CENSUS OF INDIA, 1971

A—CENTRAL GOVERNMENT PUBLICATIONS

The 1971 Census Reports on Punjab will bear uniformly Series No. 17 and will be published in the following parts :—

Part I-A	General Report
Part I-B	General Report (Detailed analysis of the Demographic, Social, Cultural and Migration Patterns)
Part I-C	Subsidiary Tables
Part II-A	General Population Tables
Part II-B	Economic Tables
Part II-C(*i*)	Mothertongue, Religion and Scheduled Castes and Scheduled Tribes Tables
Part II-C(*ii*)	Social and Cultural Tables and Fertility Tables
Part III	Establishment Report and Tables (Present book)
Part IV	Housing Report and Tables
Part V	Special Tables and Ethnographic Notes on Scheduled Castes and Scheduled Tribes
Part VI-A	Town Directory
Part VI-B	Special Survey Reports on selected Towns
Part VI-C	Survey Reports on selected villages
Part VIII-A	Administration Report—Enumeration (For official use only)
Part VIII-B	Administration Report—Tabulation (For official use only)
Part IX	Census Atlas
Part IX-A	Administrative Atlas

B—STATE GOVERNMENT PUBLICATIONS

Part X	District Census Handbooks for each district in three Parts :—
	Part A—Village and Town Directory
	Part B—Village and Townwise Primary Census Abstract
	Part C—Analytical Report, Administration Statistics and District Census Tables

Note:—

Parts A and B of the District Census Handbooks have been printed in one volume.

PREFACE

An essential preliminary to the Population Census held every ten years in India is the physical numbering with paint and brush of every house and every household followed by a listing of the inmates found in each (in Punjab metallic house-numbering plates were affixed on each house under the Permanent House-numbering Scheme at the 1971 Census). This is undertaken with two objects in view. First, as a locating and identifying device of all places containing or likely to contain human beings on the census day. Secondly, to obtain a reliable estimate of the population on which to base the supply of census forms, stationery, etc. to each census block and the number of enumerators/supervisors required for the job. The first object is served by house-numbering, the second by houselisting. Upto 1951 each State was at liberty to design its own houselist form, because of the difficulty of adopting a set of uniform definitions which would apply to the whole of India. Thus housing data were not presented in earlier censuses and obviously this left a void in our knowledge of housing.

One of the innovations of the 1971 Census is the introduction of a separate Establishment Schedule (in addition to the Houselist Schedule) for listing of establishments of all types with their various characteristics. Though a separate Establishment Schedule was canvassed at the 1971 Census, the first concerted attempt for collection of such data was made at the time of the houselisting operation of the 1961 Census. All establishments concerned with production, servicing and repair of goods were sought to be listed in the Houselist in terms of the type of production, servicing or repair each was engaged in. Questions relating to establishments thus formed a part of the Houselist Schedule itself in 1961. A limitation of the 1961 experiment was that only producing, manufacturing, processing, repairing and servicing establishments were covered. However, because of the encouraging response of the 1961 experiment, which yielded very useful data and provided a fairly complete inventory of manufacturing establishments, it was decided to enlist all other types of establishments also at the 1971 Census. These included trading establishments and other establishments such as offices, education and medical institutions, religious institutions etc. etc. All this was done with the prime object of making a detailed survey of all places (buildings/houses) where goods are produced or manufactured not solely for domestic consumption or where servicing and/or repairing is done such as a factory, workshop or household industry and/or repair workshop or a place where retail or wholesale business is carried on or commercial services are rendered or an office or a palce of entertainment or where educational, religious, social or entertainment services are rendered; the only relevant condition being that in all these places one or more than one person should be actually working. The Establishment Schedule was canvassed in February—March, 1970 alongwith the Houselist Schedule, a year in advance of the actual Census Count. The scope of the definition of an Establishment was restricted to include only such establishments which were located in 'census houses'.

Utility of data yielded through the Establishment Schedule is particularly significant in respect of the unorganised sector *i.e.*, unregistered workshops, household industries, petty shops and other similar establishments in respect of which there is hardly any reliable data available so far though this sector absorbs a good proportion of the total work force. The merit of the present Establishment Schedule is that it has helped to collect data on the small establishments in the unorganised sector, strewn all over the country—a virtual census of large and small establishments, the latter being largely in the unorganised sector.

The Tables, E-I to E-IV (E-Series) and Subsidiary Tables, presented at the end of the narrative portion, are based on the entries made by nearly one-quarter of a lakh of enumerators, drawn largely from the Revenue and Education Departments and Municipal Committees. Their work was guided and supervised by the Secretaries of Municipal Committees in towns and Tahsildars/S.D.Os. (Civil) in the rural areas, functioning under the able guidance of a team of eleven State Civil Service Officers, designated as District Census Officers. We are very grateful to each one of them for the unstinted help and cooperation in the collection of valuable statistics on establishments in the State.

The data were processed on the computer in the Data Processing Division of the office of Registrar General, India, New Delhi. We are grateful to Shri S. C. Sharma, Assistant Registrar General (Data Processing Unit) for his help. Coding and punching of the Establishment Schedules was done at Chandigarh in a special Cell, created for the purpose, where the undersigned received valuable help of Shri G. S. Pabla in organising and monitoring this new type of a work, which was done by an enthusiastic and enlightened team of coders, punchers and verifiers. We are grateful to each one of them.

We also acknowledge gratefully the effort put in by the officials in the Tabulation Cell under the able guidance of Shri D.P. Jain, T.O. in scrutinising the establishment tables for inconsistencies and preparing several subsidiary tables, included in the Report, Shri Jain has also done a good job in the scrutiny of the data in the final draft.

I am personally indebted to Shri B.L. Bhan, then A.D.C.O. Punjab (now Deputy Director of Census Operations Jammu & Kashmir), for taking extraordinary pains in the production of the first draft of the Report. He continued to show customary zeal and enthusiasm in the completion of the draft report even after his transfer to Srinagar from Chandigarh in 1973.

To Shri K. K. Chakravorty, Assistant Registrar General (Census), I owe special debt of gratitude for going through the manuscript with me, even on holidays, in New Delhi and for giving valuable suggestions and advice on various crucial points. Above all, we are very grateful to Shri A. Chandra Sekhar, Ex-Registrar General, India, his successor Shri R.B. Chari and Shri K.D. Ballal, Ex-Deputy Registrar General, India for their generous help and guidance in the accomplishment of this tough task.

We are grateful to Shri V. J. Kishore, Assistant Manager (Technical) of Government of India Press, Simla for the interest shown by him in the printing of this report.

Chandigarh,

1-2-1976

H. S. KWATRA
Deputy Director of Census Operations,

INTRODUCTION

General Introduction—Description of columns of Establishment Schedule—Limitations and Difficulties—Processing of Data—Editing—Coding—Punching—Tables . . . . . 1—6

CHAPTER II

TYPES OF ESTABLISHMENTS

Distribution Pattern by broad types—

(*a*) Manufacturing, Processing or Servicing Establishments; (*b*) Trade or Business Establishments; and (*c*) Other Establishments

Sectoral distribution of Establishments—

(*i*) Government or Quasi Government Sector; (*ii*) Private Sector; and (*iii*) Co-operative Sector.

Manufacturing Establishments—Distribution of Registered Factories, Unregistered Workshops and Household Industry units; Rural—Urban differentials. Trade or Business Establishments—Relative incidence of different types of Trade/Business Establishments; Wholesale, Retail and others; Rural—Urban differentials. Other Establishments—Distribution of Other Establishments among three broad types; Educational Institutions, Public Health Institutions and Others; Rural—Urban differentials . . . . . 7—24

CHAPTER III

SIZE OF EMPLOYMENT AND TYPE OF POWER/FUEL USED

SECTION 1. INDUSTRIAL ESTABLISHMENTS

Distribution of Industrial Establishments by size of Employment. Registered Factories : Distribution of different types of registered factories by various employment categories for Division/Major Groups, in Punjab State; Number of Units and persons employed in registered factories represented by various Major Groups among districts of the State. Unregistered workshops other than Household Industry : Distribution of Unregistered workshops and number of persons employed by Division/Major Groups—State—Districts. Type of fuels or power used in registered factories and unregistered workshops (other than Household Industry) ; State—Districts. Use of fuels/power and employment in Household Industry : Number of Units and persons employed in Household Industry in the State and Districts by Major Groups in Rural and Urban areas separately.

SECTION 2. TRADE/COMMERCIAL ESTABLISHMENTS

Number of establishments and persons employed in Trade/Commercial Establishments by Divisions/Major Groups : State—Districts

SECTION 3. OTHER ESTABLISHMENTS

Number of establishments and persons employed in Other Establishments by Divisions/Major Groups : State—Districts . . . . . 25—126

CHAPTER I

INTRODUCTION

One of the innovations of the 1971 Census is the introduction of a separate Establishment Schedule for listing of establishments of all types with their various characteristics. This was done with the prime object of making a detailed survey of all places (buildings/houses) where goods are produced or manufactured not solely for domestic consumption or where servicing and/or repairing is done such as a factory, workshop or household industry and/or repair workshop or a place where retail or wholesale business is carried on or commercial services are rendered or an office or a place of entertainment or where educational, religious, social or entertainment services are rendered; the only relevant condition being that in all these places one or more than one person should be actually working. The Establishment Schedule was canvassed in February-March, 1970 alongwith the Houselist Schedule a year in advance of the actual Census Count. Since the scope of the definition of an establishment was restricted to include only such establishments which were located in Census houses, necessary steps were taken in the field by the house-listing staff for ensuring inter-consistency between the Houselist Schedule and the Establishment Schedule. Precisely for this reason, the two schedules were canvassed simultaneously.

2. Though a separate schedule for collection of data relating to establishments was canvassed at the 1971 Census, the first concerted attempt for collection of such data was made at the time of the houselisting operation of the 1961 Census. All establishments concerned with production, servicing and repair of goods were sought to be listed in the houselist in terms of the type of production, servicing or repair each was engaged in. Questions relating to establishments thus formed a part of the Houselist Schedule itself. A limitation of the 1961 experiment was that only manufacturing establishments were covered. However, because of the encouraging response to the 1961 experiment, which yielded very useful data and provided a fairly complete inventory of manufacturing establishments, it was decided to enlist all other types of establishments also at the 1971 Census. These included trading establishments and other establishments such as offices, educational and medical institutions, religious institutions etc.

3. Utility of data yielded through the Establishment Schedule is particularly significant in respect of the unorganised sector i.e., unregistered workshops, household industries, small petty shops and other similar establishments in respect of which there is hardly any reliable data available so far though this sector absorbs a good proportion out of the total work force. It may be mentioned that data relating to factories and business houses is also available from the returns that Government collect from such establishments. The merit of the present Establishment Schedule is that it helped to collect data on the small establishments in the unorganised sector strewn all over the country—a Virtual Census of small establishments in the unorganized sector.

4. As a reference to a facsimile of the Establishment Schedule, reproduced in Appendix I, will show, the data collected through it yielded valuable information on the distribution of different types of establishments by the three sectors (i) Government or Quasi Government, (ii) Private, (iii) Cooperative, as also the size of employment in each of the type of establishments classified according to the National Industrial Classification, 1970 (NIC 1970).

5. How was this information collected? To understand the system devised for listing of establishments, it is necessary to provide the reader with some background of the houselisting operation, given in the following paragraphs. An exhaustive account will, however, be found in the Housing Report of Punjab of 1971 Census, which has since been published.

6. The first step taken was to number every structure. Before the actual affixation of house numbers, approximate location of the structures and the number of Census houses in each structure were indicated on a notional map which was prepared for each houselisting block in every village and town. A structure or a group of structures within an enclosed or open compound, belonging to the same person used as residences or establishments such as shops, workshops, factories etc. or cattlesheds, stores, *kuthars* etc. or in combination with any of these such as shop-cum-residence, workshop-cum-residence, was taken to be a "building". A structure or part of a structure having a separate main entrance from the road or common courtyard or stair-case used or recognised as a separate unit was taken to be a "Census house". However, such of the parts of a structure with an independent entrance found used for only a single purpose by one household or one management were all taken to be only one Census house.

7. After assigning numbers to each of the structures on the notional map, metallic house-numbering plates were affixed on the houses in accordance

with the numbering plan drawn on the notional map in terms of the Permanent House-numbering Scheme implemented in the State on the eve of the 1971 Census. The next step was to list all the Census houses on a Houselist Schedule and enter various particulars of each Census house in its prescribed columns.

8. It will be seen from the Houselist Schedule, Appendix II, that the entry in column 7 was required to indicate whether a Census house was used wholly or partly as an establishment or not. It was at this stage that an entry had to be made in the Establishment Schedule by the Houselisting staff. If "Yes" was entered in Column 7 of the Houselist, indicating thereby that the Census house was used as an establishment, fuller details of the relevant estabishment were entered simultaneously in the Establishment Schedule. Thus the factum of a Census house being used as an establishment was first recorded in the Houselist. There had to be one to one correspondence between the relevant entries in the Houselist and Establishment Schedules.

ESTABLISHMENT SCHEDULE

9. With this background of the houselisting operation, a brief idea is given below about various columns of the Establishment Schedule so as to enable the reader to appreciate properly the data yielded through it. Detailed instructions for filling various columns of the Establishment Schedule will be found in the "Instructions to Enumerators for filling in various columns of the Establishment Schedule", reproduced in Appendix III.

Column 1—Serial No.

In this column, the establishments were entered one after another serially in arabic numerals.

Column 2—Census House No.

The Census house No. of the structure or part of a structure used as an establishment was entered here. This was the same number shown in column 3 of the Houselist against which "Yes" was written in column 7 of the Houselist. In case of an establishment spread over more than one Census house adjoining one another, while in Column 2 of the Establishment Schedule, a number of Census houses were noted in respect of that particular unit of production, processing or repairing, trade or business etc., the entries in Column 3 onwards related to the entire group of Census houses covered by that establishment.

Column 3—Name of the Establishment or of the proprietor

In case of establishments bearing distinct names, "Name of Establishment" was recorded. Where an establishment had no separate distinct name as in the case of small shops or small workshops or household industries, name of the owner was recorded.

Column 4—Is the establishment

(a) Govt./Quasi-Govt.
(b) Private
(c) Co-operative Institution

An establishment was treated as a Government/Quasi Government Institution if the Central or State Government or a Local Authority such as Zila Parishad, City Corporation or Municipality etc. completely owned or had a majority of shares so as to control the management of the establishment.

Private establishments were those owned and managed by private individuals or corporate bodies not being cooperative institutions or Government or Quasi Government institutions.

Establishments registered under the Cooperative Societies Registration Law of the State, alone fell in the category "Co-operative".

Column 5—Average number of persons working daily last week or in the last working seasou, including proprietors and/or family workers

Such persons included owner or proprietor of the establishment, such of the family workers who worked in the establishment and also the hired workers, if any. They also included apprentices, both paid and unpaid.

Column 6—Is it

(a) Household Industry
(b) Registered Factory
(c) Unregistered Workshop

Workshop was taken to be a place where some kind of manufacturing, processing, servicing and repairing or making of goods for sale was being done. Such of the workshops which were registered under the Indian Factories Act were treated as Registered factories and others as unregistered workshops. A workshop conducted by the head of the household himself/herself or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas was taken to be a household industry.

Column 7—Description of the products, processing or servicing done

The description of the actual work relating to product, processing and servicing done in the household industry, factory or workshop was to be recorded in this column.

Column 8—Type of fuel or power used

Description of the fuel or power used for running of the factory, workshop or household industry (if run on power or fuel) was entered here. These could be Kerosene, soft coke, petrol, diesel, gas, coal, wood, electricity, steam, animal power or even human energy.

Trade or commercial Establishments

Columns 9 and 10 were filled in respect of trading establishments or establishments which rendered commercial services only.

Column 9—Description of goods bought/sold

The description of the main items of goods bought/sold was given in this column.

Column 10—Whether (a) Wholesale or (b) Retail

In the case of trading establishments, it had to be mentioned in this column whether the goods referred to in column 9 were bought/sold in wholesale or retail.

Column 11—Other Establishments

In this column, description of establishments other than trading, commercial or manufacturing establishments had to be given. These included Government, Semi-Government or private offices, schools, religious institutions, hospitals, cinemas, hotels. tea-shops, doctors' clinics, lawyers' offices, laundries etc.

LIMITATIONS AND DIFFICULTIES

10. One of the main limitations of the data yielded through the canvassing of Establishment Schedule is that these relate to only such establishments which were found in census houses: open air and itinerant establishments were not covered in the Establishment Schedule by the houselisting staff.

11. Another factor responsible for the possibility of some of the establishments, though located inside census houses, having been left out is the negligent and indifferent attitude of some of the enumerators toward filling up of the Establishment Schedule—presumably to save on time.

12. A few instances came to our notice where the enumerators were concentrating mainly on house-numbering and houselisting work. They were making no searching enquiries whether any activity relating to manufacture/repair, trade or any other activity conducted by at least one person, classifiable as an establishment, was going on inside the census house. Similarly it came to our notice that there was a tendency on the part of some of the enumerators to record only one establishment and ignore the less important establishments in such of the cases where more than one establishment was located in a census house. The supervisory staff was alerted to remedy this kind of a situation. The houselisting staff was also repeatedly instructed not to omit, for any reason, any establishment from being listed in the Schedule.

13. Enumerators in a few cases faced some difficulty in collecting data in respect of large factories where such establishments were spread over many census houses and, in some cases, more than one building. They nurtured some doubt in deciding whether to record it as one or more than one establishment. It was found that they had, in a few such cases, made some wrong entries. However, as already stated, data regarding registered factories would be available from other returns that government collect from such establishments and it would be possible to make a comparative assessment. The merit of the present Establishment Schedule is, as already stated, that it helped to collect data on small establishments strewn all over the State.

14. Another difficulty faced by the enumerators was to arrive at a correct average number of persons working in an establishment daily during the last week or in the last working season. In the case of household industry, particularly, which provides subsidiary employment to cultivating families, it is somewhat difficult to determine this number precisely.

15. Last but not the least important precaution taken by us was to ensure that the enumerators did not confuse the 1961 definition of an establishment with the one adopted at this Census. While under the definition adopted at the 1961 Census, only particulars of the manufacturing, processing or servicing establishments were collected in the Houselist form itself, the present definition encompassed, besides the manufacturing units, other establishments such as shops, business houses, offices, banks, religious and educational institutions, hostels, restaurants and places of entertainment. Among others, mention may be made of some of the typical cases such as tube-well sheds in the fields, dak bungalows and tourist lodges, small temples etc.

PROCESSING OF DATA

16. After the establishment schedules arranged in the serial order of enumerator's blocks were received from the District Census Offices, these were further arranged at the headquarters of the Census Directorate separately for rural and urban areas district by district and within the district by tahsils and within the tahsil in the serial order of the enumerators' blocks in the case of the rural areas, and with in the district town by town (break-up in the order of Location Code), and within the town in the serial order of houselisting blocks. Separate operational units for tahsils and towns were thus evolved for processing of data.

74-L/P(N)11DCOPunjab—4(a)

17. After the records were arranged, the first scrutiny was done with reference to the code list of villages/towns as well as the block list to discover any omission or duplication. Fortunately all went well notwithstanding the gigantic dimensions of the operation.

18. Unlike at earlier censuses, the data collected in the Houselist and Establishment Schedule were to be processed by electronic data processing device at the 1971 Census. There could, therefore, be no opportunity of correcting the mistakes in the original schedules at the advanced stage of tabulation. In a manual operation, one could correct mistakes in the original schedules even at the stage of preparation of tables. The staff had, therefore, to be kept on the alert at each stage to ensure hundred per cent accuracy and quality of work.

19. As the data collected in the Establishment Schedules had to be tabulated on full count, we had to scrutinize thoroughly every entry to eliminate any patent errors or inconsistencies before coding the entries. It had also to be ensured that there were no coding errors before transferring the coded data on punch-cards. The coders and key punchers were given intensive training and practical exercises before they took up the actual work. The punched cards were verified on the verifying machines on 100% basis to ensure absolute accuracy of work done on the manually operated punching machines at Chandigarh.

20. Notwithstanding elaborate instructions, intensive training and close supervision, a few incorrect and inconsistent entries in the filled in schedules came to our notice at the editing stage. These had to be scrutinized for rectifying the defects by correcting the patently wrong or internally inconsistent entries and, to some extent, probable entries had to be supplied in accordance with the editing instructions, reproduced in Appendix IV to this Report. Some such cases are illustrated below:

1. In a few cases, entries made in columns 1 and 2 of the Establishment Schedule did not tally with those recorded in columns 3 and 7 of the Houselist. These were suitably corrected by adopting the numbers given in the Houselist.

2. No mention was made of the average number of persons working in the establishments in column 5 or else 'Nil' was recorded in the column. Since it was not possible to impute the number of persons working in such cases, 'unspecified' was recorded. Also in a few cases the enumerators had included the number of students—enrolled in school in the total number of workers working in school and the indoor patients in the total number of workers in hospital. Such cases were referred to the institutions concerned and the correct number was incorporated.

3. It was noticed that some of the enumerators had recorded the information pertaining to manufacturing units not only in the relevant columns 6, 7 & 8 but also in columns 9 and 10 pertaining to Trading Establishments and vice versa. Such cases were suitably corrected by making a reference to the corresponding entries in the Houselist.

4. Exact details of products manufactured, processed or serviced were not given in column 7. Such cases were corrected with the help of information given in column 3 of the Establishment Schedule.

5. More than one fuel or power used was recorded in column 8. Unless there was some supplementary evidence available from other columns of the Establishment Schedule which could help to retain one of the fuels and exclude the others, it was decided to retain the fuel recorded first in the column and score off the rest.

6. In column 10 of the Establishment Schedule, it was shown in some cases that an establishment was engaged in both wholesale and retail trade. In order to facilitate the coding of the entry, only retail trade was retained unless there was evidence to the contrary available from column 3 of the Establishment Schedule.

Also in cases where column 10 had been left blank, 'Retail' was imputed.

7. Some of the enumerators had mistaken column 11 for remarks column. Such mistakes were suitably set right.

Coding

21. In an Electronic Data Processing Device, the data collected in the schedule is transferred to punch cards which are fed into a computer for generation of tables. This involves conversion of recorded entries into numerals or codes. The code structure prepared by the office of Registrar General (vide Appendix V) was used for the purpose of coding the Establishment Schedules. The coding of Col. 7 (or 9 or 11) was done in accordance with the National Industrial Classification, 1970, reproduced in Appendix VI to this Report. Under the scheme of Industrial Classification economic activities which are akin in terms of the processes adopted, raw material used and the finished products produced are grouped together for allotment of Code Number. The basis of classification is the nature of economic activity carried on in an establishment. Thus the National Industrial Classification, 1970 which consists of 10 Divisions (at the first

digit level) 66 Major groups (at the second digit level) and 386 Minor groups (at the third digit level) covers the entire gamut of economic activity. However, economic pursuits of establishments have been described only at the Major group level (two digit code) for the purpose of this Report. Some of the major groups which account for significant proportions of units according to data yielded through the Establishment Schedule include Major group 20-21 —Manufacture of food products, Major group 23 —Manufacture of cotton textiles, Major group 26 —Manufacture of textile products (including wearing apparel other than footwear), Major group 27—Manufacture of wood and wood products, furniture and fixtures, Major group 29—Manufacture of leather, leather and fur products (except rapair), Major—group 34—Manufacture of metal products and parts, except machinery and transport equipment, Major group 39—Repair, Major group 65—Retail trade in food and food articles, beverage, tobacco and intoxicants, Major group 66—Retail trade in textiles, Major group 67—Retail trade in fuel and other household utilities and durables, Major group 68—Retail trade in others, Major group 69—Restaurants and hotels, Major group 92—Education scientific and research services, Major group 93—Medical and Health Services and Major group 94—Community Services.

Punching

22. Coded Establishment Schedules were punched in the Coding and Punching Cell at Chandigarh as per comprehensive instructions received from the office of the Registrar General, India, reproduced in Appendix VII.

23. The Card Layout of the Establishment Schedule was designed in such a way that it was possible to punch particulars of 5 establishment on one card. File number, Location Code and rural/non-city urban/city urban status of the unit were punched on the first 13 columns of the 80 column I.B.M. Card. Data of first establishment was punched on columns 14 to 26, second establishment on 27 to 39, third establishment on columns 40 to 52, fourth establishment on columns 53 to 65 and fifth establishment on columns 66 to 78 of the card. Columns 79 to 80 were left blank. The following important items were coded and punched:—

No. 1

Serial No. of the establishment was assigned 3 Digit Code and punched accordingly.

No. 2

Type of Establishment—whether Government/Private or Cooperative was assigned a single Digit Code and punched accordingly.

No. 3

No. of persons working in an establishment was assigned a 4 Digit Code and 4 columns of the Card were used to punch the information.

No. 4

Type of manufacturing establishment was assigned one Digit Code.

No. 5

N.I.C. Code assigned to entries in columns 7 or 9 or 11 of the Establishment Schedule were punched in three columns of the Card.

No. 6

Type of fuel or power used was assigned one Digit Code and only one column of the Card was utilized to punch this information.

24. Specimen of the Card layout of Establishment Schedule adopted in 1971 Census is given in Appendix VIII.

25. The punched cards were verified on 100% basis on verifying machines and the data cards were arranged for each unit in the ascending order of Serial No. of villages in rural areas and of wards in urban areas. Blocks within the villages and wards in towns were also arranged in a continuous serial. The Punched cards were despatched to the Mechanical Tabulation Unit of the office of the Registrar General, India, New Delhi for further processing on the Electronic Computer. The information punched in Cards was transferred to tapes in the Mechanical Tabulation Unit, in New Delhi. Thereafter the programme was written and fed into the computer. Subsequently, the tape was run for producing the following tables as per instructions given to the computer through programmes:—

Table No.	Description of the table
Main Tables:	
(1) Table E.I ..	Distribution of establishments by broad types.
(2) Table E.II—	
(*i*) Part A ..	Distribution of Manufacturing, Processing or Servicing Establishments other than Household Industries classified by registered factories, unregistered workshop and size of employment.
(*ii*) Part B ..	Distribution of Manufacturing, Processing or Servicing Establishments other than Household Industries classified by Industry, Fuel/Power or Manual used and size of employment.
(*iii*) Part C ..	Distribution of Household Industry establishments classified by Industry, Fuel/Power used and size of employment.
(3) Table E. III ..	Distribution of Trade/Commercial establishments classified by the type of business or trade and size of employment.
(4) Table E. IV..	Distribution of Establishments (Other than manufacturing, processing or servicing or business and trade establishments) by size of employment.

26. In addition to these main tables, the following subsidiary tables have been prepared to facilitate interpretation of data in terms of ratios and proportions. Chapter II and III are devoted to the interpretation of the data given in these tables.

Table No.	Description of the table
Subsidiary Tables	
(1) Table E. I. 1 ..	Distribution of 1,000 establishments by broad types in rural and urban areas separately.
(2) Table E. II—(*i*) Part A. 1 ..	Distribution of 1,000 manufacturing, processing or servicing establishments other than Household Industry as registered factories, unregistered workshops in each Division/Major Group of N.I.C. and by size of employment in rural and urban areas.
(*ii*) Part B. 1 ..	Distribution of 1,000 manufacturing, processing or servicing establishments other than Household industries in each Division / Major Group of N.I.C. and the kind of Fuel/Power used and size of employment.
(*iii*) Part C. 1 ..	Distribution of 1,000 establishment which are Household Industries in each Division/Major Group of N.I.C. and kind of Fuel/Power used and size of employment.
(3) Table E. III. 1	Distribution of 1,000 Trade/Commercial Establishments in each Division/Major Group of N.I.C. by size of employment in rural and urban areas separately.
(4) Table E. IV. 1	Distribution of 1,000 establishments (Other than manufacturing, processing or servicing or business and trade establishments) in each Division/Major Group by size of employment in rural and urban areas separately.

CHAPTER II

TYPES OF ESTABLISHMENTS

1.1. For the purpose of classification, establishments have been divided into three broad categories, viz., (i) Manufacturing, Processing and Servicing Establishments, (ii) Trade or Business Establishments and (iii) Other Establishments. Data giving the distribution of establishments by these broad categories for the State, its districts and separately for rural and urban areas will be found in Table E-I. Distribution of 1,000 establishments by broad types separately for rural and urban areas has been worked out in Subsidiary Table E-I.1.

The total number of establishments in Punjab work out to 329,357—162,775 establishments have been returned in rural and 166,582 in urban areas. The break-up of the total number of establishments by various types given in Table E-I shows that the number of manufacturing, trade and other establishments stands at 105,618, 154,105 and 69,634 respectively.

1.2 The following statement shows distribution of total number of establishments falling under the three categories for the State, districts and cities:

STATEMENT II.1

Distribution of Establishments among various Districts of the State

State/District/City	Total No. of Establishments		Manufacturing, Processing or Servicing Establishments		Trade or Business Establishments		*Other Establishments*	
	No.	Percentage	No.	Percentage	No.	Percentage	No.	Percentage
Punjab	**329,357**	**100·00**	**105,618**	**100·00**	**154,105**	**100·00**	**69,634**	**100·00**
Gurdaspur District	26,593	8·05	7,588	7·18	12,639	8·20	6,276	9·01
Amritsar District	43,918	13·34	12,215	11·56	23,203	15·06	8,500	12·21
Firozpur District	40,357	12·25	10,808	10·23	19,821	12·86	9,728	13·97
Ludhiana District	41,292	12·54	15,802	14·96	18,341	11·90	7,149	10·27
Jullundur District	41,886	12·72	14,687	13·91	17,833	11·57	9,366	13·45
Kapurthala District	9,541	2·90	2,185	2·07	5,039	3·27	2,317	3·33
Hoshiarpur District ..	26,917	8·17	8,489	8·04	11,484	7·45	6,944	9·97
Ropar District	14,799	4·49	5,396	5·11	6,080	3·95	3,323	4·77
Patiala District	28,800	8·74	8,796	8·33	13,335	8·65	6,669	9·58
Sangrur District	28,002	8·50	10,382	9·83	12,030	8·26	4,990	7·16
Bhatinda District	27,342	8·30	9,270	8·78	13,700	8·89	4,372	6·28
Amritsar City	22,461	6·82	6,848	6·48	12,371	5·03	3,252	4·64
Ludhiana City	18,802	5·71	7,765	7·35	8,732	5·67	2,305	3·31
Jullundur City	14,409	4·37	4,890	4·63	6,545	4·25	2,970	4·27
Patiala City	6,119	1·86	1,666	1·58	3,311	2·15	1,142	1·64

It emerges from this statement that the highest number of establishments (43,918 or 13.34 per cent of the total number of establishments) in the State has been returned in Amritsar district. Second highest number of 41,886 establishments, constituting 12.72 per cent of total number of establishment, is accounted for by Jullundur district. Ludhiana district with 41,292 establishments ranks third in the State. It will be seen that Firozpur district also accounts for as high as 12.25 per cent of the total number of establishments in the State. In the case of the remaining districts, except for Kapurthala and Ropar districts, proportions of establishments to the total number of establishments in the State ranges between 8.05 per cent in Gurdaspur district and 8.74 per cent in Patiala district. Kapurthala district shares the lowest proportion of 2.90 per cent of the total number of establishments in the State. Ropar district with a proportion of 4.49 per cent ranks second from the bottom.

1.3 Traditionally, there is a heavy concentration of establishments in the main urban centres of the State. This trend is reflected from the following Statement giving the proportion of total number of establishments in each city to the total urban figures of the district:

STATEMENT II.2

Name of city	No. of establishments in city	No. of establishments in the urban areas of the district	Percentage of establishments in the city to total establishments in the urban areas of the district
1	2	3	4
Amritsar ..	22,451	27,824	80·69%
Ludhiana ..	18,802	25,762	72·98%
Jullundur ..	14,409	23,761	60·64%
Patiala	6,119	14,944	40·95%

DISTRIBUTION PATTERN BY BROAD TYPES

(a) Manufacturing, Processing or Servicing Establishments :

2.1 Out of the total number of 105,618 establishments of this type in the State, the highest proportion of 14.96 per cent has been recorded in Ludhiana district followed by 13.91 per cent in Jullundur district. This is very much so in view of the importance of these two districts as homes of manufacturing, servicing and repairing units. As a matter of fact Ludhiana and Jullundur districts, are the traditional home of small industries, for which they are known all over the world—woollen hosiery of Ludhiana and sports goods of Jullundur. Among the remaining districts, only Sangrur, Bhatinda and Ropar claims higher share of the total number of industrial establishments in the State compared to their share of the overall number of establishments.

(b) Trade or Business Establishments :

As in the case of total number of establishments, Amritsar district takes a lead over other districts of the State in respect of trade/business establishments also by accounting for as many as 15.06 per cent of such establishments returned in the State as a whole. Second and third places go to Firozpur and Ludhiana districts which account for 12.86 per cent and 11.90 per cent respectively of all trade/business establishments. However, Ludhiana district having returned 12.54 per cent of all types of establishments in the State is somewhat under-represented in the case of trade/business establishments. Mention may be made of Gurdaspur, Kapurthala and Bhatinda districts, which like Amritsar and Firozpur districts, reflect higher proportions under this category compared to their shares of the overall number of establishments.

(c) Other Establishments :

Establishments categorized under this heat include Government offices, educational institutions hospitals, dispensaries and religious institutions For the State as a whole, 21.14 per cent of the total number of establishments have been returned under this category. Firozpur district takes the highest share of 13.97 per cent of such establishments returned in the State as a whole, followed by Jullundur district with a share of 13.45 per cent and Amritsar district with a share of 12.21 per cent. Districts which are better represented under this category compared to their share in the overall number of establishments include, besides Firozpur district, Gurdaspur, Jullundur, Kapurthala, Hoshiarpur, Ropar and Patiala.

2.2 The statement given below shows distribution of 100 establishments by the three broad types:

STATEMENT II.3

Distribution of 100 *establishments by broad types*

State/District/City	Total No. of Establishments	Manufacturing, Processing or Servicing Establishments	Trade or Business Establishments	Other Establishments
1	2	3	4	5
Punjab	**100**	**32·07**	**46·79**	**21·14**
Gurdaspur District ..	100	28·63	47·69	23·68
Amritsar District ..	100	27·81	52·83	19·36
Firozpur District ..	100	26·78	49·11	24·11
Ludhiana District ..	100	38·27	44·42	17·31
Jullundur District ..	100	35·06	42·58	22·36
Kapurthala District	100	22·90	52·81	24·29
Hoshiarpur District	100	31·54	42·66	25·80
Ropar District ..	100	36·46	41·08	22·46
Patiala District ..	100	30·54	46·30	23·16
Sangrur District ..	100	37·08	45·10	17·82
Bhatinda District ..	100	33·90	50·11	15·99
Amritsar City ..	100	30·50	55·10	14·40
Ludhiana City ..	100	41·30	46·44	12·26
Jullundur City ..	100	33·94	45·45	20·61
Patiala City ..	100	27·23	54·11	18·66

The high incidence of trade or business establishments is an indicator of the growing economic prosperity of Punjab. The 'green revolution' and the spectacular achievements in the sector of small industry have helped to boost the level of income and have in turn stimulated the demand for consumer goods. Besides, mechanized farming has generated heavy demand for agricultural implements/machinery, chemical fertilizers and several allied products.

2.3 Next in importance to 'trade or business establishments' are 'manufacturing, processing or servicing establishments'. These account for 32.07 per cent of all types of establishments returned in the State. Establishments of the third type categorised

under 'Others' constitute 21.14 per cent of total number of establishments.

2.4 Looking at the relative incidence of the three types of establishments in the case of districts, as revealed by the figures worked out above, it will be seen that Ludhiana district reflects the highest incidence of 'manufacturing, processing or servicing establishments' while Amritsar district reflects the highest incidence in the case of 'trade or business establishments'. Establishments such as office, educational and medical institutions, religious institutions and the like categorised under 'Others' have been returned with the highest incidence in the case of Hoshiarpur district.

2.5 Besides Amritsar district, Kapurthala district has also returned more than half (52.81%) of its establishments under the category 'trade or business establishments'. However, manufacturing establishments in the case of Kapurthala district have been returned with the lowest incidence of 22.90 per cent. Bhatinda district, which too has a little more than half (50.11%) of its establishments returned under the category 'trade or business establishments', represents a fairly high proportion of 33.90 per cent under the category of 'manufacturing establishments'. The districts, however, represents the lowest proportion of 15.99 per cent under the category 'Others'.

2.6 It will be seen that Gurdaspur, Amritsar, Kapurthala and Firozpur districts have returned lower proportions of 'manufacturing establishments' but higher proportions of 'trade or business establishments' compared to the corresponding State proportions. On the other hand, Ludhiana, Sangrur, Jullundur and Ropar districts account for higher proportions under the category 'manufacturing establishments' and lower under 'trade or business establishments' compared to the corresponding State proportions. Hoshiarpur and Patiala districts, which represent lower proportions under both 'manufacturing' and 'trade or business' categories than the corresponding State proportion, reflect a significantly higher incidence under the 'Others' category.

2.7 A totally reverse position obtains in the case of Bhatinda district, which represents higher proportions under 'manufacturing' and 'trade or business' categories compared to the corresponding State proportion, but is significantly under-represented under 'Others' category. At a quick operation like the Census it was not possible to go into the various reasons responsible for such trends in different districts.

SECTORAL DISTRIBUTION OF ESTABLISHMENTS

3. It will be seen from Table E-I that data regarding distribution of establishments have been presented separately for those falling in the (i) Government or quasi Government sector (ii) Private sector and (iii) Co-operative sector. An overwhelming number of establishments falls in the private sector, the Co-operative sector, particularly, making only a marginal contribution to the total number. As a reference to Subsidiary Table E-I. 1 will show, in the rural areas, 88.7 per cent of the total number of establishments has been identified in the private sector, the government and co-operative sectors claiming just 9.1 per cent and 2.2. per cent respectively of the total number. Private sector equally dominates the scene in urban areas where it accounts for 94.3 per cent of the total number of establishments. Resultantly, government and co-operative sectors claim as low proportions as 5.3 per cent and 0.4 per cent respectively. There is no district in the State, except Kapurthala and Patiala districts, which reflects more than 10 per cent of the total number of establishments either in rural areas or urban areas in the government sector. Kapurthala district has 11.1 per cent of the total number of rural establishments in the government sector. The corresponding proportion for Patiala district is 10.5 per cent. On the other hand the highest incidence of establishments in the private secor is reflected in the case of rural areas in Bhatinda district (90.6%) and in the case of urban areas in Ludhiana district (96.9%).

SECTORAL DISTRIBUTION OF 'MANUFACTURING, PROCESSING OR SERVICING ESTABLISHMENTS'

4. Of the 105,618 manufacturing establishments returned in the State, as many as 105,025 are accounted for by the private sector. Number of units in the government and co-operative sectors stands only at 449 and 144 respectively. It will thus be observed that, compared to private sector, public and co-operative sectors pale into insignificance in the case of 'Manufacturing Establishments'. A glaring picture of the incidence of establishments run in the public sector emerges from a glance at Subsidiary Table E-I.1, which shows that out of every 1,000 establishments returned in the rural areas of the State, there is just one manufacturing establishment identified in the government sector. In the co-operative sector, the incidence is still more insignificant and in that it does not account for even one manufacturing establishment per 1,000 rural establishments. On the other hand, private sector makes a contribution of 147 unregistered workshops and 175 units in the household industry sector per 1,000 rural establishments. In the urban areas, the position is not any different from that obtaining in the rural areas. Out of 1,000 establishments, just two manufacturing establishments are accounted for by the government sector. The 'co-operative

sector' does not account for even one such establishment per 1,000 establishments.

SECTORAL DISTRIBUTION OF TRADE OR BUSINESS ESTABLISHMENTS

5. Like manufacturing establishments, the incidence of trade or business establishments is very low in the case of both government and co-operative sectors. While the former takes a share of only 7 such establishments out of 1,000 rural establishments, the corresponding proportion in the case of the latter is only 9. In the urban areas, the proportions have been returned at 7 in the government sector and 2 in the co-operative sector. The corresponding proportions of trade/business establishments in the private sector stand at 402 per 1,000 establishments in the rural areas and 509 per 1,000 establishments in the urban areas.

As will be seen from Subsidiary Table E-I.1, a large majority of trade establishments in the private sector are retail shops both in rural and urban areas. Retail shops account for more than one-third of the total number of establishments returned in the State.

SECTORAL DISTRIBUTION OF 'OTHER' ESTABLISHMENTS

6.1 Unlike Manufacturing and Trade/Business establishments, a significant proportion of 'Other' establishments falls in the government sector. These (Others) constitute proportions of 83 per 1,000 rural establishments and 44 per 1,000 urban establishments. However, relatively, private sector plays a predominant role by having returned proportions of 159 establ shments per 1,000 in the rural areas and 122 establishments per 1,000 in the urban areas.

Co-operative sector makes a very insignificant dent in the case of 'Other' establishments both in rural and urban areas.

6.2 As Subsidiary Table E-I.1 will show, the role of the government sector is highly conspicuous in the case of establishments included under sub-head 'Others' of the 'other establishments' category. These are mostly government offices. The significant role of government sector is also noticeable in the case of educational institutions strewn in the rural areas, where it takes an edge over the private sector.

Manufacturing Establishments :

7.1 All establishments concerned with production, servicing and repair of goods were listed in the establishment schedule in terms of the type of production, servicing or repair each was engaged in. This helped in obtaining a fairly complete inventory of establishments engaged in all types of manufacturing, servicing and repairing industry in the rural and urban areas.

7.2 The total number of manufacturing establishments in the Punjab State returned at the 1971 Census stands at 105,618. As will be seen from table E-1, as many as 101, 958 establishments of this number are either unregistered workshops or household industry units. Between the two, unregistered workshops account for 65,275 units and household industries 36,683 units. In terms of units, registered factories constitute just a small fraction of the total number of manufacturing units. However, as will be spelt out in detail in Chapter III of this Report, the role of registered factories in terms of production of goods and absorption of labour force is highly conspicuous.

7.3 Notwithstanding the limitation of comparison of 1961 and 1971 Census figures of manufacturing establishments on account of the fact that the unit of enumeration at the former, unlike the latter, was not an establishment but a Census house, a reference to Table E-III incorporated in the 1961 Census Housing Report shows that the total number of manufacturing establishments stood at 66,944 only in the composite Punjab. In the re-organized Punjab the number of establishments was 105,618 according to the Houselisting operation conducted in 1970 —an increase of 58%. This spectacular increase is apparently a result of the high priority given to the industrialization of the State as an integral part of the overall programme for economic development. The progress is phenomenal particularly in the small industry sector. Having made dazzling contribution in the field of agricultural production, the State is already poised for a major breakthrough in playing a leading role in the small industry sector in the country. Application of modern technology in the field of agriculture has created a significant demand for tractors, agricultural machinery, fertilizers etc., and this in turn has generated an unprecedented demand for industrial and consumers goods.

7.4 Notwithstanding the picture depicted above, it will be seen that the number of registered factories in the State, as per figures given in Table E-1, is as low as 3,660, being just 3.5 per cent of the total number of manufacturing units. It is apparent that most of the establishments returned under the manufacturing category, are either the traditional household industries or un-registered workshops in the unorganised sector. This, however, does not undermine the fact that the organized sector of the industry in the State has expanded significantly

during the last decade. The total number of registered factories in the State stood at 1921 only in 1958 for the composite State of Punjab. The period from 1958 to 1971 happened to be pretty crucial for the development of the organised sector of industry in the State: the number of registered factories shot up from 1921* to 3660† between 1958 and 1971. According to the information received from the State Labour Commissioner's office, the number of registered factories in the State was 4,423 in 1970. The difference of 763 between the number reported by the Labour Commissioner's office and that returned at the 1971 Census can be partly accounted for due to the incorrect recording of some of the registered factories as 'unregistered workshops' by the houselisting staff. In any case, without casting a doubt on the authenticity of either the Census figures or those released by the Labour Commissioner's office, a comparison of the number of the registered factories in 1961 with the corresponding figure in 1971 establishes beyond doubt that the organised sector has made a remarkable headway in the last decade.

Distribution of Manufacturing Establishments :

8.1 An interesting pattern of distribution of manufacturing establishments among various districts emerges from the following statement:

STATEMENT II.4

Distribution of Manufacturing Establishments

State/District	Total No. of Manufacturing Establishments	Proportion in terms of 1,000 Establishments
1	2	3
Punjab	**105,618**	**1,000**
Gurdaspur District ..	7,588	72
Amritsar District	12,215	116
Firozpur District	10,808	102
Ludhiana District	15,802	150
Jullundur District	14,687	139
Kapurthala District ..	2,185	21
Hoshiarpur District ..	8,489	80
Ropar District	5,396	51
Patiala District	8,796	83
Sangrur District	10,382	98
Bhatinda District	9,270	88

There are significant variations in the proportions of manufacturing establishments returned in various districts. Corresponding to 15 per cent of the total number of manufacturing establishments accounted for by Ludhiana district, the proportion in respect of Kapurthala district is as low as 2.1 per cent. Jullundur district occupies the second important place on the industrial map of Punjab, claiming 13.9 per cent of the total number of manufacturing establishments. Amritsar and Firozpur districts, each accounting for more than 10 per cent of the total number of manufacturing establishments, also make significant contributions to the total number of manufacturing establishments, in the State.

Among districts which are conspicuous for their small contributions to the total number of manufacturing establishments, mention may, particularly be made of Kapurthala and Ropar districts.

8.2 For a further insight into the pattern of distribution of manufacturing establishments, it will be useful to look at the following statement, giving the distribution of registered factories, unregistered workshops and household industries among various districts of the State.

STATEMENT 11.5

Distribution of Registered factories, unregistered workshops and household industry units among various districts of the State

Manufacturing Establishments

State/District	No. of registered factories	Per 1,000 registered factories	No. of unregistered workshops	Per 1,000 unregistered workshops	No. of household industry units	Per 1,000 household industry units
1	2	3	4	5	6	7
Punjab ..	**3,660**	**1,000**	**65,275**	**1,000**	**36,683**	**1,000**
Gurdaspur District.	311	85	5,309	81	1,968	54
Amritsar District.	777	212	9,140	140	2,298	63
Firozpur District.	189	52	5,733	88	4,886	133
Ludhiana District.	950	260	10,955	168	3,897	106
Jullundur District.	690	189	10,146	155	3,851	105
Kapurthala District.	146	40	1,644	25	395	11
Hoshiarpur District.	82	22	4,801	74	3,606	98
Ropar District. ..	38	10	2,306	35	3,052	83
Patiala District.	261	71	5,473	84	3,062	83
Sangrur District.	98	27	5,230	80	5,054	138
Bhatinda District.	118	32	4,538	70	4,614	126

Ludhiana district which leads all other districts of the State in respect of number of manufacturing establishments also accounts for the highest number of registered factories and un-registered workshops. In the case of household industry, the district trails other districts like Sangrur, Firozpur and Bhatinda. It is thus apparent that the shift from the traditional household industry to organized industry is conspicuous in the case of Ludhiana district. Closely following this pattern of change are district like Amritsar and Jullundur. The three districts put together account for 66.1 per cent of registred factories, 46.3 per cent of unregistered workshops and just 27.4 per cent of units in the household industry sector.

*Figure relates to comosite Punjab.
†Figure relates to Re-organised Punjab.

8.3 It will be seen that districts where household industry is a dominant style of manufaturing activity include Firozpur, Sangrur, Bhatinda, Ropar and Hoshiarpur. All these districts have made higher contributions to the number of units in the household industry sector compared to their contribution to the total number of manufacturing units. These districts could easily be identified as industrially backward pockets of the State. Kapurthala district, however, represents higher shares both in the case of registered factories and un-registered workshops compared to its share in the overall number of manufacturing establishments. This should not, however, be taken to imply that the district has any importance as an industrial area of the State: its overall share in the total number of manufacturing establishments is just 2.1 per cent.

8.4 Gurdaspur and Patiala districts appear to be at an identical level of industrial development. Gurdaspur district accounts for a share of 8.5 per cent of registered factories and only 5.4 per cent of units in the household industry sector as against 7.1 per cent of registered factories and 8.3 per cent of units in the household industry sector returned in Patiala district.

8.5 It is obvious that in the State of Punjab, unregistered workshops, other than household industries, constitute bulk of the total number of manufacturing units. The following statement, giving the percentage distribution of manufacturing establishments, clearly shows that unregistered workshops account for as high as 61.80 per cent of the total number of manufacturing establishments:

STATEMENT II. 6

Percentage distribution of Manufacturing Establishments by broad types

State/District	Total	Registered factories	Unregistered workshops	Household industry
1	2	3	4	5
Punjab	**100**	**3·47**	**61·80**	**34·73**
Gurdaspur District ..	100	4·10	69·97	25·93
Amritsar District	100	6·36	74·83	18·81
Firozpur District	100	1·75	53·04	45·21
Ludhiana District	100	6·01	69·33	24·66
Jullundur District	100	4·70	69·08	26·22
Kapurthala District ..	100	6·68	75·24	18·08
Hoshiarpur District ..	100	0·97	56·55	42·48
Ropar District	100	0·70	42·74	56·56
Patiala District	100	2·97	62·22	34·81
Sangrur District	100	0·94	50·38	48·68
Bhatinda District	100	1·27	48·96	49·77

The organised sector of industry does make some impact on the overall economy of the State but the units encompassed by it constitute as low as 3.47 per cent of the total number of manufacturing establishments. The predominance of unregistered workshops in the past two decades in the State marks a new trend; small scale workshops gradually taking the place of household industries. The traditional pattern of running a small workshop at the place of residence by the head of household or mainly by members of the household seems to be fast giving place to the modern trend of running a workshop at a place other than the place of residence. The need for taking to household industries largely arose because of the meagre returns from land. Earnings from the household industry helped the peasant families and other to supplement this meagre income. The 'green revolution' has helped to some extent to reduce the dependence on supplementary income from the household on industry sector. There is a marked tendency now towards taking up caltivation as a whole-time occupation in the wake of application of modern technology to agriculture or to taking up of maunfacture of goods in small workshops on whole-time basis. Rural electrification has further made a positive contribution towards opening of new vistas for making lucrative earnings in small workshops. The general increase in the family size and the resultant smaller living accommodation have also been responsible to some extent in the replacement of household industry by small workshops.

Yet, the shift is to some degree attributable to the growing family size which not only has made it difficult to spare any space in residential census house for manufacturing activity but also given rise to a serious problem of shortage of residential accommodation.

8.6 It will be seen from the statement given above that the preponderence of unregistered workshops seen in the case of the State as a whole is reflected equally in the case of districts. There are, however, distinct inter-district variations in the incidence of different types of manufacturng establishments. In the case of districts like Firozpur, Hoshiarpur, Ropar, Sangrur and Bhatinda, the gap between the proportions of unregistered workshops and units falling under household industry is very narrow. Ropar and Bhatinda districts have, particularly, returned more units in the household industry sector than the unregistered workshops. Manufacturing establishments in the remaining districts are overwhelmingly unregistered workshops. Amritsar and Kapurthala districts have returned as high as three-fourth of the manufacturing units under the category of un-registered workshops. Districts which reflect higher incidence of registered factories compared to the one for the State as a whole include

Amritsar, Ludhiana, Jullundur, Kapurthala and Gurdaspur. On the other hand, Hoshiarpur, Ropar and Sangrur districts do not represent even 1 per cent of the total number of manufacturing units in the category of registered factories.

Rural-Urban differentials

8.7 It is interesting to note from Table E-1 that there are almost as many 'manufacturing, processing or servicing' establishments returned in the urban areas of the State as in rural. The figures stand at 52,322 for urban areas and 53,296 for rural areas.

As the following statement, giving the percentage distribution of each of the three industrial types between the rural and urban areas will show, 82.65 per cent of registered factories returned in the State as a whole have been accounted for by the urban areas of the State.

STATEMENT II. 7

Percentage distribution of Manufacturing Establishments between rural and urban areas

State/District	Rural Urban	Registered factories	Unregistered workshops	Household industries
1	2	3	4	5
Punjab	Rural	17·35	36·96	77·80
	Urban	82·65	63·04	22·20
Gurdaspur District ..	Rural	19·94	32·94	71·90
	Urban	80·06	67·06	28·10
Amritsar District	Rural	7·85	26·61	49·00
	Urban	92·15	73·39	51·00
Firozpur District	Rural	38·62	53·81	64·04
	Urban	61·38	46·19	35·96
Ludhiana District	Rural	9·47	24·51	75·55
	Urban	90·53	75·49	24·45
Jullundur District	Rural	14·49	33·44	84·19
	Urban	85·51	66·56	15·81
Kapurthala District ..	Rural	16·44	41·97	64·30
	Urban	83·56	58·03	35·70
Hoshiarpur District ..	Rural	65·85	47·70	97·12
	Urban	34·15	52·30	2·88
Ropar District	Rural	55·26	43·80	96·69
	Urban	44·74	56·20	3·31
Patiala District	Rural	31·42	40·12	71·85
	Urban	68·58	59·88	28·15
Sangrur District	Rural	32·65	44·36	85·30
	Urban	67·35	55·64	14·70
Bhatinda District	Rural	30·51	50·09	75·08
	Urban	69·49	49·91	24·92

8.8 It will further be seen that a large majority of registered factories are located in the urban areas in all the districts of the State except Hoshiarpur and Ropar districts. In Amritsar and Ludhiana districts particularly, urban areas account for even more than 90 per cent of such industrial units. It clearly emerges from this that the locational pattern of organised industry in the State is mainly urban. This is to a marked degree true of unregistered workshops also. The most significant rural-urban differential in the case of unregistered workshops is seen in Ludhiana district which accounts for 75.49 per cent of unregistered workshops in its urban areas, Gurdaspur, Amritsar and Jullundur districts also reveal a significant rural-urban differential in respect of unregistered workshops. While in the case of Amritsar district 73.39 per cent of unregistered factories are located in the urban areas, 67.06 per cent are accounted for by Gurdaspur district and 66.56 per cent by Jullundur district. However, Firozpur and Bhatinda districts have more of unregistered workshops located in rural areas than in urban areas.

8.9 Household industry in Punjab, as elsewhere, is typically a rural feature of manufacturing activity. Of all the units in this sector, 77.8 per cent are accounted for by the rural areas of the State. Except Amritsar district, all other districts of the State have more of such units returned in rural areas versus urban areas. The highest rural incidence is reflected in the case of Hoshiarpur district with as high a figure as 97.12 per cent. Ropar district has also returned a significantly high proportion of 96.69 per cent of such establishments in the rural areas.

STATEMENT II.8

Statement showing percentage distribution of Manufacturing Establishments among various districts separately for rural and urban areas

State/District	Registered factories		Unregistered workshops		Household Industry	
	R	U	R	U	R	U
Punjab ..	100·00	100·00	100·00	100·00	100·00	100·00
Gurdaspur District	9·76	8·23	7·25	8·65	4·96	6·79
Amritsar District	9·61	23·67	10·08	16·30	3·94	14·39
Firozpur District	11·50	3·84	12·79	6·44	10·96	21·57
Ludhiana District	14·17	28·43	11·13	20·10	10·32	11·70
Jullundur District	15·75	19·50	14·07	16·41	11·36	7·48
Kapurthala District	3·78	4·03	2·86	2·32	0·89	1·73
Hoshiarpur District	8·50	0·93	9·49	6·10	12·27	1·28
Ropar District ..	3·31	0·56	4·19	3·15	10·34	1·24
Patiala District ..	12·91	5·92	9·10	7·96	7·71	10·58
Sangrur District	5·04	2·18	9·62	7·07	15·11	9·12
Bhatinda District	5·67	2·71	9·42	5·50	12·14	14·12

8.10 Looking at the distribution of industrial establishments among various districts in the Statement given above, it will be seen that 71.6 per cent of all registered factories returned in the urban areas of the State as whole are accounted for by the urban areas of Ludhiana, Jullundur and Amritsar districts. Ludhiana district leads with 28.4 per cent of all registered factories returned in the urban areas of the State, Amritsar accounts for 23.7 per cent and Jullundur 19.5 per cent. It is abundantly clear that manufacturing activity in the organised sector is virtually a monopoly of the urban areas of these three districts. There is no such concentration of organised manufacturing activity visible in the case of the rural areas of the State. However, Jullundur and Ludhiana districts are conspicuous for their higher shares of registered factories in the rural areas.

8.11 Though not as predominant as in the case of registered factories, Ludhiana, Jullundur and Amritsar districts claim more than half of the unregistered workshops returned in the urban areas of the State.

8.12 In the case of household industry, Sangrur district takes the lead with a proportion of 15.1 per cent in rural areas and Firozpur district leads with a proportion of 21.6 per cent in urban areas. Other strongholds of household industry include Hoshiarpur, Bhatinda, Jullundur, Firozpur, Ropar and Ludhiana districts in respect of rural areas and Amritsar, Bhatinda, Ludhiana and Patiala districts in the case of urban areas.

Trade or Business Establishments :

9.1 One of the important indicators of level of economic development of a place is the size of its trade and business activity. This in turn is closely linked with the volume of production. It however, does not mean that centres of production are necessarily centres of trade/business also. The importance of a place as a centre of trade or business activity is determined primarily by its topography and extent of urbanization. Keeping these criteria in view, it is not difficult to see that out of 154,105 trade/ business establishments, 79,198 or 51.4 per cent have been returned by just four districts namely, Amritsar, Firozpur, Ludhiana and Jullundur. The Punjab State enjoys a predominant position in the country not only because of its thriving internal trade but also as an exporting State. Being predominanty an agricultural State, its chief exports are foodgrains gur, rape and mustard, cotton and woollen textiles/hosiery. The State has also taken a dramatic leap in the small industry sector during the last decade, which has incidentally boosted export earnings in the process. Some of the items which are exported include woollen and synthetic hosiery goods, synthetic fabrics, cycles, sewing machines, machine tools, agricultural implements, machinery etc. The State imports sizable quantity of coal and coke, iron and steel, fertilizers, sugar, salt, hesian and gunny bags, glass, petroleum products, textiles, yarns, raw wool, tea, etc.

9.2 Despite the limitations of the data regarding 'trade or business' establishments presented in Main Table E-1 and Subsidary Table E-I.1 in respect of export and import trade, which is an important feature of business activity in the State, it significantly reflects the nature and size of internal trade in the State. For instance, it is interesting to note that 77.15per cent of the trade/business establishments in the State are retail shops. In contrast, establishments dealing in wholesale trade constitute just 4.52 per cent of the total number of trade/ business establishments. There is, however, no doubt that the establishments having wholesale trade handle a major part of the import and export trade, which constitutes a sizable chunk of the overall trade in the State. Further in a good number of cases wholesale and retail business are done together.

9.3 We have so far discussed only such trade or business establishments which deal in wholesale or retail trade but establishments, such as restaurants, hotels, banks and other credit institutions, insurance companies, establishments providing real estate services and some of the offices, also fall in the category. All such establishments, clubbed under the sub-head 'Others' of the main category 'trade or business establishments' in Main Table E-1 and Subsidiary Table E-I.1 constitute 18.33 per cent of the total number of trade/business establishments. It has been stated earlier that a little more than half of the number of trade/business establishments have been accounted for by Amritsar, Firozpur, Ludhiana and Jullundur districts. The following statement, giving the distribution of trade/ business establishments among various districts of the State, will show that each of the districts of Kapurthala and Ropar represent even less than 4 per cent of the total number of trade/business establishments. On the other hand, Amritsar district claims 15.1 per cent of the number of such establishments.

STATEMENT II.9

Distribution of Trade or Business Establishments among districts of the State

State/District	No. of trade/business establishments	Proportion in terms of 1,000	No. of establishments dealing in wholesale trade	Proportions in terms of 1,000	No. of establishments dealing in retail trade	Proportion in terms of 1,000	Others	Proportion in terms of 1,000
1	2	3	4	5	6	7	8	9
Punjab	**154,105**	**1,000**	**6,973**	**1,000**	**118,890**	**1,000**	**28,242**	**1,000**
Gurdaspur District	12,639	82	274	39	10,430	88	1,935	69
Amritsar District	23,203	151	2,431	349	17,570	148	3,202	113
Ferozpur	19,821	129	362	52	15,696	132	3,763	131
Ludhiana District	18,341	119	1,178	169	13,042	110	4,121	146
Jullundur District	17,833	116	936	134	13,916	117	2,981	106
Kapurthala District	5,039	33	144	21	4,236	35	659	23
Hoshiarpur District	11,484	74	258	37	9,140	77	2,086	74
Ropar District	6,080	39	153	22	4,558	38	1,369	48
Patiala District	13,335	86	411	59	10,197	86	2,727	97
Sangrur District	12,630	82	413	[illegible]	9,508	80	2,709	96
Bhatinda District	13,700	89	413	[illegible]	10,597	89	2,690	95

Amritsar has traditionally been one of the most important trade and business centres in Northern India. It owes this distinguished position to the location of Golden Temple in Amritsar City. Amritsar city has been for a long time on the trade route to Afghanistan and Baluchistan before the partition of the country in 1947. It was an important centre of collection and distribution of various commodities. Because of the stream of visitors flowing into the holy city,the businessmen not only from various corners of Punjab State but also from the other neighbouring states have been attracted to set up trade establishments there. This is despite the setback suffered by the trade and commerce in Amritsar district as a result of the partition of the country and subsequent by armed conflicts with Pakistan.

9.4 Firozpur is a very important district of the State for its trade in foodgrains. Most of the important grain markets of the State are located in this district. The district is also known for its manufacture of agricultural implements which are not only consumed within the State but also exported.

9.5 As regards Jullundur and Ludhiana districts, these are well known centres not only for the manufacture of small scale industrial products like hosiery, textiles, cycles, sports goods and agricultural implements but also for their distribution. Consequently, these districts are important consumers of iron and steel, coal and coke and of many other commodities imported into the State.

9.6 It will be seen from the statement given above that the position of Amritsar district is conspicuous particularly in the case of establishments dealing in wholesale trade. It has been an important wholesale collection and distribution centre over past few centuries. The district accounts for as high as 34.9 per cent of the total number of wholesale establishments returned in the State. The only other districts which closely follow Amritsar are Ludhiana and Jullundur, constituting 16.9 per cent and 13.4 per cent respectively of the total number of establishments in wholesale trading. It will thus be seen that the remaining eight districts of the State collectively account for as little as one-third of the total number of wholesale establishments. Even Firozpur district which, as already stated, is known for wholesale trade in foodgrains claims just 5.2 per cent of the total number of wholesale establishments in the State. In the case of retail trade, Amritsar district has again taken the lead, having returned 14.8 per cent of the total number of establishments dealing in retail trade, following by Firozpur district with 13.2 per cent. Ludhiana and Jullundur districts claim 11 per cent and 11.7 per cent respectively of such establishments. Some of the factors which explain the preponderance of wholesale and retail trade establishments in Amritsar district are (i) the district is the second most populous district of the State, (ii) has the highest urban population in the State, (iii) is the most important district of the State from the point of view of tourism on account of the location of Golden Temple in Amritsar city and (iv) because of the location of the district on the ancient surface trade routes with Afghanistan, N.W.F.P. etc. and of its own importance as an ancient centre of collection and distribution of various important consumer goods. Kapurthala and Ropar districts claim the lowest proportions of such establishments primarily because of their being the smallest districts of the State in respect of total population and their urban component.

9.7 As regards trade/business establishments categorised under the sub-head 'Others' it will be seen that Ludhiana district by accounting for 14.6 per cent of all such establishments leads all other districts of the State. The district represents a higher number of such establishments than even the more populous districts like Amritsar, Firozpur and Jullundur because it has, as a glance at table E-III will show, returned more of hotels, restaurants, etc. than any other district of the State.

Relative incidence of different types of Trade/Business Establishments

10.1 Trade/business establishments in Punjab, as elsewhere in India, are by and large retail shops. As the following statement giving the distribution of trade/business establishments among the three categories of 'wholesale', 'retail and 'other' establishments shows, retail shops contribute 77.15 per cent to the total number of trade/business establishments.

On the other hand, the proportions of 'wholesale' and 'other' establishments are as low as 4.52 per cent and 18.33 per cent respectively.

STATEMENT II.10

Percentage distribution of Trade/Business establishments among three types for the State and its districts

State/District	Total	Whole-sale	Retail	Others
1	2	3	4	5
Punjab	**100**	**4·52**	**77·15**	**18·33**
Gurdaspur District ..	100	2·17	82·52	15·31
Amritsar District	100	10·48	75·72	13·80
Firozpur District	100	1·83	79·19	18·98
Ludhiana District	100	6·42	71·11	22·47
Jullundur District	100	5·25	78·03	16·72
Kapurthala District ..	100	2·86	84·06	13·08
Hoshiarpur District ..	100	2·25	79·59	18·16
Ropar District	100	2·52	74·97	22·51
Patiala District	100	3·08	76·47	20·45
Sangrur District	100	3·27	75·28	21·45
Bhatinda District	100	3·01	77·35	19·64

Looking at the relative incidence of different types of trade/business establishments in the case of districts, it will be seen that Amritsar district represents the highest incidence of wholesale trade establishments. At the other end is Firozpur district having the lowest incidence of such establishments.

10.2 Districts which represent higher proportions of establishments under the category 'wholesale' compared to the corresponding proportions returned for the State as a whole include, besides Amritsar, districts like Ludhiana and Jullundur. All the remaining districts of the State account for lower proportions under the category compared to the corresponding State proportion.

10.3 In the case of retail shops, Kapurthala district reflects the highest relative incidence with Gurdaspur closely following it. Besides these, other districts which have returned higher proportion of such establishments compared to the corresponding State proportion include Firozpur, Jullundur, Hoshiarpur and Bhatinda.

10.4 We have dealt with in the preceding paragraphs with only such trade or business establishments which deal in wholesale or retail trade, but in this category establishments such as restaurants, hotels, banks and other credit institutions, insurance companies, real estate firms and other kind of offices also fall. In so far as Trade/business establishments categorised under 'others', are concerned Firozpur, Ludhiana, Ropar, Patiala, Sangrur and Bhatinda districts represent higher proportions compared to the corresponding State proportion. Ropar district with 22.51 per cent of such establishments has, however, the highest incidence of such establishments in the State.

Rural-Urban differentials:

10.5 A reference to Table E-I will show that of the total number of 154,105 trade/business establishments returned in the State, 68,000 or 44.13 per cent are accounted for by rural areas and 86,105 or 55.87 per cent by the urban areas. According to the districtwise break-up of figures given in the following statement, Firozpur district makes the highest contribution to the total number in rural areas and Amritsar in urban areas. This is very much in keeping with the position of the two districts in the ranking of districts of the State in respect of rural and urban populations.

STATEMENT II.11

Distribution of Trade/Business establishments among various districts of the State for rural and urban areas separately

State/District	Rural		Urban	
	Total No.	Proportion in terms of 1,000	Total No.	Proportion in terms of 1,000
1	2	3	4	5
Punjab	**68,000**	**1,000**	**86,105**	**1,000**
Gurdaspur District ..	5,998	88	6,641	77
Amritsar District	8,027	118	15,176	176
Firozpur District	9,949	146	9,872	115
Ludhiana District	6,103	90	12,238	142
Jullundur District	6,948	102	10,885	126
Kapurthala District ..	1,972	29	3,067	36
Hoshiarpur District ..	7,050	104	4,434	52
Ropar District	3,559	52	2,521	29
Patiala District	5,399	80	7,936	92
Sangrur District	6,411	94	6,219	72
Bhatinda District	6,584	97	7,116	83

In the case of remaining districts, a comparison of the distribution of number of establishments separately for rural and urban areas, shows that while the pattern of distribution in urban areas is more or less identical with the pattern of distribution of urban population, it is not so in the case of rural areas. For instance, Bhatinda district takes the third position in the ranking of the districts of the State in the matter of rural population but it takes the 5th position in respect of distribution of number of rural trade/business establishments. This nearly establishes a very important point: the number of trade/business establishments in a district is determined, to a large extent, by the size of its urban population.

10.6 Looking at the rural-urban differential in regard to the distribution of different types of trade/business establishments as revealed by the figures given in the following statement, it will be seen that Jullundur district, by having returned about one-fourth of the total number of rural wholesale trade establishments, is the most important district of the State. The total number of such establishments returned in the district is 132. Amritsar district is in a dominating position with 37.1 per cent of the total number of wholesale trade establishments in its urban areas.

STATEMENT II.12

Distribution of different types of Trade/Business Establishments among various districts of the State for rural and urban areas separately.

State/District	Rural Areas						Urban Areas					
	Wholesale	Per 1,000	Retail	Per 1,000	Others	Per 1,000	Wholesale	Per 1,000	Retail	Per 1,000	Others	Per 1,000
Punjab	**547**	**1,000**	**56,574**	**1,000**	**10,879**	**1,000**	**6,426**	**1,000**	**62,316**	**1,000**	**17,363**	**1,000**
Gurdaspur District	23	42	5,342	94	633	58	251	39	5,088	82	1,302	75
Amritsar District	50	92	7,255	128	722	66	2,381	371	10,315	166	2,480	143
Firozpur District	97	177	8,435	149	1,417	130	265	41	7,261	116	2,346	135
Ludhiana District	28	51	4,513	80	1,562	144	1,150	179	8,529	137	2,559	147
Jullundur District	132	241	5,229	105	887	82	804	125	7,987	128	2,094	121
Kapurthala District	7	13	1,760	31	205	19	137	21	2,476	40	454	26
Hoshiarpur District	65	119	5,704	101	1,281	118	193	30	3,436	55	805	46
Ropar District	47	86	2,688	48	824	76	106	16	1,870	30	545	31
Patiala District	34	62	4,254	75	1,111	102	377	59	5,943	95	1,616	93
Sangrur District	41	75	5,027	89	1,343	123	372	58	4,481	72	1,366	79
Bhatinda District	23	42	5,667	100	894	82	390	61	4,930			104

Other districts which have contributed more than 10 per cent of the total number of wholesale trade establishments include Firozpur and Hoshiarpur in rural areas and Ludhiana and Jullundur in urban areas. Thus the number of wholesale trade establishments is also by and large influenced by the impact of the urban population. However, in the case of retail trade, number of establishments is largely determined by the size of rural population in the case of rural areas. This is amply corroborated by the statement given above, which shows that Firozpur district accounts for the highest number of retail trade establishments, Amritsar district taking second place and Jullundur third. Hoshiarpur and Bhatinda districts have also contributed almost the same number of retail trade establishments as Jullundur. In urban areas, the pattern of distribution of trade establishments follows closely the pattern of distribution of urban population.

As regards 'other' trade/business establishments, it will be seen that Ludhiana district leads all other districts of the State both in rural and urban areas. Again, Firozpur district takes the second place in rural areas and third place in urban areas. However, distorted rural-urban pattern of distribution obtains in other districts. While in rural areas the third place is occupied by Sangrur district, Firozpur district occupies the third place in the urban areas.

10.7 From the percentage distribution of trade/business establishments, among the three types, given in the following statement for various districts of the State for rural and urban areas separately, it will be seen that retail trade establishments constitute the bulk of trade/business establishments both in rural and urban areas. These account for 83.20 per cent of such establishments in rural areas and 72.37 per cent in urban areas.

STATEMENT II.13

Percentage distribution of Trade/Business establishments among the three types for various districts of the State for rural and urban areas separately

State/District/City	Rural Urban	Total	Wholesale	Retail	Others
1	2	3	4	5	6
Punjab	**Rural**	**100**	**0·80**	**83·20**	**16·00**
	Urban	**100**	**7·46**	**72·37**	**20·17**
Gurdaspur District ..	Rural	100	0·38	89·06	10·56
	Urban	100	3·78	76·61	19·61
Amritsar District ..	Rural	100	0·62	90·38	9·00
	Urban	100	15·69	67·97	16·34
Firozpur District ..	Rural	100	0·98	84·78	14·24
	Urban	100	2·69	73·55	23·76
Ludhiana District ..	Rural	100	0·46	73·95	25·59
	Urban	100	9·40	69·69	20·91
Jullundur District ..	Rural	100	1·90	85·33	12·77
	Urban	100	7·39	73·37	19·24
Kapurthala District ..	Rural	100	0·35	89·25	10·40
	Urban	100	4·47	80·73	14·80

	Urban	100	4·35	77·49	18·16
Ropar District ..	Rural	100	1·32	75·53	23·15
	Urban	100	4·20	74·18	21·62
Patiala District ..	Rural	100	0·63	78·79	20·58
	Urban	100	4·75	74·89	20·36
Sangrur District ..	Rural	100	0·64	78·41	20·95
	Urban	100	5·98	72·05	21·97
Bhatinda District ..	Rural	100	0·35	86·07	13·58
	Urban	100	5·48	69·28	25·24
Amritsar City ..	Urban	100	18·91	65·71	15·38
Ludhiana City ..	Urban	100	12·25	67·28	20·47
Jullundur City ..	Urban	100	8·89	72·02	19·09
Patiala City ..	Urban	100	1·93	78·62	19·45

10.8 A glance at the statement given above shows that wholesale trading is essentially a characteristic of the business activity in urban areas of the State. Of the total number of establishments in wholesale trade, 92.16 per cent have been returned in the urban areas and just 7.84 per cent in the rural areas. As regards the relative incidence of such establishments, these constitute 7.46 per cent of all trade/business establishments in urban areas as against 0.8 per cent in rural areas. 'Other' trade/business establishments which have been returned in proportions of 16 per cent and 20 per cent in rural and urban areas respectively do not reveal significant rural-urban differential at the State level. However, of the total number of such establishments returned in the State as a whole, urban areas account for as high as 61.48 per cent as against 38.52 per cent in the rural areas.

10.9 The incidence of wholesale trade establishments is most conspicuous in the case of Amritsar district in urban areas and in Jullundur district in the case of rural areas. Retail trade establishments also represent the highest incidence in Amritsar district but only in rural areas. The highest urban incidence of retail trade establishments is reflected in the case of Kapurthala district. Among districts showing low incidence of wholesale trade establishments, mention may particularly be made of Gurdaspur district both in rural and urban areas, Firozpur district in urban areas; Ludhiana, Kapurthala and Bhatinda districts in rural areas. In the 'Others' category of trade/business establishments, Ludhiana district shows the highest incidence in rural areas and Bhatinda district in the urban areas. On the other hand, Amritsar district has the lowest proportion of 9 per cent of such establishments in rural areas and Kapurthala district represents the lowest proportion of 14.8 per cent in urban areas.

10.10 Looking at the incidence of trade/business establishments in the case of cities, it will be seen that Amritsar has the highest proportion (18.91%) of wholesale trade establishments. Patiala excels the other cities in the relative incidence of retail trade establishments while Ludhiana leads in the relative incidence of 'other' trade/business establishments.

Other Establishments :

11.1 Establishments categorized under the head 'other establishments' in the Main Table E-I and Subsidiary Table E-I.1 cover government offices, educational and public health institutions, scientific and research organizations, religious institutions, laundry shops, hair dressing saloons, cinema halls, ware-houses, cold storages, stores, post offices and telephone exchanges, panchayat ghars etc. A glance at Table E-I will show that such establishments number 69,634 or 21 per cent of the total number of establishments of all types returned in the State. The following statement, giving the distribution of 'other establishments' among various districts of the State, shows that Firozpur, the most populous district of the State, accounts for the highest proportion of 'other establishments', followed by Jullundur and Amritsar districts.

STATEMENT II.14

Distribution of 1,00 Other Establishments among various districts

State/District	Total Number	Proportion per 1,000
1	2	3
Punjab	**69,634**	**1,000**
Gurdaspur District	6,276	90
Amritsar District	8,500	122
Firozpur District	9,728	140
Ludhiana District	7,149	103
Jullundur District	9,366	134
Kapurthala District	2,317	33
Hoshiarpur District	6,944	100
Ropar District	3,323	48
Patiala District	6,669	96
Sangrur District	4,990	71
Bhatinda District	4,372	63

11.2 There is a temptation to assume that the number of 'other establishments' is somewhat correlated with the size of population. While this is true in the case of Firozpur district, the position of distribution of 'other establishments' among the remaining districts is not strictly on that pattern. Amritsar district, ranking third in the distribution of 'other establishments' is the second most populous district of the State. The reasons for these varying patterns are not far to seek. Besides population, another important determinant of the number of 'other establishments' is the total number of villages in a district. This is so because religious institutions constitute the largest single type of establishments under the category 'other establishments'. Since a large majority of villages in the State have at least one religious institution like a gurdwara or temple, the number of villages thus determines largely the number of religious institutions. Thus, Amritsar district, having a smaller number of villages than Jullundur district, accounts for a lower proportion of 'other establishments' than Jullundur. This, however, does not undermine the importance of Amritsar district as an important area dotted with religious institutions (Sikh shrines and gurdwaras largely). Hoshiarpur district is another instance in point. While it has contributed 10.0 per cent of the total number of 'other establishments' returned in the State as a whole, its share in the total population is much lower. This again is attributed to the total number of villages in the district which is the highest among all the districts.

11.3 It will be seen from Table E-I that 'other establishments' have been further categorised under the heads like 'educational institutions', 'public health institutions' and the remaining clubbed under sub-head 'others': 'religious institutions', 'Government offices' post and telegraph offices, laundries and hair-dressing saloons. All told, establishments styled as 'others' constitute as high as 71.3 per cent of the total number of 'other establishments' according to the following statement, giving the percentage distribution of 'other establishments' among the three broad types.

STATEMENT II.15

Percentage distribution of 'Other' Establishments among the three broad types

State/District	Other Establishments			
	Total	Educational institutions	Public Health institutions	Others
1	2	3	4	5
Punjab	**100**	**17·03**	**11·68**	**71·29**
Gurdaspur District ..	100	16·81	10·40	72·79
Amritsar District	100	16·54	13·99	69·47
Firozpur District	100	15·98	10·79	73·23
Ludhiana District	100	17·85	15·15	67·00
Jullundur District	100	15·42	10·87	73·71
Kapurthala District ..	100	17·35	9·71	72·94
Hoshiarpur District ..	100	15·61	10·21	74·18
Ropar District	100	18·60	11·49	69·91
Patiala District	100	19·27	9·75	70·98
Sangrur District	100	17·10	11·32	71·58
Bhatinda District	100	20·13	13·88	65·99

11.4 'Educational institutions' claim the second highest proportion of 17.03 per cent and 'public health institutions', the lowest proporton of 11.68 per cent. This very pattern of distribution obtains in all the districts of the State. However, Bhatinda district has the highest incidence of 'educational institutions' while Ludhiana district has the highest incidence of 'public health institutions'. As regards establishments categorised under sub-head 'others', highest incidence is seen in the case of Hoshiarpur district.

11.5 At this stage, it will be useful to examine the distribution of 1,000 establishments among various districts of the State. 'Educational institutions' are being taken up first followed by 'public health institutions' and the establishments categorised under the sub-head 'others'.

Educational Institutions :

11.6 For the Punjab State as a whole, the number of educational institutions, as recorded in the Establishment Schedules, has been returned at 11,857. As will be seen from the following statement, giving the distribution of educational institutions among various districts of the State, the highest number has been returned in Firozpur district.

STATEMENT II.16

Distribution of educational institutions among districts

State/District	Number of educational institutions	Proportion per 1,000 educational institutions
1	2	3
Punjab	11,857	1,000
Gurdaspur District ..	1,055	89
Amritsar District	1,406	119
Firozpur District	1,554	131
Ludhiana District	1,276	108
Jullundur District	1,444	122
Kapurthala District	402	34
Hoshiarpur District	1,084	91
Ropar District	618	52
Patiala District	1,285	108
Sangrur District	853	72
Bhatinda District	880	74

It is obvious from the statement given above that the pattern of distribution of educational institutions does not necessarily follow the pattern of distribution of population. Amritsar district, which has returned the second highest population in the State, ranks not only after Firozpur district but also after Jullundur district in the distribution of educational institutions.

11.7 A clearer picture of the incidence of educational institutions emerges from the following statement, giving the average number of educational institutions per 1,000 population and the literacy rate returned for the State as a whole and its various districts:

STATEMENT II.17

Average number of educational institutions per 1,000 *population and literacy rate among districts.*

State/District	Average No. of educational institutions per 1,000 population	Literacy rate
1	2	3
Punjab	0·87	33·67
Gurdaspur District	0·86	34·23
Amritsar District	0·77	35·32
Firozpur District	0·82	27·79
Ludhiana District	0·90	42·63
Jullundur District	0·99	41·30
Kapurthala District	0·94	35·70
Hoshiarpur District	1·03	40·88
Ropar District	1·13	37·17
Patiala District	1·06	31·51
Sangrur District	0·74	24·23
Bhatinda District	0·67	23·60

It is evident that the literacy rate bears no definite relationship with the average number of educational institutions per 1,000 population. This is so because such a relationship is conditioned by other determinants like area-school ratio and the past trends of literacy. Besides, the high or low incidence of educational institutions revealed by the figures in the statement, given above, does not fully reflect the adequacy or inadequacy of educational facilities available at a place because a single-teacher school and a high school or a college have been all lumped together under the head "Educational institutions". So, the qualitative aspect of the educational institutions gets undermined in this type of classification of data. Hence, it does not really make a material difference to our analysis as a large majority of establishments returned as educational institutions are either primary schools or middle schools. Normally, a higher incidence of such institutions in a particular district should accompany a higher literacy rate in that district. What we really find from the statement is that Ropar district, which has returned the highest proportion of educational institutions per 1,000 population, ranks only after Ludhiana, Jullundur and Hoshiarpur districts in respect of literacy rate. An important point which is missed in relating literacy rate to the incidence of educational institutions is that the present literacy rate is essentially a product of the past literacy levels. Thus, Ludhiana and Jullundur districts show the highest literacy rate not only at the present Census but equally at the last Census also. The incidence of educational institutions in terms of population is sometimes misleading. An important consideration is the accessibility of the school or the distance that has to be commuted to reach the school. The case of Firozpur district seems as an illustration of this point. The district has the highest surface area in the State but simultaneously has a fairly low incidence of educational institutions. In the result it ranks very low in the matter of literacy rate. The same is true of Sangrur and Bhatinda districts which ranks very high in area but very low in the incidence of educational institutions. There is, however, no denying the fact that the past literacy rates have also been lower in these districts. A paradoxical situation is, however, presented by Amritsar district. The district has the fourth highest area in the State but ranks very low in respect of incidence of educational institutions. Yet the district has relatively a reasonably higher literacy rate. This is apparently linked to past literacy levels, which have been quite high in comparison with most other districts of the State.

Rural-Urban Difference :

11.8 A large majority of educational institutions have been returned in the rural areas of the State.

of Hoshiarpur district corresponds to the highest incidence of educational institutions reflected in the urban areas of the same district but this is not true of rural areas which reflect highest incidence of educational institutions in Ropar district and the highest literacy in Hoshiarpur district. The highest literacy rate returned in both rural and urban areas of Hoshiarpur district is essentially a reflection of the past high levels of literacy in the district.

Public Health Institutions :

11.11 As in the case of 'educational institutions', the availability of the facility of 'public health institutions' has to be viewed not only in terms of the number of such establishments returned in various districts of the State but also their accessibility. Though the data collected in the Establishment Schedule give no idea about the accessibility of such institutions, an examination of the relative incidence in terms of area is quite revealing.

11.12 Looking at the data given in the table E-I, it will be seen that the number of public health institutions in the State as a whole has been returned at 8,131. The percentage distribution of this number given in the following statement shows that more than half (53.3 per cent) of such establishments are accounted for by the four districts, Amritsar, Firozpur, Ludhiana and Jullundur.

STATEMENT II.20

Distribution of 1,000 *public health institutions among various districts*

State/District	Public health institutions	Proportion per 1,000
1	2	3
Punjab	**8,131**	**1,000**
Gurdaspur District	653	80
Amritsar District	1,189	146
Firozpur District	1,050	129
Ludhiana District	1,083	133
Jullundur District	1,018	125
Kapurthala District	225	28
Hoshiarpur District	709	87
Ropar District	382	47
Patiala District	650	80
Sangrur District	565	70
Bhatinda District	607	75

It is obvious from these figures that the distribution of the number of public health institutions does not follow the pattern of distribution of population. Firozpur district, being not only more populous than Amritsar but also twice its size in area, ranks below it in respect of number of public health institutions. One can, therefore, safely conclude that public health facilities are provided for far better in Amritsar district than in Firozpur district. Similarly, Bhatinda and Sangrur districts are behind others in this respect. Both the districts are quite heavily populated and account for a sizable chunk of area but rank very low in the incidence of number of 'public health institutions'. It will be seen from the following statement, giving the incidence of public health institutions in terms of population, that these two districts rank at the bottom as regards their relative position vis-a-vis other districts of the State.

STATEMENT II.21

Average number of public health institutions per 1,000 *population*

State/District	Public health institutions per 1,000 population
1	2
Punjab	**0·60**
Gurdaspur District	0·53
Amritsar District	0·65
Firozpur District	0·55
Ludhiana District	0·76
Jullundur District	0·70
Kapurthala District	0·52
Hoshiarpur District	0·67
Ropar District	0·70
Patiala District	0·53
Sangrur District	0·49
Bhatinda District	0·46

Though Ludhiana district shows the highest incidence of public health institutions, yet it has returned a lower number of such establishments than Amritsar district. However, keeping in veiw the area of these districts, it is difficult to say, particularly without any appropriate supplementary data, as to which of the two districts is better off in the matter of public health facilities. Another lacuna is that no sub-classification of public health institutions like a hospital, a dispensary or a health centre is available from the data given in the Establishment tables. Speaking in terms of quality, we know reliably that the availability of medical facilities is far superior in Amritsar district compared to any other district of the State.

11.13 Among other districts which show high incidence of public health institutions, mention may be made of Jullundur, Ropar and Hoshiarpur districts.

Rural-Urban differentials :

11.14 One of the striking revelations of data given in table E-1 is that the difference between the number of 'public health institutions' returned in rural and urban areas is not very significant, the two figures standing at 4,283 and 3,848 respectively. This clearly reflects the higher incidence of such institutions in urban areas. Even speaking of incidence of such establishments in terms of population, it will be seen from the following statement that the

of Hoshiarpur district corresponds to the highest incidence of educational institutions reflected in the urban areas of the same district but this is not true of rural areas which reflect highest incidence of educational institutions in Ropar district and the highest literacy in Hoshiarpur district. The highest literacy rate returned in both rural and urban areas of Hoshiarpur district is essentially a reflection of the past high levels of literacy in the district.

Public Health Institutions :

11.11 As in the case of 'educational institutions', the availability of the facility of 'public health institutions' has to be viewed not only in terms of the number of such establishments returned in various districts of the State but also their accessibility. Though the data collected in the Establishment Schedule give no idea about the accessibility of such institutions, an examination of the relative incidence in terms of area is quite revealing.

11.12 Looking at the data given in the table E-I, it will be seen that the number of public health institutions in the State as a whole has been returned at 8,131. The percentage distribution of this number given in the following statement shows that more than half (53.3 per cent) of such establishments are accounted for by the four districts, Amritsar, Firozpur, Ludhiana and Jullundur.

STATEMENT II.20

Distribution of 1,000 public health institutions among various districts

State/District	Public health institutions	Proportion per 1,000
1	2	3
Punjab	**8,131**	**1,000**
Gurdaspur District	653	80
Amritsar District	1,189	146
Firozpur District	1,050	129
Ludhiana District	1,083	133
Jullundur District	1,018	125
Kapurthala District	225	28
Hoshiarpur District	709	87
Ropar District	382	47
Patiala District	650	80
Sangrur District	565	70
Bhatinda District	607	75

It is obvious from these figures that the distribution of the number of public health institutions does not follow the pattern of distribution of population. Firozpur district, being not only more populous than Amritsar but also twice its size in area, ranks below it in respect of number of public health institutions. One can, therefore, safely conclude that public health facilities are provided for far better in Amritsar district than in Firozpur district. Similarly, Bhatinda and Sangrur districts are behind others in this respect. Both the districts are quite heavily populated and account for a sizable chunk of area but rank very low in the incidence of number of 'public health institutions'. It will be seen from the following statement, giving the incidence of public health institutions in terms of population, that these two districts rank at the bottom as regards their relative position vis-a-vis other districts of the State.

STATEMENT II.21

Average number of public health institutions per 1,000 population

State/District	Public health institutions per 1,000 population
1	2
Punjab	**0·60**
Gurdaspur District	0·53
Amritsar District	0·65
Firozpur District	0·55
Ludhiana District	0·76
Jullundur District	0·70
Kapurthala District	0·52
Hoshiarpur District	0·67
Ropar District	0·70
Patiala District	0·53
Sangrur District	0·49
Bhatinda District	0·46

Though Ludhiana district shows the highest incidence of public health institutions, yet it has returned a lower number of such establishments than Amritsar district. However, keeping in veiw the area of these districts, it is difficult to say, particularly without any appropriate supplementary data, as to which of the two districts is better off in the matter of public health facilities. Another lacuna is that no sub-classification of public health institutions like a hospital, a dispensary or a health centre is available from the data given in the Establishment tables. Speaking in terms of quality, we know reliably that the availability of medical facilities is far superior in Amritsar district compared to any other district of the State.

11.13 Among other districts which show high incidence of public health institutions, mention may be made of Jullundur, Ropar and Hoshiarpur districts.

Rural-Urban differentials :

11.14 One of the striking revelations of data given in table E-1 is that the difference between the number of 'public health institutions' returned in rural and urban areas is not very significant, the two figures standing at 4,283 and 3,848 respectively. This clearly reflects the higher incidence of such institutions in urban areas. Even speaking of incidence of such establishments in terms of population, it will be seen from the following statement that the

average number of public health institutions per 1,000 population in urban areas is 1.20 as against 0.42 in rural areas.

STATEMENT II.22

Percentage distribution of public health institutioons and the average number of such establishments per 1,000 population in rural and urban areas separately

State/District	No. of Public health institutions		No. of Public health institutions		No. of Public health institutions per 1,000 population	
	Rural		Urban			
	Number	Percentage of total No.	Number	Percentage of total No.	Rural	Urban
1	2	3	4	5	6	7
Punjab	**4,283**	**1,000**	**3,848**	**1,000**	**0·42**	**1·20**
Gurdaspur District	358	84	295	77	0·37	1·18
Amritsar District	536	125	653	170	0·41	1·22
Firozpur District.	575	134	475	123	0·38	1·26
Ludhiana District	481	112	602	156	0·52	1·22
Jullundur District	490	115	528	137	0·48	1·21
Kapurthala District	102	24	123	32	0·31	1·23
Hoshiarpur District	467	109	242	63	0·50	1·90
Ropar District	262	61	120	31	0·57	1·45
Patiala District	334	78	316	82	0·37	1·00
Sangrur District	327	76	238	62	0·36	1·02
Bhatinda District	351	82	256	67	0·33	0·97

Though Hoshiarpur district takes a small share of the total number of 'public health institutions' returned in the urban areas of the State, it reflects the highest incidence of such establishments in its urban areas. On the other hand, in the rural areas, Firozpur district accounting for the highest share of public health institutions has returned a fairly small average number of such institutions per 1,000 population. This coupled with the fact that the district has the highest area in the State is a sufficient evidence of its being one of the neglected districts in respect of provision of medical facilities. The position seems to be still worse in the case of Sangrur and Bhatinda districts which reflect low incidence of such establishments not only in rural areas but also in urban areas. These districts are also quite sizable in terms of surface area.

Other establishments like religious institutions, Government offices etc. classified under 'Other' category :

11.15 As has been stated earlier, establishments like religious institutions, government offices, post & telegraph offices, laundries, hair-dressing saloons, etc., have been clubbed under the sub-head 'others' of the main category 'other establishments'. Their total number is 49,646. A large majority of these are religious institutions and government offices, the former having been returned in an overwhelmingly higher number than the latter. Unlike an educational or public health institutions which may or may not be accessible in all cases, a religious institution has to be accessible everywhere because of the important place or religion in our life. There is hardly a village without a gurdwara or a temple. There are very few mosques in the State. Thus the number of religious institutions is in a way largely determined by the number of villages. This explains why the following statement, giving the distribution of the type of establishments under discussion, shows that Jullundur district accounts for a higher number of such establishments than Amritsar district and Hoshiarpur district represents higher proportion than Ludhiana district.

STATEMENT II.23

Distribution of establishments classified under sub-head 'others' of the main category 'other establishment'

State/District	Total		Rural		Urban	
	Number	Proportion per 1,000	Number	Proportion per 1,000	Number	Proportion per 1,000
1	2	3	4	5	6	7
Punjab	**49,646**	**1,000**	**28,071**	**1,000**	**21,575**	**1,000**
Gurdaspur District	4,568	92	2,884	103	1,684	78
Amritsar District	5,905	119	2,946	105	2,959	137
Firozpur District	7,124	144	4,670	166	2,454	114
Ludhiana District	4,790	96	2,337	83	2,453	114
Jullundur District	6,904	139	2,969	106	3,935	182
Kapurthala District	1,690	34	913	33	777	36
Hoshiarpur District	5,151	104	3,540	126	1,611	75
Ropar District	2,323	47	1,657	59	666	31
Patiala District	4,734	95	2,649	94	2,085	96
Sangrur District	3,572	72	2,103	75	1,469	68
Bhatinda District	2,885	58	1,403	50	1,482	69

The impact of the number of religious institutions on the overall number of establishments classified under sub-head 'others' holds good only in respect of rural areas. As regards urban areas, establishments such as laundries and hair-dressing saloons have been returned in significantly higher numbers than either religious institutions or government offices. Because of the high incidence of such establishments in the urban areas of Jullundur district, the district accounts for the highest number of establishments classified under the sub-head 'others'. It may, however, be pointed out that Jullundur district also accounts for a higher number of religious institutions than even Amritsar district in the urban areas. In the rural areas, because of the predominance of religious institutions in the total number of establishments recorded under sub-head 'others'; the size of rural population and number of villages in a district seem to be the two main determining factors of the number of such establishments returned in various districts. This assertion is corroborated by the high proportion of such establishments returned in Firozpur and Hoshiarpur districts.

CHAPTER III

SIZE OF EMPLOYMENT AND TYPE OF POWER/FUEL USED

Section I—INDUSTRIAL ESTABLISHMENTS

Distribution of industrial establishments by size of employment :

1.1 The industrial development in the Punjab State during the last two decades has been largely in the organized and small industry sectors. The traditional household industries have gradually shrunk over the years and become somewhat obsolete. As the following statement, giving the distribution of different types of industrial establishments by size of employment, shows household industry accounts for just 55,373 persons or about 16 per cent of the total number of persons engaged in the group 'manufacturing, servicing or repairing of goods'.

STATEMENT III.1

Distribution of different types of industrial establishments by size of employment separately for rural and urban areas in Punjab

Type of Industry	Total Rural Urban	(a) Absolute (b) Proportion	Total		1 Person		2—4 Persons		5—9 Persons	
			Units	Persons employed	Units	Persons employed	Units	Persons employed	Units	Persons employed
1	2	3	4	5	6	7	8	9	10	11
Household Industry	Total	(a)	36,683	55,373	24,866	24,866	11,143	26,235	588	3,509
		(b)	1,000	1,000	678	449	304	474	16	63

1.2 Even in terms of number of units, household industry trails the unregistered workshops. The statement amply bears out that the winds of change are blowing fast. To get a feel of this, one has just to take a glance at the number of registered factories and the size of their employment. The dominating position of un-registered workshops among different types of industrial establishments points in the direction of a shift in the locational and size patterns of manufacturing activity. In other words, the place of household industry is being gradually taken by un-registered workshops. A few possible reasons for this shift have been given earlier in Chapter II. It may, however, be mentioned in passing that the green revolution in the Punjab State has generated such heavy demands for small machines and agricultural implements, which cannot obviously be met by the household industry.

1.3 To put the facts as they are presented in the statement given above, 105,618 industrial units in the State are employing 348,499 persons. An overwhelming number of them are employed either in un-registered workshops or registered factories. In the case of the latter, 3,660 units employ 145,229 persons whereas 65,275 units of the former type employ 147,897 persons. One remarkable thing about employment provided in the industrial establishments in the State is that the number of factories providing employment to 500 or more persons each is only 25. All told these employ as many as 25,702 persons. The number of registered factories which fall under the employment category 100 to 299 persons has been returned at 216. These employ in aggregate 31,609 persons or about 21.8 per cent of the total number of persons employed in registered factories. It is also pertinent to note that though 81.6 per cent of the registered factories returned in the State employ more than 10 persons but less than 50 persons each. These account for only 39 per cent of the total number of persons employed in the registered factories. On the other hand, just 1 per cent of the registered factories employing 300 and more persons account for as many as 20.2 per cent of the total number of persons employed in the registered factories.

1.4 As regards un-registered workshops, 90.1 per cent of the units employ on an average less than 5 persons each. These employ in the aggregate 70.8 per cent of the total number of persons employed in un-registered workshops. Among the remaining unregistered workshops, 9.1 per cent of the units employing on an average more than 5 persons but less than 10 persons each, account in aggregate for 25.4 per cent of the total number of persons employed in un-registered workshops. The average number of persons employed in an industrial establishment is still lower in the case of

household industry. 98.2 per cent of such units employ on an average less than 5 persons each. These account for 92.3 per cent of the total number of persons employed in the household industry. As is well known and in terms this concept is understood in Census, household industry, is generally run either by the head of the household or mainly by the members of the household. The household industry does not offer employment opportunities to hired labour/worker.

Rural-Urban differentials :

2.1 It clearly emerges from the statement given above that there is concentration of household industries in rural areas and un-registered workshops and registered factories in urban areas. Another highlight of the data is that the average number of persons employed in an industrial establishment is higher in urban areas than rural areas in respect of both un-registered workshops and household industries but not in the case of registered factories. The registered factories reflect a higher average in rural areas than urban areas as there is generally a tendency to set up bigger units outside municipal limits to escape various types of imports leviable in urban areas and to attract labour freely from the adjoining rural pockets.

2.2 Looking at the distribution of household industries by size of employment in rural and urban areas separately, it will be seen that 15.5 per cent of the number of persons employed in urban household industry are accounted for by units which employ on an average more than 5 persons but less than 20 persons each, the corresponding rural proportion being as low as 4.6 per cent. On the other hand, 73.3 per cent of the units in the household industry sector are one-person units in the rural areas. In the urban areas one-person units constitute 48.4 per cent of the total number of units in the household industry sector.

2.3 The most conspicuous rural-urban differential in the case of un-registered workshops is seen in respect of units employing 5 or more persons but less than 10 persons each. Units falling under this employment category account for 31.8 per cent of the total number of persons employed in the un-registered workshops in the urban areas whereas this category represents just 9 per cent of the total number of persons employed in the un-registered workshops in the rural areas. Even the total number of un-registered workshops has been returned in significantly higher proportions in the urban areas than in the rural areas under the category. Another category which reflects higher proportions in the urban areas than in the rural areas is in respect of such un-registered workshops which employ 10 or more persons but less than 20 persons each. Unregistered workshops employing one-person each and two to four-persons each, account for higher proportions of persons employed in rural areas than in urban areas.

2.4 Unlike the position obtaining in the case of units falling under the household and the un-registered workshops sectors, registered factories reflect higher proportions in the urban areas than the rural areas only in respect of units falling under the employment categories 10 to 19 persons. In this connection, it is pertinent to note that 1.4 per cent of the number of registered factories employing 500 and more persons each account for 19.2 per cent of the total number of persons employed in the registered factories returned in the rural areas. On the other hand, registered factories employing 500 and more persons each account for only 17.2 per cent of the total number of persons employed in the registered factories returned in the urban areas. Similarly, higher porportions have been returned in the rural areas than urban areas in the case of employment categories 300 to 499 persons, 100 to 299 persons and 50 to 99 persons.

Registered Factories :

3.1. A factory registered under the Indian Factories Act was treated as a registered factory and recorded as such in column 6 of the Establishment Schedule. The data relating to registered factories have been presented in Table E-II Part A.

3.2 A reference to the table shows that the number of registered factories as per the data collected in the Establishment Schedules stands at 3,660 employing 145,229 persons.

3.4 In order to grasp fully the structure of employment in different types of industries in the State, it is necessary in the first instance to know the code structure or the National Industrial Classification, 1970. This has been discussed at length in Chapter I of this Report. It will have been seen that all establishments dealing in 'manufacture processing or servicing of goods' fall under Division 2 & 3 of N.I.C. 1970. These two divisions have been further sub-divided into 20 Major Groups which cover the entire gamut of manufacturing activity. As an illustration major group 23 represents 'manufacture of cotton textiles.' Detailed description of various major groups will be found in the National Industrial Cassification, 1970 reproduced in Appendix VI to this Report.

3.5 It will be seen from the following statement, giving the distribution of different types of registered factories by various employment categories, that there is a large majority of such industries which deal in processing of secondary products or those represented by major groups 23, 24, 25, 26, 28, 33, 34, 35, 36, 37, 38 and 39.

STATEMENT III.2

Among the registered factories processing primary products, i.e. those falling under major groups 20-21, 22, 27, 29 and 32, a large majority is accounted for by those engaged in manufacture of food products (major group 20-21) and manufacture of non-metallic mineral products (major group 32). Be that as it may the largest single type of registered factories is constituted of industries which manufacture machinery, machine tools and parts except electrical machinery (major group 35). Their number has been returned at 677. The only other major group which accounts for more than 10 per cent of the registered factories is 23—manufacture of cotton textiles. Mention may also be made of registered factories manufacturing food products—major group 20-21—which accounts for about 10 per cent of the total number of factories.

3.6 It is interesting to observe from Table E-II Part A that 677 factories returned under major group 35, employ 17,968 persons whereas 325 factories returned under major group 32 employ as many as 20,885 persons. Even a cursory glance at the statement given above shows that one-fifth of the number of registered factories, falling under major group 32, employ on an average 100 or more persons each. Corresponding proportion for the industries falling under major group 35 is as low as 2.5 per cent. Looking at the proportions returned under employment category 10 to 19 persons, it will be seen that as high as 60.7 per cent of the registered factories in the case of major group 35 fall under the employment category in sharp contrast with the corresponding proportion of 8.6 per cent reflected in the case of major group 32. Another highlight of the factories represented by the two major groups is that the latter include 56.6 per cent of the number of factories falling under it which employ on an average 50 or more persons each against the corresponding proportion of 10.2 per cent returned in the case of former.

3.7 Among the remaining registered factories, only those represented by major group 20-21 and 23 account for more than 10 per cent of the total number of persons employed in all the registered factories. In the case of major group 20-21, 360 factories employ 15,417 persons. A reference to the statement given above will show that about 84 per cent of this number of factories employ on an average 10 or more persons but less than 50 persons. However, 7 out of the factories returned under the major group 20-21 employ 500 and more persons each, employing all told 5,148 persons. It may also be mentioned that the total number of registered factories under this employment category returned in the State as a whole is just 25.

3.8 As regards registered factories manufacturing cotton textiles (major group 23), 482 units under this group have returned an employment turnover of 19,523 persons. About 86 per cent of the number of factories returned under the major group employ on an average 10 or more persons but less than 50 persons. Thus most of the units manufacturing cotton textiles are either small scale or medium scale units. Units employing 100 or more persons each constitute just 6 per cent of the total number of units returned under the major group. In terms of actual numbers, 27 factories are returned under the employment category 100 to 299 persons and just 3 units are employing 500 or more persons each. These three units employ in aggregate 5,369 persons.

3.9 Other major groups which represent a large majority of units under the employment category 10 to 19 persons include major group 22 (55.6%), major group 24 (64.3%), major group 27 (71.9%), major group 28 (64.1%), major group 31 (60.9%), major group 34 (62.9%), major group 37 (60.4%) and major group 39 (53%). On the other hand, some of the major groups reflect even less than half of the total number of units under this employment category. These include major group 26 (39.1%), major group 29 (20%), major group 30 (49.3%), major group 33 (25.5%), major group 36 (42.4%) and major group 38 (46.4%). Factories returned under these major groups may be referred to as medium scale units as more than half of such units employ on an average 20 or more than 20 persons. Most of these are identified under the employment category 20 to 49 persons.

Registered Factories employing 100 or more persons :

3.10 The total number of registered factories employing 100 or more persons has been returned at 251 or about 7 per cent of the total number of registered factories returned in the State. These employ 60,986 persons or about 42 per cent of the total number of persons employed in all the registered factories. As has been stated earlier, major group 32 reflects the highest incidence of factories employing on an average 100 to 299 persons. In the case of employment category 500 or more persons, the highest number has been returned in the major group 20-21. However, a notable feature of the factories falling under this category is that 5 factories represented by the major group 24 employ in aggregate as many as 5,037 persons. Other highlights of the data include 1 factory represented by the major group 31 employing as many as 2,000 persons, 3 factories represented by the major group 23 employing as many as 5,369 persons, 1 factory represented by the major group 28 employing as many as 1,500 persons, 1 factory represented by the major group 35 employing as many as 1,200 persons, 3 factories represented by the major group 26 employing 2,054 persons and 2 factories represented by the major group 37 employing as many as 2,000 persons.

Distribution of Registered Factories by districts :

4.1 At this stage, it will be useful to examine the distribution of each of the types of registered factories among different districts of the State.

Major Group 20-21—Manufacture of Food Products :

4.2 The total number of registered factories returned under this Major Group in the State as a whole is 360. These employ in all 15,417 persons. The distribution of these factories among various districts of the State, given in the following statement, shows that Amritsar district accounts for the highest number of such units.

STATEMENT III.3

Number of units and persons employed in registered factories represented by Major Group 20-21 *Manufacture of food Products*

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	**360**	**100·0**	**15,417**	**100·0**
Gurdaspur District ..	34	9·5	1,539	10·0
Amritsar District ..	75	20·8	2,333	15·1
Firozpur District ..	44	12·2	897	5·8
Ludhiana District ..	48	13·3	1,831	11·9
Jullundur District ..	21	5·8	1,037	6·7
Kapurthala District ..	25	7·0	1,359	8·8
Hoshiarpur District ..	17	4·7	465	3·0
Ropar District ..	4	1·1	826	5·4
Patiala District ..	49	13·6	3,258	21·1
Sangrur District ..	23	6·4	1,442	9·4
Bhatinda District ..	20	5·6	430	2·8

4.3 It will be seen that though the number of registered factories is highest in the case of Amritsar district, Patiala district accounts for the highest number of persons employed in such units. 49 factories returned in the case of latter are employing as many as 3,258 persons. Both in the case of Amritsar and Patiala districts, a large majority of such units are accounted for by their urban areas.

4.4 A reference to Table E-II Part A will show that two factories returned in the urban areas of Patiala district employ as many as 1,371 persons. On the other hand, not a single factory manufacturing food products in Amritsar district is employing 300 or more persons. Other important districts which account for sizable number of registered factories engaged in manufacture of food products include Ludhiana and Firozpur. Finrozpur district does not claim more than 5.8 per cent of the total number of workers in such registered factories possibly because of its proximity to the Pakistan border. On the other hand, Ludhiana district representing 13.3 per cent of the total number of registered factories takes a fairly high share of 11.9 per cent of the number of persons employed by such industrial units. Another reason why Firozpur district represents a small proportion in the percentage distribution of number of persons employed in registered factories represented by major group 20-21 is, as a reference to Table E-II Part A will show, that all such factories in the district are medium sized factories. Except for 3 such factories, two of this number returned in the urban areas, all other factories employ less than 50 persons each in the district. Some of the districts though ranking very low in the distribution of registered factories in the State account for a number of large sized registered factories manufacturing food products. These include Gurdaspur district which has one such factory employing as many as 802 persons located in its rural areas, Jullundur district having one such factory employing as many as 725 persons located in its rural areas, Ropar district having one such factory employing as many as 700 persons located in its rural areas, Kapurthala district having one such factory employing as many as 885 persons located in its urban areas and Sangrur district having one such factory employing 665 persons located in its urban areas.

Major Group 22—Manufacture of Beverages, Tobacco and Tobacco Products :

5. According to Table E-II Part A, just 9 registered factories, represented by major group 22, have been returned in the State. These employ in all 962 persons. Though all, but one, of such factories have been returned in the urban areas of the State, these employ only 184 persons in aggregate. On the other hand, one factory returned in the rural areas employs as many as 778 persons. As the following statement, giving the distribution of the number of registered factories and persons employed shows, the factory employing 778 persons is accounted for by Kapurthala district.

STATEMENT III.4

Number of units and persons employed in registered factories represented by Major Group—22 Manufacture of Beverages, Tobacco and Tobacco Products

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab ..	9	100·0	962	100·0
Gurdaspur District ..	..	..	..	..
Amritsar District ..	1	11·1	12	1·2
Firozpur District ..	4	44·5	76	7·9
Ludhiana District ..	1	11·1	71	7·4

Kapurthala District ..	1	11·1	778	80·9
Hoshiarpur District ..	..	..	..	..
Ropar District ..	..	..	..	..
Patiala District ..	..	..	..	..
Sangrur District ..	..	..	..	..
Bhatinda District ..	1	11·1	15	1·6

The remaining 8 factories are distributed among Amritsar, Firozpur, Ludhiana, Jullundur and Bhatinda districts. However, it is interesting to note that half of this number is reflected in the case of Firozpur district.

Major Group 23—Manufacture of Cotton Textiles :

6.1 Manufacture of cotton textiles occupies a very important place in the medium and large industry of the Punjab State. This embraces activities such as cotton spinning, weaving, printing, finishing and other activities allied to the manufacture of cotton textiles.

6.2 The total number of registered factories engaged in the manufacture of cotton textiles has been returned at 482. These employ as many as 19,523 persons. A reference to Table E-II Part A will show that major group 23 account for the second highest number of registered factories and number of persons. All the same, an outstanding feature of manufacture of cotton textiles is that 3 units returned under the employment category 500 persons employ as many as 5,369 persons in aggregate. Out of the remaining number, 413 units employ less than 50 persons each.

6.3 The following statement giving the distribution of registered factories among various districts of the State shows that more than half of the total number of registered factories, manufacturing cotton textiles in the State, is accounted for by Amritsar district. These, however, employ just 30.9 per cent of the total number of persons employed in all such factories. This is because a large number of these employ 10 to 19 persons each. There is not a single such factory in the district which employs 300 or more persons and just 16 factories employ 50-299 persons each. Another interesting feature to note is that 242 units, out of 261 units returned in the district as a whole, are accounted for by Amritsar city.

STATEMENT III.5

Number of units and persons employed in registered factories represented by Major Group 23—Manufacture of Cotton Textiles

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	482	100.0	19,523	100·0
Gurdaspur District ..	3	0·6	54	0·3

Kapurthala District ..	1	0·2	3,062	15·7
Hoshiarpur District ..	3	0·6	130	0·7
Ropar District ..	1	0·2	675	3·5
Patiala District ..	6	1·2	1,819	9·3
Sangrur District ..	13	2·7	594	3·0
Bhatinda District ..	40	8·3	1,781	9·1

6.4 The district which really reflects high incidence of employment is Firozpur. Just 34 units in this district are employing as many as 2,966 persons. On the other hand, 114 units returned in Ludhiana district employ 2,058 persons. A glance at the proportion in the statement given above makes the comparisons more vivid. In the case of the former, 7.1 per cent units employ as many as 15.2 per cent of persons employed as against the latter which though taking a share of 23.7 per cent in the number of units claims just 10.5 per cent of the number of persons employed. The data given in Table E-II Part A gives adequate explanation for this variation in the incidence of employment between the two districts. In the case of Firozpur district, 14 out of the 34 units are identified under the employment category 100-299 persons. These employ all told 2,085 persons. In contrast, just one unit out of 114 units returned in Ludhiana district is identified under employment category 100-299 persons None of the two districts claims even a single factory under the major group which employs 300 or more persons.

Major Group 24—Manufacture of Wool, Silk and Synthetic Fibre Textiles :

7.1 Like manufacture of cotton textiles, manufature of woollen, silk and synthetic fibre textiles also takes a place of pride in the organized sector of the industry in Punjab. According to the data presented in Table E-II Part A, 213 registered factories employing 11,269 persons are engaged in the manufacture of these textiles in the State as a whole. Of the latter, 5,037 persons are accounted for by 5 factories returned under the employment category 500+ persons. Another 2 factories, falling under the major group, employing all told 834 persons, are identified in the employment category 300-499 persons. The number of factories employing 100-299 persons each has been returned at 11. These empoly in all 1,723 persons.

7.2 The distribution of factories represented by major group 24, given in the following statement shows that all but 5 such factories are located in Amritsar and Ludhiana districts. However, these two districts put together account for just 74.5 per cent of the total number of persons employed in registered factories represented by the major group. On the other hand, it is most remarkable that 4 factories returned in Gurdaspur district, contributing just 1.9 per cent of the total number of factories falling under the major group, account for as high as 22.1 per cent of the total number of persons employed.

STATEMENT III.6

Number of units and persons employed in registered factories represented by Major Group 24—Manufacture of Wool, Silk and Synthetic fibre textiles

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab ..	213	100·0	11,269	100·0

Jullundur District ..	..	..	..	..
Kapurthala District ..	..	..	..	..
Hoshiarpur District ..	..	..	..	..
Ropar District ..	1	0·5	384	3·4
Patiala District ..	..	..	..	..
Sangrur District ..	..	..	..	..
Bhatinda District ..	..	..	..	..

The high incidence of employment reflected in the case of factories returned in Gurdaspur district is primarily due to one factory located in its urban areas, which employs as many as 1,900 persons. This is the famous New Egerton Woollen Mills at Dhariwal.

There are 3 more comparatively smaller units, 2 returned in the urban areas and 1 in the rural areas of the district which employ 100 or more persons but less than 300 persons each. Amritsar district also accounts for 4 factories under the employment category 500 and more persons, employing in aggregate 3,137 persons and 1 factory employing 450 persons. All the 5 factories are located in the urban areas of the district. Surprisingly, Ludhiana district does not account for even a single factory under the major group employing 300 or more persons. Undoubtedly, there are one or more factories in the district which employ 500 or more persons. One of such factories Oswal Woollen Mills, employs even more than a thousand persons. It seems that the factory has, by mistake, not been shown as a single establishment by the houselisting staff but its various constituent units appear to have been entered as separate establishments or else classified under major group 26, which besides others represents knitting mills also.

Major Group 25—Manufacture of Jute, Hemp and Mesta Textiles :

8. According to Table E-II Part A, there is just one factory returned under this major group in the State. The factory located somewhere in urban areas of Bhatinda district employs 33 persons.

Major Group 26—Manufacture of Textile Products (including wearing apparel other than footwear):

9.1 The major group encompasses not only knitting mills but also the manufacture of threads, cardage, ropes, twines, nets, crepes, laces, fringes, carpets, rugs, rain coats, hats, curtains, mosquito nets, water proof textiles, coir and coir products, linoleum, upholstery and textile garments including wearing apparel. The number of registered factories manufacturing these products has been returned at 212 employing as many as 10,093 persons. Other highlights of the data are: (i) 3 factories returned under the employment category 500 + persons employ all together 2,054 persons and (ii) 14 factories returned under the employment category 100-299 persons employ in aggregate 2,488 persons. It is, however, a fact that a large majority of the factories returned under the major group employ on an average less than 50 persons.

9.2 A glance at the following statement, giving the distribution of registered factories represented by major group 26, shows that Ludhiana district enjoys the monopoly in this industry represented by the major group. The district accounts for about 80 per cent of the units and 84.3 per cent of the number of persons employed.

STATEMENT III.7

Number of units and persons employed in registered factories represented by Major Group 26—Manufacture of Textile Products (including wearing apparel other than footwear)

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	212	100.0	10,093	100·0
Gurdaspur District ..	1	0·5	25	0·2
Amritsar District ..	31	14·6	1,077	10·7
Firozpur District ..	1	0·5	219	2·2
Ludhiana District ..	169	79·7	8,509	84·3
Jullundur District ..	8	3·8	213	2·1
Kapurthala District..	1	0·5	10	0·1
Hoshiarpur District..	..	..	..	..
Ropar District ..	..	..	..	..
Patiala District ..	1	0·4	40	0·4
Sangrur District ..	..	..	..	..
Bhatinda District ..	..	..	..	..

9.3 A reference to Table E-II Part A shows that of the 169 registered factories in Ludhiana district returned under the major group, 159 are located in its urban areas. However, out of the 10 factories returned in its rural areas, 2 factories employ as many as 1,529 persons. The third factory identified under the employment category 500 + persons is located in one of its urban areas.

9.4 The only other district which also figures somewhat prominently is Amritsar. The district represents 14.6 per cent of the number of units or, in terms of absolute numbers, 31 factories. Except for one factory employing 150 persons, returned in the urban areas of the district, all such factories employ on an average less than 100 persons. A large majority of them are reflected under the employment categories 10-19 persons and 20-49 persons.

9.5 Though Jullundur district also accounts for 8 factories under the major group, these are not of much significance in terms of number of persons employed. The same is true of Gurdaspur, Firozpur, Kapurthala and Patiala districts which have returned a factory each.

Major Group 27—Manufacture of Wood and Wood Products, Furniture and Fixtures :

10.1 The wood industry in the Punjab State is not of any significance particularly after the State lost all its forests to Himachal Pradesh as a result of the States' re-organization in November, 1966. Nevertheless there are 64 registered factories in the State manufacturing wood and wood products. These employ all told 1,405 persons according to the data given in the Table E-II Part A. Just one factory employing 100 or more persons has been returned in the State as a whole under this major group. The factory employs 299 persons. All other factories employ less than 100 persons each, the large majority reflected under the employment category 10—10 persons.

10.2 The following statement, giving the distribution of registered factories represented by major group 27, shows that these are widely distributed all over the State, the highest number being claimed by Amritsar district.

STATEMENT III.8

Number of units and persons employed in registered factories represented by Major Group 27—Manufacture of Wood and Wood Products, Furniture and Fixtures.

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	**64**	**100·0**	**1,405**	**100·0**
Gurdaspur District ..	14	21·9	221	15·7
Amritsar District ..	17	26·6	219	15·6
Firozpur District ..	1	1·6	299	21·3
Ludhiana District ..	7	10·9	105	7·5
Jullundur District ..	8	12·5	222	15·8
Kapurthala District..	1	1·6	14	1·0
Hoshiarpur District ..	4	6·2	64	4·6
Ropar District ..	2	3·1	28	2·0
Patiala District ..	5	7·8	79	5·6
Sangrur District ..	3	4·7	117	8·3
Bhatinda District ..	2	3·1	37	2·6

It will be noted that the highest incidence of employment is reflected in the case of Firozpur district. This is because the district houses a factory in one of its urban areas under the major group which employs 299 persons.

Among the remaining districts, Gurdaspur and Jullundur claim fairly high proportions of the number of both the units and the persons employed. Mention may particularly be made of Kartarpur town in Jullundur district which is widely reputed for the excellence of its furniture and fixtures.

M/P(N)11DCOPunjab—6

Major Group 28—Manufacture of Paper and Paper Products and Printing, Publishing and Allied Industries :

11.1 Besides the manufacture of pulp, paper and the allied products the major group also covers activities such as printing and publishing of newspapers, books, journals, maps as also book-binding.

11.2 89 factories returned under the major group are employing 3,788 persons. One of these factories is employing as many as 1,500 persons. Among the remaining, a large majority is returned under the employment category 10—19 persons. These are generally small printing presses and are accounted for mostly by Amritsar, Ludhiana and Jullundur districts. As the following statement, giving the distribution of number of registered factories and persons employed, shows the said three districts collectively claim about 80 per cent of the units returned in the State. These do not, however, account for even half of the number of persons employed. On the other hand, because of the factory employing 1,500 persons located in its urban areas, just 6.7 per cent of the units in the case of Patiala district account for as high as 44 per cent of the number of persons employed.

STATEMENT III.9

Number of units and persons employed in registered factories represented by Major Group 28—Manufacture of Paper and Paper Products

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	**89**	**100·0**	**3,788**	**100·0**

Jullundur District ..	33	37·1	1,117	29·5
Kapurthala District	..	..	..	..
Hoshiarpur District	2	2·2	55	1·4
Ropar District ..	1	1·1	13	0·3
Patiala District ..	6	6·7	1,671	44·1
Sangrur District ..	..	..	..	..
Bhatinda District ..	..	..	..	..

11.3 After Patiala district, the incidence of employment is striking in the case of Jullundur district. The district accounts for 3 factories, each under the employment categories 100—299 persons and 50—99 persons. As regards the remaining districts, almost all the factories are returned under employment categories 10—19 persons and 20—49 persons.

Major Group 29—Manufacture of Leather, Leather and Fur Products (except repair):

12.1 Manufacture of leather goods is, as elsewhere, mostly in the small industry sector in the Punjab State. In all, 15 registered factories, employing 785 persons, have been returned in the State. Out of this number, 10 factories have been returned under the employment category 20—49 persons, one factory is employing 100 persons and another 357 persons. The remaining 3 factories are accounted for by the employment category 10—19 persons.

12.2 The distribution of the registered factories, returned under the major group, given in the following statement, shows that Jullundur district accounts for a large majority of such industrial units. However, Amritsar district is most conspicuous from the point of view of employment provided in its one factory. As has been stated earlier, the factory employs as many as 357 persons. The factory employing 100 persons is accounted for by Gurdaspur district.

STATEMENT III.10

Number of units and persons employed in registered factories represented by Major Group 29—Manufacture of Leather, Leather and Fur Products (except repair)

Sangrur District ..	..	..	..	..
Bhatinda District ..	1	6·6	20	2·6

Major Group 30—Manufacture of Rubber, Plastic, Petroleum and Coal Products :

13.1 The total number of registered factories represented by this major group stands at 67. These employ 1,960 persons according to the data given in Table E-II Part A. Except for 4 factories, returned under the employment category 100—299 persons, and 8 factories returned under the employment category 50—99 persons, all the units accounted for by the major group employ less than 50 persons each. It will also be observed that half of the number is reflected in the employment category 10—19 persons.

13.2 A glance at the following statement, giving the distribution of the registered factories represented by major group 30, shows that 43 factories or 64.2 per cent of the total number of such factories are accounted for by Jullundur district. These employ 59.1 per cent of the total number of persons employed. The district is the most important centre of manufacture of cycle tyres and tubes in the State.

STATEMENT III.11

Number of units and persons employed in registered factories represented by Major Group 30—Manufacture of Rubber, Plastic, Petroleum and Coal Products

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed

Patiala District ..	..	..	..	..
Sangrur District ..	..	..	..	..
Bhatinda District ..	1	1·5	15	0·8

13.3 It will be seen that, besides Jullundur district, the units are distributed mainly among Amritsar, Gurdaspur, Ludhiana and Kapurthala districts. Each of these districts, except Gurdaspur, claims one factory employing 100 or more persons. The units returned in the remaining districts are accounted for by employment category 10—19 persons.

Major Group 31—Manufacture of Chemical and Chemical Products (except products of petroleum and coal):

14.1 The industrial activity represented by the major group embraces manufacture of products like fertilizer, pesticides, acids, alkalies, paints, varnishes, lacquers, drugs and medicines, inedible oils, turpentine, synthetic fibres like nylon, terrylene, cosmetics, tooth pastes, synthetic detergents, shaving and other toilet products. The number of registered factories manufacturing these products has been returned at 69, employing 4,061 persons. According to the data given in Table E-II Part A, all the units, except 8,

1 reflected in the employment category 500+ persons, 5 reflected in the employment category 100—299 persons and 2 in the employment category 50—99 persons, employ less than 50 persons each. A large majority is accounted for by the employment category 10—19 persons.

14.2 Amritsar district claims as high as 37.7 per cent of all the units returned under the major group and accounts for 24.8 per cent of the number of persons employed in such factories according to the following statement giving the distribution of registered factories represented by major group 31.

STATEMENT III.12

Number of units and persons employed in registered factories represented by Major Group 31—Manufacture of Chemical and Chemical Products

Patiala District	6	8·7	126	3·1
Sangrur District	..	..	..	..
Bhatinda District	1	1·4	19	0·5

14.3 The high incidence of employment reflected in the case of registered factories in Ropar district is primarily due to one factory located in its urban areas which employs as many as 2,000 persons. This is the well known Nangal Fertilizers and Heavy Water Factory. The high incidence of employment reflected in the case of registered factories returned under the major group in Amritsar district is also attributable to the fact that 3 out of 5 factories returned in the State under the employment category 100—299 persons, and both the factories returned under the employment category 50—99 persons are accounted for by this district. These are located in its urban areas. The remaining 2 factories employing 100 or more persons but less than 300 persons, are claimed by the urban areas of Hoshiarpur and Jullundur districts. The registered factories returned under the major group in the case of remaining districts are by and large smaller units employing on an average 10 to 19 persons.

Major Group 32—Manufacture of Non-metallic Mineral Products:

15.1 The production represented by the major group includes the manufacture of structural clay products, glass and glass products, earthenware, china-ware, cement and cement products, lime, plaster, mica products, structural stone goods, stone-dressing, stone-crushing and stone-ware, asbestos and other miscellaneous non-metallic mineral products.

15.2 The importance of the industry in this group in the State is revealed by the number of units and persons employed which work out to 325 units and 20,885 persons respectively. Incidentally, it may be pointed out that this is the highest number of persons employed in registered factories represented by any single major group. Another interesting revelation of the data, given in Table E-II Part A, is that just 28 units or less than 10 per cent of the total number of units are reflected in the employment category 10—19 persons. This contrasts sharply with the position obtaining in the case of other major groups, discussed earlier, which represent a large majority of the units under the employment category 10—19 persons.

15.3 Major Group 32 represents the highest number of units under the employment category 50—99 persons. It is remarkable that even under the employment category 100—299 persons, the number of units is as high as 63. Two factories are also identified under the employment category 300—499 persons, employing in aggregate 600 persons. However, the category which makes the highest dent in the matter of employment is in the bracket 100—299 persons—63 factories falling under this employment category account for as many as 8,395 persons of the total number of persons employed. The second highest contribution is of the factories identified under the employment category 50—99 persons.

15.4 Registered factories represented by major group 32 are distributed all over the State with Firozpur district claiming not only the highest number of such industrial units but also the highest number of persons employed according to the following statement.

STATEMENT III.13

Number of units and persons employed in registered factories represented by Major Group 32—Manufacture of non-metallic mineral products

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	**325**	**100·0**	**20,885**	**100·0**
Gurdaspur District	41	12·6	2,351	11·3
Amritsar District	23	7·1	1,739	8·3
Firozpur District	46	14·1	3,743	17·9
Ludhiana District	33	10·2	1,768	8·5
Jullundur District	35	10·8	2,262	10·8
Kapurthala District ..	8	2·5	520	2·5
Hoshiarpur District ..	36	11·1	1,326	6·3
Ropar District	18	5·5	1,128	5·4
Patiala District	29	8·9	2,984	14·3
Sangrur District	25	7·7	1,523	7·3
Bhatinda District	31	9·5	1,541	7·4

The highest incidence of employment reflected in the case of Firozpur district is explained by the fact that of the 46 units returned in the district (represented by the major group), 33 units are employing 50 or more persons each. These include 10 units employing 100 or more persons but less than 300 persons each, employing all told 1,605 persons. All the 33 units are located in the rural areas of the district. Locational aspect for the manufacture of non-metallic mineral products is important because the two basic raw materials, earth and clay, are easily and cheaply available in the rural areas.

15.5 Next in importance from the point of view of employment is Patiala district, which accounts for 29 registered factories, under the major group, employing in all 2,984 persons. The district claims 1 factory which employs as many as 300 persons besides 12 factories returned under the employment category 100—299 persons employing all told as many as 1,949 persons. All the large sized units are located in the rural areas of the district. Even the smaller sized units are by and large located in the rural areas.

15.6 The second unit returned under the employment category 300—499 persons is accounted for by the urban areas of Amritsar district. The district as a whole, however, represents just 7.1 per cent of the total number of units, which claim 8.3 per cent of the number of persons employed. In comparison, Gurdaspur, Ludhiana and Jullundur districts fare better both in respect of number of units and the number of persons employed. Mention may particularly be made of Gurdaspur and Jullundur districts which account for as many as 2,351 and 2,262 persons employed respectively.

Major Group 33—Basic Metal and Alloys Industries:

16.1 The industries under the major group include those which manufacture iron and steel, ferro-alloys, copper, brass, aluminium, zinc and other non-ferrous metals.

16.2 165 registered factories employing 6,564 persons have been returned under the major group. Except for 7 units identified under the employment category 100—299 persons, all the units employ on an average less than 100 persons, a large majority being accounted for by those which employ on an average even less than 50 persons.

16.3 Lest the reader is misled, it may be stated that there are no factories in the State as such which manufacture any basic metals from the ore. However, the units returned under the major group are generally those which make the metals out of scrap materials and metal ingots.

16.4 It will be seen from the following statement that Patiala district accounts for 47.3 per cent of the total number of units returned under the major group and these account for 49.9 per cent of the number of persons employed.

STATEMENT III.14

Number of units and persons employed in registered factories represented by Major Group 33—Basic Metal and Alloys Industries

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab ..	**165**	**100·0**	**6,564**	**100·0**
Gurdaspur District ..	2	1·2	52	0·8
Amritsar District ..	15	9·1	572	8·7
Firozpur District ..	2	1·2	23	0·4
Ludhiana District ..	33	20·0	1,248	19·0
Jullundur District ..	19	11·5	424	6·5
Kapurthala District ..	7	4·3	344	5·2
Hoshiarpur District ..	..	..	..	..
Ropar District ..	..	..	..	..
Patiala District ..	78	47·3	3,274	49·9
Sangrur District ..	4	2·4	232	3·5
Bhatinda District ..	5	3·0	395	6·0

Out of 78 units returned under the major group in Patiala district, 2 units are reflected in the employment category 100—299 persons. One of these units, located in the rural areas, employs 150 persons and another, located in the urban areas, employs 100 persons.

16.5 Next in importance is Ludhiana district. 33 factories employing 1,248 persons have been returned in this district. Of these, 2 factories are employing 100 or more persons but less than 300 persons

each. One of these, employing 224 persons, is accounted for by the rural areas and another employing 150 persons is located in the urban areas.

16.6 Of the 3 remaining factories, employing 100 or more persons, one employing 247 persons is claimed by the urban areas of Amritsar district and the remaining 2 factories employing in aggregate 200 persons are accounted for by the urban areas of Bhatinda district.

Major Group 34—Manufacture of Metal Products and Parts except Machinery and Transport Equipment:

17.1 The manufactures represented by this major group relate to fabricated metal products, structural metal products, metal furniture and fixtures, hand tools and general hardware, metal utensils, cutlery and kitchen-ware, enamelling, japanning, laquering, galvanising, plating and polishing metal products.

17.2 The importance of these industries will be seen from the fact that the number of units has been returned at 321. These employ 8,893 persons according to the data given in Table E-II Part A. Though a large majority of units employ on an average 10—19 persons, 14 units have been identified under the employment category 100—299 persons and 1 unit employs as many as 376 persons.

17.3 The distribution of the units among various districts of the State, given in the following statement, shows that Jullundur district takes a lion's share not only in respect of number of units but also these units claim more than half of the number of persons employed in all the units represented by the major group.

STATEMENT III.15

Number of units and persons employed in registered factories represented by Major Group 34—Manufacture of Metal Products and Parts except Machinery and Transport Equipment

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	321	100·0	8,893	100·0
Gurdaspur District ..	36	11·2	964	10·8
Amritsar District	32	10·0	573	6·4
Firozpur District	8	2·5	177	2·0
Ludhiana District	57	17·8	1,295	14·6
Jullundur District	149	46·4	4,549	51·2
Kapurthala District ..	7	2·2	403	4·5
Hoshiarpur District ..	4	1·2	52	0·6
Ropar District	3	0·9	206	2·3
Patiala District	17	5·3	437	4·9
Sangrur District	7	2·2	223	2·5
Bhatinda District	1	0·3	14	0·2

17.4 A reference to Table E-II Part A will show that 146 out of 149 units returned under the major group in Jullundur district are accounted for by its urban areas. These include one unit employing 376 persons, 6 units employing on an average between 100—299 persons.

17.5 Among the remaining districts, only Ludhiana, Amritsar and Gurdaspur claim significant proportions of the total number of units. The three districts collectively account for about 39 per cent of units and about 32 per cent of the number of persons employed. Among the three districts, Ludhiana tops with a proportion of 17.8 per cent of the number of units and 14.6 per cent of the number of persons employed. All other districts makes only insignificant contribution.

Major Group 35—Manufacture of Machinery, Machine Tools and Parts except Electrical Machinery:

18.1 The major group encompasses the manufacture of agricultural machinery and equipment, machine tools and their parts, sewing machines, arms and armaments, cooking ranges and ovens, washing and dry-cleaning machines, office computing and accounting machines, drills, coal-cutting and earth moving machines, cranes, prime movers, boilers, diesel engines, machinery for food and textile industries, refrigerators, air-conditioners, fire-fighting equipment and other heavy machinery.

18.2 It is interesting to note from Table E-II Part A that among all the major groups, major group 35 accounts for the highest number of registered factories. However, these do not employ the highest number of persons. 677 units are employing all told 17,968 persons. It has been seen earlier in the case of major group 32 that a much smaller number of units employ a significantly higher number of persons. The main highlight of the units returned under major group 35 is one factory employing as many as 1,200 persons. A large majority of the units are covered under the employment category 10—19 persons. However, 197 units falling under the employment category 20—49 persons employ in aggregate a higher number of persons than 411 units returned under the employment category 10—19 persons. Another useful revelation of the data given in Table E-II Part A is that urban areas account for as many as 606 units as against just 71 units returned in the rural areas of the State. It may be pointed out that units returned under major group 35 are mainly those which manufacture agricultural equipment, accessories like sewing machines, cooking ranges etc., arms and armaments and parts for heavy machines. There is hardly any unit in Punjab which manufactures

heavy machinery. The industrial activity in the State revolves around the manufacture of either small machines or components for heavy machinery. The incidence of production of such industrial goods is quite high as is indirectly evident from the number of units returned under the major group 35. The following statement, giving the distribution of industries, shows that these have been monopolised by just three districts of State, namely—Gurdaspur, Ludhiana and Jullundur. Collectively, these districts account for as many as 73 per cent of the total number of units returned and an equal percentage of the number of persons employed. The factory returned in urban areas of Ropar district employ as many as 1,200 persons.

STATEMENT III.16

Number of units and persons employed in registered factories represented by Major Group 35—Manufacture of Machinery, Machine Tools and Parts except Electrical Machinery

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	**677**	**100·0**	**17,968**	**100·0**
Gurdaspur District ..	154	22·7	3,692	20·5
Amritsar District	59	8·7	1,368	7·6
Firozpur District	25	3·7	379	2·1
Ludhiana District	165	24·4	4,673	26·0
Jullundur District	175	25·9	4,766	26·5
Kapurthala District ..	41	6·1	768	4·3
Hoshiarpur District ..	5	0·7	63	0·4
Ropar District	6	0·9	1,293	7·2
Patiala District	32	4·7	699	3·9
Sangrur District	9	1·3	166	0·9
Bhatinda District	6	0·9	101	0·6

18.3 While Ludhiana and Jullundur districts are the two main areas where small machines or parts for heavy machinery are manufactured, Gurdaspur district (Batala town to be more precise) is known for the manufacture of agricultural implements. Mention may particularly be made of Rita Mechanical Works at Ludhiana which manufacture sewing machines in large numbers. Agricultural implements are manufactured on a large scale in Jullundur district also. Apart from these three districts, the only other districts which figure somewhat prominently in the statement given above are Amritsar, Kapurthala and Ropar. Each of these, however, claims less than 10 per cent of the units. These do not make any significant dent in the total employment provided in the registered factories.

Major Group 36—Manufacture of Electrical Machinery, Apparatus, Appliances and supplies and parts:

19.1 Though the major group covers the manufacture of heavy electrical machinery also such as electrical motors, generators, transformers, X-Ray plant, Electronic Computors etc., 92 units returned under it in the State are mostly those which manufacture radio and transistor sets and other electrical appliances such as lamps, bulbs, sockets, switches, fans, irons, heaters etc. These employ in all 4,619 persons. Except for one unit employing 383 persons, all units employ on an average less than 300 persons each. Of these, 12 units are returned under the employment category 100—299 persons and 13 under the employment category 50—99 persons. The former account for the highest number of persons employed, standing at 1,926, in comparison with the figures of employment given under other employment categories in Table E-II Part A.

19.2 It will be seen from the following statement that Jullundur district claims the highest number of units followed closely by Kapurthala district. The same pattern obtains in the percentage distribution of the total number of persons.

STATEMENT III.17

Number of units and persons employed in registered factories represented by Major Group 36—Manufacture of Electrical Machinery, Apparatus, Appliances and supplies and parts

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	**92**	**100·0**	**4,619**	**100·0**
Gurdaspur District ..	3	3·3	75	1·6
Amritsar District	7	7·6	145	3·2
Firozpur District ..	..	..	..	..
Ludhiana District	11	11·9	209	4·5
Jullundur District	33	35·9	1,535	33·2
Kapurthala District ..	31	33·7	1,528	33·1
Hoshiarpur District ..	1	1·1	11	0·2
Ropar District	..	..	..	..
Patiala District	6	6·5	1,116	24·2
Sangrur District	..	..	..	..
Bhatinda District	..	..	..	..

The incidence of employment is remarkably high in the case of units located in Patiala district. This is because 4 units out of 6 units returned in the district are covered under the employment category 100—299 persons, employing in aggregate 713 persons, and one unit reflected under the employment category 300—499 persons employs 383 persons. The contribution of units located in the remaining districts to the total employment is just marginal.

Major Group 37—Manufacture of Transport Equipment and parts:

20.1 The major group includes all such factories which manufacture any kind of transport equipment right from a bullock-cart to an aero-plane, 341 units returned in the State under the major group are, however, mostly those which manufacture either bullock-carts, push-carts, hand-carts or else bicycles, cycle-rickshaws, etc. There is hardly any unit in the State which manufactures automobiles. However there are a number of units which manufacture parts for automobiles. These are all netted under the major group.

20.2 Units returned under the major group 37 provide a fairly sizeable employment. As many as 12,246 persons are employed by these units. Some of the significant revelations of the data given in Table E-II Part A are: (i) 2 units returned under the employment category 500+ persons employ all told 2,000 persons, (ii) one unit returned under the employment category 300—499 persons employs 350 persons and lastly 17 units returned under the employment category 100—299 persons employ in all 2,664 persons.

20.3 About 60 per cent of the units returned in the State are accounted for by Ludhiana district, according to the following statemnet.

STATEMENT III.18

Number of units and persons employed in registered factories represented by Major Group 37—Manufacture of Transport Equipment and parts

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	341	100·0	12,246	100·0
Gurdaspur District ..	5	1·5	84	0·7
Amritsar District	7	2·1	227	1·8
Firozpur District	1	0·3	42	0·3
Ludhiana District	204	59·8	6,363	52·0
Jullundur District	88	25·8	2,946	24·1
Kapurthala District ..	15	4·4	271	2·2
Hoshiarpur District ..	..	..	..	..
Ropar District	..	..	..	..
Patiala District	13	3·8	2,202	18·0
Sangrur District	7	2·0	98	0·8
Bhatinda District	1	0·3	13	0·1

20.4 A large majority of registered factories returned in Ludhiana district are small-sized units, i.e. employing less than 50 persons each. Precisely for this reason 59.8 per cent units claimed by the district account for just 52 per cent of the number of persons employed. All the same the district represents some of the large sized factories also, including one employing 500 persons, another employing 350 persons and 6 factories covered under the employment category 100—299 persons.

20.5 Jullundur district ranks next in importance to Ludhiana district both in terms of number of units and number of persons employed. 25.8 per cent of the units returned in the district employ 24.1 per cent of the number of persons employed in all such factories. The two districts, Ludhiana and Jullundur, put together account for as many as 85.6 per cent of units which in turn claim 76.1 per cent of the number of persons employed.

20.6 Another district representing some large sized factories under the major group is Patiala. Though the number of factories returned is 13 or 3.8 per cent of the total number of such factories, one of these located in its rural areas employs as many as 1,500 persons. Among the remaining 12 factories, 3 are covered under the employment category 100—299 persons and 2 under the employment category 50—99 persons. Thus, 3.8 per cent units claim as high as 18 per cent of the number of persons employed.

20.7 All other districts of the State are conspicuous for their very low representation both in terms of number of units and number of persons employed.

Major Group 38—Other Manufacturing Industries:

21.1 All industrial activities relating to the manufacture of medical, surgical and scientific equipment, photographic and optical goods, watches and clocks, jewellery, coins, sports goods, musical instruments, stationery articles, and other miscellaneous products like costume novelties, artificial flowers, brooms, brushes, lamp shades, tobacco pipes, cigarette holders, ivory goods, badges, wigs etc. are represented by this major group.

21.2 A glance at Table E-II Part A shows that 56 registered factories employing 1,533 persons are returned under the major group. Except for 4 units reflected under the employment category 100—299 persons, all other factories employ less than 100 persons each.

21.3 It will be seen from the following statement that Jullundur district accounts for 51.8 per cent of the total number of units returned under the major group and these account for 62.3 per cent of the number of persons employed. Out of 29 units returned under the major group in Jullundur district, 3 units are reflected in the employment category 100—299 persons and are located in the urban areas.

STATEMENT III.19

Number of units and persons employed in registered factories represented by Major Group 38—Other Manufacturing Industries

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	56	100·0	1,533	100·0
Gurdaspur District ..	3	5·3	23	1·5
Amritsar District	10	17·8	244	15·9
Firozpur District	..	..	..	..
Ludhiana District	9	16·1	232	15·1
Jullundur District	29	51·8	955	62·3
Kapurthala District ..	2	3·6	61	4·0
Hoshiarpur District ..	..	..	..	..
Ropar District	..	..	..	..
Patiala District	2	3·6	18	1·2
Sangrur District	..	..	..	..
Bhatinda District	1	1·8	..	..

21.4 Besides Jullundur district, the units are distributed mainly among Amritsar and Ludhiana districts. Ludhiana district, however, claims one factory employing 100 or more persons. The contribution of units located in the remaining districts is just marginal.

Major Group 39—Repair:

22.1 Repair of all goods except that classified under other major groups is covered by major group 39. This includes the repair of foot-wear and other leather goods, motor vehicles and motorcycles, watches, clocks and jewellery, bicycles and cycle rickshaws, electric repair shops and repair of enterprises not classified under other major groups.

22.2 Repairing activity in the organised sector is most conspicuous in the case of automobiles. In all, 102 units engaged in repair of goods, classified under major group 39, have been returned in the State. These employ all told 3,225 persons. The biggest unit engaged in repairing activity employs 616 persons. Except for this factory and 3 others, returned under the employment category 100—299 persons, all the units under the major group are smaller units, each employing less than 100 persons. The factory employing 616 persons is accounted for by an urban area of Firozpur district. It is because of this factory that Firozpur district reflects the highest incidence of employment, according to the distribution of number of units and persons employed among various districts, given in the following statement.

STATEMENT III.20

Number of units and persons employed in registered factories represented by Major Group 39—Repair

State/District	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
1	2	3	4	5
Punjab	102	100·0	3,225	100·0
Gurdaspur District ..	2	1·9	112	3·5
Amritsar District	22	21·6	366	11·3
Firozpur District	10	9·8	1,019	31·6
Ludhiana District	17	16·7	469	14·5
Jullundur District	22	21·6	578	17·9
Kapurthala District ..	2	1·9	106	3·3
Hoshiarpur District ..	3	2·9	32	1·0
Ropar District	..	..	..	..
Patiala District	11	10·8	250	7·8
Sangrur District	7	6·9	167	5·2
Bhatinda District	6	5·9	126	3·9

22.3 It will be seen that Amritsar, Ludhiana, Jullundur and Patiala districts claim higher number of units than the units returned in Firozpur, although these account for lower proportions of the number of persons employed. However, their joint contribution to the total employment is quite significant.

23.1 In the preceding paragraphs, distribution of different types of registered factories among various districts of the State has been spelt out. Now, the relative significance of different types of factories in various districts will be briefly assessed. In other words, what has been said earlier about the distribution of registered factories will be briefly summed up in the next few paragraphs.

23.2 In the case of Punjab State, a registered factory is more often than not in the small industry sector. There are hardly a few factories which could be categorised as falling in the large scale industry sector in the sense of being predominantly capital-intensive enterprises using substantial quantities of raw materials. Another way of putting it would be to say that the organised sector of industry in the

State is marked for conspicuous absence of the 'heavy' industry like steel. This can be ascribed to the local non-availability of raw materials like iron, ore and coal. Because of the small scale on which the organized sector of industry of Punjab is being run, the cottage industry in the State is virtually languishing. Units in the organised sector employ more of modern techniques to manufacture the traditional products. It may, however, be noted that the organised sector has of late started spreading its wings to include the production of non-traditional items like paper and paper products (including printing and publishing), chemicals, small machinery, electric goods, transport equipment etc.

24.1 The position of distribution of registered factories as it emerges at the district level is spelt out below:—

GURDASPUR DISTRICT

24.2 Manufacture of machinery, machine tools and parts except electrical machinery (major group 35) occupies the most important place in the organised sector of industry of the district. 154 of the 311 units returned in the district are engaged in the manufacture of such goods. Batala town is a renowned centre of production of agricultural implements and other small machines and machine tools. It is undoubtedly one of the very few towns in the country where small and medium-scale sectors of industry are flourishing hand in hand.

The only other manufacturing activities in the organized sector in the district, which are of any significance from the point of view of their incidence either in terms of number or the employment, include the manufacture of metal products and parts except machinery and transport equipment—major group 34, manufacture of non-metallic minerals products—major group 32, manufacture of food products—major group 20-21 and manufacture of wool, silk and synthetic fibre textiles—major group 24. In the case of major group 24, though the number of units of the district is just 4, these provide substantial aggregate employment of the order of 2,491 persons. One of these, the New Egerton Woollen Mills, Dhariwal, employs 1,900 persons.

As regards rural-urban differential in the distribution of units, it will be seen from Table E-II Part A that a large majority of units in respect of all major groups referred to above, except major group 32, are accounted for by the urban areas. Units returned under major group 32 are mostly located in the rural areas. One of the important inferences that can be drawn from this rural-urban distribution is that location of the organised industry tends to be more urban than rural notwithstanding the consideration of availability of raw materials and local labour. In the case of major group 32, overwhelming rural location is attributable to the easy availability of raw materials.

AMRITSAR DISTRICT

24.3 Of the 777 units returned in the organised sector of industry in the district, 261 units are accounted for by major group 23—manufacture of cotton textiles and another 160 units fall under major group 24—manufacture of wool, silk and synthetic fibre textiles. Most of these units are located in Amritsar city. Lest the reader is misled, it has to be borne in mind that a large majority of units are classifiable as small-sized units, each employing even less than 20 persons. The capital investment in these units is also of a small size. The number of units employing 500 or more persons in the case of these two major groups is just 4, one of which is located in Amritsar city. All the same, the fact remains that the position of Amritsar district, particularly Amritsar city, is conspicuous in the State for the manufacture of cotton, wool and silk textiles.

FIROZPUR DISTRICT

24.4 There is hardly any sphere of organised manufacturing activity in the district which bears any significance. Of the 189 factories returned in the district, 124 units are engaged in activities covered by major groups 20-21, 23 and 32. Though major group 35—manufacture of machinery, machine tools and parts—claims 25 units, these make very insignificant contribution to the number of persons employed. On the other hand, one of the 10 units returned under major group 39 employs as many as 616 persons. Incidentally, this is the largest factory in the district and is located in its urban areas.

LUDHIANA DISTRICT

24.5 The district claims the highest number of registered factories in the State. Precisely speaking a little more than one-fourth of the number of registered factories returned in the State. In this sense, it can be rated as the foremost industrialised district of the State. It is widely known for its hosiery products, manufacture of cycles and cycle-parts and finally for the manufacture of machine tools, parts and accessories like sewing machines. An evidence of its reputation as a leading manufacturer of such industrial goods in the State will be found in Table E-II Part A, which shows that of the 950 registered factories returned in the district, as many as 652

are accounted for by major groups 23—manufacture of cotton textiles, major group 26—manufacture of textile products (including wearing apparel other than footwear), major group 35—manufacture of machinery, machine tools and parts except electrical machinery and major group 37—manufacture of transport equipment and parts.

As regards employment, 169 units, returned under major group 26, are employing in all 8,509 persons. Thus the hosiery industry, mainly the knitting mills, is the biggest employer. Though the number of units returned under major group 37 at 204 is much higher than the number returned under major group 26, the former employ a significantly lower number of persons standing at 6,363. This is more or less true of major groups 35 and 23 also which account for 165 units and 114 units respectively. The latter employ all told 2,058 persons whereas the former employ in aggregate 4,673 persons.

The organised sector of industry of Ludhiana district is concentrated mainly in Ludhiana city. Out of 950 registered factories returned in the district, as many as 811 are accounted for by Ludhiana city. Ludhiana city is undoubtedly one of the highly industrialised cities of its population size in the country. Within the State, the city shares this distinction with Amritsar and Jullundur cities.

JULLUNDUR DISTRICT

24.6 That there are 690 registered factories in the district is a clear indication of the fact that it is one of the leading industrially developed districts of the State. The main activities in the case of organised industry relate to manufacture of metal products and parts except machinery and transport equipment—major group 34 and manufacture of machinery, machine tools and parts except electrical machinery—major group 35. The two major groups jointly account for as many as 324 registered factories. These are either small or medium sized factories manufacturing fabricated metal products, metal furniture and fixtures, hand tools and general hardware, metal utensils, cutlery and kitchenware, agricultural machinery and parts, fans, sewing machines etc. The biggest factory returned under the two major groups is employing 376 persons. However, a still bigger factory employing 725 persons has been returned under major group 20-21—manufacture of food products. The third highest number of registered factories in the district standing at 88 has been claimed by major group 37—manufacture of transport equipment and parts. These products are bicycles, bicycle-parts and body building of trucks and buses. Jullundur district is very prominent in Northern India for the manufacture of body building of trucks and passenger buses.

As in the case of Ludhiana district, a large majority of registered factories returned in Jullundur district is accounted for by its urban areas. It will be interesting to note that Jullundur city alone claims 495 factories out of the 690 factories returned in the district. Factories returned in its rural areas are mostly those which manufacture non-metallic mineral products and small machines including machine parts.

KAPURTHALA DISTRICT

24.7 With just 146 factories, it can be said that the organised sector of industry in the district is still not mature. Of this number, 97 are represented by major groups 20-21 (manufacture of food products), 35 (manufacture of machinery, machine tools and parts except electrical machinery) and 36 (manufacture of electrical machinery, apparatus, appliances and supplies and parts). While a large number of units returned under major group 35 manufacture agricultural implements and parts, arms and armaments and accessories like sewing machines, those returned under major group 36 mostly manufacture radios, transistors and other electrical appliances. The units returned under major group 20-21 are generally either rice or flour mills. One of such factories employs as many as 885 persons. Other large sized factories returned in the district include one factory under major group 22 (manufacture of beverages, tobacco and tobacco products) employing 778 persons and one factory under major group 23 (manufacture of cotton textiles) employing 3,062 persons. Of the 3 factories employing 500 or more persons each, 2 are accounted for by the urban areas.

HOSHIARPUR DISTRICT

24.8 The organised sector of industry in this district is pretty small. Of the 82 registered factories returned in the district, 36 are claimed by major group, 32 (manufacture of non-metallic mineral products) and 17 by major group, 20-21 (manufacture of food products). Because of the fact that a large majority of registered factories in the district are agro-based, the locational aspect has predominantly a rural accent, urban areas account for just 28 factories.

ROPAR DISTRICT

24.9 The district is industrially the most backward region of the State. The organised sector is constituted of just 38 factories. Half of this number

is claimed by major group 32 (manufacture of non-metallic mineral products). Of the remaining, 6 units fall under major group 35 (manufacture of machinery, machine tools and parts except electrical machinery) and 4 units under major group 20-21 (manufacture of food products). The district, however, claims one of the largest factories in the State which employs 2,000 persons. The factory is reflected under major group 31 (manufacture of chemicals and chemical products except products of petroleum and coal). Other important factories returned in the district include one factory under major group 35 which employs 1,200 persons, one under major group 20-21 which employs 700 persons and one under major group 23 (manufacture of cotton textiles) which employs 675 persons.

As in the case of Hoshiarpur district, a large majority of factories returned in Ropar district are located in its rural areas. However, the two factories, one employing 2,000 persons and the other employing 1,200 persons are claimed by the urban areas.

PATIALA DISTRICT

24.10 Though not coming up to the level of Amritsar, Ludhiana and Jullundur districts, Patiala district makes quite a significant contribution to the organised sector of industry in the State. The most striking point is that employment provided in these industries is formidable; 261 factories returned in the district employ 17,973 persons. The most important industrial activity in the district relates to manufacture of basic metals from scrap materials. Factories manufacturing basic metals (major group 33) number 78. This is about half of the total number of such factories returned in the entire State. Some of the other major groups which claim significant number of units include major group 20-21 (manufacture of food products)—49 units, major group 35 (manufacture of machinery, machine tools and parts except electrical machinery)—32 units and major group 32 (manufacture of non-metallic mineral products)—29 units.

The district accounts for 5 factories which employ 500 or more persons each. Of these, 2 factories employing 1,371 persons are accounted for by major group 20-21 (manufacture of food products), 1 factory employing 1,632 persons is claimed by major group 23 (manufacture of cotton textiles) and lastly major groups 28 (manufacture of paper and paper products including printing, publishing and allied industries) and 37 (manufacture of transport equipment and parts) represent a factory each employing 1,500 persons.

Urban areas of the district not only account for a large majority of the units but also claim all the factories employing 500 or more persons each except the one returned under major group 37.

SANGRUR DISTRICT

24.11 The organised sector of industry in the district is most insignificant, constituted of just 98 factories employing 4,562 persons. These units fall mainly under major group 32 (manufacture of non-metallic mineral products)—25 units, major group 20-21 (manufacture of food products)—23 units and major group 23 (manufacture of cotton textiles)—13 units. Mention may also be made of one factory represented by major group 20-21 which employs as many as 665 persons. This factory is located in the urban areas of the district. It will also be noted from Table E-II Part A that urban component of the organised sector is much bigger than the rural.

BHATINDA DISTRICT

24.12 Though the number of registered factories returned in Bhatinda district is more than the number returned in Sangrur district, it will be seen from Table E-II Part A that the latter employ more persons than the former. In the case of Bhatinda district, organised sector of industry is constituted of just 118 units which employ in all 4,540 persons. As in the case of Sangrur district, organised manufacturing activity in Bhatinda district relates mainly to manufacture of food products—major group 20-21 (20 units), manufacture of cotton textiles—major group 23 (40 units), manufacture of non-metallic mineral products—major group 32 (31 units). A large majority of units, particularly those manufacturing cotton textiles (major group 23), are accounted for by the urban areas of the district.

UNREGISTERED WORKSHOPS OTHER THAN HOUSEHOLD INDUSTRY

25.1 It has been stated earlier that manufacturing activity, on the scale classifiable as unregistered workshop, has emerged as the most dominant feature on the industrial scene of the Punjab. What distinguishes it from organised manufacturing or a registered factory is its smallness of size. In other words, its intake of capital investment, labour and raw materials is comparatively smaller. Yet it is a step ahead of household industry towards modern industrial organization. The shift from traditional household industry to an unregistered workshop can be attributed essentially to the shift in location of the small-scale manufacturing enterprise. Earlier, the emphasis was on running the enterprise within the precincts of the owner's abode. Production from the household (manufacturing) enterprise has not been keeping pace with the galloping demand for consumers' goods. Mainly a result of this and partly because of the growing problem of shortage of residential accommodation, manufacturing activity within the owner's abode is most of the times not a

sound economic practice. Higher returns from agriculture and easier availability of electricity have also been an inducement for investment in a small-scale workshop (unregistered).

25.2 Consequent upon the emergence of a broad based small industry sector, the number of unregistered workshops in the State has been returned at as high a figure as 65,275. The numebr of persons employed by these industrial units stands at 147,897. A clearer picture about the contribution of the unregistered workshops emerges from the figures given in the following statement, which shows that about half of the total number of such industrial units are either repair shops or units manufacturing/processing food products :

STATEMENT III.21

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Punjab State

Division/Major Group of N.I.C.		Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3		65,275	100·0	147,897	100·0
Major Group	20-21	14,487	22·2	31,873	21·6
	22	251	0·4	566	0·4
	23	1,903	2·9	5,978	4·0
	24	209	0·3	1,186	0·8
	25	152	0·2	261	0·2
	26	5,869	9·0	16,019	10·8
	27	6,877	10·5	13,227	8·9
	28	970	1·5	3,412	2·3
	29	2,697	4·1	4,989	3·4
	30	381	0·6	1,103	0·7
	31	1,103	1·7	2,626	1·8
	32	414	0·6	980	0·7
	33	315	0·5	1,225	0·8
	34	6,138	9·4	13,108	8·9
	35	4,076	6·2	13,072	8·8
	36	262	0·4	961	0·6
	37	1,810	2·8	6,468	4·4
	38	3,362	5·2	7,192	4·9
	39	13,999	21·5	23,661	16·0

25.3 Among the remaining major groups, those which represent somewhat significant proportion of the total number of unregistered workshops include major group 27—manufacture of wood and wood products and major group 34—manufacture of metal products and parts except machinery and transport equipments.

25.4 It will be seen that the highest contribution to the total employment in the unregistered workshop sector is made by the units falling under the major group 20-21. However, 22.2 per cent of units claimed by the major group employ just 21.6 per cent of the total number of persons employed in the unregistered workshops. The incidence of employment is still lower in the case of units represented by major group 39 because 21.5 per cent of units claimed by the major group take a share of just 16 per cent of the total number of persons employed. On the other hand, it will be seen that 9 per cent of the units under major group 26 claim as high as 10.8 per cent of the total number of persons employed. It will also be observed from the data given in the main table E-II Part A that the number of units as also the number of persons employed under the employment category 10 to 19 persons, is highest in the case of major group 26, though major groups 20-21 and 39 figure far more prominently both in the distribution of total number of units as also the total number of persons employed.

Rural-Urban differentials :

25.5 Of the total number of unregistered workshops returned in Punjab, 41,152 are accounted for by its urban areas and 24,123 by rural areas. Traditionally, small-scale enterprises classified as unregistered workshops at the Census were more often than not, located in the rural areas. This was because the scope of activity in this area of production was limited to a few commodities only. While considerations of availability of raw materials and closeness to one's residence mainly determined the location of small-scale manufacturing and enterprises earlier, diversification of production and easier availability of transportation facilities have made it economically a better choice in many cases to locate such industrial units in urban areas. This is particularly true of the Punjab State where towns like Ludhiana, Jullundur and Batala have attracted small entrepreneurs in fairly large numbers in the last two decades. It will, however, be seen from the following statement giving the distribution of unregistered workshops among various major groups in rural and urban areas separately that repair shops (major group 39) and food manufacturing/processing units constitute as high as 36 per cent of the total number of unregistered workshops in the urban areas. What is probably more important to note for getting a proper perspective of the growth of small-scale industry in the Punjab is the number of units engaged in manufacture of (i) textile products—major group 26 (5,150 units), (ii) wood and wood products —major group 27 (3,493 units) and (iii) metal products and parts, machinery and machine tools—major groups 34 & 35 (6,848 units).

STATEMENT III.22

Distribution of unregistered workshops and number of persons employed by Division/Major Groups Separately in rural and urban areas of Punjab

Division/Major Group of N.I.C.		RURAL				URBAN			
		Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3		**24,123**	**100·0**	**41,058**	**100·0**	**41,152**	**100·0**	**106,839**	**100·0**

	22	32	0·1	62	0·2	219	0·5	504	0·5
	23	487	2·0	759	1·8	1,416	3·4	5,219	4·9
	24	5	N	11	N	204	0·5	1,175	1·1
	25	126	0·5	213	0·5	26	0·1	48	N
	26	719	3·0	1,024	2·5	5,150	12·5	14,995	14·0
	27	3,384	14·0	5,044	12·3	3,493	8·5	8,183	7·6
	28	10	N	25	0·1	960	2·3	3,387	3·2
	29	964	4·0	1,480	3·6	1,733	4·2	3,509	3·3
	30	18	0·1	51	0·1	363	0·9	1,052	1·0
	31	193	0·8	261	0·6	910	2·2	2,365	2·2
	32	238	1·0	590	1·4	176	0·4	390	0·4
	33	19	0·1	81	0·2	296	0·7	1,144	1·1
	34	2,634	10·9	3,907	9·5	3,504	8·5	9,201	8·6
	35	732	3·0	1,919	4·7	3,344	8·1	11,153	10·4
	36	31	0·1	104	0·3	231	0·6	857	0·8
	37	228	1·0	560	1·4	1,582	3·9	5,898	5·5
	38	614	2·6	815	2·0	2,748	6·7	6,377	6·0
	39	5,331	22·1	7,349	17·9	8,668	21·1	16,312	15·3

25.6 Other major groups which claim significant proportions of the total number of unregistered workshops in the urban areas include those which manufacture cotton textiles—major group 23, paper and paper products—major group 28, leather and leather products—major group 29, chemical and chemical products—major group 31, transport equipment—major group 37 and lastly other manufacturing industries—major group 38.

25.7 Contrary to the position obtaining in the case of urban areas, as high as 56.8 per cent of unregistered workshops returned in the rural areas are accounted for by units manufacturing/processing food products (major group 20-21) and repair shops (major group 39). The only other unregistered workshops which figure significantly are those which manufacture wood and wood products (major group 27) and those which manufacture metal products and parts (major group 34).

25.8 As regards employment provided in the unregistered workshops, it will be seen that the distribution of the number of persons employed has a far wider dispersal in the case of urban areas than the rural areas. Subsidiary Table E-II Part A.1 brings out the differential in the incidence of employment provided in the unregistered workshops between rural and urban areas far more clearly. While the proportions returned under the employment categories 1 person and 2—4 persons are higher in the rural areas than the urban areas in almost all the major groups, a completely reverse position obtains in the case of employment categories 5—9 persons and 10—19 persons. The differences are more prominent in the case of units manufacturing secondary goods than those manufacturing, processing or repairing primary goods.

GURDASPUR DISTRICT

26.1 Of the total number of 5,309 unregistered workshops returned in the district, as many as 2,512 or about half of the total number are dealing in manufacture of food products (major group 20-21) and repair of goods (major group 39). Because of the heavy traffic on the National Highway No. I passing through the district automobile repair workshops are doing flourishing business in the district. It is a matter of great satisfaction to the automobile owners to find such repair shops at short distances while driving on this National Highway. Such repair shops are generally 1 or 2-person enterprises. This is corroborated from the following statement, giving the distribution of unregistered workshops and number of persons employed by various major groups in respect of Gurdaspur district.

STATEMENT III.23

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Gurdaspur District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3	**5,309**	**100·0**	**10,743**	**100·0**
Major Group 20-21	1,418	26.7	2,711	25·2
22	17	0·4	22	0·2
23	79	1·5	139	1·3
25	5	0·1	6	N
26	409	7·7	802	7·5
27	538	10·1	1,180	11·0
28	36	0·7	127	1·2
29	177	3·3	294	2·7
30	7	0·1	17	0·1
31	68	1·3	136	1·3
32	24	0·5	69	0·6
33	12	0·2	43	0·4
34	645	12·1	1,310	12·2
35	449	8·5	1,566	14·6
36	16	0·3	30	0·3
37	21	0·4	60	0·6
38	294	5·5	450	4·2
39	1,094	20·6	1,781	16·6

Even the food manufacturing units are mostly either 1-person or 2-person units. On the other hand, units manufacturing machinery and machine tools (major group 35) bear a much higher incidence of employment. 449 units returned under the major group employ in aggregate as many as 1,566 persons. In the case of major group 34, though the number of units is higher, these account for a lower aggregate employment. It may be mentioned that the centre which has countrywide reputation for manufacture of metal products and parts, machinery, machine tools and parts is Batala in the district. The growth of small-scale industry witnessed in this town during the last two decades has been spectacular on many counts despite the two wars with Pakistan which shattered in a way confidence of the industrial entrepreneurs. Other important activities in the field of small industry in the district include manufacture of wood and wood products, furniture and fixtures (major group 27) and manufacture of textile products (major group 26). While the former provide sizeable employment of the order of 1,180 persons, the latter account for 802 persons of the total number of persons employed in the unregistered workshops. The only other major groups which figure somewhat prominently in the above distribution include major group 38—other manufacturing industries and major group 29—manufacture of leather and leather products. The two major groups account for 294 and 177 units respectively.

Rural-Urban differentials :

26.2 As has been seen earlier in the case of State as a whole, Gurdaspur district also accounts for an overwhelming majority of unregistered workshops in its urban areas. Of the total number of such units, 3,560 units are returned in urban areas and 1,749 in rural areas. Some of the unregistered workshops returned overwhelmingly in urban areas include those represented by major groups 27, 29, 34, 35, 38 & 39. On the other hand, more of food manufacturing units (major group 20-21) are returned in rural areas than in urban areas. The only other important rural unregistered workshops are those which are manufacturing wood and wood products (major group 27) and those manufacturing metal products and parts except machinery and transport equipment (major group 34).

26.3 A reference to Subsidiary table E-II Part A.1 shows that there are not any significant variations in the incidence of employment provided in unregistered workshops between units located in rural and urban areas in the case of major group 20-21. Corresponding to a proportion of 445 returned under 1-person category and 533 under 2—4 persons category, the urban proportions are 401 and 505. Comparatively, the differences are far more significant in the case of major groups 26 & 27. The rural proportions are much higher than urban proportions in the case of 1-person category but much lower in the case of higher employment categories. This is equally true of unregistered workshops returned under major groups 23, 34, 35, 38, 39 and most other major groups.

AMRITSAR DISTRICT

27.1 It has been stated earlier also that Amritsar district is one of the best industrially developed districts of the State. With 9,140 unregistered workshops located in the district, it occupies a prestigious place in the field of small industry in the State. These units provide employment to 23,005 persons.

27.2 It will be seen from the following statement, giving the distribution of unregistered workshops and number of persons employed by various major groups, that as high as 41.1 per cent of such units are either food manufacturing units or repair shops These, however, account for just 32.6 per cent of the number of persons employed. On the other hand, units manufacturing cotton textiles (major group 23) which constitute just 6.8 per cent of the total number of unregistered workshops claim 12.3 per cent of the number of persons employed in all the unregistered workshops.

STATEMENT III.24

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Amritsar District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division No. 2 & 3	**9,140**	**100·0**	**23,005**	**100·0**
Major Group 20—21	2,141	23·4	4,573	19·9
22	32	0·3	69	0·3
23	620	6·8	2,827	12·3
24	164	1·8	961	4·2
25	5	0·1	9	N
26	1,006	11·0	2,702	11·7
27	625	6·8	1,349	5·9
28	284	3·1	901	3·9
29	175	1·9	480	2·1
30	56	0·6	178	0·8
31	198	2·2	627	2·7
32	26	0·3	91	0·4
33	46	0·5	155	0·7
34	720	7·9	1,559	6·8
35	538	5·9	1,634	7·1
36	52	0·6	180	0·8
37	82	0·9	231	1·0
38	731	8·0	1,556	6·7
39	1,639	17·9	2,923	12·7

27.3 It is interesting to note that as many as 1,006 units manufacture textile products (major group 26). These include small knitting mills, carpet weaving units and other types of textiles manufacturing units. As has been stated earlier, there are not many such units in the organised sector in the district. These are largely small units employing a handful of workers.

27.4 Other important fields of small industry in Amritsar district include manufacture of metal products and parts except machinery and transport equipment (major group 34) which claim as many as 720 units, manufacture of machinery, machine tools and parts except electrical machinery (major group 35) accounting for as many as 538 units, manufacture of wood and wood products including furniture and fixtures (major group 27) represented by 625 units and 731 units manufacturing products like watches and clocks, jewellery, sports goods, musical instruments, medical and surgical instruments and photographic and optical goods covered under major group 38. Besides major groups 20-21, 39, 23 and 26, unregistered workshops represented by major groups 27, 34, 35 and 38 also claim significant shares of the total number of persons employed.

Rural-Urban differentials:

27.5 Urban dominance in the case of small industry is reflected more in Amritsar district than in most other districts of the State. Compared to just 2,432 unregistered workshops returned in the rural areas of the district, the urban areas of the district account for as many as 6,708 units. Similarly, while the latter employ 18,787 persons, the rural units employ just 4,218 persons.

27.6 It is significant that of the 620 units engaged in the manufacture of cotton textiles, rural areas account for just 26 units. The same is true of the units manufacturing wool, silk and synthetic fibre textiles (major group 24) which are all but one returned in urban areas. In fact, the only major groups which represent somewhat significant proportions of the total number in the rural areas include 20-21, 22, 27, 29, 34 and 39.

27.7 As regards distribution of unregistered workshops by size of employment, a glance at the figures given in Subsidiary table E-II Part A.1 reveals significantly higher incidence of employment in the case of urban units than rural units. Not a single unit has been returned under the employment category 10—19 persons in the case of rural areas. Urban proportions exceed the rural proportions under the employment category 5—9 persons in the case of all the major groups except major groups 33 and 36. Unregistered workshops represented by major groups 28 & 31 are either all or overwhelmingly 1-person units.

FIROZPUR DISTRICT

28.1 The number of unregistered workshops returned in the district is 5,733. These employ 12,179 persons. Though the size of the small industry sector is quite formidable, a peep into the figures given in the following statement will show that food manufacturing units (major group 20-21) and repair shops (major group 39) constitute altogether as high as 62.5 per cent of this number.

STATEMENT III.25

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Firozpur District

Division/Major Group of N.I.C.		Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3		**5,733**	**100·0**	**12,179**	**100·0**
Major Group	20-21	2,124	37·1	4,964	40·8
	22	41	0·7	140	1·1
	23	83	1·4	155	1·3
	25	38	0·7	83	0·7
	26	65	1·1	136	1·1
	27	520	9·1	981	8·0
	28	36	0·6	117	1·0
	29	126	2·2	208	1·7
	30	15	0·3	23	0·2
	31	74	1·3	168	1·4
	32	31	0·5	79	0·6
	33	10	0·2	28	0·2
	34	438	7·6	750	6·1
	35	437	7·6	1,362	11·2
	36	4	0·1	22	0·2

	38	190	3·3	327	2·7
	39	1,454	25·4	2,504	20·6

The very fact that food manufacturing units constitute 37.1 per cent of the total number of unregistered workshops shows that the role of small industry in the district continues to be, by and large, traditional. There is hardly any activity in the district relating to manufacture of cotton textiles, woollen textiles or other textile products. The only other activity which is of any significance relates to manufacture of wood and wood products (major group 34) and manufacture of machinery, machine tools and parts (major group 35). It may, however, be mentioned that incidence of employment is much higher in the case of units returned under major group 35 than those under major group 34. While 437 units claimed for the latter employ 1,362 persons, 438 units claimed by the former employ just 750 persons. Even units returned under major group 27 are generally 1-person and 2—4 persons units. 520 units claimed by the major group employ in aggregate 981 persons only. Mention may also be made of 190 units returned under major group 38 which provide employment in all to 327 persons.

Rural-Urban differentials:

28.2 Firozpur district presents a totally different picture in the distribution of its unregistered workshops from that obtaining for the State as a whole and some of its districts. Of the 5,733 unregistered workshops returned in the district, its rural areas account for as many as 3,085 units. Thus it will be seen that the pattern of rural-urban distribution of such industrial units in the district has, unlike the position obtaining for the State as a whole, a heavy rural accent. The only important activity in the urban areas of the district, other than repair, relates to manufacture of machinery and machine parts. Corresponding to 346 units employing 1,098 persons returned in the urban areas under major group 35, only 91 such units employing 264 persons are accounted for by the rural areas of the district.

28.3 The distribution of unregistered workshops by size of employment given in table E-II Part A.1 does not bring out any significant differentials between rural and urban areas. For the district as a whole, while out of every 977 unregistered workshops, 432 are 1-person units in the rural areas, the corresponding urban proportion stands at 328 units for every 958 units. The employment category 2—4 persons claims almost identical proportions both in rural and urban areas. However, the differentials are somewhat significant in the case of employment category 5—9 persons, the proportions standing at 26 for rural areas and 98 for urban areas. Even in the case of major groups, differences are most conspicuous under the employment category 5—9 persons. There are hardly a few units reflected under the employment category 10—19 persons both in rural and urban areas.

LUDHIANA DISTRICT

29.1 With 10,955 unregistered workshops, Ludhiana district has the distinction of being the home of small industry sector in the State. Ludhiana is being described as Birmingham of India by the small industrialists in the State—rightly so. Employing 29,647 persons, these units make quite a significant contribution to the total employment in the unorganised sector of industry in the State. It can safely be stated that the small industry sector is much more organised in this district than in all other districts of the State. This is not only a personal observation but is also corroborated by the following statement, giving the distribution of unregistered workshops and the number of persons employed by Division/Major Groups, which shows that units engaged in the manufacture of textile products (major group 26) constitute 17.5 per cent of the total number of units. On the other hand, just 13.2 per cent of the units are engaged in the manufacture of food products. However, repair shops (major group 39) constitute the largest single group of units.

STATEMENT III.26

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Ludhiana District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3	**10,955**	**100·0**	**29,647**	**100·0**
Major Group 20—21	1,450	13·2	3,256	11·0
22	27	0·2	67	0·2
23	465	4·2	1,607	5·4
24	38	0·4	198	0·7
25	3	N	4	N
26	1,922	17·5	7,189	24·3
27	735	6·7	1,429	4·8
28	217	2·0	804	2·7
29	371	3·4	611	2·1
30	62	0·6	153	0·5
31	154	1·4	364	1·2
32	52	0·5	95	0·3
33	104	1·0	441	1·5
34	839	7·7	2,039	6·9
35	948	8·7	3,095	10·4
36	46	0·4	172	0·6
37	1,019	9·3	3,921	13·2
38	299	2·7	595	2·0
39	2,204	20·1	3,607	12·2

29.2 It will be noted from this statement that though units under major group 26 have been returned lesser in number than those returned under major group 39, the former employ almost twice the number of persons than the latter. Thus it will be seen that the units manufacturing textile products bear out the highest incidence of employment. 17.5 per cent of the units account for 24.3 per cent of the number of persons employed. The highest proportion of units returned under major group 39 is largely accountable to the fact that, as in the case of Gurdaspur district, National Highway No. I passes through the district. As a result, numerous automobile repair shops have sprung up in the district to cater to the needs of heavy auto traffic on the National Highway. Such units are generally single person enterprises. Another important activity, which deserves special mention in the field of small industry in the district, relates to manufacture of transport equipment and parts (major group 37). Though just 8.7 per cent of the units have been returned under this major group, these claim the second highest proportion (13.2 per cent) of the number of persons employed. These are mostly feeder units to the large factories manufacturing cycles, rickshaws, cycle-rickshaws etc. Some of these units are even engaged in the manufacture of ancillary auto parts.

29.3 Among the remaining major groups, units returned under major groups 34 & 35, i.e. those engaged in the manufacture of metal products and parts, machinery and machine tools etc., also deserve to be mentioned. The two major groups claim all told 16.4 per cent of the units and account for 17.3 per cent of the number of persons employed. Though units manufacturing wood and wood products constitute 6.7 per cent of the total number of units, these make a very small contribution (4.8 per cent) to the total number of persons employed.

Rural-Urban differentials :

29.4 According to table E-II Part A, the number of unregistered workshops returned in rural and urban areas stands at 2,685 and 8,270 respectively. Of the latter number, as many as, 6,202 are accounted for by Ludhiana city alone. It is mostly true of the Punjab State that its cities are the strongholds of small industry. Looking at the data relating to employment in the said table, it is interesting to note that the units returned in Ludhiana city employ as many as 21,533 persons. On the other hand, units in rural areas account for just 4,225 persons. Even a little more than half of this number is employed in either food manufacturing units or repair shops. In contrast such activities do not account for even one-fourth of the number of units or the number of persons employed in the urban areas. The sizable contribution of 7,137 persons is made by units represented by major group 26 in urban areas. Major groups 35 & 37 also make significant contribution to the total number of persons employed. Mention may also be made of the 376 units engaged in the manufacture of cotton textiles (major group 23) returned in the urban textiles provide aggregate employment of 1,477 persons and 556 units returned under major group 34—manufacture of metal products and parts—which employ in all 1,617 persons.

29.5 Looking at the differentials in the incidence of employment between rural and urban areas revealed by the data given in subsidiary table E-II Part A-1, 608 units out of every 968 units in the rural areas are 1-person units while the corresponding proportion worked out for the urban areas is 271 units for every 906 units. The differentials are, however, particularly conspicuous in the case of employment category 5—9 persons, the rural and urban proportions standing at 18 and 173 respectively. In the case of units represented by major group 26, the differentials are striking: for every 808 units returned in the rural areas, 712 are 1-person units and 96, 2—4 person units. This contrasts sharply with the position obtaining in the case of urban areas where for every 922 units, 233 are 1-person units, 424 are 2—4 person units, 201 are 5—9 person units and 64 are 10—19 person units. Higher urban incidence of employment is also reflected in the case of units returned under other major groups.

74-M/P(N)11DCOPunjab—7

JULLUNDUR DISTRICT

30.1 The second highest number of unregistered workshops in the State, standing at 10,146, has been returned in Jullundur district. The district ranks next to Ludhiana district in the order of importance of small industry in the State. Also these units provide sizeable employment of the order of 25,683 persons. In Jullundur district, unregistered workshops manufacturing food products (major group 20-21) and repair shops (major group 39) put together constitute 36.3 per cent of the total number of unregistered workshops, the proportions of the two types of industrial units standing at 18.9 per cent for the latter and 17.4 per cent for the former. The statement, incorporating data relating to the number of units and persons employed under various major groups, is given below.—

STATEMENT III.27

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Jullundur District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3	**10,146**	**100·0**	**25,683**	**100·0**
Major Group 20—21	1,768	17·4	3,741	14·6
22	39	0·4	84	0·3
23	128	1·3	285	1·1
24	1	N	2	N
25	76	0·7	118	0·4
26	975	9·6	2,288	8·9
27	1,338	13·2	2,741	10·7
28	231	2·3	919	3·6
29	478	4·7	1,096	4·3
30	118	1·2	507	2·0
31	153	1·5	388	1·5
32	76	0·7	202	0·8
33	78	0·8	324	1·3
34	1,104	10·9	3,169	12·3
35	634	6·2	2,345	9·1
36	84	0·8	354	1·4
37	208	2·1	850	3·3
38	736	7·3	2,513	9·8
39	1,921	18·9	3,757	14·6

30.2 It will be seen that though units manufacturing wood and wood products (major group 27) constitute 13.2 per cent of the total number of units, these account for just 10.7 per cent of the total number of persons employed in the unregistered workshops. In the case of units manufacturing textile products (major group 26) also, the proportions of number of persons employed is lower than the proportion of number of units falling under the major group. On the other hand, major groups 34, 35 and 38 represent higher proportions in the distribution of number of persons employed compared to the proportions of units falling under these major groups. In the case of major group 38 particularly 7.3 per cent of the units claim a share of 9.8 per cent of the total number of persons employed. Mention may also be made of the 6.2 per cent of the units claimed by major group 35 which altogether account for 9.1 per cent of the number of persons employed.

30.3 It will also be noted that 17.4 per cent of the units under major group 20-21 and 18.9 per cent of the units under major group 39 take a share of just 15 per cent each of the number of persons employed.

Rural-Urban differentials :

30.4 In Jullundur district also, unrgistered workshops are concentrated mainly in the urban areas. Of the total number of such units, 3,393 are claimed by rural areas and 6,753 by urban areas. Of the latter number 3,999 units are accounted for by Jullundur city alone. It will be noted from table E-II Part A that some of the major groups like 28 and 30 are very poorly represented in the rural areas. In the case of major group 28, just 3 out of 231 units, are returned in rural areas. Major groups 20-21, 27, 34, 35, and 39 are, however, fairly well represented in the rural areas.

30.5 To gain an insight into the incidence of employment in unregistered workshops, it is helpful to refer to subsidiary table E-II Part A.1. In the rural areas, out of every 971 unregistered workshops, 563 are 1-person units, 373 are 2—4 person units, 34 fall under the employment category 5—9 persons and just 1 such unit is reflected in the employment category 10—19 persons. On the other hand, urban proportions in each category have been returned at 302, 446, 154 and 18 for every 920 unregistered workshops. The differentials are outstanding in the case of major group 26, which represents 129 units out of every 989 units under the category 5 persons and above but less than 20 persons in the urban areas but just 18 such units for every 1,000 units in the rural areas. Mention may also be made of major group 28 which represents as high as 299 unregistered workshops out of every 874 such units under the employment category 5 persons and above but less than 20 persons in the urban areas and none in rural areas.

KAPURTHALA DISTRICT

31.1 Not only has the district a very small organised sector of industry but lags behind most other districts of the State in the size of its small industry sector also. With just 1,644 unregistered workshops employing 3,761 persons, the district hardly occupies any place of prominence in the industrial development of the State.

31.2 As the following statement, giving the distribution of unregistered workshops and number of persons employed in Kapurthala district, will show, 40.9 per cent of the unregistered workshops in the district are either food manufacturing units or repair shops.

STATEMENT III.28

Distrubution of unregistered worshops and number of persons employed by Division/Major Groups in Kapurthala District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3	**1,644**	**100·0**	**3,761**	**100·0**
Major Group 20—21	381	23·2	717	19·1
22	11	0·7	18	0·5
23	42	2·5	73	1·9
24	3	0·2	4	0·1
25	3	0·2	3	0·1
26	105	6·4	176	4·7
27	128	7·8	233	6·2
28	5	0·3	19	0·5
29	51	3·1	113	3·0
30	3	0·2	16	0·4
31	18	1·1	46	1·2
32	15	0·9	38	1·0
33	7	0·4	28	0·7
34	96	5·8	232	6·2
35	314	19·1	1,054	28·0
36	24	1·5	111	3·0
37	93	5·6	339	9·0
38	54	3·3	89	2·4
39	291	17·7	452	12·0

The incidence of employment is fairly low in the case of both major groups 20-21 and 39. 17.7 per cent of units returned under the latter claims just 12 per cent of the number of persons employed. Similarly, 23.2 per cent of the units account for just 19.1 per cent of the number of persons employed in case of the former.

31.3 The most significant contribution to the total employment is made by the units returned under major group 35; 19.1 per cent of the units account for as high as 28.0 per cent of the total number of persons employed. These units are mostly engaged in the manufacture of agricultural machinery and small machine tools.

Rural-Urban differentials:

31.4 Kapurthala district also represents abundantly the State pattern of heavy concentration of unregistered workshops in the urban areas. Compared to 690 such units returned in the rural areas, the urban areas account for 954 units. However, 242 out of 381 units claimed by major group 20-21 are accounted for by the rural areas. As regards repair shops (major group 39), the urban figure exceeds the corresponding rural figure.

31.5 As regards employment, 2,612 persons are employed in the urban units and 1,149 persons in the rural units. Of the seven units reflected under the employment category 10—19 persons, 3 are accounted for by rural areas and 4 by urban areas. However, there are sharp differences in the distribution of units under the lower employment categories. As a glance at the data given in subsidiary table E-II Part A.1, will show, the proportions returned in the rural areas stand at 560 for one-person units, 350 for 2—4 person units, 27 for 5—9 person units (for every 966 units) as against the urban proportions which stand at 273, 441 and 147 (for every 887 units) respectively. Some of the major groups which bring out the rural-urban differentials in the proportions returned under various employment categories sharply are major groups 23, 34 and 35. In the case of major group 23, 75 per cent of the units are 1-person units in the rural areas while the corresponding urban proportion is just 42 per cent of all the urban units. Similarly, major groups 34 and 35 jointly represent more rural units under 1-person employment category and even a higher proportion of urban units under the employment category 2 and more persons.

HOSHIARPUR DISTRICT

32.1 Though Hoshiarpur district is not one of the known industrial areas of the State, it has returned quite a significant number of 4,801 unregistered workshops, giving employment to 8,629 persons. It will be seen from the following statement, giving distribution of unregistered workshops by Division/Major Groups, that as high as 81.3 per cent of the total number of units is accounted for by major groups 20-21, 26, 27, 34 and 39. These major groups collectively account for about 81 per cent of the number of persons employed.

STATEMENT III.29

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Hoshiarpur District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3	4,801	100·0	8,629	100·0
Major Group 20—21	1,307	27·2	2,628	30·5
22	29	0·6	43	0·5
23	111	2·3	182	2·1
24	2	0·1	3	N
25	6	0·1	8	0·1
26	412	8·6	855	9·9
27	506	10·5	910	10·6
28	21	0·4	78	0·9
29	145	3·0	240	2·8
30	24	0·5	43	0·5
31	108	2·3	252	2·9
32	23	0·5	70	0·8
33	10	0·2	27	0·3
34	489	10·2	754	8·7
35	117	2·4	239	2·8
36	14	0·3	27	0·3
37	35	0·7	65	0·8
38	253	5·3	399	4·6
39	1,189	24·8	1,806	20·9

The highest proportion of units (27.2 per cent) falls under major group 20-21—manufacture of food products—and these account for the highest proportion of number of persons employed (30.5 per cent). Next in importance in terms of number of units are repair shops, constituting 24.8 per cent of the total number of unregistered workshops. These, however, claim only 20.9 per cent of the number of persons employed. Among the remaining major groups, those which figure prominently in the above distribution include major group 26—manufacture of textile products, major group 27—Manufacture of wood and wood products, and major group 34—manufacture of metal products and parts.

Rural-Urban differentials:

32.2 A glimpse into the figures given in table E-II Part A will show that Hoshiarpur district does not reflect any significant variations in the distribution of unregistered workshops between rural and urban areas—rural areas account for 2,290 units and urban area account 2,511 units. However, more of units returned under major groups 20-21, 27, 34 are accounted for by rural areas than urban areas. On the other hand, urban areas reflect a higher concentration of units under major group 26 than by rural areas.

32.3 Looking at the distribution of unregistered workshops by size of employment given in subsidiary table E-II Part A.1, it will be observed that the differentials between the proportions returned under rural and urban areas are quite insignificant. While the former account for 584 units per 977 units under the employment category 1-person, the corresponding urban proportion is 515 per 989 units. Similarly, rural and urban proportions stand at 363 and 419 respectively under the employment category 2—4 persons, 21 and 52 under the employment category 5—9 persons and 2 and 3 under the employment category 10—19 persons.

32.4 The differentials are, however, quite significant in the case of units returned under major groups 23, 26, 27, 28, 34 and 38. In the case of units returned under major group 35 both rural and urban areas account for quite significant proportions under the employment categories 2—4 persons and 5—9 persons. This is, to some extent, also true of units returned under major groups 26 and 27. The reasons why the over all distribution of units does not reveal any significant variations in the proportions returned under various employment categories between rural and urban areas is that major groups 20-21, 26, 27, 35 and 39 which in aggregate account for a large majority of the units do not reflect any significant variations between the rural and urban areas.

ROPAR DISTRICT

33.1 Ropar is one of the least industrially developed districts of the State. With just 2,306 unregistered workshops, half of the number being accounted for by units engaged in traditional activities like food manufacturing/processing (Major group 20-21) and repair of goods (major group 39), the district does not lay claim to any eminent place on the industrial map of the State.

33.2 It will be seen from the following statement, giving the distribution of units and number of persons employed by Division/Major Groups, that though repair shops (major group 39) constitute a much higher proportion of the total number of units than food manufacturing units (major group 20-21) which form 21.5 per cent of the total number of units, both the major groups account for the same proportion of the number of the persons employed.

STATEMENT III.30

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Ropar District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3	**2,306**	**100·0**	**4,189**	**130·0**
Major Group 20—21	495	21·5	1,062	25·4
22	8	0·4	10	0·2
23	41	1·8	64	1·5
25	9	0·4	17	0·4
26	196	8·5	367	8·8
27	273	11·8	498	11·9
28	20	0·9	50	1·2
29	116	5·0	168	4·0
31	33	1·4	58	1·4
32	19	0·8	47	1·1
33	5	0·2	14	0·3
34	184	8·0	336	8·0
35	95	4·1	242	5·8
36	4	0·2	7	0·2
37	24	1·0	55	1·3
38	95	4·1	135	3·2
39	689	29·9	1,059	25·3

Among the remaining major groups, mention may be made of major group 27-manufacture of wood and wood products which accounts for 11.8 per cent of units. These units claim 11.9 per cent of the number of persons employed. Major group 26 claiming 8.5 per cent of units and major group 34 claiming 8 per cent of the units also figure somewhat prominently in the distribution shown in the statement given above.

Rural-Urban differentials:

33.3 Ropar district accounts for a much higher proportion of the total number of units than Kapurthala district. Out of 2,306 unregistered workshops returned in Ropar district, 1,010 units are claimed by the rural areas and 1,296 by the urban areas. A glance at table E-II Part A shows that except for major groups 20-21, 34 and 35, all other prominent major groups represent higher number of units in urban areas than in the rural areas.

33.4 As in the case of Hoshiarpur district, there are not any significant variations in the proportions of unregistered workshops returned under various employment categories between the rural and urban areas of Ropar district, according to the data given in subsidiary table E-II Part A-1. For every 980 units returned in rural areas, 567 are accounted for by the one person employment category, the corresponding urban proportions standing at 489 per 987 units. The proportions returned under other employment categories are 393 and 439 for rural and urban areas respectively under the employment category 2—4 persons, 19 and 57 under the employment category 5—9 persons and 1 and 2 under the employment category 10—19 persons.

PATIALA DISTRICT

34.1 In all, 5,473 unregistered workshops employing 10,861 persons have been returned in Patiala district. As elsewhere, a little more than half of the unregistered workshops returned in the district are either food manufacturing units (major group 20-21) or repair shops (major group 39) according to the following statement, giving the distribution of unregistered workshops and number of persons employed by Division/Major Groups in Patiala district:

STATEMENT III.31

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Patiala District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3	**5,478**	**100·0**	**10,861**	**100·0**
Major Group 20—21	1,062	19·4	2,516	23·2
22	21	0·4	62	0·6
23	83	1·5	177	1·6
24	1	N	18	0·2
25	4	0·1	4	N
26	383	7·0	795	7·3
27	564	10·3	1,083	10·0
28	58	1·0	179	1·6
29	250	4·6	445	4·1
30	26	0·5	49	0·5
31	113	2·1	247	2·3
32	44	0·8	91	0·8
33	21	0·4	103	1·0
34	525	9·6	879	8·1
35	239	4·4	747	6·9
36	14	0·2	47	0·4
37	77	1·4	242	2·2
38	259	4·7	373	3·4
39	1,729	31·6	2,804	25·8

It will be noted from this statement that repair shops (major group 39) constitute about one-third (31.6 per cent) of the total number of unregistered workshops but these account for just 25.8 per

cent of the number of persons employed. On the other hand. 19.4 per cent of the units returned under major group 20-21 account for 23.2 per cent of the number of persons employed. The only other major groups, which account for 10 or more than 10 per cent of units, include major group 27-manufacture of wood and wood products and major group 34-manufacture of metal products and parts. The two major groups put together account for 18.1 per cent of the number of persons employed.

Rural-Urban differentials :

34.2 The fact, that 3,277 units out of 5,473 units returned in the district as a whole, are accounted for by its urban areas, shows that small industry is more an urban than rural feature of the district. The only activity which appears to be more pronounced in rural areas than urban areas of the district relates to manufacture of metal products and parts except machinery (major group 34). Even in the case of manufacture of food products (major group 20-21), more of units have been returned in the urban areas than rural areas. The same is true of repair shops (major group 39).

34.3 As regards the differentials in the incidence of employment between rural and urban areas, a reference to Subsidiary table E-II Part A.1, shows that 78 units per 948 units in the urban areas employ on an average 5 or more persons, the corresponding rural proportion being just 23 units per 964 units. However, in the case of major group 35 the rural proportion in respect of units employing on an average 5 or more persons is 214 units per 750 units, the corresponding urban proportion standing at 169 per 897 units.

SANGRUR DISTRICT

35.1 Though there are not many registered factories in Sangrur district, it has quite a sizable sector of small industry, constituted of 5,230 unregistered workshops. An important feature of unregistered workshops returned in the district is that quite a high proportion of units (17.7 per cent) are engaged in the manufacture of wood and wood products (major group 27). As will be seen from the following statement, giving the distribution of unregistered workshops and the number of persons employed by Division/Major Groups, food manufacturing units (major group 20-21) and repair shops (major group 39) each constitute almost the same proportion of total number of units as those represented by major group 27. However, units returned under major group 20-21 account for a much higher proportion of the total number of persons employed in unregistered workshops returned in the entire district than those returned under either major group 39 or major group 27.

STATEMENT III.32

Distribution of unregistered workshops and number of persons employed by Division/Major Groups in Sangrur District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3	**5,230**	**100·0**	**10,153**	**100·0**
Major Group 20—21	1,000	19·1	2,521	24·8
22	15	0·3	26	0·3
23	166	3·2	311	3·1
25	3	0·1	9	0·1
26	231	4·4	425	4·2
27	928	17·7	1,513	14·9
28	21	0·4	72	0·7
29	479	9·2	727	7·2
30	38	0·7	63	0·6
31	85	1·6	149	1·5
32	54	1·0	95	0·9
33	16	0·3	34	0·3
34	681	13·0	1,385	13·6
35	136	2·6	346	3·4
36	4	0·1	11	0·1
37	161	3·1	477	4·7
38	245	4·7	388	3·8
39	967	18·5	1,601	15·8

35.2 It will be seen that major group 34 (manufacture of metal products and parts) has also an eminent position in the distribution of units given in this statement both because it claims 13 per cent of the total number of units and accounts for 13.6 per cent of the number of persons employed. Mention may also be made of units engaged in the manufacture of leather and leather products (major group 29) which claims 9.2 per cent of the units and accounts for 7.2 per cent of the number of persons employed.

Rural-Urban differentials:

35.3 The number of unregistered workshops returned in the rural and urban areas of Sangrur district stands at 2,320 and 2,910 respectively. A reference to table E-II Part A will show that though more of units manufacturing food products (major group 20-21) have been returned in rural areas than urban areas, the latter account for many more repair shops (major group 39) than the former. In the case of units returned under major groups 29 and 34 also, urban figures exceed the corresponding rural figures considerably. However, major group 27 accounts for more units in rural areas than in urban areas. In fact, units returned under the major group in rural areas constitute more than one-fourth of the rural units.

35.4 The high incidence of employment in the case of units returned in the urban areas can be discerned by comparing the figures relating to the number of persons employed, which stand at 6,224 for urban areas and 3,929 for rural areas. As a glance at Subsidiary table E-II Part A. 1 also shows, 550 units per 978 units in the urban areas employ on an average 2 or more persons compared to the corresponding rural proportion standing at 436 units per 986 units. The sharp rural-urban variations in proportions returned under various employment categories are distinctly visible in the case of units returned under major groups 27, 29, 31, 34 and 37.

BHATINDA DISTRICT

36.1 Though Bhatinda district has a bigger organised sector of industry than Sangrur, it will be seen from table E-II Part A that the former has returned a smaller number of unregisered workshops (4,538) than the latter. The district as compared to Sangrur also reflects a much higher incidence of units manufacturing food products and a lower incidence of units manufacturing wood and wood products as also those manufacturing metal products and parts.

36.2 As will be seen from the following statement, giving the distribution of unregistered workshops and number of persons employed by Division/Major Groups, major group 20-21 accounts for as high as 29.6 per cent of the total number of units. As against this, repair shops (major group 39) constitute just 18.1 per cent of the units. Similarly, units returned under major group 27 (Manufacture of wood and wood products) constitute just 15.9 per cent of units and those returned under major group 34 (Manufacture of metal products and parts) take a small share of 9.2 per cent of the total number of units.

STATEMENT III.33

Distribution of unregistered workshops and number of persons empliyed by Division/Major Groups in Bhatinda District

Division/Major Group of N.I.C.	Number of units	Percentage of total number of units	Number of persons employed	Percentage of total number of persons employed
Division 2 & 3	**4,538**	**100·0**	**9,047**	**100·0**
Major Group 20—21	1,341	29·6	3,184	35·2
22	11	0·2	25	0·3
23	85	1·9	158	1·7
26	165	3·6	284	3·1
27	722	15·9	1,310	14·5
28	41	0·9	146	1·6
29	329	7·3	607	6·7
30	32	0·7	54	0·6
31	99	2·2	191	2·1
32	50	1·1	103	1·1
33	6	0·1	28	0·3
34	417	9·2	695	7·7
35	169	3·7	442	4·9
37	43	1·0	86	1·0
38	206	4·5	367	4·1
39	822	18·1	1,367	15·1

36.3 It is interesting to note that of 9,047 persons employed in unregistered workshops in Bhatinda district, 3,184 or 35.2 per cent of the total number are accounted for by units manufacturing food products (major group 20-21). These units undoubtedly bear the highest incidence of employment. However, mention may also be made of units returned under major group 27 and 39 which also make significant contributions to the total number of persons employed.

Rural-Urban differentials:

36.4 Unregistered workshops returned in Bhatinda district are almost equally distributed between rural and urban areas, the two figures standing at 2,273 and 2,265 respectively. However, urban units employ more of persons (4,906) than rural units (4,141). Rural areas account for many more units under major groups 20-21, 27 and 34 than urban areas. On the other hand, urban figures exceed the rural figures considerably under major groups 26, 29, 35 and 39.

36.5 Subsidiary table E-II Part A.1, shows that 605 units per 965 units employ on an average 2 or more persons in urban areas as against the corresponding rural proportion of 491 per 984 units. It will also be noted from the figures given in the said table that while variations in the proportions returned under various employment categories are quite striking in the case of units returned under major groups 26, 27, 34 and 39, it is not quite so in case of units returned under major groups 20-21 and 35.

TYPE OF FUELS OR POWER USED IN REGISTERED FACTORIES AND UNREGISTERED WORKSHOPS (OTHER THAN HOUSEHOLD INDUSTRY)

37.1 Discussion under the section is based on main Tables E-II Part B and Subsidiary Table E-II Part B-1 which give data pertaining to various kinds of fuels/power used in registered factories and unregistered workshops (other than household industry). A limitation of these tables is that data are not presented separately for registered factories and unregistered workshops but relate to the combined figures of the two types of establishments.

37.2 The high incidence of use of manual power, revealed by the figures given in the following statement, indicates that the traditional manufacturing practices continue to hold the sway despite the strides made by the modern industrial sector:

STATEMENT III.34

Distribution of 1,000 *Establishments by type of fuel or power used*

Type of fuel or power used	No. of units
Total	1,000
I. All fuels/Power	462
(*a*) Electricity	307
(*b*) Liquid Fuel	46
(*c*) Coal, Wood & Bagasse	103
(*d*) Other Power	6
II. Manual	538

37.3 Another important revelation of these figures is that of all the units using some kind of fuel/power, an overwhelming majority is accounted for by those which are operated on electricity. In fact, easy and cheap supply of electricity in the State has in an abundant measure made it possible not only to expand the small industry sector but also to modernize and rationalize the existing units. After all, most of the modern industrial machinery is operated on electricity. As is commonly known, easy availability of electricity is one of the most important contributory factors for industrialization. The increase in the generation of power during the last two decades, which has been quite phenomenal in the Punjab State, has made it possible to replace the traditional fuels/power like liquid fuel and animal power by electricity in the case of many industrial types. This change has in turn made it possible to produce various articles on a relatively large scale and economically too.

37.4 It will be seen from the statement given above that the only other fuels used in somewhat significant proportion of units are coal, wood and bagasse. The use of water as fuel/power is virtually extinct, except a small number of atta chakis run on water. This explains why just 4.6 per cent of the total number of registered factories and unregistered workshops in the State are returned as being run on liquid fuel. Besides water, liquid fuels include kerosene, petrol, diesel etc. Similarly units run on other power, such as animal power, constitute an insignificant fraction of the total number of units.

37.5 A reference to table E-II Part B will show that there is a positive correlation between the size of a unit and the use of fuel/power. Larger sized units are by and large run on electricity and smaller sized units by manual power. Of the 10 units employing 300—499 persons each, 6 are operated on electricity. Similarly, 137 of the 216 units returned under the employment category 100-299 persons are run on electricity. As regards employment category 500 + persons, all of the 25 units returned under it are shown as run on electricity. At this stage, it will be useful to sketch the use of fuels/power in different type of industries. This has been done in the paragraphs to follow.

Electricity :

37.6 Some of the important industries which reflect a highly intense use of electricity include those which are represented by major group 24-manufacture of wool, silk and synthetic fibre textiles, major group 28 manufacture of paper and paper products and printing etc., major group 30-manufacture of rubber, plastic, petroleum and coal products, major group 33-basic metal and alloys industries, major group 35-manufacture of machinery, machine tools and parts except electrical machinery, major group 36-manufacture of electrical machinery, apparatus, appliances etc. and major group 37-manufacture of transport equipment and parts. Mention needs to be made particularly of units represented by major groups 24 and 36 which predominantly (more than 80 per cent in the case of both the major groups) run on electricity.

Liquid Fuel :

37.7 Use of liquid fuel is pronounced in the case of industrial units which are engaged in the manufacture of food products (major group 20-21), Units using liquid fuel constitute 19.4 per cent of the total number of units returned under the major group. Though the use of liquid fuel is reflected also in the case of major groups 23, 25, 26,

27, 28, 30, 31, 32, 33, 34, 35, 37, 38 and 39, such units represent insignificant proportions of the total number of units returned under these major groups.

Coal, Wood and Bagasse:

37.8 A reference to subsidiary table E-II Part B.1 shows the highest incidence of use of fuels like coal, wood and bagasse in the case of industries engaged in the manufacture of non-metallic mineral products (major group 32). Units using these fuels constitute as high as 59.4 per cent of the total number of units returned under the major group. Some of the other major groups which represent fairly high proportions of units using such fuels include major group 20-21 (24.1 per cent). major group 31 (25.2 per cent), major group 33 (40.2 per cent), major group 34 (14.5 per cent) and major group 38 (22.6 per cent).

Other Power:

37.9 According to the main table E-II Part B, the total number of industrial units, other than those classifiable as household industry in the State, which are run on 'other power' like animal power, is 444. Of this number, 319 units are accounted for by major group 20-21 and 63 units by major group 34. However, as will be seen from subsidiary table E-II Part B1, the incidence of use of 'other power' relative to other fuels/power is highest, among all the major groups, in the case of major group 22.

Manual:

37.10 Of the 37,068 units or 53.8 per cent of the total number of units, large majority is accounted for by major groups 25, 26, 27, 29 and 39. In all these cases, manually-run units constitute more than 80 per cent of the units falling under each major group. It will be noted that 93.5 per cent of the units in the case of major group 25 are operated with manual power. However, the total number of units returned under the major group is 153. On the other hand, 2,666 units out of 2,712 units (98.3 per cent) returned under major group 29 are run manually. Mention may also be made of major groups 22, 31, 34 and 38 which represent fairly high proportions of such units which are run manually.

Rural-Urban differentials in the use of fuel/power:

37.11 The following statement, giving the proportions of industrial units, other than household industry, using different types of fuels/power and those run manually, separately for rural and urban areas, amply brings out the rural urban differentials in the use of various fuels/power:

STATEMENT III.35

Distribution of 1,000 Establishments by type of fuel or power used in rural and urban areas separately

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	452	468
(a) Electricity	232	349
(b) Liquid Fuel	122	4
(c) Coal, Wood & Bagasse ..	85	112
(d) Other Power	13	3
II. Manual	548	532

37.12 The higher incidence of units run on liquid fuel in rural areas compared to the urban areas is ascribable to the former accounting for a large majority of units returned under major group 20-21 manufacture of food products. As has been stated earlier, the use of liquid fuel is most pronounced in the case of food manufacturing units. On the other hand, because of the easier availability of electricity in urban areas than rural areas, its consumption is more conspicuous in the former areas than the latter.

37.13 Fuels like coal, wood and bagasse reflect higher relative incidence in urban areas than rural areas essentially because such fuels are returned as used in 45.6 per cent of the units manufacturing food products (major group 20-21) in the case of the former areas as against the corresponding rural proportion returned at just 7.9 per cent. Normally the significant difference between the two should have shown up in the figures given in the statement above but the gap gets closer because of the higher incidence of use of such fuels in the rural than urban areas in the case of units returned under major groups 32 and 39.

37.14 As regards the incidence of use of manual power it will be seen that the proportions of units run manually are almost identical both in rural and urban areas. It has been stated earlier that the major groups accounting for a large majority of manually operated units include major groups 25, 26, 27, 29 and 39. Besides, these major groups, major groups 22, 31, 34 and 38 also make sizeable contribution both in rural and urban areas. What is pertinent to note is that the number of manually run units under major groups 35 and 38 is much higher in the urban areas than the rural areas. However, a reference to subsidiary table E-II Part B.1 throws some further light on the incidence of manually-run units relative to units run on other fuels/power. The difference is particularly conspicuous in the case of units returned under major group 39. As against a rural proportion of

90.3 per cent, returned under the major group, the urban proportion standing at 79.1 per cent is far lower. In the case of major groups 26 and 27 also, which represent sizable number of units operated manually both in rural and urban areas, rural proportions exceed the urban proportions significantly. The proportions under major group 26 have been returned at 94.8 per cent and 83.9 per cent for rural and urban areas respectively and the corresponding proportions under major group 27 at 89.4 per cent and 72.0 per cent. As regards major group 29, practically all the units under it are run manually both in rural and urban areas. However, the urban proportion of manually-run units returned at 61.9 per cent exceeds the corresponding rural proportion returned at 26.9 per cent in the case of major group 32.

37.15 As the statement given above amply bears out, the use of liquid fuel is rather rare in the case of urban areas of the Punjab. The only major groups, which represent 1 or more than 1 per cent of the total number of units under any major group run on liquid fuel, are major groups 20-21 and 33. In the case of all other urban industrial types, liquid fuel is either not at all used or used in less than 1 per cent of the units. On the other hand, in the rural areas, one third of the units under major group 20-21 are run on liquid fuel. Other major groups, which represent more than 10 per cent of the units run on liquid fuel in the rural areas, include major groups 23 and 33.

37.16 Importantly the incidence of use of electricity is fairly high in the case of units returned under major group 20-21 both in rural and urban areas, the two proportions standing at 52.5 per cent and 42.2 per cent respectively. The rural urban differentials in the case of electricity are, however, significantly marked in the case of major groups 23, 24, 34, 35 and 37, the urban proportions exceeding the rural proportions conspicuously. It needs to be pointed out that industries represented by major groups 25, 26, 27, 29, 32 and 38 have not yet taken to use of electricity on a large scale either in rural areas or urban areas.

Use of fuels and size of employment:

37.17 A reference to subsidiary table E-II Part B.1 shows that while a large majority of manually run units and those run with animal power are 1-person units, the largest single category of units in the case of other fuels/power is of those which employ on an average more than 2 persons but less than 5 persons.

37.18 Main table E-II Part B shows that of the 206 units returned under the employment category 100-299 persons, 137 units are operated on electricity and 67 units on coal, wood and bagasse. These are reflected mainly under major groups 20-21, 23, 24, 26, 32 and 34 to 37. The same major groups account for a large majority of the units returned under employment categories 300-499 persons and 500 + persons. It will also be noticed that urban areas account for many more large sized units than rural areas. These are mostly operated on electricity. Of the 6 factories returned under the employment category 300-499 persons and 25 factories under employment category 500 and more persons, 3 and 16 units respectively are accounted for by those run on electricity in the urban areas of the State.

GURDASPUR DISTRICT

38.1 A glance at the following statement, giving distribution of the combined figures of registered factories and unregistered workshops by use of fuels/power, shows that the only fuels/power which are used, in practically all such units, are electricity and coal, wood and bagasse. The use of liquid fuel and other power is somewhat rare.

STATEMENT III.36

Distribution of 1,000 *Establishments by type of fuel or power used*

Type of fuel or power used	No. of Units
Total	1,000
I. All Fuels/Power	510
(*a*) Electricity	326
(*b*) Liquid Fuel	11
(*c*) Coal, Wood & Bagasse	153
(*d*) Other Power	20
II. Manual	490

38.2 As is evident from these figures, the use of manual power continues to be predominant. However, the fact that almost one-third of the units have taken to electricity not only indicates the progress made in the field of modern industry in the district but also the increase in the capital input in the wake of easy availability of electricity. As a reference to main table E-II Part B shows, a majority of large sized units are operated on electricity. Naturally, it is more economical to run a large sized unit on electricity than a small sized unit. Of the 53 units, employing on an average 50 and more persons, as many as 29 are run on electricity. The two units employing in aggregate 2,702 persons are also operated on electricity. Even in the case of medium sized units, those employing on an average 20 or more persons but less than 50 persons, 76 of the 98 units returned under the employment category are electrically operated.

38.3 It will be noted that 859 units or 15.3 per cent of the total number of units using fuels like coal, wood and bagasse employ as many as 3,842 persons as against 2,755 units or 49 per cent of the total number of units run manually employ in aggregate just 4,952 persons. The former bear a much higher incidence of employment than the latter. This is because as many as 24 units using fuels like coal, wood and bagasse are returned under the employment categories 50 and more persons. These provide an aggregate employment of 1,885 persons. On the other hand, there is no manually-run unit which provides employment to 50 or more persons. Even in the case of employment category 20-49 persons, the number of units constitutes a much smaller proportion in respect of total number of manually-run units compared to the corresponding proportion of units returned under the employment category in respect of units run on fuels like coal, wood and bagasse.

38.4 Not only the number of units run on liquid fuel and other power is very small but also their contribution to total employment is almost negligible. The respective figures relating to such fuels have been returned at 63 and 114 in respect of number of units and 133 and 169 in respect of their contribution to the total employment. Looking at the use of fuels/ power in various types of registered factories and unregistered workshops, the following picture emerges:—

Electricity :

38.5 Among industrial types which reflect a very high incidence of use of electricity, mention may be made of those represented by major group 24 (all the units), major group 28 (73.7 per cent of the units), major group 35 (89.9 per cent of the units) and major group 36 (68.4 per cent of the units). Major groups which belong to the medium category, i.e., those which have 40 to 60 per cent of the units run on electricity include major groups 20-21, 25, 30, 33 and 37. The conspicuously low incidence of use of electricity is noticeable particularly in the case of major groups 26, 29, 31, 32 38 and 39.

38.6 Looking at table E-II Part, B, it will be seen that the highest incidence of employment in the case of units run on electricity is reflected under major group 24. This is accountable to 4 such units, returned under the major group, which provide aggregate employment of as many as 2,491 persons. Despite the highest average number of persons employed in electrically operated units, obtaining in the case of major group 24, it may be pointed out that the highest aggregate employment in the case of electrically operated units obtains in the case of major group 35. 542 units run on electricity returned under the major group employ in all as many as 5,103 persons. Mention may also be made of units run on electricity in the case of major groups 20-21 and 34 which provide substantial employment.

Liquid Fuel:

38.7 As has already been stated, use of liquid fuel is very rare in the case of registered factories and unregistered workshops, other than household industry, located in the district. Whatever small number of units run on liquid fuel is returned in the district, it is practically all accounted for by major group 20-21. Of the total number of such units standing at 63, as many as 61 are reflected under major group 20-21. As a reference to table E-II Part B will show, the incidence of employment in such units is very low.

Coal, Wood and Bagasse:

38.8 Next in importance to electricity, among all fuels/power used in the district, are coal, wood and bagasse. A glance at the figures given in subsidiary table E-II Part B.1 reveals that in the case of units using such fuels, highest incidence obtains under major group 32. Such units constitute as high as 74 per cent of the total number of units returned under the major group. However, out of 65 units returned under major group, 48 are run on coal, wood and bagasse. On the other hand, as a reference to table E-II Part B will show, the number of units using such fuels in the case of major group 20-21 stands at 460 but these units constitute just 31.7 per cent of the units returned under the major group. Of the remaining units using coal, wood and bagasse, as many as 247 are distributed between major groups 34 and 38.

The only important observation about the employment provided in units using coal, wood and bagasse is that of 3,842 persons employed in such units, 48 units returned under major group 32, account for as many as 2,367 persons. A large majority of these employ on an average 20 or more persons.

Other Power:

38.9 Like liquid fuel, 'other power' is also returned as used in a very small number of units, the number standing at 114. These employ 169 persons. Again, as in the case of liquid fuel, the use of other power is restricted to manufacturing activities represented by major group 20-21.

Manual:

38.10 A glimpse into the figures given in table E-II Part B.1 shows that not only about half of the total number of registered factories and unregistered workshops, other than household industry, in the

district are run manually but also use of manual power is very common in almost all types of such manufacturing activities. However, there are manufacturing activities such as those represented by major groups 26, 29 and 39 where practically all the units are run manually and also those represented by major groups 20-21, 24, 33 and 35 where either manual power is not used at all or such units constitute very small proportions of the total number of units returned under the major groups. The highest number of manually run units standing at 946 is claimed by major group 39. Major groups 26, 27 and 34 also make sizeable contribution to the total number of such units.

38.11 The low incidence of employment in the case of manually run units in the district becomes apparent when notice is taken of the fact that though such units constitute about half of the total number of units returned in the district, these account for even less than one-fourth of the total number of persons employed in all the units.

Rural-Urban differentials :

38.12 The number of registered factories and unregistered workshops (other than household industry) has been returned at 1,811 and 3,809 for rural and urban areas respectively. The differences in the distribution of these figures in terms of proportions by use of fuel/power will be seen in the following statement:—

STATEMENT III.37

Distribution of 1,000 Establishments by type of fuel or power used in rural and urban areas separately

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	568	482
(*a*) Electricity	308	334
(*b*) Liquid Fuel	31	2
(*c*) Coal, Wood & Bagasse	174	142
(*d*) Other Power	55	4
II. Manual	432	518

38.13 Obviously, the differences are not very significant. However, the differences become significant at the level of major groups. Taking the case of units run on electricity, it will be seen that while such units constitute 63.8 per cent of the total number of units in rural areas under major group 20-21, the corresponding proportion in the urban areas standing at 33.4 per cent is much smaller. On the other hand, the proportion of units run on coal, wood and bagasse under the major group standing at 52. 4 per cent in the urban areas is considerably higher than the corresponding rural proportion returned at 13.3 per cent. This establishes an important point, viz., food manufacturing units are generally run on electricity in rural areas and on fuels like coal, wood and bagasse in urban areas. Similarly, it will be seen that while liquid fuel and other power is used much more commonly in rural areas than urban areas in the case of units returned under major group 20-21, the incidence of use of manual power is much higher in the case of the latter than the former.

38.14 Another major group which reveals significant difference between the rural and urban proportions of units run on electricity is major group 35. While in the case of latter, more than 90 per cent of the units are run on electricity, the former accounts for even less than half of such units under the major group.

38.15 In the case of units run on coal, wood and bagasse significant differences between the rural and urban proportions are seen in the case of major groups 32 and 34 also. Both the major groups account for higher proportions of units in rural areas than urban areas. Under major group 32 particularly the rural proportion of such units is as high as 81.5 per cent as against the urban proportion returned at 36.4 per cent.

38.16 As regards use of manual power, among the major groups which make sizeable contributions to the total number of manually run units, the only major group which reflects significant differences between the rural and urban proportion of such units is major group 35, the proportions returned at 47.8 and 7.9 per cent respectively.

38.17 A reference to main table E-II Part B shows that of the two units returned under the employment category 500 persons and above one unit employing 802 persons is accounted for by rural areas and the other unit employing 1,900 persons by urban areas. The other large sized units, each employing 50 or more persons, are almost equally distributed between the rural and urban areas. However, the urban units provide a much bigger aggregate employment (16,340 persons) than the rural areas (6,382 persons).

AMRITSAR DISTRICT

39.1 The pattern of distribution of registered factories and unregistered workshops (other than household industry) in Amritsar district obtaining from the following statement giving the distribution of such units by use of fuels/power is not much different from that of Gurdaspur district. However, the incidence of use of electricity is higher in case of the former than the latter.

STATEMENT III.38

Distribution of 1,000 *Establishments by type of fuel or power used*

Type of fuel or power used	No. of units
Total	1,000
I. All Fuels/Power	548
(*a*) Electricity	410
(*b*) Liquid Fuel	14
(*c*) Coal, Wood and Bagasse	117
(*d*) Other Power	7
II. Manual	452

39.2 The fact that 86.2 per cent of the units are either run on electricity or manually is an important reflection on the survival of the traditional crafts while the industry in the district is getting fast modernized with the aid of electric power.

39.3 As has been stated earlier in the case of Gurdaspur district, the use of liquid fuel and other power in the type of industrial units under discussion is a decaying phenomenon in Amritsar district also. Though fuels like coal, wood and bagasse are returned as used in just 11.7 per cent of the units, they command importance next only to electricity.

39.4 Regarding employment provided in registered factories and unregistered workshops, figures given in table E-II Part B make interesting revelations. It will be seen that 41 per cent of the units run on electricity employ as many as 30,292 persons or about 65 per cent of the total number of persons employed. On the other hand, 45.2 per cent of the units run manually account for just 10,357 persons or even less than one-fourth of the total number of persons employed. It may also be pointed out that the units run on coal, wood and bagasse contribute as many as 5,061 persons to the total number of persons employed. The combined contribution of all other units is even less than 1,000 persons.

39.5 The high incidence of employment obtaining in the case of units operated on electricity is accountable to the fact that of the larger sized units, a majority is run on electric power. As a reference to table E-II Part B will show, of the 39 units employing on an average 100 or more persons, as many as 30 are run on electricity. Practically, all the remaining units returned under this employment category are using fuels like coal, wood and bagasse. Even in the case of employment categories 50-99 persons, 20-49 persons, 10-19 persons and 5-9 persons, a large majority of units is accounted for by those run on electricity. The lower employment categories, however, correspond to higher incidence of use of manual power. In the case of manually run units, the highest number of persons employed in a unit is just 50 and there is only one such unit returned in the entire district. The following few paragraphs deal with the relative incidence of use of fuels/power in different types of registered factories and unregistered workshops, returned in the district.

Electricity :

39.6 A peep into the figures given in table E-II Part B.1 shows that use of electricity is most conspicuous in the case of units represented by major group 24. As high as 86.1 per cent of the units under the major group are run on electricity. Among the remaining major groups, those which reflect a very high incidence of electricity, mention may be made of major groups 20-21, 23, 28, 30, 33, 35 and 36. To be more precise, the proportions in the total number of units run on electricity returned under each of these major groups are 56.7 per cent, 71.1 per cent, 61.6 per cent, 70.8 per cent, 60.7 per cent, 72.4 per cent and 76.3 per cent respectively. The type of industrial units where use of electricity is still at a low ebb include those which are represented by major groups 26, 27, 29, 31, 32, 34, 38 and 39. Most of the operations in these units are manual. These are the traditional activities which have withstood the forces of modern technology applied to industrial production. What is really interesting to note is that even in respect of these major groups, among all the fuels/power used, the use of electricity is striking in a large majority of cases.

39.7 As regards, employment provided in different types of electrically operated units, what strikes most from a glance at the figures given in table E-II Part B is the high incidence of employment in the case of units returned under major groups 23 and 24. These employ 7,083 and 7,351 persons respectively. Though in aggregate, electrically operated units returned under the two major groups constitute even less than one-fourth of the total number of units run on electricity, these account for about half of the total number of persons employed in all such units. A contrast can be observed in the case of major group 20-21 where as many as 1,256 units employ just 4,677 persons. It will also be seen from the table referred to above that the electrically-run units in the case of major groups 26, 27, 28, 31, 33, 34, 35 and 39 also make sizeable contributions to the total number of persons employed in all the units run on electricity. Another interesting revelation of the data is that all the 4 units employing on an average of 500 or more persons each are accounted for by major group 24.

Liquid Fuel :

39.8 Of the 139 registered factories and unregistered workshops run on liquid fuel in the entire district, major group 20-21 accounts for as many as

122 units. Most of the remaining units are claimed by major groups 38 and 39.

39.9 The aggregate number of persons employed in units run on liquid fuel stands at 311. Of these 254 are accounted for by units returned under major group 20-21. The largest sized unit run on liquid fuel is the one returned under major group 20-21, employing as many as 22 persons.

Coal, Wood and Bagasse:

39.10 Though major group 20-21 accounts for 629 units of the total number of 1,156 units using such fuels returned in the district, subsidiary table E-II Part B.1 reveals the highest incidence of use of such fuels in the case of major group 32. Units using these fuels constitute 61.2 per cent of the total number of units returned under the major group. However, their total number is just 30. On the other hand the number of such units, under major group 34 is as high as 159 but these constitute just 21 per cent of the total number of units returned under the major group.

39.11 The total employment provided in units using fuels like coal, wood and bagasse is of the order of 5,061 persons. A large majority of this number is accounted for by major groups 20-21 and 32. However, it is interesting to note that while 629 units in the case of major group 20-21 employ in all 1,504 persons, 30 such units provide a substantial aggregate employment of the order of 1,738 persons in the case of major group 32. Mention may also be made of units using fuels like coal, wood and bagasse in the case of major groups 23, 31, 34 and 38 which make sizeable contributions to the total number of persons employed in all such units returned in the district. Of the 8 such units employing 100 or more persons each, 7 are reflected under major group 32.

Other Power:

39.12 Other power is used only in 74 units. Of this number, 44 are accounted for by major group 20-21 and 14 by major group 23. Though the number of units run on 'other power' is small, these employ all told 636 persons. The highest incidence of employment obtains in the case of major group 31. One such unit returned under the major group employs as many as 155 persons. High incidence of employment is seen also in the case of units run on other power under major group 23. The total employment provided in 14 units returned under the major group is 353 persons.

Manual:

39.13 Even a quick glance at table E-II Part B shows that both in terms of number of units and number of persons employed, the contribution of major groups 26, 38 and 39 is outstanding. The three major groups account for 2,695 units and 5,717 persons employed in aggregate.

39.14 Now, looking at the figures given in subsidiary table E-II Part B.1 it will be seen that in the case of major group 29, 95.5 per cent of the units returned under it are run manually. The corresponding proportions are 82.5 per cent in the case of major group 38, 77.3 per cent under major group 39, 60.7 per cent under major group 37, 66.5 per cent under major group 27, and 77.1 per cent under major group 26. It will also be seen that manually-run units constitute even less than 10 per cent of the units of the total number of units returned under major groups 20-21 and 33. In the case of major group 24, the proportion stands at 11.7 per cent.

Rural-Urban differentials:

39.15 Taking all the registered factories and unregistered workshops (other than household industry), it will be seen from the following statement that their pattern of distribution by use of fuel is almost identical in rural and urban areas:—

STATEMENT III.39

Distribution of 1,000 Establishments by type of fuel or power used in rural and urban areas separately

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	588	534
(a) Electricity	419	407
(b) Liquid Fuel	49	2
(c) Coal, Wood & Bagasse	103	121
(d) Other Power	17	4
II. Manual	412	466

39.16 Though there are not any material differences between the rural and urban proportions yet it is interesting to discover that the use of electricity is more pronounced in the case of rural areas than the urban areas. This is accountable mostly to the higher rural incidence of use of electricity in the case of units returned in rural areas than urban areas under major group 20-21, such units constitute 74.6 per cent of the total units in the case of the former areas as against 37.7 per cent of the latter. Higher incidence of use of electricity in rural areas is noticeable also in the case of major groups 24, 28 and 37, but in all other major groups, the urban proportions exceed the rural ones. It may also be mentioned that the number of units run on

electricity in rural and urban areas stand at 1,044 and 3,022 respectively. Of the latter number, 2,602 are accounted for by Amritsar city. Naturally, the units located in Amritsar city employ a large majority (19,261 persons) of the total number of persons employed in all the electrically-operated units returned in the district. The rural units provide an aggregate employment of 3,792 persons. It will also be noted that 10 units out of the total number of large-sized units, those which employ on an average 100 or more persons, are located in Amritsar city and 16 units in the remaining urban areas of the district. The latter number includes 3 units employing on an average 500 or more persons, employing in aggregate 2,487 persons. The major contribution to the total number of persons employed in electrically-operated units in the urban areas is made by such units returned under major groups 23 (6,724 persons), 24 (7,183 persons) 35 (2,450 persons), 20-21 (2,672 persons), 26 (1,456 persons) and 34 (1,006 persons). As regards rural areas, as many as 2,005 persons out of 3,792 persons, employed in all the electrically-operated units, are accounted for by major group 20-21.

39.17 A reference to subsidiary table E-II Part B.1 shows that fuels like coal, wood and bagasse are used in a high proportion of units only under major groups 20-21 and 31 in the urban areas. On the other hand, these major groups reflect a very low incidence of such fuels in the rural areas of the district. The rural areas reflect the use of such fuels mostly under major group 32 and 33. In the case of major group 32 particularly, such fuels are returned as used in 89.3 per cent of the units in the rural areas.

39.18 As regards employment provided in such units in rural and urban areas, it will be seen that the total number of aggregate employment standing at 3,245 persons in the case of the latter is far in excess of the corresponding figure in respect of the former standing at 1,816 persons. The main contribution to the employment provided in rural units returned to rural areas have been made by the units returned under major group 32 (1,416 persons including 652 persons employed in 6 units returned under employment category 100-299 persons) and 20-21 (175 persons). As against this, major group 20-21 accounts for as many as 1,329 persons of the total number of persons employed in units using coal, wood and bagasse in the urban areas. A significant number of persons is also employed in such units returned under major groups 23 (512 persons including 100 persons employed in one unit), 31 (452 persons), 32 (322 persons) and 34 (288 persons) in the urban areas.

39.19 It will be seen that of the total number of units using liquid fuel, 123 units are accounted for by rural areas and 16 units by urban areas. While major group 20-21 claims as many as 117 units of the former number, the major group accounts for 5 of the 16 units using liquid fuel in the urban areas. Units using liquid fuel constitute a proportion of 10.3 per cent of the number of units returned under major group 20-21 in the rural areas and 0.4 per cent in the urban areas. As regards employment provided in units using liquid fuel, it will be seen that 235 persons out of 249 persons employed in such units in rural areas are accounted for by major group 20-21.

39.20 1,026 units run manually in rural areas are claimed by mainly major groups 27 (189 units), 34 (133 units) and 39 (455 units). These constitute proportions of 78.4 per cent, 63.9 per cent and 86.5 per cent of the number of units returned under the respective major groups. On the other hand, 3,456 manually-run units returned in urban areas of the district are accounted for by mainly major groups 26 (739 units), 27 (238 units), 34 (222 units), 38 (568 units) and 39 (829 units). These constitute proportions of 76.7 per cent, 59.4 per cent, 40.8 per cent, 84.8 per cent and 73.0 per cent of the number of units returned under the respective major groups. It will be seen that manually-run units employ in aggregate just 1,504 persons in rural areas as against 8,853 persons in urban areas. Of the latter number, 2,017 persons are employed in manually-run units returned under major group 26, 871 persons under major group 23, 512 persons under major group 27, 449 persons under major group 34, 1,237 persons under major group 38 and 1,658 persons under major group 39. The main contribution to the total number of persons employed in manually-run units in the rural areas include such units returned under major group 27 (264 persons), 34 (185 persons) and 39 (618 persons).

39.21 It will also be noted that of 32 units using other power and employing in all 559 persons in the urban areas, major group 23 accounts for 14 units employing all told 353 persons. One unit using other power and employing 155 persons is claimed by major group 31 in the urban areas. In the rural areas, of the 42 units using other power and employing 77 persons, as many as 40 units employing 72 persons are claimed by major group 20-21.

FIROZPUR DISTRICT

40.1 Looking into the broad facts about the distribution of the number of units and the employment provided in such units in Firozpur district, it will be seen from table E-II Part B that 1,812 units run on electricity employ in all 10,256 persons. In the case of units using liquid fuel, 818 units employ altogether 1,931 persons. On the other hand, in the case of units using fuels like coal, wood and bagasse, 527 units employ in aggregate as many as 5,104

persons. In the case of 2,691 units run manually 4,738 persons are employed. The idea in giving these figures is to focus attention on relative incidence of employment in industrial units using different types of fuel. It will be seen that the incidence of employment per unit is highest in the case of units using fuels like coal, wood and bagasse. The contrast is provided by units using liquid fuel as also those run manually.

40.2 A clear picture of distribution of units by use of fuel/power emerges from the following statement:—

STATEMENT III.40

Distribution of 1,000 *Establishments by type of fuel or power used*

Type of fuel or power used	No. of units
Total	1,000
I. All Fuels/Power	546
(*a*) Electricity	306
(*b*) Liquid Fuel	138
(*c*) Coal, Wood and Bagasse	89
(*d*) Other Power	13
II. Manual	454

40.3 In the case of units using fuels like coal, wood and bagasse, 8.9 per cent of the units account for as high as about one-fourth of the total number of persons employed. As against this 13.8 per cent of units returned as using liquid fuel contribute even less than 9 per cent persons to the total number of persons employed. It will also be noted that the use of electricity in the district is not as highly conspicuous as in the case of Gurdaspur and Amritsar districts. On the other hand, liquid fuel is used in a much higher proportion of units in Firozpur district than in these two districts.

40.4 The largest unit in the district, employing 616 persons, is run on electricity. Of the remaining 28 large-sized units, returned under the employment category 100—299 persons, 17 are run on electricity and 11 are using fuel like coal, wood and bagasse. The relative position of employment provided in units using different types of fuels under various major groups is discussed below.

Electricity :

40.5 It will be interested to note from table E-II Part B and subsidiary table E-II Part B.1 that the number of units in the case of major groups like 28, 33 and 36, which reflect high incidence of use of electricity, is so small that such units form almost a fraction of the total number of electrically-operated units. On the other hand, such units constitute just 41.6 per cent of the total number of units in the case of major group 20-21 but these constitute about half of the total number of electrically-operated units, major group 35 is, however, an exception. Not only 66.0 per cent of the units returned under the major group are run on electricity but these also form a substantial proportion of the total number of electrically operated units.

40.6 The highest contribution to the total number of persons employed in units run on electricity is made by the units returned under major group 23. 50 electrically-operated units returned under the major group employ in aggregate as many as 2,791 persons. As against this, 903 such units returned under major group 20-21 provide an aggregate employment of 2,774 persons. This is accountable to a preponderance of small units in the case of the latter and a preponderance of large units in the case of the former. As will be seen, of the 17 units run on electricity, each employing 100 to 299 persons, 14 are accounted for by major group 23. The other large sized unit employing 616 persons, is claimed by major group 39.

Liquid Fuel:

40.7 Of the 818 units using liquid fuel, 794 are accounted for by major group 20-21. Similarly, of the total number of persons employed in units using liquid fuel, standing at 1,931, as many as 1,855 are employed in such units represented under major group 20-21.

Coal, Wood and Bagasse:

40.8 As in the case of use of electricity, a large majority of units using fuels like coal, wood and bagasse is claimed by major group 20-21 but these constitute just 15.4 per cent of the number of units returned under the major group. On the other hand, such units form 75.3 per cent of the total number of units returned under major group 32 but their number in all is 58. Of the remaining units using coal, wood and bagasse, 42 are claimed by major group 34.

40.9 As regards employment provided in units using coal, wood and bagasse, a substantial portion of the total employment in such units is contributed by major group 32. While 58 such units returned under the major group employ altogether 3,782 persons, only 927 persons are employed in 333 such units returned under major group 20-21. These variations in the incidence of employment can be explained by the average size of such units under the two major groups. In the case of major group 32 as many as 33 out of 58 units employ on an average 50 or more persons as against a large proportion of units returned under employment categories 1 person and 2—4 persons in respect of major group 20-21. The former major group accounts for 10 of the 11 units returned under employment category 100—299 persons.

Other Power:

40.10 While units using 'other power' are claimed mostly by major group 20-21, these bear a very low incidence of employment. 58 such units returned under the major group employ in aggregate a far lesser number of persons (100) than 3 such units returned under major group 23, which employ in all as many as 189 persons.

Manual:

40.11 Out of 2,691 units run manually, major group 39 accounts for as many as 1,183 units. However, in the case of major group 29, 97.6 per cent of units are run on manually or in other words, 123 out of 126 units are run with manual power. Other major groups which reflect high incidence of use of manual power include major groups 25, 26, 27, 34, 37 and 38. In the case of major group 25, all the 38 units returned are run manually but the number of units run manually in respect of major group 27 is as high as 409.

40.12 A glance at the main table E-II Part B shows that the incidence of employment in manually-run units is low in the case of all the major groups. However, the highest contribution to the total employment is made by major group 39 for the obvious reason that the major group claims the highest number of manually-run units.

Rural-Urban differentials:

40.13 Firozpur district typically represents the pattern of use of liquid fuel in rural areas and electricity in urban areas. As will be seen from the following statement, giving the distribution of registered factories and unregistered workshops (other than household industry) in rural and urban areas separately, more than one-fourth of the rural units are run on liquid fuel while 40 per cent of urban units are run on electricity.

STATEMENT III.41

Distribution of 1,000 *Establishments by type of fuel or power used in rural and urban areas separately*

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	558	532
(*a*) Electricity	224	400
(*b*) Liquid Fuel	256	4
(*c*) Coal, Wood and Bagasse ..	59	123
(*d*) Other Power	19	5
II. Manual	442	468

40.14 Next in importance are electricity in rural areas and coal, wood and bagasse in urban areas It is also clear that the incidence of use of 'other power' is higher in rural areas than urban areas but the latter bear a slightly higher incidence of use of manual power than the former. Analysing the data in terms of major groups, it will be seen that the differences in the pattern of use of fuels/power are mainly manifest in the case of units returned under major group 20-21. The proportion of units using liquid fuel returned under the major group are 53.7 per cent and 0.7 per cent in the case of rural and urban areas respectively. Similarly, the proportions of electrically-operated units under the major group are 37.9 per cent and 49.4 per cent for rural and urban areas respectively. The differences are highly pronounced also in the case of units using fuels like coal, wood and bagasse, the rural and urban proportions of such units standing at 2.9 per cent and 41.6 per cent respectively in respect of major group 20-21.

40.15 It will also be seen that the major groups which account for high proportions of units run on electricity in urban areas but a low proportion of such units in the rural areas include major groups 23, 27, 34 and 37. Major group 35 accounts for high proportions of electrically-operated units both in rural and urban areas. As regards difference in the usage of fuels like coal, wood and bagasse, besides major group 20-21, major group 31 also accounts for a significantly higher proportions of units using such fuels in urban areas than in the rural areas. However, major groups 32, 33 and 38 account for much higher proportions of such units in rural areas than in urban areas. 'Other power' is returned as used in a significant proportion of units both in rural and urban areas only in the case of major group 22. The most significant differences between the rural and urban proportions of manually-run units are seen in the case of major groups 23 and 31, the respective rural and urban proportion being 85.5 per cent and 16.1 per cent in the case of major group 23 and 91.7 per cent and 50 per cent respectively in case of major group 31. The significantly higher rural proportions than the urban proportions obtain also in the case of major groups 26, 27, 34 and 37 but reverse position obtains in the case of major groups 32 and 38.

40.16 Regarding the employment provided in registered factories and unregistered workshops other than household industry, it will be seen that while the figures of total employment provided in rural and urban areas are not much different, units using electricity and liquid fuel reveal significant differences in the employment figures between the rural and urban areas. The electrically-operated units provide an aggregate employment of the order of 2,093 persons in rural areas and 8,163 persons in urban areas. On the other hand, units run on liquid fuel employ in all 45 persons in urban areas and 1,886 persons in rural areas. It is also interest-

ing to note that the units using fuels like coal, wood and bagasse employ altogether 1,151 persons in urban areas and 3,953 persons in rural areas. This is despite the fact that the number of units using such fuels in urban areas is almost twice the number returned in rural areas. The employment provided in rural units using liquid fuel is accounted for by mainly those returned under major group 20-21. Similarly, the employment provided in rural units using fuels like coal, wood and bagasse is accounted for by mainly those returned under major group 32. All the 10 rural units, employing on an average 100 to 299 persons and using coal, wood and bagasse are claimed by major group 32. The high contribution of the urban areas to the total employment in the case of electrically-operated units is mainly a reflection of the 14 such units returned under employment category 100-299 persons in the case of major group 23 and 2 units returned under employment categories 100-299 persons and 500 + persons in respect of major group 39. The latter 2 units employ in aggregate as many as 822 persons.

LUDHIANA DISTRICT

41.1 As in the case of Jullundur district, the proportion of units falling under major group 20-21 in the case of Ludhiana district also is not very high. Of the total number of registered factories and unregistered workshops, other than those classifiable as household industry, standing at 11,905, major group 20-21 claims 1,498 units only. The highest number of 2,221 units is claimed by major group 39. A significantly high number of units is also claimed by major group 26 (2,091), 35 (1,113), 37 (1,223 units) and 34 (896 units).

41.2 Looking at the relative incidence of units using different types of fuel/power in the following statement, it will be seen that 90 per cent of the units are either run on electricity or manually.

STATEMENT III.42

Distribution of 1,000 Establishments by type of fuel or power used

Type of fuel or power used	No. of units
Total	1,000
I. All Fuels/Power	478
(a) Electricity	370
(b) Liquid Fuel	23
(c) Coal, Wood and Bagasse	75
(d) Other Power	3
II. Manual	522

41.3 The incidence of use of liquid fuel and other power is low in the case of Ludhiana district also. Even fuels like coal, wood and bagasse are returned as used in a small proportion of units. On the other hand, use of manual power is very common in this district. This is because units returned under major groups 26 and 39, which are mostly run manually constitute in aggregate a significantly high proportion of the total number of units. As a reference to subsidiary table E-II Part B.1 will show, the proportions of manually-run units under major groups 26 and 39 are as high as 75.7 per cent and 83.2 per cent respectively. These proportions contrast sharply with the proportion of manually-run units in the case of major group 20-21, which stands at 10.3 per cent. Among other major groups which claim high proportions of manually-run units, mention may be made of major group 22 (64.3 per cent), 25 (66.7 per cent), 27 (75.1 per cent), 29 (99.2 per cent), 31 (66.5 per cent), 34 (49.4 per cent) and 38 (46.1 per cent).

41.4 Of the 4,512 units run on electricity, the highest number of 829 such units is accounted for by major group 37, followed closely by major group 35 which claims as many as 796 electrically operated units. The electrically operated units constitute 67.8 per cent of the total number of units in the case of major group 37 and 71.5 per cent in the case of major group 35. The third highest number of 753 electrically operated units is claimed by major group 20-21 but these constitute only 50.3 per cent of the number of units returned under the major group. Though the incidence of use of electricity is very high in the case of major groups 23 (52.3 per cent), 24 (86 per cent), 28 (65.4 per cent), 30 (56.1 per cent), 33 (56.9 per cent) and 36 (87.7 per cent), the number of units returned under these major groups is not very high.

41.5 The total number of units using fuels like coal, wood and bagasse has been returned at 870. Of this number, 383 units are accounted for by major group 20-21 and 150 units by major group 38. While such units constitute 25.6 per cent of the total number of units returned under major group 20-21, the corresponding proportion in the case of major group 38 is 48.7 per cent. Coal, wood and bagasse are also returned as used in a high proportion of units in the case of major groups 32 and 33, the proportion standing at 56.5 per cent and 35.1 per cent respectively. As in other districts, liquid fuel is used mainly in the case of units returned under major group 20-21 in Ludhiana district. Of 274 such units, 205 are accounted for by the major group. Of the 32 units using other power, 24 are claimed by major group 34.

41.6 The total number of persons employed in registered factories and unregistered workshops in Ludhiana district stands at 60,883. The electrically operated units account for as many as 39,953 of this

number and 15,413 are accounted for by manually run units.

41.7 The highest number of persons standing at 9,215 are employed in such electrically operated units which are represented by major group 37 and the second highest number of persons employed in electrically operated units, standing at 9,024, is claimed by major group 26. What is, however, interesting to note is that while the number of persons employed in electrically operated units in the case of the two major groups is almost the same, the number of such units in the case of major group 37 is almost twice the number of such units returned under major group 26. The high incidence of employment thus noticeable in the case of electrically operated units returned under major group 26 is accountable to mainly to the aggregate employment of the order of 2,054 persons provided in 3 such units reflected under employment category 500 + persons as also the employment provided in 23 units reflected under the employment category 50-99 persons and 11 units reflected under the employment category 100-299 persons. As against this, there is just one unit returned under each of the employment categories 300-499 persons and 500 + persons and 6 units returned under the employment category 100-299 persons in the case of major group 37. Mention may also be made of 6,955 persons employed in electrically operated units returned under major group 3,53,061 persons in such units returned under major group 20-21 and 2,741 persons employed in units returned under major group 23.

41.8 Units using fuels like coal, wood and bagasse employ in aggregate 4,773 persons. Most of these are employed in units returned under major group 32 (1,773 persons) and major group 20-21 (1,257 persons). Major group 32 also accounts for 4 of the 6 units using such fuels and returned under employment category 100—299 persons.

41.9 Of 15,413 persons employed in manually-run units, 6,645 persons are employed in manually run units returned under major group 26 and 2,933 persons in manually-run units returned under major group 39. The two major groups also claim one each of the two manually -run units returned under employment category 100-299 persons. As regards 659 persons employed in units using liquid fuel and 85 persons employed in units using 'other power', major group 20-21 accounts for 405 persons of the former number and major group 34 accounts for 34 persons of the latter number.

Rural-Urban differentials :

41.10 The following statement giving the distribution of registered factories and unregistered workshops by use of fuel/power for rural and urban areas separately shows that the use of manual power is very common in the rural areas of the district. The difference betwen rural and urban incidence is not only pronounced in the case of manually-run units but also in respect of units run on electricity.

STATEMENT III.43

Distribution of 1,000 *Establishments by type of fuel or power used in rural and urban areas separately*

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. *All Fuels/Power*	361	513
(*a*) Electricity	217	428
(*b*) Liquid Fuel	90	3
(*c*) Coal, Wood and Bagasse	50	80
(*d*) Other Power	4	2
II. Manual	639	487

41.11 A reference to subsidiary table E-II Part B.1 shows that despite the higher overall proportion of electrically operated units returned in urban areas than rural areas, major group 20-21 bears out a higher incidence of such units in rural areas (58.3 per cent) than urban areas (43.5 per cent). The same is true of major group 30, the proportion under the major group standing at 66.7 per cent in respect of rural areas and 55.6 per cent in respect of urban areas. However, urban proportion of electrically operated units exceeds considerably the corresponding rural proportion in the case of major groups 33 (28.6 per cent for rural areas and 60.2 per cent for urban areas), 34 (8.1 per cent for rural areas and 58.8 per cent for urban areas), 35 (39.7 per cent for rural areas and 76.3 per cent for urban areas), 37 (19.1 per cent for rural areas and 69.7 per cent for urban areas), 39 (5.4 per cent for rural areas and 22.3 per cent for urban areas), 23 (22.8 per cent for rural areas and 57.9 per cent for urban areas), 24 (50 per cent for rural areas and 86.9 per cent for urban areas) and 27 (6.4 per cent for rural areas and 33.6 per cent for urban areas).

41.12 As regards units using fuels like coal, wood and bagasse, the main highlight of the rural-urban differences is that such units constitute as high as 80 per cent of the units under major group 32 in the rural areas as against the corresponding urban proportion of 35.6 per cent. However, the urban proportions of such units exceed the corresponding rural proportions considerably not only in the case of major group 20-21 (9 per cent for rural areas and 39.6 per cent for urban areas) but also in the case of major groups 23 (1.1 per cent for rural areas and 14.2 per cent for urban areas), 31 (14.2 per cent for rural areas and 24.6 per cent for urban areas) and 38 (14.3 per cent for rural areas and 55.2 per cent for urban areas).

41.13 Liquid fuel is returned as used in 29.2 per cent of units in rural areas in the case of major group

20-21, 31.5 per cent in respect of major group 23, 14.3 per cent in respect of major group 33 and 4.1 per cent in respect of major group 35. In all other major groups, it is either not returned used at all or is returned as used in a small fraction of units. In the case of urban areas, liquid fuel is returned as used in somewhat a significant proportion of units only in the case of major groups 30 and 31, the proportions standing at 3.2 per cent and 1.4 per cent, respectively.

41.14 Manually-run units constitute 48.7 per cent of the total number of units in the urban areas of the district as against 63.9 per cent of rural areas. Some of the major groups which are conspicuous for their rural-urban differences in the incidence of manually-run units include major groups 27 (90.4 per cent for rural areas and 65.7 per cent for urban areas), 32 (20 per cent for rural and 60 per cent for urban), 34 (85.6 per cent for rural and 32.6 per cent for urban), 35 (55.5 per cent for rural and 21.7 per cent for urban), 37 (80.9 per cent for rural and 27.6 per cent for urban) and 38 (83.7 per cent for rural and 39 per cent for urban). In the case of major groups 26, 29 and 39, both rural and urban areas exhibit a very high incidence of manually-run units.

41.15 Of the 32 units using other power, rural areas account for 10 units. Most of the remaining 22 units returned in the urban areas are accounted for by major group 34.

41.16 The total number of persons employed in rural units is 10,337 as against 50,546 employed in urban units. Of the latter number, 45,011 are employed in units located in Ludhiana city.

41.17 While in rural areas, sizeable employment is provided by mainly units run on electricity in respect of major groups 20-21 (896 persons), 26 (1,929 persons) and 37 (910 persons) and those using fuels like coal, wood and bagasse in respect of major group 32 (1,698 persons), the main contribution to employment in the urban areas is made by units run on electricity in respect of major groups 20-21 (2,165 persons), 23 (2,666 persons), 24 (1,707 persons, 26 (7,095 persons), 33 (907 persons), 34 (2,242 persons), 35 (6,633 persons), 37 (8,305 persons) and by those using fuels like coal, wood and bagasse in respect of major group 20-21 (915 persons). Besides these, manually-run units returned under major group 39 in rural areas (1,188 persons) and major groups 26 (6,597 persons) and 39 (1,745 persons) in urban areas also claim significant proportions of the total number of persons employed.

41.18 The main highlights of the employment provided in the type of industries under discussion in the district are (i) 5 units using fuels like coal, wood and bagasse and returned under employment category 100-299 persons in rural areas, (ii) 3 electrically operated units returned under employment category 500 + persons, employing in aggregate 2,029 persons in rural areas, (iii) one electrically operated unit employing as many as 525 persons in urban areas and (iv) 33 electrically operated units returned under employment category 100-299 persons in the urban areas.

41.19 Major group 26 accounts for 2 of the three largest sized units in rural areas, the third unit being claimed by major group 37. Major group 32 accounts for 4 of the 5 units using fuels like coal, wood and bagasse in the rural areas. In the urban areas, one unit employing 525 persons is claimed by major group 26. Out of 33 electrically operated units returned in urban areas, 3 are claimed by major group 24, 10 by major group 26, 7 by major group 35 and 6 by major group 37. It may also be pointed out that Ludhiana city accounts for 31 electrically operated units returned under employment category 100-299 persons and also claims the unit employing 525 persons.

JULLUNDUR DISTRICT

42.1 A glance at the following statement, giving the distribution of registered factories and unregistered workshops (other than household industry) shows that as high as 88.2 per cent of such units in Jullundur district are either run by electricity or manually.

STATEMENT III.44

Distribution of 1,000 *Establishments by type of fuel or power used*

Type of fuel or power used	No. of units
Total	1,000
I. All Fuels/Power	432
(*a*) Electricity	314
(*b*) Liquid Fuel	20
(*c*) Coal, Wood and Bagasse	96
(*d*) Other Power	2
II. Manual	568

42.2 The position of Jullundur district appears to be conspicuous vis-a-vis most of the other districts of the State for its very low incidence of use of liquid fuel. The low incidence of use of 'other power' is, however, a common feature of a large

majority of the districts of the State. The high incidence of use of manual power can be attributed to the relatively (compared to other districts) lower proportion of units falling under major group 20-21 and a significantly higher proportion of units falling under major groups 26, 27, 34 38 and 39. The activities represented by these major groups are mostly carried on manually. It will be particularly interesting to note that major group 39 accounts for the highest number of units 1,943. Of these, as many as 1,650 are run manually. Though the incidence of use of manual power is very high also in the case of units falling under major groups 22, 23, 25, 29 and 31, these units do not constitute significant proportions of the total number of units in the district.

42.3 As regards use of electricity, the highest number of units operated electrically is accounted for by major group 20-21. Out of 1,789 units returned under the major group, 959 are run on electricity. Other major groups which bear high proportions of units run on electricity include major groups 35 (70.6 per cent), 28 (61.7 per cent), 30 (82 per cent), 34 (44.5 per cent), 36 (83.7 per cent) and 37 (74.3 per cent).

42.4 The use of coal, wood and bagasse is most common in the case of units returned under major group 32. The proportion of such units under the major group stands at 49.6 per cent. However, the highest number of units using these fuels has been contributed by major group 20-21, the figure standing at 519 or 29 per cent of the total number of units returned under the major group. Though the incidence of use of such fuels is high also in the case of some other major groups but the number of units returned under the major groups is rather small. These include major groups 31 (32.3 per cent) and 33 (47.4 per cent). The units using liquid fuel and other power are accounted for by mainly major group 20-21.

42.5 Looking at the data relating to the employment provided in registered factories and unregistered workshops other than household industry in table E-II Part B, it will be seen that of 48,334 persons employed in all such units in Jullundur district, 7,718 are claimed by units represented by major group 34, 7,111 persons by units represented by major group 35, 4,335 persons by units represented by major group 39, 3,468 persons by units represented by major group 38, 4,778 persons by units represented by major group 20-21, 3,796 persons by units represented by major group 37, 2,963 persons by units represented by major group 27, 2,501 persons by units represented by major group 26, 2,464 persons by units represented by major group 32, 1,889 persons by units represented by major group 36, 2,036 persons by units represented by major group 28, 1,666 persons by units represented by major group 30 and 1,404 persons by units represented by major group 29.

42.6 It will also be seen that the electrically-operated units account for as many as 26,189 persons employed. One of the electrically operated units, employing as many as 725 persons, is accounted for by major group 20-21. The total number of persons employed in electrically-operated units under the major group stands at 2,936. However, the main employers in the case of electrically-operated units are those which fall under major group 34 (5,671 persons) and 35 (6,023 persons). Major group 34 also accounts for 7 electrically operated units returned under the employment category 100-299 persons. Mention may also be made of electrically operated units returned under major group 36 which employ 1,826 persons, major group 37 employing 3,052 persons, major group 30 employing all told 1,567 persons and major group 28 employing in all 1,612 persons. The total number of persons employed in units using fuels like coal, wood and bagasse stands at 5,007. Of this number, 2,091 persons are claimed by units returned under major group 32 and 1,234 persons by units returned under major group 20-21. It may also be pointed out that all the 7 such units, reflected under employment category 100-299 persons, are claimed by major group 32.

42.7 The total number of persons employed in units using liquid fuel stands at 496 and of those employed in units using other power at 405. While 355 persons of the former number are accounted for by major group 20-21, 383 persons of the latter number are accounted for by major group 34. Major group 34 also claim one unit employing as many as 376 persons.

42.8 The total employment provided in manually-run units. is of the order of 16,237 persons These are employed mainly in units represented by major group 39 (3,210 persons), major group 38 (2,767 persons), major group 26 (2,297 persons) and major group 27 (2,233 persons).

Rural-Urban differentials :

42.9 It will be seen from the following statement giving the distribution of registered factories and unregistered workshops by use of fuel/power for rural and urban areas separately that there are not any significant differences between the rural and urban proportions. Mention may, however, be made of the higher rural incidence of use of liquid fuel and the higher urban incidence of use of electricity.

STATEMENT III.45

Distribution of 1,000 *Establishments by types of fuel or power used in rural and urban areas separately*

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	427	434
(a) Electricity	273	333
(b) Liquid Fuel	57	3
(c) Coal, Wood and Bagasse	93	97
(d) Other Power	4	1
II. Manual	573	566

42.10 Looking at the differences in the incidence of use of electricity it will be seen from subsidiary table E-II Part B.1 that 65 per cent of the units under major group 20-21 are run on electricity in rural areas as against the corresponding urban proportion of 39.8 per cent. However, the urban proportion of electrically operated units standing at 58.8 per cent in the case of major group 34 exceeds substantially the corresponding rural proportion standing at 9 per cent. Major groups 35, 36 and 37 bear very high proportions of electrically operated units both in rural and urban areas. However, it may be pointed out that the urban proportions exceed the rural proportions in major groups 36 and 37. High proportions of electrically operated units are returned also under major group 28 both in rural and urban areas but the urban proportion falls somewhat short of the rural proportion. The same is true of electrically operated units returned under major group 30.

42.11 As regards units using fuels like coal, wood and bagasse, it will be seen from subsidiary table E-II Part B.1 that units using such fuels constitute high proportions under major group 32 (66.2 per cent) in the case of rural areas and major group 20-21 (49.1 per cent) in respect of urban areas. It will be useful to note that corresponding urban proportion of such units under major group 32 is 23.3 per cent and the corresponding rural proportion of such units under major group 20-21 is 12.4 per cent. Coal, wood and bagasse are also returned as used in about half of the units returned under major group 33 both in rural and urban areas. Mention also needs to be made of such units returned under major group 31. These constitute 35.8 per cent of the number of units returned under the major group in urban areas and 14.8 per cent in rural areas.

42.12 Looking at the relative incidence of units using liquid fuel and other power, it will be seen that such units are practically all accounted for by major group 20-21 in the case of rural areas but not in respect of urban areas. The highest proportion of units using liquid fuel in the urban areas is returned in the case of major group 33 but the number of such units under the major group falls short of the number returned under major group 20-21.

42.13 In the case of manually-run units, most significant rural-urban difference is discernible in respect of units returned under major group 34, the rural and urban proportion of such units under the major group standing at 72.6 per cent and 31.7 per cent respectively. While the urban proportion of such units exceeds the corresponding rural proportion in the case of major group 38, the reverse position obtains in respect of manually-run units returned under major group 39. Major groups 26 and 27 do not bear out any significant differences in the proportions of such units between rural and urban areas though the proportion of such units is very high in both the areas.

42.14 Regarding the incidence of employment provided in rural and urban units, a reference to main table E-II Part B shows that urban units employ as many as 37,545 persons as against the rural units which employ 10,789 persons only. It will also be noted that electrically-operated units account for a much larger share of the total number of persons employed in units returned in urban areas than in rural areas. The number of persons employed in electrically-operated units is 21,306 in urban areas as against the corresponding rural figure standing at 4,883. While a large majority of the persons employed in rural units is accounted for by major groups 20-21 (1,992 persons) and 35 (1,425 persons), major group 34 accounts for the highest number of persons employed in electrically-operated units (5,364 persons) in the urban areas. Other major groups which claim substantial share of the total number of persons employed in electrically-operated units in the urban areas include major groups 35 (4,598 persons), 37 (2,709 persons), 36 (1,325 persons), 30 (1,523 persons) and 28 (1,608 persons).

42.15 Of the total number of persons employed in electrically-operated units in the urban areas of the district, Jullundur city accounts for a major share of 17,597 persons. It also accounts for 19 of the 22 such units returned under employment category 100-299 persons. These large sized units are reflected mainly under major groups 28, 34, 35, 36 and 37. The largest electrically operated unit employing as many as 725 persons located in rural areas of district is accounted for by major group 20-21. Besides this unit there are only 4 electrically-operated units located in the rural areas which on an average employ 100 or more persons.

42.16 The total number of persons employed in units using fuels like coal, wood and bagasse in the rural areas is 2,216. Of this number, 1,559 are accounted for by such units returned under major

group 32. The major group also claims all the 4 such units returned under the employment category 100-299 persons. The number of persons employed in units using fuels like coal, wood and bagasse is areas standing at 2,791 is not very much higher than the corresponding rural number. However, number of such units in urban areas is more than double the corresponding rural number. This shows that, on an average, units using fuels like coal, wood and bagasse employ more persons in the rural areas than urban areas. The highest number of persons employed in such units in the urban areas has been claimed by major group 20-21, the number standing at 1,031. However, all the three such units, returned under employment category 100-299 persons are accounted for by major group 32.

KAPURTHALA DISTRICT

43.1 The total number of registered factories and unregistered workshops, other than household industry, returned in Kapurthala district is 1,790. The following statement gives their distribution in terms of 1,000 units by use of fuel/power: —

STATEMENT III.46

Distribution of 1,000 *Establishments by type of fuel or power used*

Type of Fuel or power used	No. of units
Total	1,000
I. All Fuels Power	568
(a) Electricity	469
(b) Liquid Fuel	22
(c)Coal, Wood & Bagasse	79
(d) Other Power	1
II. Manual	432

43.2 A reference to subsidiary table E-II Part B.1 and main table E-II Part B shows that the electrically-operated units returned under major groups 28, 30, 33 and 36, though constituting more than 80 per cent of the units under the respective major groups, do not form any significant proportion of the total number of electrically-operated units in the district. All the four major groups account for all told 76 electrically operated units out of 821 such units returned in the district. The two major groups which claim a major share of the total number of such units are 20-21 (273 units) and 35 (253 units). These constitute proportions of 67.2 per cent in respect of the former major group and 71.3 per cent in respect of the latter. Another major group which accounts for a high proportion of electrically-operated units under it is major group 37, the proportion standing at 75.9 per cent and the aggregate number of such units at 82.

43.3 In the case of units using fuels like coal, wood and bagasse, the highest incidence (52.2 per cent) is discernible in respect of major group 32. However, the highest number of such units (67) is accounted for by major group 20-21. The total number of units using coal, wood and bagasse in the district is 141. Such units constitute 16.5 per cent of the total number of units returned under major group 20-21 and the total number of such units under major group 32 is as low as 12. The remaining number is distributed mainly between major groups 34 (23 units) and 38 (25 units).

43.4 As in other districts of the State, units using liquid fuel and other power are almost all accounted for by major group 20-21. Of 52 units using liquid fuel and 2 run on other power, major group 20-21 accounts for 45 units and 2 units, respectively.

43.5 As regards use of manual power, more than 80 per cent of the units under major groups 23 (86 per cent), 24 and 25 (100 per cent), 26 (94.3 per cent), 29 (98 per cent) and 39 (82.9 per cent) are run manually. In the case of major group 27, the proportion of such units has been returned at 71.3 per cent. However, of 774 manually-run units returned in the district, major group 39 accounts for the highest number standing at 243. The remaining units are claimed by mainly major groups 26 (100 units), 27 (92 units), 29 (50 units), 34 (47 units) and 35 (94 units).

43.6 The total number of persons employed in registered factories and unregistered workshops (*other than household industry*) stands at 13,186. It is interesting to note from table E-II Part B that of this number, 10,664 persons are employed in units run on electricity and 1,498 in units run manually. Thus, units using all other fuels employ just 1,024 persons. Even out of this number, 901 persons are employed in units using fuels like coal, wood and bagasse.

43.7 Of the number returned as employed in units run on electricity, the main contribution is of units represented under major groups 23 (3,069 persons), 20-21 (1,794 persons), 36 (1,627 persons), 35 (1,587 persons) and 22 (784 persons). It will also be seen that 3 units run on electricity employ in aggregate as many as 4,725 persons. One such unit is claimed by each major groups 20-21, 22 and 23. Of the 7 units returned under the employment category 100 -299 persons, 4 are claimed by major group 36 and one each by major groups 30, 34 and 35.

43.8 It will be noted from main table E-II Part B that of 1,498 persons employed in all manually-run units, 463 persons are employed in manually-run units returned under major group 39.

43.9 The only highlight of employment provided in units using coal, wood and bagasse in the urban

that one unit using such fuels employs as many as 200 persons. The unit is claimed by major group 32 and the total employment provided in units using coal, wood and bagasse under the major group is of the order of 539 persons.

43.10 The number of persons employed in units using liquid fuel stands at 121 out of which 81 persons are accounted for by such units returned under major group 20-21. As regards units run on other power, just 2 persons are employed in such units.

Rural-Urban differentials :

43.11 The number of registered factories and unregistered workshops (other than household industry) stands at 714 and 1,076 in rural and urban areas respectively. Their distribution in terms of 1,000 units by use of fuels/power is as follows:—

STATEMENT III.47

Distribution of 1,000 *Establishments by type of fuel or power used in rural and urban areas separately*

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	472	631
(*a*) Electricity	337	539
(*b*) Liquid Fuel	70	2
(*c*) Coal, Wood & Bagasse	62	90
(*d*) Other Power	3	..
II. Manual	528	369

43.12 As is clear from this statement, rural units bear a high incidence of use of manual power while the urban units bear a high incidence of use of electricity. Another important difference between the rural and urban usage of fuels/power is that liquid fuel and 'other power' are used only in rural areas.

43.13 The number of persons employed in electrically-operated units in urban areas stands at 9,063 as against the corresponding rural number standing at 1,601. Of the latter number, 778 are accounted for by one electrically operated unit returned under major group 22 and 218 by 2 such units returned under major group 36. Mention may also be made of 344 persons employed in 171 electrically-operated units returned under major group 20-21 in the rural areas. The number of persons employed in electrically-operated units returned in urban areas of the district is claimed by mainly those represented under major groups 23 (3,067 persons), 20-21 (1,450 persons), 35 (1,453 persons), 36 (1,396 persons), 37 (524 persons), 34 (409 persons) and 33 (362 persons). It may also be pointed out that out of two electrically-operated units employing 3,947 persons one is claimed by major group 20-21 (885 persons) and other is claimed by major group 23 (3,062 person). Of 5 such units returned under the employment category 100-299 persons in the urban areas, one employing 200 persons is claimed by major group 34, 2 employing in aggregate 404 persons by major group 36, one employing 102 persons by major group 30 and one employing 100 persons by major group 35.

43.14 The total number of units using fuels like coal, wood and bagasse returned in rural and urban areas stands at 44 and 97 respectively. Of the former number as many as 23 are accounted for by major group 20-21. However, such units are returned in the highest proportion not under major group 20-21 but under major group 32 in the rural areas. This is because 13 out of the total number of rural units returned under major group 32, 6 use fuels like coal, wood and bagasse. It may also be mentioned that 5 out of the 14 rural units returned under major group 38 use coal, wood and bagasse. As in the case of rural areas, major group 20-21 accounts for a large majority of units using coal, wood and bagasse in the urban areas also. The major group claims 44 units out of 97 such units returned in the urban areas. Of the remaining number, as many as 20 units are claimed by major group 38 and 18 units are claimed by major group 34. However, such units constitute the highest proportion under major group 32 (60 per cent) in the urban areas also although the total number of units returned under the major group in the urban areas is just 6. The corresponding proportion returned under major groups 38 and 34 in the urban areas are 47.6 per cent and 30 per cent respectively.

43.15 It will be seen by making a reference to main table E-II Part B that units using coal, wood and bagasse employ all told 308 persons in rural areas. This number is accounted for by mainly major group 32 (245 persons). In the urban areas, units using coal, wood and bagasse employ in all 593 persons. One such unit employing 200 persons is claimed by major group 32. Substantial employment is also provided by 18 such units, returned under major group 34, employing in all 115 persons and 44 units returned under major group 20-21, employing as many as 106 persons.

43.16 The total number of units using liquid fuel is returned at 50 in the rural areas. These employ in all 96 persons. Out of this number, major group 20-21 accounts for 45 units employing all told 81 persons. In the urban areas, the number of units using liquid fuel has been returned at 2, employing in aggregate 25 persons. Both the units are accounted for by major group 35. Among the major groups which claim significant shares of the total number of units, the incidence of manually-run units is

higher in the urban areas than the rural areas only in respect of major group 20-21. While such units constitute 8.2 per cent of the total number of units under the major group in urban areas, the corresponding rural proportion is as low as 2.4 per cent. The rural urban differences are conspicuous particularly in the cast of major group 27, rural areas bearing a proportion of 82.9 per cent of manually-run units under the major group as against the corresponding urban proportion of 54.7 per cent. In the case of major group 34 also, the differences are conspicuous, the rural and urban proportion standing at 69.8 per cent and 28.3 per cent respectively. Another major group which bears significant difference between the rural and urban proportions standing at 61.2 per cent and 15.6 per cent respectively is major group 35. In all other major groups which bear high incidence of manually-run units in both rural and urban areas, the differences are not very significant. The total number of persons employed in manually-run units in the rural areas is 706. In the urban areas, manually-run units employ 792 persons. The main contribution to this number is made by such units returned under major groups 26 (112 persons), 27 (52 persons), 29 (56 persons), 35 (108 persons), 37 (65 persons) and 39 (232 persons).

HOSHIARPUR DISTRICT

44.1 The total number of registered factories and unregistered workshops (other than household industry) has been returned at 4,883 in Hoshiarpur district. It will be seen from the following statement, giving the distribution of this number in terms of 1,000 units by use of fuels/power, that just 38.9 per cent of the units use some kind of fuel/power and a large majority (61.1 per cent) of those is run manually.

STATEMENT III.48

Distribution of 1,000 *Establishments by type of fuel or power used*

Type of fuel or power used	No. of units
Total	1,000
I. All Fuels/Power	389
(*a*) Electricity	190
(*b*) Liquid Fuel	54
(*c*) Coal, Wood and Bagasse ..	132
(*d*) Other Power	13
II. Manual	611

44.2 Among the units using some kind of fuel/power, those run on electricity constitute the highest proportion followed by those using coal, wood and bagasse. Though 537 units out of the total number of 927 electrically-operated units are accounted for by major group 20-21, these constitute just 40.5 per cent of the total number of units returned under the major group. The second highest number of electrically-operated units standing at 98 has been claimed by major group 39 but such units constitute just 8.2 per cent of the total number of the units returned under the major group. Contrary to this position major groups 28, 30, 33 and 36 which bear very high proportions of electrically-operated units of the total number of units returned under the major groups claim insignificant proportions of the total number of electrically-operated units. In the case of major group 35, while electrically-operated units constitute 32.8 per cent of the total number of units returned under the major group, the number of such units is 40 only. Similarly 83 electrically-operated units returned under major group 27 constitute just 16.3 per cent of the total number of units returned under the major group.

44.3 Out of 646 units using fuels like coal, wood and bagasse 376 units are accounted for by major group 20-21. However, these constitute just 28.4 per cent of the total number of units returned under the major group. Such units constitute the highest proportion of 72.9 per cent under major group 32 and the total number of such units under the major group has been returned at 43. Major groups 34 and 38 claim 101 and 56 such units respectively but these constitute even less than 25 per cent of the units returned under the two major groups.

44.4 The total number of units using liquid fuel has been returned at 264 of which 246 units are accounted for by major group 20-21. Incidentally, this is the only major group which bears a somewhat significant incidence (18.6 per cent) of such units. The major group also accounts for a large majority (57 units) of the total number of units using other power (61).

44.5 As regards use of manual power, it may be pointed that major groups 26, 27, 34 and 39 not only claim a large majority of all such units returned in the district but also the incidence of such units under the major groups is highly pronounced. These constitute 96.8 per cent of the units returned under major group 26, 78.2 per cent under major group 27, 67.1 per cent under major group 34 and 90.4 per cent under major group 39. The highest number of manually-run units (1,077) is claimed by major group 39. The number of such units returned in the case of major groups 26, 27 and 34 stands at 399, 399 and 331 respectively. The total number of manually-run units in the district has been returned at 2,985. It will be seen that manually-run units employ in aggregate 4,971 persons as against 2,993 persons employed in electrically-operated units. This is despite the fact that there are 3 units run on

electricity which are returned under the employment category 100-299 persons while not a single manually-run unit employs 100 or more persons. The employment in the manually-run units is accounted for by mainly major groups 26 (829 persons), 27 (623 persons), 34 (488 persons) and 39 (1,564 persons). As regards persons employed in units run on electricity, the contribution is made by mainly the electrically-operated units returned under major group 27 (305 persons), 31 (285 persons), 39 (244 persons) and 20-21 (1,553 persons). Of the 3 electrically-operated units returned under the employment category 100-299 persons, 2 units are claimed by major group 20-21 and 1 unit by major group 31.

44.6 Units using fuels like coal, wood and bagasse employ in all 2,476 persons. Out of this number, 756 persons are employed in such units returned under major group 20-21 and 1,328 persons in units returned under major group 32. Major group 32 also accounts for 4 such units returned under employment category 100-299 persons.

44.7 Units using liquid fuel under major group 20-21 account for 526 out of 593 persons employed in all such units. Similarly units run with other power under the major group account for 64 out of 70 persons employed in all such units.

Rural-Urban differentials:

44.8 Higher incidence of units using electricity and liquid fuel and lower incidence of units run manually and those using fuels like coal, wood and bagasse in rural areas than the urban areas are the main features of the data, giving the distribution of 1,000 registered factories and unregistered workshops (other than household industry) by use of fuels/power for rural and urban areas separately in the following statement:—

STATEMENT III.49

Distribution of 1,000 Establishments by type of fuel or power used in rural and urban areas separately

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels Power	439	343
(a) Electricity	208	174
(b) Liquid Fuel	111	1
(c) Coal, Wood & Bagasse	96	166
(d) Other Power	24	2
II. Manual	561	657

44.9 In the case of units run on electricity, the higher rural incidence is accounted for by mainly such units returned under major group 20-21. While electrically-operated units constitute 48.2 per cent of the total number of units returned under the major group in the rural areas, the corresponding urban proportion is as low as 26.9 per cent. However, electrically-operated units constitute higher proportions in the urban areas than rural areas mainly in respect of major groups 34, 35 and 39.

44.10 As regards units using fuels like coal, wood and bagasse it will be seen that such units constitute higher proportions in the urban areas than the rural areas in respect of all those major groups which account for a sizeable number of such units. However, it may be pointed out that the rural-urban differences in the incidence of such units is highest in the case of major group 32. While such units constitute 79.6 per cent of the units under major group 32 in the rural areas, not a single such unit has been returned under the major group in the urban areas. In the case of major groups like 20-21, 34, 35 and 38 urban proportions exceed the rural proportions.

44.11 The number of units using liquid fuel has been returned at 3 in the urban areas as against 261 such units returned in the rural areas. Of the latter number, as many as 244 such units are accounted for by major group 20-21. These constitute 28.6 per cent of the units falling under the major group. The major group also claims all the 56 units using other power in rural areas. The number of units using other power in the urban areas has been returned at 5.

44.12 The number of manually-run units has been returned at 1,316 in rural areas and 1,669 in urban areas. While such units are claimed by mainly major groups 26 (338 units), 27 (182 units), 29 (110 units), 34 (97 units), 38 (166 units) and 39 (548 units) in urban areas, rural areas account for such units under mainly major groups 27 (217 units), 34 (234 units) and 39 (529 units).

44.13 As regards employment provided in rural units it is interesting to note that more persons are employed in units using coal, wood and bagasse (1,637 persons) than those run on electricity (1,347 persons). The highest number has, however, been claimed by manually-run units (1,847 persons). In the case of urban areas also the highest number of persons is employed in manually-run units (3,124 persons) but electrically operated units claim a higher number of persons employed (1,646 persons) than those using fuels like coal, wood and bagasse (839 persons).

44.14 It will be seen that a large majority (1,036) of persons employed in electrically-operated units in the rural areas is accounted for by such units returned under major group 20-21. The major group also claims both electrically-operated units returned under the employment category 100-299 persons. As against this, major claimants of the number of persons employed in electrically-operated units in

the urban areas include major groups 20-21 (517 persons) 27 (228 persons) 31 (285 persons) and 39 (185 persons). Just one electrically-operated unit employs 100 or more persons in the urban areas and the unit is claimed by major group 31.

44.15 In the case of units using fuels like coal, wood and bagasse, 1,328 persons of the total number of persons employed in such units are accounted for by the units returned under major group 32 in the rural areas. The major group also accounts for all the four such units, employing 100 or more persons in the rural areas. In urban areas, the highest number of persons employed in units using fuels like coal, wood and bagasse (583 persons) is claimed by units returned under major group 20-21

44.16 The main contributors to the total employment in respect of manually-run units in the rural areas are major groups 27 (275 persons), 34 (307 persons) and 39 (696 persons). The main contributors in the urban areas include major groups 23 (201 persons), 26 (732 persons), 27 (348 persons), 29 (176 persons), 34 (181 persons), 38 (281 persons) and 39 (868 persons).

44.17 As regards employment provided in units using liquid fuel, 516 persons are employed in such units returned under the major group 20-21 in the rural areas. The total number of persons employed in units using liquid fuel in the urban areas is just 11.

ROPAR DISTRICT

45.1 The distribution of 2,344 registered factories and un-registered workshops (other than household industry) in Ropar district, given in terms of 1,000 units in the following statement, shows that incidence of use of electricity in such units in the district is lower than most of other districts of the State. On the other hand, incidence of use of manual power is relatively much higher.

STATEMENT III.50

Distribution of 1,000 Establishments by type of fuel or power used

Type of fuel or power used	No. of units
Total	1,000
I. All Fuels/Power	374
(a) Electricity	198
(b) Liquid Fuel	32
(c) Coal, Wood & Bagasse	142
(d) Other Power	2
II. Manual	626

45.2 A reference to subsidiary table E-II Part B.1 shows that the highest incidence of use of electricity (60 per cent) obtains in the case of major group 33 but the total number of such units returned under the major group is just 3. Among other major groups reflecting high incidence of use of electricity, mention may be made of units returned under major groups 20-21 (43.5 per cent), 23 (40.5 per cent), 28 (52.4 per cent), 35 (49.5 per cent), 36 (50 per cent) and 37 (33.3 per cent). However, looking at the figures given in main table E-II Part B, the highest number of electrically-operated units standing at 217, is returned under major group 20-21. High contribution of such units is also made by major groups 34 (46 units), 35 (50 units) and 39 (58 units).

45.3 Among major groups which bear high incidence of units using fuels like coal, wood and bagasse, mention may be made of units returned under major groups 20-21 (36.7 per cent), 32 (54.1 per cent) and 38 (67.4 per cent). However, it will be interesting to note that 183 units out of 332 units using coal, wood and bagasse returned in the district are accounted for by major group 20-21 and another 64 units by major group 38.

45.4 As in other districts, units using liquid fuel are practically all claimed by major group 20-21 in Ropar district. There are 75 such units in the district and 70 out of the number are accounted for by the major group. Similarly, of 5 units using other power, 2 are claimed by major group 20-21 and 2 by major group 34.

45.5 In the case of manually-run units, major groups like 39 (606 units), 34 (121 units), 29 (116 units), 27 (224 units) and 26 (192 units) which claim in aggregate a bulk of the total number of such units returned in the district also bear a very high incidence of such units under the respective major groups. It is interesting to note that, besides these major groups, all other major groups except major group 20-21 bear a high incidence of manually-run units.

45.6 It will be seen from main table E-II Part B that units run on electricity account for more than half (6,427 persons) of the total number of persons (10,767 persons) employed in all registered factories and unregistered workshops in the district. It is significant to note that 4 units run on electricity, returned under the employment category 500+ persons, employ in aggregate as many as 4,575 persons. This shows that the remaining 460 electrically-operated units returned in the district employ all told 1,852 persons. The large sized 4 units run on electricity are claimed by major groups 20-21 (one unit employing 700 persons), 23 (one unit employing 675 persons), 31 (one unit employing 2,000 persons) and 35 (one unit employing 1,200 persons). Of the aggregate employment provided in electrically-operated units under various major groups, mention need to be made of 1,332 persons employed in such units returned under major group 20-21, 696 persons employed in units returned under

major group 23, 2,205 persons employed in units returned under major group 31 and 1,457 persons employed in units returned under major group 35.

45.7 The number of persons employed in units using fuels like coal, wood and bagasse in the district has been returned at 1,536. These are accounted for by mainly units returned under major groups 32 (957 persons) and 20-21 (374 persons). It may also be pointed out that 3 units using coal, wood and bagasse have been returned under employment category 100-299 persons. All these large units are claimed by major group 32.

45.8 Out of 150 persons employed in units using liquid fuel, 140 are accounted for by such units returned under major group 20-21.

45.9 The manually-run units make a sizeable contribution of 2,648 persons to the total number of persons employed in registered factories and unregistered workshops in Ropar district. These are claimed by mainly such manually-run units which are returned under major groups 24 (384 persons), 26 (358 persons), 27 (358 persons) and 39 (887 persons). The manually-run unit employing 384 persons is claimed by major group 24.

Rural-Urban differentials:

45.10 The distribution of 1,031 registered factories and unregistered workshops (other than household industry) returned in rural areas of the district and 1,313 such units in its urban areas in terms of 1,000 units given in the following statement, reveals significant differences between the rural and urban proportions only in respect of units using fuels like coal, wood and bagasse.

STATEMENT III.51

Distribution of 1,000 *Establishments by type of fuel or power used in rural and urban areas separately*

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	355	388
(*a*) Electricity	180	211
(*b*) Liquid Fuel	71	2
(*c*) Coal, Wood and Bagasse ..	102	173
(*d*) Other Power	2	2
II. Manual	645	612

45.11 A peep into the figures given in subsidiary table E-II Part B.1 shows that the differences between the rural and urban proportions of units using fuels like coal, wood and bagasse are most conspicuous in the case of major group 38, the rural and urban proportions of such units under the major group standing at 16.7 per cent and 74.7 per cent respectively. Similarly, the urban proportion of such units returned under major group 20-21 standing at 58.2 per cent exceeds significantly the corresponding rural proportion standing at 19.9 per cent. However, it will be seen that such units returned under major group 32 bear higher proportion in the rural areas than the urban areas.

45.12 Electrically-operated units are returned in higher proportions under major group 20-21 in the rural areas (47.3 per cent) than urban areas (38.5 per cent). However, under all other major groups which represent significant number of such units, urban proportions exceed the rural proportions considerably. In the case of major group 35 particularly, the rural and urban proportions have been returned at 29.4 per cent and 70 per cent respectively.

45.13 It will be noted that units using liquid fuel constitute 24.6 per cent of the units returned under major group 20-21 in rural areas and 0.5 per cent in the urban areas.

45.14 As regards manually-run units, it will be seen that such units are accounted for by mainly major groups 27 (111 units), 34 (95 units) and 39 (288 units) in rural areas and by major groups 26 (160 units), 27 (113 units), 29 (90 units) and 39 (318 units) in urban areas. A glance at the figures given in subsidiary table E-II Part B.1 shows that in the case of major group 32, such units constitute 20 per cent of the total number of units returned under the major group in the rural areas as against the corresponding urban proportion of 66.7 per cent. However, higher proportion of such units has been returned in the rural areas (56.9 per cent) than the urban areas (28 per cent) in the case of major group 35. Similarly significant differences obtain in the case of major group 38, rural and urban proportion of manually-run units returned at 83.3 per cent and 25.3 per cent respectively.

45.15 Rural areas account for 4,081 persons of the total number of persons employed in registered factories and unregistered workshops (other than household industry) returned in the district as against 6,686 persons employed in such units returned in its urban areas. Of the number of persons employed in the rural units as many as 2,019 persons are claimed by units run on electricity. It will be noted that 2 electrically-operated units employ in aggregate as many as 1,375 persons in the rural areas. One of the two units employing 675 persons falls under major group 23 and the second unit employing 700 persons is claimed by major group 20-21. The total number of persons employed in electrically operated units in respect of major group 20-21 in the rural areas is as high as 1,003. In comparison with the position of employment in electrically-operated units in the rural areas, it will be seen that the highest employment in such units in the urban areas is

provided in respect of major group 31 (2,000 persons). One unit employing 1,200 persons is claimed by major group 35. Significant number of persons is also employed in electrically-operated units returned under major groups 20-21 (329 persons inclusive of 100 persons employed in one unit) and 34 (306 persons inclusive of 150 persons employed in one unit) in the urban areas.

45.16 Units using fuels like coal, wood and bagasse employ in all 968 persons in rural areas. Out of this number, as many as 845 persons are employed in 17 such units returned under major group 32. It may be pointed out that the major group also accounts for 3 units using coal, wood and bagasse which employ in aggregate as many as 350 persons. The units using coal, wood and bagasse employ in all 568 persons in urban areas. This number is accounted for by mainly units returned under major groups 20-21 (292 persons), 32 (112 persons) and 38 (90 persons).

45.17 The number of persons employed in units using liquid fuel in the urban areas is just 4. The same number is employed in units using other power. Of the number of persons employed in such units in rural areas, major group 20-21 accounts for a large majority.

45.18 The manually-run units employ 946 persons in rural areas. The major claimants of this number are major groups 27 (176 persons), 34 (134 persons) and 39 (380 persons). Of 1,702 persons employed in manually-run units returned in the urban areas, 384 persons are employed in one unit claimed by major group 24. Among major groups which bear high incidence of employment in manually-run units in the urban areas, mention may be made of major groups 26 (311 persons), 27 (182 persons), 29 (126 persons) and 39 (507 persons).

PATIALA DISTRICT

46.1 Of the total number of 5,734 registered factories and unregistered workshops returned in Patiala district those run manually constitute a proportion of 57.7 per cent and those run on electricity account for 24.4 per cent of all the units according to the data given in the following statement:—

STATEMENT III.52

Distribution of 1,000 Establishments by type of fuel or power used

Type of fuel or power used	No. of units
Total	1,000
I. All Fuels/Power	423
(a) Electricity	244
(b) Liquid Fuel	43
(c) Coal, Wood and Bagasse	132
(d) Other Power	4
II. Manual	577

46.2 By a look at the data given in Table E-II Part B, it will be observed that as many as 552, out of the total number of 1,397 electrically-operated units, are accounted for by major group 20-21. These constitute 49.7 per cent of the total number of units returned under the major group. Out of the remaining number of electrically-operated units, 102 are claimed by major group 34, 202 by major group 35 and 244 units by major group 39. While the electrically-operated units constitute a proportion of 74.5 per cent under major group 35, the number of such units returned under major groups 34 and 39 form just 18.8 per cent and 14.0 per cent respectively. It will be seen that the electrically-operated units constitute high proportion also under major groups 28 (76.6 per cent), 30 (50 per cent), 33 (48.5 per cent), 36 (75 per cent) and 37 (58.9 per cent). However, all the five major groups account for in all 178 electrically-operated units.

46.3 754 units using fuels like coal, wood and bagasse are represented under mainly major groups 20-21 (283 units), 34 (147 units), 38 (82 units) and 39 (86 units). These constitute proportions of 25.4 per cent, 27.1 per cent, 31.4 per cent and 4.9 per cent under the four major groups respectively.

46.4 It will be seen that units using fuels like coal, wood and bagasse constitute the highest proportion (75.4 per cent) under major group 32 but their number has been returned at just 55. Mention may also be made of 45 such units returned under major group 33, constituting 45.5 per cent of the total number of units returned under the major group.

46.5 Out of 249 units using liquid fuel, 210 are accounted for by major group 20-21 and 14 by major group 39. The former constitute a proportion of 18.9 per cent while the latter constitute a proportion of 0.8 per cent of the units returned under the respective major groups. The 25 units using other power are shared among major groups 20-21 (11 units), 22 (4 units), 34 (8 units), 35 and 39 (1 unit each). Except for major group 22, such units constitute almost fractions of the total number of units returned under the respective major groups. The proportion under major group 22 is returned at 19 per cent.

46.6 It will be seen from table E-II Part B that main contributors to the total number of manually-run units standing at 3,309 are major groups 26 (379 units), 27 (499 units), 29 (247 units), 34 (284 units), 38 (174 units) and 39 (1,395 units). In the case of all these major groups except 34 and 38, manually-run units constitute more than 80 per cent of the total number of units, the proportions in respect of major groups 34 and 38 standing at 52.4 per cent and 66.7 per cent respectively.

46.7 According to data given in table E-II Part B, the highest incidence of employment obtains in the case of units run on electricity. Such units account for 15,865 persons out of 28,834 persons employed in all registered factories and unregistered workshops (other than household industry) in Patiala district. The break-up of this figure, according to the distribution by major groups, shows that the highest number of persons employed in electrically-operated units (4,333) is claimed by such units returned under major group 20-21. It is interesting to note that the employment categories 500 + persons, 300-499 persons, 100-299 persons and 50-99 persons claim 2 such units each under the major group. The total employment provided in these units is 1,371 persons, 775 persons, 206 persons and 115 persons respectively. The second highest number of 2,325 persons in respect of electrically-operated units is employed in such units returned under major group 37. One of the electrically-operated unit claimed by the major group employs as many as 1,500 persons. 3 units employing in aggregate 441 persons are accounted for by the employment category 100-299 persons. Mention may also be made of 1,846 persons employed in electrically operated units returned under major group 23 (including one unit employing 1,632 persons), 1,815 persons employed in such units returned under major group 28 (including one unit employing 1,500 persons), 1,479 persons employed in such units returned under major group 33 (including one unit employing 150 persons), 1,236 persons employed in such units returned under major group 35 (including 3 units returned under employment category 50-99 persons) and 1,154 persons employed in such units returned under major group 36 (including one unit employing 383 persons and 4 units returned under the employment category 100-299 persons).

46.8 Units employing fuels like coal, wood and bagasse employ all told 6,276 persons. Of this number, 2,349 persons are employed in 14 units, each employing 100 or more persons. The highest number of persons employed in units using fuels like coal, wood and bagasse is claimed by such units returned under major group 32. These employ in aggregate 3,043 persons. This number is accounted for by mainly one unit returned under employment category 300-499 persons, employing 300 persons and 12 units returned under employment category 100-299 persons, employing in aggregate 1,949 persons. Other major claimants of the total number of persons employed in the case of units using fuels like coal, wood and bagasse are such units returned under major group 33 employing in all 1,760 persons (including one unit employing 100 persons).

46.9 In the case of manually-run units 2,113 persons out of the total number of 5,819 persons employed in such units are accounted for by major group 39. Among others, mention may be made of the number of persons employed in manually run units standing at 822 in respect of major group 26, 894 persons in respect of major group 27, 437 persons in respect of major group 29 and 428 persons in respect of major group 34.

46.10 As regards employment provided in units using liquid fuel, it will be seen that 607 persons out of 821 persons employed in all such units are accounted for by major group 20-21.

Rural-Urban differentials:

46.11 According to the following statement, giving the distribution of 2,278 registered factories and unregistered workshops (other than household industry) returned in rural areas and 3,456 such units returned in urban areas, in terms of 1,000 units by use of fuel/power, electricity is much more commonly used in urban areas than rural areas while the incidence of use of liquid fuel is much higher in the case of latter than the former.

STATEMENT III.53

Distribution of 1,000 *Establishments by type of fuel or power used in rural and urban areas separately*

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	400	438
(*a*) Electricity	163	297
(*b*) Liquid Fuel	101	5
(*c*) Coal, Wood and Bagasse ..	131	132
(*d*) Other Power	5	4
II. Manual	600	562

46.12 It will be seen from the main table E-II Part B that the number of electrically-operated units in the rural areas stands at 371 as against 1,026 such units returned in the urban areas of the district. The rural number of electrically-operated units is accounted for by mainly major group 20-21 (258 units). The corresponding urban figure has been returned at 294. However, a significant number of electrically operated units in the urban areas is also claimed by major groups 34 (90 units), 35 (184 units) and 39 (214 units). It will also be interesting to note that Patiala city accounts for as many as 422 electrically-operated units.

46.13 Looking at the figures given in subsidiary table E-II Part B. 1, it will be seen that units run on electricity constitute proportions of 51.3 per cent and 48.4 per cent in the rural and urban areas respectively in the case of major group 20-21. However, the urban proportions exceed the corresponding rural proportions considerably in the case of

major groups 34, 35 and 39. While the electrically-operated units constitute a proportion of 4.4 per cent under major group 34 in the rural areas, the urban proportion is as high as 33.4 per cent. Similarly the proportions of such units in the case of major groups 35 and 39 are 64.3 per cent and 3.7 per cent in the rural areas and 75.7 per cent and 23.1 per cent respectively in the urban areas.

46.14 As regards units using fuels like coal, wood and bagasse, the rural and urban figures of such units have been returned at 299 and 455 respectively. Of the latter number, 120 units are accounted for by Patiala city. Major groups which claim a significant number of units using fuels like coal, wood and bagasse, in the rural areas, include 32 (43 units), 34 (96 units), 38 (35 units) and 39 (81 units). These constitute proportions of 89.6 per cent, 35.2 per cent, 43.8 per cent and 9.9 per cent of the number of units returned under the respective major groups. In the urban areas, units using fuels like coal, wood and bagasse have been returned under mainly major groups 20-21 (261 units), 34 (51 units) and 38 (47 units). These constitute proportions of 42.9 per cent, 19 per cent and 26 per cent of the units returned under the respective major groups.

46.15 Rural areas account for 1,367 manually-run units as against 1,942 such units returned in the urban areas. The former are accounted for by mainly major groups 27 (266 units), 29 (64 units), 34 (162 units) 38 (44 units) and 39 (694 units) and the latter by major groups 26 (324 units), 27 (233 units), 29 (183 units), 34 (122 units), 38 (130 units) and 39 (701 units). It will be seen that in all these major groups, except 34 and 38, manually-run units constitute more than three-fourth of the total number of units both in rural and urban areas. However, the proportions returned in respect of major groups 34 and 38 are 59.3 per cent and 55.0 per cent in the rural areas and 45.4 per cent and 71.8 per cent in the urban areas.

46.16 Except for 19 units all units using liquid fuel are accounted for by rural areas. Out of the total number of 299 such units returned in the rural areas, major group 20-21 accounts for 202 such units, constituting 40.1 per cent of the total number of units returned under the major group. Rural areas also account for 11 units using other power as against 14 such units returned in the urban areas.

46.17 The total number of persons employed in registered factories and unregistered workshops (other than household industry) in rural and urban areas stands at 9,976 and 18,858 respectively. Of the latter number 6,866 persons are accounted for by units returned in Patiala city. The number of persons employed in such of the units which are run on electricity has been returned at 3,942 in the case of rural areas and 11,923 in urban areas. The former number is accounted for by mainly major groups 20-21 (1,033 persons including 375 persons employed in one unit), 33 (993 persons including 150 persons employed in one unit) and 37 (1,517 persons including 1,500 persons employed in one unit). In the case of urban areas, the high incidence of employment in electrically operated units is noticeable particularly in respect of major groups 20-21 (3,300 persons including 2 units employing as many as 1,371 persons, one unit employing 400 persons and 2 units employing in aggregate 206 persons), 23 (1,828 persons including 1,632 persons employed in one unit), 28 (1,776 persons including 1,500 persons employed in one unit), 33 (486 persons), 34 (448 persons including 128 persons employed in one unit), 35 (1,053 persons), 36 (1,154 persons including 383 persons employed in one unit), 37 (808 persons including 441 persons employed in 3 units) and 39 (716 persons). Electrically operated units returned in Patiala city employ in all 4,730 persons. Of this number, 1,500 persons are employed in one unit returned under the employment category 500 + persons, 400 persons in one unit returned under the employment category 300-499 persons and 819 persons in 5 units returned under the employment category 100-299 persons.

46.18 Units using fuels like coal, wood and bagasse employ 3,323 persons in rural areas and 2,953 persons in urban areas. While the former number is claimed by mainly such units returned under major group 32 (2,731 persons including 300 persons employed in one unit returned under employment category 300-499 persons and 1,949 persons in 12 units returned under employment category 100-299 persons, the major claimants of the latter number are such units returned under major groups 20-21 (608 persons) and 33 (1,543 persons including 100 persons employed in one unit). The number of persons employed in units using coal, wood and bagasse in Patiala city has been returned at 424.

46.19 Manually-run units employ 2,009 persons in rural areas and 3,810 persons in urban areas (including 1,699 persons employed in such units in Patiala city). The former number is accounted for by mainly such units returned under major group 27 (412 persons), 34(228 persons) and 39(906 persons) and the latter by major groups 26 (719 persons), 27(482 persons), 29(343 persons) and 39(1,207 persons).

46.20 Units using liquid fuel employ 685 persons in rural areas and 136 persons in urban areas. In both the cases, major group 20-21 accounts for a large majority of the persons employed in such

units. The units run on other power employ 17 persons in rural areas and 36 persons in urban areas.

SANGRUR DISTRICT

47.1 The incidence of use of maunal power in the registered factories and unregistered workshops (other than household industry) is higher in Sangrur district compared to all other districts of the State according to the data given in subsidiary table E-II Part B.1. It will be seen from the following statement that manually-run units constitute as high as 67 per cent of the total number of units returned in the district.

STATEMENT III.54

Distribution of E,ZZZ *Establishments by type of fuel or power used*

Type of fuel or power used	No. of units
Total	1,000
I. All Fuels/Power	330
(a) Electricity	175
(b) Liquid Fuel	72
(c) Coal, Wood and Bagasse	81
(d) Other Power	2
II. Manual	670

47.2 Though manually-run units constitute very high proportions of the total number of units returned under various major groups, it will be seen that the proportion of such units under major groups 20-21 (5.9 per cent), 28(19 per cent), 30(63.2 per cent), 32(54.4 per cent), 33(10 per cent), 35(32.4 per cent), 36 (25 per cent) and 37 (58.3 per cent) falls short of the proportion of 67 per cent returned for all the units. However, in the case of major groups 27 and 39 which claim 859 and 823 manually-run units, these constitute as high as 92.3 per cent and 84.5 per cent respectively of the total number of units returned under the two major groups. The remaining number of manually-run units are accounted for by mainly major groups 29 (478 unit), 34 (499 units), 38 (203 units) and 26 (221 units). It may be pointed that the total number of manually-run units has been returned at 3,572 in the district. Manually-run units constitute 99.8 per cent, 72.5 per cent, 82.9 per cent and 95.7 per cent of the total number of units returned under major groups 29, 34, 38 and 26 respectively.

47.3 The second highest number of 931 units is accounted for by those run on electricity. Those which claim a large majority of this number include major groups 20-21 (442 units), 34 (76 units), 35 (87 units) and 39 (126 units). These constitute proportions of 43.2 per cent, 11.1 per cent, 60 per cent and 12.9 per cent respectively of the total number of units returned by the four major groups. It will, however, be noted that the electrically-operated units bear higher incidence in respect of major group 28 (81 per cent) but their total number is as low as 17 units.

47.4 The total number of units using fuels like coal, wood and bagasse has been returned at 432. Of this number, 186 units are claimed by major group 20-21, 108 units by major group 34, 40 units by major group 38 and 36 units by major group 32. The proportions of such units under the four major groups have been returned at 18.2 per cent, 15.7 per cent, 16.3 per cent and 45.6 per cent respectively. A higher proportion of 75 per cent of the units using fuels like coal, wood and bagasse has been returned under major group 33 but these number just 15.

47.5 Of the total number of 382 units using liquid fuel, 324 are accounted for by major group 20-21 and 20 by major group 23. These consitute 31.6 per cent and 11.2 per cent respectively of the number of units returned under the two major groups. Major group 20-21 also accounts for all the 11 units using 'other power'.

47.6 A glance at the figures given in table E-II Part B shows that of 14,715 persons employed in registered factories and unregistered workshops (other than household industry), 6,365 are accounted for by manually-run units and 4,161 by units run on electricity. Out of the latter number, as many as 2,298 are employed in units returned under major group 20-21. This includes one electrically-operated unit employing as many as 665 persons and another employing 120 persons. Mention may also be made of electrically operated units returned under major group 35 which employ 369 persons as also those returned under major group 37 employing in all 341 persons. Sizeable employment is also provided in electrically-operated units returned under major groups 23 (240 persons), 27 (202 persons), 34 (206 persons) and 39 (311 persons).

47.7 In the case of manually-run units, the units returned under major group 39 provide highest employment of the order of 1,407 persons followed by those returned under major group 27, which employ all told 1,386 persons. It will be seen that sizeable number of persons are also employed in manually-run units returned under major group 34 (1,051 persons), 29 (722 persons), 26 (393 persons) and 23 (386 persons).

47.8 As regards units using fuels like coal, wood and bagasse about half (1,549 persons) of the total number of persons employed in such unit (3,109 persons) is accounted for by units returned under

major group 32. The major group also claims all the three such units which are returned under employment category 100-299 persons. Of the remaining, 339 persons are employed in such units returned under major group 34, 214 persons in units returned under major group 33, 222 persons in units returned under major group 23 and 609 persons in units returned under major group 20-21.

47.9 Units using liquid fuel employ in all 1,049 persons. Out of this number, as many as 901 persons are claimed by such units returned under major group 20-21. As has been stated earlier all the units using other power fall under major group 20-21. These employ in aggregate 31 persons.

Rural-Urban differentials :

47.10 Of the total number of registered factories and unregistered workshops, rural and urban areas account for 2,352 and 2,976 units respectively. The main feature of the differences between their distributions in terms of 1,000 units by use of fuels/power is the predominance of use of liquid fuel in rural areas and electricity in urban areas. It will also be seen from the following statement that a common feature of the two areas is the high incidence of use of manual power.

STATEMENT III.55

Distribution of 1,000 *Establishments by type of fuel or power used in rural and urban areas separately*

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	328	331
(*a*) Electricity	122	217
(*b*) Liquid Fuel	150	9
(*c*) Coal, Wood and Bagasse	54	103
(*d*) Other Power	2	2
II. Manual	672	669

47.11 A glance at the figures given in subsidiary table E-II Part B.1 shows that electrically-operated units returned under major group 20-21 which constitute a significant proportion of the total number of electrically-operated units do not reveal any significant rural-urban differentials, the rural and urban proportions having been returned at 41.8 per cent and 45.2 per cent respectively. However, the urban incidence of such units is considerably higher compared to the corresponding rural incidence in the case of some of the other major groups which also claim significant number of electrically-operated units. These include major groups 34, 35 and 39 Electrically-operated units under these major groups constitute proportions of 2.0 per cent, 26.1 per cent and 3.4 per cent respectively in the rural areas as against the corresponding urban proportions of 18.1 per cent, 66.4 per cent and 17.2 per cent. It will be seen that units using fuels like coal wood and bagasse are accounted for by mainly major groups 34 and 32 in the rural areas whereas the highest number of such units in the urban areas is returned under major group 20-21 followed by major group 34. A reference to subsidiary table E-II Part B.1 shows that such units constitute 2.5 per cent of the units under major group 20-21 in the rural areas as against a proportion of 40 per cent returned in urban areas. In the case of major group 32 also, the difference in the incidence of such units is quite significant; their rural and urban proportions returned at 57.9 per cent and 13.6 per cent respectively. However, major group 34 does not reflect any significant difference in the incidence of such units between rural and urban areas, these having been returned in a proportion of 16.9 per cent in the case of former and 14.7 per cent in respect of latter.

47.12 Except for 28 units returned in urban areas, all units using liquid fuel are accounted for by the rural areas. Such units constitute proportion of 15 per cent in the rural areas, the corresponding urban proportion is as low as 0.9 per cent.

47.13 As regards manually-run units, it will be seen that such units constitute high proportions under major groups 26, 27, 29, 31, 34, 38 and 39 both in rural and urban areas. However, rural proportion of such units in the case of major group 34 (80.1 per cent), 31 (94.7 per cent) and 39 (93.6 per cent) exceed significantly the corresponding urban proportions standing at 66.7 per cent, 75.8 per cent and 80.5 per cent respectively.

47.14 It will be seen from the data given in the main table E-II Part B that registered factories and unregistered workshops (other than household industry) employ in all 5,500 persons in rural areas and 9,215 persons in urban areas. Manually-run units returned under major group 20-21 account for a higher number in both rural and urban areas, the total number of persons employed in such units standing at 2,205 persons in the case of former and 4,160 persons in respect of latter. In the rural areas, manually-run units which employ a significant number of persons include those returned under major groups 27 (825 persons), 29 (273 persons). 34 (369 persons) and 39 (358 persons). The position of employment in such units in the urban areas which employ in aggregate a significant number of persons include those returned under major groups 23 (340 persons), 26 (328 persons), 27 (561 persons), 29 (449 persons), 34 (682 persons) and 39 (1,049 persons).

47.15 The next highest employment is provided in rural areas by units using fuels like coal, wood and bagasse (1,629 persons) and in urban areas by

units run on electricity (3,467 persons). The former number is accounted for by such units returned under mainly major group 32 (1,437 persons including 3 units employing as many as 357 persons in aggregate). The number of persons employed in units using coal, wood and bagasse in the urban areas stands at 1,480. Of this number, as many as 552 persons are employed in such units returned under major group 20-21, 222 persons in similar units returned under major group 23 and 245 persons employed in such units returned under major group 34. As regards units run on electricity in the urban areas, it will be seen that the highest number of persons are employed in such units returned under major group 20-21 (1,728 persons including 665 persons employed in one such unit and 120 persons employed in another such unit). Besides, mention may also be made of employment provided in electrically-operated units in the urban areas represented under major groups 23 (230 persons), 35 (349 persons), 37 (334 persons) and 39 (292 persons). In the case of rural areas, electrically operated units employ in all 694 persons. Out of this number, 570 are employed in such units returned under major group 20-21. The major group also account for 863 persons out of 949 persons employed in the units using liquid fuel in the rural areas as also all the 23 persons employed in units run on the 'other power'.

BHATINDA DISTRICT

48.1 The total number of registered factories and unregistered workshops (other than household industry) has been returned at 4,656 in Bhatinda district. The distribution of this number in terms of 1,000 units by use of fuel/power, given in the following statement, shows that liquid fuel is used in a much higher proportion of units than coal, wood and bagasse.

STATEMENT III.56

Distribution of 1,000 *Establishments by type of fuel or power used*

Type of fuel or power used	No. of units
Total	1,000
I. All Fuels/Power	430
(a) Electricity	215
(b) Liquid Fuel	143
(c) Coal, Wood and Bagasse	67
(d) Other Power	5
II. Manual	570

48.2 It will be seen by making a reference to table E-II Part B that the electrically-operated units returned in the district (1,000 units) are accounted for by mainly major groups 20-21 (520 units), 27 (79 units), 35 (110 units) and 39 (121 units). These constitute proportions of 38.2 per cent, 10.9 per cent, 62.9 per cent and 14.6 per cent respectively. It will be seen that higher incidence of electrically-operated units obtains in the case of major group 28 (80.5 per cent) but the number of units returned under it is just 33.

48.3 Among the units using some kind of fuel/power, the next highest number of units after that of the units run on electricity is of those using liquid fuel, the number of such units having been returned at 667. Of this number, 622 are accounted for by major group 20-21. These constitute a high proportion of 45.7 per cent of the total number of units returned under the major group.

48.4 The number of units using fuels like coal, wood and bagasse has been returned at 311. This is accounted for by mainly major groups 20-21 (164 units), 32 (34 units), 34 (30 units) and 38 (47 units). These constitute proportions of 12 per cent, 42 per cent, 7.2 per cent and 22.7 per cent of the total number of units returned under the rrespective major groups. It will be seen that units using coal, wood and bagasse constitute still a higher proportion of 45.4 per cent in the case of major group 33 but these number just 5.

48.5 The manually-run units which number in all 2,655 are claimed by mainly major groups 26 (157 units), 27 (628 units), 29 (325 units), 34 (335 units), 38 (160 units) and 39 (695 units). These constitute proportions of 95.2 per cent, 86.7 per cent, 98.5 per cent, 80.1 per cent, 77.3 per cent and 83.9 per cent of the total number of units returned under the respective major groups.

48.6 It will be seen from table E-II Part B that 13,587 persons are employed in registered factories and unregistered workshops (other than household industry) returned in Bhatinda district. Of this number, 3,954 persons are accounted for by units run on electricity. These are employed mainly in units returned under major groups 20-21 (1,416 persons), 23 (1,061 persons including 150 persons employed in one unit), 35 (408 persons) and 39 (360 persons). The number of persons employed in units using fuels like coal, wood and bagasse has been returned at 2,773. This number is accounted for by mainly such units returned under major groups 20-21 (502 persons), 23 (522 persons including 2 units employing 220 persons), 32 (1,246 persons including 2 units employing in aggregate 204 persons) and 33 (302 persons including one unit employing 100 persons). Of the total number of persons employed in units using liquid fuel standing at 1,862, as many as 1,558 persons are employed in such units returned under major group 20-21. Major group 33 also claims one unit using liquid

fuel which employs as many as 100 persons. 4,804 persons employed in manually-run units returned in the district are accounted for by mainly major groups 27 (1,057 persons), 29 (592 persons), 32 (398 persons including 2 units employing as many as 275 persons), 34 (536 persons) and 39 (1,107 persons). In the case of units using other power, 148 persons out of the total number of 194 persons employed in such units are accounted for by major group 23. The major group also claims 2 such units returned under the employment category 50-99 persons and employing in aggregate 145 persons.

Rural-Urban differentials :

48.7 The following statement gives the distribution of registered factories and unregistered workshops (other than household industry) in terms of 1,000 units by use of fuels/power separately for rural and urban areas.

STATEMENT III.57

Distribution of 1,000 *Establishments by type of fuel or power used in rural and urban areas separately*

Type of fuel or power used	Rural	Urban
Total	1,000	1,000
I. All Fuels/Power	440	419
(a) Electricity	130	298
(b) Liquid Fuel	271	18
(c) Coal, Wood and Bagasse ..	36	97
(d) Other Power	3	6
II. Manual	560	581

48.8 It will be seen from the main table E-II Part B that of the total number of registered factories and unregistered workshops (other than household industry) returned in Bhatinda district, 2,309 units are accounted for by its rural areas and 2,347 by the urban areas. It is interesting to note that, among units using fuels/power, those using liquid fuel constitute the highest number (626 units in the rural areas). These are accounted for by mainly major group 20-21 (602 units). The major group also claims a large majority (279 units) of the total number of units using electricity (300 units) in the rural areas. Of the 83 units using fuels like coal, wood and bagasse in the rural areas, 32 units are claimed by major group 20-21, 27 units by major group 32 and 15 units by major group 34. As regards 1,292 manually-run units returned in rural areas, 413 units are accounted for by major group 27, 229 units by major group 34 and 234 units by major group 39.

48.9 Looking at the figures given in subsidiary table E-II Part B.1, it will be seen that units using liquid fuel, constitute as high as 64.5 per cent of the total number of units in the case of major group 20-21 and the electrically-operated units constitute a proportion of 29.9 per cent under the major group in the rural areas. However, it will be seen that units using fuels like coal, wood and bagasse constitute a small proportion of 3.4 per cent under the major group. Such units constitute a high proportion of 42.2 per cent under major group 32 but a small proportion of 6 per cent under major group 34. It will be noted that manually-run units constitute more than 90 per cent of the units under each of the three major groups 27, 34 and 39.

48.10 Looking at the distribution of units by use of fuels/power in urban areas, it will be seen that the number of units run on electricity is as high as 700. These constitute 29.8 per cent of the total number of urban units. The main contributors to the total number of electrically-operated units are major groups 20-21 (241 units), 35 (106 units) and 39 (112 units). These constitute proportions of 56.3 per cent, 70.2 per cent and 19.4 per cent of the number of units returned under the respective major groups. 228 units using fuels like coal, wood and bagasse in the urban areas are accounted for by mainly major groups 20-21 (132 units) and 38 (40 units), constituting proportions of 30.9 per cent and 32.5 per cent of the number of units returned under the respective major groups. Of the 41 units using liquid fuel in urban areas, 20 are accounted for by major group 20-21. In the case of units using other power, 8 of the 15 such units are accounted for by major group 34.

48.11 As regards 1,363 manually-run units returned in the urban areas, it will be seen that 104 such units are claimed by major group 26, 215 units by major group 27, 210 units by major group 29, 106 units by major group 34 and 461 units by major group 39. These constitute proportions of 92.9 per cent, 70.5 per cent, 97.7 per cent, 63.1 per cent and 79.8 per cent of the number of units returned under the respective major groups.

48.12 The total number of persons employed in registered factories and unregistered workshops (other than household industry) has been returned at 5,635 in the rural areas and 7,952 in the urban areas. The highest number of persons is employed in units run manually in the rural areas (2,119 persons) and in units run on electricity in the urban areas (3,138 persons). The former number is accounted for by mainly manually-run units returned under major groups 27 (649 persons), 32 (275 persons), 34 (344 persons) and 39 (300 persons). As against this, 2,685 persons employed in manually-run units in the urban areas are accounted for by mainly such units returned under major groups 27

74-M/P(N)11DCOPunjab—9(a)

(408 persons), 29 (415 persons) and 39 (807 persons). The main contributors to the total number of persons employed in electrically-operated units in the urban areas are such units returned under major groups 20-21 (783 persons), 23 (930 persons including one unit employing 150 persons), 35 (393 persons) and 39 (342 persons). On the other hand, 816 persons employed in electrically-operated units in the rural areas are accounted for by mainly such units returned under major groups 20-21 (633 persons) and 23 (131 persons).

48.13 It will be noted that, among units using some kind of fuel/power, those using liquid fuel account for the highest number of persons employed (1,526 persons) in the rural areas. As many as 1,466 persons out of this number are accounted for by such units returned under major group 20-21. In the urban areas, 100 persons out of 336 persons employed in units using liquid fuel are accounted for by one such unit returned under major group 33, 92 persons by such units returned under major group 20-21 and 99 persons in such units returned under major group 23.

48.14 Units using fuels like coal, wood and bagasse employ all told 1,147 persons in rural areas. These are employed mainly in such units represented under major groups 32 (1,017 persons includng 2 units employing in aggregate 204 persons) and 20-21 (95 persons). In the urban areas, such units employ in all 1,626 persons. These are accounted for by mainly such units returned under major groups 20-21 (407 persons), 23 (522 persons including 2 units employing in aggregate 220 persons), 32 (229 persons) and 33 (302 persons including one unit employing 100 persons). In the urban areas, units using 'other power' employ all told 167 persons. Out of this number, 148 persons are employed in 3 such units returned under major group 23. All the 27 persons employed in units using 'other power' in the rural areas are accounted for by such units returned under major group 20-21.

USE OF FUELS/POWER AND EMPLOYMENT IN HOUSEHOLD INDUSTRY

49.1 The household industry sector (unorganised) in the Punjab is constituted of 36,683 units, employing all told 55,373 persons. Though, as has been stated earlier, household industry in the Punjab is gradually giving place to somewhat better organised units known in Census parlance as 'unregistered workshops other than household industry', it is significant that the household industry sector continues to supplement the meagre income of thousands of cultivating families. In the absence of availability of capital the man power resources are best utilized by manufacturing, servicing or repairing of goods by mainly members of the household within its precincts or within the limits of the village in which household is located. However, as the earnings from agriculture increase, there is a tendency to increase the scope of production by shifting the manufacturing units to places where raw materials and fuels/power are easily available. Since there are still many people in the rural areas of the State, who are either landless or own small plots of land, they derive their subsistence partly with the help of returns from the household industry. This is true of many families in the urban areas also where chances of making a living from any other alternative sources are none too bright or out of their reach.

49.2 It emerges from the statement given below, that the most important activity in the sphere of household industry relates to manufacture of leather and leather products (major group 29). As many as 8,735 units have been returned under the major group, employing in aggregate 11,985 persons.

STATEMENT III.58

Number of Units and Persons Employed in Household Industry in the State by Major Groups

Division/ Major Group	No. of units	No. of persons employed
1	2	3
Division 2&3	**36,683**	**55,373**
Major Group		
20-21	2,948	5,637
22	17	24
23	7,159	9,754
24	108	183
25	2,608	4,343
26	3,612	6,098
27	3,197	4,886
28	113	232
29	8,735	11,985
30	18	42
31	179	387
32	2,287	3,554
33	10	25
34	1,980	2,828
35	170	324
36	3	4
37	297	616
38	1,322	1,973
39	1,920	2,478

49.3 Almost equal in importance to manufacture of leather and leather products is the manufacture of cotton textiles (major group 23). There are 7,159 units under this group employing as many as 9,754 persons. Spinning and weaving is still common as a household industry in the rural areas. Apart from the two major activities listed heretofore, mention may also be made of some other important activities in the sphere of household industry. These are represented by major groups 26, 27, 20-21, 25, 32, 34, 39 and 38. It will be interesting to note that though major group 27 accounts for a higher number of units (3,197 units) than major group 20-21 (2,948

units), total number of persons employed in the case of the latter (5,637 persons) is higher than the former (4,886 persons). However, activities represented by major group 26 not only claim the third highest number of units (3,612) but also the third highest number of persons employed (6,098).

Use of fuels/power:

49.4 The fact that 88.7 per cent of the units in the household sector in the State are operated manually corroborates the common characteristic about a household industry that it is typically a manual activity. As has been stated earlier, engagement in a household industry is more often than not a consequence of a paucity of funds. This also explains why a large majority of the units in the household industry sector are run without the use of any fuel. Power is either not available or the parties do not know how to make use of it in their small enterprise.

49.5 Notwithstanding what has been stated above, it would be still interesting to examine even in the case of a small proportion of units, which are returned as using some kind of fuel/power, the relative incidence of use of various fuels/power. A reference to subsidiary table E-II Part C. 1 shows that, among all fuels/power used in the household industry in the State the highest incidence is of fuels like coal, wood and bagasse. These are returned as used in 6.8 per cent of the total number of units or in other words, more than half of the total number of units using fuels/power. Next in importance is electricity, used in all in 2.1 per cent of the units. Liquid fuel is returned as used in 1.8 per cent of the total number of units whereas units using other power constitute 0.6 per cent of the total number of units.

49.6 Though variations in the incidence of use of various fuels/power are not very significant for all the units put together, the distribution of units by use of fuels/power at the level of major groups reveals significant differences. It will be seen that 75.1 per cent of the units use fuels/power in the case of major group 20-21 and the remaining 24.9 per cent of the units are run manually. Units run on electricity constitute 13.5 per cent of the units under the major group. However, units using liquid fuel and fuels like coal, wood and bagasse constitute higher proportions of 20.6 per cent and 33.7 per cent respectively. Even other power is used in as significant as 7.3 per cent of units. In the case of major groups like 23, 24, 25, 26, 27, 28, 29, 37 and 39 manual power is used in more than 90 per cent of the total number of units returned under the respective major groups. As regards other major groups which account for sizable proportions of the total number of units, it will be seen that, among all fuels/power, units returned under these major groups use by and large fuels like coal, wood and bagasse. To be exact, units using such fuels constitute proportions of 27.4 per cent in the case of major group 31, 22.9 per cent in the case of major group 32, 30.0 per cent in the case of major group 33, 18.4 per cent in the case of major group 34 and 20.1 per cent in the case of major group 38.

Rural-Urban differentials:

49.7 According to the data given in table E-II Part C, the number of units in the household industry sector returned in rural and urban areas stands at 28,538 and 8,145 respectively. The former units employ in aggregate 39,478 persons as against 15,895 persons employed in the latter. The following statement shows the distribution of the number of units and the number of persons employed by various major groups separately for rural and urban areas:—

STATEMENT III.59

Number of Units and Persons Employed in Household Industry in the State by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2&3	**28,538**	**39,478**	**8,145**	**15,895**
Major Group				
20-21	1,764	3,271	1,184	2,366
22	9	13	8	11
23	6,158	8,077	1,001	1,677
24	91	141	17	42
25	2,236	3,401	372	942
26	2,231	3,109	1,381	2,989
27	2,459	3,421	738	1,465
28	2	2	111	230
29	7,396	9,444	1,339	2,541
30	2	5	16	37
31	69	123	110	264
32	1,853	2,781	434	773
33	4	6	6	19
34	1,609	2,168	371	660
35	102	160	68	164
36	1	1	2	3
37	202	412	95	204
38	728	926	594	1,047
39	1,622	2,017	298	461

49.8 It will be noted from this statement that while major group 29 claims the highest number of units as also the highest number of persons employed in the rural areas, this distinction is claimed by major group 26 in the urban areas. However, major group 29 accounts for the second highest number of units and persons employed in the urban areas. On the other hand, major group 26 ranks below not only major group 29 but also major groups 23, 25 and 27 both in respect of distribution of units and number of persons employed in the rural areas. The second highest number of units and persons employed is claimed by major

group 23 in the rural areas. In fact activities represented by major groups 23 and 29 seem to be almost equally important when viewed in terms of the number of units claimed by the two major groups and also the number of persons employed in such units in rural areas. Among other important activities in the field of household industry in rural areas, it will be seen that major groups 20-21, 32, 34 and 39 also claim sizable share of the total number of units and persons employed. As regards important activities in the sphere of household industry in urban areas, it will be noted that, besides major groups 26 and 29, major groups 20-21, 23, 27 and 38 also figure prominently both in respect of number of units and number of persons employed.

49.9 A reference to subsidiary table E-II Part C.1 shows that single person units constitute 73.3 per cent of the total number of units in rural areas as against the corresponding urban proportion of 48.4 per cent. Consequently, the proportion of units under the employment category 2-4 persons standing at 46.8 per cent in the case of urban areas is significantly higher than the corresponding rural proportion of 25.7 per cent. At the level of major groups, the variations in the proportion of units under various employment categories between rural and urban areas are particularly conspicuous in the case of major groups 25, 26, 27, 29, 31, 34 and 38.

Use of fuels/power:

49.10 It will be seen from subsidiary table E-II Part C.1 that units using fuels/ power constitute 10 per cent of the total number of units in rural areas as against 15.7 per cent in the urban areas. A common feature of the two areas is that coal, wood and bagasse are the most commonly used fuels. Units using such fuels constitute 5.5 per cent of the total number of units in rural areas and 11.3 per cent of the total number of units in urban areas. The use of electricity is restricted to 1.5 per cent and 4.2 per cent of the total number of units in rural and urban areas respectively. Though liquid fuel is used in a very small proportion of units in both rural and urban areas, it will be seen that units using this type of fuel constitute a higher proportion (2.3 per cent) in the case of the former than the latter (0.1 per cent). However, 'other power' is used in a fraction of the total number of units both in rural and urban areas.

49.11 Looking at the data at the level of major groups in subsidiary table E-II Part C.1 it will be seen that 89.1 per cent of the units use some kind of fuel/power in the case of rural areas as against the corresponding urban proportion of 54.3 per cent in the case of major group 20-21. As will be noticed, the higher rural incidence of use of fuels/power in the case of units returned under the major group is accountable to mainly a high proportion (34.2 per cent) of rural units run on liquid fuel. On the other hand, just 0.3 per cent of units returned under the major group are run on liquid fuel in the urban areas. As against this, proportion of units using fuels like coal, wood and bagasse works to be 47.0 per cent in urban areas and just 24.8 per cent in rural areas under the major group. However, electricity and other power are used in a higher proportion of units in the rural areas than urban areas. Among the remaining major groups, while more than 90 per cent of units are run manually in the case of major groups 23, 25, 26, 27, 28, 37 and 39, a significantly high proportion of units use fuels like coal, wood and bagasse in respect of major groups 32, 33, 34 and 38 both in rural and urban areas.

GURDASPUR DISTRICT

50.1 The total number of units in the household industry sector has been returned at 1,968 in Gurdaspur district, employing all told 2,751 persons. A reference to table E-II Part C shows that almost all the units employ on an average less than 5 persons, the large majority being 1-person units. While the number of 1-person units has been returned at 1,441, those falling under employment categories 2-4 persons, 5-9 persons and 10-19 persons number 508, 16 and 3 respectively.

50.2 It will be seen from the following statement, giving the distribution of units claimed by household industry sector by various major groups, that major group 23 accounts for the highest number of such units and also the highest number of persons employed.

STATEMENT III.60

Number of Units and Persons Employed in Household Industry in Gurdaspur District by Major Groups

Division/Major Group	No. of units	No. of persons employed
1	2	3
Division 2 & 3	**1,968**	**2,751**
Major Group 20-21	**241**	**393**
23	**521**	**643**
24	**5**	**12**
25	**5**	**5**
26	**196**	**350**
27	**323**	**463**
28	**14**	**31**
29	**241**	**336**
31	**9**	**23**
32	**208**	**264**
34	**76**	**89**
35	**1**	**1**
38	**26**	**32**
39	**102**	**199**

It will be seen from subsidiary table E-II Part C.1 that the units falling under the major group 23 are overwhelmingly 1-person units, such units constituting as high as 82.3 per cent of the total number of units returned under the major group. As against this, the proportion of units under the employment category 2-4 persons is 17.3 per cent.

50.3 The second highest number of units in the household industry sector, standing at 323, is claimed by major group 27. These employ in all 463 persons. Though 1-person units constitute a very high proportion of the total number of units under major group 27 also, the proportion of such units standing at 70 per cent is not as high as their proportion returned under major group 23. On the other hand, the proportion of units under the employment category 2-4 persons standing at 28.8 per cent in the case of major group 27 is signifcantly higher compared to the corresponding proportion in respect of major group 23.

50.4 A glance at the statement given above shows that the other major claimants of the total number of units in the household industry sector include major groups 20-21 (241 units employing 393 persons), 29 (241 units employing 336 persons), 32 (208 units employing 264 persons), 26 (196 units employing 350 persons), 39 (102 units employing 109 persons) and 34 (76 units employing 89 persons). It will be seen by making a reference to subsidiary table E-II Part C.1 that among all these major groups, major group 20-21 claims the highest proportion of units, working out to 44 per cent, under the employment category 2-4 persons. The highest proportion of 93.1 per cent in the case of 1-person units obtains in the case of major group 39.

Use of fuels/power :

50.5 As regards use of fuels/ power in the case of household industry, 84.3 per cent of the units are run manually in Gurdaspur district, according to the data given in subsidiary table E-II Part C.1. The only fuels which are used in a somewhat significant proportion of units are coal, wood and bagasse, the proportion of units using such fuels standing at 12.2 per cent. The fact that electricity is used in just 1.5 per cent of the units shows how uncommon is its use in the household industry in the district. The use of liquid fuel is still more insignificant, being 0.2 per cent of the units. Other power is returned as used in 1.8 per cent of the units.

50.6 Working at the data relating to use of fuels/ power in units engaged in different types of production/servicing/ repair in the case of household industry in Gurdaspur district (table E-II Part C and subsidiary table E-II Part C.1), it will be seen that though incidence of use of manual power is very high almost in all types of units, the use of fuels like coal, wood and bagasse is also highly pronounced in the case of units returned under major groups 20-21 and 34. While units using coal, wood and bagasse constitute 47.4 per cent of the total number of units returned under the latter, the corresponding proportion in the case of the former is 55.2 per cent. The only other major groups which account for a significant number of such units are major groups 32 and 31, these constituting proportions of 18.8 per cent and 55.6 per cent respectively of the number of units returned under the two major groups. It is also interesting to note that 'other power' is returned as used in 14.5 per cent of the units in the case of major group 20-21. This major group also reflects the highest incidence of use of electricity compared to all other major groups though such units constitute just 7.1 per cent of the total number of units returned under the major group. Incidentally, it may be mentioned that the incidence of use of manual power is lowest in the case of units returned under major group 20-21, compared to the incidence of such units in the case of all other major groups.

Rural-Urban differentials:

50.7 Out of the 1,968 units in the district, 1,415 units are accounted for by its rural areas and 553 units by the urban areas. The following statement gives the break-up of units as also the figures of employment by various major groups separately for rural and urban areas.

STATEMENT III.61

Number of Units and Persons Employed in Household Industry in Gurdaspur District by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2 & 3 ..	1,415	1,911	553	840
Major Group 20-21	147	247	94	146
23 ..	375	457	146	186
24 ..	3	5	2	7
25 ..	5	5	..	..
26 ..	114	192	82	158
27 ..	310	443	13	20
28 ..	..	..	14	31
29 ..	155	200	86	136
31 ..	4	10	5	13
32 ..	137	171	71	93
34 ..	67	78	9	11
35 ..	1	1	..	..
38 ..	18	20	8	12
39 ..	79	82	23	27

It emerges from this statement that the major groups which claim a sizable number of units in urban areas also claim equally sizable number of units in rural areas. Major group 23 claims the highest number of units in both the areas. Similarly, major groups 20-21, 26, 29 and 32 claim significant number of units in both rural and urban areas. As such, the pattern of distribution of units obtaining in rural areas does not show any marked difference from that of the urban areas. This, as will be seen, is also true of the distribution pattern of number of persons employed.

50.8 As regards use of fuels/power, a reference to subsidiary table E-II Part C.1 shows that 16.1 per cent of the units use some kind of fuel/power in rural areas as against the corresponding urban proportion of 14.5 per cent. There are not any significant differentials in the proportions of units using different kinds of fuels/power between the rural and urban areas. This becomes clear from the data given in the subsidiary table referred to above which shows that electrically-operated units constitute proportions of 1.1 per cent and 2.5 per cent in rural and urban areas respectively, the proportions of units using fuels like coal, wood and bagasse having been returned at 12.2 per cent and 12.0 per cent in the two areas respectively. While liquid fuel is not at all returned as used in the case of urban units, its use is limited to a fraction of 0.3 per cent of the units in rural areas. Similarly other power which is not at all returned as used in the case of urban units finds its use in a small proportion of 2.5 per cent of the rural units. Manually-run units constitute proportions of 83.9 per cent and 85.5 per cent in the case of rural and urban areas respectively.

50.9 A few of the highlights of the rural—urban differentials at the level of major groups are listed below:

1. Coal, wood and bagasse are returned as used in 49.7 per cent of the units in the case of rural areas under major group 20-21 while units using such fuels constitute proportion of 63.8 per cent in the case of urban areas, under the major group.

2. 'Other power' is returned as used in 23.8 per cent of rural units under major group 20-21 while it is not at all returned as used under the major group in the urban areas.

3. Units using coal, wood and bagasse constitute proportion of 75 per cent and 40 per cent in rural and urban areas respectively in the case of major group 31. Such units constitute proportions of 50.7 per cent and 22.2 per cent respectively under major group 34. It is also interesting to note that while data do not bear the use of such fuels in the case of rural units under major group 24 and reflect their use in 50.0 per cent of the urban units represented by the major group, 28.5 per cent of the units represented by major group 32 use such fuels in the rural areas but not a single unit in urban areas under the major group.

AMRITSAR DISTRICT

51.1 The total number of units in the household industry sector in Amritsar district stands at 2,298 —table E-II Part C. These employ all told 4,065 persons. It will be seen that a large majority of units are either 1-person units or fall under the employment category 2-4 persons, the proportions under the two categories of employment working to be 58.6 per cent and 37.6 per cent respectively. Thus units employing 5 or more persons constitute just 3.8 per cent of the total number of units.

51.2 As in Gurdaspur district, major group 23 accounts for the highest number of units in Amritsar district also as per the distribution of units and number of persons employed by various major groups, given in the following statement:

STATEMENT III.62

Number of Units and Persons Employed in Household Industry in Amritsar District by Major Groups

Division/Major Group	No. of units	No. of persons employed
1	2	3
Division 2 & 3	**2,298**	**4,065**
Major Group 20-21	315	559
22	1	1
23	474	744
24	11	37
25	21	32
26	400	861
27	219	420
28	21	50
29	254	429
30	9	23
31	19	47
32	75	135
33	1	2
34	187	300
35	16	31
36	2	3
37	19	36
38	135	197
39	119	158

51.3 It is interesting to observe that though more of units are claimed by major group 23 than major group 26, the latter accounts for a higher number of persons employed than the fomrer. In the case of major group 23, 71.5 per cent of the units are 1-person units. On the other hand, 1-person units

constitute just 45 per cent of the units in respect of major group 26.

51.4 Among the remaining major groups those which not only claim significant share of the total number of units but also account for significant proportion of the total number of persons employed, mention needs to be made of major groups 29 (254 units employing in aggregate 429 persons), 27 (219 units employing in all 420 persons), 20-21 (315 units employing 559 persons) and 34 (187 units employing 300 persons). Besides major group 26, other major groups which bear high proportions of units under the employment category 2-4 persons include major groups 20-21 (45.7 per cent), 27 (38.4 per cent), 28 (38.1 per cent), 29 (39 per cent), 30 (77.8 per cent), 31 (52.6 per cent), 32 (48 per cent), 33 (100 per cent), 35 (43.8 per cent), 36 (50 per cent), 37 (78.9 per cent) and 38 (33.3 per cent).

Use of fuels/power:

51.5 In Amritsar district, 19.8 per cent of units use some kind of fuel/power and 80.2 per cent are run manually. Among the fuels/power, the most commonly used are coal, wood and bagasse; units using such fuels constitute 11.3 per cent of the total number of units. The proportion in respect of electrically-operated units stand at 6.1 per cent, other power and liquid fuel are returned as used in 1.5 per cent and 0.9 per cent of units respectively.

51.6 It will be seen from the data given in subsidiary table E-II Part C.1, that just 24.4 per cent of units are run manually in the case of food processing units (major group 20-21). On the other hand, 44.1 per cent of such units use fuels like coal, wood and bagasse. Electricity, liquid fuel and other power are returned as used in 14.6 per cent, 6.1 per cent and 10.8 per cent of such units respectively. As regards units represented by major group 23, 97 per cent of units are run manually and the remaining are run either on electricity or on fuels like coal, wood and bagasse. In the case of units returned under major group 26, 87.5 per cent of units are run manually and 12.5 per cent on electricity. The only fuels/power which are employed in a significant proportion of units in the case of major groups 34, 38 and 39 are coal, wood and bagasse. It may also be pointed out that two-third of the units in respect of major group 30 are electrically-operated. Also, in the case of major group 29, except for 0.8 per cent of units using fuels like coal, wood and bagasse, all the units under the major group are run manually.

Rural-Urban differentials:

51.7 The number of units in the household industry sector located in rural and urban areas stands at 1,126 and 1,172 respectively. Of the latter, 454 units are accounted for by Amritsar city. It is interesting to note that while there is not much difference in the number of units between rural and urban areas, the dfference in the total number of persons employed in these units is quite sizable. While rural units employ 1,612 persons only, urban units provide an aggregate employment to 2,453 persons. This is because as high as 71.7 per cent of rural units are 1-person units. On the other hand, 54 per cent of the urban units employ 2 or more persons and just 46 per cent units are 1-person units.

51.8 The following statement gives the distribution of number of units and number of persons employed by various major groups separately for rural and urban areas:—

STATEMENT III.63

Number of Units and Persons Employed in Household Industry in Amritsar District by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2 & 3 ..	**1,126**	**1,612**	**1,172**	**2,453**
Major Group 20-21	175	272	140	287
22 ..	..	..	1	1
23 ..	328	441	146	303
24 ..	4	15	7	22
25 ..	17	28	4	4
26 ..	105	159	295	702
27 ..	90	132	129	288
28 ..	1	1	20	49
29 ..	102	147	152	282
30 ..	1	1	8	22
31 ..	6	14	13	33
32 ..	38	63	37	72
33 ..	..	..	1	2
34 ..	104	146	83	154
35 ..	4	9	12	22
36 ..	..	..	2	3
37 ..	1	1	18	35
38 ..	49	58	86	139
39 ..	101	125	18	33

As will be seen from the statement given above, while major group 23 accounts for the highest number of units in the rural areas, the highest number of urban units is accounted for by major group 26. It is also significant that 328 rural units, returned

under major group 23, employ just 441 persons whereas 295 urban units, returned under major group 26, employ as many as 702 persons. This is, as has been explained earlier, due to a higher concentration of units in the employment category 2-4 persons in the case of major group 26 in the urban areas compared to the overwhelming concentration of 1-person employment category in respect of major group 23 in rural areas.

51.9 It will be seen that major group 23 accounts for the third highest number of units employing second highest number of persons in the urban areas. Mention may be made of urban units returned under major groups 20-21, 27, 29, 34 and 38 which not only constitute significant proportions of the total number of urban units but also provide employment in sizable numbers. In the case of rural areas, major group 20-21 not only claims the second highest number of 175 units but also accounts for the second highest number of persons employed (272 persons). Among others, mention may also be made of rural units returned under major groups 26, 27, 29, 34 and 39 which figure prominently not only in the distribution of units but also in the distribution of number of persons employed.

Use of fuels/power :

51.10 A reference to subsidiary table E-II Part C.1 shows that 21 per cent of units in the rural areas use some kind of fuel/power as against the corresponding urban proportion of 18.7 per cent. The proportion of units using fuels/power works out to 30.4 per cent in the case of Amritsar city. It is particularly interesting to note that the proportion of units using electricity in the case of Amritsar city is as high as 13.2 per cent. This shows how the use of electricity can make in-roads into household industry at places where it is better organized. It can also be attributed partly to easier availability of electricity at some places than others. Electricity is returned as used in 4.7 per cent of rural units as against the corresponding urban proportion of 7.5 per cent. There is not any significant difference in the incidence of use of fuels like coal, wood and bagasse between rural and urban areas, the two proportions having been returned at 11.8 per cent and 10.8 per cent respectively. Liquid fuel and other power are returned as used in a very small proportion of units both in rural and urban areas. The use of such fuels is mostly restricted to food processing units (major group 20-21) located in rural areas. The two fuels/power account for 10.9 per cent and 17.7 per cent respectively of the total number of units returned under the major group in rural areas. It is, however, interesting to note that the proportion of units using electricity under major group 20-21 in the case of rural areas is as high as 22.3 per cent as against the corresponding urban proportion of 5.0 per cent. On the other hand, the proportion of units under the major group returned as using fuels like coal, wood and bagasse is as high as 65.7 per cent in the urban areas and just 26.8 per cent in the rural areas. Units returned under major groups 23 and 29 are predominently manually-operated both in rural and urban areas.

51.11 While units using fuels like coal, wood and bagasse constitute much higher proportions under major groups 32, 34, 38 and 39 in the case of rural areas than the urban areas, it will be seen that the proportions of units run on electricity are as high as 71.4 per cent and 62.5 per cent under major groups 24 and 30 respectively in the case of urban areas.

FIROZPUR DISTRICT

52.1 Being a stronghold of household industry in the State, as many as 4,886 units in this sector of industry have been returned in Firozpur district. These employ all told 7,959 persons. It will also be noted from subsidiary table E-II Part C.1 that 60.4 per cent of the units are 1-person units, 37.6 per cent fall under the employment category 2-4 persons and just 2.0 per cent of units employ 5 or more persons.

52.2 In a distribution of the number of units and persons employed by various major groups, given in the following statement, major group 29 stands out conspicuously.

STATEMENT III.64

Number of Units and Persons Employed in Household Industry in Firozpur District by Major Groups

Division/Major Group	No. of units	No. of persons employed
1	2	3
Division 2 & 3	**4,886**	**7,959**
Major Group 20-21	495	784
22	5	8
23	926	1,207
24	3	4
25	188	281
26	518	908
27	591	993
28	12	14
29	944	1,560
30	1	1
31	31	80
32	343	577
34	375	523
36	11	20
37	51	114
38	291	500
39	291	385

The manufacture of leather, leather and fur products (major group 29) not only claims the highest number of units but also accounts for the highest number of persons employed. Next in importance to manufacture of leather, leather and fur products is the manufacture of cotton textiles (major group 23). As many as 826 units are engaged in this type of manufacturing activity. These contribute a sizable number of 1,207 persons to the total number of persons employed. By claiming 591 units which employ in all 993 persons, major group 27 (manufacture of wood and wood products, furniture and fixtures) also ranks pretty high in the distribution of units by major groups. This is also true of major groups 26 and 20-21 which claim 518 and 405 units respectively. While units returned under major group 26 employ in aggregate 908 persons, those falling under major group 20-21 account for 784 persons of the total number of persons employed in household industry in the district. As will be seen from the statement given above, mention also needs to be made of major groups 32, 34, 38 and 39 which make significant contributions not only to the total number of units but also the number of persons employed.

Use of fuels/power :

52.3 A glance at the figures given in subsidiary table E-II Part C.1 shows that units using manual power constitute 88.9 per cent of the total number of units. Thus the low incidence of use of fuels/power in the household industry in the district can be seen in the fact that their use is restricted to just 11.1 per cent of the units. The only fuels which are returned as used in somewhat a significant proportion of units (7.6 per cent) are coal, wood and bagasse. Units using electricity and liquid fuel constitute 1.6 per cent each of the total number of units. Other power is returned as used even in a smaller proportion of units, which works out to 0.3 per cent.

52.4 The only major group, which reflects high incidence of use of fuels/power, is major group 20-21. Of the total number of units returned under the major group, as high as 58.3 per cent use some kind of fuel/power. Though the highest proportion (24.4 per cent) is of units using coal, wood and bagasse, it is noteworthy that those using electricity and liquid fuel constitute proportions of 12.4 per cent and 18.5 per cent respectively. As regards major group 23, as high as 99.2 per cent of units are operated manually. The units returned under major groups 26, 27 and 29 are also almost all manually operated. In the case of major groups 32, 34 and 38, a little more than three-fourths of the units are run manually. Repairing activity represented under major group 39 is mostly manual.

Rural-Urban differentials :

52.5 Of the total number of units returned in the household industry sector in Firozpur district, as many as 3,129 units are accounted for by its rural areas and 1,757 units by the urban areas. The distribution of rural and urban units by various major groups, given in the following statement, shows that while major group 23 claims the highest number of the former, the highest number of the latter is accounted for by major group 26.

STATEMENT III.65

Number of Units and Persons Employed in Household Industry in Firozpur District by Major Groups in rural and urban areas separately

Division/Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2 & 3	**3,129**	**4,423**	**1,757**	**3,536**
Major Group 20-21	182	357	223	427
22 ..	1	2	4	6
23 ..	693	961	133	246
24 ..	3	4	..	..
25 ..	167	250	21	31
26 ..	204	260	314	648
27 ..	328	426	263	567
28 ..	..	..	12	14
29 ..	642	862	301	698
30 ..	..	..	1	1
31 ..	8	16	23	64
32 ..	271	456	72	121
34 ..	289	378	86	145
35 ..	6	6	5	14
37 ..	28	61	23	53
38 ..	64	78	227	422
39 ..	242	306	49	79

It is interesting to note that 301 units returned under major group 29 in the urban areas employ more persons than 314 units returned under major group 26. This is accountable to a higher concentration of units in the employment category 2-4 persons and lower concentration in the 1-person employment category in the case of major group 29 compared to major group 26.

52.6 In the rural areas, units represented by major groups 23 and 29 stand out most prominently for their contributions to the total number of persons employed. Other than these two major groups, while it is true that major groups 20-21, 26 and 27

claim significant proportions not only of the total number of units but also of the total number of persons employed, it will be seen that there are marked differences in their incidence between rural and urban areas in respect of major groups 25, 32, 34, 38 and 39. The higher incidence in rural areas than urban areas obtains in the case of all the five major groups except major group 38. Units returned under major group 38 not only constitute much higher proportions of the total number of units in the urban areas as compared to the rural areas but the rural-urban differences are more marked in respect of incidence of employment. The higher rural incidence is most conspicious in the case of major group 32.

Use of fuels/power:

52.7 According to the data given in subsidiary table E-II Part C.1, units using any kind of fuel/power constitute proportions of 11.9 per cent and 9.6 per cent in rural and urban areas respectively. The only fuel which reflects somewhat significant rural-urban differences in the incidence of usage is liquid fuel while units using liquid fuel constitute a proportion of 2.4 per cent in the rural areas. The corresponding urban proportion has been returned at just 0.2 per cent. It will also be seen that 1.6 per cent of the units are run on electricity both in rural and urban areas. Similarly there is no difference in the proportion of units using coal, wood and bagasse between rural and urban areas, the two proportions standing at 7.6 per cent and 7.7 per cent respectively. The units using 'other power' constitute proportions of 0.3 per cent and 0.1 per cent in rural and urban areas respectively. The manually-run units constitute a proportion of 88.1 per cent in rural areas and 90.4 per cent in urban areas.

52.8 While it is true that all units in the household industry sector put together do not reveal any significant difference in the incidence of use of various fuels/power between rural and urban areas, examination of the data at the level of major groups brings out such differences clearly. For instance, it will be seen that 30 per cent of the units use coal, wood and bagasse, 3.6 per cent are run on electricity, 0.5 per cent run on liquid fuel, 0.4 per cent run on 'other power' and 65.5 per cent are run manually in the case of major group 20-21 in urban areas. As against this 40.7 per cent of the units returned under the major group are run on liquid fuel, 23.1 per cent run on electricity, 17.6 per cent use fuels like coal, wood and bagasse, 6.0 per cent are run on 'other power' and 12.6 per cent run manually in the rural areas. In the case of major groups 32 and 34, the only important fuels used are coal, wood and bagasse. However, units using such fuels in the case of two major groups constitute proportions of 28.4 per cent and 26.6 per cent respectively in the rural areas and proportions of 9.7 per cent and 8.1 per cent in the urban areas. Another major group which bears significantly high incidence of use of such fuels is major group 38 and units using such fuels under the major group constitute proportions of 15.6 per cent and 19.0 per cent in the rural and urban areas respectively. As regards major groups 23, 26 and 29 practically all the units returned under these are manually run in both rural and urban areas. In the case of major group 27, while 98.5 per cent of the units are run manually in the urban areas, the corresponding proportion of manually-run units is 89.3 per cent in the rural areas.

LUDHIANA DISTRICT

53.1 Household industry sector in Ludhiana district is constituted of 3,897 units, employing in aggregate 5,876 persons. As will be seen from subsidiary table E-II Part C.1, as high as 70.9 per cent of units fall under 1-person employment category, 26.8 per cent under the employment category 2-4 persons, 2.0 per cent under the employment category 5-9 persons and 0.3 per cent under the employment category 10-19 persons.

53.2 According to the distribution of number of units and persons employed by major groups, given in Table E-II Part C and reproduced in the follwing statement, major group 29 accounts for both the highest number of units and highest number of persons employed.

STATEMENT III.66

Number of Units and Persons Employed in Household Industry in Ludhiana District by Major Groups

Division/Major Group	No. of units	No. of persons employed
1	2	3
Division 2 & 3	**,897**	**5,876**
Major Group 20-21	301	609
22	1	1
23	703	956
24	7	17
25	108	142
26	429	838
27	261	411
28	27	53
29	1,289	1,671
30	2	3
31	20	65
32	131	221
34	151	244
35	28	70
37	38	78
38	91	*115
39	300	382

53.3 Apart from major group 29, major groups 23, 26, 20-21 and 39 also figure prominently in the statement given above. It will, however, be noted that while 301 units returned under major group 20-21 employ in aggregate as many as 609 persons, 300 units returned under major group 39 employ 382 persons only. Even 261 units returned under major group 27 employ more persons than 300 units returned under major group 39.

Use of fuels/power :

53.4 Data given in table E-II Part C.1 shows that 91.1 per cent of units returned in Ludhiana district are run manually and only 8.9 per cent units use fuel/power. Of the units using fuels/power a large majority uses fuels like coal, wood and bagasse. Units using such fuels constitute 5.2 per cent of the total number of units. As against this, units run on electricity constitute 2.6 per cent of the total number of units; while those using liquid fuel and other power account for 1.0 per cent and 0.1 per cent respectively of the total number of units.

53.5 The incidence of use of fuels like coal, wood and bagasse is highly pronounced in the case of major groups 20-21 (29.9 per cent of units), 31(30.0 per cent of units), 32(31.3 per cent of units), 35(42.9 per cent of units)and 38(16.5 per cent of units). Even in the case of major group 34, while 12.4 per cent of units are returned as using some kind of fuel/power, those using coal, wood and bagasse constitute 8.1 per cent of the units.

53.6 The use of electricity in a significant proportion of units is discernible in the case of major group 20-21 (8.0 per cent of units), 26(9.1 per cent of units), 28(14.8 per cent of units) and 35 (17.8 per cent of units).

53.7 While the use of 'other power' is rare, liquid fuel is returned as used in 10.6 per cent of units in the case of major group 20-21.

53.8 As regards use of manual power, it will be seen that more than 90 per cent of units in the case of major groups 23, 24, 25, 26, 27, 29, 30, 37 and 39 are run manually. In the case of major group 29 particularly, manually-run units constitute as high as 99.9 per cent of units while such units constitute proportion of 97.2 per cent, 99.1 per cent and 97.7 per cent in the case of major groups 23, 25 and 27 respectively.

Rural-Urban differentials :

53.9 The total number of units in the household industry sector has been returned at 2,944 and 953 in rural and urban areas respectively. The former employ in aggregate 3,795 persons and the latter 2,081 persons. Of the urban units, 752 units employing 1,752 persons are accounted for by Ludhiana city.

53.10 It will be seen from subsidiary table E-II Part C.1 that 7.2 per cent of urban units employ 5 or more persons each and 54.9 per cent of urban units employ 2 or more persons each. As against this, just 0.6 per cent of rural units employ 5 or more persons and units employing 2 or more persons do not constitute more than 20.7 per cent of the total number of units.

53.11 Looking at the distribution of the number of units and persons employed by major groups in the following statement, it will be seen that while units returned under major groups 20-21 and 26 put together constitute about half of the total number of units in the urban areas, the most prominent activity in the rural areas is that represented by major group 29.

STATEMENT III.67

Number of Units and Persons Employed in Household Industry in Ludhiana District by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5

24 ..	4	10	3	7
25 ..	103	137	5	5
26 ..	191	240	238	598
27 ..	189	246	72	165
28 ..	..	..	27	53
29 ..	1,133	1,356	156	315
30 ..	..	..	2	3
31 ..	3	15	17	50
32 ..	108	164	23	57
34 ..	145	206	16	38
35 ..	17	33	11	37
37 ..	25	55	13	23
38 ..	76	93	15	22
39 ..	270	329	30	53

53.12 In rural areas, major group 23 accounts for the second highest number of both units and persons employed. It will be seen that major groups 23 and 29 stand out prominently in respect of urban units also. As regards incidence of employment, it is interesting to note the variation in the case of units returned under major group 26. As against 598 persons employed in 238 units returned under the major group in urban areas, 191 units returned in the rural areas under the major group employ 240 persons only.

Use of fuels/power :

53.13 Units using fuels/power constitute proportions of 5.4 per cent and 19.7 per cent in rural and urban areas respectively. The main feature in variation in the incidence of usage of fuels/power between rural and urban units is the significantly high incidence of use of electricity and fuels like coal, wood and bagasse in urban areas and a conspicuous absence of such fuels/power in rural areas. While as high as 12.1 per cent of urban units use fuels like coal, wood and bagasse, the corresponding rural proportion is just 2.9 per cent. Similarly, units using electricity constitute a proportion of 7.5 per cent in urban areas as against 1.0 per cent in rural areas. Liquid fuel and 'other power' are either not used at all or their use is restricted to a very small proportion of units both in rural and urban areas.

53.14 It is interesting to note that while electricity is used in a much higher proportion of units in urban areas than rural areas for all units put together, the reverse position obtains in the case of units returned under major group 20-21. Units using electricity constitute proportions of 29.6 per cent and 1.3 per cent in rural and urban areas respectively under the major group. However, coal, wood and bagasse are returned as used in a higher proportion of units (34.8 per cent) in urban areas than rural areas (14.1 per cent).

53.15 The incidence of use of electricity is pronounced in the case of urban areas particularly under major groups 25 (20 per cent of units), 26 (16 per cent of units), 28 (14.8 per cent of units), 34(31.3 per cent of units), 35(45.4 per cent of units) and 39(16.7 per cent of units). On the other hand, the incidence of use of electricity is conspicuously low under all major groups except major group 20-21 in the rural areas.

53.16 As regards use of fuels like coal, wood and bagasse, it will be seen that such fuels are returned as used under major group 32 in 23.1 per cent of units in rural areas and 69.6 per cent of units in urban areas.

53.17 Units returned under major groups 23, 25, 26, 27, 29 and 39 which account for a large majority of units are by and large run manually both in rural and urban areas.

JULLUNDUR DISTRICT

54.1 Of the 3,851 units returned in the household industry sector in Jullundur district, 65.5 per cent are 1 person units, 31.4 per cent returned under the employment category 2-4 persons, 2.7 per cent under the employment category 5-9 persons and 0.4 per cent under the employment category 10-19 persons. The total number of persons employed in the household industry in the district stands at 6,267. The distribution of number of units and number of persons employed is given in the following statement.

STATEMENT III.68

Number of Units and Persons Employed in Household Industry in Jullundur District by Major Groups

Division/Major Group			No. of units	No. of persons employed
1			2	3
Division 2 & 3	..	..	**3,851**	**6,267**
Major Group	20-21	..	227	441
	22	..	3	4
	23	..	976	1,462
	24	..	30	35
	25	..	848	1,363
	26	..	470	825
	27	..	189	285
	28	..	15	40
	29	..	619	1,057
	30	..	1	3
	31	..	15	23
	32	..	186	264
	33	..	2	4
	34	..	77	135
	35	..	17	36
	37	..	7	18
	38	..	101	182
	39	..	68	90

54.2 It will be seen that the highest number of units is claimed by major group 23. The major group also accounts for the highest number of persons employed. Almost equal in importance to the activities represented by major group 23 are those represented by major group 25. Besides these two major groups, major groups 26 and 29 also claim sizable number of units and account for significant proportions of the total number of persons employed.

Use of fuels/power :

54.3 In Jullundur district, just 5.9 per cent of units use fuels/power and 94.1 per cent are run manually. Of the former, a large majority uses fuels like coal, wood and bagasse. Units using such fuels constitute 4.4 per cent of the total number of units. The use of electricity, liquid fuel and other power is restricted to 1.1 per cent, 0.2 per cent

and 0.2 per cent of units respectively. The incidence of use of fuels like coal, wood and bagasse is highly pronounced in the case of major groups 20-21 (37 per cent of units), 22 (33.3 per cent of units), 31(40 per cent of units), 32(13.4 per cent of units), 33(50 per cent of units), 34(24.7 per cent of units), 35(23.5 per cent of units) and 38 (20.8 per cent of units). As regards use of electricity mention may be made of major groups 20-21 (9.3 per cent of units) and 37(14.3 per cent of units). Except for major group 20-21, where liquid fuel and 'other power' are used, in 2.2 per cent of units in each, such fuels/power are particularly not at all used. In the case of major groups 23, 24, 25, 26, 29 and 30 more than 99 per cent of units are run manually.

Rural-Urban differentials :

54.4 Of the total number of 3,851 units returned in the household industry sector in Jullundur district, as many as 3,242 units are accounted for by the rural areas. Thus the urban component of household industry sector is constituted of 609 units only, while the rural units employ in aggregate 4,945 persons, the urban units employ in all 1,322 persons.

54.5 The distribution of the number of units and persons employed by major groups for rural and urban areas separately is given in the following statement.

STATEMENT III.69

Number of Units and Persons Employed in Household Industry in Jullundur District by Major Groups in rural and urban areas separately.

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2 & 3	**3,242**	**4,945**	**609**	**1,322**
Major Group 20-21	84	147	143	294
22	3	4	..	..
23	919	1,333	57	129
24	29	33	1	2
25	843	1,349	5	14
26	344	520	126	305
27	157	235	32	50
28	..	..	15	40
29	537	888	82	169
30	..	..	1	3
31	10	11	5	12
32	157	208	29	56
33	1	1	1	3
34	51	78	26	57
35	3	4	14	32
37	5	13	2	5
38	48	64	53	118
39	51	57	17	33

54.6 It will be seen that though major group 23 accounts for the highest number of units in the rural areas, the number of units claimed by the major group in the urban areas is as low as 57. On the other hand, the highest number of units in the urban areas is claimed by major group 20-21. However, these do not account for the highest number of persons employed. The highest number of persons are employed in units returned under major group 26 in the urban areas.

54.7 Though major group 25 accounts for the second highest number of 843 units in the rural areas, the number of units claimed by the major group in urban areas is as low as 5. It will be noted that 843 units returned under major group 25 employ more persons than 919 units returned under major group 23 in the rural areas. Mention may also be made of major group 29 which accounts for a significant proportion of units both in rural and urban areas. Of 396 units returned in Jullundur city, 113 units are accounted for by major group 20-21, 53 units by major group 26, 52 units by major group 29 and 50 units by major group 38.

Use of fuels/power :

54.8 According to the data given in subsidiary table E-II Part C.1, 10.7 per cent of the units use fuel/power in urban areas of Jullundur district. As against this, only 5.0 per cent units use fuel/power in rural areas of the district. Despite this, it is interesting to note that units run on electricity constitute a higher proportion (1.2 per cent) in rural areas than urban areas (0.8 per cent). Use of liquid fuel and other power is seen only in the case of rural units. However, coal, wood and bagasse are returned as used in 9.9 per cent of units in the urban areas as against the corresponding rural proportion of 3.4 per cent.

54.9 The rural-urban differences in the incidence of use of fuels/power are significant in the case of units returned under major group 20-21. While 23.8 per cent and 50.0 per cent of units under the major group use electricity and fuels like coal, wood and bagasse respectively in the rural areas, 69.9 per cent of units under the major group are run manually in the urban areas. Almost all the remaining urban units returned under the major group use fuels like coal, wood and bagasse. In the case of units returned under major groups 23, 26 and 29 there are hardly a few units which use fuels/power either in rural or urban areas. use fuels/power either in rural or urban areas. group 25 are run on electricity and the remaining run manually in urban areas, as high as 99.5 per cent of units claimed by the major group are run manually in the rural areas. As regards major group 27, all units are run manually in urban areas. However, in rural areas, 3.2 per cent units

use fuels like coal, wood and bagasse and 96.2 per cent run manually. In the case of major group 32, while a large majority of units are run manually, the only fuels/power used are coal, wood and bagasse both in rural and urban areas. The same is true of units returned under major group 34 except for a small proportion of units run on electricity. Units returned under major group 38 are practically all run manually in urban areas but a significant proportion of 41.7 per cent use fuels like coal, wood and bagasse in rural areas.

KAPURTHALA DISTRICT

55.1 All told, 395 units (employing in all 581 persons) constitute the household industry sector in Kapurthala district. A reference to subsidiary table E-II Part C.1 shows that 64.8 per cent of the units are 1-person units, 31.4 per cent fall under the employment category 2-4 persons and 1.5 per cent under the employment category 5-9 persons.

55.2 It will be seen from the statement given below that major groups 20-21, 23, 26, 29 and 32 put together account for more than two-third of the total number of units.

STATEMENT III.70

Number of Units and Persons Employed in Household Industry in Kapurthala District by Major Groups

Division/Major Group	No. of units	No. of persons employed
1	2	3
Division 2 & 3	**395**	**581**
Major Group 20-21	81	145
22	2	2
23	78	104
25	5	5
26	68	107
27	25	33
28	1	1
29	40	51
31	6	8
32	33	49
34	13	20
35	13	21
38	9	15
39	21	25

55.3 Though major group 23 accounts for a higher number of units than major group 26, units returned under the latter claim a higher number of persons employed than those returned under the former. Apart from major groups 20-21, 23 and 26, major groups 29 and 32 also claim a significant number of persons employed.

Use of fuels/power :

55.4 What strikes instantly from a glance at the distribution of units by use of fuels/power given in subsidiary table E-II Part C.1 is the high incidence of use of electricity in the household industry in Kapurthala district. Such units constitute a proportion of 9.1 per cent of the total number of units in the district. However, units using fuels like coal, wood and bagasse constitute a still higher proportion of 15.9 per cent. The insignificance of the use of liquid fuel and 'other power' will be seen in the proportion of units using such fuels, the two proportions having been returned at 0.8 per cent and 1.0 per cent respectively.

55.5 Looking at the data at the level of major groups, it will be seen that use of electricity and fuels like coal, wood and bagasse is most pronounced in the case of units returned under major group 20-21, the former used in 30.9 per cent of units and the latter in 58.0 per cent of the units returned under the major group while units using coal, wood and bagasse figure significantly under major groups 32, 34, 35 and 38 also, those run on electricity constitute significant proportions of the total number of units returned under major groups 27 and 35. As regards units returned under major groups 23, 26 and 29, it is noteworthy that more than 97 per cent of such units are run manually.

Rural-Urban differentials :

55.6 Of the total number of units returned in the household industry sector in the district, its rural and urban areas account for 254 units and 141 units respectively. While the former put together employ 362 persons, the latter employ in all 219 persons. The distribution of these figures by major groups is given in the following statement

STATEMENT III.71

Number of Units and Persons Employed in Household Industry in Kapurthala District by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2&3	**254**	**362**	**141**	**219**
Major Group				
20-21	60	101	21	44
22	2	2	..	..
23	58	82	20	22
25	5	5	..	..
26	17	18	51	89
27	19	26	6	7
28	..	..	1	1
29	33	44	7	7
31	2	3	4	..
32	28	37	5	12
34	8	13	5	7
35	11	18	2	3
38	3	4	6	11
39	8	9	13	16

55.7 It will be seen that the highest number of units is accounted for by major group 20-21 in rural areas and major group 26 in urban areas. While major group 20-21 claims the second highest number of units in urban areas, major group 26 ranks fairly low in the rural areas. However, major group 23 figures prominently both in rural and urban areas. Mention may also be made of units falling under major groups 29 and 32 in the rural areas and major group 39 in urban areas.

Use of fuels/power :

55.8 Interestingly enough, units using fuels/power constitute proportions of 31.5 per cent and 18.4 per cent of the total number of units in rural and urban areas respectively. More so because units run on electricity constitute proportion of 13.0 per cent and 2.1 per cent in rural and urban areas respectively. However, the incidence of use of fuels like coal, wood and bagasse is same in both the areas. The proportions of units using such fuels have been returned at 15.7 per cent in the rural areas and 16.3 per cent in the urban areas. The use of liquid fuel and 'other power' is restricted to a very small proportion of units and that too in rural areas only.

55.9 A glance at the figures given in subsidiary table E-II Part C.1 shows that variations in the incidence of use of electricity and fuels like coal, wood and bagasse are most significant in the case of units returned under major group 20-21. Units using electricity and fuels like coal, wood and bagasse constitute proportions of 38.3 per cent and 48.3 per cent respectively under the major group in rural areas. As against this, the two corresponding urban proportions have been returned at 9.5 per cent and 85.7 per cent. Apart from this, there is no significant variation in the incidence of use of fuels/power between rural and urban areas. As will be seen from the subsidiary table referred to above, units run on electricity constitute high proportions under major group 27 both in rural and urban areas. Similarly, major groups 32, 34 and 35 bear significant proportion of units using fuels like coal, wood and bagasse both in rural and urban areas. However, it will be noted that in rural areas, major group 38 reflects the highest incidence of use of such fuels while it is not returned as used at all in the case of urban units returned under the major group.

HOSHIARPUR DISTRICT

56.1 The total number of units in the household industry sector in Hoshiarpur district has been returned at 3,606 employing 5,050 persons. While 1-person units constitute 71.5 per cent of the total number of units returned in the district, those employing on an average 2-4 persons form a proportion of 27.0 per cent. Units returned under employment categories 5-9 persons and 10-19 persons constitute proportions of 1.0 per cent and 0.2 per cent respectively.

56.2 The break-up of total number of units and persons employed by major groups, given in the following statement, reflects almost the same pattern of distribution as has been observed earlier in the case of other districts.

STATEMENT III.72

Number of Units and Persons Employed in Household Industry in Hoshiarpur District by Major Groups

Division/ Major Group	No. of units	No. of persons employed
1	2	3
Division 2&3	**3,606**	**5,050**
Major Group		
20-21	146	236
23	1,035	1,387
24	6	8
25	801	1,191
26	308	481
27	179	234
28	3	4
29	634	848
31	11	16
32	156	220
34	124	173
35	14	21
37	13	18
38	71	96
39	105	117

56.3 It will be seen that more than half of the units are accounted for by major groups 23 and 25. These also claim more than half of the total number of persons employed. Besides, these two major groups, major groups 26 and 29 also account for a significant number of units as also the number of persons employed.

Use of fuels/power :

56.4 Units using fuels/power constitute 5.9 per cent of the total number of units as per data given in subsidiary table E-II Part C.1 A large majority of these uses fuels like coal, wood and bagasse, such units constituting a proportion of 4.0 per cent of the total number of units. 'Other power' is returned as used in 1.4 per cent of units. The use of electricity and liquid fuel is restricted to fractions of 0.3 per cent and 0.2 per cent of the units respectively.

56.5 It will be seen that the only major group which accounts for a higher incidence of use of electricity is major group 20-21. Such units constitute a proportion of 4.8 per cent of the total number of units returned under the major group. Incidentally, the use of liquid fuel is also more or less restricted to the units returned under the major group.

While units using liquid fuel constitute 3.4 per cent of the total number of units under the major group, it is not either at all used or used in a small fraction of the units in the case of all other major groups. This is more or less true of 'other power' which is returned as used in 34.9 per cent of units under major group 20-21. None of the units returned under other major groups use 'other power'.

56.6 As regards use of fuels like coal, wood and bagasse such fuels are returned as used in 41.8 per cent of units under major group 20-21, 27.3 per cent of units under major group 31, 19.2 per cent of units under major group 32, 20.2 per cent of units under major group 34 and 12.7 per cent of units under major group 38.

56.7 It is interesting to observe that more than 99 per cent of units in the case of major groups 23, 25, 26, 29 and 39 which put together account for a large majority of total number of units, are run manually. Manually-run units constitute 96.1 per cent of the total number of units returned under major group 27.

Rural-Urban differentials :

56.8 Of the total number of 3,606 units returned in Hoshiarpur district, as many as 3,502 units are accounted for by its rural areas. The latter employ 4,878 persons in aggregate. Thus the urban component of household industry sector in the district is fairly small—constituted of 104 units employing in all 172 persons. The distribution of rural and urban units and the number of persons employed in such units by various major groups is given in the following statement:—

STATEMENT III.73

Number of Units and Persons Employed in Household Industry in Hoshiarpur District by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2&3	**3,502**	**4,878**	**104**	**172**
Major Group				
20-21	125	199	21	37
23	1,012	1,347	23	40
24	5	7	1	1
25	794	1,181	7	10
26	294	464	14	17
27	169	223	10	11
28	1	1	2	3
29	632	843	2	5
31	8	8	3	8
32	137	185	19	35
34	123	169	1	4
35	14	21	..	..
37	13	18	..	..
38	70	95	1	1
39	105	117	..	..

56.9 It will be seen that major groups 23 and 25 account for more than half of the total number of units in the rural areas. Another major group which claims a sizable number of rural units is major group 29. Units returned under the three major groups account for more than two-thirds of the total number of persons employed.

56.10 While major group 23 claims the highest number of units in urban areas also, major group 25 does not figure as prominently in urban areas as in rural areas. On the other hand, major group 20-21 accounts for the second highest number of 21 units in urban areas. Apart from these two major groups, major groups 26 and 32 also account for significant proportions of units in the urban areas.

Use of fuels/power :

56.11 Units using fuels/power constitute proportions of 5.2 per cent and 27.9 per cent in rural and urban areas respectively. However, a common feature of the two areas is that, of the units using fuels/power, a large majority uses fuels like coal, wood and bagasse. While such fuels are returned as used in 25.0 per cent in urban areas, the proportion of such units in the rural areas is 3.3 per cent. All the remaining units are either run manually (72.1 per cent) or on electricity (2.9 per cent) in the urban areas. On the other hand, units run manually, on electricity, 'other power' and liquid fuel constitute proportions of 94.8 per cent, 0.3 per cent, 1.4 per cent and 0.2 per cent of the total number of units respectively in the rural areas.

56.12 It will be seen that units using 'other power' and fuels like coal, wood and bagasse constitute proportions of 40.8 per cent each of the total number of units returned under major group 20-21 in the rural areas. Though coal, wood and bagasse are returned as used in a high proportion of units (47.6 per cent) in urban areas also, a significant proportion of units (14.3 per cent) use electricity under the major group.

56.13 As regards units returned under major groups 23, 25, 26, 27 and 29 most of such units are run manually both in rural and urban areas. Similarly, the only fuels returned as used in a significant proportion of units in the two areas under major groups 32 and 34 are coal, wood and bagasse.

ROPAR DISTRICT

57.1 According to data given in table E-II Part C, 3,052 units returned in the household industry sector in Ropar district employ in aggregate 4,128 persons. The proportions of units under employment categories 1-person, 2-4 persons and 5-9 persons as per subsidiary table E-II Part C.1 are

73.9 per cent, 25.4 per cent and 0.7 per cent respectively. It is thus evident that 99.3 per cent of the units employ less than 5 persons.

57.2 The following statement gives the distribution of the total number of units and persons employed by various major groups: —

STATEMENT III.74

Number of Units and Persons Employed in Household Industry in Ropar District by Major Groups

Division/ Major Group	No. of units	No. of persons employed
1	2	3
Division 2&3	**3,052**	**4,128**
Major Group		
20-21	438	705
22	1	3
23	698	834
25	175	215
26	215	316
27	197	271
28	6	8
29	467	598
30	1	4
31	5	5
32	176	307
34	266	318
35	40	56
37	36	79
38	82	100
39	248	309

57.3 As will be seen from the statement given above, major group 23 takes the prime position with 698 units employing all told 834 persons. It is obvious that a large majority of such units comprises 1-person units. The incidence of employment is higher in the case of units returned under major group 20-21—438 units employ 705 persons. Compared to this, 467 units returned under major group 29 put together employ 598 persons only.

57.4 Other major groups, which claim significant proportions of number of units and persons employed by such units, include major groups 25, 26, 27, 32, 34 and 39.

Use of fuels/power :

57.5 The incidence of use of liquid fuel is higher in Ropar district compared to some of the other districts. While units using all types of fuel/power in the district constitute a proportion of 16.9 per cent of all units, those using liquid fuel have been returned in a proportion of 10.5 per cent. Coal, wood and bagasse have been returned as used in 4.6 per cent of units, electricity in 1.2 per cent and 'other power' in 0.6 per cent of units. Thus 83.1 per cent of the units falling in the household industry sector in Ropar district are run manually.

57.6 The incidence of use of liquid fuel is highly significant in the case of units returned under major group 20-21. Units using liquid fuel constitute a proportion of 72.6 per cent of the total number of units returned under the major group.

57.7 Major groups bearing a high incidence of use of fuels like coal, wood and bagasse include major groups 20-21 (15.1 per cent of units), 32 (17.6 per cent of units) and 35 (10.0 per cent of units).

57.8 Though 20 per cent of the units under major group 31 are run on electricity, the total number of such units returned under the major group is only one. On the other hand the proportions of units using electricity in the case of major groups 20-21, 25 and 35 have been returned at 3.4 per cent, 2.3 per cent and 10.0 per cent respectively.

57.9 As regards use of fuels/power in the case of major groups 23, 26 and 29, which claim high proportions of total number of units, it will be seen from subsidiary table E-II Part C.1 that more than 99 per cent of the units returned under each of the three major groups are run manually. Some of the other major groups which account for high proportions of the total number of units and bear significantly high incidence of use of manual power include major groups 25 (97.7 per cent of units), 27 (97.0 per cent of units), 34 (94.0 per cent of units) and 39 (93.1 per cent of units).

Rural-Urban differentials :

57.10 Of the total number of 3,052 units constituting the household industry sector in Ropar district, as many as 2,951 units are accounted for by its rural areas. These employ a large majority (3,973 persons) of the total number of persons employed in all the units. Thus the urban component of household industry is constituted of a small number of 101 units employing in all 155 persons.

57.11 Looking at the distribution of the number of units and persons employed by major groups, given in the following statement, it will be seen that units returned under major groups 20-21, 23 and 29 put together constitute more than half of the total number of units both in rural and urban areas.

STATEMENT III.75

Number of Units and Persons Employed in Household Industry in Ropar District by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2&3	**2,951**	**3,973**	**101**	**155**
Major Group				
20-21	427	687	11	18
22	1	3	..	..
23	668	797	30	37
25	173	212	2	3
26	209	308	6	8
27	194	263	3	8
28	..	..	6	8
29	450	571	17	27
30	1	4	..	..
31	4	4	1	1
32	154	268	22	39
34	264	313	2	5
35	40	56	..	..
37	36	79	..	..
38	83	100	..	..
39	247	308	1	1

57.12 However, the second highest number is accounted for by major group 29 in rural areas while this distinction goes to units returned under major group 32 in urban areas. The other major claimants of the number of units are major groups 20-21 and 29 in urban areas and major group 20-21 in rural areas. It will be noted that major groups 34 and 39 figure prominently in the rural distribution but rank very low in the urban distribution.

Use of fuels/power :

57.13 A glance at the figures given in subsidiary table E-II Part C.1 brings out striking differences in the use of fuels/power between rural and urban areas. While the most commonly used fuel in rural areas is liquid fuel, the urban units use mostly coal, wood and bagasse. Units using liquid fuel constitute 10.8 per cent of the total number of rural units. Liquid fuel is not used even in one unit in the urban areas. However, 13.9 per cent of urban units use fuels like coal, wood and bagasse as against 4.3 per cent of rural units using such fuels. Units run on electricity constitute proportions of 1.1 per cent and 5.9 per cent in rural and urban areas respectively.

57.14 Of the units returned under major group 20-21 in rural areas, 74.5 per cent use liquid fuels and 14.1 per cent fuels like coal, wood and bagasse. The corresponding position in the urban areas is that 54.5 per cent of the units returned under the major group use coal, wood and bagasse and the remaining units are run manually.

57.15 It is interesting to note that more than 90 per cent of the units returned under all other major groups, except major groups 32 and 35, are run manually in rural areas. In the case of major groups 32 and 35, 15.6 and 10.0 per cent units use fuels like coal, wood and bagasse respectively. Besides, 10 per cent of the units returned under major group 35 are run on electricity.

57.16 As regards use of fuels/power in units returned under various major groups in the urban areas, it will be seen that the use of electricity is pronounced in the case of major groups 23, 25, 26 and 31. The use of fuels like coal, wood and bagasse is highly pronounced in the case of major groups 32 and 34.

PATIALA DISTRICT

58.1 The total number of persons employed in 3,062 units, returned in the household industry sector of Patiala district, stands at 4,630. According to subsidiary table E-II Part C.1, 67.1 per cent of such units are 1-person units, 31.2 per cent fall under the employment category 2-4 persons, 1.6 per cent under the employment category 5-9 persons and 0.1 per cent under the employment category 10-19 persons. The break-up of the number of units and the persons employed at the level of major groups, given in the following statement, shows that major group 29 accounts for the highest number of 566 units followed by major groups 23, claiming 460 units.

STATEMENT III.76

Number of Units and Persons Employed in Household Industry in Patiala District by Major Groups

Division/ Major Group	No. of units	No. of persons employed
1	2	3
Division 2&3	**3,062**	**4,630**
Major Group		
20-21	351	808
22	1	1
23	460	549
24	5	7
25	86	180
26	296	490
27	263	566
28	5	12
29	566	767
30	1	2
31	12	19
32	224	311
33	4	8
34	210	283
35	12	29
37	47	72
38	149	222
39	370	504

58.2 It will be seen that besides major groups 23 and 29, major groups 20-21 and 39 also claim more than 10 per cent of the units. Mention may also be made of major groups 26, 27, 32, 34 and 38 accounting for significant proportions of the total number of units.

Use of fuels/power :

58.3 A reference to subsidiary table E-II Part C.1 shows that one-fourth of the units use fuels/power. Consequently 74.9 per cent of the units are run manually. Among units using fuels/power, coal, wood and bagasse are used in the highest proportion of units, such units constituting a proportion of 17.3 per cent. As against this, electricity is returned as used in 4.9 per cent of units. Liquid fuel and 'other power' are returned as used in 2.4 per cent and 0.5 per cent of units respectively.

58.4 It will be seen that the use of electricity is most pronounced (58.3 per cent) in the case of units returned under major group 35 but the total number of such units returned under the major group is just 7. On the other hand, in the case of major group 20-21 which accounts for a significant number of units, 32.5 per cent units are run on electricity. The major group also bears a high incidence of use of fuels like coal, wood and bagasse (32.5 per cent). Such fuels are also returned as used in a significant proportion of units in the case of major groups 32 (88.8 per cent of units), 34 (34.8 per cent of units) and 38 (49.0 per cent of units). The use of liquid fuel and 'other power' is more or less restricted to units falling under major group 20-21 such units constituting proportions of 17.6 per cent and 4.3 per cent of the total number of units respectively.

Rural-Urban differentials :

58.5 Of the total number of units returned in household industry sector of Patiala district, rural areas account for 2,200 units and the urban areas for 862 units. The latter include 384 units returned in Patiala city.

58.6 As regards employment in household industry, it will be seen that the rural and urban units employ 3,098 persons and 1,532 persons respectively. The break-up of the number of units and persons employed by major groups is given in the following statement.

STATEMENT III.77

Number of Units and Persons Employed in Household Industry in Patiala District by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2&3	**2,200**	**3,098**	**862**	**1,532**
Major Group 20-21	203	495	148	313
22	1	1	..	..
23	366	424	94	125
24	5	7	..	..
25	79	168	7	12
26	181	225	115	265
27	196	260	67	106
28	..	..	5	12
29	445	545	121	222
30	..	..	1	2
31	3	4	9	15
32	188	249	36	62
33	2	4	2	4
34	139	177	71	106
35	1	4	11	25
37	27	45	20	27
38	73	101	76	121
39	291	389	79	115

58.7 It will be seen from this statement that while major group 20-21 claims the highest number of units in the urban areas, this distinction is claimed by major group 29 in the rural areas. The latter group accounts for the second highest number of units in the urban areas. While major groups 23, 26, 34 and 39 figure significantly in the distribution of units in both rural and urban areas, it will be seen that major group 32 does not cover as many units in urban areas as it does not in rural areas.

58.8 It will be seen from table E-II Part C that larger employment in rural areas is provided by units returned under major groups 20-21, 23 and

29 and in urban areas by units returned under major groups 20-21 and 26.

Use of fuels/power :

58.9 In Patiala district, the rural-urban variation in the incidence of use of fuels/power is not very significant. This becomes evident when notice is taken of the fact that the proportion of units using fuels/power in the rural and urban areas of the district stands at 23.5 per cent and 29.0 per cent respectively. However, there are significant variations in the incidence of use of coal, wood and bagasse, such fuels have been returned as used in 15.1 per cent in the case of rural areas and 23.0 per cent in the case of urban areas. The use of electricity is limited to 4.6 per cent of units in rural areas and 5.7 per cent of units in urban areas. While liquid fuel is used in 3.2 per cent of units in rural areas and a small fraction of units (0.2 per cent) in urban areas, the use of 'other power' is restricted to a fraction of units both in rural and urban areas.

58.10 At the level of major group, it will be seen that electrically-operated units constitute a proportion of 44.3 per cent in rural areas and 16.2 per cent in urban areas under major group 20-21. On the other hand the incidence of use of coal, wood and bagasse is higher in case of urban units (56.7 per cent) than rural units (14.8 per cent) returned under the major group. However, it is interesting to observe that 88.3 per cent of units under major group 32,31.7 per cent of units under major group 34 and 43.8 per cent of units under major group 38 use such fuels in the rural areas, the corresponding urban proportions returned under the three major groups standing at 91.7 per cent, 40.8 per cent and 54.0 per cent respectively. Mention may also be made of electrically-operated units in the urban areas constituting a proportion of 8.5 per cent under major group 34.

SANGRUR DISTRICT

59.1 The district accounts for as many as 5,054 units in the household industry sector. These provide an aggregate employment of 7,021 persons. A reference to subsidiary table E-II Part C.1 shows that 1-person units constitute as high as 72.9 per cent of the total number of units, those falling under the employment category 2-4 persons constitute a proportion of 26.1 per cent. In sum, just 1 per cent of units employ 5 or more persons.

59.2 It will be seen from the following statement, giving the distribution of number of units and persons employed in household industry in Sangrur district by major groups, that the highest number of units in the district is accounted for by major group 29.

STATEMENT III.78

Number of Units and Persons Employed in Household Industry in Sangrur District by Major Groups

Division/ Major Group	No. of units	No. of persons employed
1	2	3
Division 2 & 3	**5,054**	**7,021**
Major Group		
20-21	244	526
22	2	3
23	557	729
24	7	10
25	52	77
26	337	428
27	599	861
29	2,137	2,695
30	3	6
31	27	57
32	376	559
33	1	8
34	240	352
35	15	35
37	59	147
38	222	287
39	176	241

59.3 What appears to be conspicuous about the distribution of units by major group is the pronounced incidence of units returned under major group 27. These constitute the second highest proportion of total number of units in the district. Apart from two major groups 29 and 27, the only other major group, claiming more than 10 per cent of units, is major group 23. However, mention needs to be made of major groups 20-21, 26, 32, 34, 38 and 39, claiming significant number of units.

Use of fuels/power :

59.4 According to the data given in subsidiary table E-II Part C.1, 8.4 per cent of units use fuels/power and 91.6 per cent are run manually in Sangrur district. Among the former, the highest incidence is of fuels like coal, wood and bagasse, units using such fuels constitute 5.0 per cent of total number of units while those run on electricity have been returned in a proportion of 2.1 per cent. Liquid fuel and 'other power' are returned as used in 1.1 per cent and 0.2 per cent of units respectively.

59.5 Among major groups claiming significant number of units, use of electricity is pronounced in the case of units returned under major group 20-21 (24.2 per cent of units). However, mention may also be made of units run on electricity in the case of major group 35, constituting 53.3 per cent of the total number of units returned under the major group.

59.6 Similarly, the use of coal, wood and bagasse is pronounced in the case of units returned under major groups 20-21 (37.7 per cent of units), 32 (10.6 per cent of units), 34 (12.9 per cent of units) and 38 (27.0 per cent of units).

59.7 The use of liquid fuel and 'other power' is more or less restricted to the units returned under major group 20-21, such units constituting proportions of 17.6 per cent and 4.9 per cent respectively under the major group.

Rural-Urban differentials :

59.8 It will be seen that a large majority of units is accounted for by the rural areas. As against 4,311 units returned in rural areas, urban areas account for just 743 units. Further, the former put together employ 5,777 persons while the latter employ altogether 1,244 persons. A reference to subsidiary table E-II Part C.1 shows that as against 24.7 per cent of units employing on an average 2 or more persons in rural areas, the corresponding urban proportion has been returned at 40.8 per cent.

59.9 The distribution of number of units and persons employed by various major groups for rural and urban areas respectively is given in the following statement.

STATEMENT III.79

Number of Units and Persons Employed in Household Industry in Sangrur District by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2 & 3	**4,311**	**5,777**	**743**	**1,244**
Major Group				
20-21	174	376	70	150
22	..	..	2	3
23	450	583	107	146
24	4	7	3	3
25	39	49	13	28
26	306	376	31	52
27	526	735	73	126
29	1,922	2,361	215	334
30	..	..	3	6
31	14	27	13	30
32	331	484	45	75
33	..	..	1	8
34	191	272	49	80
35	3	6	12	29
37	51	111	8	36
38	166	216	56	71
39	134	174	42	67

59.10 It will be noted that as many as 1,922 or about 45 per cent of the total number of units are accounted for by major group 29 in the rural areas. The major group accounts for the highest number of units in urban areas also though these do not constitute even one-third of the total number of urban units. However, units returned under major group 23 constitute a higher proportion of the total number of units in urban areas than rural areas. The reverse is true of units returned under major group 27.

Use of fuels/power :

59.11 The glaring differences in the incidence of use of fuels/power between rural and urban areas will be seen in the proportions of units using fuels/power returned at 6.7 per cent and 18.7 per cent respectively. It is interesting to note that liquid fuel and 'other power' are practically not at all used in the case of urban units. (The use of either of such fuels/power is restricted to 0.1 per cent of total number of units in urban areas.) On the other hand, electricity and coal, wood and bagasse are returned as used in 7.0 per cent and 11.5 per cent of urban units respectively, the corresponding rural proportion standing at 1.2 per cent and 3.9 per cent. In rural areas, units using liquid fuel and 'other power' constitute proportions of 1.3 per cent and 0.3 per cent respectively.

BHATINDA DISTRICT

60.1 The household industry sector in Bhatinda district is constituted of 4,614 units employing in all 7,045 persons. It will be seen from subsidiary table E-II Part C.1 that proportions of units under employment categories 1-persons, 2-4 persons, 5-9 persons and 10-19 persons have been returned at 65.2 per cent, 33.2 per cent, 1.5 per cent and 0.1 per cent respectively.

60.2 The distribution of number of units and persons employed by various major groups is given in the following statement:

STATEMENT III.80

Number of Units and Persons Employed in Household Industry in Bhatinda District by Major Groups

Division/ Major Group	No. of units	No. of persons employed
1	2	3
Division 2 & 3	**4,614**	**7,045**
Major Group		
20-21	199	431
22	1	1
23	831	1,139
24	34	53
25	319	852
26	375	494
27	351	549
28	9	19
29	1,544	1,973
31	24	49
32	379	647
33	2	3
34	251	391
35	3	4
36	1	1
37	27	54
38	144	227
39	120	158

60.3 It is obvious from this statement that units returned under major groups 23 and 29 put together account for more than half of the total number of units. However, these claim less than half of the total number of persons employed. From the point of view of employment mention needs to be made of units returned under major group 25, which on an average employ more than 2 persons per unit. It is revealing that though considerably larger number of units is returned under major groups 26, 27 and 32 than major group 25, units returned under the latter group employ a significantly larger number of persons than those returned under the former major groups.

Use of fuels/power :

60.4 In all, 4.8 per cent of units use fuels/power. The remaining are operated manually. Coal, wood and bagasse are returned as used in 2.5 per cent of units while liquid fuel is used in 1.0 per cent of units. Electricity and 'other power' are used in fractions of 0.7 and 0.6 per cent of units respectively.

60.5 The highest incidence of use of fuels/power is seen in the units returned under major group 20-21. Units using fuels/power constitute a proportion of 79.9 per cent of the total number of units returned under the major group. Units using electricity, liquid fuel, other power and fuels like coal, wood and bagasse constitute proportion of 10.0 per cent, 21.1 per cent, 14.6 per cent and 34.2 per cent respectively of the total number of the units under the major group. Apart from this, mention may be made of major groups 31, 32, 34 and 38 which reveal use of fuels like coal, wood and bagasse in a sizable measure. In the case of major groups 23, 25, 26, 27 and 29 which altogether account for more than two-thirds of the total number of units, practically all the units are run manually.

Rural-Urban differentials :

60.6 Of the total number of units returned in Bhatinda district, as many as 3,464 units are accounted for by its rural areas and the remaining 1,150 units by its urban areas. While the former put together employ 4,704 persons, the number of persons employed by the latter has been returned at 2,341 persons.

60.7 A reference to subsidiary table E-II Part C.1 shows that as against 26.0 per cent of units employing on an average 2 or more persons in rural areas, the corresponding urban proportion has been returned at 61.0 per cent.

60.8 According to the data given in the following statement reflecting the distribution of units and number of persons employed by major groups separately for rural and urban areas, the highest number of units is accounted for by major group 29 in the case of the former and major group 25 in the case of the latter.

STATEMENT III.81

Number of Units and Persons Employed in Household Industry in Bhatinda District by Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of units	No. of persons employed	No. of units	No. of persons employed
1	2	3	4	5
Division 2 & 3	**3,464**	**4,704**	**1,150**	**2,341**
Major Group				
20-21	116	247	83	184
22	..	..	1	1
23	681	885	150	254
24	34	53	..	..
25	11	17	308	835
26	266	347	109	147
27	281	432	70	117
28	..	..	9	19
29	1,344	1,627	200	346
31	7	11	15	38
32	304	496	75	151
33	1	1	1	2
34	228	338	23	58
35	2	2	1	2
36	1	1	..	..
37	16	29	11	25
38	78	97	66	130
39	94	121	26	37

60.9 It will be seen that the rural distribution of units is more or less typical of the distribution of the total number of units observed earlier. Even in the case of urban units, major groups 23 and 29 figure prominently. As regards incidence of employment, the most significant average of about 3 persons per unit obtains in the case of units returned under major group 25 in the urban areas. It is further revealing that 308 units returned under the major group in urban areas employ almost the same number of persons as 681 units returned under major group 23 in the rural areas.

Use of fuels/power :

60.10 Units using fuels/power constitute proportions of 3.7 per cent and 8.1 per cent in rural and urban areas respectively.

60.11 The most significant rural-urban variation in the incidence of use of fuels/power is seen in the case of units using fuels like coal, wood and bagasse. Such units constitute proportion of 1.3 per cent and 6.1 per cent in rural and urban areas

respectively. At the level of major groups, this variation manifests most prominently in the case of units returned under major group 20-21. As against a proportion of 65.1 per cent of such units returned under the major group in urban areas, the corresponding rural proportion is 12.1 per cent. The rural-urban differences in the incidence of use of such fuels in the case of other major groups viz. 32, 34 and 38, bearing somewhat a significant incidence of their use, hardly need to be mentioned.

60.12 All other fuels/power are returned as used in such small proportions of units both in rural and urban areas that it is difficult to point out any significant rural-urban variation in their use.

Section 2 : TRADE/COMMERCIAL ESTABLISHMENTS

61.1 A brief reference to trade/commercial establishments has already been made in Chapter II of this report. Detailed analysis of the nature and size of such establishments based on data, given in the main table E-III and subsidiary table E-III.1, has been done in the paragraphs that follow. The tables E-III and E-III.1 give, in terms of absolute figures and proportions, the distribution of trade/commercial establishments, classified by the type of trade or business and size of employment for the State and its districts.

61.2 Activities relating to trade/commercial establishments are embraced by divisions 6 and 8 of the National Industrial Classification. These are represented by 10 major groups under division 6 and 4 major groups under division 8.

61.3 It will be seen from the main table E-III that there are as many as 154,105 trade/commercial establishments in the Punjab, employing altogether a substantial number of 265,232 persons. Though no data regarding the volume of trade were collected in the Establishment Schedule, the manpower involvement in this economic activity does reflect it to some extent indirectly. However, it needs to be emphasised at this point that bulk of the trade in the State is confined to retail trading on a small scale. The corroborative evidence for this statement is found in the data given in table E-III, which shows that of the total number of trade/business establishments returned in the State, 77 per cent are retail shops and 64 per cent 1-person establishments. In the case of retail trade, a large majority of the establishments deal in food and food articles, beverages, tobacco and intoxicants (major group 65), which constitute almost half of the total number of trade/business establishments. These are mostly grain and grocery stores. Other types of establishments dealing in retail trade include those which trade in commodities like textiles (major group 66), fuels and household utilities (major group 67) and medicines, books and stationery, building materials, transport equipment, petrol etc. (major group 68).

61.4 As regards wholesale trade, the bulk is accounted for by primary goods like food, textiles, live animals, beverages and intoxicants (major group 60). Of the total number of establishments engaged in wholesale trade, standing at 6,973, major group 60 claims as many as 4,686. The importance of the wholesale trade in foodgrains in the Punjab is to be judged not only from the point of view of the local consumption of foodgrains in the State but also its great and ever-increasing export potential. The large export of foodgrains, in the wake of Green Revolution, has enriched the economy of the State in a large measure.

61.5 Other types of trade/business establishments include banks and financial institutions (major group 80), Insurance and provident services (major group 81), real estate and business services (major group 82) and legal services (major group 83). The most common type of establishments returned under division 8 are those represented by major group 82 —numbering 5,275.

61.6 The number of persons employed in different types of trade/business establishments has been reproduced in the following statement for a quick look.

STATEMENT III.82

Number of Establishments and Persons Employed in Trade/Commercial Establishments in the State by Divisions/Major Groups

Division/ Major Group	No. of establishments	No. of persons employed
1	2	3
Division (6 + 8)	**154,105**	**265,232**
Division 6	**147,954**	**235,315**
Major Group		
60	4,686	14,031
61	485	1,273
62	537	1,339
63	485	1,511
64	780	2,080
65	75,089	101,671
66	11,422	21,374
67	17,948	29,421
68	14,431	25,564
69	21,191	37,051
Division 8	**7,051**	**29,917**
Major Group		
80	1,355	10,808
81	44	432
82	5,275	17,968
83	377	709

61.7 It will be noticed that 75,089 establishments, returned under major group 65, employ altogether 101,671 persons which in other words means that on an average such establishments do not even employ 2 persons per establishment. This is attributable to mainly preponderance of small grain and grocery shops among the establishments, covered under the major group which are usually single-person units. It is further interesting to note from the main table E-III that 98 per cent of the establishments returned under the major group (65) employ on an average less than 4 persons and that three-fourths of these are 1-person establishments. What has been stated above about the establishments covered under major group 65 is more or less true of all other establishments engaged in retail trade. The fact that the average number of persons employed even in the case of hotels and restaurants represented by major group 69 is less than 2 shows that a large majority of these constitutes of tea shops run as single-person units. Further evidence for this statement can be gleaned by a reference to table E-III, which shows that out of the 21,191 establishments, returned under the major group, as many as 13,597 are 1-person establishments. Though a large majority of the hotels and restaurants is being run as a small enterprise, it needs being mentioned that 4 out of these employ 100 or more persons each. The numbers returned under the employment categories 50-99 persons and 20-49 persons stand at 10 and 42 respectively. It also needs to be mentioned that one establishment engaged in wholesale trade in food, textiles etc. (major group 60) employs as many as 150 persons and another such establishment employs 60 persons. The most significant number of persons employed in establishments engaged in wholesale trade is accounted for by those returned under major group 60 (14,031 persons). Compared to the average number of persons employed in establishments engaged in retail trade, the corresponding average in respect of establishments engaged in wholesale trade is 3 persons per establishment. The average is still higher in the case of establishments returned under division 8. 7,051 establishments returned under the division employ altogether 29,917 persons, giving an average of even more than 4 persons per establishment. The highest number of persons employed under the division (17,968 persons) is accounted for by the establishments returned under major group 82 and the second highest number of 10,808 persons by establishments returned under major group 80. It will be seen that 4 establishments claimed by the former major group and 6 by the latter, employ 100 or more persons each. The number of establishments, returned under the employment category 50-99 persons, in the case of two major groups has been returned at 11 and 19 respectively. It is also evident that more than half of the establishments returned under division 8 fall under the employment category 2-4 persons.

Rural-Urban differentials :

61.8 A reference to the main table E-III shows that the most glaring rural-urban differential in the incidence of number of units obtains in the case of establishments engaged in the wholesale trade. This becomes clearer when notice is taken of the fact that such establishments constitute a proportion of less than 1 per cent of all the trade establishments, returned under division 6 in the rural areas, and a corresponding proportion of 8 per cent in the urban areas. The differentials become more vivid by looking at the number of persons employed in such establishments. Break-up of the number of trade/business establishments and the number of persons employed in these establishments for rural and urban areas separately are given in the following statement :

STATEMENT III.83

Number of Establishments and Persons Employed in Trade/Commercial Establishments in the State by Divisions/Major Groups in rural and urban areas separately

Division/ Major Group	Rural		Urban	
	No. of establish-ments	No. of persons employed	No. of establish-ments	No. of persons employed
1	2	3	4	5
Division (6+8)	**68,000**	**87,393**	**86,105**	**177,839**
Division 6	**66,704**	**83,749**	**80,350**	**151,566**
Major Group				
60	273	787	4,413	13,244
61	113	190	372	1,083
62	83	230	454	1,109
63	18	38	467	1,473
64	60	96	720	1,984
65	45,942	55,516	29,147	46,155
66	2,957	4,407	8,465	16,967
67	3,836	5,018	14,112	24,403
68	3,839	5,039	10,592	20,525
69	9,583	12,428	11,608	24,623
Division 8	**1,296**	**3,644**	**5,755**	**26,273**
Major Group				
80	758	1,812	597	8,996
81	1	1	43	431
82	528	1,821	4,747	16,147
83	9	10	368	699

61.9 A common feature of the economy of the rural and urban areas is the preponderance of establishments engaged in retail trade, which constitute 83 per cent in rural areas and 72 per cent in urban areas of total number of trade/business establishments. This shows that the traditional importance of retail trade has survived equally in rural

and urban areas despite all the economic progress we have registered over the last few decades.

61.10 Not only is the aggregate number of persons employed in the trade/business establishments significantly higher in the urban areas than the rural areas but the average number of persons employed in such establishments is even more than 2 persons per establishment in the case of the former as against 1.3 persons of the latter. A reference to subsidiary table E-III.1 shows that trade/commercial establishments employing 2 or more persons constitute proportions of 19.9 per cent and 47.9 per cent in rural and urban areas respectively. The differentials are far pronounced particularly in the case of the establishments returned under major groups 60, 61, 64, 69, 81 and 83.

61.11 It will be seen that a majority of the large sized trade/commercial establishments is accounted for by the urban areas. Out of 15 such establishments, employing 100 or more persons each, 12 are located in the urban areas. Similarly, out of 47 and 251 establishments returned under employment categories 50-99 persons and 20-49 persons respectively, just 5 and 23 establishments respectively are accounted for by the rural areas and the rest by the urban areas of the State.

GURDASPUR DISTRICT

62.1 Total number of trade/commercial establishments has been returned at 12,639 in Gurdaspur district. These employ altogether 19,491 persons. It will be seen from the table E-III that establishments engaged in retail trade in food and food articles etc. etc. (major group 65) constitute even more than half of the total number of trade/commercial establishments in the district. The relevant data reproduced from the table E-III in the statement below further shows that establishments, engaged in wholesale trade in various commodities, constitute even less than 3 per cent of the total number of trade/commercial establishments.

STATEMENT III.84

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Gurdaspur District by Divisions/Major Groups

Division/ Major Group	No. of establishments	No. of persons employed
1	2	3
Division (6+8)	**12,639**	**19,491**
Division 6	**12,204**	**17,436**
Major Group		
60	169	558
61	22	63
62	31	80
63	13	28
64	39	100
65	6,817	8,409
66	986	1,420
67	1,568	2,259
68	1,059	1,738
69	1,500	2,781
Division 8	**435**	**2,055**
Major Group		
80	67	737
81	1	1
82	360	1,301
83	7	16

62.2 Surprisingly, there is just one establishment in the district engaged in insurance and providents. Similarly, establishments providing legal services are just 7 in number. In short, the district generally shares the special features of the distribution of the total number of trade/business establishments observed earlier in the case of the State as a whole.

62.3 It will be seen that out of the total number of 19,491 persons employed in trade/commercial establishments in Gurdaspur district, 8,409 persons are accounted for by those engaged in the retail trade in food, food articles etc. (major group 65). Thus, while establishments returned under the major group constitute even more than half of the total number of trade/commercial establishments, these account for less than the half of the number of persons employed. This is, as will be seen by an examination of the data in the statement given above, explained by the higher incidence of 1-person units in the case of major group 65 than in the other major groups. In fact, this is true of all types of establishments engaged in the retail trade. Such establishments employ on an average less than 2 persons. In contrast, the establishments returned under the major group 80 employ on an average even more than 10 persons. High incidence of employment is discernible also in the case of establishments returned under the major group 82. It may, however, be noted that higher incidence of employment in the case of establishments returned under the two major groups, is due to their claim on a majority of large-sized establishments. Of the total number of 7 establishments, employing 50 or more persons each, the two major groups put together account for 4 establishments. The remaining 3 are claimed by the major groups 69 and 60.

Rural-Urban differentials :

62.4 A striking feature of the differentials between the rural and urban distribution of trade/commercial establishment, shown in the following statement is an overwhelming concentration of establishments engaged in the retail trade in food,

food articles etc. (major group 65) in rural areas and of those engaged in retail trade in all other commodities in urban areas of the district.

STATEMENT III.85

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Gurdaspur District by Divisions/Major Groups in rural and urban areas separately

Division/ Major Group		Rural		Urban	
		No of establishments	No. of persons employed	No. of establishments	No. of persons employed
1		2	3	4	5
Division (6+8)		**5,998**	**7,202**	**6,641**	**12,289**
Division 6		**5,949**	**7,078**	**6,256**	**10,358**
Major Group	60	12	166	157	392
	61	4	4	18	59
	62	..	..	31	80
	63	1	1	12	27
	64	6	17	33	83
	65	4,520	5,080	2,297	3,329
	66	267	332	719	1,088
	67	328	388	1,240	1,871
	68	227	309	832	1,429
	69	584	781	916	2,000
Division 8		**49**	**124**	**386**	**1931**
Major Group	80	22	40	45	697
	81	..	..	1	1
	82	25	82	335	1,219
	83	2	2	5	14

It will be noticed that the urban areas also account for a far higher number of establishments than the rural areas under division 8 and major groups 60, 61, 62, 63 and 64.

62.5 As regards the number of persons employed in trade/commercial establishments in the rural and urban areas, it is clear that the latter bear a higher incidence than the former. This becomes quite evident by a reference to the subsidiary table E-III.1 which shows that 1-person units constitute a significantly higher proportion in the rural areas (87%) than the urban areas (63%). The difference between the two proportions is pronounced particularly in the case of major groups 61, 80 and 83.

62.6 As against one unit employing 100 or more persons in the case of rural areas, the number of such units has been returned at 2 in the urban areas. While the rural unit is claimed by major group 60, the urban units fall under major groups 69 and 80.

AMRITSAR DISTRICT

63.1 Because of the fact that Amritsar city is the most important trade and commerce centre of the State, the district claims the highest number of 23,203 trade/commercial establishments in the State. The distribution of this number by various major groups, given in the following statement, reflects the familiar feature of a high incidence of establishments engaged in retail trade and a low incidence of those engaged in wholesale trade and other covered under division 8.

STATEMENT III.86

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Amritsar District by Divisions/Major Groups

Division/ Major Group		No. of establishments	No. of persons employed
	1	2	3
Division (6+8)		**23,203**	**43,615**
Division 6		**22,162**	**38,509**
Major Group	60	1,898	5,971
	61	196	604
	62	83	267
	63	17	43
	64	237	605
	65	11,027	14,861
	66	1,602	3,121
	67	2,971	4,973
	68	1,970	3,690
	69	2,161	4,374
Division 8		**1,041**	**5,106**
Major Group	80	131	1,570
	81	7	33
	82	864	3,418
	83	39	85

63.2 Interestingly, 1,898 establishments are engaged in wholesale trade in food, textiles, live animals, beverages and intoxicants (major group 60) and just 17 establishments are engaged in all types of machinery (major group 63). This marks the importance of trading in essential commodities for consumption compared to the role of the trade in machinery. In the case of establishments returned under division 8, mention needs to be made of those dealing in real estate and business services.

63.3 It will be seen that of 43,615 persons, employed in trade/commercial establishments, as many as 14,861 persons are accounted for by those returned under the major group 65. However, establishments engaged in retail trade in all other commodities including restaurants and hotels, and except those represented under major group 65, claim a higher number of persons employed. This is despite the fact that major group 65 claims a much higher number of units than the major groups 66, 67, 68 and 69 put together.

63.4 As regards the relative incidence of employment, mention needs to be made of 1,898 establishments, returned under major group 60, employing altogether 5,971 persons and 864 establishments,

returned under major group 82, (put together) employing 3,418 persons. A high incidence of employment obtains also in the case of establishments, returned under major group 80. While it is true that a large majority of units, under all major groups, employ less than 5 persons each, the high incidence of employment obtaining in the case of units returned under the major groups 80 and 82 is accountable to the fact that these claim 9 out of the 11 establishments, employing 50 or more persons. This includes one establishment employing 200 persons, returned in the district, which falls under major group 80.

Rural-Urban differentials :

63.5 A look at the table E-III brings out that Amritsar city alone accounts for more than half of the total number of trade/commercial establishments returned in the district. Out of 15,176 such establishments returned in the urban areas of the district, Amritsar city accounts for as many as 12,371. The corresponding rural figure is 8,027. It will be seen from the following statement, giving the distribution of number of units and persons employed by major groups separately for rural and urban areas, that significant rural-urban differentials exist in the proportion of units engaged in wholesale trade and those returned under major group 82.

STATEMENT III.87

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Amritsar District by rural and urban areas separately

Division/ Major Group		Rural		Urban	
		No. of Establishments	No. of persons employed	No. of establishments	No. of persons employed
1		2	3	4	5
Division (6+8)		**8,027**	**10,777**	**15,176**	**32,838**
Division 6		**7,876**	**10,112**	**14,286**	**28,397**
Major Group	60	20	82	1,878	5,889
	61	18	45	178	559
	62	5	18	78	249
	63	1	3	16	40
	64	6	7	231	598
	65	5,981	7,181	5,046	7,680
	66	405	643	1,197	2,478
	67	509	695	2,462	4,278
	68	360	511	1,610	3,179
	69	571	927	1,590	3,447
Division 8		**151**	**665**	**890**	**4,441**
Major Group	80	46	137	85	1,433
	81	..	..	7	33
	82	102	524	762	2,894
	83	3	4	36	81

63.6 Interestingly, the total number of units engaged in wholesale trade in rural areas is only 50. In contrast, the number of such units has been returned at 2,381 in the urban areas. The difference is particularly significant in the case of units returned under major group 60, which number 20 in rural areas, and as many as 1,878 in urban areas. Of the latter as many as 1,853 are accounted for by Amritsar city alone.

63.7 More than the number of units, rural-urban differentials are significant in the case of number of persons employed in such units. As against 10,777 persons employed in trade/commercial establishments in the rural areas, the urban units employ as many as 32,838 persons. A large majority of the latter (27,718) is accounted for by the units returned in Amritsar city.

63.8 A glance at the data, given in subsidiary table E-III.1, shows that the only major groups, which represent somewhat significant proportion of the units under employment categories 5 and more persons in both rural and urban areas, include 60, 62, 80 and 82. In addition, urban proportions figure significantly also under major groups 61, 64 and 81. It is also interesting to note that rural units, returned under employment category 10-19 persons, constitute 15.7 per cent of the total number of units in the case of major group 82, and urban units, returned under employment categories 10-19 persons and 20-49 persons, constitute proportions of 16.5 per cent and 20.0 per cent respectively in the case of major group 80.

63.9 Of the 11 units employing 50 or more persons each in the district, as many as 10 are claimed by Amritsar city. One of these units, employing as many as 200 persons, is accounted for by major group 80. The remaining 9 units are engaged in activities represented under major groups 68, 69 and 80.

FIROZPUR DISTRICT

64.1 It will be seen from the following statement, giving distribution of trade/commercial establishments by major groups in Firozpur district, that all but 362 establishments of the total number of 18,573 establishments returned in the district under

division 6 are either hotels and restaurants or else are engaged in retail trade in various types of commodities.

STATEMENT III.88

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Firozpur District by Divisions/Major Groups

Division/ Major Group		No. of Establish-ments	No. of persons employed
	1	2	3
Division	**(6+8)**	**19,821**	**33,077**
Division	**6**	**18,573**	**28,687**
Major Group	60	280	686
	61	32	62
	62	15	24
	63	6	12
	64	29	77
	65	10,535	14,342
	66	1,539	2,902
	67	2,050	3,479
	68	1,572	2,945
	69	2,515	4,158
Division	**8**	**1,248**	**4,390**
Major Group	80	94	861
	81	9	49
	82	1,115	3,432
	83	30	48

64.2 In the case of establishments returned under division 8, as many as 1,115 establishments out of the total number of 1,248 establishments, returned under the division, are accounted for by major group 82, i.e., establishments dealing in real estate and business services.

64.3 Looking at the data by reference to type of commodities transacted, it will be seen that both in wholesale and retail trade activity, food figures most prominently. Next in importance are commodities like fuel and household utilities.

64.4 Trade/commercial establishments in Firozpur district employ altogether 33,077 persons. Interestingly, the average number of persons employed in an establishment works out to be less than 2 in the case of establishments returned under division 6 and more than 3 persons in the case of establishments returned under division 8. One of the reasons for a higher incidence of employment obtaining in the case of establishments returned under division 8 is that it accounts for all the 6 large-sized establishments, each employing 50 to 99 persons, returned in the district. Of this number, 4 are reflected under major group 82 and 2 under major group 80. Even in the case of establishments returned under employment category 20-49 persons, 17 of the 21 establishments returned under the employment category are accounted for by division 8. These also fall under mainly major groups 80 and 82.

64.5 Contrary to the position obtaining in the case of higher employment categories, 1-person units constitute almost two-thirds of the total number of units in the case of division 6 and even less than one-fourth of the number of units in the case of division 8.

Rural-Urban differentials :

64.6 Unlike Gurdaspur and Amritsar districts, more of trade/commercial establishments have been returned in the rural areas of Firozpur district compared to its urban areas. However, as will be seen from the following statement, giving the distribution of such establishments by major groups separately for rural and urban areas, rural predominance is reflected only in the case of establishments engaged in the retail trade. As regards the establishments engaged in the wholesale trade and in activities represented under division 8, the urban superiority stands out clearly. Restaurants and hotels are almost equally distributed between rural and urban areas.

STATEMENT III.89

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Firozpur District by Divisions/Major Groups by rural and urban areas separately

Division/ Major Group		Rural		Urban	
		No. of establish-ments	No. of persons employed	No. of establish-ments	No. of persons employed
1		2	3	4	5
Division	**(6+8)**	**9,949**	**12,946**	**9,872**	**20,131**
Division	**8**	**9,815**	**12,644**	**8,758**	**6,043**
Major Group	60	69	112	211	574
	61	13	17	19	45
	62	6	9	9	15
	63	2	2	4	10
	64	7	16	22	61
	65	7,237	8,992	3,298	5,350
	66	376	604	1,163	2,298
	67	430	570	1,620	2,909
	68	392	586	1,180	2,359
	69	1,283	1736	1,232	2,422
Division	**8**	**134**	**302**	**1,114**	**4,088**
Major Group	80	31	76	63	785
	81	1	1	8	48
	82	101	224	1,014	3,208
	83	1	1	29	47

64.7 A reference to the subsidiary table E-III.1 shows that more than three-fourths of the units (77.3%) are 1-person units in the rural areas, whereas more than half of the units in the urban areas (51.7%) employ 2 or more than two persons each. Among major groups which bear a significant difference in the proportion of units returned under 1-person employment category between rural and urban areas, mention may be made of major groups 60, 61, 63, 69, 81 and 83. These major groups

reflect much higher proportions of 1-person units in rural areas than urban areas. Consequently, the proportion of units under the higher employment categories is higher in the case of the latter than the former. It will also be noted that from the main table E-III that all the 6 units, returned under the employment category 50-99 persons, are claimed by the urban areas of the district. These relate to activities represented under major groups 80 and 82.

LUDHIANA DISTRICT

65.1 Data given in table E-III shows that though the total number of trade/commercial establishments, standing at 18,341 in Ludhiana district, is lower than the corresponding figure of Firozpur district, establishments engaged in wholesale trade have a much higher representation in the case of the former than the latter. As will be seen from the figures given in the following statement, reproduced from table E-III, that as many as 1,178 establishments are engaged in wholesale trade in Ludhiana district.

STATEMENT III.90

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Ludhiana District by Divisions/Major Groups

Division/ Major Group		No. of establishments	No. of persons employed
	1	2	3
Division	(6+8)	18,341	35,538
Division	6	17,305	30,312
Major Group	60	628	1,907
	61	28	74
	62	105	203
	63	318	1,004
	64	99	290
	65	7,717	11,092
	66	1,340	2,747
	67	2,194	3,882
	68	1,791	3,545
	69	3,085	5,568
Division	8	1,036	5,226
Major Group	80	229	1,873
	81	8	27
	82	729	3,194
	83	70	132

65.2 Another highlight of the data given above is that hotels and restaurants constitute as high as 17 per cent of the total number of trade/commercial establishments, returned in the district.

65.3 The fact that as many as 318 establishments are engaged in wholesale trade in different types of machinery, equipment including transport and electrical equipment (major group 63), establishes the link between industry and trade/commerce. In the case of other districts discussed earlier, the number of establishments returned under this major group is hardly of any significance.

65.4 A noteworthy feature of the distribution of the total number of persons employed in various types of trade/commercial establishments is the incidence of employment reflected in the case of establishments returned under division 8. As many as 5,226 persons are employed in 1,036 establishments returned under the division. The division accounts for 6 of the 8 establishments returned under the employment category 50-99 persons and 5 of the 6 establishments returned under the employment category 100 or more persons. These are shared between the major groups 80 and 82. The remaining 2 establishments returned under the employment category 50-99 persons are claimed by major group 65 whereas one establishment returned under the employment category 100 or more persons, employing in all 236 persons, is claimed by major group 69.

Rural-Urban differentials :

65.5 Like Amritsar district, there is an overwhelming concentration of trade/commercial establishments in the urban areas of Ludhiana district. As against 6,103 such establishments returned in its rural areas, urban areas of the district account for as many as 12,238 establishments. As will be seen from the following statement, giving the distribution of such establishments by major groups separately for rural and urban areas, practically all the establishments engaged in wholesale trade are claimed by the latter. Similarly, the number of establishments returned under division 8 in the urban areas is almost four times the corresponding rural number.

STATEMENT III.91

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Ludhiana District by Divisions/Major Groups in rural and urban areas separately

Division/ Major Group		Rural		Urban	
		No. of establishments	No. of persons employed	No. of establishments	No. of persons employed
1		2	3	4	5

	81	..	..	8	27
	82	60	263	669	2,931
	83	..	..	70	132

Major groups, which account for a significantly higher number of units in urban areas than rural areas, include 60, 62, 63, 66, 67, 68 and 82. It will be noted from the table E-III that Ludhiana city claims 8,732 units out of 12,238 units returned in the urban areas of the district. The city also accounts for a large majority of units returned under division 8 and those engaged in wholesale trade.

65.6 As regards the number of persons employed in rural and urban units, it is interesting to note that while the urban units are just twice the number of rural units, the former employ even more than three times the number of persons employed in the latter. It is also to be noted that while units returned under major group 65 account for more than half of the total number of persons employed in trade/commercial establishments in the rural areas of the district the units returned under the major group in urban areas claim just one-fourth of the total number of persons employed in all urban units Another interesting characteristic of the data is that while 150 units returned under the major group 80 in the rural areas employ altogether 386 persons, just 79 units returned under the major group in the urban areas employ as many as 1,487 persons. The significance of this rural-urban differentials is further corroborated by the data given in the subsidiary table E-III.1 which shows that units employing 2 or more persons under major group 80 constitute proportion of 56 per cent and 79.8 per cent of the total number of units in rural and urban areas respectively.

65.7 It will be seen that there is just one trade/commercial establishment, employing 102 persons in the rural areas of the district. On the other hand, as many as 8 such establishments, under the employment category 50-99 persons, and 5 establishments under the employment category 100 and more persons have been returned in the urban areas of the district. These have all been accounted for by Ludhiana city. One of these represented under major group 69 employs as many as 236 persons.

JULLUNDUR DISTRICT

66.1 It will be seen from the table E-III that not only the number of trade/commercial establishment in Jullundur district is almost the same as in Ludhiana district but also the pattern of the distribution of such establishments in the two districts is almost identical. A glance at the distribution of trade/commercial establishments by major groups in Jullundur district, given in the following statement, shows that establishments engaged in wholesale trade and those represented under division 8, constitute about 9 per cent of the total number of such establishments. Adding to this, the number of hotels and restaurants (major group 69), which constitute about 13 per cent of the total number of trade/commercial establishments, it will be observed that about 78 per cent of the establishments are engaged in retail trade in various types of commodities. However, the fact that establishments engaged in retail trade in food and food articles (major group 65) constitute about half of the total number of trade/commercial establishments in the district needs to be highlighted.

STATEMENT III.92

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Jullundur District by Divisions/Major Groups

Division/ Major Group		No. of establishments	No. of persons employed
1		2	3
Division	(6+8)	17,833	31,690
Division	6	17,092	28,306
Major Group	*60*	*531*	*1,312*
	61	76	201
	62	140	408
	63	51	169
	64	138	387
	65	8,221	11,146
	66	1,237	2,283
	67	2,393	4,181
	68	2,065	3,762
	69	2,240	4,457
Division	8	741	3,384
Major Group	80	293	2,008
	81	2	44
	82	363	1,157
	83	83	175

66.2 As regards the incidence of employment in trade/commercial establishments, mention needs to be made of particularly 3,384 persons employed in 741 establishments, returned under division 8. Thus, the average number of persons employed in such establishments is more than 4 persons per establishment. On the other hand, the average works out to just a little more than 1 person per establishment in the case of 8,221 establishments, under major group 65, employing all told 11,146 persons. Similarly trade/commercial establishments dealing in retail trade in all other commodities, accounting for a significant share of the total number employed, employ on an average less than 2 persons each. However, the average works out to be 2 or more persons in the case of establishments dealing in wholesale trade and also hotels and restaurants represented under major group 69. The total number of trade/commercial establishments, employing 50 or more persons each, has been returned at 6. Of this number, 4 are reflected under the employment category 50-99 persons and 2 under the employment category 100 or more persons. The former employing all told 297 persons are claimed by

major groups 67(1) and 80(3) and the latter employing in all 423 persons by major groups 69(1) and 80(1).

Rural-Urban differentials :

66.3 As against 6,948 trade/commercial establishments returned in rural areas of Jullundur district, its urban areas account for as many as 10,885 units. The differentials are more conspicuous in the case of establishments dealing in wholesale trade. Except for 132 such establishments, returned in the rural areas of the district, all the establishments are accounted for by its urban areas. The following statement gives the detailed major group-wise break-up of total number of trade/commercial establishments, separately for rural and urban areas of Jullundur district :

STATEMENT III.93

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Jullundur District by Divisions/Major Groups in rural and urban areas separately

Division/ Major Group		Rural		Urban	
		No. of establish-ments	No. of persons employed	No. of establish-ments	No. of persons employed
1		2	3	4	5
Division	(6+8)	6,948	9,215	10,885	22,475
Division	6	6,726	8,716	10,366	19,590
Major Group	60	70	169	461	1,143
	61	24	51	52	150
	62	25	64	115	344
	63	2	3	49	166
	64	11	19	127	368
	65	4,654	5,658	3,567	5,488
	66	343	522	894	1,761
	67	464	646	1,929	3,535
	68	468	610	1,597	3,152
	69	665	974	1,575	3,483
Division	8	222	499	519	2,885
Major Group	80	188	437	105	1,571
	81	..	..	2	44
	82	31	59	332	1,098
	83	3	3	80	172

66.4 It will be noted that besides establishments dealing in wholesale trade, those represented under major groups 67, 68 and 82 also reflect the differential between rural and urban number of units significantly.

66.5 Of the total number of trade/commercial establishments returned in Jullundur district, Jullundur city accounts for as many as 6,549 units.

66.6 Looking at the data given in the subsidiary table E-III.1 for variation in the incidence of employment between rural and urban areas, it will be seen that units employing 5 or more persons, under division 8, in the case of two areas reflect incidence of 9.5 per cent and 25.5 per cent respectively. In the case of major group 80 particularly, as many as 62.8 per cent of units fall under the employment category in urban areas and just 10.6 per cent in rural areas. Significant differentials between rural and urban proportions under the higher employment categories also obtain in the case of units returned under major groups 62, 63, 64 and 82. It is pertinent to note that 105 units, returned under major group 80 in the urban areas, employ as many as 1,571 persons. The high incidence of employment obtaining in the case of units returned under the major group is due mainly to 3 units returned under the employment category 50-99 persons, employing in all 203 persons and one unit returned under employment category 100 persons, employing 225 persons. All these units are accounted for by Jullundur city. The City also claims one unit employing 198 persons returned under major group 69.

KAPURTHALA DISTRICT

67.1 With 5,039 trade/commercial establishments, the district has one of the smallest number of such units in the State. These employ altogether 7,844 persons. The distribution of the number of units and the number of persons employed by various major groups, given in the following statement, shows that but for a small number of units engaged in wholesale trade and activities represented under division 8, all the units are engaged in retail trade mainly in food and food articles and also in other commodities:

STATEMENT III. 94

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Kapurthala District by Divisions/Major Groups

Division/ Major Group		No.of establish-ments	No. of persons employed
1		2	3
Division	(6+8)	5,039	7,844
Division	6	4,827	6,998
Major Group	60	35	117
	61	15	27
	62	11	20
	63	39	139
	64	44	123
	65	2,384	2,958
	66	429	711
	67	741	1,102
	68	682	1,074
	69	447	727
Division	8	21	846
Major Group	80	4	338
	81	1	11
	82	159	488
	83	4	9

67.2 Looking at the data given in the table E-III, it will be seen that of the total number of 7,844 persons employed in the trade/commercial establishments in Kapurthala district, as many as 6,515 persons are employed in units, which employ on an average less than 5 persons. Such units constitute about 90 per cent of the total number of units.

67.3 It will be seen that no unit employing 50 or more persons has been returned in the district. The number of units under the employment categories 20-49 and 10-19, has been returned at 9 and 26 respectively. Of the former, 6 have been claimed by major group 80 and one each by major groups 60, 63 and 64.

67.4 While it is true that, because of the proportion of units returned under major groups 65, 67 and 68, these account for a large majority of the number of persons employed. The average number of persons employed in such units is less than 2 persons per establishment. On the other hand, the units returned under major group 80 employ on an average 7 persons per unit.

Rural-Urban differentials :

67.5 As against 3,067 trade/commercial establishments returned in urban areas of Kapurthala district, there are just 1,972 such establishments in its rural areas. As will be seen from the following statement, giving the distribution of trade/commercial establsihments in rural and urban areas of Kapurthala district by various major groups, the urban areas account for a large majority of the units in respect of major groups 60, 61, 62, 63, 64, 67 and 82. The first five major groups, representing wholesale trade activity, account for just 7 units in rural and 137 units in urban areas:

STATEMENT III.95

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Kapurthala District by Divisions/Major Groups in rural and urban areas separately

Division/ Major Group		Rural		Urban	
		No. of establish-ments	No. of persons employed	No. of establish-ments	No. of persons employed
1		2	3	4	5
Division	(6+8)	1,972	2,318	3,067	5,526
Division	6	1,937	2,227	2,890	4,771
Major Group	60	2	6	33	111
	61	1	1	14	28
	62	..	..	11	20
	63	1	2	38	137
	64	3	3	41	120
	65	1,265	1,448	1,119	1,510
	66	104	123	325	588
	67	153	187	588	915
	68	238	262	444	812
	69	170	195	277	532
Division	8	35	91	177	755
Major Group	80	24	51	24	287
	81	..	..	1	11
	82	11	40	148	448
	83	..	..	4	9

67.6 More significant rural-urban differentials obtain in the case of number of persons employed than in the number of units. Number of persons employed in urban units is more than twice the corresponding rural number.

67.7 While the higher number of persons employed in urban units than in the rural units is understandable in the case of major groups, which account for a higher number of units in urban areas than the rural areas, it is interesting to note that units under major group 65 which have been returned in a higher number in the case of the latter than the former claim a higher number of persons employed in the case of the former than the latter. It will also be noted that all the 9 units, returned under the employment category 20-49 persons, are claimed by the urban areas.

67.8 A reference to subsidiary table E-III.1 shows that while the rural proportions are higher than the urban proportions, under 1-person employment category, in a distribution of 1,000 units by various employment categories, the reverse is true of higher employment categories in respect of all major groups.

HOSHIARPUR DISTRICT

68.1 If the number of trade/commercial establishments is any indicator of the size of trade activity, then 11,484 such establishments returned in Hoshiarpur district, compared to 5,039 establishments of Kapurthala district, conclusively prove that the size of the trade in the case of former is more than double than that of the latter. However, as will be seen from the following statement, giving the distribution of trade/commercial establishments by various major groups in Hoshiarpur district, the pattern of distribution in the two districts is not dissimilar.

STATEMENT III.96

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Hoshiarpur District by Divisions/Major Groups

Division/ Major Group		No. of establish-ments	No. of persons employed
1		2	3
Division	(6+8)	**11,484**	**16,869**
Division	**6**	**11,135**	**15,830**
Major Group	60	163	502
	61	15	31
	62	45	75
	63	13	34
	64	22	31
	65	5,710	7,189
	66	801	1,341
	67	1,501	2,195
	68	1,128	1,615
	69	1,737	2,817
Division	**8**	**349**	**1,039**
Major Group	80	169	594
	81	1	26
	82	138	365
	83	41	54

68.2 In the case of establishments engaged in the wholesale trade, the only activity, which is represented by a significant number of establishments, relates to trade in food, textiles, live animals, beverages and intoxicants (major group 60) and trade in wood, paper etc. etc. (major group 62).

68.3 It will be seen that establishments, dealing in retail trade in food and food articles, beverages, tobacco etc. (major group 65) account for half of the total number of trade/commercial establishments in the district. If all the commodities are taken together into account, then retail trade accounts for about 80 per cent of total number of trade/commercial establishments. Restaurants and hotels, represented by major group 69, claim a share of another 15 per cent.

68.4 Establishments, represented under major groups 80 and 82, are mainly either banks and similar type of financial institutions or those providing real estate and business services.

68.5 The number of persons employed in establishments engaged in retail trade in various types of commodities, standing at 12,340 constitute 73 per cent of the total number of persons employed in trade/commercial establishments. Thus it will be seen that 80 per cent of the units claim just 73 per cent of the number of persons employed. On the other hand, 15 per cent of units returned under the major group 69, claim 17 per cent of persons employed. Of the units bearing relatively a higher incidence of employment, mention may be made of 163 units, employing 502 persons under major group 60; 594 persons employed in 169 units under major group 80 and 365 persons employed in 138 units under major group 82.

68.6 As regards large-sized units, it will be seen from table E-III that there is no unit in the district employing 100 or more persons. However, there are 6 units returned under the employment category 50-99 persons and 12 units under the employment category 20-49 persons. Of the 6 units returned under employment category 50-99 persons, 4 have been claimed by major group 69 and one each by major groups 60 and 80.

Rural-Urban differentials :

68.7 Rural areas of the district account for a large majority of 7,050 trade/commercial establishments when the urban areas claim just 4,434 such units. Their distribution by major groups given in the following statement, shows that while establishments under major groups 65, 69 and 80 have been returned predominantly in the rural areas, the urban areas account for larger number of establishments than the rural areas under major groups 60, 66, 67, 68 and 82.

STATEMENT III.97

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Hoshiarpur District by Divisions/Major Groups in rural and urban areas separately

Division/ Major Group		Rural		Urban	
		No. of establish-ments	No. of persons employed	No. of establish-ments	No. of persons employed
1		2	3	4	5
Division	(6+8)	**7,050**	**8,713**	**4,434**	**8,158**
Division	**6**	**6,892**	**8,419**	**4,243**	**7,411**
Major Group	60	12	73	151	429
	61	3	3	12	28
	62	30	57	15	18
	63	6	12	7	22
	64	14	15	8	16
	65	4,192	4,799	1,518	2,390
	66	364	507	437	834
	67	599	712	902	1,483
	68	549	642	579	973
	69	1,123	1,599	614	1,218
Division	**8**	**158**	**294**	**191**	**745**
Major Group	80	133	239	36	355
	81	..	..	1	26
	82	25	55	113	310
	83	..	..	41	54

68.8 Interestingly, there are many more banks and other financial institutions (major group 80) in the rural areas than in the urban areas. Besides, except for retail trade in food and food articles (major group 65), retail trade in other type of commodities in the district is essentially an urban trade

activity. In the case of the wholesale trade, the edke the urban areas have over the rural areas, is understandable.

68.9 It will be noted that whereas there is a difference of 2,616 units between the rural and urban number of units, the difference in the number of persons employed in these units is not more than 557 persons. This is despite the fact that of the 6 units returned under the employment category 50-99 persons, 4 are claimed by the rural areas.

68.10 A clearer picture of the difference in the incidence of employment between rural and urban areas emerges by a glance at the data given in the subsidiary table E-III.1 which shows that units employing 5 or more persons constitute much higher proportion of the total number of units in the urban areas than in the rural areas. In this connection, mention may be made of particularly major groups 63 and 80, which account for altogether 28.6 per cent and 69.4 per cent units respectively under the employment categories 5-9 persons, 10-19 persons and above in the urban areas. As against this, the corresponding rural proportions under the two major groups are 16.7 per cent and 6.8 per cent respectively. Other major groups which reflect significant rural-urban differentials, under various employment categories, include 60, 61, 62 and 64.

ROPAR DISTRICT

69.1 Among all the districts of the Punjab State, the second lowest number of 6,080 trade/commercial estabilshments has been returned in Ropar district. It will be seen from the following statement, giving the distribution of this number by major groups except for 153 establishments dealing in wholesale trade and 148 establishments returned under division 8, all the establishments deal in retail trade in various types of commodities and in major group 69—hotels and restaurants.

STATEMENT III.98

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Ropar District by Divisions/Major Groups

Division/ Major Group		No. of establish-ments	No. of persons employed
1		2	3
Division	**(6+8)**	**6,080**	**9,430**
Division	**6**	**5,932**	**8,785**
Major Group	60	84	239
	61	12	36
	62	21	83
	63	6	15
	64	30	60
	65	2,647	3,699
	66	452	734
	67	633	925
	68	826	1,134
	69	1,221	1,860
Division	**8**	**148**	**645**
Major Group	80	54	289
	81	1	23
	82	76	304
	83	17	29

69.2 Of the total number of persons employed in trade/commercial establishments, standing at 9,430, establishments dealing in wholesale trade employ altogether 433 persons and those engaged in business pursuits, represented by division 8, employ in all 645 persons. This means that all the remaining 8,352 persons are employed in the units engaged in the retail trade and the units returned under major group 69. However, the average number of persons employed in units engaged in retail trade is lower than in other units, which has a significant impact on the overall average. Consequently it will be seen that of the total number of 6,080 units, as many as 5,942 units employ on an average less than 5 persons. The average is highest in the case of units returned under division 8. This is partly due to the reason that the division claims 7 of the 12 units returned under the employment category 20-49 persons. One unit employing 80 persons has been returned under major group 69.

Rural-Urban differentials :

69.3 The distribution of the total number of trade/commercial establishments by major groups for rural and urban areas separately given in the following statement, shows that out of 3,559 and 2,521 such establishments returned in the rural and urban areas respectively, just 47 and 106 establishments respectively deal in wholesale trade.

STATEMENT III.99

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Ropar District by Divisions/Major Groups in rural and urban areas separately

	62	6	66	15	17
	63	1	3	5	12
	64	4	4	26	56
	65	1,762	2,195	885	1,504
	66	177	252	275	482
	67	206	256	427	669
	68	543	687	283	447
	69	758	882	463	978
Division	**8**	**66**	**138**	**82**	**507**
Major Group	80	30	67	24	222
	81	..	..	1	23
	82	36	71	40	233
	83	..	..	17	29

Even in the case of division 8, just 66 and 82 establishments have been returned in rural and urban areas respectively.

69.4 As regards the number of persons employed in trade/commercial establishments in rural and urban areas, it will be seen that the average number of persons employed in both the cases is less than 2. However, a significant average of 11 persons per establishment obtains in the case of major group 62 in rural areas. This is so because 2 establishments, returned under the major group, employ 40 persons. In the case of urban areas, most significant average of 6 persons per establishment obtains under division 8. Mention may also be made of one establishment returned in urban areas under major group 69, employing 80 persons.

PATIALA DISTRICT

70.1 Though, 13,335 trade/commercial establishments have been returned in Patiala district, their distribution by major groups given in the following statement shows, that in all not more than 56 establishments are engaged in wholesale trade in fuel, light, chemicals, perfumery, ceramics, glass etc. (major group 61), wood, paper etc. (major group 62) and machinery equipment etc. (major group 63). On the other hand, as many as 116 establishments deal in wholesale trade in miscellaneous manufacturing activities (major group 64).

STATEMENT III.100

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Patiala District by Divisions/Major Groups

Division/ Major Group		No. of establish-ments	No. of persons employed
1		2	3
Division	**(6+8)**	**13,335**	**24,294**
Division	**6**	**12,802**	**21,336**
Major Group	60	239	813
	61	20	41
	62	22	53
	63	14	43
	64	116	354
	65	6,333	8,845
	66	1,150	2,245
	67	1,511	2,559
	68	1,203	2,159
	69	2,194	4,224
Division	**8**	**533**	**2,958**
Major Group	80	113	1,430
	81	6	107
	82	391	1,382
	83	23	39

70.2 In the case of division 8, the only major groups which represent significant number of units include 80 (113 units) and 82 (391 units). It is also interesting to note that there are as many as 2,194 hotels and restaurants (represented by major group 69) in Patiala district, formerly a princely State.

70.3 Trade/commercial establishments employ in all 24,294 persons, giving an average of about 2 persons per establishment. Among the large-sized units, mention may be made of one establishment under major group 69 employing 348 persons, one establishment under major group 80 employing 600 persons and one establishment under major group 82 employing 110 persons. These very major groups claim 4 of the 5 establishments returned under employment category 50-99 persons. Other important features of the data are that (i) 113 units returned under major group 80 employ in aggregate 1,430 persons, (ii) 6 units under major group 81 employing in all 107 persons and (iii) 391 units returned under major group 82 employ as many as 1,382 persons.

Rural-Urban differentials :

70.4 More of the trade/commercial establishments have been returned in the urban areas than in the rural areas of Patiala district. The following statement, giving the distribution of such establishments by major groups separately for rural and urban areas, shows that except for 34 establishments, all establishments engaged in wholesale trade are accounted for by the urban areas of the district:

STATEMENT III.101

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Patiala District by Divisions/Major Groups in rural and urban areas separately

Division/ Major Group		Rural		Urban	
		No. of establish-ments	No. of persons employed	No. of establish-ments	No. of persons employed
1		2	3	4	5
Division	(6+8)	5,399	7,269	7,936	17,025
Division	6	5,264	6,730	7,538	14,606
Major Group	60	23	48	216	765
	61	2	5	18	36
	62	5	5	17	48
	63	1	2	13	41
	64	3	4	113	350
	65	4,626	4,495	2,707	4,350
	66	202	297	948	1,948
	67	204	291	1,307	2,268
	68	222	318	981	1,841
	69	976	1,265	1,218	2,959
Division	8	135	539	398	2,419
Major Group	80	56	164	57	1,266
	81	..	..	6	107
	82	79	375	312	1,007
	83	..	..	23	39

70.5 It will be seen that while practically all the units, under major group 80, are equally accounted for by the rural and urban areas, a large majority of the units under major group 82 is claimed by the urban areas. Similarly, in the case of establishments dealing in retail trade, except for those dealing in retail trade in food and food articles (major group 65), all others have been returned in a significantly higher number in the urban areas than in the rural areas. The pattern of distribution observed in the urban areas is a reflection of the distribution pattern of units obtaining in the case of Patiala city, which accounts for as many as 3,311 of the total number of urban units. The city claims 2 of the 3 large-sized units, one employing 600 persons and another 348 persons.

70.6 A glance at the data given in the subsidiary table E-III.1 shows that units employing 5 or more persons each constitute a proportion of 70.2 per cent of the total number of urban units in the case of major group 80 as against the corresponding rural proportion of 23.2 per cent. Among other major groups, which reflect significant proportion of units under higher employment categories, include those which represent wholesale trade in various types of commodities but only in the urban areas and not in the rural areas.

SANGRUR DISTRICT

71.1 Of 12,630 trade/commercial establishments returned in Sangrur district, 413 deal in wholesale trade and 468 in various business activities represented by division 8. Further, it will be seen from a distribution of trade/commercial establishments by major groups, given in the following statement, that 314 of the 413 establishments engaged in the wholesale trade handle commodities like food, textiles, live animals etc. (major group 60).

STATEMENT III.102

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Sangrur District by Divisions/Major Groups

Division/ Major Group		No. of establish-ments	No. of persons employed
1		2	3
Division	(6+8)	12,630	19,957
Division	6	12,162	18,197
Major Group	60	314	675
	61	34	63
	62	52	66
	63	4	6
	64	9	15
	65	6,273	8,673
	66	908	1,808
	67	1,283	1,953
	68	1,044	1,898
	69	2,241	3,040
Division	8	468	1,760
Major Group	80	88	573
	82	353	1,121
	83	27	66

71.2 In the case of division 8, the highest number of 353 establishments render real estate and business services (major group 82).

71.3 Establishments engaged in the retail trade constitute about three-fourths of the total number of trade/commercial establishments while those dealing in retail trade in food articles (major group 65) account for half of the total number. Hotels and restaurants (mostly tea shops) have also been returned in a significant number, constituting 18 per cent of the total number of trade/commercial establishments.

71.4 As regards the size of employment in trade/commercial establishments, it will be seen that the average number of persons employed under division 8 is significantly higher than the corresponding average obtaining under division 6. While the average number of less than 2 persons per establishment is understandable in the case of establishments engaged in the retail trade, the position is not much different even in the case of establishments dealing in wholesale trade, the only exception in the case

of the latter is major group 60, which bears out an average of even more than 2 persons per establishment. The same is more or less true of the establishments returned under the major group 66.

71.5 The only highlight of the large-sized establishments in the district is that one unit employs 50 persons.

Rural-Urban differentials :

71.6 It will be seen from the following statement, giving the distribution of total number of trade/commercial establishments by major groups separately for the rural and urban areas, that though more of such units have been returned in the rural areas than in the urban areas, the latter represent higher number of units than the former under all the major groups except 65, 69 and 80.

STATEMENT III.103

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Sangrur District by Divisions/Major Groups in rural and urban areas separately

Division/ Major Group		Rural		Urban	
		No. of establishments	No. of persons employed	No. of establishments	No. of persons employed
1		2	3	4	5
Division	(6+8)	6,411	8,135	6,219	11,822
Division	6	6,321	7,899	5,841	10,298
Major Group	60	19	26	295	649
	61	12	15	22	48
	62	3	6	49	60
	63	2	3	2	3
	64	5	9	4	6
	65	4,218	5,306	2,060	3,367
	66	240	332	668	1,426
	67	348	462	940	1,491
	68	231	300	813	1,598
	69	1,253	1,390	988	1,650
Division	8	90	236	378	1,524
Major Group	80	53	138	35	435
	82	37	98	316	1,023
	83	..	..	27	66

71.7 As a glance at the above figures shows, significant rural-urban variations in the number of units osbtain in the case of major groups 60, 65, 67, 68 and 82.

71.8 It is interesting to note that while the number of units is higher in the case of the rural areas than in the urban areas, the reverse is true of size of employment in the two sectors. The difference in the incidence of employment between the rural and urban units is manifest by making a reference to the subsidiary table E-III.1, which shows that as against 49.8 per cent of units employing 2 or more persons each in the case of urban areas, the rural proportion is just 21.9 per cent. Such differentials are conspicuous particularly in the case of major groups 60, 61, 68, 69 and 80.

BHATINDA DISTRICT

72.1 The trade/commercial sector in Bhatinda district is quite sizable, constituted of 13,700 establishments. More than half of this number is accounted for by those engaged in the retail trade in food, beverages etc. (major group 65). The second highest number is of hotels and restaurants represented by major group 69. Of the remaining, as will be seen from the following statement giving the distribution of trade/commercial establishments by major groups, except for 413 establishments returned as dealing in wholesale trade in various types of commodities and 840 returned under division 8, all other establishments are engaged in retail trade in commodities other than those covered under major group 65.

STATEMENT III.104

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Bhatinda District by Divisions/Major Groups

Division/Major Group		No. of establishments	No. of persons employed
1		2	3
Division	(6+8)	13,700	23,427
Division	6	12,860	20,919
Major Group	60	345	1,251
	61	35	71
	62	12	60
	63	4	18
	64	17	38
	65	7,425	10,457
	66	978	2,062
	67	1,103	1,913
	68	1,091	2,004
	69	1,850	3,045
Division	8	840	2,508
Major Group	80	69	535
	81	8	111
	82	727	1,806
	83	36	56

72.2 It will be seen that a large majority of the establishments in the case of wholesale trade is accounted for by major group 60 and in respect of activities represented by division 8 by major group 82.

72.3 According to the data, given in the statement above, the average number of persons employed in a trade/commercial establishment in Bhatinda district is less than 2 persons. This is because as many as 8,203 units, out of the total number of 13,700 units, are 1-person units. However, it is noteworthy that the average works out to 3 or even more than

3 persons per establishment in the case of major groups 60, 62, 63 and division 8. An average of more than 2 persons obtains also in the case of major groups 61, 64 and 66. Comparatively, the average works out to less than 2 persons per establishment in the case of the major groups which account for a large majority of the units.

72.4 A reference to table E-III shows that units employing 100 or more persons have not been returned in the district and of the 2 establishments returned, under employment category 50—99 persons, one is claimed by major group 69 and the second one by major group 81.

Rural-Urban differentials :

72.5 A glaring rural-urban differential is reflected by a glance at the data, given in table E-III, which shows that while 7,116 units employ in aggregate 15,045 persons in the urban areas, 6,584 rural units employ altogether 8,382 persons. Distribution of these figures by major groups, given in the following statement, shows, that except for major group 65, the urban figures exceed the corresponding rural figures significantly in the case of all the major groups.

STATEMENT III.105

Number of Establishments and Persons Employed in Trade/Commercial Establishments in Bhatinda District by Divisions/Major Groups in rural and urban areas separately

Division/Major Group		Rural		Urban	
		No. of establish-ments	No. of persons employed	No. of establish-ments	No. of persons employed
1		2	3	4	5
Division	**(6+8)**	**6,584**	**8,382**	**7,116**	**15,045**
Division	**6**	**6,538**	**8,275**	**6,322**	**12,644**
Major Group	60	4	7	341	1,244
	61	17	18	18	53
	62	2	4	10	56
	63	..	..	4	18
	64	..	..	17	38
	65	4,987	6,258	2,438	4,199
	66	240	402	738	1,660
	67	189	272	914	1,641
	68	251	342	840	1,662
	69	848	972	1,002	2,073
Division	**8**	**46**	**107**	**794**	**2,401**
Major Group	80	25	77	44	458
	81	..	..	8	111
	82	21	30	706	1,776
	83	..	..	36	56

72.6 The higher incidence of urban employment will be observed from the data, given in the subsidiary table E-III.1, which shows that units employing 5 or more persons constitute proportions of 20.9 per cent in the case of major group 60, 16.7 per cent in the case of major group 61, 50.0 per cent each in the case of major groups 62 and 63, 79.5 per cent in the case of major group 80 and 37.5 per cent in the case of major group 81 in the urban areas. This contrasts sharply with the position obtaining in the case of the rural sector. Among these major groups, except for 16.0 per cent of the units employing 5 or more persons under major group 80, all the units employ less than 5 persons each in rural areas.

Section 3—OTHER ESTABLISHMENTS

73.1 This Section deals with economic activities of establishments other than manufacturing and trading. As has been stated earlier, activities of manufacturing and trade establishments are represented by divisions 2 & 3, 6 and 8. Activities of establishments, other than manufacturing and trade establishments, being referred to as 'other establishments' are represented by divisions 0, 1, 4, 5, 7 and 9 of the National Industrial Classification. Data relating to the distribution of 'other establishments' has been presented in the main table E-IV and subsidiary table E-IV-1.

73.2 It will be seen from the main table E-IV that 69,634 'other establishments' have been returned in the Punjab State. Of these, 55,405 establishments or 80 per cent of the total number of 'other establishments' are accounted for by division 9 of the National Industrial Classification. These include government offices, educational, scientific and research institutions, medical institutions, religious institutions, laundries, hair dressing shops, cinema halls, libraries, museums etc. etc. Other divisions which represent a significant number of establishments include divisions 7, 4 and 0.

73.3 The break-up of 'other establishments' by major groups is given in the following statement :

STATEMENT III.106

Number of Establishments and persons employed in 'Other Establishments' in the State by Divisions/Major Groups

Division/Major Group		No. of establish-ments	No. of persons employed
1		2	3
All Divisions		**69,634**	**264,138**
Division	**0**	**1,266**	**2,314**
Major Group	00	15	322
	02	1,235	1,902
	03	1	2
	04	9	78
	05	2	3
	06	4	7

1		2	3
Division	**1**	**6**	**38**
Major Group	10	5	7
	12	1	31
Division	**4**	**4,448**	**7,213**
Major Group	40	77	1,323
	42	4,371	5,890
Division	**5**	**71**	**259**
Major Group	50	25	171
	51	46	88
Division	**7**	**8,438**	**32,365**
Major Group	70	953	13,975
	71	2	4
	72	1	5
	73	590	3,312
	74	5,769	8,679
	75	1,123	6,390
Division	**9**	**55,405**	**221,949**
Major Group	90	6,207	79,095
	91	9	44
	92	11,857	78,739
	93	8,122	21,887
	94	20,993	25,985
	95	483	2,760
	96	7,546	12,772
	98	1	1
	99	187	666

73.4 It will be seen that out of the 1,266 establishments, returned under division 0, as many as 1,235 are engaged in livestock production (major group 02). Similarly, in the case of division 4, 4,371 units out of the total number of 4,448 units, deal in water supply (major group 42) and just 77 in supply of electricity (major group 40).

73.5 As regards establishments returned under division 7, as many as 5,769 out of the total number of 8,438 establishments are accounted for by major group 74. These are warehouses, cold storages and other types of storages. Besides, 1,123 units are claimed by the major group 75, which represents posts and telegraph, wireless and other communication centres. Mention may also be made of the 953 units, returned under major group 70, representing land transport and 590 units under major group 73 representing services incidental to transport, such as packing, crating, travel agency, etc.

73.6 Looking at the distribution of units by major groups, under division 9 in the statement given above, the highest number of 20,993 establishments is accounted for by the major group 94, representing religious and welfare services. These are largely gurdwaras, temples, mosques and churches. The second highest number of 11,857 establishments, under the division, is claimed by the major group 92 representing educational, scientific and research services. However, it is a safe presumption that a large majority of this number constitutes of schools and colleges. Other establishments represented significantly under the division include (i) 8,122 establishments represented under the major group 93, which include mainly hospitals, primary health centres, dispensaries and clinics, (ii) 7,546 establishments, returned under the major group 96, which include laundries, hair dressing shops, photographic studios etc. and (iii) 6,207 establishments returned under the major group 90, which include state and central government offices and other quasi-government bodies.

DISTRIBUTION OF 'OTHER ESTABLISHMENTS' AMONG DISTRICTS

74.1 The following statement gives the distribution of 'other establishments' by divisions among various districts of the State:

STATEMENT III.107

Distribution of 'Other Establishments' by Divisions among districts of the State

State/District	Total No. of other establishments	Number of establishments under					
		Division 0	Division 1	Division 4	Division 5	Division 7	Division 9
1	2	3	4	5	6	7	8
Punjab	**69,634**	**1,266**	**6**	**4,448**	**71**	**8,438**	**55,405**
Gurdaspur ..	6,276	48	..	788	3	630	4,807
Amritsar ..	8,500	63	1	211	13	1,287	6,925
Firozpur ..	9,728	46	1	1,790	6	1,368	6,517
Ludhiana ..	7,149	129	..	80	8	1,070	5,862
Jullundur ..	9,366	127	1	102	12	1,360	7,764
Kapurthala ..	2,317	14	2	5	9	245	2,042
Hoshiarpur ..	6,944	355	1	20	1	730	5,837
Ropar ..	3,323	135	..	12	4	233	2,939
Patiala ..	6,669	92	..	715	5	707	5,150
Sangrur ..	4,990	77	..	351	6	349	4,207
Bhatinda ..	4,372	180	..	374	4	459	3,355

74.2 The highest number of 9,728 'other establishments' has been returned in Firozpur district and the lowest number of 2,317 establishments in Kapurthala district.

74.3 Interestingly, the highest number of 355 establishments, under division 0, is accounted for by Hoshiarpur district while some of the other districts claim a significantly higher number of 'other establishments' than Hoshiarpur. Similarly, the second highest number of establishments under division 0 is accounted for by Bhatinda district which otherwise figures almost at the bottom in the distribution of 'other establishments' among various

districts of the State. It has already been stated that practically all the establishments, returned under division 0, deal in livestock production (major group 02).

74.4 In keeping with its position in the distribution of the total number of 'other establishments', Firozpur district claims the highest number of 1,790 establishments under division 4. However, Gurdaspur and Patiala districts, which claim the second and third highest number of 788 and 715 establishments respectively rank after Jullundur, Amritsar, Ludhiana and Hoshiarpur districts in the distribution of the total number of 'other establishments'. Sangrur and Bhatinda districts also figure prominently in the distribution of units under division 4. The units returned under division 4 are mainly those engaged in the distribution of water supply (major group 42) in all the districts.

74.5 The distribution of units under division 7 is more or less consistent with the distribution of the total number of 'other establishments'. The only inconsistency is that while Ropar district claims more of the latter units than Kapurthala, reverse is true of the former. Similarly while Sangrur district claims more of the latter units than Bhatinda, reverse is true of the former. It will also be noted from the data given in the main table E-IV, that of the 5,769 establishments, returned under major group 74, as many as 3,662 units are accounted for by just four districts, viz., Jullundur, Ludhiana, Amritsar and Firozpur. Establishments returned under the major groups 70 and 75 are more or less evenly distributed among the districts.

74.6 As regards establishments returned under division 9, it will be seen that the highest number of 7,764 establishments has been returned in Jullundur district and not Firozpur, which claims the highest number of 'other establishments'. The second highest number, under the division is accounted for by Amritsar district followed by Firozpur district. However, surprisingly, the distribution of units under the division is consistent with the distribution of 'other establishments'. A look at the main table E-IV clearly shows that the districts which claim a significant share of the total number of establishments returned under major group 94, include Amritsar, Firozpur, Jullundur and Hoshiarpur. These four districts put together account for about half of the religious institutions represented by the major group. It will be seen that unlike the position obtaining at the State level, more of establishments (1,439) have been returned under the major group 96 than major group 93 (1,015) in the case of Jullundur district. Similarly, in the case of some of the districts, more of establishments have been returned under the major group 90 than the major group 96.

EMPLOYMENT IN 'OTHER ESTABLISHMENTS'

75.1 The importance of 'other establishments' offering large scale employment can be visualized by the fact that these employ as many as 264,138 persons. Employment is, of course, mainly being offered in government offices, schools, religious institutions etc. As will be seen from the main table E-IV, the establishments returned under division 9 employ in aggregate 221,949 persons.

75.2 Because of the fact that religious institutions are more often than not 1-person units, it will be seen that 20,993 units, returned under major group 94, employ in all 25,985 persons as against 79,095 persons employed in the 6,207 units, returned under the major group 90. The second highest number of 78,739 persons is, however, employed in 11,857 units, returned under the major group 92. Though significant figures of number of persons employed standing at 21,887, 12,772 and 2,760 have been returned under major groups 93, 96 and 95 respectively, the fact remains that government offices, schools and colleges, represented by major groups 90 and 92, account for a bulk of the total number of persons employed, not in respect of units returned under division 9, but all 'other establishments'. It also needs to be pointed out that 177 of the 217 establishments, employing 100 or more persons each, are accounted for by division 9. Of the former, 115 units have been returned under major group 90, 45 units under major group 92, 14 units under major group 93, 1 unit under major group 94 and 2 units under major group 95.

75.3 It will be seen that the second highest number of 32,365 persons is employed in the units returned under division 7. The break-up of this figure by major groups further shows that 13,975 persons are employed in the units returned under major group 70, 3,312 persons under major group 73, 8,679 persons under major group 74 and 6,390 persons under major group 75.

75.4 Among the units making a significant contribution to the total number of persons employed, mention also needs to be made of 5,890 persons employed in the units, returned under the major group 42, 1,323 persons employed in the units returned under the major group 40 and lastly 1,902 persons employed in the units returned under the major group 02.

75.5 As regards large-sized units returned under divisions 0, 1, 4, 5 and 7 mention needs to be made of the 26 units employing an aggregate of 7,518 persons under the major group 70, 4 units employing an aggregate of 718 persons under the major group 40, 6 units employing altogether 1,389 persons under the major group 75, 3 units employing

in all 403 persons under the major group 73 and 1 unit employing 150 persons under the major group 00.

75.6 In the case of employment category 50-99 persons also, as many as 359 of the 412 units are accounted for by division 9. The former are returned under major groups 90 and 92 mainly. Besides, 49 establishments returned under the employment category under division 7 are accounted for by major group 70 (23), 73 (10), 74 (5) and 75 (11). These employ in aggregate 3,310 persons.

75.7 Looking at the position of employment in 'other establishments' among various districts, it will be seen from the following statement, that the highest number of 43,016 persons has been returned as employed in 'other establishments' of Jullundur district as against 31,096 persons of Firozpur district which, otherwise, claims the highest number of units. Even Amritsar district accounts for a higher number of persons employed as compared to Firozpur district.

STATEMENT III.108

Distribution of persons employed in 'Other Establishments' by Divisions among districts of the State

State/District	Total No. of persons employed in other establishments	Number of persons employed in 'other establishments' returned under					
		Division 0	Division 1	Division 4	Division 5	Division 7	Division 9
1	2	3	4	5	6	7	8
Punjab	**264,138**	**2,314**	**38**	**7,213**	**259**	**32,865**	**221,949**
Gurdaspur ..	19,391	86	..	1,005	3	2,100	16,197
Amritsar ..	34,594	143	1	704	36	5,578	28,132
Firozpur ..	31,096	183	2	2,650	10	3,646	24,605
Ludhiana ..	31,344	274	..	148	25	4,870	26,027
Jullundur ..	43,016	183	1	298	33	7,645	34,856
Kapurthala ..	9,224	64	32	6	85	595	8,442
Hoshiarpur ..	19,728	507	2	98	10	2,273	16,838
Ropar ..	14,361	365	..	27	6	1,020	12,943
Patiala ..	28,507	139	..	1,206	5	1,843	25,514
Sangrur ..	17,101	129	..	419	27	1,327	15,199
Bhatinda ..	15,776	241	..	652	19	1,668	13,196

75.8 A glance at the figures, given in table E-IV, shows that main contributions to the total number of 2,314 persons, returned as employed in units under division 0, are by (i) one unit under major group 00 in Ropar district employing 150 persons (ii) 346 units under major group 02 in Hoshiarpur district employing in aggregate 428 persons (iii) 134 units employing 215 persons under major group 02 in Ropar district and (iv) 127 units employing in aggregate 259 persons in Ludhiana district.

75.9 Very few establishments in the State are engaged in mining and quarrying (division 1) for obvious reasons. (The new State of Punjab does not have any mines or quarries). The number of such establishments, returned at 6, employ in all 38 persons.

75.10 Distribution of the number of persons employed under division 4 is more or less consistent with the distribution of number of units under the division. However, Gurdaspur district claims a higher number of units than Patiala district but the reverse is true of the number of persons employed. Of the 4 units returned, under employment category 100 or more persons, in the case of division 4, one unit employing 359 persons under the major group 40 is claimed by Amritsar district, 2 units employing in aggregate 255 persons, under the major group 40, are claimed by Firozpur district and one unit, employing 104 persons under major group 40, is claimed by Patiala district.

75.11 Like division 1, the number of establishments engaged in construction work (division 5) is rather small. These establishments, numbering 71, employ altogether 259 persons.

75.12 It will be seen that though the highest number of establishments, engaged in activities represented by division 7, is claimed by Firozpur district, the highest number of persons is employed in such units in Jullundur district. This is because the latter account for 12 of the 35 such establishments returned under the employment category 100 and more persons. Out of this number, 10 are returned under major group 70 and 2 under major group 75. As against this, just 2 establishments have been returned under the said employment category in the case of Firozpur district. Not only Jullundur but Amritsar and Ludhiana districts also account for higher number of persons employed under division 7 than Firozpur district. The former districts claim 8 and 5 establishments respectively under employment category 100 or more persons. Out of the 13 establishments returned under the employment category in the case of the two districts, 10 deal in activities represented by major group 70, 1 in activities represented by major group 73 and 2 in activities represented by major group 75. Mention may also be

made of 3 establishments, returned under the division, in Gurdaspur district, employing 100 or more persons each.

75.13 As under division 7, Jullundur district claims the highest number of persons empolyed under division 9 also. It will be observed that more of persons are employed in units returned under the division in the case of Amritsar, Ludhiana and Patiala districts than in Firozpur district. Naturally, the proportion of urban population of a district is an important determinant of the number of type of establishments represented by division 9.

75.14 It is noteworthy that four districts, viz., Amritsar, Ludhiana, Jullundur and Patiala put together account for as many as 110 of the 177 establishments returned under the employment category 100 or more persons in the case of division 9. Also, as many as 24,001 persons are employed in these 110 establishments out of the total number of 35,905 persons employed in all the 177 establishments, returned under the employment category 100 or more persons. Among the four districts, the highest number of 30 such establishments has been returned each in Jullundur and Ludhiana districts followed by 29 in the case of Patiala district and 21 in Amritsar district. Of the remaining 67 such establishments, returned in other districts of the State, 14 are accounted for by Firozpur district, 17 by Ropar district, 10 by Sangrur district, 9 each by Hoshiarpur and Kapurthala districts, 6 by Gurdaspur district and 2 by Bhatinda district.

75.15 It will be noted that most of the establishments under division 9, employing 100 or more persons each, are accounted for by major groups 90 and 92 in all the districts. The number returned under the former is considerably higher than the number returned under the latter. However, in Ludhiana district, 16 such establishments have been returned under major group 92 as against 12 under major group 90. Of the 14 establishments, employing 100 or more persons each, returned under major group 93, 4 are accounted for by Amritsar district and 3 by Jullundur district. However, one such establishment returned in Patiala district employs 733 persons.

Rural-Urban differentials :

76.1 It will be seen from table E-IV that of the total number of 'other establishments' returned in the State, 41,479 units, employing an aggregate number of 98,677 persons, are accounted for by the rural areas and 28,155 units, employing altogether 165,461 persons, by the urban areas. The break-up of these figures by divisions, given in the following statement, shows that division 9 accounts for a large majority of the units as also the persons employed both in rural and urban areas :

STATEMENT III.109

Number of Establishments and Persons employed in 'Other Establishments' in the State by Divisions in rural and urban areas separately

Division		Rural		Urban	
		No. of establishments	No. of persons employed	No. of establishments	No. of persons employed
1		2	3	4	5
All Divisions		**41,479**	**98,677**	**28,155**	**165,461**
Division	0	871	1,441	395	873
	1	5	7	1	31
	4	3,990	5,137	458	2,076
	5	35	161	36	98
	7	2,333	4,948	6,105	27,417
	9	34,245	86,983	21,160	134,966

76.2 It is obvious from these figures that the incidence of employment is significantly higher in the urban areas than in the rural areas. This can partly be ascribed to the fact that the former claim as many as 188 of the 217 units, employing 100 or more persons each, and 333 units, out of the total number of 412 units, returned under the employment category 50-99 persons.

76.3 In the case of division 4, 57 units returned under major group 40 in the urban areas employ 1,225 persons, including 718 persons employed in just 4 units. However, 3,970 units returned under major group 42 in the rural areas employ as many as 5,039 persons.

76.4 Interestingly 677 units returned under the major group 70 employ as many as 12,765 persons in the urban areas as against the corresponding rural figure of just 1,210 persons employed in 276 units. The glaring difference in the incidence of employment under the major group between the rural and urban areas is accountable to the fact that the former include 26 units, returned under the employment category 100 and more persons, and 23 units under the employment category 50-99 persons. As against this, not a single unit in respect of this major group has been returned in the rural areas. Other significant contributions to the total employment under division 7 have been made by 1,260 rural units (employing in all 1,960 persons) under major group 74, 4,509 urban units (employing in all 6,719 persons) under major group 74, 359 urban units (employing in all 4,733 persons) under major group 75, 764 rural units (employing

in all 1,657 persons) under major group 75 and lastly 558 units employing in aggregate 3,196 persons in urban areas under major group 73. The urban units, indicated above, include 6 units returned under major group 75 (employing in all 1,389 persons) and 3 units under major group 73 (employing in all 403 persons), which employ 100 or more persons each. On the contrary, not a single unit employing even 50 persons has been returned under division 7 in the rural areas.

76.5 As regards division 9, it will be seen that the highest number of 31,707 persons are employed in just 149 units, returned under the employment category 100 or more persons in the urban areas. Thus, even less than 1 per cent of units returned under the employment category claim about one-fourth of the total number of persons employed. Though in rural areas also, a significant number of 4,198 persons is employed in 28 establishments, returned under the employment category 100 or more persons, the highest number of 19,719 persons is employed in units employing 2 to 4 persons each.

76.6 A large majority of units, employing 100 or more persons each, is accounted for by major groups 90 and 92 both in the rural and urban areas. The two major groups claim 17 and 10 units in the rural areas and 98 and 35 units in the urban areas. It might also be mentioned that 14 units, employing in all 3,313 persons, are returned under the employment category 100 or more persons in the urban areas.

76.7 It may be noted that though many more units have been returned in the rural areas than in the urban areas in the case of division 9, the reverse is true of major groups 90, 96 and 99. The higher overall concentration of units under the division in the rural areas than in the urban areas is accountable to mainly the predominance of religious institutions (major group 94) in the former than in the latter. This also explains the reasons why the urban units bear a higher average incidence of employment than the rural units as religious institutions are often 1-person units.

76.8 Looking at the rural-urban differences in the incidence of various types of 'other establishments' and the number of persons employed in such units among districts of the State, it will be seen from the following statement, that though more of units have been returned in the rural areas than in the urban areas in all the districts except Jullundur, a significantly higher number of persons is employed in the urban units than in the rural units in all the districts. Jullundur district presents the most significant rural-urban disparity in the number of persons employed. Though there is not much difference between the number of rural and urban units, the latter employ almost three times the number of persons than the former.

STATEMENT III.110

Number of Establishments and persons employed in 'Other Establishments' by Divisions among districts of the State in rural and urban areas separately

State/District	Rural/ Urban	Total No. of establishments	Total No. of persons employed	Number of Establishments and persons employed in 'Other Establishments' returned under

	Urban	1,870	9,505	20	52	..	..	65	119	3	5	264	1,122	1,518	8,207
Bhatinda	Rural	2,423	6,558	34	45	..	..	351	562	2	11	105	246	1,931	5,694
	Urban	1,949	9,218	146	196	..	..	23	90	2	8	354	1,422	1,424	7,502

76.9 It will be seen that under division 0 the highest number of 305 units are returned in rural areas of Hoshiarpur district. In the urban areas, out of the total number of 395 units, 146 are returned in Bhatinda district.

76.10 A large majority of units under division 4 is accounted for by the rural areas. However, the urban units make a significant contribution to the total number of persons employed. As will be seen from the statement given above, the rural units under the division are distributed mainly among Firozpur, Gurdaspur and Patiala districts. The three districts put together claim more than three-fourths of the rural units returned under the division. Most of the rural units under the division are of small size, employing less than 5 persons each and not a single unit employs even 50 persons. On the other hand, 4 urban units employ 100 or more persons each. One of these, returned in Amritsar city, employs as many as 359 persons. This is accounted for by major group 40. Of the remaining 3 units, returned under major group 40, 2 are accounted for by Firozpur district and one by Patiala district.

76.11 The number of establishments engaged in various activities, represented by division 5, and the number of persons employed in such establishments, constitute small fractions of the total number of 'other establishments' and the total number of persons employed in such establishments both in the rural and urban areas. The position is, however, different in the case of units returned under division 7, which employ 4,948 persons in the rural areas and 27,417 persons in the urban areas. This shows how significant is the difference in the incidence of employment between rural and urban units returned under the division. It will be seen that the highest number of units employing the highest number of persons under the division, have been returned in the urban areas of Jullundur district. In fact, the three districts, viz., Amritsar, Jullundur and Ludhiana account for about half of the total number of units and more than half of the persons employed. The three districts also claim 25 out of the 35 units each employing 100 or more persons under the division in the urban areas. Most of these are returned in the three cities of Amritsar, Jullundur and Ludhiana under major group 70. Mention may also be made of units employing 100 or more persons under the division returned in Gurdaspur (3), Firozpur (2), Hoshiarpur (1), Ropar (2) and one each in Sangrur and Bhatinda districts. These are all accounted for by the urban areas.

76.12 As regards rural areas, it will be seen that though the highest number of 504 units is returned in Firozpur district, these employ a lesser number of persons (810) than 285 units returned in Jullundur district which all put together employ as many as 826 persons. Among the remaining districts, those which make somewhat a significant contribution to the total number of units and persons employed in rural areas include, Amritsar, Ludhiana and Hoshiarpur districts.

76.13 The rural-urban difference is most conspicuous, among all other establishments, in the case of those represented under division 9. In this connection, mention needs to be made of 25,158 persons employed in 3,723 urban units in Jullundur district, 17,743 persons employed in 2,066 urban units in Patiala district, 16,979 persons employed in 2,879 urban units in Amritsar district and 16,201 persons employed in 2,581 urban units in Ludhiana district. These four districts also account for a large majority of units employing each 100 or more persons. Most of these units are accounted for by major groups 90 and 92 and are located mainly in cities. As regards rural units, returned under the division, it will be seen that the highest number of 4,298 units has been returned in Hoshiarpur district. However, these employ a considerably lower number of persons in aggregate (8,379) than the 4,289 units, returned in Firozpur district, employing as many as 11,953 persons. Mention may also be made of 11,153 persons, employed in 4,046 rural units, in Amritsar district, 4,041 rural units, employing 9,698 persons in Jullundur district, 3,281 rural units employing 9,826 persons in Ludhiana district and 3,084 rural units employing 7,771 persons in Patiala district. Ludhiana district claims the highest number (6) of units each employing 100 or more persons under division 9 in the rural areas, the total number of such rural units under the division having been returned at 28. Out of these, 17 are accounted for by major group 90 and 10 by major group 92.

APPENDIX III

INSTRUCTIONS TO ENUMERATORS FOR FILLING UP THE ESTABLISHMENT SCHEDULE

Instead of loading the main Houselist form itself with questions pertaining to Establishments, it has been decided to have a separate schedule in which particulars of each establishment are to be recorded.

An "Establishment" is a place where goods are produced or manufactured not solely for domestic consumption or where servicing and/or repairing is done such as factory, workshop or household industry or servicing and/or repair workshop or a place where retail or wholesale business is carried on or commercial services are rendered or an office, public or private or a place of entertainment or where educational, religious, social or entertainment services are rendered. It is necessary that in all these places one or more persons should be actually working. Thus an establishment will cover manufacturing, trade and other establishments where people work.

Examples:

A factory or a workshop or workshop-cum-residence or a trading or other establishment, *i.e.* where some kind of production, processing repair or servicing is undertaken or where goods or articles are made and sold, or some business is being carried on such as a grocery shop, a *pan* shop, restaurant, bank, hotel, or an office is functioning such as Government office, commercial office, or an institution is being run such as school, college, hospital, dispensary, etc., and where one or more persons are working.

An Establishment may occupy a census house or a group of census houses or a part of a census house.

This column applies only in cases where the census house is used as an Establishment as defined above. Sometimes the act of production, processing or servicing may not be apparent especially if carried on as a household industry *e.g.*, when a handloom is located inside a house and is not in operation at the time of enumerator's visit or if some other type of household industry such as *papad* making or toy manufacturing or *bidi* rolling etc., is done, say in some interior portion of the house. You should make searching enquiries to see if any production, processing or servicing is done or any business is carried on or any institution is being run in any part of the house not readily seen from outside.

If 'Yes' is recorded here, go to the Establishment Schedule and fill up further particulars in that Schedule. Please fill in the Serial No. of the entry as given in the Establishment Schedule in this column after 'Yes'.

It is possible that some kind of production or processing is undertaken in the house by the members of the household for *purely domestic consumption.* For example, hand pounding of rice, preparation of spices like *haldi* (turmeric), chillies, etc., or say, knitting of woollen garments, embroidery work, loin-loom weaving and so on, meant for household use only and not for sale. In such cases, the house should not be treated as an 'establishment'.

The respondents should be fully assured that the information collected in these schedules will be treated as completely confidential and is meant for statistical purposes and will not be used as evidence against any individual or establishment for any purpose. The respondents should be encouraged to furnish truthful replies without any reservation.

At the top of the schedule provision is made for noting the Location Code No. and name of the areas concerned. This should be the same as those noted on the top of the Houselist which you will be canvassing simultaneously. You should fill the Location Code Nos. etc., correctly.

The columns of the Establishment Schedule can be classified into four broad groups:

(i) Columns 1 to 5 are of uniform applicability and entries have to be made in respect of all the establishments;

(ii) Columns 6 to 8 pertain to manufacturing, processing, etc.—establishments;

(iii) Columns 9 to 10 relate to trading establishments; and

(iv) Column 11 refers to 'other' Establishments which are not covered in columns 6 to 10.

Thus, it will be seen that the columns falling within groups (ii) to (iv) are mutually exclusive, while those in group (i) are common to all.

Col. 1 : Sl. No.

In this column the establishments are to be entered one after another serially. Arabic numerals should be used for this purpose, i.e., 1, 2, 3 etc.

Col. 2 : Census House No.

The Census house number to be noted is the same as that in column 3 of the Houselist and against which 'Yes' is written in column 7 of the Houselist indicating that the Census house is used as an establishment.

A point to be noted here is that it is likely that a single factory or workshop may be spread over more than one Census house adjoining one another. Therefore, while in Col. 2 of this schedule a number of Census houses may be noted in respect of that particular unit of production, processing or repairing, trade or business etc., the entries in Col. 3 onwards will be one only for that group of houses covered by a single unit of production or business etc. establishment. For example, if a single tea factory in Assam or business establishment in Calcutta should be spread over two or three adjacent buildings, each of the buildings should not be shown as a separate factory or establishment but the House Nos. of all these buildings shown in Col. 2 should be bracketted together and the particulars of the single tea factory or establishment entered in the subsequent columns against this group of houses. If on the other hand the activities of a large firm or an office are carried on in buildings located far away in different localities, each of the Census houses in the different localities will have to be treated as a separate establishment and the particulars of the establishment relating to that particular Census house should be listed in this schedule.

Col. 3: Name of the Establishment or of the proprietor

In this column write the name of the establishment in the case of factories, large manufacturing concerns, a shop or business establishment, banks, office etc. which usually bear a distinct name. Where an establishment has no separate name as in the case of small workshops and establishments like confectionaries, small tea shops, Dhobi's establishment, household industries etc. write the name of the owner as "So and so's Halwai shop" etc. This is to help easy identification.

Col. 4 : Is the Establishment—(a) Govt./Quasi Govt. (b) Private (c) Co-operative Institution

Enter here whether establishment enumerated belongings to public sector *i.e.*, Govt./Quasi Govt. managed, including establishments run by local authorities, or to private sector, or a co-operative enterprise. Please do not write in the column only (a) or (b) or (c) but write

(1) "Govt.—Public Sector, or Quasi Govt.—Public Sector, or Local Authority—Public Sector
(2) Private or
(3) Co-operative.

There may be many schools or libraries etc. which are not owned by any particular individual or group of individuals. These may be owned by people in general and managed by Managing Committees. Such establishments should be treated as "private" as distinguished from Govt./Quasi Govt. or run by local authorities or co-operative enterprises.

An establishment will be treated as a Govt./Quasi Govt. institution if the Central or State Govt. or a Local Authority such as the Zilla Parishad, City Corporation or Municipality etc. completely own or has a majority of shares as to control the management of the establishment.

Private establishments are those owned and managed by private individuals or corporate bodies not being co-operative institution or Govt. or Quasi Govt. Institutions.

Establishments registered under the co-operative Societies Registration Law of the State, alone fall in the category of "Co-operative".

Col. 5 : Average number of persons working daily last week or in the last working season, including proprietors and/or family workers

In this column, the information has to be entered relating to the total number of workers including the apprentices, paid or unpaid and also including owner(s) or proprietor(s) of the establishment and any of their family members if they also work in the establishment and also the hired workers, if any. It is not necessary that an establishment should necessarily have paid workers. A small shop run in the same house where the owner lives and the business is attended to by just one person of the household is also an establishment. The average number of persons working per day in the establishment during the week preceding the day of your visit should be recorded. For computing the average number of persons working per day, if the establishment remained closed owing to holiday etc., such day(s) should be ignored and only the 'days' on which the establishment worked should be taken into account. If during the week preceding your visit, the establishment remained closed either due to strike or lock-out, the week during which the establishment worked preceding such strike or lock-out should be taken into account for reckoning the average number of persons working. The hired workers should normally be in full time employment.

Some establishments such as a sugar factory, rice mill etc. may be seasonal in character and may not be actually working at the time of the present listing. You should then ascertain the particulars of such establishments with reference to the last working season.

In case more than one product is produced, or more than one item of business is conducted or several types of services are rendered, it is not necessary to enquire the number of persons employed in the production/business/servicing of each type of product, business or service that is covered against that serial number. For example in a large textile mill there may be the weaving section, dyeing section, laboratory, repairing section, sales section etc. It is not necessary to ascertain the employment in each section. The total employment has to be ascertained. The major activity of the establishment will be described in subsequent columns.

"Columns 6, 7 and 8:—If any manufacturing processing or servicing is done".

These columns relate only to such establishments in which goods are manufactured or some kind of processing or servicing is done and/or repairs are carried on.

Col. 6 : Is it (a) Household Industry (b) Registered Factory (c) Unregistered workshop

Household Industry: Definition

A 'Household Industry' is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas, and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

Thus, there are four ingredients of a household industry:—

(i) nature of activity
(ii) participation
(iii) location
(iv) size

(i) *Nature of activity*:—A Household industry should relate to production, processing, servicing, repairing, or making and selling (but not merely selling) of goods. It *does not* include professions such as a pleader or doctor or barber, musician, dancer, washerman (Dhobi), astrologer atc. or merely trade or business even if such professions, trade or services are conducted at home by members of household.

(ii) *Participation*:—The Head of the household and/or one or more members of the household must participate in such an industry. If it is run primarily by hired labourers, the 'participation' ingredient of the household members will not be satisfied and it will not be a 'Household Industry'. The industry may run with the help of hired workers but the head and/or members of the household must be mainly participating in the industry and not solely dependent on hired workers. Besides "actual work", participation also includes "supervision and direction".

(iii) *Location*:—The industry should be located within the premises of the house where the household lives in urban areas; if it is situated at a place other than at home, it will not be termed as household industry in urban areas. In rural areas however, the industry may be either at home or anywhere within the village limits. In rural areas, even though, the industry is not situated at home, there is a greater possibility of the members of the household participating in it if it is located within the village limits.

(iv) *Size*:—The industry should not be on the scale of a registered factory. Irrespective of the location and participation by the members of the household, if the industry or workshop is registered under the Factories Act, then it will not be a household industry.

Thus it will be clear that any industry which can be termed as 'Household Industry' must satisfy all the four ingredients mentioned above.

(b) *Registered Factory*:—A factory which is registered under the Indian Factories Act should be treated as a "Registered Factory". Any other workshop merely licensed by the Municipal or any other authority or registered for any other purpose should not be treated as a registered factory unless it is registered under the Indian Factories Act.

(c) *Unregistered Workshop*:—Workshop is a place where some kind of 'production' processing, servicing, repairing or mkaing of goods for sale is going on. A workshop which is registered under the Indian Factories Act should be treated as a registered factory and others as unregistered workshops. Workshops which are run as household industry should be treated as household industry and entered as such.

When you come across an establishment where some kind of manufacturing, processing or servicing etc., is done, you should ascertain whether it is a Household Industry or a registered factory or a workshop not registered under the Factories Act and write whatever it actually is in this column. Please note that workshops merely licenced or entered in the registers of a local authority are not to be considered as registered factories unless registered under the Indian Factories Act. All workshops other than household industries and not registered under the Indian Factories Act should be treated as unregistered workshops even if they are merely licenced as workshops by the local authorities. Please do not write (a) or (b) or (c) in the column but write "Household Industry", or "Registered Factory" or "Unregistered Workshop", as the case may be.

Col. 7 : Description of the products, processing or servicing done

The description of the actual work relating to product, processing and servicing which is done in the Household Industry, factory or workshop that is being listed is to be recorded here, e.g., handloom weaving, lace knitting, *oil ghani* etc., manuffacturing of G.I. pipes, electroplating, motor or cycle repairing, iron foundry, paper making or book binding, printing and dyeing, shoe making, sweetmeat making etc. If in any establishment more than one article is produced or more than one kind of processing or servicing or repairing is done, indicate only the major kind of products or processing or repairing or servicing etc.

Col. 8 : Type of fuel or power used

Enter here the description of the power or fuel used for the running of the factory, workshop (or household industry if it is run on power or fuel). The fuels can be kerosene, soft coke, petrol, diesel, gas, coal, wood, etc. Electricity and steam etc. are some of the sources of power. Some units may be run by animal power such as *oil ghani*. Some may be run by merely human energy, such as carpet-making, pottery making etc. Enter the description of fuel or power used for the production, processing, servicing etc. that is carried on in the establishment. There may be instances where more than one fuel or power is used, in such cases, only the fuel or power which is used in running the primary unit of the industry will be noted in this column.

Columns 9 and 10 are to be filled in respect of trading establishments or establishments which render commercial services only.

where some trading *i.e.*, transactions involving seal where some trading *i.e.*, transactions involving sael and/or purchase of goods go on.

Establishments rendering commercial services are the banks, money lending firms, Pawn shops, etc.

Col. 9 : Description of goods bought/sold

If it is a trading establishment,you should ascertain what are the goods bought and/or sold and write the description in this column. If there are more than one type of goods brought & sold by the establishment, you should give description of the main item of goods bought/sold by the establishment.

In the case of establishments rendering commercial services such as in the case of Banks etc., you should write the description of the services rendered, as in the case of a bank, you should write "banking services".

Col. 10 : Whether (a) wholesale or (b) retail

For all trading establishments, you should ascertain in respect of the goods mentioned in column 9, whether they are sold/bought in wholesale or in retail and write as the case may be.

You may come across certain establishments wherein both types of trade *i.e.* wholesale and retail go on. In such cases, you should ascertain in which category (*i.e.* wholesale or retail) the volume of trade is greater and record the category accordingly.

In the case of establishments rendering commercial services, *e.g.*, bank etc. please do not write any of the two categrios *i.e.* 'wholesale' or 'retail' but put an 'X' in this column.

Col. 11 : If used as any other establishment, describe e.g., Govt. office, School, Hospital, Railway Station, Barber's Saloon, Cinema Theatre, Hotel, Tea shop, etc.

Two specific types of establishments have been covered in columns 6 to 10. Column 11 relates to the remaining type of establishments not covered by columns 6 to 10. You have to describe such establishments in this column, *e.g.*, Govt. Office. school, hospital, Railway Station, orphanage, Rescue home, Barber's saloon, cinema, theatre, hotel, tea shop, lawyer's office, doctor's clinic, laundry, etc.

General :

It is possible that in a particular establishment, more than one activity is being undertaken within the same premises. For example, say in a betel shop, *bidi* rolling is also being undertaken or in a grocery shop a flour mill is also located, or in the doctor's clinic medicines are sold. In such cases, the establishment should be identified having regard to the major activity and recorded as such in the relevant columns pertaining to the major activity.

But if different activities are undertaken in different census houses quite cut off from one another though under the same title or ownership, each such census house should be treated as a separate establishment and recorded as such against that census house in this schedule. It may, however, be noted that where processing for the production of an article is carreid on, in separate adjoining census houses, all the census houses should be treated as a single establishment and recorded as such. If on the other hand the activities of a large firm or an office are carried on in buildings located far away in different localities, each of the census houses in the different localities will have to be treated as a separate establishment and the particulars of the establishment relating to that particular census house should be listed in this schedule.

After you have completed filling up of the Establishment Schedule for your block, you will prepare a duplicate copy of the Establishment Schedule, for which you would be given adequate number of blank forms.

APPENDIX IV

EDIT INSTRUCTIONS FOR ESTABLISHMENT SCHEDULE

Location Code:

Invariably, the enumerator, should have written the elements of the location at the top of the Establishment Schedule. See that all elements are correctly filled in. In the case of a rural Block, the location code will contain number of District, Taluk/Tahsil/Anchal/Police Station and Enumerator's Block. In an urban block the location code elements are numbers representing District, Town, Ward/Mohalla and Enumerator's Block. If entries are fund to be missing, supply tmeh from the charge register. The name of the enumerator will be found at the bottom of the Establishment Schedule, the Block should be located in the charge register with reference to the name of the enumerator.

Column 1: Refer to column 7 of the Houselist and make sure that for all 'yes', there is a corresponding entry in this schedule and the serial number tallies.

Column 2: Check with reference to column 3 of the Houselist. These should tally.

Column 4: In case of blank, look up the entry in column 3, this may help in making a suitable imputation, otherwise, enter 'private'.

Column 5: If there is an omission to make an entry, write 'unspecified'.

Columns 6, 7 *and* 8: The columns will be filled in if only columns 9-10 and 11 have 'X'. If in any establishment besides manufacturing/processing sales also take place, and by mistake the enumerator has entered details in columns 6 to 8 and also in columns 9 and 10, score entries in columns 9 and 10. Manufacturing will get precedence over 'selling' which is a secondary function.

If the entry in column 6 is registered factory and in column 8 type of power is other than 'Electricity' and if the number is less than '20' in column 5, then change the entry 'Registered factory' in column 6 to 'Unregistered workshop'.

Column 7: If an entry is omitted by the enumerator, make an entry from information in column 3, if it affords any clue.

Column 8: If an entry is omitted by the enumerator, enter 'manual' having regard to entries in columns 3 and 7.

Columns 9 *and* 10: There should be entries in these columns when columns 6, 7, 8 and 11 have 'X'. If entry is not made by the enumerator in column 9, impute it with reference to entry in column 3. If column 10 is blank and column 9 is filed in,write 'retail' except i nthe case of commercial services like Bank, Insurance, Pawn shop, etc.

Column 11: There will be an entry in this column only when there is 'X' in columns 6 to 10, If the enumerator has failed to make an entry although the establishment should have been entered in this column, try to impute with the help of entry in column 3.

APPENDIX V

1971 CENSUS

CODE STRUCTURE—ESTABLISHMENT SCHEDULE

Description	Col. No. in Schedule	Code No. allotted	Where to Code
1	2	3	4
ITEM			
State ..	..	Assign code as per Appendix 'A'	
District ..	Top left	Recode districts 1 to 9 as 01 to 09 rest , i.e., 10 onwards will remain as it is.

APPENDIX VI

NATIONAL INDUSTRIAL CLASSIFICATION

(N.I.C.)—1970

(As adopted by the office of the Registrar General, India, for the Industrial Classification of 'Establishment' and 'economically active population')

INTRODUCTION

Industrial Classifications are used in the Classification of economically active population, in the presentation of statistics of industrial production and distribution, labour statistics and economic data like national income etc., Comparability of statistics available from various sources on different aspects of economy, and the usability of data for economic analysis demand standardisation of the system of Industrial Classification.

The Industrial Classification used in the population Census differed from one census to another and till 1951 Census, it was generally an amalgam of industrial and occupational features.

In the 1961 Census, the Indian Standard Industrial Classification (ISIC) evolved in 1958 by the Directorate General of Employment and Training was used. There has been a variety of Industrial Classifications in India such as Labour Bureau's industrial classification of factories, Standard Industrial Classification evolved by Central Statistical Organisation etc. While attempts have been made in several cases to bring these classifications in line with the I.S.I.C. these have produced different versions depending on the nature of the respective needs. An attempt at evolving a Standard Industrial Classification was made when an interdepartmental meeting, in which all concerned departments of the Central Government along with other important users were represented, was held in April, 1964 to consider the subject. After a detailed consideration of general principles for a Standard Industrial Classification, the meeting appointed a Technical Committee consisting of representatives of the Registrar General, India, Directorate General of Employment and Training, Ministries of Internal Trade and Industry and the Central Statistical Organisation (C.S.O.) to work out a three-digit level standard classification of industries. In the meantime, the Statistical Office of the United Nations was also considering the revision of the I.S.I.C. 1968. This was ready in September, 1968 and it was circulated by the C.S.O. among all concerned organisations inviting their suggestions. After a number of meetings of the representatives of these organisations, the National Industrial Classification (N.I.C.) 1970 was finalised. This has been adopted by the Office of the Registrar General, India, with suitable modification.

Like the I.S.I.C.-1969, the National Classification attempts to group together economic activities which are akin in terms of the process adopted, the raw materials used and the finished products produced. The Classification does not draw any distinction according to the type o fownership or type of economic organisation. And except in cases like textiles etc., where traditional processes of production are in vogue in significant measures, the Classification does not endeavour to distinguish between various modes of operation as for instance, using power or not using power factory or household, large-scale or small-scale. Identification of the special features of the Indian economy, where in certain sectors traditional processing is substantial, has been attempted in the two-digit and three-digit levels in the N.I.C. 1970.

The basis of classification being the nature of economic activity carried on in an establishment, it follows that the unit classification should be an establishment. The term 'establishment' may be defined as an economic unit which is engaged in one or predominately one kind of activity usually at a single physical location under single ownership or control. A firm or enterprise may have more than one establishment either on the same location or on different locations engaged either in the same economic activity or in different economic activities. In either case, each establishment is to be counted separately and classified appropriately. It is also likely that some establishments are engaged in more than one economic activity. To the extent possible, it is desirable to treat each technical unit, or ancillary unit or welfare unit, engaged in a different type of activity as a separate establishment. Examples of technical units are the departments of textile mills which spin yarn, weave cloth, and dye the cloth or Departments of a meat packing plant which produce *lard lure bacon* or can meat. Clearest examples of ancillary units are central administration offices, warehouses, garages repairshops and electric power plants which primarily serve their parent units. Examples of welfare units are schools or dispensaries run by say, steel mills for the benefit

of their employees. Where it is not possible to separate technical, ancillary and welfare units from their parent establishments, the establishment will have to be classified into one or other of the minor groups in the Classification according to the major activity of the establishment. The major activity of the establishment should generally be ascertained by reference to value added by the production of different products or services rendered or net revenue derived from the various activities. Where such an assessment is not possible, the classification may be determined in terms of gross revenue attributable to the products or services put by the establishment, the number of persons employed on various activities or the proportion of labour-cost assignable to those activities whichever may be convenient and appropriate. Where the integration of activities in an establishment and in the case of a factory producing pulp as well as paper, the classification will have to depend on the final product irrespective of the magnitude of the value added at different levels of production. In the Indian economy, it sometimes becomes necessary to classify by industry persons who are own-account workers, as in the censuses of population and sample surveys of households. In such cases the distinction between industrial and occupational classifications becomes blurred. In the case of such own-account workers, it is desirable to classify them under industries appropriately akin to their occupations.

The National Industrial Classification (N.I.C.)-1970 consists of

10 Divisions (at the first digit level);

66 Major Groups (at the second digit level); and

386 Minor Groups (at the third digit level).

While adopting the N.I.C.-1970, and Office of the Registrar General, India, have made a modification in the classification of 'Repairing' or 'Repair-service'-establishments.

In the N.I.C.-1970 'Repair work' has been included in 'Manufacture' in some cases like, Minor Groups.

"351-Manufacture and repair of drills, coal cutting machines, etc., etc.," and

"359-Manufacture and repair of non-electrical machinery etc., etc.".

While in case of the repairing establishments, such as "Repair of Footwear and Leather goods etc., Electrical repair shops, repair of Motor Vehicles and Motor Cycles, etc.," these have been classified under Major Group 97-"Repair Services" and yet another Division 'Y' and Major Group 'YO' as 'Repair Service (if not included under Major Group 97)', has been provided.

It was felt that 'Repairs' should be assigned to 'Manufacturing or processing' activity under Divisions '2 and 3' which incidentally makes for comparability of classification at the 1961 Census. Accordingly a Major Group '39-Repair' has been inserted under Divisions 2 and 3 with the following Minor Groups:

390-Repair of Footwear and other leather goods.

391-Electrical Repair shop.

392-Repair of Motor Vehicles and Motor Cycles.

393-Repair of watch, clock and jewellery.

'394-Repair of Bicycles and Cycle-rickshaws.

395-Repair enterprises not elsewhere classified.

The N.I.C.-1970 incorporates some of the major revisions contained in the I.S.I.C., 1969, *e.g.*, transfer of 'Restaurants and Hotels' from 'Services' to 'Trade', clubbing of Banking, Insurance, Real Estate, and Business services; transfer of veterinary service from Agricultural Services to Medical and Health Services, treating sanitary services among community services etc.

NATIONAL INDUSTRIAL CLASSIFICATION (NIC)—1970

This classification groups the industries into :

10 Divisions (0 to 9 & 'X')
66 Major Groups
386 Minor Groups

The Divisions, Major Groups and Minor Groups with their code numbers are listed below :

DIVISIONS

(One digit level of calssification)

Division		
0	—	Agriculture, Hunting, Forestry and Fishing
1	—	Mining and Quarrying
2 & 3	—	Manufacturing and Repair
4	—	Electricity, Gas and Water
5	—	Construction
6	—	Wholesale and Retail Trade and Restaurants & Hotels
7	—	Transport, Storage and Communications
8	—	Financing, Insurance, Real Estate and Business Services
9	—	Community, Social and Personal Services
X	—	Activities not Adequately Defined

MAJOR GROUPS

(Two digit level of classification)

Major Groups		
	Division 0—Agriculture, Hunting, Forestry and Fishing	
00	—	Agricultural Production
01	—	Plantation
02	—	Livestock Production
03	—	Agricultural Services
04	—	Hunting, Trapping and Game Propagation
05	—	Forestry and Logging
06	—	Fishing
	Division 1—Mining and Quarrying	
10	—	Coal Mining
11	—	Crude Petroleum and Natural Gas
12	—	Metal Ore Mining
19	—	Other Mining
	Division 2 & 3—Manufacturing and Repair	
20-21	—	Manufacture of Food Products
22	—	Manufacture of Beverages, Tobacco & Tobacco Products
23	—	Manufacture of Cotton Textiles
24	—	Manufacture of Wool, Silk and Synthetic Fibre Textiles
25	—	Manufacture of Jute, Hemp, and Mesta Textiles
26	—	Manufacture of Textile Products (including Wearing Apparel other than Footwear)
27	—	Manufacture of Wood and Wood Products, Furniture & Fixtures
28	—	Manufacture of Paper and Paper Products & Printing, Publishing and Allied Industries
29	—	Manufacture of Leather, Leather & Fur Products, (except repair)
30	—	Manufacture of Rubber, Plastic, Petroleum and Coal Products
31	—	Manufacture of Chemicals and Chemical Products (except Products of Petroleum and Coal)
32	—	Manufacture of Non-Metallic Mineral Products
33	—	Basic Metal and Alloys Industries

Major Group	Description
34	— Manufacture of Metal Products and Parts, except Machinery and Transport Equipment
35	— Manufacture of Machinery, Machine Tools and Parts except Electrical Machinery
36	— Manufacture of Electrical Machinery, Apparatus, Appliances and Supplies and Parts
37	— Manufacture of Transport Equipment and Parts
38	— Other Manufacturing Industries
39	— Repair
	Division 4—Electricity, Gas and Water
40	— Electricity
41	— Gas and Steam
42	— Water Works and Supply

MINOR GROUPS

(Three digit level of classification)

Major Group	Minor Group	Description
		Division 0—Agriculture, Hunting, Forestry & Fishing
00		*Agricultural Production*
	000	Cereal Crops (paddy, wheat, jowar, bajra, maize, ragi, barley & gram, etc.).
	001	Pulses (arhar, moong, masur, urd & etc.).
	002	Raw cotton.
	003	Raw jute, mesta.
	004	Sunn hemp and other kindred fibres.
	005	Production of oilseeds such as sesamum, groundnuts, rape, mustard, linseed, castor seeds, etc
	006	Sugarcane.
	007	Roots and tubers, vegetables, pan, singhara, chillies and spices (other than pepper and cardamom) and flowers and parts of plants.
	008	Agricultural production not elsewhere classified.
01		*Plantations*
	010	Tea.
	011	Coffee.
	012	Rubber.
	013	Tobacco.
	014	Pepper.
	015	Cardamom.
	016	Edible nuts (exluding coconut and ground nut), walnut, almond, cashewnut, etc.
	017	Production of fruits, coconuts *e.g.* bananas, apples, grapes, mangoes, oranges.
	018	Production of ganja, cinchona, opium, etc.
	019	Crops of plantations, not elsewhere classified (*e.g.*, Betel nuts, etc.).
02		*Livestock Production*
	020	Cattle and goats-breeding, rearing, ranching etc. and production of milk.
	021	Rearing of sheep and production of wool.
	022	Rearing horses, mules, camels and other pack animals.
	023	Rearing of pigs and other animals.
	024	Rearing of ducks, hens and other birds and production of eggs.
	025	Rearing of bees and production of honey and wax.
	026	Rearing of Silk-worms and production of cocoons and raw silk.
	029	Rearing of livestock and production of livestock products not elsewhere classified.
03		*Agricultural Services*
	030	Pest destroying, spraying, pruning of infected stems.
	031	Operation of irrigation system.
	032	Animal sharing and livestock services (other than veterinary services).
	033	Grading agricultural and livestock products.
	034	Horticultural and nursery services.
	035	Soil conservation.
	036	Scientific services like soil testing.
	039	Agricultural services not elsewhere classified. (like land clearing, land draining etc.).
04		*Hunting, Trapping and Game Propagation*
	040	Hunting, trapping and game propagation for commercial purposes (other than for sport).

Major Group	Minor Group	Description
		Division 0—Agriculture, Hunting, Forestry & Fishing—concld.
05		*Forestry and Logging*
	050	Planting, replanting and conservation of forests.
	051	Logging-felling and cutting of trees and preparation of rough, round, hewn or riven logs (including incidental hauling).
	052	Production of fuel (including charcoal by burning) by exploitation of forests.
	053	Gathering of fodder by exploitation of forests.
	054	Gathering of uncultivated materials such as gums, resins, lac, barks, herbs, see wild fruits and leaves by exploitation of forests.
	059	Other forests products not elsewhere classified such as munjh.
06		*Fishing*
	060	Ocean, sea and coastal fishing.
	061	Inland water fishing.
	062	Pisciculture—rearing of fish.
	063	Collection of pearls, conches, shells, sponge and other sea products.
	069	Fishing and allied activities not elsewhere classified.
		Division 1—Mining and Quarrying
10		*Coal Mining*
	100	Coal.
	101	Lignite.
11		*Crude Petroleum and Natural Gas*
	110	Crude Petroleum.
	111	Natural gas.
12		*Metal Ore Mining*
	120	Iron ore.
	121	Manganese.
	122	Chromite.
	123	Bauxite.
	124	Gold and Silver Ores.
	125	Copper Ore.
	126	Lead and Zinc Ores.
	127	Limenite and Rutile.
	128	Wolfram.
	129	Metal Ores not elsewhere classified.
19		*Other Mining*
	190	Stone quarrying, clay and sand pits.
	191	Chemicals and fertilizer mineral ming (such as soda ash, sulphur, phosphates, nitrates, etc.).
	192	Salt mining and quarrying including crushing, screening and evaporating in pans.
19	193	Precious and semi-precious stones.
	194	Mica.
	195	Gypsum.
	199	Other mining not elsewhere classified (asbestos, quartz, talc and Soap stone, natural abrasives other than sand, graphite, etc.).
		Division 2 & 3—Manufacturing and Repair
20-21		*Manufacture of Food Products*
	200	Slaughtering, preparation & preservation of meat.
	201	Manufacture of dairy products.
	202	Canning and preservation of fruits and vegetables.
	203	Canning, preserving and processing of fish, crustacea and similar foods.

Major Group	Minor Group	Description
		Division 2 & 3—Manufacturing and Repair—contd.
	204	Grain mill products.
	205	Manufacture of bakery products.
	206	Manufacture and refining of sugar (vacuum pan sugar factories).
	207	Production of indigenous sugar boora, khandsari, gur, etc. from sugar-cane, palm juice.
	208	Production of common salt.
22	209	Manufacture of cocoa, chocolate and sugar confectionery (including sweetmeats).
	210	Manufacture of hydrogenated oils, Vanaspati ghee, etc.
	211	Manufacture of other edible oils and fats *e.g.* mustard oil, ground nut oil, til oil, etc. (Inedible oils shown under 315).
	212	Tea processing.
	213	Coffee curing, roasting and grinding.
	214	Cashewnut processing like drying, shelling, roasting, salting, etc.
	215	Manufacture of ice.
	216	Manufacture of prepared animal feeds.
	217	Manufacture of starch.
	219	Manufacture of food products not elsewhere classified.
22		*Manufacture of Beverages, Tobacco and Tobacco Products*
	220	Distilling, rectifying and blending of sprits.
	221	Wine industries.
	222	Malt liquors and malt.
	223	Production of country liquor and toddy.
	224	Soft drinks and carbonated water industries.
	225	Tobacco stemming, redrying and all other operations which are connected with preparing raw leaf tobacco for manufacture.
	226	Manufacture of bidi.
	227	Manufacture of cigars, cigarettes, cheroots and cigarette tobacco.
	228	Manufacture of chewing tobacco, zarda and snuff.
	229	Manufacture of tobacco & tobacco products, not elsewhere classified.
23		*Manufacture of Cotton Textiles*
	230	Cotton ginning, cleaning and baling.
	231	Cotton spinning, weaving, shrinking, sanforizing, mercerising and finishing of cotton textiles in mills.
	232	Printing, dyeing and bleaching of cotton textiles.
	233	Cotton spinning other than in mills (charkha).
	234	Production of khadi.
	235	Weaving and finishing of cotton textiles in handlooms, other than khadi.
	236	Weaving and finishing of cotton textiles in powerlooms.
	239	Cotton textiles not elsewhere classified.
24		*Manufacture of Wool, Silk and Synthetic Fibre Textiles*
	240	Wool cleaning, baling and pressing.
	241	Wool spinning, weaving and finishing in mills.
	242	Wool spinning and weaving (other than in mills).
	243	Dyeing and bleaching of woollen textiles.
	244	Manufacture of wool not elsewhere classified.
	245	Spinning, weaving and finishing of silk textiles.
	246	Printing, dyeing and bleaching of silk textiles.
	247	Spinning, weaving and finishing of other textiles—synthetic fibres, rayons, nylons, etc.
	248	Printing, dyeing and bleaching of synthetic textiles.
	249	Silk and synthetic fibre textiles not elsewhere classified.

Major Group	Minor Group	Description
		Division 2 & 3—Manufacturing and Repair—contd.
25		*Manufacture of Jute, Hemp and Mesta Textiles*
	250	Jute and Mesta pressing and baling.
	251	Jute and Mesta spinning and weaving.
	252	Dyeing, printing and bleaching of jute textiles.
	253	Preparing, spinning, weaving and finishing of hemp and other coarse fibres.
	259	Manufacture of jute bags and other jute textiles not elsewhere classified.
26		*Manufacture of Textile Products (including Wearing Apparel other than Footwear)*
	260	Knitting mills.
	261	Manufacture of all types of threads, cordage, ropes, twines, nets, etc.
	262	Embroidery and making of crapes laces and fringes.
	263	Weaving carpets, rugs and other similar textile products.
	264	Manufacture of all types of textiles, garments including wearing apparel.
	265	Manufacture of rain coats, hats, etc.
	266	Manufacture of made up textile goods (except garments) such as curtains mosquito nets, etc.
	267	Manufacture of water proof textiles such as oil cloth, tarpaulin, etc.
	268	Manufacture of coir and coir products.
	269	Manufacture of textiles not elsewhere classified like linoleum, padding, wadding, upholstering, filling.
27		*Manufacture of Wood and Wood Products, Furniture and Fixtures.*
	270	Manufacture of veneer, plywood and their products.
	271	Sawing and planning of wood (other than plywood).
	272	Manufacture of wooden and cane boxes, crates, drums, barrels and other wooden containers, baskets and other rattan, bamboo, read and willow wares made entirely or mainly of cane rattan, reed, bamboo and willow.
	273	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors and windows (excluding hewing and rough shaping of poles, bolts and other wood material which is classified under logging).
	274	Manufacture of wooden industrial goods, such as bobbins, blocks, handles, saddling and similar equipment and fixtures.
	275	Manufacture of cork and cork products.
	276	Manufacture of wooden furniture and fixtures.
	277	Manufacture of bamboo and cane furniture and fixtures.
	279	Manufacture of wood and reed, bamboo and cane products not elsewhere classified.
28		*Manufacture of Paper and Paper Products and Printing, Publishing and Allied Industries.*
	280	Manufacture of pulp, paper and paper board including newsprint.
	281	Manufacture of container and boxes of paper and paper board.
	282	Manufacture of pulp products not elsewhere classified like dolls.
	283	Manufacture of paper and paper board articles not elsewhere classified.
	284	Printing and publishing of newspaper.
	285	Printing and publishing of periodicals, books, journals, atlases, maps, sheet music directories.
	286	Printing of bank notes, currency notes, postage stamps; security presses.
	287	Engraving, etching, block making, etc.
	288	Book Binding.
	289	Printing, publishing and allied activities not elsewhere classified like envelope printing, picture post card printing, embossing.
29		*Manufacture of Leather and Leather and Fur Products (except Repair)*
	290	Tanning, currying, finishing, embossing and japanning of leather.
	291	Manufacture of footwear (excluding repair) except vulcanized or moulded rubber or plastic footwear.

Major Group	Minor Group	Description
		Division 2 & 3—Manufacturing and Repair—contd.
	292	Manufacture of wearing apparel like coats, gloves, etc. of leather and substitutes of leather.
	293	Manufacture of Leather Consumer Goods (other than apparel and footwear).
	294	Scrapping, currying, tanning, bleaching and dyeing of fur and other pelts for the trade.
	295	Manufacture of wearing apparel of fur and pelts.
	296	Manufacture of fur and skin rugs and other articles.
	299	Manufacture of Leather and Fur Products not elsewhere classified.
30		*Manufacture of Rubber, Plastic, Petroleum and Coal Products*
	300	Tyre and tube industries.
	301	Manufacture of footwear made primarily of vulcanized or moulded rubber and Plastic.
	302	Manufacture of rubber products not elsewhere classified.
	303	Manufacture of plastic products not elsewhere classified (except house furnishing).
	304	Petroleum refineries.
	305	Manufacture of products of petroleum not elsewhere classified.
	306	Production of coal tar in coke ovens.
	307	Manufacture of other coal and coal tar products not elsewhere classified.
31		*Manufacture of Chemicals and Chemical Products (except Products of Petroleum and Coal)*
	310	Manufacture of basic industrial organic and inorganic chemicals and gases such as acids, alkalies and their salts; gases like acetylene, oxygen, nitrogen, etc.
	311	Manufacture of fertilisers and pesticides.
	312	Manufacture of paints, varnishes and lacquers.
	313	Manufacture of drugs and medicines.
	314	Manufacture of perfumes, cosmetics, lotions, hair dressings, tooth pastes, soap in any form, synthetic detergents, shampoos, shaving products, cleansers, washing and scouring products and other toilet preparations.
	315	Manufacture of inedible oils.
	316	Manufacture of turpentine, synthetic resins, plastic materials and synthetic fibres like nylon terylene except glass.
	317	Manufacture of matches.
	318	Manufacture of explosives and ammunition and fire works.
	319	Manufacture of chemical products not elsewhere classified (including photo-chemicals, sensitised films and paper).
32		*Manufacture of Non-Metallic Mineral Products*
	320	Manufacture of structural clay products.
	321	Manufacture of glass and glass products.
	322	Manufacture of earthen ware and earthen pottery.
	323	Manufacture of china-ware and porcelainware.
	324	Manufacture of cement, lime and plaster.
	325	Manufacture of mica products.
	326	Manufacture of structural stone goods, stone dressing and stone crushing, stone ware.
	327	Manufacture of earthen and plaster statutes and other products.
	328	Manufacture of asbestos, cement and other cement products.
	329	Manufacture of miscellaneous non-metallic mineral products such as slate products, abrasives, graphite products, mineral wool, silica products and other non-metallic mineral products not elsewhere classified.

Major Group	Minor Group	Description
		Division 2 & 3—Manufacturing and Repair—contd.
33		*Basic Metal and Alloys Industries*
	330	Iron and steel industries.
	331	Foundries for casting and forging iron and steel.
	332	Manufacture of ferro-alloys.
	333	Copper manufacturing.
	334	Brass manufacturing.
	335	Aluminium manufacturing.
	336	Zinc manufacturing.
	339	Other non-ferrous metal industries.
34		*Manufacture of Metal Products and Parts except Machinery and Transport Equipment.*
	340	Manufacture of fabricated metal products such as metal cans from tin-plate, terne plate or enamelled sheet metal, metal shipping containers, barrels, drums, kegs, pails, safes, vaults, enamelled, sanitary and all other fabricated metal products not elsewhere classified.
	341	Manufacture of structural metal products.
	342	Manufacture of furniture and fixtures primarily of metal.
	343	Manufacture of hand tools and general hardware.
	344	Enamelling, japanning, lacquering, galvanising, plating and polishing of metal products.
	345	Manufacture of metal utensils, cutlery and kitchenware.
	349	Manufacture of metal products except machinery and transport equipment not elsewhere classified, like type-founding.
35		*Manufacture of Machinery, Machine tools and Parts except Electrical Machinery.*
	350	Manufacture of agricultural machinery and equipment and parts.
	351	Manufacture and repair of drills, coal cutting machines, earth moving, lifting and hoisting machinery, cranes, conveyors and road rollers and other heavy machinery and equipment used by construction and mining industries.
	352	Manufacture of prime movers, boilers and steam generating plants such as diesel engines and parts.
	353	Industrial Machinery for Food and Textile Industries.
	354	Industrial Machinery for other than Food and Textiles Industries.
	355	Manufacture of Refrigerators, Airconditioners, and Fire Fighting Equipment, and other parts, components and accessories.
	356	Manufacture, alteration and repair of general items of non-electrical machinery, components, equipment and accessories not elsewhere classified., *e.g.*, manufacture and repair of size reduction equipment like Pentagraph, Mapograph etc., crushers, conveyors, bucket elevators, ship hoist cranes, derricks, etc. mixers and reactors, centrifugal machines, driers, etc., power driven pumps, etc.; air gas, compressors and vacuum pumps (excluding electrical furnaces), etc.
	357	Manufacture of Machine Tools, their parts and accessories.
	358	Manufacture of office computing and accounting machinery and parts.
	359	Manufacture and repair of non-electrical machinery, equipment, components and accessories not elsewhere classified, (such as sewing machines, automatic merchandising machines, washing, laundry, dry-cleaning and pressing machines, cooking ranges and ovens, other service industry machines, arms and armaments etc.).
36		*Manufacture of Electrical Machinery, Apparatus, Appliances and Supplies and Parts*
	360	Manufacture of electrical industrial machinery and apparatus and parts (such as electrical motors, generators, transformers, electro-magnetic clutches and brakes etc.)
	361	*Manufacture of insulated wires and cables.*
	362	Manufacture of dry and wet batteries.

Major Group	Minor Group	Description
		Division 2 & 3—Manufacturing and Repairs—concld.
	363	Manufacture of electrical apparatus, appliances and their parts such as lamps, bulbs, tubes, sockets, switches, fans, insulators (except porcelain), conductors, irons, heaters, shavers, vacuum cleaners, etc., excluding repairing.
	364	Manufacture of radio and television transmitting and receiving sets including transistor radio sets, sound reproducing and recording equipment including tape recorders, public address systems, gramophone records and pre-recorded magnetic tapes, wire and wireless, telephone and telegraph equipment, signalling and detection equipment and apparatus, radar equipment and installations; parts and supplies specially used for electronic apparatus classified in this group.
	365	Manufacture and repair of Radiographic X-ray apparatus and tubes and parts.
	366	Manufacture of Electronic Computers, Control Instruments and other Equipment.
	367	Manufacture of electronic components and accessories not elsewhere classified.
	369	Manufacture of electrical machinery, apparatus, appliances and supplies and parts not elsewhere classified.
37		*Manufacture of Transport Equipment and Parts*
	370	Ship building and repairing.
	371	Manufacture of Locomotives and parts.
	372	Manufacture of Railway wagons and coaches and parts.
	373	Manufacture of other rail-road equipment.
	374	Manufacture of motor vehicles and parts.
	375	Manufacture of motor-cycles and scooters and parts
	376	Manufacture of bicycles, cycle-rickshaw and parts.
	377	Manufacture of aircrafts and its parts.
	378	Bullock-carts, push-carts, hand carts, etc.
	379	Manufacture of transport equipment and parts not elsewhere classified.
38		*Other Manufacturing Industries*
	380	Manufacture of medical, surgical and scientific equipment.
	381	Manufacture of photographic and optical goods (excluding photo chemicals, sensitised paper and film).
	382	Manufacture of watches and clocks.
	383	Manufacture of jewellery and related articles.
	384	Minting of coins.
	385	Manufacture of sports and athletic goods.
	386	Manufacture of Musical instruments.
	387	Manufacture of stationery articles like fountain pens, pencils, pens, pin cushions, tags, etc., not elsewhere classified.
	389	Manufacture of miscellaneous products not elsewhere classified such as costume jewellery, costume novelties, feather, plumes, artificial flowers, brooms, brushes, lamp shades, tobacco pipes, cigarette holders, ivory goods, badges, wigs and similar articles.
39		*Repair*
	390	Repair of footwear and other leather goods.
	391	Electrical repair shops.
	392	Repair of motor vehicles and motorcycles.
	393	Repair of watch, clock and jewellery.
	394	Repair of bicycles and cycle rickshaws.
	399	Repair of enterprises not elsewhere classified.
		Division 4—Electricity, Gas and Water
40		*Electricity*
	400	Generation and transmission of electric energy.
	401	Distribution of electric energy to household, industrial and commercial and other users.

Major Group	Minor Group	Description
41		*Gas and Steam*
	410	Manufacture of gas in gas works and distribution through mains to household, industrial and commercial and other users.
4		*Water Works and Supply*
	420	Water supply *i·e.*, collection, purification and distribution of water.
		Division 5—Constructions
50		*Construction*
	500	Construction and maintenance of buildings (including aerodromes).
	501	Construction and maintenance of roads, railways, bridges, tunnels, pipe lines, ports, harbours, *railways, etc.*
	502	Construction and maintenance of telegraph and telephone lines and communication systems.
	503	Construction and maintenance of water-ways and water reservoirs such as bund, embankments, dams, canals, tanks, wells, tube wells, etc.
	504	Construction of hydro-electric projects.
	505	Construction of industrial plants including thermal plants.
	509	Construction not elsewhere classified.
51		*Activities allied to Construction*
	510	Plumbing.
	511	Heating and air conditioning installation, lift installation, sound proofing, etc.
	512	Setting of tile, marble, brick, glass and stone.
	513	Plumber works such as fixing of doors, windows, panels, painting and decorating.
	514	Electrical installation.
	519	Other activities allied to construction not elsewhere classified, such as fixing of handpumps.
		Division 6—Wholesale and Retail Trade and Restaurants and Hotels
60		*Wholesale Trade (W. T.) in Food, Textiles, Live Animals, Beverages, and Intoxicants.*
	600	Wholesale trade in cereals and pulses.
	601	Wholesale trade in Foodstuffs other than cereals and pulses.
	602	Wholesale trade in textiles and textile products, like all kinds of fabrics, garments, shirtings, suitings, hosiery goods.
	603	Wholesale trade in beverages other than intoxicants, e.g., aerated water.
	604	Wholesale trade in intoxicants like wines and liquors including bottling.
	605	Wholesale trade in intoxicants like opium, ganja etc.
	606	Wholesale trade in tobacco and tobacco products.
	607	Wholesale trade in animals.
	608	Wholesale trade in straw and fodder.
61		*Wholesale trade in Fuel, Light, Chemicals, Perfumery, Ceramics, Glass.*
	610	Wholesale trade in medicines and chemicals.
	611	Wholesale trade in fuel and lighting products.
	612	Wholesale trade in toilets, perfumery and cosmetics.
	613	Wholesale trade in metal, porcelain and glass utensil crockery and chinaware.
62		*Wholesale trade in Wood, Paper, Other Fabrics and Skin and Inedible Oils.*
	620	Wholesale trade in petrol, mobil oil and allied products.
	621	Wholesale trade in wood, cane, bamboo, thatches, etc.
	622	Wholesale trade in paper and other stationery goods.
	623	Wholesale trade in skin, leather and fur etc.

Major Group	Minor Group	Description
		Division 6—Wholesale and Retail Trade and Restaurants and Hotels—concld.
63		*Wholesale trade in All Types of Machinery, Equipment, including Transport and Electrical Equipment.*
	630	Wholesale trade in agricultural and industrial machinery, e.g., harvestors, threshers sowing machines, etc.
	631	Wholesale trade in electrical machinery and equipment.
	632	Wholesale trade in transport and storage equipment.
64		*Wholesale trade in Miscellaneous Manufacturing*
	640	Wholesale trade in furniture and fixtures.
	641	Wholesale trade in rubber and rubber products.
	642	Wholesale trade in household and equipment not elsewhere classified.
	643	Wholesale trade in building materials.
	644	Wholesale trade in clocks, eye-glasses and frames.
	645	Wholesale trade in hardware and sanitary equipment.
	646	Wholesale trade in scientific, medical and surgical instruments.
	647	Wholesale trade in precious metals, stones and jewellery.
	649	Wholesale trade in goods not elsewhere classified.
65		*Retail trade (R. T.) in Food and Food Articles, Beverage, Tobacco and Intoxicants.*
	650	Grain and grocery store.
	651	Vegetable and fruit selling.
	652	Dealers in meat, fish and poultry.
	653	Dealers in sweetmeat, bakery products, dairy products and eggs.
	654	Pan, bidi, cigarette shops.
	655	Dealers in aerated water, soft drinks and ice cream.
	656	Wine and liquor shops.
	659	Retail trade in food and food articles, beverage, tobacco and intoxicants not elsewhere classified.
66		*Retail trade in Textiles*
	660	Dealers in textiles (non-ready made).
	661	Dealers in ready-made garments.
67		*Retail trade (R. T.) in Fuel and Other Household Utilities and Durables.*
	670	Dealers in firewood, coal and kerosene oil.
	671	Utensil shops.
	672	Fancy stores (including crockery and glassware dealers).
	673	Dealers in electrical and electronic goods.
	674	Furniture shops.
	675	Jewellery marts.
	676	Footwear shops.
	679	Retail trade in fuel and other household utilities and durables not elsewhere classified.
68		*Retail Trade in Others*
	680	Medical shops.
	681	Booksellers and stationers.
	682	Dealers in buildings material.
	683	Dealers in transport equipment.
	684	Petrol fillings stations.
	689	Retail trade in others not elsewhere classified.
69		*Restaurants and Hotels*
	690	Restaurants, cafes and others eating and drinking places.
	691	Hotels, rooming houses, camps and other lodging places.

Major Group	Minor Group	Description
		Division 7—Transport, Storage and Communications
70		*Land Transport*
	700	Railway transport.
	701	Passenger transport by tramway and bus-services.
	702	Passenger transport by other motor vehicles.
	703	Freight transport by motor vehicles.
	704	Hackney carriages bullock-carts, *ekka*, tonga, etc.
	705	Transport by animals like horses, elephants, mules, camels, etc.
	706	Transport by man (including rickshaw pullers, hand-cart pullers, porters, coolies, etc.)
	707	Pipeline transport.
	708	Supporting services to land transport, like operation of highway bridges, toll roads, vehicular tunnels, parking lots, etc.
71		*Water-transport*
	710	Ocean and coastal water transport.
	711	Inland water transport.
	712	Supporting services to water-transport like operation and maintenance of piers, docks, pilotage, light houses, loading and discharging of vessels, etc.
72		*Air Transport*
	720	Air-transport carriers (of passengers and freight).
	721	Supporting services to air-transport, like operation of airports, flying facilities radio beacons flying control centres, radar stations, etc.
73		*Services Incidental to Transport*
	730	Serivces incidental to transport, such as packing, crating travel agency, etc.
74		*Storage and Ware-Housing*
	740	Ware-Housing.
	741	Cold-storage.
	749	Storage and ware-housing not elsewhere classified.
75		*Communications*
	750	Postal, telegraphic, wireless and signal communication.
	751	Telephone communication.
	759	Communication not elsewhere classified.
		Division 8—Financing, Insurance, Real Estate and Business Services
80		*Banking and Similar Type of Financial Institutions*
	800	Banking.
	801	Credit Institutions other than banks, such as saving and loan associations, agricultural credit institution industrial development banks, etc.
	809	Other financial institutions such as pawn brokers, money lenders, financiers, chit funds, etc.
81		*Providents and Insurance*
	810	Provident Services.
	811	Insurance carriers, Life.
	819	Insurance carriers other than life, such as fire, marine, accident, health, etc.
82		*Real/Estate and Business Services*
	820	Purchase, sale letting and operating of real estate such as residential and non-residential buildings, developing and sub-dividing real estate into lots, lessors of real property, real estate agents brokers and managers engaged in renting, buying and selling, managing and appraising real estate on contract or fee basis.

Major Group	Minor Group	Description
		Division 8—Financing, Insurance, Real Estate and Business Service—concld.
	821	Purchase and sale, agents and brokers.
	822	Auctioneering.
	823	Accounting, auditing and book-keeping services.
	824	Data processing and tabulating services.
	825	Engineering, architectural and technical services.
	826	Advertising and publicity services.
	827	Machinery and equipment, rental and leasing.
	828	News Agencies *e.g.*, P.T.I., U.N.I. Reuter, etc.
	829	Business services, except machinery and equipment rental and leasing, not elsewhere classified.

1971 CENSUS

PUNCHING INSTRUCTIONS

ESTABLISHMENT SCHEDULE

Item Description	To be punched in card columns	Where coded in the schedule	Punching Instructions
1	2	3	4
File No.	1		Punch 'E' (double punch Y_5)
State	2		Punch as coded
District	3—4	1st line on top left	Punch as coded
Tahsil/Town	5—6	2nd line on top left for Tahsil and 1st line on top right for Town	In case of Tahsil Punch the code. In case of Town punch the re-numbered town code in Arabic numbers.
Village/Ward	7—9	1st line on top right for village and 1st No. of 2nd line on top right for ward	Punch as coded. In case village code exceeds 3 digits, make 'X' Punch also in col. 7 to represent Nos. 1,000 to 1,999 and make 'Y' punch in Col. 7 to represent Nos. 2,000 to 2,999. For example, X_{000} will represent 1,000; X_{001} will represent 1,001 and so on.
Block No.	10—12	2nd line on top right for Block in a village and 2nd No. of 2nd line on top right for Block in a ward.	Punch as coded. In case Block code exceeds 3 digits, punch 'X' in col. 10 to represent Nos. 1,000 to 1,999 and punch 'Y' in col. 10 to represent Nos. 2,000 to 2,999.
Rural/Urban Non-city/Urban city	13	Top left inside a triangle △	Punch as coded.
Serial No.	14—16 27—29 40—42 53—55 66—68	Col. 1	Punch as given
Type of establishment Govt. Private/Co-operative	17 30 43 56 69	Inside dotted lines in col. 4	Punch as coded and superimpose 'Y' punch (make 'Y' punch in addition to usual code).
No. of Persons working	18—21 31—34 44—47 57—60 70—73	Col. 5	Punch as given. In case the figure is more than 9,999, make 'X' punch in col. 18, 31, 44, 57 and 70, as the case may be, to represent 10,000 to 19,999 and 'Y' punch to represent 20,000 to 29,999. In case no figure is given, leave blank.
Type of manufacturing Establishments	22 35 48 61 74	Inside dotted lines in col. 6	Punch as coded. In case no code is given, leave blank.
N. I. C. Code of Establishment	23—25 36—38 49—51 62—64 75—77	Inside dotted lines in col. 7	Punch as coded.
Type of fuel or Power used	26 39 52 65 78	Inside dotted lines in col. 8	Punch as coded. In case no code is given, leave blank.
..	79—80	..	Blank.
