PREFACE

There has always been a great need for authentic and comprehensive information regarding different types of establishments in India. Though the data in respect of registered factories were available from other returns that the Government collect from such establishments, there was no information available in respect of small establishments in the unorganised sector spread throughout the length and breadth of the country. It was, however, for the first time that a comprehensive survey about different types of establishments, from one man venture such as a cobbler, a village blacksmith to a factory engaging thousand of workmen was conducted during the 1961 Census. In the 1961 Census, however, no separate schedule on establishments was canvassed at the time of Houselisting Operations but an attempt was made to collect particulars of manufacturing establishments in the houselist form itself. It was for the first time that a separate schedule on establishments was canvassed at the houselisting stage of 1971 Census. This schedule concerned manufacturing, trade as well as all other establishments. The data regarding different types of establishments when tabulated have yielded very useful information and four Establishment Tables E-I to E-IV have been built up. These Establishment Tables alongwith subsidiary tables have been incorporated in the present report.

In the present report, viz. Part III, the data collected in the form of Establishment Tables had been analysed and presented in a readable manner. As I have pointed out in the report the Enumerators did commit some mistakes but by and large the work turned out by them was of high quality. I must say that despite the different nature of inquiry, they did quite a good job. The data on establishments were tabulated in the Data Processing Division of the Registrar General, India's office. However, this report is presented with the hope that it will provide some useful information about different types of establishments in the Union Territory of Chandigarh.

I was greatly assisted by Shri M.L. Sharma, Tabulation Officer who helped me in preparing the basic draft of this report. The subsidiary tables were prepared by Shri Raj Kumar, Statistical Assistant and Shri Yog Raj Grover, Computor. The main E-Series tables were scrutinised in our office by Shri Raj Kumar, Statistical Assistant. The charts reproduced in this report were originally prepared by Shri K.L. Manchanda, Draftsman. These were later retouched by his successor Shri Devinder Singh Sulhen Draftsman. The motif on the outer cover was prepared by Shri K.L. Manchanda. Much work was put in by my Stenographer, Miss Gurdeep Kaur in typing out the draft report. Great pains were taken by Shri M.L. Sharma, Tabulation Officer and Shri Raj Kumar, Statistical Assistant in correcting the proofs and seeing the report through the press. They were ably assisted during printing by their colleagues Shri Yog Raj Grover, Computor, Mrs. Kamlesh Gupta, Computor, Shri Manjit Singh Bhatnagar, Assistant Compiler and Shri Baldev Raj Gupta, Assistant Compiler.

My thanks are due to Shri N.C. Mukherjee, Controller and Shri P. Oommen Assistant Controller Government Press, Chandigarh (U.T.), for bringing out this publication. My appreciations are also due to numerous workers of the Government Press, who were associated with this report at different stages for its neat printing. Their names deserve to be acknowledged individually but paucity of space do not permit here.

My appreciations are due to Shri S.C. Sharma, Assistant Registrar General, Data Processing Division for the timely supply of main E-Series Tables and Shri K.K. Chakravorty, Central Tabulation Officer for thorough checking and expeditious clearance of E-Series Main and Subsidiary Tables under their personal supervision.

My thanks are due to Shri J.C. Sharma, District Industries Officer, Chandigarh for contributing 'Note on Industries in Chandigarh', for this report.

Lastly I am very much indebted to Shri A. Chandra Sekhar, Registrar General, India, Shri K.D. Ballal, Deputy Registrar General and Shri K.K. Chakravorty, Central Tabulation Officer for their guidance and encouragement in conducting the houselisting operation and drafting this report.

Chandigarh:
January 9, 1972

R.K. GOSWAMI
Director of Census Operations,
Union Territory, Chandigarh.

CHAPTER I

INTRODUCTORY

It was for the first time that in 1961 Census information on different types of establishments, factories, workshops and the number of persons working therein was collected throughout the country. In Punjab, of which Chandigarh Union Territory was then part, information on establishments, etc., was collected during the Houselisting Operation conducted in mid-May to mid-December, 1960 in the houselist form itself as no separate schedule was prescribed for establishments as has been done during the 1971 Census. The following items pertaining to establishments, workshops or factories were covered in columns 5 to 8 of the houselist during 1961 Census :

(i) Column 5 : Name of establishment or proprietor ;

(ii) Column 6 : Name of product(s), repair or services undertaken ;

(iii) Column 7 : Average number of persons employed daily last week, including proprietor or household members if working; and

(iv) Column 8 : Kind of fuel or power, if machinery is used.

During 1971 Census comprehensive information on establishments was attempted during the houselisting operation conducted in August-September, 1970. As has been said earlier a separate schedule was prescribed to elicit various particulars of each and every establishment. The specimen of 1971 Census establishment schedule along with instructions is given in the Annexure. The various items covered in the establishment schedule are as follows :

Column 1 : Serial Number.

Column 2 : Census House Number.

Column 3 : Name of the Establishment or of the proprietor ;

Column 4 : Is the establishment :

(a) Government/Quasi-Government ;

(b) Private ;

(c) Co-operative Institution.

Column 5 : Average number of persons working daily last week or in the last working season, including proprietors and or family workers.

Columns 6—8 : If any manufacturing, processing or servicing is done.

Column 6 : Is it :

(a) Household Industry ;

(b) Registered Factory ;

(c) Unregistered Workshop.

Column 7 : Description of the products, processing or servicing done.

Column 8 : Type of fuel or power used.

Columns 9-10 : If used as a trading establishment.

Column 9 : Description of goods bought/sold,

Column 10 : Whether

(a) Wholesale ; or

(b) Retail.

Column 11 : If used as any other establishment, describe, e.g., Government Office, School, Hospital, Railway Station, Barber's saloon, Cinema, Theatre, Hotel, Tea shop, etc.

This schedule covered establishments, manufacturing, trade or business and others. The data collected in the establishment schedule yielded valuable information on the distribution of establishments into the three sectors, viz., (i) Government or Quasi-Government, (ii) Private, (iii) Co-operative. Besides information on the size of employment by each type of establishment classified according to National Industrial Classification was collected in this schedule. The utility of these data is particularly significant in case of the unorganised sector, i.e., unregistered workshops, household industry, small business houses and other similar establishments, as for this sector there is hardly any reliable data collected so far, even though it gives employment to a considerable strength of the labour force.

Limitations of Data Collected :

The data collected on establishments suffered from some limitations, as these cover only those establishments which were located in census houses i.e., structures with walls and roof. Open air establishments or itinerant vendors were thus not covered as these were not recorded in the houselist which is an essential prerequisite for enlisting establishments.

In a planned city like Chandigarh where separate areas have been earmarked for establishments of various types it is not easy to start establishments in the residential areas. This has given rise to increase in the number of establishments being run on *Rehris* or the pavements such as vegetables, fruits, cloth, general merchandise, articles of grocery, *chana bhatura*, tea, other eatables, etc. These establishments cater to the day to day needs of the residents of Chandigarh, especially the poorer sections. Though under the rules establishments being run on the *Rehris* are required to be kept moving from place to place yet these have more or less eaked out permanent place of operation. A few places where such establishments are found in sizable number are : Sector 5 (near the Lake), Sector 11 (near the market), Sector 15 (opposite market under the mango grove), Sector 18 (on Sarovar Path near the crossing of Sectors 18 and 19), Sector 19 (near *Dhobhi Ghat*) in Sector 20 (near the Government Training College and near 20-C Cheap Houses), Sector 22 (near Kiran Cinema and near Bajwara) and Sector 23 (in market). Besides there are number of places near the main markets where establishments run on wheels or pavements are found in sizable numbers. Though it would not be possible to give the exact number of these establishments it would not be wrong to say that the number of such establishments is well over 1,000 mark. The omission of such establishments on technical grounds is, therefore, very significant. The people working under these establishments are consequently excluded from the concerned schedules and tables.

Difficulties :

The enumerator, did not face difficulties in collecting data particularly from large establishments. It was only in one case that the owner of a big establishment refused to give information about his establishment. Probably he thought that the enumerator was an official of the Income Tax Department. However, when the enumerator explained to the owner that he was not from Income Tax Department and that he was collecting information purely for census purposes the owner relented and gave the requisite information. It will be apt to mention here that the data pertaining to registered factories, etc., are also available from other returns that Government collects from such establishments. The big advantage of the present establishment schedule is that this has helped in collecting data on small establishments in the unorganised sector which is much bigger than the organised sector and information about which was not readily available hitherto.

The enumerators had no difficulty in understanding the concept of establishment and the work turned out by them was found to be of high order. It was only in a very few cases that the enumerators could not decide as to whether a particular census house was an establishment at all. It also happened that in number of cases particularly in the villages the enumerators treated very small temples, which were without the services of a priest as establishments. These types of mistakes were corrected at the time of editing. The most common types of mistakes committed by the enumerators are :

(i) In some cases although the nature of entries in column 6 of the houselist indicated its use as an establishment, it was not recorded as such in column 7 of the houselist, and accordingly no establishment schedule was filled in for such a census house. This was due to the fact that the

enumerator could not decide whether it was an establishment at all. These cases were very few and were referred back to the field for filling in the establishment schedules.

(ii) In very few cases particularly in the cases of schools, the enumerators included the students also while calculating the average number of persons working daily last week in the school. This mistake was rectified at the time of editing by eliciting correct information from the concerned schools.

(iii) In some cases names of establishments or description of the products manufactured or services or repair undertaken were not clearly recorded for the establishment but only vague entries like workshop or factory were recorded. Such cases were, however, very few.

The establishment schedules were edited in this office but further processing of these schedules was done in the Data Processing Division of the Office of the Registrar General, India on 100 per cent basis. The data were transferred on magnetic tapes and ultimately processed on the computor.

Establishment Tables :

Four main establishments tables with parts were prepared from the establishment schedules. These are :

(i) Table E-I Distribution of establishments by broad types, (ii) Table E-II Part A Distribution of manufacturing, processing or establishments other than household industries classified by registered factories, unregistered workshops and size of employment, (iii) Table E-II Part B Distribution of manufacturing, processing or servicing establishments other than household industries classified by industry, fuel/power or manual used and size of employment, (iv) E-II Part C Distribution of household Industry establishments classified by industry, fuel/power used and size of employment, (v) E-III Distribution of trade/commercial establishments classified by the type of business or trade and size of employment and (vi) E-IV Distribution of establishments (other than manufacturing, processing or servicing or business and trade establishments) by the size of employment. It would be seen that Table E-II has been split up into three separate parts, viz., Part A, Part B and Part C. Thus in fact there are six tables when these parts are taken into account. Table E-I, E-III and E-IV are new tables. However, Tables E-II (Parts A, B and C) correspond to Table E-II of 1961 Census. Besides the main E-Series tables the following subsidiary tables have been compiled from the main tables and have been incorporated in the body of this report : (i) Subsidiary Table E-I.1 Distribution of 1,000 establishments by broad types in rural and urban areas separately, (ii) Subsidiary Table E-II Part A.1 Distribution of 1,000 manufacturing, processing or servicing establishments other than household industry as registered factories, unregistered workshops in each division/major group of N.I.C. and by size of employment in rural and urban areas separately, (iii) Subsidiary Table E-II Part B.1 Distribution of 1,000 manufacturing, processing, or servicing establishments other than household industry in each division/major group of N.I.C. and kind of fuel/power used, and size of employment, (iv) Subsidiary Table E-II Part C.1 Distribution of 1,000 establishments which are household industries in each division/major group of N.I.C. and kind of fuel/power used and size of employment, (v) Subsidiary Table E-III.1 Distribution of 1,000 trade/commercial establishments in each division/major group of N.I.C. by size of employment in rural and urban areas separately and (vi) Subsidiary Table E-IV.1 Distribution of 1,000 establishments (other than manufacturing, processing or servicing or business and trade establishments) in each division/major group of N.I.C. by size of employment in rural and urban areas separately. The Subsidiary Tables E-I.1, E-II Part A.1, E-II Part C.1, E-III.1 and E-IV.1 are new tables. But subsidiary table E-II Part B.1 of 1971 Census corresponds to Subsidiary Tables E-III.2 and E-III.3 of 1961 Census which now have been combined into one.

The information contained in the establishment tables is analysed and discussed in two succeeding chapters of this report under the heading 'Chapter II—Distribution of Establishments by broad types', 'Chapter III—Size of employment and types of power or fuel used.'

CHAPTER II

DISTRIBUTION OF ESTABLISHMENTS BY BROAD TYPES

The purpose for which a census house was used was recorded in column 6 of the houselist. If a house was used partly or wholly as an establishment and yes was recorded in column 7 of the houselist then a separate establishment schedule was canvassed in respect of that census house and particulars viz., (i) name of establishment or its proprietor, (ii) whether Government, Quasi-Government, Private or Co-operative Institution, (iii) average number of persons working daily last week or in the last working season, (iv) description of products, manufacturing, processing or servicing undertaken or whether used as a trading establishment or any other establishment, (v) type of power or fuel used, were recorded.

Table E-I refers to the distribution of establishments by broad types while subsidiary table E-I.1 gives the distribution of 1000 establishments by broad types in rural and urban areas separately. Taking Union Territory Chandigarh as a whole we find that there are in all 5,426 establishments, 391 in rural areas and 5,035 in urban areas. In the city of Chandigarh there are 4,405 establishments. The distribution of establishments into three main categories i.e., (i) manufacturing, processing and repairing establishments, (ii) trade or business establishments and (iii) other establishments, makes an interesting study. Out of a total number of 5,426 establishments as many as 1,364 come under the first category, 2,606 under the second category while 1,456 come under the third category which includes Educational Institutions, Public Health Institutions and Government Offices. Thus it is clear that there is predominance of trade or business establishments in the Union Territory of Chandigarh. This can be attributed to the preponderance of large number of shops, big or small. Moreover, Chandigarh being the Administrative Headquarters of two State Governments and one Union Territory it is the hub of business and trade activity. Other establishments rank next only to trade establishments. This is quite natural as after the reorganisation of Punjab in 1966 large number of Government offices belonging to Punjab as well as Haryana Governments have been shifted to Chandigarh. Even some Central Government Offices have also been shifted to Chandigarh. There is also predominance of trade or business establishments in the urban areas of Chandigarh as well as the city of Chandigarh. A similar pattern is noticeable in the case of rural areas of Chandigarh. In the rural areas of Chandigarh there are 158 trade or business establishments, 149 manufacturing, processing or servicing establishments and 84 other establishments. Under the category of manufacturing, processing or servicing establishments, household industries account for as many as 105 establishments. This is due to the fact that a large number of persons in rural areas have taken to Poultry and Dairy Farming.

Coming to the classification of establishments into government / quasi-government, private and co-operative sector, we find that there is predominance of private sector establishments. As many as 4,635 establishments fall in the private sector while there are only 752 Government establishments. Co-operative sector on the other hand accounts for only 39 establishments. A similar pattern is noticed in the case of urban areas of Chandigarh and the city of Chandigarh. In the rural areas there are 369 establishments in the private sector while there are only 22 Government establishments. There is no establishment in the co-operative sector. The distribution of establishments into three broad categories is given as under :—

(i) Manufacturing, Processing or Servicing Establishments

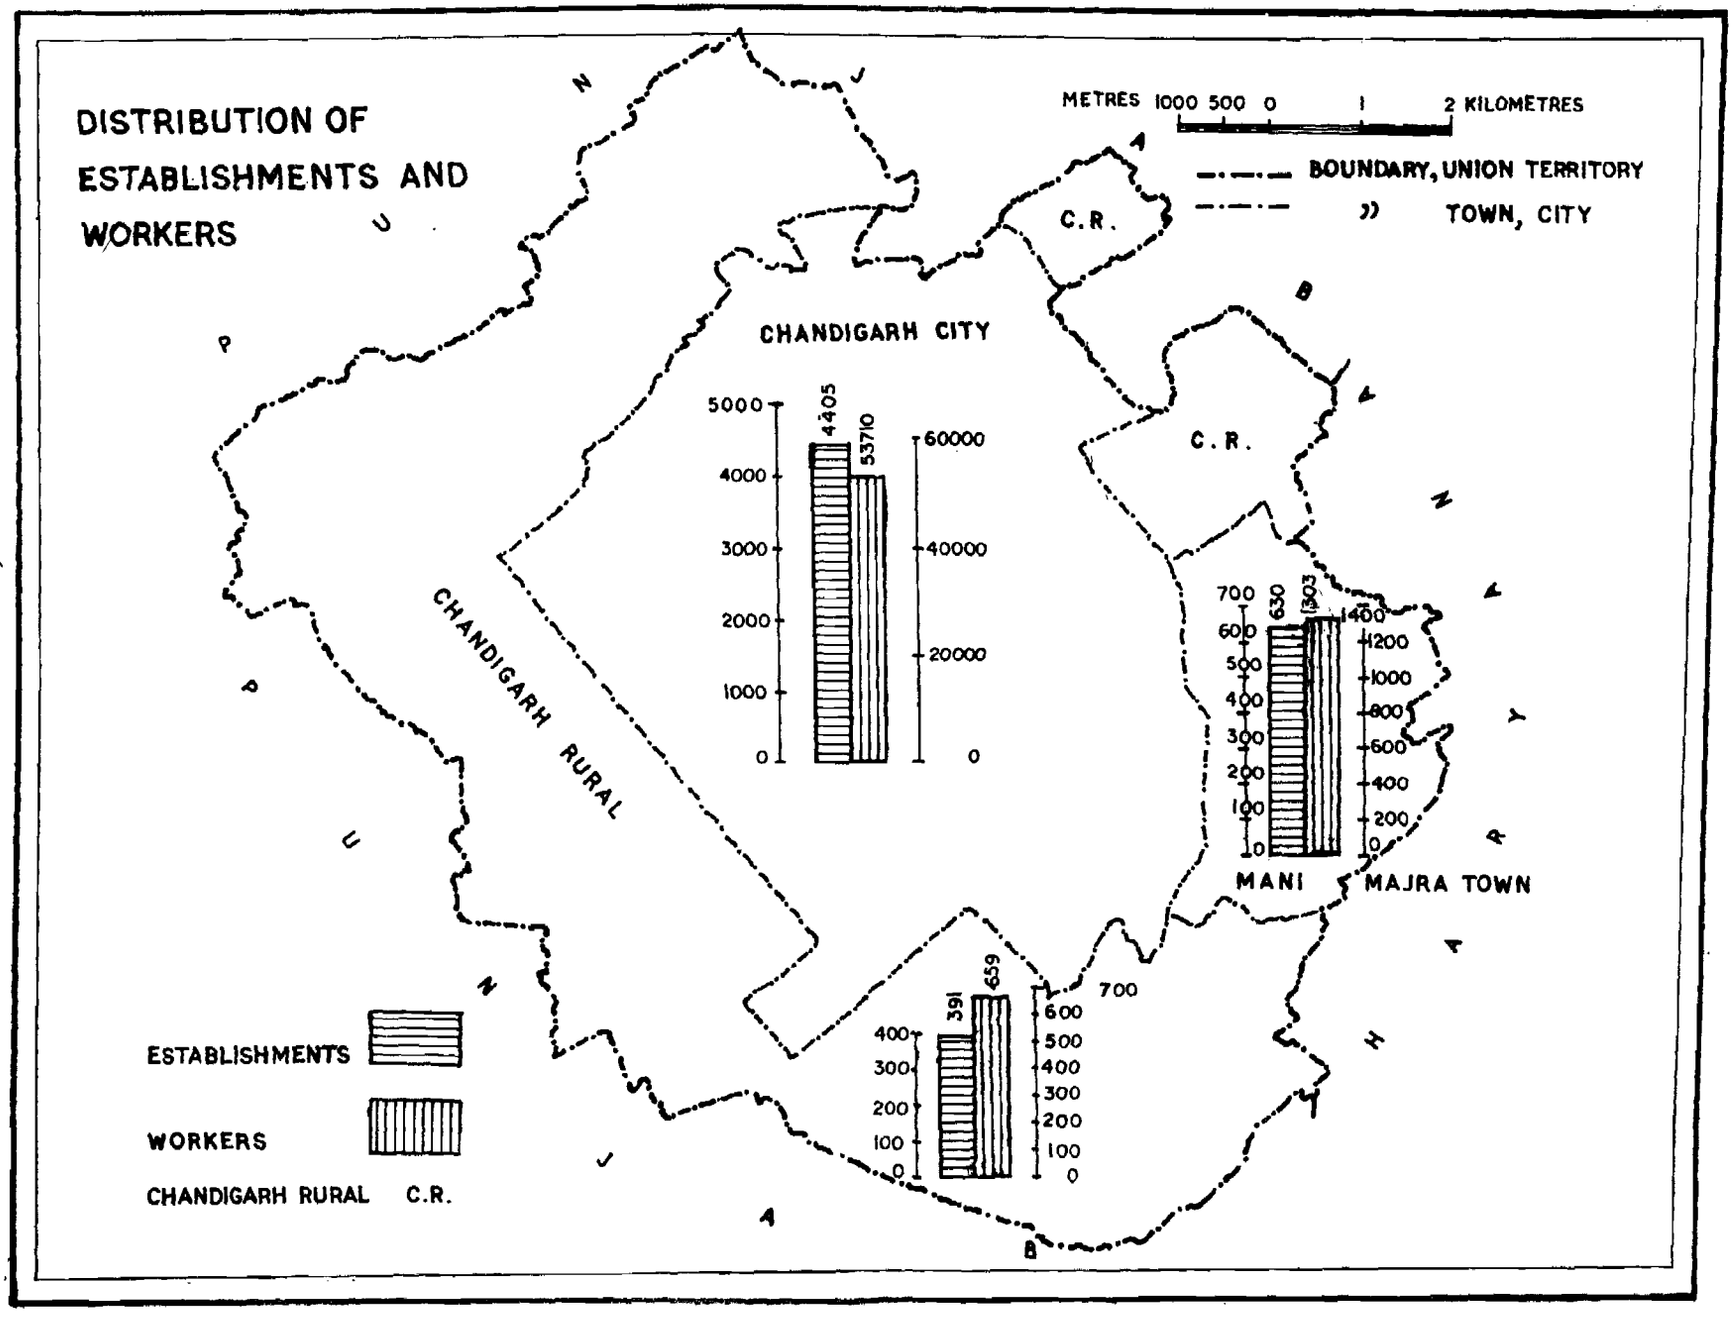

As already stated there are 1,364 establishments in this category in the Union Territory of Chandigarh, 149 in rural areas and 1,215 in urban areas. In the city of Chandigarh there are 985 establishments of this type. In the Union Territory 112 establishments have been returned as registered factories. All these registered factories except one are located in the urban areas. Chandigarh City alone accounts for 108 of the registered factories. It is thus obvious that the main concentration of the registered factories is in Chandigarh City which is fast becoming an industrial centre. In the beginning industrialists were reluctant to set up their industries in Chandigarh but by and by as a result of incentives given by the Government they have started setting up their industries in Chandigarh.

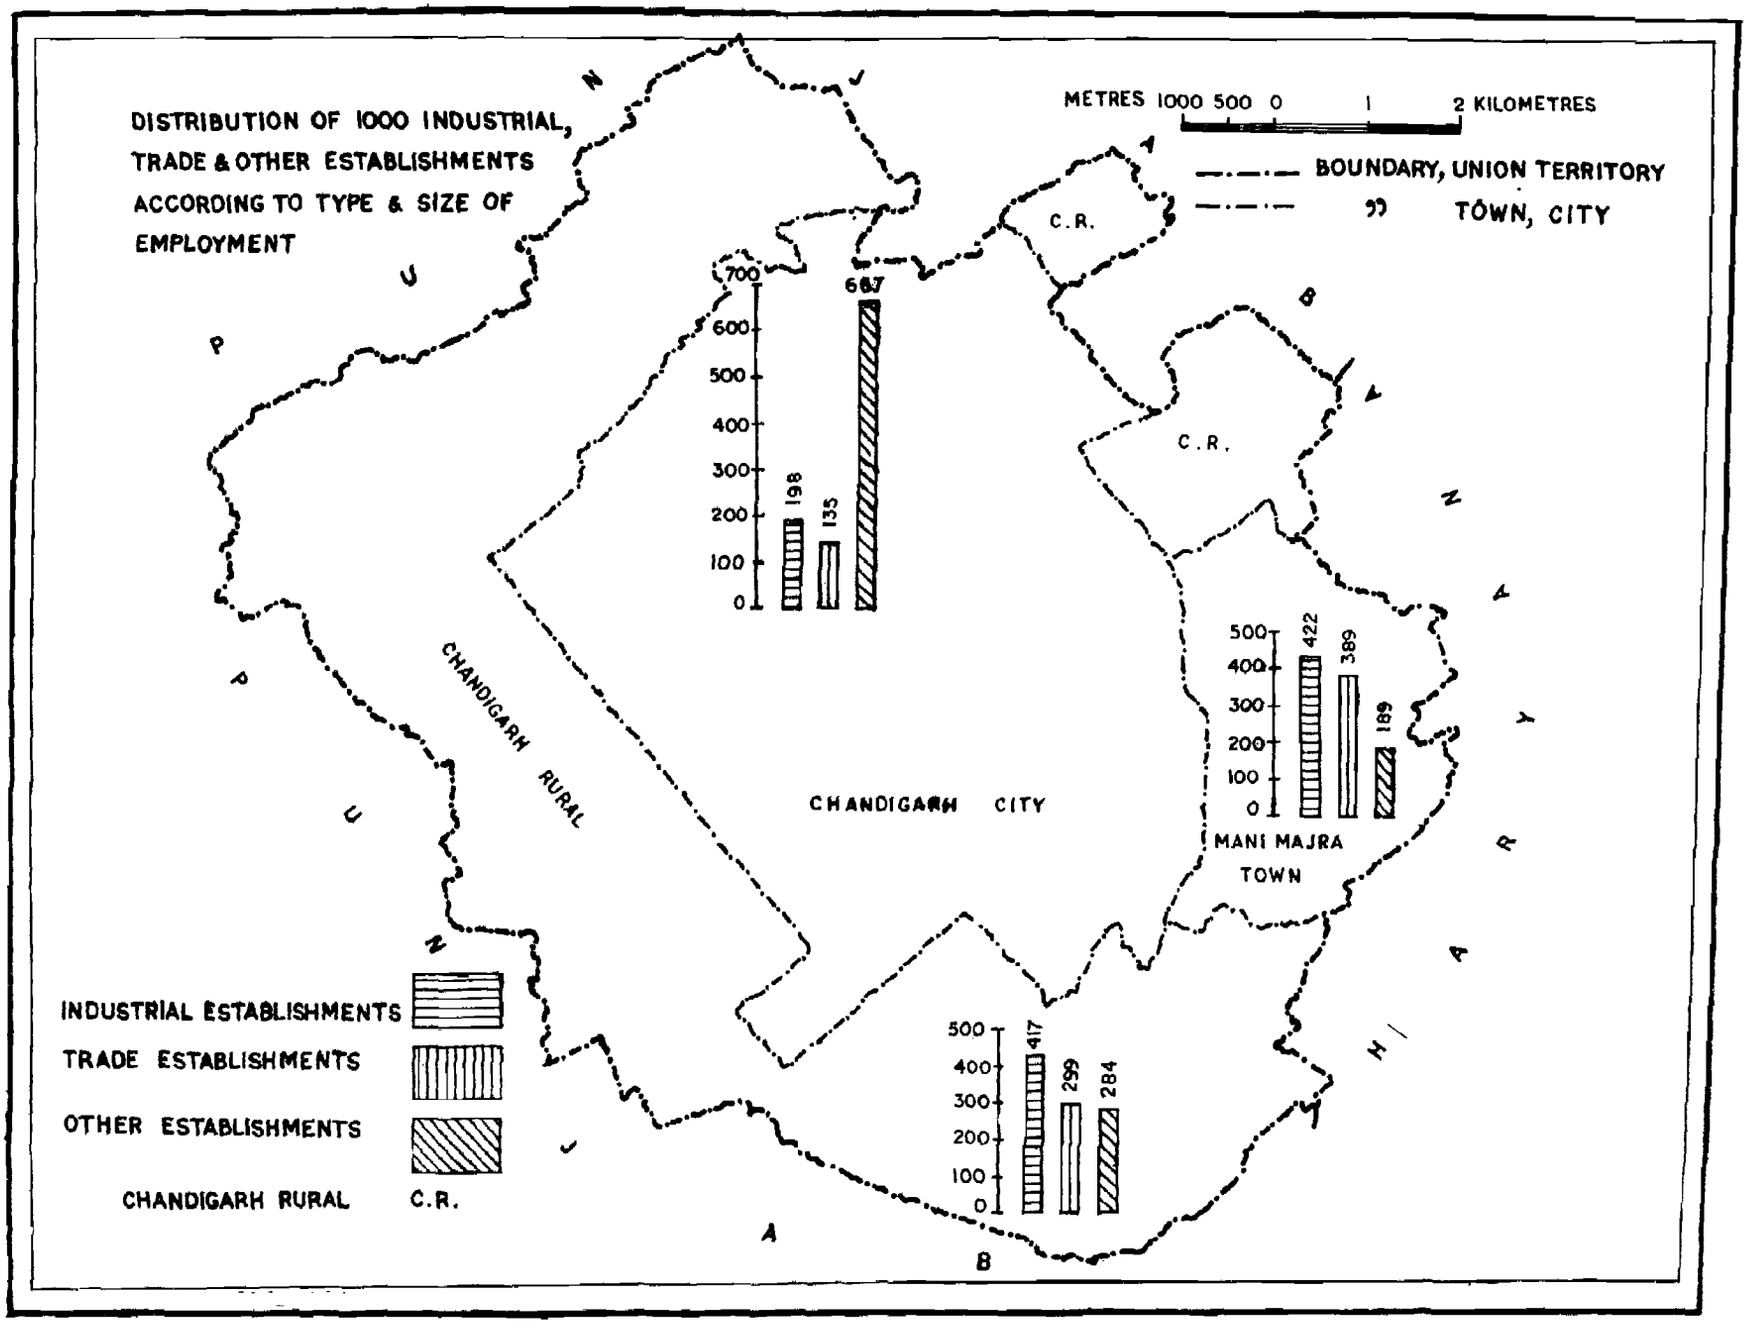

Unregistered Workshops.—There are 1,018 unregistered workshops in the Union Territory of Chandigarh, 975 in the urban areas and 43 in rural areas. Chandigarh City alone accounts for 785 unregistered workshops. It is thus obvious that bulk of unregistered workshops are located in the urban areas and that too in the city of Chandigarh.

Household Industries.—There are 234 units of household industries in the Union Territory of Chandigarh, 129 in urban areas and 105 in rural areas. Chandigarh City accounts for 92 units engaged in household industries. Comparatively speaking there are more units of household industries in the rural areas than in the urban areas. In the rural areas there are 268 establishments per 1,000 establishments engaged in household industries while in the urban areas of Chandigarh the proportion is as low as 26 out of 1,000. This is quite natural as there is fairly high concentration of household industries like Poultry and Dairy Farming etc., in the rural areas of Chandigarh.

(ii) Trade or Business Establishments

There are as many as 2,606 trade or business establishments in the Union Territory of Chandigarh

158 in rural areas and 2,448 in urban areas. Chandigarh City alone accounts for 2,133 such establishments. It is interesting to note that retail trade establishments claim the lion's share of trade or business establishments i.e., as many as 2,054 establishments, 140 in rural areas and 1,914 in urban areas have been returned as retail trade or business establishments. Chandigarh City alone accounts for 1,647 such establishments. There are only 128 wholesale trade or business establishments, all of which are located in the urban areas of Chandigarh Union Territory. Chandigarh City alone accounts for 125 such establishments. The remaining 3 establishments are reported in Mani Majra Town.

(iii) Other establishments

In this category fall Educational Institutions, Public Health Institutions, Hotels, Restaurants, Tea Shops, Cinema Houses, Barber's Shops and Government Offices etc. In the Union Territory of Chandigarh there are 1,456 such establishments, 1,372 in urban areas and 84 in rural areas. Chandigarh City accounts for 1,287 such establishments.

Educational Institutions.—There are 248 educational institutions in Union Territory of Chandigarh, 17 in rural areas and 231 in urban areas. Chandigarh City alone accounts for 217 Educational Institutions. This works out to one Educational Institution per 1,000 population separately for the Union Territory of Chandigarh and for Chandigarh City. This figure appears to be quite adequate. It may not be out of context to mention here that in Union Territory Chandigarh literacy rates during 1971 Census are the highest in the country, the rates being 66.97 per cent for males and 54.35 per cent for females. To great extent such high rates of literacy are attributed to these institutions. Among the educational institutions more prominent are : Panjab University Campus with its numerous departments, Panjab University Evening College, Government College for Men, Government College for Women, D.A.V. College, for Men, Mehar Chand Mahajan D.A.V. College for Women, Sri Guru Gobind Singh College, Basic/Technical Training College, Basic/Technical Teachers Training Institute, Home Science College, Government Fine Arts College, College of Architecture, Panjab Engineering College, Post-Graduate Institute, Central Polytechnic, Central School, Carmel Convent, Saint John, Model Schools in Sector 16, 35 and 22. Besides there are many Higher Secondary/High or Primary Schools being run by the government or private educational institutions.

Public Health Institutions.—There are 154 Public Health Institutions in the Union Territory Chandigarh, 11 in rural areas and 143 in urban areas. In Chandigarh City alone there are 129 such institutions. For the Chandigarh Union Territory it works out to, roughly one Public Health Institution for every 2,000 of population which also seems to be adequate. There are three hospitals viz., (i) Nehru Hospital, (ii) General Hospital and (iii) Military Hospital in Chandigarh. The first two render medical facilities to general public but the third type caters to the needs of in-service/retired military personnels and their families only. Besides there is one Veterinary Hospital. 13 dispensaries some of which are Ayurvedic are dispersed in various sectors of Chandigarh City. Religious institutions like Rama Krishna Mission and Arya Samaj are also running free dispensaries. Most of the medical institutions are privately run and are rendering excellent services to the public. The standard of medical facilities in the urban areas is fairly high compared with the rural areas. This is because medical practitioners have a strong bias in favour of urban areas due to personal considerations. It may not be incorrect to say that medical facilities available in Chandigarh Union Territory are one of the best in the country.

Besides the educational institutions and public health institutions there are 1,054 other establishments, 56 in the rural areas and 998 in the urban areas. Chandigarh City alone accounts for 941 such establishments. It may be mentioned here that the majority of these establishments are the Government offices which are widely dispersed in Chandigarh City in private hired buildings since main office buildings like 17 bays, 30 bays and Civil Secretariat cannot meet the demands of accommodation for various types of offices.

CHAPTER III

SIZE OF EMPLOYMENT AND TYPE OF POWER OR FUEL USED

Industrial Establishments

The scope of the present study is confined to presenting a classified list of factories and workshops according to (i) size of employment and (ii) type of power or fuel used. Since this list contains persons as working by themselves with small capital investment and small output as also big workshops and registered factories, it will be more appropriate to refer to them collectively as (i) Industrial units rather than unregistered workshops and registered factories.

Table E—II Part A gives the distribution of manufacturing, processing or servicing establishments other than household industries classified by registered factories, unregistered workshops and size of employment while Subsidiary Table E-II Part A.1 refers to the distribution of 1,000 manufacturing, processing or servicing establishments other than household industry as registered factories, unregistered workshops in each division/major groups of N.I.C. and by size of employment in rural and urban areas separately.

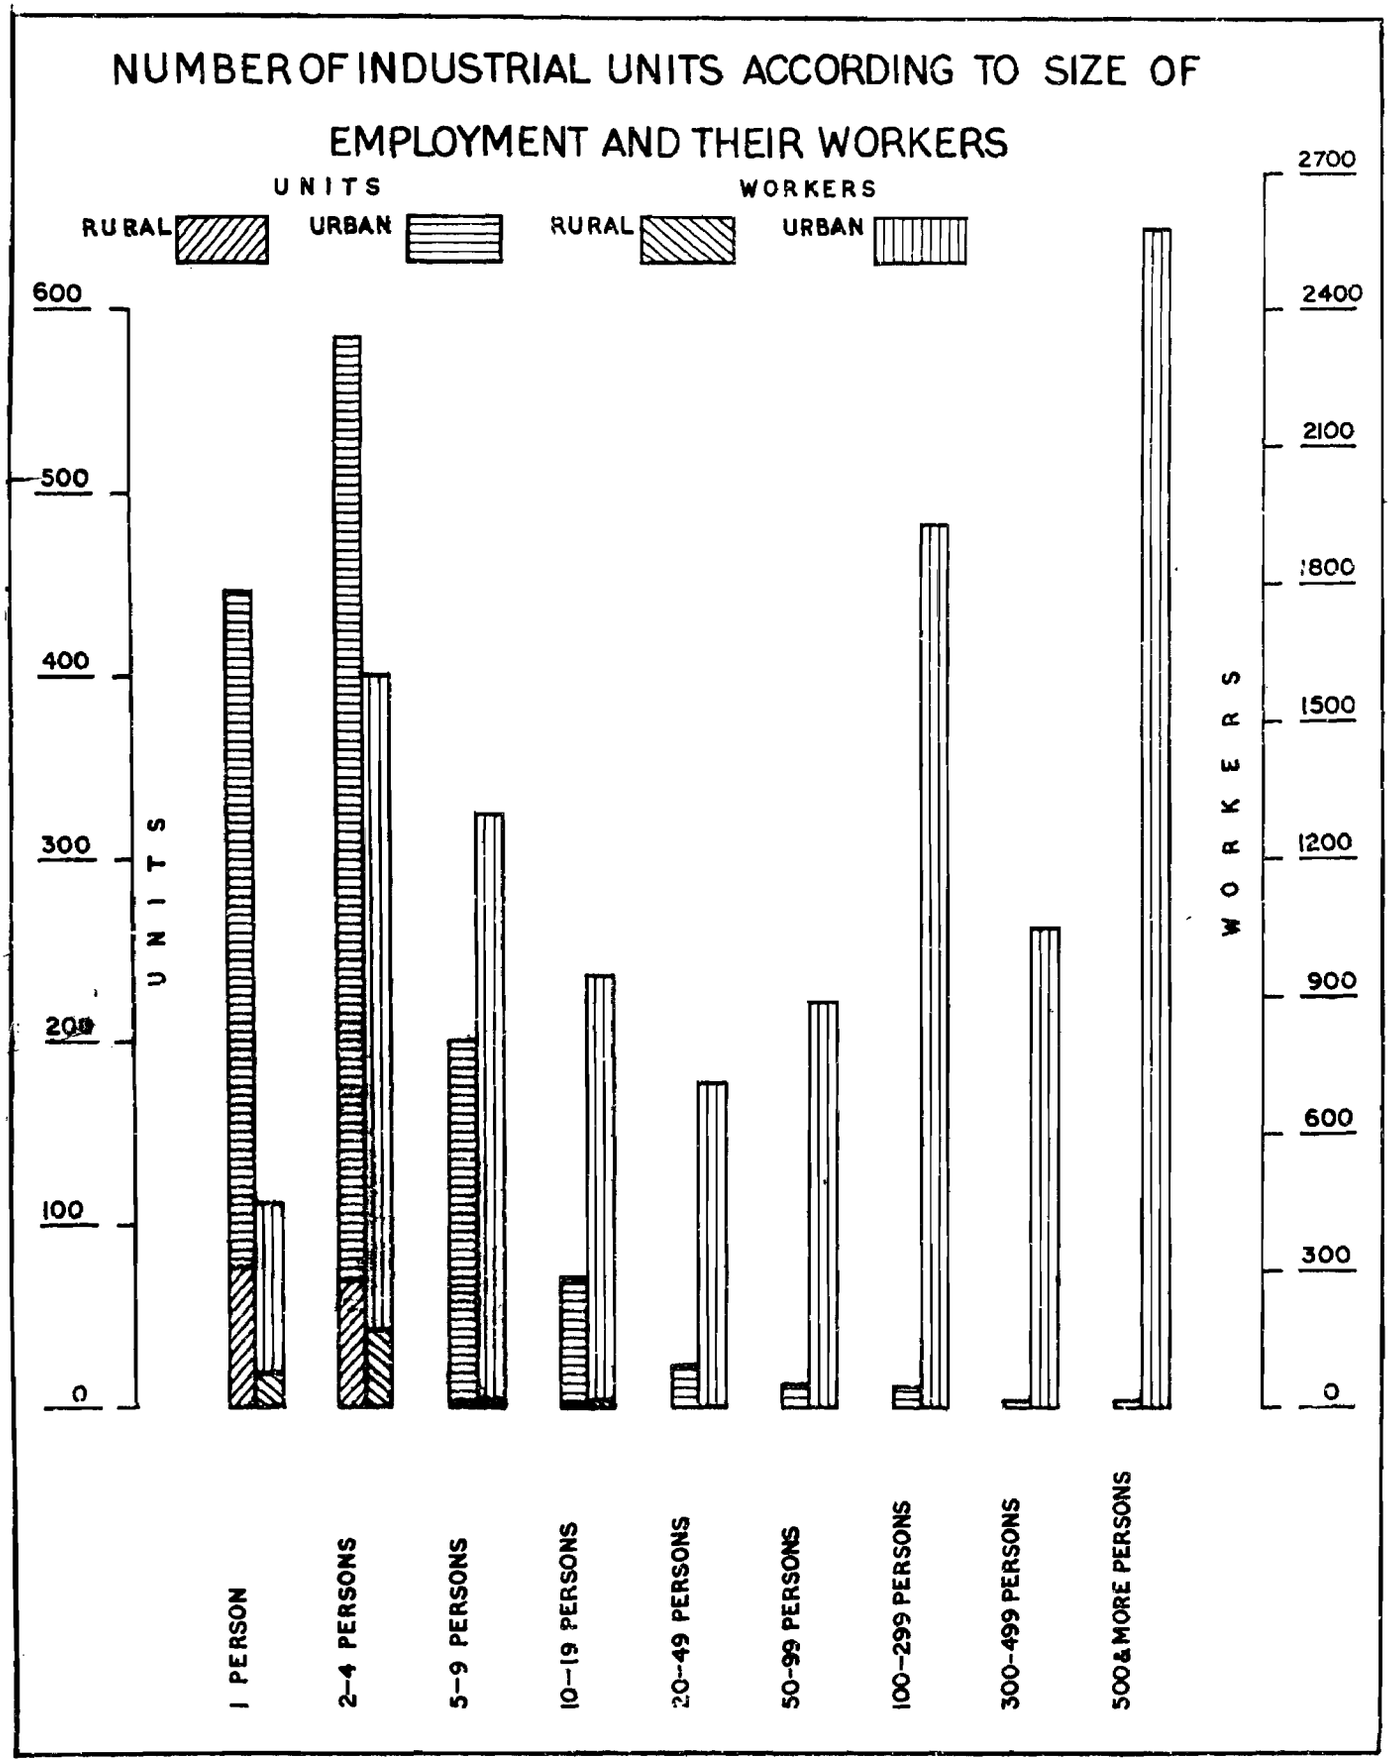

There are, in all, 1,130 industrial units in the Union Territory of Chandigarh, 44 in rural areas and 1,086 in urban areas. Chandigarh city alone accounts for 893 industrial units. It is thus obvious that majority of industrial units are concentrated in the urban areas of Chandigarh and that too in the city of Chandigarh.

Size of Employment

It is noticed from Table E-II Part A and its Subsidiary Table that it is the organised sector which provides the maximum employment. 112 industrial units in the Union Territory of Chandigarh absorb about 7,869 persons while as many as 1,018 small industrial units (unregistered workshops) provide employment to only 3,087 persons, while 234 units in the category of household industry provide employment to only 509 persons. The vast majority of industrial units are of very small size as is evident from the table given below which gives the distribution of industrial units and workers according to employment groups:

DISTRIBUTION OF INDUSTRIAL UNITS AND WORKERS ACCORDING TO EMPLOYMENT GROUPS

Employment Group	Total		Rural		Urban	
	Number	Percentage to total	Number	Percentage to total	Number	Percentage to total
A—Industrial Units						
Total	1,130	100·0	44	100·0	1,086	100·0

300—499 persons	1,051	9·6	..	..	1,051	9·7
500 and more persons	2,575	23·5	..	..	2,575	23·7
Persons unspecified	..	..	..	..	..	..

Units employing 1 person:—As many as 30 per cent of the units in the Union Territory of Chandigarh have just one worker each. They form 48 per cent of the total number of the units in rural areas and 30 per cent in urban areas. As large number of persons find employment in bigger industrial units the number of persons in one man units is only 3 per cent of the total 24 per cent in rural areas and 3 per cent in urban areas.

Units employing 2—4 persons:—This category accounts for 42 per cent of the industrial units, 50 per cent in rural areas and 42 per cent in urban areas. The number of persons employed in 2-4 persons units is 12 percent of the total number of industrial workers in Union Territory, 56 per cent in rural areas and 12 percent in urban areas. It will be noticed that as many as 98 per cent of industrial units in rural areas have 4 workers or less.

Units employing 5—9 persons :—The units of this size form 16 per cent of the total number in the Union Territory Chandigarh and none of them are located in the rural areas. The persons working therein comprise 11 per cent of the total number of industrial labour force.

Units employing 10—19 persons:—Such units are 6 per cent of the total industrial units which give employment to 9 per cent of the industrial labour force. Of these 71 are in urban areas and only one in rural areas.

Units employing 20—49 *persons*:—Such units, 24 in number, form 2 per cent of the total units employing nearly 7 per cent of the total labour force. All these units are located in urban areas.

Units employing 50—99 *persons*:—There are only 14 such units, all located in the urban areas of the Union Territory of Chandigarh accounting for 1 per cent of the total units and employing 8 per cent of the total labour force.

Units employing 100 *or more persons*:—There are 18 such units which account for nearly 2 per cent of the total industrial units in the Union Territory of Chandigarh but employ about 51 per cent of the total industrial force. It is interesting to note that all such units are located in the urban areas of Chandigarh and that these units employ more than half of the total labour force.

The more important industries are classified according to the size of employment on the basis of Table E II Part A.

1. Food Products

In all, there are 186 units engaged in production of food products, 23 in rural areas and 163 in urban areas. It may be mentioned here that a large number of industrial units under this category are engaged in the production of *Atta* and flour and processing of other foodgrains such as *Dals* and manufacturing of Bakery and Dairy products. This industry provides employment to a total number of 1,289 persons, 44 in rural areas and 1,245 in urban areas. There are only 3 concerns employing 50—99 persons and only one concern, viz., Chandigarh Milk Scheme, a Government undertaking, employs 100—299 persons. Only 10 industrial units employing about 121 persons are engaged in the production of hydrogenated and other edible oils, manufacture of ice, manufacture of prepared animal feeds and manufacture of starch etc.

2. Manufacture of Beverages, Tobacco and Tobacco Products

There are only 6 industrial units engaged in the manufacture of beverages. Predominant among these units are those engaged in the preparation of aerated water. These units provide employment to 798 persons and are situated in the urban areas. However production of Tobacco products is conspicuous by its absence in the Union Territory of Chandigarh. The two most important units are the Punjab Beverages Pvt. Ltd. and the Chandigarh Bottling Company which employ 700 persons and 76 persons respectively. These produce country famous brand of cold drinks 'Coca Cola' and 'Gold Spot' respectively. No unit is located in the rural areas of Chandigarh.

3. Manufacture of Cotton Textiles

There are only 11 industrial units which are engaged in the manufacture of cotton textiles all in the unorganised sector which provide employment to only 24 persons. All the units are located in the urban areas and there is not a single unit which provides employment to more than 9 persons.

4. Manufacture of Wool, Silk and Synthetic Fibre Textiles

There is only one unit i.e. Modella Woollens in the Union Territory of Chandigarh providing employment to 400 persons. In this unit manufacture of wool tops is undertaken. This unit is located in Chandigarh City in the Industrial Area.

5. Manufacture of Textiles Products (including wearing apparel other than footwear)

There are 187 units all in the unorganised sector in the Union Territory of Chandigarh which provide employment to 660 persons. Among these there are only two units which employ 20—49 persons each. The majority of units are those employing one person or between 2—4 persons. There are only two units located in rural areas which provide employment to only 4 persons.

6. Manufacture of Wood Products, Furniture and Fixtures

There are 124 units (only two in the organised sector) in the Union Territory of Chandigarh and these units employ 423 persons. Nine of these units are located in rural areas and provide employment to only 10 persons. There are 7 units which provide employment to 10—19 persons each.

7. Manufacture of Paper and Paper Products and printing, publishing and Allied industries.

This particular industry provides the largest employment to industrial labour force in the Union Territory of Chandigarh. There are 66 units providing employment to as many as 2,374 persons. There are two units providing employment to 50—99 persons, two units providing employment to 100—299 persons, one unit providing employment to 300—499 persons. Government Printing Press, at Chandigarh alone provides employment to 1,300 persons and is considered one of the largest in the North Western India. All these units are located in the urban areas.

8. Manufacture of Leather, Leather and Fur Products (except repair)

There are 45 units engaged in the manufacture of leather, leather and fur products (except repair) providing employment to 142 persons. There is no unit located in the rural areas of Chandigarh. One unit provides employment to 20—49 persons.

NUMBER OF INDUSTRIAL UNITS AND WORKERS IN DIFFERENT TYPES OF INDUSTRIES

9. Manufacture of Rubber, Plastic, Petroleum and Coal products

Eleven units are engaged in the production of rubber, plastic, petroleum and coal products and these units provide employment to 55 persons. There are only two units in the organised sector providing employment to 10—19 persons. All the units are located in urban areas of Chandigarh.

10. Manufacture of Chemical and Chemical products (except products of Petroleum and Coal)

Fourteen units employing 243 persons are engaged in the manufacture, of chemical and chemical products. All these units are located in the urban areas. There is only one unit which employs 10—19 persons and one unit viz. the Pfizer Limited which employs between 100—299 persons. This factory is engaged in the manufacture of life saving medicines and drugs which are even exported to foreign countries. This factory is located in Chandigarh city in the industrial area.

11. Manufacture of non-metallic mineral products

There are 21 units which employ 385 persons in the Union Territory of Chandigarh. Out of these only one unit is located in the rural areas and provides employment to 18 persons. Two units employ 50—99 persons each, while only one unit provides employment between 100—299 persons.

12. Basic Metal and alloys industries

There are only 7 units in the Union Territory of Chandigarh. These provide employment to 218 persons. There is no unit located in the rural areas. There are only two units which provide employment to 50—99 persons each.

13. Manufacture of metal products and parts except machinery and transport equipment

There are 71 units which give employment to as many as 768 persons. Two of these units are in the rural areas of Chandigarh which provide employment to only 4 persons. There are 3 large units which are employing between 100—299 persons each.

14. Manufacture of Machinery, Machine Tools and parts except Electrical Machinery

There are 31 units in the Union Territory of Chandigarh. These units provide employment to 538 persons. All these units are located in the urban areas. There are two units which are employing between 100—299 persons each.

15. Manufacture of Electrical Machinery, Apparatus, Appliances and Supplies and Parts

There are 16 units in the Union Territory of Chandigarh and they provide employment to 195 persons. There is only one unit which employs between 50—99 persons. None of the units is located in the rural areas.

16. Manufacture of Transport Equipment and Parts

There are 9 units employing 147 persons in the Union Territory of Chandigarh. None of the units is located in the rural areas. There is only one unit which is providing employment to between 50—99 persons.

17. Other Manufacturing Industries

There are 49 units in this category. These provide employment to 658 persons. Only two units are located in the rural areas which provide employment to only 2 persons. There is only one unit viz. Meters and Instruments Private Limited located in the city of Chandigarh which alone provides employment to more than 500 persons. This unit manufactures chiefly electric meters which are exported to other states in the country.

18. Repairs

This major group accounts for the maximum number of industrial units in the Union Territory of Chandigarh as there are 275 industrial units in this category. All these units give employment to 1,639 persons. There are only 5 units which are located in the rural areas which provide employment to only 6 persons There are 6 units which provide employment to 20—49 persons each, two units provide employment to 50—99 persons each, 2 units employ 100—299 persons and only one unit provide employment to between 300—499 persons.

Large Factories engaging 100 or more workers

If we apply the criterion for a large factory as employing 100 workers we find that there are 18 such factories in the Union Territory. All these factories are located in the city of Chandigarh in the Industrial Area where Government has given industrial plots at subsidised rates for the development of industries. Besides Government provides other facilities for the healthy growth of industries. Out of these four factories are engaged in the manufacture of paper and paper products, printing and publishing and allied industries. The next group is of metal products and parts (except machinery and transport equipment) and repairs having 3 factories each. Manufacture of machinery, machine tools and parts except Electricity, machinery accounts for two factories while food-stuffs, beverages and woollen textiles share one factory each.

All these factories are listed below according to industrial classification along with number of units in each class:

Factories with atleast 100 workers

(1)	Food Stuffs	1
(2)	Beverages	1
(3)	Woollen Textiles	1
(4)	Paper and Paper products printing and publishing	4
(5)	Chemical and Chemical products	1
(6)	Non-metallic mineral products	1
(7)	Metal products and parts except machinery and transport equipment	3
(8)	Machinery, Machine Tools and parts except Electric Machinery	2
(9)	Repair	3
(10)	Miscellaneous	1

From the foregoing description it is clear that paper and paper printing and publishing and allied industries are providing the largest employment. Industrial units engaged in repairs are a close second while food products and beverages occupy third place in respect of employment given. It could be seen from the earlier discussion that the larger industrial units provide employment to more than 50 per cent of the industrial labour force engaged in various units and thus occupy an important place among the industrial units in the Union Territory.

Type of Power or Fuel Used

Information about the type of power or fuel used was recorded in column 8 of the Establishment Schedule. This information was collected in respect of units engaged in manufacturing, processing or servicing and household industries. Information thus collected was tabulated in the form of Table E-II Part B and Table E-II Part C. Table E-II Part B refers to the distribution of manufacturing, processing or servicing establishments other than household industries classified by industry, fuel/power or manual used and size of employment while Subsidiary Table E-II Part B.1 gives the distribution of 1,000 manufacturing, processing or servicing establishments other than household industries in each division/major group of National Industrial Classification and the kind of fuel/power used and size of employment. The various types of fuels have been grouped as under :

(i) Electricity,

(ii) Liquid Fuel,

(iii) Coal, Wood and Bagasse, and

(iv) Other Power.

The following table shows the extent to which different types of power is used by the industrial units in the Union Territory of Chandigarh :

Use of power in Industrial units

Type of Fuel or Power used	Total		Rural		Urban	
	Number	per-cent age to total	Number	per-cent-age to total	Number	Per-cent-age to total
Total Units	1,130	100·0	44	100·0	1,086	100·0
I. All Fuels/Power	539	47·7	16	36·4	523	48·2
(a) Electricity	362	32·0	5	11·4	357	32·9
(b) Liquid Fuel	10	0·9	5	11·4	5	0·5
(c) Coal, Wood and Bagasse	157	13·9	6	13·6	151	13·9
(d) Other Power	10	0·9	..	..	10	0·9
II. Manual	591	52·3	28	63·6	563	51.8

It may be noted that 52.3 per cent of the industrial units are operated manually. It is interesting to note that there is a higher proportion of units which are worked manually in rural areas than in urban areas, their percentages being 63.6 and 51.8 respectively. The most common type of power used is electricity which alone serves 32 per cent of the industrial units in the Union Territory of Chandigarh, 11.4 per cent in the rural areas and 32.9 per cent in the urban areas. Thus the use of electricity in the industrial units is more common in the urban areas than in the rural areas. This is so because such facilities could be easily provided in the city where industrial units are found in larger concentrations. Next to electricity coal, wood and bagasse is the important source of power which is commonly in use. Nearly 13.9 per cent of the industrial units in the Union Territory of Chandigarh are making use of this source of power. The use of these fuels is evenly divided between the rural and urban areas of Chandigarh. The other two sources of power namely liquid fuel and other power are not so common. These cater to the needs of less than 1 per cent of the industrial units.

Power and size of Employment

In the statement given below percentage distribution of industrial units by differents size of employment and according to the use of power is given:

Distribution of 100 units of different employment size according to use of power

Size of Employment	All types of power	Electricity	Liquid fuel	Coal wood and bagasee	Other power	Working without Power (Manual)
1	2	3	4	5	6	7
Total	47·7	32·0	0·9	13·9	0·9	52·3
1 person	31·3	16·1	0·9	12·6	1·7	68·7
2—4 persons	40·6	26·0	0·9	13·1	0·6	59·4
5—9 persons	72·1	49·7	1·6	20·2	0·6	27·9
10—19 persons	72·2	55·5	..	16·7	..	27·8
20—49 persons	87·5	75·0	..	12·5	..	12·5
50—99 persons	92·9	92·9	..	..	..	7·1
100—299 persons	100·0	100·0	..	..	..	..
300—499 persons	100·0	100·0	..	..	..	..
500 & more persons	100·0	100·0	..	..	..	..

The above table reveals that the percentage of power operated units increases with the size of employment. Among one man units only 31.3 per cent avail of power, whereas cent per cent industrial units employing 100 or more workers make use of power. The use of electricity as a source of power becomes more and more common in units as the size of employment increases, varying from 16.1 per cent in case of one man units to cent per cent among units employing 100 or more persons. The use of liquid fuel and other power is conspicuous by its absence among units employing more than 10 persons. This is because the operational costs are comparatively high by the use of liquid fuels. The use of these two sources of power is only confined to units employing 9 or less persons but here also their use is very limited due to reason afore mentioned. The other important source of power is coal, wood and bagasse. It is essentially a source of power for small units. The use is fairly common in units employing between 5—9 persons. In units employing 50 or more persons these fuels are conspicuous by their absence as source of power

It may be interesting to note from the main Table E-II Part B that the units using electricity as the source of power provide the bulk of the employment to industrial labour force in the Union Territory. There are 362 units operated by electricity which provide employment to as many as 8,507 persons. The number of units using electricity as the source of power is very small in rural areas, there being 5 units which provide employment to 13 persons only. In Chandigarh city 314 units are

served by electricity which provide employment to 8,323 persons. The number of units working on coal,wood and bagasse is also much more in urban areas than in rural areas. There are 151 units using coal, wood and bagasse as the source of power in urban areas which provide employment to 668 persons. Chandigarh city alone accounts for 116 such units, which give employment to 584 persons. In the rural areas there are only 6 units which provide employment to 26 persons.

We may classify the important industries by the kind of power and fuel used. A brief description is given below :

(i) *Food Products* (Major Group 20-21). Coal, wood and bagasse is the major source of power for the industrial units engaged in the manufacture of dairy products, bakery products, grainmill products, canning and preservation of fruits and vegetables, manufacture and refining of sugar, production of indigenous sugar *boora, khandsari*, gur etc. from sugarcane, slaughtering, preparation and preservation of meat, canning preserving and processing of fish, crustacea and similar foods and manufacture of cocoa, chocolate-and sugar confectionery (including sweetmeats). It is observed that in the Union Territory 90 per cent of the units under these major groups use power or fuel while 10 per cent units are operated manually. Out of the units operated by power or fuel 55 per cent use coal, wood and bagasse, 31 per cent electricity and 3 per cent liquid fuels. Only 1 per cent industrial units use other power. In the case of urban areas 63 per cent of the industrial units under these major groups use coal, wood and bagasse while 33 per cent of the industrial units use electricity. However, in the case of rural areas 52 per cent of the units are manually operated while 22 per cent of the units are using electricity and 22 per cent of the units use liquid fuels. Only 4 per cent of the units are using coal, wood and bagasse as the source of power.

Industrial units (under major group 21) engaged in the manufacture of hydrogenated oils, *vanaspati ghee* etc. manufacture of other edible oils, and fats e.g. mustard oil, groundnut oil, *til* oil etc. tea processing, coffee curing, roasting, grinding, cashewnut processing like drying, shelling, roasting, salting, etc., manufacture of ice, manufacture of prepared animal feeds and manufacture of starch etc. are using electricity as the major source of power. 90 per cent of the units are using electricity as the source of power while only 10 per cent of the units are using coal, wood and bagasse. As already stated no unit under this major group is located in the rural areas.

(ii) *Beverages, Tobacco and Tobacco Products* (Major Group 22). Among the industrial units under major group 22 engaged in the manufacture of beverages, tobacco and tobacco products, 83 per cent of the units are using electricity as the source of power while 17 per cent of the units are not using any power or fuel at all but are operated manually. No industrial unit under this major group is located in the rural areas.

(iii) *Cotton Textiles* (Major Group 23). A great majority of the industrial units under major group 23 are not using any power, as 73 per cent of the units are using manual power and only 27 per cent are using electricity as the source of power. No industrial unit in this group is located in the rural areas either.

(iv) *Wool Silk and Synthetic Fibre Textiles* (Major Group 24). There is only one industrial unit in major groups 24 and this unit is using electricity as the source of power. This unit is located in Chandigarh city.

(v) *Textile Products (including wearing apparel other foot wear)* (Major Group 26). The bulk of the units under major group 26 are manually operated. 93 per cent of the units are not using any power while only 7 per cent depend upon electricity as the source of power. In rural areas no unit is using any power.

(vi) *Wood and Wood Products, Furniture and Fixtures* (Major Group 27). A majority of the industrial units under major group 27 are not using any power. 23 per cent of the industrial units are using electricity as the source of power, 77 per cent of the units are operated manually. No unit is located in the rural areas under this major group.

(vii) *Paper and Paper products, Printing, Publishing and Allied industries* (Major Group 28). Among industrial units under major group 28 the use of electricity as the source of power is fairly popular, as 92 per cent of the units are using electricity while only 8 per cent are operated manually.

(viii) *Leather, Leather and Fur products (except Repair)* (Major Group 29). Industrial units under major group 29 are mostly manually operated. Of these 93 per cent units do not use any power or fuel while only 7 per cent are making use of electricity as the source of power. No industrial unit under this major group is located in the rural areas.

(ix) *Rubber, Plastic, Petroleum and Coal products* (Major Group 30). 55 per cent of the units under major group 30 are using electricity, 36 per cent of the units do not use any power or fuel. The percentage of the industrial units which depend upon liquid fuels is only 9.

(x) *Chemical and Chemical products (except products of Petroleum and Coal* (Major Group 31). 50 per cent of the industrial units under major group 31 make use of electricity while 36 per cent of the units are manually operated. 14 per cent of the units make use of fuels like coal, wood and bagasse. All the industrial units under this major group are located in the urban areas.

(xi) *Non-metallic Mineral Products* (Major Group 32). Among the units under major group 32 the use of coal, wood and bagasse was found in the case of 47 per cent of the units. 43 per cent of the units make use of electricity as the source of power but 10 per cent of the units are manually operated. In the case of units located in rural areas cent per cent units make use of fuels, coal, wood and bagasse.

(xii) *Basic Metal and Alloys industries* (Major Group 33). The use of electricity appears to be more common among major group 33 as percentage of electricity using units is 86. The remaining 14 per cent of the industrial units use coal, wood and bagasse. There is no industrial unit in the rural areas under this major group.

(xiii) *Metal products and parts, except Machinery and Transport Equipment* (Major Group 34). 69 per cent of the units under major group 34 utilise electricity while 17 per cent of the industrial units meet their requirements from fuels like coal, wood and bagasse. 6 per cent of the units are making use of other power while 8 per cent do not use any power or fuel. Cent per cent units located in the rural areas are using coal, wood and bagasse.

(xiv) *Manufacture of Machinery, Machine Tools and parts except Electrical Machinery* (Major Group 35). 45 per cent of the units under major group 35 use electricity as the source of power while only 3 per cent make use of coal, wood and bagasse. 52 per cent of the units are manually operated.

(xv) *Electrical Machinery, Apparatus, Appliances and Supplies and parts* (Major Group 36). 88 per cent of the units under major group 36 use electricity as source of power while only 12 per cent do not use any power or fuel.

(xvi) *Transport equipment and parts* (Major Group 37). Here also a great majority of industrial units i.e. 78 per cent depend upon electricity as the source of power while 22 per cent do not make use of any power or fuel.

(xvii) *Other Manufacturing industries* (Major Group 38). 49 per cent of the industrial units under major group 38 use coal, wood and bagasse. 33 per cent of the units do not use any power or fuel while 10 per cent of the units make use of electricity. 2 per cent of the units use liquid fuel while 6 per cent make use of other power. In the rural areas all the units make use of coal, wood and bagasse.

(xviii) *Repair* (Major Group 39). 74 per cent of the industrial units under the major group 39 do not use any power while 26 per cent use electricity as the source of power. All the industrial units in this category in the rural areas are manually operated.

From the discussions in the foregoing pages it is quite clear that in Union Territory of Chandigarh large industrial units consume electricity as the source of power and such of the units provide employment to the majority of the industrial labour force.

Household Industries

Household Industry. A household industry has been defined as an industry conducted by the head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lived in urban areas. The industry should not be run on the scale of a registered factory.

There were 234 units which qualified this definition in the whole of Union Territory. Such of the units give employment to as many as 509 persons. Out of these 105 units are located in the rural areas providing employment to 187 persons. In the urban areas there number is slightly higher, there being 129 units employing 322 persons. Thus comparatively speaking units in the urban areas are more labour intensive. Chandigarh city accounts for 92 such units providing employment to 267 persons. It is observed from Table E-II Part C which gives the distribution of household industry establishments classified by industry, fuel/power used and size of employment and its Subsidiary Table E-II Part C.1 that a majority of the industrial units falling in the category of household industries do not use any power or fuel. These units are manually operated. The use of electricity is found in case of 7 units. In terms of percentages it comes to 2.99 only. As many as 185 units, 79 per cent are without the use of any power or fuel. 18 per cent of the industrial units in this category use coal wood and bagasse. It is thus clear that the household industries in the Union Territory of Chandigarh have not taken to electricity as has been in the other countries. It is interesting to observe that all the units making use of electricity as the source of power are confined only to urban areas, and that none of the units located in rural areas make use of electricity as the source of power. It may further be noted that only limited types of household industries such as those engaged in the production of (i) Food Products (ii) Beverages, Tobacco and Tobacco products (iii) Wood and Wood Products, furniture and fixtures (iv) Repair make use of electricity and there remains much to be done in case of other household industrial units.

When we come to the size of employment we find that largest employment has been provided by the household industries which are engaged in the manufacture of food products (major group 20-21). It may be observed that 123 units under household industries provide employment to as many as 318 persons. Next in the category comes the household industries engaged in the manufacture of textile products (including wearing apparel other than foot wear). There are 22 units in this category which provide employment to 35 persons only. The other types of household industries which provide substantial employment are of non-metallic mineral products and

that of leather, leather and fur products. When we come to rural and urban differentials we notice almost a similar pattern because in both rural as well as urban areas household industries engaged in the production of food products (major group 20-21) provide largest employment. In the urban areas 69 units engaged in the production of food products (major group 20-21) provide employment to as many as 210 persons while in the rural areas 54 units (major group 20-21) provide employment to as many as 108 persons. It may also be noted here that all units provide employment to less than 10 persons in any single unit. It is thus obvious that industrial units coming under the category of household industries are generally speaking small units and their contribution in providing employment to the industrial labour force is not very significant. Most of the units are operated without any power and these give employment to majority of workers engaged in household industries. 185 units provide employment to 401 persons which comes to 78.7 per cent while 7 units making use of electricity give employment to only 17 persons which is 3.3 per cent of the total workers engaged in the household industries. There are 42 units which make use of fuels like coal, wood and bagasse and employ 91 persons which is 17.9 per cent of the total workers in household industries.

Trade Establishments

According to the Table E-III which gives the distribution of trade/commercial establishments classified by the type of business or trade and size of employment, there are in all 2,606 trade or business establishments in the Union Territory, of which 2,448 are in urban areas and 158 in rural areas. These establishments provide employment to a total of 7,939 persons, 7,742 in urban areas and 197 in rural areas. A vast majority of these units are of small size. This fact is brought out by the following table wherein trade or business establishments and workers are arranged according to employment groups:

Distribution of business or trade establishments and workers according to employment groups

Employment Group	Total		Rural		Urban	
	Number	Percentage to total	Number	Percentage to total	Number	Percentage to total
A—Business or trade units

Unspecified ..	..	..	..	..	..	..

(*i*) *Units employing* 1 *person.* As many as 45.9 per cent of the trade establishments are single worker. These account for 81.7 per cent of the trade establishments in rural areas and 43.6 per cent in the urban areas. The single worker trade units provide employment to 15.1 per cent of the total working force engaged in trade and business establishments. Their employment potential is 65.5 per cent in rural areas as against 13.8 per cent in urban areas.

(*ii*) *Units employing* 2—4 *persons.* This category accounts for 40.9 per cent of the trade units giving employment to 33.7 per cent of the total working force in trade and business establishments. Only 17.7 per cent of the trade units under this category are in rural areas which provide employment to 31.5 per cent while as many as 42.3 per cent of the trade units in this category are in urban areas and they provide employment to 33.7 per cent of the total working force employed in trade and business establishments. It may be observed that as many as 99.4 per cent of the trade units in rural areas have employment size of up to 4 persons. The preponderance of such small units in the rural areas is quite natural because in the rural areas one generally comes across small establishments manned by single person. Even in the urban areas 86.8 per cent of the trade units are those which give employment to up to 4 persons.

(*iii*) *Units employing* 5—9 *persons.* Trade establishments of this size group form only 9 per cent of the total establishments engaged in trade or business in the Union Territory. There is only one unit in this category which is located in rural areas. The persons working therein comprise 18.8 per cent of the total working force engaged in trade or business establishments.

(*iv*) *Units employing* 10—19 *persons.* Such units are only 2.6 per cent of the total but they give employment to 11.3 per cent of the total working force. None of the units in this category is located in rural areas.

(*v*) *Units employing* 20—49 *persons.* There are 29 units which form 1.1 per cent of the total trade establishments and these provide employment to 10.5 per cent of the total working force engaged in trade or business establishments. All these units are located in urban areas only.

(vi) *Units employing* 50—99 *persons.* There are only 8 such units accounting for 0.3 per cent of trade or business units under this category. These give employment to 6.1 per cent of the total working force in trade or business. None of the units is located in rural areas.

(vii) 100 *or more persons.* There are only two trade establishments in this cateogry accounting for 0.1 per cent establishments. These employ 4.5 per cent of the total working force. None of the units is located in the rural areas.

From the above discussion it is thus quite clear that a great majority of the trade establihments are of small size. The establishments falling in the first three employment groups provide employment to about 2/3rd of the working force engaged in trade or business establishments. However, largest employment is provided by trade or business establishments falling in the second category of employment group i.e. 2—4 persons.

Coming to the nature of trade establishments that provide the largest employment, it may be noticed from the table given below that trade establishments engaged in retail trade in food and food articles, beverages, tobacco and intoxicants provide the largest employment in the Union Territory.

Distribution of 100 trade/business establishments according to type and size of employment

Division/ major group of N.I.C.	Total		Rural		Urban

83 ..	1·2	0·8	..	..	1·3	0·8

According to table E-III there are 891 (34.2 per cent) establishments in this category (Major group 65) and these establishments provide employment to as many as, 1,487 persons (18.7 per cent). However, the proportion of such establishments is much more in rural areas than in urban areas. In the rural areas these establishments account for 77.2 per cent of the total trade establishments. These establishments provide employment to 73.1 per cent of the working force in trade or business. On the other hand in the urban areas these establishments account for 31.4 per cent of the total trade establishments providing employment to 17.3 per cent of the total working force engaged in trade or business establishments. Next in the category come restaurants and hotels which account for 11.2 per cent of the total trade or business establishments and provide employment to 16.9 per cent of the working force in trade or business. In the rural areas hotels and restaurants account for 11.4 per cent of the trade establishments providing employment to 12.2 per cent of the working force while in the urban areas hotels and restaurants formed 11.2 per cent of the total establishments giving employment to 17 per cent of the total working force engaged in trade or business establishments. Trade or business establishments which are engaged in retail trade in fuel and other household utilities and durables also provide employment to a substantial number of persons Establishments in this category account for 18.9 per cent of the total establishments and provide employment to 15.5 per cent of the total working force in trade or business establishments in the Union Territory. The proportion of this type of establishments is much more in urban areas than in rural areas. Banks and similar type of financial institutions provide employment to 15.3 per cent of the total working force. However, these types of establishments are located in the urban areas. Establishments engaged in wholesale trade account for 4.9 per cent of the total establishments and these establishments give mployment to only 8.1 per cent of the total working force engaged in trade or business establishments. It is significant to note that wholesale trade establishments are only located in the urban areas as urban areas are the main centre of supply and consumption.

We may now discuss the type of establishments (Major group of National Industrial Classification) that provide the largest employment.

(*i*) *Retail trade in food and food articles, beverages, tobacco and intoxicants.* As already stated there are 891 units under major group 65 providing employment to 1,487 persons. Out of these 122 units providing employment to 144 persons are located in the rural areas. Only two establishments employ 10—19 persons while 21 establishments employ 5—9 persons. It may be noted that none of the units in the rural areas, employ more than 4 persons. It is interesting to note that the largest number of industrial units (except repair) are those engaged in the production of food products and beverages, tobacco and tobacco products.

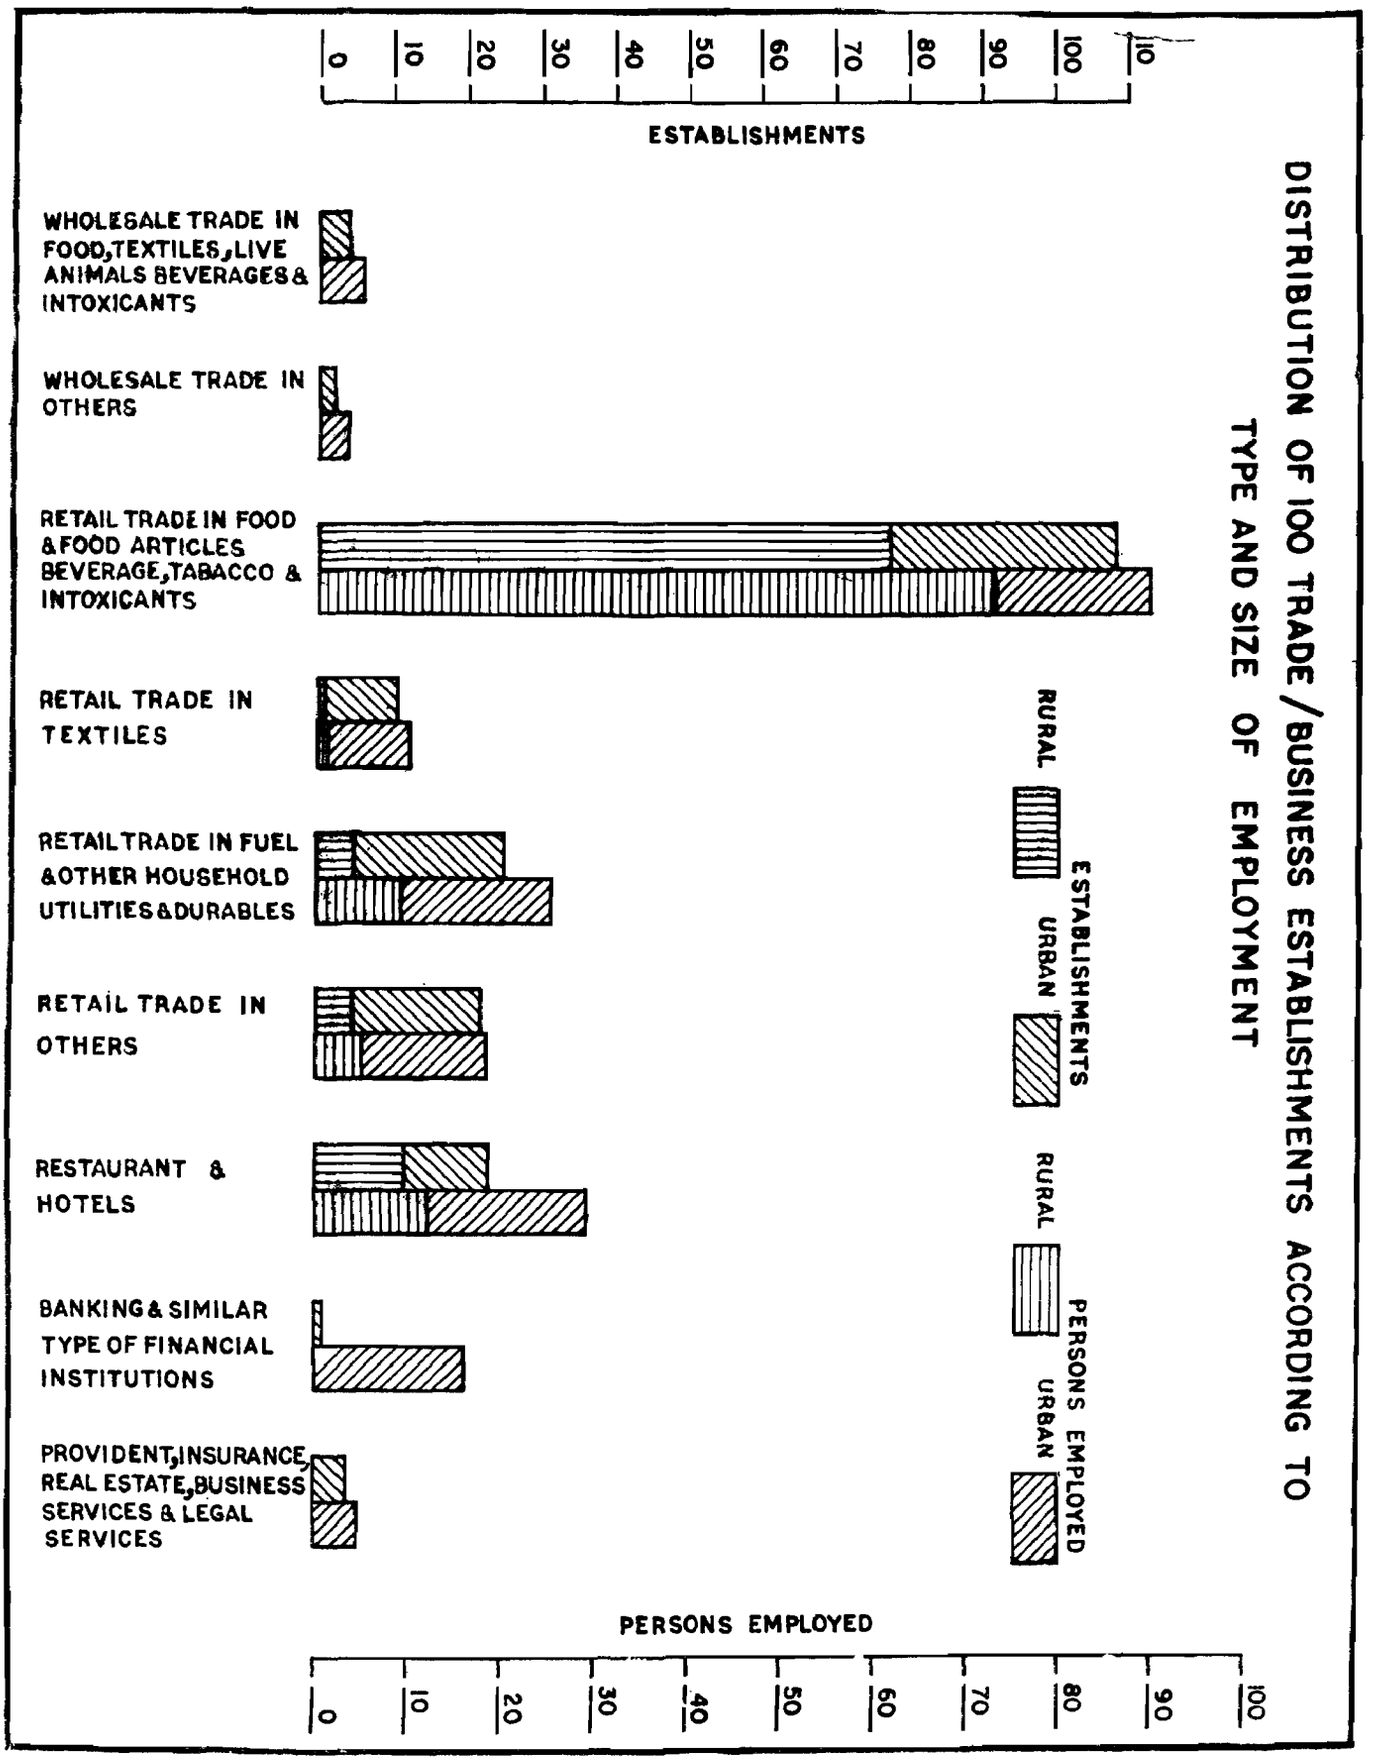

(*ii*) *Restaurants and Hotels.* There are 292 restaurants and hotels in the Union Territory of Chandigarh providing employment to 1,339 persons. In the rural areas there are 18 restaurants and hotels which provide employment only to 24 persons. Two of the restaurants and hotels employ 50—99 persons. These are located at Chandigarh. Their names are Mount View Hotel and Aroma Hotel. These cater to the needs of visitors to Chandigarh and are rated as first class hotels. There are 9 other hotels which employ 20—49 persons each. However, in the rural areas none of the hotels or restaurants employs more than 4 persons. Thus in the rural areas there are small sized hotels or restaurants.

(*iii*) *Retail trade in fuel and other household utilities and durables.* There are 494 establishments under major group 67 which provide employment to 1,231 persons. In the rural areas there are only 8 such units providing employment to only 18 persons. Two of the units under this group employ 20—49 persons each while 14 units employ 10—19 persons each and 41 units employ 5—9 persons. In the rural areas there is only 1 unit which employs between 5—9 persons.

(*iv*) *Banking and similar type of financial institutions.* There are only 33 banking and similar type of financial institutions in the Union Territory. These provide employment to a total of 1,216 persons. None of the banking and similar type of financial institutions are located in rural areas. Chandigarh city is meeting the requirements of rural areas. Two of these institutions employ more than hundred persons, 6 50—99 persons, 11, 20—49 persons and 5, 10—19 persons. Thus it could be seen that financial institutions are quite large sized. This is so because number of banks are having their regional offices at Chandigarh.

(*v*) *Retail trade in textiles.* Trade establishments engaged in retail trade in textiles account for 9.2 per cent of the total esablishments and provide employment to 8.6 per cent of the total working force. Only two such units are located in rural areas. Three of the units provide employment to 20—49 persons, 5 to 10-19 persons and 32 to 5—9 persons each.

It could be observed that trade or business establishments engaged in wholesale trade are far lesser than those engaged in retail trade and these are only confined to the urban areas. A large number of the units engaged in wholesale trade are found under major group 60 (wholesale trade in fuel, light, chemical, perfumery, ceramics, glass, etc.). There are

100 and more persons ..	19,855	54·7	..	..	19,855	55·0

(*i*) *Public Administration*. This type of establishments are the single largest source of employment in the Union Territory of Chandigarh. There are 427 such establishments which account for 68.3 per cent of the total persons employed in other establishments. It is interesting to note here that there are only 3 such establishments in rural areas which provide employment to only 3 persons which comes to 1 person per establishment. It may be observed that a majority of the establishments in this category are large sized. 55 establishments employ 100 and more persons, 42 establishments employ 50—99 persons and 132 establishments provide employment to 20—49 persons.

(*ii*) *Education, Scientific and Research Services*. Education, Scientific and Research Services rank next only to Public Administration and Defence Services. There are 248 such establishments absorbing 16.3 per cent of the total persons employed in other establishments. It may be noted here that in rural areas educational services provide the largest employment. In the rural areas educational services account for 49.7 per cent of the total persons employed in other establishments. This is a very healthy sign and speaks of rapid strides in the field of education. In this category 5 of the establishments employ more than 100 persons, 22 employ 50—99 persons and 24 establishments employ 20—49 persons each. In rural areas only establishments 2 employ more than 20—49 persons. In the rural areas high schools are located in villages Burail and Maloya.

(*iii*) *Personal Services*. If we take into consideration the numerical strength of establishments in the category of other establishments then personal services closely follow education, scientific and research services. There are 22 establishments of this type in the Union Territory of Chandigarh. In the matter of providing employment personal services account for only 1.7 per cent of the total persons

DISTRIBUTION OF 100 OTHER ESTABLISHMENTS ACCORDING TO TYPE & SIZE OF EMPLOYMENT

employed in other establishments. Only one establishment employs between 20—49 persons. Four establishments in this category are located in the rural areas which provide employment only to 7 persons.

(*iv*) *Medical and Health Services.*—There are 154 establishments in this category which provide employment to only 1.4 per cent of the total persons employed in other establishments in the Union Territory of Chandigarh. Only 11 establishments are located in rural areas which give employment to 13 persons only. Four establishments in this category employ 20—49 persons while only one employs between 50—99 persons.

(*v*) *Community Services.*—There are 72 establishments in this category providing employment to 1.8 per cent of the total working force employed in other establishments. Fifteen establishments are located in rural areas which provide employment to only 16 pers ns. Two establishments in this category provide employment to 100 or more persons, 1 establishment to 50—99 persons and 1 establishment to 20—49 persons.

(*vi*) *Communications.*—There are in all 35 establishments in this category in the Union Territory of Chandigarh which provide employment to 3.5 per cent of the total persons employed in other establishments. All the establishments in this category are located in urban areas. Two of the establishments in this category employ 100 or more persons, 2 establishments 50—99 persons and 12 establishments 20—49 persons.

(*vii*) *Electricity.*—There are 17 establishments in the Union Territory of Chandigarh which provide employment to 2.3 per cent out of total working force in other establishments. All establishments in this category are located in urban areas. Three of the establishments provide employment to 100 or more persons, 4 to 50—99 persons and 6 to 20—49 persons each.

(*viii*) *Land Transport.*—There are 26 establishments in this category which provide employment to 0.8 per cent of the total working force in other establishments. All the establishments are located in urban areas. One establishment provides employment to 50-99 persons and one to 20-49 persons.

(*ix*) *Storage and Warehousing.*—There are 57 establishments in this category in the Union Territory of Chandigarh which give employment to 0.6 per cent of the working force in other establishments. All the establishments are located in urban areas. All the establishments in this category provide employment to 20—49 persons.

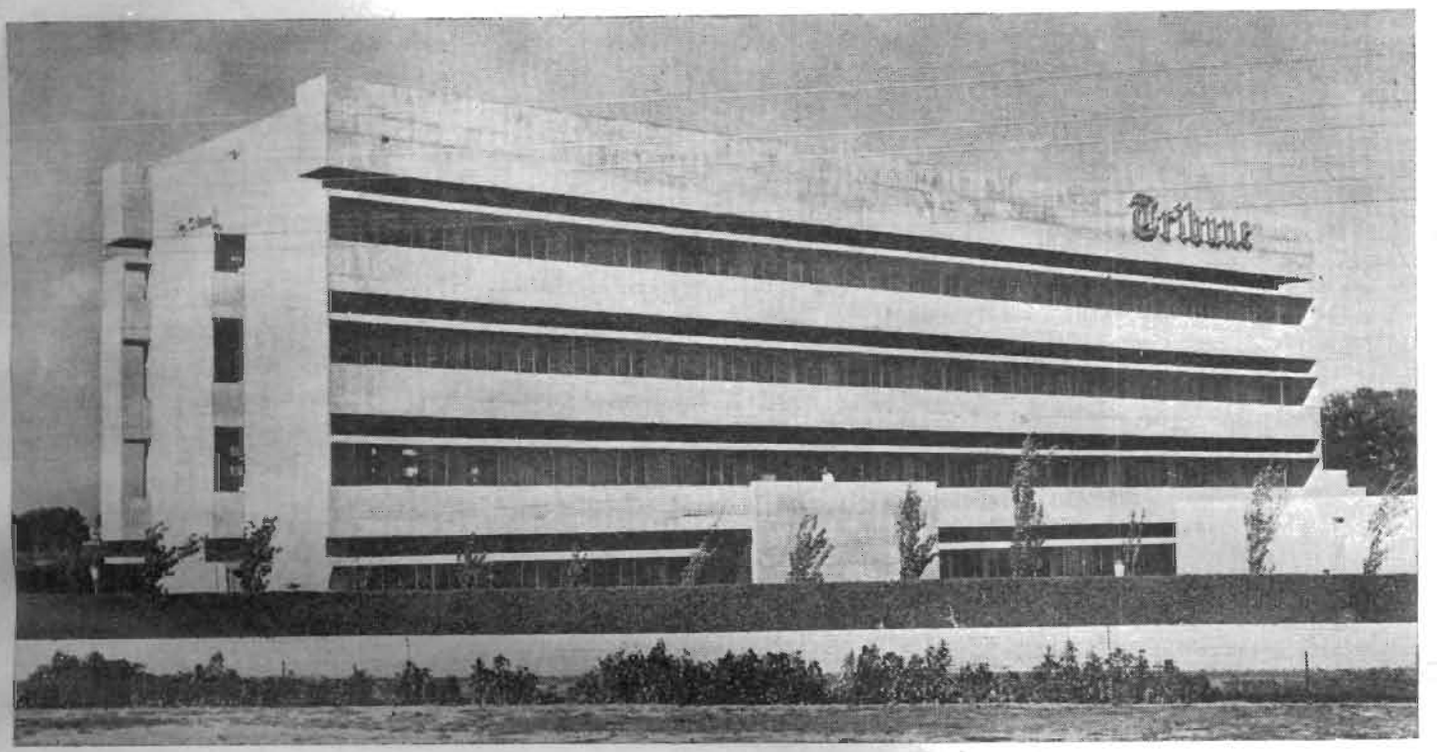

(*x*) *Live-Stock Production.*—There are 47 establishments in this category providing employment to 0.2 per cent of the working force in the Union Territory of Chandigarh. As many as 33 establishments are located in rural areas accounting for 26.2 per cent of the total working force in other establishments in rural areas.

From the discussion in the foregoing paras it is clear that establishments like Public Administration and Education, Scientific and Research Services and Communications provide employment to a substantial number of workers. Moreover, as Chandigarh is primarily a city of Government employees the Government quasi-Government establishments are the major sources of employment. It is also observed that the share of establishments employing 100 persons or more is 54.7 per cent of the total working force in the category of other establishments.

The table given below shows distribution of 1,000 establishments according to manufacturing or processing establishments, trade establishments and other establishments by the size of employment with breakup according to total/rural/urban.

Union Territory/District	Total Rural Urban	Total persons employed in all establishments	Distribution of employment in		
			Manufacturing establishments	Trade establishments	Other establishments
Chandigarh Union Territory	Total	1,000	206	143	651
	Rural	1,000	417	299	284
	Urban	1,000	203	141	656
Chandigarh District	Total	1,000	206	143	651
	Rural	1,000	417	299	284
	Urban	1,000	203	141	656

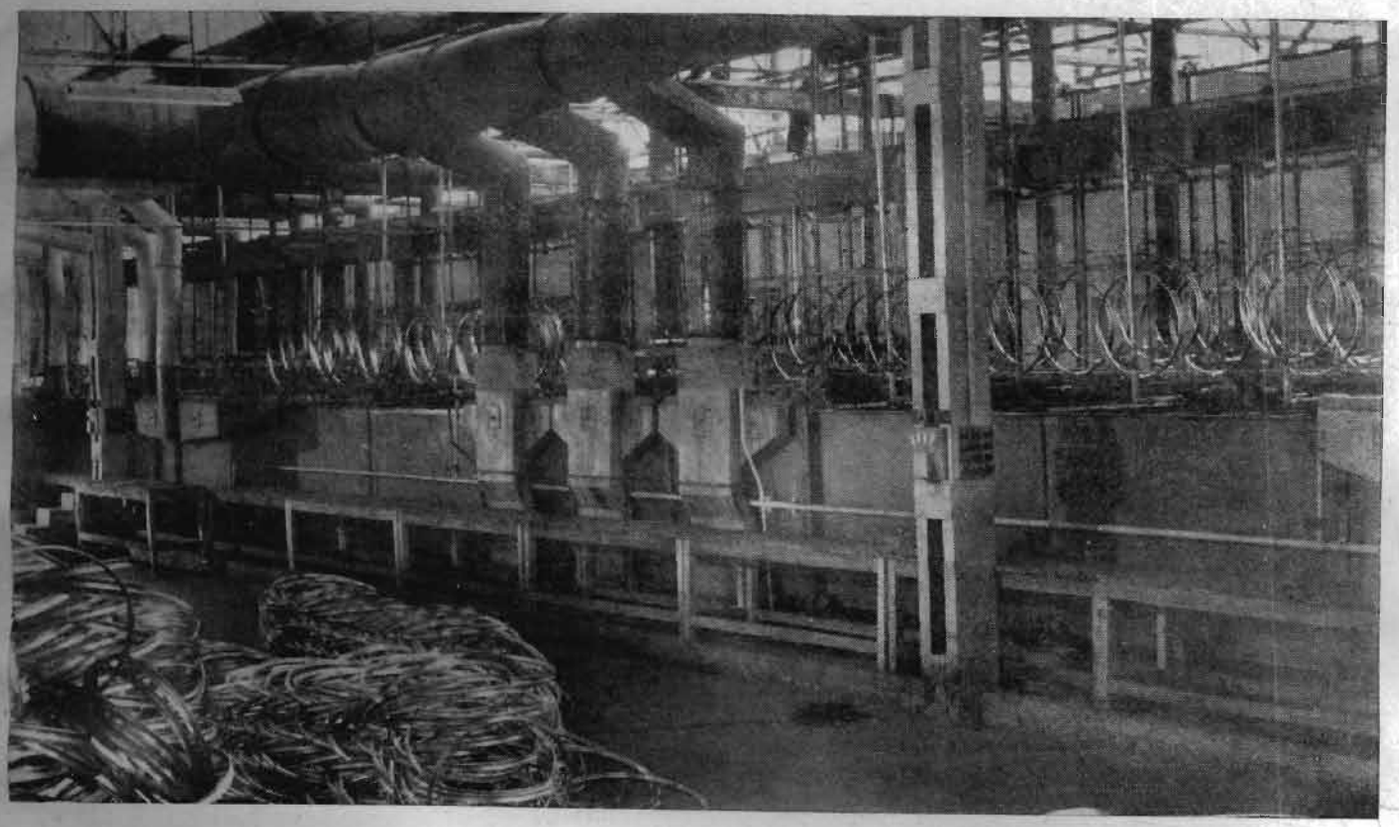

From this table it could be seen that 'other establishents' provide the largest employment to the total working force in the Union Territory, as 65 per cent of the total working force is found employed in other establishments while 21 per cent of the working force is gainfully employed in industrial establishments. Trade establishments, however, give employment to 14 per cent of the total working force returned in the Union Territory of Chandigarh. It is significant to note that in the rural areas 41.7 per cent of the working force is engaged in industrial establishments while trade establishments account for 29.9 per cent of the total working force. The share of other establishments comes to only 28.4 per cent. The respective percentages of workers in the urban areas are : industrial 20.3, trade or business 14.1 and other establishments 65.6. Thus it could be seen that in the urban areas there is great preponderance of workers in other establishments whereas industrial establishments lead other types of establishments in the rural areas. It should not be construed from the above that rural areas are more industrialised than the urban areas. The high proportion of industrial workers in rural areas is due to the fact that workers engaged as blacksmiths, carpenters, goldsmiths, leather workers, weavers have been termed as industrial workers.

APPENDIX I

INDUSTRIES IN CHANDIGARH

The Industrial development of Chandigarh is, in a sense, of recent history. Chandigarh with its back drop of mountains, its modern architecture and functional planning is one of the most beautiful cities in India. Its proximity to the hills tempers its climate and undulating nature of its terrain lends itself ideally for imaginative landscaping.

It is almost axiomatic that no modern town can develop without having a substantial industrial base. A beginning in this direction had been made by erstwhile Punjab Government by setting up an Industiral Area covering 474 acres of land. In the first instance about 205 plots were developed and allotted to the industrialists. On the eve of re-organisation of Punjab State in November, 1966, the city of Chandigarh alongwith 37 odd villages was given the status of Union Territory. To promote industrial growth after the constitution of Chandigarh as Union Territory, Chandigarh Administration took immediate steps to carve out new plots to meet the growing demand of new entrepreneures of various industries. Steps were also taken to shift blacksmiths, carpenters, welders, tyre retreaders and radio manufacturers from the slums of Manimajra and Bajwara to the Industrial Area. To meet the growing demand of Industrial plots, 275 new plots of various sizes were created after re-organisation and allotted to the industrialists. In the beginning the plots were allotted at the rate of Rs 4 per sq. yd. Due to the gradual rise in the price of land and the cost of development, the rate was enhanced to Rs 8 per sq. yd. which remained in force upto 1967. After 1967 the rate was further increased to Rs 10 per sq. yd. in view of further rise in the cost of development. Many incentives and facilities are offered to the industrialists who are allotted plots at fixed price in the Industrial Area. A brief description of the incentives and facilities are given below :—

(i) *Credit facilities.*—

(a) Loans upto Rs 25,000 are advanced for Small Scale Industries at a subsidized rate of interests of 3 per cent p.a.

(b) Conditions for grant of loan upto Rs 5,000 have been liberalized. Loans upto Rs 5000 are now advanced against one personal surety as against two sureties previously.

(c) Financial assistance is also available from the Delhi Financial Corporation with which Chandigarh is affiliated.

(ii) *Central Sales Tax.*—The Chandigarh Administration has reduced the rate of Central Sales Tax from 3 per cent to 10 P. per hundred rupees in respect of manufacturing industry.

(iii) *Exemption from Octroi duty.*—There is no octroi duty on the incoming goods in Chandigarh.

(iv) *Machinery on Hire Purchase Basis.*—The cases of Small Scale Industrial Units which desire to get machinery on Hire Purchase Basis are recommended to the National Small Industries Corporation, New Delhi, for supply of machinery.

(v) *Railway Siding.*—There is a scheme of providing Railway siding in the Industrial Area. The alignment of the Railway track has been finalized. It it expected that work would be completed by the end of Fourth Five Year Plan.

(vi) *Others.*—(a) The amenities of physical infrastructure like power, water and communications are made available to industries.

(b) Technical assistance is available from the Small Industries, Service Institute, Ludhiana. The Officers of this institute visit the local units and render the required help to solve the technical problems of industries.

Though industries in Chandigarh are still in infancy stage yet due to the enterprising spirit of the people coupled with assis'ance from Government number of indus'ries have come up within a short period of about 12 years. The industries range from nut bolt manufacturing units to rerolling mill, from an oil crushing unit to an automatic antibiotics making plant and from a machine tools manufacturing to precision plant making, electric meters and hosiery needles. The statistical information about industries set up in Chandigarh is given in Statement I.

The capital investment made in the industries is to the order of Rs 10 crores. The annual output of industrial products in monetary term is estimated at about Rs 18 crores. The various industries have provided employment to nearly 9,000 persons.

EXPORTS

In the field of Exports the Chandigarh industries have not lagged behind. In the year 1970 industrial goods to the tune of Rs 40 lakhs were exported to countries : Australia, England, Hong Kong, Switzerland, Czechoslovakia, Uganda, Kuwait and Nepal. The items which were exported were hosiery needles, sanitary fittings, cotton ginning machine parts and electrical appliances.

FINANCIAL ASSISTANCE

Finance is a major factor in the industrial development and very few entrepreneurs can arrange the requisite funds from their own resources. The majority of them depend on financial assistance from the Government, banks and other financial institutions. Adequate funds were, therefore, arranged for industrial loans in Chandigarh. From November 1, 1966 to March, 1971 a sum of Rs 29.50 lakhs has been disbursed to 272 parties. This is a big achievement when compared with the pre-reorganisation period during which the total amount of loans disbursed was about. Rs 12 lakhs only. In the subsequent years of the Fourth Plan period Rs 20 lakhs will be available for grant of loans. The credit facilities are also available from the Delhi Financial Corporation to which Chandigarh is affiliated. The Corporation has so far advanced Rs 46 lakhs to industrialists in Chandigarh. Apart from this the commercial banks have now undertaken to provide financial assistance to industries in a big way. The nationalization of 14 banks will go a long way in meeting the financial requirements of industries. Two years earlier, the State Bank of India had earmarked about Rs 14 lakhs for the grant of loans to small scale industrialists. The amount now allocated for the purpose of this Bank is of the order of Rs 61.50 lakhs.

INDUSTRIAL HOUSING

Industrial Housing has not received proper attention in the recent past. This may be attributed partly to lack of coordination between departments of Industries, Labour and Housing. The position of industrial housing is quite acute in Chandigarh The main features of the Industrial Housing Scheme at Chandigarh are given below :—

(i) Employees in registered factories are only eligible for allotment.

(ii) Employees getting salary upto Rs 350 per month are eligible for allotment ;

(iii) The employees interested for allotment of houses under the scheme are required to get themselves registered with the Labour Department ;

(iv) Allotments are made on turn "first come first served" basis ;

(v) This is a subsidized scheme floated by Government of India. The State Governments are given 50 per cent loan and 50 per cent grant for construction of houses ;

(vi) The rent is charged at the flat rate of Rs 17 per house ;

(vii) At present there are about 380 houses for industrial workers. According to Labour Department estimate there is need of additional 300 houses to meet the additional demand.

The consensus of opinion in the administrations, Labour and Industrial circles was that areas should be earmarked for industrial housing while developing the industrial area. Further built up accommodation should also be provided by the Government and given on lease/rent to the industrial units.

Besides industries in the private sector there are 2 units in the Public sector. A brief description of which is as follows :—

(a) *Central Scientific Instruments Organisation*—This institute has been set up by the Central Scientific Industrial Research Organisation, Government of India. This institute is rendering very useful service in the field of scientific industry. An Indo Swiss traning institute is also attached with this Centre. The institute provides training for manufacture of scientific and electronic components where presicion and skill of high order is required.

(b) *Ordnance Cable Factory*.—This factory has been set up by the Ministry of Defence, Government of India and is engaged in the manufacture of cables. This factory caters to the requirements of Defence only.

SOME DIFFICULTIES EXPERIENCED BY THE INDUSTRIES

(1) *Scarcity of Raw Material*.—The important raw materials which are in short supply are iron and steel and non-ferrous metals etc. About 70 per cent of industries set up in Chandigarh are engaged in manufacture of building hardwares as these are in great demand in this growing city. Important items of building hardwares are hinges, door fittings, sanitary fittings, gates, grills and water tanks etc. Of late shortage is also being felt of wire rods for manufacutre of wire and wire products viz., screws, nails, shoe tacks. The industries are also experiencing short supply of metals like zinc, nickel and tin.

(ii) *Transport*.—Transport plays an important role in the industrial growth of the place. Industries in Chandigarh are greatly handicapped for want of quick transport because Chandigarh is not on the main line. The industrialists have to adopt a circuitious route for booking industrial products to Punjab via Ambala. There is an urgent need to link Chandigarh with Ludhiana by rail as this will have healthy effect on the growth of industries in Chandigarh.

(iii) *Common Service Facility*.—Industries in Chandigarh are handicapped due to nonavailability

of Common Service facility as in other industrial towns like Ludhiana, Amritsar, Jullundur and Delhi. In the event of breakage of tools etc., they have to rush to Ludhiana or Jullundur to get necessary repairs or substitutes.

SCOPE OF INDUSTRIES

A study of the existing resources has revealed that Chandigarh has great potentiality for the development of a number of small scale industries especially Electronic Equipments and Components. It may be stated that main advantage which Chandigarh has is the human talents viz., the technically qualified persons, ex-military personnels and the experienced retired class of Government employees. This valuable human material has to be involved and motivated for higher productivity and efficiency. If properly utilized this source would create a fast tempo of industrial growth. Chandigarh is especially suited for the manufacture of electronic items in view of the availability of the technical know how and assistance from the Central Scientific Instruments Organisation and also the instrument technicians trained by this organisation. The existence of such an organisation in the Public sector at Chandigarh and the facilities offered by it should be availed to the maximum extent in the applied field. In case a start is now made in a few years time this city will earn a reputation for being an important centre for the manufacture of scientific instruments just like Ludhiana is known for hosiery, sewing machines and bicycles, Jullundur for sports goods and Batala for machine tools. To meet the tempo of industrialization of the city the Administration is endeavouring hard for creating industrial climate by promoting ancillary industries. Keeping this object in view it has been decided to acquire additional area of 480 acres in the second phase for developing new industrial plots. Out of this 120 acres have already been acquired. The whole process of acquisition of land is likely to be finalized during the year 1971-72. It is hoped that this will give fillip to the growth of industries during the next 3-4 years.

Statement showing number of Industrial Units, Annual Production and Number of Workers by Nature of Industry

Serial No.	Name of Industry	No. of units	Annual production (Rs in lakhs)	No. of workers employed	Remarks
1	2	3	4	5	6
1	Hosiery Needle	1	100	350	Collaboration with West Germany.
2	Wool Tops	1	840	400	Collaboration with U.K.
3	Electric meters	1	140	780	Collaboration with Hungary.
4	Cycle Rim	1	40	61	
5	Cycle free-wheel	1	32	56	
6	Cycle Chain	1	Nil	25 (to be employed)	The factory is expected to go into production by 15th August, 1971
7	Antibiotics and medicines	1	197	200

APPENDIX III

INSTRUCTIONS TO ENUMERATORS FOR FILLING UP THE ESTABLISHMENT SCHEDULE

Instead of loading the main Houselist form itself with questions pertaining to Establishments, it has been decided to have a separate schedule in which particulars of each establishment are to be recorded. (See the Establishment Schedule given at the end of this book).

The term "Establishment" has been defined in para 40 of this booklet. You are requested to study it carefully, before filling the 'Establishment Schedule'.

The respondents should be fully assured that the information collected in these schedules will be treated as compeletely confidential and is meant for statistical purposes and will not be used as evidence against any individual or establishment for any purpose. The respondents should be encouraged to furnish truthful replies without any reservation.

At the top of the schedule provision is made for noting the Location Code No. and name of the areas concerned. This should be the same as those noted on the top of the Houselist which you will be canvassing simultaneously. You should fill the Location Code Nos. etc., correctly.

The columns of the Establishment Schedule can be classified into four broad groups :

(i) Columns 1 to 5 are of uniform applicability and entries have to be made in respect of all the establishments ;

(ii) Columns 6 to 8 pertain to manufacturing, processing, etc.—establishments ;

(iii) Columns 9 to 10 relate to trading establishments ; and

(iv) Column 11 refers to "other" Establishments which are not covered in columns 6 to 10.

Thus, it will be seen that the columns falling within groups (ii) to (iv) are mutually exclusive, while those in group (i) are common to all.

Col. 1 : Sl. No.

In this column the establishments are to be entered one after another serially, Arabic numerals should be used for this purpose *i.e.* 1, 2, 3 etc.

Col. 2 : Census House No.

The Census house number to be noted is the same as that in column 3 of the Houselist and against which 'Yes' is written in column 7 of the Houselist indicating that the Census house is used as an establishment.

A point to be noted here is that it is likely that a single factory or workshop may be spread over more than one Census house adjoining one another. Therefore, while in Col. 2 of this schedule a number of Census houses may be noted in respect of that particular unit of production, processing or repairing, trade or business, etc., the entries in Col. 3 onwards will be one only for that group of houses covered by a single unit of production or business, etc., establishment. For example, if a single tea factory in Assam or business establishment in Calcutta should be spread over two or three adjacent buildings, each of the buildings should not be shown as a separate factory or establishment but the House Nos. of all these buildings shown in Col. 2 should be bracketted together and the particulars of the single tea factory or establishment entered in the subsequent columns against this group of houses. If on the other hand the activities of a large firm or an office are carried on in buildings located far away in different localities, each of the Census houses in the different localities will have to be treated as a separate establishment and the particulars of the establishment relating to that particular Census house should be listed in this schedule.

Col. 3 : Name of the Establishment or of the proprietor

In this column write the name of the establishment in the case of factories, large manufacturing concerns, a shop or business establishment, banks, office, etc. which usually bear a distinct name. Where an establishment has no separate name as in the case of small workshops and establishments like confectionaries, small tea shops, Dhobi's establishment, house-hold, industries, etc., write the name of the owner as "So and so's Halwai shop", etc. This is to help easy identification.

Col. 4 : Is the Establishment —(a) Government/ Quasi-Government, (b) Private (c) Co-operative Institution

Enter here whether establishment enumerated belongs to public sector, i.e., Government/ Quasi Government managed, including establishments run by local authorities or to private sector,

or a Co-operative enterprise. Please do not write in the column only (a) or (b) or (c) but write

(1) "Government—Public Sector, or Quasi Government—Public Sector, or Local Authority—Public Sector.

(2) Private

Or

(3) Co-operative.

There may be many schools or libraries, etc., which are not owned by any particular individual or group of individuals. These may be owned by people in general and managed by Managing Committees. Such establishments should be treated as "private" as distinguished from Government/Quasi-Government or run by local authorities or co-operative enterprises.

An establishment will be treated as a Government/Quasi-Government institution if the Central or State Government or a Local Authority such as the Zilla Parishad, City Corporation or Municipality, etc., completely owns or has a majority of shares as to control the management of the establishment.

Private establishments are those owned and managed by private individuals or corporate bodies not being co-operative institution or Government or Quasi Government Institutions.

Establishments registered under the co-operative Societies Registration Law of the State, alone fall in the category of "Co-operative".

Col. 5 : Average number of persons working daily last week or in the last working season, including proprietors and/or family workers

In this column, the information has to be entered relating to the total number of workers including the apprentices, paid or unpaid and also including owner(s) or proprietor(s) of the establishment and any of their family members if they also work in the establishment and also the hired workers, if any. It is not necessary that an establishment should necessarily have paid workers. A small shop run in the same house where the owner lives and the business is attended to by just one person of the household is also an establishment. The average number of persons working per day in the establishment during the week preceding the day of your visit should be recorded. For computing the average number of persons working per day, if the establishment remained closed owing to holiday, etc., such day(s) should be ignored and only the 'days' on which the establishment worked should be taken into account. If during the week preceding your visit, the establishment remained closed either due to strike or lock-out, the week during which the establishment worked preceding such strike or lock-out should be taken into account for reckoning the average number of persons working. The hired workers should normally be in full time employment.

Some establishments such as a sugar factory, rice mill; etc., may be seasonal in character and may not be actually working at the time of the present listing. You should then ascertain the particulars of such establishments with reference to the last working season.

In case more than one product is produced, or more than one item of business is conducted or several types of services are rendered, it is not necessary to enquire the number of persons employed in the production/business/servicing of each type of product, business or service that is covered against that serial number. For example in a large textile mill there may be the weaving section, dyeing section, laboratory, repairing section, sales section, etc. It is not necessary to ascertain the employment in each section. The total employment has to be ascertained. The major activity of the establishment will be described in subsequent columns.

"*Columns* 6, 7 *and* 8.—If any manufacturing processing or servicing is done."

These columns relate only to such establishments in which goods are manufactured or some kind of processing or servicing is done and/or repairs are carried on.

Col. 6. Is it (a) Household Industry (b) Registered Factory (c) Unregistered Workshop

Household Industry : Definition

A 'Household Industry' is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas, and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

Thus, there are four ingredients of a household industry :—

(i) nature of activity

(ii) participation

(iii) location

(iv) size

80. (i) *Natue of activity*:—A Household industry should relate to production, processing, servicing,

repairing, or making and selling (but not merely selling) of goods. It does not inclued professions such as a pleader or doctor or barber, musician, dancer, washerman (Dhobi), astrologer etc. or merely trade or business even if such professions trade or services are conducted at home by members of household.

(ii) *Participation.*—The Head of the household and/ one or more members of the household must participate in such an industry. If it is run primarily by hired labourers, the 'participation' ingredient of the household members will not be satisfied and it will not be a 'Household industry' The industry may run with the help of hired workers but the head and/or members of the household must be mainly participating in the industry and not solely dependent on hired workers. Besides "actual work". participation also includes "supervision and direction "

(iii) *Location.*—The industry should be located within the premises of the house where the household lives in urban areas ; if it is situated at a place other than at home, it will not be termed as household industry in urban areas. In rural areas, however, the industry may be either at home or anywhere within the village limits. In rural areas, even though, the industry is not situated at home, there is a greater possibility of the members of the household participating in it if it is located within the village limits.

(iv) *Size.*—The industry should not be on the scale of a registered factory irrespective of the location and participation by the members of the household, if the industry or workshop is registered under the Factories Act, then it will not be a household industry.

Thus it will be clear that any industry which can be termed as 'Household Industry must satisfy all the four ingredients mentioned above.

(b) *Registered Factory.*—A factory which is registered under the Indian Factories Act should be treated as a "Registered Factory". Any other workshop merely licenced by the Municipal or any other authority or registered for any other purpose should not be treated as a registered factory unless it is registered under the Indian Factories Act.

(c) *Unregistered Workshop.*—Workshop is a place where some kind of 'production' proceessing, servicing, repairing or making of goods for sale is going on. A workshop which is registered under the Indian Factories Act should be treated as a registered factory and others as unregistered workshops. Workshops which are run as household industry should be treated as household industry and entered as such.

When you come across an establishment where some kind of manufacturing, processing or servicing etc., is done, you should ascertain whether it is a Household Industry or a registered factory or a workshop not registered under the Factories Act and write whatever it actually is in this column. Please note that workshops merely licenced or entered in the registers of a local authority are not to be considered as registered factories unless registered under the Indian Factories Act. All workshops other than household industries and not registered under the Indian Factories Act should be treated as unregistered workshops even if they are merely licenced as workshops by the local authorities. Please do not write (a) or (b) or (c) in the column but write "Household Industry," or "Registered Factory" or "Unregistered Workshop". as the case may be.

Col. 7 : Description of the products, processing or servicing done

The description of the actual work relating to product, processing and servicing which is done in the Household Industry, factory or workshop that is being listed is to be recorded here, e.g., handloom weaving, lace knitting, *oil ghani* etc., manufacturing of G.I. pipes, electroplating, motor or cycle repairing, iron foundry, paper making or book binding, printing and dyeing, shoe making, sweetmeat making etc. If in any establishment more than one article is produced or more than one kind of processing or servicing or repairing is done, indicate only the major kind of products or processing or repairing servicing etc.

Col. 8- : Type of fuel or power used

Enter here the description of the power or fuel used for the running of the factory, workshop (or household industry if it is run on power or fuel). The fuels can be kerosene, soft coke, petrol, diesel, gas, coal, wood, etc., Electricity and steam etc. are some of the sources of power. Some units may be run by animal power such as *oil ghani.* Some may be run by merely human energy such as carpet-making pottery making etc. Enter the description of fuel or power used for the production, processing, servicing etc. that is carried on in the establishment. There may be instances where more than one fuel or power is used. in such cases, only the fuel or power which is used in running the primary unit of the industry will be noted in this column.

Columns 9 and 10 are to be filled in respect of trading establishments or establishments which render commercial services only.

Trading or business establishments are those where some trading i.e., transactions invloving sale and/or purchase of goods go on.

Establishments rendering commercial services are the banks, money lending firms, pawn shops, etc.

Col. 9 Description of goods bought/sold

If it is a trading establishment, you should ascertain what are the goods bought and/or sold and write the description in this column. If there are more than one type of goods bought/sold by the establishment, you should give description of the main item of goods bought/sold by the establishment.

In the case of establishments rendering commercial services such as in the case of Banks etc., you should write the description of the services rendered, as in the case of a bank, you should write "banking services".

Col. 10 : Whether (a) wholesale or (b) retail

For all trading establishments, you should ascertain in respect of the goods mentioned in column 9, whether they are sold/bought in wholesale or in retail and write as the case may be.

You may come across certain establishments wherein both types of trade i.e wholesale and retail go on. In such cases, you should ascertain in which category (i.e. wholesale or retail) the volume of trade is greater and record the category accordingly.

In the case of establishments rendering commercial services, e.g., bank etc., please do not write any of the two categories i.e 'wholesale' or 'retail' but put an 'X' in this column.

Col. 11. If used as any other establishment, describe e.g., Govt. office, school. hospital, railway station, barber's saloon, cinema theatre, hotel, tea shop, etc.

Two specific types of establishments have been covered in columns 6 to 10. Column 11 relates to the remaining types of establishments not covered by columns 6 to 10. You have to describe such establishment in this column; e.g., Government office, school, hospital, railway station, orphanage, rescue home, barber's saloon, cinema theatre, hotel, tea shop, lawyer's office, doctor's clinic, laundry, etc.

General

It is possible that in a particular establishment more than one activity is being undertaken whitin the same premises. For example, say in a betel shop, *bidi* rolling is also being undertaken or in a grocery shop a flour mill is also located, or in the doctor's clinic medicines are sold. In such cases, the establishment should be identified having regard to the major activity and recorded as such in the relevant columns pertaining to the major activity.

But if different activities are undertaken in different census houses quite cut off from one another though under the same title or ownership, each such census house should be treated as a separate establishment and recorded as such against that census house in this schedule. It may, however, be noted that where processing for the production of an article is carried on, in separate adjoining census houses, all the census houses should be treated as a single establishment and recorded as such. If on the other hand the activities of a large firm or an office are carried on in buildings located far away in different localities, each of the census houses in the different localities will have to be treated as a separate establishment and the particulars of the establishment relating to that particular census house should be listed in this schedule.

After you have completed filling up of the Establishment Schedule for your block, you will prepare a duplicate copy of the Establishment Schedule, for which you would be given adequate number of blank forms.

APPENDIX IV

NATIONAL INDUSTRIAL CLASSIFICATION (N.I.C.) 1970

This classification groups the industries into:

10 Divisions (0 to 9 and 'X')

66 Major Groups

386 Minor Groups

The Divisions, Major Groups and Minor Groups with their code numbers are listed below :

DIVISIONS

(One digit level of classification)

0	..	Agriculture, Hunting, Forestry and Fishing
1	..	Mining and Quarrying
2&3	..	Manufacturing and Repair
4	..	Electricity, Gas and Water
5	..	Construction
6	..	Wholesale and Retail Trade and Restaurants and Hotels
7	..	Transport, Storage and Communications
8	..	Financing Insurance, Real Estate and Business Services
9	..	Community, Social and Personal Services
X	..	Activities not Adequately Defined

MAJOR GROUPS

(Two digit level of classification)

Major Groups

Division 0—*Agriculture, Hunting, Forestry and Fishing*

00	..	Agricultural Production
01	..	Plantation
02	..	Livestock Production
03	..	Agricultural Services
04	..	Hunting, Trapping and Game Propagation
05	..	Forestry and Logging
06	..	Fishing

Division 1—*Mining and Quarrying*

10	..	Coal Mining
11	..	Crude Petroleum and Natural Gas
12	..	Metal Ore Mining
19	..	Other Mining

Division 2&3 —*Manufacturing and Repa ir*

20-21	..	Manufacture of Food Products
22	..	Manufacture of Beverages, Tobacco and Tobacco Products
23	..	Manufacture of Cotton Textiles
24	..	Manufacture of Wool, Silk and Synthetic Fibre Textiles
25	..	Manufacture of Jute, Hemp, and Mesta Textiles
26	..	Manufacture of Textile Products (including wearing Apparel other than Footwear)
27	..	Manufacture of Wood and Wood Products, Furniture and Fixtures
28	..	Manufacture of Paper and Paper Products and Printing, Publishing and Allied Industries
29	..	Manufacture of Leather, Leather and Fur Products (except repair)
30	..	Manufacture of Rubber, Plastic Petroleum and Coal Products
31	..	Manufacture of Chemicals and Chemical Products (except Products of Petroleum and Coal)
32	..	Manufacture of Non-Metallic Mineral Products
33	..	Basic Metal and Alloys Industries
34	..	Manufacture of Metal Products and Parts, except Machinery and Transport Equipment
35	..	Manufacture of Machinery, Machine Tools and Parts except Electrical Machinery
36	..	Manufacture of Electrical Machinery, Apparatus, Appliances and Supplies and Parts
37	..	Manufacture of Transport Equipment and Parts
38	..	Other Manufacturing Industries
39	..	Repair

Division 4—*Electric ity Gas and Water*

40	..	Electricity
41	..	Gas and Steam
42	..	Water Works and Supply

Division 5—Construction

50 .. Construction

51 .. Activities Allied to Construction

Division 6—Wholesale and Retail Trade and Restaurants and Hotels

60 .. Wholesale Trade in Food, Textiles, Live Animals, Beverages aad Intoxicants

61 .. Wholesale Trade in Fuel, Light, Chemicals, Perfumery, Ceramics, Glass

62 .. Wholesale Trade in Wood, Paper, Other Fabrics, Hide and Skin and Inedible Oils

63 .. Wholesale Trade in All Types of Machinery, Equipment including Transport and Electrical Equipment

64 .. Wholesale Trade in Food and Miscellaneous Manufacturing

65 .. Retail Trade in Food and Food Articles, Beverage, Tobacco and Intoxicant

66 .. Retail Trade in Textiles

67 .. Retail Trade in Fuel and Other Household Utilities and Durables

68 .. Retail Trade in Others

69 .. Restaurants and Hotels

Division 7—Transport Storage and Communications

70 .. Land Transport

71 .. Water Transport

72 .. Air Transport

73 .. Services incidental to Transport

74 .. Storage and Warehousing

75 .. Communications

Division 8—Financing Insurance, Real Estate and Business Services

80 .. Banking and Similar Type of Financial Institutions

81 .. Providents and Insurance

82 .. Real Estate and Business Services

83 .. Legal Services

Division 9—Community, Social and Personal Services

90 .. Public Administration and Defence Services

91 .. Sanitary Services

92 .. Education, Scientific and Research Services

93 .. Medical and Health Services

94 .. Community Services

95 .. Recreational and Cultural Services

96 .. Prersonal Services

98 .. International and other Extra Territorial Bodies Services

99 .. Services not elsewhere classified

Division X—Activities not Adequately Defined

XO .. Persons without any Affiliation to any particular industry (including fresh entrants to labour force)

XI .. Activities not adequately Defined Other than that (in XO)

ESTABLISHMENTS TABLES

TABLE E-I

DISTRIBUTION OF ESTABLISHMENTS BY BROAD TYPES

This is a new table for the 1971 Census and has been prepared for total, rural and urban areas. It gives distribution of all establishments by three broad types viz., Manufacturing, Processing or Servicing Establishments ; Trade or Business Establishments and other Establishments in each of the Government, Quasi-government, Private and Co-operative Sectors of the economy. The Manufacturing, Processing or Servicing Establishments have been further classified according to Registered Factories, Un-registered Workshops and Household Industries. Trade or Business Establishments have been classified as wholesale, retail and other. Other Establishments have been classified according to Educational Institutions, Public Health Institutions and Others.

A brief description of various terms used in the table is given below :

Establishment.—Is a place where one or more persons are working and where goods are produced or manufactured not solely for domestic consumption/or where servicing and/or repairing is done such as factory, workshop or household industry or servicing and/or repair workshop or a place where retail or wholesale business is carried on or commercial services are rendered or an office, public or private or a place of entertainment or where educational, religious, social or entertainment services are rendered.

Manufacturing, Processing or Servicing Establishments—are those where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold.

Registered Factory.—is that which is registered under the Indian Factories Act.

Unregistered Workshop—is a place where some kind of 'production, processing, servicing, repairing or making of goods for sale' is undertaken.

Household Industry—is an industry conducted by the Head of the Household himself/herself and/or mainly by the members of the household at home or with in the village in rural areas, and only within the premises of the house where the household lives in urban areas provided the industry is not run on the scale of a registered factory.

Trade or Business Establishments—are those where some trading i.e., transactions involving sale and/or purchase of goods is undertaken.

TABLE E-II PART A

DISTRIBUTION OF MANUFACTURING, PROCESSING OR SERVICING ESTABLISHMENTS OTHER THAN HOUSEHOLD INDUSTRIES CLASSIFIED BY REGISTERED FACTORIES, UN-REGISTERED WORKSHOPS AND SIZE OF EMPLOYMENT

This table shows distribution of Manufacturing, Processing or Servicing Establishments other than Household Industries for total, rural and urban areas separately. It gives information about the size of employment and the number of units under each of the two categories—(a) Registered Factories and (b) Unregistered Workshops in each Division/Major Group of National Industrial Classification, 1970 (N.I.C.). Further, figures have been given for Chandigarh Union Territory, Chandigarh District and Chandigarh City. It could be seen from the table that the figures for Chandigarh district are the same as are for Chandigarh Union Territory. This is because of the fact that the jurisdictions of Chandigarh Union Territory and Chandigarh district are the same.

TABLE E-II PART B

DISTRIBUTION OF MANUFACTURING, PROCESSING OR SERVICING ESTABLISHMENTS OTHER THAN HOUSEHOLD INDUSTRIES CLASSIFIED BY INDUSTRY, FUEL/POWER OR MANUAL USED AND SIZE OF EMPLOYMENT

In this table the number of Factories and Workshops have been presented for total, rural and urban areas and by Division/Major Group of National Industrial Classification of 1970 (N.I.C.) and by size of employment. This table gives information with further breakup according to :

I. All Fuels/Power

(a) Electricity

(b) Liquid fuel

(c) Coal, Wood and Bagasse

(d) Other Power

II. Manual

The figures have been given for Chandigarh Union Territory/Chandigarh District/ Chandigarh City. It could be seen that in case of Chandigarh District the figures have been repeated as of Chandigarh Union Territory. This is because of the fact that jurisdictions of Chandigarh Union Territory and Chandigarh District are the same.

TABLE E-II PART C

DISTRIBUTION OF HOUSEHOLD INDUSTRY ESTABLISHMENTS CLASSIFIED BY INDUSTRY, FUEL/POWER USED AND SIZE OF EMPLOYMENT

This table furnishes information on Household Industry Establishments by Division and Major Group of National Industrial Classification, 1970 and about the kind of fuel or power used by broad employment size groups for total, rural and urban areas separately.

In this table figures have been given for Chandigarh Union Territory, Chandigarh District and Chandigarh City. It could be observed that figures of Chandigarh Union Territory have been repeated for Chandigarh district. This is because of the fact that the jurisdictions of the Chandigarh Union Territory and the Chandigarh District are the same.

E-II PART C DISTRIBUTION OF HOUSEHOLD INDUSTRY ESTABLISHMENTS CLASSIFIED BY INDUSTRY, FUEL/POWER USED AND SIZE OF EMPLOYMENT

TABLE E-III

DISTRIBUTION OF TRADE/COMMERCIAL ESTABLISHMENTS CLASSIFIED BY THE TYPE OF BUSINESS OR TRADE AND SIZE OF EMPLOYMENT

This is a new table for 1971 Census and has been prepared on full count. The Commercial Establishments have been classified by the type of business and trade and size of employment for total, rural and urban areas. All Trade/Commercial Establishments have been classified under each Division/Major Group of National Industrial Classification, 1970 (N.I.C.).

In the table the figures have been given for Chandigarh Union Territory, Chandigarh District and Chandigarh City. It could be seen from the table that the figures for Chandigarh district have been repeated as given under Chandigarh Union Territory. This is because of the fact that jurisdictions of Chandigarh Union Territory and Chandigarh District are the same.

TABLE E-IV

DISTRIBUTION OF ESTABLISHMENTS (OTHER THAN MANUFACTURING, PROCESSING OR SERVICING OR BUSINESS AND TRADE ESTABLISHMENTS BY SIZE OF EMPLOYMENT

This table has been introduced for the first time during the 1971 Census. It provides frame for the establishments not covered by Tables E-II Part A & B and E-III. This Table gives the distribution of establishments (Other than manufacturing, processing, servicing or business and trade establishments) and persons employed by size of employment for total, rural and urban areas in each Division/Major Group of National Industrial Classification, 1970 (N.I.C.). Information in respect of Chandigarh Union Territory, Chandigarh District and Chandigarh City has also been attempted in this table. It could be observed from the table that figures for Chandigarh Union Territory and Chandigarh District are the same. This is because of the fact that jurisdictions of the two are identical.
