MOTIF

The picture depicts 'Paunar Chhatri' a cement canopy—built in memory of Mahatma Gandhi—the father of the nation. It is on the bank of Dham river at Paunar village, situated about 9 kms. from Wardha—district headquarter town.

This, historical village of earlier days, was the residence of late Acharya Vinoba Bhave, Gandhiji's Chief disciple and author of the Bhoodan (land-gift) movement. Of the modern places of interest which have been invested with sanctity are the Gandhi Kuti and the Paramdham Ashram of Vinobaji. For years he stayed in this Ashram and went out every day to the surrounding villages and worked ceaselessly to ameliorate the conditions of the indigent and the downtrodden in diverse ways.

FOREWORD

The District Census Handbook (DCH), compiled by the Census organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulating local level and regional plans and as an aid to District administration. The district census hand book is the only publication which provides Primary Census Abstract (PCA) data upto village level for rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census hand book series was initiated during the 1951 Census. It contained important tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the format of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approached to the village is to have an idea about the villages in the district which are inaccessible. A new column, " total population and number of households " has been introduced to examine the co-relation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of SC & ST population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class-I and Class-II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns of civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Tahsil/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non-census data in relation to the infrastructure has been introduced to enhance its value.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri P. P. Mahana, the Director of Census Operations, Maharashtra on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

P. PADMANABHA,
Registrar General, India.

New Delhi :
The 26th April 1982.

ACKNOWLEDGEMENTS

The preceding foreword of the Registrar General and Census Commissioner, India, is quite exhaustive and gives the reader a complete account of the District Census Handbook project. As has been mentioned therein, the publication of District Census Handbooks of Maharashtra is a joint venture of the Government of Maharashtra and the Census Organisation of the Government of India. The design for the 1981 District Census Handbooks was evolved centrally by the Census Commissioner, India. The contribution of the Government of Maharashtra comes by way of bearing the cost of printing. We are thankful to the Census Commissioner and to his band of devoted officers in the Social Studies Division for the valuable guidance they have given us, and to the Government of Maharashtra for the readiness they have shown to print and publish these handbooks. Our grateful thanks are also due to the District Inspectors of Land Records for helping us in marking village boundaries on the tahsil maps we have prepared and presented in these handbooks, and for recording a certificate of authenticity on each such map we referred to them.

Shri P. P. Mahana, who held the office of Director of Census Operations, Maharashtra, and guided the operations of the 1981 Census, left this organisation on 14th December 1982. The data presented in these handbooks were collected and compiled under the direction and guidance of Shri Mahana. We would deem it our duty, therefore, to offer him our sincere and grateful thanks for all that he did for this project.

In this directorate, the undersigned exercised overall supervision over the work of the project, while the main brunt of day-to-day supervision was borne by Shri A. S. Dange, Deputy Director. He was ably assisted in this work by Shri Madhav Shyam, Research Officer (Map) and Smt. V. Y. Joshi, Shri G. M. D. Lone and Shri V. S. Nagle, Assistant Directors. The list of their colleagues in the District Census Handbook Unit who put in untiring efforts to bring the project to fruition is fairly long and is not being given here for want of space. However, all these unnamed assistants in various grades who attended to the voluminous work of compilation, typing, comparing, checking and mapping, etc., deserve our heart-felt thanks.

A. W. MAHATME,
Joint Director of Census Operations.

Census Directorate, Maharashtra, Bombay.
Dated 26th January 1984 (Republic Day).

ANALYTICAL NOTE

HISTORY AND SCOPE OF DISTRICT CENSUS HANDBOOK

The District Census Handbook compiled by the State Directorate of Census Operations is, in effect, a joint venture of the State Government and the Census Organisation of the Government of India. Its publication was started from 1951 census. Not only has it become a regular feature of every census but even its coverage has been enlarged and rationalized. Naturally, this document is constantly being consulted by the planners, administrators, academicians and researchers alike. The 1981 district census handbook is the fourth in the unbroken series.

In 1951, district census handbook contained important census tables and the primary census abstract for each village and town in the district. The scope of district census handbook was enlarged at the 1961 census by including descriptive account of the district and administrative statistics in addition to the census tables and the primary census abstract of every village and town. The 1971 district census handbook series was organised in three different parts, Part A related to the village and town directory. Part B to village and townwise Primary Census Abstract (PCA) and Part C to analytical report, administrative statistics, census tables, analytical tables based on the PCA and amenity data for every village. However, for Maharashtra State (as also for many other states in India). only Part A and Part B of the district census handbook were published. Part C had to be given up mainly because of the problems relating to printing.

1981 district census handbook is comprised of two parts—Part A and Part B. Part A includes village and town directory and Part B village and townwise primary census abstract. While designing the format of 1981 district census handbook, data on some new items, such as adult literacy centres, primary health subcentres and community health workers, has also been included.

Village and Town Directory as well as primary census abstract included in the district census handbook are expected to meet the requirements of the planners for micro level planning. Similarly, the additional data for town directory in respect of civic and other amenities in class I and II towns are oriented to minimum needs programme specially in respect of slum dwellers. The data on amenities by size of town would be of great interest to the scholars and planners alike.

Brief History of the District

Wardha, the least population district of the Maharashtra State, with least area except for Greater Bombay of district which is totally urban, owes its name to river Wardha which flows along the entire northern, western and partly southern border of the district, thereby separating it from Amravati and Yavatmal districts. The name 'Wardha' according to local interpretations is a corruption of 'Varaha' or the boar incarnation of Lord Vishnu, as it is believed that the river rises from the month of the four at the invocation of a saint. The district lies at the foot of the Satpuda hills in the Wardha Valley.

The earliest period of habitation in Wardha district goes back to about 1000 B C. to 800 B. C. On the basis of ceramic evidence found when archaeological excavations were conducted at Paunar, 8 Kms from Wardha town. The remains of the next or chalcolithic period were discovered in the excavations carried on at Kaundinyapur in the adjoining district of Amravati and also in the later strata at Paunar. People of this period were in a pastoral-cum-hunting-cum-agricultural stage and lived in small villages on river banks. This kind of life continued until it was changed by a fresh in flux of people who came with a knowledge of iron, agriculture and town planning in about the fourth Century B. C. In course of time kingdoms were formed, battles fought to won and lost. This process continued till the mediaeval period which was marked by the arrival of muslim invaders and subsequently the rise of Maratha kingdom by Shivaji. Wardha was annexed to British Empire around March 1854.

It was a part of Nagpur district till 1862 and was detached from it in the same year for efficient administration. Secondly, the bifurcation was intended to project the interests of the very valuable cotton industry in this part of the Wardha valley which needed special supervisor.

The district headquarters were first located at Kaotha near Pulgaon and were subsequently shifted to the present site in 1866, which was then village Palakwadi. Later, it was renamed as Wardha after river Wardha. Between 1911 and 1955 no major changes were effected in the boundaries of the district. However, the Reorganisation of states in 1956 resulted in the transfer of this district from Madhya Pradesh to erstwhile Bombay State. Since 1st May 1960, the district constitutes a part of Maharashtra state. There have been no jurisdictional changes in the district ever since.

In 1961, there were 3 talukas in the district comprising of 972 inhabited villages. At the time of 1971 census the number of tahsil (tahsil and taluka are synonymous terms) remained at 3 but inhabited villages were reduced by 10 to 962. This number of inhabited villages rose to 1,015 at 1981 census while retaining the number of tahsils to 3 only. The reason for increase in number of villages is upgrading of hamlets/wadis in the district. One point to be noted is that there are 356 uninhabited villages (second largest in the state, next to Chandrapur district with 476 uninhabited villages) according to 1981 Census. As regards towns, the number of towns remained at 6, unchanged during the period of 1961—81.

Location, Relief and Drainage

The district lies towards eastern side of Maharashtra between 20°18' and 21°21' north latitude and 70°30' and 79°15' east longitude. It is bounded in the west and north by Amravati district, in the east by Nagpur district, south-east by Chandrapur district and in the south by Yavatmal district. The district is spread over an area of 6,310 Km^2 and from amongst the various district of the state has returned the lowest population of 926,618 persons at 1981 Census. From the area

point of view it ranks 25th in the state. But for Greater Bombay which is total urban district, Wardha has the smallest area in the state.

Off shoot of the Satpuda range is the only system of hills in this district. A spur of the Satpuda range enters the north of the district and covers most of the Arvi tahsil. The hill ranges and intervening valleys sun generally in south-easterly direction. The central cluster of hills forms the watershed on the district from the north and west of this range many small streams made their way to the Wardha river while on the south and south-east, Dham and Bor rivers take their rise and flow down the length of the district in a south-easterly direction. The slope of the district is from north-west to south-east.

Important rivers of the district are Wardha river and its tributary the Wunna. The river originates from the Mutai plateau of the Satpuda range and flows along the entire northern and western border of the district. The principal tributary *i. e.* Wardha enters the district from Nagpur and traverses the centre of the Hinganghat tahsil and merges in Wardha river near Sawangi at the south-western corner of the district. Other tributaries of lesser significance are Bor, Dham, Pothra and Asoda, Bor and Dham use in Arvi tahsil and flow in a south-easterly direction. Both, however, meet and soon afterwords join Wunna a little above Mandgaon. Pothra drains the south of the Hinganghat tahsil and after forming its border for some distance falls into Wunna a little above its junction with Wardha river. Asoda rises in the north-western slopes of Wardha tahsil and flows south-east and then turning at Alipur in Hinganghat tahsil to finally join the Wardha river near Nimsada village. These rivers, though of not much significance threaten the valleys on their banks when they are in separate during monsoons. During summer there is hardly any water in these rivers. Moreover, the beds of these rivers are very deep rendering unfit for canal irrigation.

Climate

The climate of the district is characterised by a hot summer and general dryness throughout the year except during the monsoon. The monsoon set in the middle of June and continue till the end of October, winter last from November till the end of February and followed by summer till the middle of June. The temperature varies between the extremes. Even on the same day the variations are considerable and the scorching heat of the day followed by cold nights is remarkable in the summer months. Generally a breeze is seen in hot weather making the season some what tolerable. May is the hottest month and January is the coldest month of the year.

The district receives rains from the south-west monsoon and the intensity of rainfall is the greatest in August. Within the district the rainfall is not uniform. It increases from Arvi tahsil to Hinganghat tahsil in the south. The normal rainfall at Wardha is 1,082 mm. While at Hinganghat it is 1,125 mm. Annual rainfall within the district varies between 900 to 1,400 mm. Since the district receives rains in abundance the incidence of failure of crops is very low.

Soil

'Khardi' and 'bardi' black soil of the district can be grouped into the following categories: Shallow, medium and deep. The shallow type of the soil is found in the eastern half of Hinganghat tahsil, the northern most corner of Wardha tahsil and the central part of Arvi tahsil. The western quarter of the Hinganghat tahsil and the western strip of Arvi tahsil contain medium soils. The rest of the district has good soils capable of growing both kharif and rabbi crops. All these soils are derived from the volcanic trap and are, therefore, quite fertile and capable of producing good cotton and jowar crops. The best soil in the district is found along the bank of Wardha river in Arvi tahsil. It is formed of the detritus brought down from the hills and is highly rich for the growth of cotton crop.

Census Houses and Households

The Primary Census Abstract reveals in columns 4 and 5 of the total number of occupied residential houses and the number of households in the district. To start with a 'Census House' is a building or a part thereof having a main entrance from the road or a common courtyard or staircase etc. It may be occupied or vacant, residential or non-residential or both.

A household is a group of persons who live together and would take their meals from a common kitchen, unless the exigencies of work prevented them from doing so. A household may be of persons related by blood or of unrelated persons or having a mix of both. There may be single member or more than one member household. Households of unrelated persons termed as 'institutional households' include boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. Yet another category of households population or houseless households which include persons who do not have any fixed place of residence. They move from place to place, camp at night at their own choosing or just live on the streets, pavements, gardens or in open places.

There are 178,005 residential houses spread over three tahsils of which the district is comprised of. They accommodate the district population of 926,618 persons. As regards the houseless population of 8,867 and institutional population constitutes 5,436 persons in the district- An average size of the household works out to 5.07 persons. This is however, less than the average size of the household observed at the state level 5.37 persons.

Distribution of Population in Rural and Urban Areas

As returned at 1981 census, the population of the distrcit stands at 926,618 persons comprising of 475,696 males and 450,922 females. Thus the population of the district constitutes only 1.48 per cent of the population of the state. As already said this small district with only 3 tahsils is the least populous district of the state. Among the three tahsils of the district, Wardha is the most populous (424,770). The population of Arvi

and Hinganghat has been returned at 249,188 and 252,660 persons respectively (Table 1).

TABLE 1

Population, Number of Villages and Towns, 1981

Serial No.	Name of tahsil	Population									No. of villages		No. of towns
		Total			Rural			Urban					
		P	M	F	P	M	F	P	M	F	Total	In-habited	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)

2	Arvi ..	249,188	127,594	121,594	218,069	111,643	106,426	31,119	15,951	15,168	492	360	1
3	Hinganghat	252,660	129,233	123,427	193,585	98,614	94,971	59,075	30,619	28,456	413	302	1
District Total		926,618	475,696	450,922	695,108	355,774	339,334	231,510	119,922	111,588	1,371	1,015	6

The basic unit, from the administrative part of view, in the village in the rural areas of the country. A 'village' may be defined as a statutory recognised unit having definite boundaries and separate land records. Urban areas, on the other hand are specially defined for purposes of census. The criteria adopted at 1981 census is :

(*a*) All places with a municipality, corporation or cantonment board or notified town areas ;

(*b*) All other places which satisfy the following criteria :

(*i*) A minimum population of 5,000 ;

(*ii*) At least 75 per cent of male working population engaged in non-agricultural (and allied) activities ;

(*iii*) A population of at least 400 persons per Km^2.

From a population of 926,618 persons of the district, 695,108 live in the rural areas and the remaining 231,501 persons have earned out their abode in the urban areas. A comparison with state figures shows that 75.02 per cent and 24.98 per cent live in the rural and urban areas of the district, respectively against the corresponding state population of 64.97 per cent and 35.03 per cent. Thus, the district is less urbanised than the state taken as a whole.

Size Class and Status of Towns

To study in detail their varied demographic characteristics, towns have been divided into the following classes according to their population :—

Class I ..	..	100,000 and above
Class II	..	50,000 — 99,999
Class III	..	20,000 — 49,999
Class IV	..	10,000 — 19,999
Class V ..	..	5,000 — 9,999
Class VI ..	..	Below 5,000

In 1981, no town has been added to the already existing 6 towns in the district nor has any been declassified (Table 2).

TABLE 2

New Towns/Towns declassified in 1981 Census

Name of the town (1)	Population in 1981 census (2)
(*a*) Added	Nil.
(*b*) Declassified	Nil.

From the 6 towns in the district as per 1981 census no one qualifies to be a class I town. Wardha and Hinganghat qualify as class II town with a population of 88,495 and 59,075 respectively. Arvi and Pulgaon by virtue of their population returned at 31,119 persons and 31,358 persons respectively claim to be class III towns. Deoli with a population of 11,566 is a class IV town while Sindi with a population of 9,897 is a class V town (Statement I).

Urban Agglomeration

There is no urban agglomeration in this district.

Standard Urban Area

Standard Urban Area (S. U. A.) concept introduced in 1971, has been followed in 1981 as well. The essential requirement for the constitution of S. U. A. are :

(*i*) It should have a core town of a minimum population of 50,000;

(*ii*) The contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town ; and

(*iii*) In all probability this entire areas should get fully urbanised within a span of two or three decades.

The constituent units of Standard Urban area in Wardha district are :

Wardha S. U. A.—

Urban Components :

1. Wardha (M).

Rural Components :

1. Umari.
2. Pipri.
3. Alodi.
4. Nalwadi.
5. Sindi-Hindnagar.
6. Sawangi Meghe.
7. Borgaon Meghe.
8. Chichala.
9. Mhasala.

In all there are 1,371 villages in the district and the inhabited ones number 1,015 during 1981 census. Of the inhabited ones 250 (24.63 %) have less than 200 population, 293 (28.87%) fall in the size class of 200-499, 416 (40.98%) have population between 500-1,999. The remaining 47 (4.63%) and 9 (0.89%) fall in the population range of 2,000—4,999 and 5,000—9,999 respectively (Table 3).

TABLE 3

Distribution of Inhabited Villages by population Ranges

Range of population (1)	No. of villages in each range (2)	Percentages of villages in each range (3)
—200	250	24.63
200—499	293	28.87
500—1,999	416	40.98
2,000—4,999	47	4.63
5,000—9,999	9	0.89
10,000+	..	..
All ranges .	1,015	100.00

There is however, no village in the district with a population of 10,000 or more. For a broader generalisation the villages have further been classified as: small sized (population below 500), medium sized (500—1,999), large sized (2,000—4,999). Accordingly there are 543 small sized, 416 medium sized and 47 large sized villages in the district. 9 villages are exceptionally large sized (5,000+). In other words, an inhabited village in the district has an average population of 685 persons against 1,037 persons for the state as a whole.

Population Growth, Density and Sex Ratio

The population of the district, as returned at 1981 census, stands at 926,618 persons. Thus to its 1971 population of 779,562 persons it has added 147,056 persons yielding the decennial growth rate of 18.86 per cent during 1971—81. During the same period the state has registered a growth rate of 24.54 per cent. Thus the growth rate registered by the district is much lower than the one found at the state level. The lower growth of the district may be due to the male selective migration to neighbouring Nagpur district which has more lucrative job opportunities to offer because of its wider industrial and commercial bases. Within the district of the three tahsils comparing if Hinganghat experienced the highest growth rate of 23.61 per cent and Arvi the lowest of 14.42 per cent. Wardha tahsil grow out a growth rate of 18.86 per cent (Table 4).

TABLE 4

Decadal Change in Distribution of Population

Name of tahsil	Population						Percentage decadal (1971—81) variation		
	1971			1981					
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1. Wardha ..	357,376	237,117	120,259	424,770	283,454	141,316	+18·86	+19·54	+17·51
2. Arvi ..	217,783	191,289	26,494	249,188	218,069	31,119	+14·42	+14·00	+17·46
3. Hinganghat ..	204,403	160,054	44,349	252,660	193,585	59,075	+23·61	+20·95	+33·20
District total ..	779,562	588,460	191,102	926,618	695,108	231,510	+18·86	+18·12	+21·14

As coincidence would have it, the growth rate of the district as also of Wardha tahsil has turned out to be the same. The rural-urban differentials in the growth rate reveal that while the urban growth rate in the district has been of the order of 21.14 per cent, the rural rate of growth has been 18.12 per cent. In the Wardha tahsil, rural growth rate (19.54%) has been higher than urban one (17.51%). Against this both Arvi and Hinganghat have revealed higher urban growth rates. While the rural growth rate has been 14.00 per cent in Arvi tahsil, the urban growth rate has been 17.46 per cent. More striking differentials are observed in case of Hinganghat tahsil where 20.95 per cent has been rural growth rate and 33.20 per cent has been returned in case of urban areas.

Since 1901 and right up to 1961 there have been sharp fluctuations in the rate of growth in the district. The growth rate was insignificant for the decades 1931-41 and 1941-51. In the following decade of 1951-61 the district population has shown a sudden rise and has attained a growth rate of 17.70 per cent. This significant increase in the growth rate during the decade appears to be the result of control of epidemics and other diseases since 1950. The highest ever rate of growth has, however, been found in the decade 1961-71. It has been of the order of 22.91 per cent. The increase has been more than 5 points during this decade. This may again be due to better medical amenities provided to the people resulting in higher survival rate. The decade 1971-81, however, reveals a decline in the growth rate (18.86%).

As regards urban growth rate since independence, it was highest (27.39%) during the decade of 1961-7 1 (Table 5).

TABLE 5

Growth, Density and Sex-ratio of urban population in the district in relation to the state

Census Year	District						State					
	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per km²)	Sex ratio (No. of females per 1,000 males)	Total population	Urban population	%Urban population	Decadal percentage variation in urban population	Density (population per km²)	Sex ratio (No. of females per 1,000 males)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
1951 ..	538,903	125,852	23·35	+25·36	N.A.	950	32,002,564	9,201,013	28·75	+62·42	N.A.	807
1961 ..	634,277	150,015	23·65	+19·20	3,125	917	39,553,718	11,162,561	28·22	+21·32	1,694	801

1981 ..	926,618	231,510	24·98	+21·14	7,784	931	62,784,171	21,993,594	35·03	+39·99	3,736	850

N.A.—Not Available.

It came down to (21.14%) in the decade 1971-81. In the same decade from amongst the 6 towns of the district the highest growth rate (33.20%) has been observed in Hinganghat town. Against this Pulgaon town has revealed a negative growth rate (—6.06%). Other towns in order of their rate of growth are Wardha (28.18%), Deoli (21.64%), Sindi (18.78%), Arvi (17.46%) (Statement I).

The district has a population of 926,618 persons spread over an area of 6,310 Km². This yield a density of 147 persons per Km² on an average. This is much lower than 204 persons per Km² found at the state level, from amongst the three tahsils of the district. Wardha has the highest density of 201 persons per Km². Arvi and Hinganghat have the same at 108 and 134 persons per Km² which are obviously lower than the district average.

TABLE 6

Distribution of Villages by density

Ranges of density (Per km.²)	Total No. of villages in each density range	Perentage of villages in each density range
(1)	(2)	(3)
—10	103	10.15
11—20	40	3.94
21—50	78	7.69
51—100	249	24.53
101—200	370	36.45
201—300	94	9.26
301—500	52	5.12
501 + ...	29	2.86
Not known	..	..
All density ranges	1,015	100.00

As would be seen from table—6, of the 1,015 inhabited villages in the district, 103 have less than 10 persons per Km² whereas 29 have 501 or more persons per Km². The highest number of villages 370 have a density of 101-200 persons per Km². Next highest number of villages 249 have the same in the range of 51—100 persons per Km².

In the urban areas the highest density of 11,745 persons per Km² has been found in Pulgaon town. Wardha town has revealed the second largest density of 11,389 persons per Km² . In respect of other towns it ranges between 1,410 and 9,848 persons per Km² (Statement I). Since 1951 the density of population in the district has been increasing. A sporadic leap ahead is observed in 1971. Against an urban density of 3,125 persons per Km² of 1961, the same has been found at 6,461 persons per Km² in 1971—a more than 100 per cent increase. However the increase in 1981 has been modest *i. e.* 7,784 persons per Km². At the state level the density has increased but the same has been of a steady nature. Against 1,694 persons per Km² in 1961, it increased to 2,555 persons per Km² in 1971 and to 3,736 persons per Km² in 1981 (Table 5). Sex ratio, defined as member of females per 1,000 males, has been recorded at 948 for the district as a whole at 1981 Census. This is, however, higher than 937 observed at the state level. The following table reveals the sex ratio at the district and the state level since 1901 :—

TABLE 6 (i)

Sex Ratio 1901—1981

Year	District	State
1901	987	978
1911	983	966
1921	973	950
1931	975	947
1941	978	949
1951	983	941
1961	964	936
1971	949	930
1981	948	937

As would be seen from the above table between 1901 and 1921 the Sex Ratio divulges a downward trend with a declines from 987 to 973. A similar trend is described between 1901 and 1921 at the state level also. On the contrary an upward trend is disclosed at the district level from 1931 to 1951 when Sex ratio rises from 975 to 983. Thereafter it had again shown a declining trend similar to be trend observed for the state sex ratio. Out numbering by males is also observable at the tahsil level in Table 6 (ii).

TABLE 6 (ii)

Sex Ratio by tahsils, 1981

District/Tahsil	Females per 1,000 males
Wardha District	948
Wardha tahsil	941
Arvi tahsil	953
Hinganghat tahsil	955

The highest sex ratio of 955 has been found in Hinganghat tahsil followed by Arvi tahsil with 953. Wardha tahsil, however, reveals a sex ratio 941 lower than the district average.

The urban sex ratio of 931 at the district level at 1981 census is significantly higher than the corresponding State sex ratio of 850. Trend over past few decades (Table 5) reflects fall in the district urban sex ratio till 1971 and then increase at 1981 census; while for the state there is an increasing trend since 1961.

Scheduled Castes and Scheduled Tribes

To evolve schemes and draw up the plans for improving the socio-economic condition of the Scheduled Castes and Scheduled Tribes communities, the government and other welfare agencies require data pertaining to socio-economic cultural and demographic characteristics of the members of these communities. To fulfill this need, the census organisation has been collecting the required information ever since 1961. To start with, there is not a standard definition for identifying the scheduled castes or scheduled tribes. Scheduled castes are such of the castes in Hindu and Sikh communities as are declared so by the President of India through a notification under article 341 (i) of the constitution. Similarly, scheduled tribes are such of the tribes as are declared by President of India under article 342(i) of the constitution.

For Maharashtra state 59 castes and 47 tribes have been recognized as scheduled castes and scheduled tribes respectively. These lists are given below :—

Scheduled Castes and Scheduled Tribes in Maharashtra State

I. LIST OF SCHEDULED CASTES

1. Ager.
2. Anamuk.
3. Aray Mala.
4. Arwa Mala.
5. Bahna, Bahana.
6. Bakad, Bant.
7. Balahi, Balai.
8. Basor, Burud, Bansor, Bansodi.
9. Beda Jangam, Budga Jangam.
10. Bedar.
11. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chamari, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Nona, Ramnami, Rohit, Samgar, Samagara, Satnami, Surjyabanshi, Surjyaramnami.
12. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli.
13. Bindla.
14. Byagara.
15. Chalvadi, Channayya.
16. Chenna Dasar, Holaya Dasar, Holeya Dasari.
17. Dakkal, Dokkalwar.
18. Dhor, Kakkayya, Kankayya, Dohor.
19. Dom, Dumar.
20. Ellamalvar, Yellammalawandlu.
21. Ganda Gandi.
22. Garoda, Garo.
23. Ghasi, Ghasia.
24. Halleer.
25. Halsar, Haslar, Hulasvar, Halasvar.
26. Holar, Valhar.
27. Holaya, Holer, Holeya, Holiya.
28. Kaikadi (in Akola, Amravati, Bhandara, Buldana, Nagpur, Wardha and Yavatmal districts and Chandrapur district other than Rajura tahsil).
29. Katia, Patharia.
30. Khangar, Kanera, Mirdha.
31. Khatik, Chikwa, Chikvi.
32. Kolupulvandlu.
33. Kori.
34. Lingader.
35. Madgi.
36. Madiga.
37. Mahar, Mehra, Taral. Dhegu Megu.
38. Mahyavanshi, Dhed, Vankar, Maru-Vankar.
39. Mala.
40. Mala Dasari.
41. Mala Hannai.
42. Mala Jangam.
43. Mala Masti.
44. Mala Sale, Netkani.
45. Mala Sanyasi.
46. Mang, Matang, Minimadig, Dankhni Mang, Mang Mahashi, Madari Garudi, Radhe Mang.
47. Mang Garodi, Mang Garudi.
48. Manne.
49. Mashti.
50. Meghval, Menghvar.
51. Mitha Ayyalvar.
52. Mukri.
53. Nadia, Hadi.
54. Pasi.
55. Sansi.
56. Shenva, Chenva, Sedma, Ravat.
57. Sindhollu, Chindollu.
58. Tirgar, Tirbanda.
59. Turi.

II. LIST OF SCHEDULED TRIBES

1. Andh.
2. Baiga.
3. Barda.
4. Bavacha, Bamcha.
5. Bhaina.
6. Bharia Bhumia, Bhuinhar Bhumia, Pando.
7. Bhattra.
8. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave.
9. Bhunjia.
10. Binjhwar.
11. Birhul, Birhor.
12. Chodhara (excluding Akola, Amravati, Bhandara, Buldana, Chandrapur, Nagpur, Wardha, Yavatmal, Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts.)
13. Dhanka, Tadvi, Tetaria, Valvi.
14. Dhanwar.
15. Dhodia.
16. Dubla, Talavia, Halpati.
17. Gamit, Gamta, Gavit, Mavchi, Padvi.
18. Gond, Rajgond, Arakh, Arrakh, Agaria, Asur, Badi Maria, Bada Maria, Bhatola, Bhimmi, Bhuta, Koilabhuta, Koilabhuti Bhar, Bisonhorn Maria, Chota Maria, Dandami Maria, Dhuru, Dhurwa, Dhoba, Dhulia, Dorla, Gaiki, Gatta, Gatti, Gaita, Gond Gowari, Hill Maria, Kandra, Kalanga, Khatola Koitar, Koya, Khirwar, Khirwara, Kucha Maria, Kuchaki Maria, Madia, Maria, Mana, Mannewar, Moghya, Mogia, Monghya, Mudia, Muria, Nagarchi, Naikpod, Nagwanshi, Ojha, Raj, Sonjhari Jhareka, Thatia, Thotya, Wade Maria, Vade Maria.
19. Halba, Halbi.
20. Kamar.
21. Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari.
22. Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanwar, Chattr
23. Khairwar.
24. Kharia.
25. Kokna, Kokni, Kukna.
26. Kol.
27. Kolam, Mannervarlu.
28. Koli Dhor, Tokre Koli, Kolcha, Kolgha.
29. Koli Mahadev, Dongar Koli.
30. Koli Malhar.
31. Kondh, Khond, Kandh.
32. Korku, Bopchi, Moussi, Nihal, Nahul, Bondhi, Bondeya.
33. Koya, Bhine Koya, Rajkoya.
34. Nagesia, Nagasia.
35. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka.
36. Oraon, Dhangad.
37. Pardhan, Pathari, Saroti.
38. Pardhi, Advichincher, Phans Pardhi, Phanse Pardhi, Langoli Pardhi, Behelia, Bahellia, Chita Pardhi, Shikari Takankar, Takia.
39. Parja.
40. Patelia.
41. Pomla.
42. Rathawa.
43. Sawar, Sawara.
44. Thakur, Thakar, Ka Thakur, Ka Thakar Ma Thakur, Ma Thakar.
45. Thoti (in Aurangabad, Bid, Nanded, Osmanabad and Parbhani districts and Rajura Tahsil of Chandarpur district).
46. Varli.
47. Vitolia, Kotwalia, Barodia.

Scheduled caste population in the district has been returned at 36,412 persons comprising of 18,783 males and 17,629 females. Thus the scheduled caste population accounts for 3.93 per cent of the district population. This is, however, much lower than the state average of 7.14 per cent of such population. The proportion of this community has increased from 3.02 per cent in 1971 to 3.93 per cent in 1981. The rural-urban differential show that 65.84 per cent of the total scheduled caste population live in the rural and 34.16 per cent is in the urban areas of the district. From amongst the 1,015 inhabited villages of the district 464 do not have scheduled caste population at all (Table 7).

TABLE 7

Proportion of Scheduled Castes Population to Total Population in the Villages

Percentage range of Caste population to total population (1)	No. of villages in each range (2)	Percentage of villages in each range (3)
No S. C. Population	464	45.72
—5	435	42.86
6—10	69	6.80
11—15	25	2.46
16—20	11	1.08
21—30	7	0.69
31+	4	0.39
All ranges ..	1,015	100.00

Of the remaining villages 435 have up to 5 per cent of such population. On the other hand there are 4 villages having the scheduled caste population above 30 per cent. 69, 25, 11 and 7 villages have the proportion of such population in the percentage range of 6-10, 11-15, 16-20 and 21-30 respectively.

The following Table 7(i) shows the tahsil-wise population of scheduled caste and scheduled tribe population to the total population of the district for 1971 and 1981.

TABLE 7 (i)

Scheduled Castes and Scheduled Tribes population 1971 and 1981

District/Tahsil	Percentage of scheduled caste population to total population		Percentage of scheduled tribe population to total population	
	1971	1981	1971	1981
(1)	(2)	(3)	(4)	(5)
Wardha District ..	3.02	3.93	..	15.35
Wardha tahsil ..	3.33	4.05	..	13.70
Arvi tahsil ..	3.19	4.44	..	20.15
Hinganghat tahsil ..	2.31	3.21		13.39

As per 1981 census, the scheduled tribe population of district stands at 142, 244 persons comprising the 72,579 males and 69,665 females. Thus the scheduled tribe population constitutes 15.35 per cent of the population of the district. In fact there was no scheduled tribe population in the district prior to 1981. This sudden emergence of this population is due to the removal of area restrictions for recognizing certain tribes as scheduled tribes in the state. In other words certain tribes which were not formerly recognized as scheduled tribes have been recognized as such now. The highest proportion of scheduled tribe population has been found in Arvi tahsil (20.15 per cent). Wardha and Hinganghat tahsils have the proportion of such population at 13.70 per cent and 13.39 per cent respectively. As is the general trait with this community 85.63 per cent live in rural areas of the district and the remaining 14.37 per cent have been found in urban areas.

As would be seen from Table 8, 128 villages do not have the scheduled tribe population at all. 146 Villages are having such population of the order of less than 5 per cent. Against this there are 137 villages having such population of the order of more than 50 per cent. The largest number of villages 251 have the scheduled tribes population between 6 to 15 per cent. The remaining 176, 93 and 84 fall in the percentage range of 16-25, 26-35 and 36-50 respectively.

TABLE 8

Proportion of Scheduled Tribes Population to Total Population in the Villages

Percentage range of scheduled tribe population to total population (1)	No. of villages in each range (2)	Percentage of villages in each range (3)
No S. T. Population	128	12.61
—5	146	14.38
6—15	251	24.73
16—25	176	17.34
26—35	93	9.16
36—50	84	8.28
51+	137	13.50
All ranges ..	1,015	100.00

In the urban areas scheduled caste and scheduled tribe population constitute 5.37 per cent and 8.83 per cent respectively of the urban population of the district (Table 9).

TABLE 9

Proportion of Scheduled Castes/Scheduled Tribes population in towns

Name and civic status of the town (1)	Total population (2)	Total scheduled caste population (3)	Total scheduled tribe population (4)	Percentage of scheduled caste population to total population (5)	Percentage of scheduled tribe population to total population (6)
Arvi (M. Cl.)	31,119	2,196	2,741	7·06	8·81
Deoli (M. Cl.)	11,566	652	690	5·64	5·97
Hinganghat (M. Cl.)	59,075	2,798	5,781	4·74	9·79
Pulgaon (M. Cl.)	31,358	1,397	2,699	4·46	8·61
Sindi (M. Cl.)	9,897	482	1,824	4·87	18·43
Wardha (M. Cl.)	88,495	4,913	6,703	5·55	7·57
All Towns ..	231,510	12,438	20,438	5·37	8·83

The highest percentage of scheduled caste population (7.06%) has been observed in Arvi town and the highest concentration of scheduled tribe population has been found in Sindi town (18.43%).

Literacy

From the census point of view, any person who is able to both read and write with understanding in any language is recorded as a literate. The 1981 census has revealed the literacy rate of the district as 51.05 per cent which is higher than the state average of 47.18 per cent. Though least populated the district ranks 5th among other districts of the state in the field of literacy. Within the district the higher literacy rate of 54.20 per cent has been observed in Wardha tahsil. In case of Arvi and Hinganghat tahsils it has been returned at 48.94 per cent and 47.82 per cent respectively (Table 12). Table 10 revealed the distribution of villages in various population ranges and the average rate of literacy in each range.

TABLE 10

Literacy Rates by Population Ranges of Villages

Range of population (1)	No. of villages in each range (2)	Literacy rate (3)
—200	250	28.17
200—499	293	41.22
500—1,999	416	45.06
2,000—4,999	47	50.58
5,000—9,999	9	55.63
10,000+	..	..
All ranges ..	1,015	46.27

It is seen that higher the range of the population higher is the rate of literacy. This is obvious because of better schooling amenities available in the large size of villages. In case of various towns in the district, the highest literacy rate has been observed in Wardha town (70.03 %). Literacy rates in respect of other towns are Pulgaon 64.97 per cent Hinganghat 62.62 per cent, Arvi 61.95 per cent, Sindi 61.39 per cent and Deoli 58.06 per cent (Table 11).

TABLE 11

Literacy Rates for Towns

Name and civic status of the towns (1)	Literacy rate (2)
Arvi (M. Cl)	61.95
Deoli (M. Cl.)	58.06
Hinganghat (M. Cl.)	62.62
Pulgaon (M. Cl.)	64.97
Sindi (M. Cl.)	61.39
Wardha (M. Cl.)	70.03
All towns ..	65.40

The following table 11(i) reveals the growth of literacy in the district for the last 80 years.

TABLE 11 (i)

Progress of literacy, 1901-81

Year (1)	Total (2)	Males (3)	Females (4)
1901	3.89	7.57	0.15
1911	4.71	9.11	0.23
1921	5.75	10.64	0.73
1931	6.77	12.32	1.09
1941	12.37	19.91	4.66
1951	21.18	33.45	8.62
1961	30.45	43.44	16.98
1971	41.71	52.55	30.29
1981	51.05	61.01	40.53

It is interesting to note that overall literacy in the district has improved by over 13 times since 1901. Compared to males, the improvement in female literacy is remarkable. It is heartening to note that from a meagre average female literacy of 0.15 per cent in 1901, the same has been found at 40.53 per cent in 1981, Till 1931, the improvement has modest but the subsequen decades have revealed marked improvement. Between 1961-71, the average male literacy gained by 9 points. Against that the female literacy gained by over 13 points It can also be said that for every two literate females there were three literate males at the time of 1981 census. As regards the rural-urban differentials, the literacy has been of the order of 65.40 per cent in urban areas against 46.27 per cent in rural areas of the district (Table 12). Rural literacy of 46.27 per cent of the district is comparatively much higher than the state average for rural areas, of 38.15 per cent. However the highest urban literacy data of 67.32 per cent has been observed in Wardha tahsil and it leads in highest rural literacy also (47.66 %).

Working Population

'Work' in census has been defined as participation in economically productive activity. The participation may be physical or mental in nature. Thus it involve not only actual work but also effective supervision and direction.

In 1981 there has been a conceptual change in defining a worker. A trichotomy of main workers, marginal workers and non-workers has been adopted in 1981 census against a dichotomy of workers and non-workers only as adopted at 1971 and 1961 censuses. However, care has been taken to make the data comparable with previous censuses. Conceptually the main workers plus the marginal workers of 1981 are, almost comparable with the 'workers plus non-workers with secondary work' of 1971 and 'workers' of 1961. Again, on the recommendation of the Planning Commission and Central Statistical Organisation only four categories of main workers *i.e.* cultivators, agricultural labourers, workers engaged in household industry and other workers have been adopted against nine industrial categories of workers in 1971 and 1961.

The main worker has been defined as one who was engaged in the economically productive activity for the major part of the preceding year (at least 6 months or 183 days). Those who worked for sometime, but not for the major part of the year, during the preceding year have been treated as marginal workers. All those who did not work at all during the preceding year have been recorded as non-workers. Those include persons, engaged in household duties, students dependents retired persons, rentiers, beggars etc.

As returned at 1981 census, main workers constitute 42.87 per cent of the population of the district. This is higher than the state average of 38.71 per cent. Sex differentials of main workers also reveal that male and female main workers proportionately out member their counterparts at the state level. A compansion of work particapation rate between 1971 and 1981 reveals that the proportion of main workers has increased to 42.87 per cent in 1981 from 39.10 per cent of 1971 while the male main workers have increased by a point or so, the female main workers have increased by about 6 points.

Within the district Arvi tahsil again leads with a proportion of main workers working out to 47.10per cent. Hinganghat and Wardha tahsils have returned the same at 42.82 per cent and 40.42 per cent respectively below the district average (Table 12).

TABLE 12

Literates, Workers, Non-workers, Scheduled Castes/Scheduled Tribes population in the district

Name of tahsil	Total Rural Urban	Total Population			Percentage of S.C. population to total population	Percentage of S.T. population to total population	Percentage of Literates to total population		
		Persons	Males	Females			Persons	Males	Females
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1. Wardha ..	Total ..	424,770	218,869	205,901	4.05	13.70	54.20	63.65	44.15

The proportion of marginal workers at the state level has an edge over the district. In the state the marginal workers account for 3.85 per cent of the total population while in the district they constitute 2.35 per cent as per 1981 census. The figures of non-workers for the district and the state are 54.78 per cent and 57.44 per cent respectively.

The main workers have been sub-divided into—cultivators, agricultural labourers, workers engaged in household industry and other workers. Cultivators as per 1981 census in the district constitute 28.95 per cent of the main workers against the state average of 35.12 per cent. The sex differentials in cultivators reveal that male cultivators constitute 33.03 per cent and female cultivators 21.69 per cent of the main workers of the district. These proportions are, however, lower than the corresponding state porportions of 33.69 per cent and 38.48 per cent respectively.

The district has returned significantly higher proportion of agricultural labourers. Against the state average of 26.63 per cent of agricultural labourers amongst the main workers, the same has been disclosed as 47.99 per cent in the district. A similar trend is desirable in case of male and female agricultural labourers also. The former and the later constitute 34.79 per cent and 71.45 per cent respectively of the main workers of the district. The corresponding proportions at the state level stand at 18.51 per cent and 45.61 per cent. High proportion of female agricultural labourers and low proportion of female cultivators in the district as compared to the state average is worth noting. In case of workers engaged in household industry, the district recorded the same at 1.93 per cent of the main workers while in the state they average 2.55 per cent.

The category 'other workers' has a considerably higher proportion of main workers in the state than in the district. Other workers constitute 35.70 per cent of main workes in the state, against only 21.13 per cent in the district.

A little probe into the figures reveals that the district has more of an agrarian economy than found at the state level. This is borne out by the fact that cultivator and agriculture labourer claim 76.94 per cent of the main workers against the state average of 61.75 per cent. Moreover 'Other workers' encompassing non-agriculture persuits are proportionately much less in the district than those worked out at state level.

Availability of Amenities—Education

From amongst the 1,015 inhabited villages in the district, educational amentity is available in 796 villages encompassing a rural population of 679,568 persons. In other words this amenity covers 78.42 per cent villages and 97.76 per cent of the rural population of the district (Table 13 and 14).

TABLE 13

Distribution of Villages according to the availability of different amenities

Serial No.	Name of tahsil	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
			Educational	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communications	Approach by pucca road	Power supply

	Total of all tahsils ..	695,108	679,568 (97.76)	275,547 (39.64)	695,108 (100.00)	348,278 (50.10)	271,910 (39.12)	418,544 (60.21)	430,209 (61.89)	612,313 (88.09)

Of the three tahsils of the district Hinganghat leads with 269 villages out of its 302 having this amenity and 98.52 per cent of its rural population benefits from the same. The proportion of villages having this facility in respect of Wardha and Arvi tahsils respectively stands at 75.64 per cent and 72·22 per cent. The corresponding proportion of population covered 97.75 per cent and 97.12 per cent. 328 Villages with the educational amenity have a population of less than 500 each. Against this there are 9 villages each with population of more than 5,000. The remaining 412 and 47 fall in the population range of 500-1,999 and 2,000-4,999 respectively. There are 219 villages do not have this amenity at all. The inhabitants of 171 have to walk a distance of upto

5 kms. to reach nearby school, inhabitants of another 30 villages have to cover a distance of 5-10 kms to reach a school. Inhabitants of yet another 18 villages have to tread a distance of more than 10 kms. to avail this amenitity (Table 15 and 16).

TABLE 15

Table 18 indicates schools per ten thousand of population in towns.

TABLE 18

Schools per ten thousand population in towns

Class, name and civic status of town	No. per ten thousand population			
	Higher secondary/ Inter/PUC/Junior College	Secondary/ Matriculation	Junior secondary/ Middle	Primary
(1)	(2)	(3)	(4)	(5)
III Arvi (M. Cl.)	1·29	1·29	0·96	4·82
IV Deoli (M. Cl.)	2·59	1·73	1·73	6·05
II Hinganghat (M. Cl.)	0·68	0·85	1·02	2·88
III Pulgaon (M. Cl.)	1·59	1·59	1·59	3·19
V Sindi (M. Cl.)	2·02	2·02	1·01	6·06
II Wardha (M. Cl.)	1·47	1·36	1·47	4·52
All towns ..	1·34	1·30	1·30	4·10

In so far as the urban areas are concerned the population to institution ratios are 10,000: 1.34 Higher Secondary/Inter/PUC/ Junior College ; 10,000: 1.30 Secondary/Matriculation School ; 10,000 : 1.30 Junior Secondary/Middle School and 10,000 : 4.10 Primary School. To make it more understandable it may be said that there is an Higher Secondary/Inter/PUC/ Junior College for every 7,468 persons ; a Secondary/ Matriculation School for every, 7,717 persons a Junior Secondary/Middle School for every 7,717 persons and a Primary School for every 2,437 persons in the urban areas of the district.

Medical

Medically, district is not well disposed. Hardly 151 villages (14.88%) inhabiting 275,547 rural population (39.64%) have the medical amenities available. Wardha tahsil, the district headquarter also has medical amenities available in just 36 villages out of its 353 inhabited villages. Much worse is the condition in Hinganghat tahsil where only 30 out of 302 villages have been provided with this amenity. Arvi tahsil, however appears to be in a better slope with the amenity provided in 85 of its 360 villages (23.61%). In this tahsil 55.03 per cent of its rural population benefit from this facility (Table 13 and 14). From amongst the 151 villages provided with medical amenity, 16 have a population of less than 500 each. There are, however, 8 villages each with a population of 5,000 or more. The remaining 90 and 37 fall in the population range of 500-1,999 and 2,000-4,999 respectively (Table 15). Of the villages devoid of medical amenities, the inhabitants of 418 have the medical amenity available within a radius of 5 kms. The same is not in the case with other 313 villages whose inhabitants have to travel a distance of 5-10 kms. in search of medical facility. Much worse is the condition of the inhabitants of remaining 133 villages who have to tread more than 10 kms. in search of a medical facility. In the urban areas there are 2.39 beds available to 1,000 urban population (Table 19).

TABLE 19

Number of beds in medical institutions in towns

Class, name and civic status of the town	No. of beds in medical institutions per 1,000 population
(1)	(2)
III Arvi (M. Cl.)	0·39
IV Deoli (M. Cl.)	1·04
II Hinganghat (M. Cl.)	1·05
III Pulgaon (M. Cl.)	2·84
V Sindi (M. Cl.)	1·52
II Wardha (M. Cl.)	4·11
All towns ..	2·39

In other words a bed is available after every group of 418 urban people. The bed position is some what better in Wardha town where a bed is available after every group of 243 persons.

Drinking Water

All the villages in the district have been provided with the drinking water amenity.

Post and Telegraph

The post and telegraph amenities are available in 192 villages (18.92%). Of these 88 fall in Wardha tahsil and remaining 61 and 43 fall in Arvi and Hinganghat respectively. The amenity covers 50.10 per cent of the rural population of the district. In Wardha tahsil the facility caters to 60.17 per cent of its population. In

respect of other tahsils viz ; Arvi and Hinganghat the coverage of population extends to 49.17 per cent and 36.41 per cent respectively (Table 13 and 14).

From amongst the 192 villages having the post and telegraph amenity, 6 have less than 500 population while another 9 have 5000 or more population. The remaining 131 and 46 fall in the population size class of 500-1,999 and 2,000-4,999 respectively (Table-15).

823 villages are not having this amenity. To obtain the same the inhabitants of 569 villages can get it within a radius of 5 kms ; whereas the inhabitants of 206 have to travel a distance of 5-10 kms in search of the same. There are yet another 48 villages whose inhabitants have to tread a distance of more than 10 kms to have avail this amenity (Table-16).

Market/hat

For the sale and purchase of goods and commodities markets/hats are held in 164 villages (16.16%) of the district and 39.12 per cent of the district rural population benefits from the same, within the district. Arvi tahsil leads with markets/hat being held in 72 of its 360 villages. In case of Wardha and Hinganghat such markets are organised in 54 and 38 villages respectively. In Arvi tahsil 48.57 per cent of its population is benefitted by such market/hat. In case of Wardha and Hinganghat the proportion of populations covered by such markets/hats stand respectively at 36.18 per cent and 32.77 per cent (Table 13 and 14).

Of the villages having this amenity 21 have less than 500 population. On the other hand 7 villages are with a population of 5,000 or more. Another 98 and 38 villages fall in the population range of 500-1,999 and 2,000-4,999 respectively (Table-15).

From the 851 villages not having this amenity, the people of 453 villages have such markets/hats within the radius of 5 kms. 302 villages have a distance of 5-10 kms and another 96 villages have such markets/hats at a distance of above 10 kms. (Table-16).

Communications

Communication facilities are available in 358 villages (35.27%) of the district and cater to 60.21 per cent of the districts rural population. These facilities include bus stop, railway station and waterways within the village. Arvi tahsil lead in communication amenities available to 62.92 per cent of its rural population. It is followed by Wardha tahsil with 62.62 per cent of its population enjoying the amenity within the villages. (Table 13 and 14).

From the 358 villages having the communication facilities, 107 have less than 500 population whereas 9 villages have 5,000 or more population. The remaining 197 and 45 fall in the population ranges of 500-1,999 and 1,000-4,999 respectively (Table-15).

657 villages do not have any of the communication facilities. 392 have the same available within a radius of 5 kms. 195 have then at a distance of 5-10 kms, while another 70 have then at a distance of more than 10 kms.

Approach by Pucca Road

411 villages constituting 40.49 per cent of all the villages in the district are connected by Pucca road. Of these 171 fall in Wardha tahsil and the remaining 146 and 94 belong to Arvi and Hinganghat tahsils respectively. As regards the coverage of population by these roads, 6 out of 10 persons of the district benefit from such roads. Largest network of such road, benefitting 7 out of the 10 persons of its population, has beer found in Wardha tahsil. The similar proportions in respect of Arvi and Hinganghat tahsils stand respectively at about 6 and about 5 out of 10 persons. (Tables 13 and 14).

From amongst the 411 villages having the pucca roads, 152 have a population of less than 500 persons ; whereas 9 have 5,000 or more. 207 have a population between 500-1,999. The remaining 43 fall in the population range of 2,000-4,999.

Power Supply

729 villages (71.82%) of the district inhabiting 88.09 per cent of its population have been electrified. Within the district 307 of the 353 villages of Wardha district have get the benefit of electricity. 269 out of 360 (about three fourth) and 153 out of 302 (about half) villages of Arvi and Hinganghat tahsils respectively have beer provided with electrictiy. (Tables 13 and 14). Of the electrified villages in the district 310 have less than 500 population and 9 are with a population of 5,000 or more. 363 and 47 fall in the population range of 500-1,999 and 2,000-4,999 respectively. (Table-15).

Villages which do not have any amenity (except drinking water) are 81 in number (Appendix-III). Tahsilwise break-up of these villages is Wardha-29, Arvi-33 and Hinganghat -19. 219 villages without school, 864 villages devoid of medical facility, 823 villages not having postal facility, no market/hat in 851 villages, 657 villages without the facility of bus stop/railway station/waterway, 604 villages not approachable through pucca road and 286 villages not having electricity is certainly not a happy situatior. A positive relationship between the size of the village and amenity provided is observed.

Land Utilization

Columns 15 to 19 of the village directory reveals the land use pattern in each village of the district. The classification of land use adopted corresponds to the recommendations of the Ministry of Food and Agriculture.

Forests

Nearly one twenty-fifth (203 km^2) of the total area is under forests. Most of the forests in the district lie in the northern half in a more or less compact block in the Arvi and Wardha tahsils. The forests within the track are of the southern tropical dry deciduous type. Within this main type considerable local variations occur depending mainly on rock and soil, topography and past treatment. In Wardha division the forests are mainly borne by the trap zone. Teak forests are found in parts of Arvi, Karanja and Hingni range. Other species found are 'ber' khair, palas, ain, lendia, saja, devda, moin and karvanda. Important forest products are teak, gum, bamboo, tendu leaves, grass and firewood.

Irrigated, Un-irrigated and Culturable Waste Areas

Columns 16, 17 and 18 of the village directory reveal the irrigated area, unirrigated area and culturable waste respectively in the district. The major chunk of the area is devoid of irrigation facilities and it constitute only 4.98 per cent of the total cultivable area of the district (Table 20).

TABLE 20

Distribution of Village according to the Land use (in hectares)

Serial No.	Name of tahsil	No. of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to the total cultivable area
(1)	(2)	(3)	(4)	(5)	(6)
1	Wardha	353	178,581·00	85·28	7·33
2	Arvi	360	162 250·00	72·56	5·65
3	Hinganghat	302	163,105·52	84·02	1·80
	Total of all tahsils ..	1,015	503,936·52	80·78	4·98

Within the district Wardha tahsil is in a better position with 7.33 per cent of irrigated area to total cultivable area. It is followed by Arvi and then Hinganghat tahsils. Arvi tahsil has only 72.56 per cent cultivable area which is much below the district average of 80.78 per cent.

Staple Food

In all the three tahsils of the district the Staple food comprise of wheat and jowar (Table 21).

TABLE 21

Main staple food in the majority of Villages in each tahsil

Serial No.	Name of the tahsil	Main staple food
(1)	(2)	(3)
1	Wardha	Wheat, Jowar
2	Arvi	Wheat, Jowar
3	Hinganghat	Wheat, Jowar

Municipal Finance

There are 6 towns in the district and Table-22 reveals the per capita receipts and expenditure in respect of each town. Taken the urban area of the district as a whole, the average per capita receipts amount to Rs. 77.33. Of this Rs. 33.47 are collected through taxes and another Rs. 43.86 through all other sources. The per capita expenditure on the other hand, works out to Rs. 75.92. The expenditure on general administration accounts for Rs. 11.10 Rs. 22.30 are spent on public health and conveniences expenditure on public works amount to Rs. 8.47. Expenditure on public institution and other aspects works out to Rs. 17.89 and Rs. 16.16 respectively. Among the various towns the highest per capita receipts and experditure have been found in Arvi town and the lowest in per capita receipts have been found in Pulgaon town and lowest per capita expenditure of Rs. 61.91 in Deoli town (Table 22).

TABLE 22

Per capita receipt and expenditure in towns

Class, name and civic status of the town	Per capita								
	Receipt (in Rs.)			Expenditure (in Rs.)					
	Total	Receipt through taxes	Receipt from all other sources	Total expenditure	General administration	Expenditure on public health and conveniences	Public works	Expenditure on public institutions	Other aspects
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
III Arvi (M. Cl.) ..	94·83	29·98	64·85	92·06	3·73	16·00	5·43	24·42	42·48
IV Deoli (M. Cl.)	80·15	18·94	61·21	61·91	10·55	11·50	11·24	17·12	11·50
II Hinganghat (M. Cl.)	74·77	33·09	41·68	71·53	16·83	19·42	5·59	13·07	16·62
III Pulgaon (M. Cl.) ..	70·29	27·11	43·18	71·75	11·32	28·13	3·41	20·85	8·04
V Sindi (M. Cl.) ..	92·96	26·78	66·18	88·62	14·45	22·03	1·11	28·80	22·23
II Wardha (M. Cl.) ..	73·28	39·86	33·42	75·06	9·49	25·82	13·72	16·63	9·40
Total ..	77·33	33·47	43·86	75·92	11·10	22·30	8·47	17·89	16·16

Minerals

But for the stone quarries found in Sawangi, Borgaon, Nachangaon and Inzapur in the Wardha tahsil, no minerals of economic value are found in the district. From these quarries black basalt is extracted and used for building purposes. Though extremely hard to dress, Basalts quarries near Umri, Segaon and Wasi in Hinganghat tahsil are commonly used as dimension blocks in building construction and as road metal. Calcite associated with intertrappean beds and kankar in the black cotton soil are burnt for lime locally and is used for white washing purposes.

Fisheries

Fishing activity in the district is confined to inland waters only and rivers, tanks or ponds are the main sources. Wardha river along the entire northern and western borders of the district and the Wunna alongwith the Bor and Dham constitute the main riverine system, within the district. Asoda and Pothra are the other two tributaries of the Wardha flowing through the district. All these tributaries have total length of about 500 kms. In addition to these river sources there are some perennial and seasonal tanks and the Bor reservoir.

The commercially important varieties of fish are Murrel, Dhadkya, Botre, Padhan, Tambir, Karvedi, Poshti, Dhare, Gane or Karkeri Chale, Katan, Seerghan, Chandni, Mahaseer, Kolus, Magar and Zinga.

Industries

The Wardha district though smallest in the state is agriculturally very productive and its prosperity is mainly based on agricultural income. Apart from the cotton ginning, boiling factories in the district there are about five cotton textile mills and number of oil mills. In addition there are number of supporting small scale and cottage industries to fulfill the requirements of the common man for his daily life. These include general engineering,repairs,fabrication, printing,tanning, manufacture of soap, furniture, "Charkhas" handlooms, oilcake, saw milling, agarbatti making, etc. True industrialisation is yet to take root in the district.

Trade and Commerce

Various articles manufactured in the district are Ayurvedic medicines, textile cloth, handloom sarees, sweet and lin-seed oil. The district, however, exports ginned cotton, tur, other butter, ghee, handloom cloth, hides and skins etc. (Table 23)

TABLE 23

Most important commodities manufactured, imported and exported in towns

Class, name and civic status of the town	Most important commodities		
	Manufactured	Exported	Imported
(1)	(2)	(3)	(4)
III Arvi (M, Cl.)	Papad	Ginned cotton	Raw cotton
IV Deoli (M. Cl.)	Ayurvedic medicines	Cotton bales	Raw cotton
II Hinganghat (M. Cl.)	Textile cloth, Handloom sarees	Textile cloth & Handloom sarees.	Raw cotton
III Pulgaon (M. Cl.)	Sweet oil	Textile cloth	Rice
V Sindi (M. Cl.)	Linseed oil	Wheat	Linseeds
III Wardha (M. Cl.)	Sweet oil	Sweet oil	Cloth.

A considerable quantity of ginned cotton is exported to Nagpur and Bombay. Ghee is sent for sale to Nagpur markets. Needless to say Pimpalkhute of Arvi tahsil is famous all over Vidarbha district for its quality butter.

The items of import include raw cotton, good quality cloth, salt, kerosene, sugar, gur, tobacco, bidies, timber, dried funs, betel nut, chillies, coal, foodgrains like rice, wheat and other commodities viz., medicines, landwave, metal utensil, betel leaves etc.

Apart from shops, weekly markets and fairs are held at some places for the trading purposes. Important trading centres in the district are Wardha, Hinganghat, Arvi, Pulgaon and Sindi.

Slum Population

Out of the 6 towns in the district notified slums are in the Wardha municipality only. The proportion of slum population to total population works out to 19.21 per cent and the density of population turns out to 60,714 persons per km². (Table 24).

TABLE 24

Proportion af slums Population in towns

Class, name and civic status of the town	Proportion of the slums Population to total population in the town	Density in slums (Per km²)
(1)	(2)	(3)
II Hinganghat (M. Cl.)	There are no notified slums within the municipal limits, hence the information shows nil.	
II Wardha (M. Cl.)	19·21	60,714
Total	19·21	60,714

Places of Tourist's Importance

District has not rich heritage of art, architecture or archaeology like some other districts in the state. Even thus, rulers in ancient, mediaeval, maratha and modern times as well as lovers of art and architecture have constructed beautiful temples, mosques and other object of interest. Some of these places are mentioned below.

Allipur is a village in Hinganghat tahsil near Sonegaon station and is famous for tomb of the muslim saint 'Wali'. Anji village in Wardha tahsil, about 15 kms. from Wardha is well known for mud fort erected at the time of Bhosle rule. Deoli municipal town in Wardha tahsil has large number of temples and fair is held in December, in honour of Marananath Maharaj. Dhaga village in Arvi tahsil is a quiet and beautiful spot surrounded by dense forest and is known for image of Mahadeva which is believed to be 'Svayambhu' or risen out of ground by itself. Girad in Hinganghat tahsil about 32 kms from Hinganghat town, is locally famous, for the shrine of saint Farid and is a place of resort for both hindus and muslims. Hinganghat town situated on the left bank of Wunna river has worthy temple of Khandoba Malhari Martand Pavnar is historically village about 8 kms from Wardha town. It is famous because of Acharya Vinobaji Bhave, the Sarvodaya leader who was associated with the Gandhi Kuti and Paramdham Ashram. Similarly, Sevagram village, about 8 kms from Wardha town, was used as headquarter by Mahatma Gandhi for his social service work. Wardha is welknown for its long association with Mahatma Gandhi.

PART A—VILLAGE AND TOWN DIRECTORY

SECTION I

VILLAGE DIRECTORY

SECTION I—VILLAGE DIRECTORY

Note Explaining the Abbreviations used in the Village Directory.

The 'Village Directory' gives the list of villages, their area, population, amenities such as educational, medical, communications, drinking water facilities etc. available to them and also the land use of each village. For this purpose, villages have been arranged tahsil-wise in order of their location code number. The inclusion of alphabetical list of villages and the map of every tahsil depicting location of villages by population size, urban-spread and important infrastructural facilities available therein will further help the readers in identifying any village in the tahsil.

'Village' is a statutory recognised unit having definite boundary and separate land records. In case, a village is treated as an outgrowth of urban agglomeration, data on amenities and land use for that village have not been given in the Village Directory but shown alongwith the urban component. For those villages which have partly merged in an outgrowth, data pertaining to remaining part of the village is shown in the Village Directory and for the part merged or treated as an outgrowth, the details have been given under the concerned urban agglomeration. If a village, has fully merged in the town, the same has been specified as such in the Village Directory. However, all such villages do appear in the Village Primary Census Abstract for any cross reference. Similarly, villages treated as Census Towns (urban) for the first time in 1981 Census are shown both in the Village Directory and the Village Primary Census Abstract for making any cross reference and no data relating to the amenities available have been indicated in the Village Directory. However, land use data for all such villages can be seen in the Appendix II of the Village Directory.

If a village has fully merged into another village, the location code number and name of the merged village are given both in the Village Primary Census Abstract and the Village Directory at the appropriate place. Data in respect of these two villages put together appear against the village with which the other village has merged.

The "un-inhabitated" villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 *i.e.* the location code number, name and area of the village. In addition to all the above details, following four appendices to Village Directory have also been included :—

Appendix (*i*) Tahsilwise abstract of educational, medical and other amenities ;

Appendix (*ii*) Land utilisation data for census towns ;

Appendix (*iii*) Tahsilwise list of villages with no amenities available ; and

Appendix (*iv*) Tahsilwise list of villages according to proportion of Scheduled Castes/Scheduled Tribes population.

The first two appendices were also prepared for 1971 District Census Handbook. Appendices (*iii*) and (*iv*), added in 1981, are expected to help the planners for planning inputs in areas/villages where basic infrastructure is lacking and also for evolving suitable plans for the welfare of Scheduled Castes and Scheduled Tribes.

The Village Directory form has 20 columns and the details given under each column are as under :—

Column 1 gives the location code number of each village as the same is essential for identification of the village.

Column 2 indicates name of the village. For filling up of this column, 1971 District Census Handbook has been used as the basis.

Column 3 shows area figures (in hectares) as supplied by the State Revenue Department. For towns however, the area figures are in km².

Column 4 which gives population and the number of households in each village has been introduced for 1981 census to examine the corelation between the amenities available to the population and the number of households. Figures given within brackets against total population in this column refer to the number of households in the village.

Data on amenities such as educational, medical, communications, availability of drinking water, days of market/hat etc. are shown under columns 5 to 11 of the Village Directory. Additional feature for 1981 District Census Handbook is that in case if amenity is not available within the referrent village, a dash (—) is shown in the column and next to it, in brackets the distance from the village in broad ranges viz., upto 5 km, 5—10 km and 10+km. to the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provision of goods and services as well, so as to minimise the regional imbalances in the process of development.

Column 5 exhibits the availability of educational facilities viz. primary or elementary school, junior secondary or middle school, matriculation or secondary school, higher secondary/intermediate/pre-university/junior college, college, industrial school, training school, adult literacy school/centre and other educational institutions (Sanskrit pathshala, senior basic school, makhtab etc.).

If in a village, secondary school has middle and primary classes also the same has been counted as three schools *i. e.* secondary, middle and primary school. In case, there are more than one institutions of any type in a village their number is indicated within brackets against the prescribed abbreviation. Following abbreviations have been used for presenting data on educational amenities :—

Primary or Secondary School	P
Junior Secondary or Middle School ..	M
Matriculation or Secondary School ..	H
Higher Secondary/Intermediate/Pre-University/Junior College (PUC). ..	PUC
College, any college (graduate level and above) like Arts, Science, Commerce etc.	C

Industrial School	I
Training School	Tr.
Adult Literacy Class/Centre	AC
Other Educational Institutions	O

Column 6 provides data on medical facilities available in the village. If in a village no medical facility is available 'dash' (—) has been placed and within the brackets the distance in broad ranges (upto 5 kms, 5—10 kms and above 10 kms of the nearest place where the most modest medical amenity such as dispensary/ community health worker is available) has been indicated. Various types of medical institutions included and codes used for them are as follows :—

Hospital	H
Maternity and Child Welfare Centre	MCW
Maternity Home	MH
Child Welfare Centre	CWC
Health Centre	HC
Primary Health Centre	PHC
Primary Health Sub-centre	PHS
Dispensary	D
Family Planning Centre	FPC
T. B. Clinic	TB
Nursing Home	NH
Registered Private Practitioner	RP
Subsidised Medical Practitioner	SMP
Community Health Worker	CHW
Others	O

Column 7 gives information regarding availability of drinking water within the village. In case more than one source is available for drinking water, the same has been mentioned. Following abbreviations have been used for indicating the source of drinking water in the village :—

Tap water	T
Well water	W
Tank water	Tk
Tube-Well water	TW
Hand pump	Hp
River water	R
Fountain	F
Canal	C
Lake	L
Spring	S
Nallah	N
Others	O
Information Not Availabe	NA

Column 8 shows postal facilities such as post office, telegraph office, post and telegraph office and telephone connections available in the village. Various abbreviations adopted for indicating this information are :—

Post Office	PO
Telegraph Office	TO
Post and Telegraph Office	PTO
Telephone Connection	Phone

Column 9 gives information on day or days of the market/hat held in the village. This information is based on local enquiry and generally relate to weekly or bi-weekly market. If in any case, the market is held monthly or fortnightly it has been recorded accordingly in this column. In case weekly or bi-weekly or monthly market/hat is not being held, the column has been left blank.

Column 10 represents information as to whether the village is served by any mode of public transport like bus, rail and water-way and the same has been indicated as follows :—

Bus Stop	BS
Railway Station	RS
Navigable Water-way (including river, canal and back-water etc.).	NW

Column 11 refers to the state of roads etc. in the village. This will help us in determining as to whether the village is approachable both in fair and foul weather. Following abbreviations have been used for stating this information :—

Pucca Road	PR
Kaccha Road	KR
Navigable River	NR
Navigable Canal	NC
Navigable Waterway (Other than river or canal).	NW
Foot Path	FP

Column 12 gives the distance in Kilometres within bracket from the nearest town. In case, the nearest town is located in another state the name of the state has also been indicated.

Column 13 relates to the availability of power supply to the village. The various sources of power supply have been indicated through the following codes :—

Electricity for Domestic purpose	ED
Electricity for Agriculture	EAg
Electricity for Other purpose like Industrial, Commercial etc.	EO
Electricity for All purposes listed above	EA

In case the power supply is released only for specific purpose, say agriculture or other, it has been stated accordingly.

Column 14 gives staple food (only in terms of grains) of the majority people of the village during the major part of the year. This may be rice, wheat, jowar, maize, ragi etc. or a combination of grains where it is difficult to determine a particular grain.

Columns 15 to 19 give the details about land utilization. The land use pattern given in the village Directory conforms to the classification recommended by the Ministry of Food and Agriculture, Government of India, which maintains the land records under the following five categories :—

(1) Forests.

(2) Not available for cultivation—

(*a*) lands put to non-agricultural uses.

(*b*) barren and unculturable land.

(3) Other uncultivated lands excluding fallow land—

(*a*) permanent pastures and other grazing lands.

(*b*) lands under miscellaneous tree crops and groves not included in the net area sown.

(*c*) culturable wastes.

(4) Fallow lands—

(*a*) fallow lands other than current fallows.

(*b*) current fallows.

(5) Net area sown.

Column 15 shows all the lands classed as forest under any legal enactment dealing with forest or administered as forests, whether state owned or private. In case, any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or un-cultivated land.

Columns 16 and 17 cover all agricultural lands including the net area sown with crops and orchard and also the current and other fallow lands. Net area sown represents the area sown under various crops and orchards. Areas sown more than once in the same year have been counted only once. Column 16 indicates extent of irrigated lands under various types of irrigation *e.g.* canal, tank, wells, tubewells etc. and codes adopted for indicating various sources of irrigation are as under :—

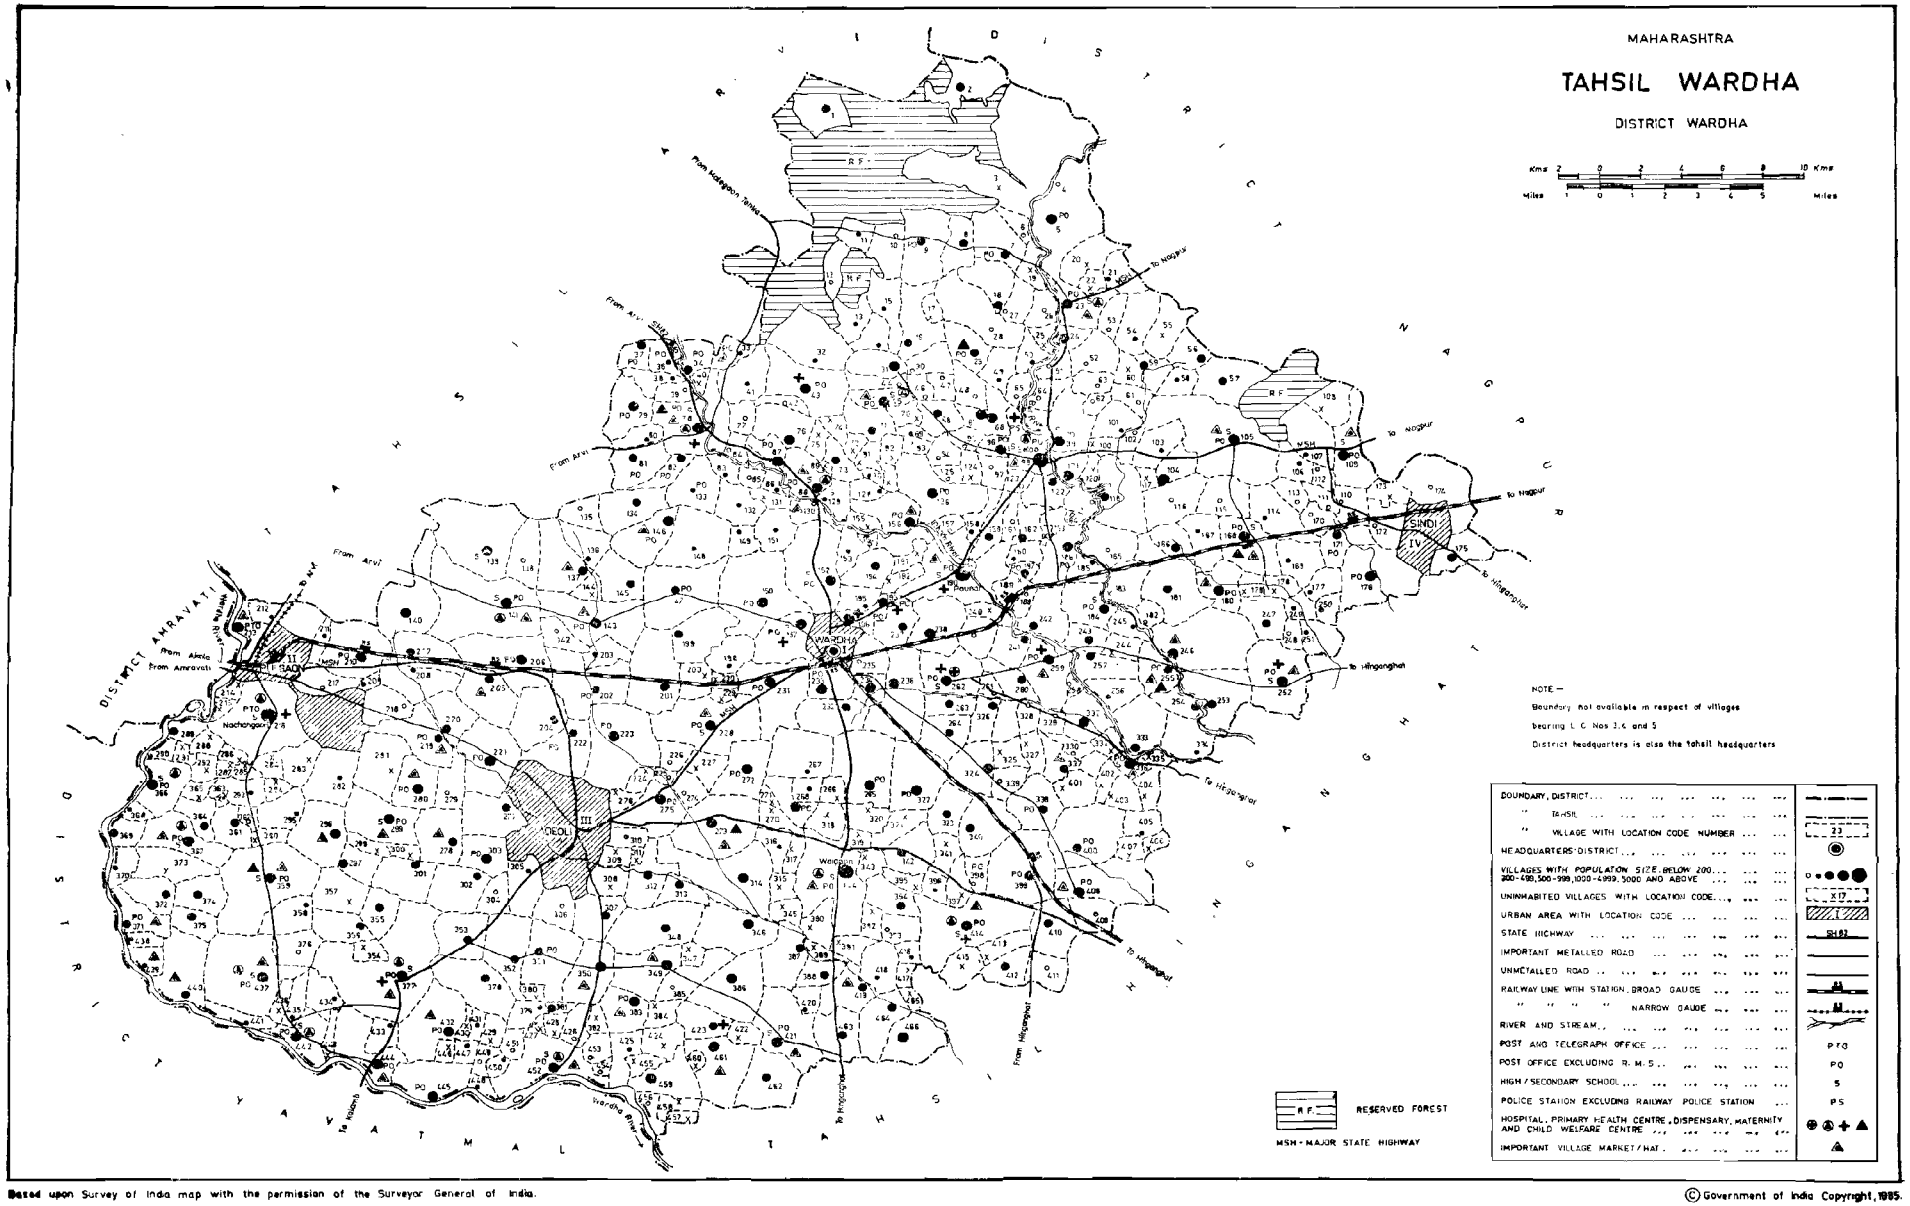

Government Canal	GC
Private Canal	PC
Well (without Electricity)	W
Well (with Electricity)	WE
Tube Well (without Electricity)	TW
Tube Well (with Electricity)	TWE
Tank	Tk
River	R
Lake	L
Water Fall	WF
Others	O
Total	T

Column 18 gives information on culturable wastes lands and includes land available for cultivation whether or not taken up for cultivation once. Area taken up for cultivation once but not cultivated during the preceding five years or more in succession is also covered under this column. Such lands may either be fallow or covered with shrubs and jungles which are not put to any use. These lands may be assessed or unassessed and found in isolated blocks or within the cultivating holdings. Lands under thatching grasses, bamboo, bushes and other groves for fuels etc., which are not included under orchards or forests, are included in this category. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest areas, are also included in this column.

Column 19 shows land not available for cultivation such as barren, unculturable land and land put to non-agricultural uses. All lands covered under buildings, roads, railways, rivers, canals etc. form part of the land under non-agricultural uses. Barren and unculturable lands include mountains, rocks, deserts etc. which cannot be brought under cultivation, except at a very high cost.

Column 20 has been filled up on the basis of local enquiry. Besides, recording the particulars of places of importance, it gives information on number of newspapers coming in the village, motor cycles/scooters, cars/jeeps and tractors available in the villages. Appropriate codes listed below have been used for presenting this information and number of items available is mentioned against the code used :—

N	..	Copies of Newspapers coming in the village.
M	..	Motor cycles/scooters available in the village.
C	..	Cars/jeeps available in the village.
T	..	Tractors available in the village.
PS	..	Police Station.

Based upon Survey of India map with the permission of the Surveyor General of India.

(*N.B.*—Ranges with 'nil' entries have been omitted)

SECTION II

TOWN DIRECTORY

Note explaining the abbreviations used in Town Directory

The 'Town Directory' gives for each town the area, population in 1981 and past censuses, growth rates, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities, and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. Seven statements (I to VI and IV-A) have been included for presentation of this data. All the towns in the district are arranged in alphabetical order. In case of all urban agglomerations the particulars for each constituent town of agglomeration have been furnished separately, also. Obviously separate information could not be furnished in respect of outgrowths which did not qualify to be treated as independent towns. However, in all such cases asterisk mark has been placed against their names to indicate that they have outgrowths and details of their particulars have been merged with the referrent towns.

Data presented in the seven statements have largely been procured from the municipal bodies and for non-municipal towns the respective tahsildars supplied the information.

Statement I shows status and growth history of the towns in the district. Column 2 in this statement indicates class, name and civic administration status of a town (as in 1980). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the state and the national level. Census towns have no urban civic status. Following abbreviations have been used to indicate the civic status of the town :—

Municipal Corporation/Corporation	M. Corp.
Municipality	M.
Municipal Council	M. Cl.
Non-Municipal	N. M.
Cantonment Board/Cantonment ..	C. B.
Notified Area/Notified Area Committee/Notified Committee.	N. A. C.
Census Town	C. T.

Columns 7 to 15 give population and growth rate of towns since 1901 and would help in drawing the trends in their growth rate. Columns 5, 6, 16 and 17 to 19 showing area in Km^2, number of households including houseless households, density and sex ratio respectively are new additions and are expected to facilitate in analysing the town directory data both at the state and the national level.

Statement II shows physical aspects and location of each town. In physical aspects only the rainfall and temperature data as obtained from the Director-General of Meteorological Survey of India have been shown. Towns for which information could not be obtained from Meteorological Survey of India, the same has been collected locally or calculated in relation to the nearest town, to the extent possible. Columns 6 to 12 have been filled up on the basis of local enquiry. Distances respectively from the state, district and tahsil headquarters and the nearest city (Urban area with a population of 1,00,000+) would help in determining the location of a town. Communication facilities available are shown by railway station, bus route and navigable river/canal.

Statement III delas with municipal finances for the statutory and also non-statutory town bodies managing civic administration of the town provided they have separate budgets and accounts of their own.

Statement IV provides information on the civic and other amenities available in the town. Total population given under column 4 and Scheduled Castes/Scheduled Tribes population given in column 5 have been added to help in measuring amenities in respect of population size of the weaker sections of the community in the town. The information on the road length within the town shown under column 6 has been obtained from municipality (except for the highways). Codes used are :—

Pucca road	PR
Kuccha road	KR

Columns 7 to 11 reflect the information on system of sewerage, number of latrines and method of disposal of night soil.

Codes used are :—

Sewer/Sewerage	S
Open surface drains	OSD
Box surface drains	BSD
Sylk drains	SD
Cesspool method	CD
Pit system	Pt.
Head loads	HL
Baskets	B
Wheel barrows	WB
Septic tank latrines	ST

Columns 12 and 13 indicate sources of protected water supply to the inhabitants of the towns. The information of major source of water supply is given in the column 12 and on major source of storage and capacity under column 13. For stating this information following codes have been used:—

Overhead tank	OHT
Service reservoir	SR
River infiltration gallery ..	IG
Borewell pumping system ..	BWP
Pressure tank	PT
Tubewell water/Hand pump ..	TW
Tap water	T
Well water	W
Tank water	TK

Column 14 gives information regarding availability of fire fighting services. In case, it is not available in the referrent town, the name of the nearest place where it is available has been mentioned and the distance from the town has also been indicated within brackets Columns 15 to 19 pertain to the number of electricity supply connections available for domestic, industrial, commercial and road lighting points etc.

The newly added statement IV-A provides data on civic and other amenities in the notified or recognised slums of towns with a population of above 50,000 (i.e. class I and II towns).

Statement V gives information regarding availability of medical, educational, recreational and cultural facilities available in the town. 1981 population figures for each town have also been indicated and this will facilitate in analysing data on facilities available on the people.

Data on medical facilities have been obtained from the district and sub-divisional medical officers and shown under columns 4 and 5. All types of medical institutions whether allopathic, ayurvedic or homoeopathic have been covered and indicated by way of following codes :—

Hospital	H
Dispensary	D
Health Centre	HC
Family Planning Centres ..	FC
T. B. Clinic	TB
Nursing Home	NH
Ayurvedic	A
Unani ..	U
Homoeopathic	Hom
Others	O

In case, more than one institution of any type is available, the exact number is shown within the brackets.

The information on educational amenities (Cols. 6 to 9) is exhibited as :

Arts only	A
Science only	S
Arts and Science only	AS
Commerce only	C
Arts and Commerce only ..	AC
Combined for all categories Arts, Science and Commerce.	ASC
Law	L

Column 10 pertains to the number of recognized shorthand, typewriting and vocational training institutes (grouped as others) which include applied art/painting college, pharmacy college, B.Ed. college, teacher's training school, music/dancing institute, nursing school etc. Various codes used for indicating this data are :—

Shorthand	SH
Typewriting	Type
Shorthand and Typewriting ..	Sh. Type
Others	O

Keeping in view the 'Minimum Needs Programme' of the Planning Commission the information regarding adult literacy classes/centres etc. has also been collected and presented under column 15. Similarly, in view of the spurt in the employment of women in towns, information on number of working women's hostels and seats available therein has been given under column 16. This information would help in formulating plans for opening new hostels in order to meet the housing needs of the single working woman.

Columns 17 to 20 show recreational and cultural facilities available in the town. These include stadia, cinema, auditoria/drama, community halls, public libraries indicated as 'PL' and the reading rooms indicated as 'RR'.

Statement VI presents information regarding trade, commerce industry and banking services in the town. Columns 3 to 11 indicate three most important commodities imported, exported and manufactured in the town. Information on number of banks available in the town appears under column No. 12. Columns 13 and 14 show number of agricultural and no-agricultural credit societies respectively in each town.

STATEMENT I
