	All other activities	Non-workers
District Average ..	18·53	27·67	7·97	45·83
All Scheduled Castes	6·30	35·71	15·56	42·43
(1) Bahna ..	..	..	66·67	33·33
(2) Basor ..	1·84	14·50	38·32	45·34
(3) Bhangi ..	0·45	0·15	40·37	59·03
(4) Chambhar ..	10·28	27·02	18·58	44·12
(5) Dohor ..	10·77	12·31	7·69	69·23
(6) Kaikadi ..	3·35	22·15	16·11	58·39
(7) Khatik ..	9·15	17·21	20·36	53·28
(8) Madgi ..	3·76	43·62	16·14	36·48
(9) Mahar ..	9·90	33·59	12·34	44·17
(10) Mang ..	2·98	44·72	12·91	39·39

The proportion of workers for the Scheduled Castes is more than the average in the district. But the proportion of cultivation is lower and that in agricultural labour higher than the district average. This is due to the association of some Scheduled Castes with certain services as well as to a fewer persons owning lands amongst them.

Size of Land Cultivated

Tables C-I and SCT-V—Part A in Part II show a broad classification of cultivating sample households by size of land cultivated for the district rural population and all Scheduled Castes. The proportions are as follows :—

Size of land cultivated	District Rural population		All Scheduled Castes	
	No. of sample households	Percentage	No. of sample households	Percentage
All sizes	18,132	100·00	406	100·00
Less than 5 acres..	1,651	9·11	65	16·01
5—9·9 acres ..	3,197	17·63	91	22·41
10—29·9 acres ..	9,600	52·94	198	48·77
30 acres and over..	3,684	20·32	52	12·81

Out of a sample of 18,132 cultivating households, 406 or about 2·2 per cent households are from the Scheduled Castes in rural areas against their population which is 3·60 per cent of the total rural population of the district. 16·01 per cent of the cultivating households of the Scheduled Castes are cultivating less than five acres of land against the corresponding average of 9·11 per cent for the district. The percentage of cultivating households cultivating land over five acres among the Scheduled Castes is 83·99 per cent against the corresponding average of 90·89 per cent for the district. The proportion of cultivating households is smaller in the case of Scheduled Castes and their participation in agriculture is more as agricultural labourers.

SCHEDULED TRIBES

Table SCT-I—Part B in Part II shows the population of Scheduled Tribes by each Scheduled Tribe separately. 32 Scheduled Tribes have been declared as such only for three talukas, *viz.*, Wani, Kelapur and Yeotmal. Out of them 16 Scheduled Tribes were reported in the notified area in the 1961 Census. This section deals only with those tribes and that too limited to their population in the notified area. It should be noted that because of the area restrictions, there are no Scheduled Tribes in Pusad and Darwha talukas.

The distribution of their population by rural and urban areas is as shown below.

The remaining 16 Scheduled Tribes for which no one was returned in the district in 1961 are as follows :—

(1) Baiga, (2) Bharia, (3) Bhunjia, (4) Gadaba, (5) Kamar, (6) Khairwar, (7) Kharia, (8) Kondh (9) Korwa, (10) Majhwar, (11) Munda, (12) Nagesia, (13) Nihal, (14) Parja, (15) Saonta and (16) Sawar.

Gond with 85,803 persons is the largest Scheduled Tribe in the district. Kolam with 41,013 persons is the second largest and Pardhan with 22,280 is the third. Andh and Pardhi with 4,313 and 1,236 persons, respectively, are the fourth and fifth. The other eleven Scheduled Tribes have very small population and together form less than 0·1 per cent of the total population of the district. The first three major tribes are found in all the three notified talukas of Yeotmal, Kelapur and Wani. Andhs are concentrated more in Yeotmal taluka. Pardhis again are found in all the three notified talukas. The district did not have any Scheduled Tribes population in 1951. The declaration of Scheduled Tribes as such in the three talukas was made in 1956.

Name of the Scheduled Tribe	Population		Percentage to total population of the district	Percentage of each Scheduled Tribe population in	
	Males	Females		Rural Areas	Urban Areas
(1)	(2)	(3)	(4)	(5)	(6)
*All Scheduled Tribes	77,315	78,294	14·17	97·35	2·65
(1) Andh	2,174	2,139	0·39	99·00	1·00
(2) Bhaina	7	5	N	..	100·00
(3) Bhattra	1	2	N	100·00	..
(4) Bhil	23	26	N	89·80	10·20
(5) Binjhwar	..	7	N	100·00	..
(6) Birhul	15	7	N	100·00	..
(7) Dhanwar	26	14	N	100·00	..
(8) Gond	42,783	43,020	7·81	96·82	3·18
(9) Halba	331	343	0·06	71·51	28·49
(10) Kawar	56	45	0·01	100·00	..
(11) Kol	26	27	N	100·00	..
(12) Kolam	20,086	20,927	3·73	99·70	0·30
(13) Korku	2	..	N	100·00	..
(14) Oraon	1	..	N	100·00	..
(15) Pardhan	11,119	11,161	2·03	95·43	4·57
(16) Pardhi	665	571	0·11	100·00	..

*Inclusive of persons from the Scheduled Tribes who have not reported their individual tribe. "N" denotes very negligible entry.

Literacy and Education

The Scheduled Tribes are very much behind in literacy and education than the general population and even than the Scheduled Castes. Male literacy for Pardhis is as low as 0·45 per cent. The female literacy is negligible. Kolams, who are one of the major tribes, also appear to be a depressed group in this respect.

Economic Activity

More than 90 per cent of the workers from Scheduled Tribes are working in agriculture. The proportion of workers in cultivation also compares favourably with that of the general population. The proportion of cultivating households is larger in the case of Scheduled Tribes and their participation in agriculture is thus more as cultivators and not as agricultural labourers like that of the Scheduled Castes.

WELFARE OF BACKWARD CLASSES

The subject of welfare of Scheduled Castes, Scheduled Tribes and other Backward Classes in the district is now in the purview of the Zilla Parishad. In the membership of Standing Committee which is the most powerful committee of the Zilla Parishad at least two members from Scheduled Castes, Scheduled Tribes and other socially and educationally backward classes are required to be elected by the Parishad. This Standing Committee acts as the subject committee for that subject and the District Social Welfare Officer works under it. The Zilla Parishad is also legally required to spend adequate amounts for the amelioration of the condition of Scheduled Castes, Scheduled Tribes and of any socially and educationally backward classes and in particular for the removal of untouchability.

Various schemes for the welfare of Scheduled Castes, Scheduled Tribes and other educationally or socially backward classes are in operation in the district :—

(*i*) *Educational.*—These include schemes of granting tuition fees at all stages of education irrespective of age and income, examination fees of recognised examinations and scholarships to the students from the Scheduled Castes, Scheduled Tribes, Nomadic and Semi-Nomadic Tribes, Vimukta Jatis and the Backward Classes. The concession is awarded in the Primary Schools, High Schools or Technical Schools. 3,822 students benefited from and Rs. 1,95,837 were spent on these schemes during the year 1962-63. Rs. 2,95,492 were spent on 15 backward class hostels and 35 cosmopolitan hostels in the district during the year 1962-63.

(*ii*) *Schemes for Economic Uplift.*—These include schemes of granting loan-*cum*-subsidy for cottage industries and professions and of assistance for purchase of milch cattle to the Scheduled Castes and other backward classes. Under the scheme of loan-*cum*-subsidy for cottage industries and professions, Rs. 15,200 were given to 149 beneficiaries from the Scheduled Castes and Backward Classes from under-developed rural areas during the year 1962-63 and Rs. 6,600 were spent on 59 beneficiaries under the scheme of assistance for purchase of milch cattle.

(*iii*) *Housing.*—A number of housing societies of Backward Classes have been formed in the district. These societies construct houses for their members. Financial assistance in the form of loans and subsidies is given to these societies. Assistance in cash or kind for repairs to houses of Scheduled Castes and other backward classes is also provided. Under this scheme Rs. 64,600 were given on 139 beneficiaries during 1962-63.

(*iv*) *Drinking Water Wells.*—An amount of Rs. 56,000 was spent under this scheme. Out of this Rs. 18,500 were incurred for 12 drinking water wells for Scheduled Castes.

(*v*) *Medical Aid to Scheduled Castes.*—Monetary aid is given to deserving persons belonging to the Scheduled Castes and Rs. 600 were spent during the year 1962-63.

(*vi*) *Agricultural.*—Financial assistance to poor deserving agriculturists from Scheduled Tribes, Vimukta Jatis in under-developed rural areas and other backward classes to purchase ploughs, bullocks, implements, seeds, carts, etc., is given. Rs. 35,740 were spent on 256 beneficiaries under this scheme during the year 1962-63. This includes expenditure of Rs. 4,000 spent for the purchase of 3 oil engines and pumps.

(*vii*) *Schemes for Removal of Untouchability.*—These include various schemes of publicity against untouchability. Sanskar Kendras and Balwadis are organised, film shows and gatherings are addressed at fairs and other places. Kirtan programmes and Melas, inter-caste dinners, celebration weeks and days are also arranged. Building sites are given to Scheduled Castes in caste Hindu localities and subsidy is paid to caste Hindu landlords for letting their premises on hire to Scheduled Castes. Prizes are also awarded to villages which show outstanding work for removal of untouchability. Rs. 5,341, were spent under the schemes during the year 1962-63.

The schemes which were already in operation before the Third Five-Year Plan are treated as committed schemes and those added under the Third Plan are separately treated as Plan schemes. There are in addition some more schemes sponsored by the Central Government.

J-1812—V-b (Yeotmal).

Economic Criterion of Backwardness

Castewise basis of classification of " Other Backward Classes" has now been replaced by a new classification based on income. The income limit was raised from Rs. 900 per annum to Rs. 1,200 per annum with effect from 1st June 1960. All persons whose annual income from all sources does not exceed this limit are irrespective of their religion, caste or community treated as belonging to the "Other Backward Classes."

Concessions to Nav-Bauddhas

From 1st May 1960, the Scheduled Castes converts to Buddhism are treated as eligible for all concessions and facilities available to Scheduled Castes except the statutory concessions under the Constitution and certain special schemes for removal of untouchability, etc., which cannot by their very nature apply to non-Hindus.

EDUCATION

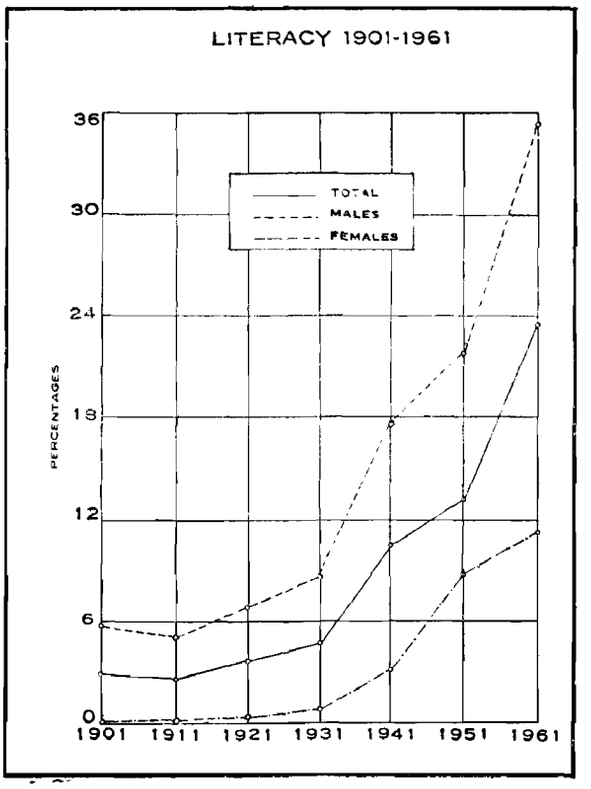
The district has made substantial progress in the sphere of primary education during the decade 1951—61. In 1960-61, all the villages having population of 250 and above have primary schools. In the field of higher education also, the district has been making a steady progress.

Growth of Literacy

Percentage of literacy in the district for total, males and females since 1901 is as follows :—

	Total	Males	Females
1901	2·94	5·65	0·17
1911	2·68	5·15	0·16
1921	3·66	6·84	0·37
1931	4·80	8·63	0·84
1941	10·43	17·67	3·02
1951	14·40	23·77	5·08
1961	23·48	35·34	11·27

Figure to the right shows the growth of literacy in the district for total population, males and females separately.



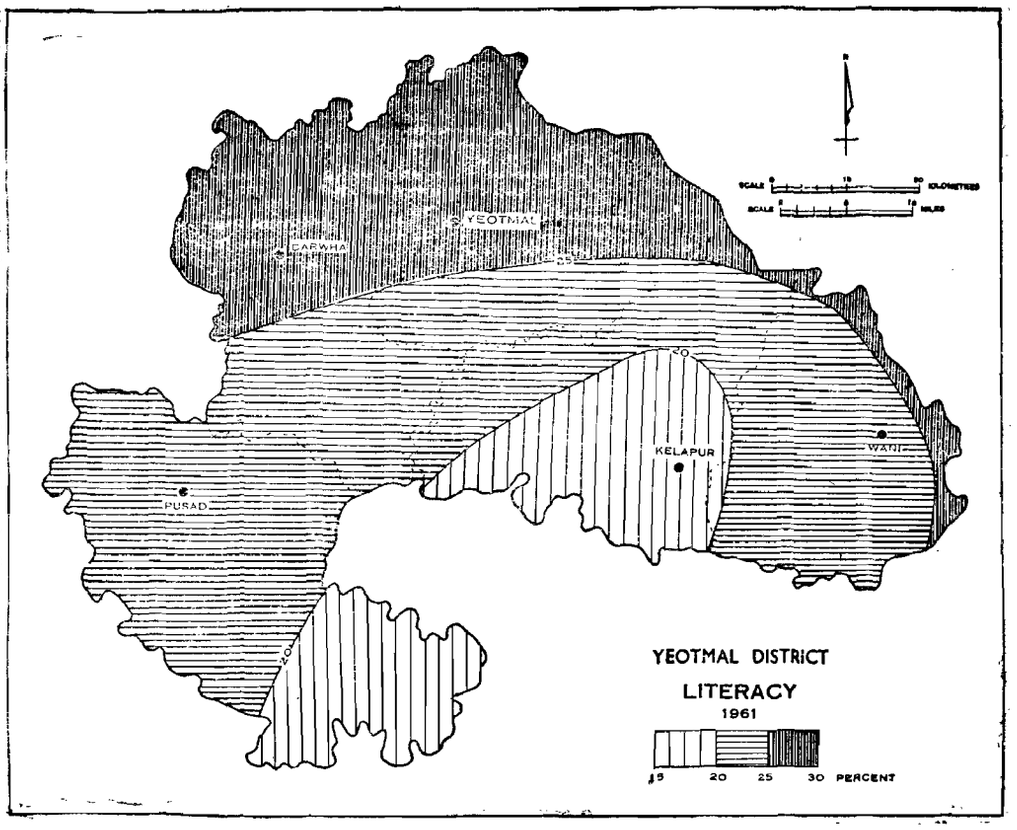
The literacy percentage has increased five times during the last thirty years. The improvement has been very substantial in the decade 1951—61. The progress made is really outstanding in the context of a large tribal population and a small proportion of urban population. A scheme of compulsory primary education introduced by the State Government during the First Five-Year Plan may be one of the factors which helped to improve the level of literacy in the district.

The Primary Census Abstract in Part II shows the number of literate males and females for total, rural and urban areas of each taluka separately.

The Village Directory in Part I furnishes such numbers for each village and for each ward of every town separately. Percentage proportions out of the total population for males and females are shown below for total, rural and urban areas of each taluka separately :—

State/District/Taluka	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Male	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
MAHARASHTRA	29·82	42·04	16·76	21·46	33·51	9·34	51·07	61·62	37·90
YEOTMAL DISTRICT ..	23·48	35·34	11·27	20·30	31·80	8·56	45·52	59·04	30·74
1 Darwha Taluka	25·61	37·96	12·79	23·81	35·97	11·24	40·74	54·38	26·09
2 Yeotmal Taluka	27·58	38·46	16·22	20·51	30·68	10·08	52·70	64·97	39·00
3 Pusad Taluka	21·40	33·76	8·71	18·69	30·65	6·48	42·15	56·86	26·26
4 Kelapur Taluka	18·87	29·42	8·28	16·78	26·95	6·64	41·00	54·40	26·36
5 Wani Taluka	23·83	36·77	10·56	21·42	34·10	8·49	44·53	58·93	28·91

Figure to the right shows the spread of literacy in the district by isopleths.



The northern portion which incidentally lies in the basin of the Wardha river is the most literate area in the district. The literacy rate drops down beyond this region towards the south. The hilly and forest areas in the extreme south in parts of Pusad and Kelapur talukas have the lowest rates of literacy. Within the district Yeotmal taluka has the highest literacy for total, males and females. But Darwha taluka has the highest literacy rate for rural areas. For urban areas also Yeotmal taluka is the highest for total, male and female literacy.

Literacy by Age

The percentages of literates by age-groups for the district total, rural and urban areas are as shown below. Actual figures are shown in Table C-III-A, B and C in Part II which also gives figures for different educational levels separately.

That the education of women is a recent development is evident by the comparatively higher literacy rate for females in the age-group 5—14 against that for males in the age-group 15—34.

Age-group	Total			Rural			Urban		
	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
All ages	23·48	35·34	11·27	20·30	31·80	8·56	45·52	59·04	30·74
0—4	..	..	..	..	..	..	..	..	..
5—14	33·11	42·91	26·21	29·59	38·96	18·99	57·38	62·92	51·52
15—34	31·24	48·66	13·80	26·75	43·83	9·98	60·43	77·76	40·60
35—59	20·60	34·70	4·49	17·50	30·58	2·61	42·65	63·69	18·10
60 + ...	12·51	24·91	1·43	10·37	21·13	0·77	28·05	52·05	6·22

Primary Education

Table 15 in Part III shows the number of primary schools and pupils in them for the district and each taluka in 1951, 1956 and 1961.

The number of primary schools and their classification as on 31st March 1962 are as shown in the next column.

	Total	Basic			Non-basic		
		Senior basic	Junior basic	Single teacher	Single teacher	I-IV multi-teacher	Middle I-VII
Total No. of schools.	1,219	65	82	42	574	340	116
State Government.	28	5	1	..	5	15	2
Zilla Parishad	1,113	60	81	42	559	265	106
Municipal ..	52	..	..	..	1	47	4
Private ..	26	..	..	..	9	13	4

There has been a very rapid growth in the number of primary schools in the district during the last ten years. The number increased from 464 in 1951 to 897 in 1956 and to 1,168 in 1961. On 31st March 1962, it stood at 1,219. Out of the 1,219 primary schools, 1,113 or 91·30 per cent are managed by the Zilla Parishad and only 2·13 per cent are managed by private institutions. The State Government's share (in the year 1961-62) was 88·8 per cent of the total expenditure. The expenditure on primary education is incurred by the State Government through grants-in-aid to Zilla Parishad and building loans and grants to primary teachers' training colleges. Similarly, wards of parents whose annual income does not exceed Rs. 1,200 get free education. The cost borne by the schools on this account is reimbursed from the State Government. Students from Scheduled Castes and Scheduled Tribes and children of political sufferers and of landless labourers get free education at the cost of the Government. Scholarships are given to students from Scheduled Castes and Scheduled Tribes at the rate of Rs. 3 per year in I and II standards and Rs. 6 per year in III and IV standards. Government also gives aid to backward class and mixed hostels for meeting their cost on students belonging to Scheduled Castes and Scheduled Tribes.

The State Government's policy of converting primary schools into basic schools has also made steady progress in the district. In 1960-61 there were 157 basic schools in the district. On 31st March 1962, the number stood at 189.

By 31st March 1962, 8 towns and 1,115 villages in the district had primary schools and 230 villages had schooling facilities, i.e., primary schools situated within a mile from the village. 284 villages did not even have schooling facilities. Total number of teachers was 3,223. Out of them, 1,614 were trained teachers.

Other indices of the progress of primary education in the district compared with those of the State averages are as follows :—

(As on 31st March 1962)

	Yeotmal District	Maharashtra
Average population served by a primary school	912	1,135
Average area served by a primary school (sq. miles)	4·3	3·4
Pupils per teacher	29	38
Pupils per school	76	127
Average annual salary per teacher (Rs.)	1,090	1,250
Average annual expenditure per school (Rs.)	3,157	4,903
Average number of teachers per school	2·6	3·3
Percentage of trained teachers	50·1	64·8

The scheme of compulsory primary education was introduced during the First Five-Year Plan. Initially, it was applied to four towns in the district. During the Second Plan period, the scheme was extended to the remaining four towns, as well as to Community Development Blocks. Children in the age-group 6—10 were covered. One of the Third Plan schemes is to extend the scheme of compulsory primary education to children in the age-group 6—11. A provision of Rs. 70·28 lakhs has been made for primary education in the Third Plan in the district. The additional 1,226 teachers would be appointed in primary schools during the Plan period. The number of students is expected to rise by 61,300. Similarly, 201 class-rooms are proposed to be built during this period.

Secondary Education

The number of institutions imparting secondary education and number of pupils both boys and girls for the years 1951, 1956 and 1961 are shown in Table 15 in Part III. A list of high schools with number of students for each of them may be seen in Table 16.

By 31st March 1962, the number of institutions and their classification in the district are as follows :—

	Total	Vocational High Schools	Higher Secondary Schools: Multi-purpose	Higher Secondary Schools: Ordinary	Middle Secondary Schools
State	8	..	5	..	3
Municipal	2	..	1	..	1
Private	48	..	6	33	9
Janapad (now Zilla Parishad).	13	..	..	5	8

Total number of students on roll in the secondary schools as on 31st March 1962 was 20,829. Out of them, 16,339 were boys and 4,490 girls. Total number of teachers was 941. Out of them, 471 were trained teachers. Percentage of trained teachers was thus 50·0. Other indices of secondary education compared to the State averages are as follows :—

	Yeotmal District	Maharashtra
Population served by each secondary school	15,659	13,805
Area served by secondary school (sq. miles)	73·9	40·8
Pupil-teacher ratio	22	25
Pupils per secondary school	293	338
Average annual salary per teacher (Rs.)	1,724	1,870
Average annual expenditure (direct) per secondary school (Rs.)	29,215	39,543
Average number of teachers per secondary school	13·2	13·7

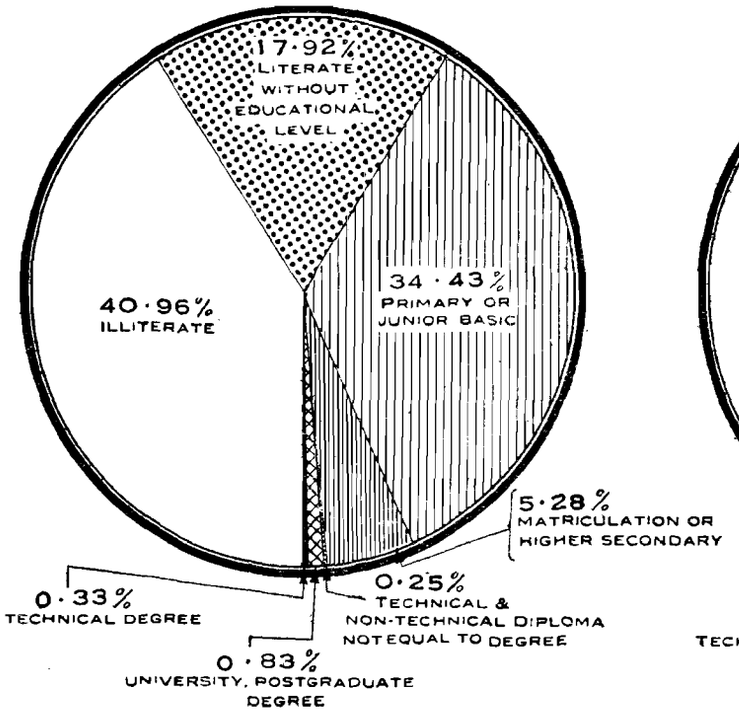
The Figure on page (26) shows the proportions for literates and different educational levels among males and females for rural and urban areas separately.

LITERACY AND EDUCATIONAL LEVELS

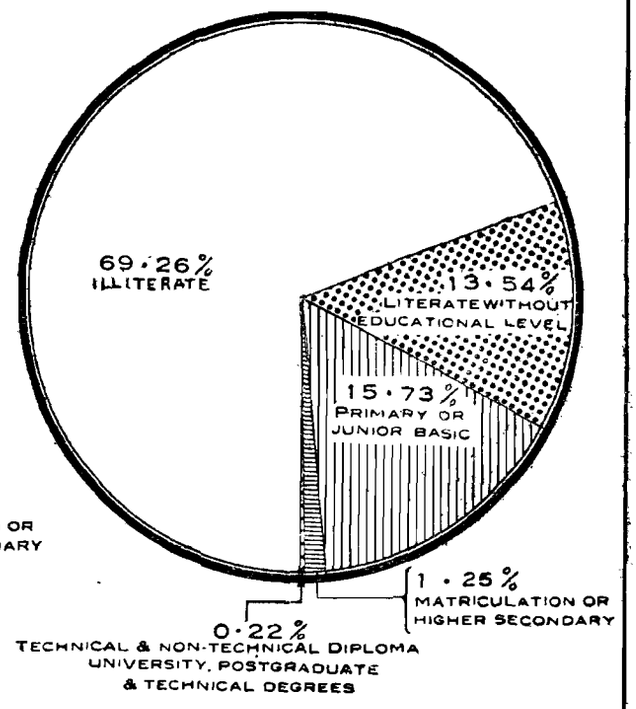
1961

URBAN

MALE

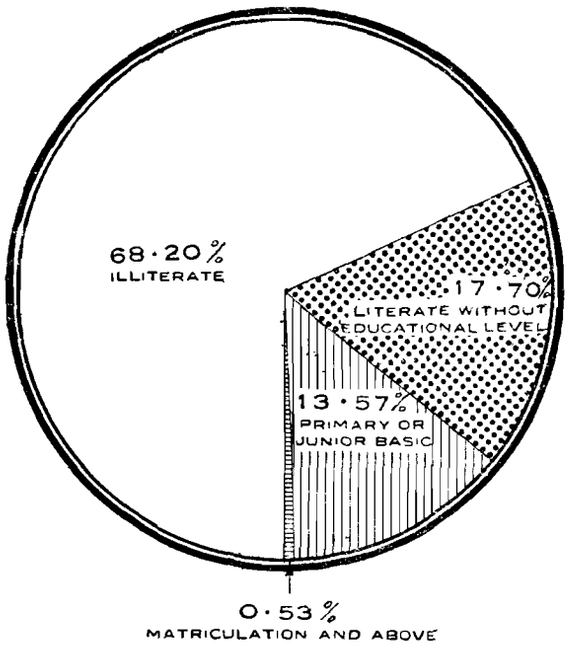


FEMALE

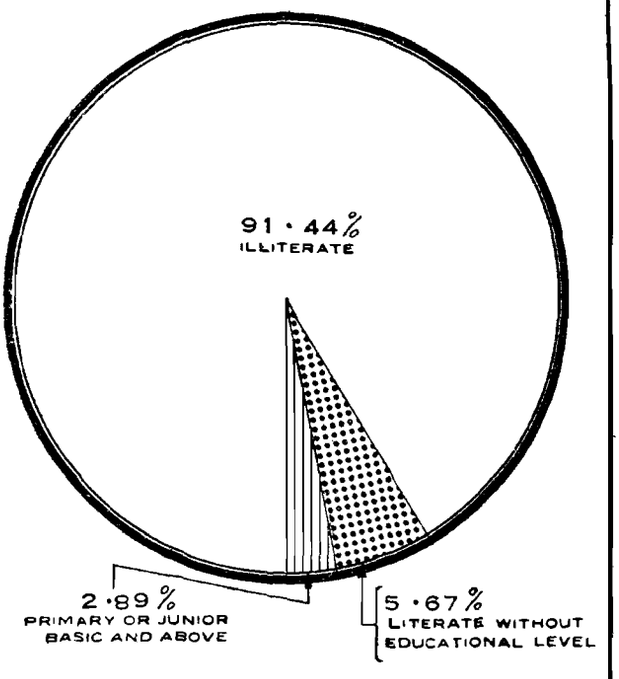


RURAL

MALE



FEMALE



This will show that the progress of secondary education has also been quite steady. The number of secondary schools increased from 27 in 1951 to 35 in 1955-56 and to 59 in 1960-61. This figure stood at 71 on 31st March 1962. The secondary schools are adequately dispersed throughout the district both in urban and rural areas. As per 1961 Wani taluka has seven secondary schools which is the smallest number in the district. Darwha and Kelapur talukas each have as many as 15 secondary schools.

Private institutions manage 67·6 per cent of the secondary schools in the district. The Government's share in the total expenditure on secondary education is (in 1961-62) 78·9 per cent and is incurred, through different schemes of grants for maintenance, salaries, buildings, building sites, equipment, freeships, scholarships, loans, etc., and special concessions to Scheduled Castes, Scheduled Tribes and other Backward Class students.

Looking to the very fast growth in the number of pupils in primary schools, the number of pupils in the secondary schools may rise to 27,000 by 1965-66 and to 36,000 by 1970-71.

S. S. C. and Higher S. S. C. Examinations

The Vidarbha Board of Secondary Education, Nagpur, conducts public examinations at the end of the secondary school course. Two examinations are held every year in March and October, and Yeotmal, Umarkhed, Digras, Darwha, Pusad, Pandharkaoda, Wani, Ghatanji, Ralegaon and Nerparsopant (Darwha taluka) are the examination centres in the district. The number of candidates who appeared and passed from those centres during the year 1962 are as follows :—

	Appeared	Passed
Examination held in March 1962—		
(*a*) S. S. C.	2,677	1,450
Higher S. S. C.	467	273
Examination held in October 1962—		
(*a*) S. S. C.	588	225
(*b*) Higher S. S. C. ..	103	15

Higher Education

Talukawise list of colleges is given in Table 16 in Part III along with the 1960-61 number of students for each college. There were four colleges and the number of students was 805 in that year. The number of colleges has increased to seven in 1962-63. The colleges now provide education in Arts, Science, Commerce, Teaching and Law. There is a private Ayurved Mahavidyalaya and a Government recognised Homoeopathy College, both at Yeotmal. All the colleges are managed by private institutions and receive grants for maintenance, dearness allowance and buildings from Government.

Technical Education

There is one Technical High School at Yeotmal, training students in technical subjects for S. S. C. Examination.

An Industrial Training Institute which is temporarily located at Nagpur provides facilities for training 128 trainees for two-year certificate course in the following trades : Blacksmith, Carpenter, Electrician, Fitter, Turner, Welder and Mechanic. The institute will be shifted to Yeotmal as soon as the new building, which is under construction, is completed.

A Polytechnic catering for diploma courses in engineering is also proposed to be started from June 1964 at Yeotmal.

Libraries

There are 13 libraries in the district which are recognised by the Government of Maharashtra as standing on 31st March 1964.

Printing Presses, Journals and Newspapers

There were 21 printing presses in the district in 1960. Four periodicals are being published, out of which two are weeklies and two monthly journals.

Radio Licences

The number of radio licences in the district has been fluctuating in recent years. It decreased from 1,919 in 1954-55 to 1,609 in 1955-56. It increased to 2,852 in 1959-60 and has again declined to 2,408 in 1960-61.

Cinema Theatres

There were 14 permanent and 4 touring cinema theatres in the district on 21st December 1963.

HEALTH AND MEDICAL AMENITIES

The Health Department's work in the district is now in the purview of the Zilla Parishad. A Subject Committee looks after its working and the District Health Officer works as Secretary to that Committee as well as the Officer-in-charge of Health activities in the district.

Drinking Water Supply.

Column (5) of the Village Directory in Part I shows the sources and adequacy of drinking water for each village in the district.

One town has protected water supply. Out of the remaining towns and villages, 199 villages draw drinking water from rivers, 73 villages from nallahs, 2 villages from tanks, 3 towns and 1,064 villages from wells and 4 towns and 291 villages from more thau one of these sources. The water supply is not adequate in summer in the case of 5 towns and 263 villages.

Malaria Eradication

Under the National Malaria Control Programme, Malaria Control Unit was set up in this district in

October 1956. DDT spraying was carried out in almost all houses. Cattle sheds were sprayed in two rounds every year for four years. A special round was given to 68 flood affected villages of Pusad taluka in 1959. Since May 1958, the Malaria Control programme has been converted into Malaria Eradication programme. Under the new programme, each house is visited every fortnight to find out whether any person is suffering from malaria.

Leprosy Control

There is a Leprosy Clinic at Yeotmal with a subsidiary centre at Darwha and five Survey, Education and Treatment Units for leprosy at Kalamb, Ner, Shirpur, Wani and Pandharkaoda.

Anti T. B.

25,590 persons were tested for B. C. G. and 9,446 were vaccinated during the year 1960.

Control of Small-pox

Under the programme of mass vaccination against small-pox 24 vaccinators were appointed and 311,537 children were vaccinated during 1960.

Family Planning Centres

There are nine Family Planning Centres in the district.

Medical Facilities

Medical facilities available in the district are shown in Table 17 in Part III. The figures in the Table relate to the facilities provided by Government and other aided institutions. The number of private practitioners, hospitals and dispensaries are not shown there.

The number of doctors and nurses, number of beds available and the number of indoor and outdoor patients treated have all increased between 1950—60. The number of doctors increased from 19 in 1950 to 29 in 1960. Similarly, the number of nurses increased from 9 in 1950 to 26 in 1955 and decreased to 25 in 1960. The number of beds increased from 106 in 1950 to 199 in 1960. The number of indoor patients increased from 2,766 in 1950 to 7,618 in 1960. The number of outdoor patients also increased from 217,085 in 1950 to 298,165 in 1960.

Hospitals.—There were 12 hospitals in 1960. The main hospital at Yeotmal, which is now called the District Hospital, Yeotmal, and a private hospital at Umari, run by a Christian Mission, are well-equipped. Facilities for X-Ray and pathological examination are available in both these hospitals. There is also one eye ward equipped with modern equipment in the District Hospital at Yeotmal. A T.B. ward with 50 beds has been attached to the hospital. There is also a T. B. Clinic with 10 beds. One big hospital known as Uttarwar Memorial Hospital has been started at Umarkhed during 1958-59.

Dispensaries.—In 1960, there were six Government or Government aided dispensaries. Besides, there are 24 Ayurvedic dispensaries and one Homoeopathic dispensary in the district.

Primary Health Centres.—At the end of 1960, there were seven Primary Health Centres functioning in the different development blocks in the district. Besides, about 242 first-aid centres have also been established in the same area.

There is one Women's Hospital at Yeotmal and two maternity and child welfare centres at Wani and Digras.

The total number of persons working as Physicians, Surgeons, Dentists, Nurses, Pharmacists and other health technicians in the district is 1,671.

The persons returned in the 1961 Census as Physicians, Surgeons and Dentists and their classification by sex are shown in Table B-V in Part II. The number of medical personnel per one lakh population in the district is 39 as against 54 for Maharashtra.

HOUSING

Tables E-I, E-II, E-IV and E-V in Part II present material on different aspects of housing in rural and urban areas of the district and each taluka separately.

64·1 per cent of all the houses are used as dwellings, 23·7 per cent as cattle sheds, etc., 5·9 per cent were vacant at the time of the Census and the remaining are used as shops, workshops or factories, schools, etc.

The density of residential houses per square mile in the district has increased along with the density of population per square mile from 38·7 per cent in 1951 to 44·9 per cent in 1961. The number of persons per residential house has also slightly increased from 4·62 in 1951 to 4·69 in 1961.

Classified by "owned" and "rented" categories 83 per cent of the dwellings in the district are owned and only 17 per cent are rented. The proportion of "owned" in the rural areas is slightly higher (88 per cent) and very much lower (48 per cent) in the urban areas. Even this low proportion of 48 per cent for the urban areas in the district is somewhat higher than the average of 30 per cent for all urban areas of Maharashtra.

Out of the various materials used for walls, mud appears to be predominant in the district with a proportion of 48·0 per cent. The proportions in the talukas of Yeotmal and Kelapur are much lower and the difference is made up by grass, leaves, reeds or bamboos. Burnt bricks are used next to mud and grass, leaves, etc., as 6·3 per cent of the occupied dwellings are found to be of walls of this type. They are, however, more common in the urban (31·9 per cent) than in rural areas (2·8 per cent). Stone is not used much in the district as only 3·1 per cent of the dwellings have stone walls.

Out of the material of roof, corrugated iron and zinc sheets (C. I. sheets) are predominant in the district with a proportion of 39·0 per cent. C. I. sheets are, however, more common in urban areas. Their proportion in the urban areas is 52·2 per cent against 37·1 per cent in rural areas. In the rural areas along with the C. I. sheets, roofs of grass, leaves, reeds, etc., are also common and have a proportion of 36·3 per cent. C. I. sheet roofs are very common in the western part comprising Darwha and Pusad talukas. The roofs of grass, leaves, reeds, thatch, etc., are found mostly in the rural areas of Yeotmal and Kelapur talukas. The rainfall increases towards the eastern part of the district and the roofs in Wani taluka are, therefore, slopy and are of tiles, slate, shingle, etc. Their proportions in both rural (26·2 per cent) and urban (29·2 per cent) areas are very close.

Classified by the number of rooms occupied, 65·3 per cent of households are occupying one-room dwellings and 23·1 per cent are occupying two-room dwellings. Households occupying larger number of rooms are more in urban areas than in rural areas. Average number of persons per room is 3·06 for total, 3·15 for rural and 2·57 for urban areas.

AGRICULTURE AND IRRIGATION

Agriculture is the most important economic activity as it engages 85·30 per cent of the working population in the district. Many others also work in industries related to processing of agricultural produce or trade, transport and services ancillary to agriculture.

Tables 3 to 10 in Part III present ten years statistics for land utilisation, crop pattern, irrigation, wholesale and harvest prices, livestock and agricultural implements for the district and each taluka separately.

Cultivating Seasons

As in other areas of the State, there are two agricultural seasons, *viz.* Kharif and Rabi, in this district also, but the district is predominantly a kharif crop growing area. Kharif jowar, groundnut, cotton and tur are the important crops of the kharif season while the main crops of rabi season are wheat and gram.

Sowing and harvesting periods of some of the principal crops are shown below :—

Crop	Sowing period	Harvesting period
(*a*) *Kharif Season*—		
(1) Jowar ..	2nd and 3rd week of July.	3rd week of December to 1st week of January.
(2) Groundnut	Last week of June to mid of July.	Last week of September to mid of October.
(3) Cotton ..	3rd week of June to mid of July.	October, November, December.
(4) Tur ..	3rd week of June to mid of July.	Last week of January to mid of February.
(*b*) *Rabi Season*—		
(1) Wheat ..	Mid of October to 1st week of November.	March.
(2) Gram ..	3rd week of September to 1st week of October.	Last week of February to mid of March.

Land Utilisation

The pattern of land utilisation in the district and each of its talukas is shown below compared with that of the State. All the figures are based on the averages for three years from 1957-58 to 1959-60.

Administrative Unit	Percentage of geographical area										
	Total geographical area	Forests	Barren and unculturable land	Land put to non-agricultural uses	Culturable waste	Permanent pastures	Miscellaneous tree crops and groves	Current fallows	Other fallow land	Net area sown	Total gross cropped area
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
MAHARASHTRA	100	17.54	6.08	2.29	2.80	4.75	0.62	3.77	4.46	57.69	60.55
YEOTMAL DISTRICT	100	22.76	5.83	2.86	2.22	2.90	1.73	2.11	5.48	54.11	54.51

LAND PUT TO NON AGRICULTURAL USES
CULTURABLE WASTE
PERMANENT PASTURES & OTHER GRAZING LAND
MISCELLANEOUS TREE CROPS ETC.
CURRENT FALLOWS
OTHER FALLOW LAND
NET AREA SOWN

The Figure facing this page shows the land utilisation pattern for the district and each of its talukas separately for the year 1959-60.

Because of the higher proportion of area under forests the proportion of net area sown to the total geographical area (54·11 per cent) in the district is lower than the average for the State (57·69 per cent). In all other types of utilisation the district proportions are nearly at par with the State averages.

The percentages of net area sown to the total geographical area within the district vary from 49·87 per cent in Pusad taluka to 60·43 per cent in Darwha taluka. The proportion is more than the State average only in Darwha taluka, which, although is the taluka having slightly higher proportion of area under forests, has the least proportion of barren and unculturable lands. On the other hand Pusad taluka, in which the net sown area is nearly half of the geographical area, has a higher proportion of areas both under forests (27·73 per cent) and barren and unculturable categories (9·28 per cent). Only Kelapur taluka has a significant proportion under miscellaneous tree crops and groves. The proportions of areas under culturable waste are very low except in Wani taluka where it is higher than the State average.

Due to the change in the classification of land utilisation effected in 1950-51, camparable statistics, prior to 1950, are not available. It is not, therefore, possible to study the changes in land utilisation over the last 40—50 years. It may, however, be of interest to note that according to the District Gazetteer in 1909-10, 23 per cent of geographical area was covered by forests, 1 per cent under permanent pastures, 4 per cent under culturable waste, 63 per cent was cropped area and 4 per cent was old fallows. The proportions do not appear to be comparable as in 1909-10 the areas were unsurveyed and the statistics had been collected on different definitions.

Crop Pattern

The proportions of areas under important food and non-food crops for the district and each of its talukas are shown below compared with the corresponding figures for Maharashtra. All the figures are averages for the three years 1957-58 to 1959-60.

The Figure on page (33) shows the crop pattern for the district and each taluka separately.

The ratio of areas under food crops to non-food crops in the district is 55:45. This pattern is different from the average for the State where 70 per cent of the gross cropped area is occupied by food crops. Amongst the food crops, jowar with 36·09 per cent of gross cropped area ranks first in the district. Pulses chief of which is tur cover another 12·42 per cent and wheat 2·74 per cent. Compared to the State averages, the district has very low proportion of areas under rice (1·29 per cent), bajri (1·39 per cent), other cereals (0·08 per cent), sugarcane (0·03 per cent) and other food crops (0·78 per cent).

Amongst non-food crops, the proportion of area under cotton to the gross cropped area in the district is nearly three times the average for the State. Cotton is the principal crop of the region and occupies the largest area. Oilseeds cover 6 per cent of the gross cropped area. Groundnut is the principal oilseed of the district occupying 56 per cent of the area covered by oilseeds. The other oilseeds of importance from the average area are sesamum and linseed. Tobacco is not an important crop in the district and occupies almost negligible area and that too only in one taluka, *viz.*, Wani.

Details of cropped area	Percentage of gross cropped area in						
	Maharashtra	Yeotmal District	Darwha Taluka	Yeotmal Taluka	Pusad Taluka	Kelapur Taluka	Wani Taluka
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Gross Cropped Area	100 00	100·00	100.00	100.00	100.00	100.00	100.00
Total area under food crops	69.88	54·82	48·12	51·79	59.29	55.92	59.90
Area under cereals	52.97	41·59	36·96	38·90	46.10	42.06	44.16
Rice	6·67	1·29	0·77	1·03	2.09	1.43	1.02
Wheat	4·68	2·74	0·71	2·13	4.98	1.91	4.17
Jowar	30·95	36·09	33·62	33·90	37.33	37.31	38.69
Bajri	9·42	1·39	1·81	1·79	1.52	1.36	0.25
Other cereals	1·25	0·08	0·05	0·05	0.18	0.05	0.03
Area under pulses	10.69	12·42	10·40	11.98	12.42	13.12	14.86
Sugarcane	0·63	0·03	0·04	..	0.07	0.02	0.03
Other food crops	5·59	0·78	0·72	0·91	0.70	0.72	0.85
Area under non-food crops	30·12	45·18	51·88	48·21	40.71	44.08	40.10
Area under oil-seeds	8·18	6·01	10·21	4·86	4.54	2.49	7.71
Groundnut	6·11	3·77	9·64	3·55	2.93	0.94	0.45
Other oilseeds	2·07	2·24	0·57	1·31	1.61	1.55	7.26
Cotton	13·62	38·52	41·23	42·64	35.28	41.02	31.74
Tobacco	0·12	0·01	...	...	...	...	0.05
Other non-food crops including fodder crops	8·20	0·64	0.44	0·71	0.89	0.57	0.60

Comparable statistics for the entire district prior to year 1950-51 are not available. It is difficult to study the change in the crop pattern in the district. According to the District Gazetteer it appears that in 1909-10, 0·5 per cent of the cultivated area was under rice, 41·3 per cent under jowar, 6·1 per cent under tur, 31·9 per cent under cotton, 2·5 per cent under til, 0·7 per cent under chillies, 2·6 per cent under wheat, 2·0 per cent under gram and 1·3 per cent under linseed. This broadly shows that cotton has gained during the last fifty years at the cost of jowar.

The crop pattern of the district in general is poorer than the average for the State. The State's crop pattern itself is poor, in the all-India setting' because of higher proportion of jowar, bajri and other low-value crops. The district proportions of rice and wheat are considerably lower and that of jowar is higher than the average for the State. The relieving factors are the higher proportion of area under cotton and better yields for jowar and tur.

Within the district only minor variations are noticed in the cropping pattern. The proportion of food crops is more than the non-food crops in all the talukas except in Darwha taluka. Pusad and Wani talukas have sizable proportions of areas under rabi crops like wheat and gram. Pusad and Wani talukas have comparatively lower proportions of area under cotton. Groundnut is important in Darwha taluka while Wani taluka has higher proportion of area under other oilseeds chiefly sesamum. As described earlier tobacco occupies some area only in Wani taluka.

Nine-year average yields and 1958-59 acreages and outturns of important crops are shown in the next column compared with the corresponding figures for Maharashtra taken as 100.

Crop	Nine-year average yields per acre	1958-59 area	1958-59 outturn
MAHARASHTRA	100.00	100.00	100.00
Rice	64.78	0.73	0.41
Wheat	95.18	1.58	1.73
Jowar	129.56	4.62	4.46
Tur	161.38	7.36	11.38
Gram	93.81	1.90	1.66
Groundnut ..	77.56	2.47	1.56
Cotton	100.00	11.20	8.53
Sesamum	101.55	5.03	4.69
Rape, mustard and linseed.	113.16	3.03	3.20

The district average yield of tur is 60 per cent higher than the average for the State and that of jowar is more than 25 per cent higher than the State average. The average yield of groundnut is, however, considerably lower than the State average. The district has 11·2 per cent of the total area under cotton in Maharashtra. The district contribution in the State's outturn of tur is 11·38 per cent.

The Techno-Economic Survey of Maharashtra has estimated gross value of output per acre of cropped area in 1955-56 at Rs. 50 for the district against Rs. 76 for the State and Rs. 126 for India.

The density of population, proportion of workers working on land to total workers, gross area sown per worker on land and the proportion of gross irrigated area to gross cropped area are shown below for the district and each of its talukas compared with the State averages:—

Administrative Unit	Density of population per square mile	Percentage of workers working on land to total workers	Gross area sown per worker on land (acres)	Percentage of gross irrigated area to gross cropped area
MAHARASHTRA ..	334	69·91	3·50	6·23
YEOTMAL DISTRICT	210	85·30	3·57	0·37
Darwha Taluka	237	88·41	3·44	0·29
Yeotmal Taluka	228	79·05	3·73	0·68
Pusad Taluka	206	87·72	3·43	0·31
Kelapur Taluka	182	86·62	3·71	0·33
Wani Taluka	201	82·94	3·66	0·30

85·30 per cent of total working population work on land of which 34·21 per cent are cultivators and 51·08 per cent are agricultural labourers. This proportion is considerably higher than the average for the State (69·91 per cent). Correspondingly, however, the gross area sown per worker on land is not comparatively high.

The percentage of workers working on land to total workers does not vary much from taluka to taluka. The proportion is considerably higher than the State average in each taluka. The gross area sown per worker on land also does not vary much from taluka to taluka.

Because of very low proportion of irrigated lands the district also has very low proportion of double-cropped area. In 1959-60 the proportion of area under double crops to the net area sown was only 0·87 per cent against the average of 5·05 per cent for the State. The double-cropped area has, however, gradually increased from 6,500 acres in 1950-51 to 15,600 acres in 1959-60. The proportion of double-cropped area is significant only in the talukas of Kelapur (1·20 per cent) and Pusad (1·02 per cent).

Irrigation

Compared to the State average the district has very small area under irrigation. The proportion of gross irrigated area to gross cropped area in the district during 1959-60 was only 0·37 per cent against 6·23 per cent for Maharashtra. The proportion varies between 0·29 per cent for Darwha and 0·68 per cent for Yeotmal taluka. The construction of the projects on Pus and Penganga rivers is likely to change the face of the district in the near future.

Table 4 in Part III gives the break-up for irrigated areas by sources of irrigation for the district and each taluka separately. It is interesting to note that except for negligible portion of land which is irrigated by tanks (100 acres or 1·47 per cent) and by canals (200 acres or 2·94 per cent) the entire irrigation is done by wells, canals and tanks as sources of irrigation appear in Wani taluka only.

The District Gazetteer reports that the area under irrigation during the period 1891 to 1900 fluctuated from year to year roundabout 3 thousand acres, and about 10 thousand acres from 1901 to 1910 and then again from 1910 to 1913 around 3 thousand acres. Statistics for the period thereafter till 1950 are not readily available. In 1950-51 the irrigated area was 7·8 thousand acres (or 0·46 per cent of gross cropped area) but it fell to 6·8 thousand acres (or 0·37 per cent of gross cropped area) in 1959-60.

It is surprising that the irrigated area has actually decreased during the last decade, inspite of a substantial increase in the number of oil engines and electric pumps used for irrigation. The number of oil engines increased from 99 in 1951 to 413 in 1961 and the number of electric pumps increased from 19 in 1951 to 232 in 1961.

Crop Pattern under Irrigation

Table 5 in Part III gives the crop pattern under irrigation. In the year 1959-60, 85·29 per cent of the irrigated area was occupied by food crops and 14·71 per cent under non-food crops. Among food crops, rice covered 2 per cent, wheat 8 per cent, sugarcane 12 per cent, condiments and spices (mainly chillies) 26 per cent and miscellaneous food crops including fruit orchards 52 per cent. Amongst non-food crops 40 per cent were covered by cotton and the remaining 60 per cent by other food crops including fodder crops.

Though in the year 1959-60, 8 per cent of gross irrigated area was under wheat, irrigated wheat in the district formed only 0·71 per cent of the total area under wheat. The entire area under sugarcane was irrigated. The proportion of irrigated area to total area under condiments and spices was 19·23 per cent. The irrigated area under cotton was only 0·06 per cent of the total area under cotton.

Production

The annual outturn of principal crops in the district is shown in Table 6 in Part III. The average production of food crops between 1951—56 and 1956—60 compares with the production of 1951-52 as under:—

Crop	Average production in hundred tons for year		
	1951-52	1951—56	1956—60
Rice	78	51	67
Wheat	40	63	66
Jowar	2,470	1,874	1,424
Bajri	50	45	33
Other cereals	1	1	..
Total cereals	2,639	2,034	1,590
Total pulses	681	709	494
Total foodgrains ..	3,320	2,742	2,083
Groundnut	236	186	128
Cotton	1,484	1,071	1,114

This comparison with a single year as a base may not however be quite reliable as the base year itself might either have been a very good or a bad agricultural season. As it is seen here, 1951-52 looks to have been a very favourable year. The comparison of the results in the achievements during the Plan periods should, however, be used with caution.

Excepting rice and wheat the average annual production of cereals and foodgrains is lower during the Second Plan period than that during the First Plan period. Compared to the year 1951-52, production of almost all the items is considerably lower during both the Plan periods. The production of foodgrains is lower by 17 per cent during the First Plan period and by 37 per cent during the Second Plan period than the production in 1951-52. The production of cotton increased by about 4 per cent during the Second Plan period over the production in the First Plan period.

Agricultural Implements

The number of agricultural implements for the district and for each of its talukas for the year 1951, 1956 and 1961 are separately shown in Section C of Table 9 in Part III.

The remarkable increase in the number of oil engines and electric pumps used for irrigation has already been described. Between 1951—61, the number of iron ploughs has more than doubled and the number of wooden ploughs has increased by 29·17 per cent. The number of sugarcane crushers operated by power decreased by one during the decade and those worked by bullocks declined from 81 to 56. The number of crushers of both types together reduced to about 22 per cent. The number of tractors increased from 30 in 1951 to 98 in 1956 but again declined to 68 in 1961.

By using standard average prices of the agricultural implements shown in Table 9 in Part III, the total outlay on them for the year 1961 may be estimated at Rs. 152 lakhs or Rs. 8·45 per acre of the net area sown. The agricultural implements not shown in the table may not together make more than Rs. 2 per acre. The total outlay on this item in the district may approximately be presumed to be less than Rs. 11 per acre.

Agricultural Extension

Agricultural development in the district is now looked after by the Zilla Parishad. A Subject Committee of the Zilla Parishad deals with it and the Agricultural Development Officer works as a Secretary to that Committee. There are Agricultural Extension Officers at taluka level working under the Block Development Officer. The latter works as a Secretary to the Taluka Samiti. Talatis and Gram Panchayat Secretaries work as Assistant Gram Sevaks. Village Panchayats are expected to work for agricultural extension at the village level.

Agricultural Research

The Agricultural Research Station at Yeotmal had been established in 1920. It has a farm area of 105·55 acres. Research is done in this station on cotton as principal crop and jowar and groundnut as subsidiary crops.

Agricultural Improvements

(*i*) *Increasing the area under Irrigation.*—The most important single item of increasing the agricultural production is enlarging the area under irrigation. Stress is therefore laid on irrigation projects in the Five-Year Plan schemes. There is however very little scope by way of major and medium irrigation projects in the district. Attention so far had been mainly focussed on minor irrigation works such as *bandharas*, wells and tanks. In the First Plan period more stress was laid on construction of new wells and repairs to old ones. In the Second Plan period the work of construction of eight new tanks and improvement to one old tank was completed. These tanks are, however, not directly used for irrigation. They have indirectly helped in raising the water level of wells in nearby areas. Besides these works, construction of Durug tank in Yeotmal taluka, construction of *bandharas* at three places and construction of Ambona canal system in Pusad taluka were started during the Second Plan period and completed in the Third Plan period. These works have raised irrigation potential by about 2,800 acres. Apart from these spill over works, new works of construction of eight tanks and eight *bandharas* have been included in the Third Five-Year Plan. On completion of these schemes, irrigation potential will be increased by about 13,000 acres.

In addition to these minor irrigation works, the Third Plan includes two medium irrigation projects known as (1) Pus river project and (2) Khuni river project. The former has an estimated irrigation potential of about 25,000 acres of which about 5,000 acres will be available by end of Third Plan period. The preliminary work has already started. The Khuni river project is likely to create irrigation potential of about 6,000 acres.

Construction of new wells and renovation to the old ones offer the cheapest and quickest means of increasing the irrigational potential. Between 1950-51 and the end of Second Plan period 1,276 new irrigation wells were constructed and 552 wells were repaired. The Third Plan envisages construction of 2,200 new wells and installation of 1,050 pumping sets.

With the increasing facilities for irrigation the question of the full utilisation of created potential is likely to assume importance. The statistics of the created potential and its current utilisation are however not readily available.

(*ii*) *Improved Seeds.*—Another item of improving food production is the recommendation of appropriate varieties or strains of crops suitable for the tract. The Agriculture Department has recommended the following improved varieties or strains of crops for the district :—

(1) Cotton	..	Buri 147, Buri 394.
(2) Jowar	..	Improved Saoner.
(3) Groundnut	..	AK—12-24.
(4) Tur	..	Tur C-II, E-B-38, Hyderabad—48.
(5) Wheat	..	Hy—65.

Seed farms have been established at 10 places in the district to provide improved seed to farmers. The combined area of all the seed farms is 662·43 acres.

(*iii*) *Soil Conservation or Bunding.*—During the Second Plan period an area of about 40,000 acres has been bunded. The Third Plan target is 1·08 lakh acres involving an outlay of Rs. 57·20 lakhs.

Livestock

The number of livestock for the years 1951, 1956 and 1961 have been shown separately for each taluka and the district in Table 9 in Part III.

There are 10·01 lakhs of livestock in the district in 1961. This makes 55 livestock per 100 acres of cultivated area. The corresponding figure for the State is 139.

The total bovine population in the district in 1961 is 79·84 per cent of the total livestock. The number of male bovines over three years are 2·8 lakhs. The area cultivated per pair of male bovines over three years is thus 13·16 acres as against 5·48 acres for Maharashtra. There are 3 lakhs female bovines over three years in the district. That makes 273 female bovines over three years per 1,000 population, which is considerably higher than the average for Maharashtra (159).

The total livestock increased by 13·94 per cent during the decade 1951—61. During the first five years from 1951—1956, all types except horses, ponies and other livestock increased, but during the next five years there was a small reduction in the number of cattle and also large decrease in sheep, horses, ponies and other livestock. This resulted in reducing the sheep population in 1961 to two-thirds of its size in 1951. Horses and ponies reduced to almost half the number during the decade. The number of goats has increased by 57 per cent. The number of poultry has increased by 167 per cent in the decade.

Veterinary Facilities

Veterinary dispensaries are located at the following 13 places in the district :—

(1) Yeotmal, (2) Darwha, (3) Pusad, (4) Umarkhed, (5) Wani, (6) Pandharkaoda, (7) Digras, (8) Shambhalpipri, (9) Maregaon, (10) Patanbori, (11) Babhulgaon, (12) Ralegaon and (13) Ghatanji.

In addition, there are veterinary aid centres located at 32 different places in the district. Treatment of animal diseases, control of epidemics, castration of bovines and control and destruction of animal parasites are the main services rendered at these dispensaries.

Majority of cattle found in the district are of Gaolao breed. The Hariana breed is recommended and is found in Pusad and Darwha talukas and parts of Yeotmal taluka and the Gaolao breed in the remaining areas. The buffalo breed is mostly of Nagpur type giving very rich milk. Murra animals are also found to a small extent.

Nine key village centres have been established in the First Five-Year Plan for improvement of cattle breed in the district. In the Second Plan period one more key village centre with six key village units was established. Two breeding bulls of Gaolao breed are maintained for natural and artificial insemination at each key village unit.

There is a cattle breeding farm at Yeotmal which has a capacity to accommodate 50 animals. In 1960-61 a herd of 42 Gaolao cows and two bulls was maintained at this farm. The selective breeding in Gaolao animals is now taken up at this farm to develop the Gaolao breed which is a recognised breed of this region.

A poultry demonstration centre has been established at Yeotmal for development of poultry in the district. It has recently been converted into District Poultry Breeding Farm for taking up poultry development on a large scale.

AGRARIAN STRUCTURE AND LAND REFORMS

Land Tenures

As in the other districts of Maharashtra, the land tenure has been of the Ryotwari type at least since the introduction of the survey and settlement. Under this system each field is considered a separate holding which the ryot holds directly from the State, and the holder or occupant of the field is called the Khatedar. The right of occupancy depends on the regular payment of the assessment by the Khatedar and in case of failure to meet the demand he forfeits his right and the land reverts to the State.

There were 72 Jagir and 358 Izara villages. Jagir villages had been granted by the Nizam as a reward of some services performed or on condition of continuing some services. In the Izara villages, the lands had been granted to the holders on a long-term lease with favourable terms of rent or land revenue but on conditions of populating the villages and bringing their lands under cultivation. There was only one Inam village in the district (Sangam in Pusad taluka) though there were Inam lands in many villages. All proprietary rights in estates, mahals, alienated villages or alienated lands have been abolished under the Madhya Pradesh Abolition of Proprietary Rights (Estates, Mahals, Alienated Lands) Act, 1950.

Record of Rights

A Record of Rights in land is maintained by the Revenue Department for each village separately. It is integrated with annual crop returns and inspections and is, therefore, easily maintained up-to-date. Rights on land in respect of ownership, tenancy, mortgage and other encumbrances are recorded and a form is maintained for each parcel of land separately. It is obligatory on every person acquiring any right on land to report it within three months. Annual revenue accounts are prepared on the basis of the Record of Rights.

Ownership Rights to Tenants

Tenancy rights are regulated under the Bombay Tenancy and Agricultural Lands (Vidarbha Region) Act which is in force since 1958. It provides security of tenure to and payment of only reasonable rents by the tenants.

In pursuance of the "Land to the tiller" policy, the Act provided for compulsory transfer of ownership rights of tenanted lands to the tenants from 1st April 1961, which is known as the "Tiller's day". This was an important step towards the removal of absentee landlordism which was one of the disincentives in any programme of agricultural improvement.

Up to 31st March 1963, ownership rights have been conferred upon 352 tenants for 5,394 acres of land in the district. The prices were fixed by the Revenue Officers in all the 352 cases. There were no cases of tenants who had mutually agreed with the landholders on the prices to be paid by them.

Size of Land Holdings

Census Table B-X (based on 20 per cent Sample) in Part II of this Volume shows that 40·43 per cent of the total number of households cultivate land and the remaining 59·57 per cent do not cultivate any land.

Census Table B-XI (based on 20 per cent Sample) in Part II shows the break-up of cultivating households by size of land cultivated and by interest in the land. 75·65 per cent of the cultivating households cultivate their owned lands only. 12·57 per cent of the households cultivate tenanted lands only and the remaining 11·78 per cent cultivate lands partly owned and partly taken on lease. Percentage distribution of cultivating households by the size of land cultivated is shown below.

The distribution of households in Table B-XI and the same shown in percentages in column 2 below, is based on cultivation (operational) holdings as returned in the 1961 Census.

A classification of holdings on the basis of area owned (against the area cultivated) for the year 1952-53 is shown in Table 10 in Part III. The percentage distribution of those ownership holdings is also shown in column 3 below :—

Area	1961 cultivation holdings	1952-53 ownership holdings
Less than 1 acre	0·11	3·39
1 to 4·9 acres	8·91	26·46
5 to 9·9 acres	17·42	23·20
10 to 14·9 acres	19·58	13·67
15 to 29·9 acres	33·05	18·25
30 to 49·9 acres	12·85	7·44
50+ acres	8·08	7·59
Total ..	100·00	100·00

The average size of cultivation holding in the district in 1960-61 is 18·94 acres. Average size of the ownership holding in the district was 21·9 acres in 1952-53 against the average of 12 acres for the State.

Ceiling on Holdings of Agricultural Land

The Maharashtra Agricultural Lands (Ceiling on Holdings) Act came in force from 26th January 1962. Three local areas, *viz.*, Yeotmal, Darwha and Kelapur have been notified in the district with different

ceiling areas for dry crop land, *viz.*, 108, 114 and 126 acres respectively. In the case of irrigated lands, the ceiling area is the same in all the three local areas, *viz.*, 18 acres in the case of perennially irrigated areas, 27 acres in areas irrigated in two seasons and 48 acres in areas which get irrigation water for one season. Holders of land in excess of the ceiling areas are not now free to transfer or partition any land until the land in excess of the ceiling is determined under the Act. They were required to furnish returns of their holdings to the Collectors. The Collectors are to make enquiries to determine the surplus lands and take them over in possession. Those lands shall afterwards vest in the State Government. The Act also provides for payment of compensation to the holders at specified rates and for distribution of surplus lands to landless or other persons in the prescribed order of priority. At the moment, the enquiries to be made by the Collectors are in progress.

Consolidation of Holdings

The provisions of the Bombay Prevention of Fragmentation and Consolidation of Holdings Act, 1947, were applied to the district in 1960 and work of consolidation of holdings was started in the same year in Yeotmal taluka. The scheme is to arrange mutual exchange of small and scattered fragments of holdings and to make the land holdings as compact as possible. Up to end of March 1963, execution work in respect of nine villages has been completed covering an area of 10,787 acres with 581 holdings. This work is temporarily suspended since September 1962, as the Record of Rights is not up-to-date.

The standard areas specified as minimum necessary for profitable cultivation under the Prevention of Fragmentation and Consolidation of Holdings Act are as follows :—

(*i*) Dry crop lands	.. ..	3·0 acres.
(*ii*) Bagait tari lands	.. ..	0·5 acre.

All plots of land, less in area than the standard area, are treated as fragments and their transfer except to holders of contiguous plots is prohibited.

CO-OPERATION

Administration

The Deputy Registrar of Co-operative Societies is in charge of the co-operative movement in the district. He is assisted by two Assistant Registrars who have territorial jurisdiction and deal with all the aspects of the co-operative movement in the district. In addition an Assistant Registrar works under the Zilla Parishad. He carries out the duties of registration, deciding appeals against non-admission of members, approval to bye-laws and administrative supervision in respect of co-operative societies whose working capital does not exceed Rs. 5 lakhs and whose jurisdiction does not extend beyond the district. The Zilla Parishad also looks to the promotion and extension of co-operative movement in the district.

The co-operative movement though originated in the second decade of the century lacked popular enthusiasm till attainment of independence. Concentrated efforts made during the last decade have resulted in a rapid progress in the co-operative movement in the district. All the villages in the district are now covered by rural co-operatives. Besides agricultural credit, the activities are now extended to processing of agricultural products, dairying, farming, marketing, fisheries, etc.

The following description is based on the report for the year 1960-61.

Co-operative Credit

(*a*) *Agricultural Credit Societies.*—The number and membership of agricultural credit societies have increased at a rapid pace during the last decade especially during the Second Plan period.

The position of agricultural credit societies in 1957-58 and 1960-61 is as under :—

		1957-58	1960-61
(1) Number of Agricultural Credit Societies		514	604
(2) Number of members		34,741	58,889
(3) Share capital	(Rs. in lakhs)	11·82	29·07
(4) Reserve and other funds	(Rs. in lakhs)	5·48	7·91
(5) Working capital ..	(Rs. in lakhs)	68·60	137·54
(6) Number of members to whom loan was advanced		..	43,605
(7) Amount advanced	(Rs. in lakhs)	54·61	108·77
(8) Amount recovered	(Rs. in lakhs)	32·90	116·10
(9) Loans outstanding	(Rs. in lakhs)	56·89	108·69
(10) Overdues.. ..	(Rs. in lakhs)	11·02	32·13

Average membership per primary society in the district is 97 against the average of 96 members for the State. All villages in the district have been covered.

Total owned funds (share capital *plus* reserve funds) of the primary agricultural credit societies in the district amounted in 1960-61 to Rs. 36·98 lakhs and formed 26·89 per cent of their working capital against 26 per cent for the State.

The loan operations of all the primary agricultural societies in the district amounted to Rs. 108·77 lakhs in 1960-61. The average amount of loan per borrowing member in the district worked out to Rs. 249 as against Rs. 329 for the State.

During the course of three years from 1958-59 to 1960-61, the number of societies has increased by 17·51 per cent, the membership has increased by 69·51 per cent, the share capital has multiplied almost one and half times and working capital has doubled. There is also an increase of Rs. 54·16 lakhs in the amount advanced as loans by the societies

in 1960-61 over the amount advanced in 1957-58. The rate of recovery of the loans has however not increased with the result that the proportion of overdues to the outstanding loans which was as high as 19·37 per cent in 1957-58 has risen still higher to 29·56 per cent in 1960-61. This indeed points out the need of improving the recoveries.

Besides the financial activities good progress has also been made by agricultural credit societies in the sphere of services to agriculturists such as distribution of seeds, manure, etc., and in marketing of agricultural produce, etc.

(*b*) *Central Co-operative Bank.*—There were three Central Co-operative Banks working in the district. The Yeotmal Central Co-operative Bank Ltd. was established at Yeotmal in the year 1913 having its area of operation extended over Yeotmal, Pandharkaoda and Wani talukas. The Darwha and the Pusad Banks were established at the respective places in 1930 and 1924 respectively and operate for these two talukas separately. These banks were working as federal financing agencies catering for the credit requirements of all the primary credit societies in the respective talukas. The three banks have from January 1962 amalgamated to form the Yeotmal District Central Co-operative Bank with headquarters at Yeotmal. The Zilla Parishad also transacts its financial business through this bank.

In the year 1960-61, the combined position of these three banks was as follows :—

(1) Number of members—	
(*a*) Individuals	2,327
(*b*) Societies	710
(2) Paid-up share capital .. ..(Rs. in lakhs)	25·21
(3) Reserve and other funds ..(Rs. in lakhs)	14·19
(4) Deposits—	
(*a*) Individuals .. ..(Rs. in lakhs)	30·77
(*b*) Societies and Banks ..(Rs. in lakhs)	10·09
(5) Borrowings—	
(*a*) State Co-operative Bank and the Reserve Bank of India .. ..(Rs. in lakhs)	79·33
(*b*) Government .. ..(Rs. in lakhs)	0·20
(*c*) Other sources .. ..(Rs. in lakhs)	3·30
(6) Working capital .. ..(Rs. in lakhs)	163·09
(7) Cash—	
(*a*) On hand .. .. ..(Rs. in lakhs)	2·72
(*b*) At Banks .. .. ..(Rs. in lakhs)	28·15
(8) Investments—	
Government and other Trustee securities (Rs. in lakhs)	3·86
(9) Percentage of cash in hand to deposits	6·7
(10) Percentage of investment to deposits	9·4
(11) Loans outstanding—	
(*a*) Individuals .. ..(Rs. in lakhs)	0·65
(*b*) Societies .. .. ..(Rs. in lakhs)	109·31
(12) Percentage of loans outstanding to deposits	269· 2
(13) Percentage of loans outstanding to working capital	67·4
(14) Overdues.. .. .. ..(Rs. in lakhs)	20·05
(15) Percentage of overdues to loans outstanding	18· 2
(16) Cost of management .. ..(Rs. in lakhs)	1·88
(17) Percentage of cost of management to working capital	1·15
(18) Profit .. ..(Rs. in lakhs)	1·16
(19) Number of branches and pay offices in the district	11

During the year 1960-61, the society membership of the Banks increased by 10·25 per cent but the individual membership decreased by 43·44 per cent than the previous year. On the whole there was a decrease of 36·17 per cent in the total membership. The share capital of the Banks more than doubled, there was an addition of Rs. 14·12 lakhs in the owned funds and the deposits increased by 34·02 per cent. There was however a reduction in the working capital by 5·94 per cent. The Banks advanced loans of Rs. 175·81 lakhs as against advances of Rs. 181·21 lakhs in the previous year. However there has been an improvement in the recoveries and the proportion of overdues to outstanding loans have decreased from 34·36 per cent to 18·22 per cent. The Banks made a profit of Rs. 1·16 lakhs during the year as against a profit of Rs. 1·13 lakhs in the previous year. The Banks opened three new branches during the year. Besides providing crop finance the Banks have commenced advancing loans to Co-operative and Marketing Societies on an increasing scale. On the whole the progress of Banks during the year is fairly satisfactory.

(*c*) *Land Mortgage Bank.*—The Primary Land Mortgage Bank was established at the district headquarters in the year 1935 with a view to providing long-term finance to the cultivators. In October 1956, the management of the Bank was transferred to the Vidarbha Co-operative Bank. The management was restored to the elected Board of Directors on 10th March 1961. In 1960-61, the membership of the Bank was 1,107, paid-up share capital Rs. 24,000 and working capital Rs. 4·60 lakhs. Loans amounting to Rs. 1·22 lakhs were advanced during the year. The Bank made a profit of Rs. 3,000 in the same year. The well and oil engine tagai schemes which were previously operated by the Revenue Department have been transferred to the Bank. This has made a favourable impact on its progress.

The Bank exceeded the target of Rs. 80,000 set for the district by the State Land Mortgage Bank in respect of rural debentures floated by the State Bank by Rs. 3,100.

(*d*) *Urban Banks and Credit Societies.*—There are in all 43 urban banks and credit societies in the district. Nine of them are urban credit societies, 32 are salary earners' societies and two are other types of societies. Their combined membership in 1960-61 was 2,828, paid-up share capital Rs. 1·69 lakhs and working capital Rs. 8·99 lakhs. The societies advanced loans of Rs. 7·68 lakhs during the year. Thirty-two societies made a profit of Rs. 15,000, six suffered loss of Rs. 3,000 and three others neither made profit nor loss. There is a proposal to organise Urban Co-operative Banks at Yeotmal, Wani, Pusad, etc.

Agricultural Processing Societies

There are three cotton ginning and pressing co-operative societies organised in the district. Their combined membership is of 214 societies and 310 individuals. The paid-up capital is Rs. 3·74 lakhs and working capital Rs. 4·18 lakhs. Only two societies were in operation and during the year 63,620 cwts. of cotton was ginned by them. The societies made a profit of Rs. 17,000 during the year.

Industrial Societies

There are five weavers' societies and 59 other industrial societies in the district. All the weavers' societies are handloom weavers' societies. Their combined membership is 465, share capital Rs. 9,000 and working capital Rs. 15,000.

The other types of industrial societies include 11 oil ghanis, 2 cane and bamboo workers, 6 tanning, 10 leather working, 2 carpentry and smithy, 15 pottery and brick-making, 3 neera and palm gur and 10 miscellaneous societies. Their combined membership is 1,426, share capital Rs. 93,000 and working capital Rs. 3·03 lakhs. The value of production by these societies is Rs. 3·53 lakhs and sales value Rs. 3·35 lakhs.

Forest Labourers'and Labour Contract Societies

There are 8 Forest Labourers' Co-operative Societies and 11 Labour Contract Co-operative Societies in the district all of which were registered during the year under report. These forest labourers co-operative societies have membership of 154, share capital Rs. 7,825 and working capital Rs. 10,754. They could not secure forest coupes during the year as they were registered late. However they have been allotted coupes during the year 1961-62.

The eleven labour contract societies have a combined membership of 295, share capital Rs. 9,000 and working capital Rs. 48,000. Five of them made a profit of Rs.19,000. Five suffered loss of Rs. 2,000 and one showed neither loss nor profit. Out of these 11 societies, 8 societies were provided work by P. W. D. authorities and Block Development Officers and other private concerns. The Labour Contract Co-operative Society Ltd., Maregaon, had an excellent performance during the year as without any financial assistance from Government or any Central Financing Agency it executed a large number of contracts. The society has purchased a truck of its own.

Co-operative Farming Societies

There are 65 collective farming, 6 joint farming and 4 Gram Swarajya societies. The collective farming societies have a membership of 1,112, Rs. 1·32 lakhs as share capital and Rs. 2·80 lakhs as working capital. The area under cultivation by these societies is 8,225 acres out of 10,620 acres under command.

The joint farming societies have 98 members, Rs. 23,100 as share capital, Rs. 66,000 as working caiptal and 1,450 acres under command of which 1,206 acres are cultivated.

The Gram Swarajya societies have 43 members and Rs. 20,000 as working capital. The area under cultivation by these societies is 348 acres out of 453 acres under command.

During 1960-61, 21 societies made a profit of Rs. 26,175 and 31 societies sustained a total loss of Rs. 29,495. The remaining 23 societies neither made any profit nor loss.

Lift Irrigation Societies

Two co-operative lift irrigation societies have been registered in this district, one at Hatala and the other at Digras. Their combined membership is 50, share capital Rs. 30,000 and working capital Rs. 66,000. The area under command of these societies is 425 acres. Both these societies are yet to start functioning. They have almost completed the civil portion of the works under the scheme.

Dairy Societies

One dairy union and 20 milk supply societies have been organised in the district. The milk supply societies undertake to collect milk. It is distributed through the centres of milk union. The milk union extends credit facilities to the member societies. The union has the membership of six societies and 72 individuals, share capital of Rs. 6,000 and working capital of Rs. 28,000. The milk union sold milk and milk products worth Rs. 56,000 during the year 1960-61.

The combined membership of the milk supply societies is 392 individuals, the paid-up capital Rs. 14,000 and working capital Rs. 17,000. Milk worth Rs. 40,000 was sold during the year. Twelve societies made a profit of Rs. 2,000, one suffered loss of Rs. 5,000 and seven others neither showed profit nor loss.

Fishermen's Societies

There are three societies having membership of 132 and share capital of Rs. 1,595. These societies received Rs. 4,000 as loan from the Government. One of the societies made a nominal profit and two suffered a loss of Rs. 1,000 each. The value of catch by the societies during the year was Rs. 3·6 thousands.

Purchase and Sales Societies

There are six purchase and sales societies in the district. These societies together have 444 society members and 3,581 individual members and Rs. 2·28 lakhs as share capital. The Government has contributed Rs. 1·06 lakhs in the share capital of the societies. The societies cover all the 15 regulated Mandies in the district. The societies own 5 and hire

10 godowns. The societies earned Rs. 35,000 as commission during 1960-61. Five of these societies made a profit of Rs. 72,000 and one suffered loss of Rs. 8,000.

The main business of the societies is to arrange for sale of agricultural produce and to distribute improved seeds, chemicals, fertilisers, agricultural implements, iron, steel, etc. Outright purchases of agricultural produce in the market on a limited basis have also been undertaken by some societies. Sale of agricultural produce through the Adat shops of these societies is being tried and the same is gaining momentum day by day.

Consumers' Movement

There are 20 primary consumers' stores in the district. Their combined membership is 2,024 and share capital Rs.29,000. During the year 1960-61 the value of sales of these societies amounted to Rs. 3·61 lakhs. Ten of these societies made a profit of Rs. 9,000, five suffered loss of Rs. 5,000 and five others neither showed profit nor loss.

Most of these stores are running in rural areas and are engaged in limited activities like running fair-price shops.

Housing Societies

On 30th June 1961, there are 22 co-operative housing societies in the district. Their total membership is 1,179, share capital Rs. 1·67 lakhs and working capital Rs. 35·14 lakhs. The societies advanced loans of Rs. 4·52 lakhs during the year to members for constructional purposes. 298 independent houses valued at Rs. 36·99 lakhs have been constructed by the members of the societies. The societies also built 26 independent houses valued at Rs. 3·87 lakhs and 90 tenements valued at Rs. 5·12 lakhs up to the end of 1960-61.

Co-operative Activity for Backward Classes

There are 22 farming societies and 16 housing societies organised by Backward Class persons. In addition there are 17 agricultural credit societies wherein the percentage of members belonging to Backward Classes is more than 50 per cent.

The farming society has a membership of 570 individuals, share capital of Rs. 23,000 and working capital of Rs. 78,000. The area cultivated during the year by these societies is 943 acres. The societies received loans of Rs. 48,000 and subsidy of Rs. 20,000 from the Government.

The housing societies have 410 members. Their share capital is Rs. 9,000 and working capital Rs. 1·96 lakhs. The societies have constructed 23 tenements so far. The Dalit Griha Nirman Sahakari Society Ltd., Yeotmal, received financial assistance of Rs. 89,000 as loan and Rs. 45,000 as subsidy from the Government.

Audit Classification

The audit classification of different types of societies in the district on 30th June 1961 is as follows :—

Type of society	Number of societies classified as				No. of societies not classified	No. of societies not audited	Total
	A	B	C	D			
(1) Central Co-operative Banks.	1	2	..	..	..	..	3
(2) Agricultural Credit Societies.	7	415	140	11	..	31	604
(3) Non-Agricultural Credit Societies.	4	21	7	2	..	9	43
(4) Primary Land Mortgage Bank.	..	..	1	..	..	..	1

FORESTS

The district has an area of 1,510·18 square miles under forests, of which 1,213·97 square miles are in charge of Forest Department and remaining 296·21 square miles are in charge of Revenue Department. The forest area forms 28·94 per cent of total geographical area as against 17·56 per cent for the State.

Of the forests in charge of Forest Department 840·32 sq. miles occupied by reserved forests of Class 'A' are one of the well-managed and most valuable forests of the State. The area of 300·70 sq. miles are treated as 'C' class reserved forests. These are meant specially for grazing purpose. The remaining area of 72·95 sq. miles comprising protected forests represent the ex-proprietary forests vested in the State.

The forests are distributed all over the district but Pusad taluka has the maximum concentration in the southern portion. This portion along the bank of Penganga river has also the concentration of superior quality.

The forests are administered by the Divisional Forest Officer, Yeotmal Forest Division, who has headquarters at Yeotmal. The Division works under the Conservator of Forests, Amravati Circle. The forests in charge of Revenue Department are looked after by the Collector of the district.

The forests in the district belong to the South India Tropical Dry (Mixed) deciduous type. The forests can broadly be classed as (*i*) Good quality teak forests, (*ii*) Poor quality teak forests and (*iii*) Mixed forests.

(*i*) The good quality teak forests are mainly found in the southern portion of Pusad taluka. Teak is the main species of this type of forests. Trees of 5′ girth and a few of even 6′ girth are found. The other associates of teak found are Ain, Bel, Kalamb, Tiwas, Lendia, Dhawda, Tendu, Semal, Bhiwa, etc.

(*ii*) The poor quality teak forests occur over most of the area. Teak forms over 50 per cent of the crop and in many areas it is almost pure. The other associates of teak in this area are Dhawda, Salai, Ain, Lendia, Tendu, Achar, etc.

(*iii*) The mixed forests occur in patches, mostly in south-east of Wani taluka. Teak is not found. The species found are Ain, Lendia, Dhawda, Tendu, Gevrai, Char, Bija, Beheda, Kalani, Khair, etc.

The forest produce in the district is exploited mainly through the agency of contractors. Since 1961-62, the forest labourers' co-operative societies have also been entrusted with the work. Forest produce worth about Rs. 40 lakhs are exploited annually. Almost all the work is carried out by forest villagers. There are 34 inhabited forest villages in the district. The Forest Division also looks to the welfare of these villagers. According to the 1961 Census 651 persons are working in forestry and logging. Their distribution for minor industrial groups is shown in Table B-IV-C in Part II.

The exploitation of forests in charge of Forest Department is regulated by scientifically prepared working plans. According to the working plan, the forests are divided into seven working circles: (1) Penganga selection-*cum*-improvement working circle, (2) Coppice-with-reserves working circle, (3) Important working circle, (4) Plantation working circle, (5) Pasture improvement working circle, (6) Bamboo overlapping working circle and (7) Miscellaneous working circle. Major portion of the forest is worked under coppice-with-reserves working system under which each patch of forest is treated according to treatment suited to it. Plantations in suitable areas are mostly raised under agri-silviculture.

The following important schemes have been included among others for development of forests :—

(1) *Plantation of valuable trees.*—Plantation of Teak, Semal and Eucalyptus trees in 350 acres involving outlay of Rs. 0·46 lakhs.

(2) *Afforestation for soil conservation.*—200 acres to be afforested involving outlay of Rs. 0·56 lakhs.

(3) *Development of forest pastures.*—Plantation to be raised in 75 acres for which Rs. 0·37 lakhs have been sanctioned. Besides, Rs. 20,000 have been allotted to assist village panchayats for afforestation and development of pastures in the district.

Besides the valuable flora, the district forests are fairly well representative in larger forest blocks. Panthers are common all over the forests. Hyaenas, wolves and wild dogs are restricted to certain areas only. Blue bull, antelope, wild pigs and chinkara are found in a good number throughout the district. Sambhar and cheetal however are found only in some areas. Black buck and barking deer are very rare. Hare, porcupine, peafowl, partridge, quail, blue rock and green pigeons are common throughout the district.

FISHERIES

Fishing activities in the district are naturally restricted to inland waters only, rivers, tanks and ponds being the chief sources. The total length of perennial rivers in the district is about 650 kms. There are also 20 perennial tanks and 80 seasonal tanks and ponds which provide 797 acres of water-spread area, which is adequate for development of fishing industry.

The commercially important varieties of fish found in the district are Murrel, Dhadkya, Botri, Padhan, Tambu, Karvadi, Poshti, Dhoara, Gane or Kanheri, Chela, Katva, Seenghan, Chandri, Mahaseer, Kolus, Magur and Zinga.

These varieties are however not of the fast-growing type. As such, under Five-Year Plan Schemes, quick-growing "Bengal Carps" are stocked annually in the perennial water tanks for propagation of pisciculture. The varieties stocked are Catla Catla, Rohu, Mrigal and Cyprinus Carpio. During the Second Five-Year Plan period about 2·92 lakhs of Carp Fry was stocked while during only the first two years of the Third Plan period the quantity stocked amounted to 2·98 lakhs.

In the 1961 Census, 1,883 persons are reported as engaged in fishing as principal work; 1,684 of them are males and 199 females. Fishermen in the district belong to the communities known as Dheemer, Bhoi and Kahar. As the fishing industry has a limited scope, some of the fishermen take jobs in workshops and few others in seasonal agriculture. Fishing is generally done with the help of gill nets known as Udan or Tangar, cast nets called Bhawan Jal, drag nets or Odhe Jal and Long lines (Dawan). The nets are mostly made of cotton twine but these days nylon is also effectively used. Under the fishery requisites scheme financial assistance in the form of subsidy is given for purchase of nylon and cotton twine.

Six co-operative societies of fishermen have been organised in the district and more societies are likely to be organised for riverine fisheries. These societies are given financial assistance in the form of loans and subsidy. They are also assisted in securing tanks and ponds on lease for pisciculture.

MINING AND QUARRYING

The district is one of the important mineral producing districts of Maharashtra. It is endowed with very rich deposits of coal of non-cocking type which has, however, been exploited only to a small extent so far. The coal fields geologically belong to the Barakar stage of the Damuda series of Gondwana system. The district also has extensive deposits of good quality limestone belonging to Vindhyan system. Barytes has also been reported to occur in a coal seam at Wani. The deposit may, however, not be of much economic importance.

Following is the brief account of the important mineral deposits found in the district :—

(1) *Coal.*—There are two groups of coal fields in the district :—(*i*) The Wani area and (*ii*) A part of Ghugus-Telwasa field. In the Wani area called Rajur or Wani fields, the coalfield extends over about 12 sq.miles from Pisgaon to Warora (in Chanda district). The coal reserves are estimated at 240 million tons. The field contains three seams 18 to 31 feet thick. The quality of coal is fair. The Ghugus-Telwasa field contains a number of seams. One of the seams is 59 feet thick. The coal reserves are estimated at 1,500 million tons and are being exploited presently. Leases for mining of coal were granted in 1960-61 to two colliery companies covering an area of about 4,318 acres. One of the companies was, however, not working. 97,300 metric tonnes of coal valued at Rs. 20·58 lakhs was extracted during that year.

(2) *Limestone.*—The deposits occur in three major contiguous belts :—(*i*) Rajur belt, (*ii*) Khekari-Mauli-Gaurala belt and (*iii*) Kurli-Pardi-Pathri belt. The belts are generally situated in an area flanked on both sides either by Gondwanas or Deccan Trap. The limestones are fine grained, hard compact, dark grey and give foetid smell of petroleum when freshly broken. No bituminous layer or lenses are however noted. At some places the limestones are found to be siliceous.

The Rajur belt is extended over about six miles in length and two miles in breadth. The workable open cast depth is about 60 feet. The estimated reserves of workable limestone are over 1,000 million tonnes. The magnesia and silica contents are low and the limestone is suitable for manufacture of cement. About 32 quarries are in active operation in the belt.

The Khekari-Mauli-Gaurala belt is also about six miles long and two miles broad. Limestone deposits suitable for manufacture of cement are estimated at 1,000 million tonnes. At present no mines or quarries are working in this area.

The Kurli-Pardi-Pathri belt is approximately eight miles long and two miles broad. Deposit reserves of good quality limestone suitable for manufacture of cement are estimated at about 2,000 million tonnes.

During the year 1960-61, 1·22 lakh tonnes of limestone valued at Rs. 4·80 lakhs was extracted as against the output of only 50 thousand tonnes in the previous year.

Large areas of the district are covered with Deccan Trap and stone is quarried at a number of places. In the 1961 Census, 1,004 persons are reported as engaged in mining and quarrying activities ; 713 of them are males and 291 females. Their distribution for industrial minor groups is shown in Table B-IV-C in Part II.

INDUSTRIES

There are practically no large-scale industries, except an oil mill, in the district. The existing industries are mostly of medium and small scale like cotton ginning and pressing, oil mills, weaving, brick-making, etc. The employment in non-agricultural sector leans heavily towards village and cottage industries, i.e., the village artisans working on traditional lines with locally available raw materials or for local demand. The expansion of the Khaparkheda Power Station to supply more power to this district and the establishment of an industrial estate for large-scale and small-scale industries during the Third Five-Year Plan are good auguries for further industrial development in the district in future.

There are in all 24,402 workers engaged in industries, 14,796 or 60·63 per cent of them are in household industries and 9,606 or 39·37 per cent in non-household industeirs. The total number of workers in the registered factories in 1961 is 4,472 which makes 18·33 per cent of all workers engaged in industries, or only 4 factory workers per thousand of total population against 20 per thousand of total population of Maharashtra.

The distribution of workers engaged in each industry major and minor group is shown in Table B-IV-C in Part II. The number of establishments and the number of workers for each industry minor group prepared from the houselists are also shown separately, for each village, in the Village Industries Table presented at the end of Part II.

Large-scale Factories

The only large-scale industry in the district employing 54 workers and using power is the Yeotmal Oil Mill located at Yeotmal. Apart from this, there are no large-scale registered units in the district.

Small-scale Registered Factories

There are 224 small-scale establishments like general engineering, soap manufacture, wooden furniture, cotton ginning and pressing, oil mills, rice mills, dal and flour mills, saw mills, bidi-making, etc. Only 58 out of them are registered and the rest are working as unregistered units. Among the general engineering units, repair workshops and fabrication are quantitatively the most important in the district. There are about 98 cotton ginning and pressing units and oil mills.

In addition, there are a number of rice mills, dal and flour mills and saw mills. Saw mills in the district cut timber of all varieties produced especially in Chanda district. The sawn timber is used in building construction activity and the local wood processing industries.

The total number of registered factories has decreased from 77 in 1956 to 58 in 1961. The number of workers in registered factories has also gone down from 5,043 in 1956 to 4,472 in 1961. This may be attributed to the temporary closure of certain seasonal processing industries like rice or flour mills, dal mills and oil mills.

According to the Census of Manufacturing Industries in 1959, the manufacturing industries in the district had a combined fixed capital of Rs. 30·2 lakhs and working capital of Rs. 13·5 lakhs.

The total value of annual production was Rs. 50·3 lakhs and the value added by manufacture was Rs. 14·0 lakhs. These figures relate only to the industries covered by the Census of Manufacturing Industries Act.

The value added by manufacture in the district in 1959 is only 0·3 per cent of the total for Maharashtra.

Small-scale and Cottage Industries

In the cottage and small-scale industries sector, handloom, Khadi and village industries, handicrafts, cane and bamboo works, oil ghanis, brick-making, pottery, leather and tanning, carpentry and smithy, etc., are some of the important industries in the district. These industries are, by and by, coming more and more under the co-operative fold. The manufacturing industries coming under this sector are traditional crafts conducted as household and cottage industries. Under the supervision of the District Industrial Co-operative Association, the following primary societies have been organised in the sphere of cottage industries in the district :— (1) Weavers' Societies, (2) Oil pressing, (3) Cane and bamboo works, (4) Leather working and tanning, (5) Carpentry, (6) Pottery, bricks and tiles, (7) Soap manufacture, (8) Neera, Tad-gul, (9) Nail manufacturing, (10) Forest Societies and (11) Gramodyog Mandals.

Production and rearing of livestock for milk and animal power engages 5,556 workers. The district is known for its cattle wealth. Th persons engaged specially in breeding the cattle are known as " Gadi " in this district. Cattle of good breed are also exported to other districts of Vidarbha. Digras, Ner, Ghatanji and Wani are some of the well-known cattle markets in the district.

3,904 persons are engaged in the manufacture of miscellaneous textiles out of which 3,628 persons are tailors engaged in making garments for men and women.

Cotton ginning and pressing engages 2,235 workers. These processing industries are spread all over the district. The ginning and pressing units also combine oil extraction work for providing work almost all the year round.

Production of fish by fishing in inland waters engages 1,883 persons. Fishing operations are mostly carried through ponds and tanks. Two co-operative fishing societies have been established during the Second Five-Year Plan in the district.

3,649 persons are working as carpenters, joiners and cabinet makers in the district. They are the carpenters who manufacture, fix or repair doors and door-frames, wooden roof beams, carts, furniture and agricultural implements. A fair amount of furniture is made in Yeotmal town.

1,709 persons are working as blacksmiths. They are the persons who do the iron work required for ordinary agricultural implements. 1,610 workers are engaged as potters. They are the village potters most of whom still work on the traditional *baluta* system under which they get a fixed quantity of foodgrains at the harvest time for supplying earthenware during the year.

Quarrying of limestone around Wani-Manjri in the district is carried out on an extensive scale. Lime kilns have been established around Rajur, the main limestone bearing area.

A licence under the Industries (Development and Regulation) Act is granted by the Government of India for a cement factory in the district with an installed capacity of 2·4 lakh tons annually.

Wool-weaving is also common at some places in the district and coarse blankets of wool are prepared. Darwha and Yeotmal are known for looms for cotton. Dyeing is also carried on at Ner in Darwha taluka. Cotton fabrics are stamped for use as table cloths and floor cloths at Wani. Rough hand paintings on cloth are also done at that place.

Uninhabited.																						225

Pedlars and hawkers set up booths on market days. Agriculturists from the nearby villages also bring their farm produce. In addition, the traders and shopkeepers belonging to the market places also set up temporary stalls. Buyers come from nearby villages within 4-5 miles. The weekly markets start in the morning and after a slack of an hour or so in the afternoon close by six in the evening to enable both the buyers and sellers to reach home before it is dark.

Column (7) of the Village Directory in Part I shows for each village in the district if a weekly market is held and if so on which day of the week. A list of weekly markets in the district given in Table 32 in Part III shows the location and the day on which each bazar is held. The map facing page 228 shows the locations of all these markets and also the days on which they are held.

The District Gazetteer had reported 116 weekly and bi-weekly markets for the district in 1908. Their number in 1960-61 has increased to 206 (this includes 4 bi-weekly markets also) out of which 18 are also cattle markets. 29 markets are held on Sunday, 23 on Monday, 22 on Tuesday, 36 on Wednesday, 36 on Thursday, 33 on Friday and 27 on Saturday.

The map facing page 228 will show that five to eight weekly markets cluster as subsidiaries around a central village. Each place has its bazar on one of the week days keeping the pedlars and hawkers engaged throughout the week and also providing a choice to buyers to go to one nearby market or the other.

Fairs

Fairs vary little from weekly markets and sometimes consist of a gathering hardly known to persons outside the respective villages. Most of the fairs held in the district are associated with important religious festivals. So far as trade is concerned fairs are complementary to the weekly markets. Considerable quantities of agricultural produce, other articles of daily use and cattle are brought for sale. A list of fairs held in the district showing their locations, duration, dates and approximate number of persons attending is presented in Table 33 in Part III. The map facing page 230 shows location of all the fairs in the district having 1,000 or more gatherings. A volume giving details regarding fairs and festivals is also issued separately.

Trade Centres

Apart from the weekly markets and fairs (1) Yeotmal, (2) Digras, (3) Darwha, (4) Ghatanji, (5) Wani, (6) Pusad, (7) Bori, (8) Pandharkaoda, and (9) Umarkhed are important trade centres in the district, as far as collection and export of agricultural produce are concerned. Agricultural produce markets at these places are regulated under the Central Provinces and Berar Agricultural Produce Markets Act, 1935, and the Central Provinces and Berar Cotton Market Act, 1932, and they are known as principal market yards.

Yeotmal, Darwha, Ghatanji, Wani, Pandharkaoda and Umarkhed are the centres where cotton is mainly sold. The combined turnover of commodities (by value in rupees) in all the centres during the year 1958-59 was as follows :—

Market Committee	Total Value in Rs.
Yeotmal	4,22,465
Digras	2,92,076
Darwha	1,62,643
Ghatanji	1,12,446
Wani	3,99,438
Pusad	1,80,075
Bori	72,128
Pandharkaoda	1,07,623
Umarkhed	84,898
Total ..	18,33,792

Workers in Trade and Commerce

The total number of persons engaged in trade and commerce in the district is 15,939 out of which 7,687 or 48·23 per cent are in rural areas and 8,252 or 51·77 per cent are in urban areas. The number of workers in trade and commerce makes 2·68 per cent of all the workers in the district. Darwha, Yeotmal and Pusad talukas contain respectively 22·54 per cent, 23·75 per cent and 22·75 per cent of the district number.

Only 4·34 per cent of the workers in trade and commerce are in wholesale trade, 92·80 per cent in retail trade and 2·86 per cent in miscellaneous trade and commerce. 93 per cent of the wholesalers are in urban areas.

The number of wholesalers trading exclusively in cereals and pulses is only 102. Mostly, the wholesale trade of cereals and pulses appears to be combined with wholesale trade of gur, sugar, spices, oil, etc., as the number for this group is 168 for the district.

A detailed break-up of workers in trade and commerce by industry major groups and minor groups is shown in Table B-IV-C in Part II.

Banking Offices

A list of banking offices with their years of establishment, type and location is given in Table 23 in Part III. Their break-up by talukas and type is shown below:—

	Number of Banking Offices		
	Scheduled	Co-operative	Total
DISTRICT TOTAL ..	11	7	18
1 Darwha Taluka ..	2	2	4
2 Yeotmal Taluka ..	5	1	6
3 Pusad Taluka ..	2	2	4
4 Kelapur Taluka ..	..	..	..
5 Wani Taluka ..	2	2	4

Yeotmal taluka containing Yeotmal town which is the headquarters of the district and also an important cotton trading centre, has one-third of the total number of banking offices in the district. The Central Co-operative Bank has at least one branch office in each taluka except Kelapur taluka which has no banking office at all. Moreover, there are no offices of non-scheduled banks in the district.

The State Bank of India works for the treasury in the district and has branches at Darwha, Digras, Yeotmal, Pusad and Wani.

COMMUNICATIONS AND TRANSPORT

A broad gauge line of 10·39 miles of Rajur-Wani joining to Nagpur-Madras main line at Majri and a narrow gauge line of 41·01 miles linking Murtazapur on Bombay-Calcutta line with Yeotmal, both of Central Railway, pass through the talukas of Wani, Yeotmal and Darwha. Thus the total railway line in the district is only 51·40 miles. The narrow gauge line has nine stations, *viz.*, Yeotmal, Lasina, Ling, Ladkhed, Tapona, Dharwha-Motibag, Bhandegaon, Warud khed and Sangvi, while Rajur and Wani are the only two stations on the broad gauge section in the district.

Existing railway mileage in the district is hardly 0·98 miles per 100 sq. miles of area against 2·66 miles in the State.

Table 21 in Part III shows the existing road mileage in the district as well as its break-up by the type of road surface. The district map facing the title page shows all those roads.

Even though, the important centres in the district are well connected by roads with the adjoining districts of Nanded, Parbhani, Akola, Amravati, Wardha, Chanda and the State of Andhra Pradesh, some of the interior places do not possess good metalled roads to afford easy and quick transport facilities. The district headquarters is connected by roads with all the taluka headquarters. Major portion of the district is hilly and contains broad and deep valleys and the roads are, therefore, fewer in Wani, Kelapur and Pusad talukas. The National Highway No. 7, i.e., Nagpur-Adilabad section of the Banaras-Cape Camorin Highway, passes through the district and has a mileage of 38·87 miles.

During the period 1951—61, the National Highways increased by 32·87 miles, the State Highways by 246·12 miles, the major District roads and Village roads by 39·11 miles and 129·33 miles, respectively. The other District roads, however, decreased by 4·75 miles. Thus the total increase in all types of roads (excluding municipal roads) is 442·68 miles.

Under the Nagpur Plan the district should have 1,936 miles of roads. On 31st March 1961 it was short of that target by 1,141·82 miles.

New Roads

The following roads are being improved (as on 31st March 1962):—

(1) Yeotmal-Kalamb road.
(2) Yeotmal-Amravati road.
(3) Umri-Pandharkaoda road.

New Bridges

Work on the following important bridges is in progress (as on 31st March 1962):—

(1) On Penganga river on Marlegaon-Hatgaon road.

(2) On Penganga river on Shembalpimpri-Kalamnuri road.

(3) On Penganga river on Dhanora-Mahur road.

Posts, Telegraphs and Telephones

The district is included in the East Berar Postal Division. Head Post Office is situated at Yeotmal and sub-offices at taluka headquarters and towns. The bigger villages have branch post offices. During the year 1961-62 there were 14 sub-post offices and 226 branch post offices.

There are Telegraph offices at the following ten places:—

(1) Yeotmal; (2) Darwha; (3) Dhanki; (4) Digras; (5) Ghatanji; (6) Pandharkaoda; (7) Pusad; (8) Umarkhed; (9) Wun (Wani); (10) Wun Bazar.

The following nine places have Telephone connections:—

(1) Yeotmal (H. O.); (2) Darwha; (3) Digras (4) Ghatanji; (5) Pandharkaoda; (6) Pusad; (7) Umarkhed; (8) Wun (Wani); (9) Yeotmal town;

Passenger Road Transport

During the Plan periods, a number of roads connecting the villages were constructed in the district and the buses of the Transferred Road Transport Undertaking were running regularly on these roads. With effect from 1st July 1961, the erstwhile undertaking was abolished and has been amalgamated with the Maharashtra State Road Transport Corporation.

The district is included in the jurisdiction of Nagpur division. The State Transport operations in the district are maintained through the depot at Yeotmal. No separate figures for passenger transport are available for the district. The depot at Yeotmal runs buses on 22 routes which make 138 single trips per day. The district has three temporary bus stations.

Nationalisation of passenger road transport in the district was 34 per cent by the end of Second Five-Year Plan and is expected to achieve 53 per cent by the end of Third Five-Year Plan. In addition the Third Five-Year Plan schemes include expansion of the service to new places on public demand, construction of additional bus stations and pick-up stands and provision of other facilities for the travelling public.

Goods Transport

Separate figures for lorries operated in the district are not available as the Regional Transport Officer working at Nagpur keeps combined records for his region including Nagpur, Akola, Amravati, Buldhana, Yeotmal, Wardha, Bhandara and Chanda districts.

Workers in Transport and Communications

2,985 persons are engaged in transport and 468 in postal, telegraphic and telephone communications in the district. Out of the workers in transport, 357 are in railway transport, 1,186 in motor and bus transport and 1,442 in other kinds of transport like bullock-carts, horses on hire, coolies, etc.

The Village Directory in Part I gives information for each village in the district whether it is served by a railway or a road or has a post office or not.

CONSTRUCTION

The total number of persons engaged in construction is 3,201. 2,803 are males and 398 are females. Their distribution by minor groups is shown in Table B-IV-C in Part II.

5·31 per cent of the workers are engaged in construction and maintenance of dams, waterways, canals, etc., 20·33 per cent in construction and maintenance of roads, bridges, etc., 0·16 per cent in construction and maintenance of telegraph and telephone lines and 74·20 per cent in construction and maintenance of buildings. The large proportion engaged in the construction of buildings is mainly due to the construction of buildings for residential, administrative and industrial purposes. These include in addition to private houses, the construction of houses for backward classes, low-income group, schools, Government offices, health centres, etc., in the district.

All the workers engaged in construction together make only 0·54 per cent of the total workers in the district.

OTHER SERVICES

30,993 persons are engaged in the district in "Other Services". 25,335 are males and 5,658 are females. Major categories out of them are: (*i*) Public Services; (*ii*) Educational Services; and (*iii*) Personal Services. "Public Services" include administrative employees of Central, State and Local Governments, "Educational Services" include all classes of teachers and "Personal Services" include domestic servants as well as barbers, washermen and others rendering services to persons or households. The distribution of workers in other services by minor groups is shown in Table B-IV-C in Part II.

5·21 per cent of the total workers in the district are engaged in "Other Services" as against 8·53 per cent for the State. 26·92 per cent of the total workers in "Other Services" in the district are engaged in "Public Services" and 14·76 per cent in "Educational Services". Both these proportions are higher than the corresponding proportions (23·86 per cent and 12·40 per cent) for Maharashtra. This may be so because the district does not have large urban centres and there are hardly any comparable business centres, labour associations or recreation services. Even the proportion of "Personal Services" in the district 27·42 per cent is slightly higher than the State average of 27·15 per cent.

The number of domestic servants is 2,373 or one for about 463 population. The number of barbers is 2,154. The number of persons in laundry services (including washermen) is 1,556. There are 553 legal practitioners and 1,598 persons working in medical and health services excluding veterinary services.

The number of persons including the teaching staff in technical schools and colleges is 21 and that in other schools and colleges is 4,553.

The number of State Government employees including those now working under the Zilla Parishad is 6,778.

BROAD ASPECTS OF ECONOMY

Individual sectors of economy of the district have so far been described separately. A few broad aspects may now be discussed for the economy as a whole.

Labour Participation Rate

The proportions of workers to total population, males and females, for the district and each taluka are as follows :—

	Percentage proportion of workers		
	Total	Males	Females
MAHARASHTRA ..	47·91	57·09	38·10
YEOTMAL DISTRICT ..	54·17	60·26	47·91
1 Darwha Taluka ..	53·95	60·54	47·10
2 Yeotmal Taluka ..	52·54	59·96	44·78
3 Pusad Taluka ..	52·10	59·71	44·29
4 Kelapur Taluka ..	56·93	61·00	52·84
5 Wani Taluka ..	56·47	60·22	52·62

Labour participation rate varies from 52·10 in Pusad taluka to 56·93 in Kelapur taluka. In all the talukas of Yeotmal district the labour participation rates are higher than those for the State. This is so, both for males and females. Kelapur taluka has the highest labour participation rate in the district both for males and females. Higher labour participation rates in the district are due to the extreme dependence on agriculture and a generally backward economy.

Primary, Secondary and Tertiary Sectors

The Primary Census Abstract shows the distribution of workers in the nine categories of economic activity. Table B-IV-C in Part II shows detailed industrial classification of all workers other than those at cultivation. The percentage distribution of workers in primary, secondary and tertiary activities for the district and the State is as follows :—

	Total workers	Primary	Secondary	Tertiary
Maharashtra—				
Total	100·00	72·25	12·34	15·41
Rural	100·00	88·73	5·68	5·59
Urban	100·00	11·97	36·69	51·34
Yeotmal District—				
Total	100·00	86·83	4·68	8·49
Rural	100·00	92·24	3·28	4·48
Urban	100·00	26·72	20·26	53·02

The primary sector is predominant in the district with 86·83 per cent of the workers engaged against the State average of 72·25 per cent. The proportion engaged in the secondary sector is almost one-third of the State average. Even the proportion (8·49 per cent) of workers engaged in tertiary sector is considerably lower than the corresponding State average (15·41 per cent). It may also be seen that the workers engaged in tertiary sector in urban areas of the district have a higher percentage than that for urban average of the State.

Categories of Economic Activity

The distribution of workers, males and females, by nine categories of economic activities for the district and the State is as follows :—

	MAHARASHTRA			YEOTMAL DISTRICT		
	Persons	Males	Females	Persons	Males	Females
I Cultivation	46.11	40.69	54.79	34.21	36.02	31.87
II Agricultural Labour	23.80	18.12	32.90	51.08	41.68	63.25
III Mining, Quarrying, Livestock, Fishing, etc.	2.16	2.97	0.86	1.58	2.51	0.37
IV Household Industry ..	4.39	4.80	3.74	2.49	3.68	0.95
V Manufacturing other than Household Industry.	6.88	10.22	1.54	1.61	2.32	0.70
VI Construction	1.24	1.69	0.53	0.54	0.83	0.15
VII Trade and Commerce ..	4.52	6.61	1.17	2.68	4.35	0.52
VIII Transport, Storage and Communications.	2.36	3.65	0.29	0.60	1.06	0.01
IX Other Services	8.54	11.25	4.18	5.21	7.55	2.18
Total Workers ..	100.00	100.00	100.00	100.00	100.00	100.00

Although the proportion of workers engaged in cultivation is less in the district than that of the State, the proportion of workers engaged as agricultural labourers is more than double in the district than the State average. For both taken together the district has a much larger proportion than the State average. The proportions of both males and females engaged in agricultural labour are much higher in the district than those of the State average. These larger proportions are due to the land tenures, larger sizes of holdings and mainly to crop pattern dominated by labour intensive crops like cotton.

The proportion in manufacturing other than household industry in the district is extremely low when compared to the State average.

Talukawise distribution of workers in nine categories of economic activities is shown below. Corresponding figures for the State and the district are also shown for comparison :—

State/District/Taluka	I Cultivator	II Agricultural	III Mining, quarrying, livestock, fishing, hunting, etc.	IV Household industry	V Manufacturing other than household industry	VI Construction	VII Trade and Commerce	VIII Transport, Storage and Communications	IX Other services	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
MAHARASHTRA ..	46.11	23.80	2.16	4.39	6.88	1.24	4.52	2.36	8.54	100.00
YEOTMAL DISTRICT ..	34.21	51.08	1.58	2.49	1.61	0.54	2.68	0.60	5.21	100.00
1 Darwha Taluka ..	32.17	56.23	0.89	1.89	1.49	0.35	2.61	0.51	3.86	100.00
2 Yeotmal Taluka ..	26.68	52.37	2.06	2.72	2.53	0.67	3.47	1.41	8.09	100.00
3 Pusad Taluka ..	39.13	48.59	0.95	2.21	1.15	0.67	2.63	0.36	4.31	100.00
4 Kelapur Taluka ..	30.95	55.67	1.98	2.47	0.90	0.54	2.08	0.31	5.10	100.00
5 Wani Taluka ..	42.26	40.68	2.43	3.48	2.25	0.47	2.65	0.50	5.28	100.00

OTHER SERVICES

Distribution of workers by broad nine categories of economic activities is also shown in the Figure facing this page for the district and each taluka separately.

The proportions of cultivators and agricultural labourers differ considerably from taluka to taluka. The proportion of cultivators varies between 26·68 per cent for Yeotmal taluka and 42·26 per cent for Wani taluka. The proportion for agricultural labourers varies from 40·68 per cent in Wani taluka to 56·23 per cent in Darwha taluka. Such wide variations within the district are due to the differences in the fertility of soils and resulting cropping and land holding patterns. Talukas with larger areas under cotton have larger proportions of agricultural labourers.

Labour Participation by Age

The labour participation rates by broad age-groups are shown below for the district for total, males and females separately. Corresponding figures for the State are also shown for comparison :—

Age-groups	Yeotmal District			Maharashtra		
	Total	Males	Females	Total	Males	Females
All ages	54·17	60·26	47·91	47·91	57·09	38·10
0—14 ..	13·33	11·88	14·79	8·72	8·62	8·84
15—34 ..	82·02	91·43	72·59	74·53	87·45	60·90
35—59 ..	87·97	97·98	76·55	81·57	96·86	63·68
60 + ..	59·93	80·69	41·36	49·13	72·82	26·28

Participation rates in the district are higher than the corresponding State averages both for males and females and for all age-groups. This may be an index of the under-developed economy of the district.

Workers by Educational Levels

The distribution of workers by educational levels shown in Table B-III is shown below by percentages for the district total, rural and urban areas separately. Corresponding figures for the State are also shown for comparison :—

	Illiterate	Literate (without educational level)	Primary or Junior Basic	Matriculation and above
Maharashtra ..	68·65	14·11	13·91	3·33
Yeotmal District ..	76·59	11·30	11·05	1·06

Because of lower literacy rates in the district the proportion (76·59 per cent) of illiterate workers to total workers is much higher than the State average of 68·65 per cent.

The proportions of literates without educational level are consequently lower than those for the State. The proportion of Matriculation and above is less than one-third of the State average.

Status of Employment

Table B-IV-B in Part II shows the distribution of workers by status of employment for non-household industries. The percentage proportions of employers, employees, single workers and family workers in the district for total, rural and urban areas are as follows. Corresponding figures for Maharashtra are also shown for comparison. The four classes of workers are defined in paragraph 58 in the Explanatory Note to Part II :—

	Total workers	Class of workers			
		Employers	Employees	Single workers	Family workers
Maharashtra—					
Total	100	3·96	62·18	26·52	7·34
Rural	100	1·57	46·47	38·58	13·38
Urban	100	4·98	68·90	21·37	4·75
Yeotmal District—					
Total	100	3·33	46·31	39·95	10·41
Rural	100	1·73	41·71	44·27	12·29
Urban	100	5·12	51·44	35·13	8·31

Family workers and single workers have larger proportions in the district than the State average. Those differences are more marked in urban areas. This is a reflection of the traditional crafts dominating the scene. The proportions of employers are low as a consequence of the predominance of single workers and family workers. It is even so for rural and urban areas of the district compared to those of the State.

Percentage Distribution in Household Industry by Employees and Others

The proportion of employees, i.e., hired workers and others in household industries in the district total, rural and urban areas is shown in Table B-IV-A in Part II. The percentage distribution with corresponding figures for Maharashtra is as follows :—

		Total workers	Employees	Others
Maharashtra ..	Total ..	100·00	8·18	91·82
	Rural ..	100·00	4·91	95·09
	Urban ..	100·00	16·35	83·65
Yeotmal District ..	Total ..	100·00	3·68	96·32
	Rural ..	100·00	3·18	96·82
	Urban ..	100·00	6·24	93·76

Household industries in the district also work more with family workers and the proportion of hired workers is only 3·68 per cent against the average of 8·18 per cent for the State. The same difference persists for household industries both in rural and urban areas but it is little more significant for urban areas in the district than that in the State.

Secondary Work

The proportions of workers also engaged in some other secondary economic activity for three categories of principal work for Maharashtra and the district are as follows (Actual figures are shown in Table B-VII-A in Part II):—

Principal work	Total Rural Urban	Percentage of total workers by categories of secondary work		
		I	II	IV
MAHARASHTRA—				
I Cultivation	Total ..	..	17.85	1.97
	Rural ..	..	18.03	1.98
	Urban ..	..	10.54	1.32
II Agricultural Labour ..	Total ..	13.17	..	0.94
	Rural ..	13.46	..	0.97
	Urban ..	7.12	..	0.31
IV Household Industry ..	Total ..	14.78	6.97	..
	Rural ..	19.61	9.38	..
	Urban ..	2.70	0.95	..
YEOTMAL DISTRICT—				
I Cultivation	Total ..	..	17.10	0.95
	Rural ..	..	17.35	0.94
	Urban ..	..	5.72	1.38
II Agricultural Labour ..	Total ..	2.90	..	0.41
	Rural ..	2.96	..	0.41
	Urban ..	0.75	..	0.26
IV Household Industry ..	Total ..	8.24	7.34	..
	Rural ..	9.83	8.56	..
	Urban ..	0.08	1.07	..

The proportion of cultivators also working as agricultural labourers as secondary work for the district is almost equal to that of the State average. Proportions of agricultural labourers also engaged in cultivation as secondary work are however much lower than the State average. Most of the workers engaged in household industries also work as cultivators and agricultural labourers as secondary work.

Occupational Classification

Table B-V in Part II shows the distribution of non-agricultural workers by occupation. The percentage distribution for the State and the district is as follows. The occupational classification is described in the Explanatory Note to Part II :—

Occupational Division	Maharashtra	Yeotmal District
0 Professional, technical and related workers.	6·42	8·38
1 Administrative, Executive and Managerial workers.	3·89	6·62
2 Clerical and related workers ..	9·13	7·88
3 Sales workers	12·23	15·49
4 Farmers, fishermen, hunters, loggers and related workers.	7·64	10·27
5 Miners, quarrymen and related workers.	0·75	0·96
6 Workers in Transport and Communication occupations.	3·57	3·05
7 & 8 Craftsmen, production process workers and labourers not elsewhere classified.	45·99	35·55
9 Service, sport and recreation workers.	10·27	10·70
X Workers not classifiable by occupation.	0·11	1·10
Total ..	100·00	100·00

The proportion for the fourth occupational division is higher in the district than for Maharashtra mainly because of the comparatively larger number of hunters and loggers. They are higher in divisions 3, 0, 1 and X also and slightly higher in divisions 9 and 5. Much lower proportions are seen in divisions 7 and 8 for the district and almost same in division 6. Corresponding proportions are not available for 1951 and the 1961 pattern cannot therefore be compared with that of 1951 and earlier Censuses.

Non-workers

The distribution of non-workers by eight broad categories is shown in Table B-IX in Part II. Percentage distribution for the district is shown below :—

	District total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
(1) Full-time students	30.55	10.08	27.62	8.39	46.26	17.10
(2) Household duties	0.14	28.89	0.15	25.49	0.07	43.10
(3) Dependents, infants and disabled	67.38	60.54	70.75	65.63	49.31	39.31
(4) Retired, rentiers or persons of independent means.	0.28	0.14	0.16	0.14	0.94	0.14
(5) Beggars vagrants, etc. ..	0.74	0.31	0.72	0.31	0.84	0.31
(6) Inmates of institutions.. ..	0.03	N	0.01	N	0.09	..
(7) Persons seeking employment for the first time.	0.54	0.02	0.40	0.03	1.33	0.01
(8) Unemployed but seeking work..	0.34	00.2	0.19	0.01	1.16	0.03
Total ..	100.00	100.00	100.00	100.00	100.00	100.00

N=Negligible.

There is a marked difference in the distribution pattern for non-workers among males and females. 30·55 per cent out of male non-workers are full-time students while the corresponding proportion for females is 10·08. The reason is that 28·89 per cent females who are engaged in household duties are also included as non-workers. Male dependants have a higher percentage than female dependants to their respective non-working population.

Other categories have less than one per cent of non-working population each. There are rural urban differences in the proportion of dependants. They are due to the large proportion of females in urban areas as non-workers. The rural urban differences are similar both for males and females. Both in urban and rural areas the percentage of dependants is higher and that for full-time students lower. The percentage of females engaged in household duties is higher in urban areas than in rural areas. The percentage of unemployed is 2·49 and 0·59 for males in urban and rural areas and almost negligible in both cases for females. Proportions of full-time students among females are lower both in urban and rural areas. The difference is not, however, entirely due to the social custom of attending more to the education of boys than that of girls. The proportions for females are lower also because the group of non-workers contains a large number of adult women engaged in household duties.

PART I

VILLAGE DIRECTORY

This Directory renders an account of each Village and each ward of Town

5	Wani Taluka	69

EXPLANATORY NOTE

This Part I presents 1961 Population Census figures for all villages and towns in the district In the case of towns, the figures are also presented separately for each ward. These basic statistics are not published for such small administrative units in any other country in the world.

2. For each village, ward or town are shown its area, number of occupied residential houses, number of households, total population and its break-up by sex, literacy, Scheduled Castes, Scheduled Tribes, workers and non-workers. The figures for workers are further split up by sex and by a broad classification of industrial activity in nine categories described in paragraph 16 below.

3. In the village directory, the villages are presented talukawise and within a taluka in the order of their location code numbers. These code numbers had been assigned to them for organising 1961 Census work and follow a regular north-west to south-east direction. The taluka map shows approximate locations of all villages with their code numbers. An alphabetical list of villages will be found facing each taluka map. It shows the code number for each village and its population in 1951 and 1961. The taluka map and the alphabetical list will together facilitate location of any village in the village directory as well as on the spot.

4. A "village" is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have, therefore, not been shown separately. On the other hand, statutorily recognised villages having no population have been shown with separate code numbers but with word "uninhabited" shown against them.

5. Forest villages, however, make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Most of them are, however, permanent localities and also have attached cultivated areas leased out by the Forest Department under certain conditions Their land records are not maintained by the Revenue Department. Statistics for these forest villages have also been presented in the village directory. They may, however, be distinguished from other statutory revenue villages from the letters "(FV)" suffixed after their names.

6. Survey of India maps, taluka maps, previous Census Handbooks and many other official sources have been referred both to secure accurate coverage and to get the correct spellings of village names. A very high standard of accuracy may now be claimed for both.

7. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of over 5,000 ; and

(*b*) 75 per cent or more of male workers engaged in non-agricultural occupations.

Census figures for all these towns are presented wardwise after the completion of rural portion. Their names will also be found in the alphabetical lists of villages in capital letters with code numbers shown inroman figures. They are also shown on the taluka map.

8. The taluka maps and the alphabetical lists are both improvements over the 1951 District Census Handbooks. The village figures are, moreover, extracted directly from Census records and not as was done in 1951, from their copies prepared for some other purposes. The figures presented in the village directory, therefore, tally with the taluka and district Census tables perfectly.

9. Information contained in columns (3) to (7) of the village directory is based on village enumeration reports prepared by the Talaties or Patwaries during October/November, 1960, at the time of house numbering and house listing for 1961 Census. Because of the geographical arrangement of the villages these five columns indicate the general pattern of distribution of some basic amenities within a taluka. Village enumeration reports contained many more useful items of information on the villages, which could not be presented in the village directory for want of space. They are preserved in the offices of the District Statistical Officers.

10. The area figures in column (8) have been obtained either from the Mamlatdars/Tahsildars or taken from the 1951 Census Handbooks.

11. In column (9) of the village directory, the occupied houses include houses used as dwellings or partly as dwellings and partly for some other purposes, *e.g.*, shop-*cum*-dwellings, etc.

12. Columns (14) to (17) of the village directory present, for the first time, villagewise figures of population of Scheduled Castes and Scheduled Tribes.

13. For columns (18) and (19) a "literate" is a person who knows both reading and writing.

14. For the definition of a "worker" or a "non-worker" and for a detailed description of industrial categories the Explanatory Note to Part II may have to be referred.

15. The villagewise figures for industries and the number of workers have been presented in a separate table appearing in Part II of the Handbook.

16. The following abbreviations have been used in the village directory :—

ABBREVIATIONS AND SYMBOLS USED

IN COLUMN HEADINGS

F *for* Females.

M *for* Males.

P *for* Persons.

I Working as Cultivator.

II Working as Agricultural Labourer.

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.

IV Working at Household Industry.

V Working in Manufacturing other than Household Industry.

VI Working in Construction.

VII Working in Trade and Commerce.

VIII Working in Transport, Storage and Communications.

IX Working in Other Services.

IN NOTATIONS

In Column (2)

E *for* Electricity.

FV *for* Forest Village.

In Column (3)

Po *for* Post Office.

R *for* Connected by Road.

Rh *for* Rest-houses and Choultries.

Rly *for* Connected by Railway.

To *for* Telegraph Office.

In Column (4)

C *for* Higher Institutions including Colleges.

H *for* High School.

M *for* Middle School.

P *for* Primary School.

T *for* Technical Institutions.

IN NOTATIONS

In Column (5)

C *for* Canal.

N *for* Nallah.

Riv *for* River.

S *for* Protected Water Supply.

Sp *for* Spring.

Tk *for* Tank,

W *for* Well.

× *for* Inadequacy of Drinking Water.

In Column (6)

D *for* Dispensaries.

Hos *for* Hospital.

Mp *for* Medical Practitioner

In Column (8)

NA *for* Not Available.

Number of Establishments and Workers for Industries classified by Minor Groups of Industrial Classification. 190

EXPLANATORY NOTE

This Part contains 58 Tables presenting 1961 Census data for the district. 29 Tables also present material for each taluka and 6 for each town separately. These talukawise and townwise tables have been prepared specially for this volume.

2. A few Tables (e.g., A-IV, B-VI, B-VIII-A, etc.) present material for urban areas only. An urban area is the aggregate of all towns in the district or in the taluka concerned. All the other tables present material for total, rural and urban areas separately. In a few cases (e.g., B-III-D, B-VIII-B, B-IX, C-III-B, etc.), talukawise break-up is given for rural areas only because the corresponding data for the urban areas had been compiled only for the district as a whole and not for each taluka separately.

3. Tables on migration and a few other topics could not be included in this volume for want of space. They will be found in the volumes of the Maharashtra Census Report.

4. An account of how the Census was taken and a description of the definitions and concepts followed will be found in Part II-A of the Maharashtra Census Report. The material presented here relates to the 1st March 1961, which was the reference date fixed for the Census and which very closely approximated the completion of the Second Five-Year Plan. An analysis of this material will be found in the Introductory Note on the district at the beginning of this volume.

5. The following paragraphs contain brief notes on the tables included in this Part. Concepts and definitions of terms used are briefly described in the notes on the tables where those terms first appear in the Series. Each table starts with the entries for the district and the talukas follow in the order of their code numbers fixed by their geographical locations for purposes of the 1961 Census.

A SERIES

GENERAL POPULATION TABLES

6. There are four General Population Tables and three Appendices in this Series. They are the basic population tables. They will be useful to study the variation of population, sex ratios, distribution by size of villages or towns and trends of urbanisation in the district.

Table A-I

7. This table presents area, density, number of villages and towns, occupied residential houses and population total, males and females. Material is presented for the district and for each taluka (Tahsil or Mahal) for total, rural and urban areas separately. Towns are shown immediately after the entries of the taluka in which they are situated.

8. A town or an urban area is a place which has a municipality, a cantonment or a civil line or a population of 5,000 or over and at least $\frac{3}{4}$ths of male population dependent on non-agricultural pursuits. A population enumerated in urban areas is urban population and the population enumerated in all other places is rural population. Total includes the population of both urban and rural areas.

9. Area figures have been obtained through Revenue and Municipal Officers. Rural area is the difference between the Total and the Urban areas. The area figures for the district have been obtained from the Director of Land Records.

10. The term "village" has been explained in paragraphs 4 and 5 of the Explanatory Note to Part I.

11. The figures for number of occupied residential houses include houses used partly as dwellings and partly for some other purpose like shop, workshop, factory, etc., but do not include vacant residential houses where no person was found to be residing at the time of the Census.

Appendix I

12. There have been no territorial changes during the decade 1951—1961. Appendix I does not, therefore, appear here.

Appendix II

13. This shows the number of villages which in spite of a population of 5,000 or over have not been treated as towns and the number of towns which have less than 5,000 population but which have been treated as towns only because they have Municipalities. Columns (4) and (7) show the percentage of populations in villages of over 5,000 and towns of less than 5,000 to the respective rural or urban populations of the district or the taluka concerned.

Appendix III

14. *Houseless Population.*—Houseless persons were enumerated in all areas on the night of 28th February 1961. These include: (i) persons who might be doing domestic service or some other work with one or more households but who do not reside in any house and sleep in the corridors, verandahs or passages in buildings or on the streets; (ii) wandering or nomadic tribes found to be staying in temporary huts, rahooties, etc., or residing without any such huts just on the open grounds; and (iii) beggars, vagrants, tramps, sadhus, fakirs, lepers, etc., who are found on the footpaths, streets, otlas, in places like parks, gardens, seashore, railway yards, etc.

15. *Institutional Population* includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding houses, etc.

Table A-II

16. This table presents population of the district for the seven Censuses from 1901 to 1961 and the variation by actual figures and percentages. Population figures for 1951 and 1961 and variation during the decade are presented for each taluka separately. The population figures for earlier Censuses shown in the table have been adjusted for the boundaries or areas of the district and talukas as they existed at the time of 1961 Census.

Table A-III

17. This table gives for the district and each taluka the distribution of inhabited villages classified by seven population size groups which are: (i) less than 200; (ii) 200—499; (iii) 500—999; (iv) 1,000—1,999; (v) 2,000—4,999; (vi) 5,000—9,999; and (vii) 10,000 and above.

18. Hamlets are included in the village. The classification here is on the basis of the combined population of the village and its hamlets if there are any. In other words, the classification is not strictly according to the size of each individual nucleus of rural population but is based on the size of population of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities.

Table A-IV

19. This table shows the growth of each town since 1901. It shows population for each town for the last seven Censuses. Towns are presented in the following six classes classified by their population in 1961. Within a class, the names of towns are arranged in the order of population:

Class I	..	100,000 and over.
Class II	..	50,000 to 99,999.
Class III	..	20,000 to 49,999.
Class IV	..	10,000 to 19,999.
Class V	..	5,000 to 9,999.
Class VI	..	Less than 5,000.

20. Where two or more towns are adjacent and together form a compact urban unit, the entire town group is classified with reference to the combined population of the group. In such cases, the total population of the group is shown along with the population of each of its constituent towns.

21. Where a town was not treated as a town in some earlier Census, its population at that Census had been included in rural population. It is not presented here as the table presents figures of urban population only.

22. The total urban population of the district and its variation in the last sixty years are shown at the beginning of the table.

B SERIES

(i) GENERAL ECONOMIC TABLES

23. There are 16 Tables in this Series showing the distribution of population by economic activity correlated with sex, age and educational levels. The classification by economic activity is first by workers and non-workers. The workers are then classified in nine broad categories of economic activity. A more elaborate classification of workers by industry under the Standard Industrial Classification Scheme is presented in Tables B-IV-A, B and C and by occupation under the National Occupational Classification in Table B-V. Two Tables B-VII-A and B-VII-B show the classification of workers by secondary work. The last three tables present distribution of non-workers by sex, age and eight broad classes.

24. In the 1951 Census Reports, the population was classified into eight livelihood classes and each class was further divided with reference to economic status into—

(i) self-supporting persons ;

(ii) earning dependents ; and

(iii) non-earning dependents.

25. The concept of dependency has been abandoned for economic classification at the 1961 Census. Instead, the population is classified into workers and non-workers. The emphasis is now on work and not on income or economic dependence.

26. A person is classified as worker if—

(*a*) in case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season ; and

(*b*) in the case of regular employment in any trade, profession, service, business or commerce, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

27. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

28. "Work" includes not only actual work but effective supervision and direction of work also.

29. Persons under training as apprentices with or without stipend or wages are regarded as workers.

30. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cowdung cakes, or grass, etc., or any such work she has been treated as a worker.

31. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession, business or commerce.

32. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

33. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

34. The Census Questionnaire did not have any question to determine the extent of full employment or under-employment.

35. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, i.e., the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income.

Primary Census Abstract

36. This table shows 1961 summary figures for the district and talukas, each for total, rural and urban areas separately. Similar details for each village, town and ward of a town are presented in Part I.

37. For each unit, the table shows area in square miles, number of occupied houses, number of households, total population, population of Scheduled Castes and Scheduled Tribes, number of literate and educated persons and number of workers and non-workers. The workers are shown further classified for nine categories of economic activity.

38. Column (5) shows the number of households for each unit. The "household" is slightly different from a "family". A "household" is a group of persons who commonly live together in the same house and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. A domestic servant residing and eating at the employer's house is a member of the household. Similarly, a friend or a guest (related or unrelated) residing and eating with the host during the Census period is treated as a member of the (host) household. On the other hand, a son or a daughter residing in a hostel (may be in the same town) is not treated as a member of the household.

39. Columns (9) to (12) of the Primary Census Abstract show population of the Scheduled Castes and Scheduled Tribes, respectively, by males and females. The figures are related only to the two group totals of all Scheduled Castes and all Scheduled Tribes. Their break-up by individual Scheduled Caste or Scheduled Tribe will be found in Table SCT-I.

40. The limitations in coverage of these two groups may be mentioned here. The groups of Scheduled Castes or Scheduled Tribes do not include all backward castes or tribes living in the district. They include only the castes or tribes declared as Scheduled Castes or Scheduled Tribes in the district. In cases where a caste or a tribe is declared as a Scheduled Caste or a Scheduled Tribe for a specified area that caste or tribe has been separately presented only for that specified area and not for any other areas of the district.

41. Columns (13) and (14) show figures for literates and educated persons. A "literate" is a person who can both read and write a simple letter. Persons having higher education are also included in these figures. More material on literacy and education cross tabulated with age-groups is presented in Table C-III.

42. The workers are shown classified by sex and in the following nine categories of economic activity :—

I As Cultivator.
II As Agricultural Labourer.
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.
IV At Household Industry.
V In Manufacturing other than Household Industry.
VI In Construction.
VII In Trade and Commerce.
VIII In Transport, Storage and Communications.
IX In Other Services.

Category I

43. This category includes both the owner cultivators and tenant cultivators. Along with workers personally doing work on land are also included persons who are engaged in supervision or

direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

44. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

45. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

46. A "Household Industry" is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. A household industry is not run on the scale of a registered factory. Thus, the main criterion for a household industry is the participation of one or more members of a household in rural areas. In the urban areas, household industry is confined to the house.

47. A household industry relates to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader, doctor, barber, washerman or astrologer. Persons working in other person's household industry as paid employees are also treated as workers in household industry.

Category V

48. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as household industry.

Category VI

49. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reservoirs, etc.

Category VII

50. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estates and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

51. This category includes workers engaged in transport activities by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as Posts, Telegraph, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

52. This category includes (i) Public utility services like electricity or gas or water-supply, sanitary services; (ii) Central, State or Municipal employees; (iii) Professional services; (iv) Trade or labour associations, Recreation services, etc.

Tables B-I and B-II

53. This combined table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by four broad age-groups. The material is presented for the district and each taluka as well as for total, rural and urban areas separately. Towns are also shown immediately after the entries of the talukas in which they are situated. For talukas which do not have any urban areas, entries are given only for totals which correspond to those for rural areas.

Table B-III

54. This table gives break-up of the Primary Census Abstract distribution of workers in nine industrial categories and non-workers by educational levels. Material for the district is presented for total, rural and urban areas separately while that for the talukas is presented only for rural areas. The classification by educational levels is more elaborate in the case of the urban areas. Classification by educational levels and age-groups will be found in Table C-III.

Industrial Classification

55. Industry of a worker is that branch of economic activity in which he is engaged in producing goods or services. Tables B-IV-A, B-IV-B, B-IV-C, B-VII-A and B-VII-B of the present Series and Tables B-XIII, B-XIV-A, B-XIV-B and B-XVI of the following Series show the distribution of workers by industry according to the Standard Industrial Classification which is reproduced as Appendix I to this note. For want of space it has not been possible to give description of each group of industry in the tables. They are shown only by industry codes in one, two or three digits as the case may be.

56. The nine categories shown in the Primary Census Abstract and Tables B-I, B-II and B-III conform to the industry divisions as follows :—

	Category	Industry Division
I	Cultivator	Minor groups 000, 001, 002, 003 and 004 from Division 0.
II	Agricultural Labourer ..	
III	Mining, Quarrying, etc.	Division 0 except minor groups 000 to 004 and Division 1.
IV	Household Industry ..	Division 0 except minor groups 000 to 004, Divisions 1, 2 & 3.
V	Manufacturing	Divisions 2 & 3.
VI	Construction	Division 4.
VII	Trade and Commerce ..	Division 6.
VIII	Transport, Storage and Communications.	Division 7.
IX	Other Services	Divisions 5, 8 and 9.

Table B-IV-A

57. This table gives the distribution of workers engaged in household industry by status of employment and by each division and major group (Appendix I) of household industry separately. Material is presented only for the district but for total, rural and urban areas separately. Major groups of household industry which do not have any workers in the district are not shown here. Columns (7) and (8) show the workers who work at their own household industry (i.e., who are either employers, single workers or family workers in those household industries). Columns (5) and (6) on the other hand show the workers who are working as employees in household industries not of their own.

Table B-IV-B

58. This table presents distribution of all workers (other than those working in categories I, II and IV) by industry divisions and major groups (Appendix I) and by employment status. Material is presented for the district only but for total, rural and urban areas separately. Classification of workers by employment status is in four classes " employer ", " employee ", " single worker " and " family worker " :

An " employer " is a person who employs other persons in order to perform economic activity in which he is engaged.

An " employee " is a person who usually works under some other person for salary, or wages in cash or kind.

A " single worker " is a person who works by himself. He is not employed by anyone else and in his turn does not emply anyone else, not even members of his household, except casually.

A " family worker " is a member who works, without receiving wages, in cash or kind, in any industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season.

Table B-IV-C

59. This is a very important table as it gives the employment position in all sectors of economy in the district. It shows the distribution of all workers (other than those in categories I and II) by industry division, major groups and minor groups according to the Standard Industrial Classification (Appendix I). The number of workers against each division, major group or minor group, is further split up and shown separately for household industry and non-household industry. Material is presented only for the district but for total, rural and urban areas separately. Major or minor groups which do not have any workers in the district are not shown here.

Occupational Classification

60. Occupation of a worker is the function which he performs in any branch of economic activity (which is called his industry). For a clerk working in a textile mill, the industry is textile and occupation is clerical. For a person working as a driver on a bank's vehicle, the industry is banking and occupation is driver.

61. Tables B-V and B-VI show the distribution of workers by occupation according to the National Occupational Classification Scheme which is reproduced as Appendix II to this note.

Table B-V

62. This table presents the distribution of workers (other than those engaged in categories I and II) by occupational divisions and groups (Appendix II). For each division or group the workers are shown by a categorywise break-up of their industry. The materials is presented only for the district but for total, rural and urban areas separately. Occupational groups which do not have any workers in the district are not shown in the table. For an occupational group which has all the workers in only one category of industry, only one line shows the total workers for that group as well as for that category of industry.

Occupational distribution of workers in the 1961 Census has been worked out and presented in Maharashtra Census Report, Part II-B (ii) even for Occupational families, i.e., up to three digits. For want of space it is presented here for occupational groups, i.e., up to two digits only.

Table B-VI

63. This table presents the distribution of workers (other than categories I and II) classified by sex, occupational divisions (Appendix II), broad age-groups and by educational levels. This table is presented only for the total urban area of the district.

Table B-VII-A

64. This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secondary work. In case a worker is engaged in two or more kinds of work the one which consumes larger portion of his time (not necessarily earning a larger portion of his income) is treated as his principal work, another consuming second larger portion of his time is his secondary work. The secondary work is shown in the table classified only in three broad categories, viz., IV-Household Industry, I-Cultivator and II-Agricultural Labourer. Workers who may be engaged in secondary work in other categories, viz., III, V, VI, VII, VIII and IX are not shown in this table. The break-up of principal work in household industry by major industrial groups (Appendix I) is shown in column (1). It will enable analysis of workers engaged in secondary work by major branches of their principal work at household industry. The material is presented for the district only but for total, rural and urban areas separately.

J-1812-II-13-A—(Yeotmal)

Table B-VII-B

65. This table shows workers engaged in non-household industry categories III and V to IX as principal work and doing some additional work in household industry. The additional work in household industry is classified by industrial divisions (Appendix I) only. Similarly, the break-up of principal industry in column (1) is also by industrial divisions only. Workers engaged in the industry divisions shown in column (1), but who are doing additional work in any sector other than household industry are not shown in this table. Material is presented for the district only but for total, rural and urban areas separately.

Table B-VIII-A

66. This table presents the distribution of unemployed persons aged 15 and above by age-groups and educational levels. The number of unemployed have been further split up by persons seeking employment for the first time and persons employed before but now out of employment and seeking work. Material is presented only for the total urban area of the district. Such detailed information on the unemployed is compiled for the first time in the 1961 Census.

Table B-VIII-B

67. This table presents the distribution of unemployed aged 15 and above in rural areas of the district by educational levels. The break-up of educational levels is not as elaborate as in Table B-VIII (Part A) and classification by age-groups or by persons seeking employment for the first time, etc., is not shown in this table. As a compensatory factor, the material is presented for the rural area of the district and each taluka separately.

Table B-IX

68. This table presents the distribution of non-working population by broad age-groups and eight classes of non-workers. Such information on the non-working population had never been compiled before. The material is presented for the district separately for total, rural and urban areas and for each taluka for rural areas only.

(ii) HOUSEHOLD ECONOMIC TABLES

69. Tables B-X to B-XVI present the economic activity of the households as units. They relate to—

(i) the size of or interest in land cultivated and/or the household industry conducted by the households ; and

(ii) the number of family workers and/or hired workers working in either of the two activities separately or combined in both.

70. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where much of what is produced is consumed by the family itself, presentation of information on economic activity of individuals alone is likely to be slightly misleading unless that information is supplemented by material relating to economic activity of the households as entities. Such information is presented here for the first time. These tables are prepared from the household schedules specially introduced for that purpose as one of the three Questionnaire forms in the 1961 Census. The tables have been prepared on a 20 per cent sample of all the households in the district drawn for rural and urban areas separately.

71. Cultivation here includes cultivation both as owners and tenants. Size of holding shown is also of Operational holding, i.e., land actually cultivated and does not include land owned but not cultivated by the household.

Table B-X

72. This table presents distribution of sample households by those—

(i) engaged neither in cultivation nor household industry;

(ii) engaged in cultivation only;

(iii) engaged in household industry only; and

(iv) engaged both in cultivation and household industry.

The material is presented for the district and each taluka for total, rural and urban areas separately.

Table B-XI

73. This is an important table. It shows the distribution of sample households engaged in cultivation classified by size of land and interest in land cultivated. Ten size-groups are shown horizontally while the interests in land are classified in three types, viz.—

(*a*) Entirely owned or held from Government.

(*b*) Entirely held from private persons or institutions for payment in money, kind or share.

(*c*) Partly held from Government and partly from private persons or institutions for payment in money, kind or share.

The material is presented separately for total, rural and urban areas of the district and only for rural areas of each taluka.

Table B-XII

74. This table shows the distribution of sample households engaged in cultivation classified by size of land cultivated and the total number of family workers and hired workers. The material is presented for the district for total, rural and urban areas separately and only for rural areas of each taluka.

Table B-XIII

75. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and by industry division and major group of the household industry (Appendix I). The table shows the

sizes of cultivation holdings and the branches of household industry for which the two household economic activities combine in varying degrees. The material is presented only for the district but for rural and urban areas separately.

Table B-XIV-A

76. This table shows the distribution of sample households engaged in household industry only by the number of workers engaged and by industry division and major groups of the household industry (Appendix I). Material is presented for the district only but for total, rural and urban areas separately.

Table B-XIV-B

77. This table shows the distribution of sample households engaged in household industry only classified by industry minor groups (Appendix I) for the household industry. The industry minor group is shown with a break-up in four-digit codes in column (1). *These four-digit codes are shown in Appendix III.* The material is presented for the district only but for total, rural and urban areas separately.

Table B-XV

78. This table shows the distribution of sample households engaged both in cultivation and household industry classified by size of land cultivated and the number of family workers and hired workers working in the two activities combined. The material is presented for the district for total, rural and urban areas and for each taluka only for rural areas separately.

Table B-XVI

79. This table shows the distribution of sample households engaged in household industry classified by the period for which the household industry is worked and by industry division and major groups (Appendix I) of the household industry. A further split-up of figures is shown for household industry combined with cultivation and without cultivation. The material is presented for the district only but for total, rural and urban areas separately.

C SERIES

SOCIAL AND CULTURAL TABLES

80. There are 11 tables in this Series dealing with Social or Cultural aspects like sizes and composition of households, age, marital status, literacy and education, language, religion, Scheduled Castes and Scheduled Tribes. The first two Tables C-I-A and C-I-B relating to Size and Composition of Households are prepared from the household schedules on a 20 per cent sample. All the other tables are prepared from individual slips and on a total count.

Table C-I-A

81. This table presents distribution of sample households classified by their size and by economic activity, i.e., by work in cultivation or household industry. Households working at cultivation are further classified by size of land holding. The material is presented only for the district but separately for total, rural and urban areas. Classification by economic activity as well as by size of land holding is presented only for rural areas and classification by size of the household is alone presented for total and urban areas. This table is prepared from household schedules on a 20 per cent sample. This table appears as Table B-XVII in Part III of the Maharashtra Census Report.

82. The classification by size is as one member small (2 to 3), medium (4 to 6), large (7 to 9) and very large (over 10) households. By definition, a Census household is not the same as a family. The household also includes persons who are not members of the family but who were residing with the family during the Census period. All the same the table will give a general idea of the family sizes as in the majority of families outsiders are not likely to be present.

Table C-I-B

83. This table presents distribution of population of sample households by heads of the households, spouses of heads of households, married relations, never married, widowed or divorced relations and unrelated persons. These details are also shown for sample households classified by economic activity, i.e., participation in cultivation or household industry. For cultivation, the sample households are further classified by size of land holdings. This table is prepared from the household schedules on a 20 per cent sample. Material is presented for the district only but for total, rural and urban areas separately. The classification of households by economic activity and size of land holding is, however, shown for rural areas only. This table is of sociological interest indicating the strength of the joint family system.

Table C-II

84. This table presents distribution of population by sex, age and marital status. Classification of age between 10 and 70 years is by five-year age-groups. The other two groups are 0—9 years and 70 and over. The entire population in 0—9 years age-group has been treated as never married and no further classification by marital status is shown against them. The material is presented only for the district but for total, rural and urban areas separately. From this table it may be ascertained whether proportions in various marital status groups have changed since the last Census and whether any trend is observed in age of marriage. A corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table is, however, prepared on a full count.

Tables C-III-A, B and C

85. These three tables present the distribution by age, sex, literacy and educational levels. Classification by age is by five-year age-groups up to 59 years. Classification by educational levels is the same as in Table B-III. It is more elaborate in the case of urban areas. Part A presents material only for the district total while Part B presents material for rural areas of the district and of each taluka separately. Part C presents material only for the district urban areas but with more elaborate classification by educational levels.

86. These tables are a measure of the growth of literacy in the total population as well as in the different age-groups since the last Census. They are also likely to furnish information on the spread of adult education. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. These tables have been prepared on a full count.

Table C-IV

87. This table presents distribution of the district population by single year ages both for males and females separately. Figures presented are based on the actual returns recorded in the Census, i.e., they have not been smoothed or adjusted for preferences for digits 0, 5, etc. The material is presented only for the district total.

88. This is an important demographic table which is used for computing mortality rates. The corresponding table at the 1951 Census was prepared on a 10 per cent sample. This table has been prepared on a full count.

Table C-V

89. This table presents the distribution of population by mother-tongues. The figures are presented only for 9 top ranking mother-tongues in the district. Figures for all the other mother-tongues have been shown combined in the group " Others ". Mother-tongues are arranged in the alphabetical order. Material is presented for total, rural and urban areas for the district and each taluka separately. At the end material is also presented for each town separately. A foot-note is added to show the number of speakers in the district for each of the mother-tongues combined in the group " Others ".

90. " Mother-tongue " is defined as a language spoken by the person's mother to the person in his childhood or mainly spoken in the house. Dialects have been included in the main languages on the basis of Grierson's Classification.

91. Another Table (C-VI) on bilingualism has been prepared in the 1961 Census. It is not included in this volume and may be found in Part II-C of the Maharashtra Census Report.

Table C-VII

92. This table presents distribution of population by religion. Eight main religions have been shown in their alphabetical order. All other religions returned in the Census are combined in the group " Others ". Figures for various sects returned as religion during the Census have been combined with the main religions concerned.

Table C-VIII-A

93. This table presents the total population of Scheduled Castes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka separately. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Castes.

Table C-VIII-B

94. This table presents the total population of Scheduled Tribes classified by literacy and by economic activity. Classification by economic activity is the same as in the Primary Census Abstract or Tables B-I and B-II. Material is presented for total, rural and urban areas of the district separately and only for rural areas of each taluka. Paragraph 40 above, on Primary Census Abstract, may be seen for explanation of the special group treated as Scheduled Tribes.

SCT, SC & ST SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

95. There are 11 Tables in this Series specially prepared for the population of Scheduled Castes and Scheduled Tribes in the district. These classes of people are declared by the President's orders issued under Articles 341 and 342 of the Constitution of India as Scheduled Castes or Scheduled Tribes. Under Article 46 of the Constitution, the State has to promote, with special care, the educational and economic interests of the weaker sections of the people and in particular of the Scheduled Castes and Scheduled Tribes and has to protect them from social injustice and all forms of exploitation. For ensuring adequate representation to these classes, seats are also reserved for them in the House of the People, State Legislature and other elective bodies.

96. These special tables have been prepared to furnish data on the present socio-economic conditions of these people to be studied not only as a combined group as in 1951 but also for each Scheduled Caste and Scheduled Tribe separately.

97. These tables relate to economic activity, education, mother-tongue and classification of persons not at work. Material is presented for each Scheduled Caste and Scheduled Tribe separately. It will be useful information for formulating various schemes for their welfare.

98. Classification by Castes and Tribes is on the basis of returns recorded in response to question 5 (c) of the 1961 Census Questionnaire. Every person was asked if he belonged to one of the Scheduled Castes or Scheduled Tribes notified for the district and in case he belonged to one of them he was asked the name of his caste or tribe. Paragraph 40 above on the Primary Census Abstract explains the limitations of these castewise or tribewise figures. The population of Scheduled Castes shown here is much less than that for the district in 1951 as many persons from that group have returned their religion as Buddhist or Nav-Buddha, and under the Constitution, there can be Scheduled Castes only among Hindus and Sikhs and in no other religion.

99. Two more Tables SCT-II and SCT-IV on age, marital status and religion of the Scheduled Castes and Scheduled Tribes prepared in the 1961 Census are not presented here for want of space. They may be seen in Part V-A of the Maharashtra Census Report.

Table SCT-I-A

100. This table presents the distribution of Scheduled Castes population by economic activity. Material is presented for the total of all Scheduled Castes as well as for each Scheduled Caste separately. Scheduled Castes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents castewise break-up of the material presented in Table C-VIII (Part A). The last group of castes "not stated" is of persons who were returned as belonging to Scheduled Castes but in whose case the name of the Scheduled Caste concerned had not been stated in the Census.

101. Columns (28) to (31) present Scheduled Castewise figures of persons engaged in unwholesome occupations like tanning, currying of hides and skins and scavenging. The number of workers shown in these occupations as well as in any other category is on the basis of principal work. Persons engaged in cultivation or any other activity as principal work and also engaged in tanning, currying or scavenging as secondary work are not included in the figures of columns (28) to (31).

102. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

103. There are some more castes declared as Scheduled Castes for the district. They are not shown in this table because no one belonging to those castes was enumerated in 1961 Census in the district.

Table SCT-I-B

104. This table presents the distribution of Scheduled Tribes population by economic activity. Material is presented for the total of all Scheduled Tribes as well as for each Scheduled Tribe separately. Scheduled Tribes are arranged in the alphabetical order. Classification by economic activity is in the same nine categories as in the Primary Census Abstract and Tables B-I and B-II. In a way, this table presents tribewise break-up of the material presented in Table C-VIII (Part B). The last group of tribes "not stated" is of persons who were returned as belonging to Scheduled Tribes but in whose case the name of the Scheduled Tribe concerned had not been stated in the Census.

105. The material is presented for total, rural and urban areas of the district separately and only for rural areas for each taluka.

106. There are some more Scheduled Tribes declared as Scheduled Tribes for the district. They are not shown in this table because no one belonging to those tribes was enumerated in 1961 Census in the district.

Table SCT-III-A (i)

107. This table presents the distribution of each Scheduled Caste population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-A (ii)

108. This table presents the distribution of each Scheduled Tribe population by sex and educational levels. The table presents material for the district urban area only. The classification of educational levels is the same as in Tables B-III and C-III applicable for urban areas.

Table SCT-III-B (i)

109. This table presents the distribution of population for each Scheduled Caste by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-III-B (ii)

110. This table presents the distribution of population for each Scheduled Tribe by educational levels only for the district rural area. The classification by educational levels is somewhat reduced than that of Table SCT-III (Part A).

Table SCT-V-A

111. This table presents the distribution of sample Scheduled Caste households of the district (Rural) by interest in land cultivated and by size of land cultivated. The interests in land cultivated are shown in three categories :—

(i) entirely owned or held from Government;
(ii) entirely held from private persons or institutions for payment in money, kind or share; and
(iii) partly held from Government and partly from private persons, etc.

Classification by size of land cultivated is the same as in the B Series household economic tables. Material here is presented only for the district rural and for all the Scheduled Castes as a group. The table is prepared from the household schedules on a 20 per cent sample.

Table SCT-V-B

112. This table for Scheduled Tribes (same as Part A) is presented only for the district rural. The table is prepared from the household schedules on a 20 per cent sample.

Table SC-I

113. This table presents the total non-working population of all the Scheduled Castes as a group classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The non-working population is further classified by educational levels. The material is presented for the district only but for total, rural and urban areas separately.

Table ST-I

114. This table presents the distribution of population of each Scheduled Tribe by mother-tongue and the subsidiary languages spoken. Material is presented only for the district but for total, rural and urban areas separately. Scheduled Tribes are arranged in their alphabetical order and mother-tongues when there are more than one for any Scheduled Tribe are also shown in the alphabetical order.

Table ST-II

115. This table presents the total non-working population of each Scheduled Tribe classified by four categories of non-workers, viz.—

(i) full-time students;
(ii) persons seeking employment for the first time;
(iii) persons employed before but now out of employment and seeking work; and
(iv) others.

The material is presented for the district only but for total, rural and urban areas separately.

E SERIES

HOUSING TABLES

116. There are five tables in this Series. Four of them relate to housing conditions and furnish data on the purposes for which the houses are used, the tenures on which they are occupied by the households, material of construction of walls and roofs and the distribution of households by the number of rooms occupied. The last table relates to industries and shows the number of establishments and the number of workers for each industry classified by industry division, major groups and minor groups. Another Table (E-III) on industrial establishments prepared from the houselists gives a break-up by industry and the fuel used cross-tabulated by the size of the establishments. It is not presented here for want of space. It may be seen in Part IV of the Maharashtra Census Report.

117. All the five tables of this Series are prepared from the houselists which were prepared at the time of numbering of houses in September-October of 1960. Such data on housing conditions are furnished here or the first time.

118. A "house" was defined for purposes of the Census as "a structure or part of a structure inhabited or vacant, a dwelling, a shop, a shop-*cum*-dwelling or a place of business, workshop, school, etc., having a separate entrance. The entrance may be directly on the road, street, or lane or to a common staircase, court-yard or a gate".

Table E-I

119. This table presents the distribution of houses classified by uses to which they are put to. The various uses are shown in columns (4) to (16). Houses which were not being used for any purpose at the time of houselisting were treated as vacant. A "workshop" is a place where some kind of production, processing, repairs or servicing of goods goes on a commercial scale. Manufacturing or processing establishments registered under the Factories Act are treated as factories. When a house was used both as a shop and as a dwelling or workshop and as a dwelling it is treated as a shop-*cum*-dwelling or workshop-*cum*-dwelling. The houses which were used as schools, offices, factories, or restaurants and also used by some people for residence, have been treated for purposes of this table as schools, offices, factories or restaurants and not as school-*cum*-dwelling, office-*cum*-dwelling and so on.

120. The last category of "Others" includes all purposes not included in columns (4) to (15) prominent among them being cattle-sheds, garages, show-rooms, locked houses, etc. Table E-I presents material for the district and each taluka and for total, rural and urban areas separately. The table is prepared from the houselists on a full count.

Table E-II

121. This table presents the distribution of sample households by the tenure of houses occupied by them. Tenure here is of only two kinds, owned or rented. "Rent free" or "Caretaker" occupation is included in the "Rented" category. The houses occupied under each tenure are further classified by the nature of uses such as dwellings, shop-*cum*-dwellings, etc. Tenure of occupation of non-residential houses such as schools, hospitals, etc., is not shown here.

122. This table is prepared from the houselists and on a 20 per cent sample.

123. Material is presented for the district and each taluka and for total, rural and urban areas separately.

Table E-IV

124. This table presents distribution of sample houses used wholly or partly as dwelling by material of wall and material of roof. The material of wall is the material out of which most of the walls of the house are constructed. Where a house has separate portions each of different material, the material of the walls for this table is the one out of which the walls of the main bed-rooms are constructed. Similarly, the material of roof is one out of which most of the roof exposed to weather is constructed. In case of multi-storeyed buildings, the intermediate floor is treated as the roof of the lower storey.

125. Material is presented here for the district and each taluka and for total, rural and urban areas separately. This table is prepared from the houselists on a 20 per cent sample.

Table E-V

126. This table presents the distribution of sample households classified by the number of rooms occupied. For each class of households the total number of members of the households is shown by males and females separately. This will help measure congestion or over-crowding particularly in urban areas.

127. The table is prepared from the houselists on a 20 per cent sample. The material is presented for the district and each taluka and for total, rural and urban areas separately.

128. The table relates only to the family households. Institutional households like hostels, boardings, prisons, etc., are not shown here.

129. A "room" has four walls with a door and a roof overhead and is not less than $6' \times 6'$. Unenclosed verandah, kitchen, store, garage, cattle-shed, etc., though used for residential purposes are not treated as rooms. Households residing in such places are shown in columns (7) to (9) as having no regular room.

Table on Industrial Establishments and Workers

130. This is a very important table and presents the number of establishments and number of workers for each branch of industry classified by industry divisions and minor groups according to the Standard Industrial Classification (Appendix I). For each industry division, minor group figures are shown in the brackets first for the number of establishments and second for the number of workers.

131. The table is prepared from the houselists on a full count. Material is presented here for the district and talukas for total, rural and urban areas as well as *for each village and town* separately. The presentation is in the run-on style and the villages are shown both by their names and code numbers. These latter will help locate them in the taluka maps included in Part I. Villages which do not have any industrial establishments are not shown here. Similarly, for any village, town or taluka, the industry minor codes for which there are no establishments are not shown in the table.

132. The material presented here relates to September-October of 1960. Establishments where processing, repairing or servicing of goods is done are also included along with the manufacturing establishments. The number of workers shown here includes the proprietor and/or the other household members if any were working in the industry during the week preceding the enumerator's visit.

133. The list of industries presented here may not include some seasonal industries which were not actually working during the period when houselists were prepared, viz., September-October 1960.

APPENDIX I
STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into—
9 Divisions
45 Major Groups
343 Minor Groups

The divisions major groups and minor groups with their Code numbers are listed below :—

DIVISIONS

0	Agriculture, livestock, forestry, fishing and hunting
1	Mining and Quarrying
2 & 3	Manufacturing
4	Construction
5	Electricity, Gas, Water and Sanitary Services
6	Trade and Commerce
7	Transport, Storage and Communication
8	Services
9	Activities not adequately described

MAJOR GROUPS

Division 0—Agriculture, livestock, forestry, fishing and hunting

00	Field produce and Plantation crops
01	Plantation crops
02	Forestry and Logging
03	Fishing
04	Livestock and Hunting

Division 1—Mining and Quarrying

10	Mining and Quarrying

Division 2 and 3—Manufacturing

20	Foodstuffs
21	Beverages
22	Tobacco Products
23	Textile—cotton
24	Textile—jute
25	Textile—wool
26	Textile—silk
27	Textile—miscellaneous
28	Manufacture of wood and wooden products
29	Paper and paper products
30	Printing and publishing
31	Leather and leather products
32	Rubber, Petroleum and coal products
33	Chemicals and chemical products
34-35	Non-Metallic Mineral Products other than petroleum and coal
36	Basic Metals and their products except machinery and transport equipment
37	Machinery (all kinds other than Transport) and Electrical equipment
38	Transport Equipment
39	Miscellaneous Manufacturing Industries

Division 4—Construction

40	Construction

Division 5—Electricity, Gas, Water and Sanitary Services

50	Electricity and Gas
51	Water-supply and Sanitary Services

Division 6—Trade and Commerce

60—63	Wholesale Trade
64—68	Retail Trade
69	Trade and Commerce Miscellaneous

Division 7—Transport, Storage and Communication

70-71	Transport
72	Storage and Warehousing
73	Communications

Division 8—Services

80	Public Services
81	Educational and Scientific Services
82	Medical and Health Services

Division 8—Services—*concld.*

83	Religious and Welfare Services
84	Legal Services
85	Business Services
86	Community Services and Trade and Labour Associations
87	Recreation Services
88	Personal Services
89	Services (not elsewhere classified)

Division 9—Activities not adequately described

90	Activities unspecified and not adequately described (This includes new entrants to the labour market)

MINOR GROUPS

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting	
00	*Field Produce and Plantation Crops—*	
	Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize.	000
	Production of pulses, such as arhar, moong, musur, urid, khesari, other gram.	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops.	003
	Production of oilseeds, sugarcane and other cash crops.	004
	Production of other crops (including vegetables) not covered above.	005
	Production of fruits and nuts in plantation, vines and orchards.	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms.. ..	008
	Production of other agricultural produce (including fruits and nuts not covered by code number 006 and flowers) not covered above.	009
01	*Plantation Crops—*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above.	015
02	*Forestry and Logging—*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs.	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forests.	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests.	025
	Production and gathering of other forest products not covered above.	026
03	*Fishing—*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries.	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, ponds.	032

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 0—Agriculture, livestock, forestry, fishing and hunting—*concld.*	
04	*Livestock and Hunting—*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat.	040
	Rearing of sheep and production of wool ..	041
	Rearing and production of other animals (mainly for slaughter) such as pig.	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming.	043
	Rearing of bees for the production of honey, wax and collection of honey.	044
	Rearing of silk worms and production of cocoons and raw silk.	045
	Rearing of other small animals and insects ..	046
	Trapping of animals or games propagation ..	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth.	048
	Division 1—Mining and Quarrying	
10	*Mining and Quarrying—*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores ..	105
	Mining of crude petroleum and natural gas ..	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone.	107
	Mining of chemical earth such as soda ash ..	108
	Mining and quarrying of non-metallic products not classified above such as precious and semi-precious stones, asbestos, gypsum, sulphur, asphalt.	109
	Division 2 and 3—Manufacturing	
20	*Foodstuffs—*	
	Production of rice, atta, flour, etc., by milling, de-husking and processing of crops and food-grains.	200
	Production of sugar and syrup from sugarcane in mills.	201
	Production of indigenous sugar, gur from sugarcane or palm juice and production of candy.	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits.	203
	Slaughtering, preservation of meat and fish and canning of fish.	204
	Production of bread, biscuits, cake and other bakery products.	205
	Production of butter, ghee, cheese and other dairy products.	206
	Production of edible fats and oils (other than hydrogenated oil).	207
	Production of hydrogenated oils (Vanaspati) ..	208
	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chocolate, toffee, lozenge.	209
21	*Beverages—*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery.	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palm juice.	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water ..	214
	Production of ice	215
	Production of ice-cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
22	*Tobacco Products—*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco.	225
	Manufacture of other tobacco products ..	226
23	*Textile—Cotton*	
	Cotton ginning, cleaning, pressing and baling ..	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills ..	232
	Cotton dyeing, bleaching	233
	Cotton weaving in powerlooms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms ..	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine.	239
24	*Textile—Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta.	244
25	*Textile—Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring) ..	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253
	Wool weaving in powerloom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textile ..	256
26	*Textile—Silk*	
	Spinning and weaving of silk textile in mill ..	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by powerloom ..	263
	Weaving of silk textile by handloom ..	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine ..	266
27	*Textile—Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products.	270
	Manufacture of hosiery and other knitted fabrics and garments.	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear.	273
	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags.	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin.	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling.	276
	Manufacture of coir and coir products ..	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above.	279

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
28	*Manufacture of wood and wooden Products—*	
	Sawing and planing of wood	280
	Manufacture of wooden furniture and fixtures	281
	Manufacture of structural wooden goods (including treated timber such as beams posts, doors, windows.	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures.	283
	Manufacture of other wooden products such as utensils, toys, artwares.	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest.	286
	Manufacture of boxes and packing cases other than plywood.	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products.	288
	Manufacture of other wood and allied products not covered above.	289
29	*Paper and Paper Products—*	
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill.	290
	Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade.	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper,paper board and pulp.	292
30	*Printing and Publishing—*	
	Printing and publishing of newspapers and periodicals.	300
	Printing and publishing of books	301
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry.	302
	All types of binding, stitching, sizing and other allied work connected with binding industry.	303
31	*Leather and Leather Products—*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather.	310
	Manufacture of shoes and other leather footwear.	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur.	312
	Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles.	313
	Repair of shoes and other leather footwear ..	314
	Repair of all other leather products except footwear.	315
32	*Rubber, Petroleum and Coal Products—*	
	Manufacture of tyres and tubes..	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose.	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat.	323
	Productions of petroleum, kerosene and other petroleum products in petroleum refineries.	324
	Production of coaltar and coke in coke oven ..	325
	Manufacture of other coal and coaltar products not covered elsewhere.	326

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*contd.*	
33	*Chemicals and Chemical Products—*	
	Manufacture of basic industrial chemicals such as acids alkalis and their salts not elsewhere specified.	330
	Manufacture of dyes, paints, colours and varnishes.	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fireworks.	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap.	335
	Manufacture of soap and other washing and cleaning compounds.	336
	Manufacture of turpentine, synthetic, resin and plastic products and materials (including synthetic rubber).	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats).	339
34	*Non-metallic Mineral Products other than Petroleum and Coal—*	
	Manufacture of structural clay products such as bricks, tiles.	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing.	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
35	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery ..	351
	Manufacture of porcelain and its products ..	352
	Manufacture of glass bangles and beads ..	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by code No. 355.	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above.	357
	Manufacture of other non-metallic mineral products not elsewhere specified.	359
36	*Basic Metals and their Products except Machinery and Transport Equipment—*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods.	360
	Manufacture including smelting, refining of non ferrous metals and alloys in basic forms.	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate.	363
	Manufacture of iron and steel furniture ..	364
	Manufacture of brass and bell metal products ..	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can.	367
	Enamelling, galvanising, plating (including electroplating), polishing and welding of metal products.	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39).	369

J-1812-II-14-B-(Yeotmal).

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 2 and 3—Manufacturing—*concld.*	
37	*Machinery (All kinds other than Transport) and Electrical equipment—*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery.	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment, such as diesel engines, road rollers, tractors.	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories.	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers.	374
	Manufacture of electric lamps and fans ..	375
	Manufacture of insulated wires and cables ..	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone.	378
	Manufacture of electric machinery and apparatus, appliances not specified above.	379
38	*Transport Equipment—*	
	Manufacture, assembly and repairing of locomotives.	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363.	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines).	382
	Manufacture of motor vehicles engines, parts and accessories.	383
	Repairing and servicing of motor vehicles ..	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear.	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines.	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines.	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand-drawn vehicles.	389
39	*Miscellaneous Manufacturing Industries—*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies.	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies.	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals.	393
	Manufacture and tunning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen.	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group.	399
	Division 4—Construction	
40	*Construction—*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations.	400
	Construction and maintenance of roads, railways bridges, tunnels.	401
	Construction and maintenance of telegraph and telephone lines.	402
	Construction and maintenance of water ways and water reservoirs such as bund, embankments, dam, canal, tank, tubewells, wells.	403

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 5—Electricity, Gas, Water and Sanitary Services	
50	*Electricity and Gas—*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers.	502
51	*Water-Supply and Sanitary Services—*	
	Collection, purification and distribution of water to domestic and industrial consumers.	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation.	511
	Division 6—Trade and Commerce	
60	*Wholesale Trade—*	
	Wholesale trading in cereals and pulses ..	600
	Wholesale trading in vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuff (not covered elsewhere).	601
	Wholesale trading in all kinds of fabrics, and textiles products such as garments, hessian, gunny bag, silk and woollen yarn, shirtings, suitings, hosiery products.	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water.	603
	Wholesale trading in intoxicants such as wines, liquors.	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products.	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder ..	608
61	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle.	611
	Wholesale trading in toilets, perfumery and cosmetics.	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware.	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings.	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products.	616
	Wholesale trading in petrol, mobil oil and allied products.	617
	Wholesale trading in other household equipment not covered above.	618
62	Wholesale trading in bricks, tiles and other building materials.	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products.	621
63	Wholesale trading in paper and other stationery goods.	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical.	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb.	632
	Wholesale trading in all kinds of transport and storage equipment.	633
	Wholesale trading in skins, leather and fur ..	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment.	636
	Wholesale trading in scientific, medical and surgical instruments.	637
	Wholesale trading in precious metals and stones, gold and silverware and jewellery.	638
	Wholesale trading in all goods not covered above.	639

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*contd.*	
64	*Retail Trade—*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry.	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water.	641
	Retail trading in intoxicants such as wines, liquors.	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643
	Retail trading in tobacco, bidi, cigarettes and other tobacco products.	644
	Retail trading in fuel such as coke, coal, firewood and kerosene.	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
65	Retail trading in fibres, yarns, dhoti, saree, ready-made garments of cotton, wool, silk and other textiles and hosiery products (this includes retail trading in piece-goods of cotton, wool, silk and other textiles).	650
	Retail trading in toilet goods, perfumes and cosmetics.	651
	Retail trading in medicines and chemicals ..	652
	Retail trading in footwear, head-gear such as hat, umbrella, shoes and chappals.	653
	Retail trading in tyres, tubes and allied rubber products.	654
	Retail trading in petrol, mobil oil and allied products.	655
66	Retail trading in wooden, steel and other metallic furniture and fittings.	660
	Retail trading in stationery goods and paper..	661
	Retail trading in metal, procelain and glass utensils.	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above.	664
67	Retail trading in bricks, tiles and other building materials.	670
	Retail trading in hardware and sanitary equipment.	671
	Retail trading in wood, bamboo cane, bark and thatches.	672
	Retail trading in other building materials ..	673
68	Retail trading in agricultural and industrial machinery equipment, tools and appliances.	680
	Retail trading in transport and storage equipments.	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and head-gear.	683
	Retail trading in clock and watch, eye glass, frame.	684
	Retail trading in scientific, medical and surgical instruments.	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing.	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous—*	
	Importing and exporting of goods and commodities.	690
	Real estate and properties	691
	Stocks, shares and futures	692

Major Group (Code) (1)	Description (2)	Minor Group (Code) (3)
	Division 6—Trade and Commerce—*concld.*	
69	*Trade and Commerce Miscellaneous*—concld.	
	Providents and insurances	693
	Money-lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699
	Division 7—Transport, Storage and Communication	
70	*Transport—*	
	Transporting by railways	700
	Transporting by tramway and bus service ..	701
	Transporting by motor vehicles (other than omnibus).	702
	Transporting by road through other means of transport such as hackney carriage, bullock-cart, ekka.	703
	Animal transporting by animals such as horses, elephant, mule, camel.	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving.	705
	Transporting by boat, steamer, ferry, etc., by river, canal.	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean.	707
	Transporting by air	708
	Transporting by other means not covered above	709
71	*Services incidental to transport—*	
	Such as packing, carting travel agency.. ..	710
72	*Storage and Warehousing—*	
	Operation of storage such as warehouses ..	720
	Operation of storage such as cold storage ..	721
	Operation of storage of other type	722
73	*Communication—*	
	Postal, telegraphic, wireless and signal communications.	730
	Telephone communication	731
	Information and broadcasting	732
	Division 8—Services	
80	*Public Services* (This does not include Govt., Quasi-Govt. or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups).	
	Public Services in Union and State army including territorial corps and volunteer corps.	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government.	804
	Public service in administrative departments and offices of quasi-Government organisation, municipalities, local boards, etc.	805
	Public services in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services—*	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions.	810

Major Group (Code)	Description	Minor Group Code)
(1)	(2)	(3)
	Division 8—Services—*contd.*	
81	*Educational and Scientific Services*—concld.	
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type.	811
	Scientific services and research institutions not capable of classification under any individual group.	812
82	*Medical and Health Services*—	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners.	820
	Veterinary services rendered by organisations and individuals.	821
83	*Religious and Welfare Services*—	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities this includes missions, ashrams and other allied organisations.	830
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk.	831
	Welfare services rendered by organisation operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity.	832
84	*Legal Services*—	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi.	840
	Matrimonial services rendered by organisations and individuals.	841
85	*Business Services*—	
	Engineering services rendered by professional organisations or individuals.	850
	Business services rendered by organisations of accountants, auditors, book-keepers or like individuals.	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies.	852
	Business services rendered by professional organisations or individuals such as of those rendered by news-agency, newspaper correspondent, columnist, journalists, editors, authors.	853

Major Group (Code)	Description	Minor Group (Code)
(1)	(2)	(3)
	Division 8—Services—*concld.*	
86	*Community Services and Trade and Labour Associations*—	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations.	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers association, club, library.	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*—	
	Production of motion picture and allied services such as processing, editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures.	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals.	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, etc., racing.	873
88	*Personal Services*—	
	Services rendered to households such as those by domestic servants, cooks.	880
	Services rendered to households such as those by governess, tutor, private secretary.	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities.	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning, services.	883
	Hair dressing, other services rendered by organisations and individuals such as those by barber, hair dressing saloon and beauty shops.	884
	Services rendered by portrait and commercial photographic studios.	885
89	*Services (not elsewhere classified)*—	
	Services rendered by organisations or individuals not elsewhere classified.	890
	Division 9—Activities not adequately described	
90	*Activities unspecified and not adequately described*—	
	Including activities of such individulas who fail to provide sufficient information about their industrial affiliation to enable them to be classified.	900
	Fresh entrants to the Labour Market	999

APPENDIX II

NATIONAL CLASSIFICATION OF OCCUPATIONS

A Code structure which classifies occupations into—

11 Occupational Divisions (one-digit code numbers)

75 Occupational Groups (two-digit code numbers)

Note.—n. e. c.=not elsewhere classified.

DIVISIONS

0 Professional, technical and related workers

1 Administrative, executive and managerial workers

2 Clerical and related workers

3 Sales workers

4 Farmers, fishermen, hunters, loggers and related workers

Miners, quarrymen and related workers

Workers in transport and communication occupations

7-8 Craftsmen, production process workers, and labourers not elsewhere classified

9 Service, sport and recreation workers

X Workers not classifiable by occupations

DIVISIONS AND GROUPS

Professional, Technical and Related Workers

0 Architects, Engineers and Surveyors
1 Physicists, Chemists, Geologists and other Physical Scientists
02 Biologists, Veterinarians, Agronomists and Related Scientists
03 Physicians, Surgeons and Dentists
04 Nurses, Pharmacists and other Medical and Health Technicians
05 Teachers
06 Jurists
07 Social Scientists and Related Workers
08 Artists, Writers, and Related Workers
09 Draughtsmen, Science and Engineering Technicians, n. e. c.
0X Other Professional, Technical and Related Workers

Administrative, Executive and Managerial Workers

10 Administrators, and Executive Officials, Government
11 Directors and Managers, Wholesale and Retail Trade
12 Directors, Managers and Working Proprietors, Financial Institutions
13 Directors, Managers and Working Proprietors, Other

Clerical and Related Workers

20 Book-Keepers and Cashiers
21 Stenographers and Typists
22 Office Machine Operators
28 Clerical Workers, Miscellaneous
29 Unskilled Office Workers

Sales Workers

30 Working Proprietors, Wholesale and Retail Trade
31 Insurance and Real Estate Salesmen, Salesmen of Securities and Services and Auctioneers
32 Commercial Travellers and Manufacturers' Agents
33 Salesmen, Shop Assistants and Related Workers
34 Money Lenders and Pawn Brokers

Farmers, Fishermen, Hunters, Loggers and Related Workers

40 Farmers and Farm Managers
41 Farm Workers
42 Hunters and Related Workers
43 Fishermen and Related Workers
44 Loggers and Other Forestry Workers

5 Miners, Quarrymen and Related Workers

50 Miners and Quarrymen
51 Well Drillers and Related Workers
52 Mineral Treaters
59 Miners, Quarrymen and Related Workers, n. e. c.

6 Workers in Transport and Communication Occupations

60 Deck Officers, Engineer Officers and Pilots, Ship
61 Deck and Engine-Room Ratings (Ship), Barge Crews and Boatsmen.
62 Aircraft Pilots, Navigators and Flight Engineers
63 Drivers and Firemen, Railway Engine
64 Drivers Road Transport
65 Conductors, Guards and Brakesmen (Railway)
66 Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport
67 Telephone, Telegraph and Related Telecommunication Operators
68 Postmen and Messengers
69 Workers in Transport and Communication Occupations, n. e. c.

7-8 Craftsmen, Production Process Workers, and Labourers not elsewhere Classified

70 Spinners, Weavers, Knitters, Dyers and Related Workers
71 Tailors Cutters, Furriers and Related Workers
72 Leather Cutters, Lasters and Sewers (except Gloves and Garments) and Related Workers
73 Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers
74 Precision Instrument Makers, Watch Makers, Jewellers and Related Workers
75 Tool Makers, Machinists, Plumbers, Welders, Platers and Related Workers
76 Electricians and Related Electrical and Electronics Workers
77 Carpenters, Joiners, Cabinet Makers, Coopers and Related Workers
78 Painters and Paper Hangers
79 Bricklayers, Plasterers and Construction Workers, n. e. c.
80 Compositors, Printers, Engravers, Book Binders and Related Workers
81 Potters, Kilnmen, Glass and Clay Formers and Related Workers
82 Millers, Bakers, Brewmasters and Related Food and Beverage Workers
83 Chemical and Related Process Workers
84 Tobacco Preparers and Products Makers
85 Craftsmen and Production Process Workers, n. e. c.
86 Testers, Packers, Sorters and Related Workers
87 Stationary Engine and Excavating, and Lifting Equipment Operators and Related Workers
89 Labourers, n. e. c.

9 Service, Sport and Recreation Workers

90 Fire Fighters, Policemen, Guards and Related Workers
91 House Keepers, Cooks, Maids and Related Workers
92 Waiters, Bartenders and Related Workers
93 Building Caretakers, Cleaners and Related Workers
94 Barbers, Hairdressers, Beauticians and Related Workers
95 Launderers, Dry Cleaners and Pressers
96 Athletes, Sportsmen and Related Workers
97 Photographers and Related Camera Operators
99 Service, Spot and Recreation Workers, n. e. c.

X Workers not Classifiable by Occupations

X0 Workers without occupations
X8 Workers Reporting Occupations Unidentifiable or Inclassifiable
X9 Workers not Reporting Occupations

APPENDIX III

Common Household Industries with their Industrial Code Numbers

Note—n. e. c.=not elsewhere classified

Industrial Code Number	Household Industry
Major Group 00—Field Produce and Plantation Crops	
005·1	Production of Vegetables
005·2	Production of roots, etc., not included above
006·1	Production of fruits and nuts in plantation, vines and orchards.
006·2	Production of copra (from coconuts)
007·1	Production of thatching grass.
007·2	Production of wood, bamboo, cane reeds, etc. (excluding thatching grass)
008·1	Production of juice (Neera) by tapping coconut trees.
008·2	Production of juice by tapping other palms like date Palmyra n. e. c.
009·0	Production of other agricultural produce (including fruits and nuts not covered by 006 and flowers) not covered above
Major Group 01—Plantation Crops	
013	Production of tobacco in plantation
015·1	Pan Cultivation
015·2	Plantation crops except tea, coffee, rubber, tobacco, ganja, cinchona, opium and pan
Major Group 02—Forestry and Logging	
023·1	Production of Charcoal
023·2	Production of other fuels by exploitation of forests
024	Production of fodder by exploitation of forests
025·1	Production of Kathha
025·1	Production of Lac
025·3	Production of gum
025·4	Production of resins, barks, herbs, wild fruits, berries and leaves, etc., n. e. c.
026	Production and gathering of other forest products not covered above.
Major Group 03—Fishing	
030	Production of fish by fishing in sea
031	Production of fish by fishing in inland waters and ponds including fish farms and fish hatcheries.
032	Production of pearls, conch shells, sponges, sea herbs, corals, etc., by gathering or lifting from sea, river, pond
Major Group 04—Livestock and Hunting	
040·1	Rearing of goat for milk and animal power
040·2	Rearing of buffalo for milk and animal power
040·3	Rearing of cows for milk and animal power
040·4	Rearing of camels and other big domestic animals
040·5	Production and rearing of livestock mainly for milk and animal power n. e. c.
041·1	Sheep breeding and rearing
041·2	Production of wool
042·1	Rearing and production of pigs and goats (mainly for slaughter)
042·2	Rearing and production of other animals (mainly for slaughter) n. e. c.
043·1	Poultry keeping and production of eggs
043·2	Rearing and production of ducks, hens, etc., and other small birds, *e.g.*, pigeons, parrots, peacock, maina, etc.
044·1	Bee keeping for production of honey and wax
044·2	Collection of wax and honey
045	Rearing of tassar/eri/mulberry and other silk worms and production of cocoons and raw silk
046·1	Dog breeding, rearing of rabbits and guinea-pigs
046·2	Rearing of other small animals and insects n. e. c.
048·1	Collection of bones
048·2	Manufacture of glue from animal carcasses.
048·3	Manufacture of gut
048·4	Production of other animal husbandry products such as skin, ivory, teeth and hair, etc.

Industrial Code Number	Household Industry
Major Group 10—Mining and Quarrying	
107·1	Extraction of chalk
107·2	Quarrying of lime-stone
107·3	Stone and slate quarrying
107·4	Quarrying of sand, clay, gravel, etc., n. e. c.
Major Group 20—Foodstuffs	
200·1	Production of flour by village chakkies or flour mill by grinding wheat, maize, gram, etc.
200·2	Hand pounding of rice by Dhekhi or Ukhal
200·3	Production of rice by milling, dehusking and processing of paddy by rice mill.
200·4	Grinding of chillies, turmeric, etc.
200·5	Production of pulses
200·6	Parching of grains
200·7	Production and processing of other crops and food-grains n. e. c.
202·1	Gur and Khandsari making from sugarcane and palm
202·2	Production of bhoora and candy
202·3	Production of jaggery from coconut and palmyra juice (neera)
202·4	Production of other indigenous products from sugar and jaggery n. e. c.
203·1	Manufacture of achar, pickles, chutney and murabba
203·2	Production of sauce, jam and jelly
203·3	Processing of cashew nut
203·4	Manufacture of kokam products
203·5	Fruit preservation (canning of fruits)
203·6	Making dried vegetables
203·7	Production of other fruit products and preservation of fruits n. e. c.
204·1	Slaughtering, preservation of meat and fish and canning of fish
204·2	Fish currying or curing and salting (currying applies more to skin and hide)
205	Production of bread, biscuit, cake and other bakery products
206	Production of butter, cream, ghee, cheese, chhana, khowa and other dairy products
207	Oil pressing ghani, kolhu or by small maahines
209·1	Confectionery
209·2	Making of sweetmeats, laddu, peda, barphi, batasa, etc.
209·3	Sattu, bhunja, papar, barri, danauri, tilauri, sewai, apalam, etc.
209·4	Making of chura or chira, muri, murki, khoi
209·5	Making of chat
209·6	Making of dalmot, chanachur (jor) garam, rewari, etc.
209·7	Making of other food products for residuary snacks
209·8	Production of other food products like cocoa, chocolate, toffee, lozenge
Major Group 21—Beverages	
201·1	Manufacture of vinegar from coconut juice (neera)
210·2	Manufacture of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery
211	Production of country liquor from material obtained from sources other than trees and shrubs
212·1	Production of indigenous liquor such as liquor, toddy, neera from mahua and palm trees
212·2	Production of other indigenous liquors from other materials from trees and shrubs
214·1	Production of mineral water
214·2	Production of aerated water such as sodawater, lemonade, etc.
215	Production of ice
216	Production of ice-cream, ice-candy or kulphimalai, milk-shake, etc.
218	Grinding of Coffee
219·1	Preparation of sharbat and squashes
219·2	Preparation of jeerapani
219·3	Production of other beverages n. e. c.

Industrial Code Number	Household Industry
Major Group 22—Tobacco Products	
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
223	Manufacture of hookah tobacco
224	Manufacture of snuff
225	Manufacture of jerda, kimam, khaini and other chewing tobacco
226	Manufacture of other tobacco products n. e. c.
Major Group 23—Textile—Cotton	
230	Cotton ginning, cleaning, carding, pressing and baling
231	Cotton spinning (by charkha and takali)
233·1	Dyeing of cloth (cotton) and yarn
233·2	Bleaching of cloth (cotton) and yarn
233·3	Tie and dye (bandhani) of cloth and yarn
234	Cotton cloth weaving in powerlooms
235	Cotton cloth weaving in handlooms
236	Manufacture of khadi textile in handlooms
237	Printing of cloth (cotton)
238·1	Making of fishing net
238·2	Making of mosquito net
238·3	Making of other nets
239·1	Making of sacred thread
239·2	Making of thread, rope, cordage and twine (cotton)
Major Group 24—Textile—Jute	
240	Jute pressing and baling
241	Jute spinning and weaving of mats, asanis, etc.
242	Dyeing and bleaching of jute
244·1	Making of rope and cordage, out of hemp
244·2	Making of rope and cordage, out of jute
244·3	Making of rope by palm fibre
244·4	Making of rope by date palm fibre
244·5	Making of fibre, sunn-hemp fibre
244·6	Making of other products from jute and similar fibres such as hemp, mesta
Major Group 25—Textile—Wool	
250	Wool baling and pressing
251	Cleaning, sorting, carding, scouring and processing of wool
253	Spinning of wool by charkha or takali
254	Weaving of woollen cloth in powerloom such as blankets, asanis, etc.
255	Weaving of woollen cloth in handloom such as blankets, rugs, pashmina, thulma, gudma, etc.
256·1	Embroidery with various colours, combinations of various threads and art work in woollen textile
256·2	Shawls (with traditional borders)
Major Group 26—Textile—Silk	
261	Dyeing and bleaching of silk
262·1	Spinning of tussar, other than in mills
262·2	Spinning of eri, other than in mills
262·3	Spinning of silk, other than in mills n. e. c.
263·1	Weaving of Traditional silk (Atlas) by powerloom
263·2	Weaving of tussar by powerloom
263·3	Weaving of eri by powerloom
263·4	Weaving of silk and artificial silk in powerloom n. e. c.
264·1	Weaving of mashru, himroo, brocade, kinkhab by handloom
264·2	Weaving of silk and artificial silk in handloom n. e. c.
265	Printing of silk textile
266·1	Goaf making
266·2	Making of silk cordage, rope and twine n. e. c.
Major Group 27—Textile—Miscellaneous	
270·1	Making of durries
270·2	Making of carpets and druggets
270·3	Manufacture of other similar textile products n. e. c.
271·1	Making of hosiery goods such as banyans, socks, sweaters, mufflers, etc.
271·2	Making of nalas and azarbands
271·3	Making of parandas and chootelas

Industrial Code Number	Household Industry
Major Group 27—Textile—Miscellaneous—*concld.*	
271·4	Manufacture of hosiery and other knitted fabrics and garments n. e. c.
272·1	Embroidery and making of phulkari
272·2	Making of jari thread, zardoshi
272·3	Traditional embroidery
272·4	Patchwork embroidery
272·5	Lace garland making
272·6	Making of fringes and crepe laces
272·7	Making of kargota, main garlands, shell garlands, etc.
272·8	Making of other embroidery products n. e. c.
273·1	Making of cap, hat and other head-gear
273·2	Traditional garments
273·3	Chrochet work (bora caps)
273·4	Making of textile garments including raincoats and head-gears n. e. c.
274·1	Weaving of khes, bed covers, curtains, pillow cases and table-cloth, cloth bags, etc.
274·2	Making of newar
274·3	Manufacture of other made-up textile goods like mattress, quilt, rezai, etc., n. e. c.
275	Manufacture of waterproof textile products such as oil cloth, tarpaulin, etc.
276·1	Making of namda felt
276·2	Making of suzani (padded quilts)
276·3	Processing of coconut fibre for upholstery
276·4	Handicraft articles made of flax and fibre
276·5	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling n. e. c.
277·1	Manufacture of coir matting, cactus fibre for ropes and rope making from coconut fibre
277·2	Making of brush, broom, etc., from coconut fibre
277·3	Coir spinning
277·4	Coconut curing
277·5	Other allied products of coir industry n. e. c.
278	Manufacture and repair of umbrellas
279·1	Making of daura (thread) batua, cotton thread, buttons
279·2	Manufacture of dolls and toys (rags and cotton)
279·3	Manufacture of other textile products not elsewhere classified
Major Group 28—Manufacture of Wood and Wooden Products	
280	Sawing, planing and milling of wood
281	Manufacture of wooden furniture and fixtures
282	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows
283·1	Carpentry works concerned with repairs of agricultural implements (wood)
283·2	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipments and fixtures.
284·1	Lecquerware (if on wood)
284·2	Manufacture of wooden utensils, artware and decorative wooden boxes (patras)
284·3	Manufacture of wooden toys
284·4	Sandal wood and other wood carving
284·5	Bead making from wood
284·6	Sawdust and plaster figure making
284·7	Marquetry boxes (inlay work)
284·8	Manufacture of photo frames and framing of photo paintings, etc.
284·9	Manufacture of other wooden products n. e. c.
285	Manufacture of match splinters, plywood and veneers
287	Manufacture of boxes and packing cases other than plywood
288·1	Making of box from moonj grass
288·2	Making of rope mats, etc., from moonj and sawai grass and making of cadjar for thatching purposes
288·3	Making of mats, handfans and umbrellas from palm leaves
288·4	Making of sirki, moora and chhaj
288·5	Making of baskets and broomsticks
288·6	Making of donas (drone) and pattals (patravali) from leaves

Industrial Code Number	Household Industry
	Major Group 28—Manufacture of Wood and Wooden Products—*concld.*
288·7	Caning of chairs
288·8	Making of chicks, cuscus-tatti and fans, sticks and poles from bamboo
288·9	Manufacture of other articles from leaf, cane, bamboo, cork and other allied products n. e. c.
289·1	Making of sticks and poles from wood
289·2	Making of wooden kharaus and other wooden sandals
289·3	Making of cartwheels
289·4	Manufacture of other wood and allied products n.e.c.
	Major Group 29—Paper and Paper Products
291	Manufacture of pulp and paper by hand
292·1	Making of envelopes and paper bags.
292·2	Papier-mache articles
292·3	Making of kite
292·4	Paper decorations for homes
292·5	Making of card-board boxes and cards
292·6	Making of paper toys
292·7	Making of paper flowers, etc.
292·8	Manufacture of other paper products from paper, paper board and pulp n. e. c.
	Major Group 30—Printing and Publishing
301	Printing and publishing of books
302·1	Printing works, printing of handbills, invitation cards, etc.
302·2	Lithography, engraving, etching, block making, type cutting and other work connected with printing industry.
303	Book binding, stitching, sizing and other work connected with book binding industry
	Major Group 31—Leather and Leather Products
310·1	Flying, processing of hides and skins including taxidermy.
310·2	Currying, tanning and finishing of hides and skins, preparation of finished leather
310·3	Stuffed animals
311·1	Making of leather boots, shoes or chappals (slippers, sandals)
311·2	Making of Poola shoes
311·3	Manufacture of other footwear n. e. c.
312	Making of clothing and wearing apparel (except footwear) made of leather and fur
313	Manufacture of leather products such as leather upholstery suitcases, pocket-books, cigarette and key cases, purses, saddlery, whip, acquaducts (Kos), charsa and other articles
314	Repair of shoes, chappals and other leather footwear
315	Repair of all other leather products except footwear
	Major Group 32—Rubber, Petroleum and Coal Products
320	Vulcanising tyres and tubes
321	Manufacture of chappals from torn tyres and other rubber footwear
322	Manufacture of rubber products from natural and synthetic rubber including raincoats, oil clothes, waterproof cloths, etc.
	Major Group 33—Chemicals and Chemical Products
331·1	Manufacture of dyes, paints, colours, abir, sindoor, varnish, etc.
331·2	Manufacture of indigo
332	Manufacture of fertilizer (including from bones)
333	Manufacture of fireworks and other explosives such as *pataka*, etc.
334	Manufacture of matches
335·1	Manufacture of incense and perfumes
335·2	Manufacture of Agarbatti
335·3	Manufacture of rose water
335·4	Manufacture of powder, snow cream, bindi, tikali, hair oil and nail polish
335·5	Manufacture of kum kum and hinglo
335·6	Manufacture of mascara and kajal

Industrial Code Number	Household Industry
	Major Group 33—Chemicals and Chemical Products —*concld.*
335·7	Manufacture of medicines (ayurvedic, unani, etc.) and pharmaceutical preparations
335·8	Manufacture of perfumes, cosmetics and other toilet preparations n. e. c.
336·1	Manufacture of soap and washing soda
336·2	Manufacture of other washing and cleaning compounds n. e. c.
337·1	Manufacture of plastic toys
337·2	Making of plastic buttons
337·3	Manufacture of other plastic goods
337·4	Making of celluloid goods
337·5	Manufacture of turpentine, synthetic resin and other materials n. e. c.
338	Salt production
339·1	Manufacture of ink including fountain pen ink
339·2	Making of candles
339·3	Making of tooth powder
339·4	Making of boot polish and inedible oils, etc.
339·5	Manufacture of other chemical products n. e. c.
	Major Group 34-35—Non-mettalic Mineral Products other than Petroleum and Coal
340·1	Making of bricks
340·2	Manufacture of roofing tiles
340·3	Manufacture of other clay products n. e. c.
341·1	Manufacture of cement door frames and sanitary fittings
341·2	Manufacture of cement jali and tiles
341·3	Making of cement statues
341·4	Making of cement products n. e. c.
342·1	Manufacture of lishu
342·2	Manufacture of lime
343·1	Stone carving
343·2	Marble carving
343·3	Granite carving
343·4	Manufacture of other structural stone goods, stone dressing and stone crushing n. e. c.
344	Making of chakki, chakla, silaut, lorha, jainta, utensils and other articles from stone
345	Manufacture of stone images and toys
246·1	Making of images from soap stone
346·2	Manufactre of images, toys and other aritcles of plaster of paris
348·1	Mica splitting
348·2	Manufacture of mica products, including mica grinding
350	Making of earthenware such as pottery, etc.
351	Manufacture of crockery
353·1	Making of glass bangles
353·2	Making of glass beads
353·3	Manufacture of bead garlands (where making of garlands is undertaken at the place of manufacture of beads) (also see 399)
354	Manufacture of Laboratory glass apparatus
355	Making of clay models, earthen images, busts and statues
356·1	Making of earthen toys and artware
356·2	Decorative ceramics
357	Manufacture of glass and glass products except optical and photographic lenses
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment
360·1	Re-rolling of M. S. Rods
360·2	Manufacture of iron and steel including smelting, refining, rolling, etc., such as billets, blooms, tubes, rods n. e. c.
362	Manufacture of arms and weapons and their repair service
364	Manufacture of iron and steel furniture
365·1	Making of utensils of brass and bell metal
365·2	Making of brassware
365·3	Making of bottom part of hookha from brass and bell metal

Industrial Code Number	Household Industry
	Major Group 36—Basic Metals and their Products except Machinery and Transport Equipment—*concld.*
365·4	Making of brass and bell metal ornaments
365·5	Making of other brass and bell metal products n.e.c.
366·1	Making of aluminium utensils.
366·2	Making of other aluminium products n.e.c.
367·1	Making of tin utensils.
367·2	Making of articles from tin sheets.
367·3	Copper utensils.
367·4	Bronze works including bronze images, medals and articles of alloys
367·5	Manufacture of other metal products (excluding iron brass, bell metal, aluminium) n.e.c.
368·1	Lacquerware (if on metal).
368·2	Nickel plating and electroplating
368·3	Engraving, embossing, polishing and welding of metal products.
368·4	Enamelling and galvanizing of metal products
368·5	Plating and electroplating of metal n.e.c. including silverplating, goldplating, E. P. N. S., e c.
369·1	Manufacture of agricultural implements such as ploughshare, khurpi, kudal, etc.
369·2	Manufacture of light engineering goods including bolts and screws
369·3	Making of iron utensils (*e.g.*, buckets, etc.) and articles from iron sheets.
369·4	Making and repairing of locks and trunks.
369·5	Cutlery
369·6	Manufacture of pins
369·7	Manufacture of scales, weights and measures
369·8	Foundry Industry (including blacksmithy)
369·9	Manufacture of other sundry hardware such as G. I. pipe, wire net, etc., n.e.c.
	Major Group 37—Machinery (All kinds other than Transport) and Electrical Equipment
370	Manufacture of mechanical water pumps, tube well pumps, air pumps, etc.
372	Manufacture of small machine tools and machine parts
373	Manufacture of sewing machine parts
375	Repairing and servicing of fans
376	Manufacture of insulated wires
377·1	Manufacture of storage batteries
377·2	Manufacture of charging batteries
377·3	Manufacture of other batteries n.e.c.
378	Repairing and servicing of radios
379·1	Manufacture of domestic electrical appliances
379·2	Repairing and servicing of electrical apparatus, heaters, oven, etc.
	Major Group 38—Transport Equipment
382	Manufacture of body of trucks and buses including carpentry and joinery work involved
384	Repairing and servicing of automobiles

Industrial Code Number	Household Industry
	Major Group 38—Transport Equipment—*concld.*
385·1	Manufacture of cycle parts and accessories such as saddle, seat frame and gear, etc.
385·2	Manufacture of rickshaw parts
386	Manufacture of boats and barges
388	Repair of cycle and rickshaw
389	Manufacture of animal drawn and hand drawn vehicles such as bullock cart, tamtam, lagadi, palaki, cab, wheelbarrow, handbarrow, etc.
	Major Group 39—Miscellaneous Manufacturing Industries
390·1	Repair of spectacles
390·2	Manufacture of small photographic equipment
390·3	Manufacture of optical and photographic equipment n.e.c.
391	Manufacture of scientific goods
392	Repairing and servicing of watches and clocks
393·1	Inlaywork with ivory and brass
393·2	Goldsmithy
393·3	Manufacture of jewellery, silverware and wares using gold and other precious metal and precious and semi-precious stones
393·4	Silver artware, including silver repousse work on copper (such as in Tanjore) and silver images
393·5	Silver filigree industry
393·6	Manufacutre of gold and silver leaves
393·7	Gold covering work (fancy jewellery)
393·8	Bidriware industry
393·9	Manufacture of jewellery, silverwares, etc., n.e.c.
394	Manufacture, repairing and tuning of musical instruments such as harmonium, table, sitar, bansuri, etc.
395·1	Manufacture of chalk pieces
395·2	Making of slate and slate pencil
395·3	Making of rubber stamps
395·4	Manufacture of fountain pen parts
395·5	Manufacture of other stationery articles such as pencils, penholders, etc.
396·1	Manufacture of deshi sports goods such as lezzim and dumbells
396·2	Making of rubber balls and balloons
396·3	Manufacture of other sports goods n.e.c. bats, rackets balls, etc.
399·1	Making of tikka and cowdung cakes
399·2	Making of beads from conch shells and horn goods
399·3	Making of traditional objects such as Orissa, Mysore and Tanjore paintings, etc.
399·4	Making of lac bangles
399·5	Making of buttons (bone, shell, ivory)
399·6	Making of gangavan (making of wig from human hair)
399·7	Making of garlands from flowers, camphor, sandal wood shavings, seeds and other materials, like beads, etc.
399·8	Repair of petromax lights, etc.
399·9	Making and repairing of goods n.e.c.

J-1812—II-15-B (Yeotmal)

EXPLANATORY NOTE

The scope of the 1961 District Census Handbooks has been enlarged to include in this Part, Official Statistics on climate and rainfall, agriculture, industry, education, health and a few other topics. The material presented here was mainly collected and compiled by the District Statistical Officer, for this volume. The concerned Departments of the State and Central Governments have also been consulted. For most of the Tables the footnotes show the sources from which the material has been obtained.

2. There are 33 Tables in this Part. They may be broadly grouped as follows :—

(1) Climate and Rainfall—Tables 1 and 2.
(2) Agriculture—Tables 3 to 10.
(3) Industries—Tables 11 to 14.
(4) Education—Tables 15 and 16.
(5) Public Health—Tables 17 to 19.
(6) Miscellaneous—Tables 20 to 33.

(1) CLIMATE AND RAINFALL

Table 1

This table presents the highest and the lowest temperatures recorded at one or more stations in the district for all the 12 months for the years 1951 to 1960. Annual averages are shown in the last column.

Temperature data are maintained by the Meteorological Department and are published in their monthly weather reports and their summary which is published annually.

Table 2

This table shows monthly and annual rainfall and the number of rainy days for the various stations in the district. "Normal rainfall" [column (28)] is the average rainfall over a long period—usually 80 years. Where rainfall records over such a long period are not available it may be the average for a shorter period—in some cases even five years. Rainfall records are maintained at taluka headquarters, dispensaries and a few police stations where rain-gauges have been supplied. These statistics are published in Part III of the State Government Gazette and Annual Season and Crop Reports issued by the Department of Agriculture. They are subsequently consolidated and issued by the Meteorological Department in two annual publications, *viz.*, " Daily Rainfall of India " and " Monthly Rainfall of India".

Rainfall statistics are presented in this table separately for each of the ten years from 1951 to 1960.

J-1812-III—28—(Yeotmal).

(2) AGRICULTURE

Table 3

This table shows the utilisation of land and areas under various crops. Material is presented for the district as a whole and for each taluka separately. It is presented for ten years 1950-51 to 1959-60 :

(i) *Geographical area* : This area represents the total land area and is worked out from the Survey and Settlement Records. The changes in the geographical area from year to year may be due to territorial changes or corrections on account of adjustments in the areas of former unsurveyed villages which are now surveyed ;

(ii) *Forests* : This category includes all areas actually under forests whether State-owned or private and classed or administered as forests under any legal enactment dealing with the forests ;

(iii) *Barren and unculturable land* : This includes barren and unculturable lands like mountains, river beds, etc. (land which cannot be brought under cultivation unless at a very high cost) ;

(iv) *Culturable waste*: This includes lands which can be brought under cultivation but which have not been cultivated or having been cultivated for some time have not been cultivated successively for more than five years. Such lands may either be fallow or covered with shrubs ;

(v) *Permanent pastures and other grazing lands* : This includes all grazing lands whether they are permanent pastures and meadows or not ;

(vi) *Miscellaneous tree crops and groves not included in the net area sown* : This category includes lands under casuarina trees, thatching grass, bamboo bushes or other trees used for fuel, etc. Lands which are not included under orchards are included in this class. These are lands which are put to some agricultural use but whose area is not included in the net area sown ;

(vii) *Current fallows* : This includes lands which are left fallow during the current year only ;

(viii) *Other fallow land* : All lands which have been cultivated but which are temporarily out of cultivation for a period of not less than one year and not more than five years;

(ix) *Net area sown* : The net area sown is the actual area under crops counting areas sown more than once in the same year only once ;

(x) *Gross cropped area* : This is the sum of areas under all crops and represents the sum of net area sown and area sown more than once in the year.

After the land utilisation statistics under section A in column (1) the table presents in section B the details of areas under different crops. The crops are classified in two main groups, *viz.*, foodcrops and non-foodcrops. Foodcrops are further grouped by "cereals, pulses and others". Non-foodcrops are similarly shown under "oilseeds and others".

The data on land utilisation and areas under crops are primarily prepared by the village officials of the Revenue Department. They are subsequently consolidated by the Agriculture Department.

Talukawise land utilisation and crop statistics are being presented for the first time in this volume. They have not been published so far anywhere else.

Table 4

This table presents gross and net irrigated areas and the distribution of net irrigated area by sources of irrigation. To facilitate comparison, the gross cropped area is also shown in column (3). The data are presented for three years, *viz.*, 1950-51, 1956-57 and 1959-60. Presentation is for the district as a whole and for each taluka separately.

Table 5

This table shows the acreages of various crops under irrigation for each year from 1950-51 to 1959-60. To facilitate comparison, the gross cropped area and the gross irrigated area are presented in the beginning. This is followed by acreages under irrigation for each crop.

The material is presented for the district as a whole and for each taluka separately.

Sources for the district and talukawise material are different and there may, therefore, be a few small discrepancies between the two sets of figures.

Table 6

This table presents the outturn and average yields per acre of principal crops in the district. The crops presented are foodcrops like rice, wheat, jowar, bajri, ragi, maize, tur, gram and sugarcane and non-foodcrops like groundnut, sesamum, cotton and tabacco. Crops which are locally important are only shown in this table.

The outturn figures are in hundred tons while average yields are shown in pounds per acre.

The estimates of average yields and production in respect of rice, bajri (kharif and rabi), jowar, wheat, gram, cotton, groundnut, tobacco, ragi and tur are based on the results of crop estimation surveys conducted annually by the Agriculture Department. The estimates of yields for other remaining crop are based on the anna valuation figures and normal yields reported by the Revenue Officers. The figures relate to the years 1950-51 to 1950-60.

Table 7

This table presents wholesale prices of principal crops. The material is presented for previous years by monthly averages and for the last year separately for each month. The prices shown are for the places having regulated markets or for the District Headquarters.

Table 8

This table presents harvest prices of principal crops. The "harvest price" is the average wholesale price at which the commodity is disposed of by the producer to the trader at the village site during the specified harvest period. These prices are published in the Season and Crop Reports. The figures relate to the years 1950-51 to 1959-60.

Table 9

This table presents figures for livestock and agricultural implements for the district and each taluka separately for three years : 1951, 1956 and 1961. The material is obtained from the three Livestock Censuses conducted in those years. The reference date to which the data relate is the 15th April of the concerned year.

"Poultry" in section B of the table includes hens, cocks, chicken, ducks, drakes and ducklets.

Section C presents statistics for agricultural implements. The figures for carts shown in the table are in respect of carts used for agricultural purposes only.

The number of tractors is inclusive of those owned by the Government and those owned by private persons.

The material is presented for the district as a whole and for each taluka separately.

Table 10

This table presents the distribution of the number of land holdings and their areas by size of holdings. The material has been taken from the census of agricultural holdings conducted in the year 1952-53 or 1953-54 in different parts of the State.

The figures presented here are for ownership holdings and the area figures are in terms of converted dry acres, *i.e.*, calculated after giving due weightage for irrigated lands.

Where the district has undergone major changes because of the reorganisation of States in 1956 or 1960, the material relates to the area of the district as it existed in the year 1952-53 or 1953-54.

(3) INDUSTRIES

Table 11

This table presents, for each industry, the total number of working factories, the number of man-days for which they worked during the year and the average daily number of workers employed classified by adults (18 years and above), adolescents (15 to 17 years) and children (14 or less). Statistics presented in columns (3) to (11) relate only to the reporting factories. The number of non-reporting factories and their estimated average daily number of workers are shown in columns (12) and (13). These details of factories are further split up by the type of industry shown under column (1) both by industry code and a brief description. The industry codes shown here (as well as in Table 12) are those used for compilation of data by the Chief Inspector of Factories. They are different from the Standard Industrial Classification used in the Census Tables and reproduced in Appendix I to the Explanatory Note to Part II.

The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

The word " factories " here includes only the registered factories. They are of three types :—

(i) Factories using no power but employing 20 or more workers ;

(ii) Factories using power and employing 10 or more workers, and

(iii) Factories not covered by (i) and (ii) above but notified by the Government as covered by the Factories Act.

The material presented in this table is for all the three types combined.

Table 12

This table presents the distribution of factories for each type of industry by size of employment. For each size group, the number of factories and their total working strength are shown for each industry separately. The material is presented only for the district as a whole and only for one year, *viz.*, 1961.

Table 13

This table presents the distribution of factories for each type of industry by the number of days worked during the year. The material is shown for each industry and the number of factories and their total workers are shown for each group of working periods. This will show the seasonal or perennial pattern of employment in industries in the district. Material is presented only for the district as a whole and relates to the year 1961.

Table 14

This table presents a summary of data regarding the manufacturing industries as obtained through the annual Census of Manufacturing Industries conducted during the year 1958.

The 1958 Census had covered only 29 important industries. It moreover covered only the factories using power and employing 20 or more workers.

The figures for capital, etc., relate to 31st December 1958. "Value" added by manufacture denotes the increase in the total value of commodities as calculated by deducting the cost of materials, supplies, containers, fuel, electric energy and depreciation of fixed assets from the total value of the products.

The table presents only the combined figures for the 29 industries covered in the 1958 Census.

(4) EDUCATION

Table 15

This table shows the number of different types of educational institutions in the district and the total number of pupils (boys and girls) and teachers for each type for the years 1951, 1956 and 1961. The material is presented for the district as a whole and for each taluka separately.

The number of institutions relates to the academic year ending June and the number of pupils is as on 31st March of the respective years.

Table 16

This table presents a list of colleges and high schools in the district with their locations. The material relates to 31st March 1961, and does not include institutions started after that date.

Lists are presented talukawise.

(5) PUBLIC HEALTH

Table 17

This table shows medical facilities available in the district. The material is presented for three years 1950, 1955 and 1960 and shows the number of hospitals, maternity homes, dispensaries, rural health centres, doctors, nurses, beds available and indoor and outdoor patients treated.

Material is presented for each taluka separately.

The material presented here includes only civil hospitals and Government dispensaries, Local or Municipal Funds institutions, private-aided or Railway dispensaries. It does not cover private unaided institutions run by individuals or associations. Similarly, the number of doctors, nurses or patients shown in this table does not include that relating to unaided hospitals, dispensaries or private practitioners.

Table 18

This table shows data about births, deaths and infant deaths for the years 1951 to 1960. Wherever possible, figures for each taluka are also shown separately. For the districts of Aurangabad and Nagpur divisions, material is available and presented only for the years 1957 and onwards.

The figures of infant deaths relate to deaths of children below one year.

The coverage and reporting on births, deaths and epidemic diseases in the rural areas are incomplete in many respects. The material presented in Tables 18 and 19 should not, therefore, be treated as any accurate representation of actual conditions in the district and should be used only after allowing a margin for those limitations. The Department of Public Health is working on many schemes to improve the present position in respect of vital statistics.

Table 19

This table shows the number of deaths due to principal causes in the district for the 10 years 1951 to 1960. The causes of deaths shown are cholera, smallpox, plague, dysentery and diarrhoea, fever, respiratory diseases and other causes. The figures of fevers include deaths due to enteric fever, cerebro-spinal fever, malaria, influenza, typhus, etc. Respiratory diseases include pneumonia, pulmonary tuberculosis, whooping cough, etc. In the other causes are included diphtheria, chicken-pox, poliomyelitis, leprosy, cancer, deaths from child birth, etc.

(6) MISCELLANEOUS

Tables 20 to 31

Tables 20 to 31 are self-explanatory and need no further clarification.

Table 32

This table presents talukawise lists of weekly markets. The table also shows the day on which the weekly bazar is held. Places where cattle bazars are held are also indicated. The list is based on the information collected from the Mamlatdar's offices and the Census enumerators' reports, prepared in September-October 1960.

Table 33

This table gives a talukawise list of villages where different religious or cultural fairs are held. The list includes only those fairs which have a congregation of 1,000 or more. Information regarding—

(i) Location Code Number,

(ii) the name of the village in which the fair is held,

(iii) distance from Railway station and S. T. Bus stop,

(iv) name of the fair, and month and date of the fair, and

(v) average congregation

is furnished for each fair separately.

The list is prepared on the basis of information collected from the District Superintendents of Police, Municipalities and the Census enumerators' reports. The number of people gathering at the fair is based on eye estimates and should be treated as a broad approximation.
