STATE PUBLICATIONS

DISTRICT CENSUS HAND BOOKS

A District Census Hand Book for each of the 20 Districts in Andhra Pradesh

PRINTED BY THE INTEKHAB PRESS, HYDERABAD, FOR THE DIRECTOR OF PRINTING, HYDERABAD

PREFACE

The District Census Handbook is an innovation introduced at the 1951 Census. The Handbooks are compiled by the Census Office but published by the State Government. They proved to be very popular and valuable publications in considerable demand by the public as well as the official users of the Census data. At the 1961 Census, therefore, it was decided not only to continue the publication of the District Census Handbook but to greatly improve upon its precursor of 1951.

The present District Census Handbook may be conveniently divided into four parts. The first part consists of narrative description of the physical features and history of the district, the social and economic characteristics of the people and the progress made by the district in each field of administration over the past decades. This is supplemented by a Gazetteer of places. The second part consists of administrative statistics of various departments. The third part is based mainly on the present Census returns and consists of statistical tables giving the particulars of population, sex ratio, the economic composition, literacy, language and migration data, etc. The fourth part consists of Village and Town Directory which is perhaps the vital part of the Handbook giving villagewise and townwise particulars of area, households, population, Scheduled Castes and Scheduled Tribes, literacy, broad categorisation of working population, etc. Against each village and town the educational, medical, public health and transport facilities, etc., if available, have also been indicated. At the end of the fourth part a tabular statement of fairs and festivals, information about which had been collected through the Census enumerators will also be found. The pages of each part are numbered separately. The Handbook is enriched with two district maps, one showing the administrative divisions and important communications, rivers, etc., and the names of all important places of above 5,000 population and the other showing the talukwise density of population. In the Village Directory portion of the Handbook, before the statistics of each taluk are presented, a taluk map showing the village and town boundaries with the location code numbers of each village and town marked will also be found. Thus the District Census Handbook is a self-contained and convenient book of reference about almost all matters pertaining to the district.

The Handbooks are no doubt coming rather late, a few years after completion of the Census count. This delay, if at all it can be called delay, could not be helped. The very detailed sorting of Census slips and compilation of the elaborate 1961 Census tables were time consuming; the administrative particulars for incorporation in the Handbooks had to be collected from different departments and other sources on proformae that were finalised and circulated from this office; the preparation of the excellent maps of the district and the taluks, attempted this time, also required considerable time; and lastly the printing of these voluminous reports which had to be done very carefully was a laborious process. All the same it is hoped that these Handbooks will serve as valuable sources of reference about all matters pertaining to the district and help one to assess the impact of the Five Year Plans and the progress each district had made in its social and economic well being over the decades and also serve as a guide in planning for the furture. The credit for the compilation of this Handbook goes chiefly to Shri K. M. Ahmad, I. A. S., and Shri P. S. R. Avadhany, Deputy Superintendents of Census Operations. Shri Ahmad took great pains to tour the district, contact the various officers of the district and dig out information from various sources. A compilation of this type and magnitude could have taken a much longer time but for the diligent efforts of Shri Ahmad and Shri Avadhany. The Handbook section of the Census Office under the Tabulation Officer, Shri K. Narasimha Murthy, did a commendable work in the speedy and accurate compilation of the Village Directory and the other Statistical and Administrative tables. Sarvashri G. Pandurangam, Mohiuddin Hassan and M. J. Sadiq of the Cartographic Section in my office did a magnificent work as will be evident from the quality of maps that have been produced.

A. CHANDRA SEKHAR
Superintendent of Census Operations
Andhra Pradesh

10.4	Receipts and Expenditure of Municipalities	B 58

SERIES 11-COMMUNITY DEVELOPMENT

11.1	Talukwise distribution of Community Development Blocks...	B 59
11.2	Expenditure incurred in each of the Community Development Blocks from inception upto 31-3-1961	B 60
11.3	Blockwise Physical Achievements under Community Development upto 31-3-1961	B 61-B 62

SERIES 12-IMPORTANT HISTORICAL EVENTS

12.1	Calendar of outstanding occurrences	B 63-B 64

SERIES 13-BANKS AND INSURANCE

13.1	Banks	B 65
13.2	List of Banks and their places of Business	B 65
13.3	Life Insurance Business	B 66
13.4	Achievements in National Small Savings Scheme	B 66

SERIES 14-MARKETS

14.1	List of Markets	B 67-B 68

PART C

STATISTICAL TABLES

A SERIES—GENERAL POPULATION TABLES

	Pages
Explanatory Note	C 1–C 4
TABLE A-I—Area, Houses and Population	C 5–C 6
Appendix—I to Table A-I—Statement showing the 1951 territorial units constituting the present set-up of Visakhapatnam district and taluks therein and details of net area gain or loss in the changed territories during the decade 1951-61	C 7
Annexure to *Appendix—I*—Showing the particulars of Villages involved in changes of territories included in columns 3 and 6 of *Appendix—I*	C 8–C 20
Appendix—II to Table A-I—Number of Villages with a Population of 5,000 and over	C 21
Appendix—III to Table A-I—Houseless and Institutional Population	C 22
TABLE A-II—Variation in Population during sixty years (1901-1961)	C 23
Appendix to Table A-II—Statement showing 1951 Population according to the Territorial Jurisdiction in 1951 and changes in Area and Population involved in the changes during 1951-1961	C 23
TABLE A-III—Villages Classified by Population	C 24–C 25
TABLE A-IV—Towns (And Town-Groups) Classified by Population in 1961 with variation since 1941	C 26
Appendix to Table A-IV—Statement showing the constituent Villages of each of the Towns at 1961 Census	C 27

B SERIES—ECONOMIC TABLES

Explanatory Note	C 29–C 45
TABLE B-I—Workers and Non-Workers classified by Sex and Broad Age-Groups	C 46–C 47
TABLE B-III Part A—Industrial Classification of Workers and Non-Workers by educational levels *in Urban Areas only*	C 48–C 49
TABLE B-III Part B—Industrial Classification of Workers and Non-Workers by educational levels *in Rural Areas only*	C 50–C 53

B SERIES—ECONOMIC TABLES—*Concld.*

	Pages
TABLE B-IV Part C—Industrial Classification by Sex and Divisions, Major Groups and Minor Groups of Persons at work other than Cultivation	C 54–C 57
Appendix to Table B-IV Part C—Statement showing particulars of Workers under Minor Groups accounting for less than 1% of the Workers in the concerned Divisions (less than 0.5% in the case of the Minor Groups under Division 2 & 3) who have not been included in the main Table	C 58–C 60
TABLE B-V—Occupational Classification by Sex of Persons at work other than Cultivation	C 61–C 81
Appendix to Table B-V—Statement showing the particulars of Workers under Occupational Families accounting for less than 1% of Workers of the respective Divisions (0.5 % in the case of the Families under Division 7-8) who have not been included in the main Table	C 82–C 93
TABLE B-VII Part A—Persons Working principally (i) as Cultivators (ii) as Agricultural Labourers or (iii) at Household Industry classified by Sex and by Secondary Work (i) at Household Industry (ii) as Cultivator or (iii) as Agricultural Labourer	C 94–C 97
TABLE B-VII Part B—Industrial Classification by Sex of Persons working in Non-Household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry	C 98–C 108
TABLE B-VIII Part A—Persons unemployed aged 15 and above by Sex, Broad Age-Groups and Educational Levels *in Urban Areas only*	C 109–C 110
TABLE B-VIII Part B—Persons unemployed aged 15 and above by Sex and Educational Levels *in Rural Areas only*	C 111
TABLE B-IX—Persons not at work classified by Sex, Broad Age-Groups and type of activity	C 112–C 114

PART A

INTRODUCING THE DISTRICT

VISAKHAPATNAM DISTRIC

G. P. RANGAM

Prepared in the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

CHAPTER I

GENERAL FEATURES

Situation and Physical Characteristics:

The Visakhapatnam district lying in the north eastern part of Andhra Pradesh is situated on the east coast known as the Coramandal coast between 17°10′ and 18° 25′, of the northern latitude and 85°50′ and 80°55′ of the eastern longitude. It is bounded on the north by Orissa State and Srikakulam district, on the east by the Bay of Bengal, on the south by the east Godavari district and on the west by Orissa State. The district consists of two natural divisions, namely, the Agency area and the Plains area. The Agency tract mainly consists of the hilly regions covered by the Eastern Ghats which run parallel to the coast from the north-east to the south-west and is situated in the interior of the district. The Agency area comprises Chintapalle and Paderu taluks and portions of Narasapatnam, Chodavaram and Srungavarapukota taluks. The rest of the district is classified as Plains. The average height of the hills in the district is about 3,000 feet though there are several peaks of over 4,000 feet in height. The chief peak of the district is Sankaram in Srungavarapukota taluk which is 5,300 feet in height. Between this main hill and the low country intervene ranges of lower foot hills among which there are secluded valleys. The Plains tract drains into the sea. The district has a long coast line and along the coast lie a series of saltish sandy swamps.

Visakhapatnam district is one of the oldest districts of the composite Madras State. In 1936 when Orissa State was formed a portion of this district and a major portion of the Ganjam district were transferred to Orissa State and the residuary portions of these two districts were clubbed and constituted into the enlarged Visakhapatnam district with headquarters at Visakhapatnam. As this enlarged Visakhapatnam district was found to be very unwieldy for administration, it was divided on 15th August, 1950 into the two districts of Srikakulam and Visakhapatnam.

The Visakhapatnam district so reconstituted on 15th August, 1950 did not undergo any changes in its jurisdiction during the last decade till the 1961 Census. There were however, some inter-taluk changes within the district and the names of certain taluks were also changed. The taluks thus affected were Gudem, Srungavarapukota, Golugonda, Sarvasiddhi and Veeravalli. On Ist October, 1959 Gudem taluk was split up and the south-western portion of the taluk was constituted into the Chintapalle taluk with headquarters at Chintapalle and the north-eastern portion of Gudem taluk into Paderu taluk with headquarters at Paderu. A major part of the hilly tract in the north-western portion of Srungavarapukota taluk was transferred and added to the newly constituted Paderu taluk. The name of Golugonda taluk was changed into Narasapatnam taluk; Sarvasiddhi taluk was renamed as Yellamanchili taluk and Veeravalli taluk as Chodavaram during this decade. The jurisdiction as well as names of other taluks in the district remained unaffected during the decade 1951-61.

The district occupies an area of 5,179.0 sq. miles and has a population of 2,290,759 persons (1,142,647 males and 1,148,112 females) and a density of 442 persons per square mile as per the 1961 Census findings. The Agency portion covers 2,677.4 square miles, nearly half of the district area and is inhabited by 202,682 persons (103,556 males and 99,126 females). The Plains account for the remaining area of 2,501.6 square miles and 2,088,077 persons (1,039,091 males and 1,048,986 females). There are altogether 3,524 inhabited and 117 uninhabited villages and 10 towns in the district of which as many as 2,246 inhabited villages and 59 uninhabited villages lie in the Agency area. There are no towns in the Agency area. The district is at present divided into three Revenue Divisions and ten taluks for purposes of Revenue Administration as shown below, with each taluk in charge of a Tahsildar.

STATEMENT I-1

Name of the Revenue Division	Names of the Taluks in the Revenue Division	Area in sq. miles	Population as per 1961 Census	Density of population per Sq. mile
(1)	(2)	(3)	(4)	(5)
1 Visakhapatnam	1 Visakhapatnam	196.0	306,971	1,566
	2 Anakapalle	304.0	244,481	804
	3 Bheemunipatnam	337.0	243,766	723

STATEMENT I-1—*Concld.*

Rivers:

The chief rivers in this district are Machkund, Sarada, Varaha, Gosthani, Champavathi, Thandava, Saragudugedda and Meghadrigedda.

Machkund River: The river Machkund which is named after Fish-God 'Matsya Raja' rises in the Madugula hills in Paderu taluk and flows nearly north at first and then turns westwards into the Orissa State. The river flows as the boundary between Andhra Pradesh and Orissa State for about 50 miles and flows completely in Malkanagiri taluk of Orissa State and again becomes the boundary between Paderu taluk and Malkanagiri taluk for a length of six miles. In this lower reach the river is known as 'Paleru'. After flowing through a distance of six miles it again flows into Orissa State and then re-enters this district forming a boundary between Chintapalle and Malkanagiri taluks. In this lower reach it is called the Sileru river. There is a water-fall in the river at Doduma. The waters of the fall are being harnessed for production of electricity.

Sarada River: The river Sarada rises in the Madugula hills, flows through Chodavaram, Anakapalle and Yellamanchili taluks and falls into the Bay of Bengal at Vatada in Yellamanchili taluk.

Varaha River: The Varahanadi rises in the Narasapatnam hills, flows through Narasapatnam and Yellamanchili taluks and falls into the Bay of Bengal at Vatada the place where river Sarada also joins the sea.

Thandava River: This river rises in the Chintapalle taluk, flows through Narasapatnam and Yellamanchili taluks and finally enters into the Bay of Bengal at Pentakota village in Yellamanchili taluk.

Gosthani River: This takes its origin in Anantha-giri forest area of Srungavarapukota taluk, some miles away from Borra caves which are famous and situated at a distance of about 4 miles to the north of the road point at Mulyaguda on the road from Visakhapatnam to Jeypore *via.*, Srungavarapukota and Araku. The local tradition states that deep in the caves there is a Sivalingam over which there is an idol of a cow and that water comes from the udder of this cow, falls on the Sivalingam and flows down in the form of a river, and that from this point of the caves the river is called Gosthani. The stream coming from the western side and joining this Gosthani river near Borra caves is only a hill-stream. As the river is said to commence from the udder of a cow, it is called Gosthani (meaning Cow udder) river.

Champavathi River: This takes its origin in the Eastern Ghats in Srikakulam district and after flowing through Salur taluk of Srikakulam district enters this district in Vizianagaram taluk. The river finally falls into the Bay of Bengal at Konda village in Bheemunipatnam taluk after flowing through Vizianagaram and Bheemunipatnam taluks.

Mahendragedda River: This river flows in Visakhapatnam taluk and finally falls into the Bay of Bengal.

Saragudugedda River: This river flows in Narasapatnam taluk and finally falls into the Bay of Bengal.

Climate:

The climate varies considerably in different parts of the district. Near the coast the air is moist and relaxing and the temperature seldom rises very high. The climate gets warmer as one goes more into the interior. April to June are the warmest months. The climate in the hilly region is, however, cooler on account of the elevation and thick vegetation. The south-west monsoon that sets in from June brings down the temperature to a considerable extent. By the middle of November there is, a marked decrease in the temperature. The maximum and minimum temperatures recorded at Visakhapatnam station from 1951 to 1960 monthwise are given under Administrative Statistics in Part B of this Hand Book and may be referred to.

Rainfall :

This district gets the benefit of both the north-east and the south-west monsoons. The average annual rainfall is 993.4 mm. Most of the rain is received during the south-west monsoon between June to September. There is only moderate rainfall during the north-east monsoon (October-December). The rainfall during the south-west monsoon period decreases from the inland taluks to the coast while the conditions are quite the reverse during the north-east monsoon. The rainfall on the whole is scanty and this factor largely contributes to the fact that this district is not self-sufficient in food supplies. The average number of rainy days is 56. The following statement shows the seasonal rainfall from 1951-52 to 1960-61 with the percentage of variation from the normal rainfall for each year.

STATEMENT 1-2

Year	South-West monsoon period (July to September)	North-East monsoon period (October to December)	Winter period (January to February	Hot Weather period (April to June)	Total annual rainfall	Percentages of variation from normal
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Normal rainfall	22 2" (564.8 mm.)	11.6" (296 1 mm.)	1.9" (26.6 mm.)	4.2" (105.9 mm.)	39.0" (993.4 mm.)	
1951-52	26.8"	7.7"	0.6"	6.4"	41 5"	+ 6.4
1952-53	16.2"	17.8"	1.0"	3.1"	38.1"	— 2.3
1953-54	24.3"	10 2"	0.1"	2.5"	37.1"	— 4.9
1954-55	24.0"	16.6"	0.5"	17.3"	58.4"	+49.7
1955-56	25.8"	16.9"	0 5"	5.5"	48.7"	+24.9
1956-57	34.8"	15.2"	0.3"	2.5"	52.8"	+40.5
1957-58	30.2"	7.3"	2.3"	1 7"	41.5"	+ 6 4
1958-59	622.1mm.	915 5mm.	29.9mm.	15 9mm.	1583.4mm.	+59 4
1959-60	746.0mm.	273.5mm.	29.9mm.	21.2mm.	1040.7mm.	+4.8
1960-61	479.0mm	171 5mm.	67.8mm.	38 6mm.	756.9mm.	+23 8

The rainfall was above normal in the years 1951-52 and from 1954-55 to 1959-60. In the years 1952-53, 1953-54 and 1960-1961 it was below normal.

Soils:

The soils in this district belong chiefly to the regar or black cotton and red ferruginous series. Near the hills the red varieties are predominant but towards the coast the soil becomes finer and in the valleys there is fertile black clay with a tendency to crack on drying. The northern, southern and the western taluks are mainly of red soils which are free from stones to a certain extent. The coastal taluks have large sandy tracts. In the black soils, paddy, ragi, jowar, korra, sugarcane etc., are grown. In the red soils groundnut, castor, horsegram etc., are grown.

Land Utilisation :

Like other districts of the State, Visakhapatnam is also predominantly agricultural in character. Out of a total population of 2,290,759 persons in the district 868,479 persons are engaged in agriculture as their main occupation as per the 1961 Census thus accounting for 37.91% of the total population. Paddy, bajra, ragi and jowar are the chief food crops grown in the district. Jute, groundnut, gingelly, sugarcane, onion and chillies are the important commercial crops grown in this district. The land utilisation statistics of the district from 1950-51 to 1960-61 are given below.

STATEMENT I-3

LAND UTILISATION PATTERN IN THE DISTRICT

(Area in acres)

Description	1951-52	1952-53	1953-54	1954-55	1955-56	Percentage to the Total area in 1955-56

Net area sown	7,48,793	8,15,319	9,37,936	8,75,778	8,86,155	26.7
Area sown more than once	1,82,166	1,95,963	1,65,817	2,40,646	1,24,411	3.7
Total cropped area	9,30,959	10,11,282	11,03,753	11,16,424	10,10,566	30.4

The above statement gives the classification of the geographical area under different categories of utilisation in the district for the decade from 1951-52 to 1960-61 *i.e.*, the first year of the commencement of the Five Year Plans and at the end of the First and the Second Five Year Plans for obtaining a comparative idea in the pattern of land utilisation before and after the implementation of the Five Year Plans. The net area sown under all crops during 1960-61 forms 26.7% of the district area. Forests cover a major portion of the district and account for 44.8% of the district area while uncultivable land covers 9.7% of the district area. The area put to non-agricultural use such as buildings, roads etc., constitutes 10.5%of the district area. The total fallow land during 1960-61 accounts for 3.9% out of which current fallows (*i.e.*, land left fallow in the current year only) constitutes 1.9% and the other fallow land (*i.e.*, land left fallow for more than one year but less than five years) accounts for 2.0%. Cultivable waste land (*i.e.*, land left fallow for more than five years) accounts for 2.3% of the district area. Permanent pastures during 1960-61 cover 0.5% while land under miscellaneous tree crops and groves accounts for 1.6% of the district area. The net area sown has increased form 8,09,337 acres in 1951-52 to 8,86,155 in 1960-61.

Livestock :

In an agricultural economy livestock also play a very important role. The number of livestock and poultry of different categories in the district as per the quinquennial Census taken in 1961 is given below:

LIVESTOCK	Cattle	506,197
	Buffaloes	387,295
	Sheep	294,548
	Goats	216,049
	Horses and Ponies	3,411
	Donkeys	1,801
	Pigs	54,759
	Total	570,568
POULTRY	Fowls	1,245,643
	Ducks	24,165
	Others	878
	Total	1,270,686

Flora:

Nearly half of the district is covered by forests and a considerable portion of it is reserved. The common species available in these forests are Guggilam (*Robusta*), Tangedu and Konda tangedu (*Xylia dolabriformis*), Billu or Billudu (*Choroxylon swietenia*), Chirimanu or Yellama (*Anogeissus accumiriata*), Yegisa (*Pterocarpus marlepium*), Nallamaddi or Maddi (*Terminalia tomentosa*), and Somi or Somidi (*Soymida toprijuga*). The timber locally in demand chiefly is Nallamaddi which is found in many areas. Bamboo is plentiful and is practically of the non-thorny variety (*Dendrocalamus strictus*). A small quantity of *Bambusa Arundinacea* also exists. A good proportion of the forest revenue is derived from the bamboo forests.

Communications:

All the important towns in the district are well connected by roads. The Plains portion of the district can be said to be well knit by road communications and the roads lead to the adjoining districts and Orissa State. The Madras-Calcutta National

Highway is the most important road in this district. It passes through Yellamanchili, Anakapalle, Visakhapatnam and Bheemunipatnam taluks respectively touching Yellamanchili, Anakapalle, Visakhapatnam and Bheemunipatnam towns. Another National Highway branches off from this road to Vizianagaram and Bobbili near Polepalli in Bheemunipatnam taluk. Madras-Howrah Broad Gauge Railway line traverses through this district almost parallel to the above National Highways. This Railway line upto the Waltair station is under the Southern Railway and from Waltair onwards under the South—Eastern Railway. A branch line connects Visakhapatnam with Waltair on the main line. Another branch line takes off from Vizianagaram to Raipur *via* Bobbili in Srikakulam district. The railways link this district with the other coastal districts. A long sea coast and an excellent natural harbour at Visakhapatnam are two very important features of this district. There is a minor port at Bheemunipatnam.

Jute mills, Sugar mills, Hindustan Ship Building Yard, Caltex Oil Rifinery are some of the important industries in the district. Varaha Narasimhaswamy temple on the Simhachalam hills, 8 miles from Visakhapatnam, Andhra University campus in Waltair, and the Araku Valley are some of the important places to be seen in this district. A brief Gazetteer of important places in the district is given at the end of this part and may be referred to.

Geology and Mineral Resources :

A brief note on the Geology and Mineral Resources of Visakhapatnam District prepared by the Geological Survey of India, Andhra Pradesh Circle, Hyderabad, is reproduced below:

Geology : Almost the whole of Visakhapatnam district is occupied by rocks of 'Archaean age'. Rock formations of 'Upper Gondwana' age occur near the coast in small patches. The following is the presumed sequence:—

Recent	...	Laterite and coastal sands
Upper Gondwanas	...	Sandstones, clays and boulder bed
Archaeans		Quartz veins, pegmatites, charnockite, granite and associated injection gneisses and hybrid rocks
		Kodurites-hybrids
		Khondalite, quartzite and calcsilicate rocks

Khondalites and associated Rocks: The name Khondalite is derived from the word 'Khonds', one of the aboriginal tribes of India, in whose country the series is especially well developed. The Khondalites are essentially garnet-sillimanite schists, containing graphite in varying quantities as well on some quartz and felspar. The rocks are greyish to reddish in colour, usually foliated. The rock is very prone to decomposition, especially under tropical conditions. In the decomposed state it is characterised by a brick red colour and a spotted appearance caused by weathering of clusters and nests of garnet.

The Khondalite country is well wooded except where it is artificially robbed of its forest.

The typical Khondalite is very well developed in the Visakhapatnam district where it is accompanied by beds of crystalline limestone and calcareous gneisses, which are regarded as metamorphosed sediments. Mineralogically, they vary much in composition but consist usually of green pyroxene, wollastonite, scapolite, brown garnet, calcite and sphene. Since the characteristic feature in nearly all the minerals of these gneisses is abundance of lime, the rocks have been called calc-gneisses, although calcite is not invariably present.

Kodurites: These group of rocks, the locus of the manganese deposits of this region, are hybrid rocks formed by the addition of acid igneous material to manganese silicate rocks. The typical rock of the Kodurite series, so named after the Kodur manganese mine in Visakhapatnam, is composed of potash felspar, manganese garnet, apatite, manganese pyroxene and quartz. The first result of decomposition is irregularly shaped manganese ore bodies derived from the manganiferous silicates, and enormous masses of lithomarge derived from the felspars.

The common form of the above manganese bearing rocks when fresh enough for inspection is granular in structure, with the texture of a medium grained granite. The Kodurite is a term used for petrographic series or suite of rocks that grade from acid to ultrabasic, the latter is non-felspathic but apatite in smaller or greater amount is found in all types. The rocks of the Kodurite group are said to be more closely associated with the calcareous or scapolitic gneisses rather than with either the Khondalites or the gneissose granites.

Gneissose granites: Of the ordinary granitic gneisses of Visakhapatnam district very little systematic information is available. Foliated felspathic biotite gneisses with hornblende, striking N.N.W—S.S.E. occur in the region. The commonest rock type appears to be a very fine grained biotite gneiss made up typically of fine angular grains of quartz and felspar, with a small but variable quantity of green biotite. The ordinary gneiss of Visakhapatnam district is described as, in a general way, some what coarse and

granitoid. There is little indication of foliation in hand specimen where the foliation is obscure, the felspars are large, and show a porphyritic tendency-when strongly folded these phenocrysts are pressed out into flat patches of broken fragments. It is this rock which gives rise to great boulders and scarps so common throughout the granitic hills. The finer-grained varieties of this granite weather more easily and tend to produce a featureless country.

Charnockites and some associates : The charnockite suite of rocks in Visakhapatnam district tend to assume modifications and to pass into more biotite bearing gneisses free from hypersthene. The commonest form of charnockite consists of plagioclase, orthoclase and rhombic pyroxene, in addition, garnet, brown hornblende and biotite. The porphyritic varieties of this rock are also noticed.

Two additional types of rocks associated with the charnockites of this region require special mention. The first is a band of Eleolite-syenite-gneiss and it sometimes forms part of the great charnockitic massif and includes two principal varieties. The first approaches the Miaskites of Ural mountains and the other is a very coarse mylonitised pegmatite in which large porphyritic crystals of Eleolite of the size of walnuts lie in a massive mylonitic material.

The second additional type found near Paderu in Visakhapatnam hill tracts, is associated with pyroxene granulite and the more basic forms of norite. It is a granular aggregate of hypersthene; sapphirine, brown biotite, sillimanite and cordierite have been identified in some specimens and the rock is thought to be result of interaction between an ultrabasic igneous magma and Khondalites.

Pegmatites and Quartz Veins: There are numerous small lenses of pegmatite in the Khondalites. These contain mostly felspar and quartz. At places, sillimanite, garnet, graphite, biotite, muscovite and tourmaline are found in these pegmatites. The pegmatites traversing the calc-gneisses are grey in colour and contain in addition to felspar and quartz, small amounts of sphene, garnet, diopside and graphite. The bluish grey pegmatites traversing the charnockites contain enstatite and hypersthene in addition to felspar and quartz. The pegmatites traversing the granites are biotite rich.

There are numerous small veins of quartz of white or grey colour. At places, these veins contain small amounts of garnet, graphite, biotite, muscovite and tourmaline.

Upper Gondwanas: Overlying unconformably the Khondalites there is a series of rock formations consisting of boulder bed, sandstones and clays exposed in the south of Visakhapatnam district on the border with East Godavari district. The boulder bed is made up of boulders of Khondalite, quartzite and ferruginous quartzite in a matrix which is ferruginous or aluminous. The sandstones are light red, buff or dark in colour. The clays are buff in colour. They lie horizontally or gently dipping towards south. The total thickness of this series may not exceed 100 metres.

Recent Laterites: Lateritic formations are generally confined to elevations of 3,000 feet and above. They can best be seen in Araku Valley between Diguva Kantaram (17°59′ : 82°34′) and Solabham (17°58′ : 82°35′) in parts of Gudem agency. These laterites are mostly in the nature of ferruginous gravels or as red ferruginous laterites forming a thin capping over the underlying.

Soils and Alluvium: In the Araku Valley and elsewhere in the Visakhapatnam district red loam soils are found. The following is the mechanical analysis of the soil from Araku Valley; clay 23%, silt 25%, fine sand 17.6%, coarse sand 33.6%.

The alluvial formations are confined mostly to the beds of the large rivers. They are composed mostly of grey to brownish coloured medium sized sands with admixture of micaceous and felspathic impurites.

Coastal Sands: Beach sands occur over a strip of country about one mile wide, along the coast. These sands are mostly of quartz. Small amounts of garnet, ilmenite, monazite are concentrated at places around Visakhapatnam beach.

Earth-Tremors in Visakhapatnam District :

There are some reports that as early as 1900, there were some explosions at Ramathirthalu (18°-10′: 83°29′). At first, there appeared to be some cracking noise which later culminated in a sudden explosion. Stones of 3 inches diameter were hurtled on the houses and as far as 100 yards off the place of explosion.

The tremors of October 1953, March 1954 were localised to an avoid track around Vizianagaram

with the larger axis approximately trending N.N.E—S.S.W. covering an area of about 200 sq. miles (320 sq. km.). The adjoining area experienced no shocks or shocks which were so feeble that they were not perceived. The earth tremors were accompanied by sounds resembling thunders. In some cases the amplitude of the shock waves has been large enough so that the movement of the ground has been distinctly felt. However, the severest shock did not range beyond III on the Rossi-Forel scale of intensity. The shocks were of a local nature and were not strong enough to be recorded by seismographs of the neighbouring Seismological observatory.

Local earth-tremors were reported occurring in Vizianagaram Town and its neighbourhood since August, 1959 to December, 1959 quite frequently. It was found that an ellipsoidal area of about 150 sq. miles around Vizianagaram had felt the tremors without any perceptible damage to life and property. But the effective zone seems to have been about 4–5 sq. miles round about Vizianagaram. The tremors have been ascribed to owe their origin to the local geological and structural instability aided by slumping and slippage.

Future shocks: Since the areas described above lie beyond known active seismic zone of India, it is surmised that these purely local tremors may be fringe effects of the more disastrous earth-quakes occurring in the active seismic zone. They are not likely to cause any severe damage to life and property.

Mineral Riches:

Building materials : The Khondalites are made use of widely in construction of buildings. For metalled roads, in particular the ghat roads of Visakhapatnam district, charnockitic bands met with at the road cutting are made use of. All the group of rocks are quarried for road metal and railway ballast.

Clays: Clays in the Visakhapatnam district are essentially lithomarges underlying laterite and derived from the alteration of garnetiferous gneisses. They turn more gritty and less plastic with increase in depth and grade below into weathered rock. The important clay occurrences are (1) Bodiguda (18°18′30″: 82°52′)-reserves-20,000 tons; (2) Rengar (18°17′: 82°59′)-reserves—50,000 tons; (3) Pendurti area (17°49′: 83°12′), reserves—7,283,750 cubic feet; (4) Chintanippula 17°44′: 83°02′) reserves—3,805,000 cubic feet; (5) Kasimkota area (17°41′ : 82°59′) reserves—3,600,000 cubic feet.

Of the above deposits, the Bodiguda deposit can be a useful auxiliary to the Rengar deposit. The exploitation of the latter is linked up with the construction of a road connecting the deposits to the Visakapatnam—Jeypore road. The clays are mostly pale yellowish in colour and are useless as far as the porcelain or whiteware or paper industries are concerned. They may however be useful in the manufacture of stoneware, yellowware, sanitaryware and such products.

Results of firing tests carried out on the several representative samples from Pendurti area indicate that the clays are suitable for the manufacture of Mangalore-pattern roofing tiles. As the clays are generally very fine and extremely plastic and free from gritty materials they may not necessitate much washing preparatory to pressing in moulds. Some blending may be necessary to bring down the plasticity of the clay to the required grade.

The colour of the clays in most parts of the area around Chintanippula Agraharam (17°44′:83°02′) varies from yellowish brown to brown and patches of yellowish red and red clays are also met with. But tests have shown that they are equally good in quality and quite suitable for the manufacture of Mangalore-pattern roofing tiles.The Kasimkota clays can also be put to similar use.

In addition to the above clays deposits, clays of white or buff colour of Upper Gondwana age have been observed in well sections east of Lakshmipuram (17°24′: 82°44′). The reserves of the clays available in this area have yet to be assessed.

Graphite: Few good deposits of Graphite have been reported around (1) Paidikonda (17°47′ : 83°01′) (2) Nandakota (18°15′ : 83°6′), (3) Chimlipalle (18°15′ : 83°5′), (4) Kondamosuru (18°22′ : 83°9′), (5) Narupalle (18°20′ : 83°19′). The graphite can be utilised in making grey paints.

Limestones: The occurrence of crystalline limestone in Visakhapatnam is reported from near Borra (18°16′45″ : 83°2′45″). The limestone band occurs as a lenticular body within calc-granulite having a rough triangular out-crop pattern. The limestone band has a maximum length of about 3,500 feet and width of about 900 feet. The limestone is generally massive and medium grained and magnesian bearing in character. Assuming that the limestone

deposit persists to a minimum depth of 20 feet, this deposit would yield as much as 4,000,000 tons of limestone. In addition to the main band, another limestone band 1.6Km. west of Borra cave supplements the reserves estimated for the Borra limestones. The Borra limestone appears to be suitable for making magnesian lime for structural purposes as it satisfies the specification of 20 percent maximum of magnesia and 95 percent minimum of combined magnesia and lime. It may also be possible to utilise it in glass manufacture and for making mild abrasives for polishing metallic surfaces.

Manganese: Ferruginous manganese ores with an average manganese content of 30 to 32% are known to occur in Visakhapatnam district at the following places. (1) A fairly extensive deposit of such manganese ores is found about 5 furlongs N.24°E. of Medangi (18°39'15" : 83°8') in association with Khondalites dipping at 25° to N.40°W. Here the ores are mainly constituted of psilomelane with little pyrolusite and very rarely wad. It is estimated that after allowing 25% for various losses about 90,000 tons of ore could be won from here.

The Chikkappara deposit (18°39': 83°6')lies about 2 miles to west of Tonam. This deposit is estimated to yield about 50,000 tons of ore.

The most important use of manganese is in the manufacture of ferro alloys. It is an absolute essential for carbon steels and also necessary for the making of high manganese steels.

Red Ochres: There are only two known large occurrences of red ochre in the Agency tracts and both of them lie in the northern part of Srungavarapukota taluk. The larger one of these is found about 6 furlongs to the west of Sarayi village (18°10' : 82°45' 30"). The total available ore in sight here is to the order of 37,000 tons. The other occurrence of red ochre lies about a furlong to the west of Araku village (18°20' : 82°51). It is estimated that the available reserves are of the order of 22,500 tons.

The ochre at Sarayi is of a better grade but ochres from both the localities could be utilised either as neutral mineral pigment or for the manufacture of paints. Araku colony lying about 3 miles east of Araku village would be a suitable centre for starting a small scale paint Industry.

Mineral sands: The mineral sands are derived from the disintegration of the gneisses, schists and other rocks, in the higher regions. Subsequently, this material is carried by numerous streams to the sea, where it is finally graded and sorted by incessant and rhythmic wave and tidal actions. The black sand concentrates have a wide distribution along the beach of Vizag district especially around Bheemunipatnam (17°53' : 83°27'). The concentrates occur as one or more layers, with varying thicknesses. The colour of the layers is dependent on the content of ilmenite and garnet in particular. The calculated quantities of black sands, ilmenite and monazite available to a depth of 5' are 434,000, 6,500, 745,300 cubic feet respectively.

There seems to be no industry, at present, in India, using any large quantities of these minerals. Ilmenite is mainly used in the manufacture of titanium pigment which is preferred to white lead and zinc oxide pigments. Titanium also finds use in the manufacture of alloys. Though the average monazite content is rather low for this deposit, the mineral is an important by-product in the extraction of ilmenite. Monazite is more commonly used in the preparation of cerium compounds for use in several industries. Monazite from the Vizag area has been analysed to contain about 2.4 percent ThO_2.

Apatite: A preliminary survey of the reported apatite deposits in Sitaramapuram area(18°17' : 83°9') indicates that the apatite veins occur in pegmatites 20-50 feet in thickness and 150-300 feet in length, containing massive and crystalline aggregates of blue green apatite forming about 70 percent of the pegmatites. The total reserves of apatite in the area are estimated to be of the order of about 1.7 lakh tons for 100 feet depth extension. The apatite contains about 83% of tricalcium phosphate and is suitable for the manufacture of superphosphates.

Iron-ore : Iron-ore in the form of magnetite veins 1-6 feet in thickness occurs along with apatite bearing pegmatites near Sitaramapuram area (18°17': 83°9'). The ore is high grade massive magnetite containing 69.08% of Fe. but the estimated reserves are only of the order of about 2 lakh tons for 100 feet depth.

Vermiculite: Vermiculite occurs as narrow zones upto 3 feet in width along the margins of apatite rich pegmatites and magnetite veins. The probable reserves of vermiculite are of the order of about 15,000 tons for 100 feet depth, a good proportion of which is good quality showing the required linear and volume expansion and bulk density.

CHAPTER II

HISTORY

This district originally formed part of the ancient Kingdom of Kalinga which is supposed to have been founded in the 9th century B.C. The history of this tract has to be considered along with that falling in Srikakulam district. The name of Kalinga still survives in the sea side village of Kalingapatnam not far from Srikakulam and in early times a place of importance. Kalinga was for many centuries the citadel of Buddhism in India. The good relations of Kalinga with Ceylon were also kept up for many centuries and in 275 A.D., the celebrated tooth of Buddha was said to have been obtained by the king of Ceylon and shifted to Kandy, a place in Ceylon.

In 260 B.C., king Asoka attacked and conquered Kalinga. One of the famous rock edicts shows clearly that it was the remorse that he had felt for the horrors of this campaign which led him in the same year to espouse the Buddhist religion which he afterwards spread throughout India and Ceylon. The edict states that about 150,000 persons were carried away captive from Kalinga, 100,000 were slain and many times that number perished. Some of the terms of this inscription show that Kalinga at that time was quite capable of offering considerable resistence even to such a powerful emperor as Asoka and that its people were a civilized race. For several centuries after this the history of Kalinga was quite obscure. Inscriptions, however, show that in the 6th century A.D. Kalinga was conquered by the Chalukyas of Badami and in the 7th century, by their off-shoot the Eastern Chalukyas. The result of this latter campaign was the establishment of the Vengi Kingdom (the ruins of the capital can be found 6 miles north of Eluru) under the Eastern Chalukya King, Vishnu Vardhana I (615-633 A.D.). Copper grants of this monarch found at Cheepurupalle show that he once ruled this tract.

The chronicles are continued by the grants of a series of kings who describe themselves as of the Ganga family, Lords of Kalinga, and worshippers of the Gokarnaswami (Siva) on the Mahendragiri hill in Ganjam, and as ruling from Kalinganagara which has been identified with Mukhalingam on the banks of the Vamsadhara, where notable temples and inscriptions have survived.

The Eastern Chalukyas of Vengi appear to have constantly interfered in the affairs of Kalinga, and Vimaladitya of that line seems to have conquered much of it, since an inscription at Mahendragiri states that the Chola King Rajaraja I of Tanjore overthrew him in 999-1000 and set up a pillar of victory on the hill.

The Gangas were followed by the later line of the same name who, as they also worshipped the Gokarnaswami on Mahendragiri and ruled from Kalinganagara, were apparently of the same family. Calculations from dates in copper grants show that they were in power from the end of the 9th century. One of them, Rajaraja, ascended the throne in 1070-71 and reigned eight years, during which time he is said to have helped the Vengi kings against the Cholas and afterwards defeated both of them and also the ruler of Utkala (Orissa) and other monarchs. Under his son, Anantavarman-Choda-Ganga, who ruled from 1078 A.D. for about 72 years, this family reached the zenith of its power. Many copper grants and inscriptions of this monarch have been found and these state that he replaced on their thrones the fallen kings of Vengi and Orissa engaged in wars extending from the Ganges in the north to the Godavari in the south and built the famous temple of Jagannatha at Puri. He married at least five queens and had by them four sons who ruled after him. The country eventually fell to the Eastern Chalukyas of Vengi and their feudatories. The Yadavas of Devagiri (Doulatabad) and the Kakatiyas of Warangal also claim to have humbled Kalinga at this period.

The Simhachalam temple in Visakhapatnam district contains inscriptions of several of the later Ganga kings, but few details regarding them survive. Their power was on the wane. Narasimha I and two of his successors are said to have resisted attacks from the Muslim kings of Bengal and Delhi. The Reddy kings of Kondavidu in Guntur district also penetrated into this Kingdom. On the death of Ganga King Banudeva IV, his minister usurped the throne and in 1434-35 founded the Gajapati dynasty under the title Pratapa Kapileswara with his capital at Cuttack. He started expanding his dominions until

they extended from the river Ganges to the river Krishna. His whole reign was spent in warring with the Hindu kings of Vijayanagar who by then were powerful in the south and with the Muslim Bahmani dynasty of the Deccan. His son Purushottama reigned from 1469 to 1497. His successor was Prataparudra. He is said to have had reverses at the hands of the Vijayanagar King, Krishna Devaraya. The latter seized Udayagiri in Nellore, Kondavidu, Kondapalli in Krishna, Rajahmundry and other fortresses and finally halted at Simhachalam. The Simhachalam temple still contains inscriptions recounting successes and relating how he and his queen presented the God with a necklace of 991 pearls and other costly gifts.

About the end of the 15th century the Bahmani Kingdom split up into several smaller States such as Bijapur A.D., 1489, Ahmednagar 1490 and Bidar 1498. In 1512, the Kingdom of Golconda was founded by Sultan Kutub Shah said to have been a native of Persia. He was so successful that at the end of a long reign, he left a territory extending from the river Godavari to beyond the river Krishna and from the sea to a line drawn west of Hyderabad about the 78th degree of east longitude. In 1520,Sultan Kutub Shah defeated the forces of the Hindu chiefs of the Telangana at Koudapalli and there is reason to suppose that Prataparudra, was one of the chiefs who suffered discomfiture. In 1571, Ibrahim, the 4th monarch of the Kutub Shahi dynasty, taking advantage of the disturbed conditions of Orissa made himself master of the Godavari and other districts as far north as Srikakulam. For about 180 years since then this tract which also included the Ichchapur area then known by the name of the "Chicacole Circar" was controlled more or less directly by the Muslim authority from Hyderabad.

The principal seat of Government was at Srikakulam where the Faujdar or Deputy of the Subah resided, while a Sub-Governor or Naib resided at Ichchapur. The revenues of the country were collected by these two Muslim officers and remitted to the seat of Government at Hyderabad. In the year 1641 Abdullah Kutub Shah sent Sher Mohammed Khan from Hyderabad to Srikakulam to rule over the dependencies north of the Krishna river. Sher Mohammed Khan during his period built a fine mosque at Srikakulam. In 1687, the Kutub Shahi dynasty came to an end when Aurangazeb,the Mughal emperor, marched down to reduce the south to obedience and had wiped out the Kingdom of Golconda and brought the whole country under his direct control. He appointed to the charge of it an officer called the Subadar of the Deccan under whom were a number of local subordinates in control of the various smaller divisions of territory. The five Northern Circars of Guntur, Kondapalli, Eluru, Rajahmundry and Srikakulam had Masulipatam for their chief town and the northern most of them, Srikakulam continued to be ruled in the same manner as before by a Faujdar residing in that town.

Aurangazeb died in 1707 and his death was followed by great disorder in his southern possessions. In 1724 the Subadar of the Deccan, though still continuing nominally subject to the authority of Delhi, made himself virtually independent and began appointing his own officers. His first Faujdar of Srikakulam was Anwar-ud-din who afterwards became very famous in the wars of the Carnatic and was subsequently came to be known as the Nawab of Carnatic. His firm but kindly rule was gratefully remembered for many years afterwards.

This Subadar of the Deccan died in 1748 whereupon the French and English took opposite sides in the disputed succession which followed. Eventually a French protege, Salabat Jung, secured the post of Subadar and Bussy, the French General, obtained from him in 1753 the four Northern Circars (excluding Guntur) for the support of his troops. Masulipatam and the country adjacent had been already ceded to the French in 1750; and Bussy sent M. Moracin, the French officer with instructions to take possession of the new acquisitions.

The Faujdar of Srikakulam, Jafar Ali, was extremely disinclined to give up his charge to the French, and he persuaded Gajapati Viziarama Razu, head of the Vijayanagar family and the most powerful of the local renter-chieftains, who had come into being during the Muslim rule, to join him in opposing Moracin's entry. The latter, however, seduced Viziarama Razu from this compact by promising to lease him the Rajahmundry and Srikakulam Circars at a rate much below their value. Finding himself deserted, Jafar Ali called in the help of the Maharathas of Nagpur, who crossed the hills; devastated the two circars; plundered and burnt the Dutch factory at Bheemunipatnam, defeated Viziarama Razu near

Vizianagaram; fought an irregular action against the combined forces of that chief and Moracin at Tummapala near Anakapalle; and after a few adventures returned home with immense booty. Having secured the loot, they troubled no further about Jafar Ali's aspirations, whereupon that gentleman was obliged to submit.

In July 1754, Bussy went in person to Masulipatam and Rajahmundry, settled affairs in the Circars, and appointed Ibrahim Khan as the Faujdar of Srikakulam. Soon afterwards, however, relations between him and the Subadar of the Deccan became strained, at last an open rupture occurred, and for several weeks in the summer of 1756 Bussy was obliged to entrench himself against attack near Hyderabad. The authorities at Madras were only prevented from joining the Subadar against him by the necessity of sending every available man to Bengal. Further, Bussy's Officers in Circars including Ibrahim Khan disavowed his authority and refused to pay their tribute. Viziarama Razu was the only man who stood by Bussy. He ordered his Agents at Hyderabad to assure M. Bussy of his fidelity and the regular payment of his tributes

Bussy was eventually relieved by reinforcements from Masulipatam and was received back into the Subadar's favour; and at the end of 1756 he marched into the Circars to restore his fallen authority. Ibrahim Khan fled in terror at his approach. But Viziarama Razu, confident in the proofs of attachment he had given, went to meet him with a body of troops belonging to him and others of the local Chiefs which numbered 10,000 men. Taking advantage of the support of Bussy he persuaded the latter to attack his bitterest enemy, the Chief of Bobbili. Bussy proposed to Bobbili that he should leave his fort and receive instead other land of greater extent and value in another part of the province, but the suggestion was received as an insult. Soon afterwards one of Bussy's detachments was cut off in the woods of Bobbili and in his anger this Frenchman determined to expel that chief and all his family. The result was "one of the most ghastly stories which Indian History has to record." For further details the Chapter on History in the Handbook of Srikakulam district may be referred to.

From Bobbili Bussy marched on into Ganjam receiving the submission of the various local Chiefs and Zamindars as he went; sent a body of troops from Masulipatam to capture the English factories at Injaram, Madapollam and Bandamurlanka in the Godavari district and then turned back to attack the Vizagapatam settlement in person. Bussy then proceeded southwards and eventually returned to Hyderabad. In July of the next year (1758) he proceeded south to help in the war in the Carnatic and the siege of Madras.

Viziarama Razus' successor Ananda Razu, dissatisfied with the arrangements made by M. Bussy on the death of his predecessor had waited for an opportunity to take his revenge. As soon as Bussy went down south, he captured Vizagapatam from the French garrison which was holding it, sent news of the event to Madras and invited the English there to join him in expelling the French from the Northern Circars. Since Madras authorities were fully occupied at that time, this offer was repeated to the English in Bengal. Clive sent Colonel Forde to Vizagapatam by sea with a force of 500 Europeans, 2,000 sepoys and 100 lascars which arrived on the 20th of October, 1758. The first step that Colonel Forde took, after joining the troops to those of Ananda Razu was to re-establish the factory of Vizagapatam where the French had left a small garrison. The united forces then moved south and on the 9th of December near Condore, about 35 miles east-north-east of Rajahmundry, an action was fought with the French which ranks as one of the decisive battles of India and in which the French were utterly routed. Forde then pushed on to Rajahmundry the next day without the Raja's rabble and shortly afterwards took Masulipatam by a most brilliant assault. Salabat Jung, the Subadar of the Deccan, who had advanced within fifteen miles of the place to assist the French, changed sides at once and on the 14th May, 1759 concluded a treaty with the English granting them the country around Masulipatam, renouncing all friendship with the French and prohibiting the latter from ever again settling in the Northern Circars. Except the tract then ceded to the Company, the rest of the Northern Circars fell once more with dramatic suddenness under the sway of the Subadar of the Deccan. His rule, however, extended to it in name only. For the seven succeeding years the completest anarchy ever recorded in history therefore prevailed over the Northern Circars.

In 1765 Clive obtained from the Mughal Emperor at Delhi a firman granting to the Company

the five Northern Circars. The Subadar, however, was in no way pleased at this cession of territory which he regarded as his own and threatened to retaliate by an irruption into the Carnatic. In November, 1766 a treaty was hastily concluded with him by the British, by which the Engish agreed to pay Rs. 9 lakhs annually for the territory that had already been granted them as a free gift by the Mughal Emperor. Later, however, this tribute was reduced and finally it was completely dropped.

At this stage it will be of interest to trace the fortunes of the English settlement at Vizagapatam from its inception until it became the capital of the district.

This settlement was founded in 1682. In February of that year the Directors wrote to Fort St. George that an unauthorized trader (interloper) was designed for Masulipatam or Vizagapatam and left it to the Madras authorities to decide whether a factory should not be established at the latter place. It was largely, therefore the fear of rivalry of the ubiquitous interloper which led the Company to first settle in Vizagapatam. 13 days later the first official letter was sent from Fort St. George to Vizagapatam and thereafter correspondence with the factory appears regularly in the records.

Messrs. Ramsden and du Jardin did not let the grass grow under their feet. In October of the same year they wrote that in spite of the bitter hostility of the Dutch at Bhimilipatam they had made a respectable investment; had obtained a *cowle* from the Faujdar of Chicacole giving them liberties throughout the Kalinga country far greater than ever was granted to the Dutch and that this has caused a great deal of heartburning.

The records of 1684 show that the settlement was very small at that time, the monthly expenditure being only about Rs.350/-, but however, had possessed the right to collect dues in the town. The annual rent paid to the Faujdar of Chicacole was Rs. 4,500/-. At the end of that year the Madras Council, desirous of obtaining less limited privileges, resolved to send the new Chief Mr. Browne to the Faujdar with a big retinue hired for the purpose. This mission was crowned with success. A new *cowle* was obtained which exempted the Company's goods from land customs, granted privileges over Vizagapatam and permission to build a factory there, and brought the settlement into a position as good as any other in India. In 1685 the friendship with the Faujdar was further cemented by a present of saltpetre, powder and lead, which he earnestly desired owing to the possibility of a war with his northern neighbours, but which the Dutch at Bhimilipatam had steadfastly refused to supply.

In 1689 the footing in the country which had been won with such determination was suddenly lost. The Company fell out with Emperor Aurangazeb. As a result the latter issued orders that the English should be driven out from his dominions and all the property seized. On the 13th September, therefore, the Faujdar sent his 'Rashwar' to Vizagapatam for seizing and bringing away the English. The British factory was surrounded. There was a small skirmish and finally the Company's property was seized and the Englishmen taken prisoners. In 1690 peace was made with Aurangazeb whereupon the Faujdar released the prisoners and restored the Company's property. Later on account of disturbances of a local nature and also on account of the threatened invasion from the Maharattas the factory and its surrounding areas had to be fortified.

In 1753 the Circars were ceded to the French; and at the end of 1756 Bussy, free at last from other embarrassments, marched into them to restore his shaken authority, seized Bobbili, quieted Ganjam, captured Injaram and the other English factories in the Godavari area and then marched in person against Vizagapatam. He reached that place on the 24th of June, 1757 with a large force of 600 Europeans, 6,000 Sepoys and 30 pieces of cannon.

Orme gives the following disparaging account of the then fortifications of the place:

"A river coming from the north and turning south-eastward to the sea, forms an arm of land, a mile and a half in length and 600 yards in breadth. Nearly in the middle of this ground stands the fort, of which the construction by repeated mistakes was become so absurd, that it was much less defensible than many of the ancient barons' castles of Europe. The face towards the river was choked by houses. A whole town lay within 300 yards to the north, a village at the same distance to the south, and several buildings on each of these sides stood much nearer the walls; towards the sea, the esplanade was clear, excepting a saluting battery, where a lodgment might be easily made; after many injudicious additions of works round the fort, which only made it worse, it was found

necessary to throw up an entrenchment to the north, beyond the town, in the shoulder of the peninsula, quite across from the river to the sea, with a battery at each extremity, and another on a hillock near the centre but this was commanded by a sand-hill directly opposite, and within point-blank. The access across the river from the south was sufficiently secured by batteries, which commanded not only the passage, but the entrance of the river itself, through which all embarkations from the sea must gain the shore, as the surf prevents even a boat from landing on the beach. Indeed the whole scheme of the defences seemed to have been calculated only to oppose the attempts of pirates and Polygars. The garrison consisted of 150 excellent Europeans, and 300 sepoys; the English families in the town were 50 persons.

On the same day that the van of Mr. Bussy's army appeared in sight, the Company's ship Marlborough anchored in the road,on board of which was the Chief Engineer of Madras proceeding to Bengal. He landed, and having the next morning reviewed the works with Captain Charles Campbell, who commanded the troops, both gave their opinion that the extent could not be defended, even with a much greater force; and advised that all the Europeans should be immediately embarked, and the Sepoys, with two or three officers, left to make the best capitulation they could; but all the boat and fishermen had deserted in the night, and the wind blew so strong from the sea, that none but those accustomed could manage the boats over the bar, which that of the Marlborough carrying back the engineer experienced, being twice overset and a man drowned before she got out. At noon, cannon appeared on the sand hill; soon after, the mainbody of the enemy, and a summons to surrender; after two or three messages, the capitulation was signed at 11 at night. All the Europeans, whether troops or inhabitants, were to be prisoners of war; the sepoys and natives free to go where they liked; the Company's effects, capture; individuals, Mr. Bussy said, should have no reason to complain: he kept his word with the utmost liberality, resigning without discussion whatsoever property any one claimed as his own. The Marlborough having anchored at the Dutch factory of Bhimilipatam, 12 miles to the northward, he permitted the chief, Mr. Percival, Captain Campbell, and several others, to proceed in her to Bengal".

The subsequent history of the Vizagapatam settlement-its seizure from the French by the Raja of Vizianagaram in 1758, the expulsion of the French from the Circars by Colonel Forde's expedition in the next year, the eventual cession of the country to the English in 1765 etc., have already been described in some detail above.

The twelve years of anarchy which followed Bussy's departure had enabled the Raja of Vizianagaram to make himself more powerful than ever. The Raja, Ananda Razu who had accompanied Forde's expedition died of small-pox at Rajahmundry. He had no son, and the widow of his predecessor Viziarama Razu, had adopted Venkatapati Razu a boy of twelve and the second son of her husband's cousin Ramabhadra Razu, and caused him to assume the name of Viziarama Razu, by which he was afterwards so well-known. This boy had a half brother, considerably older than himself, named Sitarama Razu who cherished considerable resentment because of his apparent supersession. Thus owing to the new Raja's minority, all authority and State fell into Sitarma's hands and for very many years he succeeded in maintaining the position of superiority over his younger brother.

The two brothers were very powerful. They controlled almost all the districts except the Haveli land near about Vizagapatam, Kasimkota, and Chicacole. In 1761 they seized by force much of the Estate of Parlakimedi in Ganjam. When the English came into possession of the country they persuaded the brothers to relinquish Parlakimedi and settled a *peshkash* of three lakhs annually and rest of their estate. This also included indefinite rights in Jeypore.

Soon afterwards the various zamindars formed a strong confederacy to throw off the Vizianagaram yoke. Sitarama Razu, however, was equal to the occasion. He persuaded the Chief and Council to regard this as a challenge to their newly constituted authority, and with the aid of the Company's troops he easily defeated the opponents one after the other. At the close of the campaign, those zamindars in the district who had opposed him were dispossessed.

On the 3rd of October, 1780 a serious mutiny occurred among the Sepoys at Vizagapatam. To meet the invasion of the Carnatic by Hyder Ali of

Mysore, the Government ordered four companies of troops to embark from Madras. The result is described as follows by the newswriter in Hickey's Gazette.

"We are informed that the Sepoy troops lately draughted at Vizagapatam, having all their arms, accoutrements, baggage, etc., ready to embark on board the *Sartine* Frigue, and some other Vessels then in that harbour in order to carry them to Madras, the day of their intended departure the Governor of Vizag invited all the military officers to dine with him and the Council. The troops were to embark that afternoon. The gentlemen made a cheerful repast, drank success to the British arms, and sat in company with all the tranquility of mind imaginable, but were soon alarmed by an uncommon noise. They sent some of their servants out to learn the cause, and was soon informed that the troops draughted for Madras had mutinied, and was endeavouring to force those Sepoys who were to remain behind in the barracks to join them, which they refused. This account soon brought their officers out, who instantly resumed their commands, and ordered them immediately to march down to the beach and go on board. This they refused one and all.The grenadiers levelled their pieces took aim, discharged a volley, and killed every officer on the spot. They took the Governor prisoner and all the civil servants, set free a French spy who had been confined there for some time, and placed him at their head, at the same time put the Governor and all the civil servants in the prison from whence they took the Frenchman. They plundered the Governor's house and factory of the treasure, plate and every other valuable that night, took the civilians out the next morning, tied them, and marched them off with them, with an intent to carry their prisoners to Hyder Ali, whom themselves intended to join. After they had marched several miles from Vizag., they unty'd the Governor Mr. Casamajor and the rest of the gentlemen, and told them they might return to Vizag if they pleased. Ensign Butler, the only surviving officer on that establishment, and who very fortunately had been on a visit to a friend at some distance from the settlement, finding what had happened, drew up a detachment of the remaining troops the next morning with a few field pieces, marched at the head of them in quest of the deserters, came up with them, and discharged a few rounds of grape shot amongst them, which brought several of them to the ground. Some ran off, leaving the most part of their arms behind, and the remainder he took prisoners, marching them in the front with the field pieces in the rear."

The Zamindar of Parlakimedi, then under surveillance at Vizagapatam, was strongly suspected of having engineered this outbreak, but he boldly claimed to have saved the lives of the other Europeans in the station and was eventually given back his estate as a reward for his doubtful services.

In 1781 the Circars were within an ace of being ceded back again to Hyderabad in return for a body of horse to be placed at the disposal of the Governor-General. Lord Macartney, who had just arrived as Governor of Madras, protested, however, with such force against the proposal that it was abandoned.

Viziarama Razu and Seetharama Razu through their oppressive measures against the ryots had brought the district in a very unsatisfactory state. At the same time the British administration in the area had also become weak and corrupt thereby contributing to the further decline in the moral tone of administration. Therefore a Committee of Circuit consisting of five Members of Council was sent to investigate matters. This committee in 1784 submitted its report which condemned the administration in no uncertain terms. It stated that maladministration by Seetharama Razu and the constantly increasing taxes had resulted in a decrease of population and the ruin of several of the handicrafts; that the ryots were allowed to retain barely one-fifth of their crops; that the excessive customs duties had strangled trade; that there were no courts of justice; that the villages were composed of wretched hovels; that the zamindar was converting all his gains to private purposes; that the Raja of Vizianagaram was maintaining 7,760 troops including 1,620 sepoys dressed and armed after the European manner at an annual cost of nearly five and a half lakhs of rupees etc. The Committee therefore considered it necessary in the interests of the people at large that the power of Vizianagaram should be curbed and recommended that all his troops except some, 2,000 sibbandis for service in the malarious hills and a body-guard of 767 peons and 50 horses should be ordered to be disbanded. The committee also suggested that separate *cowles* be granted to the Jeypore, Palakonda and Golgonda Chiefs and that they should be rendered independent of Vizianagaram. They made several other proposals for the improvement of the revenue and other branches of administration.

The Raja agreed at the time to disband his troops except certain Rajputs who belonged to his own clan and in 1788 he was formally ordered to

reduce his forces and was granted a new lease at the enhanced *peshkash* of 9 lakhs recommended by the committee, his Zamindari, however, being increased by the addition of the Estates of Anakapalle, Uratla and Satyavaram.

Sitarama Razu who had for a long time usurped real authority was removed from the office of Diwan in 1784. In 1790, however, he regained his post; was dismissed by his brother in 1791; taken back again in February, 1792; removed by order of Government; and required in August, 1793 to reside in Madras, to which place he proceeded accordingly and lived on a pension from Government of Rs. 5,000 a month.

By this time the Raja's incompetent management of the estate had led to the accrual of arrears of *peshkash* amounting to no less than Rs.6 1/4 lakhs and the Chief and Council reported that the security of the revenue and the general welfare of the country would be ensured by no method short of the sequestration of the Zamindari. The Government therefore threatened that unless all the arrears were paid the estate would be attached and the Raja removed and pensioned. The Raja thereupon offered to pay Rs. 5½ lakhs of arrears (which had grown to 8½ lakhs) in three equal instalments in a reasonable time, but the proposal was rejected by the Board of Revenue and the Government, and on 2nd August, 1793 the sequestration was effected by Colonel Prendergast by taking possession of the Vizianagaram Fort. The Raja was, however, so powerful that no one would come forward to rent any part of the estate. He also intrigued to render impossible any management but his own. The sequestration continued. The Board of Revenue in 1794 stated as follows:

"The objects we had in view and which we trusted would result from the sequestration of the Zamindari, were, to reduce the military force which this Zamindar (notwithstanding the repeated orders, to the contrary, of the Honourable Court of Directors, within the last twenty years, and of successive Governments) has not only retained, but even increased; to ameliorate the condition of the inhabitants and families of those Zamindars, who had been dispossessed by the most unjust and ambitious projects of the Vizianagaram Zamindar; to afford relief to those who retained their countries, but who have been exposed to great oppressions; to heal the distractions, which had so long prevailed under a weak, fluctuating and improvident administration; to ascertain the real value of the different *parganahs* and the extent of the improper alienations of land, whether for military services or to Bramins and favourites; to clear off all debts (particularly to the Rajah's troops); to introduce some fixed principle of management, in order to secure tranquility, and the realization of an adequate revenue; and by affording the Zamindar a more intimate knowledge of the resources of his country. We hoped to provide for the punctual discharge of the Company's future demands."

It seemed therefore clear that as long as the Raja remained in the district the arrears would continue uncollected and the estate would remain unmanageable. He was accordingly directed to leave the district and proceed to Masulipatam. He was given an allowance of Rs. 1,200 a month and an advance of Rs.30,000/- was granted to him for the expense of his journey. He marched for about 12 miles and then on the 11th of May, 1794 wrote to the Chief stating his inability to proceed further owing to the turbulence of his peons, who clamoured for the arrears of their pay. These people were pacified by an assurance from the Chief that the Company would discharge their claims and the Raja was left without excuse for further non-compliance with the orders of the Government. His reluctance to leave his country was however, extreme. He considered the orders not only harsh and disparaging to his position, but as a sure precursor of the entire extinction of his power. He seems to have hoped that a determined attitude would save extreme measures, and so retired with his camp to Padmanabham, a village between Vizianagaram and Bhimilipatam and in quite the opposite direction to the main road to Masulipatam.

By this open movement he was now declared by the Chief and Council to have broken with the Company; and intelligence was shortly received which left very little doubt of his intentions. It was found that he was moving his family and effects; that some sepoys and cavalry who were in course of being paid of by the Chief of Vizagapatam had been recalled by the Raja and had actually joined him at Padmanabham; that the country peons were collecting; that promises had been made to the other Zamindars for the purpose of conciliating them; and that it was imagined to be the Raja's intention to proceed to Jeypore or further still, to the Bastar country of

Nagpur. Once in the hills, a very large force was expected to be at his disposal. On the 14th May a Company of the Raja's sepoys stationed at Vizianagaram marched off, without informing the commanding officers of their intentions, to join the Raja at Padmanabham, and three companies which were at Srungavarapukota acted in the same manner. Spies which were sent out by the Chief and Council returned with the news that it was the Raja's intention to resist the Company's forces to the last, and, if finally overpowered, "then to do as the Bobbili family did formerly" when their fort was captured by Bussy.

On the 29th May, Lieutenant Colonel Prendergast arrived at Bhimilipatam from Chicacole with five companies of sepoys and was joined by Captain Cox from Vizianagaram with two and a half companies. Madras and Vizagapatam also provided some more help in the form of ammunition etc.

By this time the number of fighting men who had joined the Raja amounted to four thousand men. He appeared to be aware that he was engaged in a desperate enterprise. He sent for Dr. Martin, who was with the troops at Bhimilipatam and to whom he was known, on the plea that he required his professional advice. The Doctor who was permitted to proceed by the Chief found the Raja prostrated both in mind and body and after prescribing for his bodily ailments, he was asked by his patient whether he would administer to a diseased mind. The doctor replied that his skill did not extend so far, but that he hoped and believed that the Raja was not inflicted in that way beyond all cure. The Raja replied by a long narrative of his grievances and difficulties and ended by entrusting the doctor with a letter for the Chief, in which he attributed his disobedience to the Company's orders to the restraint laid upon him by the rabble of sibbandis and others that had gathered around him. The Chief in his reply offered to employ force against these obstructions but to this no answer appears to have been received.

On the tidings of these events reaching Madras the Governor himself addressed a letter to Viziarama Razu informing him that the Company would settle every just demand of his troops, requiring him to repair forthwith to Vizagapatam accompanied by his personal attendants only. He was also warned that in the event of his declining compliance to these summons he would be considered in a state of armed and wilful disobedience to the Government; that the Commanding officer would proceed against him so soon as he might be prepared for that purpose; and use the most effectual means, in his power for dispersing his people and securing his person and the persons of his principal adherents. No reply was received from Viziarama Razu and on the 5th July Colonel Prendergast was directed to enforce the orders of Govenment, after giving the Raja twenty four hours for the necessary preparations for his departure.

Information reached the British that the Raja and all his men had sworn to die sword in hand. Early on the morning of 10th all was over. The following brief report from Colonel Prendergast was received at Vizagapatam the same evening:—"I arrived at Padmanabham at half past five 'O' clock this morning and finding the Raja's troops all arrived and prepared, attacked them, and after a severe conflic t for about three-quarters of an hour, dispersed them. The Raja was killed, with many of his followers. Further returns to-morrow."

Matters however were very far from being at once adjusted. The late Raja had placed the ladies of his family, with his young son Narayana Razu, a boy of 8 years of age at Annamarazupeta, a village very close to Padmanabham; and on the eve of the battle he sent intsructions to his son to surrender in the event of his own death to the Chief and Council. It had become necessary for him to yield up his life to save his honour but the "Company were very just people" and would not visit their quarrel with the father on his own son. He at the same time induced his wife and mother to swear to him that they would not kill themselves on receiving the news of his death.

As soon as the fate of Viziarama Razu and his army was known, the guardians of the women and the child fled to Kasipuram at the foot of the hills. Mukki Rajabhupala Razu, who was in charge of the place received the fugitives with every attention, and shortly afterwards escorted them to Makkuva, a place further north. Negotiations were opened with several Zamindars. The young Raja was soon surrounded with several thousand armed peons; the leaders collected the *kists* from the ryots and seemed resolved to set the Company's Government at defiance.

The Chief and Council despatched letters to the chief surviving members of the late Raja's family inviting them to come, as the Company's Government did not intend to take any further notice of

the past proceedings. This invitation was not accepted by the Raja and his supporters. Thereupon the Governor sent a letter under his own hand dated 20th August, 1794 promising that Narayana Razu and all the late Raja's family etc., would be taken under the Company's protection provided they return within 30 days. To this the boy's friends replied that they would return at an early date. Subsequently Narayana Razu was given a cowle for three years for the estate on a peshkash of rupees six lakhs, but the property was curtailed not only by the severance from it of the zamindaris which had been restored to the original proprietors, but by the absorption into the haveli lands of Anakapalle taluk and some adjacent areas.

By the permanent settlement of 1802 all the ancient zamindaris were handed over to their owners in perpetuity on a fixed peshkash and a number of other proprietary estates were also called into being by parcelling out the haveli land into a series of properties and selling these by auction subject to the payment of a permanent peshkash.

Politically, this settlement was a failure. It took no account of the personal equation among the zamindars. These men had for years been treated as feudatories rather than as mere farmers of the revenue, 'rather as captains of the borders, lords of the marches, chiefs of the hills, than as private landholders'; and the Government had been in part conducted through them, some of them having been entrusted with the responsibility of keeping the hill tribes in order. But under the new arrangement they were unceremoniously set aside; authority over the hill men was taken from them; their estates were declared liable to immediate attachment and sale for default in paying a single instalment of the peshkash; they were irritated by the working of the new revenue and judicial regulations; and the new police force, no longer under their control, took every opportunity, under cover of a pretence of enforcing law and order, of harassing and annoying them. Mr. Thackeray, the well-known Member of the Board of Revenue, wrote in 1819 as follows:

"The (police) darogahs were generally low men, such as kotwals, turned-off writers, dubashes and butlers, the dregs of the courts and cutcherry: their peons good for nothing, batta peons, such as hang about every cutcherry and follow every dubash. Sending such men into the zamindaris was as if the Government, an hundred years ago, had sent a dozen London attorneys' clerks, with some Bow Street runners, to the highlands of Scotland, to control those proud chiefs, and establish a good police in that country."

Owing to all these causes, the zamindars, for many years after the introduction of the permanent settlement, were in a chronic state of discontent and disaffection. Too often internal and domestic troubles accentuated their restlessness. Those of them who had been restored to their ancient patrimonies on the death of the Raja of Vizianagaram in 1794 returned to them, of course, without capital or credit; and in several instances an illegitimate brother or a cousin disputed their title, got together a band of paiks, and seizing upon a portion of the estate contrived to hold it by force.

At first, troops were called out and an attempt was made to chastise these disturbers of the public peace and drive them from their fastnesses. But these expeditions were by no means uniformly successful and cost much in blood and treasure. Recourse was then had to negotiation, the only result of which was to increase the insolence of the malcontents. Fresh leaders of banditti started up in every direction, and the zamindars, believing that the English were afraid to put the law in operation against them, began neglecting to pay their peshkash.

Sir Thomas Munro, Governor of Madras, in a minute of 7th January 1823 written at the close of a tour through the country, summed up the then position as follows :

"The weakness of the authority of Government in the Circars is owing to our restoring the districts of the petty zamindars, who had been subdued, contrary to the opinion of the Committee of Circuit; to our erecting by the permanent settlement a new set of proprietary zamindars; to our not reserving a single village in which we could exercise direct control over the ryots; and to our transferring to these proprietors the karnams, who are the source of all information. In open countries long under the immediate authority of Government, the permanent settlement, though it tends to conceal the real state of the country, does not seriously affect the public authority by encouraging resistance or rebellion; but in mountainous unhealthy districts like the Northern Circars, the

greater part of which has long been in the hands of a number of petty Rajas, some claiming independence, and all constantly ready to withhold their tribute and to raise disturbances whenever they see a favourable opportunity, the permanent settlement has the effect of weakening the authority of Government over the whole province, and of rendering the establishment of security and of good order more difficult than before. ..... Our system in the Circars is one of forbearance, and we are obliged to connive at irregularities which would not be tolerated in other provinces, lest we should be compelled to use force and involve ourselves in a petty warfare against banditti in a pestilential climate among hills and jungles.

The affairs of Circars can never be well administered, nor the great body of the people protected against oppression, nor the country be secured from disturbance and the incursion of plunderers, until our Government becomes more respected in those provinces than it is at present ..... No zamindari once forfeited for rebellion should ever be restored, whatever temporary evil the retention of it might occasion. All estates falling in should invariably be kept and annexed to the sirkar lands ..... The gradual extension of the sirkar lands should be our main object, because it is by having the direct possession and management of landed property that we can best protect the ryots, grant them remissions of rent, assist them in agricultural improvements and attach them to our Government."

Ten years later, at the close of 1832, the disturbances in this district and in the Parlakimedi Zamindari of Ganjam became so serious that Mr. George Russel, First Member of the Board of Revenue, was sent as Special Commissioner to investigate their causes and concert measures for their suppression. He was invested with extraordinary powers, including that of proclaiming martial law if necessary, and was supported by a strong force of troops.

To check further disturbances of the same kind Act XXIV of 1839 was passed and seven-eighths of the district was removed from the operation of much of the ordinary law, and administered directly by the Collector with extraordinary powers conferred upon him in the capacity of 'Agent to the Governor.' Several of the Zamindaris in the south were, from time to time, bought in by Government at sales for arrears of revenue, and these were formed into the taluks of Golugonda and Sarvasiddhi, but the owners of others were quieted permanently.

In 1936 Orissa State was formed and this resulted in the territorial readjustment of the Visakhapatnam district, parts of which had to be given away to the newly formed State of Orissa. The plains portion of Visakhapatnam district however, remained unaffected during these transfers. The following are the portions of the district that were transferred to Orissa :

Complete taluks of Bissam Cuttack, Jeypore, Koraput, Malkanagiri, Naurangapur, Pottangi and Rayagada and portions of Gunupur, Padwa and Parvatipur taluks from the Agency portion of the Visakhapatnam district.

The residuary portion of Ganjam district, namely Chicacole, Sompeta, and Tekkali taluks and portions of Parlakimedi, Ichchapur and Berhampur taluks of Ganjam district retained in Madras State was added to Visakhapatnam district. The major portion of Parlakimedi taluk (Plains) retained in Madras State was constituted into Pathapatnam taluk. Portions of Berhampur and Ichchapur taluks retained in Madras State were clubbed and constituted into Ichchapur Independent Sub-Taluk. Srikakualm taluk was bifurcated into Srikakulam and Narsannapet taluks. All the above changes were made for administrative convenience. After the estates were abolished under the Madras Estates (Abolition and Conversion into Ryotwari) Act, 1948 (Act, XXVI of 1948) survey and resettlement was undertaken in the taken over Estates and Inam villages.

As it was found that the enlarged Visakhapatnam district was very unweildy for administration it was bifurcated into Srikakulam and Visakhapatnam district in the year 1950. The northern half of the old Visakhapatnam district was included in Srikakulam district with headquarters at Srikakulam and the southern half was constituted into Visakhapatnam district with headquarters at Visakhapatnam.

CHAPTER III

POPULATION AND HOUSING

In this chapter a brief review is made of demographic, economic and social characteristics of the population of Visakhapatnam district as revealed at the 1961 Census count. The detailed tables in Part C of this Handbook will give the fuller statistical data. The following statement gives an idea of where the district stands in comparision with other districts of the State in respect of certain demographic data.

STATEMENT III-1

Population:

On the 1st March 1961, the reference date of the 1961 Census 2,290,759 persons were found in Visakhapatnam district which means an increase of 10.52% as against the average rate of increase of 15.65% for the State as a whole during 1951-61. Out of the above persons, 202,682 persons were found in the Agency areas and the rest in Plains areas of Visakhapatnam district. There are 442 persons per sq. mile in the district as against 339 in the State as a whole. The density of population in the district was only 400 in the 1951 Census. The density of the urban population in the district is 7,577 per sq. mile as against the corresponding State average 4,340. Amongst the districts of the State, Visakhapatnam district with an area of 5,179 sq. miles occupies 11th rank in regard to area but fourth rank as regards to population. Out of this area 2,677.4 sq. miles are under the Agency tract and the remaining 2,501.6 sq. miles under Plains portion.

Distribution and Density of Population:

The district comprises 10 taluks, two of which *viz.*, Paderu and Chintapalle taluks are completely under the Agency tract. Among the remaining eight taluks also three taluks *viz.*, Narasapatnam, Chodavaram and Srungavarapukota have a part of their respective areas under the Agency. Only the remaining five taluks are completely in the Plains portion. Vizianagaram taluk has the largest number of people (311,320) living in it followed by Visakhapatnam (306,971), Chodavaram (298,619), Yellamanchili (259,735), Anakapalle (244,481), Bheemunipatnam (243,766), Narasapatnam (241,375), Srungavarapukota (208,418), Paderu (132,145), and Chintapalle (43,929). Chintapalle taluk which is completely under the Agency tract of Visakhapatnam district recorded less than a lakh population. Visakhapatnam taluk takes first rank in density of population with 1,566 persons per sq. mile followed by the taluks of Vizianagaram (867), Anakapalle (804), Yellamanchili (749), Bheemunipatnam (723), Srungavarapukota (512), Chodavaram (503), Narasapatnam (468), Paderu (110) and Chintapalle (48).

Growth of Population:

During the past decades *i.e.*, from the dawn of the present century Visakhapatnam district has recorded only 65.46% increase in population over 1901 population as against the State average of 88.73%. Though the total growth of population is less yet there was a steady increase in the growth in all the decades except in the decade 1911-1921. The rate of increase of population in this district as a whole during the decade 1951-61 was lower than that recorded in the previous decades. In urban areas the growth was very high in the decade 1941-51 when compared to any of the previous decades. In the decade 1951-1961 the growth of population in the urban areas of Visakhapatnam district is quite high, being 35.48%. This large increase may by attributable to the industrial importance that Visakhapatnam City is gaining by the developmental activities of Hindustan Ship Building, Caltex Oil Refinery, Harbour etc., and the recognition of Malkapuram Panchayat as a new urban area in 1961.

During 1911-1921 all the taluks in the district except Anakapalle, Narasapatnam, Chodavaram, Srungavarapukota and Bheemunipatnam taluks recorded decrease of population. This was slightly more pronounced both in the Plains and Agency tracts of Narasapatnam and in the Agency tracts of Srungavarapukota and Chodavaram taluks whereas the remaining two taluks recorded almost an equal rate of decrease. The reason for the decrease in the growth of the above mentioned taluks and for the decrease of 0.06% in the entire district was due to the great Influenza of 1918 that devastated the whole country. This district recovered from this set back and exhibited growth of 11.30% in population in the next decade ending 1931. During the decade 1941-1951 this district had registered a higher rate (13.12%) in the growth of population than the previous and succeeding decades, the percentages being 11.80% and 11.30% respectively.

The statement below gives the percentage of variation of population from 1901 - 1961 for the district as a whole as well as for each taluk.

	1961	243,766	+11,147	+4.79	121,577	122,189

Rural and Urban Population:

There are 3,641 (3,524 inhabited and 117 uninhabited) villages, nine towns and one city in this district. Out of the above villages, 2,305 (2,246 inhabited and 59 uninhabited) are in the Agency tract and the remaining 1,336 (1,278 inhabited and 58 uninhabited villages) are in the Plains portion of the district. There are no towns in the Agency areas of Visakhapatnam district. 81.97% of the total population lives in the villages and only 18.03% lives in towns and in the city. Visakhapatnam city which is also the headquarters of the district accounts for 7.95% of the total population of the district and 44.07% of the urban population. The Agency tract of this district accounts for 8.85% of the total population and 10.79% of the rural population.

Sex Ratio :

The female population outnumbers the male population in this district. There are 1,005 females for every 1,000 males as per the 1961 Census findings. Their number was slightly higher in 1951 Census *i.e.*, 1,026 females for every 1,000 males. In the urban areas of the district there are 960 females for 1,000 males which is much less than at the 1951 Census and in the rural areas there are 1,015 females for every 1,000 males and this figure can be said to have considerably come down from the previous Census figure. It may, therefore, be seen that there is still a shortage of 40 females for every 1,000 males in the urban areas of the district. There may be several reasons contributing to this disparity of sexes such as immigration of male population to the industrialised centres of this district leaving their families at their native places and the large number of student population studying at the various educational institutions in urban centres. The higher sex ratio in the general population of this district in previous dacades may be due to larger emigration of male population to Burma and few other eastern countries. This emigration has stopped and several have been actually returning back. Hence, the general lowering of sex ratios recently.

Age Structure :

Able bodied persons of above 15 years and below 55 years constitute 54.89% of the total population, the remaining being accounted for by children and young persons of age below 15 years (37.38%) and old persons of 55 years and above (7.73%). The age distribution of the population is given below.

STATEMENT III-3

Age Structure

Age-group (1)	Persons (2)	Percentage (3)
0 — 4	280,351	12.24
5 — 9	315,750	13.78
10—14	260,164	11.36
15—24	384,280	16.77
25—34	371,236	16.21
35—44	288,166	12 58
45—54	213,821	9.33
55—64	119,336	5.21
65—69	21,889	0.96
70+	35,433	1.55
Age not stated	333	0.01

It may be seen from the above table that not many seem to survive to old age.

Marital Status :

As elsewhere in the country, marriage is universal. Out of the total number of 1,694,658 persons (males 845,714 and females 848,944) aged above 10 years 1,280,052 are found to be married (75.54%) and this number includes 218,324 widowed (males 33,968; females 184,356), 19,611 divorced or separated persons (males 7,350; females 12,261). The marital status of 8 persons (males 5; females 3) is unspecified and 414,606 persons comprising 24.46% of the age-group 10+, were found to be unmarried. 61.81% of males and 85.22% of females comprise the married persons in this age group. All persons below 10 years of age were treated as unmarried. In the age-group 10-14 out of the total number of 260,164 persons 1,607 males and 28,148 females were found to be married. Amongst these married persons 62 males and 371 females were found to be widowed and 5 males and 306 females were found to be divorced or separated. The population structure of Visakhapatnam district shows that at the 1961 Census count there is a shortage of 5,465 men as compared to the total number of women in the district. Though there is a shortage among the male population, the total number of women married (723,483) are more than the total number of married men (556,569). The percentage of unmarried men to the total number of male population of above 15 years is 10.83% and of above 10 years is 24.46%. This imbalance may be either due to men going to other places to seek their livelihood leaving their wives at home or women coming to their parents for confinement and temporary stay or some men getting married to more than one woman or the females usually getting married in the early ages. This question deserves a deeper study.

Literacy and Education :

The development of a country largely depends upon the education of its people and hence great stress has been laid on education in the Five Year Plans. Education is the systematic instruction, schooling or training given to young persons in preparation for work in life, while literacy is the ability of a person to read and write in order that he may communicate with the outside world. During the Census count detailed information regarding literacy and educational levels of each person was collected and the particulars so tabulated as to facilitate proper

planning for the improvement of educational facilities with reference to the needs of the country in various fields.

At the present Census a person who can both read and write any single language is taken as a literate. A person who can merely read but cannot write has not been treated as a literate. The test for reading is the ability to read any simple letter. Children aged 4 years and below have been automatically treated as illiterates. If a person has been successful in a recognised examination or examinations, the highest qualification so obtained has been taken as the level of education of that individual. Columns 18 and 19 of the Village and Town Directory given in Part D of this book indicate the number of literates among males and females in each village and in each ward/locality of a town. The following statement gives at a glance the total number of literates as well as their percentage to the total population in the district and in each of the taluks of the district sexwise for the total, rural and urban population.

It may be seen from the above statement that only 17.15% of the population of the district is literate against the corresponding figure of 21.19% for the State as a whole. The percentage of literacy in Chintapalle and Paderu taluks is very low compared to other taluks of the district. The incidence of illiteracy among females is very heavy. Only 9.31% of the female population is literate and the remaining 90.69% of females are illiterates. 25.03% of males, however, claim literacy.

The following table will illustrate the total literates together with their percentage in the district according to the different age-groups and sex-wise.

The large number of fulltime students in the age-group 15-34 in this district is attributable to the existence of the Andhra University and various other educational institutions in the district specially at Waltair. The number of educational institutions and scholars studying therein in the year 1960-61 are given in a separate statement under Administrative Statistics.

Working Population :

Persons engaged in productive work whether they derive income or not have been treated as Workers at the 1961 Census. In respect of seasonal work like Cultivation, Livestock, Household Industry etc., if a person had some regular work for more than one hour a day throughout the greater part of the working season, he has been recorded as a Worker. Persons temporarily incapacitated from the work at the time of Census enumeration due to illness or other causes are also treated as Workers depending on what they normally did. Undertrial prisoners are also treated as workers provided they did some productive work before they were apprehended. Thus all workers in any branch of productive work have been netted as workers. All other who did not do any productive work were classified under Non-Workers. They are (1) fulltime students, (2) persons engaged in unpaid home duties (housewife), (3) infants and children not attending school, (4) retired persons, rentiers or royalty receivers, (5) beggars, vagrants or independent workers without indication of source of income, (6) convicts in jail or inmates of penal, mental or charitable institutions, (7) unemployed persons seeking employment for the first time and (8) persons employed before but now out of employment and seeking work.

It may be seen from the classification of Workers and Non-Workers given above, that the definition of a Worker has been liberally conceived. Any person who spends more than an hour per day on any particular productive occupation has been classified as a Worker. In this district 52.93% of the total population is found to be economically active.

There are 856,265 persons in the age-group 0-14 years representing 37.38% of the total population. The recent trend has been to regard this age-group as representing the school going population. With the

introduction of compulsory education this age-group will henceforth be automatically eliminated from the working population. The 1961 Census shows that 117,760 persons of this age-group in this district have been working instead of being whole time students. That is 13.75% of the non-adults constituted the earning members in the population.

Persons engaged in Agriculture (Cultivation and Agricultural Labour) as their principal work constitute 71.63% of the total population. The following table based on a 20% sample of Household Schedules gives the figures of sample Households engaged in Cultivation classified by interest in land and size of land cultivated in total, rural and urban areas separately.

STATEMENT III-7

SAMPLE HOUSEHOLDS ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED IN TOTAL, RURAL AND UNBAN AREAS SEPARATELY

(Based on 20% Sample)

Non-Agricultural occupations provide employment to 28.37% of the total working population. The following table illustrates the broad categories of Workers other than in Cultivation and Agricultural labour and number of persons in each with their percentage to the total working population.

	Total persons	Percentage
Other Services (IX)	126,607	10.44
Household Industry (IV)	79,147	6.53
Trade and Commerce (VII)	47,347	3.91
Mining *etc.* (III)	30,424	2.51
Manufacturing other than Household Industry (V)	30,225	2.49
Transport *etc.* (VIII)	22,331	1.84
Construction (VI)	7,903	0.65

Medical facilities:

The district headquartes has very good medical facilities *viz.*, King George Hospital, Mental Hospital, T. B. Hospital and other Government Hospitals in Visakhapatnam and at the taluk headquarters provide necessary medical facilities to the population of the district. It cannot yet be said that the medical facilities available in the district are adequate. In view of the large number of medical institutions and also the medical college in the district, there are 359 practitioners of modern medicine including 54 women practitioners in this district as per the 1961 Census

findings. This means that on the average there is one Doctor for every 6,389 people and one Lady Doctor for every 42,421 women. There are also, 6 Dentists, 398 Nurses and 400 Midwives and Health Visitors but their number is quite disproportionate to the total population in the district. The following table illustrates the average number of Beds, Doctors, Dentists, Nurses, Midwives and Health Visitors per 100,000 of total population.

	Number	Per 100,000 population
Beds	2,151	93.90
Doctors	359	15.67
Dentists	6	0 26
Nurses, Midwives and Health Visitors	798	34.84

There are about 435 persons who practise Ayurvedic and Homeopathic systems of medicine. and about 262 persons who profess to be Physicians and have been classified under 'Others.'

Other Professions :

There are 835 Architects, Engineers and Surveyors in the district. Of these, 307 are Civil Engineers (including Overseers), 65 Mechanical Engineers, 132 Electrical Engineers, 44 Chemical Engineers, 6 Mining Engineers, 8 Metallurgical Engineers, 195 Surveyors and 77 others who have not been classified elsewhere.

On the educational side there are 672 University Teachers, 1,064 Secondary School Teachers, 4,176 Middle and Primary School Teachers, 5 Nursery and Kindergarten School Teachers and 1,074 Teachers who have not been classified elsewhere.

On the juristic side there are 30 Judges and Magistrates, 292 Legal Practitioners and Advisers, 17 Law Assistants and 67 Jurists and Legal Technicians (including petition writers who have not elsewhere been classified).

On the communications side there are 241 Railway Engine Drivers and 246 Firemen. There are 1,485 Motor Vehicle and Motor Cycle Drivers, 1,515 Cycle Rickshaw Drivers and Rickshaw Pullers and 1,157 Animal drawn vehicle drivers.

Table B-V in Part C gives full details regarding the people of various occupations among the working population available in the district classified by sex of persons. All these occupations have been classified according to the National Classification of Occupations. It provides an interesting field of study to the discriminating reader and will help to assess the requirements and the availability of resources and talent.

Scheduled Castes Population :

As half of the district is covered by the Agency tract mainly inhabited by the hill tribes, the Scheduled Castes population is less than the Scheduled Tribes population in this district. The total Scheduled Castes population of this district as per the 1961 Census is 185,046 persons representing 8.08% of the total population while the total Scheduled Tribes population is 213,820 persons representing 9.33% of the total population. The proportion of Scheduled Castes population (8.08%) is very low compared to the State average of 13.82%. The highest concentration of Scheduled Castes population is found in Narasapatnam Taluk representing (11.13%) of the general population of that taluk followed by Vizianagaram (10.01), Yellamanchili (9.88), Bheemunipatnam (9.43). Srungavarapukota (9.08), Visakhapatnam (6.96), Chodavaram (6.95), Anakapalle (6.06) Chintapalle (1.78), and Paderu (0.91).

Of the total population of Scheduled Castes 92,064 are males and 92,982 are females and this shortage of males is not different from the characteristics of the general population of the district. The extent of literacy among the Scheduled Caste population is low and more so among the females. Only 2,860 females (3.08%) and 13,859 Males (15.05%) of the Scheduled Castes are literates.

102,803 persons are workers representing 55.56% of the total Scheduled Castes population. Their major occupation is Agriculture. Very few have taken to Other Services, Household Industry, Manufacture and Communications. This seems to be due to lack of appropriate training and orientation. There are very few persons who have reached even the Matriculation or the Higher Secondary stage. The actual figure for this stage is 530 males and 52 females representing 0.63% and 0.06% of their respective numbers. These figures by themselves aptly illustrate the need for the uplift of this community through more advanced education and technical training.

The following table shows the castewise population particulars of the various Scheduled Castes enumerated in Visakhapatnam district at the 1961 Census.

Scheduled Tribes not specified	1	57	58

Scheduled Tribes:

The Scheduled Tribes population of the district is 213,820 as per the 1961 Census. A majority of the Scheduled Tribes population live in the two Agency Taluks of Paderu and Chintapalle. The population of Scheduled Tribes (9.33%) to the total population in the district is much higher than the State average of 3.68%. The highest concentration of Scheduled Tribes population is in Paderu taluk (92.64) which is fully an Agency area and it is followed by Chintapalle taluk (82.02), Chodavaram (6.81), Narasapatnam (6.70) and Srungavarapukota (6.40). In the remaining five taluks the population of Scheduled Tribes is very negligible. Their economic condition is no better than that of the Scheduled Castes. Their educational achievements are hardly worth mentioning. Their main occupation is cultivation and Agricultural Labour and a few of them work in Household Industry, Mining, Quarrying etc.

The following table illustrates the population particulars of the various Scheduled Tribes enumerated in Visakhapatnam district.

Social and Religious Groups :

Hindus form the bulk of the population constituting 98%. After this major religion, Muslims (1.22), Christians (0.74), Jains (0.02), Sikhs (0.01) and the Buddhists (0.01) come next in order. There are however, only 323 Buddhists, 390 Jains and 182 Sikhs living in this district.

Migration :

Migration of persons from one part of the country to another is generally motivated by economic, social and cultural considerations and is not an uncommon feature. The desire to eke out livelihood and to lead a better standard of life prompts a person to migrate from place to place. The emigration from and immigration into a country therefore largely depends upon its prosperity and economic wealth. Visakhapatnam district, half of which is covered by Agency tract is not a very prosperous district agriculturally compared to the adjoining district of East Godavari. The agricultural lands in the district are not served by any major irrigation projects though a few minor projects exist here and

there. The district can therefore look for better industrial prosperity than agricultural. With the establishment of the Hindustan Ship Building Yard, Caltex Oil Refinery, and an Industrial Estate, Visakhapatnam City is gradually gaining industrial importance and attracting population from the neighbouring areas and also from other States. If the contemplated Steel Plant is also established together with the Coromandel Fertiliser Co., the importance of the place will go up higher. Being a centre of learning, young and bright students come both from within and outside the district for persecuting higher studies. Physically the district is surrounded by Srikakulam district on the north, Bay of Bengal on the east, East Godavari and Bay of Bengal on the south and Koraput district of Orissa State on the west. Among the three surrounding districts East Godavari is the most prosperous one. Srikakulam is not more forward than Visakhapatnam. Koraput district, another hilly terrain is an economically backward district. A detailed study of the migration trends at the 1961 Census in this district reveals that 123,955 persons (61,603 males and 62,352 Females) have immigrated into this district of which 93,546 persons (43,872 males and 49,674 females) are from the other districts in the State; 24,397 persons (14,126 males and 10,271 females) are from other States in the country; and 6,012 persons (3,605 males and 2,407 females) are from other countries. The bulk of the immigrants are from the adjoining districts of East Godavari 36,519 persons (14,451 males and 22,068 females) and from Srikakulam 31,733 persons (13,332 males and 18,401 females). The other districts of Andhra region that have contributed migrants to this district in the descending order are West Godavari 8,518 persons (4,788 males and 3,730 females), Krishna 4,962 persons (2,847 males and 2,115 females), Guntur 3,926 persons (2,560 males and 1,366 females), Nellore 1,727 persons (1,117 males and 610 females) Chittoor 850 persons (575 males and 275 females) Cuddapah 809 persons (540 males and 269females), Kurnool 731 persons (585 males and 146 females) and Anantapur 575 persons (446 males and 129 females).

The largest number of immigrants that came from Telangana region is from Hyderabad district 949 persons (591 males and 358 females). It is followed by the districts of Warangal 336 persons (280 males and 56 females), Karimnagar 301 persons (271 males and 30 females), Khammam 299 persons (269 males and 30 females), Mahbubnagar 287 persons (260 males and 27 females), Medak 279 persons (237 males and 42 females), Nizamabad 272 persons (261 males and 11 females) and Adilabad 230 persons (229 males and one female).

Out of 24,397 persons immigrated from other States, Orissa has contributed the largest number of 8,781 persons (4,516 males and 4,265 females). It is followed by Madras 5,071 persons (2,945 males and 2,126 females), Kerala 2,720 persons (2,024 males and 696 females), West Bengal 1,979 persons (975 males and 1,004 females), Mysore 1,045 persons (572 males and 473 females). The other States have contributed less than a thousand persons each. Among the immigrants from the foreign countries the largest number is from Burma and it is followed by Pakistan. Considerable number of immigrants have come from the U.S.A., U.S.S.R., and U.K also.

It is of interest to observe that among the immigrants from both the neighbouring districts of Srikakulam and East Godavari female immigrants are larger in number than the male immigrants. This disparity in the sex ratio among the immigrants from these two districts may be on account of marriage ties. The majority of the immigrants from other districts have taken to Agriculture, Household Industry and Other Services. More than half of the immigrants are Non-Workers and are presumbly the housewives and family members of the persons migrated.

As regards emigration of persons from this district to the other districts of this State it is observed that 134,708 persons have gone out as emigrants. The largest number of emigrants are to East Godavari 56,726 persons (23,946 males and 32,780 females) it being a fertile district. It is followed by Srikakulam 22,218 persons (8,547 males and 13,671 females), West Godavari 26,481 persons (12,191 males 14,290 females), Krishna 15,872 persons (9,066 males and 6,806 females), Guntur 2,693 persons (1,431 males and 1,262 females), Nellore 643 persons (385 males and 258 females), Chittoor 425 persons (205 males and 220 females), Cuddapah 85 persons (40 males and 45 females), Anantapur 280 persons (155 males and 125 females) and Kurnool 686 persons (271 males and 415 females) of the Andhra region. So far as Telangana region is concerned the largest number of emigrants have gone to Nalgonda district, presumably on account of the Nagarjunasagar Dam construction. The next in order are Hyderabad 3,256 person (1,742 males and 1,514 females), Khammam 1,135 persons (710 males and 425 females),

Warangal 261 persons (154 males and 107 females), Karimnagar 112 persons (45 males and 67 females), Nizamabad 109 persons (62 males and 47 females), Adilabad 102 persons (66 males and 36 females) and Medak 54 persons (30 males and 24 females). Hyderabad on account of its being the capital of the State might have attracted a large number of emigrants from Visakhapatnam.

Housing :

Man requires shelter as his basic need next to food and clothing. It is an evident fact that many able bodied people specially in the urban areas are deprived even the barest minimum of shelter. It is not an uncommon sight to see in the urban areas specially in busy bazaars many poor hunger-striken people eking out their livelihood in the busy hours of the day but sleeping on pavements with no shelter whatsoever. The migration of the population from the rural areas to urban areas and the rapid increase in the population have further accentuated the accommodation problem as the number of new constructions have not kept pace with the increasing demand. The pressure on land in the urban areas has become so acute that the land has become dear and it has gone beyond the reach of the common man and consequently slums and unhealthy localities are rapidly growing up resulting in sub-human living conditions.

With a view to improving the situation and for future planning of housing programmes, the Government of India suggested to the National Buildings, Organization working under the Ministry of Works, Housing and Supply to collect in collaboration with the Registrar General, India, New Delhi during the 1961 Census operations, the basic data on housing to meet the needs of the National Buildings Organization. The data on housing did not merely relate to residential housing but also covered places of business, workshops, schools, restaurants, places of entertainment, hospitals etc. From this information so gathered it has now become possible to assess not only the residential housing but also the adequacy or otherwise of the requirements of Industry, Commerce, Education, Public Health Institutions etc. The data on housing was collected on a standardised All India Schedule called the 'Houselist' when the Housenumbering was done a few months before the general Census Enumeration.

According to the data collected from the Houselists the total number of Census Houses in Visakhapatnam district is 569,424 out of which 483,092 are in rural areas and 86,332 are in urban areas. 484,102 Census Houses out of the total number of 569,424 are used wholly as dwellings, 1,451 as shop-*cum*-dwellings and 1,287 as workshop-*cum*-dwellings. Some of the part dwellings like laundry-*cum*-dwellings, barber's saloon-*cum*-dwellings have not been shown separately but clubbed under the category "Others". If these houses are also taken into account the number of houses used wholly or partly as dwellings will go up slightly.

It is seen that the proportion of dwellings to population in the rural areas is more than in the urban areas. Thus for a rural population of 1,877,724 persons there are 412,229 dwellings while for an urban population of 413,035 persons there are 71,873 dwellings. This means that in urban areas there are 174 houses for every 1,000 population and in the rural areas 220 houses accommodate every 1,000 persons. It is obvious from this figures that there is a terrific over crowding in the residential housing. The increase in the residential accommodation has not kept pace proportionately with the growing needs of a fast developing population.

The proportion of Census Houses as shop-*cum*-dwellings in the district is very small and is only 3 per 1,000 houses. Workshop - *cum* - dwellings are less than shop-*cum*-dwellings and their proportion amongst the total number of houses is low being only about 2 per 1,000 in the district. Out of 1,287 workshop-*cum*-dwellings 784 are in the rural areas and 503 are in the urban areas of the district. This illustrates that rural areas of the district are not very backward in the use of machines and other mechanical implements.

Hotels, Hostels, Dharmashalas etc; These account for 0.08% of the total number of Census Houses in the district and the percentage is lower than the State average of 0.14%. The proportion is higher in the rural areas than in the urban areas.

Shops excluding eating houses: These number 4,947 in the district accounting for 9 per 1,000 and the corresponding State average works out to 1.3%. The urban proportion as everywhere in the State is higher than the rural. The number of shops in the district shows that it has yet to improve commercially.

The proportion of *business houses and offices* to the total Census Houses is only 0.2% in the district *i.e.*, 1,162 out of a total number of 569,424 houses.

The number of houses of this category in the urban areas is more than in the rural areas, for obvious reasons.

There are 2,531 Census Houses in the district which are used as *factories, workshops*, and *worksheds*, 1,520 being in the rural areas and 1,011 in the urban areas. It means that there are about 4 houses used as factories, workshops and worksheds out of every 1,000 houses in the district.

There are 1,654 Census Houses used in the district which are used as *schools* and other *educational institutions*. Of these 1,371 are in the rural areas while 283 are in the urban areas. For every 1,000 houses there are 3 houses under this category in the district.

There is one school for every 1,370 persons in the rural areas while it is one for every 1,459 persons in the urban areas of the district.

There are 1,678 *restaurants, sweetmeat shops and other eating places* out of a total number of 569, 424 Census Houses in the district. Out of this number 1,086 are in the rural areas and 592 are in the urban areas. In the rural areas their proportion worksout to 2 for every 1,000 Census Houses.

3,794 Census Houses are being used as *places of entertainment, recreation etc., including temples, churches, mosques*; of which 3,152 are in the rural areas while 642 are in the urban areas. The higher proportion in rural areas is naturally due to a large number of places of worship and also on account of the existence of village chavadis etc., in almost all villages.

There are only 259 Census Houses used as *Hospitals, Public Health Institutions, Dispensaries, Clinics* etc., in the district. Of these 130 are in the urban areas and 129 are in the rural areas. The medical facilities are grossly inadequate especially in the rural areas and hence no further comments are considered necessary on the existing state of affairs.

There are 21,942 houses classified under the category 'Others' out of a total number of 569,424 Census Houses in this district. As explained above this category includes houses put to miscellaneous uses like cattle sheds, garages etc. Consequently a distinct pattern is not discernible. The proportion of houses in this category is higher in this urban areas than in the rural areas.

House types in Visakhapatnam :

There is a striking resemblance in the pattern of Housing to some extent between Visakhapatnam and Srikakulam districts and distinct from that of East Godavari and West Godavari districts. The construction of a house in a backward economy like ours is conditioned by extraneous factors like climatic, economic, social and cultural conditions, tradition and mostly on the local availability of building material. The district has a fairly long coast line with an extreme inland extension dominated by the Eastern Ghats which run roughly parallel to the sea coast. Hence one cannot fail to observe the peculiar conical huts, so shaped all along the coastal belt, with a view to resist the cyclonic weather. The area abounds in palmyra trees which form the cheapest material available for house construction. The beams, the rafters, the roofs and even the rope for securing all these are obtained from the palmyra tree.

In the Agency tracts of the district the houses have long roofs and are constructed in a row with common walls. The hillmen of the area obtain all the material needed for the construction from the forest. A dwelling to the poor tribal may cost him hardly anything except his own labour.

In the urban areas of Visakhapatnam district particularly in Visakhapatnam City, constructions are greatly influenced by the modern design and architecture. The Caltex residential colony of the Caltex Petroleum Company in Visakhapatnam contains the most modern type of houses. The modern constructions on the uplands overlooking the sea are indeed splendid! However the older constructions, which are quite a few, have tiled roofs with steep incline so as to resist the strong and persistent gales.

Wall Material :

In Visakhapatnam district as in other parts of the State, houses with mud walls constitute the largest proportion (80.1%) and next comes houses with brick walls (12.1%) and stone walls (4.2%). Houses having grass, leaves, reeds or bamboo as wall material

constitute only a very small proportion (3.3%). In the rural areas 85.8% of the houses have mud walls, 8.2% brick walls and 2.3% stone walls. Houses having walls with grass, leaves, reeds or bamboos as their main material constitute 3.6% only. In the urban areas of the district 48.5% of the houses have mud walls and 34.4 % have brick walls. Houses having stone as the main material for their walls consitute 14.6%. Paderu taluk has recorded, as per the 1961 Census findings, the highest percentage (94.8%) of the houses having mud walls in the district. Next in order are the rural areas of Bheemunipatnam taluk (90.8%), Chodavaram taluk (89.4%), Srungavarapukota taluk (87.8%), Visakhapatnam taluk (87.0%), Vizianagaram taluk (86.9%) Narasapatnam taluk (86.2%) and Yellamanchili taluk (77.8%). Chintapalle taluk has recorded the lowest proportion (47.1%) but it has recorded the highest proportion of houses (49.0%) having grass, leaves, reeds and bamboos as the chief wall materials. In the urban areas, Anakapalle taluk has recorded the highest proportion (75.2%) of the houses having brick walls and it is followed by Vizianagaram taluk (52.3%), Chodavaram taluk (34.3%), Yellamanchili taluk (33.1%). Visakhapatnam taluk (22.6%). Bheemunipatnam taluk (12.7%) and Narasapatnam taluk (12.0%). The largest proportion of houses having stone as the main wall material has been recorded in the urban areas of Visakhapatnam taluk (28.0%). Bheemunipatnam taluk comes next in order recording 20.4.% The proportion of houses having timber, C. I. sheets or other metal sheets, cement concrete etc., as wall materials is negligible in this district.

Roof Material :

Thatch is the most common roof material used in this district. Like in other districts, houses with grass, leaves, reeds, wood or bamboo as roof material constitute the largest proportion (81.9%.) Such houses in the rural areas constitute 87.3% while in the urban areas they form 51.6% only. Tiled houses comes next in order constituting 11.3% of the total Census Houses. Though such houses in the rural areas constitute only 7.7% in the urban areas they account for 31.7%. Houses having brick and lime as the main roof material constitute 3.2% in the district while in the rural areas they constitute 1.3% and in the urban areas they form 13.7%. The proportion of houses having other types of roofs are quite negligible. Amongst the taluks, Paderu and Chintapalle have recorded a very high proportion *i.e.* (98.8%) and (93.4%) respectively of houses having grass, leaves, reeds, wood or bamboo as the main material. In the rural areas of other taluks also the proportion of such houses is more than 80%. Tiled houses are more predominant in the urban areas of Anakapalle, Vizianagram, Bheemunipatnam, Chodavaram, Visakhapatnam, Yellamanchili and Srungavarapukota taluks. Anakapalle taluk has recorded the highest proportion *i.e.* 50.0% of urban houses and 12.7% of rural houses having tiled roofs. Vizianagaram taluk comes next in order. Even in regard to houses having brick and lime as the main roof material the urban areas of Anakapalle taluk have recorded the highest proportion (20.0%) and it is followed by Vizianagaram taluk (12.0%). Houses having concrete and stone slabs as main roof material are found in some small proportion in the urban areas of Bheemunipatnam and Visakhapatnam taluks. The proportion of houses having other types of roof material is small and negligible.

CHAPTER IV.

AGRICULTURE

The total annual rainfall in the district during the year 1960-61 was 756.9 m.m. of which 479.0 millimetres of rain was received in the south-west monsoon period (June to September) and 171.5 millimetres in the north-east monsoon (October to December) and 105.9 millimetres during hot-weather period (April to May). The south-west monsoon and the north-east monsoon are equally important for the district, though the former provides sufficient rain for the early dry crops. Rain is required in the months of May and June for taking up preparatory cultivation.

The rain is once again required in July to September for the late dry crops and for the transplantation of paddy. Moderate rain is required in October, and November to refresh the standing crops. Again light rain is required during the period from December to February for sowing "Pyru" crops. Thus for a normal season there should be equitable distribution of rainfall almost every month of the year.

The soils in the district belong chiefly to the regar or black cotton and red ferruginous series. Near the hills the red varieties are predominant but further away towards the coast the soil becomes finer black clay with a tendency to crack when dry. This is, however, a very different soil from the deep fissuret regar of the Rayalaseema districts. In Yellamanchili and Narasapatnam taluks red ferruginous represents a major portion of the soil. The regar soil covers only a small portion.

Seed is generally sown broadcast in the case of many of the crops like pulses, gingelly and a few minor millets. Bajra, dry ragi and jowar are sown in plough furrows. Groundnut is dibbled behind the plough furrow. Paddy seedlings raised in a nursery are transplanted in puddled fields. Sugarcane seeds are planted in furrows.

The agricultural practices in this district do not differ greatly from those of the other parts of South India. There are however, some variations within the district due to the differences in soil, the receipt of rainfall and facilities for irrigation and also the status of the ryot himself. There are three distinct agricultural seasons, namely, (i) Punasa, the period from April to August when the staple dry grains are sown, (ii) Peddapanta, the regular wet crop season from August to December, and (iii) Pyru, the period from January to March. The year is also divided into 27 *Karthies* or stars of the Lunar Zodiac and the ryots commonly hold that each of those asterisms is the proper season for certain agricultural operations. The result is that cultivation of some sort or other is in progress for about 10 months in a year. The Punasa crops,(bajra and ragi)are by far the most important as they comprise together with rice, the staple food crops of the mass of the population. This is the reason why failure of the south-west monsoon could very easily result in a great calamity for the district.

Crop pattern and calendar of sowing and harvesting operations of important crops in the district.

In a normal year 78.8% of the total sown area in Visakhapatnam district will be under food crops and 21.2% will be under non-food crops. The chief food crop in the district is paddy and covers 32.2% of the total sown area in normal years. It is followed by bajra (13.3%), ragi (7.9%) and jowar (3.2%). Other millets will cover an area of (3.6%) while pulses and other food crops cover 11.2% and 7.4% respectively. Among the non-food crops groundnut occupies the chief place covering 8.6% of the total sown area. Gingelly comes next accounting for 6.2%. Other non-food crops individually constitute negligible percentage. The particulars like the area under principle crops, yeild rates per acre of the principle crops etc; in this district during the decade 1951-61 are given in Part B of this Book under Administrative Statistics—Series 2—Agriculture and my be referred to.

The sowing and harvesting months of the important crops grown in Visakhapatnam district are given in the next page.

The effects of any departure from normal monsoon conditions upon this time table of agricultural operations are given below :

STATEMENT IV—3

Month	Normal weather	Effects of unseasonable or abnormal weather on the various crops
(1)	(2)	(3)
January	This is the first dry month, after the monsoon rains, with fine weather, dry days and cold nights with dew fall	There is generally no rainfall in this month. The dry weather facilitates the threshing of paddy, harvest of sugarcane, pulses, etc. Any heavy rainfall if received during this month will be an obstruction for the main agricultural operation. But moderate rainfall will be beneficial to the standing dry crops such as chillies, cotton, vegetables etc., and is conducive to the sowings of dry crops such as gingelly, ragi, vegetables and also facilitates the transplantation of second crop of paddy in Vizianagaram, Anakapalle, Narasapatnam, Yellamanchili and Chodavaram taluks
February	This is also a month of fine weather generally with occasional showers The days prove warmer but nights continue to be cool.	This month is also generally rainless and the dry weather facilitates the harvest of sugarcane and other dry crops such as pulses, garden crops, jowar. If there are excess of rains, they affect the quality of tobacco leaves in the process of curing and retard the juggery manufacture. Continuous rainfall affects the drying of ragi and chillies and retards the harvest of sugarcane Moderate rainfall facilitates the late sowing or pyru, gingelly and other dry crops such as ragi, vegetables etc.

STATEMENT IV—3—*Contd.*

Month	Normal weather	Effects of unseasonable or abnormal weather on the various crops
(1)	(2)	(3)
February—*Concld.*		Occasional showers will be advantageous to all the standing crops, but the absence of rainfall is favourable to harvest but necessitates irrigation of garden crops such as chillies, onions, vegetables etc.
March	Fine weather; generally dew abating with occasional showers; cold abates	This month is also generally rainless and the dry weather facilitates the harvest of sugarcane, making of jaggery, curing of tobacco, etc., and harvest of dry crops such as ragi, chillies and other garden crops. Heavy rains will retard the harvest of dry crops. Moderate rains will be beneficial to the standing crops and for the sowings of gingelly and ragi. Absence of rainfall necessitates the irrigation of standing crops such as ragi, chillies and other garden crops.
April	Fine weather generally with occasional showers; the days and nights get warm	April is favourable for the agriculturists and the occasional showers facilitate the ryots to commence preparation for cultivation. Heavy and continuous rains during the month facilitate transplantation of sugarcane but retard the harvest of ginelly, ragi, chillies and dalwa paddy. Moderate rainfall though retards the harvests of paddy crops, facilitates the standing dry crops

STATEMENT IV-3—*Contd.*

Month	Normal weather	Effects of unseasonable or abnormal weather on the various crops
(1)	(2)	(3)
April—*Concld.*		Absence of rainfall is favourable for the harvest of dry crops but postpones the agricultural operations such as ploughing, preparation of seed beds etc.
May	Fine weather with occasional showers; The days are very warm and nights sultry	Excessive rainfall causes damage to the standing dry crops such as pyru, gingelly and ragi. Moderate rainfall is beneficial to the standing sugarcane crops and other tender dry crops. Absence of rainfall postpones the sowings of dry crops as well as paddy and ploughing operations and ultimately postpones the transplanting operations of paddy.
June	South-west monsoon sets in. Moderate rains are received throughout the district and tanks get adequate supply of water. The busiest agricultural season begins	Excess or continuous rainfall interferes with the sowing of the groundnut and gingelly crops, which do not require much irrigation and will be prejudicial to the standing tender crops. Moderate rainfall is quite helpfull for transplantation of dry crops such as ragi, bajra, etc., and the preparation of paddy seed beds. Absence of rainfall postpones all the agricultural operations mentioned in the above para.
July	South-west monsoon in progress; winds continue	Excess or continuous rainfall is prejudical to the standing dry crops such as gingelly, castor, dry paddy etc , but the irrigation sources get plentiful supply of water for the brisk transplantation of paddy which is the staple food of most of the people in the district. Moderate showers are highly useful to the standing dry crops and facilitate planting and sowing of other dry crops and facilitate paddy transplantation Absence of rainfall postpones the agricultural operations and delays the transplantation of paddy and may affect the normal yields of the crops.
August	South-west monsoon active; winds continue; cold weather with moderate rains throughout the district	Heavy or continuous rainfall is highly prejudicial to the standing crops and recently sown dry crops It postpones the harvest of gingelly and other dry crops ripe for harvest but it is beneficial to the rainfed tanks and other sources.

STATEMENT IV-3—*Concld.*

Month	Normal weather	Effects of unseasonable or abnormal weather on the various crops
(1)	(2)	(3)
August—*Concld.*		Moderate rainfall is useful to the standing crops and helps the transplantation of paddy. Absence of rainfall postpones the transplantation of paddy though it facilitates the harvest of dry crops.
September	South-west monsoon active; heavy winds abate. Fine weather with poor rains	Heavy and continuous rainfall provides sufficient water supply to the tanks but it retards the transplantation of paddy and prevents harvest of dry crops and also affects the standing dry crops. Moderate rainfall is beneficial to the standing wet and dry crops and facilitates the completion of paddy transplantations. Absence of rains retards the growth of the standing crops and leads to the failure of the paddy crops
October	Setting in of north-east monsoon about the middle of this month; weather cools down with heavy rains in coastal taluks	Heavy and continuous rains will be beneficial to the standing paddy crop, but affect the standing dry crops and crops sown recently, and also prevents the sowing of dry crops such as tobacco, jowar and pulses. Heavy rains with cyclonic winds might damage the standing paddy crop. Moderate rainfall is quite welcome for the tender and standing crops and facilitates the sowing of pyru crops Absence of rainfall affects the paddy crop badly which requires sufficient supply during this month but facilitates the harvest of dry crops
November	North-east monsoon active	Heavy and continuous rainfall as usual is prejudicial to the paddy, tobacco and other cereals and pulses. It also retards the planting of tobacco. Medium rainfall well distributed is beneficial to all the standing crops both wet and dry. Absence of rainfall facilitates the harvest of the standing crops such as paddy and pulses.
December	Bright weather with rare occasional showers; north - east monsoon closes. Dewfall begins. Nights become very cool.	This is generally a dry month No rainfall is required. Any rains received during this month will be injurious to the standing crops.

CHAPTER V

IRRIGATION

Visakhapatnam distrist, though half of its area is covered by hilly terrain and forest area, is predominantly an agricultural district. The land utilisation statistics of 1961-62 reveal that during 1961-62 the total cropped area was 14,10,532 acres accounting for 45.5% of the total area of the district. The net area irrigated was, however, 3,43,737 acres only. In this district medium sized rivers and hill streams flow and hence perennial sources of irrigation are lacking. The major irrigation sources in this district are the rivers flowing in the district, the hill streams and irrigation tanks. As a large area of the district was under Zamindari system till 1949 the irrigation potential of the district was not adequately tapped. The Government under the Five Year Plan Scheme contemplated various irrigation schemes to improve irrigational facilities and there by to make the district atleast self-sufficient in food.

The chief rivers in the district are Sarada, Varaha, Thandava, Gosthani, Champavati (Nellimerla) and Meghadrigedda. River Machkund also known as 'Paleru' and 'Sileru' flows on the northern border of Paderu and Chintapalle taluks and does not afford irrigation facilities. Amongst the rivers that flow, Sarada, Thandava and Varaha rivers provide maximum irrigation facilities in this district. The other irrigation schemes worth mentioning are the Saragudugedda Irrigation Scheme and the Gambheeramgedda Irrigation Scheme. There are two fresh water lakes *viz.*, Komaravolu Ava and Kondakarla Ava which are although of not great depth have not dried up and proved themselves to be very useful for irrigation purposes. Across Sarada, Varaha and Thandava rivers anicuts have been constructed both by Government and by previous Zamindars and they irrigate lands in Narasapatnam, Yellamanchili and Anakapalle taluks. With the abolition of the Zamindari System all the private dams constructed by the Zamindars and Proprietors came under the control of the Government.

The regulator constructed at Gokivada village in Yellamanchili taluk diverts the waters of Gokivadagedda into Sarada River which in its lower reaches is very shallow and provides for irrigation of lands situated in the lower Sarada Basin of the Yellamanchili taluk. The Godeti Anicut across the Sarada River near Anakapalle waters the Komaravolu Ava. The Peddakattu across Sarada River diverts waters into Kondakarla Ava. The Komaravolu Ava and Kondakarla Ava thus afford considerable irrigational facilities in this area. The Sarada, Varaha, and Thandava river systems consists of a series of dams and anicuts constructed across these rivers at various points. Water for irrigation is provided either directly through the channels from the headworks or by diverting the waters first into the irrigation tanks and then to the fields from the tanks. The particulars of the area irrigated under these three river systems and in Anakapalle, Yellamanchili and Narasapatnam taluks are given below:

STATEMENT V-1

Name of Irrigation Source (1)		Ayacut in acres (2)
ANAKAPALLE TALUK		
I CHANNELS		
Sarada River System		
Tagarampudi channel and its branches		572
Seethanagaram channel		800
Thumpala channel		2,100

The various Medium and Minor Irrigation Schemes taken up in this district under the Five Year Plans are explained below briefly.

Medium Irrigation Projects :

Gambheeramgedda Reservoir Scheme : This scheme which envisages the formation of a dam across Gambheeramgedda at Gambheeram village in Bheemunipatnam Taluk with a masonry spill way at its right flank and two channels, one on either side, was taken up as a Medium Irrigation Project under the First Five Year Plan at an estimated cost of Rs. 11.43 lakhs. The length of the left side channel is 2 miles 5 furlongs and the right side is 1 mile 300 feet. The ayacut originally contemplated under this scheme was 283 acres existing and 1,166 acres new but it was subsequently modified and restricted to 643 acres only with a view to utilising the balance waters in the Reservoir for augmenting water supplies to Visakhapatnam city during summer months. The scheme has now been completed.

Varaha Reservior at Kalyanampu Lova : This scheme taken up under the second Five Year Plan at an estimated cost of Rs. 25 lakhs envisages the construction of a reservoir at Kalyanampu Lova across Varaha river. The scheme when completed will have an ayacut of 1,134 acres existing and 2,000 acres new.

Thandava Reservoir Scheme at Gantavani Kothagudem: This is another Medium Irrigation Project taken up in this district under the Second Five Year Plan at an estimated cost of Rs. 118.85 lakhs. The scheme envisages the construction of a Reservoir across Thandava River at Gantavani Kothagudem in Narasapatnam taluk and when completed will irrigate 1,400 acres.

Reservoir across Thandava River near Rekhavanipalem: This scheme included under the Third Five Year Plan is a Medium Irrigation Project and envisages the construction of a Reservoir across Thandava River at Rekhavanipalem at an estimated cost of Rs. 87 lakhs and will benefit an ayacut of 10,000 acres.

Reservoir across Sarada River at Raiwada : This scheme is included in the Third Five Year Plan as a Medium Irrigation Project. The scheme envisages the construction of a Reservoir across Sarada River at an estimated cost of Rs. 83 lakhs at Raiwada village. It will have an ayacut of 19,700 acres.

Denkada Anicut : This scheme included under the Third Five Year Plan envisages the construction of an anicut across the river Champavathi at Denkada village in Bheemunipatnam taluk and the revised estimated cost is Rs. 26.28 lakhs. It will have an ayacut of 5,871 acres existing and 920 acres new.

Minor Irrigation Projects under the public works Department :

The followlng are the Minor Irrigation Projects contemplated under the Five Year Plans in this district :

Polipalle Anicut Scheme : This scheme was taken up in 1950 and completed in 1952 at a cost of Rs. 3.5 lakhs. The scheme consisted of the reconstruction of an anicut and a head sluice across Gosthani river near Rowthulapalem village of Bheemunipatnam taluk. It irrigates an extent of 1,096 acres of land.

Ravanapalle Reservoir Scheme : A Reservoir was constructed under the scheme at Ravanapalle village in Narasapatnam taluk four miles from Narasapatnam at a cost of Rs. 5,436 lakhs. It irrigates 3,017 acres of developed area.

Jaggammagedda Scheme : The scheme involves the construction of a tank across Jaggammagedda near Kusuluvara village in Bheemunipatnam taluk at an estimated cost of Rs. 3.29 lakhs. It will have an ayacut of 620 acres. The preliminary investigation has been completed.

Construction of Irrigation tank at Nandiguda village: Under this scheme a tank has been constructed at Nandiguda Araku village of Srungavarapukota taluk, with an ayacut of 62 acres.

Govadagedda Anicut Scheme : This scheme has been completed in May 1964. The ayacut proposed under this scheme is 300 acres. This scheme was sanctioned for Rs. 1.25 lakhs for works.

Besides the above Minor Irrigation Schemes several other schemes are also either under execution or under sanction in the district. The following statement furnishes the particulars of Minor Irrigation Schemes under execution and also those under sanction.

STATEMENT V—2

Description of work (1)	Estimated cost (In Rupees) (2)	Ayacut benefited (in Acres) (3)

Gosthani Reservoir Project (Thatipudi Reservoir Project):

This is not an Irrigation Project but is mainly intended for supplying water to Visakhapatnam city for domestic consumption and for industrial demand. The project involves the construction of a dam across the river Gosthani near Thatipudi village in Srungavarapukota taluk. The project was started in December 1961 and is programmed to be completed by December 1964. A brief history of the project is given below:

With the rapid growth of the Visakhapatnam city the demand for water supply is increasing rapidly. Industrial concerns like Caltex Oil Refinery, Hindustan Ship Building yard, the Coromandel Fertilizers etc., both existing and in execution in this city have further increased the water scarcity position. The total capacity of all the existing sources of water supply to Visakhapatnam city is 50 lakhs gallons per day in summer. To cater to the needs of the growing population and the industrial demands the daily water requirements are estimated to be in the order of 150 lakhs gallons. A special Engineering division was therefore appointed in 1956-57 to investigate the several sources including Sarada River, Kondakaria Ava, Ghambheeramgedda, Meghadrigedda, Raiwada Scheme, Godavari River and Gosthani Reservoir Project to secure the additional requirements of water for Visakhapatnam city. Of all the above sources the Thatipudi Reservoir Project also known as Gosthani Reservoir Project was ultimately pitched upon as the only dependable source from which about 110 lakhs of gallons of water can be tapped economically per day. The Government accorded necessary sanction in March 1961 for the construction of a Reservoir across Gosthani River near Thatipudi village at mile 14/7 of of Vizianagaram-Araku Road at an estimated cost of Rs 4 crores including the pipe line, pumping station and the distribution system. The river Gosthani flows at this place in between two hills having a large basin for the Reservoir with minimum submersion of valuable lands and villages. The dam will be masonary with a regulator in the river bed. The maximum depth of water above bed level of the river is 77 feet and maximum height of earth bund is 87 feet.

CHAPTER VI

FORESTS

In Visakhapatnam district forests cover nearly 36.6% of the total geographical area. The following statement gives details of the various categories of forests existing together with their respective areas in acres:

Category of Forest	Area (in acres)
(1)	(2)
Class I Reserve Forests	2,45,365
Class III Reserve Forests (Panchayat)	20,877
Areas notified under Section 4 of the Forest Act	35,453
Areas notified under Section 26 of the Forest Act	5,70,489
Areas not notified under Section 26 of the Forest Act	3,10,660
Total ...	11,82,844

The Visakhapatnam Forest Division can be broadly classified into two physiographic units, *i.e.*, (i) the strip of land along the coat made up of flat or undulating ground and (ii) the southern outliers of the Eastern Ghats or the adjacent low lying hills. These hills are more or less continuous chains and occasionally spread into groups forming undulating plateaus and broad basins.

The forests covered by this area are almost entirely deciduous, extremely irregular and very open, varying considerably in condition, composition and density of the group. The species that commonly occur are *Terminalia tomentosa*, *Pterocarpus marsupium*, *Anogeissus latifolia, Adina cordifolia etc.* A very good variety of timber forests are found in the Chintapalle reserves. However, a bulk of the stand is still immature. In the unreserves of Gudem Agency *Albizzia stipulata* occurs in fair quantity near village sites. Pole forests are met with in Sanivaram reserve of Narasapatnam range and Wangasari and other blocks in the Gudem Agency range. The growth varies in density and quality according to the nature of the soil and steepness of the hill slopes. Certain areas believed to be suitable for growing teak have been selected and marked for the purpose in these pole forests. Fuel forests which cover most of the division lie at the foot of the hills and in the lower slopes. The species met with are *Soymida febrifuga*, *Maba buxifolia*, *Albizzia amara, Albizzia lebbek*, *Dichrostachys cinerea* and *Acaica sundra* etc. As a rule trees of more than three feet girth with a clean bole of 8 feet or more are rare. Bamboo forests exist in all the ranges occuring plentifully over a major portion of Narasapatnam range.

The following statement gives particulars of the schemes undertaken during the First and Second Five Year Plan periods:

STATEMENT VI-1

Name of the Scheme	First Five Year Plan		Second Five Year Plan

CHAPTER VII

INDUSTRIES

Large and Medium Industries :

The most prominent amongst the large industries are the Hindustan Shipyard and the Caltex Oil Refinery at Visakhapatnam. In addition to these there is a re-rolling mill known as the Andhra Steel Corporation (P) Ltd., in Visakhapatnam which was established in 1960. The existing capacity of the plant is 60,000 tons of rolled steel products. Further there are jute, oil and sugar factories, situated at various places in the district. Nellimarla, Vizianagaram, Chittivalasa, Anakapalle, Etikoppaka, Chodavaram and Payakaraopeta are some of the more important industrial places in the district. The following statement gives particulars of these industries like capital invested, persons employed, productive capacity etc.

STATEMENT VII-1

Name of Industry (1)	Capital invested (In lakhs) (2)	Persons employed (3)	Production capacity (4)
Hindustan Shipyard (Private) Ltd., Visakhapatnam	502.90	3,990	...

Messrs. Sarvaraya Textiles Ltd.	Vizianagaram	1200 spindles

Note: T.P.A. : Tons per annum

Small Scale Industries :

With a view to developing the Small Scale Industries and to train artisans in the improved methods of production by using modern machinery, the following Small Scale Industries were started in the public sector on a commercial basis :

Carpentry Production-cum-Training Centre, Visakhapatnam: This centre was sanctioned in G. O. Ms. No. 1692, dated 17-8-1955. It is equipped with modern machinery and equipment such as planing machine, band saw, mortiser, wood working lathe etc. The teak required for use in this centre is purchased from the Forest Department at Rajahmundry. The furniture prepared here has a ready market. This Centre was transferred to the Andhra Pradesh Small Scale Development Corporation in July 1962 and is at present located in one of the units of the Industrial Estate at Visakhapatnam. The following statement gives particulars of the yearwise expenditure, production and sales etc.

STATEMENT VII-3

Year (1)	Budget (2)	Expenditure (3)	Production (4)	Sales (5)
	Rs. P	Rs. P	Rs. P	Rs P
1956—57	...	67,581 24	30,500 00	18,718.29

1960—61	1,10,000 00	1,10,000 00	1,20,000 00	75,970 00
1961—62	82,000 00	75,267 44	76,450 00	58,946 58

Stoneware and Earthenware Centre, Anakapalle : This centre was started inNovember, 1958. This scheme is intended to train artisans in improved methods of preparing stoneware and earthenware. It is equipped with modern equipment and thus producing various types of ceramic goods. The clay required for use is being obtained from the Government Ceramic Service Centre, Rajahmundry. The following statement gives particulars of the yearwise production, expenditure, sales etc.

STATEMENT VII-4

Year (1)	Budget (2)	Expenditure (3)	Production (4)	Sales (5)
	Rs. P	Rs. P	Rs. P	Rs. P
1956—57	...	1,700.00	...	...
1957—58	...	2,293.99	...	...
1958—59	24,000.00	23,139.38	4,000.00	3,480.00
1959—60	25,000.00	26,904.47	19,520.36	16,358.00
1960—61	18,000 00	22,397 72	19,428.34	17,463.00
1961—62	19,000 00	9,226.71	6,721.76	7,321.00

Stoneware and Earthenware Centre, Vizianagaram: This Centre was sanctioned in 1955. It is intended to impart training to the artisans of the potters, community in the improved methods of preparing stoneware and earthenware. This Centre is equipped with modern equipment and is manufacturing various types of ceramic products. The clay which is the primary raw material is obtained from the Government Ceramic Service Centre, Rajahmundry. The following statement gives particulars of the budget allotment, expenditure, sales etc.

STATEMENT VII-5

Year (1)	Budget (2)	Expenditure (3)	Production (4)
	Rs. P	Rs P	Rs P
1956—57	1,900 00	1,700 00	...
1957—58	...	1,432.24	...
1958—59	24,000.00	59,569 95	4,000.00
1959—60	25,000.00	48,000.00	20,500.00
1960—61	18,000.00	22,397 72	...
1961—62	19,000.00	7,807.26	7,271 06

Government Tiles Factory, Pendurthi: This centre was sanctioned by the Government in August 1955. It started production from 1-9-1959 The factory is equipped with modern machinery. The centre produces 24,000 tiles of Mangalore type per month valued at Rs. 3,840. The products of this centre find and easy market. The following table gives particulars of the sanctioned budget, expenditure, production, sales etc.

STATEMENT VII-6

Year (1)	Budget (2)	Expenditure (3)	Production (4)
	Rs. P	Rs P	Rs. P
1958—59	51,000.00	53,745.68	25,000.00
1959—60	39,300.00	40,000 00	26,000.00
1960—61	44,000 00	36,572.41	24,849 00
1961—62	27,000 00	9,870 03	16,874 85

In addition to the above departmental units there are several Small Scale Industries throughout the district under private management manufacturing trunks, agricultural implements, cement pipes, soaps, inks, varnishes, houseware articles like chairs, almirahs, cast iron foundries, general engineering workshops, microscopes manufacturing units, utensils manufacturing units out of non-ferrous metals, oil containers etc. The following statement gives particulars of these Small Scale Industries together with the capital invested, output value, employment opportunities etc., in the district.

Village Industries :

There are several village industries in the rural areas manufacturing wooden toys, horn toys, ivory articles, tailoring and dress making, *adda* leaf plate manufacture, tape weaving, carpentry, blacksmithy, pottery, bamboo basket making, spinning and weaving, leather tanning, coir rope making and coir mat weaving etc. Government have also given assistance to the village artisans in form of loans, for the purchase of raw materials, for the purchase of tools and towards working capital etc.

Industrial Estates :

The Industrial Estate in Visakhapatnam was established in the year 1958 with 33 units of A, B, C and D types. Most of the units started functioning. Efforts are also being made for the establishment of an Assisted Private Industrial Estate. Towards this end a scheme for the establishment of a self-help Industrial Estate at Vizianagaram was sanctioned in February, 1961 by the Industries Department. Land for the construction of factories was acquired at Vantitadi Agraharam, a village in Vizianagaram taluk, to an extent of Ac. 18. 40 Cts.

About 18 Industrialists have also paid the earnest money deposit of Rs. 500 each for the allotment of the units in the estate. Construction work has not yet begun.

Handi crafts :

A procurement-*cum*-sales depot was started during 1958-59 in Visakhapatnam for giving an impetus to the Handicrafts. The emporium has started functioning at Visakhapatnam from the 23rd of March, 1959. Its main function is to procure Handicrafts from the craftsmen and from the co-operative societies in the district and to sell them locally and through the medium of the emporia working in other districts in the State. The purchases constitute wooden and lacquer articles and toys of Etikoppaka, ivory and tortoise shell products of Visakhapatnam, horn toys of Parlakimedi (Orissa State) and Pendurthi, Kondapalli toys, Nirmal articles, bidriware, silver filigree, Narsapur lace etc. Besides the Handicrafts section there is also a Handloom section containing handloom fabrics from different centres in Andhra Pradesh and other areas.

Sericulture :

A Government Basic Seed Farm was first started in June, 1946 in Chintapalle on an extent of 485 cents mulberry garden. The farm is intended for the supply of cocoons and layings to the grainage at Hindupur. The rearing and the reeling units are located in *pucca* buildings and irrigation facilities are obtained from a well which has been sunk for the purpose. 17 tribal families have taken up to this industry. The farm also supplies seed material for extension work among the tribals. The latter have brought a further extent of 45 acres under mulberry cultivation. Some of the tribals in the Gudem villages have also taken up to this.

The Government Silk Farm at Araku Valley was started in the year 1948 with 5 acres of mulberry garden. The scheme was converted as Chawki Rearing Unit, with a view to promoting enthusiasm among the tribals to take up to mulberry cultivation and intensive rearing work. This scheme is progressing satisfactorily with the co-operation of the local tribals.

Industrial Co-operatives :

There are 57 Industrial Co-operative Societies are functioning in the district in the field of oil industry, handpounding of rice industry, leather Industry, carpentry, pottery, khadi and gur processing. A majority of these Industrial Co-operatives have come into existence in recent years on account of the encouragement given by the Khadi and Village Industries Commission.

The Industrial Co-operative Societies are rendering help to the artisans by helping them to improve their economic conditions through financial and other help to them. The following statement gives particulars of the Industrial Co-operative Societies Block-wise as on 30-9-1962.

The Small Scale Industries Service Institute of the Ministry of Commerce and Industry, Government of India, Hyderabad conducted an intensive survey of the industrial potential of Srikakulam and Visakhapatnam districts and in 1960 published a brochure called "The Industrial Possibilities of Visakhaptnam-Srikakulam Districts." The authors of this publication state that the purpose of this booklet is to give an idea about the industries which can be set up on a small scale basis in Srikakulam and Visakhapatnam district. Although the list of industries in the district is not exhaustive, this booklet is expected to serve the purpose of a guide to small scale entrepreneurs.

This booklet has, therefore, been reproduced in full for the benefit of the reader.

. Agricultural Implements :

1. This Industry is in existence in the area and there are many units already functioning.

2. The annual off-take of agricultural implements in the two districts was estimated at Rs. 12 lakhs of which the local units accounted for about Rs. 8 lakhs.

3. It is expected that the demand for the agricultural implements will increase at the rate of 20% per annum.

4. The items which may be increasingly in demand in the coming years are sugarcane crushers, bund formers, sprayers and dusters, winnowing pans, jaggery pans etc.

5. The existing units have chance to expand production for manufacturing the items mentioned above.

II Builders' Hardware :

1. The builders' hardware items are manufactured in the area by units engaged in the production of agricultural implements.

2. It is estimated that about Rs. 6 lakhs worth builders' hardware items were sold in 1958-59 in the Visakhapatnam-Srikakulam area.

3. The production within the area is estimated at about Rs. 3.4 lakhs per annum.

4. The demand is expected to show an annual increase of 10%.

5. The existing units have opportunities to expand production and new units can come up for the manufacture of specialised items like hinges, drawer locks, door locks, tower bolts, hasps and staples etc., required by the Ship Building Yard and also to meet the increasing demand in the open market.

III. General Engineering & Foundry including Rice Mill Parts :

1. There is a good demand for products of general engineering industry like machine parts, automobile parts, and oil engines, rice huller and oil expeller spare parts.

2. There are 23 general engineering workshops in the area.

3. Skilled workers for this industry are available in the area.

4. No serious competition is reported by the existing units.

5. Annually Rs. 10 lakhs worth of rice mill parts alone are sold in the two districts.

6. There are 77 oil and rice mills in the area requiring different mill parts.

7. Existing units in this industry have scope for expansion and new units can also be started.

8. These units can also manufacture industrial fastener items like bolts and nuts, rivets, gland packings etc., which are also in good demand by the ship building industry.

IV. Cycles and cycle parts :

1. Cycles and cycle accessories are in good demand in the twin districts of Srikakulam, Visakhapatnam. The existence of cycle rickshaws in urban and rural areas has also contributed towards the demand for cycles and cycle parts.

2. The annual turnover of cycles, cycle parts and accessories works out to nearly Rs 30 lakhs of which the share of cycle parts and accessories alone is about Rs. 15 lakhs in the two districts.

3. The demand for these items in the past has been progressively increasing by nearly 16% on an average every year. As more and more cycles are sold year after year, the demand for spare parts and accessories would correspondingly increase.

4. There is a good scope for one or two small assembly units. Though there is scope for new units to manufacture spare parts, due to non-existence of this industry in the area, prospective enterpreneurs would do well to consider the competition in the market from the established manufacturers.

V. Ancillary Industries :

1. The Hindustan Shipyard and the Port and Dockyard workshop offer good scope for the development of ancillary industries.

2. The existing general engineering units have also chance to take up the production of ancillary items. The following are the main items required

i Electrical accessories
ii Hardware fittings
iii Sheet metal parts
iv Industrial fasterners
v Sanitary fitting (metal)
vi Pipe fittings
vii Fire fighting equipment
viii Centrifugal pumps
ix Wire ropes
x Valves and cocks

3. The general engineering units may even expand into the new lines of production by equipping themselves with the addition of a few more machines and equipment.

4. One among the existing small scale units may also take up the manufacture of malleable cast iron items.

5. The Hindustan Shipyard and Port and Dockyard workshop authorities will extend maximum co-operation by giving details of specifications and drawings of items required.

VI. Automobile Leaf springs :

1. There is no unit at present in the whole of Andhra Pradesh manufacturing this item.

2. The entire demand in the area is met through supplies from Calcutta, Ludhiana, Kapurthala, Jullundhur, Bombay and Kerala.

3. The total demand for automobile leaf springs in the two districts is estimated at Rs.6.5 lakhs per annum.

4. The spring steel flats required for the manufacture of leaf springs are to be imported. The State Department of Industries and Commerce, Andhra Pradesh can help in the procurement of this imported raw material.

5. One unit could be started at the Industrial Estate, Visakhapatnam.

6. The new units will be able to market their products throughout Andhra Pradesh and even export to adjacent foreign countries.

VII. Scientific Instruments :

1. Scientific Instruments are required in large numbers in Educational Institutions, Universities and Research Laboratories.

2. There is good demand for Scientific Instruments throughout the Southern Region (Andhra Pradesh, Madras and Kerala).

3. There is one unit in the area producing these instruments.

4. The raw materials used in the industry are brass rods, copper sheets, michrome and manganese wires, optical blanks etc., which are generally obtained through dealers and importers at Bombay and Calcutta.

5. With the restriction in the imports of scientific instruments the demand for indigenous goods has increased considerably.

6. One more unit can be started in the area provided an entrepreneur with the necessary technical knowledge comes forward to take up this industry.

VIII. Domestic Electrical Appliances (Heater type) :

1. There is good scope for establishing units in the area for manufacturing domestic electrical appliances (heater type).

2. By 1961 the demand for electrical appliances in the southern Region (Andhra Pradesh, Madras and Kerala) is expected to be about Rs. 20 lakhs while the production in the region in 1957 was only about Rs. 1.81 lakhs.

3. There are three units in Andhra Pradesh manufacturing Domestic Electrical Appliances.

4. The small-scale units will be able to compete well in the market if good quality appliances are produced.

5. The fast moving items of appliances are electric irons, cooking ranges, water stills, heaters and incubators.

IX. Electrical Porcelain Ware :

1. There is scope within the area to manufacture low tension electrical porcelain ware items like insulators, fuse handles, porcelain parts for switches, plug sockets, fan regulators etc.

2. The consumption of these items in the Southern Region was estimated at Rs. 4.0 lakhs in 1955-56 and the demand was expected to increase by 70% during the Second Five Year Plan period.

3. Different varieties of clays which form the basic raw material are available in the area. The types of clay available will have to be tested further before deciding on its utility

4. The equipments required for the industry are relatively simple.

5. The location of the units may be decided after the Department of Industries and Commerce has arranged for the ceramic tests of various types of clays.

X. Graphite Industries :

1. Graphite is reported to be available in Anakapalle, Vizianagram and Visakhapatnam taluks of Visakhapatnam district and Kuruppam and Salur agency of Srikakulam district.

2. The graphite obtained in the impure form is at present sent to other parts of country for refining.

3. The price of raw graphite is Rs. 100 per ton and that of refined graphite is Rs. 500-1500 per ton (August 1959 prices).

4. Refined graphite can facilitate the establishment of new industries for manufacturing of paints, electrodes, dry batteries, crucibles and pencil leads.

5. It will be quite advantageous to start a graphite refinery in the area.

XI. Leather Tanning and Finishing :

1. There is no unit in Andhra Pradesh manufacturing finished leather.

2. There are seven tannaries in the area which are generally producing E.I. Tanned leather.

3. There is not much scope for new tanneries, but a unit could be established for manufacturing finished leathers like chrome uppers and vegetable tanned sole leather.

4. One of the existing tanneries at Vizianagaram may take up the production of finished leather.

XII. Leather Footwear :

1. There are 20 units in the area manufacturing leather footwear such as shoes, sandals, boots, chappals etc.

2. Industrial leather goods like gloves, aprons, knee covers are also manufactured by these units.

3. The annual consumption of footwear in these two districts is worth about Rs. 6 lakhs.

4. The total annual production in the area is about Rs. 3 lakhs.

5. There is scope for expansion in the existing units. They should concentrate on producing items of reasonably good quality.

6. In order to introduce new designs and improved methods of production, the Government is considering the establishment of an Extension Centre at Vizianagaram or Visakhapatnam.

XIII. Leather Sports Goods :

1. There is good scope for establishing a unit for manufacturing covers for foot-balls, volley balls etc

2. In this industry there is no unit in Andhra Pradesh and at present the demand is met through imports, from Calcutta, Bombay and Jullundar.

3. The main raw material is E.I. Tanned leather.

4. The labour will have to be trained for this industry before the unit is established if the proprietor himself is not a trained person.

XIV. Paints and Varnishes :

1. There is no unit in the area manufacturing paints and supplies are at present obtained mostly from Bombay and Calcutta.

2. The annual demand for paints in the two districts is estimated at Rs. 16.5 lakhs. The demand is expected to go up by 50 percent when the Hindustan Shipyard attains the target production of 6 ships per annum.

3. Raw materials like graphite, red ochre, titanium etc., are available in the area. Niger seed oil which can be used as a substitute for linseed oil, is also available in Visakhapatnam district.

4. Two units may be started in this industry. The following places are suggested for locating these units.

   i. Visakhapatnam
   ii. Srikakulam
   iii. Vizianagaram
   iv. Anakapalle

XV. Starch Products :

1. There is excellent scope for manufacturing starch from the tamarind seed locally available.

2. The tamarind seed from the area is at present sent to Calcutta and the starch required in the area is imported from Calcutta.

3. The consumption of starch by the two jute mills in the area is estimated at 7 cwt. per day.

4. The annual output of tamarind from the forests of the two districts alone is about 2.5 lakhs maunds. Tamarind seed is also available from the neighbouring State of Orissa.

5. Two units for the manufacture of starch may be located at Nellimarla in Visakhapatnam and Bobbili in Srikakulam districts.

XVI. Fruit Preservation :

1. Fruit preservation industry is not developed in the area in spite of the availability of plenty of bananas and mangoes.

2. There are good possibilities for exporting fruit products like pickles, chutneys etc., to foreign countries.

3. After local consumption, it is estimated that in the two districts about 37,680 tons of bananas and 108,320 tons of mangoes are available.

4. The unit in this industry may produce banana, figs, pickles, chutneys and other products from mangoes.

5. The unit may be located in the Araku Valley or Vizianagaram.

XVII. Wood Based Industries :

1. Demand prospects for wooden furniture items are good in Srikakulam and Visakhapatnam districts.

2. With the increasing income people are becoming more and more furniture conscious and in the coming years the demand may be expected to go up.

3. The forests which cover about 43.6% of the total area of Visakhapatnam district and 17.4% of Srikakulam district offer good timber resources to this industry. Nearly 50% of the timber available serves as raw material for the existing 21 units manufacturing furniture.

4. The demand for wooden furniture is expected to go up with the establishment of more educational institutions, offices and industrial units. Hence new units can come up in the area in this industry, while the existing units may introduce in the market improved designs of furniture, drawings for which are available with the Small Industries Service Institute, Andhra Pradesh, Hyderabad.

5. For producing better quality furniture seasoned wood is necessary. A seasoning kiln could be established in the area to cater to the demand for seasoned wood.

XVIII. Jute Twine :

1. Jute is an important commercial crop of the area.

2. The two jute mills in the area are consuming only about 30-35 percent of the local jute grown in the area.

3. The surplus jute can be profitably used for manufacturing jute twine.

4. The following varieties of jute twine have a good demand
   (a) single ply for packing provision and general stores;
   (b) three ply and five ply twine used for heavier packing;
   (c) three ply fine twine used for stitching gunny bags.

5. One unit may be established at Srikakulam and another one at Vizianagaram or Visakhapatnam.

XIX Plastic Articles :

1. The consumer type plastic articles like combs, cups, tumblers, ash-trays etc., have a good market in Andhra Pradesh.
2. The demand for these items in this State is mostly met by imports from other places especially Calcutta and Bombay.
3. Most of the plastic articles can be made by injection moulding processes.
4. The main raw material (Polythene) is available in India.
5. Some of the moulding powders like cellulose acetate, cellulose butyrate etc., are still to be imported.
6. Small injection moulding machines are indigenously available. Automatic injection moulding machines are to be imported and can be obtained on hire-pur-chase basis through the National Small Industries Corporation.

XX. Miscellaneous :

(a) Expanded metal :

1. Expanded metal is in great demand as a building material for ventilation purposes.
2. The annual consumption of expanded metal in the southern region is estimated to be worth Rs. 7 lakhs.
3. There are four units in India manufacturing this item. One unit is located in Madras State.
4. With the improvement in the supply position of B.P. sheets and rapidly increasing demand there is scope for establishing one or two units.

(b) Steel Furniture and Steel Trunks :

1. There are six units in the area manufacturing steel trunks.
2. The existing units produce about Rs. 1 lakh worth steel trunks which may be nearly 90% of the total demand in the area.
3. The existing units can expand production to meet the increasing demand, and also produce good quality steel furniture.
4. There is no unit in the area manufacturing steel furniture.
5. Items such as folding chairs, tables, almyirahs and hospital equipment are suggested for manufacture in the area.
6. New units may also take up the manufacture of steel furniture.

(c) Fountain-pen Nibs :

1. There are three units in the area manufacturing fountain-pens.
2. Production of pens in the area in 1958-59 is estimated at about 405 dozens valued at Rs. 27,000.
3. There is good scope for the existing units to manufacture fountain-pen nibs.
4. The units may mainly produce superior quality gold nibs.
5. The machinery for manufacturing iridium tipped nibs can be obtained through the National Small Industries Corporation on hire-purchase basis.

(d) Optical Grinding :

1. In the area there three units engaged in the manufacture of optical lenses.
2. The total production in the area is valued at about Rs. 70,000
3. The consumption of optical lenses in the area in 1958-59 is placed at Rs. 82,000.
4. The demand for spectacles is increasing rapidly in the Southern Region.
5. The existing units have chance for expanding their production. One or two new units can also be started.

(e) Ivory Products:

1. Manufacture of Ivory products is a traditional handicrafts industry of the area.
2. To train the artisans in this industry the Department of Industries and Commerce, Andhra Pradesh have started a training centre at Visakhapatnam.

3. Among the various products manufactured, the tortoise shell and sandal wood fretwork boxes are the fast moving items.

4. There is demand for these articles in foreign countries.

5. In view of the difficulties in getting raw materials no new units are suggested in this industry. However, the existing units can expand their production.

(f) Bone Meal Fertilizers :

1. The cattle wealth of the two districts provide scope for establishing units in the Bone Crushing Industry.

2. Bone crushing for export is a well established industry in India. Bones crushed with the help of distintegrators are exported to foreign countries and there is a good demand for the same. Bone meal which is used as a fertilizer can be made by steaming the bones first and crushing them later. Bones, which are available from the slaughterhouses, and also from carcasses from the villages can be utilised for this purpose.

(g) Card Board and Straw Board :

1. Card board and straw board are widely used for manufacturing cartons and also for book binding.

2. The internal market for card board and straw board is quite extensive.

3. The main raw materials required are waste paper, straw and bagasse.

4. The availability of raw materials and good water supply are factors favourable for the establishment of a unit.

5. A unit with a capacity of 4 tons per day requires a capital investment of Rs. 3.5 lakhs.

6. Most of the required machines can be fabricated within the country.

(h) Cashew Shell Oil :

1. There are 13 factories at Palasa in Srikakulam district processing about 4,800 tons of Cashew nuts annually.

2. About 3,600 tons of cashew shell available are mostly used as fuel.

3. Cashew shell oil which can be extracted from the shells can be used for different purposes.

4. It is estimated that nearly 10 to 12 gallons of cashew shelloil could be extracted from 500 lbs. of cashew shells.

5. There is scope for one or two units to be started at Palasa in this industry.

(i) Playground Equipments :

1. Recreation and cultural activities find an important place in the social welfare programmes of the Second Five Year Plan.

2. Playgrounds and childeren's parks are established in Block Development areas at considerable cost.

3. Use of playground equipments like merry-go-rounds, see-saw etc., is ever increasing in the Block areas.

4. Scope for new units exists for manufacture of those items as the Block Development activities all over the State are expected to be intensified.

(j) Solvent Extraction of Oil from oil cake :

1. There are seventy seven oil and rice mills in the Srikakulam and Visakhapatnam districts.

2. The cake available from oil mills after oil extraction contains 6% of oil. From this 5% oil can be extracted.

3. The deoiled cake has a good market. It is also exported.

4. The consumption of deoiled cake as a fertilizer is bound to increase in the future.

5. A small unit capable of producing 40 tons of deoiled cake in 24 hours requires an approximate investiment of Rs. 4 lakhs.

6. The majority of the equipment required is fabricated indigenously.

7. Two units can be located one at Vizianagaram in Visakhapatnam district and the other at Donkinivalasa or Ponduru in Srikakulam district.

(k) Coir Products :

1. In the northern part of Srikakulam district, the belt extending from Ichapuram to Palasa, has cocoanut plantations. The green husk obtained from the cocoanuts can be used in the manufacture of coir products.

2. Various coir products like coir-rope, coir-mats, and fancy articles can be manufactured on small scale and these have a good market.

3. Consumer articles like brushes made with coir bristles have also a good and ready demand.

4. One or two units for the manufacture of coir products can be located in the northern part of Srikakulam district.

CHAPTER VIII

CO-OPERATION

The decennium ending 1951 witnessed the complete recovery from the general economic depression of the thirties. The Second World War, the consequent inflation and the scarcity of the essential articles, *viz*,. foodstuffs, textiles, iron and steel etc., exerted a great deal of influence on the growth and development of the co-operative movement. The co-operatives readily responded to the call and played a vital role in the economy of the country. They were commissioned by Government to undertake equitable distribution of essential articles. During this period, emphasis was laid on the development of non-credit co-operative institutions like Co-operative Stores, and Weavers' Co-operative Societies.

The Rural Credit Societies undertook multi-purpose activities like distribution of chemical fertilizers, iron and steel, agricultural implements, besides financing agriculture by the issue of short-term loans to ryots for the seasonal agricultural operations and for the purchase of agricultural implements etc. They further contributed greatly to the success of the "Grow More Food Campaign" launched by the Government. This decennium recorded a rapid growth in the development of the co-operative movement. There was a striking increase in the number of societies, membership, working capital, transactions etc. The following table shows the progress made by the Co-operative Credit Societies in the district during the decennium ending in 1951:

STATEMENT VIII—1

Year	No. of Co-operative Societies	No. of Members (in thousands)	Amount of loans disbursed during the year (Rs. in lakhs)	Loans for productive purposes (Rs in lakhs)	Loans for non-productive purposes (Rs. in lakhs)	Loans for the discharge of prior debts (Rs. in lakhs)	Loans outstanding against members on the last day of the year (Rs in lakhs)	Working capital on the last day of the year (Rs. in lakhs)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
1941—42	285	14.60	2 58	2 49	0.01	0 08	6.10	8 94
1942—43	288	14.10	2.71	2.54	0 08	0.09	5.72	8.11
1943—44	291	15.80	3.10	3.01	...	0.09	4.81	8.21
1944—45	298	25 11	5.90	5.81	0.05	0.04	7 90	11.07
1945—46	300	25.45	8.50	8.30	0.06	0.14	10.20	12.04
1946—47	345	20 10	12.20	11.87	0.01	0.32	13.06	16.71
1947—48	375	26.33	15.33	15.90	...	0.43	17r62	23.21
1948—49	413	28.51	23.09	22.88	...	0 21	23.08	28.27
1949—50	479	34.80	31.46	31.42	0.01	0.03	29.32	34.83
1950—51	517	38 51	33.42	33 42	...	...	29 94	36.69

The heralding of the Five Year Plans gave a further stimulus to the establishment on a sound footing of the co-operative movement in this district. To gear up the administrative efficiency and to excercise close and effective supervision over the societies, the District was bifurcated into two Deputy Registrar's circles, by locating another office at Anakapalle in addition to the existing one at Visakhapatnam. The plans further aided the coverage of all villages by co-operatives. To implement this scheme and to get an extensive coverage, Rural Credit Societies as well as Large Sized Co-operative Societies were organised. At the end of the Second Plan period out of 1,804 villages, 1,676 villages were covered by Rural Credit and Large Sized Societies. At the end of the Second Plan there were 45 Large Sized Co-operative Societies and 436 Rural Credit Societies. It is expected that by the end of the Third Plan period the remaining villages will come under one co-operative society or the other.

Apart from bringing the villages under the co-operative fold, it is the intention of the co-operative movement to get every family represented in some Co-operative Society or the other and at least 50% of the rural credit business to be handled by the co-operatives This movement has also been a success to a large extent.

Long Term Rural Credit :

Short term and medium term credit to the agriculturists is being provided by the Co-operative Central Bank, Vizianagaram through its affiliated societies both Large Sized Societies and Rural Credit Societies. Funds drawn from the Reserve Bank of India and State Co-operative Bank, owned funds, and deposits are utilised for the purpose. Short term loans are issued mainly for agricultural production, while medium term loans are issued for purchase of agricultural implements and cattle, land improvement, repairs to wells etc.

As regards short term and medium term loans, the Co-operative Central Bank Limited., Vizianagaram is providing credit facilities to its affiliated societies out of funds drawn from the Reserve Bank of India, owned funds, deposits and funds drawn from the State Co-operative Bank by way of short term and medium term loans through Large Sized Co-operative Societies and Rural Credit Societies for domestic purposes, purchase of agricultural implements and for land improvement.

Weavers' Societies :

The introduction of control over prices and distribution of yarn and the acute scarcity of cloth and the concessions shown to weavers' co-operatives contributed to the rapid development of weavers' co-operative movement by the end of decennium in 1950-51. The following statement gives particulars of the progress recorded by these societies from 1941-42 to 1950-51.

STATEMENT VIII-2

Year	No. of Societies	No of Members (to the nearest hundred)	Value of raw materials and finished goods purchased (Rs in lakhs)	Value of finished goods sold (Rs. in lakhs)	Working capital (Rs in lakhs)
(1)	(2)	(3)	(4)	(5)	(6)
1941—42	3	2 0	0.18	0.15	0.12
1942—43	3	2.0	0.2	0.4	0 2
1943—44	4	5.3	0.5	0.1	0.3
1944—45	4	5 6	0.9	0.9	0.41
1945—46	6	24 0	4.0	5.0	2.78
1946—47	25	58.0	3 0	7.0	2.99
1947—48	27	77.8	8.9	9.0	4.93
1948—49	30	97.6	22.0	22.5	7.42
1949—50	29	58 0	15.0	22.0	10.00
1950—51	29	54 0	22.0	24.0	3 05

The following statement gives particulars of the progress of co-operative movement in this field from the begining of the First Five Year Plan to the end of the Second Five Year Plan.

STATEMENT VIII-3

(1)	At the beginning of the First Five Year Plan (2)	At the end of the First Five Year Plan (3)	At the end of the Second Five Year Plan (4)
1 No. of Weavers' Co-operative Societies	32	35	38
2 No. of looms in the Co-operative pool	7,336	7,736	8,401
3 No. of Weavers in Co-operative Societies	9,276	9,481	10,143

The various categories of cloth produced are dhoties, sarees, shirtings, bedsheets, towels, lungies and gadas of 20 to 60 count.

During the Second Plan period a scheme was started for the collection of statistics on Handloom Industry pertaining to production, sale, unsold stock etc. The Anakapalle and the Kondakarla Weavers' Co-operative Societies were selected as focal centres. This scheme was mainly intended to collect statistics relating to loomage and production every month

A weaving factory was started under the Cess-fund scheme under the Payakaraopeta Weavers' Co-operative Society for imparting training to members in the production of higher counts with better techniques. A dye factory was started under the Godicherla Weavers' Co-operative Society for dyeing yarn and cloth and for distribution of dyes and chemicals.

To encourage the manufacture and sale of Handloom cloth through co-operatives the All India Handloom Board sanctions rebate from the Cess Fund for facilitating higher sales and the quick release of stocks. A large portion of the cloth produced by the Weavers' Co-operative Societies is marketed by the societies themselves or through the Andhra Handloom Weavers' Co-operative Society.

Co-operative Marketing :

In order to check profiteering by merchants and make just and equitable distribution of essential commodities, Co-operative Stores Societies have been started extensively all over the district to cater to the needs of the people.

To assist these primary stores societies a Central Co-operative Stores was formed in the year 1942-43 for the entire Srikakulam and Visakhapatnam districts with headquarters at Vizianagaram, a major commercial centre. The Central Co-operative Stores acted as an Agent to Government in procurement and distribution of food grains on Government account. It was also the wholesale distributor of paddy, cloth and other rationed articles, chemical fertilizers, iron and steel.

By March 1964 there were four Co-operative Marketing Societies functioning in this district, namely (1) Visakhapatnam District Co-operative Marketing Society Limited, Vizanagaram (ii) The Anakaplle Co-operative Marketing Society, (iii) The Payakaraopeta Co-operative Marketing Society and (iv) The Sri Rama Co-operative Marketing Society, Bheemunipatnam.

The District Co-operative Marketing Society at Vizianagaram deals in the distribution of chemical fertilizers, cloth, sugar, wheat, kerosene, iron and steel. During the Second Plan period an amount of Rs. 1 lakh was sanctioned as loan to the Society for the installation of a groundnut decorticator and an oil expeller. Further, for the construction of a godown the society was sanctioned as loan and subsidy Rs. 50,000 during the same period. A share capital contribution of Rs. 1,10,000 and a cash credit of Rs. 1 lakh was sanctioned and distributed to this society.

The Anakapalle Co-oparative Marketing Society constructed two godowns, one for storing food grains and the other for the storage of jaggery, besides an auxiliary godown at Chodavaram. Rs. 90,000 were sanctioned and disbursed for the installation of a groundnut decorticator and an oil mill. Further, a share capital contribution of Rs. 30,000 was also sanctioned and disbursed to the society.

The Payakaraopet Marketing Society has started work on the construction of a godown and a sum of Rs.65,100 was disbursed to this society towards loan and subsidy for the construction of this godown. Further a sum of Rs. 3,000 was also sanctioned and disbursed to this society for the installation of a sugarcane crusher. A share capital contribution of Rs. 38,000 was sanctioned and disbursed to this society.

Sri Rama Co-operative Marketing Society at Bheemunipatnam is a primary marketing society to which an amount of Rs. 25,000 was sanctioned for the construction of a godown. This society deals with sugar, wheat, chemical fertilisers etc. A share capital contribution of Rs. 14,000 was sanctioned and disbursed to this society.

By March, 1964 there were 12 consumer stores in Visakhapatnam district. The following is the list of Consumer Stores in the district:

1. Visakhapatnam Co-operative Stores, Visakhapatnam
2. Allipuram Co-operative Stores, Allipuram, Visakhapatnam
3. South Eastern Railway Employees' Co-operative Stores, Visakhapatnam
4. Port Employees' Co-operative Stores, Visakhapatnam
5. Vizianagaram Co-operative Stores, Fort, Vizianagaram
6. Andhra University General Co-operative Stores, Visakhapatnam
7. Simhachalam Devasthanam Co-operative Stores, Simhachalam
8. Srungavarapukota Co-operative Stores, Srungavarapukota
9. Semi-Urban Co-operative Stores, (Anakapalle
10. Circle)
11. Rural Consumers' Stores, Sileru Project area
12. Rural Consumers' Stores, Devarapalli

Dairy Development :

The milk supply societies and unions are intended to supply unadulterated milk to consumers and to get better price to the producers. With the introduction of the three years plan for the supply of pure milk to people living in towns, the business of milk supply unions and primary societies developed to a great extent. The number of societies increased from 5 to 16 by the end of the decennium ending in 1950-51. The production and distribution of milk by these societies increased considerably year after year. Interest free loans were granted to the members of the milk supply societies for the purchase of milch animals.

By March, 1964 there were 35 milk supply societies in the district besides one milk supply union in Visakhapatnam. Out of these, loans were provided from Government to 22 societies. There is one Dairy Assistant to render technical advice to the members of these societies in respect of proper feeding and production of milk besides conducting quality tests.

The Visakhpatnam Milk Supply Union is working on profitable lines and is handling nearly 2,000 lbs of milk on average per day, but however this is quite insufficient to meet the requirements of consumers in Visakhaptnam city.

Co-operative Farming :

A Land Colonisation Co-operative Society was registered and started during March 1959 at Mampakinchuvanipalem at an estimated cost of Rs. 1,65,104 to rehabilitate 50 families. A share capital of Rs. 5,000 was disbursed to members. Out of 350 acres of land alloted, an area of 272.12 acres was reclaimed by the society. However, great difficulty is being felt on account of lack of irrigation facilities

Housing Societies :

There are 16 Co-operative Housing Societies functioning in the district. Rural Housing Schemes have not been introduced so far. All the societies have been working satisfactorily. Loans for the construction of houses by members are channelled through these societies.

Palm Gur Development :

There are 17 Neera and Palm Jaggery manufacturing societies and 21 societies exclusively manufacturing Palm Jaggery in Visakhapatnam circle and 28 Palm Jaggery societies in Anakapalle circle bringing the total number of societies to 66 with 5,373 Members and a paid-up share capital of Rs. 67,096.

Co-operative Sugar Factories :

During the Second Plan Period one sugar factory was established at Chodavaram and another factory at Bhimasingi was registered. The Government have provided to the Chodavaram Sugar Factory the free services of Deputy Registrar for attending to the preliminary work such as collection of share capital, purchase and installation of machinery etc. The society have been provided with a contribution of Rs. 15 lakhs from the Government towards share capital. The construction work on this factory is in progress.

Two Co-operative Sugar Factories were functioning at Etikoppaka and Anakapalle with crushing capacity of 1,000 and 450 tons per day respectively. The Etikoppaka Co-operative Sugar Factory is the oldest sugar mill in the country, set up in co-operative sector in 1933. The Bhimasingi Co-operative Sugar Factory has been issued a licence for setting up a factory with a crushing capacity of 1,250 tons per day and the factory is to be set up.

Co-operatives for Backward Communities and Hill Tribes :

There are four Agency Co-operative Marketing Societies situated at Hukumpeta, Paderu, Dumriguda and Sunkarametta. These societies were provided with grants to an extent of Rs. 80,000 towards share capital, working capital, construction of godowns etc.

The Araku Valley Agency Co-operative Society and the Ananthagiri Agency Co-operative Society are also functioning satisfactorily. However, there is a proposal to amalgamate these societies with the Andhra Scheduled Tribes Co-operative Finance and Developement Corporation, Visakhapatnam whose functioning is described in the succeeding paragraphs. Further the three Marketing Societies at Downuru, K.D. Peta and Madugula are already working as Agents of the Corporation with regard to procuring minor forests produce and agricultural produce and supplying domestic requirements on their own account.

The Andhra Scheduled Tribes Co-operative Financing and Development Corporation :

The Andhra Scheduled Tribes Co-operative Finance and Development Corporation Ltd., Visakhapatnam for the economic development of the Scheduled Tribes was registered under the Co-operative Socities Act on 26-10-1956 and started its work from 5-4-1957. It was mainly intended to under take such activities that are conducive to the promotion of economic interest and social welfare of the members of the Scheduled Tribes in the Agency areas situated in the Andhra Region. Upto the beginning of 1963-64, it covered the Agency areas of Srikakulam, Visakhapatnam, East and West Godavari districts only. However, during 1963-64 the activities of the above Corporation were extended to Khammam district also.

The object of the Corporation is to prevent the exploitation of the Tribal people by the Plains' men, to provide them credit facilities, to procure and supply them their requirements and to arrange for

the marketing of the Agricultural and minor forest produce. When the Corporation started its work in 1956-57, there were only two Agency Produce Co-operative Marketing Societies affiliated to it, one at G. L. puram in Srikakulam district and the other at Downuru (Narasapatnam) in Visakhapatnam district. These Agency Produce Co-operative Marketing Societies were set up in the tribal areas with a view to enlist the tribals of the area as their members and to implement the objectives of the Corporation through these societies by affiliating them to it. The Primaries in fact, form part and parcel of the Corporation and act as agents to the Corporation in purchasing from the tribals their agency produce and selling to them their needs of domestic requirements, fertilisers, agricultural implements etc. During the year 1958-59 three more societies were formed, one at Sithampet in Srikakulam district and the other two at Madugula and K.D. Peta in Visakhapatnam district and got affiliated to the Corporation. During the year 1959-60 three more societies were formed one at Saluru in Srikakulam district and the second at Srungavarapukota in Visakhapatnam district and the third at Yeleswaram in East Godavari district. During the year 1960-61 two more societies, one at Rampachodavaram in East Godavari district and the other at Kota Ramchandrapuram in West Godavari district have been formed and affiliated to the Corporation. Consequent on the extension of the activities of the Corporation to Khammam district in Telangana area of the State of Andhra Pradesh two more Agency Produce Co-operative Marketing Societies, one at Bhadrachalam and the other at Palwancha were formed.

Through these Primary Marketing Societies, the Corporation is catering to the needs of the tribals in the following three ways *viz.*

(i) Purchasing the produce of the tribals (minor forest produce and agricultural produce) by paying them fair prices with reference to the market rates prevailing in the nearest plains market

(2) Selling to the hillmen their domestic requirements at cheaper rates by making bulk purchases from the producing centres; and by organising the net work of sales depots throughout the Agency area at all important tribal villages; and

(3) Granting loans and advances to the tribal at a very low rate of interest through Primary Marketing Societies

All the Primaries were registered on liability basis, with their area of operations nc confined to the forest lease units worked out b (Primaries) and as agents to the Corporation. T enrolling tribal members on their rolls and are ing necessary credit facilities to the tribals working out the schemes of the Corporatic merated above. The Corporation has i Rs. 10,000 in each of these Primaries (Andhra paid up share capital, mainly to provide the necessary working capital for issue of ne credit facilities to their tribal members.

The paid up share capital of the Corpor Rs. 2,01,000 of which Rs. 2,00,000 was subscr Government of Andhra Pradesh and the bal Rs. 1,000 was invested by the ten affiliated Pr (Andhra area) at the rate of Rs. 100 each. are in all sixteen members (six representatives Government and ten affiliated Primaries) on tl of the Corporation.

In the Primaries the tribals are enlisted members. Upto 30th June 1964, they have e 14,180 tribals as members (*i.e.*, 14,180 family re tatives, representing the tribal population o 70,900) in the Agency areas of the districts of V patnam, Srikakulam, East Godavari and Godavari. The tribals so admitted have in share capital of Rs. 31,503 upto 30th June 1964

All hillmen are eligible to become mem the Primary Marketing Societies. The share is Re. 1 per share, and the hillmen may t number of shares with reference to their capaci amount of Rs. 5 is collected towards admissic at the time of his enrollment. Soon after the of the annual audit report the profits of the are distributed to the tribal members at the each year.

The Corporation transacts all its business t the Primary Marketing Societies which funct agents to the Corporation. The Corporation fi the societies whenever they are in need of mo also pays a commission of 1/2 percent to the on Agency produce *i.e.*, purchased by the on behalf of the Corporation. Similarly it al a commission of 1/2 percent on all the sales domestic requirements made on behalf of th poration.

The tribals are freely allowed to collect and sell the minor forest produce such as adda leaf, tamarind, sheekai, honey, jack fruits, soapnuts etc. Prior to the inception of the Corporation the Forest Department used to lease out annually the right of purchase of the minor forest produce at a fixed annual rent to the private merchants who in turn used to purchase the entire minor forest produce at a very cheap rate from the tribals and make huge profits by selling the same at high prices to the merchants from them. Thus the tribals were exploited ruthlessly by the plains merchants. Under these circumstances the Corporation came into being with a monopoly right to purchase the minor forest produce.

The Executive management of the affairs of the Corporation is vested in the Board of Directors consisting of 16 members nominated by the Registrar of Co-operative Societies, Andhra Pradesh in consultation with the Government of whom eleven shall be the officers of the Government and five non-officials. Besides the above eleven official Directors, the Government have accepted the inclusion of Financial Adviser to Government (Education Department) and Collector, Khamam in the Board as Additional Directors as also the inclusion of the Director of Information and Public Relations, Hyderabad and the Heads of Departments of Co-operation, Agriculture and Forest instead of the Regional Zonal Officers of the respective Department on the Board in view of the fact that the activities are gradually extended all over the Agency areas of Andhra Pradesh.

The Primaries have their own Boards of Management consisting of nine Directors of whom one-third are nominated official Directors and two-thirds are Directors elected from among the members of the Primaries concerned. The Government have issued orders that two-thirds of the strength of the Board of Directors of the Corporation and Agency Produce Co-operative Marketing Societies shall be nominated while the balance of one-third shall be elected by the General Body of the Institution concerned from amongst their members.

The Office of the Corporation is situated at Visakhapatnam. The administration of the Corporation is placed under the control of the General Manager, an I.A.S. officer in the senior time-scale, assisted by two Deputy General Managers of Senior Deputy Collector's Cadre-one at Visakhapatnam and the other at Rajahmundry. The affiliated Primaries are being managed by Deputy Tahisildars of Revenue Department. There are also sub-ordinate officers of the Co-operative, Revenue, Forest Departments working in the Corporation Head Office and the Primaries in different categories.

CHAPTER IX

PANCHAYATI RAJ

Historical Retrospect :

Local Boards were non-existent till the middle of the 19th century when Road Funds were created by an executive order for the upkeep of roads, other than trunk roads and important district roads. The Collector and the District Engineer were placed in-charge of these works. This arrangement was put on a statutory basis by the District Road Cess Act, 1866, which authorized the levy of a cess of half an anna in the rupee on the rent value of occupied land for the construction and maintenance of local roads.

The origin of the District Boards may be traced to the Local Fund Act of 1871, which was the outcome of the desire on the part of the Government to provide sound elementary education to the masses. The Act made specific provisions for declaring a district or part of a district as a circle and for constituting a Local Fund Board for every such circle, consisting of three or more non-official members, nominated by the Government and an equal number of official members appointed by the Government. The term of office of members was for three years. The non-official members were chosen from among owners or occupiers of lands or persons carrying on business and residing in the circle. The Collector of the district was the Ex-Officio President of the Board situated within his jurisdiction. Some of the important functions of the Board were as follows:

(i) Maintenance of public roads or streets;

(ii) Management of hospitals, schools, choultries and markets; and

(iii) Employment and training of Health staff, the inspection of sanitation in towns and villages and upkeep of other local works of public utility calculated to promote health and comfort of the people

The Act authorized the levy and collection of land cess (at the rate not exceeding one anna in the rupee on the annual rental value of all occupied land), house tax (in villages or groups of villages or town ships in which a school supported by Government grants-in-aid existed) and tolls on carriages, carts or animals making use of the roads within the circle.

Local Self Government as a conscious process of administrative devolution and political education dates back to the final reforms of Lord Mayo's Government. By a resolution No. 3334, dated 14th December, 1871, the Government of India made over to the Provincial Governments certain departments of which education, medical services and roads, deserve particular mention, as they still constitute the principal activities of Local Bodies. The beginnings of a system of Local finances were to be found in the new scheme of Provincial finances and many of the present day problems of Local finance *vis-a-vis* Provincial finance are similar to those which Provinces had to face in their dealings with the Government of India. Lord Ripon's Government desired that Provincial Governments should apply to their financial relations with Local Bodies, the principle of financial decentralization which had worked so satisfactorily between the Government of India and the Provinces. The more important services that were entrusted to the rural bodies were communications, education and sanitation.

The Madras Local Boards Act, 1884, conferred additional responsibilities on the Local Boards which for the first time came to be known as the 'District Boards' instead of the 'Local Fund Boards'. Under this Act, three classes of Local Boards, came into existence, *viz*., District Boards, Taluk Boards and Unions. The Unions were of two classes-"Major"and"Minor". The administration of local affairs was vested in the District Boards constituted for each of the revenue districts consisting of not less than 24 Members who might all be appointed by the Government or might be partly so appointed and partly elected by the Members of the newly created Taluk Boards from among their Members or by the Union Boards and by the tax-payers of the rural parts of the district. The Collector continued to be the Ex-Officio President. The Act also provided for the election of the Presidents of the District Boards, from among the members of the District Boards, if the Government so directed. The members were to hold office for

three years. All the Revenue Divisional Officers were made Ex-Officio Members. The Local Boards were empowered to levy with the approval of the Government any of the taxes authorized under the Act.

A Taluk Board consisting of a President and not less than 12 Members was constituted for each taluk or group of taluks. The term of office of the members was for three years. The Revenue Divisional Officer was made an Ex-Officio Member and President of the Board. The Taluk Board funds consisted of one-half of the proceeds of the tax levied by the District Board in the area and transferred to the Taluk Boards by the District Board and other fees such as licence for markets etc., collected within the area of the Taluk Board. The revenues of the District Boards and the Taluk Boards were derived from land cess, from fees for the use of cart stands, markets, slaughter houses, etc., and from tolls in the case of the maintenance of roads, bridges and other means of communications. The chief functions of these institutions as has been stated earlier were the construction and maintenance of hospitals and dispensaries, the diffusion of education, the enforcement of measures relating to sanitation and public health and the establishment and maintenance of relief works in times of famine and scarcity conditions

An Union Board was constituted for a single village or for a group of villages. They consisted of not less than five persons, the headmen of the villages constituting the Union, being Ex-Officio members. The Board levied house-tax varying from four annas to four rupees according to the classification of the house. The duties and responsibilities of this Board were the lighting and cleaning of public roads, the maintenance of drains, wells and other public places, the establishment and maintenance of dispensaries and schools etc.

In 1907 the entire subject of Local Self Government was taken up for consideration by the Royal Commission on Decentralization. The Commission brought to light that the resources of the Local Bodies were not sufficient for the proper discharge of the duties assigned to them. In order, therefore, to make Local Self Government really effective and responsible, the Montague-Chelmsford Report suggested that there should be as far as possible complete popular control in the affairs of the Local Bodies and the largest possible independence from outside control. In regard to Rural Boards the report stated that they should have full liberty to improve and alter taxation within the limits laid down by law. It further stated that whenever a board paid for a service it should also control that service. If it was considered that control should be largely in the hands of the Government, then in such a case the service should be provincialized.

In the Government of India Resolution of the 16th May, 1918, the Government reviewed the question of Local Self Government and expressed the view that in order to give effect to the new policy, Local Bodies should be as representative as possible of the people whose affairs they were called upon to administer, the authority in the matter entrusted to them should be real and not nominal and that they should not be subject to unnecessary control but should learn, if necessary, by making mistakes and profiting by them.

With the coming into force of the Government of India Act, 1919, Local Self Government became a transferred subject and implementation of the policy and the principles formulated in the resolution of May, 1918, thereupon devolved on the elected members.

Several amending Acts were passed by the State Legislature from time to time in order to rectify defects which were brought to light in the working of the Madras Local Boards Act, 1884. In 1920, the State Government thought that it was necessary to have a comprehensive legislation to give effect to the new policy of the Government and to consolidate and amend the law relating to the District Boards and this resulted in the passing of the Madras Local Boards Act (Act XIV of 1920). The Act gave an independent status to each class of Local Boards and increased not only their strength but also the proportion of elected members, their resources and their powers. The taxation powers of all the three categories of Local Boards were enlarged. The Boards were authorized to levy the pilgrim tax and also the profession tax on companies and firms. They were given a free hand in framing their budgets. Provision was also made for the appointment of a District Board Engineer and a District Health Officer. The Local Boards thus became more or less autonomous and the Collector and the Government were empowered to interfere only in cases of emergency and maladministration. In the same year, the Madras Village Panchayat Act was also passed with the object of developing the system

of Local Self Government in Rural areas. This Panchayat Act was, however, repealed in 1930 with passing of the Madras Act XI of 1930, which amended the Madras Local Boards Act, 1920, and was also comprehensive enough to include even the Panchayats constituted before the repeal of the Madras Village Panchayats Act, 1920. The Madras Local Boards Act, 1920, has been amended since then several times; the Taluk Boards having been abolished in 1934 and the Panchayats having been taken away from the ambit of the Act by the Madras Village Panchayats Act, 1950.

The following paragraphs illustrate in brief the trend in the amendments to 1920 Act.

Provision was made for taking of oath by Members of Local Boards. All roads and public markets were thrown open to all persons of whatever caste or creed. The main changes introduced by the amendment Act of 1930 were:

(i) Inclusion of Village Panchayats within the scope of the Act, conversion of Union Boards into Panchayats and the repeal of the Madras Village Panchayats Act, 1920;

(ii) Abolition of the system of nomination to Local Boards;

(iii) Direct elections to District Boards;

(iv) General triennial elections to Local Boards;

(v) Provision for a vote of no-confidence in Presidents and Vice-Presidents and for the removal of Presidents and Vice-Presidents by Government;

(vi) Election of Presidents of District Boards;

(vii) Empowering the Government to Provincialize the services of officers and servants of Local Boards

(viii) Alteration in the provisions relating to taxes and tolls with special emphasis on the levy of any tax suitable to the village with the sanction of the Panchayat, and

(ix) More effective supervision over the adjudication of disputes between local authorities *inter-se*, including, in particular, the vesting of power in the Local Government to constitute joint committees of local authorities for the purpose.

The levy of tolls and tax on motor vehicles by Local Boards was abolished in 1931. Specific provision was made for the constitution of District Boards, for altering their jurisdiction and for their abolition. The majority required for the passing of motion of no-confidence in Presidents and Vice-Presidents was reduced from 2/3 to 3/5. Provision was made for the reservation of seats for Muslims and Indian Christians besides members of the Scheduled Castes. The Government took power to appoint District Engineers, Health Officers and Panchayat Officers. The amended Act of 1934 abolished the Taluk Boards, the Village Development Fund, and made a provision for the splitting up of District Boards. The jurisdiction of Courts to grant injunctions in election proceedings of Local Boards was taken away by the amending Act of 1936. The amalgamation of bifurcated District Boards was made possible by the amending Act of 1937. The Act of 1938 provided for the inclusion of the names of persons found in the electoral rolls of the Legislative Assembly Constitutencies in the rolls prepared for Local Boards. Failure to pay arrears of any kind due to the Local Boards was made a disqualification for candidates standing for elections or for members continuing in office.

Certain safeguards were provided by the amending Act of 1942 in regard to the removal or the dismissal of Government servants employed by Local Boards. Act X of 1945 increased the rate of land cess leviable by Local Boards from 1½ annas to 2 annas in the rupee. In the same year, provision was made in the Act for the levy of duty on transfers of property in the form of surcharge on stamp duty in respect of immovable property situated in the area under the jurisdiction of Local Boards. The formation of the Highways Department in 1946 resulted in certain amendments to the Act in that year. In 1947 provision was made for the inclusion in the electoral rolls of Local Boards of persons who were qualified to be included but were omitted to be included in the Assembly electoral rolls. The levy of duty on transfer of property in respect of leases in perpetuity of immovable property and exchange of immovable property was made possible by the Madras Act VII of 1950. The Madras Village Panchayats Act, 1950 removed Village Panchayats from the ambit of the Madras Local Boards Act, 1920, after which the provisions of the latter Act, which

formerly related to Panchayats were restricted to Non-Panchayat areas. The name of the Madras Local Boards Act was altered into the Madras District Boards Act, 1920. The provision for the reservation of seats for Muslims, Indian Christians and Europeans in the Act was omitted by the amending Act of 1951. The Act also limited the total number of reserved seats for the members of the Scheduled Castes, Anglo-Indians and women to one-fourth of the strength fixed for the District Board. By another Act of 1951, the adoption of Madras Legislative Assembly electoral rolls and the alteration there to for purposes of elections to District Boards was provided for. Certain provisions of Representation of the People Act, 1950 regarding the conduct of elections were embodied in the Madras District Boards Act by an Act of 1954.

The First Five Year Plan for the country was introduced in 1951. Planning led to an enormous increase in the activities of the Government. Large sums of money had to be spent on various schemes in short periods. It was, therefore, found essential that those who were to be benefited by these schemes should also have a say in their formulation. They must learn to express their felt needs and get them translated into programmes that can be implemented. Thus, the idea of the "Panchayati Raj" slowly began to take shape.

Panchayati Raj in Andhra Pradesh can, however, be said to have had its roots nearly one and a half decades ago. It is based on the Gandhian principle of rural rejuvenation to usher in a balanced development of the countryside. This idea was given effect to by late Sri T. Prakasam, the then Chief Minister of the composite Madras State by his promulgation of the "Firka Development Scheme" in 1946. This was subsequently converted to the "Rural Welfare Scheme" in 1950. Besides the rural reconstruction work this scheme also covered Harijan Uplift Programmes as well as the Khadi Schemes. The three-pronged drive that this scheme gave to the economic and social reconstruction of rural life was in the direction of self-help, co-operative approach and State aid. As in all nascent institutions, the issues at the beginning were not so clearly defined and so well crystalised as in the case of the Panchayati Raj institutions, but however, they formed the forerunners of a movement which has now got itself fully entrenched in the institution of the Panchayati Raj.

Community Development Programmes:

The pattern of Community Development inaugurated on the 2nd of October, 1952 has been gradually modified to suit the needs of our rural communities. The central object of the Community Development Programme was to secure the fullest development of material and human resources of the local areas based on the fact that all aspects of rural life are inter-related and that no lasting results can be achieved if individual aspects of it are to be dealt in isolation. The approach was to step up the co-operative principle in its infinitely ranging forms for solving all problems of rural life. The experiment, therefore in Community Development was started with the introduction of the Community Projects in the wake of the Rural Development Schemes. These projects in a very short period achieved great popularity and people everywhere in other areas started to clamour for similar benefits in their respective villages. On account of these public demands and also considering the limited resources at the disposal of the Government the pattern of Community Projects had to be gradually changed over, to cover similar and lesser expensive projects. These were known as the National Extension Service Blocks each covering an area of about 150-170 square miles and involving an out lay of about Rs. 4.50 lakhs. The normal operational period of each of the N.E.S Blocks was to be for three years. Any time within that period depending on the performance in the realm of people's participation, physical attainment and expenditure, the N.E.S. Block got converted into a Community Development Block with a bigger outlay of Rs. 15 lakhs which also included the expenditure incurred during its N.E.S. stage. In June, 1957 the National Development Council decided that the Block should be treated as an unit for the purpose of planning and development and it should be made the agency through which the resources of the Government should flow to the people.

The study team for Community Development and National Extension Service headed by Sri Balwant Rai G. Mehta recommended certain changes in the pattern of Community Development. The Ministry of Community Development accepted these proposals and accordingly removed the distinction between the different types of Blocks and introduced the two stage system. Stage I was to be the intensive development phase with a provision of Rs. 12 lakhs and Stage II was to be the post-intensive phase with

a provision of Rs. 5 lakhs. Both stages were to be of a duration of 5 years each. Great emphasis was laid on agriculture, and therefore each Block had to pass through a Pre-Extension stage of one year devoted exclusively to agricultural development. On completion of this Pre-Extension Stage of one year the Block automatically entered the Stage I period.

Decentralization :

Decentralisation of authority and the participation of people in administration have always been considered by great thinkers from the time of Socrates, as the chief embodiments of any democracy. In order that these two essential requisites find place in the fabric of the Indian democracy on the recommendations of Sri Balwant Rai G. Mehta (Committee) Team "Panchayat Samithis" were constituted for each Community Development Block wherein the people are provided opportunities for participating in the process of administration. All developmental works beneficial to the community and coming within the ambit of Community Development were entrusted to the people's own elected representatives.

The idea of democratic decentralisation was thus conceived and the nucleus for this revolutionary movement was the age old Village Panchayat. The three tier system in which the Panchayat Raj institutions are linked one with the other consisting of the Gram Panchayat with its directly elected Sarpanch and members, the Panchayat Samithi at the Block level with the Sarpanches of Gram Panchayats as its members and the Zilla Parishad at the District level consisting of the Presidents of all the Panchayat Samithis within the district and the Legislators of the State and the Centre, was evolved as the institution in which the people's representatives will have their say in the formulation and execution of policies and programmes beneficial of the Community. The constitution of Gram Panchayats was, therefore, speeded up in order that the entire rural area comes under one or the other of the Gram Panchayats.

The Andhra Pradesh Panchayat Samithis and Zilla Parishads Act was enacted in 1959 and except the areas within the jurisdiction of the Municipalities in the Andhra area, the areas within the jurisdiction of the City Municipalities in the Telangana area; the areas within the jurisdiction of the Municipal Corporation of Hyderabad and the areas within the jurisdiction of Secunderabad Cantonment Board and City Municipalities, the rest of the area constituting the State of Andhra Pradesh was brought under the ambit of this Act.

Panchayat Samithis :

The Sarpanches of all the Gram Panchayats in a Block constitute the members of the Panchayat Samithi. Besides two women members, one representative of the Scheduled Castes, one representative of the Scheduled Tribes where the population in the Block is not less than 5%of the total population of that Block and if not, one more representative of the Scheduled Castes, and two persons interested in rural development will also be elected as members in the prescribed manner. Apart from these members, the Member of the Legislative Assembly of the State representing a constituency which comprises the Block will be members of the Panchayat Samithi of that Block. A Member of the Legislative Assembly representing a constituency which comprises more than one Block including a portion of any Block will be a member of the Panchayat Samithi of only one such Block which he chooses and he will have the right to speak in, and otherwise to take part in the proceedings of a meeting of any Standing Committee of such Panchayat Samithi, but he is not entitled to vote at a meeting of such Standing Committee unless he is also a member of that Committee. He will also have the right to speak in and otherwise to take part in the proceedings of a meeting of any Panchayat Samithi or any Standing Committee thereof constituted for the other Blocks comprised within the constituency, but he is not entitled to vote at any such meeting. A Member of the Legislative Council of the State specified by Government as member of the Zilla Parishad will become member of one of the Panchayat Samithis in the District. Such member of the Legislative Council will be a member of only one Panchayat Samithi in such district; and where he is a registered voter in any Block in such district, he will be a member of the Panchayat Samithi of only that Block; but if he is not a registered voter in any Block in the district, he will be a member of only one Panchayat Samithi of his choice in such district. Similary the Revenue Divisional Officer, the District Collector and such other officers as the Government may, by order, specify, have got the right to speak in and otherwise to take part in the proceedings of any meeting of a Panchayat Samithi or any standing committee thereof functioning within the local limits of their respective jurisdictions but they are not entitled to vote at any such meeting.

The Panchayat Samithi has been placed in complete charge of the implementation of the Community Development Programmes and in addition the Government have also entrusted to it the extension activities of the various development departments of the Government such as Agriculture, Animal Husbandry, Fisheries, Industries, Education, Co-operation, Social Welfare, Women's Welfare etc.

Every Panchayat Samithi has seven Standing Committees each of which has been placed in charge of a few specified subjects. The Panchayat Samithi with the approval of the State Government, is empowered to constitute one or more standing committees if necessary, for attending to any specific items of work. All the standing committees have independent powers of sanction within specified financial limits and may also execute works and schemes within those limits.

The Block Development Officer is the Chief Executive Officer of the Panchayat Samithi and he is assisted by the Extension staff. The President of the Panchayat Samithi exercises administrative control over the Block Development Officer for the purpose of implementation of the resolutions of the Panchayat Samithi and its Standing Committees.

Zilla Parishad :

At the District level there is the Zilla Parishad comprising the Presidents of all the Panchayat Samithis in the district, the District Collector, the Members of the Legislative Assembly of the State elected from the district, such Members of the Legislative Council of the State as the Government may by order specify, the Members of the House of the People elected from the Constituency which forms part of the district, and such Members of the Council of States as the Government may, by order, specify. Two women, one representative of the Scheduled Castes, and one representative of the Scheduled Tribes if their population in the district is not less than 5 % of the total population of that district, and if the population of the Scheduled Tribes is less than such percentage, another representative of the Scheduled Castes, two persons interested in rural development have to be elected by the above categories of members.

The Chairman and the Vice-Chairman are to be elected by the members from among the non-officials who are not Legislators. The President of any Panchayat Samithi, if elected, as the Chairman of the Zilla Parishad will automatically cease to be the President of that Panchayat Samithi, but his right of membership on the Panchayat Samithi, will not be affected. A Secretary, appointed by the Government functions as the executive head of this organisation. He is entitled to attend the meetings of the Zilla Parishad or any of its Standing Committee and can take part in disscussions, but he is not entitled to vote. Like the Panchayat Samithis, the Zilla Parishad also functions through its seven Standing Committees. In addition to these seven Standing Committees, the Zilla Parishad may, with the approval of the Government, constitute one or more Standing Committees if necessary, for specified purposes. The Chairman of the Zilla Parishad and the District Collector are Ex-Officio members of all Standing Committees while the remaining members are to be elected in prescribed manner by the members of the Zilla Parishad from among themselves. The District Collector is the Chairman of all the Standing Committees. The President or Chairman of the District Co-operative Bank or the Central Bank and the President of the District Marketing Society in the district have the right to speak in and otherwise to take part in the proceedings of any meeting of the Zilla Parishad but are not entitled to vote at any such meeting. The District Officers of various development departments, Regional and State Officers in charge of development activities who are specified by the Government by an order have the right to speak in and otherwise to take part in the proceedings of any meeting of the Zilla Parishad or any Standing Committees thereof functioning within the local limits of their respective jurisdiction but they, however, have no right to vote.

The Zilla Parishad co-ordinates and consolidates plans prepared in respect of all the Blocks in the district, prepares plans in respect of the entire district, and supervises generally the activities of the Panchayat Samithis in the district. It also examines and approves the budgets of the Panchayat Samithis in the district.

The chief sources of income of the Zilla Parishad are the Central or the State Government funds allotted to it; grants from All India Bodies and Institutions for the development of Cottage, Village and Small Scale Industries; such share of the land cess or, local cess, State taxes or fees as may be prescribed, proceeds from taxes or fees which the Zilla Parishad may under any law levy; income from Endowments

or Trusts administered by the Zilla Parishad; such income of the District Board as the Government may by order allot to it; donations and contributions from Panchayat Samithis or from the public in any form; and such contributions as the Zilla Parishad may levy from the Panchayat Samithis with the previous approval of the State Government.

Growth of Community Development Programmes in the District :

The Community Development Programmes in the district were commenced in 1954. On 4th April, 1954 three National Extension Service Blocks of Pendurthi, Kotauratla and Nakkapalle were started and on 2nd October, 1954 one more National Extension Service Block at Sabbavaram was started. Based on the progress of work and targets achieved during the previous year Pendurthi was upgraded into a Community Development Block on 1-4-55. Kotauratla and Nakkapalle Blocks were upgraded as C.D. Blocks on 2-10-1956 while Sabbavaram was upgraded on 1-4-56 itself. During 1956 four new N.E.S Blocks were established out of which two were Multipurpose Projects started on 1-4-1956 in tribal areas namely Araku and Hukumpet (Paderu) Multipurpose Projects and Kanithi and Rolugunta N.E.S. Blocks on 2-10-56. Thus at the beginning of the Second Five Year Plan period there were eight Blocks in the district of which four were C.D. Blocks, two Multipurpose Projects and two N.E.S. Blocks. During 1957 four more N.E.S. Blocks namely Tagarapuvalasa (Bheemunipatnam), Golugonda (Narasapatnam), Kodur and Kasimkota were constituted, the former two on 1-4-57 and the latter two on 2-10-57. During 1958 a significant change in the pattern of the programme was made. Shri Balwanta Rai G. Mehta Committee which was appointed by the Committee on Plan Projects to study the working of the Community Development Programme recomended the abolition of the distinction between National Extension Service Blocks and Community Development Blocks and instead suggested the introduction of revised phased programme envisaging only two stages of five years each. Based on these recomendations the pattern of the Blocks was changed from N. E. S. and C. D. Blocks to Pre-Extension, Stage I and Stage II Blocks from July, 1958. Certain Community Development Blocks were however allowed to continue as such till the expiry of their programme period. Another significant step taken in 1958 was to treat a Block as an unit for the purposes of Planning and Development. As a result of the above changes in the pattern of the Community Development Programme adopted by the Government, the eight N.E.S. Blocks that were functioning in this district in the previous year were classified as Stage I Blocks and the two Multipurpose Projects *viz.*, Araku and Paderu and the four C.D. Blocks (Pendurthi, Kotauratla, Nakkapalle and Sabbavaram) were continued as such. On 1st April, 1958 two blocks namely Gazularega, a Stage I Block and Achutapuram, a Pre-Extension Block were created and again on 2nd October, 1958 one more Pre-Extension Block *viz.*, Vaddadi was inaugurated. Thus by the end of 1958 the total number of Blocks have grown to 25 (7 Stage I Blocks, 14 C. D. Blocks, 2 Multipurpose Projects and 2 Pre-Extension Blocks). During 1959 Achutapuram and Vaddadi Pre-Extension Blocks were upgraded as Stage I Blocks. The four Community Development Blocks were classified as Stage II Blocks. Besides the above changes four more Blocks, two Stage II Blocks *viz.*, Paravada and Payakaraopet and two Pre-Extension Blocks *viz.*, Kothavalasa and Gajapatinagaram were constituted. Of these four, two were constituted on 1-4-59 and the remaining two on 2-10-59. During 1960 Kothavalasa and Gajapatinagaram Pre-Extension Blocks were upgraded as Stage I Blocks and two new Pre-Extension Blocks *viz.*, Chintapalle and Yellamanchili were established on 1-4-60 and 2-10-60 respectively. Thus by the end of the Second Five Year Plan period Visakhapatnam district was covered by 21 Blocks of which 11 were Stage I, 6 Stage II, 2 Multipurpose and 2 Pre-Extension benefiting 1,301 villages and 12,42,907 persons. During the Third Plan period the programme gained further impetus and by 1-4-64 the total number of Blocks has grown to 33 (18 Stage I, 12 Stage II, 3 Post Stage II), Blocks. The following statement gives the details of the number and names of the Blocks in the district as on 1st April, 1964 together with their dates of inception, present stage, number of villages, area and population covered.

STATEMENT IX-1

Sl. No.	Name of Block	Date of inception	Stage of Block	No. of villages in the Block	Area in sq. miles	Population covered
(1)	(2)	(3)	(4)	(5)	(6)	(7)
	Stage I Blocks					
1	Atchutapuram	1-4-58	I	54	94.50	55,398

Source : Planning Department, Government of Andhra Pradesh, Hyderabad.

During the re-delimitation of the Blocks made in 1964 the above 33 Blocks were re-delimited to 24 Blocks namely Pendurthi, Sabbavaram, Kasimkota, Bheemunipatnam, Bhogapuram, Nellimerla, Gantyada, Srungavarapukota, Viyyampeta, Ravikamatam, K. Kotapadu, Madugula, Araku, Kilaguda, Anantagiri, Gamparayi, Paderu, Gangarajumadugole, Chintapalle, Koyyuru, Narasapatnam, Kotauratla, Yellamanchili and Nakkapalle. The Panchayat Samithis were constituted for the first time in this district on 1-11-59 and the Zilla Parishads on 1-12-59 on a statuatory basis. After the introduction of the democratic decentralization and the establishment of the democratic institutions at the district, block and village levels the responsibility and intitiative in economic and social development in rural areas rested more with these popular institutions namely the Zilla Parishads,the Panchayat Samithis and the Gram Panchayats. In view of the important role that the Gram Panchayats have to play in this decentralisation the need for the constitution of Gram Panchayats for all villages has increased all the more. 1,145 Gram Panchayats have so far been constituted in this district. During the recent Panchayat Elections held in June, 1964, 813 Panchayats elected both their members and Sarpanches unanimously and 1,084 Panchayats elected their Sarpanches only uncontested. Seven of the Panchayat Samithis also elected their co-opted members and Presidents unanimously. The Gram Panchayats are now in a formative stage and if they are given proper guidance in the matter of administration and the vital role that they have to play under the Five Year Plans it is hoped that in the course of time these Gram Panchayats will rise up to the occasion and share their responsibilities squarely.

CHAPTER X

GAZETTEER

VISAKHAPATNAM TALUK

This is a coastal taluk comprising an area of 196.00 square miles and lies elongated from south to north-east in the district. It is bounded on the north by Srungavarapukota and Bheemunipatnam taluks; on the east and south by the Bay of Bengal, and on the west by Anakapalle taluk. The climate is generally salubrious on account of its proximity to the sea. May to July are the warmest months of the year. According to the 1961 Census count the taluk supports a population of 306,971 persons as against 231,907 persons in the previous Census count. There are altogether 58 inhabited villages and two towns *viz.*, Visakhapatnam and Malkapuram.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	4
200–499	6
500–999	13
1000–1999	17
2000–4999	16
5000–9999	2
10000 and above	Nil
Total inhabited villages	58

The two villages having more than 5,000 population are Gopalapatnam (5,509) and Nellimukku (6,135). The places of interest among these villages are described in the succeeding paragraphs. The density of population of the taluk is 1,566 persons per square mile.

It is a picturesque tract. The coast line is broken in the vicinity of Visakhapatnam by the bold headland called the Dolphin's Nose (1,174 feet above the Sea), the hills which run down to the shore by Lawson's Bay just north of Waltair, and the Sugarloaf hill which separates this from the Bay just beyond it; and in the inland stands the Simhachalam range of rounded red hills. The taluk is drained and watered only by the river Meghadri Gedda which flows from north-west to south-east and finally falls into the Bay of Bengal. The taluk contains as many as 173 minor irrigation and 6 major irrigation sources. Apart from this, the taluk is served by the Gambhiram Gedda Reservoir. The taluk has a fairly long coast line with an extreme inland extension and the coastal belt includes sandy tracts. The interior plain is predominantly made up of red sand and red ferruginous series of soils. The forest area in this taluk extends over 49.39 square miles.

As regards the transport and communication facilities this taluk is well connected by road communications. The Madras-Calcutta National Highway passes through this taluk. It has a splendid harbour at Visakhapatnam deep enough to receive ocean-going vessels. The Waltair Railway Junction is an important railway station from where the railways lead to Calcutta, Raipur and Madras. Visakhapatnam City has an air port and a bi-weekly air service connects Hyderabad to Visakhapatnam.

As regards medical facilities, there is King George Hospital, a Government Hospital for Women and Children, a Mental Hospital, a Port Hospital, a Railway Hospital, besides three Municipal Dispensaries at the taluk headquarters. In the rural areas a Tuberculosis Hospital is located at Nakkavanipalem. Rural Health Centres are also located at Kanithi, Pendurti and Simhachalam. A Leprosy Subsidiary Centre is located at Thatichetlapalem. The City of Visakhapatnam is served with protected water supply system.

The Andhra University with its affiliated colleges is located in Visakhapatnam. This place contains an Arts and Science College, an Engineering College and a Medical College.

The chief cottage and small scale industries of this taluk are basket making, vegetable oil pressing, manufacture of dairy products, carving in ivory, sandalwood and tortoise shells, pottery, carpentry besides the coir industry which is popular. As regards the large scale industries the taluk contains the Hindustan Ship Building Yard, the Caltex Oil Refinery, the Indian Oxygen Company and the Industrial Estate. A huge fertilizer plant with American collaboration known as the Coromandel Fertilizers is also coming up at Visakhapatnam.

The common features of interest in this taluk as elsewhere in the entire district are weekly shandys (markets) which are held on different days at Gopalapatnam, Mindi, Gajuvaka, Pendurthi and Visakhapatnam. Large number of people come to these market places.

Visakhapatnam City — is a Municipality with a population 182,004 persons as per the 1961 Census count and is also the headquarters of the district and the taluk. The establishment, the development and the fortunes of the British settlement here have been traced in great detail in the Chapter relating to the History of this district and it may be referred to. The city is built along the sea shore of a wide Bay 5 miles across which is bounded and broken by the bold headland called the Dolphin's Nose (1,174 feet above the sea level). This place is also known as the Blackmore's hill. The built up area comprising Visakhapatnam and Waltair lies from the southern end of the Bay to its northern end with a fine road all along its shore. The drive along this road will reveal a series of splendid buildings at various elevations slightly to the interior of the sea shore.

Visakhapatnam city on account of the various industries, educational and technical institutions has become very important and as a result crowded. The main road leading from the harbour towards Waltair has become a commercial centre and is very congested. The atmosphere of dust and din gradually changes as one traverses up the road from Visakhapatnam to Waltair. Even as late as few years after Independence the Waltair hill was occupied by isolated houses in which highly placed Government officials and a few well-to-do businessmen and Maharajas resided. Many new houses have come up on this beautiful area overlooking the sea and land values have also shot up on the Waltair hill where previously nobody except the powerfuls and the influential resided.

The Governor's summer residence known as the "Circuit House" is located on one of the hills at Waltair. This place is ideally situated and has a clear and splendid view of the sea which seems almost to caress its feet. This house was previously the official residence of the District and Sessions Judge before it was converted into the Circuit House. When it is not occupied by the Governor it is being used as a State Guest House for the occupation of the V. I. Ps. who visit this place. Very close to the Circuit House is the Waltair Club which is also quite an old institution and it still preserves its air of exclusiveness and style. Further north lie the Collector's residence and the Andhra University. Opposite to the main gate of the Andhra University buildings has come up the residential colony of the officers of the Caltex Oil Refinery. This colony looks most modern. The modern houses of American design are quite exquisite. Further north is the Lawson's Bay very close to an Ashram and the whole atmosphere at this place is very peaceful. The Lawson's Bay with its shallow waters is an ideal place for picnic and bathing. Early hours of the morning is the best time to visit this place for a quiet dip.

The harbour in Visakhapatnam is considered to be one of the best natural harbours of the world. It was found that the mouth of this harbour was getting blocked on account of sand being deposited by tidal action. Therefore, after a detailed study of this problem it was decided to sink two ships in the path of these tides so that the sand gets prevented from reaching the mouth of the harbour. This was done and since then the problem of silting has been minimised to a considerable extent. These two sunken ships can be seen still from the shore and they present quite an unusual sight to any visitor. Large ocean liners can now enter the harbour without much difficulty and these have to be piloted by pilots from the harbour. Other dredging operations also go on continuously for keeping the harbour channel in a proper condition. There is a large scheme of further expansion of the harbour. During 1960-61, 13,64,066 tons of imports and 14,39,922 tons of exports were handled at this harbour. Heavy machinery, foodgrains and crude oil are the chief items of imports and iron ore the chief item of export. Within the harbour area is a Ship Building Yard under the public sector known as the Hindustan Shipyard, manufacturing ships both for commercial use as well as for the Indian Navy. At one end of the harbour is also situated the Naval base.

Waltair is an important railway junction from where trains could be had to Raipur, Calcutta and Madras. There is a very good Air port a few miles away from Visakhapatnam.

The harbour area is a very picturesque spot. The hills seem to suddenly rise from the water. One such hill is known as Ross'hill. On one of the hills overlooking the harbour is a Church, on another a temple, and on a third a shrine together with a mosque. This shrine is said to be of a Muslim saint by name Saiyad Madina *alias* Ishaq Madina. This is an important place of pilgrimage for Muslims. The St. John's Church of England also quite close to the Harbour was built in 1844 by the famous builder Sir Arthur Cotton and this was consecrated in 1846. The Town Hall is said to have been presented by the Maharaja of Bobbili to commemorate the late Queen Victoria's Diamond Jubilee. From whatever view point Visakhapatnam City is observed, it is undoubtedly the most progressive and the most picturesque of all the cities in Andhra.

There are several important educational institutions in the city. The Andhra University and the Andhra Medical College are some of the oldest educational institutions in the State. Besides these there is a College of Arts and Science and an Engineering College. There are several High Schools, Middle Schools, Secondary Schools, and Higher Secondary School in the city.

A big General Hospital known as the King George Hospital is situated here overlooking the sea. It is one of the oldest and one of the best equipped hospitals in the State.

As regards the other amenities the city has protected water supply system But unfortunately the drainage is still of the open type. There are a number of cinema houses, reading rooms, libraries, clubs *etc.* There are also a number of hotels which cater to the needs of the enormous floating population.

Malkapuram— is a fairly large township adjoining Visakhapatnam city with a population of 29,186 persons according to the 1961 Census count. It has gained importance only after the location of the Caltex Oil Refinery and has assumed an urban complex. Several workers of the Hindustan Shipyard also are housed in Malkapuram area. The town is a Panchayat and there are altogether 6,124 occupied residential houses. This township deserves to be merged with Visakhapatnam City.

Gopalapatnam— is a fairly big village situated between Simhachalam, a famous pilgrim centre and Visakhapatnam with a population of 5,509 persons as per the 1961 Census count. The village extends over an area of 1.72 square miles and in all it comprises 1,078 occupied residential houses. The village owes its importance to its Railway Station on the Howrah-Madras line (Broad Gauge) of the South Eastern Railway It also assumes importance on account of its nearness to Simhachalam. People in this village live by cultivation as their main occupation. According to the 1961 Census count the total number of agricultural workers of this place is 940 persons, out of which 534 persons are Cultivators while the rest 406 persons are Agricultural Labourers. Wet paddy, ragi and bajra are the food crops raised in this village. It contains a Panchayat Office, a Police Station, a Prohibition Office, a Branch Post Office, a Public Choultry besides a small Reading Room and a Community Hall. Shandies are held three times every week *i.e.*, on Monday Wednesday and Saturday. A Zilla Parishad Middle School caters to the educational requirements of the local children.

Nellimukku— is the largest populated coastal village in this taluk consisting of about six hamlets. According to the 1961 Census count it supports a population of 6,135 persons. The village extends over an area of 6.66 square miles and there are altogether 1,208 occupied residential houses. Agriculture is the major means of livelihood for a large number of people and the total number of Agricultural workers is 2,099 persons. Wet paddy, ragi and bajra are the chief food crops raised. Fishing is another major occupation on account of the nearness of this place to the sea. As such the villagers of Gannavaram, Pallipalem, Chepalapalem hamlets of Nellimukku mainly live by fishing and mostly the fish is transported to Markets at Visakhapatnam. There is a separate elementary school maintained by the Fisheries Department, exclusively for the children of fishermen.

Another feature of economic interest of this village is that a salt centre or factory is situated in the hamlet of Balacheruvu which lies on the threshold of the main village connected by a road. It is reported that Balacheruvu is the biggest salt production centre in the taluk. The village contains several elementray schools There is a Branch Post Office, a Panchayat Office and Rama Mandiram in this village. The G.N. T. Road passes at a distance of about

6 miles from this village connected by Balacheruvu road. Thadi the nearest Railway Station on the Southern Railway (Broad Gauge) is about 7 miles from this village.

Appikonda—situated on the coast of Bay of Bengal extends over an area of 6.04 square miles. The village recorded a population of 1,519 persons as per the 1961 Census count and comprises 288 occupied residential houses. Agriculture is the major means of livelihood for the people in this village. The total number of agricultural workers of this place is 927 persons.

The village, though small, assumes religious importance owing to the construction of a Siva temple containing a life size bull carved out of black stone, besides a number of other small temples around it. But these small temples are mostly covered by sand and only the Gopurams can be seen. The Siva temple contains inscriptions of the 12th century A. D. which reveal that the grant of this village was by one of the Commanders-in-Chief of the Choda dynasty for the up-keep of the temple and performance of religious functions. Every year on Sivarathri day a big festival takes place in this village and devotees of the surrounding villages participate in it.

Simhachalam—hamlet of Adivivaram is a sacred place of pilgrimage in Visakhapatnam taluk and is situated on the Simhachalam range of hills. It is about ten miles from Visakhapatnam. It is roughly 800 feet above the sea level and stands just north of Visakhapatnam. Near the top of the north side of it, in a wooded hollow surrounded by a wide circle of higher ground, is the temple of Narasimha, the man-lion incarnation of Vishnu, which gives the hill its name. This is the most famous, richest and best sculptured shrine in Visakhapatnam district and in honour of this deity a number of people of the district are named Simhachalam, Simhadri, Narasimha and so on. From the hollow in which it stands, a deep glen watered by a rivulet and clothed with many trees in striking contrast to the bare flanks of the rest of the hill, runs down to the foot of the northern slope where there is a rosegarden. This garden is traditionally declared to have been planted by the well-known Sitarama Razu of Vizianagaram Kings and is watered from this rivulet. The Rajas of Vizianagaram have been wardens of the shrine for over two centuries and have endowed it with land having an annual income of about Rs. 30,000.

The way up to the temple runs along the glen from near the rose-garden, through terraced fields of pineapples dotted with mango, jack and other trees. It passes up a broad flight of well-kept stone steps, over a thousand in number, on either side of which trees have been planted to provide shade. At frequent intervals are images of the various Hindu Gods in little niches, and on festival days the steps are lighted from top to bottom. The steps eventually reach the narrow mouth of the glen, and here the path is barred by bold portal called Hanuman's gate, by the side of which the rivulet, which passes down the glen, is led into two pools where pilgrims bathe before they continue the ascent. This gate was apparently part of the fortifications which, in former days, guarded the temple and other sacred places which even to-day may be traced on the high ground surrounding it. Tradition states that these included as many as 24 bastions. A motorable ghat road has recently been formed from the foot of the hill leading to the temple.

Passing through Hanuman's gate, the pilgrim traverses a narrow part of the glen where the rivulet is led through pipes and channels over several artificial cascades surrounded by more sculptures of the Gods, and at length reaches the amphitheatre in which, on a terrace partly cut out of the hill-side, stands the temple itself.

The local *Sthala Purana* contains a mythical account of the foundation of the building which relates to the well-known story of how the demon Hiranyakasyapa, furious with his son Prahlada's devotion to his pet aversion Vishnu, had the boy thrown into the sea and placed Simhachalam hill on top of him; how Vishnu in his man-lion incarnation went to the youth's rescue, stood on one side of the hill and tipped it up so that the boy could crawl out on the other. On account of this Prahlada in his gratitude is said to have founded this shrine.

The exact age of the temple is not known, but it contains an inscription, dated as far back as 1098-99 A. D., of the Chola King Kulottunga I who conquered the Kalinga territories and it must thus have been a place of importance even then. Another inscription shows that a queen of the Velanandu Chief Gonka III (1137-56) covered the image with gold; a third says that the Eastern Ganga King Narasimha I built the central shrine, the *mukhamandapam*, the *natyamandapam*, and the enclosing

verandah in black stone in 1267-68; and the many other grants inscribed on its walls (the Government Epigraphist's lists for 1899 gives about 125 of these) make it a regular repository of the history of the district.

Architecturally the temple deserves high praise. This is said to contain a square shrine surmounted by a high tower, a portico in front with a smaller tower above it, a square sixteen-pillared mandapam (called the *mukhamandapam*) facing this, and an enclosing verandah, all made of dark granite richly and delicately carved with conventional and floral ornament and scenes from the Vaishnavite Puranas. One of the pillars is called the *kappam stambham* or 'tribute pillar'. It is credited with great powers of curing cattle-disease and granting children. In the verandah is a stone car with stone wheels and prancing stone horses. The image of the God is small and is kept covered with an unctuous preparation of sandal paste. Once a year, in May, this is removed with much ceremony at the festival called *Chandanayatra*. Outside this inner enclosure there is the excellent *natyamandapam* on the north side of the temple, where the *Kalyanothsavam* is performed. This is supported by 96 pillars of black stone, arranged in sixteen rows of six each, which are more delicately carved than any others in the temple, are all different in the details of their design, and yet avoid incongruity of effect by adhering to one general type especially in their capitals, which are usually of the inverted-lotus shape.

ANAKAPALLE TALUK

Anakapalle taluk lies to the west of Visakhapatnam taluk. To its north are the Srungavarapukota and the Chodavaram taluks. Narasapatnam taluk is on its west and Yellamanchili on its south. A small portion of this taluk between Visakhapatnam and Yellamanchili touches the Bay of Bengal. The taluk supports a population of 244, 481 persons as per the 1961 Census count. The total area of this taluk is 304 square miles. It contains 136 inhabited and 8 uninhabited villages and one town *viz.*, Anakapalle.

The following statement shows the number of inhabited villages arranged according to the various population sizes

Less than 200	7
200-499	25
500-999	30
1,300-1,999	47
2,000-4,999	23
5,009-9,999	3
10,000-and above	1
Total inhabited villages	136

The four villages having more than 5,000 population are Thummapala (10,610), Nagulapalle (6,269) Kasimkota (9,303) and Munagapaka (6,472). The places of interest among the villages are described in the succeeding paragraphs.

This taluk near the sea includes low-lying and swampy ground; but a little further inland rises a disconnected line of the red hills characteristic of the plains of this district; then follows a plain of rich variety of land. The river Sarada is the only river of importance in this taluk. Much of the tract of the rich land is watered from the Sarada channels and grows excellent sugarcane. In addition to it there are many major and minor irrigation tanks all over the taluk which however do not receive the river waters. The palmyra stands in rows along the boundaries of all the fields and grows in clumps in every hollow. The taluk contains Reserve Forest areas in Kannurupalem, Bayyavaram, Adduru and Nallaregulapalem villages. The climate of this taluk is moderate on account of its nearness to the sea.

Being mostly an agricultural area the taluk possesses several Agro-based industries. Amongst these a Co-operative Sugar Factory at Thummapala is making good progress Gur and Khandasari are manufactured at Seethanagaram and Narasingavilli villages and there is a big market for jaggery at Anakapalle. In fact much of the jaggery manufactured here is exported to distant places. Besides these the taluk contains some other industries, *viz.*, three Match Factories, a Mangalore Tile Industry, an Ivory Industry and a Carpentry Centre. The Brass Industry of this taluk has a good reputation. It is being supported by the Viswabrahmin community. The raw materials required for this industry *viz.*, brass, copper, zinc, copper-sheets and brass-sheets are obtained from Bombay. About 300 families live by this trade.

As regards medical facilities, there is a Government Hospital at the taluk headquarters. The Merchant' Association has set up a separate hospital for women with special facilities in maternity and child welfare. There are a few dispensaries maintained by the Anakapalle Municipality in different parts of the town. Several private medical practitioners also practise in this town. In the rural areas there are Rural Dispensaries at Tallapalem, Sabbavaram

and Paravada villages. A Family Planning Clinic has been recently started at the Government Hospital, Anakapalle. Anakapalle town has protected water supply system.

As regards transport and communication facilities the Howrah-Madras line (Broad Gauge) of the Southern Railway passes through this taluk with its stations at Bayyavaram, Kasimkota, Anakapalle, Thadi and Duvvada. The Great North Trunk Road from Madras to Calcutta also passes through this taluk. The neighbouring taluks such as Visakhapatnam, Narasapatnam, Yellamanchili and Chodavaram are connected by major district roads.

As regards educational facilities this taluk contains an Arts & Science College at Anakapalle town. The Anakapalle Municipality maintains a Higher Secondary School and two Secondary Schools. In the rural areas there are High Schools at Sabbavaram, Paravada, Mungapaka and Kasimkota maintained by the Zilla Parishad. The Panchayat Samithis are in charge of the Elementary and Higher Elementary Schools located in almost all villages.

Anakapalle—a Municipality, is the headquarters of the taluk and supports a population of 46,402 persons according to the 1961 Census count. The town covers an area of 8.75 square miles and there are altogether 9,327 occupied residential houses. It is situated 21 miles west of Visakhapatnam in the midst of a level expanse of a rich wet land watered by the river Sarada which flows close by the town and is spanned over by both the road and railway bridges. Anakapalle is a Railway Station on Howrah-Madras line (Broad Gauge) of the Southern Railway. The town is reputed to be quite healthy. This town is an important wholesale marketing centre of gur. It is also known for its Brass Industry under taken by some families of the Viswabrahmin community. There is a company calld Messrs. Thutika Mallikarjunudu & Sons, Anakapalle which is popular. It employs about 25 to 30 workers daily for the manufacture of ordinary household brass utensils. There is a Taluk Office, a Sub-Registrar's Office, a Second Class Judicial Magistrate's Court, a police Station besides a number of public offices. It contains a Government Hospital and a Veterinary Hospital. A number of private medical practitioners also serve the people of this town. There is a Higher Secondary School, a Boys' High School and a Girls' High School, maintained by the Municipality besides a Basic Agricultural Training School. The town contains a Post Office, with Telegraph and the Telephone facilities. There is also a Travellers' Bungalow maintained by the Public Works Department. This town is well known for its sugarcane and guava fruit.

Thummapala—it is a very large village with a population of 10,610 persons as per the 1961 Census count. It is situated at a distance of about two miles to the north of Anakapalle, and occupies an area of 1.42 square miles. There are altogether 2,135 occupied residential houses in this village. The importance of this place is mainly due to the location of a large co-operative sugar factory here.

Thummapala is a Railway Station on the Howrah-Madras line (Broad Gauge) of the Southern Railway. It is also connected by the Anakapalle—Chodavaram road on which buses ply regularly. As it stands on the bank of river Sarada, irrigation is facilitated by its river channels besides a minor irrigation tank. The total number of agricultural workers of this place is 2,211 persons out of which 1,738 persons are Cultivators while the remaining 473 are Agricultural Labourers. Paddy, ragi, bajra and sugarcane are the chief crops grown. The village contains a Panchayat Office, a Maternity Centre, a Post Office and a Travellers' Bungalow besides a temple of Satyanarayanaswamy. The chief cottage industry of this locality is basket making. A weekly market is held on every Saturday.

Kasimkota—was originally the headquarters of a Zamindari and is now the second largest village in this taluk with a population of 9,303 persons as per the 1961 Census count. It is situated four miles away from Anakapalle on the G.N.T. Road. The village extends over an area of 3.15 square miles and in all it comprises 1,836 occupied residential houses. A large number of people in this village live by cultivation as their main occupation. The total number of agricultural workers of this place is 1,915 persons comprising Cultivators and the Agricultural Labourers. Sugarcane and paddy are the chief crops raised in this village through minor irrigation tanks, the Kasimdora channel and the Krishnaraju channel. The village contains a Panchayat Office, an Ayurvedic Dispensary a Veterinary Touring Billet, a High School, a Police Station, a Park and a Post Office with Telephone and Telegraph facilities. An Artificial Insemination Centre

has been recently set up by the Animal Husbandry department. Kasimkota is the headquarters of a Panchayat Samithi. There is a match factory and a sewing centre in this village which provide both part-time and whole-time occupations. A weekly market is held here on every Thursday.

YELLAMANCHILI TALUK

Yellamanchili taluk which was previously known as Sarvasiddhi taluk lies along the Bay of Bengal in the southern most corner of the district. It is bounded on the north by Anakapalle taluk, on the east and south by the Bay of Bengal and on the west by Narasapatnam taluk and East Godavari district. According to the 1961 Census count the taluk recorded a population of 259,735 persons. The total area of this taluk is 347.0 square miles. There are altogether 146 inhabited, 3 uninhabited villages and one town *viz.*, Yellamanchili.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	8
200—499	8
500—999	36
1,000—1,999	49
2,000—4,999	41
5,000—9,999	4
10,000 and above	Nil
Total inhabited villages	146

The four villages having more than 5,000 population are Rambilli (5,371), Etikoppaka (5,368), Koruprolu (5,063) and Payakaraopeta (8,655). The places of interest among these villages are described in succeeding paragraphs. The density of population of the taluk is 749 persons per square mile.

In general the interior of the taluk resembles the other coastal areas, but along the shore are several salt water swamps and the coast line itself is diversified with picturesque headlands. The soil in this taluk is chiefly made up of regar or black cotton and the red ferruginous series but the red ferruginous represents the major portion of the soil particularly near the hills. Farther away towards the coast the soil becomes finer black clay with a tendency to crack when dry. The taluk comprises large extents of wet lands under the Varaha, Sarada and the Thandava rivers. Besides these rivers, there are big irrigation tanks, namely, Kondakarla Ava, Gopalapatnam Ava and Payakarayanamgari tank. There are many minor irrigation tanks, in this taluk supplementing the sources of irrigation. The taluk also contains as many as 367 tanks with a total of 9,872 acres irrigated under them. There are also many wells used for irrigation.

The extent of the Reserved Forest in this taluk is 23 square miles. The existing forests in Yellamanchili taluk consist merely of scrub jungle on certain low red hills. The two large blocks are the Vemagiri and the Peddapalle Reserves which are 1,611 acres and 9,077 acres in extent respectively. The average annual rainfall of this taluk is 863.6 millimetres, and April to June are the warmest months in the year. The taluk has a fairly long coast line with an extreme inland extension. The Eastern Ghats run roughly parallel to the sea coast all along the northern boundary of the taluk. However, owing to its proximity to the Bay of Bengal the sea breeze renders the climate moderate and tolerable to some extent. As regards the transport and communication facilities the taluk is well connected both by roads and railways. The Howrah-Madras line (Broad Gauge) of the Southern Railway passes through this taluk with its stations at Yellamanchili, Regupalem, Narasapatnam Road, Gullipadu and Namavaram. The Great North Trunk Road also passes through this taluk. The taluk is also served by the major district roads on which buses ply regularly.

As regards medical facilities, there is a Government Hospital at Yellamanchili the taluk headquarters. There are Rural Dispensaries in several big villages of the taluk such as Srirampuram, Lalamkoduru, Kondakarla, Gullipadu, Rayavaram and Purushothapuram. There is a Primary Health Centre at Nakkapalle and a Veterinary Hospital at Guntapalle.

As in other taluks the common feature of economic interest in this taluk is that weekly shandies are held at Yellamanchili, Purushothapuram, Pulaparthi, Etikoppaka, Penugallu, Rayavaram, Koruprolu, Nakkapalle, Chinadoddigallu, Godicherla, Srirampuram, Dimili, Kothuru, Velchuru, Kondakarla, Marripalem, Melupaka, Jagannadhapuram, Somalingapalem, Kokkirapalle, Pedapalle, Khajipalem, Thimmarajupeta, Haripalem, Nunabarthi and Chodapalle villages. A large number of persons throng at these market places.

The educational establishments of this taluk consist of a Zilla Parishad Higher Secondary School and a Girls' High School at Yellamanchili the taluk headquarters. Nakkapalle, Rayavaram and Payakaraopeta have one High School each maintained by the Zilla Parishad. There is a Zilla Parishad Middle School at Darlapudi. Besides these there are many Elementary Schools maintained by the Panchayat Samithis and Single Teacher Schools financed by the Central Government.

Handloom weaving, toys making, pottery and carpentry are the chief cottage industries in several villages of this taluk. The large scale industries consist of two sugar factories *viz.*, the Thandava Agricultural and Industrial Society at Payakaraopeta and the Etikoppaka Agricultural and Industrial Society at Darlapudi and the Tile and Brick Factory at Vempadu.

Yellamanchili—a Panchayat, is the headquarters of the taluk by the same name with a population of 13,556 persons as per the 1961 Census count. The town comprises an area of 1.95 square miles and there are altogether 2,793 occupied residential houses. It lies on the Great North Trunk Road.

Overshadowing the entire town rises a hillock on the top of which are many broken stones and bricks of ancient pattern. These are locally declared to be the remains of a palace and fort of the Golla Kings and the hillock is called Nuki Papa's Hillock which is said to be named after the sister of one of these rulers. Close on the southern side of the Nuki Papa's Hillock is the shrine of the village Goddess, Ramachandramma. She is said to appear before her worshippers at her bienneal festival in the form of flashes of lightning in the sky. Another Goddess named Paidithalli of Mamidivada does the same.

The spacious military encamping ground is now used as the playground of the Zilla Parishad Higher Secondary School. On one side of this ground are located the Taluk Office and the Hospital. Near one corner of it is the shrine of Achayamma Perantalu, which affords a good instance of the genesis of local deities and their shrines.

Yellamanchili is a Railway Station on the Howrah-Madras (Broad Gauge) line of Southern Railway. There is a District Munsif's Court, a Sub-Registrar's Office, a Panchayat Samithi Office besides the usual offices of a taluk. It is also a centre of the Canadian Baptist Mission.

Rambilli—situated at a distance of about ten miles towards the south-east corner of Yellamanchili supports a population of 5,371 persons as per the 1961 Census count. It extends over an area of 0.93 square miles and there are altogether 1,156 occupied residential houses. A very large section of people in this village are Kshatriyas who are well-to-do and interested in the uplift of their village. The village is noted for the export of casuarina fuel to several important places in Andhra Pradesh. Agriculture is the main stay for a large number of people in this village. The total number of agricultural workers in this place is 1,305 persons out of which 908 persons are Cultivators while the rest 397 persons are Agricultural Labourers. Ragi and bajra are the food crops raised in this village and irrigation is facilitated by minor irrigation tanks. The village contains a Panch a Office, two Post Offices and several Elementary Schools. Handloom weaving is the chief cottage industry of this locality.

Etikoppaka—which stands on the left bank of the river Varaha is at a distance of about 10 miles to the south of Yellamanchili and three miles north-west of Narasapatnam Road Railway Station. It has a population of 5,368 persons as per the 1961 Census count. The village covers an area of 1.37 square miles and in all it comprises 1,239 occupied residential houses. The people in this village chiefly live by cultivation as their main occupation. The number of agricultural workers of this village is 2,145 persons out of which 712 persons are Cultivators while the rest 1,433 persons are Agricultural Labourers. Paddy and sugarcane are the chief crops raised in this village and the village is served by the channels of the river Varaha.

This village is famous for the toys industry specially prepared with "*Ankudu*" wood and provides employment for a number of people in this village. In fact there are quite a number of families depending on it. The Great North Trunk Road passes adjacent to this village which is connected by a road. There is a Panchayat Office, a Reading Room and a Post Office with a Telegraph Exchange in this village. It contains two Elementary Schools. A weekly market is held here on every Tuesday.

Payakaraopeta—the largest village in this taluk, stands on the bank of the river Thandava with a population of 8,655 persons as per the 1961 Census count. It is about 25 miles away from Yellamanchili and 7 miles west of the sea shore. It occupies an area of 3.04 square miles and in all it comprises 1,435 occupied residential houses. The river Thandava and Kondagedda are the chief minor irrigation sources of cultivation. Paddy and sugarcane are the chief crops normally raised in this place. The total agricultural workers of this place is 458 persons. The chief cottage industries of this locality are the handloom weaving, carpentry and pottery which provide both main and subsidiary occupations. It is gratifying to note that about 1,131 persons including males and females are engaged in Household Industry alone and this may largely be attributed to the popularity of the prevailing industry. Further it is reported that a majority of the people in this village are engaged in Handloom Industry.

Owing to its convenient location on the borders of Visakhapatnam district towards the south and connected by the G. N. T. road with the neighbouring districts like East Godavari and West Godavari the place assumes commercial importance. It is also known as the southern gateway of Visakhapatnam. A Sugar Factory is located in this place.

Payakaraopeta is the headquarters of a Community Development Block. A Health Inspector and a Veterinary Assistant are attached to it. There is a Panchayat Samithi Office, a High School, a Post Office and a Police Station in this Village.

Dimili—though a small village with a population of 3,903 persons as per the 1961 Census count, it assumes religious importance owing to the construction of an unpretentious temple dedicated to Lord Siva in the uncommon form of Nageswara. It is said that Lord Siva and Parvathi appeared to the *rishi* Agastya at this place and that the temple was errected to commemorate the event.

Gopalapatnam–is a small village with a population of 1,827 persons as per the 1961 Census count. The village covers an area of 3.95 square miles and there are altogether 359 occupied residential houses. It is situated towards the south of the taluk two miles from the coast and close under the hill known as Sudikonda. On the top of this hill is a spring called the Kasibugga, in which the devotees bathe on Sivarathri.

Panchadarla—lies six miles north-east of Yellamanchili and 15 miles by road from Anakapalle. The village supports a population of 3,310 persons as per the 1961 Census count. It covers an area of 2.98 square miles and there are altogether 801 occupied residential houses. Panchadarla means 'five fountains' and the name is derived from five jets of water fed by a perennial natural spring. Close by, there is a *lingam* on which are carved other *lingams* in 12 rows, of 85 each and which is consequently known as the *Kotilingam* or 'crore of lingams'. On the pillars of the *mandapams* within it are several inscriptions of historical interest. Two of them (dated in years corresponding to A.D. 1407 and 1428 respectively) give the genealogy of a branch of the Eastern Chalukyan Kings.

Rayavaram—is situated eight miles south-west of Yellamanchili and has a population of 4,469 persons as per the 1961 Census count. This village is said to be named after King Krishna Devaraya of Vijayanagar who is supposed to have halted here during his expedition against Orissa in about 1515 A.D. and to have recorded his victories on the big stone slab known as Rachabanda.

Peda Uppalam— situated nine miles south-west of Yellamanchili has a population of 2,757 persons. The village occupies an area of 1.44 square miles and there are altogether 614 occupied residential houses. Planted in the ground near the village there is a most curious stone, roughly cylindrical about 3 feet in diameter and 6 feet high. It does not appear to be a piece of rock *in situ*, but the villagers on one occasion failed to reach the bottom of it though they dug persistently throughout a whole day. It is called Bhima's club, and there is a local tale to account for it. Near here, says the story, lived once upon a time a demon named 'Bakasura' who had to be propitiated by a daily meal of human flesh. One day it fell to the lot of a youth who was the only son of his mother, to furnish the monster's breakfast. Bhima chanced to hear of this and volunteered to go instead. He was late, and the demon angrily demanded the reason and called for a twig to clean his teeth. Bhima pulled up a palmyra tree and tossed it over to him, whereon the amazed monster took to his heels. Bhima pursued him, flung his club at him (this stuck in the ground where it still rests) and at last ran him to ground in the cave, still to be seen in

the 'Quoin rock' at Polavaram, a hamlet of Uppalam which jets out into the sea and is washed by the waves. Dragging him out by the nose, Bhima there slew him.

Upmaka Agraharam—lying a quarter of a mile to the south of Nakkapalle, on the hill near Upmaka is the well known shrine of Sree Venkateswara, the famous God of Tirupati. Another temple to the same God stands at the foot of the hill. At the celebration of the God's marriage *(Kalyanamahotsavam)* in March, pilgrims from all over the Northern Circars participate in it. This village according to the 1961 Census count supports a population of 3,254 persons and extends over an area of 2.56 square miles. There are altogether 721 occupied residential houses.

NARASAPATNAM TALUK

Narasapatnam taluk which was formerly known as Golugonda taluk is situated in the western part of the district adjoining the Agency area of Chintapalle taluk. According to the 1961 Census count the taluk recorded a population of 241,375 persons. The total area of this taluk is 516 0 square miles and there are altogether 180 inhabited, 14 uninhabited villages and one town *viz.*, Narasapatnam.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	38
200— 499	26
500— 999	35
1,000—1,999	45
2,000—4,999	34
5,000—9,999	1
10,000 and above	1
Total inhabited villages	180

The two villages having more than 5,000 population are Kothakota (10,421) and Vemulapudi (6,094). The places of interest among these villages are described in the succeeding paragraphs. The density of population of the taluk is 468 persons per square mile.

The taluk consists of two widely differing portions, the low country and the hills. The low country provides a striking resemblance of the coastal plains of the district generally sloping towards the sea covered with undulating red land broken up by low hills. The hilly portion of the taluk is within the Agency area and it drains northwards, mainly through the Paleru river.

The Narasapatnam Agency consists of a jumble of steep and broken hills with anaverage height of about 2.500 feet. There are few plateaus with a height of 4,000 feet and over. The southern boundary of the taluk contains Sanjivikonda at a height of 2,145 ft. It is so named because it is supposed to produce medicinal herbs good for many ailments. Near Kothakota is the Komarabolu one of the few natural lakes in the State. The principal ghat is from Kondasanta to Lammasingi, nine miles, part of which contains only cart tracks. At Kondasanta there are masses of splendid bamboos.

The Narasapatnam taluk is drained and watered by the rivers Varaha, Thandava and Sarugudugedda. The river Varaha rises in Golugonda hills, flows through Narasapatnam taluk and falls into the Bay of Bengal at Vatada. The Thandava river takes its origin in the settled portion of Chintapalle taluk and then flows through this taluk before it falls in the Bay of Bengal. The taluk contains a large forest area of 151.00 square miles out of which the total area of the Reserve Forest is 117.58 square miles. The climate of this taluk is rendered tolerable on account of its proximity to the Bay of Bengal.

The soil in this taluk is made up of regar clay, regar sand, red loam and red sand. The chief irrigation sources are tanks. The taluk contains as many as 528 minor irrigation sources and 29 major irrigation sources. In addition to these, two irrigation projects namely, Ravanapalle Reservoir and Sarugudugedda have been constructed. The total ayacut under the major irrigation sources is 4,724.00 acres while the area under the minor irrigation sources is 16,620.00 acres.

As regards the medical facilities the taluk contains a Government Hospital at Narasapatnam with 25 beds and manned by two Assistant Surgeons. Another Government Hospital is located at K.D. Peta. Rolugunta, Kotauratla and Nathavaram have Primary Health Centres and these Centres are also manned by Assistant Surgeons. Besides these there are four Maternity Centres; one at the taluk headquarters and one at each of the three Block headquarters of Narasapatnam, Rolugunta and Kotauratla.

The educational establishments consist of five High Schools for Boys', one Girls' High School, one Basic School, eight Adult Schools and many Elementary

Schools covering the entire taluk. This taluk is not connected either by Railways or by the G.N.T. Road. Only major district roads connect this with all the important places both in and out of the taluk. As such, buses are the only possible conveyance to this taluk.

As regards industries, the toy industry and tanning centre at Kotauratla come under the major industries which are progressing well on co-operative basis. The chief cottage industries of this taluk are Handloom Weaving which employs about 3,922 persons and the stitching of *Adda* leaf plates which absorbs about 1,620 persons by providing either whole time or part time occupations.

As in other taluks weekly shandies are held at Narasapatnam, Kothakota, Kotauratla, K. D. Peta, Butchempeta, Nathavaram, Makavaripalem, Golugonda, Rolugunta, Vemulapudi and Chettupalle on different days and attract a large number of persons.

Narasapatnam—a Panchayat, is situated at a distance of about 19 miles north-west of the railway station called Narasapatnam Road and is the headquarters of the taluk by the same name. This place is also the headquarters of a Sub-Collector. According to the 1961 Census this town supports a population of 22,768 persons. The town extends over an area of 13.10 square miles and in all it contains 4,734 occupied residential houses.

The town stands amidst a Palmyra dotted wide valley bounded on one side by the Golugonda hills and on the other by the rising ground and smaller elevations which are just high enough to cut off the sea breeze. It is consequently one of the warmest spots in the district. Narasapatnam contains the remains of an old mud fort which is said to have been built by one of the Golugonda Bhupatis at the base of the two hills. Local tradition gives the names of seven forts with which it was once defended. These are said to have been constructed by the Golla Kings. A tale is told of their having kidnapped a daughter of the ruler of Madugula and held out here against his attacks for months until they were betrayed by a woman of their own caste who showed the enemy how to cut off their water supply. They then slew their women kind, says the story, dashed out against the besiegers and fell fighting to the last.

Kothakota—village has neither historical nor religious importance. But the village is famous for the cottage industry of *Adda* leaves. About 75% of the population including the agricultural families of this village take part every day in the stitching of leaf plates and thereby make it an additional source of income. Kothakota is a big business centre in exporting *Adda* leaves to several places. The average income on account of this industry of *Adda* leaves is estimated at Rs. 25,000 per month. This village is also one of the important centres for the production of fine jaggery. It is the largest populated village in this taluk with a population of 10,421 persons as per the 1961 Census count. The village extending over an area of 4.06 square miles contains 2,522 occupied residential houses. It is connected by the Narasapatnam-Chodavaram road. There is a Hospital, a Panchayat Office, a Branch Post Office, besides several Elementary Schools in this village. Wet paddy and sugarcane are chief crops grown in this village. A bi-weekly market is held here on every Sunday and Saturday.

Vemulapudi—is a fairly big village with a population of 6,094 persons as per the 1961 Census count. It extends over an area of 6.70 square miles and there are altogether 1,306 occupied residential houses. Agriculture is the major means of livelihood for a large number of people. The number of agricultural workers of this place is 2,224 persons out of which 1,981 persons are Cultivators while the rest 243 persons are Agricultural Labourers.

Handloom Weaving and Pottery are the two chief cottage industries of this place. It is reported that about hundred families are dependent on pottery alone while about 200 families are dependent on weaving. Besides these jaggery production also provides seasonal employment. There is an Elementary School in this village. A bi-weekly market is held here on every Sunday and Wednesday.

Balighattam—a small village two miles south-west of Narasapatnam stands on the bank of the river Varaha. It is included in the urban area of Narasapatnam.

Balighattam owes its importance to its temple of Brahmalingeswara, which is located at the foot of a small hill on the other side of the river. The shrine, like that of Visweswara at Benares, faces west, instead of east as usual. This peculiarity and the fact that the

river flows north and south for a short distance here have led to the spot being considered peculiarly sacred. The local pandits quote with *unction* the *sloka* which says "where a lingam faces west and river runs north, that place is equal to Kasi (Benares) and there one will surely obtain celestial bliss."

It is inte esting to note that this temple is supposed to have been built by Brahma; and that the river is declared to have been made by Vishnu during his incarnation as a boar (Varaha). Therefore the river is known as Varahanadi. The deposits of white clay in the river bank are supposed to be the ashes of a sacrifice performed here by Bali, the demon-king from whom the village takes its name as Balighattam. It is connected by a major district road on which buses ply regularly.

Krishnadevipet — village is situated sixteen miles west of Narasapatnam and close to the hills. It supports a population of 953 persons as per the 1961 Census count. Owing to its convenient position at the foot of the Lammasingi Ghat, it is a busy trading Centre in the produce of the hills, such as tamarind, saffron, gallnuts, long pepper, honey, bees' wax, soapnut, horns, mustard and kamal dye. As the village is perched high above a river-bed it is difficult to get water. The village is well connected by a major district road on which buses ply regularly and provide urban contacts.

Vajragada (Diamond-Fort)—is a small village lying six miles from Narasapatnam-Anakapalle road. The total population returned at the 1961 Census count is 2,613 persons. The ruins of a very large fortress built at the base of two hills, and now all cultivated, are still to be seen in it and local tradition gives the names of seven forts with which it was once defended. These are said to have been constructed by the Golla Kings.

CHINTAPALLE TALUK

Chintapalle taluk was newly constituted into a separate taluk on the 1st of October, 1959 by carving it out of the south-western portion of the Gudem Agency taluk. This taluk is entirely an Agency tract occupying an area of 920.0 square miles. According to the 1961 Census count the taluk supports a population of 43,929 persons. There are altogether 317 inhabited and 42 uninhabited villages in this taluk. The density of population is 48 persons per square mile.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	258
200-499	47
500-999	10
1,000-1,999	1
2,000-4,999	1
5,000-9,999	Nil
10,000 and above	Nil
Total inhabited villages	317

The taluk can be divided into two distinct parts, one the upper Agency and the other the lower Agency. The upper Agency area consists of five Muttas *viz.*, Darakonda, Gudem, Pedavalasa, Lothugedda and Lammasingi which are unsurveyed and unsettled. The Lower Agency area which is mostly settled and surveyed, contains 76 Ryotwari villages and 14 unsurveyed hill villages.

The principal hill tribes living in the taluk are Bagata, Konda Dhoras, Valmiki, Kammari and Samanth. Cultivation is their main occupation but they are also found profitably engaged in selling minor forest produce *i. e.*, sheekayi, adda leaves, tamarind, jack fruits, batavias and oranges. The tribals grow both wet and dry crops like paddy, cholam, ragi, bajra besides chillies, turmeric, ginger and niger. The annual average rainfall is 968.57 mm.

With effect from 1st April 1958 the criminal jurisdiction which was vested in the Agent (Collector) in the capacity of Agency Sessions Judge was transferred to the regular Sessions Judge. The Special Assistant Agent and the Taluk Magistrate however continue to administer criminal and civil justice in the Agency. The Agency people are poor and cannot afford to go long distances to reach the Courts. The Tahsildar being the Taluk Magistrate has the jurisdiction of law and order and revenue matters and will have constant touch with the living conditions of the tribals. The Muttadars report offences to the Police who in turn investigate into the cases.

As usual the hillmen continue to enjoy the concessions granted to the Agency tribes under various special enactments and Government orders. The Government in order to create working opportunities and raise the living standards of the labourers undertook developmental activities in all the areas

such as the construction of projects, formation of roads, land colonisation schemes and coffee plantation schemes. The tribals from Jolaput and Sujankota areas were brought here and two colonisation schemes were introduced *viz.*, Tajangi and Kothagudem. The colonists were provided with houses and lands free of charge and were also granted loans to bring the lands under cultivation.

There is N. M. E. P. Sub Unit functioning at Chintapalle. Its jurisdiction extends over the entire Chintapalle taluk and part of Paderu taluk. This project is manned by one Health Inspector, one Field Assistant and a Field Worker. It conducts anti-malarial operations as a result of which malaria has been controlled to a great extent in the Agency tracts.

The Birth and Death Registration Act of 1890 is in force in these Agency tracts. Vaccination is attended to by the Health Inspectors. There is a Maternity and Child Welfare Centre at Downuru with three Sub-Centres at Tajangi, Chowdupalle and Rintada. The centre is in charge of a Health Visitor who supervises the work of Maternity Assistants in charge of the Sub-Centres. The Maternity Assistant conducts cases both ante-natal and post-natal.

The Forest Act is in force in respect of the Reserve Forests in the taluk. The Forest Department has taken up teak plantation, pepper, pine apple and coffee. At Vadurupalle village near Gudem there is a Coffee Plantation. In the dense forest belts of this region wild animals like tiger, bear, cheetah and bison are found.

There are two Agriculture Demonstration Units at Chintapalle and Lammasingi and a Pilot Farm at Tajangi. It is in charge of a Farm Manager in the cadre of an Agricultural Demonstrator. The Agency Agricultural Officer at Visakhapatnam has jurisdiction over this Agency area. The Demonstrator conducts experiments and imparts training in improved methods of agricultural practices. There is also an Extension Officer, Agriculture attached to the Block Development Office at Chintapalle. Improved varieties of seeds and seedlings are supplied to the tribals for cultivation.

The taluk contains a Sericulture (Silk Rearing) Station. It is also functioning as a propaganda station for the intensification of mulberry cultivation among the hill tribes and the dissemination of knowledge about Sericulture. Besides this, there is also a basket making training centre at Chintapalle, where training facilities are provided to the tribals.

As regards medical aid there is a Government Dispensary at the taluk headquarters with 12 beds besides a Mobile Medical Unit in charge of a Medical Officer. In addition to these there are Government Dispensaries at Pedavalasa, Koyyuru, Tajangi and Sileru villages of this taluk.

The educational establishments of this taluk consist of two Zilla Parishad, thirty four Government and twenty five Aided Elementary Schools and one Middle School. There are two Government Boarding Homes one at Chintapalle attached to the Middle School and the other at Downuru besides a midday meals centre at Tajangi under the Agency Development Scheme.

The Downuru Agency Produce Corporation Marketing Society Limited located at Narasapatnam is affiliated to the Andhra Pradesh Scheduled Tribes Co-operative Finance and Development Corporation. Another branch is at D.K. Pet. The area of operation of the Society extends over 5 Muttas of the Upper Agency in this taluk. The Society has a Deputy Tahsildar as Manager assisted by a Senior Co-operative Inspector as Accountant. The Society has the monopoly for the purchase of minor forest produce. The tribals bring their minor forest produce to the shandies or sell them to the Society. In addition to this the Corporation has opened Sales-*cum*-Purchasing Depots at Chintapalle, Lammasingi, Downuru, Tajangi, Lothugedda, Gudem and Peddavalasa in the Upper Agency area in order to provide the day to day provisions at cheaper rates. As regards the transport and communication facilities this taluk is not connected by railways but major district roads connect Chintapalle with the neighbouring taluks directly on which buses ply regularly. All important places in the taluk such as Peddavalasa, Gudem, Lothugedda, Lammasingi and Downuru are well connected by major district roads with Chintapalle. At Chintapalle there is a Post and Telegraph office besides several Branch Post Offices covering the entire taluk. There are about fourteen community radio sets serving the taluk. Generally the tribals are accustomed to drinking gedda water and spring water that occur in the taluk. The Government has introduced protected water supply system under the Rural Water Supply Scheme.

Rajendrapalem—is the place where Alluri Seetharama Raju who conducted his famous '*pithuri*' against British administration lies buried in a tomb. The village supports a population of 599 persons as per the 1961 Census count. It covers over an area of 0.44 square miles and in all it contains 145 occupied residential houses. Wet paddy is the chief food crop raised and irrigation is facilitated by Soola Kalva (channel).

Sileru—according to the 1961 Census count has recorded a population of 3,004 persons. It owes its importance to the Hydro-Electric Project which is under way on the river Sileru, a mountain stream (also known as river Machkund). The place attracted large number of immigrant workers and labourers in the course of construction.

Lothugedda—is a small village with a population of 159 persons as per the 1961 Census count. There are altogether 38 occupied residential houses in this village.

It contains the ruins of three or four old granite temples dedicated to Siva, the largest of which has elaborate sculpture. One odd group depicts four men with long pointed beards and long pigtails, carrying pickaxes on their shoulders holding out their hands to receive a reward which a king, sitting on a throne with three ladies behind him, is in the act of bestowing. The villagers say the men are the builders of the temple, and are content to account for the beards by the conjecture that barbers were probably rare on the hills in those days. On three sides of a pillar there are inscriptions in Telugu.

PADERU TALUK

This Agency taluk lies to the north-western portion of the district separating it from Orissa State. Paderu taluk which is entirely in the Agency, was newly formed by carving it out of Gudem Agency taluk and a portion of the Agency area of Srungavarapukota on the 1st of October, 1959 with Paderu as the taluk headquarters. The remaining portion of Gudem Agency taluk was constituted into another taluk by name Chintapalle with Chintapalle as headquarters. There are 41 Hill Muttas of the former Madugula Estate including five villages claimed to be undertenure estates in the area transferred from Gudem Agency taluk to Paderu. 42 Jarayati and 22 Mokhasa villages are in the area transferred from Srungavarapukota taluk to Paderu taluk. The distinctive feature of this taluk is that it is mostly covered with hills of the Eastern Ghats and thick forest. The Eastern Ghats run roughly parallel to the sea coast. In the plateau the well known heights are Sinkaram (5,300 feet) and Galikonda (windy hills 5,300 feet) besides several other notable peaks.

The taluk extending over an area of 1,199 sq. miles has a population of 132,145 persons as per the 1961 Census count. There arealtogether 1,621 inhabited and 2 uninhabited villages in the taluk. There are no urban areas in the taluk. It is an entirely Agency taluk and the density of population is 110 persons per sq. mile.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less then 200	1,503
200—499	103
500—999	13
1,000—1,999	2
2,000—4,999	Nil
5,000—9,999	Nil
10,000 and above	Nil
Total inhabited villages	1,621

Paderu is a broad picturesque and rich valley with an altitude of 3,000 feet above sea level. The soil is fertile. There are a good number of hill-streams locally known as *Geddas* in Paderu area, and provide irrigation facilities. Paddy, ragi, samai, korra, maize, turmeric, castor, mustard and ginger are some of the main crops raised in this taluk. The taluk is drained and watered by the river Machkund, so named because it is said to have been ruled by the rulers of Matsya Desa or the chiefs of Matsya dynasty. As it flows, in its lower reach the river is called as 'Paleru' and still farther as 'Sileru'. A reservoir has been constructed across this river at Jolaput, by erecting a dam of 1,540 feet width. A diversion dam is also constructed across this river at Chickenput. Hydro-Electric Power is being generated under this scheme with six turbines and with a generating capacity of 1,50,000 KV. This scheme is called the Machkund Hydro-Electric Scheme and is a joint venture of Andhra Pradesh and Orissa States. As regards the Transport and Communication facilities the taluk is not having adequate communication facilities. Visakhapatnam-Jeypore major district road passes through this taluk *via.*, Araku Valley. Roads also lead from Paderu to Araku (26 miles), to Duduma (40 miles) and to Lothugedda (24 miles). The Dandakaranya-Balingir-Kiruburu Railway project which is under construction passes through this taluk and may be of some consequence to it in future.

The taluk contains Primary Health Centres at Hukumpet, Araku Valley and Dumbriguda besides the Government Dispensaries at Paderu and Gangaraju Madugula. Protected water supply system exists only at Araku Valley and at Paderu. Reservoirs have been constructed on nearby hill tops and water is supplied to these two areas. In addition several drinking water wells and cisterns have been constructed under the Agency Rural Water Supply Scheme and Block Development Schemes. Still many villages have no protected water supply. The taluk contains High Schools at Paderu and Araku Valley. There are also Elementary Schools some of which are maintained by Missionaries. The chief cottage industries of this taluk are basket-making, blacksmithy and fruit canning. The manufacture of tiles and bricks in this taluk is on the increase. There are no large scale industries.

The people inhabiting these Agency tracts are mostly aboriginal tribes *viz.*, Konda Dhoras, Valmikis, Bagatas and Kondhs. The tract was earlier a highly malarial place. But on account of the incessant efforts and interest evinced by the Malaria Eradication Department its incidence is reduced. The Government have been making every effort under various developmental schemes to improve the lot of the hill tribes. Araku in this taluk attracts large number of tourists and picnic parties.

In Paderu taluk crops like coffee, potato, pineapple are also grown besides food crops. Coffee is a crop that can be grown on plantation basis and gives an income of Rs. 900 per acre for a period of nearly 60 years. Coffee commences yield from the fourth year onwards. The tribals till very recently were apparently scared of the Excise Duty and did not take to this encouragingly. On seeing the performance of the rust resistant varieties distributed under Community Development Programme and with the exemption of Excise Duty, the tribals are now taking enthusiastically in shade existing lands. The early plantations in Cheerlapadu, Hattaguda, Madagada and Janamguda have already come to yield. This crop is likely to become an important crop in this taluk. Potato and pineapple are also being grown on a large scale in this taluk. Potato crop on an average is giving a gross income of Rs. 1,800 or a net income of Rs. 1,000 per acre. Pineapple is giving an income of Rs. 400 per acre.

Paderu—is the headquarters of the taluk by the same name. According to the 1961 Census count the village supports a population of 1,166 persons and there are altogether 274 occupied residential houses. Paderu contains a High School, a Government Dispensary and a Veterinary Dispensary besides the usual offices of a taluk.

The place is connected by road with Araku on which buses ply regularly. Lothugedda, Jolaput, and Kaligada are connected by roads. The Dandakaranya-Balingir-Kiruburu Railway line may benefit the taluk after the completion of its construction.

Araku Valley—is a part of the Agency tracts of Paderu taluk. It is a narrow strip of land about 9 miles in length and 2 miles in width with usual boundaries of hills on all sides. The valley comprises 20 villages distributed on either side of the road connecting Srungavarapukota and Jeypore. It is situated at an altitude of about 3,080 ft. above the mean sea level. Patelgedda stream flows in the middle and the land on either side of it rises gently towards the hills. It is sparsely wooded. The soil is red loam and permeable. The average rainfall is about 1,270 mm. Bagatas, Konda Dhoras, Nooka Dhoras, Gouds, Doms, Gadabas, Kotias, Porjas, Parangis and Kammaras are the tribals found in this valley. Of these Bagatas and Nooka Dhoras are considered to be the highest class among the hill tribes and Dom *alias* Paidis and Ghasi tribes are considered to be untouchables. The Araku Valley Scheme was originally sanctioned for growing potatoes and vegetables for the army during the Second World War but with the cessation of hostilities the scheme was switched over to the general development of the hill men. There is one Government Hospital with 25 beds, a High School and some Elementary Schools. Agriculture is the main occupation of the people. Crops like coffee, potato, pineapple, and sugarcane are now being grown in this valley. There is one Special District Agricultural Officer for improving agricultural practices. There is a Government Silk Farm with mulberry garden. Cocoons from this farm will be got reeled in the farm itself and the silk yarn and waste will be sent to Hindupur for disposal.

CHODAVARAM TALUK

Chodavaram taluk formerly known as Veeravalli taluk is surrounded on the north by Paderu, on the east by Srungavarapukota taluk, on the south by Anakapalle and on the west by Narasapatnam.

The north-western portion of the taluk is under Agency tract. The Minamalur ghat leads up to the plateau from Madugula. Here the low country on the plains resembles the adjoining tracts. The total area of the taluk is 594.0 sq. miles including the Agency; it has a population of 298,619 persons as per the 1961 Census count. There are altogether 366 inhabited villages and 9 uninhabited villages.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	159
200—499	32
500—999	68
1,000—1,999	74
2,000—4,999	30
5,000—9,999	3
10,000 and above	Nil
Total inhabited villages	366

The three villages having more than 5,000 population are Devarapalle (5,066), Chowduvada (5,002) and Vaddadi (6,023). The places of interest among these villages are described in succeeding paragraphs. The density of population of the taluk is 503 persons per sq. mile. It contains two urban units *viz.*, Chodavaram and Madugula.

This taluk is drained and watered by the river Sarada with its tributaries called the Pedda Eru and Budderu. The Agency area comprises Devapuram, Salugu, Peddakota, Pinakota and Jeenabadu Muttas towards the western boundary of the taluk, out of the which Madugula and Devarapalle are the main centres for the sale of Agency produce. Major portion of the plains is irrigated by the Sarada river system in most of the villages. Rainfed tanks are also helpful sources of irrigation in other villages of the taluk. Generally people in the plains are interested in Agriculture while in the Agency they are interested in collection and sale of Agency produce.

As regards the transport and communication facilities it is not connected by railways and has to depend entirely on road communication. Major district roads connect this taluk with the neighbouring taluks and almost all important places in the taluk and buses ply on them regularly. There are regular and direct bus conveyances even to Visakhapatnam. As regards medical facilities there is a Government Hospital at Chodavaram and a Mission Hospital at Madugula. Besides these the taluk contains Local Fund Dispensaries at Madugula, Devarapalle, K. Kotapadu and Kasba Jagganadhapuram. There is protected water supply system at Chodavaram town and people in the villages normally drink water drawn from wells.

As regards educational facilities there is a Higher Secondary School and a Middle School for Girls at Chodavaram. There are also High Schools in several big villages of the taluk such as Vaddadi, Madugula, Devarapalle, Koduru and Kotapadu. The villages of Ravikavitham, Thruvolu and Chowduvada also have one High School each. The taluk contains Elementary Schools in almost all the villages.

As regards industries, weaving is the chief cottage industry which is popular in Singadharapalem village. A large scale sugar factory is located at Govada village which is at a distance of one and half miles towards the south of Chodavaram.

Chodavaram—a Panchayat, is the headquarters of the taluk by the same name and supports a population of 14,948 persons as per the 1961 Census count. The town extends over an area of 6.52 square miles and there are altogether 3,261 occupied residential houses.

In the small temple of Kesavaswamy there are six inscriptions of which five (one of which is dated Saka 1389 or A.D. 1467) mention Sriman Mahamandaleswara Pratapa Vallabha Raja, who from his title Mahamandaleswara must have been some local chief and not a ruling king. Perhaps he built a fort in this town in which lies an ancient cannon, seven feet long. There is a Sub-Registrar's Office, a Second Class Magistrate's Court, a Taluk Office, a Police Station, a Government Hospital and Veterinary Hospital besides several other public Offices in the town. Further the town contains a Post Office with Telegraph and Telephone facilities. A Zilla Parishad High School and a Middle School cater to the educational requirements of the local children. A weekly market is held on every Friday. A large Sugar factory is located 1½ miles from this Panchayat within the limits of Govada Village.

Madugula—a Panchayat, has recorded a population of 7,688 persons at the 1961 Census count. It covers an area of 7.54 sq. miles and there are altogether 1,804 occupied residential houses. It is situated eleven miles north-west of Chodavaram, close under the hill near the foot of the Minamalur ghat. Its position makes it an important mart for the Agency produce.

It comprises the Agency portion of the taluk which in consequence is often called 'Hill Madgole'. The Madugula Zamindars claim to have descended from the rulers of Matsya Desa. There is a Panchayat Office, Travellers' Bungalow and a Post Office with Telegraph exchange. The town contains several Elementary Schools. A weekly market is held here on every Monday.

Devarapalle—stands on the left bank of the river Sarada in the plains of Chodavaram taluk with a population of 5,066 persons as per the 1961 Census count. The village occupies an area of 3.54 sq. miles and altogether there are about 1,182 occupied residential houses. A large number of people in this village are engaged in agriculture and its allied pursuits. The number of agricultural workers of this place is 1,443 persons out of which 1,312 persons are Cultivators, while the rest 131 persons are Agricultural Labourers. Paddy is the chief food crop raised in this place. It is well connected by a district road on which buses ply to important places like Visakhapatnam, Madugula and Kothavalasa. It is about 24 miles away from Chodavaram and Kothavalasa is the nearest railway station. The village contains a High School, a Police Out-post, a Rest House and a Branch Post Office besides a Sewing Centre. In this village an annual festival for the village Goddess Modakondamma is held in the last week of January and there is usually a big procession followed by *puliveshams*, fancy dressing and mimicry in the evening on the festival day. It is a noted place for Agency produce which comes from Pedakota, Pinakota, Mutta and from the Agency villages near by Madugula to the weekly market held on every Sunday.

Vaddadi—situated on the right bank of Pedda Eru, a tributary of Sarada river, is at a distance of about five miles from Chodavaram and six miles from Madugula. It is the largest populated village with a population of 6,023 persons as per the 1961 Census count. The village covers an area of 3.38 sq. miles and there are altogether 1,303 occupied residential houses.

Vaddadi is a junction of roads leading to Chodavaram, Madugula, Paderu and Narasapatnam on which buses ply regularly. Agriculture is the major means of livelihood for a large number of people. The total agricultural workers of this place is 1,908 persons out of which 893 persons are cultivators while the rest 1,015 persons are agricultural labourers. Rich crops of wet paddy, sugarcane and tobacco are raised. Here irrigation is facilitated by river channels and tanks. The tobacco grown in this village is noted for its taste in these parts and commands a good market. There is a High School and a Sub-Post Office in this village besides a temple of Sri Venkateswaraswamy. Every year a festival is held in honour of the deity in the month of Phalguna (February-March) consecutively for about six days and it ends with *kalyanamahotsavam* of Sri Venkateswaraswamy, participated by a large number of people from the surrounding villages. It is said that this village was destroyed by the "Reddi Kings" when they conquered Madugula. A weekly market is held on every Sunday during which cattle are also brought for sale.

SRUNGAVARAPUKOTA TALUK

This taluk situated at a distance of 33 miles from Visakhapatnam in its north-western portion is surrounded by Paderu taluk and Orissa State on the north, Vizianagaram and Bheemunipatnam taluks on the east, Visakhapatnam and Anakapalle taluks on the south, and Chodavaram taluk on the west. It has an area of 407.0 sq. miles and supports a population of 208,418 persons as per the 1961 Census count as compared with 225,757 persons in the previous Census. The taluk contains 360 villages out of which 23 villages are uninhabited.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	188
200-499	37
500—999	42
1,000-1,999	44
2,000-4,999	24
5,000-9,999	2
10,000 and above	Nil
Total inhabited villages	337

The two villages having more than 5,000 population are Jami (7,626) and Kothavalasa (9,113.)

The places of interest among these villages are described in succeeding paragraphs. The density of population is 512 persons per square mile.

The western part of this taluk includes an Agency area with dense forest and hills. In fact the entire forest area of this taluk is most picturesque. The hills of this Agency area are parts of the Eastern Ghats which run roughly parallel to the sea. Several streams from the Agency area flow into Plains area. The structure of the Plains tract, may therefore, be described as consisting of drainage slope. The river Gosthani is the only river of importance in the taluk which irrigates Jami and Dharmavaram firkas. Besides this a good number of major and minor irrigation tanks and streams facilitate irrigation. The soil in this taluk is made up of red regar and ferruginous series and often sandy throughout the taluk.

As regards transport and communication facilities the headquarters of the taluk is connected by roads with Visakhapatnam, Vizianagram, Chodavaram, Anakapalle, Araku and Jeypore besides several other places. The Howrah-Madras (Broad Gauge) line passes through this taluk with its stations at Kothavalasa Kantakapalle and Alamanda. Recently the double line has also been completed. The Dandakaranya-Balingir-Kiruburu Railway Project now under construction starts from Kothavalasa Railway station and passes through this taluk breaking the Agency and joins Araku in Paderu taluk touching Mettapalem, Tyada, Borra and Karakavalasa where it will have stations.

As regards medical relief, there is a hospital at Srungavarapukota. Further, Rural Dispensaries are situated at Lakkavarapukota, Kothavalasa, Bheemali, Alamanda, Jami, Kottam, Bonangi,Dharmavaram and Vepada villages. There are also Maternity Centres at Alamanda, Vizinigiri, Dharmarava, Srungavarapukota, Boddam and Lakkavarapukota villages. There is also a Veterinary Hospital at Srungavarapukota.

The educational establishments of this taluk consist of Zilla Parishad High Schools at Srungavarapukota, Dharmavaram, Jami, Lakkavarapukota, Kothavalasa and Kallepalle villages. Besides these almost all villages in the taluk are served by Elementary Schools.

In the sphere of industries the taluk contains three Mangalore tile factories and nine big oil mills on a large scale basis at Kothavalasa village alone which are rapidly making headway. In addition to these the Mica mines in the Agency provide employment to large number of workers. As regards the small scale industries of this taluk the bronze vessels prepared at Lakkavarapukota village deserve mention. These vessels are famous for their good workmanship and quality and the industry is on the increase. Another feature of economic interest in this taluk is the weekly shandies held at Alamanda, Kummapalle, Gangubudi, Kothavalasa, Vepada, Kasipatnam, Kothuru, Rega, Santhapeta, Bonangi, Venkataramanapet, Ballanki, Marrivanipalem, Jami, Mamidipalle, Srungavarapukota, Sirikripalem, Chanduluru, Santhagabirampeta, Latchampeta, Boddam, Chinaraopalle and Devada villages held on different days which attract a large number of persons. People even from outlying farms throng at these market places. the taluk can boast of a big project called the Thatipudi Reservoir scheme which is under progress. It is expected to supply water to several big industries at Visakhapatnam in future.

Srungavarapukota—a Panchayat, is the headquarters of the taluk by the same name and supports a population of 9,807 persons as per the 1961 Census count. The town comprises an area of 1.0 sq. mile and contains 1,947 occcupied residential houses.

Srungavarapukota was once the residence of Mukki family and it contains the remains of an old fort. Two miles west of the town, at the foot of an outlying spur of the hills called Punyagiri is a garden belonging to the Vizianagaram estate. A flight of steps said to have been built by one of the Rajas leads up the hill to a wooded gully in which is a quaint shrine of Dhara Gangamma consisting of a boulder poised on two others between which trickles a small stream. A festival takes place here on Sivarathri when people collect for a bath. Further up, the stream tumbles over a little fall which is also held sacred.

The local Goddess, Yerakamma is another deification of a woman who committed Sati. Ballads are sung about her which say that she was the child of Dasari parents and that her birth was foretold by an Yerukula woman, who prophesied that she would have the gift of foresight. She eventually married and one day she begged her husband not to go to his field, as she was sure he would be killed by a tiger if he did. Her husband went notwithstanding and was slain as she had foreseen. She committed Sati on the spot where her shrine still stands and at this place there is also a

festival on Sivarathri. The town contains the usual offices of a Tahsil, a Government Hospital, a Panchayat Office and a Post Office with Telegraph and Telephone exchanges. A weekly market is held on every Friday.

Jami—stands on the bank of river Gosthani at a distance of about 8 miles from Srungavarapukota. It has a population of 7,626 persons as per the 1961 Census count. The village contains 1,496 occupied residential houses. People in this village live by cultivation as their main occupation. The total number of agricultural workers of this place is 2,600 persons of whom 2,245 persons are Cultivators and 355 persons are Agricultural Labourers. Paddy is the chief food crop raised in this village. It is connected by the Srungavarapukota-Vizianagaram road on which buses ply regularly and provide urban contacts. Handloom weaving is the chief cottage industry of the locality. There is a High School, a Panchayat Office, a Police Station, a Travellers' Bungalow and a temple of Poleramma in this village. A weekly market is held on every Tuesday and people even from outlying farms throng at this market place.

Kothavalasa—lies towards the south of Srungavarapukota at a distance of about 16 miles on the Visakhapatnam-Srungavarapukota major district road and supports a population of 9,113 persons, the largest number in any village in this taluk as per the 1961 Census count. There are altogether 2,015 occupied residential houses in this village. Agriculture is the major means of livelihood for a large number of people. The total number of agricultural workers of this place is 2,884 out of whom 1,935 persons are Cultivators while the rest 949 persons are Agricultural Labourers. The village chiefly raises dry crops such as Ragi, Cholam, Groundnut etc.

Kothavalasa is a Railway Station on the Visakhapatnam—Bobbili line (Broad Gauge) of the South-Eastern Railway Mangoes are chiefly exported from this village even to Delhi and Calcutta. It contains a High School, a Panchayat Office and a Post Office with Telegraph and Telephone facilities. Besides these there is a big oil mill in this place. A weekly market is held on every Tuesday. The Dandakaranya-Balingir-Kiruburu (D. B. K.) Railway now under construction will be extended upto this village.

Alamanda—is situated at a distance of about 10 miles from the Kothavalasa-Vizianagaram road towards the south-east of Srungavarapukota. It is famous for mangoes. People say that this village derived its name on account of its past when the cattle of the Maharaja of Vizianagaram used to be sent to this place for grazing owing to its extensive pastures and fallows lands. The herdsman after grazing their herds used to stop over here temporarily. As such it was originally named as Alamanda (meaning the halting place of cattle). Alamanda is a Railway station on the Visakhapatnam—Bobbili line (Broad Gauge) of South-Eastern Railway. According to the 1961 Census count it supports a population of 4,488 persons and there are altogether 412 occupied residential houses.

Borra—an Agency village lying in the Ananthagiri hills in the south-east corner of Srungavarapukota taluk is at a distance of about 27 miles from Srungavarapukota. The Srungavarapukota—Araku road passes adjacent to it distance of about 3 miles. The D.B.K. line under construction passes through this village and it may have a Railway station in future. There are rich mica mines around this village. The village contains caves of antiquity, which are of both historical and religious importance. The river Gosthani takes its origin in Ananthagiri forest area away from Borra caves. These Borra caves are famous and the caves are situated at a distance of about 4 miles to the north of the road point at Mulyaguda. Deep in the caves there is a *Sivalingam* over which there is an idol of a cow (*Kamadhenuvu*). The saying is that the water comes from the udder of this cow, falls on *Sivalingam* and then flows down, forming into a river; on account of this the river is called Gosthani. The stream coming from the western side and joining this river Gosthani near Borra caves is only a hill stream. The proposed Railway Station is adjacent to the caves. A big project at a cost of about 4½ crores is in the course of construction across this river at Thatipudi known as the Thatipudi Reservoir Scheme. Borra has a population of 33 persons as per the 1961 Census count.

VIZIANAGARAM TALUK

This taluk is situated towards the north-east corner of the district adjoining Srikakulam district. The taluk resembles in general appearence the rest of the low country of the district consisting of a plain

red soil scattered with red hills. The most prominent of the latter stand just north and west of Vizianagaram town. According to the 1961 Census count the taluk supports a population of 311,320 persons. There are altogether 197 inhabited and 12 uninhabited villages.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	22
200–499	25
500–999	56
1,000-1,999	66
2,000-4,999	25
5,000-9,999	3
10,000 and above	Nil
Total inhabited villages	197

The three villages having more than 5,000 population are Devupalle (6,288), Gajularega (5,150) and Nellimerla (8,754). The places of interest among these villages are described in succeeding paragraphs. The total area of the taluk is 359.0 sq. miles and its density is 867 persons per sq. mile. Vizianagaram is the only town in this taluk.

Vizianagaram taluk is drained and watered by the river Champavati. This river enters the sea near Konada, a coastal village in Bheemunipatnam taluk. There are as many as 1,752 minor irrigation tanks serving an ayacut of about 55,000 acres and 28 major irrigation sources with an ayacut of about 17,200 acres. The taluk contains a forest area of about 58 sq. miles in which several species of deciduous and scrub jungles grow and these are useful as fuel. The average annual rainfall of the taluk is 1,044.5 mm. April, May and June are the warmest months but owing to its proximity to the Bay of Bengal the sea breeze renders the climate moderate.

As regards the transport and communication facilities the taluk is well connected both by Road and by Railways. The Howrah—Madras line (Broad Gauge) of the South-Eastern Railway passes through this taluk, Vizianagaram being an important Railway junction. The Vizianagaram—Raipur Railway line passes through the north of this taluk. The G.N.T. road also passes through this taluk on the same direction. Besides these the taluk is connected by several major district roads on which buses ply regularly.

As regards the medical facilities, the Vizianagaram town contains a Government Hospital, a Government Gosha Hospital, a Government Police Hospital, a Government Dispensary, a Municipal Ayurvedic Dispensary, a South-Eastern Railway Dispensary and an E. S. I. Dispensary. In the Rural areas there are several hospitals. At Gantyada, the Panchayat Samithi maintains a Dispensary with 6 beds. There is a Primary Health Centre at Pedamajjipalem. A Government Hospital is located at Gajapathinagaram with 16 beds and a Rural Dispensary at Mentada.

There is protected water supply system in Vizianagaram town which was a gift by the Maharaj Kumarini of the Vizianagaram Estate. It is therefore named as Maharani Appalakondayyamba Water Works. The reservoir situated to the north-east corner of the town.

As regards the educational establishments, the taluk contains at the headquarters two colleges of Arts and Science of which one is for women besides a Music College and a Sanskrit College. There are nine High Schools for boys, one High School for girls, one Basic Training School and 206 Elementary Schools covering almost all villages. A Sainik School has also been opened recently at Korukonda in this taluk.

As regards industries Nellimarla contains a jute mill on a large scale basis. Vizianagaram town contains the Hindustan Jute and Twine Factory, the Aruna Jute and Twine Factory, the Andhra Oil Cake Company, the Ceramic Factory, the Rainbow Soap Factory, the Durga Match Factory, the Appateti Mine Industry besides an Aluminium Factory and a Tag Industry. Marupalli and Hajisahebpeta contain Graphite Mines. At Nellimerla there is also a Manganese mine.

As in other taluks weekly shandies are held at Gajapathinagaram, Devupalli, Mentada, Kotagandredu and Atchutapuram villages and Vizianagaram town which are participated by a large number of people.

Vizianagaram—a Municipality, is the headquarters of the taluk and supports a population of 76,808 persons as per the 1961 Census count as compared with 67,104 persons at the 1951 Census count. The town covers an area of 3.40 sq. miles and there are altogether 13,821 occupied residential houses. It is about 40 miles away from the district

headquarters. Vizianagaram is an important Railway junction on the South-Eastern Railway and connects the Raipur—Vizianagaram line(Broad Gauge)with the Howrah-Madras line (Broad Gauge).

It is a place of historical importance. During the past it enjoyed great prominance being a centre of art and culture under the patronage of the Zamindars of Vizianagaram. Most of the present institutions in the town have had their beginning during the time of the Rajas of Vizianagaram and also due to the patronage given by the members of their families. The town is endowed with moderate climate with all modern aminities like good parks, well lit roads, protected water supply etc.

An account of the part played by the Vizianagaram Raja's in the history of this tract has been given in some detail in the Chapter II relating to the history of this district.

Devupalle—is situated at the foot of Veduruvada Reserve Forest range with a population of 6,288 persons as per the 1961 Census count. The village occupies an area of 6.44 sq. miles and there are altogether 1,345 occupied residential houses. It was once the seat of Vizianagaram Estate. The fort built by the Zamindars of the erstwhile Vizianagaram estate is now in ruins. People in this village are engaged in agriculture and its allied pursuits and irrigation is facilitated by river channels.

Dry crops are mostly cultivated besides Jute and Groundnut which are important commercial crops. There is a Panchayat Office, a Branch Post Office and a Higher Elementary School. A weekly market is held on every Tuesday.

Gajularega—is situated very close to Vizianagaram town. It has a population of 5,150 persons as per the 1961 Census count and extends over an area of 1.96 sq. miles. There are altogether 1,066 occupied residential houses in this village. Paddy and ragi are grown in this village besides groundnut which is an important commercial crop. Irrigation is facilitated by a minor irrigation tank and a stream. Owing to the location of jute mills and the tanning industry in this village some of the people are profitably employed. There is a Branch Post Office, a Panchayat Office, an Elementary School and a temple of Mutyalagumma.

Nellimerla—is the largest populated village in this taluk and supports a population of 8,754 persons as per the 1961 Census count comprising an area of 6.31 sq. miles. It stands on the bank of river Champavati and is connected by Vizianagaram—Cheepurupalli road on which buses ply regularly. There is a Zilla Parishad High School, an E.S.I. Dispensary, a Veterinary Hospital, a Panchayat Office, a Sub-Post Office and a Police Station. In this village is grown mostly dry crops besides Jute. It contains a Jute Factory on a large scale basis called the Nellimerla Jute Mills.

Gajapathinagaram—Gajapathinagaram was once the taluk headquarters of Gajapatinagaram taluk which is now included in the Vizianagaram taluk. It is an important Railway Station on the Vizianagaram—Raipur (Broad Gauge) line of the South-Eastern Railway. The place is also accessible by the Great North Trunk Road. According to the 1961 Census count the village supports a population of 3,509 persons. The village extends over an area of 0.40 sq. miles and in all it comprises 715 occupied residential houses.

BHEEMUNIPATNAM TALUK

This taluk lies on the east coast surrounded on the north by Vizianagaram taluk on the east by the Bay of Bengal, on the South by Visakhapatnam taluk and on the west by Srungavarapukota taluk. It occupies an area of 337.0 sq. miles and contains a population of 243,766 persons with density of 723 persons as compared with a population of 232,619 persons with a density of 690 persons per sq. mile at the 1951 Census count. There are altogether 166 inhabited and four uninhabited villages and one town in the taluk.

The following statement shows the number of inhabited villages arranged according to the various population sizes.

Less than 200	12
200-499	27
500-999	47
1,000-1,999	37
2,000-4,999	39
5,000-9,999	4
10,000 and above	Nil
Total inhabited villages	166

The four villages having more than 5,000 population are Chittivalasa (7,375), Bhogapuram (6,934), Kumili (5,641) and Konada (5,991). The places of interest among these villages are described in succeeding paragraphs.

The taluk is drained and watered by two rivers called the river Gosthani and the river Champavati. The river Champavati rises in the Eastern Ghats, drains through Salur taluk of Srikakulam district then waters the Vizianagaram taluk and finally falls into the Bay of Bengal at Konada in this taluk. The river Gosthani rises in the slopes of Galikonda hills and runs nearly south and finally joins the Bay of Bengal at Bheemunipatnam. The taluk contains quite a large number of minor irrigation tanks maintained both by the Public Works Department and the Panchayat Samithis. But the Irrigation Schemes executed under the Five Year Plans namely the Polipalle Anicut across the river Gosthani near Rowthulapalem, the Gambheeram Reservoir project across Gambheeram Gedda near Gambheeram village, the Denkada Anicut across the river Champavati, the Jaggamma Gedda scheme across the Jaggamma Gedda, and the Bhogapuram Open Head Channel which takes off from the river Champavati have added much to the agricultural economy of the taluk.

As regards the transport and communication facilities the taluk is not connected by Railway. The Howrah-Madras line passes close on the boundary of the taluk from north-east to south-west. However, the National Highways connects this taluk headquarters town directly with Visakhapatnam town, the district headquarters and with Vizianagaram the neighbouring taluk towards the north of it. Bheemunipatnam is a minor port which must have been of great importance in olden days.

As regards the medical facilities, there is one Government Hospital at Bheemunipatnam, the taluk headquarters. Besides this, there are Rural Dispensaries at Bhogapuram, Pandrangi, Pusapatirega, Polipalle and Sontyam villages maintained by the Zilla Parishad and Panchayat Samithis. There is a State Employees' Insurance Hospital at Chittivalasa for the workers.

The educational establishments of this taluk consist of four High Schools, one at Reddipalle, the other at Pusapatirega and two High Schools at Bheemunipatnam out of which one called the St. Anne's High School is for Girls. There is a Government Basic Training School at Bheemunipatnam. The taluk contains 21 Literacy and Social Education Centres under Social Education Schemes and Elementary Schools in almost all villages. There are about 10 Higher Elementary Schools in the entire taluk.

The taluk contains several large scale industries which are making headway. At Chittivalasa there is a big Jute Factory. Anandapuram and Kandivalasa contain big oil expellers and provide employment to a good number of workers. At Bheemunipatnam there are three factories *viz.*, a Jute Factory, a Match Factory and a Salt Factory. Konada also contains a Salt Factory on a large scale basis.

In order to bring about a more balanced integrated rural economy, cottage and small scale industries are being developed under the plan schemes. Handloom weaving industry is popular at Ravada, Denkada, Pothuru, Polipalli and Ponturu. Another important industry is fishing. There are Fishermen's Co-operatives at Bheemunipatnam, Nagamayyapalem and Mangamavipeta villages of this taluk. In order to facilitate the fishermen to reach far off fishing grounds it was proposed to supply mechanised boats under the Five Year Plan schemes at subsidised rates. As the fishermen do not know the handling of mechanised boats, a training centre was established at Kakinada to train them. There are coir workers in the coastal villages like Annavaram and Chippada and the coir industry provides employment to about 500 workers. Tagarapuvalasa and Ananthavaram villages are famous for Brass and Bronze industries. The bricks of Nagaram are popular and the industry is progressing well. In addition to these, Chittivalasa and Tatituru contain Industrial Co-operative Societies of Potters, one each. Bheemunipatnam and Rajapulova are noted for bamboo basket making and carpentry. The finished products of these industries are sold in weekly shandies and also in neighbouring villages. Weekly shandies are held at Tagarapuvalasa, Boyapalem, Perapuram, Singavaram, Dakamarri, Savaravilli and Anandapuram on different days. Cattle are brought for sale at Mopada and Alladapalem shandies. The renovation of Bheemunipatnam port under the Minor Port Development Scheme is under consideration. This port was one of the prominent ports on the east coast for several decades.

Bheemunipatnam—a Municipality, is the headquarters of the taluk with a population of 9,868 persons as per the 1961 Census count. It occupies an area of 1.00 sq. mile and in all it comprises 1,659 occupied residential houses.

The town is most picturesquely situated on the coast at the mouth of theChittivalasa river, close to the big laterite-topped Narasimha hill, which is formed of deep-red soil with brown and purple streaks of rocks. It came first into notice as a settlement of the Dutch, who built a fort. In fact it was a bone of contention between the English and the Dutch when the war broke out between the two powers but the place finally surrendered to the English. If its dilapidated large warehouses and palatial buildings close to the coast is any indication, this place must have been an important port in the olden days It has a light house and is a minor port now though it is hardly used.

Chittivalasa—is largest village in the taluk with a population of 7,375 persons as per the 1961 Census count. It is a coastal village not far away from Bheemunipatnam. It comprises an area of 1.24 sq. miles and has 1,533 occupied residential houses. The village is well connected by the Great North Trunk Road and a Major District Road on which buses ply regularly. Wet paddy, ragi and bajra are the chief food crops of this place and groundnut is the important commercial crop. Here irrigation is facilitated by a minor Irrigation Tank. There is a Police Station, a Panchayat Office, a Panchayat Library and a Post Office with Telegraph facilities in this village. This place owes its importance to the large jute mills located here.

Gopalapatnam—is situated two miles from the coast and close under the block of hills known as Sudikonda. On the top of the hills is a spring called the Kasibugga in which the devout bathe on Sivarathri and the water of which is believed to be very efficacious in curing blighted crops. Near another pool close by, there is a little shrine in which are two slabs bearing Telugu inscriptions. There are a number of fragments of sculptures scattered round among which there is a spirited representation of Kali slaying the buffalo-demon Mahishasura. Not far off is a tiny circular shrine cut out of the rock. The place thus seems to have been of religious importance at one time.

TABLE 2.11—GOVERNMENT EXPERIMENTAL FARMS

Sl. No.	Name of Farm	Location and distance from Railway Station	Year of Establishment	Whether Research Multiplication or Demonstration Farm	Management i. e., State, University or private	Annual Rainfall (in inches)	Type of soil	Programme of Research
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
				VISAKHAPATNAM DISTRICT				
1	Demonstration-*cum*-Exploratory Farm	Araku Valley 72 miles from Waltair Railway Station	1946	Demonstration	State Government	50.00"	Soil varies from Red loamy to Red sandy loams and Red gravelly loams; pure in humus and slightly acidic too.	Trial and observation of different varieties in the various crops to study their suitability in the locality is being done and the most successful strains are being distributed to the local ryots in Paddy, Ragi, Samai, Niger, Groundnut, Chillies and Sugarcane. Various kinds of tropical and sub-tropical fruits, spices and beverage crops are also maintained to study their performance and the most promising types are being distributed to the local people.
2	Government Millet Farm	Vizianagaram 1 mile from Vizianagaram Railway Station	1954	Research	State Government	41.00"	Red loamy soil	i. Evolution of improved strains in the following millets by selections: (a) Ragi in '*Punasa*' season (May to August) (b) Ragi in main season (August to December) (c) Ragi in '*Pyru*' season (December to March) (d) Ganti or Sajja. (e) Jonna (yellow grain) (f) Jonna (white grain) ii. Production of short duration ganti hybrids of high yielding quality iii. Improving quality of straw of AKP 2 and Tella Jonna (white Jowar) and strain by hybridisation. iv. To find out response to various manures of main and '*pyru*' Ragi and fix up an economic manurial doses.
3	Sugarcan Research Station	Anakapalle 1/2 mile from Anakapalle Railway Station	1913	Expanded Research in 1926	State Government	41.29"	Loamy	Programme of the Sugarcane Research Station comprises the following sections: 1. Agronomy, 2. Chemistry, 3 Physiology, 4. Mycology, 5. Entomology. Details are given in the succeeding two pages.

Sugarcane Research Station, Anakapalle—Programmes of Research in different Sections—*Contd.*

1. Agronomy :-

(a) Varietal:-Testing of seedlings received from Coimbatore and classifying for early, mid and late seasons based on economic characters. Selected varieties to be compared with the standards in preliminary and final yield trials. These varieties to be simultaneously tested in regional liaison farms. Based on yield and quality of juice jaggery and sugar recovery, the varieties will be approved for the general cultivation.

(b) Cultural :—Testing of varieties under swamp conditions and selecting the one superior to C. O. 419; preliminary studies on time of planting and harvest with the important varieties to test the possibilities of second season in the tract; studies on methods of propping with a view to minimise the cost on the operation as now practised in the tract.

(c) Manurial :—Study of effects of continuous application of organic, inorganic and mixed forms of nitrogen to sugarcane; methods of disposal of cane trash and raising green manures to be tested with reference to cane culture, effects on soil and additional quantum of artificials required, and incidence of pests and diseases in order to reduce cost of manuring and to utilise cane wastes to increase humus and fertility of the soil.

2. Chemistry :—

I (a) Studies on the major plant food requirements of the approved strains for different production levels in the more important soil types occuring in the cane growing areas Sufficiency or otherwise of a nutrient will be judged by (a) growth (b) composition of (i) whole plant and (ii) foliar.

To start with, the study may be confined to the nitrogen nutrition as it is the most effective of the essential elements and may include examination of the rate of absorption and distribution of nitrogen in the plant at different stages of its growth It will be accompanied at the same time by a determination of available nitrogen in the soil (a) by rapid chemical methods (b) A. O.; A. C. methods. The ultimate idea is to evolve a constant or a workable formula for determining the optimum quantity of a fertiliser or fertiliser combination independent of the soil but characteristic of the approved strain of cane.

(b) Testing of the approved varieties (different for different soil regions) for their maximum potentialities. This may form part of a joint study by the Physiologists and Chemists and is more fully elaborated in his programme and will include a study of the effect of the normal duration of the crop *viz* , 12 months extending upto about 20 months as is prevalent in Hawaii.

II Biochemical and Physiological investigations on the ratoon crop :—

It is well known that the ratoon cane is inferior to the plant cane in spite of manuring, irrigation and better cultivation. It is necessary to find out whether in spite of the genetic similarities between the two canes, the ratoon cane is biologically an inferior unit. Studies of its physiology and major metabolisms may be taken up in order to obtain general indications.

III Evolution of suitable standards for defining jaggery primarily for use in scientific investigations and incidentally for commerce : — Study of the composition of cane juice and its influence on the quality of jaggery in relation to cane nutrition. This item of study may involve the following lines of work.

1. Factors contributing to colour in jaggery
2. Composition and k-eping quality of jaggery
3. Effect of storage condition on quality
4. Methods of storage

In spite of high sucrose several canes yield poor quality (with regard to colour as well as consistency) jaggery. Non-sugar organic matter is said to be responsible for poor quality; which of the substances in this non-sugar organic matter is responsible for this and how best to eliminate it in the process of manufacture of gur or in the evolution of the variety itself need thorough investigation.

TABLE 2.11—GOVERNMENT EXPERIMENTAL FARMS—*Concld.*

Sugarcane Research Station, Anakapalle—Programme of Research in different Sections—*Concld.*

3. Physiology :—

(a) Physiological and anatomical studies of approved varieties of sugarcane in respect of growth, respiration cosmetic values) *etc.*, as influenced by nutrition and water supply.

(b) Root studies—Approved varieties of cane will be grown for a stndy of their root development under specific conditions of soil nutrients and water supply. The approved varieties of cane will have to serve areas of a varied character in respect of their soil and water resources. A knowledge of their root system will help to interpret their field performances in the different areas.

(c) Pre-treatment of sugarcane sets to improve germination and growth and if possible shorten the duration without loss of yield or quality.

(d) The possibility of utilising trace elements in fertiliser practice for inducing disease and pest resistance will be investigated.

(e) Study of the physiological conditions that are responsible for pith formation in sugarcane.

(f) Study of the factors responsible for arrowing, in order to limit arrowing and increase cane yields

(g) Designing methods for increasing tillering and reducing height.

(h) Use of weedicides for controlling weeds in cane fields.

4. Mycology :—

A. *Smut* :—(a) Varietal resistance studies (b) control of smut by chemical and cultural methods (c) studies in loss of yields due to smut (d) Studies in control of smut by systematic fungicides.

B. *Red Rot* :— (a) Varietal resistance studies (b) study of red rot flora in the State (c) Determination of incubation period for maximum spread of infection in the inoculated canes (d) studies in the inoculation technique (e) studies on control methods.

C. *Pineapple* :— Studies on the efficacy of Aretan and Abavet 5 for controlling pineapple disease.

D. *Miscellaneous* :—Studies on the inhibitory action of insecticides on smuts spores.

5. Entomological Studies :—

A. *Borer pests* :—1. Study of the various varieties of cane for pest resistance.
2. Study of loss due to the different borers.
3. Control measures (a) destruction of larvae by spike thrust method (b) dusting of D. D. T. and 666 at various strengths

B. *Pests other than borers* :—1 Termites, species concerned, extent of damage and control measures (2) Cane leaf hopper (pyrilla) species concerned, extent of damage, natural enemies and control measures (3) Cane mealy bugs; species concerned, extent of damage and control measures

C. *Jaggery Research* :—1. Studies on the efficient clarification of cane juices in jaggery making.
2. Studies on the non-sugar organic matter in cane juices.
3. Studies in jaggeries from immature cane juices.
4. Studies in jaggeries from deteriorating cane juices.
5. Studies in the factors affecting colour of jaggeries.
6. Studies in keeping quality of jaggery.

Note : Due to the introduction of one year P U.C. and three year Degree course in place of two year Intermediate course and two year Degree course from 1957–58 the strength under columns 7 to 10 under P.U.C. has gone down and that under colnmns 11 to 14 under Degree course has gone up from 1958–59 in respect of M R College, Vizianagaram, Mrs. A V. N College, Visakhapatnam and A M.A. College, Anakapalle. The figures shown upto 1956–57 in respect of the three colleges mentioned above under columns 7 to 10 reprsent the strength of students studying Intermediate course The figures shown against 1957–58 under cloumns 7 to 10 represents those of P.U.C. and Second Year Intermediate. The figures shown from 1958–59 onwards represent that of P.U.C only

EXPLANATORY NOTE
A-SERIES
GENERAL POPULATION TABLES

General Population Tables prepared at the 1961 Census are the basic demographic Tables and give information about the total population as recorded at the present Census in the District/Taluk/Town, the territorial changes that have occurred during the last decade from 1951–61, variation of population during the past six decades, distribution of villages or towns by population sizes and trends of urbanisation in the district. The data are presented under the following four Tables.

A–I Area, Houses and Population

A–II Variation in population during sixty years (1901–61)

A–III Villages classified by population

A–IV Towns (and Town-Groups) classified by population in 1961 with variation since 1941

All the above Tables pertaining to Visakhapatnam district are reproduced in this Handbook.

TABLE A–I AREA, HOUSES AND POPULATION

This Table, the basic population table, gives for the district and for each taluk as well as for each town in the taluk, area in square miles and also in square kilometres, persons per square mile, number of villages inhabited and uninhabited, number of towns, number of occupied residential houses and population by persons, males and females. The figures have been given separately one below the other under Total, Rural and Urban. In this Table as in all other tables, the taluks have been arranged in the order of the Location Code Numbers adopted in the 1961 Census and not in an alphabetical order. For this purpose all the ten taluks in the district have been numbered continuously in a clockwise order starting from the taluk in which the district headquarters is situated, *i.e.*, from Visakhapatnam taluk. The location code numbers allotted to the taluks are shown below:-

Name of Taluk	*Location Code Number*
Visakhapatnam	1
Anakapalle	2
Yellamanchili	3
Narasapatnam	4
Chintapalle	5
Paderu	6
Chodavaram	7
Srungavarapukota	8
Vizianagaram	9
Bheemunipatnam	10

The particulars relating to Agency portions in the district which exist in the taluks of Narasapatnam, Chintapalle, Paderu, Chodavaram and Srungavarapukota are given separately.

One of the main changes in the presentation of this Table since the last Census is that the particulars relating to each of the towns in the taluk are also given underneath the concerned taluk besides giving the number of inhabited and uninhabited villages in each taluk.

The district area shown against (x) in column (3a) in brackets is that supplied by the Surveyor-General, India. The difference noticed between the area figures furnished by the Surveyor General, India and the figures given by the State Survey Department shown against (Y) is on account of the different methods of computation of areas adopted by the two authorities. The area figures adopted generally for the district and the taluks are as furnished by the State Survey Department and the area figures of each of the towns are as furnished by the Local Authorities concerned and these are exhibited under column 3(a). The urban area of each taluk has been worked out by adding the areas of all the urban units in the taluk and the rural area of the taluk is obtained by deducting the urban area of the taluk from its total area.

The area in square kilometres under column (3b) is obtained by converting the area in sq. miles, corrected upto 2 places of decimals, given under column (3a).

The area figures for District Total/Rural/Urban, Taluk Total/Rural and for each town have been first converted separately. In order to tally the totals of all the taluks with the district total, the converted Total/Rural/Urban area figures of the taluks have been suitably adjusted on prorata basis according to area ratios of the taluks. The area of each town both in square miles under column (3a) and in square kilometres under column (3b) have been given upto second decimal place while the Total/Rural/Urban areas of the taluks as well as of the district have been given only upto first decimal place.

The density of persons per square mile for the district and for each of the taluks and towns has been worked out according to the area figures exhibited under column (3a).

"Village" referred to in this Table and in all other Tables in this book is the Revenue administrative unit with well defined boundaries. A village having one or more groups of habitations is treated as an inhabited village and a village with no habitation at all is treated as an uninhabited village. The number of inhabited and uninhabited villages in each taluk and in the district are shown under columns 5 and 6 of this Table. In computing the number of villages in a taluk, the villages which are either completely included in an urban unit (town) or hamlets to a main Revenue village, are not taken into account. All the Revenue villages within the taluk are demarcated and numbered continuously from North-West to South-East. The number so assigned to each village is the 1961 Census Location Code Number, distinct from the Revenue Survey Number and will be referred to hereafter as the Location Code Number.

"Town" is a place of usually having not less than 5,000 inhabitants possessing distinct urban characteristics and also satisfying certain criteria prescribed.

For recognition of any place as a town at the present Census, it was laid down that it should be either covered by a City Corporation, Municipality or Cantonment Board or that it should generally satisfy the following criteria;

(i) It should have a minimum population of 5,000

(ii) The density of population should not be less than 1,000 per square mile; and

(iii) At least 3/4ths of the adult male population should be non-agricultural.

The total number of towns in each taluk and in the district is exhibited under column 7 of this Table.

A Census House is defined (for the purpose of 1961 Census) as a structure or part of a structure inhabited or vacant, a dwelling, a shop, workshop, or a factory, place of business, a shop-*cum*-dwelling giving on the road or a common staircase or a common courtyard, leading to a main gate or enjoying a separate entrance. Only houses used wholly or partly for the purpose of residence by one or more households are considered as residential houses and the number of such houses in the town/taluk/district have been given in column 8. Houses utilised wholly for purposes other than for residence are not therefore taken into account.

The total population figures, by persons, males and females for the district as well as for each taluk and town have been exhibited separately under columns 9, 10 and 11 in this Table.

Besides the main Table, there are also three appendices to this Table.

Appendix I : In this Appendix the growth of the district and the taluks to the present area since the last Census has been traced by giving the territorial changes that have taken place during the last decade together with the names of the units and the area involved in the changes. The net area gained or lost by each unit is also given in this Appendix. The names of the villages involved in the transfers together with their location code number at 1951 Census, are given in this Annexure to this Appendix.

Appendix II : One of the criteria for a place to be declared as a town is that it should normally have a population of 5,000 and over. However, several places with a population of 5,000 and over did not qualify to be treated as towns. This Appendix gives the number of such places with their population. There are no towns with population under 5,000 persons at the 1961 Census in this district.

Appendix III : This Appendix shows the taluk-wise figures for the Houseless Population and the Institutional population separately. Houseless Population comprises groups of people who have no fixed place of residence and no regular home to live in. Institutional Population represents groups of unrelated persons living and messing together, as in the case of boarding houses, messes *etc.* under the management of a head of the household appointed either by rules governing the institution or by common consent of its members. For the purpose of studying different characteristics Institutional Population is also considered as Household Population.

TABLE A-II VARIATION IN POPULATION DURING SIXTY YEARS 1901-1961

This Table compares the population of the district as ascertained at the 1961 Census with the corresponding figures for the six previous Censuses *i.e.*, from 1901. The figures revealed at the previous Censuses have been adjusted for subsequent territorial changes in order to afford a correct basis for comparison.

As this Table gives the growth of population from decade to decade, these data form the main source for the estimation of population in the absence of reliable Vital Statistics. One of the main changes in the presentation of this table since the last Census is that the percentage of variation is also given from decade to decade. The variation of males and females from decade to decade has been omitted at the present Census.

During the last decade the jurisdiction of this district was unaffected. Gudem Agency taluk was split up and 322 of its villages were newly constituted into Chintapalle taluk. The remaining 1,507 villages of the Gudem Agency taluk along with 481 villages transferred from the Agency portion of Srungavarapukota taluk were constituted into another new taluk by name Paderu. No other inter taluk transfers took place. The names of the following taluks were changed during this decade as indicated below but their jurisdiction was unaffected.

Name of Taluk at 1951 Census	*Name of Taluk at 1961 Census*
Golugonda	Narasapatnam
Veeravalli	Chodavaram
Sarvasidhi	Yellamanchili

Appendix: The appendix to this table shows the 1951 population according to the territorial jurisdiction in 1951 and changes in area and population involved in the changes that have taken place during the decade 1951-1961. The details of transfers of areas in each case together with the names and areas in sq. miles and the number and the date of the Notification of each transfer to the extent available are also given in the foot note.

TABLE A-III VILLAGES CLASSIFIED BY POPULATION

This Table shows the total number of inhabited villages in the district, arranged on population basis under the following groups :—

Less than 200 population

200 — 499

500 — 999

1,000 — 1,999

2,000 — 4,999

5,000 — 9,999

10,000 and above

The villages which are either uninhabited or wholly included in urban units are not taken into account in this Table. The following statement gives at a glance the break up of all the inhabited villages of Visakhapatnam district classified by population in four broad groups, *viz.*

Villages with population	*Number of Inhabited Villages*		
	Agency	*Plains*	*Total*
(*1*)	(*2*)	(*3*)	(*4*)
Less than 499	2,212	323	2,535
500 — 1,999	32	700	732
2,000 — 4,999	2	231	233
5,000 and above	...	24	24
Total inhabited villages	2,246	1,278	3,524

For the definition of Village and Inhabited Village see Explanatory note to Table A-I.

TABLE A-IV TOWNS (AND TOWN GROUPS) CLASSIFIED BY POPULATION IN 1961 WITH VARIATION SINCE 1941

This Table shows the growth of each town since 1941. The civic status, area both in Sq. miles and Sq. Kilometres, population with sex breakup, decade variation in total population and percentage of decade variation have been given for every town in the district.

For the definition of Town see explanatory note to Table A-I.

The towns have been classified into six classes according to their population in the 1961 Census as detailed below :-

Class	*Limits of Population*
I	100,000 and above
II	50,000 — 99,999
III	20,000 — 49,999
IV	10,000 — 19,999
V	5,000 — 9,999
VI	Less than 5,000

Class I towns with a population 100,000 and above are termed as cities. The total number of towns under each class in the district at the 1961 Census are given below :—

Class	*Number of Towns*
I	1
II	1
III	3
IV	2
V	3
VI	...
Total Towns	10

Kothakota and Kasimkota which were treated as towns in 1951 Census have been deleted from the list of towns in the 1961 Census in this district. Malkapuram has been treated as a town for the first time at the 1961 Census in this district.

Since the prime purpose of this Table is to show the growth of towns as towns and not how certain places have grown into towns from villages, the population of a place which at any particular Census year was not treated as a town is not given in this Table. The population of towns at each of the last seven Census years *i.e.*, since 1901 is, however, given in Table A-IV in Part II-A General Population Tables of Andhra Pradesh. The population of towns for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area

The civic status of every town *i.e.*, whether the town is a Municipality, a Panchayat etc., is indicated after the name of the town in abbreviated letters M., P., etc.

One of the main changes in the presentation of this Table since the last Census is that the areas of towns and the percentage of decade variation of the total population of the towns have also been given.

Appendix to this Table gives the names of towns recognized at the present Census together with the names of villages either fully or partly included in them.

Note : (1) Under columns (3a) and (3b), (X) represents the area figures furnished by Surveyor General of India, and (Y) represents the area figures furnished by the State Survey Department. The Urban areas are based on the areas of individual towns furnished by the local authorities. The rural area for the District Taluk is obtained by subtracting the urban area from the total District/Taluk areas according to the State Survey Department.

(2) The Sq. Km. and density figures of urban areas of Taluk District are worked out using the area figures corrected upto second place of decimal obtained by adding the areas of the towns in the respective units and not using the area figures given in the Table. In addition to this the area figures relating to Sq. Km. are further adjusted to make the taluk District total tally.

(3) @ The area of Malkapuram has been included in Rural area of Visakhapatnam taluk and is not separately available.

(4) Names of Towns treated as such for the first time in the 1961 Census are printed in italics.

(5) The following abbreviations have been used for the civic Status of a town:-

M : Municipality; P : Panchayat

APPENDIX I TO TABLE A-I

Statement showing the 1951 Territorial Units constituting the present set-up of Visakhapatnam district and taluks therein and details of net area gain or loss in the changed Territories during the decade 1951–1961

[Only those names/areas which have undergone changes since 1951 have been shown in this Appendix]

District Taluk	1951 Territorial Units	DETAILS OF GAIN IN TERRITORIES			DETAILS OF LOSS IN TERRITORIES			NET AREA (Gain '+' Loss '—')	
		Brief description	Area, Sq. miles	Sq. Km.	Brief description	Area Sq miles	Sq. Km.	Sq. miles	Sq..Km.

APPENDIX II TO TABLE A-I

Number of Villages with a Population of 5,000 and over

(Taluks which do not have villages falling in this category are not included in this Appendix)

District/Taluk	Villages with a population of 5,000 and over		
	Number of Villages	Population	Percentage to total Rural Population of the District
(1)	(2)	(3)	(4)
VISAKHAPATNAM DISTRICT	**24**	**164,233**	**8.75**
1 Visakhapatnam Taluk	2	11,644	0.62
2 Anakapalle Taluk	4	32,654	1.74
3 Yellamanchili Taluk	4	24,457	1.30
4 Narasapatnam Taluk	2	16,515	0.88
5 Chodavaram Taluk	3	16,091	0.86
6 Srungavarapukota Taluk	2	16,739	0 89
7 Vizianagaram Taluk	3	20,192	1.08
8 Bheemunipatnam Taluk	4	25,941	1.38

Note: 1. There are no Towns with a population under 5,000 in this district

2. There are no Villages with a population of 5,000 and over in the Agency portion

APPENDIX III TO TABLE A-I

(a) This taluk was newly formed by 322 villages transferred from former Gudem Agency Taluk, *vide*. G. O. Ms. No. 1258, Revenue dated 9-7-1958.

(b) This taluk was newly formed by 1,507 villages transferred from former Gudem Agency Taluk and 481 villages transferred from Srungavarapukota Taluk *vide* · G.O.Ms. No. 1258, Revenue dated 9-7-1958.

(c) 481 villages with an area 250.0 Sq. miles were transferred to newly constituted Paderu Taluk *vide*. G.O.Ms No 1258, Revenue dated 9-7-1958.

Note : 1. Area figures given under columns 2 and 5 relate to the jurisdictions prevailing in 1961 and 1951 respectively and are furnished by the State Survey Department.

2. The figures given in brackets in columns 5 and 6 represents the difference in area between 1951 and 1961 and the figures in brackets in column 7 show the difference in population between the areas as per the jurisdiction in 1951 and the present jurisdiction.

EXPLANATORY NOTE
B-SERIES
ECONOMIC TABLES

The Economic Tables of the 1961 Census are based on the principal work of a person and the concept of dependency has been abandoned altogether for economic classification. The entire population has been divided into the following nine categories of Workers, for broad economic classification based on the Indian Standard Industrial Classification adopted by the Government and the Non-Workers being shown as a separate category.

I Working as Cultivator

II Working as Agricultural Labourer

III Working in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV Working at Household Industry

V Working in Manufacturing other than Household Industry

VI Working in Construction

VII Working in Trade and Commerce

VIII Working in Transport, Storage and Communications

IX Working in other Services

X Non-Workers

The following seventeen Economic Tables, the first nine relating to the General Population and the remaining eight pertaining to a 20% sample of Households, have been prepared at the present Census.

(i) GENERAL ECONOMIC TABLES

B-I Workers and Non-Workers classified by sex and broad Age-groups

B-II Workers and Non - Workers in Cities, Town-Groups and Towns arranged territorially classified by sex and broad Age-groups

B-III *Part A*—Industrial Classification of Workers and Non-Workers by educational levels in *Urban areas only*

B-III *Part B* — Industrial Classification of Workers and Non-Workers by educational levels in *Rural areas only*

B-IV *Part A* — Industrial Classification by sex and class of worker of persons at work at Household Industry

Part B — Industrial Classification by sex and class of Worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service

Part C — Industrial Classification by sex and Divisions, Major Groups and Minor Groups of persons at work other than Cultivation

B-V Occupational Classification by sex of persons at work other than Cultivation

B-VI Occupational Divisions of persons at work other than Cultivation classified by sex, broad Age-groups and educational levels in *Urban areas only*

B-VII *Part A*-Persons working principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and by secondary work (i) at Household Industry, (ii) as Cultivator or (iii) as Agricultural labourer

Part B—Industrial Classification by sex of persons working in Non-Household Industry, Trade, Business, Profession or Service who are also engaged in Household Industry

B-VIII *Part A*—Persons unemployed aged 15 and above by sex, broad Age-groups and educational levels in *Urban areas only*

Part B—Persons unemployed aged 15 and above by sex, and educational levels in *Rural areas only*

B-IX Persons not at work classified by sex, broad Age-groups and type of activity

(ii) HOUSEHOLD ECONOMIC TABLES

B-X Sample Households (i) engaged neither in Cultivation nor in Household Industry, (ii) engaged either in Cultivation or in Household Industry but not in both and (iii) engaged both in Cultivation and Household Industry

B-XI Sample Households engaged in Cultivation classified by interest in land and size of land cultivated

B-XII Sample Households engaged in Cultivation only, classified by size of land cultivated and number of family workers and hired workers

B-XIII Sample Households engaged both in Cultivation and Household Industry, showing size of land cultivated classified by Principal Household Industry

B-XIV *Part A* — Households classified by Major Groups of Principal Household Industry and number of persons engaged

Part B — Households classified by Minor Groups of Principal Household Industry

B-XV Sample Households engaged both in Cultivation and Household Industry classified by size of land

B-XVI Sample Principal Household Industry classified by period of working and total number of workers engaged in Household Industry

B-XVII Sample Households classified by (i) number of male and female members by size of Housholds and (ii) engagement (a) neither in Cultivation nor in Household Industry, (b) in Household Industry only and (c) in Cultivation sub-classified by size of land cultivated.

Out of the above seventeen Tables only Tables B-I, B-III, B-IV Part-C, B-V, B-VII, B-VIII, and B-IX pertaining to Visakhapatnam district are reproduced in this Hand Book.

The Household Economic Tables which are a special feature of this Census and which are prepared on the basis of a 20% sample of the returns in the Household Schedules filled up at the time of enumeration. They are printed in a separate volume entitled "Census of India, 1961, Vol. II, Andhra Pradesh-Part III Household Economic Tables" which may be referred to.

The working population in each of the nine categories of workers and the non-working population are classified by broad Age-groups, *viz.*, 0-14, 15-34, 35-59, 60+ and Age not stated in some of these Economic Tables.

TABLE B-I WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

This Table is prepared separately for total, rural and urban population and is a summary Economic Table for the entire district. It gives the distribution of the population by sex among the nine Industrial Categories of Workers and also Non-Workers by the four broad Age-groups 0-14, 15-34, 35-59, and 60+ years. This is the basic Economic Table and the Age-groups correspond to the different stages of life which have special significance with reference to capacity to work, *viz.*, children, young persons, middle aged persons and elderly persons. The classification of non-working population is made in other succeeding tables.

This Table is prepared on the basis of the principal work of a person irrespective of the fact that the person may not be self-supporting from the income derived by that work. In the case of persons who are engaged in more than one work, which are also productive activities, the principal work is taken as that one which has been declared by the person himself as the work on which he spends the longest time and not necessarily the work from which he derives the largest income. Thus the stress is on the concept of work and not income or dependency. The following explanation makes it clear as to who is treated as a worker.

Workers

All persons who were engaged in some productive work during any of the 15 days preceding the day on which enumerated, irrespective of the fact, whether they derive income or not, are treated as Workers. In respect of seasonal work like Cultivation, Livestock, Household Industry, etc., if the person had some regular work *for more than one hour a day* throughout the greater part of the working season, he is recorded as a Worker. Persons

temporarily incapacitated from work at the time of Census enumeration due to illness or other cause are also treated as Workers. An under trial prisoner in prison during the Census enumeration is also treated as worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not, however, treated as workers. Persons under training as apprentices with or without wages are recorded as Workers. Family workers, *i.e.*, who do not directly derive any income but attend to work along with other members of the family are treated as Workers. An adult woman who is engaged mainly in Household duties and in no other economically productive work, *i.e.*, a housewife, is not, however, treated as a worker. Work includes not only actual work but also effective supervision. A public or social service Worker who is actually engaged in public service activity or political activity is taken as a Worker. Thus all workers in any branch of productive work are netted as Workers.

Non-Workers

All persons who are not Workers, *i.e.*, those falling under the following categories are treated as Non-Workers:

(i) Fulltime students or children attending schools and who do no other work;

(ii) Persons engaged in unpaid home duties such as housewife;

(iii) Any dependent including an infant or child not attending school or a person permanently disabled from work because of illness or old age;

(iv) A retired person who is not employed again, a rentier or royalty receiver or any other person of independent means for securing which he does not have to work and who does no other work;

(v) Beggars, vagrants or independent women without indication or source of income and others with unspecified source of existence;

(vi) A convict in jail or an inmate of a penal, mental or charitable institution;

(vii) Unemployed persons seeking employment for the first time;

(viii) Persons employed before but now out of employment and seeking work.

TABLE B-III INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS BY EDUCATIONAL LEVELS

This Table is divided into two parts. Part A relates to urban areas and Part B relates to rural areas. The distribution according to different educational levels of each of the nine categories of Workers and also the Non-Workers are given in this Table.

In *Part-A* which relates to urban areas only, the data are given for all the Urban areas of the district put together and also for Visakhapatnam City separately by the following educational levels.

Illiterate

Literate (without educational level)

Primary or Junior Basic

Matriculation or Higher Secondary

Technical diploma not equal to degree

Non-technical diploma not equal to degree

University degree or Post-graduate degree other than technical degree

Technical degree or diploma equal to degree or Post-graduate degree:

Engineering

Medicine

Agriculture

Veterinary and Dairying

Technology

Teaching

Others

In *Part B* the data, which relate to rural areas only, are given for the district followed by the figures for taluks according to the following educational levels.

Illiterate

Literate (without educational level)

Primary or Junior Basic

Matriculation and above

A "*Literate*" is a person who can, with understanding both read and write. He should be able to read any matter in print or manuscript and also be able to write a simple letter. A person who can neither read nor write or can merely read and cannot write is considered as an illiterate. All children aged 4 years and below are treated as illiterates. The test for education is that the person should have passed a recognised written examination or examinations as proof of the educational level attained. The highest examination passed is taken as the level of education.

TABLE B-IV INDUSTRIAL CLASSIFICATION BY SEX AND CLASS OF WORKER OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table is divided into three parts.

Part-A shows Industrial Classification by sex and class of worker of persons at work at Household Industry for total, rural and urban population. The data are shown first for the Division followed by Major Groups in the order laid down in the Indian Standard Industrial Classification under that Division.

Part-B shows the Industrial Classification by sex and class of worker of persons at work in Non-Household Industry, Trade, Business, Profession or Service for the total and urban population. In this part also the data are presented first for the Division followed by the Major Groups in the order laid down in the Indian Standard Industrial Classification.

Part-C shows the Industrial Classification by sex and Divisions, Major Groups and Minor Groups of persons at work *other than cultivation* for total and urban population. The data are presented first for the Divisions followed by Major Groups in the order laid down in the Indian Standard Industrial Classification. Under each Major Group the corresponding Minor Groups are shown.

Only *Part-C* is reproduced in this Hand Book upto district level. Minor Groups having less than 1% of workers of the respective Division (0.5% in the case of Division 2 and 3) are not shown in this Table but are given in the Appendix to this Table.

"*Household Industry*" is an industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in the rural areas and only at home in Urban areas. The industry should not be run on the scale of a registered factory and should relate to production, processing, servicing, repairing or making and selling of goods.

An "*Employer*" is a person who has to employ other persons in order to perform the work. Such a person is not only responsible for his own personal work but also for giving work to others. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

An "*Employee*" is a person who usually works under some other person for salary or wages in cash or kind. Persons who are employed as managers, superintendents, agents, etc., and in that capacity, employ or control other workers on behalf of their own employers are not regarded as employers.

A "*Single Worker*" is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. Single workers also include persons who work in joint partnership with one or several persons hiring no employees and also a member of a Producers' Co-operative. Each one of the partners or members of such Producers' Co-operatives is recorded as a "Single Worker".

A "*Family Worker*" is a member who works, without receiving wages in cash or kind, in an Industry, Business or Trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. Such an Industry, whether run at home or away from home, in town or village and even away from village in the Rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. Members of a family include those drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative. Members of the household who help solely in household duties are not treated as family workers.

Note :—In respect of Household Industry, by the very nature of the participation of the workers in a Household Industry all the four catagories of workers are not recognised. Only the "employees" if any, *in a Household Industry are categorised* as such. The rest are clubbed together as "Others".

TABLE B-V OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This Table shows, for the total and urban population, the Occupational Classification of persons working in Non-Agricultural Occupations. The data are presented first for the Division followed by the Occupational Groups in the order of the National Classification of Occupations. Under each Group the detailed Occupational Families are shown. Occupational Familes, accounting for less than 1% of the Workers of the respective Divisions (less than 0.5% in case of Families under Division 7-8) are not given in this Table but shown in the Appendix to this Table. The particulars for the district are given down to the Occupational Family, while the talukwise and City particulars are given upto Division level.

The Occupational Classification given in this Table is quite distinct from the Industrial Classification presented in Table B-IV Part-C. Occupational Classification relates to the actual work a person does irrespective of the Industry in which he is engaged, *e.g.*, a person who is a clerical worker for occupational Classification may be connected with Industry, Trade or Service. Conversely in the same Industrial Category there may be persons following different Occupations as, technicians, managerial workers, clerical workers, watch and ward, etc. Therefore, in this Table under each Occupational Division, Group and Family the broad Industrial Category of the worker is also given.

TABLE B-VII

PART A PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

PART B INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

This Table is divided in to two parts:

Part-A shows the persons working principally as Cultivators or as Agricultural labourers or at Household Industry and who have secondary work in the other two alternatives from among Household Industry or Cultivation or Agricultural Labour. The data for the district are given for total, rural and urban population and separately for Visakhapatnam City by Industrial Divisions and Major Groups. For the taluks, however, the particulars are given for rural population and by Divisions only.

Part-B shows the persons working principally in Non-Household Industry, Trade, Business, Profession or Service and also engaged at Household Industry as secondary work by Industrial Divisions and Major Groups. The data for the district are presented for the total, rural and urban population by Divisions followed by the Major Groups of that Division. The talukwise data for rural population and City data for urban population are presented by Industrial Divisions only.

TABLE B-VIII PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS

This Table shows the distribution of persons unemployed aged 15 and above by sex and educational levels for urban and rural areas separately in two parts.

In *Part-A* which gives data relating to all the urban areas of the district taken together and separately for Visakhapatnam City, the unemployed have been sub-divided into two classes, *viz.*, (i) Persons seeking employment for the first time and (ii) Persons employed before but now out of employment and seeking employment and the data have been given by broad Age-groups and by educational levels. The first class of unemployed are divided into the Age-groups 15-19, 20-24, 25-29,30-34, 35+ and Age not stated and the second class into the Age-groups 15-19, 20-24, 25-34, 35-44, 45-59, 60+ and Age not stated.

Part-B relates to rural areas. The data in this part are given talukwise by educational levels. The data in this Table are not, however, given by Age-groups.

TABLE B-IX PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

This Table shows for the total, rural and urban population, the persons not at work classified by sex, broad Age-groups and type of activity. The Non-Workers are divided into eight categories according to their activites, *viz.*, (i) Fulltime students; (ii) those attending only to Household duties; (iii) Dependants, infants and disabled; (iv) Retired persons, rentiers or persons of independants means; (v) Beggars, vagrants, etc., (vi) Inmates of penal, mental and charitable institutions; (vii) Persons seeking employment for the first time; and (viii) Persons employed before but now out of employment and seeking work, according to their activities. These eight categories are based on the recommendations of the United Nations. This Table provides information about those who have an income without working, about housewives, about school going children, besides other types of non-working population. The data for the district are presented for total, rural and urban population. The talukwise data are, however, presented for the rural population only. Particulars relating to Visakhapatnam City are presented separately.

A total number of 39 males and 160 females have been returned as fulltime students in the Age-group 35-59 in this district. These elderly persons might be pursuing advanced studies in religion such as Christian missionary trainees, or in Vedas, Music or other Fine Arts etc., and hence classified as fulltime students.

A complete list of the Standard Industrial Classification adopted by the Government of India giving the description of Divisions, Major Groups and Minor Groups is given below for guidance. In Table B-IV Part C and Table B-VII Part B only the number of the Division, Major Group or Minor Group is shown. The description of the Industry, Business or Service concerned can be found from the list below :-

STANDARD INDUSTRIAL CLASSIFICATION

This classification groups the industries into

9 Divisions

45 Major Groups

343 Minor Groups

The Divisions and Major Groups with their Code Numbers are listed below.

Divisions

0 AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

1 MINING AND QUARRYING

2&3 MANUFACTURING

4 CONSTRUCTION

5 ELECTRICITY, GAS, WATER AND SANITARY SERVICES

6 TRADE AND COMMERCE

7 TRANSPORT, STORAGE AND COMMUNICATIONS

8 SERVICES

9 ACTIVITIES NOT ADEQUATELY DESCRIBED

Major Groups

DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING AND HUNTING

00 Field produce and Plantation crops
01 Plantation crops
02 Forestry and Logging
03 Fishing
04 Livestock and Hunting

DIVISION 1—MINING AND QUARRYING

10 Mining and Quarrying

DIVISION 2 & 3—MANUFACTURING

20 Foodstuffs
21 Beverages
22 Tobacco products
23 Textile-Cotton
24 Textile-Jute
25 Textile-Wool
26 Textile-Silk
27 Textile-Miscellaneous
28 Manufacture of Wood and Wooden products
29 Paper and Paper products
30 Printing and Publishing

STANDARD INDUSTRIAL CLASSIFICATION—*Contd.*

31 Leather and Leather products
32 Rubber, Petroleum and Coal products
33 Chemicals and Chemical products
34–35 Non-Metallic Mineral products other than Petroleum and Coal
36 Basic Metals and their products except Machinery and Transport equipment
37 Machinery (all kinds other than Transport) and Electrical equipment
38 Transport equipment
39 Miscellaneous Manufacturing Industries

DIVISION 4—CONSTRUCTION

40 Construction

DIVISION 5-ELECTRICITY, GAS, WATER AND SANITARY SERVICES

50 Electricity and Gas
51 Water supply and Sanitary services

DIVISION 6—TRADE AND COMMERCE

60–63 Wholesale Trade
64–68 Retail Trade
69 Trade and Commerce Miscellaneous

DIVISION 7 — TRANSPORT, STORAGE AND COMMUNICATIONS

70–71 Transport
72 Storage and Warehousing
73 Communications

DIVISION 8—SERVICES

80 Public Services
81 Educational and Scientific Services
82 Medical and Health Services
83 Religious and Welfare Services
84 Legal Services
85 Business Services
86 Community Services, Trade and Labour Associations
87 Recreation Services
88 Personal Services
89 Services (not elsewhere classified)

DIVISION 9—ACTIVITIES NOT ADEQUATELY DESCRIBED

90 Activities unspceified and not adequately described.

Classification and Code Numbers at the 3 digit level in respect of Minor Groups are given below

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups

Major Group (Code)	Description	Minor Group (Code)
DIVISION 0—AGRICULTURE, LIVESTOCK, FORESTRY, FISHING, AND HUNTING		
00	*Field Produce and Plantation crops*	
	Production of cereal crops (including Bengalgram) such as rice, wheat, jowar, bajra, maize	000
	Production of pulses, such as arhar, moong, masur, urd, khesari, other gram	001
	Production of raw jute and kindred fibre crops	002
	Production of raw cotton and kindred fibre crops	003
	Production of oilseeds, sugarcane and other cash crops	004
	Production of other crops (including vegetables) not covered above	005
	Production of fruits and nuts in plantation, vines and orchards	006
	Production of wood, bamboo, cane reeds, thatching grass, etc.	007
	Production of juice by tapping palms	008
	Production of other agricultural produce (including fruits and nuts not covered by Code Number 006 and flowers) not covered above	009
01	*Plantation Crops*	
	Production of tea in plantation	010
	Production of coffee in plantation	011
	Production of rubber in plantation	012

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups—*Contd.*

Major Group (Code)	Description	Minor Group (Code)
01	*Plantation Crops*—Concld.	
	Production of tobacco in plantation	013
	Production of ganja, cinchona, opium	014
	Production of other plantation crops not covered above	015
02	*Forestry and Logging*	
	Planting, replanting and conservation of forests	020
	Felling and cutting of trees and transportation of logs	021
	Preparation of timber	022
	Production of fuel including charcoal by exploitation of forest	023
	Production of fodder by exploitation of forests	024
	Production of gums, resins, lac, barks, herbs, wild fruits and leaves by the exploitation of forests	025
	Production and gathering of other forest products not covered above	026
03	*Fishing*	
	Production of fish by fishing in sea	030
	Production of fish by fishing in inland waters including the operation of fish farms and fish hatcheries	031
	Production of pearls, conch, shells, sponges by gathering or lifting from sea, river, pond	032
04	*Livestock and Hunting*	
	Production and rearing of livestock (large heads only) mainly for milk and animal power such as cow, buffalo, goat	040
	Rearing of sheep and production of wool	041
	Rearing and production of other animals (mainly for slaughter) such as pig	042
	Production of ducks, hens and other small birds, eggs by rearing and poultry farming	043
	Rearing of bees for the production of honey, wax and collection of honey	044
	Rearing of silk worms and production of cocoons and raw silk	045
	Rearing of other small animals and insects	046
	Trapping of animals or games propagation	047
	Production of other animal husbandry products such as skin, bone, ivory and teeth	048
	DIVISION 1—MINING AND QUARRYING	
10	*Mining and Quarrying*	
	Mining of coal	100
	Mining of iron ores	101
	Mining of gold and silver ores	102
	Mining of manganese	103
	Mining of mica	104
	Mining of other non-ferrous metallic ores	105
	Mining of crude petroleum and natural gas	106
	Quarrying of stone (including slate), clay, sand, gravel, limestone	107
	Mining of chemical earth such as soda ash	108
	Mining and quarrying of non-metallic products not classified above such as precious and semiprecious stones, asbestos, gypsum, sulphur, asphalt	109
	DIVISION 2 & 3—MANUFACTURING	
20	*Foodstuffs*	
	Production of rice, atta, flour etc., by milling, dehusking and processing of crops and foodgrains	200
	Production of sugar and syrup from sugarcane in mills	201

Standard Industrial Classification showing the Divisions, Major groups and Minor Groups—*Contd.*

Major Group (Code)	Description	Minor Group (Code)
20	*Foodstuffs*—Concld.	
	Production of indigenous sugar, gur from sugarcane or palmjuice and production of candy	202
	Production of fruit products such as jam, jelly, sauce and canning and preservation of fruits	203
	Slaughtering, preservation of meat and fish and canning of fish	204
	Production of bread, biscuits, cake and other bakery products	205
	Production of butter, ghee, cheese and other dairy products	206
	Production of edible fats and oils (other than hydrogenated oil)	207
	Production of hydrogenated oils (Vanaspati)	208
	Production of other food products such as sweetmeat and condiments, muri murki, chira, khoi, cocoa, chocolate, toffee, lozenge	209
21	*Beverages*	
	Production of distilled spirits, wines, liquor from alcoholic malt, fruits and malts in distillery and brewery	210
	Production of country liquor	211
	Production of indigenous liquor such as toddy, liquor from mahua, palmjuice	212
	Production of other liquors not covered above	213
	Production of aerated and mineral water	214
	Production of ice	215
	Production of ice cream	216
	Processing of tea in factories	217
	Processing of coffee in curing works	218
	Production of other beverages	219
22	*Tobacco Products*	
	Manufacture of bidi	220
	Manufacture of cigars and cheroots	221
	Manufacture of cigarette and cigarette tobacco	222
	Manufacture of hookah tobacco	223
	Manufacture of snuff	224
	Manufacture of jerda and other chewing tobacco	225
	Manufacture of other tobacco products	226
23	*Textile-Cotton*	
	Cotton ginning, cleaning, pressing and baling	230
	Cotton spinning (other than in mills)	231
	Cotton spinning and weaving in mills	232
	Cotton dyeing, bleaching	233
	Cotton weaving in power looms	234
	Cotton weaving in handlooms	235
	Manufacturing of khadi textile in handlooms	236
	Printing of cotton textile	237
	Manufacturing of cotton nets	238
	Manufacturing of cotton, cordage, rope and twine	239
24	*Textile-Jute*	
	Jute pressing and baling	240
	Jute spinning and weaving	241
	Dyeing and bleaching of jute	242
	Printing of jute textile	243
	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta	244
25	*Textile-Wool*	
	Wool baling and pressing	250
	Wool cleaning and processing (scouring)	251
	Wool spinning and weaving in mill	252
	Wool spinning other than in mills	253

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups—*Contd.*

Major Group (Code)	Description	Minor Group (Code)
25	*Textile-Wool*—Concld.	
	Wool weaving in power loom	254
	Wool weaving in handloom	255
	Embroidery and art work in woollen textiles	256
26	*Textile-Silk*	
	Spinning and weaving of silk textile in mill	260
	Dyeing and bleaching of silk	261
	Spinning of silk other than in mills	262
	Weaving of silk textile by power loom	263
	Weaving of silk textile by handloom	264
	Printing of silk textile	265
	Manufacture of silk cordage, rope and twine	266
27	*Textile-Miscellaneous*	
	Manufacture of carpet and all other similar type of textile products	270
	Manufacture of hosiery and other knitted fabrics and garments	271
	Embroidery and making of crepe lace and fringes	272
	Making of textile garments including raincoats and headgear	273
	Manufacture of made up textile goods except wearing apparel such as curtains pillow cases, bedding materials, mattress, textile bags	274
	Manufacture of waterproof textile products such as oil cloth, tarpaulin	275
	Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling	276
	Manufacture of coir and coir products	277
	Manufacture of umbrellas	278
	Processing and manufacture of textile products not covered above	279
28	*Manufacture of Wood and Wooden Products*	
	Sawing and planing of wood	280
	Manufacture of wooden furniturć and fixtures	281
	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows	282
	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures	283
	Manufacture of other wooden products such as utensils, toys, artwares	284
	Manufacture of veneer and plywood	285
	Manufacture of plywood products such as tea chest	286
	Manufacture of boxes and packing cases other than plywood	287
	Manufacture of materials from cork, bamboo, cane, leaves and other allied products	288
	Manufacture of other wood and allied products not covered above	289
29	*Paper and Paper Products*	
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board in mill	290
	Manufacture of pulp from wood, rags, wastepaper and other fibres and the conversion of such pulp into any kind of paper and paper board handmade	291
	Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from paper, paper board and pulp	292
30	*Printing and Publishing*	
	Printing and publising of newspapers and periodicals	300
	Printing and publishing of books	301

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups—*Contd.*

Major Group (Code)	Description	Minor Group (Code)
30	*Printing and Publishing*—Concld.	
	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry	302
	All types of binding, stitching, sizing and other allied work connected with binding industry	303
31	*Leather and Leather Products*	
	Currying, tanning and finishing of hides and skins and preparation of finished leather	310
	Manufacture of shoes and other leather footwear	311
	Manufacture of clothing and wearing apparel (except footwear) made of leather and fur	312
	Manufacture of leather products (except those covered by Code Nos. 311, 312) such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles	313
	Repair of shoes and other leather footwear	314
	Repair of all other leather products except footwear	315
32	*Rubber, Petroleum and Coal Products*	
	Manufacture of tyres and tubes	320
	Manufacture of rubber footwear	321
	Manufacture of rubber goods used for industrial purpose	322
	Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat	323
	Production of petroleum, kerosene and other petroleum products in petroleum refineries	324
	Production of coaltar and coke in coke oven	325
	Manufacture of other coal and coaltar products not covered elsewhere	326
33	*Chemicals and Chemical Products*	
	Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified	330
	Manufacture of dyes, paints, colours and varnishes	331
	Manufacture of fertilizers	332
	Manufacture of ammunition, explosives and fire works	333
	Manufacture of matches	334
	Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other toilet preparations except soap	335
	Manufacture of soap and other washing and cleaning compounds	336
	Manufacture of turpentine, synthetic resin, and plastic products and materials (including synthetic rubber)	337
	Manufacture of common salt	338
	Manufacture of other chemicals and chemical products not covered above (including inedible oils and fats)	339
34–35	*Non-metallic Mineral Products other than Petroleum and Coal*	
	Manufacture of structural clay products such as bricks, tiles	340
	Manufacture of cement and cement products	341
	Manufacture of lime	342
	Manufacture of structural stone goods, stone dressing and stone crushing	343
	Manufacture of stonewares, other than images	344
	Manufacture of stone images	345

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups—*Contd.*

Major Group (Code)	Description	Minor Group (Code)
34–35	*Non-metallic Mineral Products other than Petroleum and Coal*—Concld.	
	Manufacture of plaster of paris and its products	346
	Manufacture of asbestos products	347
	Manufacture of mica products	348
	Manufacture of earthenware and earthen pottery	350
	Manufacture of chinaware and crockery	351
	Manufacture of porcelain and its products	352
	Manufacture of glass bangles and beads	353
	Manufacture of glass apparatus	354
	Manufacture of earthen image, busts and statues	355
	Manufacture of earthen toys and artwares except those covered by Code No. 355	356
	Manufacture of glass and glass products except optical and photographic lenses and glass products covered above	357
	Manufacture of other non-metallic mineral products not elsewhere specified	359
36	*Basic Metals and their Products except Machinery and Transport Equipment*	
	Manufacture of iron and steel including smelting, refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods	360
	Manufacture including smelting, refining of non-ferrous metals and alloys in basic forms	361
	Manufacture of armaments	362
	Manufacture of structural steel products such as joist, rail, sheet, plate	363
	Manufacture of iron and steel furniture	364
	Manufacture of brass and bell metal products	365
	Manufacture of aluminium products	366
	Manufacture of metal products (other than of iron, brass, bell metal and aluminium) such as tin can	367
	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products	368
	Manufacture of sundry hardwares such as G. I. pipe, wire net, bolt, screw, bucket, cutlery. (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in Major Groups 36, 37, 38, and 39)	369
37	*Machinery (All kinds other than Transport) and Electrical Equipment*	
	Manufacture and assembling of machinery (other than electrical) except textile machinery	370
	Manufacture and assembling of prime mover and boilers, other than electrical equipment such as diesel engines, road rollers, tractors	371
	Manufacture of machine tools	372
	Manufacture of textile machinery and accessories	373
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups—*Contd.*

Major Group (Code)	Description	Minor Group (Code)
38	*Transport Equipment*	
	Manufacture, assembling and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by Code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aero-engines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles	389
39	*Miscellaneous Manufacturing Industries*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountainpen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399
	DIVISION 4—CONSTRUCTION	
40	*Construction*	
	Construction and maintenance of buildings including erection, flooring, decorative constructions, electrical and sanitary installations	400
	Construction and maintenance of roads, railways, bridges, tunnels	401
	Construction and maintenance of telegraph and telephone lines	402
	Construction and maintenance of water ways and water reservoirs such as bund embankments, dam, canal, tank, tube-wells, wells	403
	DIVISION 5—ELECTRICITY, GAS, WATER AND SANITARY SERVICES	
50	*Electricity and Gas*	
	Generation and transmission of electric energy	500
	Distribution of electric energy	501
	Manufacture of gas in gas works and distribution to domestic and industrial consumers	502
51	*Water Supply and Sanitary Services*	
	Collection, purification and distribution of water to domestic and industrial consumers	510
	Garbage and sewage disposal, operation of drainage system and all other types of work connected with public health and sanitation	511

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups—*Contd.*

Major Group (Code)	Description	Minor Group (Code)
DIVISION 6—TRADE AND COMMERCE		
60-63	*Wholesale Trade*	
	Wholesale trading in cereals and pulses	600
	Wholesale trading in vegetables, fruits sugar, spices, oil, fish, dairy products, eggs, poultry and other foodstuffs (not covered elsewhere)	601
	Wholesale trading in all kinds of fabrics, and textiels products such as garments, hessian, gunny bag, silk and woollen yarn, shirting, suiting, hosiery products	602
	Wholesale trading in beverages, such as tea (leaf), coffee (seed and powder), aerated water	603
	Wholesale trading in intoxicants such as wines, liquors	604
	Wholesale trading in other intoxicants such as opium, ganja, etc.	605
	Wholesale trading in tobacco, bidi, cigarettes and other tobacco products	606
	Wholesale trading in animals	607
	Wholesale trading in straw and fodder	608
	Wholesale trading in medicines and chemicals	610
	Wholesale trading in fuel and lighting products such as coke, coal, kerosene, candle	611
	Wholesale trading in toilets, perfumery and cosmetics	612
	Wholesale trading in metal, porcelain and glass utensils, crockery, chinaware	613
	Wholesale trading in wooden, steel and other metallic furniture and fittings	614
	Wholesale trading in footwear	615
	Wholesale trading in tyres, tubes and allied rubber products	616
	Wholesale trading in petrol, mobil oil and allied products	617
	Wholesale trading in other household equipment not covered above	618
	Wholesale trading in bricks, tiles and other building materials	620
	Wholesale trading in wood, bamboo, cane, thatches and similar products	621
	Wholesale trading in paper and other stationery goods	630
	Wholesale trading in agricultural and industrial machinery equipment and tools and appliances other than electrical	631
	Wholesale trading in electrical machinery and equipment like motor, battery, electric fan, bulb	632
	Wholesale trading in all kinds of transport and storage equipment	633
	Wholesale trading in skins, leather and fur	634
	Wholesale trading in clocks, eye glasses, frames	635
	Wholesale trading in hardware and sanitary equipment	636
	Wholesale trading in scientific, medical and surgical instruments	637
	Wholesale trading in precious metals and stones, gold and silverwares and jewellery	638
	Wholesale trading in all goods not covered above	639
64-68	*Retail Trade*	
	Retail trading in cereals, pulses, vegetables, fruits, sugar, spices, oil, fish, dairy products, eggs, poultry	640
	Retail trading in beverages such as tea (leaf), coffee (seed and powder), aerated water	641
	Retail trading in intoxicants such as wines, liquors	642
	Retail trading in other intoxicants such as opium, ganja, etc.	643

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups—*Contd.*

Major Group (Code)	Description	Minor Group (Code)
64-68	*Retail Trade*—Contd.	
	Retail trading in tobacco, bidi, cigarettes and other tobacco products	644
	Retail trading in fuel such as coke, coal, firewood and kerosene	645
	Retail trading in foodstuffs like sweetmeat, condiments, cakes, biscuits, etc.	646
	Retail trading in animals	647
	Retail trading in straw and fodder	648
	Retail trading in fibres, yarns, dhoti, saree, readymade garments of cotton, wool, silk and other textiles and hosiery products; (this includes retail trading in piecegoods of cotton, wool, silk and other textiles)	650
	Retail trading in toilet goods, perfumes and cosmetics	651
	Retail trading in medicines and chemicals	652
	Retail trading in footwear, headgear such as hat, umbrella, shoes and chappals	653
	Retail trading in tyres, tubes and allied rubber products	654
	Retail trading in petrol, mobil oil and allied products	655
	Retail trading in wooden, steel and other metallic furniture and fittings	660
	Retail trading in stationery goods and paper	661
	Retail trading in metal, porcelain and glass utensils	662
	Retail trading in earthenware and earthen toys	663
	Retail trading in other household equipment not covered above	664
	Retail trading in bricks, tiles and other building materials	670
	Retail trading in hardware and sanitary equipment	671
	Retail trading in wood, bamboo, cane, bark and thatches	672
	Retail trading in other building materials	673
	Retail trading in agricultural and industrial machinery equipment, tools and appliances	680
	Retail trading in transport and storage equipments	681
	Retail trading in electrical goods like electric fan, bulb, etc.	682
	Retail trading in skins, leather and furs and their products excluding footwear and headgear	683
	Retail trading in clock and watch, eye glass, frame	684
	Retail trading in scientific, medical and surgical instruments	685
	Retail trading in precious stones and jewellery	686
	Retail trading in musical instruments, gramophone record, pictures and paintings including curio dealing	687
	Book-selling	688
	Retail trading in goods unspecified	689
69	*Trade and Commerce Miscellaneous*	
	Importing and exporting of goods and commodities	690
	Real estate and properties	691
	Stocks, shares and futures	692
	Providents and insurances	693
	Money lending (indigenous)	694
	Banking and similar type of financial operation	695
	Auctioneering	696
	Distribution of motion pictures	697
	All other activities connected with trade and commerce not covered above, including hiring out of durable goods such as electric fan, microphone, rickshaw, etc.	699

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups—*Contd.*

Major Group (Code)	Description	Minor Group (Code)
DIVISION 7—TRANSPORT, STORAGE AND COMMUNICATIONS		
70-71	*Transport*	
	Transporting by railways	700
	Transporting by tramway and bus service	701
	Transporting by motor vehicles (other than omnibus)	702
	Transporting by road through other means of transport such as hackney carriage, bullock cart, ekka	703
	Transporting by animals such as horses, elephant, mule, camel	704
	Transporting by man such as carrying of luggage, hand cart driving, rickshaw pulling, cycle rickshaw driving	705
	Transporting by boat, steamer, ferry, etc., by river, canal	706
	Transporting by boat, steamer, ship, cargo boat by sea or ocean	707
	Transporting by air	708
	Transporting by other means not covered above	709
	Services incidental to transport such as packing, carting travel agency	710
72	*Storage and Ware Housing*	
	Operation of storage such as warehouses	720
	Operation of storage such as cold storage	721
	Operation of storage of other type	722
73	*Communications*	
	Postal, telegraphic, wireless and signal communications	730
	Telephone communication	731
	Information and broadcasting	732
DIVISION 8—SERVICES		
80	*Public Services (This does not include Govt., Quasi Govt., or local body activities, other than administrative, in such fields as transport, communication, information and broadcasting, education and scientific services, health, industries, production, construction, marketing and operation of financial institution each of which is classified in the appropriate industry groups)*	

Major Group (Code)	Description	Minor Group (Code)
DIVISION 8—SERVICES—*Contd.*		
	Public Services in Union and State army including territorial corps and volunteer corps	800
	Public service in Navy	801
	Public service in Air Force	802
	Public service in Police	803
	Public service in administrative departments and offices of Central Government	804
	Public service in administrative departments and offices of quasi-government organisation, municipalities, local boards, etc.	805
	Public service in administrative departments and offices of State Governments.	809
81	*Educational and Scientific Services*	
	Educational services such as those rendered by technical colleges, technical schools and similar technical and vocational institutions	810
	Educational services such as those rendered by colleges, schools and similar other institutions of non-technical type	811
	Scientific services and research institutions not capable of classification under any individual group	812
82	*Medical and Health Services*	
	Public health and medical services rendered by organisations and individuals such as by hospitals, sanatoria, nursing homes, maternity and child welfare clinic as also by hakimi, unani, ayurvedic, allopathic and homeopathic practitioners	820
	Veterinary services rendered by organisations and individuals	821
83	*Religious and Welfare Services*	
	Religious services rendered by religious organisations and their establishments maintained for worship or promotion of religious activities; this includes missions, ashrams and other allied organisations	830

Standard Industrial Classification showing the Divisions, Major Groups and Minor Groups—*Concld.*

Major Group (Code)	Description	Minor Group (Code)
83	*Religious and Welfare Services*—Concld.	
	Religious and allied services rendered by pandit, priest, preceptor, fakir, monk	831
	Welfare services rendered by organisations operating on a non-profit basis for the promotion of welfare of the community such as relief societies, red-cross organisation for the collection and allocation of contributions for charity	832
84	*Legal Services*	
	Legal services rendered by barrister, advocate, solicitor, mukteer, pleader, mukurie, munshi	840
	Matrimonial services rendered by organisations and individuals	841
85	*Business Services*	
	Engineering services rendered by professional organisations or individuals	850
	Business services rendered by organisation of accountants, auditors, book-keepers or like individuals	851
	Business services rendered by professional organisations or individuals such as those of advertising and publicity agencies	852
	Business services rendered by professional organisations or individuals such as of those rendered by news agency, news paper correspondent, columnist, journalists, editors, authors	853
86	*Community Services and Trade and Labour Associations*	
	Services rendered by trade associations, chambers of commerce, trade unions and similar other organisations	860
	Services rendered by civic, social, cultural, political and fraternal organisations such as rate payers, association, club, library	861
	Community services such as those rendered by public libraries, museums, botanical and zoological gardens, etc.	862
87	*Recreation Services*	
	Production of motion picture and allied services such as processing editing, etc.	870
	Recreation services rendered by cinema houses by exhibition of motion pictures	871
	Recreation services rendered by organisations and individuals such as those of theatres, opera companies, ballet and dancing parties, musicians, exhibitions, circus, carnivals	872
	Recreation services rendered by indoor and outdoor sports by organisations and individuals including horse, motor, racing etc.	873
88	*Personal Services*	
	Services rendered to housholds such as those by domestic servants, cooks	880
	Services rendered to households such as those by governess, tutor, private secretary	881
	Services rendered by hotels, boarding houses, eating houses, cafes, restaurants and similar other organisations to provide lodging and boarding facilities	882
	Laundry services rendered by organisations and individuals, this includes all types of cleaning, dyeing, bleaching, dry cleaning services	883
	Hair dressing, other services rendered by organisations and individuals such as those by barber, hairdressing saloon and beauty shops	884
	Services rendered by portrait and commercial photographic studios	885
89	*Services (not elsewhere classified)*	
	Services rendered by organisations or individuals not elsewhere classified	890
	DIVISION 9—ACTIVITIES NOT ADEQUATELY DESRIBED	
90	*Activities unspecified and not adequately described including activities of such individuals who fail to provide sufficient information about their industrial affiliation to enable them to be classified*	900

TABLE B-I

WORKERS AND NON-WORKERS CLASSIFIED BY SEX AND BROAD AGE-GROUPS

District	Total Rural Urban	Age-group	Total Population			Workers							
						Total Workers (I–IX)		I As Cultivator		II As Agricultural Labourer		III In Mining, Quarrying Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

EXPLANATORY NOTE

C-SERIES

SOCIAL AND CULTURAL TABLES

Social and Cultural Tables prepared at the 1961 Census give information relating to the composition of Sample Households, Age, Sex, Marital Status, Education, Mother-Tongue, Bilingualism and Religion of general population and also about Scheduled Castes and Scheduled Tribes classified by Literacy and Industrial Category of Workers. The data are presented in eight Tables as indicated below :

C-I Composition of Sample Households by relationship to head of family classified by size of land cultivated

C-II Age and Marital Status

C-III Age, Sex and Education

Part A-All areas

Part B-Urban areas

Part C-Rural areas

C-IV Single Year Age Returns

C-V Mother-Tongue (in alphabetical order)

C-VI Bilingualism

C-VII Religion

C-VIII Scheduled Castes and Scheduled Tribes classified by literacy and Industrial Category of Workers and Non-Workers

Part A-Classification by literacy and Industrial Category of Workers and Non - Workers *among Scheduled Castes*

Part B-Classification by literacy and Industrial Category of Workers and Non - Workers *among Scheduled Tribes*

All the above Tables pertaining to Visakhapatnam district except Tables C-IV Single Year Age Returns and C-VI Bilingualism are reproduced in this book.

TABLE C-I COMPOSITION OF SAMPLE HOUSEHOLDS BY RELATIONSHIP TO HEAD OF FAMILY CLASSIFIED BY SIZE OF LAND CULTIVATED

This Table, prepared on a 20% sample basis from the Household Schedules filled in at the time of enumeration, gives the composition of Households, separately for total, rural and urban areas in the district. The Households in the rural areas are further classified into 3 economic categories *viz.*, (i) Households engaged neither in cultivation nor in Household Industry (ii) Households engaged in Household Industry only and, (iii)Households engaged in Cultivation. In respect of the third category of Households the data are furnished separately for each of the eleven classes of Households according to the size of land cultivated *viz.*, (i) Less than one acre, (ii) 1.0-2.4 acres, (iii) 2.5-4.9 acres, (iv) 5.0-7.4 acres, (v) 7.5-9.9 acres, (vi) 10.0-12.4 acres, (vii) 12.5-14.9 acres, (viii) 15.0-29.9 acres, (ix) 30.0-49.9 acres, (x) 50.0 + acres and (xi) Size of holding unspecified. The composition of the households is given in terms of the heads of households, spouses of heads of households, married sons and other married relations, other relations and unrelated persons. This Table will thus indicate the strength of the joint family system and will, therefore, be of sociological interest.

TABLE C-II AGE AND MARITAL STATUS

This Table prepared on full count gives the distribution of population both by Age-groups and Marital Status separately for total, rural and urban population in the district, and for the rural population in each for taluks and of the Visakhapatnam City. This is a very important demographic Table. A comparison of the data in this Table with corresponding data pertaining to the last Census will give an indication of mortality in different Marital Status and also in different Age-groups. The Age-groups *viz.*, 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70 + and Age not stated adopted in this Table conform to international requirements. Age-group 0-9 is automati-

cally treated as 'Never Married' for the purpose of this Table. The proportion of increase or decrease in the various Marital Status since the last Census and the trends in the age of marriage can be studied from this Table. From the data of married females by Age-groups given under column 9 of this Table the future birth rates can also be forecast.

TABLE C-III AGE, SEX AND EDUCATION

This Table gives the distribution of total population by broad Educational Levels, Sex and by broad Age-groups. This Table is divided into three parts.

Part A relates to all areas while *Part B* and *Part C* relate only to urban and rural areas respectively. The educational levels given for all areas and rural areas in *Part A* and *Part C* are the same while in respect of urban areas in *Part B* more detailed educational levels have been adopted. These educational levels are the same as those adopted in Table B-III for the Industrial Classification of Workers and Non-Workers by educational levels. This Table is useful in ascertaining the growth of literacy in the total population as well as in the different Age-groups since the last Census.

TABLE C-V-MOTHER-TONGUE

This Table exhibits separately for the total, rural and urban population of the district and only for the rural population of each taluk and urban population of Visakhapatnam City the number of persons, males and females speaking a particular language as Mother-Tongue. The languages returned at this Census are given in this Table in an alphabetical order.

'Mother-Tongue' is the language spoken in childhood by the person's mother to the person or mainly spoken in the Household. If the mother died in infancy then the language mostly spoken in the Household is the Mother-Tongue. In the case of infants and deaf mutes the Mother-Tongue is the language usually spoken by the mother.

This Table is very important in view of the large number of languages and dialects spoken in the country and will be of great assistance for ensuring the implementation of the various safeguards granted to the linguistic minorities under the Constitution.

TABLE C-VII RELIGION

This Table gives separately the distribution of total, rural and urban population of the district and rural population only of taluks and of Visakhapatnam City according to Religion. In Censuses earlier to 1941 the practice was to show the distribution of population Religion-wise down to the village level. Since the 1951 Census this practice has been discontinued.

TABLE C-VIII SCHEDULED CASTES AND SCHEDULED TRIBES

Part A-Classification by literacy and Industrial Category of Workers and Non-Workers *among Scheduled Castes*

Part B-Classification by literacy and Industrial Category of Workers and Non-Workers *among Scheduled Tribes*

This is a general Table prepared for Scheduled Castes and Scheduled Tribes only and gives separately the total population of Scheduled Castes and Scheduled Tribes and their distribution by literacy and by classification of Workers into different Industrial Categories and the total number of Non-Workers. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This is the first time that the number of literates among the Scheduled Castes and Scheduled Tribes are given separately. In addition to this Table some more Special Tables for Scheduled Castes and Scheduled Tribes pertaining to Visakhapatnam district have also been prepared and incorporated in this book under the series "SCT TABLES."

TABLE C-I

EXPLANATORY NOTE

D-SERIES

MIGRATION TABLES

The Tables in this series show the migration trends analysed on the basis of the results of the 1961 Census. The data are presented in the following seven Tables, which are printed upto district level and for all Cities and Town-Groups in the publication "Census of India 1961-Volume II-Andhra Pradesh-Part II-C-Cultural and Migration Tables" and these may be referred to for details.

D-I Non-Indian Nationals

D-II Place of Birth

D-III Migrants classified by place of birth and duration of residence in place of enumeration

D-III A Migrants from other States and outside India (less than 5 years duration) classified by Age-groups.

D-IV Migrants to Cities classified by Sex, broad Age-groups, Educational levels and in case of Workers also by occupational Divisions and Groups

D-V Cities showing population born locally, migrants from Rural areas and migrants from other Towns and Cities

D-VI Distribution of Industrial categories of Workers and Non-Workers by place of birth

In this Hand Book only Tables D-I and D-II showing the Non-Indian Nationals and other migrants in Visakhapatnam district are reproduced.

TABLE D-I-NON-INDIAN NATIONALS

This Table shows the number of Non-Indian Nationals sex-wise in the district. The Non-Indian Nationals for the purpose of presentation of the data have been broadly classified into five groups *viz.*,

(i) Nationals of Countries in Asia beyond India (including U.S.S.R.)

(ii) Nationals of Countries in Europe (excluding U.S.S.R.)

(iii) Nationals of Countries in Africa

(iv) Nationals of Countries in two Americas

(v) Nationals of Countries in Oceania.

The name of the country of which the person is a National is given separately under each group. The persons who have not recorded any Nationality have been shown separately. Nationals of Goa, Diu, Daman and Pondicherry have been treated as 'Born in India'.

TABLE D-II—PLACE OF BIRTH

This Table prepared as in all previous Censuses gives the distribution of population by birth place. The data are presented both by the place of enumeration and by the place of birth classified separately into Rural and Urban areas. An important change in the presentation of the data at the present Census is that the place of birth has been classified separately as Rural and Urban. This two fold representation of the data enables one to study the migration trends not only within the district and from outside the district but also from Rural to Urban areas and *vice-versa*.

EXPLANATORY NOTE

E-SERIES

HOUSING TABLES

The Tables in this series give information on Housing. At the present Census when House numbering was done a few months before the general Census enumeration, the various particulars relating to each Census House were collected on a standardised All India Schedule called the 'House List' which is reproduced below:

CENSUS OF INDIA 1961
HOUSE LIST

Name of district .....(Code No.....)
Name of Island / Taluk / Tehsil / Thana / Anchal / Town.....(Code No .....)
Name of Village / Ward / Mohalla / Enumerator's Block.....(Code No.....)

Line No.	Building number (Municipal or local authority or Census Number, if any,	Building Number (Col 2) with sub-numbers for each Census House	Purpose for which Census House used, e.g. dwelling, shop, shop-cum-dwelling, business, factory, workshop, school or other institution, jail, hostel, hotel *etc.*	If the Census House is used as an establishment, workshop or factory			
				Name of establishment or proprietor	Name of product (s), repair or servicing undertaken	Average No. of pesons employed daily last week (including proprietor or household members, if working)	Kind of fuel or power if machinery is used
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

Description of Census House		Sub-numbers of each Census Household with Census House number (Column 3)	Name of head of Household	No of rooms in Census Household	Does the Household live in own or rented house? (a) Own (O), (b) Rented (R)	No. of persons residing in Census Household on day of visit			Remarks
Material of wall	Material of roof					Males	Females	Total	
(9)	(10)	(11)	(12)	(13)	(14)	(15)	(16)	(17)	(18)

The data have been collected uniformly for the first time at the present Census in the above form and are presented in the following five Tables.

E-I Census Houses and the uses to which they are put

E-II Tenure Status of Sample Census Households living in Census Houses used wholly or partly as dwelling

E-III Census Houses used as factories and workshops classified by Industry, *power* and *no power* used and size of employment

E-IV Distribution of Sample Households living in Census Houses used wholly or partly as dwellings by predominant material of wall and predominant material of roof

E-V Sample Households classified by number of members and by number of rooms occupied

All the above Tables give information upto taluk level, except Table E-*III* which contains figures upto the district level only, and also in respect of towns having a population of 50,000 and more and are reproduced in the publication "Census of India, 1961, Vol. II-Andhra Pradesh, Part IV-B-Housing and Establishment Tables" and it may be referred to for full details. In this Hand Book only "Table E-I Census Houses and the uses to which they are put" pertaining to the Visakhapatnam district is reproduced.

TABLE E-I—CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

This Table shows the number of Census Houses and the different uses to which they are put. The data are given down to taluk level and also for towns having a population of 50,000 and more; the data are presented separately for Total, Rural and Urban areas.

A "Census House" is defined in the present Census as a structure, or a part of a structure inhabited or vacant, or a dwelling, or a shop-*cum*-dwelling, or a place of business, workshop, school *etc.*, with a separate entrance. If a building has a number of flats or blocks which have separate entrance of their own and are independent of each other giving on the road or a common stair case, or a common courtyard, leading to a main gate, they are considered as separate Census Houses. If within an enclosed or open compound there are separate buildings then each such building is treated as a separate Census House. If all the structures within an enclosed compound are together treated as one building then each structure with separate entrance is treated as a separate Census House.

TABLE E–I

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

District/Taluk/ Town with population of 50,000 or more	Total Rural Urban	Total No. of Census Houses	Census Houses vacant at the time of House-listing	Occupied Census Houses Used as											
				Dwellings	Shop-*cum*-dwellings	Workshop-*cum*-dwellings	Hotels, sarais, dharma-shalas, tourist homes and inspection houses	Shops excluding eating houses	Business houses and offices	Factories work-shops and work-sheds	Schools and other educational institutions including training classes, coaching and shop classes	Restaurants, sweet-meat shops and eating places	Places of entertainment and Community gathering (Panchayat Ghar)	Public Health and Medical institutions, Hospitals, Health Centres, Doctor's Clinics, Dispensaries *etc.*	Others

EXPLANATORY NOTE

SCT-SERIES

SPECIAL TABLES FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This series of special Tables for Scheduled Castes and Scheduled Tribes gives the population of each Scheduled Caste, and Scheduled Tribe classified by Religion, Age, Marital Status, Education and distributed by Industrial Categories of Workers and Non-Workers adopted in Table B-I. After the 1931 Census, the population figures of individual Scheduled Castes and Scheduled Tribes are being given only at the present Census. The data are presented in the following five Tables:

SCT-I	Industrial Classification of persons at Work and Non-Workers by sex for Scheduled Castes and Scheduled Tribes
SCT-II	Age and Marital Status for Scheduled Castes and Scheduled Tribes
SCT-III	Education in Urban and Rural areas for Scheduled Castes and Scheduled Tribes
SCT-IV	Religion for Scheduled Castes and Scheduled Tribes
SCT-V	Sample Households engaged in Cultivation classified by interest in land and size of land cultivated *in Rural areas only* for Scheduled Castes and Scheduled Tribes

All the above Tables except Table SCT-IV are reproduced upto district level in this Hand Book.

Besides the above five Tables, the following three Special Tables, relating to either Scheduled Castes or Scheduled Tribes exclusively are reproduced.

SC-I	Persons not at work classified by sex, type of activity and educational levels for *Scheduled Castes*
ST-I	Mother-Tongue and Bilingualism for *Scheduled Tribes*
ST-II	Persons not at work classified by sex and type of activity for *Scheduled Tribes*

These three Special Tables are also reproduced upto district level. The figures for Narasapatnam, Chintapalle, Paderu, Chodavaram and Srungavarapukota taluks are also given in respect of Scheduled Tribes as they constitute a larger proportion in these taluks than the State average.

In view of the safeguards provided in the Constitution for these communities, the Tables in this series will be of much use and guidance, especially when the Government are taking measures for the improvement of the condition of these comunities by suitable welfare schemes under the Five Year Plans. The total Scheduled Castes and Scheduled Tribes population is given talukwise separately for Total, Rural and Urban areas and for each Town under the State Primary Census Abstract. The Villagewise particulars are given under Village Directory.

The Scheduled Castes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule I of the Scheduled Castes and Scheduled Tribes lists (Modification) Order, 1956, published in the Notification of the Ministry of Home Affairs, New Dehli, dated 29th October, 1956. The list of Scheduled Castes in Andhra Pradesh is given below:

Note: Scheduled Castes are recognised only amongst Hindus and Sikhs. Converts to other religions such as Christianity or Islam or Buddhism cease to belong these castes.

(1) Throughout the State:

1 Chalavadi
2 Chamar, Mochi or Muchi
3 Madiga
4 Mala

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda districts:

1 Adi Andhra
2 Adi Dravida
3 Arundhatiya
4 Dariki
5 Bavuri
6 Chachati
7 Chandala
8 Dandasi

9 Dom, Dombara, Paidi or Pano
10 Ghasi, Haddi or Relli Chachandi
11 Godagali
12 Godari
13 Gosangi
14 Jaggali
15 Jambuvulu
16 Madasi Kuruva or Madari Kuruva
17 Mala Dasu
18 Madiga Dasu and Mashteen
19 Matangi
20 Mundala
21 Paky or Moti
22 Pambada or Pambanda
23 Pamidi
24 Panchama or Pariah
25 Relli
26 Samban
27 Sapru
28 Thoti

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda:

1 Anamuk
2 Aray (Mala)
3 Arwa Mala
4 Beda (Budga) Jangam
5 Bindla
6 Byagara
7 Chambhar
8 Dakkal (Dokkalwar)
9 Dhor
10 Ellamalwar (Yellamalawandlu)
11 Holeya
12 Holeya Dasari
13 Kolupulvandlu
14 Mahar
15 Mala Dasari
16 Mala Hannai
17 Malajangam
18 Mala Masti
19 Mala Sale (Netkani)
20 Mala Sanyasi
21 Mang
22 Mang Garodi
23 Manne
24 Mashti
25 Mehtar
26 Mitha Ayyalvar
27 Samagara
28 Sindhollu (Chindollu)

The Scheduled Tribes in Andhra Pradesh are those listed in Part I under "Andhra Pradesh" to Schedule III of the Scheduled Castes and Scheduled Tribes listed (Modification) Order, 1956 published in the same Notification of the Ministry of Home Affairs, New Delhi, dated 29th October, 1956. The list of Scheduled Tribes in Andhra Pradesh is given below:

NOTE: Members of Scheduled Tribes may belong to any Religion

(1) Throughout the State:

1 Chenchu or Chenchwar
2 Koya or Goud with its subsects-Rajah or Rasha Koyas, Lingadhari Koyas (Ordinary), Kottu Koyas, Bhine Koya and Rajkoya

(2) Throughout the State except Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khamam and Nalgonda districts:

1 Bagata
2 Gadabas
3 Jatapus
4 Kammara
5 Kattunayakan
6 Konda Dhoras
7 Konda Kapus
8 Konda Reddis
9 Kondhs (Kodi and Kodhu), Desaya Kondhs, Dongria Kondhs, Kuttiya Kondhs, Tikiria Kondhs and Yenity Kondhs
10 Kotia-Bentho-Oriya, Bartika, Dhulia or Dulia, Holva, Paiko, Putiya Sanrona and Sidhopaiko
11 Kulia
12 Malis
13 Manna Dhora
14 Mukha Dhora or Nooka Dhora
15 Porja (Parangiperja)
16 Reddi Dhoras
17 Rona, Rena
18 Savaras-Kapu Savaras, Maliya Savaras or Khutto Savaras
19 Sugalis (Lambadis)
20 Yenadis
21 Yerukulas

(3) In the districts of Hyderabad, Mahbubnagar, Adilabad, Nizamabad, Medak, Karimnagar, Warangal, Khammam and Nalgonda

1 Andh
2 Bhil
3 Gond (including Naikpod and Rajgond)
4 Hill Reddis
5 Kolam (including Mannervarlu)
6 Pardhan
7 Thoti

(4) In the Agency tracts:

1 Goudu (Goud)
2 Nayaks
3 Valmiki

As would be clear from the Tables, not all the above Castes and Tribes, will be found in all the taluks of the district.

An abstract of the total Scheduled Castes and Scheduled Tribes population in Visakhapatnam district and its percentage to the total general population is given talukwise in the statement below:

Name of the District/Taluk	Total Rural Urban	General Population	Scheduled Castes population together with percentage to general population	Scheduled Tribes population together with percentage to general population
(1)	(2)	(3)	(4)	(5)
VISAKHAPATNAM DISTRICT	T	2,290,759	185,046 (8.08)	213,820 (9.33)

TABLE SCT-I INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for the rural and urban areas of the district, the population of each Scheduled Caste and Scheduled Tribe classified by Industrial Category of persons at Work and Non-Workers by sex.

The Table is divided into two parts. *Part A* relates to Scheduled Castes while *Part B* relates to Scheduled Tribes. This Table is important as it gives the strength of each of the Scheduled Castes and Scheduled Tribes, the working population among them and the sector of Industry in which the working population is engaged. The data are presented for the rural and urban areas separately.

TABLE SCT-II AGE AND MARITAL STATUS FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows for each Scheduled Caste and Scheduled Tribe the total population by Age and Marital Status. This Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. This Table corresponds to Table C-II for the total population; however the Age-groups are restricted to 0-14, 15-44, 45+ and Age not stated only in both the parts of this Table. This Table enables us to know the percentage of each of Scheduled Castes and Scheduled Tribes to the total population in the corresponding Age-group. Such communitywise data by Age and Marital Status for Scheduled Castes and Scheduled Tribes are being given for the first time at the present Census. The Age distribution and Marital status data will give an indication as to whether the population of a Caste/Tribe is growing or declining.

TABLE SCT-III EDUCATION IN RURAL AND URBAN AREAS ONLY FOR SCHEDULED CASTES AND SCHEDULED TRIBES

This Table shows the literacy and educational levels for each Scheduled Caste and Scheduled Tribe separately for rural and urban areas. This Table divided into *Part A (i)* and *Part A (ii)* relating to the Scheduled Castes and Scheduled Tribes respectively in urban areas and *Part B (i)* and *Part B (ii)* relating to the Scheduled Castes and Scheduled Tribes respectively in rural areas. In the Case of urban areas the educational levels adopted for giving the data are the same as those adopted in Table B-III *Part A* and in the case of rural areas the data are given as in Table B-III *Part B*. This Table, therefore, enables us to know the proportion of each of the Scheduled Castes and Scheduled Tribes among the total population in different literacy and educational levels.

TABLE SCT-V SAMPLE HOUSEHOLDS OF SCHEDULED CASTES AND SCHEDULED TRIBES ENGAGED IN CULTIVATION CLASSIFIED BY INTEREST IN LAND AND SIZE OF LAND CULTIVATED *IN RURAL AREAS ONLY*

This Table shows the Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in rural areas only, separately for Scheduled Castes and Scheduled Tribes. The Table is divided into two parts. *Part A* relates to Scheduled Castes and *Part B* relates to Scheduled Tribes. The sizes of land holdings and types of interest in land cultivated adopted in this Table are the same as those adopted in Table B-XI.

TABLE SC-I PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS *FOR SCHEDULED CASTES*

This Table shows persons belonging to the Scheduled Castes not at work classified by sex, type of activity *viz.*, fulltime students, persons seeking employment for the first time, persons employed before but now out of employment and seeking work and others, by educational levels. The broad educational levels adopted are illiterate, literate (without educational level), Primary or Junior Basic, Matriculation or Higher Secondary, and above Matriculation or Higher Secondary. This Table is prepared for total Scheduled Castes as a whole and not separately for each individual caste and the figures are exhibited for total, rural and urban population. This Table will be very useful as it clearly illustrates the extent to which the Scheduled Caste children have taken to education and it also helps to plan employment for the unemployed members of the Scheduled Castes.

TABLE ST-I MOTHER-TONGUE AND BILINGUALISM *FOR SCHEDULED TRIBES*

This Table shows exclusively the Scheduled Tribes classified by Mother-Tongue and subsidiary languages spoken by them. The data are given for the total, rural and urban areas in the district and for rural areas of Narasapatnam, Chintapalle, Paderu, Chodavaram, and Srungavarapukota taluks. The Scheduled Tribes have their own peculiar languages and dialects and this Table gives the language or dialect of each Tribe. In respect of the members of the Scheduled Tribes who have moved out of their homes and as a result of contact with the local population speak some other languages also, those subsidiary languages are also shown in this Table. The number of male and female speakers of the subsidiary language is indicated in brackets after the subsidiary language under column 7 of the Table.

TABLE ST-II PERSONS NOT AT WORK CLASSIFIED BY SEX AND TYPE OF ACTIVITY *FOR SCHEDULED TRIBES*

This Table shows for the district the persons not at work classified by sex and type of activity for each individual Scheduled Tribe. The types of activity under which the persons not at work are classified are the same as those adopted in Table SC-I *viz.*, full-time students, persons seeking employment for the first time, persons employed before but now out of employment and seeking work, and others. In this Table the particulars are given according to the individual Tribe while in Table SC-I similar particulars in respect of Scheduled Castes are given for Total Scheduled Castes as a whole by educational levels. The present Table, however, shows the number of unemployed persons in each individual Tribe without reference to the literacy levels.

This Table is presented for Narasapatnam, Chintapalle, Paderu, Chodavaram and Srungavarapukota taluks also which have a good proportion of Scheduled Tribes population exceeding the State's average.

PART D

VILLAGE AND TOWN DIRECTORY

EXPLANATORY NOTE

VILLAGE AND TOWN DIRECTORY

This Directory renders an account of each village, as also each ward and each Enumerator's Block of a town. It gives the Location Code Number and Name of each village/town, area of the village/town and where inhabited, the number of Occupied Residential Houses, Census Households, Total Population, Population of Scheduled Castes and Scheduled Tribes, Literate Population and Workers classified into the following nine Industrial Categories of Workers, and the Non-Workers:

I Cultivator

II Agricultural Labourer

III Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities

IV Household Industry

V Manufacturing other than Household Industry

VI Construction

VII Trade and Commerce

VIII Transport, Storage and Communications

IX Other Services; and

X Non-Workers

The data are presented talukwise, first for the rural portion in the "Village Directory" and next for the urban portion in the "Town Directory." In the Village Directory the villages have been arranged in the ascending order of the Location Code Numbers assigned to the villages within the taluk and in the Town Directory, in the ascending order of Location Code Numbers assigned to the towns in the taluk and also by each Ward and Enumerator's Block in the ascending order. The taluk map given at the beginning of the Village Directory of each taluk showing the Location Code Number of each village and town and other particulars will help the easy location of the villages.

In the Village Directory, villages uninhabited and villages that have been completely merged in towns have been indicated accordingly. In respect of villages which are partly included within the town limits and partly fall outside the town limits the particulars for that portion included in the town limits *i.e.*, 'Urban Portion' are clubbed with the particulars of the town and given in the Town Directory and for that portion outside the town limits *i.e.*, 'Rural Portion' the data are given in the Village Directory along with other villages. The term "Rural" is indicated immediately after the name of such villages to make the position clear. In the presentation of data for the towns the particulars have been exhibited in the ascending order of Municipal Wards or Blocks and also by Enumerators' Blocks and not according to the villages constituting the town. In order that each Enumerator's Block may be located, the jurisdiction of each Block *i.e.*, the houses covered by each Enumerator's Block in towns is indicated at the beginning of the Town Directory.

Under column 8 the area is given for the villages and towns in square miles based on the information furnished by the State Central Survey Office, the Tahsildars and by the Municipal authorities concerned. In respect of certain villages for which the area particulars are not available the abbreviation "N.A." has been recorded in this column. As the area of a taluk comprises not only the area of the villages but also the area of Reserved Forests *etc.*, within the taluk, the areas of all the villages put together may not be equal to the area of the taluk.

Under columns 9 to 41 the total population, Scheduled Castes and Scheduled Tribes population, literate population, total number of Workers under each of the nine categories and Non-Workers is given by sex for each village/town.

The taluk map found at the begining of the Village Directory of each taluk shows the boundaries of each village and town, the important roads and railway lines, the rivers, if any, in the taluk. In this map the location code number of each village is shown and the names of the towns and villages having more than 5,000 population, important tourist centres and places of great religious importance, *etc.*, if any, are given. Urban areas have been shown by shading the area covered. Uninhabited villages and villages of different sizes of population *i.e.*, below 2,000,

2,000—4,999, 5,000 and above, are distinguished by distinct designs. An alphabetical list of villages with the Census Location Code Numbers indicated against them is given after the taluk map and before the Village Directory. This list enables one to find out the Location Code Number of any village and thereafter to get the required particulars of the village from the Village Directory.

The information relating to Educational facilities, Medical and Public Health facilities, Drinking Water facilities, Communication and Transport facilitiles and Electrification is also given villagewise in this section for the first time besides the population data. These facilities are shown by symbols as explained below immediately after the names of the villages under columns 3 to 7.

(i) Educational facilities are shown by the following symbols under column 3:-

P : Primary School
M : Middle School
H : High School
C : Institutions of Higher Education including Colleges
T : Technical Institutions

(ii) Medical and Public Health facilities are shown by the following symbols under column 4 :—

D : Dispensaries
Rhc : Rural Health Centres or Primary Health Centres
Hos : Hospitals
Mcw: Maternity Child Welfare Centres

(iii) Drinking water facilities are shown by the following symbols under column 5 :—

S : Safe or protected water supply including Tube Wells etc.
W : Well
Tk: Tank
Riv: River
C : Cannal or Gedda
Sc: Spring Channel

(iv) Communications and Transport facilities are shown by the following symbols under column 6 :-

Po : Post Office
To : Telegraph Office or Public Call Office
Rh : Rest Houses and Choultries
R : Road
Rly : Railway

(v) Electrification facilities are shown by the following symbols under column 7 :—

E : Electricity
E(I) : Electricity in Industrial use
E(A): Electricity in Agricultural use
E(D): Electricity in Domestic use

Where figures like 5P, 2H *etc.*, occur they denote that the village or town has 5 Primary Schools, 2 High Schools *etc.*

Besides presenting the information relating to the above facilities in the Village/Town Directory, certain other important particulars *viz*, sources of irrigation, crops raised, value of land, Co-operative Societies, Police Stations, Veterinary Hospitals, Reading Rooms, Places of Public Entertainments (Cinemas), Industrial Establishments and Rural Handicrafts are also given talukwise in separate Sub-Tables immediately after the Town Directory. The Sub-Tables are numbered as follows :—

Sub-Table-1 : Source of Irrigation, crops raised and value of land
Sub-Table-2 : Co-operative Societies
Sub-Table-3 : Police Stations
Sub-Table-4 : Veterinary Hospitals
Sub-Table-5 : Reading Rooms
Sub-Table-6 : Public Entertainments (Cinemas)
Sub-Table-7 : Industrial Establishments
Sub-Table-8, 9 & 10 : Rural Handicrafts

In the Sub-Table relating to the Sources of irrigation, crops raised and value of land, the particulars relating to the high and low prices of dry and wet land, the various important crops raised and the sources of irrigation are given village wise. Only the Location Code Numbers have been given in the Sub-Table without giving the names of the villages. Villages having land of same value are grouped together. In respect of some of the villages of

Agency taluks of Narasapatnam, Chintapalle, Chodavaram and Srungavarapukota, the particulars have not been received and they have been therefore omitted in the Sub-Table. As the particulars in respect of all villages of Paderu taluk have not also been received this table has been omitted in respect of this taluk. The following abbreviations are used in this Sub-Table:

Cereals

J : Jonna or Cholam or Jowar
M : Maize
P : Paddy
R : Ragi
S : Sajja or Cumbu

Other Crops

Ch : Chillies
G : Groundnut
Gi : Gingelly
O : Onion
Ju : Jute
Su : Sugarcane
T : Tobacco

Pulses

Bg : Bengalgram
Gg : Greengram
Hg : Horsegram
Rg : Redgram

Irrigation Sources

C : Canal
Riv : River
Sc : Spring channel or Nala
Tk : Tank
W : Well

In the Sub-Table relating to Co-operative Societies, the various types of Co-operative Societies functioning in each village have been presented talukwise. The data for the district are given in the beginning followed by the particulars relating to taluk. The abbreviations used for the different types of Co-operative Societies are given below. If a village is served by a Co-operative Society of another village it has been indicated accordingly.

BWCS	Brick Workers' Co-operative Society
CICS	Cottage Industrial Co-operative Society
CS	Co-operative Society
ECS	Employees' Co-operative Society
FICS	Fishermen's Co-operative Society
HPRCS	Hand Pounding Rice Co-operative Society
LCCS	Labour Contract Co-operative Society
LUCS	Local Union Co-operative Society
MCS	Marketing Co-operative Society
MPCS	Multi-Purpose Co-operative Society
MSCS	Milk Supply Co-operative Society
PJCS	Palm Jaggery Co-operative Society
PSCS	Public Servants' Co-operative Society
SSCS	Students' Stores Co-operative Society
TCS	Teachers' Co-operative Society
T&LWCS	Tanners' & Leather Workers' Co-operative Society
WCS	Weavers' Co-operative Society
XCS	Christian Co-operative Society

In the other Sub-Tables 3 to 6 Police Stations, Veterinary Hospitals, Reading Rooms and Places of Public Entertainments (Cinemas) also, the data are presented in the same form as explained above, *i.e.*, first for the district and then for each taluk. Only the names of places where such facilities exist are given.

In the Sub-Table 7 relating to Industrial Establishments, the number of units under various industries existing in villages and towns are given. These particulars were mainly those collected through a schedule of industries and crafts issued to the village school teachers in connection with the Rural Craft Survey. In this schedule the data were to be given by the numbers of families; and as such, the families which had members engaged in any of the industries had been taken as units for that industry. In respect of some villages where the schedules had not been answered, the information was compiled from the Houselists. Certain data were taken from other sources as well such as the Village Directory furnished by the Tahsildar, and the survey of Industries conducted in the cities. It is, however, quite possible that there may be some villages for which the information could not be presented. Such omissions are however, likely to be very few. The particulars are given separately for the rural and urban areas. Under the name of the district, the industries are arranged in the ascending order of Minor Groups of the Indian Standard Industrial Classification showing the total number of establishments within brackets next to each Minor Group Code Number, for Total, Rural and Urban separately. Then, the figures for the various taluks are presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village Directory. Against each village/town are

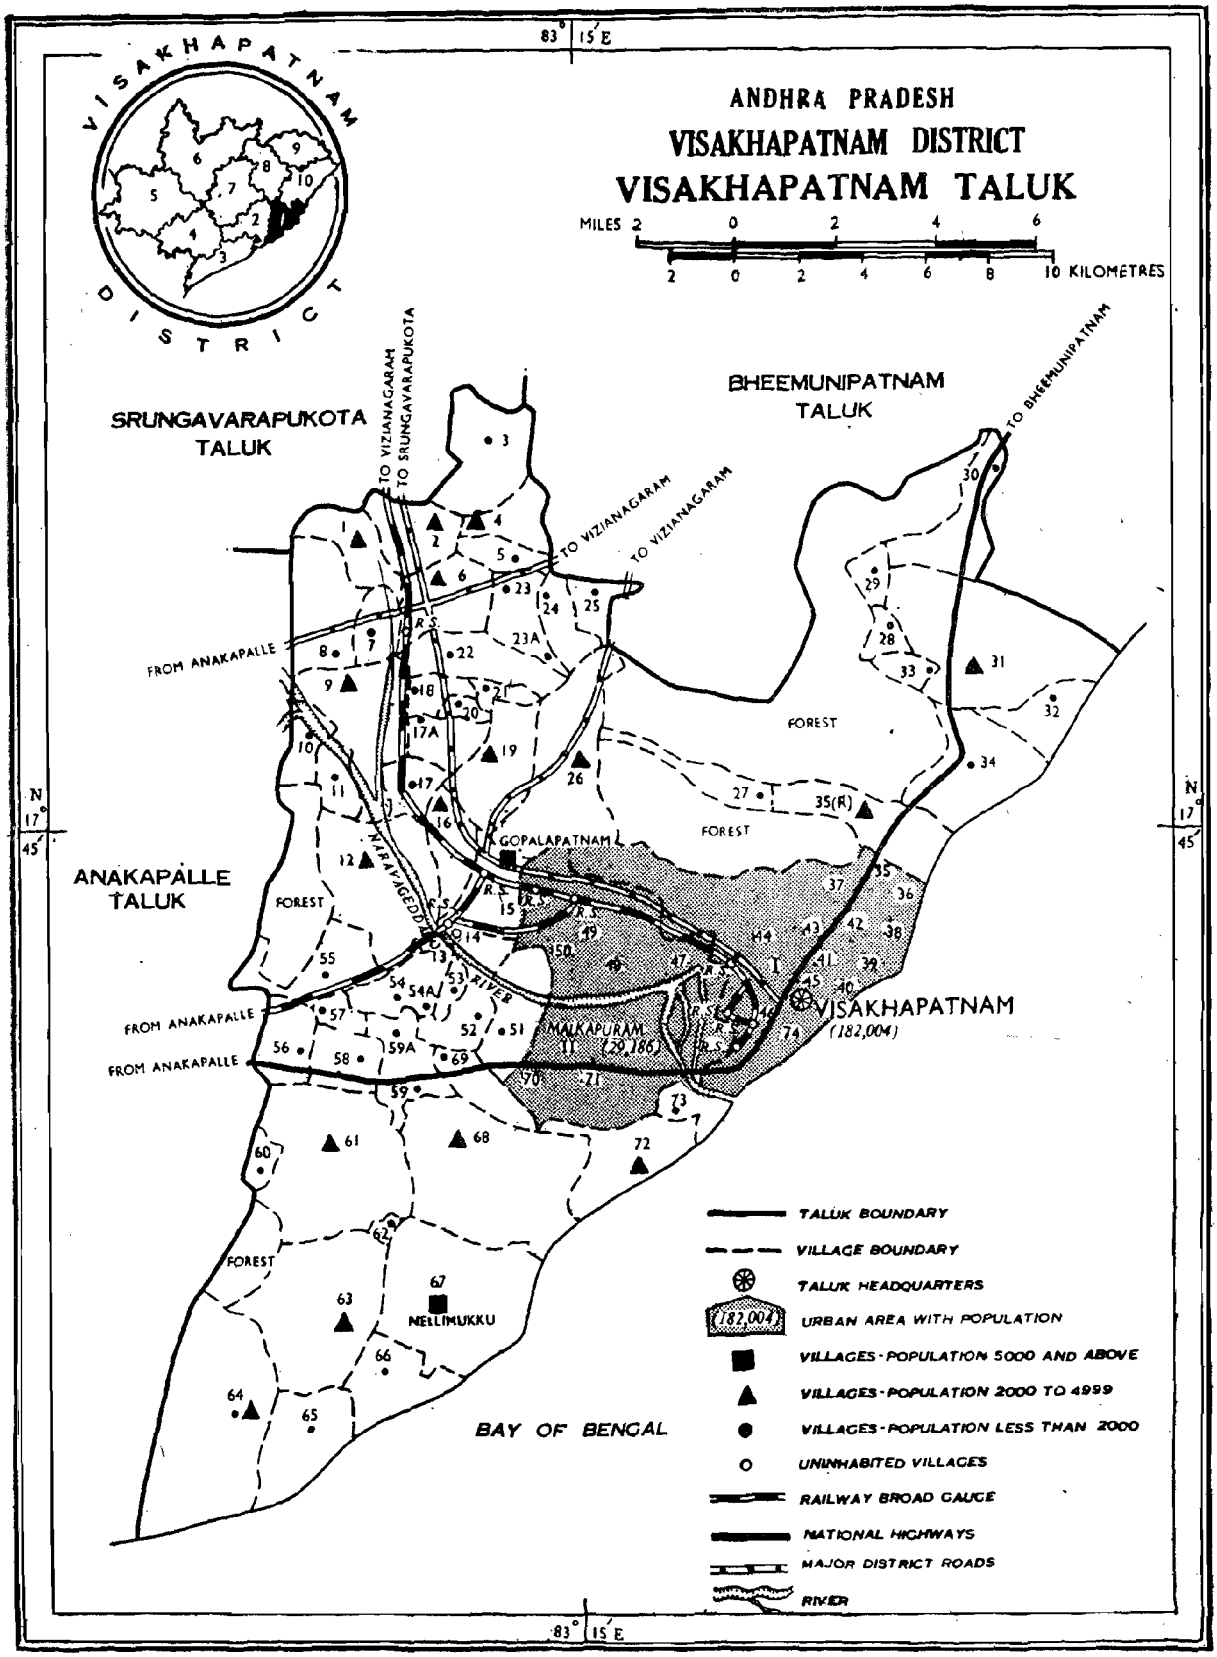

shown the Minor Group Code Numbers of the industries or crafts found in that village/town with the number of units engaged in that Minor Group in brackets against each of the group.

In the three Sub-Tables 8, 9 and 10 relating to Handicrafts information is given about the various Crafts practised, the number of persons engaged, the distribution of Artisan Communities, the number of families engaged in the Handicrafts, and the names of highly skilled craftsmen of each community and the distribution of articles of crafts by main material used, source of design, manufacture, marketing and earnings. These particulars were mainly collected through a schedule of Industries and Crafts issued to the village school teachers in rural areas and to the Municipal authorities in the Municipal areas. In respect of cities the information was collected through the staff of the Census Tabulation Offices specially appointed for the purpose. In respect of some villages where the schedules have not been answered the information was taken from the Houselists prepared at the time of House-numbering in 1960. A detailed report on the Handicrafts Survey is given in "Census of India, 1961 - Volume II - Andhra Pradesh - Part VII-A" and may be referred to.

In the Sub-Table relating to Fairs and Festivals given at the end of this section, the important fairs and festivals that take place in the village, the month in which they take place, *etc.*, are given for each village having such importance. A detailed report on the Fairs and Festivals is given in "Census of India 1961 - Volume II - Andhra Pradesh - Part VII-B" and may be referred to.

All the information given in the various Sub-Tables in this section are based on the information furnished by the Heads of Departments, the District Officers, the Tahsildars and the Municipal authorities concerned.

VISAKHAPATNAM TALUK

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

Note: 1. In Visakhapatnam City, Enumerator's Block No. 246 has been deleted and the Houses originally assigned to this Enumerator's Block have been assigned to the Enumerator Block No. 247

2. Localities 56 to 63 of Visakhapatnam City are out side the Visakhapatnam Municipal limits and the jurisdictions of the ten Enumerators who covered these localities are not given.

3. As the Houses in Block 27 of Malkapuram Town were not existing at the time of Census Enumeration, they have not been assigned to any other Enumerator.

4. *In Malkapuram Town E.B. 88 covered Blocks 1 & 2 of Kapparada and Block 4 of Kancharapalem

5. †Kancharapalem, Kapparada and Marripalem villages are partly included in Visakhapatnam City and partly in Malkapuram Town.

BHEEMUNIPATNAM TALUK

M. HASSAN

Prepared at the Office of the Superintendent of Census Operations, Andhra Pradesh, Hyderabad.

ALPHABETICAL LIST OF VILLAGES

BHEEMUNIPATNAM TALUK

1961 Location Code No.	Name of Village
(1)	(2)
119	Akkivaram
161	Alladapalem
105	Amakam
96	Amanam
121	Amatamravivalasa
72	Anandapuram
31	Ananthavaram
91	Annavaram
10	Ayinada
54	Bakurupalem
99	Bangarurajupeta
118	Bantupalle
18	Bapiraju Tallavalasa
95	Basavapalem
115	Bellam
26	Bhandevupuram
164	Bharanikam
84	Bheemunipatnam
59	Bhimandorapalem
124	Bhogapuram
15	Bodamettapalem
13	Boddavalasa
35	Boni
7	Buddivalasa Agraharam
19	Buddivalasa Agraharam
137	Burravanipalem
50	Chandaka
81	Chapaluppada
45	Cherukupalle
139	Chinabattivalasa
9	Chinnapuram
12	Chintalavalasa
170	Chintapalle
90	Chippada
104	Chittigunkalam
87	Chittivalasa
64	Dabhanda
16	Dakamarri
112	Denkada
103	Dindivari Tallavalasa
111	Dwarapureddipalem
156	Gaithula Chodavaram
70	Gambhiram
28	Gandhavaram
63	Gandigundam
66	Gangasani Agraharam
102	Gantlam
57	Gidijala
101	Golagam
60	Gorinta
49	Gottipalle
163	Govindapuram
122	Gundepuvalasa
69	Gudilova
89	Gudivada
154	Gumpam
109	Gumpuru
51	Jagannadhapuram
125	Jaggayyapeta
20	Janakidevipuram
77	Jayantivari Agraharam
14	Jonnada
158	Kamavaram
61	Kanamam
93	Kancheru
92	Kancherupalem
160	Kandivalasa
157	Kanimella
159	Kanimetta
80	Kapuluppadu
94	Kavuluvada
58	Kolavanipalem
151	Kollayavalasa
150	Konada
169	Konayyapalem
127	Kongavanipalem
131	Kopperla
17	Korada
3	Korukonda
132	Kotabhogapuram
76	Kothavalasa
29	Kovvada
155	Kovvada
22	Krishnapuram
167	Krishnapuram
138	Kumili
83	Kummaripalem
85	Kummaripalem *alias* Valandabhumulu
36	Kusuluvada
133	Lakshmipuram
162	Lankalapallepalem
141	Lovajagannadhapuram
24	Maddi
41	Majjivalasa
11	Malicherla
65	Mamidilova
43	Modavalasa
100	Mopada
55	Muchcherla
34	Mukundapuram
88	Mulakuddu
108	Munginapalle
126	Munjeru
130	Nadipalle
47	Nagarapupalem
129	Nandigam
6	Narasapuram Agraharam
67	Narayanagajapathi-rajupuram
40	Narayanarajupeta
134	Nathavalasa
8	Nerellavalasa
82	Nerellavalasa
79	Nidigattu
23	Padmanabham
152	Palanki
71	Palavalasa
52	Pandalapaka
37	Pandrangi
148	Pasupam
166	Pativada
140	Pedabattivalasa
117	Pedada
107	Pedatadivada
1	Pedavemali
74A	Peddipalem
32	Pekeru
30	Penta
146	Perapuram
113	Pinatadivada
2	Pinavemali
98	Polipalle
142	Poram
4	Potnuru
145	Pusapatipalem
144	Pusapatirega
106	Raghumanda
44	Rajapulova
116	Rajulatammapuram
62	Ramavaram
78	Ramayogi Agraharam
97	Ravada
21	Reddipalle Agraharam
136	Rellivalasa
39	Revidi
165	Roluchappidi Agraharam
86	Sangivalasa
120	Savaravilli
42	Singanabanda
135	Singavaram
33	Sirlapalem
68	Sontyam
128	Subbannapeta *alias* Pilakavari Agraharam
46	Tagarapuvalasa
56	Tangudubilli
53	Tarluvada
75	Thallavalasa
48	Thatiturru
27	Thimmapuram
153	Tottadam
123	Tsakivalasa
168	Tsavuduvada
143	Tsodamma Agraharam
110	Tsollangipeta
5	Tunivalasa Agraharam
114	Vedullavalasa
74	Vellanki Peddipalem
147	Vempadam
73	Vemulavalasa
38	Venkatapuram
25	Viziarampuram Agraharam
149	Yerukonda

The following abbreviations have been used in the above Village and Town Directories :

Note : N A. : Not ascertainable

(i) *Educational facilities are shown by the following symbols under Col. 3:—*
P : Primary School, M : Middle School, H : High School, C : Higher Institutions including Colleges, T : Technical Institutions

(ii) *Medical and Public Health facilities are shown by the following symbols under col. 4:—*
D : Dispensaries, Rhc : Rural Health Centres, Hos : Hospitals, Mcw : Maternity Child Welfare Centres

(iii) *Drinking Water facilities are shown by the following symbols under col. 5:—*
S : Safe or protected water supply including Tube Wells etc., W : Wells, Tk : Tank, Riv : River, C : Canal, Sc : Spring Channel

(iv) *Communication and Transport facilities are shown by the following symbols under col. 6:—*
Po : Post Office, To : Telegraph Office or Public Call Office, Rh : Rest Houses and Choultries, R : Road, Rly : Railway

(v) *Electrification facilities are shown by the following symbols under col. 7:—*
E : Electricity, E(I) : Electricity in Industrial use, E(A) : Electricity in Agricultural use, E(D) : Electricity in Domestic use

SUB-TABLE 1 TO VILLAGE & TOWN DIRECTORY

SOURCE OF IRRIGATION, CROPS RAISED AND VALUE OF LAND

The following abbreviations have been used in the above Sub-Table :—

N. A : Not ascertainable

Cereal Crops

J: Jonna or Cholam or Jowar
M: Maize
P: Paddy
R: Ragi
S: Sajja or Cumbu

Pulses

Bg: Bengalgram
Gg: Greengram
Hg: Horsegram
Rg: Redgram

Other Crops

Ch: Chillies
G: Groundnut
Gi: Gingelly
O: Onions
Ju: Jute
Su: Sugar cane
T: Tobacco

Irrigation Sources

C: Canal
Riv: River
Sc: Spring Channals or Nalas
Tk: Tank
W: Well

SUB-TABLE 7 TO VILLAGE & TOWN DIRECTORY

INDUSTRIAL ESTABLISHMENTS

VISAKHAPATNAM DISTRICT

[Note:— In the Sub-Table below relating to Industrial Establishments, the units of various Industries existing in villages and towns are given. The particulars are given separately for the Rural and Urban areas. The Industries are arranged, first for the district total in the ascending order of Minor Groups of Industries under the Indian Standard Industrial Classification showing the total number of establishments within brackets next to each Minor Group Code Number, for Total, Rural and Urban areas separately. The figures for the various taluks are also presented showing first the total numbers on the pattern adopted for the district totals, followed by the particulars for the villages and towns in that taluk in the order of the Village Town Directory. Against each Village/Town are shown the Minor Group Code Numbers of the Industries or Crafts found in that Village Town with the number of units engaged in the Minor Group in brackets against each of the Groups.]

Detailed description of the Industrial Code (Minor Group) Numbers under which the Industrial Establishments are arranged in the above Sub-Table are given below :

Minor Group No.	Description as per the Indian Standard Industrial Classification
(1)	(2)
048	Production of other Animal Husbandry products such as skin, bone, ivory and teeth
200	Production of rice, atta, flour etc., by milling, dehusking and processing of crops and food grains
201	Production of sugar and syrup from sugar cane in mills
202	Production of indigenous sugar, gur from sugar cane of palm juice and production of candy
205	Production of bread, biscuits, cake and other bakkery products
207	Production of edible fats and oils (other than hydrogenated oil)
209	Production of other food products such as sweetmeat and condiments, muri, murki, chira, khoi, cocoa, chacolate, toffee, lozenge
212	Production of indigenous liquor such as toddy, liquor from mahua, palm juice
214	Production of aerated and mineral water
215	Production of ice
216	Production of ice cream
218	Processing of coffee in curing works
220	Manufacture of bidi
221	Manufacture of cigars and cheroots
230	Cotton ginning, cleaning, pressing and baling
231	Cotton spinning (other than in mills)
233	Cotton dyeing, bleaching
235	Cotton weaving in handlooms
238	Manufacturing of cotton nets
239	Manufacturing of cotton cordage, rope and twine
240	Jute pressing and baling
241	Jute spinning and weaving
244	Manufacture of other products like rope, cordage from jute and similar fibre such as hemp, mesta
272	Embroidery and making of crepe lace and fringes
273	Making of textile garments including rain coats and head-gear

SUB-TABLE 7 TO VILLAGE & TOWN DIRECTORY—*Contd.*

INDUSTRIAL ESTABLISHMENTS

Minor Group No. (1)	Description as per the Indian Standard Industrial Classification (2)
274	Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding materials, mattress, textile bags
277	Manufacture of coir and coir products
278	Manufacture of umbrellas
280	Sawing and planning of wood
281	Manufacturing of wooden furniture and fixtures
283	Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar equipment and fixtures
284	Manufacture of other wooden products such as utensils, toys, artwares
288	Manufacture of materials from cork, bamboo, cane leaves and other allied products
289	Manufacture of other wood and allied products not covered above
292	Manufacture of products such as paper bags, boxes, carts, envelopes and moulded pulp goods from paper, paper board and pulp
302	All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry
303	All types of binding, stitching, sizing and other allied work connected with binding industry
310	Currying, tanning and finishing of hides and skins and preparation of finished leather
311	Manufacture of shoes and other leather foot-wear
314	Repair of shoes and other leather foot-wear
320	Mununfacture of tyres and tubes
324	Production of petroleum, kerosene and other petroleum products in petroleum refineries
331	Manufacture of dyes, paints, colours and varnishes
334	Manufacture of matches
335	Manufacture of medicines, pharmacentical preparations perfumes, cosmetics and other toilet preparations except soap
336	Manufacture of soap and other washing and cleaning compouuds
337	Manufacture of turpentine, synthetic resin and plastic products and materials (including synthetic rubber)
338	Manufacture of common salt
340	Manufacture of structrual clay products such as bricks, tiles
341	Manufacture of cement and cement products
342	Manufacture of lime
343	Manufacture of structural stone goods, stone dressing and stone crushing
345	Manufacture of stone images
350	Manufacture of earthen ware and earthen pottery
359	Manufacture of other non-metallic mineral products not elsewhere specified
360	Manufacture of iron and steel including smelting refining, rolling, conversion into basic forms such as billets, blooms, tubes, rods
364	Manufacture of iron and steel furniture
365	Manufacture of brass and bell metal products
366	Manufacture of aluminium products
367	Manufacture of metal products (other than of iron, brass bell metal and aluminium) such as tin can
368	Enamelling, galvanising, plating (including electroplating) polishing and welding of metal products
369	Manufacture of sundry hardwares such as G. I. pipe, wire nut, bolt, screw, bucket, cutlery (This will also include the manufacture of sundry ferrous engineering products done by jobbing engineering concerns which cannot be classified in major groups 36, 37, 38 and 39)
377	Manufacture of all kinds of Battery
378	Manufacture of electronic equipment such as radio, microphone
384	Repairing and servicing of Motor vehicles
386	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines
388	Repairing of bicycles and tricycles
389	Manufacture of other transport equipment not covered above such as animal drawn and hand drawn vehicles

INDUSTRIAL ESTABLISHMENTS

Minor Group No	Description as per the Indian Standard Industrial Classification
(1)	(2)
390	Manufacture of optical instruments and lenses, opthalmic goods, and photographic equipment and supplies
391	Manufacture of scientific, medical and surgical instruments and equipment and supplies
392	Assembling and repairing of watches and clocks
393	Manufacture of jewellery, silver ware and wares using gold and other precious metals
394	Manufacture and tuning of musical instruments
395	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen
399	Manufacture and repair work of goods not assignable to any other group

SUB-TABLE 8 TO VILLAGE & TOWN DIRECTORY

DISTRIBUTION OF ARTICLES OF CRAFTS BY MAIN MATERIAL USED, NUMBER OF PERSONS EMPLOYED IN PRODUCTION, SOURCE OF DESIGN, MANUFACTURE, MARKETING AND EARNINGS

(RURAL)

Branch of Industry Major Group of Indian Standard Industrial Classification	Name of Article produced	Name of main material used	No of Villages engaged in manufacture	No of persons employed in production			No. of Villages engaged in manufacture of articles of		No. of Villages which produce for sale in open markets	No. of Villages where there are Co-operative sales societies	Average earnings per worker per day (in Rupees and Paise)
