SRI VARAHA NARASIMHA SWAMY

The motif presented on the cover page represents the sculptured Shrine of the diety 'Sri Varaha Narasimha Swamy" of Simhachalam near Vishakhapatnam city.

Simhachalam is a sacred place of pilgrimage in Vishakhapatnam district and ranks with Benaras and Tirupati. This hill temple is dedicated to Lord Narasimha, the Man-Lion incarnation of Lord Vishnu. In honour of this diety, a number of people of the district are named as Simhachalam, Simhadri, Narasimham and so on.

The way upto the temple runs through terraced fields of pineapples dotted with jack, mango and other trees. It passes up a broad flight of well-kept stone steps, over a thousand in number, on either side of which trees have been planted to provide shade. There is a ghat road from the foot of the hill leading to the temple. Architecturally, the temple deserves high praise. The temple comprises a square shrine, surmounted by a high tower, a portico in front with a small circular tower over it, a square sixteen pillared Mandapam, all made of dark granite richly and delicately covered with conventional and floral ornament and scenes from the Vaishnavite Purana. One of the pillars of the **mandapam** *is called the* **'Kappam Stambham'** *and people believe that, this pillar has the power of curing cattle diseases and also barren women will be blessed with issues.*

The exact age of the temple is not known but the inscriptions engraved on the walls and pillars of this shrine give us a flood of light on the vicissitudes of the temple through history. An inscription dating back to 1099 AD of the great Chola King Kulothunga - I, who conquered the Kalinga land, says the importance of the Shrine even in that period. The kings of later period viz. Velanadu, Eastern Ganga, Gajapathis of Cuttack and Rajas of Vizianagaram made additions like Central Shrine, the **mukhamandapam**, *the* **natyamandapam**, *Verandah, etc., to the temple during the period from 1137 AD to 1713 AD. The Rajas of Vizianagaram had been wardens of the shrine for over two centuries and endowed it with lands. Krishnadevaraya, the famous Vijayanagara emperor visited this temple twice in 1516 and 1519 AD and the jewellery offered by him to the Lord is there still.*

The puranic legend of the temple takes us to the time of Hiranyakasipu and Prahlada, who are famous figures in Indian mythology. Lord Vishnu in his aspect of Narasimha, rescued the great **Bhakta** *- Prahlada at this* **Kshetra** *and in memory of the incident, Prahlada is said to have founded this shrine.*

The image of the deity in the temple of Simhachalam is overcovered with a thick coating of sandal paste, which is said to have appeased the fury of the Lord after the destruction of the Rakshasa King Hiranyakasipu. This coating is removed only once a year, on the Visakha day during May in a function called **'Chandanayatra'** *and that day is considered to be specially sacred People from all over India visit the shrine on this day to have* **darsan** *of the Lord in* **'Nijaswarupa'** *(original form).*

Simhachalam temple is presently under the control of Endowments Department of the Andhra Pradesh State Government. One can reach Simhachalam either by train which goes upto Simhachalam Railway Station, or more easily by city buses from Vishakhapatnam. The Devasthanam is plying buses from down hill to up hill.

FOREWORD

The district census handbook (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to district administration. The district census handbook is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series, some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referrent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but in the regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health subcentres and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class I and Class II towns (Statement IV-A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in Statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in Statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of towns into consideration. The addition of the columns on civic administration status and popoulation in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 D C H series it has been so designed that Part-A of the volume contains village and town directory and Part-B, the P C A of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Taluk/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The district and taluk/town level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the State under the direction of Shri S.S. Jaya Rao I.A.S., Director of Census Operations, Andhra Pradesh, Hyderabad, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of this publication was carried out by Dr N. G. Nag, Deputy Registrar General (Social Studies) of my office, Dr. B.K.Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social Studies Division at the head-quarters under the guidance of Shri M.M. Dua, Senior Research Officer. I am thankful to all who have contributed in this project.

New Delhi
the 26th April, 1982

P. PADMANABHA
Registrar General, India

PREFACE

District Census Handbook is the most important of the local publications brought out by the Census Organisation. This is a joint venture of the State and Central Governments. The chapter on HISTORY OF DISTRICT CENSUS HANDBOOK details its history and growth right from the inception of Census in 1872, while the foreword of the Registrar General and Census Commissioner, India highlights the scope and significance of the tremendous improvements brought about from time to time since 1951 to 1981, in the presentation of data so as to meet the demands of planning and administrative needs of the Governments and the data user Needless to say that it is of immense use to planners, administrators, academicians, scholars, researchers, social workers, etc.

The restructuring of the format of the Village Directory at the 1981 Census has been done particularly to incorporate the exhaustive data on infrastructure in relation to amenities and land-use pattern to meet the needs of micro-level and local area planning for rural areas as well as to meet the Minimum Needs and Revised Minimum Needs Programmes of the Planning Commission. It is further intended to help regulating the provision of goods and services and also to enable minimising regional imbalances in the process of development. The formats of the Town Directory have also been modified to meet the requirements of the Minimum Needs Programme, by adding statements on civic and other amenities in slums in Class I and Class II Towns, columns on Scheduled Castes and Scheduled Tribes population, adult literacy centre, working women's hostels, etc. In the process of collection of data for this volume, various State and Central Government departments have extended their kind Co-operation. The District Census Handbook comprises two parts—Part A - Detailed analytical note supported by a number of inset tables based on Census and non-Census data in relation to infrastructure and Part B - Village and Town Directories as well as Primary Census Abstract of Villages and Towns published in one volume each for all the districts except for Visakhapatnam district. It is felt that if this District Census Handbook is published in one volume, it would be unweildy. Hence, it is being published in two volumes - part XIII A & B (i) and part XIII-A & B (ii). The first volume contains part XIII A & B (i) Village Directory, Town Directory and Appendices, and the second volume part XIII-A & B (ii) Analytical Note, Village Primary Census Abstract & Town Primary Census Abstract.

The present volume is the second part of the District Census Handbook covering Analytical Note, Village Primary Census Abstract & Town Primary Census Abstract.

In this joint venture of the State and Central Governments, while the collection, processing including compilation, tabulation and finalisation of the write up have been done by the Directorate of Census Operations, Andhra Pradesh, under the Ministry of Home Affairs, Government of India, the paper and printing costs are borne by the Government of Andhra Pradesh State. I offer my grateful thanks to Sri S.R. Rama Murthy, I.A.S. (Retd), former Chief Secretary to the Government of Andhra Pradesh and Sri M. Appa Rao, Joint Secretary (Retd.), General Administration (Elections) Department for the kind co-operation and encouragement extended by them at the time of 1981 Census. Grateful thanks are also due to Sri Shravan Kumar, I.A.S. the present Chief Secretary, Sri B.N. Jaya Simha, I.A.S., Special Chief Secretary, General Administration Department and Chief Electoral Officer who is also in-charge of Census and to Sri P.V. Gopala Rao, I.A.S., Deputy Secretary, General Administration Department, for extending their kind co-operation. The Director of Printing and Stationery has been helpful in selecting good private presses for printing the Handbooks.

My grateful thanks are due to Sri S.S. Jaya Rao, I.A.S. Director of Census Operations, Andhra Pradesh, under whose direction the entire Census Operations Programme was successfully carried out in the State. He has retired from service after superannuation in April, 1984. I am extremely grateful to Sri P. Padmanabha, I.A.S., former Registrar General and Census Commissioner of India, whose constant

guidance and advice were a source of strength and to Dr. N.G. Nag, Deputy Registrar General (Social Studies) who has formulated the contents of the Handbook in detail. Grateful thanks are also due to Dr. B.K. Roy, Deputy Registrar General (Map) under whose guidance the Map Division has scrutinised the district map and the taluk maps evincing very keen interest and to Sri M.M. Dua, Senior Research Officer (now Deputy Director), who has scrutinised the data presented here with very minute care. I feel it a proud privilege and bounden duty to offer my sincere and grateful thanks to Sri V.S. Verma, I A.S., Registrar General and Census Commissoiner, India and to Sri V.P. Pandey, Joint Registrar General, India, for their constant guidance and advice in both administrative and technical matters.

In the finalisation of the write up, compilation and processing of data for the volume, I have been ably assisted by Sri B. Satyanarayana, as Deputy Director and as Assistant Director of Census Operations, with the assistance of an efficient team led by Smt. P. Lalitha, Investigator who has gained rich experience and specialised this subject. Sri Shyam Deo, Research Officer, ably guided the Map Section in the preparation of various maps included in this publication. I am thankful to all those officials who have contributed in bringing out this voluminous publication.

The following officials who have worked on the present volume of Visakhapatnam District Census Handbook deserve my thanks for their contribution.

PART - A

ANALYTICAL NOTE

HISTORY

This district originally formed part of the ancient Kingdom of Kalinga which is supposed to have been founded in the 9th century B. C. The history of this tract has to be considered along with that falling in Srikakulam district. The name of Kalinga still survives in the sea side village of Kalingapatnam not far from Srikakulam and in the early times a place of importance. Kalinga was for many centuries the citadel of Buddhism in India. The good relations of Kalinga with Ceylon (now Srilanka) were also kept up for many centuries and in 275 A. D., the celebrated tooth of Budha was said to have been obtained by the king of Ceylon and shifted to Kandy, a place in Ceylon (Srilanka).

In 260 B. C., king Asoka attacked and conquered Kalinga after the historic Kalinga war fought on the banks of river Mahanadi at Dhavalagiri with the Kalinga King Anangapala. One of the famous rock edicts shows clearly that it was the remorse that he had felt for the horrors of this campaign which led him in the same year to espouse the Buddhist religion which he afterwards spread throughout India and Ceylon (Sri Lanka). This Kalinga campaign thus turned out to be an epoch-making events in the career of Asoka the Great. The edict states that about 150,000 persons were carried away captive from Kalinga, 100,000 were slain and many times that number perished. Some of the terms of this inscription show that Kalinga at that time was quite capable of offering considerable resistence even to such a powerful emperor as Asoka and that its people were a civilized race. For several centuries after this the history of Kalinga was quite obscure. Inscriptions, however, show that in the 6th century A. D. Kalinga was conquered by the Chalukyas of Badami and in the 7th century, by their off-shoot the Eastern Chalukyas. The result of this latter campaign was the establishment of the Vengi Kingdom (the ruins of the capital can be found 6 miles north of Eluru) under the Eastern Chalukya King, Vishnu Vardhana I (615–633 A. D.). Copper grants of this monarch found at Cheepurupalle show that he once ruled this tract.

The chronicles are continued by the grants of a series of kings who describe themselves as of the Ganga family, Lords of Kalinga, and worshippers of the Gokarnaswami (Siva) on the Mahendragiri hill in Ganjam, and as ruling from Kalinganagara which has been identified with Mukhalingam on the banks of the Vamsadhara, where notable temples and inscriptions have survived.

The Eastern Chalukyas of Vengi appear to have constantly interfered in the affairs of Kalinga, and Vimaladitya of that line seems to have conquered much of it, since an inscription at Mahendragiri states that the Chola King Rajaraja I of Tanjore overthrew him in 999–1000 and set up a pillar of victory on the hill.

The Gangas were followed by the later line of the same name who, as they also worshipped the Gokarnaswami on Mahendragiri and ruled from Kalinganagara, were apparently of the same family. Calculations from dates in copper grants show that they were in power from the end of the 9th century. One of them, Rajaraja, ascended the throne in 1070–71 and reigned eight years, during which time he is said to have helped the Vengi kings against the Cholas and afterwards defeated both of them and also the ruler of Utkala (Orissa) and other monarchs. Under his son, Anantavarman-Choda-Ganga, who ruled from 1078 A. D. for about 72 years, this family reached the zenith of its power. Many copper grants and inscriptions of this monarch have been found and these state that he replaced on their thrones the fallen kings of Vengi and Orissa engaged in wars extending from the Ganges in the north to the Godavari in the south and built the famous temple of Jagannatha at Puri. He married atleast five queens and had by them four sons who ruled after him. The country eventually fell to the Eastern Chalukyas of Vengi and their feudatories. The Yadavas of Devagiri (Doulatabad) and the Kakatiyas of Warangal also claim to have humbled Kalinga at this period.

Source : District Census Hand Book, Vishakhapatnam 1961 A. P. pp A 9 to A 18.

The Simhachalam temple in Vishakhapatnam district contains inscriptions of several of the later Ganga kings, but few details regarding them survive. Their power was on the wane. Narasimha I and two of his successors are said to have resisted attacks from the Muslim kings of Bengal and Delhi. The Reddy kings of Kondavidu in Guntur district also penetrated into this Kingdom. On the death of Ganga King Bahnudeva IV, his minister usurped the throne and in 1434–35 founded the Gajapathi dynasty under the title Pratapa Kapileswara with his capital at Cuttack. He started expanding his dominions until they extended from the river Ganges to the river Krishna. His whole reign was spent in warring with the Hindu kings of Vijayanagar who by then were powerful in the south and with the Muslim Bahmani dynasty of the Deccan. His son Purushottama reigned from 1469 to 1497. His successor was Prataparudra. He is said to have had reverses at the hands of the Vijayanagar King, Krishna Devaraya. The latter seized Udayagiri in Nellore, Kondavidu, Kondapalli in Krishna, Rajahmundry and other fortresses and finally halted at Simhachalam. The Simhachalam temple still contains inscriptions recounting successes and relating how he and his queen presented the God with a necklace of 991 pearls and other costly gifts.

About the end of the 15th century the Bahmani Kingdom split up into several smaller States such as Bijapur in 1489, Ahmednagar in 1490 and Bidar in 1498. In 1512, the Kingdom of Golconda was founded by Sultan Kutub Shah said to have been a native of Persia. He was so successful that at the end of a long reign, he left a territory extending from the river Godavari to beyond the river Krishna and from the sea to a line drawn west of Hyderabad about the 78th degree of east longitude. In 1520, Sultan Kutub Shah defeated the forces of the Hindu chiefs of the Telangana at Kondapalli and there is reason to suppose that Prataparudra, was one of the chiefs who suffered discomfiture. In 1571, Ibrahim, the 4th monarch of the Kutub Shahi dynasty, taking advantage of the disturbed conditions of Orissa made himself master of the Godavari and other districts as far north as Srikakulam. For about 180 years since then this tract which also included the Ichchapur area then known by the name of the "Chicacole Circar" was controlled more or less directly by the Muslim authority from Hyderabad.

The principal seat of Government was at Srikakulam where the Faujdar or Deputy of the Subah resided, while a Sub-Governor or Naib resided at Ichchapur. The revenues of the country were collected by these two Muslim officers and remitted to the seat of Government at Hyderabad. In the year 1641 Abdullah Kutub Shah sent Sher Mohammed Khan from Hyderabad to Srikakulam to rule over the dependencies north of the Krishna river. Sher Mohammed Khan during his period built a fine mosque at Srikakulam. In 1687, the Kutub Shahi dynasty came to an end when Aurangazeb, the Mughal emperor, marched down to reduce the south to obedience and had wiped out the Kingdom of Golconda and brought the whole country under his direct control. He appointed to the charge of it an officer called the Subadar of the Deccan under whom were a number of local subordinates in control of the various smaller divisions of territory. The five Northern Circars of Guntur, Kondapalli, Eluru, Rajahmundry and Srikakulam had Masulipatnam for their chief town and the northern most of them, Srikakulam continued to be ruled in the same manner as before by a Faujdar residing in that town.

Aurangazeb died in 1707 and his death was followed by great disorder in his southern possessions. In 1724 the Subadar of the Deccan, though still continuing nominally subject to the authority of Delhi, made himself virtually independent and began appointing his own officers. His first Faujdar of Srikakulam was Anwar-ud-din who afterwards became very famous in the wars of the Carnatic and was subsequently came to be known as the Nawab of Carnatic. His firm but kindly rule was gratefully remembered for many years afterwards.

This Subadar of the Deccan died in 1748 whereupon the French and English took opposite sides in the disputed succession which followed. Eventually a French protege, Salabat Jung, secured the post of Subadar and Bussy, the French General, obtained from him in 1753 the four Northern Circars (excluding Guntur) for the support of his troops. Masulipatam and the country adjacent had been already ceded to the French in 1750; and Bussy sent M. Moracin, the French officer with instructions to take possession of the new acquisitions.

The Faujdar of Srikakulam, Jafar Ali, was extremely disinclined to give up his charge to the French, and he persuaded Gajapati Viziarama Razu, head of the Vijayanagar family and the most powerful of the local renterchieftains, who had come into being during the Muslim rule, to join him in opposing Moracin's entry. The latter, however, seduced Viziarama Razu from this compact by promising to lease him the Rajahmundry and Srikakulam Circars at a rate much below their value. Finding himself deserted, Jafar Ali called in the help of the Marathas of Nagpur, who crossed the hills; devastated the two circars; plundered and burnt the Dutch factory at Bheemunipatnam, defeated Viziarama Razu near Vizianagaram; fought an irregular action against the combined forces of that chief and Moracin at Tummapala near Anakapalle; and after a few adventures returned home with immense booty. Having secured the loot, they troubled no further about Jafar Ali's aspirations, whereupon that gentleman was obliged to submit.

In July 1754, Bussy went in person to Masulipatam and Rajahmundry, settled affairs in the Circars, and appointed Ibrahim Khan as the Faujdar of Srikakulam. Soon afterwards, however, relations between him and the Subadar of the Deccan became strained, at last an open rupture occurred, and for several weeks in the summer of 1756 Bussy was obliged to entrench himself against attack near Hyderabad. The authorities at Madras were only prevented from joining the Subadar against him by the necessity of sending every available man to Bengal. Further, Bussy's Officers in Circars including Ibrahim Khan disavowed his authority and refused to pay their tribute. Viziarama Razu was the only man who stood by Bussy. He ordered his Agents at Hyderabad to assure M. Bussy of his fidelity and the regular payment of his tributes.

Bussy was eventually relieved by reinforcements from Masulipatam and was received back into the Subadar's favour; and at the end of 1756 he marched into the Circars to restore his fallen authority. Ibrahim Khan fled in terror at his approach. But Viziarama Razu, confident in the proofs of attachment he had given, went to meet him with a body of troops belonging to him and others of the local Chiefs which numbered 10,000 men. Taking advantage of the support of Bussy he persuaded the latter to attack his bitterest enemy, the Chief of Bobbili. Bussy proposed to Bobbili that he should leave his fort and receive instead other land of greater extent and value in another part of the province, but the suggestion was received as an insult. Soon afterwards one of Bussy's detachments was cut off in the woods of Bobbili and in his anger this Frenchman determined to expel that chief and all his family. The result was 'one of the most ghastly stories which Indian History has to record' For further details the Chapter on History in the Handbook of Srikakulam district (1981) may be referred to.

From Bobbili Bussy marched on into Ganjam receiving the submission of the various local Chiefs and Zamindars as he went; sent a body of troops from Masulipatam to capture the English factories at Injaram, Madapollam and Bandamurlanka in the Godavari district and then turned back to attack the Vizagapatam settlement in person. Bussy then proceeded southwards and eventually returned to Hyderabad. In July of the next year (1758) he proceeded south to help in the war in the Carnatic and the siege of Madras.

Viziarama Razus' successor Ananda Razu, dissatisfied with the arrangements made by M. Bussy on the death of his predecessor had waited for an opportunity to take his revenge. As soon as Bussy went down south, he captured Vizagapatam from the French garrison which was holding it, sent news of the event to Madras and invited the English there to join him in expelling the French from the Northern Circars. Since Madras authorities were fully occupied at that time, this offer was repeated to the English in Bengal. Clive sent Colonel Forde to Vizagapatam by sea with a force of 500 Europeans, 2,000 sepoys and 100 lascars which arrived on the 20th of October, 1758. The first step that Colonel Forde took, after joining the troops to those of Ananda Razu was to re-establish the factory of Vizagapatam where the French had left a small garrison. The united forces then moved south and on the 9th of December near Condore, about 35 miles east-north-east of Rajahmundry an action was fought with the French which ranks as one of the decisive battles of India and in which the French were utterly routed. Forde then pushed on to Rajahmundry the next day without the Raja's rabble and shortly afterwards took Masulipatam by a most brilliant assault. Salabat Jung, the Subadar of the Deccan, who had advanced within fifteen miles of the place to assist the French, changed sides at once and on the 14th May, 1759 concluded a treaty

with the English granting them the country around Masulipatam, renouncing all friendship with the French and prohibiting the latter from ever again settling in the Northern Circars. Except the tract then ceded to the Company, the rest of the Northern Circars fell once more with dramatic suddenness under the sway of the Subadar of the Deccan. His rule, however, extended to it in name only. For the seven succeeding years the completest anarchy ever recorded in history therefore prevailed over the Northern Circars.

In 1765 Clive obtained from the Mughal Emperor at Delhi a firman granting to the Company the five Northern Circars. The Subadar, however, was in no way pleased at this cession of territory which he regarded as his own and threatened to retaliate by an irruption into the Carnatic. In November, 1766 a treaty was hastily concluded with him by the British, by which the English agreed to pay Rs. 9 lakhs annually for the territory that had already been granted them as a free gift by the Mughal Emperor. Later, however, this tribute was reduced and finally it was completely dropped.

At this stage it will be of interest to trace the fortunes of the English settlement at Vizagapatam from its inception until it became the capital of the district.

This settlement was founded in 1682. In February of that year the Directors wrote to Fort St. George that an unauthorized trader (interloper) was designed for Masulipatam or Vizagapatam and left it to the Madras authorities to decide whether a factory should not be established at the latter place. It was largely, therefore the fear or rivalry of the ubiquitous interloper which led the Company to first settle in Vizagapatam, 13 days later the first official letter was sent from Fort St. George to Vizagapatam and thereafter correspondence with the factory appears regularly in the records.

Messrs. Ramsden and du Jardin did not let the grass grow under their feet. In October of the same year they wrote that inspite of the bitter hostility of the Dutch at Bhimilipatam they had made a respectable investment; had obtained a cowle from the Faujdar of Chicacole giving them liberties throughout the Kalinga country far greater than ever was granted to the Dutch and that this has caused a great deal of heartburning.

The records of 1684 show that the settlement was very small at that time, the monthly expenditure being only about Rs. 350/–, but however, had possessed the right to collect dues in the town. The annual rent paid to the Faujdar of Chicacole was Rs. 4,500/–. At the end of that year the Madras Council, desirous of obtaining less limited privileges, resolved to send the new Chief Mr. Browne to the Faujdar with a big retinue hired for the purpose. This mission was crowned with success. A new cowle was obtained which exempted the Company's goods from land customs, granted privileges over Vizagapatam and permission to build a factory there, and brought the settlement into a position as good as any other in India. In 1685 the friendship with the Faujdar was further cemented by a present of saltpetre, powder and lead, which he earnestly desired owing to the possibility of a war with his northern neighbours, but which the Dutch at Bhimilipatam had steadfastly refused to supply.

In 1689 the footing in the country which had been won with such determination was suddenly lost. The Company fell out with Emperor Aurangazeb. As a result the latter issued orders that the English should be driven out from his dominions and all the property seized. On the 13th September, therefore, the Faujdar sent his 'Rashwar' to Vizagapatam for seizing and bringing away the English. The British factory was surrounded. There was a small skirmish and finally the Company's property was seized and the Englishmen taken prisoners. In 1690 peace was made with Aurangazeb whereupon the Faujdar released the prisoners and restored the Company's property. Later on account of disturbances of a local nature and also on account of the threatened invasion from the Maharattas the factory and its surrounding areas had to be fortified.

In 1753 the Circars were ceded to the French; and at the end of 1756 Bussy, free at last from other embarrassment, marched into them to restore his shaken authority, seized Bobbili, quieted Ganjam, captured Injaram and the other English factories in the Godavari area and then marched in person against Vizagapatam. He reached that place on the 24th of June, 1757 with a large force of 600 Europeans, 6,000 Sepoys and 30 pieces of cannon.

Orme gives the following disparaging account of the then fortifications of the place :

"A river coming from the north and turning south-eastward to the sea, forms an arm of Land, a *mile and a half in length and 600 yards in breadth.* Nearly in the middle of this ground stands the fort, of which the construction by repeated mistakes was become so absurd, that it was much less defensible than many of the ancient barons' castles of Europe. The face towards the river was choked by houses. A whole town lay within 300 yards to the north, a village at the same distance to the south, and several buildings on each of these sides stood much nearer the walls ; towards the sea, the esplanade was clear, excepting a saluting battery, where a lodgment might be easily made; after many injudicious additions of works round the fort, which only made it worse, it was found necessary to throw up an entrenchment to the north, beyond the town, in the shoulder of the peninsula, quite across from the river to the sea, with a battery at each extremity, and another on a hillock near the centre but this was commanded by a sand-hill directly opposite, and within point-blank. The access across the river from the south was sufficiently secured by batteries, which commanded not only the passage, but the entrance of the river itself, through which all embarkations from the sea must gain the shore, as the surf prevents even a boat from landing on the beach. Indeed the whole scheme of the defences seemed to have been calculated only to oppose the attempts of prirates and Polygars. The garrision consisted of 150 excellent Europeans, and 300 sepoys; the English families in the town were 50 persons.

On the same day that the van of Mr. Bussy's army appeared in sight, the Company's ship Marlborough anchored in the road, on board of which was the Chief Engineer of Madras proceeding to Bengal. He landed, and having the next morning reviewed the works with Captain Charles Campbell, who commanded the troops, both gave their opinion that the extent *could not be defended, even with a much* greater force; and advised that all the Europeans should be immediately embarked, and the Sepoys, with two or three officers, left to make the best capitulation they could; but all the boat and fishermen had deserted in the night, and the wind blew so strong from the sea, that none but those accustomed could manage the boats over the bar, which that of the Marlborough carrying back the engineer experienced, being twice overset and a man drowned before she got out. At noon, cannon appeared on the sand hill; soon after, the mainbody of the enemy, and a summons to surrender; after *two or three messages.* the capitulation was signed at 11 at night. All the Europeans, whether troops or inhabitants, were to be prisoners of war; the sepoys and natives free to go where they liked; the Company's effects, capture; individuals, Mr. Bussy said, should have no reason to complain; he kept his word with the utmost liberality, resigning without discussion what so ever property any one claimed as his own. The Marlborough having anchored at the Dutch factory of Bhimilipatam, 12 miles to the northward, he permitted the chief, Mr. Percival, Captain Campbell, and several others to proceed in her to Bengal".

The subsequent history of the Vizagapatam settlement its seizure from the French by the Raja of Vizianagaram in 1758, the expulsion of the French from the Circars by Colonel Forde's expedition in the next year, the eventual cession of the country to the English in 1765 etc., have already been described in some detail above.

The twelve years of anarchy which followed Bussy's departure had enabled the Raja of Vizianagaram to make himself more powerful than ever. The Raja, Ananda Razu who had accompanied Forde's expedition died of small-pox at Rajahmundry. He had no son, and the widow of his predecessor Viziarama Razu, had adopted Venkatapati Razu a boy of twelve and the second son of her husband's cousin Ramabhadra Razu and caused him to assume the name of Viziarama Razu, by which he was afterwards so well-known. This boy had a half brother, considerably older than himself, named Sitarama Razu who cherished considerable resentment because of his apparent supersession. Thus owing to the new Raja's minority, all authority and State fell into Sitarama's hands and for very many years he succeeded in maintaining the position of superiority over his younger brother.

The two brothers were very powerful. They controlled almost all the districts except the Haveli land near about Vizagapatam, Kadimkota, and Chicacole. In 1761 they seized by force much of the Estate of Parlakimedi in Ganjam. When the English came into possession of the country they persuaded the brothers to relinquish Parlakimedi and settled a ***peshkash*** of three lakhs annually and rest of their estate. This also included indefinite rights in Jeypore.

Soon afterwards the various zamindars formed a strong confederacy to throw off the Vizianagaram yoke. Sitarama Razu, however, was equal to the occasion. He persuaded the Chief and Council to regard this as a challenge to their newly constituted authority, and with the aid of the Company's troops he easily defeated the opponents one after the other. At the close of the campaign, those zamindars in the district who had opposed him were dispossessed.

On the 3rd of October, 1780 a serious mutiny occurred among the Sepoys at Vizagapatam. To meet the invasion of the Carnatic by Hyder Ali of Mysore, the Government ordered four companies of troops to embark from Madras. The result is described as follows by the newswriter in Hickey's Gazzette.

"We are informed that the Sepoy troops lately draughted at Vizagapatam, having all their arms, accoutrements, baggage, etc., ready to embark on board the Sartine Frigue and some other Vessels then in that harbour in order to carry them to Madras, the day of their intended departure, the Governor of Vizag invited all the military officers to dine with him and the Council. The troops were to embark that afternoon. The gentlemen made a cheerful repast, drank success to the British arms and sat in company with all the tranquility of mind imaginable, but were soon alarmed by an uncommon noise. They sent some of their servants out to learn the cause, and was soon informed that the troops draughted for Madras had mutinied, and was endeavouring to force those Sepoys who were to remain behind in the barracks to join them, which they refused. This account soon brought their officers out, who instantly resumed their commands, and ordered them immediately to march down to the beach and go on board. This they refused one and all. The grenadiers levelled their pieces took aim, discharged a volley, and killed every officer on the spot. They took the Governor prisoner and all the civil servants, set free a French spy who had been confined there for some time, and placed him at their head, at the same time put the Governor and all the civil servants in the prison from whence they took the Frenchman. They plundered the Governor's house and factory of the treasure, plate and every other valuable that night, took the civilians out the next morning, tied them, and marched them off with them, with an intent to carry their prisoners to Hyder Ali, whom themselves intended to join. After they had marched several miles from Vizag., they unty'd the Governor Mr. Casamajor and the rest of the gentlemen, and told them they might return to Vizag if they pleased. Ensign Butler, the only surviving officer on that establishment, and who very fortunately had been on a visit to a friend at some distance from the settlement, finding what had happened, drew up a detachment of the remaining troops the next morning with a few field pieces, marched at the head of them in quest of the deserters, came up with them, and discharged a few rounds of grape shot amongst them, which brought several of them to the ground. Some ran off, leaving the most part of their arms behind, and the remainder he took prisoners, marching them in the front with the field pieces in the rear."

The Zamindar of Parlakimedi, then under surveillance at Vizagapatam, was strongly suspected of having engineered this outbreak, but he boldly claimed to have saved the lives of the other Europeans in the station and was eventually given back his estate as a reward for his doubtful services.

In 1781 the Circars were within an ace of being ceded back again to Hyderabad in return for a body of horse to be placed at the disposal of the Governor General. Lord Macartney, who had just arrived as Governor of Madras, protested, however, with such force against the proposal that it was abandoned.

Viziarama Razu and Seetharama Razu through their oppressive measures against the ryots had brought the district in a very unsatisfactory state. At the same time the British administration in the area had also become weak and corrupt thereby contributing to the further decline in the moral tone of administration. Therefore a Committee of Circuit consisting of five Members of Council was sent to investigate matters. This committee in 1784 submitted its report which condemned the administration in no uncertain terms. It stated that maladministration by Seetharama Razu and the constantly increasing taxes had resulted in a decrease of population and the ruin of several of the handicrafts; that the ryots were allowed to retain barely one-fifth of their crops; that the excessive customs duties had strangled trade; that there were no courts of justice; that the villages were composed of wretched hovels; that the zamindar was converting all his gains to private purposes; that the Raja

of Vizianagaram was maintaining 7,760 troops including 1,620 sepoys dressed and armed after the European manner at an annual cost of nearly five and a half lakhs of rupees etc. The Committee therefore considered it necessary in the interests of the people at large that the power of Vizianagaram should be curbed and recommended that all his troops except some, 2,000 sibbandis for service in the malarious hills and a body-guard of 767 peons and 50 horses should be ordered to be disbanded. The committee also suggested that separate ***cowles*** be granted to the Jeypore, Palakonda and Golgonda Chiefs and that they should be rendered independent of Vizianagaram. They made several other proposals for the improvement of the revenue and other branches of administration.

The Raja agreed at the time to disband his troops except certain Rajputs who belonged to his own clan and in 1788 he was formally ordered to reduce his forces and was granted a new lease at the enhanced *peshkash* of 9 lakhs recommended by the committee, his Zamindari, however, being increased by the addition of the Estates of Anakapalle, Uratla and Satyavaram.

Sitarama Razu who had for a long time usurped real authority was removed from the office of Diwan in 1784. In 1790, however, he regained his post; was dismissed by his brother in 1791; taken back again in February, 1792; removed by order of Government; and required in August, 1793 to reside in Madras, to which place he proceeded accordingly and lived on a pension from Government of Rs. 5,000 a month.

By this time the Raja's incompetent management of the estate had led to the accrual of arrears of *peshkash* amounting to no less than Rs. 6 1/4 lakhs and the Chief and Council reported that the security of the revenue and the general welfare of the country would be ensured by no method short of the se-questration of the Zamindari. The Government therefore threatened that unless all the arrears were paid the estate would be attached and the Raja removed and pensioned. The Raja thereupon offered to pay Rs. $5\frac{1}{2}$ lakhs of arrears (which had grown to $8\frac{1}{2}$ lakhs) in three equal instalments in a reasonable time, but the proposal was rejected by the Board of Revenue and the Government, and on 2nd August, 1793 the sequestration was effected by Colonel Prendergast by taking possession of the Vizianagaram Fort. The Raja was, however, so powerful that no one would come forward to rent any part of the estate. He also intrigued to render impossible any management but his own. The sequestration continued. The Board of Revenue in 1794 stated as follows :

"The objects we had in view and which we trusted would result from the sequestration of the Zamindari, were, to reduce the military force which this Zamindar (not withstanding the repeated orders, to the contrary, of the Honourable Court of Directors, within the last twenty years, and of successive Governments) has not only retained, but even increased; to ameliorate the condition of the inhabitants and families of those Zamindars, who had been dispossessed by the most unjust and ambitious projects of the Vizianagaram Zamindar; to afford relief to those who retained their countries, but who have been exposed to great oppressions; to heal the distractions, which had so long prevailed under a weak, fluctuating and improvident administration; to ascertain the real value of the different ***parganahs*** and the extent of the improper alienations of land, whether for military services or to Brahmins and favourites; to clear off all debts (Particularly to the Raja's troops); to introduce some fixed principle of management, order to secure tranquility, and the realization of an adequate revenue; and by affording the Zamindar a more intimate knowledge of the resources of his country. We hoped to provide for the punctual discharge of the Company's future demands."

It seemed therefore clear that as long as the Raja remained in the district the arrears would continue uncollected and the estate would remain unmanageable. He was accordingly directed to leave the district and proceed to Masulipatam. He was given an allowance of Rs. 1,200 a month and an advance of Rs. 30,000/- was granted to him for the expense of his journey. He marched for about 12 miles and then on the 11th of May, 1794 wrote to the Chief stating his inability to proceed further owing to the turbulence of his peons, who clamoured for the arrears of their pay. These people were pacified by an assurance from the Chief that the Company would discharge their claims and the Raja was left without excuse for further non-compliance with the orders of the Government. His reluctance

to leave his country was however, extreme. He considered the orders not only harsh and disparaging to his position, but as a sure precursor of the entire extinction of his power. He seems to have hoped that a determined attitude would save extreme measures, and so retired with his camp to Padmanabham, a village between Vizianagaram and Bhimilipatam and in quite the opposite direction to the main road to Masulipatam.

By this open movement he was now declared by the Chief and Council to have broken with the Company; and intelligence was shortly received which left very little doubt of his intentions. It was found that he was moving his family and effects; that some sepoys and cavalry who were in course of being paid of by the Chief of Vizagapatam had been recalled by the Raja and had actually joined him at Padmanabham; that the country peons were collecting; that promises had been made to the other Zamindars for the purpose of conciliating them; and that it was imagined to be the Raja's intention to proceed to Jeypore or further still, to the Bastar country of Nagpur. Once in the hills, a very large force was expected to be at his disposal. On the 14th May a Company of the Raja's sepoys stationed at Vizianagaram marched off, without informing the commanding officers of their intentions to join the Raja at Padmanabham, and three companies which were at Srungavarapukota acted in the same manner. Spies which were sent out by the Chief and Council returned with the news that it was the Raja's intention to resist the company's forces to the last, and if finally over powered, "then to do as the Bobbili family did formerly" when their fort was captured by Bussy.

On the 29th May, Lieutenant Colonel Prendergast arrived at Bhimilipatam from Chicacole with five companies of sepoys and was joined by Captain Cox from Vizianagaram with two and a half companies. Madras and Vizagapatam also provided some more help in the form of ammunition etc.

By this time the number of fighting men who had joined the Raja amounted to four thousand men. He appeared to be aware that he was engaged in a desperate enterprise. He sent for Dr. Martin, who was with the troops at Bhimilipatam and to whom he was known, on the plea that he required his professional advice. The Doctor who was permitted to proceed by the Chief found the Raja prostrated both in mind and body and after prescribing for his bodily ailments, he was asked by his patient whether he would administer to a diseased mind. The doctor replied that his skill did not extend so far, but that he hoped and believed that the Raja was not inflicted in that way beyond all cure. The Raja replied by a long narrative of his grievances and difficulties and ended by entrusting the doctor with a letter for the Chief, in which he attributed his disobedience to the Company's orders to the restraint laid upon him by the rabble of sibbandis and others that had gathered around him. The Chief in his reply offered to employ force against these obstructions but to this no answer appears to have been received.

On the tidings of these events reaching Madras the Governor himself addressed a letter to Viziarama Razu informing him that the Company would settle every just demand of his troops, requiring him to repair forthwith to Vizagapatam accompanied by his personal attendants only. He was also warned that in the event of his declining compliance to these summons he would be considered in a state of armed and wilful dis-obedience to the Government; that the Commanding officer would proceed against his so soon as he might be prepared for that purpose; and use the most effectual means, in his power for dispersing his people and securing his person and the persons of his principal adherents. No reply was received from Viziarama Razu and on the 5th July Colonel Prendergast was directed to enforce the orders of Government, after giving the Raja twenty four hours for the necessary preparations for his departure.

Information reached the British that the Raja and all his men had sworn to die sword in hand. Early on the morning of 10th all was over. The following brief report from Colonel Prendergast was received at Vizagapatam the same evening:– "I arrived at Padmanabham at half past five 'O' clock this morning and finding the Raja's troops all arrived and prepared, attacked them, and after a severe conflict for about three-quarters of an hour, dispersed them. The Raja was killed, with many of his followers, Further returns to-morrow."

Matters however were very far from being at once adjusted. The late Raja had placed the ladies of his family, with his young son Narayana Razu, a boy of 8 years of age at Annamarazupeta, a village

very close to Padmanabham; and on the eve of the battle he sent instructions to his son to surrender in the event of his own death to the Chief and Council. It had become necessary for him to yield up his life to save his honour but the "Company were very just people" and would not visit their quarrel with the father on his own son. He at the same time induced his wife and mother to swear to him that they would not kill themselves on receiving the news of his death.

As soon as the fate of Viziarama Razu and his army was known, the guardians of the women and the child fled to Kasipuram at the foot of the hills. Mukki Rajabhupala Razu, who was in charge of the place received the fugitives with every attention, and shortly afterwards escorted them to Makkuva, a place further north. Negotiations were opened with sevaral Zamindars. The young Raja was soon surrounded with several thousand armed peons; the leaders collected the kists from the ryots and seemed resolved to set the Company's Government at defiance.

The Chief and Council despatched letters to the chief surviving members of the late Raja's family inviting them to come, as the Company's Government did not intend to take any further notice of the past proceedings. This invitation was not accepted by the Raja and his supporters. Thereupon the Governor sent a letter under his own hand dated 20th August, 1794 promising that Narayana Razu and all the late Raja's family etc., would be taken under the Company's protection provided they return within 30 days. To this the boy's friends replied that they would return at an early date. Subsequently Narayana Razu was given a *cowle* for three years for the estate on a *peshkash* of rupees six lakhs, but the property was curtailed not only by the severance from it of the zamindaris which had been restored to the original proprietors, but by the absorption into the haveli lands of Anakapalle taluk and some adjacent areas.

By the permanent settlement of 1802 all the ancient zamindaris were handed over to their owners in perpetuity on a fixed *peshkash* and a number of other proprietary estates were also called into being by parcelling out the haveli land into a series of properties and selling these by auction subject to the payment of a permanent peshkash.

Politically, this settlement was a failure. It took no account of the personal equation among the zamindars. These men had for years been treated as feudatories rather than as mere farmers of the revenue, 'rather as captains of the borders, lords of the marches, chiefs of the hills, than as private land holders'; and the Government had been in part conducted through them, some of them having been entrusted with the responsibility of keeping the hill tribes in order. But under the new arrangement they were unceremoniously set aside; authority over the hill men was taken from them; their estates were declared liable to immediate attachment and sale for default in paying a single instalment of the peshkash; they were irritated by the working of the new revenue and judicial regulations; and the new police force, no longer under their control, took every opportunity, under cover of a pretence of enforcing law and order, of harassing and annoying them. Mr. Thackeray, the well known Members of the Board of Revenue, wrote in 1819 as follows:

"The (police) darogahs were generally low men, such as kotwals, turned-off writers dubashes and butlers, the dregs of the courts and cutcherry: their peons good for nothing, batta peons, such as hang about every cutcherry and follow every dubash. Sending such men into the zamindaris was as if the Government, an hundred years ago, had sent a dozen London attorney's clerks, with some Bow Street runners, to the highlands of Scotland, to control those proud chiefs, and establish a good police in that country."

Owing to all these causes, the zamindars, for many years after the introduction of the permanent settlement, were in a chronic state of discontent and disaffection. Too often internal and domestic troubles acentuated their restlessness. Those of them who had been restored to their ancient patrimonies on the death of the Raja of Vizianagaram in 1794 returned to them, of course, without capital or credit; and in several instances an illegitimate brother or a cousin disputed their title, got together a band of paiks, and seizing upon a portion of the estate contrived to hold it by force.

At first, troops were called out and an attempt was made to chastise these disturbers of the public peace and drive them from their fastnesses. But these expeditions were by no means uniformly successful

and cost much in blood and treasure. Recourse was then had to negotiation, the only result of which was to increase the insolence of the malcontents. Fresh leaders of banditti started up in every direction, and the zamindars, believing that the English were afraid to put the law in operation against them, began neglecting to pay their peshkash.

Sir Thomas Munro, Governor of Madras, in a minute of 7th January 1823 written at the close of a tour through the country, summed up the then position as follows :

"The weakness of the authority of Government in the Circars is owing to our restoring the districts of the petty zamindars, who had been subdued, contrary to the opinion of the Committee of Circuit; to our erecting by the permanent settlement a new set of proprietary zamindars; to our not reserving a single village in which we could exercise direct control over the ryots; and to our transferring to these proprietors the karnams, who are the source of all information. In open countries long under the immediate authority of Government, the permanent settlement, though it tends to conceal the real state of the country, does not seriously affect the public authority by encouraging resistance or rebellion; but in moutainous unhealthy districts like the Northern Circars, the greater part of which has long been in the hands of a number of petty Rajas, some claiming independence, and all constantly ready to withhold their tribute and to raise disturbances whenever they see a favourable opportunity, the permanent settlement has the effect of weakening the authority of Government over the whole province, and of rendering the establishment of security and of good order more difficult than before.....Our system in the Circars is one of forbearance, and we are obliged to connive at irregularities which would not be tolerated in other provinces, lest we should be compelled to use force and involve ourselves in a petty warfare against banditti in a pestilential climate among hills and jungles.

The affairs of Circars can never be well administered, nor the great body of the poeple protected against oppression, nor the country be secured from disturbance and the incursion of plunderers, until our Government becomes more respected in those provinces than it is at present ———————— No zamindari once forfeited for rebellion should ever be restored, whatever temporary evil the retention of it might occasion. All estates falling in should invariably be kept and annexed to the sirkar lands... The gradual extension of the sirkar lands should be our main object, because it is by having the direct possession and management of landed property that we can best protect the ryots, grant them remissions of tent, assist them in agricultural improvements and attach them to our Government."

Ten years later, at the close of 1832, the disturbances in this district and in the Parlakimedi Zamindari of Ganjam became so serious that Mr. George Russel, First member of the Board of Revenue, was sent as Special Commissioner to investigate their causes and concert measures for their suppression. He was invested with extraordinary powers, including that the proclaiming martial law if necessary, and was supported by a strong force of troops.

To check further disturbance of the same kind Act XXIV of 1839 was passed and seven-eighths of the district was removed from the operation of much of the ordinary law, and administered directly by the Collector with extrordinary powers conferred upon him in the capacity of 'Agent to the Governor.' Several of the Zamindaris in the south were, from time to time, bought in by Government at sales for arrears of revenue, and these were formed into the taluks of Golugonda and Sarvasiddi, but the owners of others were quieted permanently.

In 1936 Orissa State was formed and this resulted in the territorial readjustment of the Vishakhapatnam district, parts of which had to be given away to the newly formed State of Orissa. The plains portion of Vishakhapatnam district however, remained unaffected during these transfers. The following are the portions of the district that were transferred to Orissa:

Complete taluks of Bissam Cuttack, Jeypore, Koraput, Malkanagiri, Naurangapur, Pottangi and Rayagada and portions of Gunupur, Padwa and Parvatipur taluks from the Agency portion of the Vishakhapatnam district.

The residuary portion of Ganjam district, namely Chicacole, Sompeta, and Tekkali taluks and portions of Parlakimedi, Ichchapur and Berhampur taluks of Ganjam district retained in Madras State was added to Vishakhapatnam district. The major portion of Parlakimedi taluk (Plains) retained in Madras State was constituted into Pathapatnam taluk. Portions of Berhampur and Ichchapur taluks retained in Madras State were clubbed and constituted into Ichchapur Independent Sub-Taluk. Srikakulam taluk was bifurcated into Srikakulam and Narasannapet taluks. All the above changes were made for administrative convenience. After the estates were abolished under the Madras Estates (Abolition and Conversion into Ryotwari) Act, 1948 (Act, XXVI of 1948) survey and resettlement was undertaken in the taken over Estates and Inam villages.

As it was found that the enlarged Vishakhapatnam district was very unweildy for administration it was bifurcated into Srikakulam and Vishakhapatnam districts in the year 1950. The northern half of the old Vishakhapatnam district was included in Srikakulam district with headquarters at Srikakulam and the southern half was constituted into Vishakhapatnam district with headquarters at Vishakhapatnam.

PHYSICAL ASPECTS

The District derived its name 'Visakhapatnam' from its headquarters town. About the etymological explanation of its name, the Manual of the district of Vizagapatam in the presidency of Madras mentions this. "The term VIZAGAPATNAM is properly "VISAKHAPATTANAM" the city of VISAKHA OR KARTIKEYA, the Hindu Mars".[1] The Madras District Gazetteer of Vizagapatnam published in 1909 gives the following account as to how the name came into existence, "Tradition has it that some centuries ago a king of the Andhra dynasty encamped on the site of the present town on his way to Banaras, and, being pleased with the place built a shrine to VAISAKHA, his favourite deity.....but it (the shrine) is said to have given its name to the town and its traditional site is still supposed to be an auspicious spot for the religious bathings. The name is popularly shortened to VIZAG and the form VIZAG was in the use from almost the earliest days of the English occupation of the district in the latter half of the eighteenth century".[2] The name Vizagapatam was altered to VISAKHAPATNAM in 1943-49 by the composite Madras State through a G.O.

Vishakhapatnam district is one of the North-Eastern districts of Andhra Pradesh situated within the geographic coordinates of 17°-15' and 18°-32' of northern latitude and 18°-6' and 83°-32' of eastern longitude. The district is bounded by Vizianagaram district on the north, East Godavari on the south, Koraput of Orissa on the West and Bay of Bengal on the east. In the 1971-81 decennium, the district had undergone many territorial changes consequent on the formation of Vizianagaram district in 1979. Entire taluk of Vizianagaram, 122 Villages of Gajapathinagaram taluk, 89 Villages of Bheemunipatnam taluk and 187 Villages from Srungavarapukota taluk were transferred to the new district Vizianagaram and thus Vishakhapatnam has been reconstituted with the remaining areas. The district has two distinct regions of contrasting ecological and topographical characteristic features, one with plain land-scape extending from sea's coast to foot hills of Eastern Ghats with Moderate temperature called the plains division and the other extending to 56.4% of the total area of the district is an undulating area covered by degraded forests atop the elevated Eastern Ghats with cool temperature, called the Agency division.

Soils : The important soils are Red lands and Sandy loamy and these constitute about 52% and 35% of total area of the district respectively. The Blocks of Ananthagiri, Araku, Bheemili, Chintapalle, G. Madugula, Kotauratla, Munchingiput, Nakkapalle, Pedabayalu, Pandurthi, Sabbavaram have more than 70% of area and Kasimkota more than 50% of area covered by Red Loamy soils and the blocks of Yellamanchili, Koyyuru, Madugula, Narasapatnam and Ravikamatham have more than 40% covered by sandy lands.

Sl. No.	Predominent Soil type	Area in 000' Hectars	Percentage of area to total area of the district
1	2	3	4
1.	Black soils	126	11.4
2.	Red Soils	576	51.7
3.	Sandy loam	390	35.3
4.	Others	11	1.6

Minerals The important economic minerals that occur in the district are Bauxite, Apatite, Graphite, Mica, Limestone and Quartz. They are available in Narasapatnam, Paderu, Chintapalle, Araku and Ananthagiri blocks. The places of occurrences, the total potential and the present exploitation are given below.

Source : 1 The manuel of the District of Vizagapatam in the Presidency of Madras (1869), page 1.
2 The Madras District Gazetteer of Vizagapatam (1907), pages 2-3
Collector, Vishakhapatnam district.
* Monthly and Annual rainfall Table for the year 1978 published in Statistical Supplement to part II of Andhra Pradesh, Gazette, Hyderabad dated 15-1-1981.

Sl. No.	Name of the Minerals	Places of occurrence — Name of the Block	Annual exploitation in tonnes
1.	Graphite	Pendurthi Narasapatnam Paderu, Anantagiri, Araku	165
2.	Apatite	Anantagiri and Araku	1500
3.	Quartz	Bheemili and Anantagiri	400
4.	Limestone	Bheemili, Kasimkota, Anantagiri	500
5.	Mica	Paderu	46

Flora : Nearly half of the district is covered by forests and a considerable portion of it is reserved. The common species available in these forests are Guggilam (Robusta), Tangedu and Konda Tangedu (Xytia dolabriformis), Billu or Billudu (Chloroxylon Swietenia), Chirimanu or Yellamma (Anogeissus accumiriata), Yegisa (Pterocarpus Martepium), Nallamaddi or Maddi (Terminalia tometosa), and Somi or Somidi (Soymida toprijuga). The timber locally in demand chiefly is nallamaddi which is formed in many areas. Bamboo is plentiful and is practically of the non-thorny variety (Dandrocalamus Strictus). A small quantity of Bambusa Arundinacea also exists. A good proportion of the forest revenue is derived from the bamboo forests.

Rivers : The important rivers in the district are Sarada, Varaha and Thandava. There are no major irrigation tanks but there are 3925 minor irrigation tanks in the district. The details of the rivers are given below.

Sl. No.	Name of the River/Tributory/Rivulet	Length of flow in the District	Name of Barrages/Dams/Anicuts constructed	Name of Block irrigated
1	2	3	4	5
1.	Sarada	80 Kms.	Open Head Channels, Channel fed tanks, Raiwada & Konam Projects	Madugula, Ravikamatham, Kotapadu Kasimkota Yellamanchili
2.	Varaha	61 Kms.	Open Head Channels, Channel fed tanks, KLR Project	Yellamanchili, Nakkapalle, Kotauratla, Narasapatnam
3.	Thandava	34 Kms.	Ravanapalli Reservoir, Open Head Channels Reservoir Projects	Kotauratla, Nakkapalle

Rainfall : The district gets the benefit of both South-West and North-West monsoon periods. The annual normal rainfall of the district is 1,025 mm which is 129 mm more than the state average. The highest rainfall is received in Araku block, and the lowest in Nakkapalle block.

Distribution of normal raintall season-wise in mm is given below :

Sl. No.	Item	Rainfall in mm — District Normal	State Normal
1	2	3	4
1.	South-West Monsoon	585	602
2.	North-West Monsoon	290	203
3.	Winter Period	28	18
4.	Hot weather period	122	73
		1,025	896

Changes in administrative units and component parts : Vishakhapatnam district was not a homogeneous administrative unit in the past and its component parts were, at different periods of time, under the control of different imperial dynasties, namely, the Mauryas, Chedis, Satavahanas, Guptas, Gangas of Kalinga, Chalukyas of Vengi, Cholas, Kakatiyas, Reddis of Kondavidu, Recherla chiefs, Gajapatis, Rayas of Vijayanagar, Qutb Shahis, Mughals and Asaf Jahis, besides the local dynasties of the Matharas, Vasisthas, Chalukyas of Elamanchi, Velanati Chodas, Matsyas of Vaddadi, Surabhis of Jantarunadu and Pusapatis, and Madugula zamindars. This district was the biggest in the country till 1950 when it was bifurcated. For the sake of administrative convenience the Agency tracts of Ganjam, Vishakhapatnam and Godavari district were separated and constituted into an Agency division in 1921. This division was, however, merged in the district during the decade ending with 1931. In 1936, when Orissa State was formed, a portion of Vishakhapatnam district and a major portion of Ganjam district were transferred to it. The residuary portions of these two districts were clubbed to constitute the enlarged Vishakhapatnam district with its headquarters at Vishakhapatnam. As this district was subsequently found to be very unwieldy, it was divided on the 15th of August 1950 into two districts of Vishakhapatnam and Srikakulam. After the bifurcation, the district consisted of nine

taluks, namely, 1)Vishakhapatnam 2) Vizianagaram, 3) Bheemunipatnam, 4) Srungavarapukota, 5) Veeravalli (Viravalli), 6) Gudem, 7) Golugonda, 8) Sarvasidhi (Sarvasiddhi) and 9) Anakapalle. This reorganised district has not undergone any change in its jurisdiction during the decade ending with 1961. But there were some inter-taluk transfers within the district including changes in the names of certain taluks. In the year 1959 the taluk of Gudem was split up. The south-western portion of the taluk was formed into Chintapalle taluk with its headquarters at Chintapalle, while the north-eastern portion of Gudem taluk was merged into Paderu taluk with its headquarters at Paderu. A major part of the hilly tract in the north-western portion of Srungavarapukota taluk was transferred and added to the newly constituted Paderu taluk. In the same year, the names of the taluks of Golugonda, Sarvasidhi and Veeravalli were changed into Narasapatnam, Yellamanchili and Chodavaram respectively. After 1959, the district did not undergo any territorial changes. During 1961 Census, the district had 10 taluks and 10 towns. During the decade 1971–81 the district had undergone many jurisdictional changes and those are explained at later pages. At 1971 census it had 11 taluks and 15 towns. According 1981 census there are 14 taluks and 10 towns which have been grouped under three revenue divisions.

STATEMENT SHOWING THE REVENUE DIVISIONS IN VISHAKHAPATNAM DISTRICT, 1981

Sl. No.	Name of sub-division Revenue Division	Name of Taluk	Name of Town (M)/(P)
1	2	3	4
1.	Vishakhapatnam	1. Chodavaram	1. Chodavaram (P)
		2. Anakapalle	2. Anakapalle (M)

Note : 1 The district Geographical area figures are as supplied of Surveyor General, India

2 The total of the area figures of taluks will not tally with the district area figures because the former represents Land use Area and are derived from the figures supplied by the State Survey Department

3. Villages shown under Col. 5 do not include the villages given under Col. 8

MAJOR CHARACTERISTICS

Agriculture: Economy of the Vishakhapatnam district is agriculture oriented since 63% of workers (as per 1981 Census) ekeout their livelihood from agriculture. But agriculture has low growth potential in the district, since out of the total land area of 11.16 lakh hects. arable area is only 3.85 lakh hects. Average net cropped area per year is 2.81 lakh hects. and average net irrigated area is 1.04 lakh hectares. Area sown more than once is 27% of the net sown area while area irrigated more than once is 5.7% of the net sown area. This higher cropping intensity in the back drop of low growth potential signifies that the cultivation practiced in the district is one of distress type, due to which yield per hectare of crops is comparatively lower in the district as seen from the figures given below.

Crop	Yields per Hectare in Kgs.	
	In the district	In Coastal Andhra
Rice	926	1,599
Bajra	775	875
Jowar	599	642
Ragi	1,290	1,333
Groundnut	973	1,217
Sugarcane (Gur)	2,466	7,361

For securing increased agricultural production and improving the economy of the district, replacement of local varieties with high-yielding one has been taken up and the progress achieved in the 1971–81 decennium is given below.

Crop	Normal extent (Hects)	Area under high-yielding variety at the beginning of 1971 (.Hects.)	Area under high-yielding variety at the beginning of 1981 (Hects.)
(1)	(2)	(3)	(4)
Paddy	88,650	42,200	46,400
Bajra	58,450	25,000	49,700
Groundnut	23,040	16,198	20,896
Ragi	34,940	12,816	16,000
Sugarcane	23,050	18,640	20,463
Maize	5,820	1,816	2,018
Pulses	31,700	6,742	12,676

Source : Collector, Vishakhapatnam district

Application of fertilisers to wet crops Paddy and Sugarcane has also increased from 34.5 Kgs. of 'N' and 9.4 Kgs. of 'P' per hectare in 1971 to 48.7 Kgs. of 'N' and 16.1 Kgs. of 'P' in 1981. Short term loans from Co-operative Institutions also have gone up to Rs. 350 per hectare of wet cropped area from Rs. 265 in the decennium. Land Ceilings and distribution of Banjar lands have increased the involvement of agriculturists especially marginal and small farmers in the cultivation of land and paved way for intensive cultivation in the decennium. The variation in the percentage holdings of these farmers here under bears this out.

		1971	1981
1.	Percentage holdings of marginal farmers in the total holdings of the district	60.0	64.1
2.	Percentage holdings of small farmers in the total holdings of the district	17.2	17.5
3.	Percentage holdings of other farmers in the total holdings of the district	22.8	18.4
		100.0	100.0

Agricultural practices also have changed for the better. In wet areas raising of bajra or ragi as Paddy crop preceder in Kharif season has come to stay. Consequently the percentage area under these crops has gone up to 17.5 and 9.5 from 12.3 and 9.0 respectively in the 1971–81 decennium. Areas under low value crops like korra, varagu, sama, horsegram etc., have decreased while areas under high value crops like chillies, cashew, groundnut, redgram, niger etc.. have increased which may be seen from the following table.

Crop	Percentage of average area under the crop to total cropped area during 1970–71	1980–81
(1)	(2)	(3)
1. Redgram	0.6	1.0
2. Chillies	0.7	1.1
3. Cashew	0.5	0.8
4. Groundnut	4.8	6.0
5. Niger	0.9	2.9

Area under sugarcane also have gone up from 3.9% to 6.0% in the decennium of report. On the extention front, due to reclamation of Banjar lands and due to bringing under plough additional areas in the agency, the percentage of average net sown area to total area has increased from 24.8 to 25.2 in the decennium. Data on land utilisation during 1980–81 is furnished hereunder.

Classification	Area in lakh hectares	% to total land area
(1)	(2)	(3)
Total Geographical area	11.16	100.0
1. Forests	4.70	42.1
2. Barren and uncultivable	1.69	15.1
3. Land put to non-agricultural uses	0.91	8.1
4. Culturable waste	0.22	2.0
5. Permanent pastures	0.05	0.4
6. Land under miscellaneous	0.11	1.0
7. Current fallows	0.40	3.6
8. Other fallows	0.21	1.9
9. Net sown area	2.87	25.8
(a) Area sown more than once	0.96	—
(b) Gross sown area	3.83	—

Animal Husbandry : Since agriculture has low growth potential and is dependent on erratic rainfall, development of the district lies therefore on non-farm lines. Animal Husbandry, on account of its inbuilt employment-cum-increased earning potential is a better non-farm activity for the development of the district. Further, programmes of Animal Husbandry have special significance for weaker sections, since they lend scope to extend succour to these people under Integrated Rural Development Programme and other programmes. The livestock population of the district as per latest quinquinnial census (1983) is given below

Description	No. in lakhs
1) Working animals	3.00
2) Milch animals	2.20
3) Sheep	1.92
4) Goat	2.05
5) Poultry	12.33

Most of the livestock is non-descriptive. The male species of bovines supplied drought power. In the 1972 quinquinnial census, the district had 957 drought animals per 1,000 hectares of cropped area. In the present census the figure is 1,057 while the relative average figure for the State is 481. The female species of cattle and buffaloes, when in lactation supply milk. The district had 14 milch animals per 1000 population as per 1972 livestock census. In the present livestock census there are only 99 milch animals against the relative State figure of 153. The sectoral economy can be improved through better breeding and feeding practices. Towards this end, cross breeding technology has been taken up. An Indo-Swiss Project was started and 38 insemination centres were opened for artificial insemination with frozen semen, in the decennium, to upgrade white cattle with Brown Swiss, Jersy and Ongole breeds and buffaloes with Murrah stock for increased milk yields and drought power. Similarly local sheep and goat have had cross breeding with Nellore rams and improved stock of goat for better mutton potential. In poultry also sufficient cross breeding work was done in the decade to produce high-yielding stock in egg production and meat. For health care of the cross breed and other livestock, 6 Veterinary Hospitals and 59 other Voterinary Institutions were opened during the decade. For developing fodder, 200 demonstration-cum-seed production farms were laid and 400 demonstrations were conducted during the decade to develop pastures at a cost of Rs. 5.00 lakhs. in the district.

Dairy Development: Dairy is another industry for improving the non-farm activity of the economy of the district and ameliorating the lot of the weaker sections. The district has 2.2 lakh milch animals of which 40% alone will constitute the main source of supply of milk in the district. But due to their non-descriptive origin, their milk yields are comparatively lower. The low milk yield coupled with low stock of milch animals and the accelerated urbanisation with the consequential increased demand for milk had made the rural and tribal developmental agencies resort to large loaning programme

for purchasing milch animals by weaker sections and encourage milk cooperative to organise market to cater to the increased flow of milk, By 1971 the milk cooperative organised had established a plant with a handling capacity of 6,000 litres per day to serve the milk needs of the people of Vishakhapatnam and had opened 48 commission agency counters and 49 pickup points for procuring milk in the milkshed area of the plant. But the society found it difficult to meet the enormous demand for milk from the citizens of Vishakhapatnam with the existing plant. On the other hand the massive loans assistance being given by the Rural Development Agencies for purchase of milch animals by weaker sections, had made the beneficiary producers of milk face the formidable task of finding out an outlet for the produce especially during flush season. To sort this, a modern dairy named "Vishakha dairy" was established in the decennium with an installed capacity of 50,000 litres per day. For affording similar market facility to the proliferated producers outside the milk-shed area of the dairy, a chilling centre with an installed capacity of 12,000 litres and 3 cooling centres were established, the former at Narsipatnam and the later in the Agency area. Milk routes have also been increased to five and milk collection centres to 368 by 1981.

Fisheries : The District has 32 kms. of maritime coast, 7,431 inland water bodies with a water spread area of 27,000 hectares and 4,018 hectares of brackish water area for developing fishery. Marine fish landings had increased to 838 tonnes from 73 tonnes per annum in the decennium. Gordine, Catfish, Mackerels and Ribbonfish constitute the main varieties in the landings. Much of the catch is registered with indegenous craft and tackle. 30 trawlers and 176 mechanised boats are conducting bottom trawling in 1981 from the berth accommodation provided in the fishery harbour in the decennium. Inland fishery had not made much headway in the district. Most of the inland water bodies are not suited for pisciculture. Effective water spread area suited for pisciculture is estimated to be 12,955 hectares. For charging the effective area, a quantity of 40 lakh fish seed is necessary. But there were only 2 fish farms in 1971 which had produced 7.23 lakh seed to stock 103 sources. In the decennium one more seed farm at Thandava was opened and by 1981 the production of seed in these farms has reached a level of 9.78 lakhs to charge 129 sources. For financial assistance to fishermen, 19 cooperatives were organised with a membership of 1949 in the 1971–81 decennium. By 1981 the number of cooperatives functioning has gone upto 47 with a membership strength of 6,611. These members were given Nylon Yarn of 24,373 kgs. on subsidy for making nets for tackle. Regarding brackish water, the estuary backwaters of Gostani, Varaha, Sarada and Thandava alone extending to 130 hects. are found suitable for brackish water pisciculture. Development of the area has started in 1981 with the organisation of 10 cooperatives for the purpose.

Mining and Minerals : Minerals generate economic growth independent of monsoon. The district has Bauxite, Phosphate apatite, and Crystalinestone confined to the tribal tracts. Bauxite deposits at Sapparla (hamlet of Galikonda Village) and Gudem of Chintapalli taluk are considered to be the largest in the country. The mineral which occurs as capping is feed back for Alumina Industry. It is estimated that there are 400 million tonnes of Bauxite deposite reserved in the district. But the stock is of low grade category with alumina content ranging from 25% to 40%. However, there is a proposal to establish an Allumina Plant at K. D Peta (Narasapatnam) to utilise these reserves. Phosphate apatite is available in Kasipatnam village of Araku taluk. The reserves are estimated to be of 2 million tonnes. M/s. Andhra Phosphates Ltd., is carrying out mining operation. The Company mined 44,834 tonnes of the mineral in the decennium of report for fertiliser usage. Rich deposits of crystaline limestone are mapped in Borra Caves and along the valley upto Araku from Borra. The reserves are estimated to be of 20 million tonnes. The limestone is suited for the manufacture of magnesium lime required for construction purpose. In the decennium of report, a quantity of 3,953 tonnes of limestone was mined for preparing magnesium lime. Rubi Mica is another mineral rich in the district, essential for electrical and electronic industries. The mineral occurs in the form of Phologopite and is confined to Borra tract. About 70 tonnes of the mineral was mined in the decennium of report, Graphite rock containing 15% to 88% of fixed carbons is seen scattered in Araku, Vishakhapatnam and Narasapatnam taluks. It occurs as veins and pockets in metamorphic rocks. It is mainly used for the manufacture of crucibles, paints, elctrodes, moderators, foundry forgings, solid lubricants etc. The ore reserves are estimated to be about 0.2 million tonnes. In the decennium of report 1791 tonnes

of Graphite ore was mined. Quartz is yet another mineral found mostly in Bheemunipatnam taluk, the reserves of which are estimated to be of one million tonnes. It is mainly used in the manufacture of glass. M/s. FACOR of Sriramnagar, a town in cheepurupalle taluk of Vizianagaram makes use of this mineral for manufacturing Ferro Silican. In the decennium of report 3,108 tonnes of quartz was mined for use in manufacturing glass and Ferro Silican. The refractory units started recently will give a boost in the use of this mineral in the coming years. Further, about 1200 M. Tonnes of China clay, 81,000 tonnes of stealite and 1.43 tonnes of fire clay have been mapped and scaled besides granite of various studs and trap rocks, excellent material for buildings and roads scattered all over the district.

Forestry : Forests occupy 4.78 lakh hectares covering 42.2% of the total geographical area of the district. The forests are of moist dry deciduous type. Due to indiscriminate felling and unchecked of grazing, lack of regeneration programmes and absence of even natural regeneration due to drought and fires, the forest area in the district has become degraded. To stem this, regeneration programmes have been taken up. Teak and Coffee plantations are an off-shoot of this. In the decennium of report, Teak plantations were raised in 2,600 hectares bringing the total area under Teak to 4,600 hectares by 1981. Coffee plantations were raised in 1,605 hectares in the decennium bringing the total area under Coffee to 2,038 hectares by 1981. The district has a further potential of 10,000 hectares and therefore the plantation should be taken up as the lead sector of the Agency areas. Bamboo area extends to 1.54 lakh hectares, scattered all over the agency. But much of the produce of the area was cut and removed in the decennium for export to Rajahmundry Paper Mills for manufactuing paper, without initiating required regeneration programmes, due to which the area has now become apologetic. Cashew plantations were raised in 334 hects. in the decennium bringing the cashew plantations area to 1,608 hectares by 1981. In addition, under non-forestry sector cashew was raised in 1757 hectares in the decennium bringing the total area under cashew both under forest and non-forest sectors to 6,040 hectares by 1981. Besides these, forests in the district yield minor forest produce like tamarind, nuxvomica, myrobolanes etc. The produce is collected by tribals as a secondary pursuit and disposed to Girijan Corporation which has monopoly over these. The receipts by way of forest rentals to State Exchequer from the minor forest produce of the district had increased to Rs. 3.55 lakhs by 1981 from Rs. 1.48 lakhs in 1971.

Industries : Due to the orientation of the economy towards agriculture, industrial development had progressed on Agro-based lines. But the opening of Vishakhapatnam Port had given a fillip to industrial development in the district. As many as 31 major and medium industries have been functioning with an investment of Rs. 190 crores and an employment potential of 25,654 persons by 1981. In the decennium of report, in these 18 units were opened with an employment intake of 3,721. Hundustan Zinc, Union Carbide and other Sea food processing firms and Cement factory are some of the important industrial units startad in the decennium. But most of these industries are located in and around Vishakhapatnam, due to which the city has become an industrial island, while the other areas especially outlying areas have had backwash effects. Even at Vishakhapatnam, no ancillaries worth the name had developed. To rectify this imbalanced growth and to accalerate industrial development in the rural area especially small-scale and cottage industries which have greater employment potential, 7 industrial estates were established in the decennium of report and District Industries Centre, an institutional innovation for the establishment of small and tiny industrial units, opened. As a result of these endeavours, 1,113 small-scale industrial units had come up with an employment intake of 3,724 in the decennium of report. By 1981 the number of small-scale units functioning in the district has reached a figure of 1944 with an investment of Rs. 1,104 lakhs and an employment potential of 11,065 persons. These units manufacture items like Alluminium builders, hardware, Paints, Structural fabrications, Polythene covers, Bread and confectionary, Synthetic detergents, pestierdes, welding eletrodes, Refractory bricks etc.

There were 342 registered factories functioning in the district with 22,305 workers in 1971. The number of factories have increased to 461 with a worker participation of 27,839 by 1981. Of these 77 factories are Agro-based employing 28.7% of workers, Wood & Wood products account for 55 units, Paper and Paper products 60 units, Petrolium and Chemical group 21 units and other groups including metal group accounting for the balance.

Construction of Steel Plant has commenced. The first phase of the Plant is expected to be completed by 1986 and full potential by 1988. The Plant will absorb 50,000 workers during construction stage and later when it goes on steam, it is likely to absorb permanently 20 to 30 thousand persons. Future industrial activity will lie in promoting ancillaries to Steel Plant and to the other existing and coming up large-scale industries.

Electricity : Coming to economic infrastructure activities, electricity, which is essential for the development of agriculture and industry, was extended to 271 villages in decennium of report, bringing the total number of villages electrified to 560 by 1981 census which works out to a coverage of 15.17 of the settlements.

Regarding service connections, the number of service connections given had increased by 31,632 in the decennium of report, bringing the total number or services in operation to 82,396 by 1981. Much of the increase is found in domestic and non-domestic lines. In the period of report industrial connections had increased only by 780 and agricultural connections for energisation of pumpsets by 46. Street lighting services had increased by 251.

The increase in the length of transmission lines during the decennium in the district is given hereunder.

Category	Length of transmission lines in kms.	
	1971	1981
220 KV	116.34	166.34
130 KV	353.20	377.37
33 KV	556.54	640.43
11 KV	1,314.75	1,757.10
L.T.	1,377.69	2,102.86

Transport: In the decennium of report, there is a phenomenal increase in motor vehicular traffic in the district. While there were 6,596 vehicles on road in 1971 in the then composite Vishakhapatnam district there are 25,893 vehicles on road in the reconstituted district in 1981. Scooters and motor cycles constitute the main competent in the total, with their percentage at 48.6. The A.P.S.R.T.C. started functioning in the district in the year 1968 with a small fleet controlled by Eluru Division. But after nationalisation of bus routes in the district in 1975, the vista of operations of the Corporation had started extending to cover more number of bus routes. With the taking over of city bus routes in November 1978, the percentage share of State carriages on road by the A.P.S.R.T.C. had increased to 73 with its fleet of 261 buses by 1981.

Under village linking scheme, the programme of extending vehicular passenger service to rural areas was taken up and 90 villages in 23 routes were connected. The number of villages connected with vehicular passenger service has reached a figure of 1,366 out of the 3,692 inhabited villages in the district that can be connected by Bus service, by 1981. The other villages cannot be reached by mechanised transport due to difficulties of terrain.

The transport net work of the district has reached 178 kms. of rail road and 4,114 kms. of road ways both surfaced and unsurfaced under all managements, by 1981, the particulars of which are given below :

	Cement concret	Black top	Metal	Unmetal	Total
			(in kms.)		
Roads & Buildings	11	916	296	36	1,259
Zilla Parishad	4	84	634	433	1,155
Panchayat Samithis	—	2	236	1,462	1,700
	15	1,002	1,166	1,931	4,114

No new rail road was laid in the district in the decennium of report. Regarding roadways, a total of 699 kms. of roads were laid by R&B Department and Zilla Parishad to connect villages communicationally. For extention of rail road, which by virtue of its infrastructure character goes a long way to accelerate economic activity, a proposal is there to lay rail road through Chintapalle-Sileru to connect Vishakhapatnam to Bhadrachalam road which if fructifies will not only develop the backward agency area but will also reduce the distance between Vishakhapatnam and Hyderabad considerably. Regarding roadways, to reach the norm of 50 kms. of road ways per 100 sq.kms. of area, set by the Road Development Congress, the district has to have another 1,467 kms. of road length. The requirement will be more if allowance is made for agricutlurally and industrially developed areas.

To conclude, due to change in the jurisdiction of the district in the decennium, absolute figures of the elements of the economy of the district, as they stood in 1971 and in 1981 do not admit of comparison for assessing trends but relative figures of these do admit of such comparison. Relative figures have therefore been made use of to assess trends in the decennium.

PLACES OF INTEREST

Places of Religious, Historical or Archaeological Importance : Places of religious institutions (temples) and mutts charitable institutions and institutions of historical or archaeological importance in the district are presented in the following statement for the convenience of the reader.

STATEMENT SHOWING THE MONUMENTS, TEMPLES AND MUTTS IN VISHAKHAPATNAM DISTRICT

Sl. No.	Taluk	Name of the Town/Village/hamlet	Name of the Monuments/Temples/Mutts
1	2	3	4
1	Chodavaram	Chodavaram	Kesava Temple
2	Nakkapalle	Upnaka	** Sri Venkateswara Swamy
3	Anakapalle	1 Anakapalle	** 1 Sri Nookalamma Aammavaru ** 2 Sri Gowri Seva Sangam
		2 Kasimkota	** 1 Sri Venugopala Swamy ** 2 Sri Satyanarayana Swamy
4	Vishakhapatnam	1 Simhachalam	* Sri Varaha Lakshmi Narasimha Swamy Temple
		2 Vishakhapatnam	* 1 Sri Kanaka Mahalakshmi Temple * 2 Sri Venkateswara Swamy Temple ** 3 Sri Jagannadha Swamy ** 4 Sri Raja Rajeswari Ammavaru ** 5 Sri Kodanda Rama Swamy Ammavaru *alias* Sri Sitha Rama Swamy ** 6 Sri Kurupam Market Endowment ** 7 Smt. J.N. Choultry ** 8 Turners Choultry ** 9 Sri Garuda Ganganayakulu Choultry 10 Sri Godadu Bhavaji Mutt

* These institutions have an income of Rs. 1,00,000 and above
** These institutions have an income of Rs. 20,000 and above but less than Rs. 1,00,000

Places of Tourist Interest

Lothugedda (Chintapalle Taluk) : This place is situated at about 42 kilometres north-west of Narasapatnam in a direct line among the Golugonda hills and roughly about 16 kilometres north of Chintapalle. This village contains the ruins of three or four old granite temples of Siva, the largest of which has elaborate sculptural depictions. One odd group depicts four men with long pointed beards and long pigtails carrying pickaxes on their shoulders holding out their hands to receive a reward which a king sitting on a throne with three ladies behind him, is in the act of bestowing. The villagers believe that the men are the builders of the temple and that the barbers were probably rare on the hills in those days. Several inscriptions in Telugu are found in one of these temples.

Rajendrapalem (Chintapalle Taluk) : This village lies about 48 kilometres from Chintapalle. This is the place where Alluri Seetharamaraju organised his famous 'Fituri' against the British administration. A tomb was erected here in his honour.

Paderu (Paderu Taluk) : Paderu, the headquarters of the taluk of the same name, is situated at a distance of about 74 kms from Vishakhapatnam. Paderu is a broad picturesque and rich valley with an altitude of over 900 metres above the sea level. There are a good number of hill stream locally known as Geddas in this area and they provide irrigation facilities. Paderu is an Agency area which is backward in all respects. There is much potential development due to the construction of the Dandakaranya-Balangir-Kiribur railway line,

Source : 1 Vishakhapatnam district Gazetteer 1979
2 Vishakhapatnam district Census Handbook of 1961

Araku Valley (Araku Taluk) : Araku valley is about 115 kilometres from Vishakhapatnam. The area of the valley is roughly 36 sq kms. and the altitude is between 600 and 900 metres above mean sea level. The entire area is inhabited by aboriginal tribes and attracts visitors from all over the country. The journey to Araku Valley on the ghat road with thick forests on either side is in itself interesting and pleasent. The Ananthagiri hills on the way to Araku Valley are famous for coffee plantations. Araku Valley has an Exploratory-cum-Demonstration Farm which is about 20 hectares in extent, a Government Orchard and a Government Silk Farm with mulberry gardens. Cocoons from the silk farm are reeled in the farm, and the silk yarn and waste are sent to Hindupur (Anantapur District). The beautiful Araku Valley with its bracing climate, orchards and the Ananthagiri Ghats, which present an enchanting view to the visitors, is attracting tourists not only from all parts of India but also from abroad as there are good communication and halting facilities. The natural beauty of this valley is enhanced by the tribal people who abound here with their own folklore and traditions. "Dhimsa dance" is a unique feature of the tribes of Araku Valley.

Chodavaram (Chodavaram Taluk) : Chodavaram, the headquarters of the taluk of the same name, is situated at a distance of about 80 kms. from Vishakhapatnam and 32 kms. from Anakapalle. This town has got good communication facilities by road with all the important places in the taluk. There is a small temple of Kesava here and it contains six inscriptions. Five of these epigraphs mention Mahamandaleswara Pratapa Vallabha Raja as the local chief. Here, he built a fort in which lies a seven feet long old cannon.

Balighattam (Narasapatnam Taluk) : About three kilometres south-west of Narasapatnam, there lies on the bank of the river Varahanadi, a place known as Balighattam. This place owes its importance to the Brahmalingeswara temple at the foot of a small hill on the western bank of the river. Here, the shrine like the one at Benares faces to the west. It is interesting to note that this temple is supposed to have been built by Brahma and that the river is declared to have been made by Vishnu during his incarnation as a boar (Varaha). Therefore the river is known as Varahanadi. The deposits of white clay on the river bank are supposed to be the ashes of a sacrifice performed here by Bali, the demon king from whom the village takes its name as Balighattam. The river at this place flows from north to south for a short distance. On account of these peculiarities, the place is considered to be very sacred. The Sivaratri festival celebrated here every year attracts a large number of devotees.

Gopalapatnam (Nakkapalle Taluk) : Gopalapatnam is situated to the south-west of Yellamanchili at a distance of three kilometres from the coast and close to the sudikonda. On the top of the hill there is a spring called Kasibugga in which the devotees take their bath on the Sivaratri day. The water here is believed to be very efficacious in curing blighted crops. Near another pool close by, there is a small shrine in which two slabs contain some Telugu inscriptions. There are a number of sculptured stone fragments strewn all over. One of these contains the figure of Kali slaying the buffalo-demon Mahishasura. Not far off is a tiny circular shrine cut out of the rock. The place thus seems to have attained religious importance.

Dimli (Yellamanchili Taluk) : Dimli is situated at a distance of about 10 kms. from Yellamanchili. It assumed religious importance owing to the construction of a temple dedicated to Lord Siva in the unusual form of Nageswara (Serpent god). It is locally believed that Lord Siva and Parvathi appeared to the sage Agastya at this place and the temple was erected to commemorate the event. The festival celebrated at the place is Sivaratri when large number of devotees congregate here with much devotion.

Etikoppaka (Yellamanchili Taluk) : This village lies on the left bank of the river Varaha and is situated at a distance of about 20 kms. to the south of Yellamanchili and about five kms. north-west of Narasapatnam Road railway station. This place is famous for the manufacture of toys specially prepared with the Ankudu wood.

Panchadharla (Yellamanchili Taluk) : This village is situated at a distance of about 10 kms. north-east of Yellamanchili and 24 kms. from Anakapalle. It derived its name from the five jets of water coming out of five fountains which receive their supplies from a natural perennial spring. Near by there is *lingam* on which are carved other *lingams* in 12 rows of 85 each and which is consequently known as the "Kotilingam or Crore of lingams". There are several inscriptions on the

pillars of the Mandapam in the temple and two of them dated in A.D. 1407 and 1428 contain a genealogy of chiefs who claimed Eastern Chalukya ancestry and bore the Eastern Chalukya titles of Sarvalokasraya and Vishnuvardhana.

Anakapalle (Anakapalle Taluk) : Anakapalle the headquarter of the taluk of the same name is situated at a distance of 34 kms. west of Vishakhapatnam. This town is an important wholesale marketing centre for jaggery which is exported to various places in the country. It is also famous for sugarcane and guava fruits. The town is also known for its brass industry, especially for the manufacture of household utensils Of the temples at the place, the shrine of Kanyaka Parameswari is the most important.

Sankaram (Sabbavaram Taluk): Sankaram is a small village which is over six kilometres from Anakapalle. There are two low contiguous rock hills running east and west which are locally known as the Bojjanakonda. They contain some notable Buddhist remains. Three huge stupas at three different places were cut with great difficulty from the rocks in these hills. The biggest of these is about nine metres in diametre. On the eastern side of the hills is a rock cut temple with numerous Buddhist sculptures and also a life size statue of Buddha. Sankaram is a place of archaeological importance.

Appikonda (Vishakhapatnam Taluk): This is a small village situated on the coast of the Bay of Bengal at a distance of 18 kms. from Vishakhapatnam. Kapilamahamuni is said to have installed the image of Somalingeswara Swamy in this village. So it was called Kapilakonda. Formerly fishermen used to live in those places and they called it Apilakonda which gradually became Appikonda. It assumed religious importance owing to the existence of a Siva temple containing a life-size bull carved out of black stone. There are also other small temples around the Siva temple but they are covered with sand-dunes and their Gopurams alone are visible. The Siva temple contains inscriptions of the 12th century A.D. These inscriptions mention that this village was granted by a commander-in-chief of the chodas for the maintenance of worship in the temple. The Sivaratri festival celebrated here is attended by a large number of devotees.

Simhachalam (Vishakhapatnam Taluk): Simhachalam, a hamlet of Adivivaram village, is a place of pilgrimage in Vishakhapatnam taluk. It is situated on the Simhachalam range of hills. It is about 16 kilometres from Vishakhapatnam connected by both rail and road. The Simhachalam temple, the man lion incarnation of Vishnu, is the most famous the richest and the best sculptured shrine. The word Simhachalam etymologically means the hill of the lion.

The temple of Varaha Lakshminarasimha is situated on the hill which is 244 metres above the sea level. The way up to the temple runs through the glen covered with pineapple fields besides mango, jack and other fruit trees. Architecturally this ancient temple deserves high praise. It contains a square shrine surmounted by a high tower, a portico infront with a smaller tower, a square sixteen pillared mandapam facing the portico and an enclosing Verandah, all made of dark granite. All these are richly and delicately carved with conventional and floral ornaments and scenes from the Vaishnavite puranas. One of the pillars locally known as the Kappam Stambham (tribute pillar) is believed to possess great curative powers. There is a stone car with stone wheels and prancing stone horses.

The image of the deity is small and always kept covered with sandal paste. In May every year this sandal paste is removed ceremoniously at the festival called Chandanayatra. On the north side of the temple there is an excellent Natyamandapam where Kalyanotsavam is performed. This mandapam is supported by 96 pillars of black stone, exquisitely carved and arranged in sixteen rows of six each. The exact age of the temple is not known, but it contains an inscription dated as far back as A. D. 1098–99 of the Chola King Kulottunga–I who conquered the Kaling territories. Another inscription shows that a queen of the Velanadu chief Gonka III (A. D. 1137–56) covered the image with gold. A third says that the Eastern Ganga king Narasimha I built the central shrine, the Mukhamandapam, the Natyamandapam and the enclosing verandah in black stone and the other grants inscribed on its walls make it a place of historical importance. The most important festivals celebrated here are 1) The Kalyanam of Varaha Lakshminarasimha (March-April) 2) Chandana yatra (May) and 3) Vishakha poornima (May) and large number of devotees congregate here during these festivals. Apart from the religious importance attached to the place, Simhachalam is a place of enchanting scenic beauty.

Vishakhapatnam (Vishakhapatnam Taluk) :— Vishakhapatnam the headquarters of the district, the Revenue Division and the taluk of the same name, is situated on the Madras-Howrah broad gauge line. The name Vishakhapatnam is named after 'VAISAKHA' or 'KARTIKEYA' the lord of valour. The city is built along the seashore of the Bay of Bengal, and it is bounded and broken by the bold headland called the Dolphin's Nose (357 metres above the sea level). This place is also known as the Black mores hill. Vishakhapatnam has grown in importance educationally, commercially and industrially. It is the seat of Andhra University. The places of interest in the city include the Dolphin's Nose, light house with 7 million candle power covering 64 kilometres range, harbour, Bharat heavy plates and Vessels, Hindustan Ship-building yard, Caltex oil Refinary, Coromandel Fertilisers' Factory, King George Hospital, Circuit House on the hill, a beautiful beach near the Ramakrishna Mission and an airport.

The harbour of Vishakhapatnam is considered to be one of the best natural harbours in the world. The harbour area is a very picturesque spot. The hills seem to suddenly rise from the water. On one of the hills overlocking the harbour is a church, on another a temple and on a third a shrine together with a mosque. This is said to belong to a Muslim Saint saiyad Madina alias Ishaq Madina. This is an important place of pilgrimage for the Muslims.

Bheemunipatnam (Bheemunipatnam Taluk) : Bheemunipatnam, the headquarters of the taluk of the same name, is situated at a distance of 34 kms. from Vishakhapatnam. The name Bheemunipatnam is said to have been derived after the hero of Mahabharata, Bhima, the second of the Pandavas. During the exile, the hero Bhima after killing the demon king Bakasura installed an idol of Lord Narasimha the presiding deity of the place. The town is most picturesquely situated at the mouth of the Chittivalasa, close to the big laterite topped Narasimha Hill which is formed of deep red soil with brown and purple streaks of rocks. It is one of the oldest municipalities in the country having been constituted as early as A.D. 1861. This place at first came to prominence as a settlement of the Dutch who built a fort and a factory in the 17th century A.D. The most important aspect of interest at the place is the beach which is, perhaps, matchless for its beauty all along the east coast. It is a usual resort for seabathers as it is free from dangerous depths and sharks. Nearer the sea and facing the flagstaff is a well-equipped round bungalow which, it is said, was originally the Vizianagaram Raja's resort. The view of the seascape from the Verandah of the bungalow is captivating. This place was an important port in olden days. It has a light house and it is a minor port though it is seldom used now. Bheemunipatnam is undoubtedly a place of holiday resort.

Padmanabham (Bheemunipatnam Taluk) :-This village lies 16 kilometres north-west of Bheemunipatnam on the left bank of the Gosthani. Padmanabham is known in the local history as the place where the Raja of Vizianagaram was slain in A.D. 1794 in the fight with the East India Company's troops and the spot is marked by a small masonry erection. The Padmanabhaswamy temple of this place is one of the most important temple of the region. The presiding deity Padmanabhaswamy is said to be the lord who readily responds to the desires of his devotees. On the top of the hill which overlooks the place, is the shrine of Padmanabha and the Kalyanotsavam of the deity celebrated annually during March-April draws a congregation of large number of Hindu devotees.

CENSUS CONCEPTS

Rural and urban areas It is customary to classify the population of every country at each census as Rural and Urban. Such a classification has considerable importance and is necessary from the point of assessing the differentials in the social, economic, cultural and demographic characteristics of the population. Hence, at the beginning of each census, the criteria for treating a place as a town i.e., urban are evolved and the areas are then classified according to the definition so evolved. The census definition of a town in this country was more or less the same from 1891 to 1941. The towns broadly comprised all municipalities irrespective of the population size and every other continuous collection of houses permanently inhabited by not less than 5,000 persons while provincial Directors of Census Operations having regard to the character and relative density of population, their importance as centres of trade decide them to be towns. In the application of this definition there was some variation from State to State according to the local conditions. It was only at the 1961 census that a fairly strict definition was sought to be applied throughout the country in order to determine a place as an urban unit. The same definition was followed at the 1971 and 1981 Censuses also. The Director of Census Operations, however was given discretion to include places that had other distinct urban characteristics and to exclude undeserving cases in consultation with the State Government. The following criteria are adopted for treating a place as urban at the 1981 Census.

i) A minimum population of 5,000,

ii) Atleast 75% of the male working population is in non-agricultural pursuits,

iii) A density of population of atleast 400 persons per sq. km.

The urban criterion of 1981 varies slightly from that of 1961 and 1971 Censuses, in which the males working in activities such as fishing, logging, etc., were treated as engaged in non-agricultural activities and therefore contributed to the 75% criterion in 1961 and 1971 Censuses, whereas in the 1981 Census these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion.

The towns are distributed into six classes as detailed below :

Classification of towns	Population size
Class I	100,000 and above
Class II	50,000–99,999
Class III	20,000–49,999
Class IV	10,000–19,999
Class V	5,000–9,999
Class VI	below 5,000

The Class I towns are termed as cities.

Standard Urban Area: Besides classification of all places into rural and urban areas, two more concepts viz., Urban Agglomeration and Standard Urban Area were evolved from the 1971 Census. One of the difficulties in comparing the urban population and its characteristics between one census and another, apart from the changes in the list of certain units at each census, had been the change in the jurisdictions of the urban units from census to census. The concept of Standard Urban Area had been introduced at the 1971 census and the same was followed in 1981 with a view to obviating this difficulty to some extent. The essentials of a standard urban area are (i) that it should have a core town of a minimum population size of 50,000, (ii) that the contiguous areas made up of other urban as well as rural administrative units should have close mutual socio-economic links with the core town and (iii) that there are probabilities of this entire area getting fully urbanised in a period of two or three decades. The idea is that it should be possible to provide comparable data for a definite area of urbanisation continuously for three decades which would give a meaningful picture. This replaced the concept of town-group which was introduced in the 1961 Census. The town-group was made up of independent urban units not necessarily contiguous to one another but were to some extent inter-dependent. The data for such town groups become incomparable from census to census as the boundaries of towns themselves change and the intermediate areas are left out of account. Thus the concept of Standard Urban Area

came to be developed for adoption at the 1971 Census. In Andhra Pradesh, 31 units have been selected for demarcating Standard Urban Areas. The necessary data will be compiled for these units also during the next two or three successive censuses in order to study urbanisation around a large nuclei. The Standard Urban Area is identified by the administrative units that it encompasses namely the city, the town and the villages. The boundaries of the Standard Urban Area are the administrative boundaries of the peripherial units.

Urban Agglomeration : Apart from town/city, the 1971 concept of Urban Agglomeration has also been adopted for the 1981 Census. An urban agglomeration constitutes;

a) A city with continuous outgrowth (part of the outgrowth being out of the statutory limits but falling within the boundaries of adjoining village or villages);

b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a);

c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

There are only 4 urban agglomerations in the State viz., Vishakhapatnam, Rajahmundry, Vijayawada and Hyderabad.

Census House : A census house is a building or part of a building having a separate main entrance from the road or common court yard or stair case etc,, used or recognised as a separate unit. It may be inhabited or vacant.

Household: A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be one member household, two member household or multi-member household. For census purposes each one of these types is regarded as household. Again, there may be household of persons related by blood or household of unrelated persons or even of mixed type. Examples of unrelated households are boarding houses, hostels, residential hotels, orphanages, rescue houses, ashrams, etc. These are called institutional households.

Scheduled Castes/Scheduled Tribes : Scheduled Castes and Scheduled Tribes are those notified under Article 341 of the constitution according to which the President may with respect to any State or Union Territory and where it is State after consultation with the Governor thereof, by public notification, specify the castes, races or tribes which shall for the purpose of the constitution be deemed to be Scheduled Castes/Tribes in relation to that State or Union Territory, as the case may be.

For the purpose of 1981 Census the Scheduled Castes and Scheduled Tribes order (Amendment) Act, 1979, notified under the Government of India, Ministry of Home Affairs, Notification No. BC 12016/34/76-SCT-V dated 27-7-1977 was adopted. A copy of the list of Scheduled Castes and Scheduled Tribes in Andhra Pradesh is given under the note on Primary Census Abstract.

Literates : A person who could both read and write any language with understainding was treated as a literate at the 1981 Census. A person who could merely read but could not write or vice versa was not treated as literate. The test for reading was ability to read any simple letter either in print or in manuscript. Children aged 4 years and below were treated as illiterates. The test for education was that a person should have passed a recognised written examination or examinations as proof of educational level attained. The highest examination passed was taken as the level of education.

Worker : The definition of work adopted in 1981 Census is as follows :

> "Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work."

In the concept of work, a significant departure is made at the 1981 Census. At the 1971 Census, the main activity of a person was initially enquired according as he spent his time basically as a 'worker', engaged in production of goods and services or as a non-worker. For regular work in organised sector, the reference period was the week prior to enumeration, and for seasonal work such as agriculture, etc., the last one year. Persons engaged atleast for a day in regular (non-seasonal) work during the preceding week were treated as

workers. The work of a person who was basically a non-worker, such as a student, or housewife but had made some marginal contribution to work was classified as secondary work and this was recorded separately.

At the 1981 Census it was considered desirable to have as detailed a profiled of the working population as possible, maintaining the comparability with 1961 and 1971 data. An attempt was made to find out if a person had done any work at all during the last year. It will thus be seen that the questions on economic approach have been designed to distinguish all the workers, regular or seasonal and non-workers with reference to the last one year prior to the date of enumeration. It was intended to find out how many had worked for 183 days or more i.e., 6 months or more and information regarding the secondary work done by regular workers and also the marginal work done by the non-workers was collected. It was felt in the present context that the usual status of worker was more appropriate when compared with the approach of current status of worker followed earlier. The broad classification of workers is explained under the note on the Primary Census Abstract.

Non-Worker : All other who did not do any productive work irrespective of whether they derived some income such as through pension, rents, etc., or did not derive any income were classified under category (X) non-workers.

The non-workers are divided into the following seven categories :

1. Household duties i.e., all those persons basically engaged in unpaid home duties doing no other work;
2. Students i.e., all full-time students or children attending school;
3. Retired persons or a rentier i.e., a retired person not employed again or rentier or royalty receiver or any other person of independent means for securing which he does not have to work and who does no other work;
4. Dependent i.e., an infant or child not attending school, a person permanently disabled from working due to illness or old age or it able bodied who have no other activity and who are not seeking any work either, but are purely dependent.
5. Beggars, etc., i.e, beggars, vagrants or an independent woman without indication of source of income and those of unspecified source of subsistence and who are not engaged in any economically productive work;
6. Institutional inmates i.e , a convict in a jail or an inmate of penal, mental or charitable institution; and
7. Other non-workers-all non-workers who may not come under any of the above six categories;

Marginal Workers : A significant feature of the 1981 Census was the collection of information on marginal workers who had done some work for a period of less than 6 months during the reference year prior to census taking. At the 1971 Census though this concept was not introduced there was a comparable category called non-workers with secondary work.

HISTORY OF DISTRICT CENSUS HANDBOOK

District manuals compiled and published prior to 1905 by the erstwhile composite Madras Government contained not only particulars of items of more or less a permanent character such as physical characteristics, history religion and ethnography, but also a few statistical tables including those relating to population which became obsolete within a few years of publication. Later, the Madras Government replaced the District manuals by another publication viz., the District Gazetteer consisting of two volumes A and B. Volume A contained descriptive and such general tables as might be necessary to explain the text and volume B contained detailed statistics. It was decided that volume B should be brought out periodically after each Decennial Census so that they contain the latest statistics. Volume A was published for some districts between 1905 end 1927 in the composite Madras State. The publication of volume A was discontinued in 1927. Volume B was published for all the districts of the composite Madras State between 1906 and 1915. The publication of volume B was also stopped after 1931 Census. Due to the II world war, they were not published after the 1941 Census.

Similarly in the erstwhile Hyderabad State also the Gazetteer volumes were brought out for some of the districts.

The scheme of publication of revised District Gazetteers was started in 1958 by the State Governments and in this State, the Gazetteers of all the districts except Ongole have been published.

The Village Statements : Apart from the District Manual and Gazetteers the Census data upto village level used to be published in a brouchure called 'Village Statement' for each District immediately after every census from 1872 upto 1941.

The village statements presented only the number of occupied houses and population by religion of each village and town. From 1951 Census, the village statements were replaced by the District Census Handbooks.

District Census Handbooks: Sri R. A. Gopala Swamy, I. C. S., the then Registrar General, India and Ex-officio Census Commissioner of India pioneered the idea of compiling the District Census Handbooks for each district and introduced the same in 1951 Census. This was envisaged as part of the plan intended to secure an effective method of preserving the census records prepared for areas below the district level. He proposed that all the District Census Tables and Census Abstracts prepared during the process of sorting and compilation, should be bound together in a single manuscript volume called the 'District Census Handbook' and suggested to the State Governments that the Handbook with or without the addition of other useful information relating to the District should be printed and published at their own cost, in the same manner as the village statistics of the earlier censuses. This suggestion was accepted by most of the State Governments. Both the composite Madras State and the erstwhile Hyderabad State accepted this suggestion and published the District Census Handbooks for each district at their own cost. In the erstwhile Hyderabad State, the District Census Handbooks were brought out in two parts, part I containing the administrative statistics and part II the census tables whereas in composite Madras State, the Handbooks were brought out in one single volume for each district.

Pattern of District Census Handbooks at 1961 : At the 1961 Census, the scope of the District Census Handbooks was enlarged significantly by Sri Ashok Mitra, I. C. S., the then Registrar General, India. District Census Hand Books of 1961 of Andhra Pradesh included four parts. The first part contained narrative description of the physical features, history, social, economic and demographic characteristics, the progress made in each field of administration over the past decades and a brief gazetteer of places. The second part contained the administrative statistics of various departments. The third part contained the 1961 Census tables viz., General population tables, economic tables on Scheduled Castes and Scheduled Tribes. The fourth part consisted of village and town directory which was the most vital part of the Handbook, giving the village-wise and town-wise primary census abstract i.e., particulars of area, households, population, scheduled castes, scheduled tribes, literacy, broad categorisation of working population, etc. Important amenities such as educational, medical, public health and communication facilities available were also indicated against

each village and town. Nine such tables containing village-wise particulars such as irrigation sources, important crops raised, value of land, co-operative societies, industrial establishments, police stations, list of skilled craftsmen, etc., were given after village and town directory. A statement on fairs and festivals in the district was given at the end of the volume. All these four parts were bound in a single volume and published at the cost of the State Government,

Pattern at 1971 Census : At the 1971 Census it was decided to enlarge the scope, in view of its usefulness to the official users of the census data and the increased demand among the public. There was some delay in the publication of District Census Handbooks at 1961 Census due to two reasons— 1) inadequate printing facilities and 2) delay in the preparation of District Census Handbook which contained four parts. In order to avoid delay in the publication and to make available the more important data to the planners at the earliest, the District Census Handbook was prepared in 3 parts viz., Part A, Part B and Part C as shown below.

Part—A : Village and Town Directory

Part—B : Village and Town Primary Census Abstract

Part—C : Administrative Statistics and Report

Parts A and B were bound in a single volume and were published for all the districts as early as in 1974. However the printing of Part C was given up

Pattern at 1981 Census : At the 1981 Census, the format of village directory and statements of town directory are almost similar to those adopted for 1971. The District Census Handbook of 1981 Census comprises the following two parts brought in single volume, the grouping of which would enhance the value of publication as the data given therein are closely interrelated.

Part A* : Analytical Note

Part B : Village and Town Directory and Village and Town-wise Primary Census Abstract.

It has been decided not to go in for administrative statistics that is Part–C as it was our experience during 1971 Census that there was inordinate delay in collecting the administrative statistics pertaining to various departments with the result that the publication of this part of District Census Handbook was dropped in Andhra Pradesh State. Other reason for dropping the publication is that administrative statistics, would be available to the data users in the publications of the State by Bureau of Economics and Statistics and the concerned departments.

The formats of village directory and of seven statements on town directory are on the same pattern canvassed in 1971 Census except for a few additional columns. These additional columns are introduced to throw more insight into the infrastructure of the villages and towns. A feature of 1981 pattern is the restructuring of all the amenities except power supply in the villages and to bring them together, with the corollary that in case any amenity is not available in the village, the distance of the nearest place where the facility is available is presented. Similar method is followed in respect of towns where educational and medical facilities are not available. While presenting the additional columns of Town Directory, the Minimum Needs Programme of the Planning Commission is kept in view. The scope of village directory, town directory statements and primary census abstract is explained hereunder.

Scope of Village Directory : As was done in the past, the village directory has been prepared for all the villages in the State and these are presented taluk-wise in the District Census Handbook (DCH). For convenience of references, an alphabetical list of villages together with location code numbers in respect of each taluk precede the village directory for that taluk. This is done for easy location of any village in the directory since the information is arranged in ascending order of the location codes of the villages.

In the village directory, various amenities and other data have been indicated by codes. These include, area of the village, total population with number of households at 1981 Census, availability of amenities such as educational, medical, drinking water and P & T facilities, communication facilities, type of approach to village and the distance of nearest town, power supply and land use particulars. There are 20 columns in the village directory covering the above aspects.

Columns 1 to 3 relate to the location code number, name and total area of the village. The area given under column 3 is as per the data collected from the State Survey Department.

*Since Vishakhapatnam DCHB is unweildy, it is published in two Volumes-Part XIII A & B (i) and Part XIII A & B (ii). The first volume contains Part XIII A & B (i)- Village Directory, Town Directory and Appendices, and the second volume Part XIII A & B (ii) Analytical Note, Village Primary Census Abstract & Town Primary Census Abstract. The present volume is the second part of the DCHB.

Wherever the figures are not available from the State Survey Department, the figures furnished by the Tahsildars have been adopted. Columns 4A and 4B provide the number of households and population of the village as per 1981 Census Columns 5 to 11 and 13 list out the basic amenities available in the village such as educational, medical, drinking water, postal, day of the market, communications approach to village and electricity.

In order to indicate the food habits, information on the staple food of the majority during the major portion of the year was collected under column 14. Wherever it was difficult to clearly determine a particular grain as staple food, the combination of grains mainly used as staple food has been indicated.

Columns 15 to 19 pertain to the land use pattern in the village. The extent of forest area has been given in column 15 while in columns 16 and 17 the extent of cultivated area in the village has been given. The extent of irrigated area together with different irrigational sources has been indicated in column 16. The extent of culturable waste has been shown in column 18 while the area not available for cultivation such as village site, road and railways or under water, etc., has been indicated under column 19.

The concepts of various types of land use given under each of the columns 15 to 19 are explained below:

1. Forests (Col. 15) : These include all actually forested areas and the lands classed or administered as forests under any legal enactment dealing with forests whether State owned or private. If any portion of such land is not actually wooded but put to some agricultural use, that portion is included under the appropriate heading of cultivated or uncultivated land.

2. Cultivated area with break-up irrigated and unirrigated (Columns 16 & 17) This includes the land under the following three categories.

(i) Net area sown:

The net area sown represents the area sown to crops counting areas sown more than once in the same year, only once.

(ii) Other fallows :

This includes all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years. The reasons for keeping such lands fallow may be either due to poverty of the cultivators or inadequate supply of water or malarial climate or silting of canals or rivers or unremunerated nature of farming, etc.

(iii) Current fallows :

This class comprises cropped areas which are kept fallow during the current year. If any seedling area is not cropped again in the same year, it is also treated as current fallow.

3. Culturable waste: (Column 18) This includes the land under the following three categories.

(i) Permanent pastures and other grazing lands:

These cover all grazing lands whether they are permanent pastures and meadows or not. Village common and grazing lands within forest areas are included under this head.

(ii) Miscellaneous tree crops, groves not included in the area sown :

Under this class is included all cultivable land which is not included under net area sown but is put to some agricultural use. Lands under casuarina trees, thatching grass, bamboo bushes and other groves for fuel, etc., which are not included under 'Orchards' are classed under this category.

(iii) Culturable waste :

This includes lands available for cultivation but not taken up for cultivation or abandoned after a few years for one reason or other. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. They may be assessed or not assessed and may lie in isolated blocks or within cultivated holdings. Land once cultivated but not cultivated for five years in succession is also included in this category.

4. Area not available for cultivation. (column. 19) This includes the land under the following two categories.

(i) Land put to non-agricultural uses:

All lands occupied by building, roads and railways or underwaters, e.g., rivers and canals and other lands put to uses other than agricultural.

(ii) Barren and uncultivable land:

This covers all barren and un-cultivable land like mountains, etc., i.e., which cannot be brought under cultivation unless at a high cost whether such land is in isolated blocks or within cultivated holdings.

Column 20 is for recording remarks if any on matters like place of religious, historical or archaeological interest and for information on the number of copies of newspapers circulated in the village, and the number of motorcycles/scooters, cars/jeeps and tractors available in the village.

All the above particulars are based on the data received from the concerned departments like Education, Medical, Postal and Electricity and also from the Tahsildars concerned,

In the Appendix to the village directory taluk level totals of the amenities have been furnished which gives the picture for the district as a whole. At the 1981 Census, additional items viz., total population and number of households and approach to village have been introduced. Information on population and number of households will be useful as ready reference for analysing the data.

Item on communications has been singled out to spell in terms of availability of the public transport system. This is intended to see whether the village is served by any mode of transport such as bus or rail or waterway. It is against this back ground that the item on approach to village has been listed separately. This refers to road, etc., leading to the village and is to indicate whether the village is approachable both in fair and foul weather and whether it is inaccessible for all time or only some time in the year. Adult literacy class/centre under item on 'Education' and primary health centre and community health worker under item 'Medical' of village directory are included to indicate statistics on the Minimum Needs Programme of the Planning Commission.

Scope of Town Directory: There are seven statements in the Town Directory which include several particulars relating to the towns arranged as per the alphabetical order of their names. These statements are almost similar to those adopted at 1971 Census except for a few additional columns. The titles of the statements are as follows:

Statement	I	:	Status and growth history
Statement	II	:	Physical aspects and location of towns, 1979.
Statement	III	:	Municipal Finance, 1978-79.
Statement	IV	:	Civic and other amenities, 1979.
Statement	IVA	:	Civic and other amenities in notified slums, 1979.
Statement	V	:	Medical, Educational, Recreational and cultural facilities, 1979.
Statement	VI	:	Trade, Commerce, Industry and Banking, 1979.

With a view to facilitate analysis of data, a few new columns have been introduced. The columns-class of Town, in every statement is a significant addition. By taking the class of town into consideration the infrastructure of amenities and facilities available in urban areas can best be analysed. The addition of civic Administrative Status in Statements III and IV and population in Statement IV & V also serve the same purpose. The formats of Town Directory have been devised to suit the Minimum Needs Programme of the Planning Commission. As a sequel to this Programme the columns, Scheduled castes and Scheduled Tribes population in statement IV and Adult Literacy classes/Centres in statement V are identical.

In case such of the amenity as fire fighting service in statement IV, the Educational facility in statement V is not available in the town, the name of the nearest place if in the same district or the name of the nerest district if in the same state or other state where available along with its distance from the referrent town has been given. This is a new feature of 1981 Census as it is necessary to identify the areas that have no specific facility in the district.

Statement VII i.e, population by religion and scheduled castes/scheduled tribes in towns of 1971 Census was discontinued at the 1981 Census and a new statement IVA has been introduced to explore

the possibility of civic and other amenities available in notified slums in class I and II towns only.

The following ten places form part of urban in Vishakhapatnam district at the 1981 Census.

1	Anakapalle	6	Narasapatnam
2	Bheemunipatnam	7	Payakaraopet
3	Chodavaram	8	Upper Sileru Project Site Camp,
4	Gopalapatnam	9	Vishakhapatnam
5	Madugula	10	Yellamanchili

Of these Vishakhapatnam is Municipal Corporation. Anakapalle and Bheemunipatnam are Municipalities. All others except Upper Sileru Project Site Camp are panchayat towns. Upper Sileru Project Site Camp is a town clsssified for Census purpose and is a Census town and its civic status has not yet been determined.

Of these ten towns five towns namely Anakapalle, Bheemunipatnam, Narasapatnam, Vishakhapatnam and Yellamanchili have attained urban status in 1901 and continued to be towns through out the successive Censuses. Madugula and Chodavaram were classified as towns in 1911 and 1921 respectively. The remaining three towns viz., Gopalapatnam, Payakaraopet and Upper Sileru Project Site Camp were declared as towns from 1971 Census.

Vishakhapatnam Urban Agglomeration : It may not be realistic to treat well recognised and fairly large areas laying out side the statutory limits of a town as rural area and at the same time each such individual area by itself may satisfy the minimum population limits to qualify to be treated as an independent town. Such areas deserve to be regarded along with the main town and continuous spread including such urban outgrowth would deserve to be considered as an integrated urban area such continuous urban spreads at the 1971 census were treated as an integrated urban areas and defined as urban agglomeration.

The concept of urban agglomeration which was introduced at the 1971 Census and followed in the 1981 Census also, is explained below in detail.

Concept of Urban Agglomeration : The urban agglomeration can be constituted in the following situation.

1. A city with continuous outgrowth (The part of outgrowth being out of the statutory limits but falling within the boundaries of the adjoining village or villages)

2. One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (1) above.

3. A city and one or more adjoining towns with their outgrowths, all forming a continuous spread.

Vishakhapatnam urban agglomeration with its Constituent units as formed during the 1981 Census is illustrated below,

Vishakhapatnam Urban Agglomeration:

a) Vishakhapatnam Municipal Corporation

b) Gajuvaka outgrowth to Vishakhapatnam (M. C)

c) Gopalapatnam (P)

The Standard Urban Area (S.U.A.) : The standard urban area is an area which extends well beyond the main core city or town and contains all likely developments over the next 30 years. It will be a statistical reporting unit for the next three successive Censuses irrespective of the jurisdictional changes of the local administrative units within the tract. Thus the concept of the Standard Urban Area was evolved in 1971 Census and was defined as the projected growth area of a city or town as it would be in another three decades taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. The standard urban area will be identified by the administrative units that it surrounds namely the city, the town, the village. The boundary of the standard urban area remains terminus with the administrative boundaries of the pheripheral units.

In demarcating these units the following measurements were conventionally followed.

a) A core town with a population of 50,000 and above

b) Predominent urban land use.

c) Intensive inter-action with the urban centres as reflected in Commutation for purposes

of work and secondary educational facilities, extension of city bus service, sale of commodities (other than those transported by rail or truck) and purchase of food grains, cloth and general provisions, etc., by the consumers directly.

d) Anticipated urban growth as a result of locational decisions relating to industry, transport and communications, market, administrative and servicing functions.

e) Existence of villages with a large proportion of working force engaged in non-agricultural industrial categories.

As it is clear from the definition of the concept, a Standard Urban Area is a potential areal spread. The constituent units within the S.U.A. tract over the period of 1971-81 are supposed to have undergone changes, both physical and demographic. The nature of identifiable changes at the 1981 census are indicated below.

a) Annexation of village (s) wholly/partly from within the S. U. A. to one of the urban components.

b) Merger of outgrowth (s) /any other urban component with another urban components.

c) Formation of new town (s) /outgrowth (s) in 1981 Census from among the rural components of the S.U.A. of 1971.

d) Declassification of Constituent town (s)/ outgrowth (s)

e) De-urbanisation of a portion of Town.

Anakapalle and Vishakhapatnam are the two Standard Urban Areas in the district. The Constituent Units of each of these Standard Urban Areas are given below:—

Constituent Units

Standard Urban Area	Urban	Rural
1	2	3
1 Anakapalle	1 Anakapalle (M)	1 Thummapala
		2 Kasimkota
		3 Pishinikada
		4 Vummulada
2 Vishakhapatnam	1 Vishakhapatnam (M.C.)	1 Vepagunta
		2 Adivivaram

Constituent Units *(Concld.)*

Standard Urban Area	Urban	Rural
1	2	3
	i) Gajuvaka O.G.	3 Yendada
		4 Chinna Gadila
		5 Venkatapuram
		6 Fakeer tekya
	2 Gopalapatnam (P)	7 Nathayyapalem
		8 Thungalam
		9 Venkatapathi-rajupeta
		10 Akkireddipalem
		11 Mindi
		12 Yarada
		13 Chinna Gantyada
		14 Thokada
		15 Vadlapudi

Vishakhapatnam and Anakapalle are the class I and II towns with a population of 100,000 and above and 50,000–99,999 respectively in the district. Bheemunipatnam, Chodavaram and Narasapatnam are class III towns with a population ranging from 20,000 to 49,999. Gopalapatnam, Payakaraopet and Yellamanchili are categorised as class IV towns while Madugula and Upper Sileru Project Site Camp, are class V and VI towns respectively.

The urban population of the district is 805,961 out of a total population of 2,576,474 persons, constituting 31.28% of the population of the district as against 25% of urban at 1971.

Statement I:—Status and Growth History: This statement provides basic information on Civic Status, population with decadal growth rate from 1901 to 1981, density for 1981 Census and sex ratio from 1961 to 1981 Censuses of each town in columns 1 to 19.

In this as well as in all other Town directory statements columns 1 & 2 relate to serial number and class, name and civic administrative status of the town, Class of town has been introduced to facilitate analysis of Town directory data at the state and all India levels. This is presented according to 1981 population of the core town as per the population size classification.

Population	Class
100,000 and above	I
50,000–99,999	II

20,000–49,999	III
10,000–19,999	IV
5,000–9,999	V
Below–5,000	VI

The Civic Administrative Status of the town is indicated in brackets by abbreviated letters like M. C. (Municipal Corporation), M (Municipality), P (Panchayat) etc. The location code number under col. 3 for the town was framed to follow the alphabetical order of the towns in the district. This also facilitate easy location of the town in the map. The name of taluk where the town is located is given to facilitate analysis of data at state and all India levels. Area in sq. kms. and number of households including houseless house holds for each town are included in the town directory for first time at 1981 Census. The population of the town with decadal growth rate from 1901 to 1981 Censuses is given in columns 7 to 15. The percentage growth rate is indicated below the population in brackets. Density for 1981 is a new column (col. 16) introduced to facilitate analysis of town directory data. It has been calculated taking into account the area and the population of 1981 Census of the town and presented per sq. km. Sex-ratio from 1961 to 1981 Censuses has been given in columns. 17 to 19. This is also a new addition to facilitate analysis of Town directory data Sex-ratio defined here is number of females per 1,000 males.

There was no decline in the population of Anakapalle town between 1901 and 1981 except in the decade 1911-21 where there was a slight decrease in its population. The growth of Bheemunipatnam town's population was tardy generally except during the decades 1921-31, 1961-71 and 1971-81. Actually the population recorded decline during 1901–11, 1911-21 and 1951–61. The 1981 census population of the town is 34,619 persons registering a rise of 142.24 per cent over the previous decade. Chodavaram has recorded a steady rise in its population growth since it was declared as a town in 1921 Census. Madugula did not indicate any commendable rise or steep fall in its population growth during the last seven decades. Inspite of being an out-let for the forest produce coming from the Paderu Agency tract, the township has not become a flourishing trading and commercial centre. Narasapatnam has registered small increase in its population growth till the 1951 Census. Due to canal construction works taken up in the nearby areas, a section of the town's population, mostly labour classes, were reported to have left the town during the decade 1961-71. As a result of this emmigration, the town has registered a fall of 23.50% in its population at the 1971 Census. Narasapatnam serves as the main gateway of the forest produce coming from the Sileru and Chintapalle forest belts to the plains areas of the district. Payakaraopet has recorded an increase of 44.65% in its population over the 1971 Census while Upper Sileru Project Site Camp has shown a slight fall of 2.43% in its population at the 1981 Census. Vishakhapatnam, the head quarters of the district, has attained class I status in 1951 Census. At the 1981 Census, the city has recorded a population of 584,166 persons which shows an increase of 64.53% over the population of 1971 Census. Apart from the very large industrial establishments like the ship building yard, the Dockyard, the Coromandel Fertilizers, the Bharat Heavy Plates and Vessels limited, scores of ancillary industries have come up to cater the needs of the large industries, further a Zinc smelter plant and a gigantic steel factory are also set up recently. Besides the industrial importance, the city had been an important educational centre for a long time. It has been the seat of Andhra University since its inception except for its temporary shifting for about two years to Machilipatnam during the second world war period. There are a number of other educational institutions in the city. All these factors have contributed to the rapid growth of population of the city. Gopalapatnam which lies on the fringe of Vishakhapatnam city has recorded a rapid growth of 131.11% in its population over 1971 Census.

Of the 10 towns in the district, Vishakhapatnam the district headquarters town has the largest area of 81.98 sq kms. Next to it comes Anakapalle with an area of 23.28 sq. kms. The third important town as far as area is concerned is Madugula panchayat with an area of 19.52 sq. kms.

Vishakhapatnam the district headquarters town with an area of 81.98 sq. kms. records the highest density of 7,126 persons per sq. km. as against the district average density of 231 persons per sq. km.

Statement II Physical Aspects and location of towns, 1979: This statement has 12 columns and depicts physical aspects and location of towns in the district. Under cols. 3 to 5 in the statement data relating to rainfall and the maximum and minimum temperature recorded in 1971 Census were given.

If this information was not available for any town then the particulars available for that nearest town have been given against such town.

Bheemunipatnam town has recorded the minimum rainfall of 951.5 mm. while the Narasapatnam and Upper Sileru Project Site Camp have recorded the maximum of 1128.2 mm. Except Bheemunipatnam and Payakaraopet towns all other towns in the district recorded the Maximum temperature around 40°C.

Of the ten towns in the district three towns are directly connected by Railway line. The remaining 7 towns have this facility-two towns at different distance ranges viz., at a distance of 1-2 kms. four at a distance range of 18–38 kms. and one town viz., Upper Sileru Project Site Camp is at a distance of 120 kms.

All the towns in the district have APSRTC bus communication facility along with private transport organisations facilities. But it was not served with any navigable river facility.

The district is blessed with natural harbour at Vishakhapatnam which was developed into a major seaport in India and place the city on the map of international seaways.

Statement III Municipal Finance, 1978-79 : The data for inclusion in this statement was obtained from the respective statutory and non-statutory bodies from their budgets and accounts.

The statement shows except Vishakhapatnam M.C. no town has an excess of expenditure over income. In Bheemunipatnam and Madugula towns more than 27% of the total receipt is spent on General Administration. Narasapatnam and Yellamanchili towns utilised more than 37% of the total receipt for the purpose of public health and conveniences. For public institutions like schools and Libraries except four towns viz., Anakapalle, Bheemunipatnam, Payakaraopet and Gopalapatnam the rest have not spent anything from their incomes.

Statement IV Civic and other Amenities. 1979. As the title itself reveals, this statement deals with the facilities provided to the people in urban areas of the district.

It may be seen that all the ten towns are having open surface drains. The most striking feature is that majority of the towns have the excess of service latrines over the water borne latrines. Anakapalle, Upper Sileru Project Site Camp and Vishakhapatnam have fully protected water supply through taps. The people in the remaining towns partly depend on tap, well and tanks for their drinking and domestic purposes. Fire fighting service is available only in Anakapalle, Vishakhapatnam towns.

All the ten towns have electric supply for all purposes such as domestic, industrial, commercial and road lighting.

In Andhra Pradesh, domestic service includes supply of energy for lighting, fans and domestic purposes in domestic premises, and supply in poultry farming units upto 100 birds. Industrial service means supply for purposes of manufacturing, processing and/or preserving goods for sale, rice mills, oil mills, flour mills, ginning mills,decorticating mills, dal and grain mills, stone crushers, water works and severage pumping stations operated by local authorities or Government Departments or Co-op house building societies and pump sets of Railways for whatever purpose they may be used. Commercial service includes the supply of energy for lights, fans for non-domestic and commercial purposes. Road lighting service includes supply of energy for lighting on public roads, streets, thorough fares including parks, markets, cart stands, bridges and for traffic signalling. Supply of energy to places of worship like churches, temples, mosques, gurudwaras, educational institutions, student hostels, municipal guest houses, T.B's, Circuit houses of the Government Charitable institutions and recognised service/ institutions are included in "Others".

Vishakhapatnam Municipal Corporation has highest number of connections in all categories followed by Anakapalle municipality. Upper Sileru Project Site Camp and Madugula towns have only 3 and 5 industrial connections respectively.

Statement-IV A Civic and other Amenities in notified slums, 1979: This is a new statement on civic and other amenities provided to the people living in notified or recognised slums in class I and II towns. Since the magnitude of slum is greater in respect of class I and II towns presentation of data on slums is limited to class I and II towns only. Vishakhapatnam district has only one town in each class viz., Vishakhapatnam class I and Anakapalle Class II.

Statement-V Medical, Educational, Recreational and cultural facilities in towns, 1979 : In this statement, the magnitude of facilites on medical, educational, recreational and cultural aspects with reference to population of 1981 has been detailed in respect of the various towns in the district. All the towns in the district have hospitals except Payakaraopet and Gopalapatnam towns. There are only 70 medical institutions which include Government Hospitals, dispensaries, Nursing Homes and Maternity and Child welfare centres together with a total bed strength of 2,347 catering to the medical needs of a total urban population of 805,961 persons. Institutions covering all systems of medicine have been included in the statement.

Vishakhapatnam the district headquarters town has more than 80% of the district bed strength whereas Payakaraopet and Gopalapatnam towns have nil bed strength in their medical institutions.

The main branches of professional education in which the district affords facilities are the Teacher-Training, Medicine, Law, Engineering, Technology and polytechnic, are available only in Vishakhapatnam city.

There are 10 degree colleges-one in Anakapalle town, and the remaining in the Vishakhapatnam city, and 13 Junior colleges or Higher Secondary schools, 41 secondary or high schools, 63 Junior secondary or upper primary schools and 170 primary schools in all the towns put together in the district.

A different method has been adopted in presenting the number of educational institutions. Composite schools like middle school with primary classes or secondary schools with middle classes have been included in the number of primary and middle schools respectively. For example, if in a town there are two primary schools upto say class IV and one high school from class I to X, the number of primary schools in the town is given as three and that of middle school as one and secondary school as one even though there are physically only three educational institutions. Again a composite school having classes upto class XII has been divided as shown below.

Class I to IV	:	Primary
Class V to VIII	:	Middle
Class IX to X	:	Secondary
Class XI to XII	:	Higher Secondary

Thus the number of educational institutions physically existing within a town have not been presented but has been presented by the grouping of the classes in the institutions and treating each group as a school of its kind. This grouping holds true irrespective of educational institutions they belong to. For instance, the grouping marked as Higher secondary i.e. Class XI and XII may physically belong to a college but for the purpose of town directory these two classes put together constitute one unit of a higer secondary school and the rest of the college has been treated as a college.

There are only two stadia in the district at Vishakhapatnam city. There are 45 cinema halls and 26 public libraries including reading rooms in all the towns in the district. There are 21 community halls in the district. One at Bheemunipatnam, two each at payakaraopet, and yellamanchili, four each at Anakapalle and Gopalapatnam and eight at Vishakhapatnam.

Statement-VI Trade, Commerce, Industry and Banking 1979 : Vishakhapatnam district is noted for its rich forest produce and mineral resources like manganese, iron-ore, graphite, limestone, phosphate and micaclay. The district is also blessed with a major seport and big industries like. Hindustan ship Building yard, Bharath Heavy Plate and vessels, Coromandal Fertilisers, Andhra Steel and Indian Oxygen.

The district is served by a net work of 90 banks of which 58 are located in Vishakhapatnam city, 12 are in Anakapalle, 4 each in Chodavaram and Yellamanchili, 3 each in Bheemunipatnam and Narasapatnam 2 each in Madugula and Gopalapatnam and one each in Payakaraopet and Upper Sileru project site camp.

Only 8 agricultural credit societies and 89 non-agricultural Credit societies are serving the total urban population of the district.

PRIMARY CENSUS ABSTRACT

The Primary Census Abstract provides the most important statistics relating to residential houses, households and population and its characteristics down to the village/ward levels in rural/urban areas respectively. Till the 1971 Census, Primary Census Abstract and some other tables were generated by breaking the individual slip pads and sorting them manually. As a distinct departure from this procedure, the system of 1981 Census tabulation avoided breaking of the pads and manual sorting of the individual slips. The data on Primary Census Abstract were obtained by compilation of data available in Part-II of the Household Schedule, namely Population Record.

Primary Census Abstract of 1981 Census has been presented on the following aspects for each revenue village in respect of rural areas and for each ward/locality/block of a town in urban area.

1. Location Code number and name of village/ town and areas.
2. Total number of occupied residential houses and total number of households.
3. Total population and its sex breakup.
4. Population of Scheduled Castes and Scheduled Tribes by sex breakup.
5. Literate persons by sex.
6. Total main workers (I to IX categories) and the breakup of the workers into four broad categories viz,.

Category I : Cultivators
Category II : Agricultural Labourers
Category V (a) : Household Industry
Category III . Other Workers
IV, V(b) &
VI to IX

The column 'Marginal Workers' is an addition to the Primary Census Abstract in 1981 Census and was not there in the previous censuses. The marginal worker is defined as a person who has worked in any economic activity for less than 183 days or 6 months in a year. Thus he would be basically classified as a non-worker for the major part of the year.

While presenting the data in the Primary Census Abstract, villages and towns have been arranged in the ascending order of their L.C. Nos. The wards in each town have also been arranged similarly. The uninhabited villages and villages fully included in a town have been indicated accordingly in the rural Primary Census Abstract. In case of villages which are partly included in towns the word 'Rural' has been added in brackets after the name of village and the particulars relating to the rural portion only have been presented against such villages. An alphabetical list of villages together with their respective L. C. Numbers is given at the beginning of each taluk, which helps the reader to locate village for which data on the Primary Census Abstract are required.

The basic characteristics of such of those persons who were alive at the sunrise on 1st March, 1981 irrespective of whether they lived in normal residential houses or huts or institutions like hospitals, hostels, asylums, boarding houses, hotels, etc. or houseless persons like the wandering tribes, pavement dwellers have been presented in 28 columns of the Primary Census Abstract.

As per the 1981 Census count the population of Vishakhapatnam district is as follows:

	Persons	Males	Females
Total	2,576,474	1,300,676	1,275,798
Rural	1,770,513	887,231	883,282
Urban	805,961	413,445	392,516

Col. No. 1 & 2 indicate L. C. No. and name of village/town/ward. Location Code is a device by which every village or town in a taluk of every district in a State is identified by a combination of numbers. Districts in the State are serially numbered in a clockwise direction starting from Srikakulam district and ending with Nalgonda district. In this process Vishakhapatnam district was allotted L. C. No. 3. Likewise the taluks in each district were given numbers serially in a clockwise order and the villages in each taluk were assigned serial numbers in serpentine order. Unlike the districts, taluks and villages, the towns in each district were given numbers in alphabetical order. L.C. Nos. of villages were given in Arabic numerals while those of towns were given in Roman numerals.

Col. 3. This column shows the area of villages in hectares while the area of town is given in Sq. Kms. based on the information furnished by the respective State agencies. Where the area of a particular village/town was not available, the fact was noted as N.A. against that village/town. The area of all the villages and towns put together may not be equal to the area of the taluk since the area of the taluk includes area of villages, reserve forests, rivers and hills within the taluk. Rural area of a taluk presented in P.C.A. is obtained by deducting urban area from the total area of the taluk as furnished by the State Survey Department. Similarly, the rural area of a district can be obtained by deducting the total urban area of all the towns from the total area of the district. The area figures of the districts in the state are those supplied by the Surveyor General of India. Hence the total area of all the taluks in a district put together may not tally with the district area figures.

Col. 4: Number of occupied residential houses in a village/town includes partly residential houses also.

Col. 5. This column includes houseless households and institutional households as well.

Col. 6 to 8: Total population includes houseless and institutional population with sex break up.

Cols. 9 to 12: Under these columns the population of S.Cs. and S.Ts. by sex is given. A copy of the list of S.Cs. and S.Ts. in Andhra Pradesh as notified in Presidential Order No. BC 12016/34/76-SCT V dated 27-7-1977 is given below.

List of Scheduled Castes in Andhra Pradesh

1 Adi Andhra

27 Rona, Rena
28 Savaras, Kapu Savaras, Maliya Savaras, Khutto Savaras
29 Sugalis, Lambadis
30 Thoti (in Adilabad, Hyderabad, Rangareddi, Karimnagar, Khammam, Mahbubnagar, Medak, Nalgonda, Nizamabad and Warangal Districts)
31 Valmiki (in the Agency tracts)
32 Yenadis
33 Yerukulas

Cols. 13 & 14 : Literate persons are shown under these columns. A person who can both read and write with understanding in any language is taken as literate. A person who can merely read but cannot write is not a literate. All children of the age of 4 years or less are treated as illiterate even if the child is going to school and may have picked up reading and writing a few odd words.

Cols 15 to 28 : At the 1981 Census, population has been broadly divided into three sections based on main activity viz., workers, marginal workers, and non-workers. Their details are shown under these columns.

The definitions and concepts adopted in the economic classification of population at the 1981 Census are given under census concepts.

Work : Work is defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. A man or a woman who is doing only household duties or making something only for domestic consumption (and not for sale) is not doing any work in census terminology. The reference period is the one year preceding the date of enumeration. Persons who had worked for 183 days or more, in other words worked 6 months or more are classified under cultivator, agricultural labourer, household industry and other workers according to the nature of work one did. Such of those persons who had worked for less than 183 days or 6 months are shown as marginal workers.

Cultivator : For purposes of census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

Agricultural labourer : A person who works in another person's land for wages in money, kind or share is regarded as agricultural labourer. An agricultural labourer has no right of lease or contract on land on which he/she worked.

Household Industry : Household industry is defined as an industry conducted by the head of the household himself/herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The large proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of registered factory which would qualify or has to be registered under the Indian Factories Act.

Other Workers : All workers who are not cultivators or agricultural labourers or in household industry are other workers. The type of workers that come under this category include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, lawyers, barbers, dhobis, etc.

The total number of persons returned at the 1981 Census in Vishakhapatnam district is 2,576,474 as against 2,035,831* in 1971 Census, thus recording an increase of 26.56% as against the State's growth rate of 23.10%. The proportions of rural and urban population to the total population in the district works out to 68.72% and 31.28% respectively in 1981 Census compared to 74.58% and 25.42% in 1971. There are 949 females per every 1,000 males at the 1981 Census when compared with the state index of 975 females per 1,000 males.

Vishakhapatnam district returned 716,913 literates at 1981 Census forming 27.83% of the total population of the district. The sex breakup of literacy rates during 1981 Census is 36.49% among males and 18.99% among females. Rural-Urban breakup of literacy rates indicate 16.31% of population are literates in rural while this is 53.12% in urban population.

In Vishakhapatnam district there are 1,010,013 workers constituting 39.20% of the total population. Among males the workers constituted 56.66% while among females only 21.41% are workers. The decrease in the working population is due to the definition of workers adopted in 1981 Census.

*Adjusted to the present jurisdiction of district.

The Brief Analysis of the Village & Town Directory and Primary Census Abstract Data

There are 4,258 villages in the district at the 1981 Census as against 4,931 at 1971,* Out of the 4,258 villages, 3,692 are inhabited while 566 villages are uninhabited. Two inhabited villages reported as partly included in different towns of the district. 41 villages which are included in urban areas are not taken into account while arriving the total number of villages in the district. The following table gives the population of taluks by total/rural/urban with sex break-up. The number of villages and towns in each of the taluks is also indicated in this table.

Vishakhapatnam taluk has more urban population than other taluks, while Chintapalle taluk has the least urban population as per 1981 Census. Five taluks are exclusively returned as rural taluks

Table 1

* Note : L.C. No. 237 Kuridi in Araku taluk is deleted since it is retained in Srungavarapukota taluk of Vizianagaram district.

This table compares the taluk-wise population from 1971 and 1981 Censuses for total, rural and urban areas. Vishakhapatnam taluk has recorded the highest growth rate of 64-78% during the decade 1971-81, while Madugula taluk has recorded the lowest growth rate of 7.41%.

Out of 4,931 villages at 1971 Census 552 villages were transferred to Vizianagaram district. 113 villages became hamlets, 56 villages not covered in 1981 and 41 villages fully included in their respective urban areas. 89 villages are newly sprung up during the decade. Thus it comes to 4,258 villages at 1981.

Table 2

Table 3 shows the total number of inhabited villages in the district classified by population into six broad ranges. In computing the number of villages in a taluk, the villages which are either completely included in an urban unit or returned uninhabited are not taken into account. Maximum number of villages are in the size group of less than 200 population and form 68.12% of total villages in this district which is due to return of large number of agency villages with less than 200 population in the three agency taluks viz., Chintapalle, Paderu and Araku.

Table 3

DISTRIBUTION OF VILLAGES BY POPULATION RANGES

Range of Population	No. of villages in each range	Percentage of villages in each range
1	2	3
— 199	2,515	68.12
200— 499	419	11.35
500—1,999	506	13.71
2,000—4,999	215	5.82
5,000—9,999	32	0.87
10,000+	5	0.14
Total	**3,692**	**100.00**

The following table presents the distribution of villages by density into the nine ranges and also the percentage of villages in each range. The density figures per Sq. km. of each village have been worked out by using the area figures corrected upto two places of decimal. The highest proportion of villages is observed in the range of density not known which is due to the large number of unsurveyed villages in the agency areas of Chintapalle, Paderu and Araku taluks in the district. More than 73% of villages come under density group of 101 and above. This district has returned a density of 231 persons per sq. km. as against 195 persons for the State.

Table 4

DISTRIBUTION OF VILLAGES BY DENSITY

Range of density (per sq. km)	Total No. of villages in each density range	Percentage of villages in each density range
1	2	3
—10	48	1 30

Range of density (per sq. km)	Total No. of villages in each density range	Percentage of villages in each density range
1	2	3
501+	411	11.13
Area not known	816	22.10
Total	**3,692**	**100.00**

According to 1981 Census the population of Scheduled Castes in Vishakhapatnam district is 202, 343 accounting for 7.85% of the total population of the district. Scheduled Caste population in this district forms 2.54% of the total Scheduled Caste population in the State. The proportion of Scheduled Caste population to total population in the villages is calculated for all the villages in the district and arranged in seven ranges together with percentage of villages in each range. Only 6.37% of the villages have Scheduled Caste population in a percentage range above 11. Large number of villages forming 74.78% of the total villages are without Scheduled Caste population.

Table 5

PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Castes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
Nil	2,761	74.78
5 or less	424	11.48
6—10	272	7.37
11—15	118	3.20
16—20	45	1.22
21—30	46	1.25
31 and above	26	0.70
Total	**3,692**	**100.00**

The Scheduled Tribes population in the district is 354,127 persons forming 13.74% of the total population of the district. 20.05% of the total villages in the district have returned the proportion of Scheduled Tribe population less than 5% range, which include 15.17% of the total number of villages which have no Scheduled Tribe population. Among the taluks, highest proportion of Scheduled Tribe population is returned in Paderu taluk accounting for 93.01% of the total Scheduled Tribe population in the district.

Table 6

PROPORTION OF SCHEDULED TRIBE POPULATION TO TOTAL POPULATION IN THE VILLAGES

Percentage range of Scheduled Tribe population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3

51 and above	2,852	77.25
Total	**3,692**	**100.00**

Table 7 provides the total population, scheduled castes and scheduled tribes population and the percentage of scheduled caste and scheduled tribe population to total population of the towns in the district.

The total scheduled castes population in all the urban areas of the district at 1981 census was 77,253 persons representing 9.59% of the total urban population. Among the towns, proportions of scheduled castes population varies from 5.19% in Madugula town to 20.78% in Payakaraopet panchayat town.

The scheduled tribes population in urban areas of the district according to 1981 census was 4,192 persons constituting 0.52% of the total urban population. The proportions of scheduled tribes population varies from 0.13% in Bheemunipatnam and Gopalapatnam towns to 14.26% in Upper Sileru Project Site Camp.

Table 7

PROPORTION OF SCHEDULED CASTES/SCHEDULED TRIBES POPULATION IN TOWNS

The following Table 8 gives the literacy rates by population ranges of villages in the District. Vishakhapatnam occupies 8th rank in literacy amongst the districts in Andhra Pradesh State. The proportion of literates of this district constitutes 4.47% of the total Andhra Pradesh literates.

Highest literacy rate of 25.94% is found in Villages with 10,000+ population.

Table 8

LITERACY RATES BY POPULATION RANGES OF VILLAGES

Range of Population	No. of villages in each range	Literacy rate
1	2	3
—199	814	3.02
200—499	373	9.77
500—1,999	506	15.39
2,000—4,999	215	18.42
5,000—9,999	32	25.67
10,000+	5	25.94
Total	**1,945**	**16.31**

Table 9 shows the literacy rates for the towns in the district as per 1981 census.

The literates in all the 10 urban areas in the district together constitute 428,087 persons forming 53.12% of the urban population. Among the towns, the literacy rate varies from 37.95% in Madugula town to 55.98% in Vishakhapatnam city. Being the district headquarters and the location of several district administrative offices and educational institutions Vishakhapatnam city tops the list in proportions of literates.

Table 9

LITERACY RATES FOR TOWNS

Name of the Town	Literacy Rate
1	2
Anakapalle	48.81
Bheemunipatnam	39.44
Chodavaram	45.42
Gopalapatnam	See Vishakhapatnam Urban Agglomeration.

Vishakhapatnam Urban Agglomeration	55.96
a) Vishakhapatnam	55.98
b) Gopalapatnam	55.32
Yellamanchili	44.14
All Towns	**53.12**

Table 10 presents the proportions of literates, workers, non-workers, scheduled castes/scheduled tribes population to the total population, giving break-up by taluk (total/rural/urban) and by sex. There is a highest concentration of scheduled castes and scheduled tribes population in the rural areas than in the urban areas. Vishakhapatnam district has returned 27.83% of the total population of the district as literates. Vishakhapatnam taluk has returned 50.25% of literates and this is the highest in the district. Narasapatnam taluk has returned the largest number of workers 80,716 in its rural areas accounting for 9.02% of the total workers of the district and 59.56% of the total population of the taluk. Again Narasapatnam taluk only stands first among the taluks in the district in the proportion of workers to total population. Nakkapalle taluk has returned 13.35% of scheduled caste population while the least is in Paderu taluk with 0.45%. In rural areas of taluks also these two taluks only have maintained the first and last places. The percentage of scheduled caste population in urban areas range between 5.19% to 20.71% among the taluks. Paderu taluk has recorded highest proportion of scheduled tribe population with 93.01% while Sabbavaram taluk has the least proportion of scheduled tribe population with only 0.11%.

Vishakhapatnam taluk tops the list in literacy rates among the total, male and female poulation as well as in rural and urban pockets. The literacy rates recorded for Vishakhapatnam taluk are higher than the district and state averages, in the case of both sexes.

(Table 10 Follows)

Distribution of villages according to the availability of different amenities by taluks is presented in this table. Among all the districts Vishakhapatnam district is having large number of inhabited villages. Of these villages majority are covered by agency taluks of Chintapalle, Paderu and Araku where the amenities are very meagre. As seen from the table the amenities like medical, P & T, market, communication, approach by pucca road and power supply are below 20% where as education and drinking water facilities are available to 32.34% and 95.29% of the total villages respectively. This position remains the same in further tables also.

Table 11

Table No. 12 gives the proportion of rural population served by the different amenities and also provides this information taluk-wise.

48.02 per cent of population has only medical facilities while about 20.58% of the population has access market facilities. More than 45% of the population have P & T, approach by pucca road, power supply and communication while above 86% of the population has access to education and drinking water.

Table 12

PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES

6 Communication	387	316	405	2,194	3,292

Table 13 *(Concld.)*

Table 14 illustrates the distribution of villages according to the distance from the nearest town and availability of different amenities.

1.92% of the villages have town within the range of 0–5 Kms. About 11.08 per cent of the villages have towns within a range of 6–15 Kms., while the balance i.e. 20.61% and 66.39% have nearest town located within 16-50 Kms. and 51+Kms. respectively. The pattern of distribution of amenities in the villages, associated with the location of villages around the towns in terms of distance do not indicate any significant deviation from each other. As given in other tables on amenities, all the facilities except drinking water and to some extent education are far below i.e. 20%

Table 14

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES

Distance range from the nearest town (in Kms.)	No. of inhabited villages in each range and percentage to total	Number (with percentage) of villages having the amenity of

	100.00	**32.34**	**10.62**	**95.29**	**16.52**	**4.88**	**10.83**	**18.26**	**15.17**

Table 15 sets out the amenities available in the villages by distributing the villages according to the population range. The population ranges of less than 500, 500–1,999, 2,000-4,999 and 5,000+ are considered and the villages are distributed in these ranges. About 13.71% of the villages are in the range of of 500–1,999, while the villages less than 500 and those in the range of 2,000–4,999 form 79.47% and 5.82% respectively. Only 1.00% of the villages are in the category of 5,000+. It is interesting to note that as the population range increases, the amenities available in the villages falling in these ranges are also on the increase. As has been observed earlier not only the medical and market facilities but also the other facilities like education, P & T and communication etc., are not adequate in the villages of the district.

Table 15

Table 17 presents the land use pattern giving the proportion of cultivable area to the total area and the irrigated area to the cultivable area. It is seen from the table that 53.06% of the total area is accounted for as cultivable area of the district. Of the total cultivable area of 348,216.59 hectares 107124.91 hectares forming 30.76% is only tenable. Madugula taluk has the largest percentage of cultivable area of 71.79% while the irrigated area is about 37.24% of cultivable area. Vishakhapatnam taluk has the least proportion of cultivable area (of 31.45%) as well as irrigated area. Among the taluks in the district K. Kotapadu taluk has the highest percentage of 43.34 irrigated area to total cultivable area of the taluk.

Table 17

The following table indicates the towns added/ declassified at the 1981 Census with their population.

There is no case of addition or declassification of town at the 1981 Census in this district.

Table 19

NEW TOWNS/TOWNS DECLASSIFIED IN 1981 CENSUS

Name of Towns		Population 1981 Census
1		2
a) Added	Nil	—
b) Declassified	Nil	—

Table 20 deals with the finances indicating the receipt and expenditure of towns in the district as on 1979.

Of the ten urban areas in the district, the highest per capita receipt is noticed in Anakapalle Municipality (Rs. 115.53) followed by Vishakhapatnam Municipal Corporation (Rs. 78.18) and Bheemunipatnam Municipality (Rs. 65.80) takes the third rank. The lowest per capita receipt is recorded in Madugula panchayat town (Rs. 15.16), Receipts through taxes is highest in Vishakhapatnam Municipal Corporation (Rs. 51.31) while this is lowest in Payakaraopet panchayat town (Rs. 3.52). From all other sources together, the highest par capita receipt is seen in Anakapalle Municipality (Rs. 94.23) followed by Bheemunipatnam Municipality (Rs. 45.70) and Payakaracpet town (Rs. 37.94) while the lowest per capita receipt is recorded by Chodavaram panchayat town (Rs. 4.87).

Anakapalle Municipality stands first among the urban areas of the district with its per capita expenditure of (Rs. 96.02) followed by Vishkahapatnam city (Rs. 88.22) and Bheemunipatnam Municipality (Rs. 41.35). Gopalapatnam town ranks last in per capita total expenditure (Rs. 13.75). The per capita expenditure of (Rs. 21.29) on General administration in Bheemunipatnam is the highest among the towns while Vishakhapatnam city has the minimum of Rs. 0.02. The highest per capita expenditure of Rs. 25.72 on public institutions like schools and libraries is recorded by Anakapalle town followed by Bheemunipatnam (Rs. 6.48), Gopalapatnam (Rs. 0.04) and Payakaraopet panchayat (Rs. 0.01). No expenditure is incurred by Chodavaram, Madugula, Narasapatnam, Vishakhapatnam and Yellamanchili towns for this purpose.

All the civic bodies are running on sound lines with surplus budget except Vishakhapatnam town which is functioning with deficit budget. Anakapalle, Bheemunipatnam and Payakaraopet are having considerably more per capita receipt than per capita expenditure.

Table 20

The following table 21 provides the data relating to the availability of educational facilities in different categories per 10,000 population. It may perhaps be mentioned here that data presented in the following table refer generally to the institutions that have been recognised by the State Government and are authorised to teach the students for appearing at the different grades of examinations conducted by the concerned examination boards periodically.

There are 170 primary schools, 63 upper primary schools, 41 high schools and 13 Junior Colleges in all the urban areas of the district.

Table 21

Total	**0.16**	**0.51**	**0.78**	**2.11**

From the table 22 it can be seen that the number of beds available in urban areas of this district is very low being 2.91 beds per ever 1,000 population. More than 80% of the total bed strength in the urban areas of the district is concentrated in Vishakhapatnam city, the district headquarters. The bed population ratio is highest in Madugula towr where there are 11-64 beds per 1,000 population. Chodavaram and Vishakhapatnam towns have recorded the bed-population ratio more than the district average. All other towns have this ratio less than the district index.

Physically Handicapped Persons

Collection of data on physically handicapped persons is a special feature of 1981 Census. Last time this information was collected in 1931 Census. After the independence, the data for the physically handicapped persons in our country were collected again for the first time along with the houselisting operations held in May, 1980 and as such, the physically handicapped persons who were available in the census houses were alone covered in the survey. The houseless do not, therefore, find a place in this survey. The physically handicapped persons covered are of three types of disabilities, totally blind, totally crippled and totally dumb. The definition adopted for physically handicapped is as follows.

"The term of totally crippled refers to such persons who have lost their arms or limbs. The loss of arms or legs or all the four limbs refers to loss of both the arms or loss of both legs. It is not necessary that the disabled should have lost both arms and legs. The loss of either of these i.e., both arms or both legs would be sufficient for classification as totally crippled. Loss of only one arm and/or one leg will not classify a person as totally crippled. The loss here refers to the inability to use and not necessarily physical absence. Thus, a paralytic who has lost the use of both the legs or both the arms, will be totally crippled, though the legs or arms as such are still physically present".

In case when a person unfortunately suffered from more than one of the disabilities mentioned above, the person was recorded by the greater disability. For example, if a person was both blind and dumb or blind and crippled, etc., blindness was noted for him as blindness is considered as greater disability than either dumbness or being crippled. Similarly, being crippled was considered a greater

disability than being dumb. In an extreme case where a person suffered from all the disabilities was taken under blind since this is certainly the most unfortunate disability.

A statement showing the distribution of physically handicapped persons by taluks in Vishakhapatnam district is given below.

* Constituent units of Vishakhapatnam Urban Agglomenation.

Physically handicapped form 0.16% of the total population in the district, comprising of 0.20% of rural and 0.07% of urban population. Out of the total 4,044 persons recorded as physically handicapped, i. e., totally blind, totally crippled and torally domb in the district as many as 3,537 persons forming 87 46% are from rural areas only. Among the totally physical handicapped in the district 41.35% are totally blind, 26.48% are totally crippled and 32.17% are totally dumb. The survey revealed that Vishakhapatnam taluk has recorded the highest number of physically handicapped persons accounting for 510 persons, the lowest being Araku taluk with 117 persons.
