Publications of the Government of Goa, Daman and Diu

Part X District Census Hand book	1) Part (A) : Town and Village Directory of the Districts of Goa, Daman and Diu. Part (B) : Village and Town-wise Primary Census Abstract of the Districts of Goa Daman and Diu. 2) Part (C) : Analytical Report and Administrative Statements and District Census Tables of the Districts of Goa, Daman and Diu.

NOTE :—

(i) Part V (Special Tables and Ethnographic Notes on Scheduled Castes and Scheduled Tribes) is not published for Goa, Daman and Diu as a separate publication.

(ii) Part VI-A (Town Directory) is not published as a separate publication for Goa, Daman and Diu. The data are included in the District Census Handbook of Goa, Daman and Diu, Part A.

(iii) Part VII (Special Report on Graduates and Technical Personnel) is a publication of the Office of the Registrar General India, New Delhi on an all-India basis.

PREFACE

This volume presents for Goa, Daman and Diu important data on the Housenumbering and Houselisting operations that were carried out for the first time in this territory. In all the previous censuses, which were conducted under the erstwhile regime, only residential houses were taken into account, as the main purpose was to locate the places of human habitation for census enumeration. Non-residential houses, such as schools, temples, churches, factories, shops, offices, business houses etc. were not listed. These places have been brought under the purview of the 1971—Census in order to fall in line with the rest of the country. With the adoption of a uniform houselist throughout the country, important data on housing such as purpose for which the house is used, material of wall and roof, number of rooms occupied by households, tenure status of the households, approximate number of persons in each household etc. were collected. In case the census house was used as an establishment an altogether separate schedule was canvassed while preparing the houselist, and detailed particulars such as ownership of the establishment, number of persons working, type of fuel/power used if the establishment was a manufacturing or processing one, retail or wholesale in case of trading establishments and the like were collected. Thus for the first time in the history of Indian Census, a census of housing as well as a census of different categories of establishments was undertaken in the country as a part of the operations preparatory to the 1971-Census.

The results of the Housing and Establishment Census are being presented in this Volume in two parts, part III and part IV. Part III contains the report on establishments, subsidiary tables appearing at the end of each chapter and all the 'E' series tables, viz. E-I, E-II Part A, E-II Part B, E-II Part C, E-III and E-IV. Part IV contains the report on housing alongwith the subsidiary tables appearing at the end of each chapter and all the H-Series tables, viz. H-I, H-II & its appendix, H-III and H-IV. In this volume a few charts, diagrams, photographs and line drawings have also been provided so as to highlight the salient features. An idea of the houselist form and the establishment schedule used under the Census, instructions for filling them, list of industrial codes adopted under the National Industrial Classification, etc. can be had from the annexures given at the end of the volume.

This volume is the product of hard toil and patient labour of several persons in my office. I wish to place on record my grateful appreciation of the useful services rendered by the following members of my staff in the preparation of this volume.

1. Shri D. P. Naik, Assistant Director of Census Operations.

2. Miss M. V. Naik Salatry, Assistant Compiler.

Mention may also be made of Miss F. Fernandes, Stenographer who typed the whole report and Shri K. Lotlikar who typed the main and subsidiary tables.

My thanks are also due to Shri V. D. Mashelkar, a gifted artist from the Directorate of Fisheries, Govt. of Goa, Daman & Diu, for his excellent line drawings.

I am grateful to Shri S. R. Sathi, Manager, Government of India Press, Nasik for printing this volume and to Shri R. B. Chari Director of Census operations, Maharashtra and Shri D. V. Rangneker Deputy Director of Census operations Maharashtra for helping us with the printing paper and binding material required for printing of this volume.

S. K. Gandhe

Director of Census Operations Goa, Daman & Diu and Dadra & Nagar Haveli.

Panaji, 7th March 1973,

(vii) Percentage distribution of households by tenants and owners in Goa, Daman and Diu. . . Between 324–325

PART III

ESTABLISHMENT REPORT AND TABLES

CHAPTER I

INTRODUCTORY

Background

Lack of adequate and reliable data even of a basic nature on the type and level of activities of smaller establishments in the country has been felt keenly for a long time. The need became all the more pressing with the advent of the era of planned economic development in the country. Available statistical information was only with respect to industrial establishments furnished by the Chief Inspector of Factories every year covering only the units registered under the Factories Act. It did not include thousands of other smaller establishments in respect of which there was hardly any reliable data so far, though this sector absorbed a sizable section of the labour force.

The opportunity provided by the 1961 Population Census at its housenumbering and houselisting stage was availed of to collect the following additional information for only manufacturing, processing or servicing establishments in the houselist form itself :

(i) Name of establishment or proprietor.

(ii) Name of product(s), repair or servicing undertaken.

(iii) Average number of persons employed daily last week including proprietor or household members if working

(iv) Kind of fuel or power, if machinery is used.

This for the first time provied a complete list of all manufacturing establishments in the State with details of their location, size of employment and fuel or power used. While unregistered workshops and household industries engaged in any activity involving some kind of production, processing, servicing or repairing were covered at the 1961-Census, the business, trade and other similar establishments were left out at the holselisting stage of 1961-Census. The 1971-Census afforded an excellent and perhaps unique opportunity for removing this vital gap in our statistics. It was for the first time in the history of Indian Census that a separate and comprehensive schedule on establishment was canvassed at the houselisting stage of the 1971-Census. Besides the manufacturing establishments, it also covered the trading and other establishments, and gathered several detailed particulars thereof, giving a very valuable data on the unorganised sector of establishments.

So far as is known, the collection of such elaborate data on establishments has never been attempted before either within the Indian Sub-continent or in most of the foreign countries. It is hoped that this data will be highly valuable not only for industrial planning, but also for future economic surveys including the one attempting a study of the economic growth of the country.

1.2 Concepts and definitions

In 1961-Census, the term "Establishment" was defined in the following manner :

"An establishment, workshop or a factory was a place where goods were produced, processed or repaired. The production, processing or repair work was, however, to be on a commercial scale. Places where goods were only purchased or sold or where they were not produced for sale, were not treated as establishments"

Under the 1971-Census, instead of loading the main houselist form itself with questions pertaining to establishments, it was decided to have a separate schedule in which particulars of each establishment were recorded. The definition of establishment has also undergone some change, and was defined as follows :

"An Establishment is a place where goods are produced or manufactured not solely for domestic consumption or where servicing and/or repairing is done such as factory, workshop or household industry or servicing and/or repair workshop or a place where retail or wholesale business is carried on or commercial services are rendered or an office, public or private or a place of entertainment or where educational, religious, social or entertainment services are rendered. It is necessary that in all the places one or more persons should be actually working". It is obvious that the definition of an establishment has been elaborated to include trade and other establishments besides the manufacturing establishments.

1.3 Main items of information

Instructions to enumerators for filling up the houselist and establishment schedule are reproduced as Annexure 'A' to this Volume. A perusal of the establishment schedule on page 365 will indicate that it is intended to provide a complete list of all kinds of establishments in every village and town and also the size of employment in each category of establishments. The other items of information relate to :

(i) Ownership, i.e. whether the establishment is a Government/quasi-Government, private or co-operative institution, and the average number of persons working.

(ii) If used as a manufacturing establishment whether it is a registered factory or unregistered workshop or household industry.

(iii) Description of product(s) produced, processed or servicing done and type of fuel or power used.

(iv) Description of goods bought or sold and if retail or wholesale in case of trading establishments.

(v) In case of other miscellaneous establishments, the exact description like Government Office, hotel, theatre, barber's saloon, hospital, school, etc.

The data yielded through this scedule is of great significance, particularly in regard to the unorganised sector of industry or trade, classifying the establishments by the size of employment and the industrial or trade categories, correlating the power used and size of employment, indicating public or private or co-operative institutions by the size of employment etc. Since the data on establishments is tabulated on 100% basis throughout the country it will serve as a very good frame for any type of future economic research project.

1·4 Limitations of data collected

It has, however, to be noted that the data presented herein have certain limitations.

(i) First of all, the data presented in this report are limited only to establishments located in buildings i.e. in structures with walls and a roof. Open air establishments or itinerant establishments with no regular buildings are not covered.

(ii) Despite the instructions that all places where any kind of production, processing, servicing or repairing is undertaken should be recorded as workshops or household industries as the case may be, some enumerators laboured under an erroneous impression that some sort of machines should exist to treat a place as workshop. This lapse has given rise to an under-estimation of household industries to some extent.

(iii) In the case of large establishments, some enumerators might have recorded 3 or 4 contiguous houses constituting only one establishment, as separate establishments. In such cases there is a possibiity of getting inflated figures for the number of establishments in certain categories. Such cases are, however, believed to be very few.

(iv) Regarding the number of persons employed particularly in large establishments, the enumerators encountered many difficulties to get accurate figures. Though no precise estimate of such cases is possible, it is believed that the employment shown against each category of establishments has been recorded very much on the lower side.

In spite of the aforesaid limitations the data analysed in this report would no doubt be very useful in knowing the location pattern of production, types of servicing/processing etc. of different categories of establishments in this territory.

1·5 Pre-Tabulation Scrutiny

In the first instance, Establishment records received along with the Houselist in the Tabulation Office were first checked for accuracy of coverage. These records were then subjected to a rapid but close and careful scrutiny with a view to ascertaining the defects in them, if any.

The entries in the Establishment Schedule are inter-connected with columns 6 and 7 of the Houselist form and so whilst scrutinising Establishment shcedule, the houselist form was also taken up for checking. All the discrepancies which were of purely technical nature were reconciled in the Tabulation Office itself by making a reference to other columns of the establishment schedule.

Following were the instructions for editing of data on Establishments.

(i) Location Code was invariably checked. If any entries were found missing, the same were found out from the corresponding Houselist form.

(ii) For scrutiny of column 1-Sr. No., it was made sure that for all 'yes' entries in column 7 of houselist form, there is corresponding entry in this schedule and the serial number tallied. In case any entry was struck off either at the enumeration stage or at editing stage, all succeeding serial numbers were corrected and correspondence with column 7 of the Houselist was ensured.

(iii) For security of column 2-Census house number, column 3 of the houselist form was tallied.

(iv) For scrutiny of column 4-type of establishment, column 3 was made use of to make correct imputation. 'Private' was entered in case no clue was found from column 3.

(v) 'Unspecified' was entered under column 5, if there was an omission.

(vi) Columns 6, 7 and 8 was checked if the establishment fell in the category of manufacturing/processing establishments Sometimes the enumerator had entered details in columns 9 and 10 besides column 6, 7 and 8 to show that sales also took place in the establishment. Here entries in columns 9 and 10 were scored off since manufacturing was given precedence over sale which was treated as a secondary function. Similarly if the entry in column 6 was registered factory and in column 8 type of power used was other than electricity and the number of workers wasl ess than 20 in column 5, then the entry Registered factory in column 6 was changed to unregistered workshop.

If the entry under column 7 was omitted, the same was filled with the help of column 3, if it afforded any clue. For missing entry under column 8, 'manual' was entered after having regard to entiries in columns 3 and 7.

(vii) For columns 9 and 10, it was first verified that columns 6, 7, and 11 had no entries. In case no entry was made under column 9, imputation was made with reference to entry in column 3. If column 9 was filled in and 10 was left blank, then "retail" was written under column 10, except when commercial services like bank, insurance etc. were rendered in the trade or business establishments.

(viii) Column 11 would have entry only when the establish ment was classified as other establishment. In the case of missing entry, imputation was done with the help of entry under column 3.

1.6 Quality of work

In spite of the above careful scrutiny some doubtful cases arose which could be reconciled only after local verification. Such cases were sent to the respective Charge Superintendents for immediate rectification.

Below listed were a few typical mistakes committed by the enumerators and were set right either by correspondence or by visit on the spot.

(i) The definition of an 'industry' was quite comprehensive—any activity involving some kind of production, processing, servicing or repairing came within its scope provided the motive was commercial exploitation as distinct from mere domestic consumption. The words production, processing or repairing of goods used in the definition were interpreted by some of the enumerators to include tea-stalls or sweetmeat shops or pan-shops.

(ii) In a few cases, the enumerators could not decide correctly whether the establishment where some kind of manufacturing, processing or servicing etc. was done was a household industry or a registered factory or a workshop not registered under the Factories Act.

(iii) Another discrepancy resulted from a confusion created in the minds of enumerators to record correctly the type of fuel/power used for manufacturing or processing industries. Invariably where diesel oil is used for working the machines, the enumerators recorded "electricity" as the source of power. In some cases the kind of fuel used was not at all recorded.

(iv) In case of trading establishments, some of the enumerators employed generic expressions like shop, without giving the details of the particular commercial activity in which the establishment is engaged.

(v) In case of offew schools and other educational institutions, some enumerators entered the number of students in column 5 of the establishment schedule instead of recording the number of teachers and other staff working in these institutions.

1·7 Tabulation

As soon as the preliminary scrutiny was over, the establishment records were arranged blockwise for rural and urban areas separately. Details regarding district, taluka, village or town, block number etc. were entered on the cover page of each bundle to facilitate the coding of entries in the Establishment schedule. Red pencil or red ink was used for the coding work in the various columns of the Establishment schedule.

Following codes were used for coding the entries

(i) Area

Rural.....1

Urban.....2

(i) Type of Establishment

Government/Quasi-Government.....1

Private.....2

Co-operative.....3

(iii) Type of Manufacturing Establishment

Registered Factory.....1

Un-Registered Workshop.....2

Household Industry.....3

(iv) Nature of Establishments

The information on the nature of establishments is coded in accordance with the National Industrial Classification adopted by the Government of India. A three digit code system as given in the Annexure 'B' to this Volume has been adopted to identify the whole range of economic activity.

(v) Type of fuel or power used

Electricity	1
Liquid fuel	2
Coal, Wood & Bagasse . . .	3
Other (including animal power) .	4
Manpower	5

Since the data on Establishments was to be processed on Electronic Data Processing System, maximum care was exercised to ensure that the coded entries were free from mistakes. All the entries were therefore once again checked with the code list. This was the first time in the Census history that a considerable part of Census data was computerised. The data on establishments was processed accordingly by transferring on to punched cards. These punched cards after verification in the Tabulation Office were taken to Bombay for feeding on the computer. A series of edit checks were applied once the cards passed on the computer which could reveal errors of coding/punching. These errors were then corrected keeping with the internal consistency of the data and simultaneously the punched card data was transferred to a magnetic tape. All the regional computers did the function of transferring data from punched cards to magnetic tapes (called as Card to Tape operations) which were subsequently sent to the Registrar General's Office at Delhi. These tapes have enormous storing capacity for the punched card data and can provide information at the shortest notice for even the smallest administrative unit, if required. The entire data stored on the magnetic-tapes is tabulated with the help of an IBM. 1401 Electronic Computer with 16-K Memory and 6 tape drives, installed in the office of the Registrar General, New Delhi.

1·8 Nature of Tables

Four different tables with parts were computerised on the basis of information contained in the Establishment Schedule The tables were prepared on a full count basis, separately for rural and urban areas of every taluka. The following main table have been prepared :

E-I Distribution of Establishments by broad types

This table gives the distribution of all establisnments by three broad types, *viz.* manufacturing, processing or servicing establishments ; trade or business establishments; and other establishments under each of the government or quasi-government, private and co-operative sectors of the economy. The manufacturing, processing or servicing establishments are further classified as registered factories, unregistered workshops and household industries. The trade or business establishments are classified as wholesale, retail or others. Lastly, the 'other' establishments are classified as educational institutions, public health institutions and others

E-II Part A—Distribution of Manufacturing, Processing or Servicing Establishments other than household Industries classified by registered factories, unregistered workshops, and size of employment.

This table shows distribution of manufacturing, processing or servicing establishments other than household industries and gives useful information about the size of employment and the number of units under (a) registered factories and (b) unregistered workshops in each Division/Major Group of N.I.C, 1970.

E-II Part B—Distribution of Manufacturing, Processing or Servicing establishments other than Household Industries classified by Industry, fuel/power or manual used and size of employment.

In this table, the number of factories and workshops are presented by Division/Major Group of N.I.C. 1970 and by size of employment. This also gives information about the kind of fuel or power used in the industries.

E-II Part C—Distribution of Household Industry Establishments classified by Industry, Fuel/Power used and size of employment.

Information on household Industry Establishments by Division and Major Group of N.I.C. 1970, about the kind of fuel or power used by broad employment size groups is given in this table.

E-III—Distribution of Trade/Commercial Establishments classified by the type of business or trade and size of employment.

This table is prepared for the Trade/Commercial establishments classified by the type of business or trade and size of employment. The establishments are further classified under each Division, Major Group of N.I.C. 1970.

E-IV—Distribution of Establishments (other than Maunfacturing, Processing, Servicing or Business and Trade establishments) by size of employment.

This table gives the distribution of establishments (other than manufacturing, processing, servicing or business and trade establishments) by size of employment in each Division/Major Group of N.I.C., 1970. It also provides data regarding employment by broad groups in each Division/Major Group of N.I.C., 1970.

CHAPTER II

TYPES OF ESTABLISHMENTS

Preliminary Remarks

We have described in chapter I, how the data on establishments was collected, edited and processed to prepare varied types of tables. In this chapter we shall discuss the main table E-I which gives a comprehensive account of different categories of establishments in each taluka and district separately for total, rural and urban areas according to the type of establishments. To facilitate analysis of the material from Table E-I, a subsidiary table E-I.1 has been prepared and is presented at the end of this chapter. This subsidiary table shows for total, rural and urban areas of Goa, Daman & Diu and its 3 districts, the distribution of 1000 establishments by broad types.

2.2 Category of Establishments

In table E-I, the establishments have been classified into 3 broad categories, *viz* :

i) Manufacturing, processing and repairing establishments.

ii) Trade or Business establishments.

iii) Other establishments.

i) Before proceeding with the analysis of the data it is necessary to give the broad implications of the various terms such as a registered factory, unregistered workshop, household industry, etc. The first category comprises of those establishments where some kind of production, processing, repair or servicing takes place, or where goods or articles are made and sold. The emphasis here is on some sort of process of manufacturing, servicing or repairs for sale. It is immaterial whether the sale takes place at a point other than the point of production, processing, repairing or servicing.

Registration of an establishment under the Factories Act is obligatory if a unit employs 20 or more persons without using power, or ten or more persons while using power. Registered factories are distinguished from the unregistered workshops on the basis of these two criteria. A workshop run as household industry is not considered a factory (registered or not) but treated as a household unit only.

ii) Trade or business establishments are those where some trading *i. e.* transactions involving sale and/or purchase of goods go on either in cash or on credit basis. Business establishments are those places where transactions in money or other articles take place, e.g. banks etc.

iii) Other establishments include Govt. and private offices, schools, hospitals, railway stations, barbers' saloons, cinemas or drama theatres, temples, churches, etc.

2.3 Number of Establishments

In all , 25,592 establishments have been recorded in Goa, Daman & Diu. Of the total, 11,154 or 44% are trade or business establishments. The number of manufacturing, processing and repairing establishments is 7,510 while that of other establishments is 6,928.

The trade or Business establishments constitute 436 per thousand and this category of establishments is highest in the two talukas of Tiswadi and Mormugao (541 and 518 per thousand respectively) followed by Salcete and Bardez talukas (483 and 478 per thousand respectively). The lowest proportion of 268 per thousand is found in Pernem taluka. From statement II.1 given below, it will be seen that in almost every taluka the proportion of trade or business establishments is higher than that of the two other categories, except in the three talukas of Pernem, Satari and Canacona which are comparatively backward areas and industrially undeveloped.

STATEMENT II.1

Distribution of 1000 *Establishments by different categories*

Union Territory/District/ Taluka	Manufacturing, Processing or Servicing establishments	Trade or Business Establishments	Other Establishments
1	2	3	4
Goa, Daman & Diu . .	293	436	271
Goa District	296	437	267
Tiswadi	220	541	239
Bardez	321	478	201
Pernem	364	268	368
Bicholim	247	407	346
Satari	248	361	391
Ponda	274	390	336
Sanguem	286	368	346
Canacona	416	276	308
Quepem	357	398	245
Salcete	318	483	199
Mormugao . . .	274	518	208
Daman District . . .	269	413	318
Daman	269	413	318
Diu District . . .	220	406	374
Diu	220	406	374

All the above facts clearly point towards an essentially trade oriented economy of this territory. No doubt, after the liberation of this territory from the eistwhile regime the scene began to change fast and industrial activity started picking up and acquiring more and more momentum. But it seems it may not be before some years still that a major break through is attained in converting the trade oriented economy of this territory into an industrial economy.

The manufacturing, processing or servicing establishments constitute 293 per thousand while the other category of establishments constitute 271 per thousand. Detailed analysis on the number of these categories of establishments is given in subsequen t paragraphs.

2.4 Types of Ownership

Every establishment is classified according to the type of its ownership i. e. whether it belongs to public sector (Government/ Quasi-Government) or to private sector or to the co-operative fold.

All establishments either completely owned or having majority of shares owned by the Central or State Government or a Local body like Municipality, etc. are classified as public sector establishments. Private establishments are those owned and managed by private individuals or associations. Establishments registered under the Cooperative Societies Act of the State were entered in the category of "Co-operative" establishments.

From the subsidiary table E-I.1, it will be seen that as many as 893 establishments out of every 1000 in this territory are managed by private individuals. In Daman and Diu districts, this proportion is slightly lower, being 862 and 847 per thousand respectively as against 895 in Goa district. While the proportion of Government owned establishments is 95 per thousand, the Co-operative Sector establishment hardly makes any significant proportion, being only 12 per thousand. This easily proves that the cooperative movement has not made any headway in this territory. This is also natural since, prior to the liberation of this territory in December, 1961, there was hardly any semblance of economic enterprise run on a cooperative basis. Whatever small proportion has been observed now is due to the establishment of service consumer cooperatives during the last 8/9 years only.

As regards private sector establishments the major share goes to the retail trade (36%), followed by household industries (22%) and other miscellaneous establishments (17%) e. g. temples, churches, cinema houses, laundries, etc. A higher percentage of 44% of the total number of establishments owned by Government is observed in the case of educational institutions. This is probably due to the fact that a majority of the primary schools is owned by Government.

2.5 **Factories, Workshops and Household Industries**

There are in all 7,510 manufacturing establishments out of which 210, or 3% are registered factories, 2,360, or 31%, are recorded as unregistered workshops and the remaining 4,940 or 66% are entered as household industries. Of the total number of manufacturing establishments 5,505 or 73% are located in rural areas and 2005 or 27% in urban areas. The urban areas account for 26.4% of the population and 3.6% of the land area of Goa, Daman & Diu. It is evident, therefore, that the urban areas have their due share of manufacturing establishments.

Statement II.2 below gives the distribution of 1,000 manufacturing establishments in different talukas by rural and urban areas.

STATEMENT II.2

Distribution o 1000 Manufacturing Establishments in Different talukas by Rural and Urban areas.

Union Territory/ District/Taluka	No. of Manufacturing Establishments			Distribution of 1000 Establishments	
	Total	Rural	Urban	Rural	Urban
1	2	3	4	5	6
Goa, Daman & Diu	**7,510**	**5,505**	**2,005**	**733**	**267**
Goa District	7,152	5,367	1,785	750	250
Tiswadi	722	390	332	540	460
Bardez	1,134	792	342	698	302
Pernem	626	599	27	957	43
Bicholim	453	344	109	759	241
Satari	200	172	28	860	140
Ponda	786	678	108	863	137
Sanguem	380	338	42	889	111
Canacona	416	405	11	974	26
Quepem	454	411	43	905	95
Salcete	1,447	1,005	442	695	305
Mormugao	534	233	301	436	564
Daman District	220	63	157	286	714
Daman	220	63	157	286	714
Diu District	138	75	63	543	457
Diu	138	75	63	543	457

From the above statement it will be seen that among the 13 talukas of Goa, Daman & Diu, Salcete takes the lead in terms of absolute numbers followed by Bardez, Ponda, Tiswadi and Pernem. Diu taluka has the lowest number. These figures, revealing though they are, should cause no surprise because they depend mainly on the size of the population of the area as well as the preponderance of small units catering to the rural demand. The ranking of talukas in terms of 1971-Census population follows almost the same pattern except in the case of Pernem taluka which occupies 7th place in the list of talukas classified by siz of population but fifth in the above table. The distinction of occupying 5th place by Pernem taluka is mainly due to a large number of country liquor and toddy manufacturing establishments there. Out of a total of 626 manufacturing establishments in that taluka, as many as 352 (more than 50%) are manufacturing country liquor and toddy and are run as household industries in the rural areas.

From table E-I, it will be seen that five talukas of Tiswadi, Bicholim, Ponda, Salcete and Mormugao account for nearly 78% of the total number of registered factories—38% in rural areas and 40% in urban areas. The unregistered workshops are more common in urban areas, accounting for 6 1% of the total number of workshops. The four bigger towns of Panaji, Mapusa, Margao and Mormugao together contribute to over 45% Household industries are small establishments of village carpenters, potters, weavers, etc. and are more a common feature of rural areas. This is evident from the fact that nearly 91% of such establishments are located in rural areas. The villages of Bardez Pernem, Ponda and Salcete account for 53% of the total number of household industries in the Territory.

2.6 **Trade or Business Establishments**

In all, there are 11,154 Trade or Business Establishments in Goa, Daman & Diu. Of these only 164 or 1.5% are engaged in wholesale trade, 8,517 or 76.3% in retail trade while the remaining 2,473 or 22.2%, which also include restaurants and other eating places, are classified as "others" in this category.

Wholesale trade establisments are mostly located in urban areas. The two towns of Panaji and Margao account for nearly 41% of the total number of thes establishments. Nearly 90% of these establishments are owned by private individuals and mostly deal in food articles, textiles, beverages and intoxicants.

Retail trade establishments which formed the main bulk mostly consisted of grain and grocery shops, panbidi shops, vegetable shops, traders in aerated waters, country liquor shops etc. and constituting nearly 77% of the total number of establishments engaged in retail trade. While the rural areas account for 4,633 or 54%, the urban areas account for 46%. Over 96% of these establishments are owned privately, followed by a few establishments (about 2.7% only) run on a cooperative basis. The proportion of Government owned establishments is almost negligible, not being even 1% of the total number of retail trade establishments.

"Other" establishments include business houses where transactions in money or other articles take place, like banks, insurance etc. Restaurants, hotels, etc. are also included in this category and in fact occupy the major share of 77% of the total number of establishments in this category. 1,469 or 59% of these establishments are located in rural areas, out of which the tea-shops, bars, restaurants, hotels etc. together account for as many as 1,341 units forming 91% of the establishments. Here again, the majority of establishments constituting nearly 94% are owned privately.

The statement given below shows for the Union Territory, its 3 districts and 13 talukas and separately for total, rural and urban areas of each unit the proportion of 1000 trade/commercial establishments according to different types.

STATEMENT II.3

Distribution of 1000 *Trade/Commercial Establishments by Broad Types in Rural and Urban Areas.*

Union Territory/ District/Taluka	Total Rural Urban	Total Trade/ Commercial Establishments	Trade or business establishments		
			Wholesale	Retail	Others
1	2	3	4	5	6
Goa, Daman & Diu	T	1000	15	763	222
	R	1000	8	753	239
	U	1000	23	776	201
Goa District	T	1000	13	760	227
	R	1000	6	749	245
	U	1000	21	775	204
Tiswadi	T	1000	22	764	214
	R	1000	3	848	149
	U	1000	35	711	254
Bardez	T	1000	9	818	173
	R	1000	2	774	224
	U	1000	17	874	109
Pernem	T	1000	2	718	280
	R	1000	2	724	274
	U	1000	0	667	333
Bicholim	T	1000	12	652	336
	R	1000	15	624	361
	U	1000	0	760	240
Satari	T	1000	10	574	416
	R	1000	14	491	495
	U	1000	0	813	187
Ponda	T	1000	17	736	247
	R	1000	12	733	255
	U	1000	37	748	215
Sanguem	T	1000	10	630	360
	R	1000	7	610	383
	U	1000	29	754	217
Canacona	T	1000	0	743	257
	R	1000	0	744	256
	U	1000	0	736	264
Quepem	T	1000	12	771	217
	R	1000	11	765	224
	U	1000	15	809	176
Salcete	T	1000	14	803	183
	R	1000	2	855	143
	U	1000	23	765	212
Mormugao	T	1000	6	806	188
	R	1000	0	830	170
	U	1000	7	800	193
Daman District	T	1000	27	840	133
	R	1000	10	941	49
	U	1000	34	797	169
Daman	T	1000	27	840	133
	R	1000	10	941	49
	U	1000	34	797	169
Diu District	T	1000	79	803	118
	R	1000	87	812	101
	U	1000	69	793	138
Diu	T	1000	79	803	118
	R	1000	87	812	101
	U	1000	69	793	138

From the above it will be seen that out of every 1000 trade. or business establishments as many as 763 are engaged in retail trade. In Daman and Diu districts this proportion is higher, *viz* 840 and 803 per thousand respectively, as against 760 in Goa district. In rural areas of Daman and Diu districts, this proportion is higher than that of urban areas though opposite is the case for the Goa district as a whole. Among the talukas of Goa district Bardez is having the highest proportion (818) followed by Mormugao (806) and Salcete (803). The proportion of other establishments is 222 for the State and much higher in Goa district than the districts of Daman and Diu. The proportion of whole sale trade establishments is confined to a mere 1.5 per cent of the total trade/commercial establishments.

2.7 Other Establishments

There are 6,928 other establishments, which are broadly *classified into three main categories :—*

(i) schools and other educational institutions;

(ii) Public Health and Medical institutions;

(iii) Others.

Schools and other Educational Institutions

There are in all 1,521 educational institutions in this territory. Of these 1,226 or 81% are in the rural areas and 295 or 19% in the urban areas. This category of establishments constitutes about 22% of the total number of other establishments. Again, of the total number of educational institutions over 70% are owned by the Government. Rural areas alone account for over 87% of the total number of Govt. owned educational institutions. This is mainly because of a number of primary and middle schools located in rural areas are owned by the Government.

In order to arrive at any precise conclusion about the relative position of each taluka from the point of view of educational facilities, it is necessary to find out the average number of educational establishments per 1000 pouplation for each taluka. This average sometimes may not give a correct picture since our observations are based on mere numerical strength of the institutions. The enrolment of students in each institution has not been taken into consideration . For example, a degree college is treated on par with a small primary school. Even so, the following statement giving the number of institutions per 1,000 population in rural and urban areas of each taluka would more or less reveal the adequacy of educational facilities in this territory.

STATEMENT II.4

Average Number of Educational Institutions per 1000 *Population.*

Union Territory/District/Taluka	Rural	Urban
1	2	3
Goa, Daman & Diu	**1.94**	**1.30**
Goa District	1.98	1.31
Tiswadi	2.49	1.00
Bardez	1.25	1.55
Pernem	2.36	2.05
Bicholim	1.99	1.75
Satari	3.31	3.42
Ponda	2.12	1.96
Sanguem	2.93	2.80
Canacona	2.59	4.49
Quepem	2.05	3.42
Salcete	1.43	1.38
Mormugao	1.35	0.75
Daman District	1.31	1.04
Daman	1.31	1.04
Diu District	1.36	1.77
Diu	1.36	1.77

From the above statement, it is seen that the average number of schools or educational institutions is 1.94 for every 1000 population in the rural areas of the territory as against 1.30 in the urban areas. The higher ratio for rural areas is the result of the intensive campaign for the spread of primary education carried out in this territory during the last decade. As a result of this, a number of small primary and middle schools have come up in rural areas as against a smaller number of educational institutions in urban areas each catering to a larger number of students.

The student enrolment figures may perhaps throw better light on this subject. According to the available student enrolment statistics from Education Department, 107 students per school or educational institution are on the enrolment in rural areas as against 195 in urban areas. Again in rural areas, Satari Taluka with an average of 3.31 seems to be placed in a relative[illegible] to a greater number of schools though [illegible] The rural areas of Tiswadi, Pernem, Ponda, Sanguem, Canacona and Quepem are having averages varying from 2.05 to 2.93. Bardez, Bicholim, Salcete, Mormugao, Daman and Diu Talukas have schools less than 2 for every 1000 population.

Among the urban areas, Chauri Town in Canacona heads the list with 4.49 schools per thousand population, followed by Valpoi and Quepem Towns with an average of 3.42 schools each. So far as Chauri Town is concerned, the case is one of wrong classification of urban area. It has been given the urban status by virtue of the sole consideration of being a Municipal area with population of 1,335 which is less than each and every village of the Canacona Taluka. The Valpoi and Quepem Towns too are having meagre population figures of 2922 and 2925 respectively. Though the town of Mormugao has the lowest average of 0.75 i. e. one school or educational institution for every 1,335 persons, the enrolment figures there is found to be quite high *viz.* 253' students per educational institution.

Public Health and Medical Institutions

There are 473 public Health Institutions in the Union Territory which include hospitals, dispensaries, clinics, maternity homes etc. Of these 227 or 48% are found to be located in the rural areas and 246 or 52% in the urban areas. The number of public health institutions owned by the Government is 144 *i.e.* 30% of the total number. The remaining 70% of the institution are almost owned privately. Here also, it is possible to judge the extent of medical facilities available in each taluka from the number of such institutions and the population served by each one of them. The figures of 1971-population served by a hospital or dispensary etc. in the different talukas given in the following statement will be useful in this context.

STATEMENT II.5

Number of Persons served by a Hospital or Dispensary etc.

Union Territory/District/Taluka	Rural	Urban
1	2	3
Goa, Daman & Diu	2,780	922
Goa District	2,703	907
Tiswadi	2,450	1,040
Bardez	3,155	588

STATEMENT II.5—*Contd.*

Number of Persons served by a Hospital or Dispensary etc.

Union Territory/District/Taluka	Rural	Urban
1	2	3
Pernem	4,543	419
Bicholim	3,560	1,710
Satari	3,699	1,461
Ponda	2,404	638
Sanguem	2,827	1,669
Canacona	4,022	223
Quepem	3,511	975
Salcete	1,785	748
Mormugao	2,145	1,469
Daman District	10,711	1,082
Daman	10,711	1,082
Diu District	2,950	1,036
Diu	2,950	1,036

It is seen from the above statement that there is a hospital or dispensary for every 2,780 persons in the rural areas of the Union Territory as against 1 for 922 persons in the urban areas There is also variation in the rural areas between talukas. While there is a hospital for every 1,785 persons in the rural areas of Salcete Taluka, the rural areas of Pernem taluka have one hospital for more than 4,500 persons. From the above statement, it appears that the rural areas of Daman district are greatly lacking in medical facilities, because one hospital has to cater for nearly 11,000 persons. However, it may not be correct to hasten to such a conclusion since the District of Daman is a very compact area with very good communication links between the villages and the twon of Daman. In fact, the Government hospital at Daman is greatly made use of by the rural population of the district Most of the villages are situated with an easy reach of the town of Daman. In the case of urban areas, there is a hospital for every 922 persons. The towns of Bicholim, Valpoi, Sanguem and Mormugao seem to be lacking behind in medical facilities as compared to the other towns.

Other categories of Establishments

As explained earlier, this category of establishments include Government and Semi-Government offices, temples, churches cinemas, barber's saloons, laundries, clubs, photo-studios etc. Temples, churches, mosques and other religious institutions together account for roughly 50% of these establishments, 44% in rural and 6% in urban areas. The higher proportion in the rural areas is naturally due to the existence of places of worship in almost all the villages including the small ones, and those situated in far-flunged areas. The rural proportion is higher in almost all the talukas except Tiswadi, Mormugao, Daman and Diu. The proportion in the rural areas of three talukas of Ponda, Bicholim and Pernem is significantly higher on account of concentration of a number of small temples in the villages of these talukas.

SUBSIDIARY TABLE E-I.1

Distribution of 1,000 *Establish ents by Broad types in Rural and Urban areas separately*

This subsidiary table is based on main table E-1 and gives the distribution of 1000 Establishments by broad types for the Union Territory of Goa, Daman and Diu and its 3 districts, separately for total, rural and urban areas.

There was no comparable Table in 1961 Census since the scope of inquiry was limited to manufacturing establishments only. In this table against Total in col. 2 there are 3 entries in col.3 against items (a), (b) and (c) which add up to one thousand Entry in col. 3 against (a) is equal to line total of cols. 4 to 12. Similarly entry against (b) or (c) in col. 3 is equal to cols. 4 to 12. This pattern is repeated for rural and urban also.

The terms used in this table are explained in detail in para 2 of Chapter-II-Types of Establishmens.

SUBSIDIARY TABLE—E-I. 1

DISTRIBUTION OF 1000 ESTABLISHMENTS BY BROAD TYPES IN RURAL AND URBAN AREAS SEPARATELY

Union Territory/District	Total Rural Urban	No. of Establishments (a) Govt. or quasi Govt. (b) Private (c) Co-operative	Manufacturing, Processing or Servicing Establishments			Trade or Business Establishments			Other Establishments		
			Registered Factories	Unregistered workshops	Household Industries	Wholesale	Retail	Others	Educational Institutions	Public Health Institutions	Others
1	2	3	4	5	6	7	8	9	10	11	12

CHAPTER III

SIZE OF EMPLOYMENT AND TYPES OF FUEL USED

Preliminary Remarks

This chapter attempts a discussion on the main tables E-II Part A, E-II Part B and E-II Part C which present distribution of industrial establishments classified by industry, fuel/power used and size of employment. In addition to this, it is also proposed to discuss in this chapter data presented in tables E-III and E-IV relating to trade/commercial and other establishments. The data contained in the above main tables was also utilised for drawing 5 subsidiary tables, viz, E-II Part A.1, E-II Part B.1, E-II Part C.1, E-III.1 and E-IV.1, which are given at the end of the chapter.

3.2 Size of employment in industrial establishments.

For purposes of analysing data under this head, all industrial establishments, viz. registered factories, unregistered workshops and household industries have been divided into 9 categories according to the number of persons employed. These categories consist of establishments employing (i) 1 person (ii) 2-4 persons (iii) 5-9 persons (iv) 10-19 persons (v) 20-49 persons (vi) 50-99 persons (vii) 100-299 persons (viii) 300-499 persons and (ix) 500 + persons. Establishments where the number of persons employed is not specified were treated separately.

Out of 7,510 industrial establishments enumerated in Goa, Daman & Diu, as many as 3,734 units or nearly 49.7% are single-worker establishments; and another 2,944 units or nearly 39.2% have 2 to 4 workers. Industrial establishments employing 5 to 9 persons account for 5.6% of the total number. A further 1.5% belong to the category employing 10 to 19 workers. It is implied therefore that after accounting for the units of unspecified number of persons, hardly 1.8% out of the total number remain, which employ 20 workers or more. If the establishments are broadly divided into 3 employment sizes, (i) small units (upto 4 persons), (ii) medium units (5-19 persons) and (iii) large units (20 persons and above), the first category would comprise as much as 88.9%, the second 7.1% and the third a mere 1.8% of the total. Establishments with unspecified number of persons employed makes a proportion of 2.2% of the total. The following statement gives the distribution of 1000 industrial establishments in different talukas of Goa, Daman & Diu by the size of employment.

STATEMENT III.1

Distribution of 1000 Industrial Establishments in different talukas of Goa, Daman & Diu by size of employment.

Union Territory/District/ Taluka	1 Person	2—4 Persons	5—9 Persons	10—19 Persons	20—49 Persons	50—99 Persons	100 Persons and above	Persons unspecified
1	2	3	4	5	6	7	8	9
Goa, Daman & Diu	497	392	56	15	12	4	2	22
Goa District	502	388	54	15	12	4	2	23
Tiswadi	413	392	97	33	26	6	1	32
Bardez	480	392	66	8	3	1	1	49
Pernem	714	265	11	2	0	0	0	8
Bicholim	433	421	53	18	35	18	9	13
Satari	510	420	5	0	20	0	0	45
Ponda	572	351	38	17	10	3	3	6
Sanguem	563	326	37	21	8	3	0	42
Canacona	567	409	12	0	0	0	0	12
Quepem	463	436	44	9	11	4	2	31
Salcete	418	461	71	17	11	2	1	19
Mormugao	534	320	73	30	22	13	8	0
Daman District	345	505	118	27	0	0	0	5
Daman	345	505	118	27	0	0	0	5
Diu District	522	420	29	0	7	15	7	0
Diu	522	420	29	0	7	15	7	0

From the above, it will be seen that Pernem taluka is having the highest proportion (714 per thousand) of single-worker establishments, followed by Ponda, Canacona and Sanguem with 572,567 and 563 per thousand, respectively. Lowest proportion of 345 per thousand is observed in Daman taluka. The high proportion of single-worker establishments in Pernem taluka is attributable as stated in the earlier chapter mainly to the country liquor manufacturing industry conducted as an household industry in this taluka. In the category of establishments employing 2 to 4 workers, Daman taluka takes the lead with a proportion of 505 per thousand followed by Salcete taluka with 461 per thousand. Pernem taluka is having the lowest proportion of 265 per thousand. There is a substantial drop in all talukas in the number of establishments belonging to the employment sizes 5 to 9 and 10 to 19. The proportion is comparatively high in Daman, Tiswadi, Salcete and Mormugao. In the next 3 categories employing 20 persons or more, the proportion is markedly high in Bicholim taluka followed by Mormugao, Tiswadi and Diu talukas. A higher proportion of this category in Bicholim taluka is attributable mainly to the flourishing mining industry and also a good number of cashewnut processing factories. There are 4 factories in Bicholim taluka employing 100 persons and above, two of them engaged in the processing of mineral ore, third unit in the construction and repair of barges and the fourth one is a cashewnut processing factory.

3.3 Rural-Urban Pattern

The foregoing observations have been made on the basis of figures for the total area. It may be useful to find out whether the employment pattern differs between rural and urban areas. The statement below gives the distribution of 1000 industrial establishments by size of employment, separately for rural and urban areas. Some of the categories in higher employment ranges have been combined to reduce the spread of the table.

STATEMENT III.2

Distribution of 1000 industrial establishments by size of employment, separately for rural and urban areas.

Union Territory/District/ Taluka	1 Person		2—4 Persons		5—19 Persons		20 Persons and above		Persons Unspecified	
	R	U	R	U	R	U	R	U	R	U
1	2	3	4	5	6	7	8	9	10	11
Goa,Daman & Diu	544	368	374	442	48	134	14	27	20	29
Goa District	546	366	375	428	45	143	14	30	20	33
Tiswadi	523	283	349	443	84	184	31	36	13	54
Bardez	509	412	365	456	59	108	5	3	62	21
Pernem	723	519	264	296	8	111	0	0	5	74
Bicholim	436	422	419	431	73	64	58	74	14	9
Satari	512	500	448	250	6	0	23	0	11	250
Ponda	597	417	347	380	38	157	12	37	6	9
Sanguem	565	548	340	214	59	48	12	0	24	190
Canacona	563	727	413	273	12	0	0	0	12	0
Quepem	455	535	438	419	56	23	19	0	32	23
Salcete	492	247	445	498	42	192	6	34	15	29
Mormugao	635	455	270	359	56	140	39	46	0	0
Daman District	381	331	302	586	317	77	0	0	0	6
Daman	381	331	302	586	317	77	0	0	0	6
Diu District	533	508	373	476	40	16	54	0	0	0
Diu	533	508	373	476	40	16	54	0	0	0

It would be evident from the above that the incidence of single-worker establishments is considerably lower in urban areas in all the talukas except Canacona and Quepem. About 54.4% of the total number of industrial establishments in rural areas belong to this group which consists really of self-employed persons. It can generally be concluded that single-worker establishments are more a rural feature than urban. Opposite is the case with the next category employing 2-4 persons. In this, urban areas of most of the talukas dominate. Again, in the next two higher employment groups too the urban areas have more pronounced incidence.

3.4 Number of persons employed

The importance of an industry depends on several factors such as (i) number of units (ii) number of persons employed (iii) amount of investment (iv) daily output (v) nature, quantum and value of products etc. The inquiry conducted by the Census did not go into complicated issues of investment, output etc. In fact a more detailed analysis was really not possible in an operation of the magnitude of a population census. Attention was, therefore, confined mainly to the number of units, number of persons employed, nature of products, and type of fuel/power used. In the foregoing paragraphs some data relating to the number of units according to different sizes of employment have been provided. Here a discussion relating to the number of persons employed in industrial establishments is attempted.

From table E-II Part A and E-II Part C, it is seen that out of a total number of 22,231 persons employed in industrial establishments, 8329 or 37.5% are factory workers. Remaining 13,902 persons or 62.5% of the total are employed in workshops and household industries. It is evident therefore that the unorganised sector of industry provides larger total employment in Goa, Daman & Diu. In Goa district, 62.2% of the total employment is provided by unorganised sector of industry and the same is 91.6% in case of Daman district. Only in case of Diu District, larger employment is provided by the registered factories and only 43.5% of the workers are employed in the unorganised sector of industry. Statement given below shows the percentage of industrial workers in each taluka of Goa, Daman & Diu.

STATEMENT III.3

Percentage of workers in factories, workshops and household industries.

Union territory /District/Taluka	Percentage of Workers in		
	Registered Factories	Unregistered Workshops	Household Industries
1	2	3	4
Goa, Daman & Diu . .	**38**	**26**	**36**
Goa District . . .	**38**	**26**	**36**
Tiswadi	43	35	22
Bardez	15	38	47
Pernem	0	11	89
Bicholim	66	16	18
Satari	33	10	57
Ponda	40	16	44
Sanguem	24	27	49
Canacona	0	8	92
Quepem	42	20	38
Salcete	30	34	36
Mormugao . . .	62	24	14
Daman District . . .	**8**	**46**	**46**
Daman	8	46	46
Diu District . . .	**57**	**27**	**16**
Diu	57	27	16

It would be noted from the above table that in most of the talukas of Goa district, the percentage of workers in industrial establishments is more in the unorganised sector of industry. Only in the talukas of Bicholim and Mormugao the situation is reverse, perhaps on account of a number of cashewnut and mineral processing units in Bicholim and a large number of workshops and worksheds in Mormugao where construction, maintenance and repairs of barges transporting mineral ore are undertaken.

3.5 Nature of Establishments

In order that information regarding employment in various sectors of the economy may be more specifically known, an industrial classification of all economic activity has been prepared by the Government of India. According to this classification which is known as the "National Industrial Classification" the whole gamat of economic activity is divided into 10 divisions, 66 Major Groups and 385 Minor Groups. A three digit code system has been adopted to identify each minor group. The first digit represents the Division, the second the Major Group and the third the Minor Group. The ten Divisions are as under:—

Division	Description
0	Agriculture, Hunting, Forestry and Fishing.
1	Mining and Quarrying
2 & 3	Manufacturing and Repair
4	Electricity, Gas and Water
5	Construction
6	Wholesale and Retail Trade and Restaurants and Hotels.
7	Transport, Storage and Communications
8	Financing, Insurance, Real Estate and Business services.
9	Community, Social and Personal services.
X	Activities not adequately defined.

A complete list of industrial codes adopted in the National Industrial Classification, is given in the Annexure 'B' at the end of this volume.

Since factories, workshops and household industries relate only to manufacturing (which includes repair, servicing or processing) we are concerned at present with the Division 2&3. This Division has 19 Major Groups and 176 Minor Groups. In this report we will analyse the details of information in respect of each Major Group of Industry. Below given is the statement showing the number of units and the persons employed according to each Major Group of Industry. It will be seen from the statement that the industry of manufacture of beverages, tobacco and tobacco products is numerically the most important industry of the Territory. Next in importance is the manufacture of food products followed by industry of manufacture of textile products (including wearing apparel). The position slightly change if the number of persons employed in these industries is taken into consideration as, in that case, manufacturing of food products gets a precedence over beverages, tobacco and tobacco products.

STATEMENT III.4

Number of industrial establishments, persons employed and the average per unit employment, classified according to the nature of industry.

Industry Major Group Number	Description	No. of Units	Persons employed	Average per unit employment.
1	2	3	4	5
20—21	Manufacture of Food Products	1,098	3,974	3.62
22	Manufacture of beverages, tobacco & tobacco products	2,248	3,881	1.73
23	Manufacture of Cotton Textiles	34	94	2.76
24	Manufacture of Wool, Silk and Synthetic Fibre Textiles	1	3	3.00
26	Manufacture of Textile products(Including wearing apparel)	1,003	1,924	1.92
27	Manufacture of wood and wood products, Furniture & Fixtures	840	2,033	2.42
28	Manufacture of Paper and Paper Products and Printing, Publishing and Allied Industries	87	692	7.95
29	Manufacture of Leather and Leather and Fur Products (except repair)	179	295	1.65
30	Manufacture of Rubber, Plastic,Petroleum and Coal Products	80	414	5.18
31	Manufacture of Chemicals and Chemical Products (except products of Petroleum and Coal)	42	421	10.02
32	Manufacture of Non-metallic Mineral Products	452	1,807	4.00
33	Basic Metal and Alloys Industries	17	682	40.11
34	Manufacture of Metal Products and Parts except Machinery and Transport equipment	230	680	2.96
35	Manufacture of Machinery, Machine tools and Parts except electrical machinery	33	277	8.39
36	Manufacture of Electrical Machinery, Apparatus, Appliances and Supplies and Parts	5	12	2.40
37	Manufacture of Transport equipment and parts	45	1,712	38.04
38	Other Manufacturing industries	365	567	1.55
39	Repair services.	751	2,763	3.68
	Total	7,510	22,231	2.96

The largest number of persons has been employed by the food-products manufacturing industry. The industry of manufacturing beverages, tobacco and tobacco products ranks second, while the third place goes to repair services. The third place occupied by the industry of manufacturing textile products in the number of total units gets a lower ranking i.e. the fifth place, by virtue of number of persons employed in that industry.

3.6 Classification of Industrial Establishments by Major Groups of N.I.C.

In this section we will analyse in short the data thrown up by the tables in respect of each Major Group of Industry in the order in which they occur.

1. Major Group 20—21 (Manufacture of Food Products.)

The number of establishments under this Major Group in Goa, Daman & Diu is 1,098 or 14.6% of the total number. Numerically it ranks second, next only to the Major Group 22, but provides employment to the largest number of persons i.e. 3,974. Bakeries, sugar confectionaries, fruit and fish processing units, ice and ice-candy, rice and flour mills, cashew nut processing factories, etc. are the important industrial units included in this group.

2. Major Group 22 (Manufacture of Beverages, Tobacco and Tobacco Products.).

For the Territory as a whole, this major group is numerically the most important. It has 2248 units in all, constituting 29.9% of the total number. Production of country liquor, manufacture of aerated drinks, manufacture of "bidi" are the major contributors in this group. Over 91% of these establishments are run as household industries mostly in the rural areas.

3. Major Group 23 (Manufacture of Cotton Textiles).

This industry has not made much headway in this territory as it reportedly has in other states. The small proportion of 34 units in this group mainly belongs to the handloom weaving industry.

4. Major Group 26 (Manufacture of Textile Products.)

1,003 units have been returned in this major group mostly belonging to the units making garments i.e. tailoring and cutting. About 1,924 persons are engaged in this industry. In rural areas, the establishments are run mostly as household industry.

5. Major Group 27 (Manufacture of Wood and Wood Products, Furniture and Fixtures).

In this Major Group, there are 840 units inthe Union Territory comprising 11.2% of the total number of establishments. 2,033 persons are engaged in this industry. The substantial contribution comes from bamboo-ware industry and smaller carpentry works of different kinds in rural areas. Over 82% of this group of industries are run as household industries. Only 62 units make use of electricity to run the industry and these mostly belong to the units engaged in sawing and planing of wood (saw mills).

6. Major Group 28 (Manufacture of Paper and Paper Products and Printing, Publishing and Allied Industries).

There is not a single paper mill in this territory. The small number of 87 units in this Major Group mainly relate to printing presses, a few of them engaged in printing and publishing of newspapers and periodicals and the remaining engaged in printing of books and all other types of printing including lithography, engraving, block-making etc. Out of 87 units, 73 are located in urban areas; 74 units are employing electricity as power. The total number of persons employed in this industrial group is 692.

7. Major Group 29 (Manufacture of Leather and Leather & Fur Products.)

There are 179 units in this Major Group, employing 295 persons only. These units mainly refer to manufacture of shoes and other leather footwear. Most of the units are located in rural areas and run as household industries. No. electric power is used, and the entire industry is run manually.

8. Major Group 30 (Manufacture of Rubber, Plastic, Petroleum and Coal Products.)

There are in all 80 units in this Major Group. The employment-size considered alongwith the pattern of use of power indicates that these are mostly repair units, excepting a few which manufacture plastic products like polythene bags, spectacles frames and candles. Most of the units are engaged in remoulding and retreading of tyres. There are 8 units which are classified as factories employing in all 216 persons. 24 units use electric power and 35 coal, fire-wood and bran. There are also 21 units run manually.

9. Major Group 31 (Manufacture of Chemicals and Chemical Products.)

In this Major Group, the total number of establishments is small (42). A varied types of industries are classified in this Group viz. oxygen manufacturing, manufacturing of pesticides, manufacture of paints, manufacture of drugs and medicines, manufacture of soap and manufacturing of fire-works. Out of 42 units, 9 are registered factories employing 271 persons, while the total employment is 421. There are only 11 units using electric power.

10. Major Group 32 (Manufacture of Non-metallic Mineral Products.)

This Major Group relates to the manufacturing of non-metallic mineral products such as bricks, tiles, lime, earthenware and earthen pottery, earthen toys, etc. In Goa, Daman & Diu, it occupies the fifth place in order of numerical importance and employs 1807 persons. As many as 36 units are registered factories in this group employing 925 persons. 363 units which are run as household industry mainly relate to manufacture of earthenware and earthen pottery. A great majority of these units makes use of power derived from coal, wood, bran etc. and most of the units are within the employment range 1 to 4. It is evident that most of the small size units relate mainly to village potters. Most of the processes connected with the manufacture of non-metallic products are carried out in the open. It is, therefore possible that a number of units engaged in this industry might have escaped inclusion in the establishment schedule as the enquiry covered only those units which operated in a house or a shed. The data may therefore be an under estimate.

11. Major Group 33 (Basic Metal and Alloys Industries).

The number of units in this Major Grup is 17 only employing 682 persons. There are 8 registered factories employing 657 persons. These are nothing but the mechanical iron ore processing units. The famous pelletisation plant at Pale in Bichoidm taluka is included in this group. About 13 units out of 17 are run on electric power.

12. Major Group 34 (Manufacture of Metal Products and Parts except Machinery and Transport Equipments).

The number of units in this Major Group is 230 out of which 9 are registered factories, 88 are unregistered workshops and the remaining 133 are run as household industries. The employment size in household industries considered alongwith the power pattern clearly indicates that these units relate to ordinary blacksmithy establishments manufacturing copper, brass and other metal utensils. The employment pattern is indicated by the following figures:—

1 person : 110; 2-4 persons : 85; 5-9 persons : 23 ; 10-19 persons: 3; 20-49 persons : 6 and number of persons unspecified: 3. As many as 49 employ electric power out of 230 units.

13. Major Group 35 (Manufactureing of Machinery, Machine Tools, and Parts except Electrical Machinery).

This major group has 33 units in all employing 277 persons. Larger employment (total) is provided by smaller units which mostly relate to repair workshops. All la the-works are included in this group. That is why we see the proportion of units using electric power is as high as 58 per cent.

14. Major Group 36 (Manufacture of Electric Machinery, Apparatus, Appliances and Supplies and Parts.)

The proportion of units in this group is so small that only 5 establishments have been recorded employing 12 persons. Out of 5 units, 4 make use of electricity.

15. Major Group 37 (Manufacture of Transport Equipments and Parts).

There are 45 units in this major group employing 1,712 persons. As many as 29 units in this group are registered factories employing 1637 persons. These units are mainly large workshops where construction and repairs of barges carrying mineral ore are undertaken. There are 4 units in this group employing in all 632 persons and all are located in the taluka of Mormugao. Out of 45 units 28 are run on electricity.

16. Major Group 38 (Other Manufacturing Industries).

This Major Group has 365 units in all, comprising only 4.9% of the total number of industrial establishments in the territory. Units manufacturing gold and silver jewellery and other related articles are included in this group. Besides, there are about half a dozen industries viz. Manufacturing of stationery articles, manufacturing of toys, manufacturing of paper flowers etc. which are classified under this group. The total number of persons engaged in these industries are 567, and most of the units are in the employment size-group 1 to 4 persons, excepting one which has been recorded as a registered factory employing 45 persons. As many as 331 units used coal, wood, bran, etc. for power. Hardly 4 units are recorded using electricity as power.

17. Major Group 39 (Repair Services.)

All repair and servicing units were covered this time under manufacturing or processing activity under Division 2 & 3, and accordingly a major group 39 has been inserted under 2&3division. The total number of units in this major group is 751 comprising exactly 10% of the total number of industrial establishments. As many as 412 are located in urban areas. The number of 28 factories recorded in this group mostly relate to workshops where maintenance and repairs of heavy motor vehicles and other earth moving equipments of the mining industry are undertaken. The remaining establishments relate to repair of *footwear and other leather goods, electrical repair shops* like charging of motor batteries etc., repair of motor vehicles and motor cycles, repair of watches, clocks etc., repair of bicycles and so on. In this group as many as 129 units use electric power.

3.7 Type of Fuel/ Power Used

Table Nos. E-II Part B and E-II Part C give the distribution of the industrial establishments according to type of industry, type of fuel/power used and size of employment. For analysing the data regarding use of fuel/power, all the units have been divided into five categories, viz. (i) Electricity (ii) Liquid fuels like kerosene oil, petrol, diesel etc. (iii) coal, wood, bran, husk bagasse, etc., (iv) other power including animal power and (v) no power which covers such units as are run by employing manual labour. Statement No. III. 5 given below shows the distribution of industrial establishments in Goa, Daman & Diu according to the kind of power used.

STATEMENT III.5

Number of industrial establishments in Goa, Daman & Diu according to kind of power

Kind of fuel/power used	Total	Rural	Urban
1	2	3	4
I All Fuels/power . . .	4,365	3,557	808
(a) Electricity . .	699	313	386
(b) Liquid Fuel . .	403	374	29
(c) Coal, Wood & Bran .	3,235	2,842	393
(d) Other Power . .	28	28	..
II No Power . . .	3,145	1,948	1,197
TOTAL . .	7,510	5,505	2,005

(i) Electricity

Electric power ranks third in order of numerical importance and is used in 699 units i.e. in 9.3% of the total number. As is expected, it is more common in urban areas but the figures for rural areas is also quite high. Salcete, Tiswadi and Bardez talukas occupy the three top positions with 135, 133 and 96 units respectively. Canacona and Satari occupy the bottom places with 3 and 2 units.

(ii) Liquid Fuel

Liquid fuel comes fourth to contribute 5.4% of the total number. It is mostly confined to rural areas where 92.8% of the units using it are located. Among its notable users are the talukas of Salcete (112) and Bardez(89) which are also incidentally thickly populated areas of the Territory.

(iii) Coal, Wood, Bran etc.

43.1% of the industrial establishments use coal, wood or bran and are numerically the most important. The three talukas of Salcete, Bardez and Pernem have a large number of these units. The incidence of units belonging to this category is significant in rural areas than in urban areas. Nearly 88.6 % of the units using this type of power are run as household industries.

(iv) Other Power

Users of other power come last of all, being only about 0.37% of the total number. Pernem happens to be the only taluka having a sizeable number of such units.

(v) No power

Numerically, establishments using no power come next to those using coal, wood and bagasse. They contribute 3,145 or 41.9% of the total units. These are fairly well represented in almost all the talukas, though Bardez and Ponda talukas occupy upper positions with 487 and 425 units respectively. Taluka of Diu with 72 units is at the bottom. The bulk of these units is located in rural areas, though urban areas also account for no less than 38% of the total number in this category.

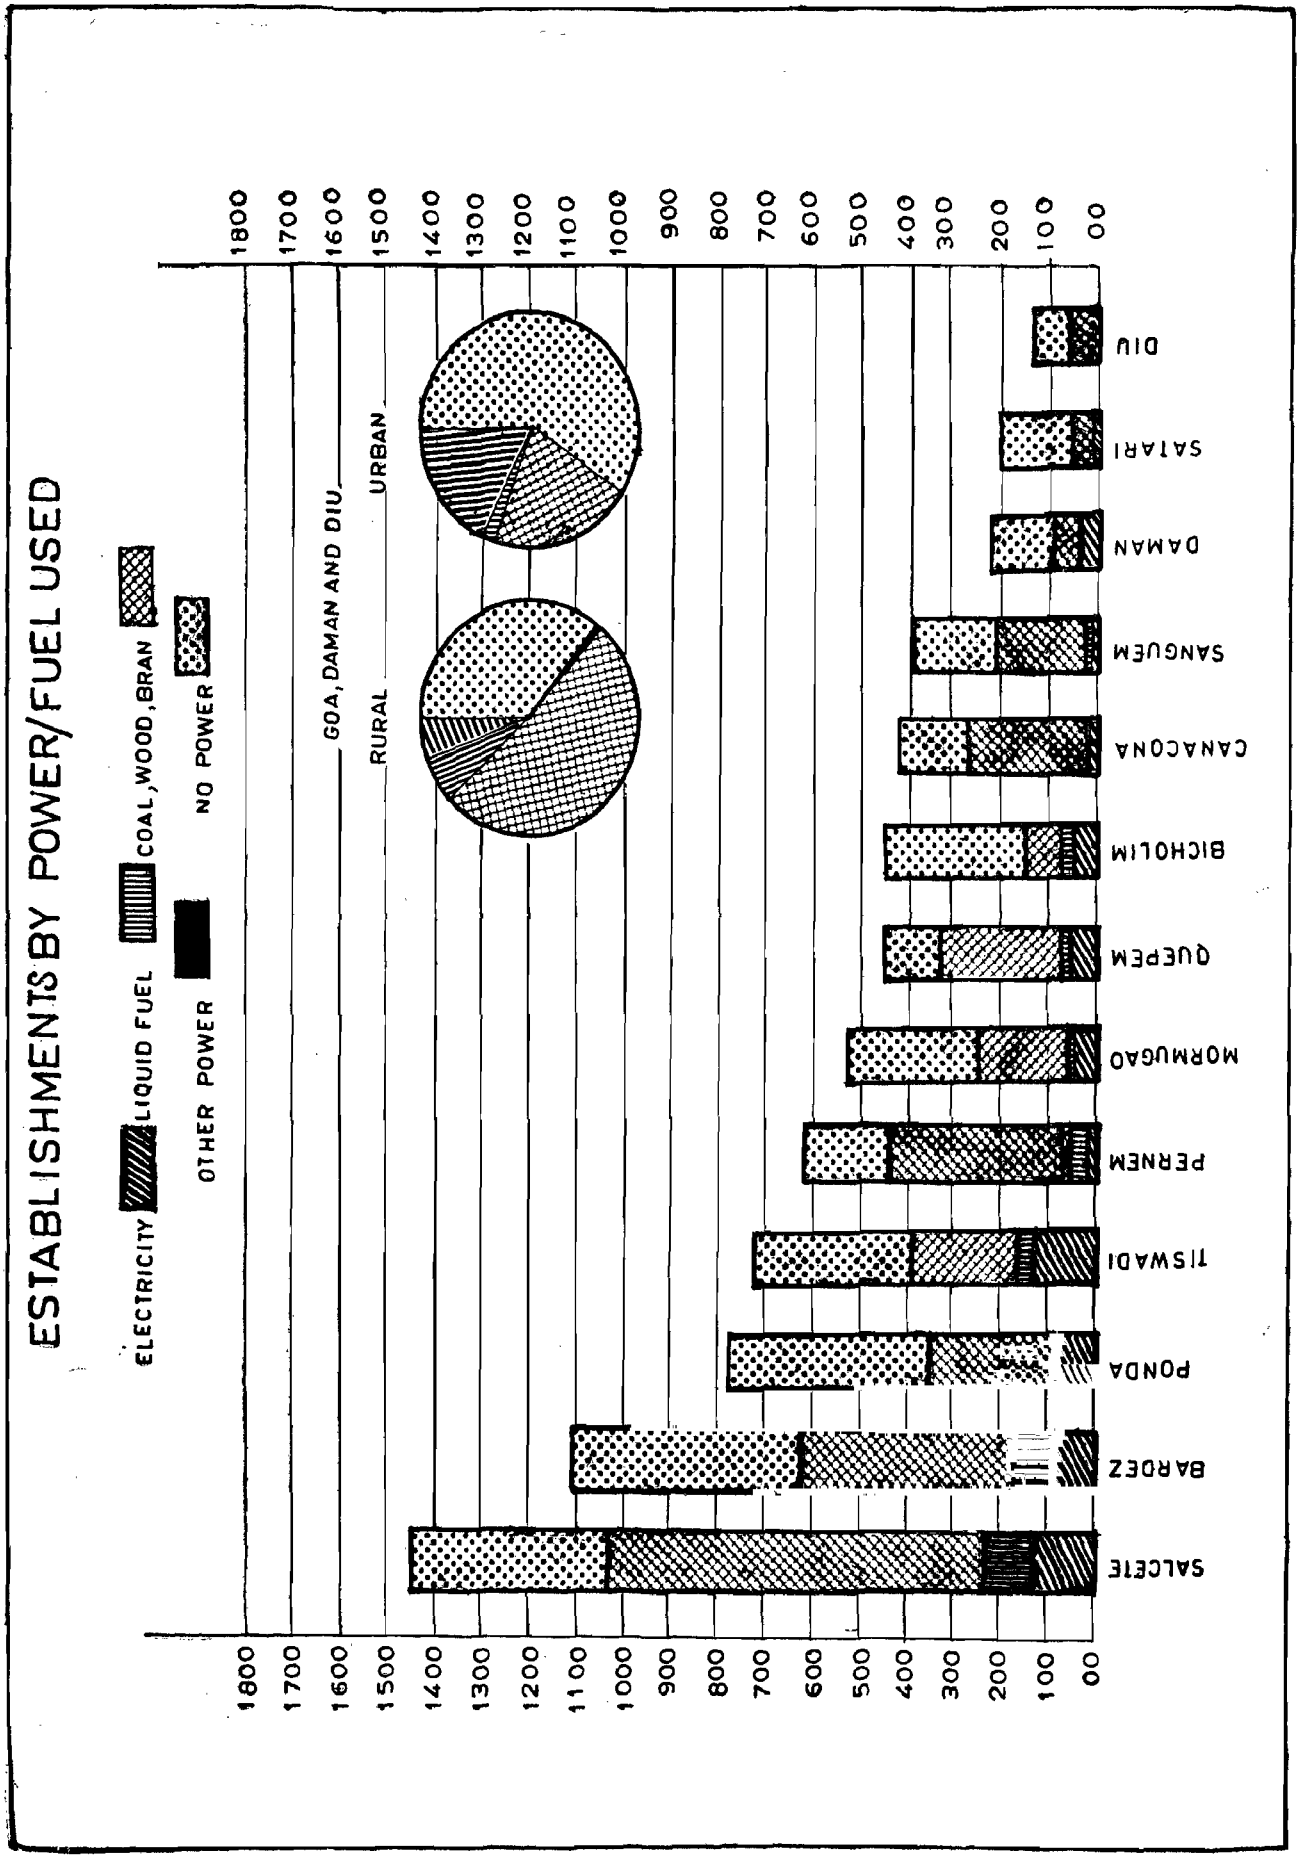

3.8 Power and Industry

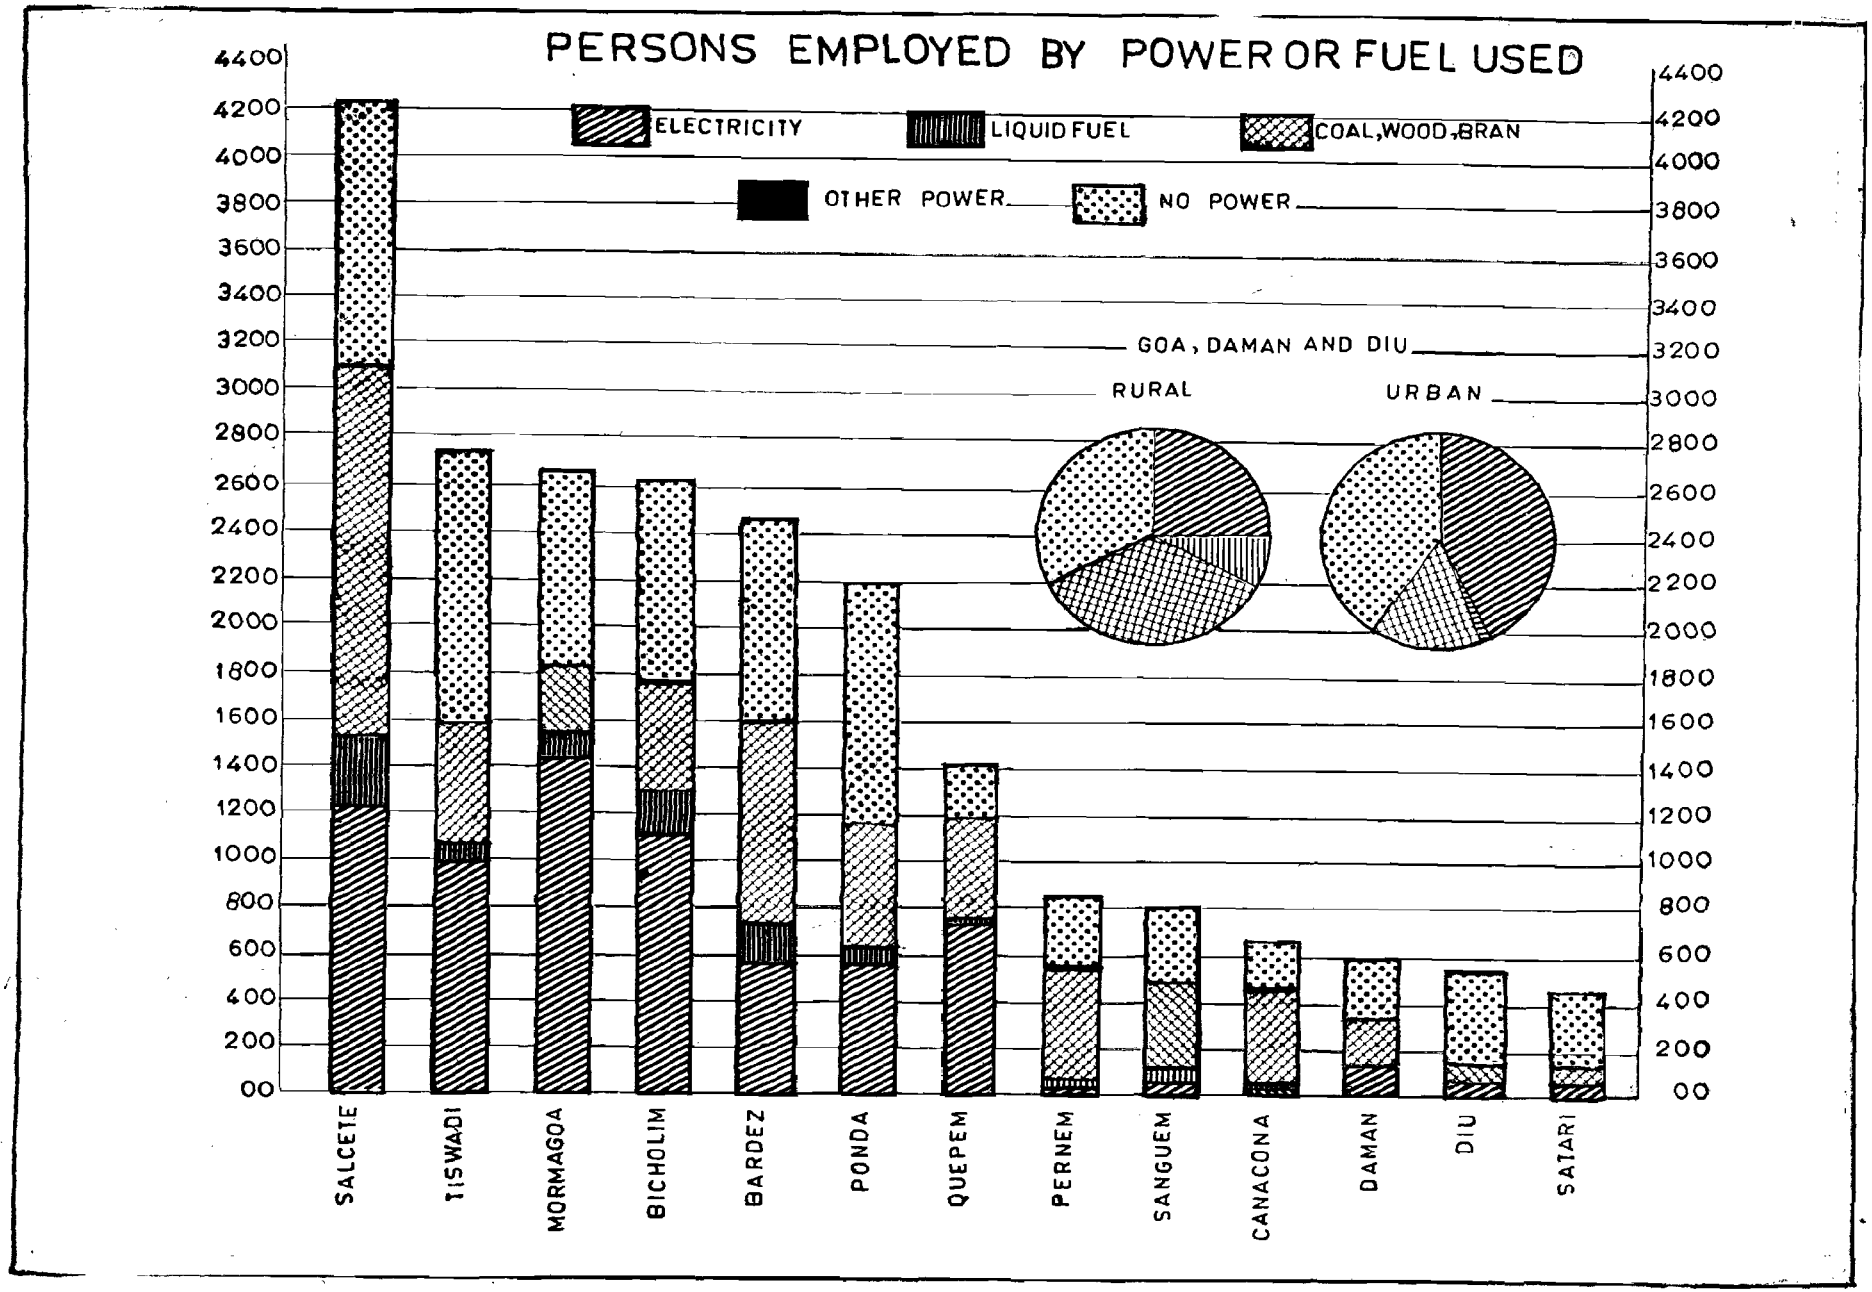

In statement III.6 given below, the industries in the Union Territory have been arranged in order of the number of persons they employ, and the units relating to them have been classified according to the use of power.

STATEMENT III.6

Industries arranged in order of number of persons employed and units classified according to the use of Power.

Industry Major Group Number	No. of Persons employed	No. of units	Types of fuel or power used					Working without power
			All types of power	Electricity	Liquid fuel	Coal, wood & bagasse	Other power	
1	2	3	4	5	6	7	8	9
20—21	3,974	1,098	1,012	250	363	371	28	86
22	3,881	2,248	1,950	11	..	1,939	..	298
39	2,763	751	171	129	..	42	..	580
27	2,033	840	70	62	7	1	..	770
26	1,924	1,003	5	4	..	1	..	998
32	1,807	452	392	17	26	349	..	60
37	1,712	45	31	28	3	..	..	14

A perusal of the above statement will show tnat there is a wide variation between tne different industry groups in respect of use of power. There are some industry groups where the use of power is absent such as Group(29) Manufacture of leather and leather and Fur products, and group (23) Manufacture of cotton textiles. Similarly, it is just negligible in Group (26), Manufacture of textile products, etc. Among industries where the use of some kind of power predominates are Industry Groups 20-21, 22, 28, 30, 32, 33, 34 and 38. However Electric power is used by some or the other units in all the industry groups except Groups 23, 24 and 29.

3.9 Power and size of Employment

In tne following statement III.7, percentage distribution

STATEMENT III.7

Percentage distribution of Industrial Units of different employment sizes according to the use of power or fuel

Industrial establishments by size of employment	Types of Fuel or Power used					Working without power
	All types of Power	Electricity	Liquid Fuel	Coal, Wood bagasse	Other power	
1	2	3	4	5	6	7
Total	58.12	9.31	5.37	43.07	0.37	41.88
1-Person	57.36	4.66	5.94	46.17	0.59	42.64
2—4 Persons	57.78	8.83	4.28	44.46	0.21	42.22
5—9 Persons	60.91	31.17	5.28	24.46	0	39.09
10—19 Persons	67.54	37.72	10.52	19.30	0	32.46
20—49 Persons	68.97	49.43	13.79	5.75	0	31.03
50—99 Persons	66.67	53.33	6.67	6.67	0	33.33
100 or more Persons	87.50	75.00	0	12.50	0	12.50

of industrial establishments employing different number of persons according to their use of fuel or power is given.

It will be noticed from the above statement tnat the percentage of power-operated units increases with the employment size. Whereas among the single-person employment units, only 57.36% avail some kind of power, in the units employing 100 or more persons 87.50% work on power of one kind or the other. This holds good in the case of use of electric power too. It gets more and more common in units in ascending order of employment, ranging from 4.66% among units run by individuals to 75.00% among units employing one hundred or more persons. The use of liquid fuel and coal, wood etc. is mentionable among larger and medium sized units engaged in diverse types of activities. Use of "other power" is essentially limited to small units. A fact which is not brought out by the above statement, but may be ascertained from Statement III.5, is that whereas the number of units working on electricity is fairly evenly distributed (313 units in rural areas and 386 in urban areas), the number of units working on liquid fuel and coal, wood etc. is about eight times as much high in rural units as compared to those functioning in urban areas.

3.10 Household Industries

Uptil now, we have discussed the distribution of all industrial establishments including household industries according to type of industry, size of employment and kind of power used. In this section, it is proposed to discuss household industries alone, since this group of establishments plays a prominent role in the industrial structure of the territory.

Household Industries covered those establishments which are run on cottage basis with the participation mainly of household members (the role of hired workers being almost insignificant) and which employ traditional skill and produce articles primarily meant for local consumption. This is evident from the fact that nearly 95.63% of the total number of establishments are covered in the employment sizes of 1 person and 2 to 4 persons. More than 63% of such establishments are run with power of some kind. As many as 4,471 out of 4,940 units in this group (constituting nearly 91%) are located in rural areas. The statement given below indicates the distribution of 1000 household industries in each employment size by the kind of power used separately for rural and urban areas.

STATEMENT III·8

Distribution of 1000 *household industry establishments in each employment-size by the kind of Power used separately for Rural and Urban areas.*

Size of employment	Rural/ Urban	Electricity	Liquid fuel	Coal, wood and bagasse	Other Power	No power
1	2	3	4	5	6	7
1 Person	R	14	38	599	8	341
	U	8	0	269	0	723
2—4 Persons	R	12	30	620	3	335
	U	48	5	402	0	545
5—9 Persons	R	71	51	500	0	378
	U	72	0	571	0	357
10—19 Persons	R	0	0	0	0	1,000
	U	0	0	0	0	0
Persons unspecified	R	25	12	605	0	358
	U	143	0	571	0	286

The following conclusion can be drawn from the above statement.

In the category of self-employed persons, units using coal, wood, etc. are in a predominant position in rural areas (59·9%). Units using no power come next (34·1%), followed by liquid fuel (3·8%). Use of electric power is very much limited. In urban areas, 'no power' units dominate the scene followed by units using coal, wood etc. Here too, the extent of use of electric power is negligible. In establishments employing 2 to 4 persons the position is more or less the same though electric power assumes a slightly more importance. In rural areas over 50% of establishments in the employment range 5 to 9 make use of coal, wood etc. This proportion is somewhat increasing in urban areas. The use of electric power has also slightly increased to 7%.

From above, it can be stated that majority of household industry establishments make use of coal, wood, bran etc. Very few household industries use electric power and whatever small proportion observed is in the major groups 20-21, 27, 34 & 39 i. e. rice and flour mills, saw-mills, lathe works and workshops doing repairing and servicing of motor vehicles.

3·11 Trade Establishments

The main table E-III gives a comprehensive account of Trade/Commercial establishments in each taluka, district and union territory separately for rural and urban areas, according to type of trade and size of employment. The subsidiary table E-III·1 gives the distribution of 1000 trade/commercial establishments in each major group by size of employment in rural and urban areas separately.

3·12 Number of trade/commercial establishments

The 11,154 trade/commercial establishments in Goa, Daman & Diu employing 23, 209 persons comprise 6,152 establishments employing 9164 persons in rural areas and 5002 establishments employing 14045 persons in the urban areas. The average employment is only about 1·5 persons in the rural areas as against 3 persons in the urban areas and thus the urban areas with only about 45% of the trade/commercial establishments have 60% of total number of persons employed.

From table E-III, it will be seen that excepting the two major groups viz. 65 (retail trade in food & food articles, beverage tobacco and intoxicants) and 69 (Restaurants & Hotels), in all the other groups the proportion of establishments and persons employe is markedly higher in urban areas than in rural areas. Even in the two aforesaid groups the employment range is higher in urban areas.

3·13 Types of Establishments

The information on this subject has been presented in accordance with the National Industrial classification adopted by the Government of India. All the trade/commercial establishments are covered under divisions 6 and 8 which have 14 major groups and 72 minor groups. Statement III·9 given below show the distribution of all trade/commercial establishments with their employment classified according to each major group.

STATEMENT III·9

Number of Trade/Commercial Establishments, the Persons Employed and the average per unit employment, classified according to Type of Establishments.

Major Group Number	Description	No. of units	Persons employed	Average Employment per unit
1	2	3	4	5
60	Wholesale Trade in Food, Textiles, Live Animals, Beverages & Intoxicants .	105	248	2·36

STATEMENT III.9—contd.

Number of Trade Commercial Establishments, the Persons Employed and the average per unit employment, classified according to Type of Establishments.

Major Group Number	Decsription	No. of Unit	Persons employed	Average Employment pe unit
1	2	3	4	5
61	Wholesale Trade in Fuel, Light Chemicals, Perfumery, Ceramics, Glass .	13	114	8·77
62	Wholesale Trade in Wood, Paper, Other fabrics and skin & inedible oils . .	3	3	1·00
63	Wholesale Trade in all types of machinery, equipment including transport and electrical equipment . .	16	49	3·06
64	Wholesale Trade in Miscellaneous manufacturing .	27	75	2·78
65	Retail Trade in Food & Food articles, Beverage, Tobacco and Intoxicants .	6,557	9,450	1·44
66	Retail Trade in Textiles .	379	785	2·07
67	Retail Trade in Fuel and other household utilities and durables . .	571	1,134	1·99
68	Retail Trade in others .	1,010	2,002	1·98
69	Restaurants and hotels	1,898	5,950	3·13
80	Banking and similar type of Financial Institutions	124	1,235	9·96
81	Providents and Insurance .	20	212	10·60
82	Real Estate and Business Services . . .	395	1,892	4·79
83	Legal Services . .	36	60	1·67
	TOTAL	11,154	23,209	2·08

From the above statement, it will be seen that major group 65 has the largest number of establishments, there being 6,557 establishments under this group accounting for 58·8% of the total number of establishments in the Union Territory. The next important trade from the point of view of number of establishments is that coming under major group 69, followed by group 68. The more important trade/commercial establishments may now be recounted on the basis of Table E-III.

1. Major Group 65 (Retail Trade in Food and Food articles, Beverages, Tobacco and Intoxicants·

The number of establishments in this major group is 6,557 or 58·8% of the total number. This category of establishments mainly includes grain and grocery shops, pan-bidi shops, country liquor shops, vegetable and fish-selling shops etc. In both rural and urban areas, this category of establishments is numerically the most important. 9,450 persons are engaged in this type of trade which constitutes over 40% of the total persons employed.

2. Major Group 69 (Restaurants and Hotels)

This major group comes next to group 65, accounting for 17% of the total number of establishments. Bars and Restaurants, tea-stalls and other eating and drinking places come under this group. Similarly hotels, dormitories and other lodgings are also included in this category. Numerically it occupies third place in urban areas, though it is second in rural areas. Total number of persons engaged in this type of trade is 5,950 i.e. 25·6% of the total.

3. Major Group 68 (Retail Trade in other miscellaneous articles)

This category of trade includes drug stores, book-sellers & stationery marts, hardware shops, motor spare parts shops, petrol pumps etc. These types of establishments are more common in urban areas which account for over 62% of the total number of establishments in this category.

4. Major Group 66 (Retail Trade in Textiles)

All establishments dealing with retail sale of cloth are covered in this group. Dealers in ready-made garments are also included here. Over 83% of the establishments in this category of trade are located in urban areas.

After recounting some of the important trade establishments, we shall go to commercial establishments, which are 575 in number. This forms only a small proportion of over 5% of the total number of establishments engaged in Trade & Commerce taken together. The commercial establishments, covered under groups 80, 81, 82 and 83 are the banks & other financial institutions, Insurance companies, Real estate and business services and legal services. Over 77% of the commercial establishments are located in urban areas employing 3042 persons.

Under group 80, banks and other similar types of institutions are covered. 124 units are located which employ 1235 persons or 36% of the total number of persons employed in commercial establishments. Many Commercial banks have opened their offices in the nook and corner of Goa, Daman & Diu during the last 10 years, with the result that there is a bank office per population of 7,800. The total deposits are estimated to be over Rs. 52 crores and per capita deposit works out to over Rs. 760, perhaps the highest for any area in the country. The business establishments also play a major role so far as employment is concerned. Over 55% of the persons employed in commercial establishments are working in these establishments.

3·14 Size of employment

That a vast majority of Trade/Commercial establishments are of very small size is brought out by the Statement III.10 below in which the establishments and workers are arranged according to the employment groups.

STATEMENT III.10

Distribution of Trade/Commercial Establishments and Workers according to Employment Groups.

Employment Group	Total		Rural		Urban	
	Number	Percentage to total	Number	Percentage to total	Number	Percentage to total
1	2	3	4	5	6	7
Trade/Commercial Establishments						
Total	11,154	100.0	6,152	100.0	5,002	100.0
1—Person	6,701	60.1	4,341	70.6	2,360	47.2
2—4 Persons	3,407	30.6	1,506	24.5	1,901	38.0
5—9 Persons	492	4.4	108	1.7	384	7.7
10—19 Persons	172	1.5	26	0.4	146	2.9
20—49 Persons	60	0.5	12	0.2	48	0.9
50—99 Persons	9	0.1	..	..	9	0.2
100 or more Persons	3	N	..	..	3	0.1
Unspecified no. of persons	310	2.8	159	2.6	151	3.0
No. of Persons Employed						
Total	23,209	100.0	9,164	100.0	14,045	100.0
1-Person	6,701	28.9	4,341	47.4	2,360	16.8
2—4 Persons	8,308	35.8	3,528	38.5	4,780	34.0
5—9 Persons	3,025	13.0	637	7.0	2,388	17.0
10—19 Persons	2,231	9.6	325	3.5	1,906	13.6
20—49 Persons	1,685	7.3	333	3.6	1,352	9.6
50—99 Persons	596	2.6	..	..	596	4.3
100 or more Persons	663	2.8	..	..	663	4.7

From the above statement, it will be seen that as many as 60% of the establishments have just one worker each. In rural areas they form 71%, but only 47% in urban areas. Because of the large number of persons employed in bigger establishments mostly in urban areas, the number of persons among one-man units is just 17% in urban areas as against 47% in rural areas. Establishments employing 2 to 4 persons account for 31% of the total number, and provide employment to 36% of the total persons employed by Trade/Commercial establishments. Whereas in the previous group a majority of units was in rural areas, in this and further higher groups, the number of units in urban areas is proportionately higher. In fact, this size group provides larger total employment in urban areas. Establishments employing 5 to 9 persons form 4·4% of the total number of workers. The units of employment size 10 to 19 are 1·5% of the total, but they provide employment to about 10% of the trade working force. Establishments employing more than 20 persons are 72 in number, out of which 60 are located in urban areas. Only a few establishments are recorded employing more than 100 persons.

3·15 Other Establishments

Main table E-IV classifies establishments other than manufacturing, trade and commercial, under divisions and major groups as prescribed in the National Industrial Classification adopted by the Government of India and subdivides them according to the size of employment. Information is given separately for rural and urban areas in each district and taluka of the Union Territory.

As stated in chapter I, the other establishments include Government offices, schools, hospitals, railway-stations, orphanages, rescue-homes, barbers' saloons, cinema houses, theatres, doctors' clinics, laundries, photo-studios, clubs, etc. These are covered under division 9 of N.I.C. Besides this, other divisions *viz.* 0, 1, 4, 5 and 7 are also covered under this category of establishments. There are in all 6,928 such establishments recorded in Goa, Daman & Diu, 4,980 in rural areas and 1,948 in urban areas. Their number alongwith the employment is shown below :

STATEMENT III.11

Number of Establishments and the persons employed in rural and urban areas

Union territory/District/Taluka	Total		Rural		Urban	
	No. of units	Persons employed	No. of units	Persons employed	No. of units	Persons employed
1	2	3	4	5	6	7
Goa, Daman & Diu	6,928	27,349	4,980	10,468	1,948	16,881
Goa District	6,434	25,760	4,752	9,992	1,682	15,768
Tiswadi	787	7,244	355	1,131	432	6,113
Bardez	710	2,318	528	1,238	182	1,080
Pernem	634	939	561	698	73	241
Bicholim	633	1,593	560	1,258	73	335
Satari	316	259	274	239	42	20
Ponda	965	1,984	862	1,395	103	589
Sanguem	459	1,207	407	952	52	255
Canacona	308	391	259	290	49	101
Quepem	311	1,158	275	1,009	36	149
Salcete	907	4,659	557	1,431	350	3,228
Mormugao	404	4,008	114	351	290	3,657
Daman District	260	1,009	106	223	154	786
Daman	260	1,009	106	223	154	786
Diu District	234	580	122	253	112	327
Diu	234	580	122	253	112	327

From the above, it will be seen that Ponda taluka has the largest number of establishments (965) of this category followed by Salcete (907), Tiswadi (787) and Bardez (710). At the tail end are Daman (260) and Diu (234). Another striking feature is that the total employment is one and a half times in urban areas than that in the rural areas, though the number of establishments in rural areas is almost two and a half times than that in the urban areas.

3·16 Types of Other Establishments

The following statement shows establishments arranged as per the N.I.G. Code (Major Groups).

STATEMENT III.12

Number of Other types of Establishments, persons employed, and the average per unit employment according to type of establishment

Major Group	Description	No. of units	Persons employed	Average per unit employment
1	2	3	4	5
00	Agricultural Production	2	11	5·50
01	Plantations	4	18	4·50
02	Livestock Production	106	152	1·43
03	Agricultural Services	4	4	1·00
05	Forestry & Logging	4	15	3·75
06	Fishing	1	2	2·00
12	Metal Ore Mining	213	2,280	10·70
19	Other Mining	1	2	2·00
40	Electricity	38	189	4·97
41	Gas and Steam	2	2	1·00
42	Water Supply	39	110	2·82
50	Construction	8	22	2·75
70	Land Transport.	77	507	6·58
71	Water Transport	46	1,740	37·83
72	Air Transport	5	18	3·60
73	Services incidental to transport	2	..	N.A.
74	Storage and Ware-Housing	181	297	1·64
75	Communications	129	682	5·29
90	Public Administration & Defence Services	656	8,027	12·24
91	Sanitary Services	7	58	8·28
92	Education, Scientific & Research Services	1,521	6,679	4·39
93	Medical and Health Services	466	1,938	4·16
94	Community Services	2,448	2,340	N.A.
95	Recreational and Cultural Services	200	874	4·37
96	Personal Services	767	1,381	1·80
99	Services not elsewhere classified	1	1	1·00

It would be seen from the above that the largest employment is provided under Major Group 90 followed by Major Groups 92, 94, 12, 93, 71 and 96 which account for 88·2% of the total number of establishments and 89·2% of the total number of persons employed.

Major Group 90—(Public Administration and Defence Services)

All public service establishments, central as well as state, local bodies, departments, and quasi-Government bodies are covered under this group. Panaji town being the seat of the Government and headquarters of Goa district, nearly 48·2% of persons are employed in the 96 different Govt. establishments recorded in this town. Remaining Government offices are mainly located in towns which are the taluka headquarters bringing the percentage of Government employees working in urban areas to 88·14%.

Major Group 92 (Education, Scientific and Research Services)

In this group, all primary, middle and secondary schools are covered besides colleges and other institutions. Almost every village of Goa, Daman & Diu is now provided with a primary school which has considerably increased the number of establishments in this category. Likewise, the number of persons employed in this category of establishments has also been proportionately increased. Rural areas therefore constitute 80·6% and 56·1% respectively of the total number of establishments and persons employed.

Major Group 94 (Community Services)

Temples, churches, mosques and other religious institutions are all included in this group. There is a much larger concentration of small temples in the three talukas of Ponda, Pernem and Bicholim which together account for over 52% of the total establishments in this category. Lowest proportion is observed in the taluka of Diu. In this category of establishments, a good number of them did not give any particulars about the employment and as a result of this about 35% of them were recorded as units of unspecified number of persons employed.

Major Group 12 (Metal Ore Mining)

Establishments engaged in the extraction of mineral ore are covered in this group. 213 such establishments are recorded employing 2280 persons. The employment in the mining industry as indicated in the establishment schedule appears to be much on the lower side when viewed against the high importance of this industry in the economic development of the territory. The 1971 census data shows that nearly 16,439 persons are engaged in the mining industry which easily proves that a large number of establishments engaged in mining have grossly underreported the employment data at the time of canvassing of the establishment schedule.

Major Group 93 (Medical and Health Services)

Public health and medical institutions, hospitals, health centres, doctors' clinics, dispensaries, etc. have been returned in this category of establishments. 466 such units have been recorded employing 1938 persons. Rural areas account for 223 or 48% of the total number of establishments, employing 29% of the persons employed. Highest number of these establishments are located in Salcete taluka (123), followed by Tiswadi (75), Bardez (67), and Ponda (43) talukas. Satari taluka is having the least number of such establishments.

Major Group 71 (Water Transport)

In this group, all establishments engaged in the transportation of goods, passengers etc. through inland waters of Goa coast are covered. 46 such establishments are recorded employing 1,740 persons, out of which 39 employing 1,576 persons are located in urban areas. The town of Mormugao itself is having 34 such establishments employing 1541 persons. Here, the establishments are mostly owned by mineral ore exporters who transport mineral ore to the Mormugao-Harbour through mechanised barges. The employment pattern is indicated by the following figures :—

1-person : 8; 2-4 persons : 14; 5-9 persons : 5; 20-49 persons : 6; 50-99 persons : 3; 100+persons : 4; and persons unspecified : 2.

Major Group 96 (Personal Services)

Laundries, hair dressing saloons, photo-studios, etc. are covered in this group. In all 767 such establishments are recorded employing 1381 persons. Nearly 50% of the establishments are of the single-worker type. Over 46% are in the employment

range of 2 to 4 workers, while 12 establishments are found where the number of workers was unspecified. The number of establishments is more or less evenly distributed among the rural and urban areas. The number of workers employed is however more in urban areas.

3·17 Relationship between employment and the category of Establishment.

The following statement shows the proportion of workers in different categories of establishments. From this statement it could be easily seen that the territory of Goa, Daman & Diu is still a backward area in respect of industrial development, the proportion of workers engaged in the industry being less than that in the trade/commercial and other categories of establishments. In fact, the proportion of employment in non-industrial establishments is higher not only in the Territory as a whole but also in all its talukas. This holds good for rural and urban areas as well, but for a few exceptions. The industrial employment in Bicholim Urban, is higher than the non-industrial because of the fact that a few important cashew processing units are located in the town of Bicholim. Likewise, the industrial employment is higher in the rural areas of Mormugao and Canacona talukas. The apparent reason so far as Mormugao is concerned is that some leading industrial establishments (barge-repair workshops, etc,) are located in the villages situated on the periphery of the Mormugao port. So far as Canacona is concerned, the case is one of wrong classification of urban area. The Chauri town which has been given the urban status by virtue of the sole consideration of being a Municipal area has a population of only 1,335 *which is less than each and every village of the Canacona taluka.* Obviously, industrial units are located in the villages rather than in the so called urban area of the taluka.

Another striking aspect of the following table III.13 is that amongst urban and rural areas, the latter provide more industrial employment than the former. The principal reason for this appears to be the fact that cottage and household industries are generally more numerous and scattered in a large number of homes in rural areas. In urban areas, the proportion of workers engaged in Trade/Business and other establishments is higher in most of the talukas. The urban areas are nothing but the taluka headquarters where most of the trading activity is concentrated. The proportion of workers is higher as it includes workers in the Government offices as well as that of commercial firms and business houses.

3·18 Comparison of employment figures with the data in 1971 Census

The limitations of the data collected in the Establishment schedule regarding the number of establishments and persons employed have already been explained in Chapter I paragraph 1·4. More reliable figures about the actual employment in different categories of establishments are available from B Series Tables (to be printed in Part II-B of the Census Publications) which are compiled from the 1971 Census enumeration slips. However, it may be of some interest to examine the data relating to number of persons employed as given in the establishment schedule. The statement below compares the figures relating to number of persons employed in four different categories of establishments separately for rural and urban areas of the Union Territory.

STATEMENT III·14

Comparison of employment figures as compiled from Establishment Schedule with the data in 1971 *Census.*

Category of the Establishments	Persons Employed					
	Total		Rural		Urban	
	1971 Census returns	Establishment Schedule	1971 Census returns	Establishment Schedule	1971 Census returns	Establishment Schedule
1	2	3	4	5	6	7
1. Household Industries	15,673	8,034	13,181	7,173	2,492	861
2. Factories and Workshops	16,551	14,197	8,588	7,085	7,963	7,112
3. Trade/Commercial Establishments	26,114	23,209	12,005	9,164	14,109	14,045
4. Other Establishments	107,425	27,349	64,922	10,468	42,503	16,881

Surprisingly enough, figures as compiled from the 1971 Census enumeration slips are overwhelmingly higher than those compiled from the establishment schedules. An explanation for this is not far to seek. The establishment schedule canvassed during the houselisting operations was confined mainly to the establishments located in buildings, whereas the census enumeration was done on the basis of individuals. Obviously chances of omission are very rare in the population census than in the case of establishments. It may not be wrong to presume that the enumerator failed to record during the first phase operations a large number of establishments under two main categories *viz.* household industry and "Other Establishments". The enumerator failed to notice such establishments because most of them did not carry any boards or name-plates etc. and could not be easily distinguished from a residential house. The enumerator failed in his probe and seems to have made only approximate recording of the number of persons employed, which was much on the lower side. Certain other complexes including the fear of new taxation etc. might have impelled the household to conceal information regarding employment of all the members. However, in spite of these deficiencies which have arisen mainly due to the varying nature of the two enquiries, the data yielded through establishment schedule would certainly give a good idea of the distribution of different categories of establishments in the different parts of the State and also for further intensive sample studies on particular aspects.

SUBSIDIARY TABLE E-II PART A.1

Distribution of 1000 manufacturing, processing or servicing Establishments other than household industry as registered factories, unregistered workshops in each Division/Major Groups of N.I.C. and by size of employment in rural and urban areas.

This subsidiary table is based on main Table E-II Part A. There was no comparable table in 1961-Census. Entries in cols. 4 and 12 against total in col. 2 add up to 1,000. Again entry in col. 4 is equal to 5 to 11 and entry in col. 12 is equal to 13 to 17 for each line. The pattern is repeated for rural as well as urban areas. This table is presented for the Union Territory and its 3 districts.

SUBSIDIARY TABLE—E-II PART A.1

DISTRIBUTION OF 1000 MANUFACTURING, PROCESSING OR SERVICING ESTABLISHMENTS OTHER THAN HOUSEHOLD INDUSTRY AS RECISTERED FACTORIES, UNREGISTERED WORK-SHOPS IN EACH DIVISION/MAJOR GROUPS OF NIC AND BY SIZE OF EMPLOYMENT IN RURAL AND URBAN AREAS

Subsidiary Table E-II Part B-1

Distribution of 1,000 manufacturing, processing or servicing establishments other than household industries in each Division/Major Group of N.I.C. and the kind of fuel/Power used and size of employment

This subsidiary table is based on main table E-II Part B. In col. 1 of this table, the presentation is for Division 2 and 3, followed by Major Group 20-21, 22,.....etc. upto 39. Against each entry in col. 1 there is Total classified by All fuels/power and Manual and All fuels/power further classified by (a) electricity (b) liquid fuel (c) Coal, wood, bagasse etc. (d) Other power. In Col. 3 there is 1,000 against 'total' in col. 2. Total of I-All fuels/power and II-Manual comes to 1,000. Total of (a), (b), (c) and (d) is equal to 'All fuels/power'. Col. 3 is equal to line total of cols 4 to 13.

This table is presented for Total, Rural and Urban areas separately, and presented one after the other within the Union Territory/District.

SUBSIDIARY TABLE—E-II PART B.1

SUBSIDIARY TABLE E-II PART C.1

Distribution of 1000 *establishments which are household industries in each division/major group of N. I. C. and kind of fuel/power used and size of employment.*

This subsidiary table is based on main tableE-II Part C and its presentation is the same as subsidiary table E-II part B. 1. Col. 3 is equal to line total of cols. 4 to 8. Since the distribution is only in respect of household industries, no figure should appear under col. 7 in case of All Fuel/Power and fuels (a), (b), (c) and (d).

This table is presented for Total, Rural and Urban areas separately, and presented one after other within the Union Territory/District.

SUBSIDIARY TABLE - E-II Part C.1

DISTRIBUTION OF 1000 ESTABLISHMENTS WHICH ARE HOUSEHOLD INDUSTRIES IN EACH DIVISION/MAJOR GROUP OF N.I.C. AND KIND OF FUEL/POWER USED AND SIZE OF EMPLOYMENT.

UNION TERRITORY/DISTRICT

SUBSIDIARY TABLE E-III·1

Distribution of 1,000 *Trade/Commercial establishments in each Division/Major Group of N.I.C. by size of employment in rural and urban areas separately.*

This subsidiary table is based on main table E-III. There was no comparable table in 1961 Census since trading establishments were not covered. In this table Division 6 comes first followed by Major Groups 60, 61.....etc. and then Division 8 followed by Major Groups 80,81.....etc. In col. 3 there is 1000 against total which is equal to total of cols. 4 to 11. Same is true with rural and urban areas also.

This table is presented one after the other within the Union Territory/District.

SUBSIDIARY TABLE-E-III.1

SUBSIDIARY TABLE E-IV-1

Distribution of 1,000 establishments (other than manufacturing, processing or servicing or business and trade establishments) in each Division/Major Group of N.I.C. by size of employment in rural and urban areas separately.

This subsidiary table is based on main table E-IV. There was no comparable table in 1961-Census since such types of establishments were not covered. In col. 1 Divisions 0, 1, 4, 5, 7 and 9 followed by Major Groups immediately after each Division come. In col. 2 there is total, rural and urban against each entry in col. 1. In col. 3 there is 1,000 which is the line total of cols 4 to 11. The pattern is repeated for rural and urban also.

This table is presented one after the other within the Union Territory/District.

TABLE E-I

DISTRIBUTION OF ESTABLISHMENTS BY BROAD TYPES

TABLE E-I

DITRIBUTION OF ESTABLISHMENTS BY BROAD TYPES

Table E-1 is prepared for total, rural and urban areas of each district and each taluka of the Union Territory of Goa, Daman and Diu. It gives a comprehensive account of all establishments which are classified into three broad groups *viz*(1) Manufacturing, Processing or Servicing establishments; (2) Trade or business establishments and (3) Other establishments in each of the government or quasi-government, private and co-operative sectors of the economy. The manufacturing, processing or servicing establishments are further classified as registered factories, unregistered workshops & household industries depending on the size of employment, type of power used etc. The trade or business establishments are classified as wholesale, retail or others depending on the nature and type of transactions that take place. Lastly, the other establishments are classified as educational institutions, public health institutions and others which include Government and private offices, temples, churches etc.

There is a difference in the two sets of figures *viz*. Col.Nos. 7+11 of Table H-1 and Col. Nos. 5+6+7 of Table E-1. The difference here arises from the fact that according to the definition of an establishment there could be more than one establishment in one Census house and also one establishment in more than one Census house. Here the incidence of more than one establishment in one Census house, is, however, very small (0.23%).

The data presented in Table E-I and the related Subsidiary Table E-I.1 are analysed and discussed in detail in Chapter-II (Types of Establishments) of the report on establishments Part III of this volume.

TABLE E-II PART A

DISTRIBUTION OF MANUFACTURING, PROCESSING OR SERVICING ESTABLISHMENTS OTHER THAN HOUSEHOLD INDUSTRIES CLASSIFIED BY REGISTERED FACTORIES, UNREGISTERED WORKSHOPS & SIZE OF EMPLOYMENT.

PHOTOGRAPHS

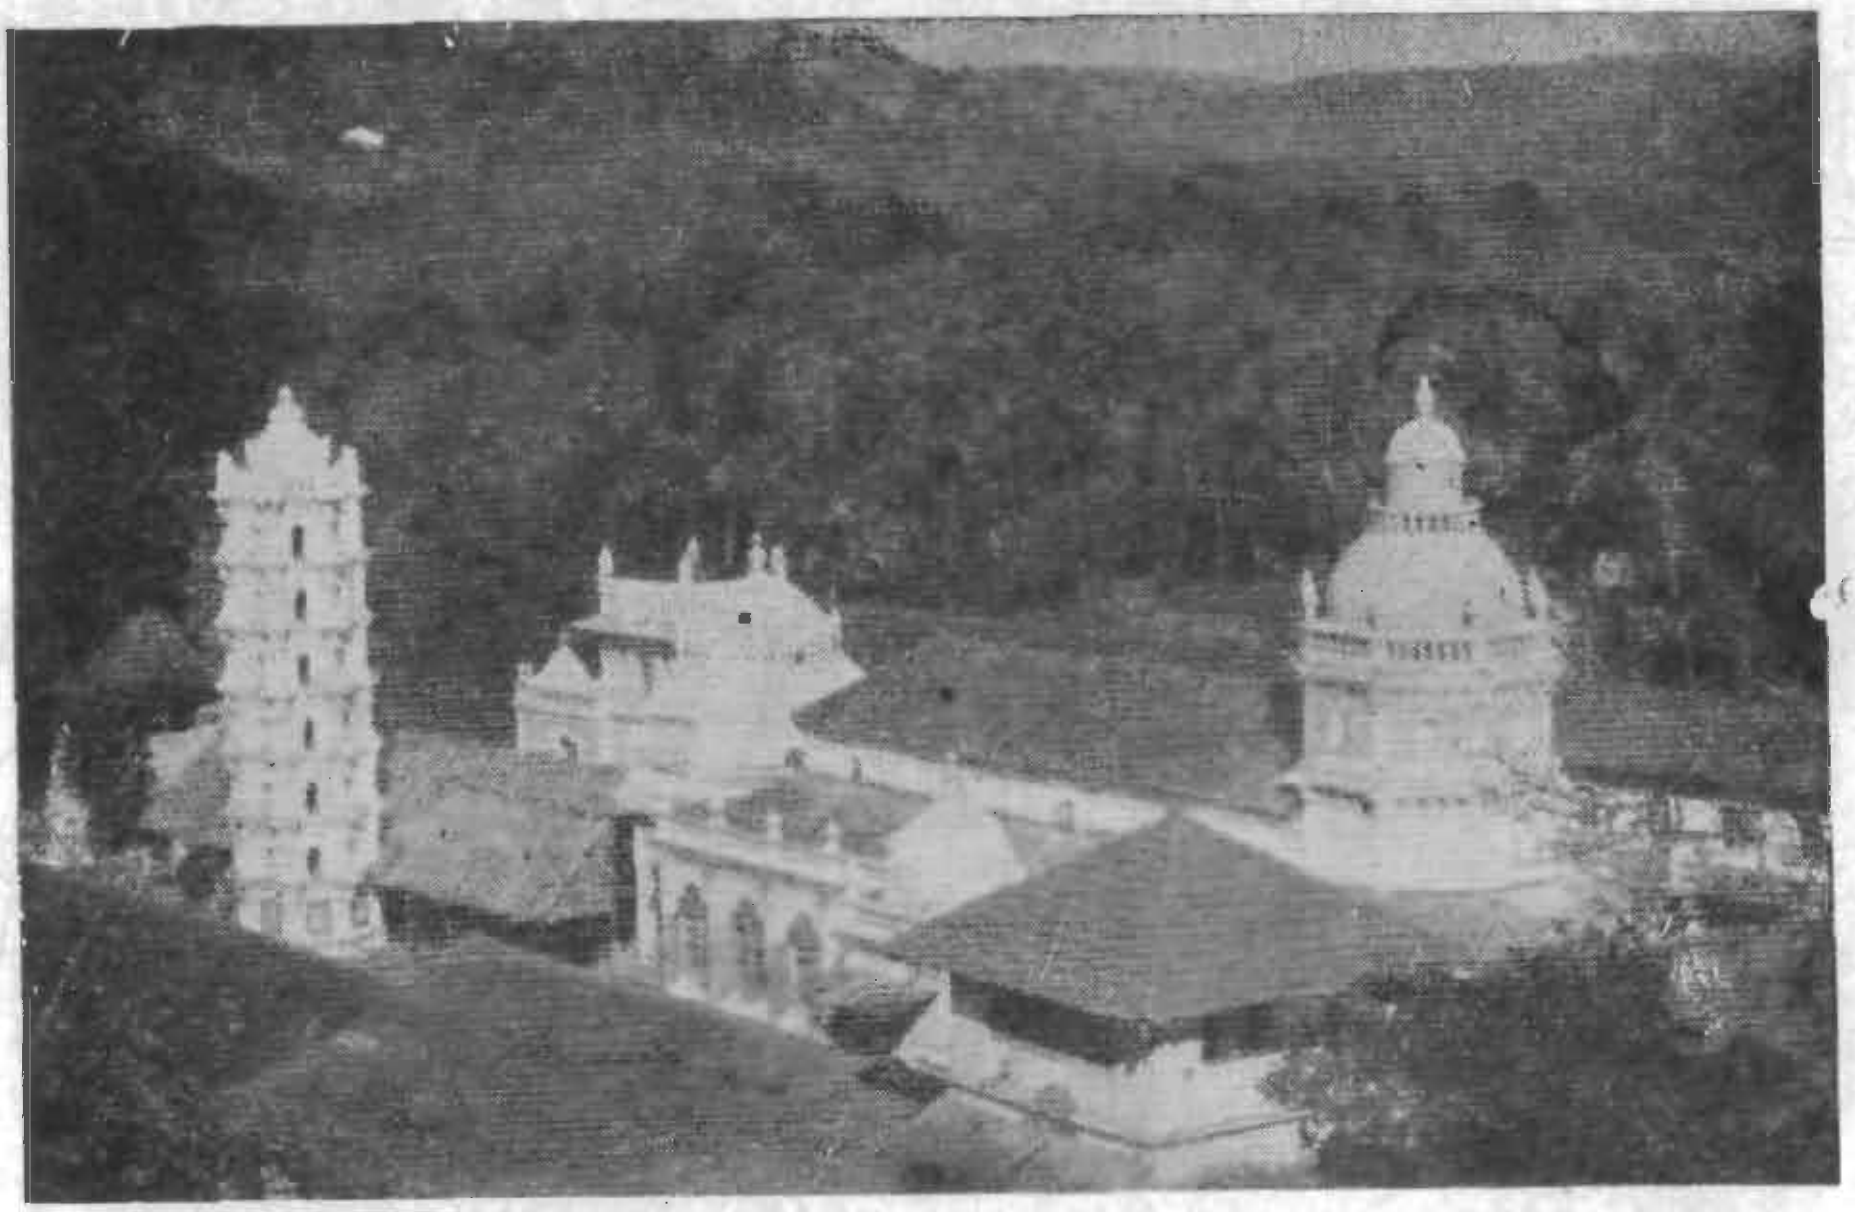

A Chapel in a village (Such chapels are seen in many villages of Goa)

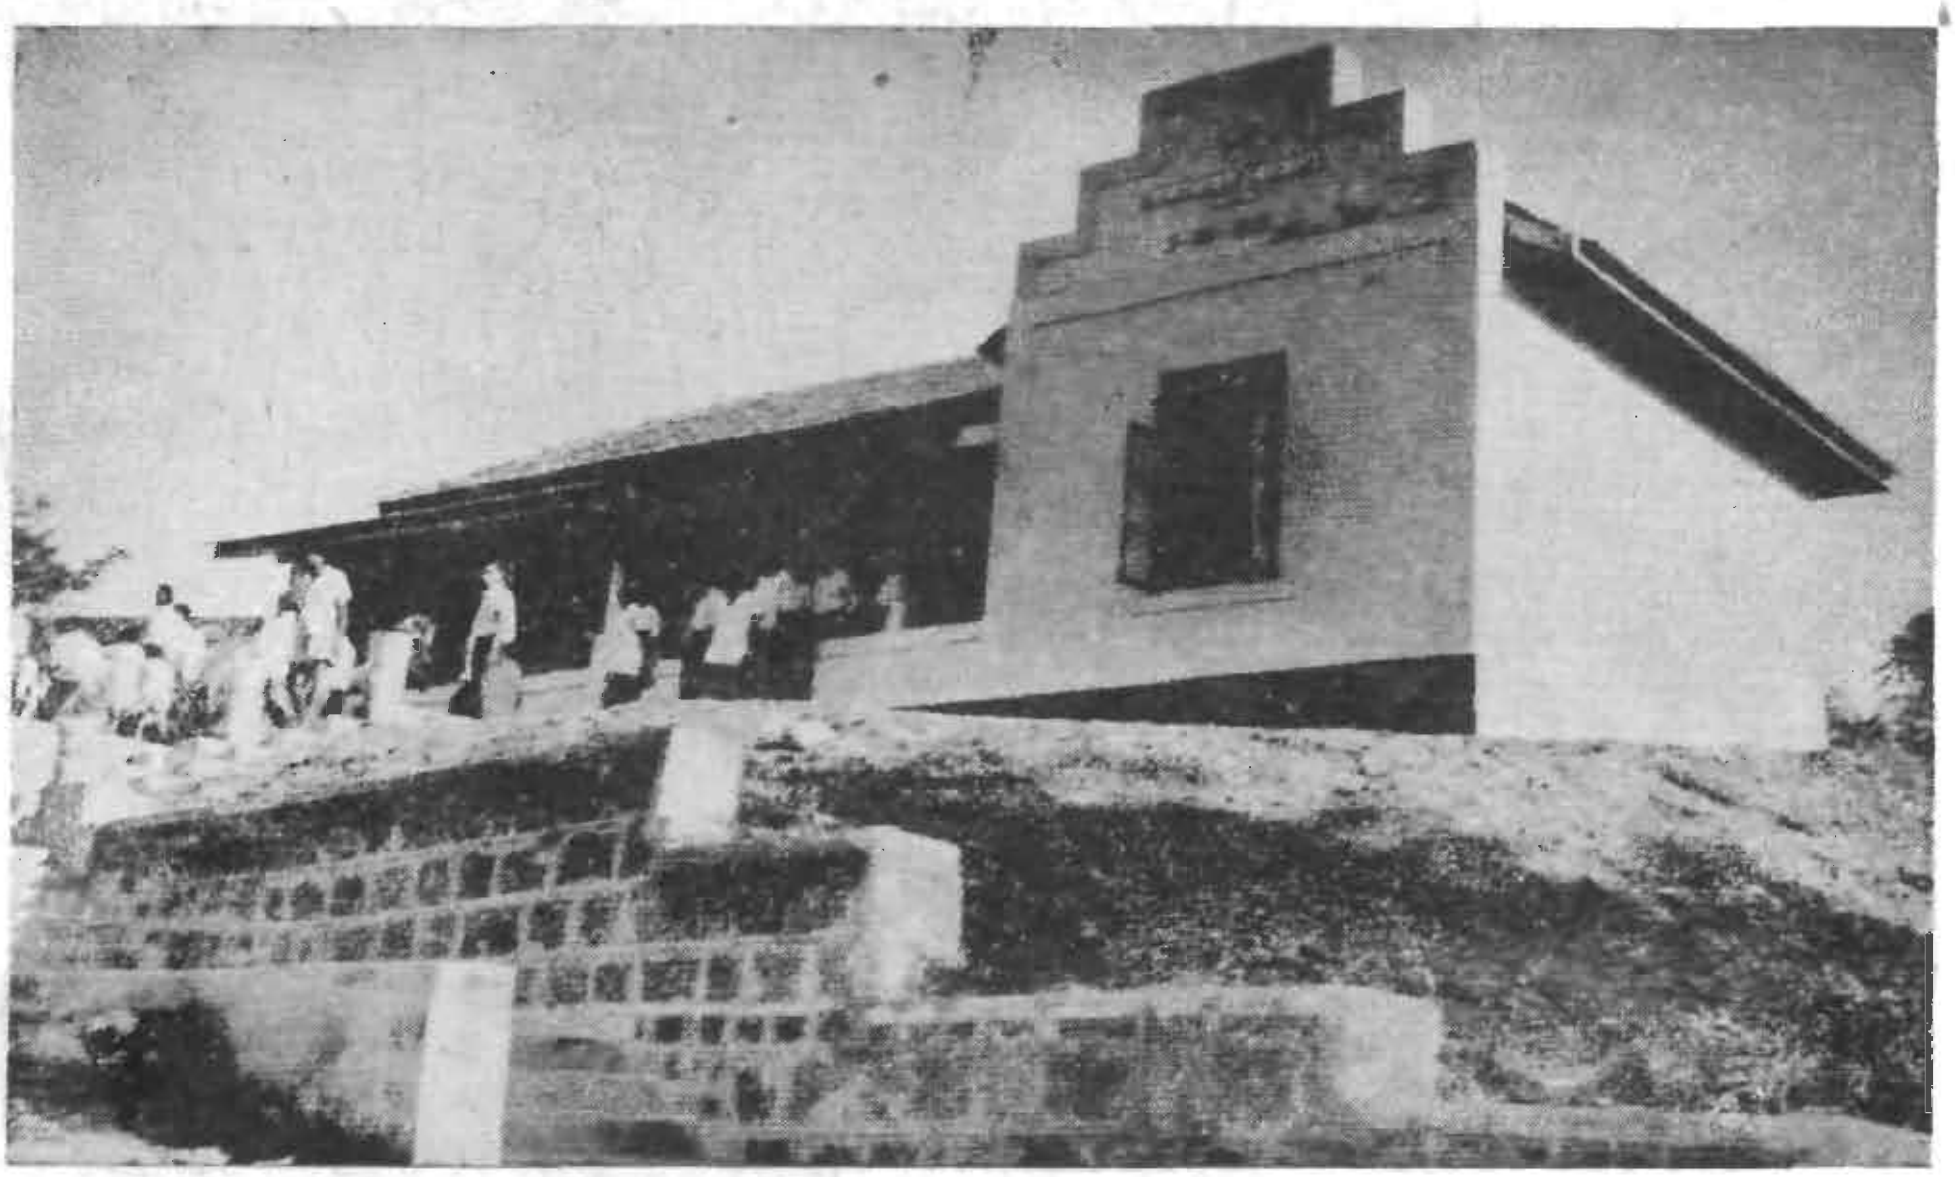

A workshop where artistic brass-wares are manufactured

Hindu Temples with their chacacteristic "lamp pillars" and the ritual water tanks

A 'Panchayat Ghar' in a village

A Primary Health Centre

Mechanised barges provide a very economical means of transport for metalliferous ores of Goa

TABLE E-II PART A

DISTRIBUTION OF MANUFACTURING, PROCESSING OR SERVICING ESTABLISHMENTS OTHER THAN HOUSEHOLD INDUSTRIES CLASSIFIED BY REGISTERED FACTORIES, UN REGISTERED WORKSHOPS AND SIZE OF EMPLOYMENT.

Table E-II Part A shows distribution of manufacturing processing or servicing establishments other than household industries for total, rural and urban areas separately for each district and taluka of the Union Territory. It gives useful information about the size of employment and the number of units under each of the two categories (a) registered factories (b) unregistered workshops in each Division/Major Group of National Industrial Classification 1970 adopted by the Government of India for the purpose of detailed classification of Industries. The material presented in this table is limited only to Industry Division 2&3 which together covers all manufacturing, processing or servicing establishments.

The classification of number of units and persons employed by size of employment is in five groups in the case of unregistered workshops viz (i) one person (ii) 2-4 persons(iii) 5-9 persons (iv) 10-19 persons (v) persons unspecified and in seven groups in the case of registered factories viz (i) 10-19 persons (ii) 20-49 persons (iii) 50-99 persons (iv) 100-299 persons (v) 300-499 persons (vi) 500 + persons (vii) persons unspecified The number of workers used for this classification is the figure reported by the employers or responsible persons on their behalf.

Subsidiary Table E-II Part A.1 has been prepared from this Table to facilitate the analysis of its material and is presented at the end of Chapter-III of the report on Establishments Part III of this Volume.

TABLE E-II PART B

DISTRIBUTION OF MANUFACTURING, PROCESSING OR SERVICING ESTABLISHMENTS OTHER THAN HOUSEHOLD INDUSTRIES CLASSIFIED BY INDUSTRY, FUEL/POWER OR MANUAL USED AND SIZE OF EMPLOYMENT

TABLE E-II PART B

DISTRIBUTION OF MANUFACTURING, PSOCESSING OR SERVICING ESTABLISHMENTS OTHER THAN HOUSEHOLD INDUSTRIES CLASSIFIED BY INDUSTRY, FUEL/POWER OR MANUAL USED AND SIZE OF EMPLOYMENT.

Table E-II Part B gives the number of factories and workshops by Division/Major Group of National Industrial Classification, 1970 and by size of employment separately for total, rural and urban areas. Each category of industry is further classified according to the kind of power /fuel used. The classification by power or fuels used is first by power or no-power used and then for those using power or fuels by four categories of power or fuels viz. (a) electricity (b) liquid fuel (c) coal, wood and bagasse and (d) other power. The classification by size of employment is in ten groups viz. (i) one person (ii) 2-4 persons (iii) 5-9 persons (iv) 10-19 persons (v) 20-49 persons (vi) 50-99 persons (vii) 100-299 persons (viii) 300-499 persons (ix) 500+ persons (x) persons unspecified.

Since the districts of Daman & Diu consist of one taluka each of the same name separate figures for Daman Taluka and Diu Taluka are not presented in this table.

Entries for kind of fuel or power having 'nil' figures have been altogether omitted from the table to economise on space.

Chapter III of the report on establishments part-III of this Volume contains a detailed analysis of the voluminous material presented in this table.

TABLE E-II PART C

DISTRIBUTION OF HOUSEHOLD INDUSTRY ESTABLISHMENTS CLASSIFIED BY INDUSTRY, FUEL/ POWER USED AND SIZE OF EMPLOYMENT.

TABLE E-II PART C

DISTRIBUTION OF HOUSEHOLD INDUSTRY ESTABLISHMENTS CLASSIFIED BY INDUSTRY, FUEL/POWER USED AND SIZE OF EMPLOYMENT.

Table E-II Part C presents data on Household Industry Establishments for the Union Territory as a whole, each district and each Taluka, for total, rural and urban areas, separately. As in TableE-II Part B, this table also gives a three-fold classification. Firstly, household industry establishments are classified by industry, according to the Divisions and Major Groups (two digits) adopted in the National Industrial Classification, 1970. Secondly, the establishments are distributed according to the kind of fuel or power used and thirdly they have been distributed according to the size of employment which is in five groups viz. (i) one person (ii) 2-4 persons (iii) 5-9 persons (iv) 10-19 persons and (v) persons unspecified. Employment size 20 + on wards is not shown in the table because an establishment employing 20 or more persons will be a registered factory even if it is run without power.

Since the districts of Daman & Diu consists of one taluka each of the same name, separate figures for Daman taluka and Diu taluka are not presented in this table.

A Subsidiary Table E-II Part C.1 has been prepared to facilitate the analysis of its material and is presented at the end of Chapter-III of the report on establishments Part-III of this Volume.

While presenting the data in Table E-II Part C or in its Subsidiary Table, lines for power or fuels or for major groups for which the columns have nil entries, have been omitted from the table.

TABLE E-III

DISTRIBUTION OF TRADE/ COMMERCIAL ESTABLISHMENTS CLASSIFIED BY THE TYPE OF BUSINESS OR TRADE AND SIZE OF EMPLOYMENT

TABLE E-III

Distribution of Trade/Commercial Establishments Classified by the Type of Business or Trade and Size of Employment.

Table E-III gives a comprehensive account of Trade/Commercial establishments in each district and each taluka of the Union Territory separately for total, rural and urban areas.

The National Industrial Classification, 1970 adopted by the Government of India has been followed for the purpose of detailed classification of these establishments. Material presented in this table is limited only to Divisions 6 and 8 which together cover all Trade/Commercial establishments.

For studying employment statistics, all establishments have been classified into eight categories depending on the number of persons employed. These categories are (i) one person (ii) 2-4 persons (iii) 5-9 persons (iv) 10-19 persons (v) 20-49 persons (vi) 50-99 persons (vii) 100+persons (viii) Persons unspecified.

Chapter III of the report on establisments Part III of this Volume contains a brief analysis of the material presented in this table.

Entries for any of the Major Groups having 'nil' figures have been altogether omitted from the table.

TABLE E—IV

DISTRIBUTION OF ESTABLISHMENTS (OTHER THAN MANUFACTURING, PROCESSING OR SERVICING OR BUSINESS AND TRADE ESTABLISHMENTS) BY SIZE OF EMPLOYMENT.

TABLE E-IV

DISTRIBUTION OF ESTABLISHMENTS (OTHER THAN MANUFACTURING, PROCESSING OR SERVICING OR BUSINESS AND TRADE ESTABLISHMENTS) BY SIZE OF EMPLOYMENT.

Table E-IV gives the distribution of establishments (othre than manufacturing, processing servicing or business and trade establishments) by size of employment for total, rural and urban areas of the Union Territory and each district and taluka separately.

Establishments are clasified according to the National Industrial Classification, 1970 adopted by Government of India in major groups (two digits).

The classification by size of employment is in eight groups viz. (i) one person (ii) 2-4 persons (iii) 5-9 persons (iv) 10-19 persons (v) 20-49 persons (vi) 50-99 persons (vii) 100+ persons and (viii) Persons unspecified.

The data presented in Table E-IV and the related Subsidiary table E-IV. 1 are analysed and discussed in detail in chapter III (Size of employment and types of power or fuel used) of the report on establishments Part-III of this Volume.

Entries for any of the Major Groups having 'nil' figures have been altogether omitted from the table.

TABLE E-IV

PART IV

HOUSING REPORT AND TABLES

CHAPTER I

INTRODUCTORY

Background

Every Indian Census is preceded by an operation known as Housenumbering and Houselisting which is carried out some months before the actual enumeration. The main object of this operation is to prepare a complete and accurate list of all houses and households which is mainly intended for use as guide to the staff doing census enumeration work. By this operation each house, residential as well as non-residential, is allotted a census number which is recorded fairly prominently on the door of each house or at other conspicuous place and then further details of the house are collected in the prescribed proforma.

In the censuses prior to that of 1961, each State was left to devise its own form of houselist and as such there was neither uniformity between one State and another nor any continuity from one census to another. Very little information on housing used to be collected with the result that the decennial census reports only discussed about the number of houses and households for different administrative areas. This situation was reviewed at the time of 1961 Census and for the first time it was recognised that the houselisting operations could be utilized for a very vital purpose. Consequently, a uniform houselist schedule was designed for the country as a whole and was canvassed during the 1961-census. This 1961 Census experiment proved extremely useful as the houselist yielded some valuable basic data on housing which was not anywhere available hitherto. Since then houselisting has come to be regarded as a sort of Housing Census of the country.

Main Items of Information

1.2 A perusal of the 1971 Census houselist form reproduced as Annexure 'A' to this volume will indicate that it is intended to provide a complete list of all houses and households in every village and town and also the number of persons staying in each house. The other items of information relate to :—

(i) the purposes for which census houses are used e.g. residence, shop, shop-cum residence, work-shop, factory, etc;

(ii) type of material used for wall and roof of each census house;

(iii) whether the census household lived in owned or rented house;

(iv) number of living rooms occupied by the household, and so on.

Before we enter into further discussion of the Houselist form it may be noted that the Houselist of 1971-Census by and large follows the pattern of the 1961-Census Houselist. One important improvement this time over the 1961-Census was in respect of recording the reasons why the Census house was found to be vacant. This was necessary for at the 1961-Census a large number of dilapidated houses were allotted house numbers and shown as vacant, which gave a misleading impression that a number of houses were lying vacant in many areas. Similarly, if the head of household belonged to a Scheduled Caste/Scheduled Tribe, it was specifically recorded. The households engaged in cultivation were recorded as such so that the list could serve as a frame for any future sample surveys of Agricultural households. Another striking difference was that in 1961 Houselist some simple data on houses used as factories or workshops were collected through the Houselist itself, whereas at the 1971-Census a separate schedule called the Establishment schedule was canvassed alongwith the Houselist encompassing all establishments, manufacturing trade and other places where people work. The Establishment schedule reproduced in Annexure 'A' gathered several particulars. The data yielded through this schedule are very useful particularly in regard to the unorganised sector of industry of trade. It is presented in part III of the Census publications.

Pretests

1.3 At the time of drawing the Houselist form for the 1971-Census, it was originally contemplated to collect some additional particulars on Housing such as the age of the house, its area, certain basic amenities in the house like electrification, availability of water supply, nature of privy etc. Information on a few more items like type of fuel used for cooking etc. was also proposed to be collected, on an area sample basis.

The draft houselist was then prepared and subjected to careful pretests in the field in several parts of the country. On pretesting it showed that responses to some of the questions were not encouraging e. g. it was found very difficult to get the correct age of the house. Finding out the area of the house also posed a difficult problem for the enumerators, and was also considered to be a time consuming factor. Several discussions were held with the State Directors of Census Operations. The Planning Commission was also consulted which, however, advised that collection of data on Housing amenities may not be maningful in the present stage of rural housing in the country. As regards the urban areas, Municipalities should be able to maintain detailed information on housing and therefore in a quick operation such as the census one need not attempt any detailed collection of data because of the time and expense involved and the unreliability of response. It was then decided to canvass almost the same houselist schedule as that of 1961-Census so that results from 1971-Census may show the trends in the matter of usage of houses, material of wall and roof and the congestion of accommodation with reference to the number of rooms per household, particularly in respect of industrialised urban areas. There can be little doubt that such an information will be of immense value to the planners and particularly to the National Buildings Organisation in the formulation and execution of their housing programmes.

Permanent Housenumbering Scheme

1.4 At the 1961-Census an attempt was made to introduce a permanent system of house numbering. The objective of the scheme was to have a uniform system of housenumbering throughout the country and maintain it effectively and continuously so that it can serve not merely the purpose of population census but also meet the needs of various branches of Governmental and local administrations, e..g. preparation of electoral rolls, assessment of Municipal taxes, postal and telegraphic servises implementation of health and family planning programmes, socio-economic surveys and so on. The objective, however, could not be fulfilled at the time of 1961-Census.

This scheme of permanent housenumbering was sought to be introduced again during the intercensal period prior to the launching of the housenumbering and houselisting operation for the 1971-Census as per Government of India Circular reproduced vide Annexure 'C'. Implementation of this scheme comes under the purview of the State Government. Since it involved a huge organisation to complete it in a stipulated time not much work has so far been made thereunder.

Unique distinction

1.5 The 1971-Census can claim to have produced excellent detailed notional maps of every village and every ward or block of a town throughout the country. These maps were prepared along with the housenumbering operations, showing the location of every census house. The main object to have these maps was to ensure a complete coverage during enumeration. These maps together with the houselist, will also provide a valuable frame for any socio-economic survey in future. All these maps are compiled for each administrative area, such as a taluka, and are carefully preserved. They will also be of immense help for revising the housenumbering system in future. A couple of specimens of such notional maps are reproduced at the end of this chapter.

Concepts and Definitions

1·6 For the purpose of houselisting, three terms were used in the houselist of 1971-Census. These are 'Building', 'Census House' and 'Household' The definations and implications of these terms will be clear from the excerpts given below from the booklet 'Instructions for filling up the Houselist' issued by the Registrar General, which is reproduced as Annexure 'A' to this volume.

(i) *Building.*—A "building" is generally a single structure but sometimes made up of more than one component unit, which are used or likely to be used as dwellings (residences) or establishments such as shops, work-shops, factories, etc., or as godowns, stores, cattle sheds etc. or in combination with any of these such as, shop-cum-residence, or workshop-cum-residence, etc.

(ii) *Census House*—A "Census house" is building or part of a building having separate main entrance from the road or common court-yard or stair-case etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

(iii) *Household*—A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be 'one member household, two-member household or multi-member household. For census purposes each one of these types is regarded as a "Household". Again, there may be a household of persons related by blood or household of unrelated persns; the latter are Bourding Houses, Hostels, Residential Hotels, Orphanages, Rescue Homes, Ashrams etc. These are called "Institutional Households".

The three terms, viz. the 'Building', the 'House' and the 'Household' are quite different though they are dependent upon each other. The building and the house are structural units of accommodation while the household is a socio-economic unit of population. The 1971 concept of these terms is more or less the same as implied in 1961-Census.

Houselisting Operations

1.7 Unlike in some other States, the housenumbering and houselisting operations were carried out simultaneously in this territory. The operations commenced in all the three districts in March 1970.

It was decided to adopt the same blocks for housenumbering in rural areas which were carved out for the permanent housenumbering scheme. Since this scheme was not taken up in urban areas, fresh blocks had to be carved out on the basis of rough population estimates and by making spot-visits to the areas. only in case of three major towns viz. Panaji, Mapusa and Margao (out of 13 towns) the blocks had to be carved out with the help of the National Sample Survey urban frame. Since the blocks under the permanent housenumbering scheme were formed sometime in 1968–69 and the blocks under urban frame of National Sample Survey being larger in size, it was not possible to have the same size of blocks throughout.

A running serial number was given only to the buildings. The houses or households within a building were marked by sub-numbers written in brackets after the serial number of that building. The sub-numbers for the houses were written in arabic numerals like (1), (2), (3), etc. while those for two or more households living in the same house were written in alphabets as (A), (B), (C), etc. Thus, number 125(3), indicates house No. 3 in the building bearing serial No. 125. The number 109 (2) (C) indicates the third household living in house No. 2 in building No. 109. Where there was only one household in a house, the number of the house also represented that of the household. Similarly, where there was only one house in a building, the building number and the house number were identical. For all the numbers the alphabet 'C' has been prefixed so as to distinguish the Census numbers from that of the election numbers which also have been written on many of the houses and prefixed with E, like E-275, etc.

Training

1.8 Training for housenumbering and house listing of primary workers e.g. Enumerators and Supervisors was organised at Taluka Headquarters in such a way that at least one official from the Census Office could be present at each training camp. From the very beginning great importance was laid on a competent and adequate training of the houselist enumerators. Each trainee had to attend two classes, and a field practice of numbering and listing of at least ten houses was also arranged. Training was imparted in Konkani/Marathi/English/Gujarati depending on the locality.

The period fixed for the housenumbering and houselisting according to the 1971-Census calendar was from March to April 1970. This differed from the 1961 Census when this operation was undertaken rather too close of actual enumeration. This must have adversely affected the training programme of enumerators. Based on these experiences, the period of work of first phase in 1971-Census was fixed far in advance of actual enumeration. By this, sufficient time was made available to impart comprehensive training to the Houselist enumerators which ultimately resulted in much better quality of work.

Agency

1.9 The task of selection of enumerators and supervisors was left to the Charge Superintendents. In rural areas all the talathis, most of the village panchayat secretaries and many Government Primary Teachers were appointed as enumerators, while the supervisors were selected from amongst the Revenue Circle Inspectors, Assistant District Inspectors of Education, etc. In urban areas the employees of the respective Municipal Councils and the Government Primary teachers were appointed as enumerators. The number of enumerators and supervisors (both regular and reserve) who had undergone training was 1,051 and 223 respectively, for 1,205 blocks.

It was indeed very difficult to get primary teachers who formed the bulk of the enumerators engaged for this work, to realise the importance and urgency of Census Operations and to attend to it with the degree of seriousness and accuracy it demanded. There was a general dissatisfaction amongst the teachers for having been called upon to attend to such additional works with the result that many of them were not mentally prepared to take up the census work with due seriousness. It was only after explaining to them the significance of this work as being one of great national importance coupled with a good deal of persuasion that their cooperation was listed. The fact nevertheless remained that many of the teachers took up to this work rather half heartedly and completed it within a period much longer than originally stipulated.

Public Response

1.10 The enumerators were asked to use the paint for giving house numbers and not 'Geru' or other material which may get washed out in the heavy and torrential rains that this territory gets from June to October. To begin with there was some resistance on the part of some households to allow the enumerators to paint the census number. Some households did not agree to have the census house numbers painted on the front side wall and hence they requested the enumerators to give the numbers on the inside wall or on the inside part of the lintel, which was agreed to by the enumerators. In some cases, the household allowed our enumerator to give the number on the wall, but soon afterwards covered it with a photo frame or a calendar out of a sheer superstitious belief that the black paint used for the purpose was inauspicious. Nobody however, objected to the ill famed number 13 being assigned to his/her house. It was impressed on all the enumerators that while giving the census numbers, the wishes of the heads of households should be respected. Inspite of these clear instructions there were some complaints but, ultimately, these were attended to and after explaining the importance of housenumbering and houselisting, the households agreed to have the numbers painted on their houses.

Quality of the data collected

1.11 The quality of housenumbering and houselisting was on the whole quite satisfactory, although there can be no gainsaying the fact that some of the enumerators/supervisors had committed due to negligence, minor mistakes which could have conveniently been avoided.

Following were the typical mistakes committed by the enumerators :

(i) when the census house was shown vacant in column 6, likely reasons for the vacancy were not given in column 17. Sometimes the exact purpose for which the census house is used was not elaborated. The enumerator had employed generic expressions like shop etc. without giving any details of the particular commodity bought/sold;

(ii) the material of wall was written as cement and stone, mud and bricks when in fact it should have been 'stone' 'bricks' etc. in column 4, of the houselist. Sometimes this column was left blank;

(iii) in some cases the household number was mentioned in column 8 of Houselist when the entry in column 6 indicated that the census house was not used for residential purposes either wholly or partly;

(iv) it was also found that the totals given in respect of columns 13-15 were wrong in many cases. The Houselist Abstract was also not filled with adequate care. The number of houses and households was not recorded after actual counting from the houselist. Instead, the opening and the closing building numbers were noted;

(v) in a few cases, the name of the head of household was not entered in column 9.

The houselist population was 8,33,408 as against the enumerated population of 8,57,771 which recorded an increase of 2.92 per cent. This shows that a complete coverage was attained in houselisting operations. The small difference of 2.92 percent, within a period of one year is negligible because 1971-Census figure included houseless persons and also the personnel of military establishments both of which were not included in the houselist estimates.

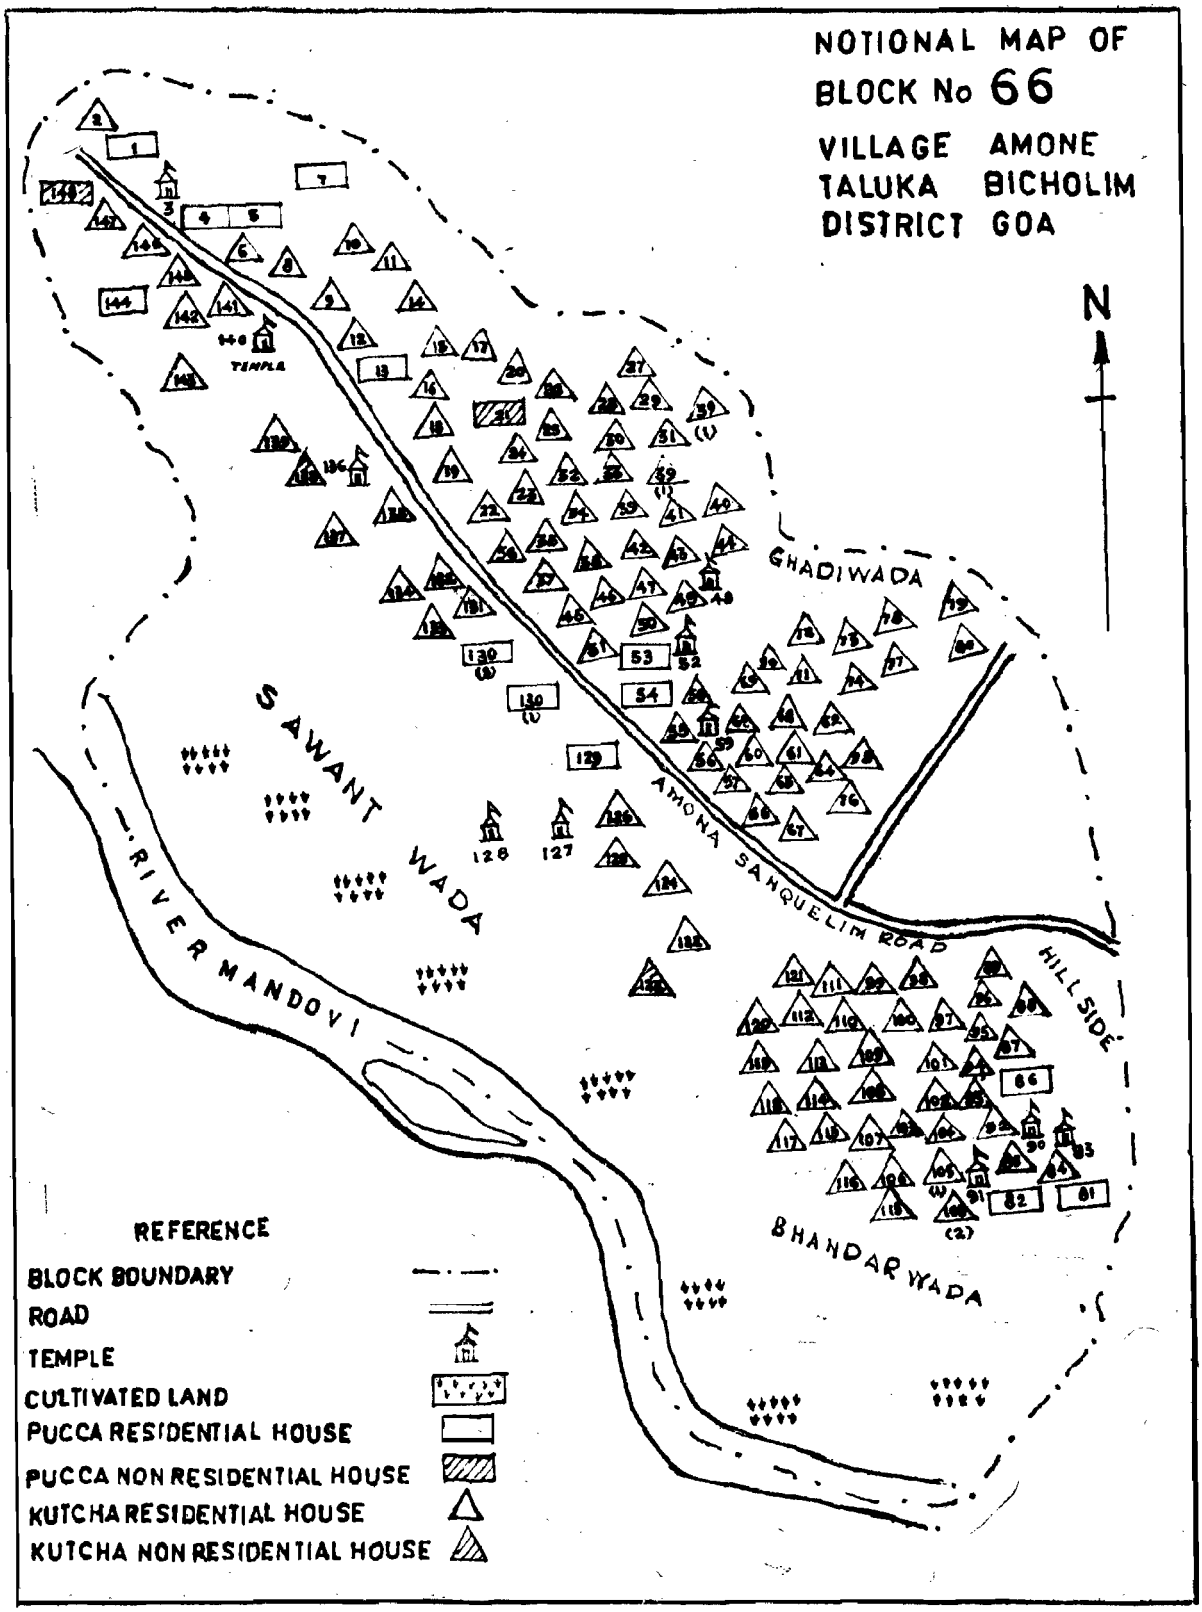

Tabulation

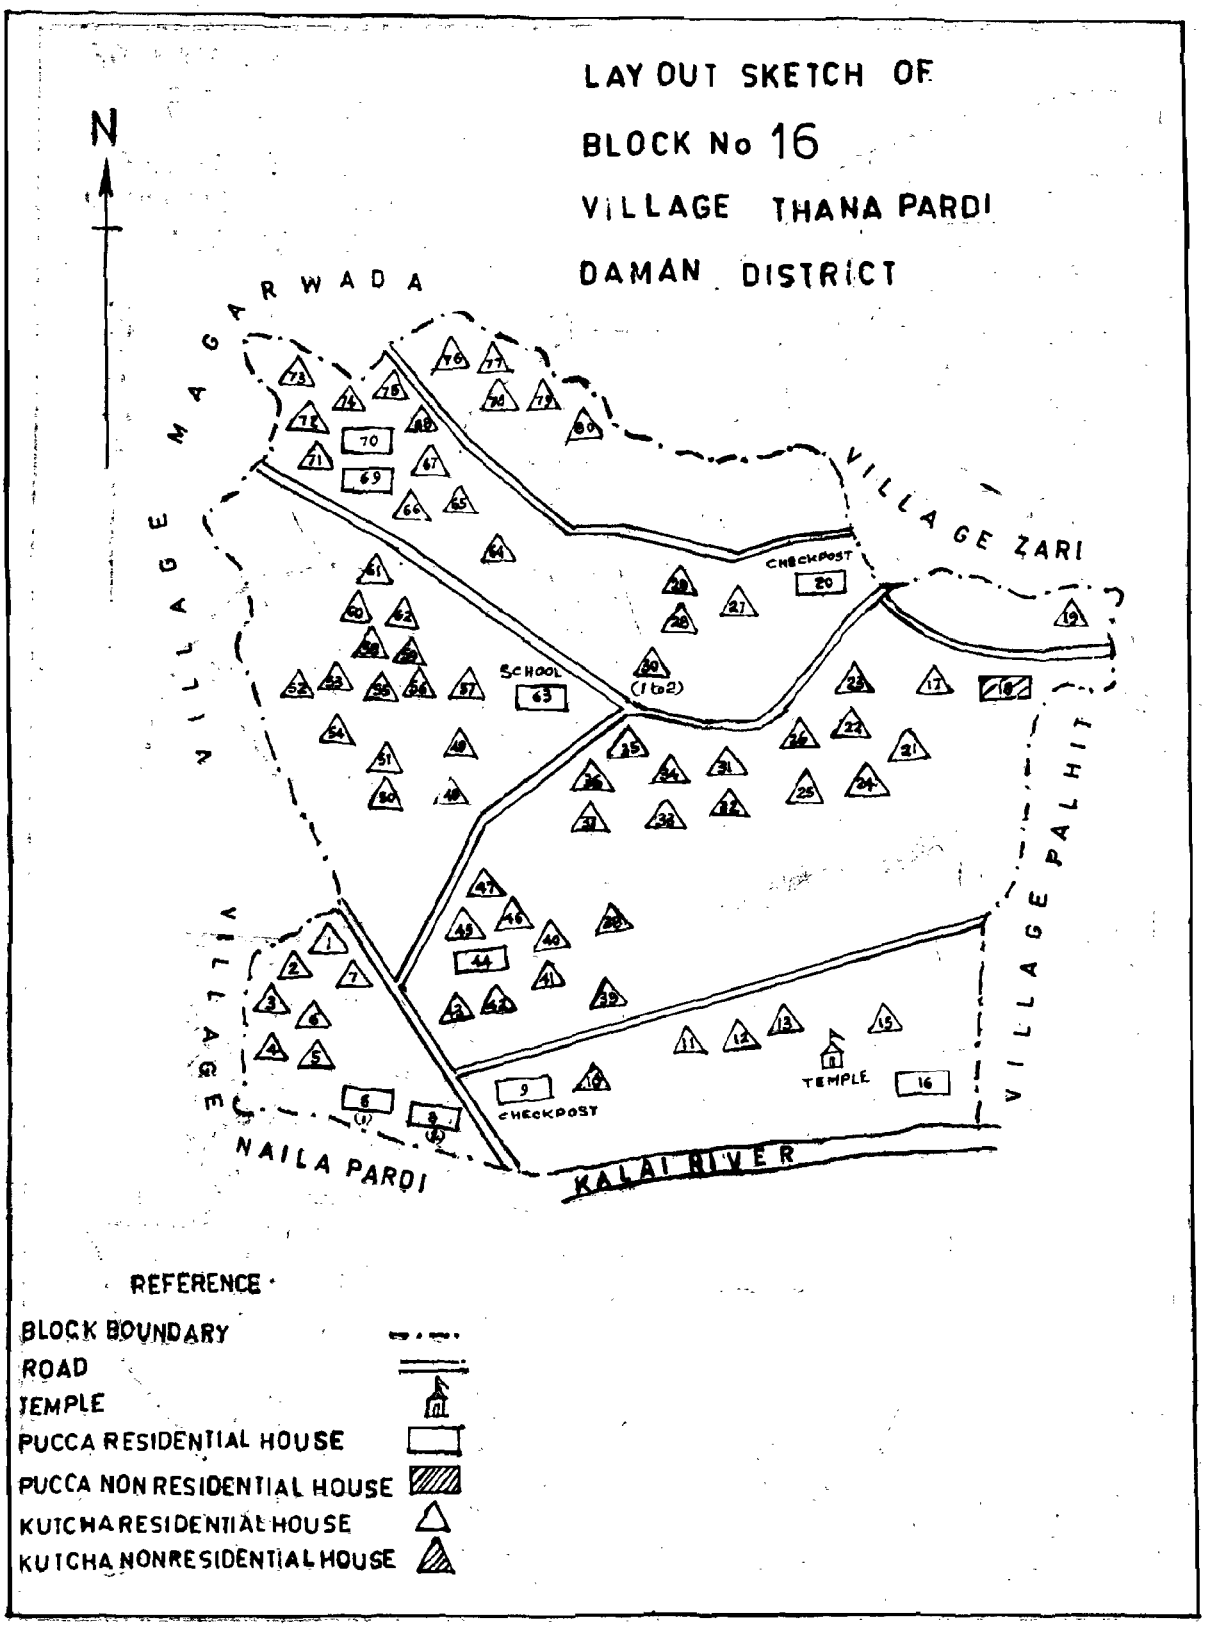

1.12 As soon as the houselisting operation was completed, a Tabulation Office was set-up at the headquarters towards the middle of June 1970 to process the data relating to housing and establishment schedules. The records were prepared in duplicate and one copy of the houselist was retained at the taluka head quarters and the other was sent to the tabulation office for further processing.

Houselist records received in the tabulation office were first scrutinised for accuracy of coverage. The scrutiny also included checks for internal consistency in the entries. Each entry was then edited and coded before further processing.

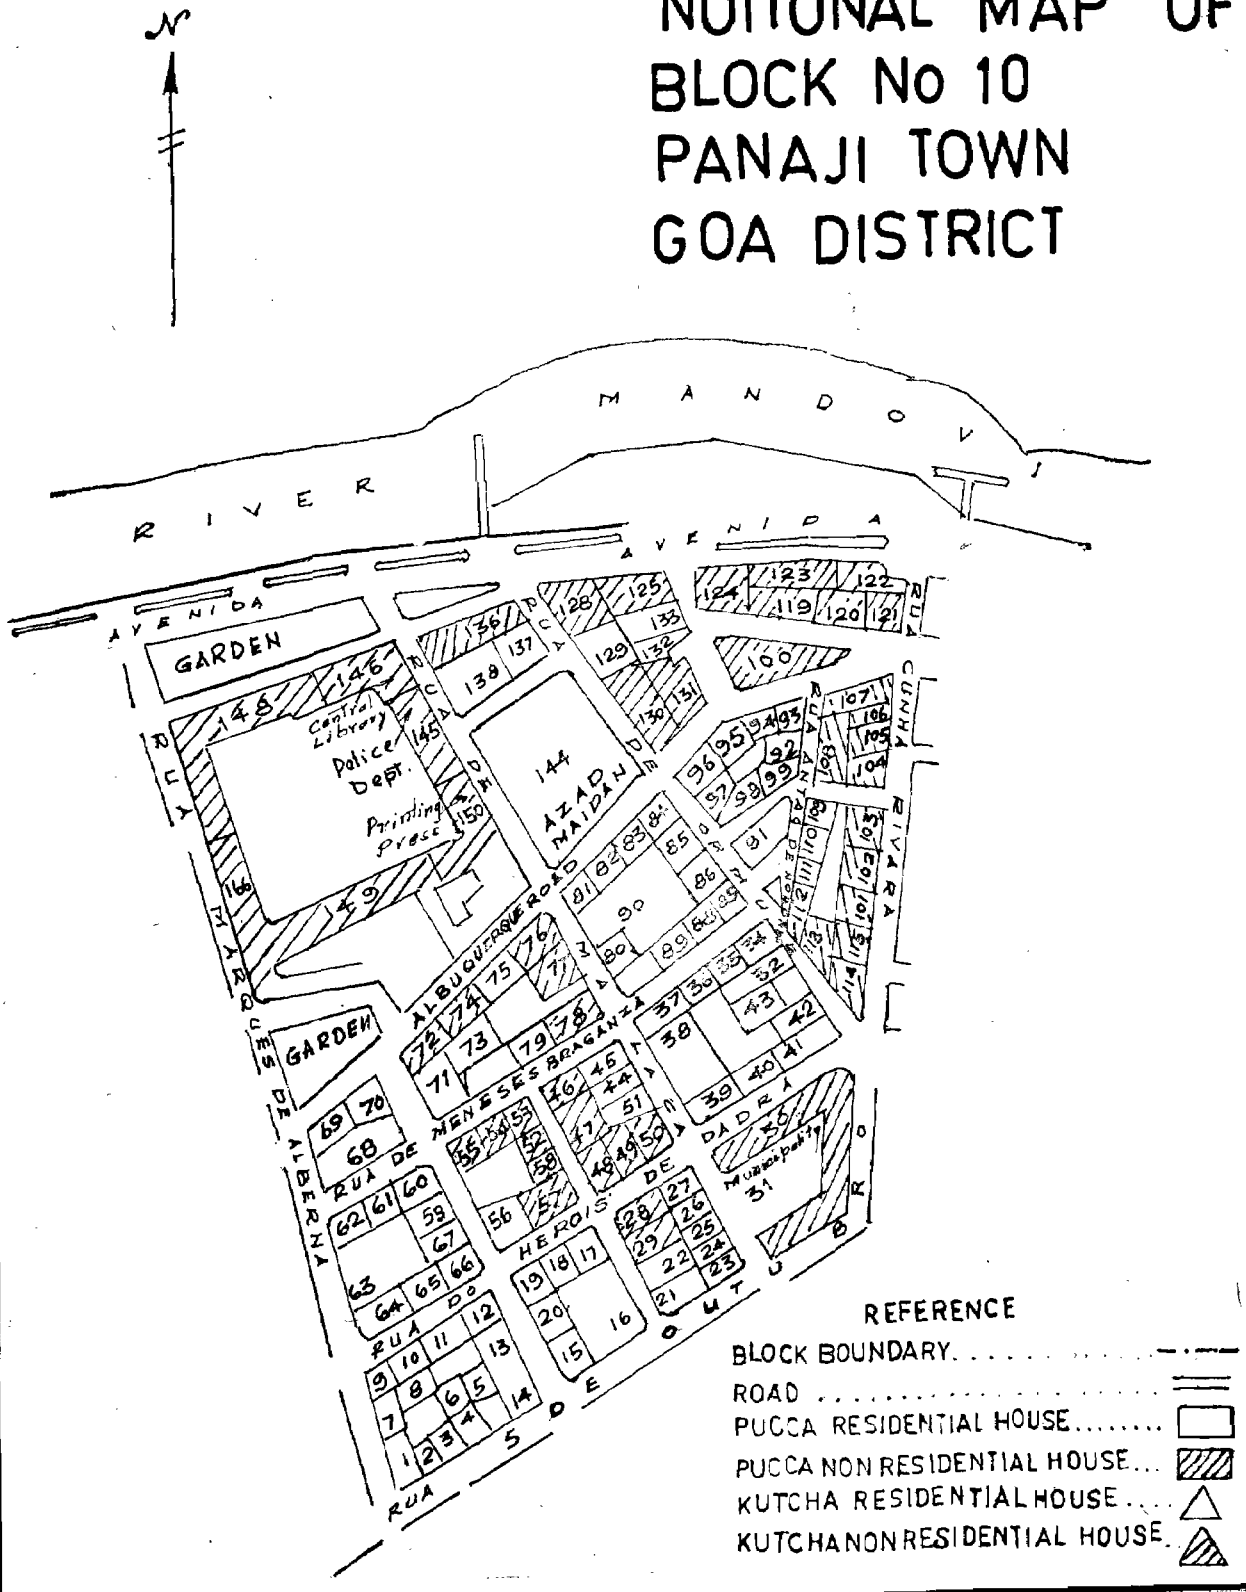

Unlike other States the tabulation of the houselist data of this territory was proposed to be done on the full-count basis. This was the first time in the census history that a considerable part of data was computerised. For this, a coding/punching unit was set up in each State and the data relating to the houselist was transferred on the punched cards. These punched cards were then fed on the computer which could reveal errors of coding/punching. A series of edit checks were applied at this stage and the errors found were imputed. Simultaneously, the entire punched card data was transferred to a magnetic tape and finally this tape was reproduced to generate all types of cross tabulations.

The system of computerising the census data will certainly play a significant role in analysing the huge data at enormous speed otherwise unattatinable, and will assure accuracy by eliminating the factor of human error to a very great extent.

CHAPTER II

USES TO WHICH CENSUS HOUSES ARE PUT

Preliminary Remarks

Table H-I gives the number of Census houses found vacant or occupied at the time of Houselisting as also the broad particulars of how the occupied census houses were being used. The data is compiled upto taluka level separately for total, rural and urban areas. The data given in table H-I was further utilised for abstraction of information indicating :

(i) distribution of 1,000 Census houses by vacant and different types of occupied census houses and

(ii) distribution of 1,000 census houses for selected types of use among rural and urban areas.

Two subsidiary tables, H-I.1 and H-I.2, giving the above information have accordingly been prepared and are given at the end of the chapter.

Kinds of Uses

2.2 Occupied Census houses were classified into the following 11 categories on the basis of the uses to which they were being put

(i) Residence

(ii) Shop-*cum*-residence.

(iii) Workshop-*cum*-residence including household industry

(iv) Hotels, Sarais, Dharmashalas, Tourist houses and 'Inspection Bungalows' etc.

(v) Shops excluding eating houses.

(vi) Business houses and offices.

(vii) Factories, Workshops and Worksheds.

(viii) Restaurants, Sweetmeat Shops, and eating places.

(ix) Places of entertainment and community gathering (Panchayat Ghar etc.,) excluding places of worship

(x) Places of worship (Temples, Churches, Mosques, Gurudwaras etc.)

(xi) Others.

These different uses may be briefly defined as follows :

(i) Residence—used exclusively for residential purposes.

(ii) Shop-*cum*-residence—used partly for residence and partly for sale of goods.

(iii) Workshop-*cum*-residence—used partly for residence and partly for production, repairing, or servicing of goods or manufacturing and sale of goods.

(iv) Hotels, Sarais, Dharmashalas, Tourist houses and Inspection Bungalows, etc.—used as places of halt of temporary stay by travellers and pilgrims.

(v) Shops excluding eating houses—places where goods are bought or sold, excluding cafes, bars and restaurants

(vi) Business houses and offices—offices of Government, local bodies, institutions, commercial firms, banks etc.

(vii) Factories, Workshops and Worksheds—Places where some kind of production, processing, servicing or repairing is undertaken on a commercial scale.

(viii) Restaurants, sweetmeat shops and eating places—Places where food and other eatables are sold or served.

(ix) Places of entertainment and community gathering excluding places of worship—these include cinemas, theatres, clubs, libraries, etc.

(x) Places of worship—These include temples, churches, mosques, gurudwaras, where people go for worshipping.

(xi) Others—These include the residual categories like garage, godown, cattle-shed, pump-house etc. All educational and medical institutions are also included in this category.

Census Houses

2.3 It will be seen from Table H-I that the total number of Census houses in Goa, Daman & Diu according to the Houselist figures of the 1971-Census is 2,26,544 out of which 1,50, 629 houses are used as residences. Out of these residential houses 1,19,049 or 79 per cent are in rural areas and 31,580 or 21 per cent in urban areas.

The population of Goa, Daman & Diu in 1971 Census is 8,57,771 which gives a density of 225 persons per sq. km. The territory has 40 residential houses per sq. km. which gives a ratio of about 5.6 persons per occupied residential house. During the 1960-Census, the density was 164 persons per sq. km. and 32 houses per sq. km. with the ratio of about 5.1 persons per occupied residential house.

Residential Houses

2.4 The residential houses (including combined uses) constitute 665 per thousand for the total, 668 per thousand for rural and 652 per thousand for urban areas. The population of partly or wholly residential houses is highest in Mormugao taluka (728 per thousand) followed by Salcete Taluka (721 per thousand) and Daman taluka (713 per thousand). The lowest percentage of 528 per thousand is found in Pernem taluka. This great difference in the proportion is mainly due to the category of other uses (Column 15 of Table H-I) which includes cattlesheds, godowns garages and such other places making as much as 329 per thousand in Pernem taluka against only 86 in Mormugao taluka. The table below gives the proportion of residences of all kinds per 1,000 census houses separately for rural and urban areas in the talukas of Goa, Daman & Diu arranged in ascending order within each district.

STATEMENT II.1

Proportion of Residential Houses of all kinds per 1,000 Census houses, 1971.

Union Territory/District/Taluka	Total	Rural	Urban
1	2	3	4

Diu District	572	573	567
Diu	572	573	567

A few houses are used both as shops and residences. Number of such shop-*cum*-residences are given in column 6 of Table H-I and their proportion in column 6 of subsidiary Table H-I.1. It will be seen that out of 665 (per thousand) residences in the State, 5 are used as shop-*cum*-residences. This proportion is almost the same in urban areas, viz. 5 out of 652. Unlike in other States where the practice of using shops as residence also is found to be more in vogue in urban areas than the rural areas, in Goa it seems to be almost equally uncommon in both.

From column 7 of Table H-I and H-I.1, it will be seen that the use of houses as workshop-*cum*-residence is more common in rural than in urban areas. This is because a number of household industries in rural areas are conducted at home. The carpentry work, pottery, tailoring, weaving, etc. in rural areas generally conducted at home and as such their residences have been recorded as workshop-*cum*-residences. The highest proportion of workshop-*cum*-residences is found in Ponda taluka (18 per thousand) followed by Canacona taluka (16 per thousand). This is so because the bamboo weaving and carpentary works, respectively, are mostly conducted as household industries in these two talukas.

Hotels, Lodgings etc.

2.5. Column 8 of Table H-I will show that only 275 house are used as hotels, "sarais", Dharmashalas, Tourist houses etc. in this territory, out of which 170 are in rural areas and 105 in urban areas. The proportion of this item is hardly 1 out of 1,000 census houses, and is just about double of it in urban areas alone.

Shops

2.6 The number and proportion of houses used as shops will be available from columns 6 and 9 of Table H-I and subsidiary Table H-I.1. Places where articles are bought or sold either for cash or credit are treated as shops. Business houses, offices, bars and restaurants, laundries, hair cutting saloons, photostudios etc. are all excluded from this category. In all, there are 8,677 houses wholly or partly used as shops, out of which 4,669 are in rural areas and the remaining 4008 are in urban areas. There are 26 shops per thousand census houses in rural areas and 83 shops per thousand houses in urban areas. The four bigger towns of Panaji, Mapusa, Margao and Mormugao account for 36 per cent of the total number of shops, while the Mapusa town alone shows the highest proportion of shops viz. 126 per thousand Census houses. The only plausible reason, which can be attributed to this phenomenon is the central location of the town with a number of villages surrounding it.

Business houses and offices

2.7 Column 10 of Table H-I will show that 1,729 houses in Goa, Daman & Diu are used as business houses and offices, 721 or 42 per cent of which are in rural areas and the remaining 1008, or 58 per cent, in urban areas. Again the four bigger towns of Panaji, Mapusa, Margao and Mormugao account for 45 per cent of the total number of business houses and offices This higher proportion in these towns is mainly due to concentration of banks, trading firms and a number of Government offices.

Factories and Workshops

2.8 There are 7,493 houses in Goa, Daman & Diu which are wholly or partly used as factories, workshops or worksheds, out of which 5,510 or 74 per cent are in rural areas and the remaining 1,983 or 26 per cent in urban areas. Factories are those which are registered under the Indian Factories Act and the workshop or worksheds are small unregistered places where some kind of production, processing, repair or servicing activity is conducted. Flour mills, bakeries or other places where sweetmeats are prepared, oil ghani etc. are included in this category. From table H-I, it will be seen that factories, workshops and worksheds are more concentrated in rural areas. It is so, because the smaller establishments of village carpenters, potters, weavers, etc. are all included in this category. Further detailed discussion on this aspect is given in Part III of the publication.

Bars and Restaurants

2.9 Column 12 of Table H-I will show that 1,412 houses are used as restaurants, sweetmeat shops and eating places, out of which 1,010 are in rural areas and 402 in urban areas. It is significant to note that the number of restaurants, sweetmeat shops and eating places where eatables are sold or served is about 16% of the total number of all other kinds of shops. In other words for every 6 other shops, there is one restaurant or tea-shop or eating place. The proportion of rural and urban areas is 22 percent and 10 per cent respectively of the total number of all other shops. The urban areas however have a larger proportion of restaurants i.e. 8 in every 1,000 census houses as against 6 in rural areas. Since Goa has become one of the important attractions in the country, this somewhat higher representations of establishments under this group seem natural.

Places of entertainment

2.10 Places of entertainment and community gathering include cinema houses, drama theatres, libraries, reading rooms, gymnasia, clubs, town-halls etc. The places of worship like temples churches, mosques etc. were excluded this time and treated under a separate category. In Goa, Daman & Diu, there are only 168 such establishments, 100 in rural areas and the remaining 68 in urban areas.

Religious Institutions

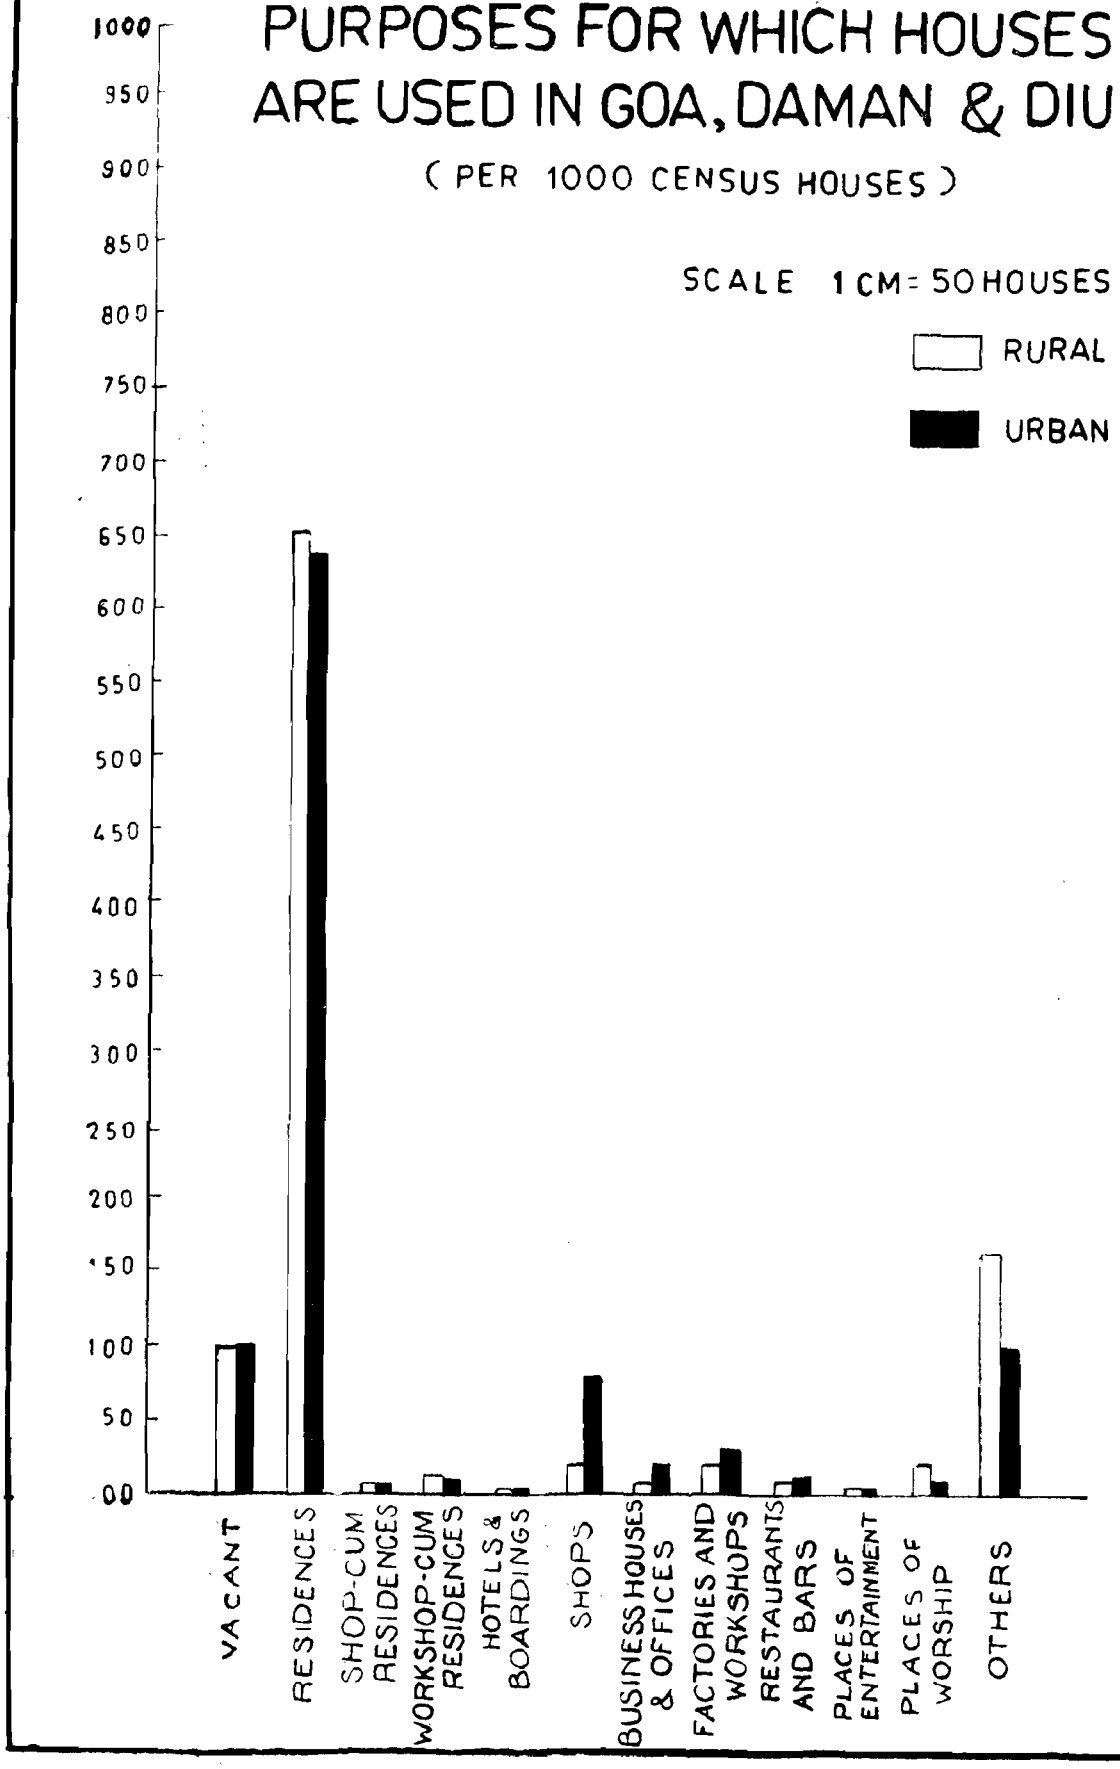

2.11 A good number of temples, churches etc. are seen in this territory. From table H-I. it will be seen that 4,036 houses are used for this purpose, 3,627 in rural areas and the remaining 409 in urban areas. There is certainly a much larger concentration of small temples and chapels in rural areas of this Territory and that is why the proportion in rural areas is as high as 21 per thousand, against 9 per thousand in urban areas. Ponda taluka has the highest proportion (35 per thousand) followed by Pernem taluka (30 per thousand) and Bicholim taluka (29 per thousand) respectively.

Others

2.12 The number of houses used for other purposes is shown in column 15 of Table H-I and their proportion in column 15 of subsidiary table H I.1. Out of 33,670 houses used for other purposes not classified in any of the uses shown in columns 5 to 14, the rural areas have 28,890 or 86 per cent, while the remaining 4,780 or 14 per cent are in urban areas. In rural areas, the proportion is 162 per thousand as against 99 in urban areas. Pernem Taluka has the highest proportion of 329 per thousand,

PURPOSES FOR WHICH HOUSES ARE USED IN GOA, DAMAN & DIU

(PER 1000 CENSUS HOUSES)

The category of other uses is really a residuary group and any kind of use which could not be fitted into the specified categories was lumped up here. Following are some of the types of uses grouped in this category :—

(i) schools, colleges and all other teaching institutions;

(ii) hospitals, nursing homes, dispensaries etc.,

(iii) places where personal services such as laundrying, hair cutting, photography etc. are rendered;

(iv) cattle-sheds, garages (for keeping the automobile) godowns, power-sub-stations, pump-houses, cemetaries etc.

The categories mentioned at Sr. No. (i) and (ii) were shown separately in the 1961-Census but grouped this time under the houses used for other purposes.

Vacant Census Houses

2.13 The incidence of vacant census houses in Goa, Daman & Diu is 98 per 1,000 census houses which is rather high. Among the talukas, the incidence of vacant houses is the highest in Diu (217 per thousand) followed by Bardez (159 per thousand) and Daman (144 per thousand), respectively. The lowest proportion of 42 per thousand is found in Satari taluka. Taking figures for rural and urban areas, we find the proportion of vacant census houses almost the same viz. 97 and 99 per thousand respectively. The table below indicates the position, the talukas have been arranged in ascending order within each district.

STATEMENT II.2

Number of vacant census houses per 1,000 census houses 1971

Union Territory/District/Taluka	Total	Rural	Urban
1	2	3	4
Goa, Daman & Diu	98	97	99
Goa District	91	92	87

Diu District	217	226	188
Diu	217	226	188

Vacant census houses are those which at the time of census enumeration were not used for residence or for any other purpose This category also included houses which were lying vacant either due to dilapidation or being under repair, or incomplete construction or want of tenant/occupant etc. It may, however, be wrong to conclude that the larger proportion of houses categorised as vacant in some areas indicate a better supply of the housing facility. In fact a large number of houses remain vacant for the better part of the year as the owners are either employed in Bombay, African countries or elsewhere, or are sea-faring. As a tradition, Goans working elsewhere make it a point to visit Goa at least once in two years (if not every year) during the summer season or around Christmas. They would for this reason rather like to keep their houses in Goa but would not sub-let.

SUBSIDIARY TABLE H-I.1

DISTRIBUTION OF 1,000 CENSUS HOUSES BY VACANT AND DIFFERENT TYPES OF OCCUPIED CENSUS HOUSES

This subsidiary table is based on main table H-I and gives the distribution of 1,000 Census houses according to the different uses to which they are put, for the Union Territory, districts and talukas separately for total, rural and urban areas. The terms used in this table are explained in detail in para 2 of Chapter-II-uses to which Census houses are put-of this volume.

SUBSIDIARY TABLE H-1.1

DISTRIBUTION OF 1000 CENSUS HOUSES BY VACANT AND DIFFERENT TYPE OF OCCUPIED CENSUS HOUSES

Union Territory/District Taluka		Census Houses vacant at the time of House-listing	OCCUPIED CENSUS HOUSES

CHAPTER III

MATERIAL OF WALL AND ROOF OF HOUSES

Preliminary Remarks

This Chapter attempts a discussion on the main table H-II which presents the distribution of Census houses by the predominant material of wall and of roof, and the following four subsidiary tables.

H-II.1—Distribution of 1000 census houses by predominant material of wall.

H-II.1 (A)—Distribution of 1000 residential census houses by predominant material of wall.

H-II.2—Distribution of 1000 Census houses by predominant material of roof.

H-II.2 (B)—Distribution of 1000 residential census houses by predominant material of roof.

Kinds of material

3.2 The material of wall for a census house is the material out of which most of its walls are constructed. Where a house consists of separate structures, each of different material, the material out of which the walls of the main bedroom are made is to be recorded. Similarly, the material of roof is the one out of which most of the outer roof exposed to the weather, and not the ceiling is constructed. The intermediate floor is treated as the roof of the lower floor in the case of a multistoreyed building.

Marerials of walls are classified into the following nine categories which are generally used for constructing walls.

(i) Grass, leaves, reeds or bamboo
(ii) Mud
(iii) Unburnt bricks
(iv) Wood
(v) Burnt bricks
(vi) Galvanised Iron Sheets or other metal sheets
(vii) Stone
(viii) Cement concrete, and
(ix) All other materials

It will be seen from Table H-II that mud and stone are the two predominant materials of walls used in Goa, Daman and Diu accounting for 49.7% and 27.6% of walls, respectively. Grass, leaves, bamboo, etc. with 7.5% comes in the third, and wood with 7.3% occupies the fourth place. Burnt bricks, cement concrete, G. I. sheets, etc. constitute a small proportion.

Mud is the most important wall material in rural areas (555 per thousand), followed by stone (with 250 per thousand). The position is exactly reversed in case of urban areas. Here, out of every 1000 census houses, 373 are having walls made of stone and 285 made of mud. Other materials like burnt bricks, wood, G.I. sheets, Cement concrete, etc. make a significant proportion in urban areas. Goa district is also having the same trend as regards the construction of material is concerned. Mud is the most common material (538 per thousand) followed by stone (259 per thousand). It is significant to note that in the two districts of Daman & Diu, mud is not at all used for the construction of walls Out of every 1000 census houses in Daman only 18 are having walls of mud. In Diu area not a single house was recorded having mud as the material of wall. The predominant material of wall in Daman is burnt bricks (505 per thousand) followed by material of grass, leaves, reeds, bamboo etc. (446 per thousand). In Diu district, stone is the most important wall material used. Out of every 1000 Census houses wall is made of stone in as many as 921 cases. Next comes the category of walls made of grass, leaves reeds, bamboo etc. (76 per thousand).

Grass, leaves, reeds etc.

3.3 Walls of grass, leaves, reeds, bamboo etc. should generally denote a hut or a cottage. Such houses are usually associated with poverty and backwardness. Comparatively the proportion of such houses in Goa district is insignificant, though it is not so in other parts of the country. Satari and Sanguem talukas in Goa district are having somewhat higher proportion *viz.* 168 and 126 per thousand respectively of such houses. In Daman district however, this is the most important material covering more than 45% of the houses. In Diu district, on the other hand, the importance of this category is much less (8 per cent).

Mud

3.4 In Goa district, mud walls are more a rural feature, though their proportion in urban areas is also quite significant. The age-old practice of using mud for walls in preference to other material is on account of its lower cost and easier availability. It is still believed in rural areas that mud becomes very hard on drying and mud walls are as strong as those of stones. It is significant to note that most of the houses of mud walls are having their foundations made up of stone upto ground level. As said earlier, the importance of this material is entirely insignificant in Daman and Diu districts.

Stone

3.5 Walls of stone are more a feature of urban areas in Goa district. In every taluka of Goa district, the percentage of houses with walls of stone is more in urban areas than of rural areas. Same is true with Diu district except that the variety of stone used there is the black building stone as against laterite stone used in Goa district. Stone is however scarcely used in Daman district as a material of wall. The table below shows the proportion of census houses with stone as material of wall for rural and urban areas of each taluka per 1000 Census Houses.

STATEMENT III.1

Proportion of Census Houses with stone as Material of wall per 1000 Census Houses, 1971

Union Territory/ District/Taluka	Total	Rural	Urban
1	2	3	4
Goa, Daman and Diu . .	276	250	373
Goa District . . .	259	230	376
Tiswadi . . .	301	260	383
Bardez . . .	476	458	578
Pernem . . .	182	171	374
Bicholim . . .	197	190	236
Satari . . .	70	56	232
Ponda . . .	124	99	348
Sanguem . . .	179	173	243
Canacona . . .	92	91	127
Quepem . . .	171	156	351
Salcete . . .	311	263	452
Mormugao . . .	232	167	263
Daman District . .	12	21	3
Daman . . .	12	21	3
Diu District . . .	921	901	987
Diu	921	901	987

Burnt Bricks

3.6 Burnt bricks are more or less an urban feature. However this material has reached the Goa district only in recent years, perhaps on account of its lower cost than that of stone. This could also be seen from a number of brick-kilns which came up in recent years in this district. However, this material has so far not made much headway, forming only an insignificant proportion, *viz.*, 2.4% of the total census houses. On the other hand, this material is predominantly used in Daman district. Over 50% of Census houses in Daman have walls made of burnt bricks, and this proportion increases to 77 per cent in urban areas. It appears that in the 1960 Census, this material of wall was wrongly classified as stone and as such no census house was shown as having walls made of burnt bricks. In Diu district, burnt bricks are not at all used in the construction of walls.

Other Materials

3.7 Other materials like unburnt bricks, wood, G. I. sheets or other metal sheets, cement concrete etc. also play some role, comprising in all over 11 per cent of the total number of census houses Out of these over 7 per cent are having walls made of wood. These houses are mostly huts belonging to the casual workers and are erected temporarily.

Inter Census Comparison

3.8 From subsidiary table H-II.1(A), it is seen that the pattern in usage of material of wall has slightly changed during the last ten years. In rural areas, mud was the predominant material of wall in 1960 Census. Its proportion has slightly gone down, mainly due to the fact that people in rural areas now go for walls of laterite stone or burnt bricks. In urban areas, too, particularly in the five important towns of Goa district, *viz.* Panaji, Margao, Mormugao, Mapusa and Ponda, there is a spectacular increase in the proporion of usage of good material of wall like stone, burnt bricks, etc. However, this increase in the proportion has been nullified in two towns of Margao and Mormugao due to a number of temporary huts of casual labour which have come up on the outskirts of these towns. A comparative statement shown below for the two decennial censuses will indicate that the usage of material is being changed slowly from cheaper to more durable and costlier material, particularly in rural areas.

STATEMENT III.2

Statement showing the Comparison in the Pattern of usage of wall Matterial in Different Talukas for the two Decennial Censuses 1971 (Ratio per 1000 Residential Census Households)

Union Territory/ District/Taluka	Rural Urban	Predominant Material of Wall

8. Pondicherry	634	366	N	722	278	N	488	512	N

Grass, leaves, reeds or bamboo, mud, unburnt bricks, wood are the predominant wall materials in use, in the villages of practically all States of India except the State of Haryana. However their use is somewhat low in the villages of Himachal Pradesh, Jammu and Kashmir, Maharashtra, Mysore and Punjab which, have compared to other States, a larger use of pucca and costlier wall materials like burnt bricks, stone, G. I. Sheets etc. Assam, Manipur, Meghalaya, Nagaland and Tripura are the five States where these (Kuchha) materials are in appreciable use both in the villages and towns.

Among the Union Territories, Andaman and Nicobar Islands, Dadra and Nagar Haveli and Arunachal Pradesh make appreciable use of these materials for the construction of walls.

The use of burnt bricks, G. I. Sheets or other metal sheets, stone, cement etc. as wall-material is practically significant in the rural areas of Gujarat, Haryana, Himachal Pradesh, Jammu and Kashmir, Maharashtra, Mysore, Punjab and Rajasthan. In urban areas, these materials constitute the most important wall material in use of all States except Assam, Manipur, Meghalaya Nagaland and Tripura. The high proportion of these wall materials in the urban areas of two neighbouring States *viz.* Punjab and Haryana are noteworthy. In the Union Territories of Chandigarh and Delhi more than 90% of the houses have walls made of this material. Comparatively in the towns of Goa, Daman & Diu, its percentage is only 50.

Kinds of Material of Roof

3.10 The materials commonly used for roofing have been divided into 8 categories for the purposes of compilation of house-list data and for present analysis. These are :

(i) Grass, leaves, reeds, thatch, wood, mud etc.
(ii) Tiles, slate, shingle
(iii) Corrugated iron, zinc or other metal sheets
(iv) Asbestos cement sheets
(v) Brick and lime
(vi) Stone
(vii) Concrete R. B. C./R. C. C.
(viii) All other materials.

It will be seen from Table H-II.2 that out of every 1,000 Census houses in this territory, the largest number (736) has roof made of tiles either of Mangalore type or country tiles. Roofs of grass leaves, thatch etc. come next (188 per thousand) followed by cement concrete (32 per thousand)

The above remarks hold good for the territory as a whole. Naturally, there are differences between rural and urban areas. The main distinction lies in the use of grass, leaves, thatch, etc. In rural areas they account for as many as 215 per thousand, the corresponding proportion for urban areas being 86 per thousand

only. The difference between the two is also reflected in much higher proportion of cement concrete RBC/RCC. As against 116 Census houses having roofs of cement concrete RBC/RCC in urban areasthere are only 9 per thousand in rural areas. Under "other materials" also tnere is a significantly high proportion in urban areas.

Grass, Leaves, reeds, etc.

3.11 Roofs of grass, leaves, reeds, thatch etc. are generally associated with poor and backward ways of living. Most of the roofs in this category are that of coconut leaves and predominate in the rural areas of Sanguem, Canacona and Satari Talukas in Goa district. Out of total number of census houses 18·8 per cent are having roofs of grass, leaves, etc. 21·5 per cent of which are in rural and 8·6 per cent in urban areas.

Tiles

3.12 Roofs of tiles are sloping roofs and are the most predominant type in this territory. In a majority of cases, particularly in rural areas of Goa district, country tiles which are locally made are used for roofing. Mangalore tiles are more common in urban areas, though in recent years, the new constructions coming up in rural areas are found to be having roofs of mangalore tiles. This is mainly due to certain advantage over country tiles *viz* durability, low maintainance cost, etc. The difference in the prices of the two varieties of tiles is also marginal.

Cement Concrete

3.13 Cement concrete covers RBC/RCC roofs and is naturally an urban feature. Over 77 per cent of all census houses with such roofs are in urban areas. Four major towns *viz.*, Panaji, Mapusa, Margao and Mormugao of Goa district and Daman town of Daman district together form about 72 per cent. In rural areas they make only 23 per cent and are generally associated with well-to-do community.

Nevertheless, tile roofs continue to dominate the scene in urban areas, the cement concrete roofs occupying tne second place. Most of the new constructions which are generally multi-storeyed structures are however having cement-concrete for their roofs. These are distinct signs of a shift in favour of cement concrete roofs and can be considered to reflect a degree of prosperity.

Other Materials

3.14 Corrugated iron, zinc or other metal sheets, asbestos sheets, etc. are rarely used for roofs of residential houses in Goa. This category makes only 3·4 per cent of all census houses in the territory. Its proportion is more in urban areas (7.8%) though in rural areas of two talukas of Bicholim and Sanguem, quite a good number of census houses are having roof material either of corrugated iron sheets or asbestos cement sheets. This is mainly because of the flourishing mining industry in these two talukas which has provided a number of labour tenements with roofs of these materials.

Other roof materials like brick and lime, stone etc. make an insignificant proportion i.e. 1 per cent of the total number of census houses.

Inter-State Comparison

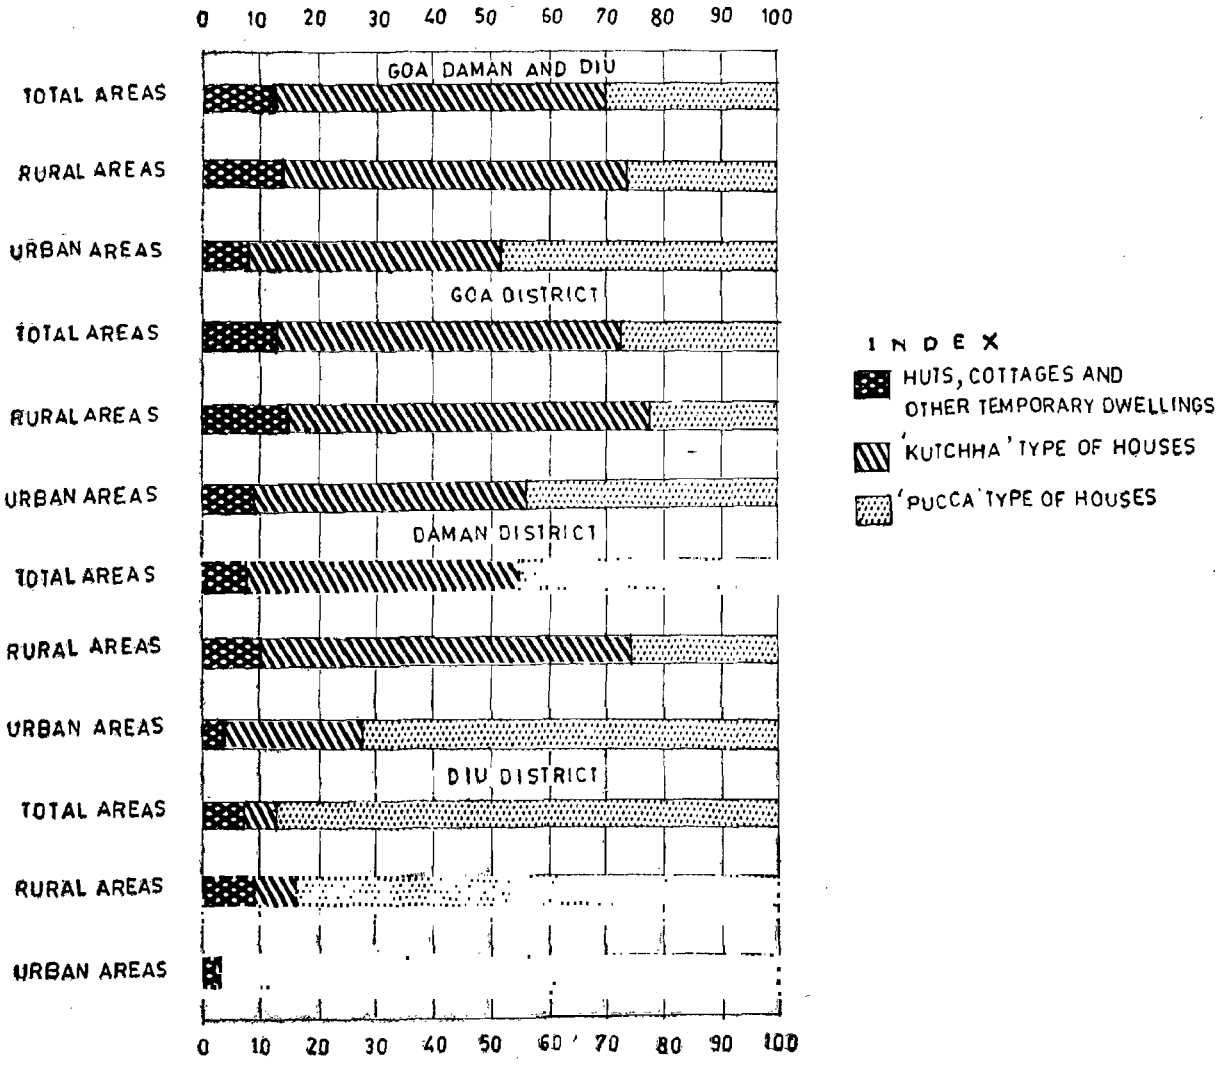

3.15 The position in other States and Union Territories of India is shown in the statement given below :

STATEMENT III.4

CHART SHOWING PERCENTAGE COMPOSITION OF RESIDENTIAL HOUSES ACCORDING TOTHE QUALITY OF HOUSE CONSTRUCTION

So far as rural areas are concerned, tiles, slate, shingle, corrugated iron, zinc or other metal sheets etc. constitute the most common roof-material only in the State of Himachal Pradesh, Gujarat, Madhya Pradesh, Maharasntra and Rajasthan. In the villages of Gujarat and Madhya Pradesh, about 90% of the residential houses have roofs made of tiles, slate, shingle etc. Among the Union Territories, rural areas of Goa, Daman and Diu has the highest proportion (86%) so far as this roof-material is concerned. Delhi comes next with 56% of its roofs made of this material. In Assam, Jammu and Kashmir, Manipur, Nagaland and Tripura more than 80% of the dwellings have roofs made of grass, leaves, reeds, thatch, wood etc. Even in Andhra Pradesh, Haryana, Kerala, Meghalaya, Orissa, Punjab, TamilNadu and West Bengal, their percentage is above 60. Comparatively, villages in Bihar, Himachal Pradesh, Maharashtra, Mysore, Rajasthan and Uttar Pradesh, the proportion of this roof-material is varying from 30% to 58% since these States have a somewhat high proportion of tile-roofs. Among the Union Territories Arunachal Pradesh has the highest proportion (over 90%) of grass roofs. It may be noted here that Goa, Daman & Diu has the lowest proportion (about 14%) among all Union Territories.

In urban areas, the proportion of roofs made of grass, leaves, reeds, thatch or bamboo, wood etc. declines considerably. Even so, it is appreciably high in Andhra Pradesh, Assam, Haryana, Jammu & Kashmir, Kerala, Manipur, Orissa and Tripura where it continues to be the important material. In the towns of the Union Territory of Pondicherry this category of roofs is also quite important. The urban areas of Bihar, Gujarat, Himachal Pradesh, Madhya Pradesh, Maharashtra, Meghalaya, Rajasthan and West Bengal have a fairly high proportion (over 80%) in the category of roofs made of tiles, slate, shingle, corrugated iron sheets cement concrete etc. In the urban areas of the remaining States too, the proportion varies from 40% to 75%. Among the Union Territories, the towns of Goa, Daman and Diu leads in this category (92%) followed by Union Territory of Chandigarh (87%)

Cross Classification of Material of Wall and Roof

3.16 We have so far discussed the classification of Census houses by different materials of walls and roofs separately. We have not shown how the different materials of walls and roofs are actually used in combination with each other. This sort of a cross tabulation, which was not attempted in the earlier censuses, is presented this time in a new table as an appendix to table H-II. This type of cross tabulation will certainly help to reflect more realistically the quality of house construction. Besides, it will throw some light on the degree of prosperity or poverty of different localities in the State, because after all, it is the economic condition of a household which determines the type of house it occupies. No doubt, it is true that factors such as climate, soil, easy availability of construction material etc. exercise considerable influence in some areas in the choice of materials. But this influence is generally limited to the selection of the most suitable material from among the cheaper quality.

In the appendix to table H-II, all residential census houses have been classified into 9 categories, depending on the building material used in the construction of walls and roofs. These categories are—

(i) Houses with *walls* made of grass, leaves, reeds or bamboo, mud, unburnt bricks and *roofs* made of grass, leaves, reeds, bamboo, thatch, mud, unburnt bricks and wood.

(ii) Houses with *walls* made of the same material as in (i) above, but *roofs* made of tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos cement sheets, brick, lime stone and R. B. C./R. C. C.

(iii) Houses with *walls* made of burnt bricks, G. I. sheets or other metal sheets, stone, Cement etc. and *roofs* made of the same material as in (i) above.

(iv) Houses with *walls* made of the same material as in (iii) above and *roofs* made of the same material as in (ii) above

and (v) to (ix) Houses where either the materials of walls/roofs are different than those stated above or they are unspecified.

It is easy to see from above, that the first category of houses should generally denote huts, cottages and other purely temporary structures. Categories (ii) and (iii) together represent semi-permanent structures (kuchha type) built by poor households who cannot afford better type of material for construction. Category (iv) belongs to well-to-do community which can afford to go in for better and costly building material and can be taken as permanent structures (Pucca type).

Proportion of residential houses with different wall and roof materials.

3·17 Of the 1,51,732 residential houses in the Territory, 19,085 or nearly 12.6% are huts, cottages and other purely temporary dwellings, 86,754 or 57.2% are 'kuchha type' of houses and 45,775 or 30·2% are 'pucca built' houses. It is thus seen, that the type of residential houses that predominates in number is the 'kuchha type i. e. houses with mud walls and tiled roofs. In the rural areas too, this category of houses is predominant (608 per thousand) followed by 'pucca built' houses (253 per thousand). The position is almost reversed in the case of urban areas. Here out of every 1,000 residential houses 487 are 'pucca built' and 434 are 'kuchha type'. The proportion of huts and cottages have also declined considerably. As against 139 in rural areas of the Territory, there are only 78 huts or cottages in urban areas. Goa district is also having the same trend as regards the quality of house construction is concerned. Here out of every 1,000 Census houses, 595 are 'kuchha built' and 273 are 'pucca built'. Even in urban areas, 'kuchha built' houses predominate in number. In Daman district the proportion of 'kuchha' and 'pucca' built houses is more or less even *viz.* 467 and 465 per thousand respectively. This remarks holds good for the district as a whole. Naturally there are differences between rural and urban areas of the district. In Diu district, however, it is significant to note that out of every 1000 residential census houses, only 53 are "kachha type and 881 are "pucca" built.' This is mainly because "stone" as the construction material for walls and tiles as roofing material are predominantly used in the building construction both in rural and urban areas of the district. The statement below gives the proportion of huts or cottages and "kuchha" and "pucca" built residential houses for Goa, Daman and Diu and its three districts separately for rural and urban areas.

STATEMENT III.5

Distribution of 1,000 Residential Census Houses According to the Quality of House Construction 1971

Over 50% of the residential houses in the villages of Andhra Pradesh, Assam, Kerala, Manipur, Meghalaya, Nagaland, Orissa, Tamil Nadu, Tripura and West Bengal are either huts and cottages or other type of temporary dwellings. In other States the percentage varies between 6.8 for Gujarat and 49.7 for Jammu & Kashmir. This type of dwellings is also found in the towns of Andhra Pradesh, Assam, Kerala, Manipur, Orissa and Tripura where over 30% of the houses are huts and cottages. The percentage of "Kuchha" type of houses is considerable in the rural areas of Madhya Pradesh (74.3), appreciable in Gujarat, Himachal Pradesh, Mysore, Maharashtra, Bihar and Jammu and Kashmir. This type of "kuchha" houses are also found in the towns of Haryana, Jammu & Kashmir, Madhya Pradesh, Manipur, Meghalaya, Mysore and Nagaland where over 30% of houses are "kuchha" type. The quality of house construction is found to be good in the villages of Gujarat State where 376 in every 1,000 are found to be "pucca" type of houses. Rajasthan and Maharashtra with a proportion of 360 and 310 respectively come next to Gujarat State. The proportion of "pucca" type houses is considerable in the urban areas of all the States except Assam, Manipur, Meghalaya and Tripura.

Among the Union Territories, Goa, Daman and Diu occupies the 4th place so far as quality of house construction is concerned. The first three places go to Chandigarh, Delhi and L. M. & A. Islands.

SUBSIDIARY TABLE H-II.1

DISTRIBUTION OF 1,000 CENSUS HOUSES BY PREDOMINANT MATERIAL OF WALL IN RURAL AND URBAN AREAS SEPARATELY

This subsidiary table is based on main table H-II and gives the distribution of 1,000 Census houses according to the 8 types of predominant material of wall for the Union Territory, districts and talukas separately for total, rural and urban areas.

CHAPTER IV

HOUSEHOLDS AND NUMBER OF ROOMS OCCUPIED

Preliminary Remarks

In this chapter it is proposed to discuss the data presented in Table H-III relating to households classified by number of members and by number of rooms occupied, and the following two subsidiary tables :

H.III.1—Distribution of 1,000 census households according to number of rooms occupied.

H.III.2—Number of persons, males and females per room and persons per household.

The material presented here relates only to family type of households. Institutional households e. g. hotels, boarding houses, hospitals, jails etc. are not included.

Concepts and Definitions

4.2 A room was defined in the houselisting instructions in the following terms :

"A room should usually have four walls with a doorway with a roof overhead and should be wide and long enough for a person to sleep in e. g. it should have a length of not less than 2 metres and a breadth of at least 1½ metres, and a height of 2 metres. Unenclosed verandah, kitchen, store, garage, cattle-shed, latrine, etc. which are not ordinarily used for living and sleeping etc. are excluded from the definition of a room."

No attempt was made to ascertain the size of rooms as this would have made the task of enumerators extremely difficult. No comparison is therefore possible in terms of square feet or cubic feet of habitable space per person or household. The number of rooms available to households and the number of persons per room give a good picture of housing conditions.

Number of rooms per household

4.3 In the main table H-III, all households have been classified into six categories depending on the number of rooms occupied by them. These categories are households with

(i) one room
(ii) two rooms
(iii) three rooms
(iv) four rooms
(v) five rooms and above

and (vi) with unspecified number of rooms.

It is easy to see that the first two categories *viz.* household[s] with 1 room and 2 rooms represent small houses, those with 3 or 4 rooms, medium-size houses and those having 5 rooms or more, big houses.

The distribution of 1000 census households by the number of rooms occupied for Goa, Daman & Diu, *its* districts and talukas, and separately for rural and urban areas, is given in subsidiary table H-III.1. It will be seen that as many as 643 households out of every 1000 in this territory live in smaller houses having 1-2 rooms. In Daman and Diu districts this proportion is much higher *viz.* 861 and 724 per thousand respectively as against 631 in Goa district. These differences in proportions may reflect conditions of relative poverty or affluence to some extent. In the three talukas of Pernem, Satari and Sanguem taken together which are comparatively backward areas, the incidence of households living in small houses, records a high proportion of nearly 820 per thousand. There is a wide range of variation in rural and urban areas of Daman and Diu districts, though this proportion is almost the same for the Goa district as a whole.

The proportion of households living in medium size houses (3-4 rooms) is 254 per thousand for the Territory. Goa district is having high proportion (262 per thousand) as compared to Daman (113 per thousand) and Diu (183 per thousand). Again, this proportion remains the same so far as rural and urban areas of Goa district are concerned. In Daman and Diu districts, the proportion is higher in urban areas than that of the rural areas This should indicate that the housing conditions are much better in urban areas of Daman and Diu districts and that the middle class population reside more in urban areas.

Not more than 103 households out of every 1000 in the Territory live in houses having 5 rooms or more. Again, Goa district is having a high proportion (107 per thousand) as compared to Daman (26 per thousand) and Diu (93 per thousand) respectively. In the three talukas of Tiswadi, Bardez, and Salcete, the proportion of households living in houses having 5 rooms or more is quite significant.

To sum up, a great majority (64.3 per cent) of the households live in small houses followed by households (25.4 per cent) living in medium size houses. The privilege of living in houses with 5 rooms or more is confined to a mere 10.3 per cent of house holds in Goa, Daman & Diu. The district of Goa is better placed so far as the number of households living in medium size and big houses is concerned followed by Diu district. The incidence of such households is much less in Daman district.

Statement below gives the proportion of 1,000 Census households according to number of rooms occupied separately for rural and urban areas of talukas of Goa, Daman nd Diu.

STATEMENT—IV.1

Distribution of 1,000 Cennsus Households according to number of rooms occupied 1971

Union Territory/District/Taluka	Total Rural Urban	Small size households (1-2 rooms)	Medium-size households (3-4 rooms)	Large-size households (5 rooms & above).

Number of Persons per Room

4.4 In the foregoing paragraphs, we have seen how a majority of households lives in small houses having 1-2 rooms. This will give only broad indication of crowding. But for an exact comparison of housing conditions, it is necessary to examine the size of household and the number of persons per room (hereafter called room-person ratio).

From the subsidiary Table H. III.2, it will be seen that for the Territory as a whole, the room-person ratio is 2.15. Urban areas have a slightly higher ratio (2.21) than rural areas (2.13). This is but natural in view of the fact that there is generally more over-crowding in urban areas. However, if we look at the district figures, we will find that this observation does not hold good for all districts. In Daman and Diu districts, the rural room-person ratios are higher.

A comparison of taluka figures would show that in as many as 9 talukas *viz.* Pernem, Bicholim, Satari, Ponda, Sanguem, Canacona, Quepem, Daman and Diu, the rural room-person ratio is higher. In the taluka of Tiswadi, it is equal, while in the remaining three talukas of Bardez, Salcete and Mormugao, the room person ratio is higher in urban areas. A statement showing the average number of persons per room in the 13 talukas of the Territory for the total, rural and urban areas is given below.

STATEMENT IV. 2

Statement Showing number of persons per room in different talukas of Goa, Daman & Diu 1971

Diu District	2·25	2·98	1.15
Diu	2·25	2·98	1·15

Number of Persons per household

4.5 We may now proceed to examine another ratio which has important bearing on housing conditions. It relates to the number of persons per household (hereafter called household-person ratio).

The number of persons per household for the Territory as a whole comes to 5.23 and it varies in the three districts *viz.* Goa (5.21), Daman (5.99) and Diu (5.08). We have already seen that households have been classified into 5 categories and the household-person ratio for each of these categories is given in the subsidiary table No. H.III. 2. As is natural, the household size increases steadily as the number of rooms in its occupation increases. The extent of pressure in living conditions is, however, determined by the room-person ratio, which can be found out for each category of households by dividing the average number of persons by the number of rooms in the category. This will give the room-person ratio for that category which gives us useful insight into the general level of housing conditions and the amount of congestion in households.

Index of overcrowding

4.6 Considering two persons per room as a satisfactory norm of housing accommodation, there is overcrowding in housing conditions in the Territory as a whole as well as its rural and urban areas. While the maximum overcrowding is noticed in the category of single-room households, the pressure goes on diminishing as the number of rooms per household increases. Even in households living in two rooms the position is bad, though considerably better than in single-room households. We find that the position improves radically and there is no overcrowding at all, as we go to households with three rooms and above. Both rural and urban areas are more or less alike in this respect though in urban areas, there is found a slight overcrowding in the households with three rooms also.

The following statement gives the average number of persons per room in different categories of households (classified according to number of rooms occupied) in different talukas for total rural and urban areas.

STATEMENT IV. 3

Number of persons per room in each category of households for total rural and urban areas of different talukas 1971

Inter Census Comparison

4.7 Comparing the data of 1971-Census with that of 1960 Census, we find that there is more overcrowding in the housing conditions in the Territory for each of categories of households. Statement below gives the number of persons per room in each category of households for rural and urban areas of Goa, Daman & Diu for the two decennial censuses.

STATEMENT IV.4

Number of persons per room in each catecory of households for the two decennial censuses 1971

SUBSIDIARY TABLE H-III.2

NUMBER OF PERSONS MALES AND PER FEMALES ROOM AND PERSONS PER HOUSEHGLD

This subsidiary table also is based on main table H-III and gives the number of persons per room and per household for all the households put together and the average number of persons, males and females per household, for the households in each of the categories i.e. those with 1-room, 2-rooms, 3-rooms, 4-rooms and 5-rooms and above. The average number of persons per household is also given separately for households with unspecified number of rooms. This table is presented for the Union Territory, districts and talukas separately for total, rural and urban areas.

CHAPTER—V

TENURE STATUS

Preliminary Remarks

The main data relating to tenure status of Census households will be found in table H-IV—Households classified by size and tenure status. Subsidiary table H-IV.1 shows the distribution of 1,000 households living in census houses used wholly or partly as residence according to size of household.

Concepts and Definitions

5.2. The tenure status is an attribute of a census household and has to be studied in relation to the census house in which the household lives. Occupancy tenure i.e. the nature of right on which a household is occupying the house is classified here only in two categories 'Owned' and 'Rented'. Rent free or caretaker occupancies are included in the rented category. Table H-IV does not show the tenure status of non-residential houses like schools, hospitals, shops, factories etc.

Tenure Status

5.3. In the Territory of Goa, Daman and Diu out of a total number of 1,59,259 households, 1,25,835 (79 per cent) reside in owned houses while 33,424 (21 per cent) reside in rented houses. The distribution of owned and rented houses is, however, widely different for rural and urban areas. In rural areas 86.3 per cent households reside in owned houses and only 13.7 per cent in rented houses while in urban areas only 51 percent reside in owned houses and 49 percent reside in rented houses. Households living in rented houses appear by and large to be an urban feature. This is mainly due to the fact that a substantial portion of the urban population consists of migrants from outside areas (from within the State as well as without) who come for schooling, service, business or other work. Few people really belong to the town and fewer still have the privile ge of owning a house in the town. The position is just the reverse in rural areas. Here, the bulk of the population is engaged in agriculture and for generations they have lived at the same place and owned their houses, no matter how small it is. But even the percentage of 13.7 of rented houses in rural areas appears to be rather high and reflects the incursion of outside elements like the village officials (primary school teachers, Talathis, Gramsevaks etc.) and other petty tradesmen, contractors, etc.

The following statement will show the proportion of owned and rented houses for total, rural and urban areas of Goa, Daman and Diu, its 3 districts and 13 talukas.

STATEMENT—V-1

Proportion of owned and rented houses 1971

Unin Territory /District/Taluka	Total		Rural		Urban	
	Owned	Rented	Owned	Rented	Owned	Rented
1	2	3	4	5	6	7
Goa, Daman and Diu .	79	21	86	14	51	49
Goa District . .	78	22	86	14	48	52
Tiswadi . . .	69	31	82	18	39	61
Bardez . . .	75	25	79	21	51	49
Pernem . . .	95	5	96	4	74	26
Bicholim . . .	77	23	79	21	68	82

STATEMENT—V-1—*Contd.*

Proportion of owned and rented houses 1971

Uuion Territory/ District/Taluka	Total		Rural		Urban	
	Owned	Rented	Owned	Rented	Owned	Rented
1	2	3	4	5	6	7
Satari . . .	91	9	93	7	67	33
Ponda . . .	89	11	93	7	51	49
Sanguem . .	72	28	71	29	77	23
Canacona . .	94	6	95	5	65	35
Quepem . . .	86	14	87	13	82	18
Salcete . . .	81	19	91	9	44	56
Mormugao . .	54	46	82	18	42	58
Daman District . .	88	12	97	3	77	23
Daman . . .	88	12	97	3	77	23
Diu District . .	82	18	87	13	67	33
Diu . . .	82	18	87	13	67	33

From the above statement, it will be seen that tenure status is significant mainly in urban areas alone.

Subsidiary Table H-IV.I indicates that in rural areas out of every 1,000 households, 137 live in rented houses. The proportion of such households is somewhat high in the two talukas of Bicholim and Sanguem which indicates that outside elements have penetrated even in the rural parts of these talukas as a result of the flourishing mining industry in these parts. The distribution of rented households is noticeably low in the rural areas of Pernem, Satari, Ponda, Canacona and Daman Talukas. This fact points towards the essentially agricultural economy of these talukas.

In the case of urban areas, it is observed that 490 households reside in rented houses out of every 1,000 households. In the Goa district there is a large proportion of rented houses. The Panaji town with 61 per cent of the households residing in rented houses tops the list followed by Mormugao town (58 per cent) and Margao town (56 percent). Panaji is the seat of Government as well as headquarters of the District. A large number of State and Central Government Offices is located in this town. Besides, a number of banks and business houses have come up during the last decade, resulting in a sudden rise in the number of office-goers who generally reside in rented houses. The local Government has constructed a number of residential quarters for Government employees. All these facts attribute to the comparatively high percentage of rented houses in the town of Panaji. While Mormugao town is a port town, with a good harbour, Margao is the commercial and shopping centre of the Goa District. A high percentage of rented houses in these two towns are the result of these facts.

Tenure status and Household size

5.4. The tenurial status changes with households of different sizes. The proportion of rented houses is found more in the large

size households. Here households upto 3 persons are considered to be small size households while all the households with 4 persons and above are taken as large size households. Following statement shows the proportion of rented households in different sizes of Households.

STATEMENT—V. 2

Distribution of 1000 Census Households rented according to size of the Household. 1971

Union Territory /District/Taluka	Total		Rural		Urban	
	Small size house-holds	Large size house-holds	Small size house-holds	Large size house-holds	Small size house-holds	Large size house holds
1	2	3	4	5	6	7
Goa, Daman and Diu .	395	605	426	574	362	638
Goa District . .	397	603	431	569	360	640
Tiswadi . . .	324	676	356	644	302	698
Bardez . . .	356	644	378	622	296	704
Pernem . . .	612	388	615	385	603	397
Bicholim . . .	497	503	522	478	390	610
Satari . . .	591	409	612	388	538	462
Ponda . . .	432	568	425	575	442	558
Sanguem . .	533	467	549	460	449	551

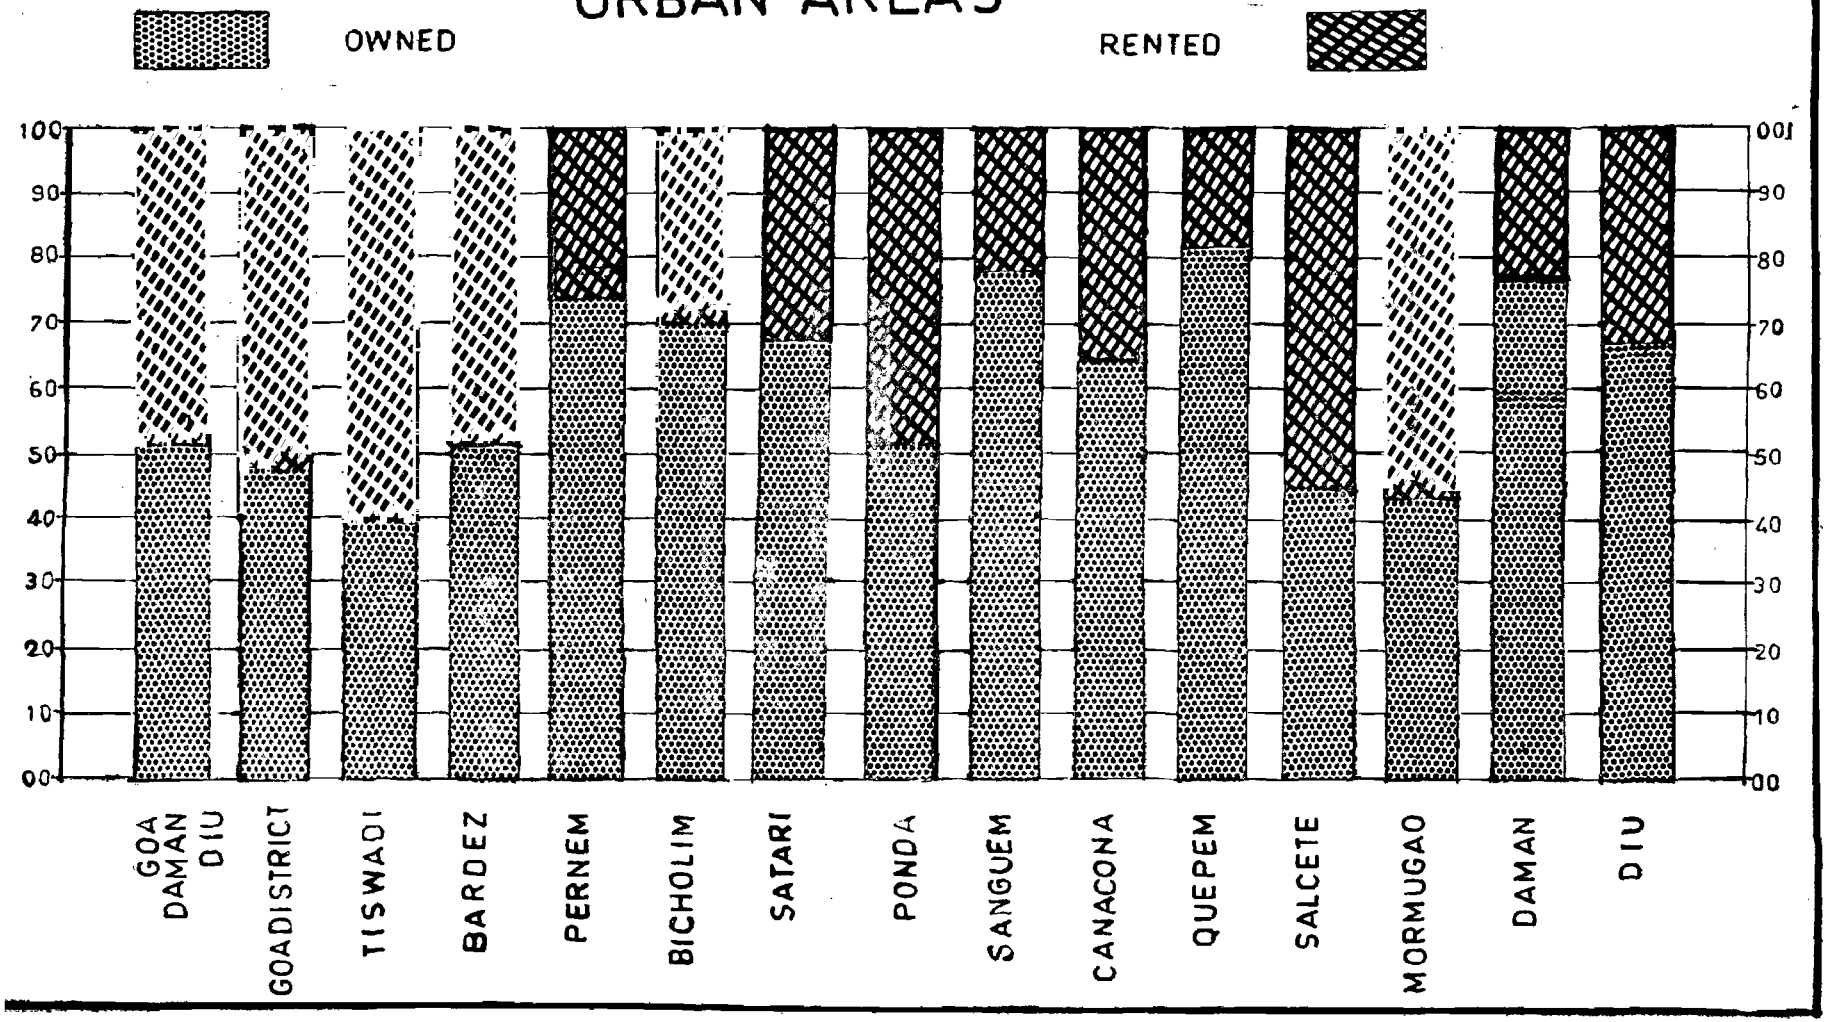

STATEMENT—V. 2—contd.

Distribution of 1000 Census Households rented according to size of the Household. 1971

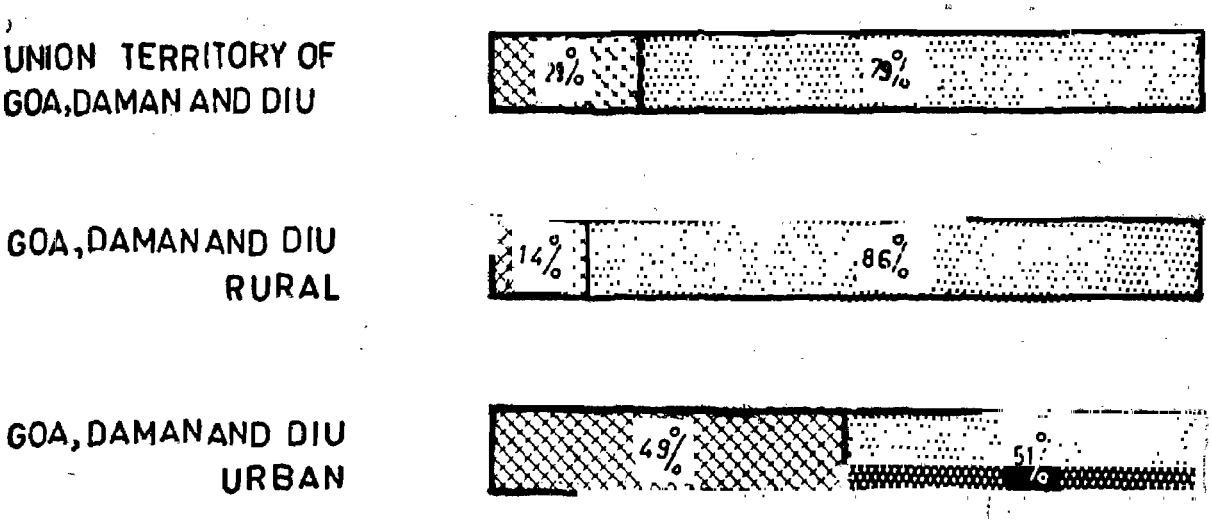

Union Territory /District/Taluka	Total		Rural		Urban	
	Small size house-holds	Large size house-holds	Small size house-holds	Large size house-holds	Small size house-holds	Large size house-holds
1	2	3	4	5	6	7
Canacona . .	542	458	529	471	580	420
Quepem . . .	413	587	414	586	404	596
Salcete . . .	313	687	353	647	290	710
Mormugao . .	435	565	389	611	441	559
Daman District . .	347	653	390	610	340	660
Daman . . .	347	653	390	610	340	660
Diu District . .	368	632	300	700	454	546
Diu . . .	368	632	300	700	454	546

From the above statement, it will be seen that the proportion of rented households is found more in large-size households (households with 4 persons and above) in most of the talukas except the four talukas of Pernem, Satari, Sanguem and Canacona which are rather backward economically and socially when compared to the other Talukas.

SUBSIDIARY TABLE H-IV. 1

DISTRIBUTION OF 1000 CENSUS HOUSEHOLDS LIVING IN CENSUS HOUSES ACCORDING TO SIZE OF THE HOUSEHOLD IN RURAL AND URBAN AREAS SEPARATELY

This subsidiary table is based on main table H-IV and gives the distribution of 1000 households living in Census houses according to the size of household and their tenure status, for the Union Territory, districts and talukas separately for total, rural and urban areas.

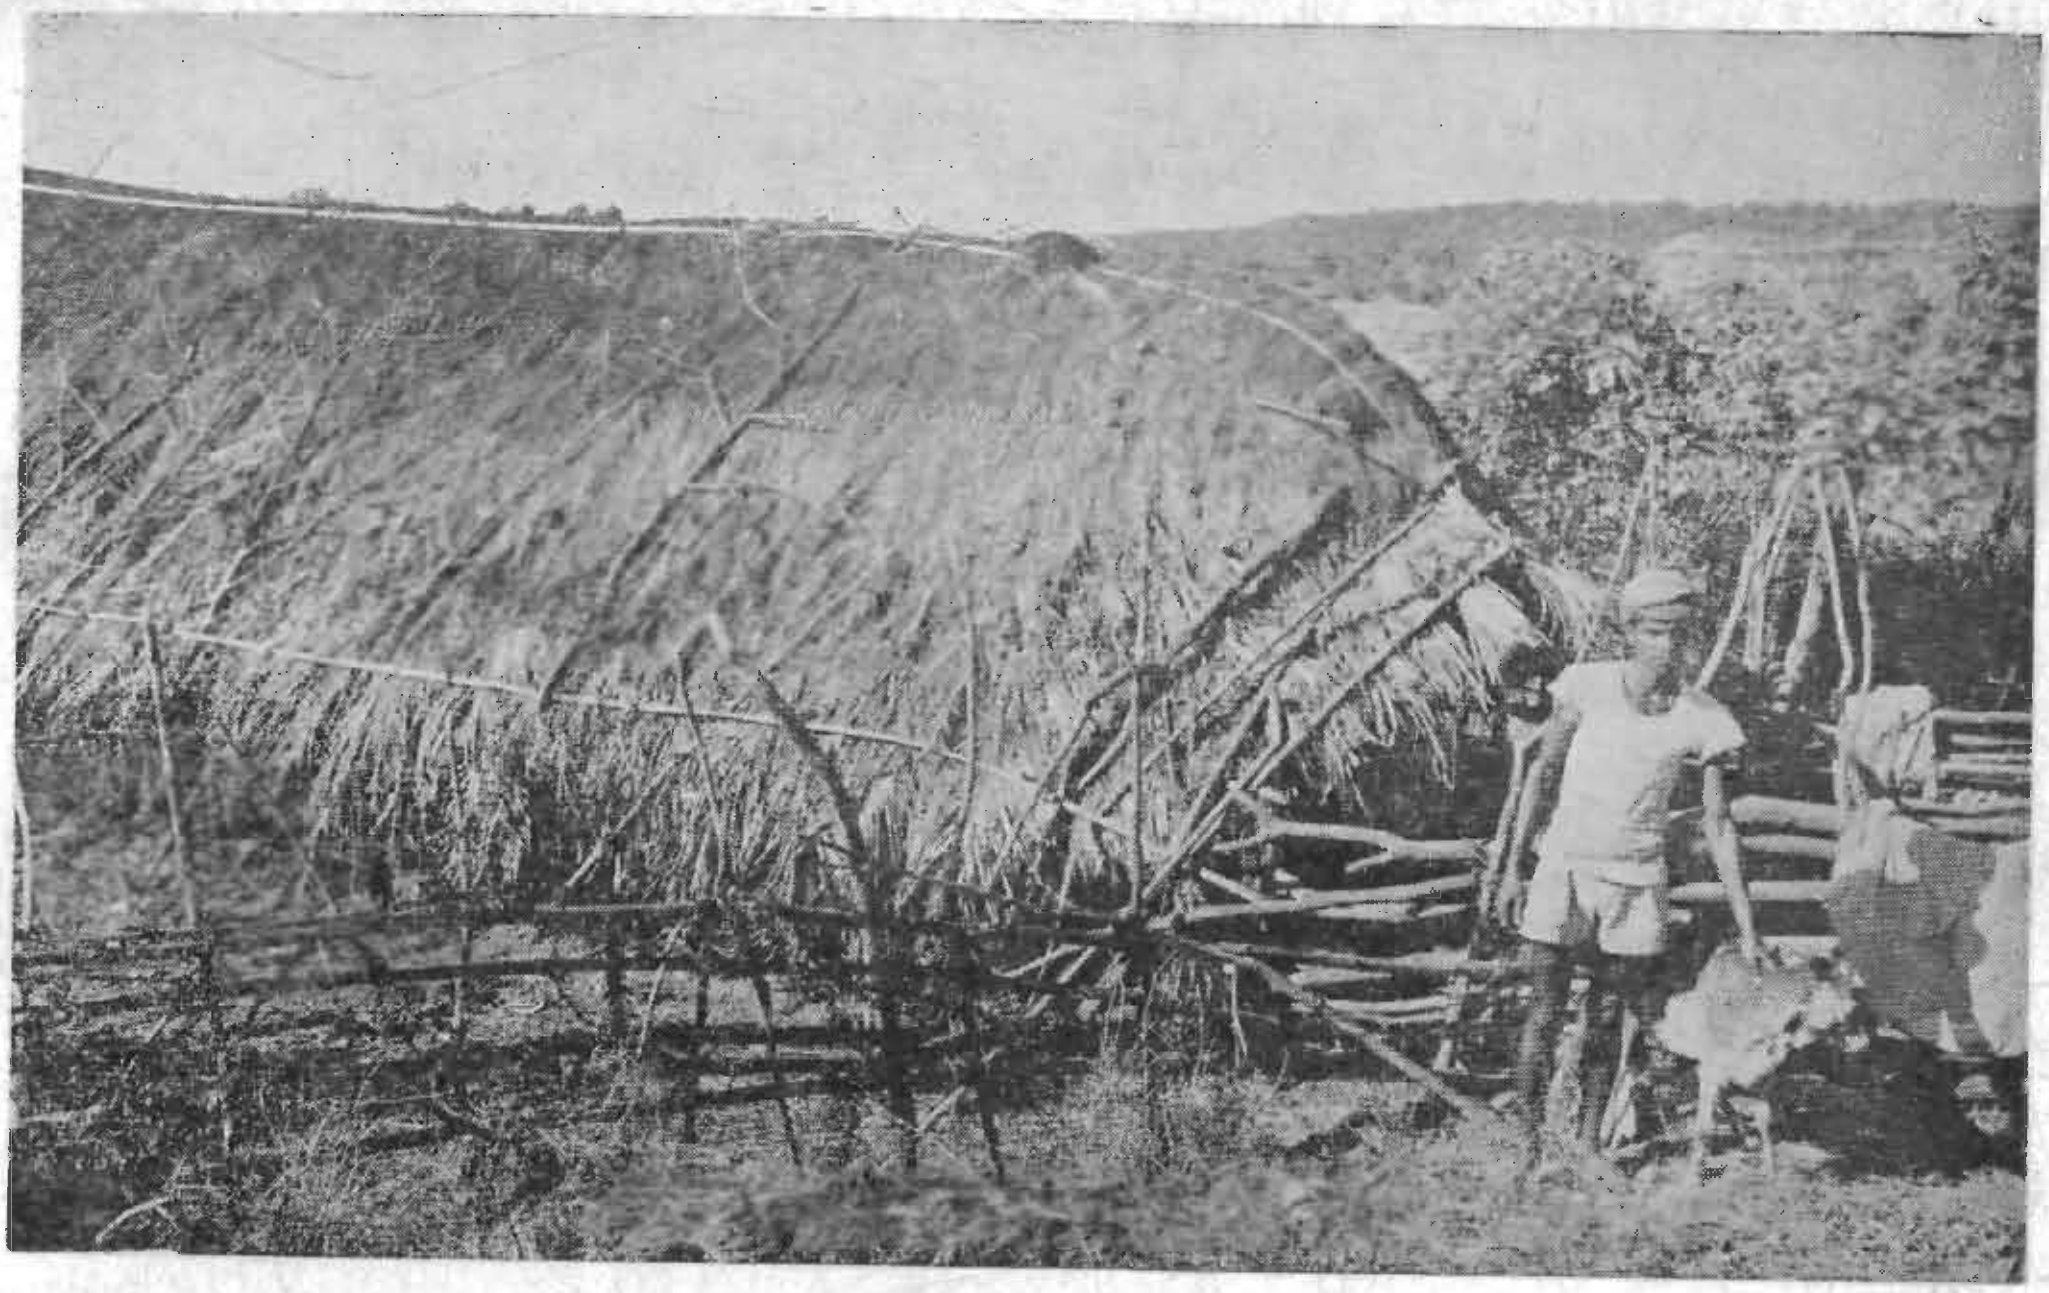

The terms used in this table are explained in detail in para 2 of Chapter V—Tenure Status—of this report.

SUBSIDIARY TABLE H-IV. 1

DISTRIBUTION OF1000 CENSUS HOUSEHOLDS LIVING IN CENSUS HOUSES ACCORDING TO SIZE OFTHE HOUSEHOLD IN RURAL AND URBAN AREAS SEPARATELY.

PHOTOGRAPHS

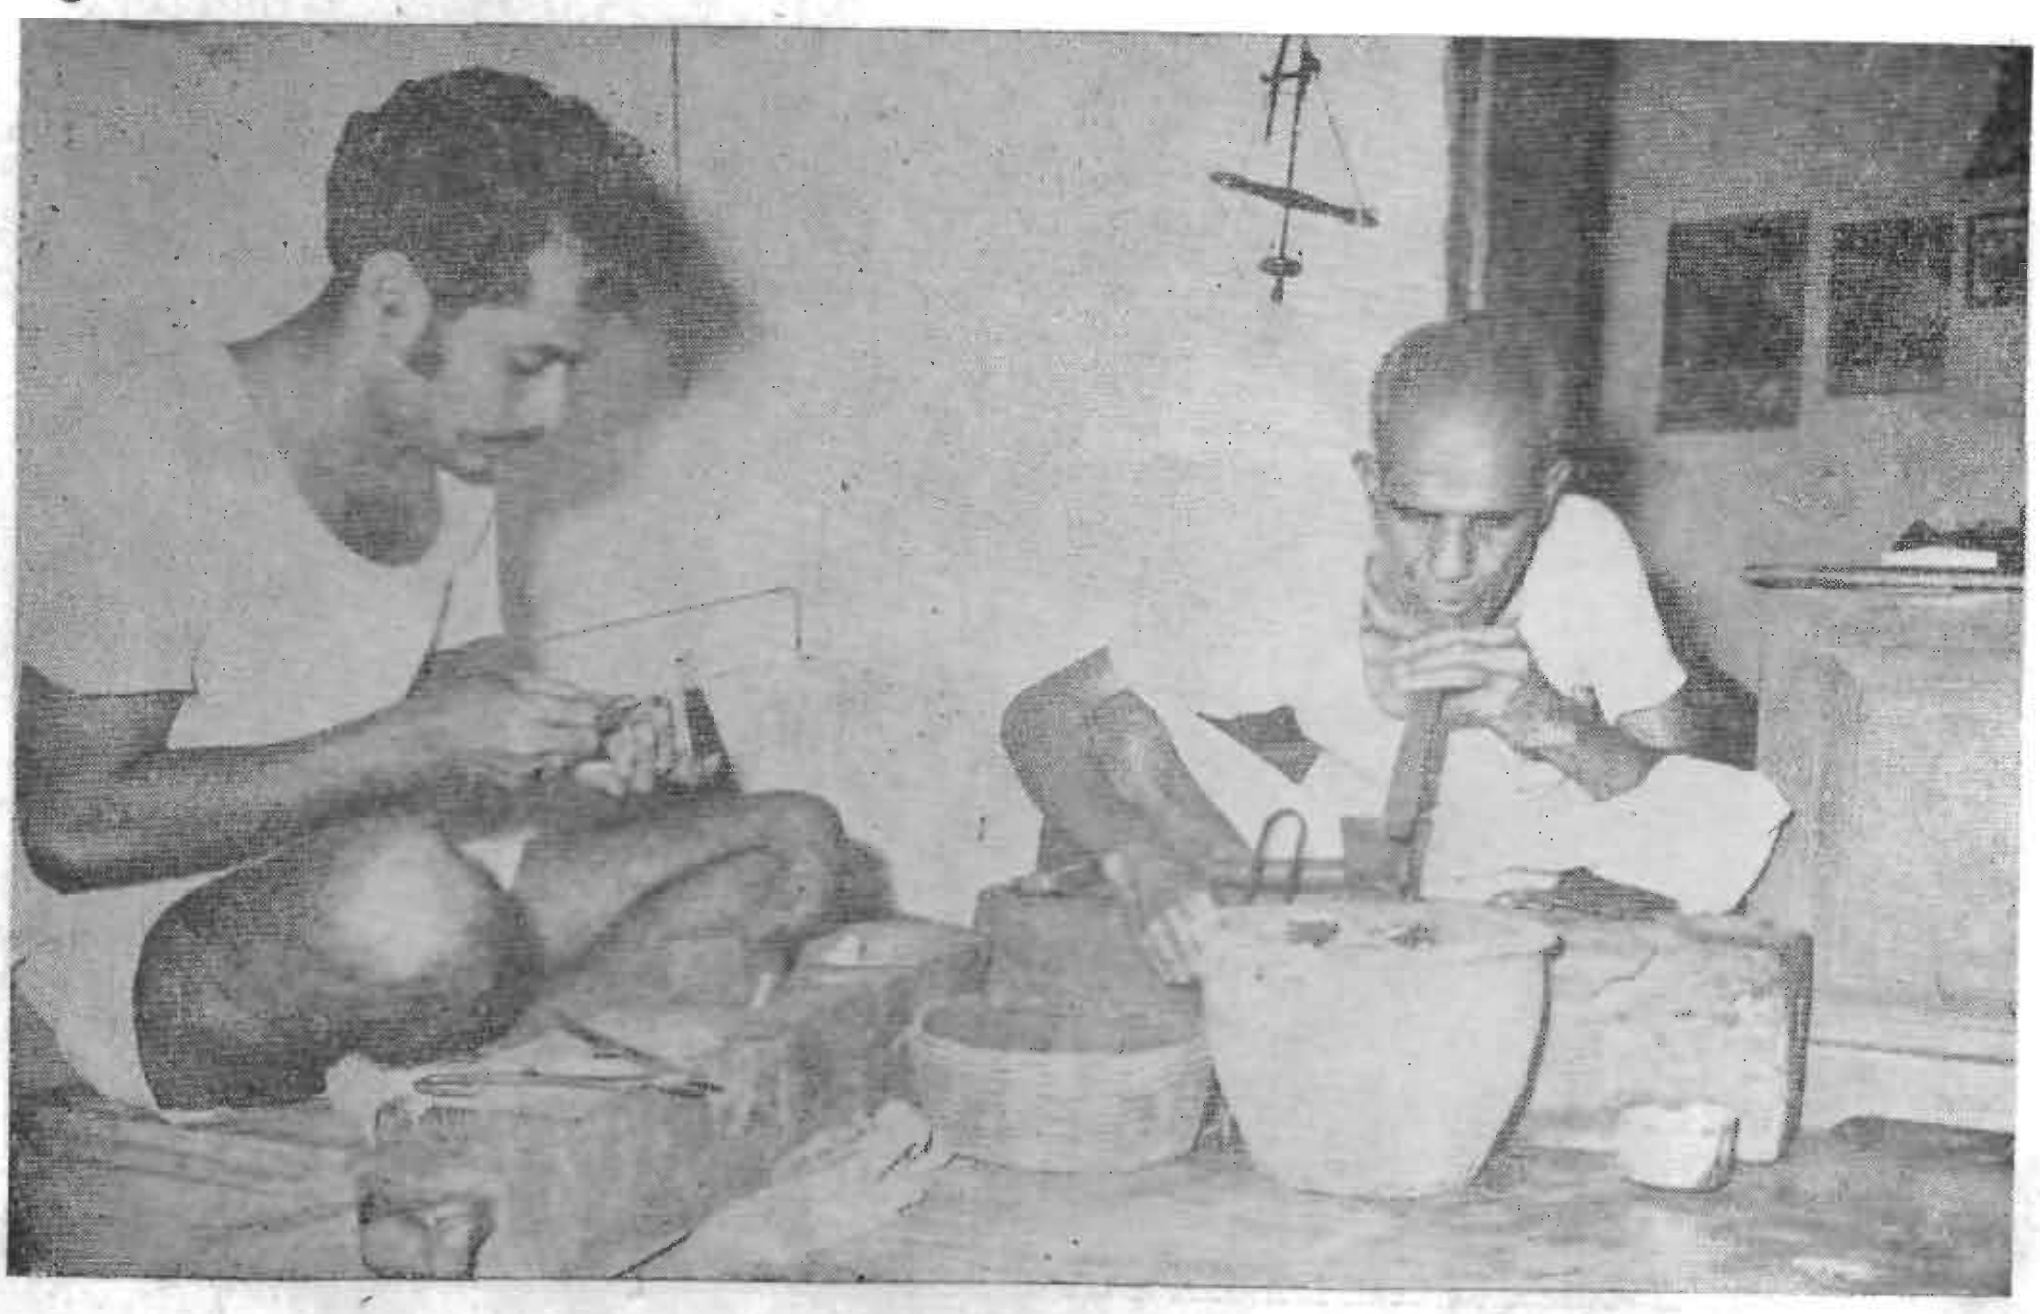

A hut of a shepherd ('Dhangar') household

Typical house of a Hindu family with 'Tulsivrindavan' in the front

A shop-*cum*-residence

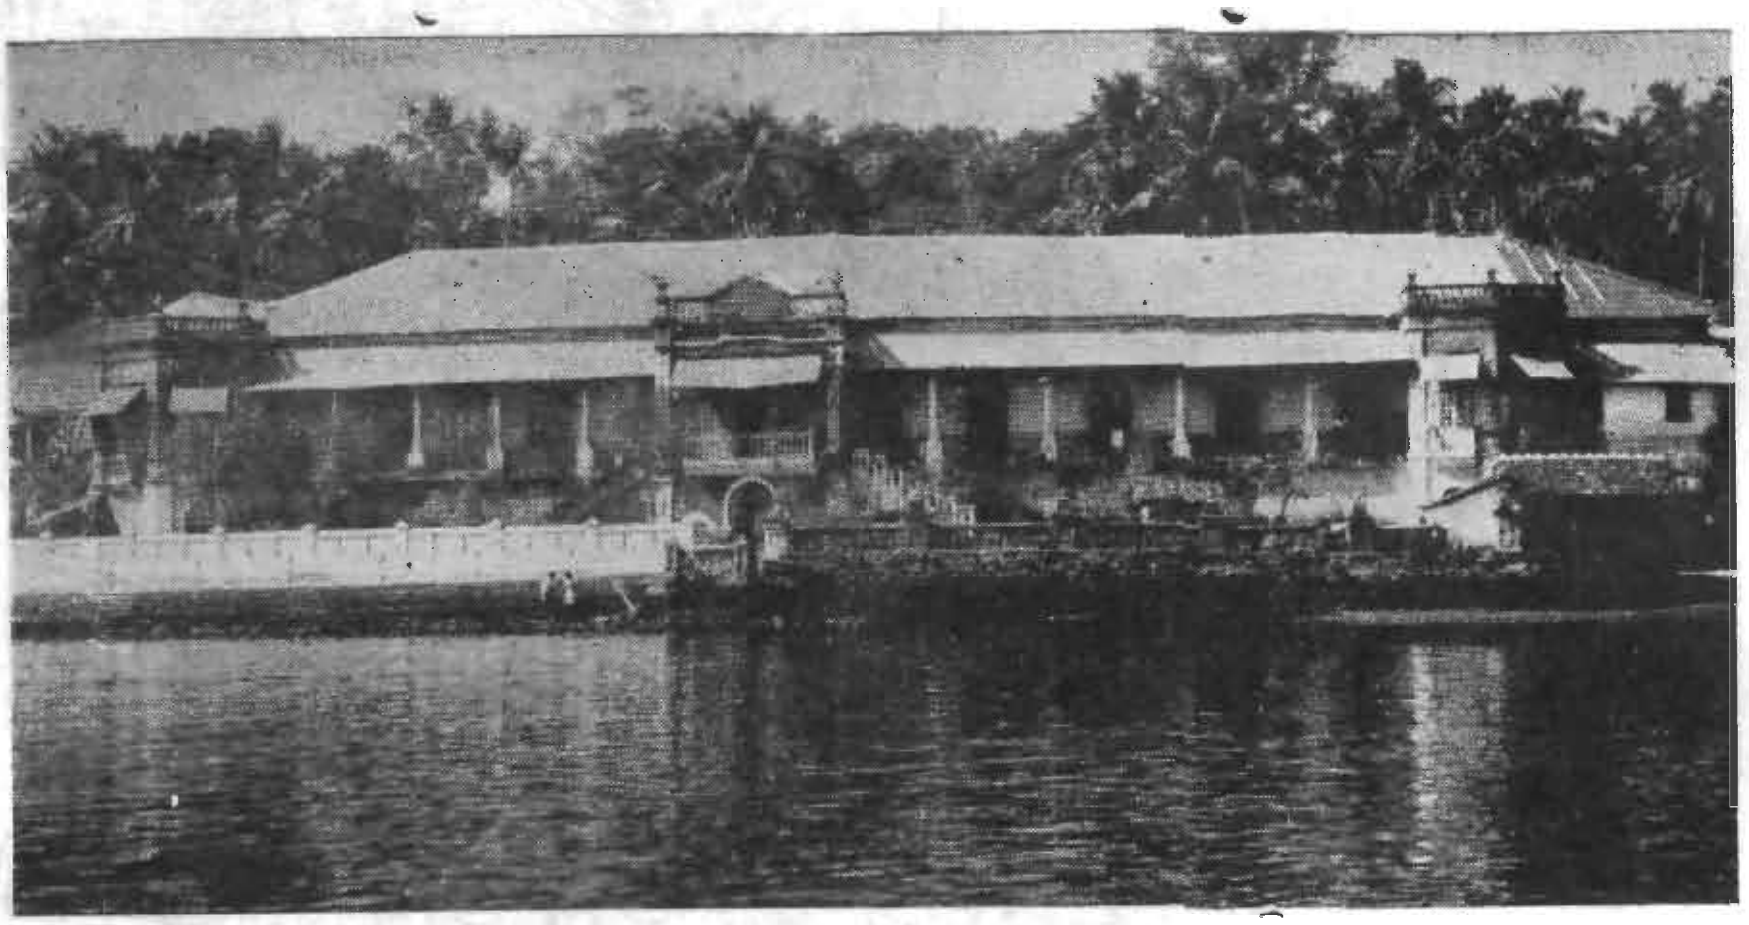

A workshop-*cum*-residence

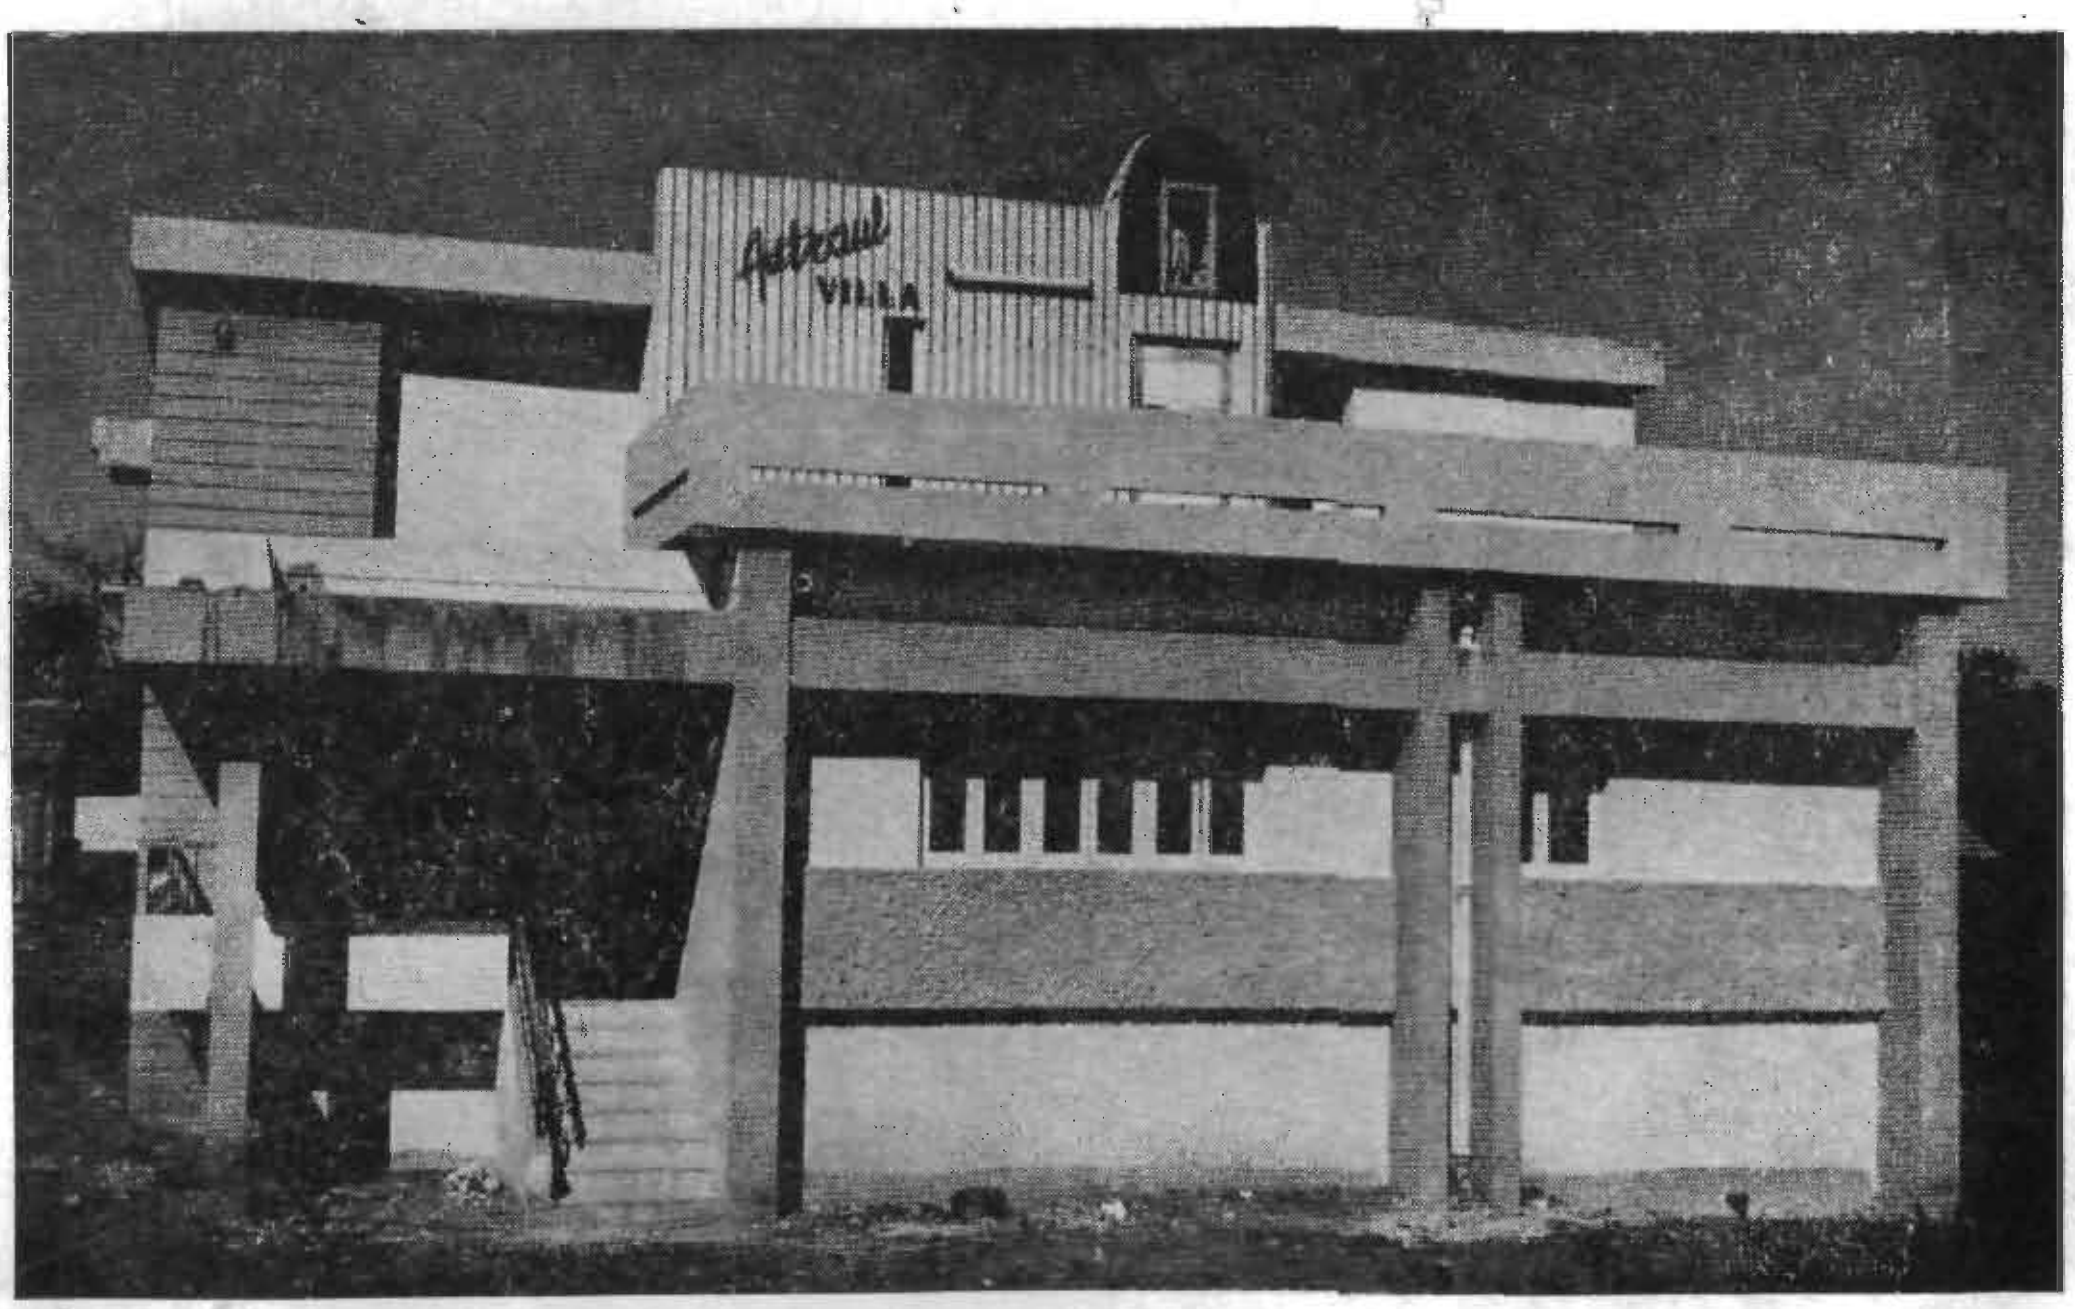

House of a Christian family with a 'Cross' in the front

Residential house of a rich Christian family displaying a mixture of the eastern and western style of Architecture

House on the water-front, common feature in Goa.

A modern house in a village.

['Tourist Hotel']—a multistoreyed building (Many such buildings have come up after liberation in urban areas of Goa)

TABLE H-1

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

TABLE H—1

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

This table gives for the Union Territory, districts and talukas, the total number of Census houses according to the house-list and their distribution according to the 11 categories of uses to which they are put. Vacant houses are treated as a separate class and the number of such houses is also given in the table. The figures for all categories are furnished for total, rural and urban areas separately.

The data presented in Table H-1 and the related subsidiary tables H-1.1 and H-1.2 are analysed and discussed in detail in Chapter II- uses to which census houses are put of the report on housing Part IV of this volume.

TABLE H-I

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

Union Territory /District/Taluka	Total Rural Urban	Total number of Census Houses	Census Houses vacant at the time of House-listing	Occupied Census Houses used as										
				Residence	Shop-cum-Residence	Workshop-cum-Residence including Household Industry.	Hotels, Sarais, Dharamshalas, Tourist Homes and Inspection Houses.	Shops excluding Eating Houses	Business Houses and Offices.	Factories, Workshops and Worksheds	Restaurants, Sweetmeat shops and Eating Places	Places of entertainments and Community Gathering (Panchayat Ghar) excluding places of worship	Places of worship (e.g. Temple, Church, Mosque, Gurudwara, etc.)	Others

TABLE H-II

DISTRIBUTION OF CENSUS HOUSES BY PREDOMINANT MATERIAL OF WALL & PREDOMINANT MATERIAL OF ROOF

TABLE H—II

DISTRIBUTION OF CENSUS HOUSES BY PREDOMINANT MATERIAL OF WALL AND PREDOMINANT MATERIAL OF ROOF

This table seeks to present information regarding the structural condition of the Census house viz. the predominant material of wall and the predominant material of roof separately for total rural and urban areas of the Union Territory, districts and talukas.

The statistics relating to material of wall have been classified into nine categories, while the roof materials of houses were categorised under eight different groups. This table is supplemented with an Appendix which gives cross classification of material of wall and roof used in the residential Census Houses. There is a difference in the two sets of figures viz. cols. 5, 6 and 7 of Table H-I and col. 3 of Appendix to Table H-II. This difference is due to the fact that residence with other uses e. g. school-cum-residence, temple-cum-residence etc. which appear in Appendix to H-II are clubbed with col. 15 'Other' of Table H-I. The incidence of residence with other uses is however very small (0·73%).

The data contained in Table H-II, its Appendix and the related subsidiary tables H-II.1, H-II.1 (A), H-II.2, H-II.2 (B) are analysed and discussed in detail in chapter-III-Material of wall and roof of the report on housing Part IV of this volume.

TABLE

TABLE H.III

HOUSEHOLDS CLASSIFIED BY NUMBER OF MEMBERS AND BY NUMBER OF ROOMS OCCUPIED

TABLE H-III

HOUSEHOLDS CLASSIFIED BY NUMBER OF MEMBERS AND BY NUMBER OF ROOMS OCCUPIED

This table seeks to give an idea of the congestion and over crowding or otherwise in households. It gives the total number of households, the total number of members in them and the total number of rooms occupied by the households. The households are further distributed according to those with 1 room, 2 rooms, 3 rooms, 4 rooms and 5 rooms or more. Information for households with unspecified number of rooms and households with details unspecified are also being shown separately in this table. The number of members by sex in each of the 6 different categories of households is also given. The figures in this table are given for the Union Territory, Districts and Talukas for total, rural and urban areas separately.

The data contained in table H-III and the related subsidiary tables H-III. 1 and H-III. 2 are analysed and discussed in detail in Chapter IV-Households and the number of rooms occupied of the Report on Housing Part-IV of this volume.

The institutional households are excluded from this table.

TABLE

TABLE H-IV

HOUSEHOLDS CLASSIFIED BY SIZE AND TENURE STATUS

TABLE H-IV

HOUSEHOLDS CLASSIFIED BY SIZE AND TENURE STATUS

This table gives the number of households occupying owned/ rented accommodation, for the Union Territory, districts and talukas separately for total, rural and urban areas. The distribution of households in the two categories owned/rented is presented according to the composition of households e.g. households having one person, two persons, three persons etc. Households with number of persons unspecified are also being shown separately in this table. Institutional households are not to be reckoned for purposes of this table.

The data contained in table H-IV and the related subsidiary table H-IV. 1 are analysed and discussed in detail in Chapter-V, Tenure Status of the report on housing Part IV- of this volume.

TABLE H—IV

ANNEXURES

ANNEXURE—'A'

INSTRUCTIONS TO ENUMERATORS FOR FILLING UP THE HOUSELIST AND ESTABLISHMENT SCHEDULE

INSTRUCTIONS—PART I

HOUSELIST

General

Census is a national undertaking of great importance, indispensable to intelligent and efficient public administration apart from the other multifarious ways it serves the scholar, the businessman, industrialist the country's planners, the electoral authorities etc. Census has become a regular feature in every progressive country, whatever be its size and political set-up and they are conducted at regular intervals to fulfil well defined objectives

2. The job entrusted to you, viz., the house-numbering and houselisting is an essential preliminary step to the population census. Apart from mere listing of houses, you will be collecting some essential data in housing, as also separatey on manufacturing, trading and service establishments which will be useful to the country's planners. You have therefore, an important role to play. The quality and quantity of your contribution depends on how well you apply yourself to this task, understand the instruction thoroughly and carry out your responsibilities with the care that it demands.

3. You will be required to prepare lay-out sketches showing the location of houses within the area alloted to you and number all the houses, residential or otherwise and list them and fill up some essential particulars in the shedules given to you. The house-numbering sketches prepared by you may form the basis for a permanent system of house-numbering that may be introduced and maintained by he local bodies concerned in future.

House-numbering and preparation of notional maps

4. *Rural areas:* The first operation will be allotment of distinguishing numbers to each building house and household.

5. Before the actual affixing of house numbers on doors and essential step to be taken is to prepare a rough notional map of the entire village and decide on whether the village should be sub-divided into blocks and if so, how? Normally a small village of less than 125 houses need not be sub divided into blocks. But if a village has one or more hamlets, irrespective of the size, it is desirable to divide the area of the village into blocks so that each hamlet with the adjoining area is recognised as a separate house-numbering block of the village. It is important that the dividing lines between one block and another should be clearly demarcated. Such dividing lines, besides following some natural boundaries whetrever possible should also be indicated by the Survey number that fall on either side of the dividing line in cadastrally surveyed villages. In villages which are not cadastrally surveyed, the line can be indicated by the name of the owners of the fields on either side of the line or by the name of the field, if any. A notional map showing the general topographical details of a whole revenue village particularly if a survey map is already available with the village revenue officials, will greatly help. This notional map should indicate the prominent features and land marks such as the village site, roads, cart tracks, hills, rivers, *nallahs*, etc., Clear demarcation lines of blocks are important so that any to define at the foot of the map the boundaries of a particular block is covered by a specific block without giving scope for any doubt. It may be desirable to define at the foot of the map the boundaries of each block clearly.

6. Having thus prepared the village map, each block of the village as demarcated on the village map should be taken up for a detailed sketching of the layout. In this detailed sketch the emphasis is mainly on the lay-out of the houses on the village site. The sketch should show all the roads, streets and cart tracks. The names of the streets, if any should be shown on these sketches. All topographical details, important features and public buildings should be prominently shown. Then every single building or house should be located on this sketch. It will be of advantage if the *Pucca* and *Kachha* houses are shown by some conventional signs like a square □ for a *Pucca* house and a tringle Δ for a *Kachha* house, further depicting them as residential or non-residential as follows:

□ *Pucca* residential house; for *Pucca* non-residential house shade the square.

Δ *Kachha* residential house; for *Kachha* non-residential house shade the tringle.

It is difficult to evolve a comprehensive definition of the terms '*Pucca* and '*Kachha*' houses to cover different patterns of structures all over the country. The categorisation of the houses as *Pucca* or *Kachha* for the purpose of depicting them on the lay-out sketches is purely to facilitate identification. Also as *Kachha* houses are not likely to be long-lasting, any one referring to the lay-out sketches a few years later can easily distinguish settlement areas which are likely to have undergone a change. For the purpose of the preparation of lay-out sketches, a *Pucca* house may be treated as one which has its walls and roof made of the following materials :

Wall material : Burnt Bricks, stone (duly packed with lime or cement), cement concrete or timber etc.

Roof Material : Tiles, GCI* sheets, asbestos cement sheets, RBC*, RGC* and timber, etc.

*Note : G.C.I.—Galvanized Corrugated Iron, R.B.C.—Reinforced Brick Concrete and R.C.C. Reinforced Cement Concrete.

Houses, the walls and or roof of which are made of materials other than those mentioned above such as unburnt bricks, bamboo, mud, grass reeds, thatch etc., or loosely packed stone, burnt bricks etc. may be treated as *Kachha* houses.

7. When once the location of every building/house is fixed on the plan, it will be a simple matter to decide on a convenient method of numbering the building/houses in one series following certain principles. No hard and fast rule can be laid as to the direction in which the house numbers should run *i.e.*, left to right or in a clockwise order or north-east to south-west and so on. Much depends on the lay-out. So long as some convenient and intelligible order is followed it should be all right. The numbers allotted to each house should be marked on the sketch and with the help of arrow marks at convenient intervals, the direction in which the house numbers run should be indicated. This is particularly important when streets cut across one another and the house numbering series along a street get interrupted. It will be of advantage if the numbers are roughly marked in pencil on this sketch and later verified with the actual state of things on ground to see if the order of numbering indicated on the sketch would be convenient or if any slight changes are needed, for, after all the sketch is only a rough one and the actual state of buildings on ground may suggest a more intelligible order of numbering at some places.

8. Where villages are not cadastrally surveyed and the village boundaries not fixed by survey, it is essential that the limits of each village are defined by some permanent features so that it may be known that any house falling in any such areas may be reckoned along with a particular village.

9. In the forest areas, all habitations are not on settled pattern. There are forest villages which may be just like other revenue villages or *mauzas*. For such villages procedure for preparing normal lay-out plan sketches may be followed. But apart from such villages, there would be clusters of habitations spread out in the forest. It will be facilitating, if for the purpose of netting such clusters a lay-out plan is prepared of the Forest area comprising the lowest administrative unit (such as, beat of a Forest Guard in some States). Then the clusters should be drawn on the lay-out sketch. Name of the cluster should also be written, if there be one. If there be no name then it would be necessary to identify it with reference to any known permanent feature such as a hill stream, a range of hills, road and so on. After drawing the boundaries of such clusters on the lay-out, the location of each of the houses should be indicated on it and number assigned to each house. Habitations (clusters) falling within the area of the smallest forest administrative unit should be taken as one village for the purpose of housenumbering and houselisting

Since it is likely that some of the tribal habitations may change their locations now and then, it is necessary to define the location of a habitation area with reference to any known permanent feature as indicated above in regard to the clusters in Forest areas.

10. *Urban Areas :* The preparation of notional maps and the house-numbering sketches in urban areas should essentially follow the same procedure as in the rural areas excepting that in most urban units the draughtsman of the Municipal Administration might have already prepared town maps perhaps even to scale and these may come extremely useful. It has been found from experience that the boundaries of towns are often times loosely defined and not properly demarcated giving rise to several doubts regarding the areas lying on the outskirts of towns. It is important that the map should very clearly indicate the boundaries by means of definite survey numbers and also other permanent features. Sometimes one side of a road falls within the town limits and the other side excluded as it may be outside the defined boundary of the town. All these should be carefully verified on ground before the maps are certified to be correct by the supervising authorities. Cases of sub-urban growth adjoining the limits of a town and such cases as one side of a street falling outside the limits of a town should be brought to the notice of the superior officers who will have to ensure that such built up areas are properly accounted for within the administrative units in which they fall.

11. But what is essential is that very detailed plans showing the location of every building and census house along every road and street in each ward, locality or *mohalla* of a town should be clearly prepared. In view of the very large number and close location of houses in urban areas it may be necessary to have a large number of sketches each covering a limited area. Each town would probably have already been divided into some permanent *mohallas* or localities or wards. A large map of the entire town indicating the boundaries of each of the sub-units into which the town has been divided should be prepared. On this map, the main roads and other topographical details and important public buildings etc., may be shown for clear identification of the boundaries of each *mohalla*/ locality/ward etc. Next, a skeleton map of each locality/ward or block should be prepared in which all the roads and streets should be clearly indicated and their names also written. Then each building and house should be located on this skeleton map. May be that even a locality/ward may be too large an area to indicate all houses on a single map. In such a case a ward map showing the segments and separate lay-out map for each one of the segments may be perpared and on these segments the buildings and houses should be clearly located and the house-numbers shown. It may be an advantage if the non-residential houses are distinguished from the residential houses as indicated in para 6 of these instructions. Here again [illegible] buildings may be indicated such as say, town-hall, large office building, court building, post office, hospital, school, church, market building etc.

12. As stated earlier most towns may already be having a satisfactory house-numbering system. This need not be disturbed and may be adopted for the purpose of preparation of the house-numbering maps referred to above. The house-numbering can be brought up-to date with the help of these lay-out maps. If there be no proper system of house-numbering in the town, then you will have to assign numbers to the houses in the lay-out sketch(es) of your jurisdiction in the manner indicated hereafter.

Numbering of Buildings and Census Houses in rural as well as urban areas :

13. You have to give numbers to "Buildings" and "Census houses" in all areas. The instructions below will guide you to determine what a building and a census house are for the purpose of houselisting. The building is a readily distinguishable structure or group of structures which is taken as the unit for house numbering. The entire building may be deemed one census house or sometimes parts of it, as will be explained. The objective is to ultimately number and list out all physical units of constructions which are used for different purposes, residential or otherwise.

14. *Building* : A "building" is generally single structure but sometimes made up of more than one component unit, which are used or likely to be used (as dwellings residences) or establishments such as shops, workshops, factories, etc., or as godowns, stores, cattle-sheds etc. or in combination with any of these such as, shop-*cum*-residence, or workshop-*cum*-residence, etc.

15. Sometimes a series of different buildings may be found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and likely to have been built at different times and owned by different persons. In such cases though the whole structure with all the adjoining units apparently appears to be one building, each portion should be treated as separate building and given separate number.

16. If there are more than one structure within an enclosed or open compound (premises) belonging to the same person *e.g.*, the main house, the servant's quarters, the garage etc., only one building number should be given for this group and each of the constituent separate structures assigned a sub-number like 1(1), 1(2), 1(3) and so on provided these structures satisfy the definition of a 'Census House' given hereafter.

17. The buildings should be numbered as follows :

(i) If the locality consists of a number of streets in a village, the buildings in the various streets in village, should be numbered continuously. Streets should be taken in uniform order from North-east to South-west. It has been observed that the best way of numbering is to continue with one consecutive serial on one side of the street and complete the numbering on that side before crossing over to the end of the other side of the street and continuing with the serial, stopping finally opposite to where the first number began.

(ii) In a town/city, enumeration block, the numbering will have to respect the axis of the street and not any preconceived geographical direction like- north-east etc.

(iii) Arabic numerals *e.g.* (1,2,3.....) should be used for building numbers.

(iv) A building under construction, the roof of which has been completed should be given a number in the serial.

(v) If a new building either *Pucca* or *Kachha* is found after the house-numbering has been completed or in the midst of buildings already numbered, it should be given a new number which may bear a sub-number of the adjacent building number, *e.g.* 10/1.

NOTE : These should not be numbered as 10(1) or 10(2) etc. as such numbering would apply to census houses within the same building. On the other hand, 10/1 would mean a separate building that has come up after building No. 10.

18. *Census house* : A "Census house" is building or part of a building having a separate main entrance from the road or common court-yard or stair-case etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for a residential or non-residential purpose or both.

19. If a building has a number of flats or blocks which *are independent of one another* having separate entrances of their own from the road or a common stair-case or a common court-yard leading to a main gate, they will be considered as separate census houses. If within a large enclosed area there are separate buildings, then each such building will be one or more separate census houses. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

20. Each census house should be numbered. If a building by itself is a single census house, then the number of the census house is the same as the building number. But if different parts or constituent units of a building qualify to be treated as separate census houses, each census house should be given a sub-number within brackets to the building number as 10(1), 10;(2) etc., or 11(1), 11(2), 11(3), etc.

21. The order in which census houses within a building are to be numbered, should be continuous, preferably clockwise or in any convenient manner if it is difficult to do it clockwise.

22. The definition of census house may sometimes be difficult of application in its literal sense in the context of varying patterns of structures and their usage. For example, in cities and towns, one does come across a situation when a flat in the occupation of one household as residence may be made up of four rooms or so and all the rooms may have direct entrance from a common court-yard, or a stair-case. In terms of the definition of a census house each of these rooms having entrances from the common stair-case etc., may qualify to be treated as census houses. But it does not realistically reflect the situation of the number of houses. In such case, 'singleness' of use of these rooms alongwith the main house by the household should be taken into account and the entire flat comprising four rooms should be treated as one census house only and assigned one number. If on the other hand each one of these rooms had been separately occupied by independent households and if each portion had separate main entrance then each will be justified to be treated as a separate census house. In a ostel building even if the door of each room in

which an inmate lives opens on to a common verandah or stair-case as it happens almost invariably, the entire hostel building may have to be treated as one census house only. In some parts of the country in the rural areas, the pattern of habitation is such that a single household occupies a group of huts within an enclosed fence which has one main entrance. Each of the apparently separate structures is an integral part of the housing unit as such. In such cases it may be more realistic to treat the group as one census house. Care should be taken to ascertain if only one household occupies such a unit or shared by more than one household. Thus the definition of a census house will have to be applied having due regard to the actual situation in such exceptional cases.

23. It is usual to find in municipal towns/cities that every site whether built upon or not is numbered by the municipal authorities on property basis. Such open sites even if they are enclosed by a compound wall should not be listed for census purposes. Only where a structure with four walls and a roof has come up, should it be treated as a census house and listed. But in some areas the very nature of construction of houses is such that, for example, a conical roof almost touches the ground and an entrance is also provided and there may not be any wall as such. Such structures should of course be treated as buildings and houses and numbered and listed.

24. *Household* : A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be 'one-member household, two-member household or multi-member household'. For census purpose each one of these types is regarded as a "Household". Again, there may be a household of persons related by blood or household of unrelated persons; the latter are Boarding Houses, Hostels, Residential Hotel Orphanages, Rescue Homes, *Ashrams* etc. These are called "Institutional Households".

Each household will be listed according to the instructions that follow (*see* paras 44 & 45) and distinguishing number allotted to each household. As each household will be related to the physical structure of a census house, the household number as such need not be painted on the door of each census house, only the building and census house number will be painted.

HOUSELISTING

25. After the preparation of the notional house-numbering maps and the numbering of the house the next step is to list them in the prescribed form (Houselist)

26. At the 1971 Census, a houselist schedule and an establishment schedule will be canvassed on universal basis. Specimen forms of the schedules to be so canvassed are given at the end of this book.

The following instructions will guide you in filling the houselist:

27. On the top of the houselist form, provision is made to note the name of District with Code No name of Taluk/Tehsil/Thana/Anchal/Island/Code No., name of Village/Town/Code No., name or No. of Ward, *Mohalla*, Enumerator's Block Code No. The entries here are to be filled in by you very carefully. The Location Code is the method by which every village or town in any tehsil or police station in every district of a State is identified by a combination of numbers. For this purpose every district, tehsil or police station village or town/ward/mohalla/enumerator's block in your State would have been allotted code numbers. Your charge Superintendent or the Supervisor would have indicated to you the district, tehsil or police station and the village or town/ward/mohalla/ enumerator's block code numbers pertaining to you. You shall have to enter them in the relevant spaces against the names of the various jurisdictional units. *Please note that the town number is to be given in Roman figures to distinguish it from the village number which will be indicated by Arabic numerals.*

NOTE : Please do not write anything in spaces enclosed by dotted lines in column Nos., 4,5,6,10 and 12. These are meant for writing code numbers in the tabulation offices.

Col. 1 : Line Number

28. Every line in the Houselist is to be numbered serially. The line numbers should be continuous for your block. Arabic numerals should be used for this purpose, *e.g.* 1,2,3,4, etc. .....

Col. 2 : Building No. (Municipal or local authority or Census No.)

29. Before you start houselisting, every building will bear a number. Some Municipal towns may have satisfactory system of numbering the buildings and after preparation of the lay-out sketch of your area, you would have given the same number to the building located on the sketch.

30. There would be cases where the Municipal numbers or local authority numbers are not found satisfactory and there fore you would have given numbers to various buildings by way of updating the numbering or revising it. In any case you would have assigned a number to every building in the lay-out sketch. The third contingency is that numbering did not exist earlier and you have numbered the buildings and assigned them the number on the lay-out sketch and marked them on the building itself.

31. The number which has been assigned in the lay-out sketch in any of the three modes described above and marked or put on the building should be written in this column.

32. If the building has a well-known name then the name of the building should also be recorded in this column in addition to the number of the building.

The purpose of this column is to readily identify every building by the number found on it and by local name if any the building may bear.

33. The attributes of a census house have been described earlier and in accordance with those instructions you would have allotted census house number to a building or to a part of a building.

Col. 3 : Census House Number

34. If there is only one census house in the building, then the number of the census house will be the same as the building number, which will be repeated in this column.

35. If there be more than one census house in a building (as mentioned in paras 19 and 20) *e.g.*, in building No. 10, there are three census houses—then against the first census house, you will record "10(1)" for the second "10(2)" and for the third "10(3)" in this column. Column 2, Building number, will be entered in the first line only against which census house No. 10;(1) would have been mentioned in Col. 3. Column 2 will remain blank against census house No. 10(2) and 10(3).

NOTE : You should *not* indicate them as 10/1 or 10/2 etc. as that would be followed in the allotment of a number to a new building not previously numbered that has come up after building No. 10.

Columns 4-5 : Predominant construction material of census house.

36. In these columns you will have to note the materials of wall and roof.

37. Under this column, the material out of which the major portion of the walls of the house are made, as for example, grass, leaves, reeds, bamboo, unburnt bricks, mud, burnt bricks, stone, cement concrete, timber etc., should be written. Where a house consists of separate structures each having walls made out of different materials, the material out of which the walls of the main portion of the house mostly used for living or sleeping are made, are to be recorded.

Col. 4 : Material of Wall

38. The material out of which most of the outer roofs, exposed to the weather and *not the ceiling* is made *i.e.*, tiles, thatch, corrugated iron, zinc or asbestos cement sheets or concrete, slate, tiles, etc., should be written. In the case of a multi-storeyed building the intermediate floor or floors will be the roof of the lower floor. If the roof is mainly made of bricks, stone etc., and has a mud plaster, cement plaster or lime plaster exposed to the sky, the material of roof in such cases will *not* be "mud" "cement" or "lime respectively but it will be "bricks", "stone" etc., which constitute the fabric of the roof.

Col. 5 : Material of Roof

39. The actual use to which a 'census house' is put is to be recorded here keeping in mind the broad categorisation such as : (these are purely illustrative) ;

Col. 6 : Purpose for which Census House is used *e.g.* residence, shop-*cum*-residence, business, factory, workshop, workshop-*cum*-residence, school, bank, commercial house, office, hospital, hotel etc., or Vacant

(1) Residence, shop-*cum*-residence, workshop-*cum*-residence.

(2) Factory/workshop and workshed etc. Factory should be written if it is registered under Indian Factories Act. A 'workshop' is a place where any kind of production, repair or servicing goes on or where goods and articles are made and sold, but is not large enough to be a factory. It is not necessary that some machinery should exist. Even a place where some household industry (as defined in Para 78) such as say, handloom weaving, *bidi* rolling, *papad* making, toy making etc., is carried on, it should be noted as a workshop here. If it is also used as a residence it should be noted as workshop-*cum*-residence. Make searching enquiry if a house is used for the purpose of production of any goods or engaged in some processing or repairing even on a Household Industry basis as these are not likely to be apparent to a casual observer.

Shop :

(3) Shop: A shop is a place where articles are bought and/or sold or cash or for credit.

(4) Office, business house, bank, etc. Business house is that where transactions in money or other articles take place.

(5) Hospital, dispensary, Health centre, Doctor's clinic, etc.

(6) School and other educational institution.

(7) Hotel, *sarai*, *dharamshala*, tourist house, inspection house, etc.

(8) Restaurant, sweetmeat shop and eating place. (A sweetmeat shop where sweetmeat is being made and sold should be recorded as a Workshop).

(9) Place of entertainment such as cinema house, theatre, community-gathering (Panchayatghar) etc.

(10) Place of worship *e.g.*, temple, church, mosque, gurudwara, etc.

(11) Institution such as orphanage, rescue home, jail, reformatory, children home, etc.

(12) Others *e.g.*, cattle-shed, garage, godown, laundry, petrol bunk, passenger shelter, etc., the exact use to be fully described.

(13) If the census house is found vacant, *i.e.* if no person is living in it at the time of enumeration and it is not being used for any of the purposes listed above, write 'vacant' in this Col. If the census house is locked because the occupants have gone on journey or pilgrimage, then it may not be treated as "vacant", but the use to which it is put recorded here and the fact that the occupants have gone on a journey/pilgrimage, noted in the 'Remarks' column as "House locked, occupants on journey/pilgrimage etc.".

NOTE : The reason for vacany such as 'dilapidated' 'under repair', 'incomplete construction' 'want of tenant' etc., may be recorded in the "Remarks" column.

Definition of an Establishment :

Col. 7 : Is it used wholly or partly as an Establishment? Yes or No.
If yes, enter further details in the Establishment Schedule and indicate the Serial No. of that entry here

40. An "Establishment" is a place where goods are produced or manufactured not solely for domestic consumption or where servicing and/or repairing is done such as factory, workshop or household industry or servicing and/or repair workshop or a place where retail or whole sale business is carried on or commercial services are rendered or an office, public or private or a place of entertainment or where educational, religious, social or entertainment services are rendered. It is necessary that in all these places one or more persons should be actually working. Thus an establishment will cover manufacturing, trade and other establishments where people work.

Examples :

A factory or a workshop or workshop-*cum*-residence or a trading or other establishment, *i.e.*, where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold, or some business is being carried on such as a grocery shop, a *pan* shop, restaurant, bank, hotel, or an office is functioning such as Government office, commercial office, or an institution is being run such as school, college, hospital, dispensary, etc., and where one or more persons are working.

An Establishment may occupy a census house or a group of census houses or a part of a census house.

41. This column applies only in cases where the census house is used as an Establishment as defined above. Sometimes the act of production, processing or servicing may not be apparent especially if carried on as a household industry *e.g.*, when a handloom is located inside a house and is not in operation at the time of enumerator's visit or if some other type of household industry such as *papad* making or toy manufacturing or bidi rolling etc., is done, say in some interior portion of the house. You should make searching enquiries to see if any production, processing or servicing is done or any business is carried on or any institution is being run in any part of the house not readily seen from outside.

If 'Yes' is recorded here, go to the Establishment Schedule and fill up further particulars in that Schedule. Pleas fill in the Serial No. of the entry as given in the Establishment Schedule in this column after 'Yes'.

42. It is possible that some kind of production or processing is undertaken in the house by the members of the household for *purely domestic consumption*. For example, hand pounding of rice, preparation of spices like *haldi* (turmeric), chillies, etc., or say, knitting of woollen garments, embroidery work, loin-loom weaving and so on, means for household use only and not for sale. In such cases, the house should not be treated as an 'establishment'.

COLUMNS 8 to 16

43. These columns will relate to census houses which are used wholly or partly as a residence If herefore, a particular census house is not being used for residential purposes at all even partly, as will be evident from entry in Col. 6, put 'X' in each of the columns 8 to 16.

Col. 8 : Household No.

44. A 'household' is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. It may be made up of related or un-related persons. A cook or a servant living in the house of his employer and taking his food there is part of that household. A hostel where a number of un-related persons live together is an institutional household. So also a Jail.

45. There may be more than one household in a census house. Each household should be given a separate number. This can be done by using the alphabets as (a), (b), (c), etc., as affixes to the census house No. For example, if bulding No. 2 is also a census house and has three households, the household numbers will be 2(a), 2(b) and 2(c). If building number 4 has two census houses, the houses will be numbered as 4(1) and 4(2). If within these houses there are respectively 3 and 2 households then they will be numbered as 4(1) (a), 4(1) (b), 4(1) (c) and 4(2)(a) and 4(2) (b) respectively. If, however, building No. 3 is also a census house and has only one household, the household No. to be entered in this column will be No. 3 only.

6. In the above cases of households Nos. 2(b), 2(c), 4(1)(b), 4(1)(c) and 4(2)(b), there will be no entries against them in Cols. 3 to 7. Cols. 3 to 7 will be filled for the entire census houses, 2, 4(1) 4(2) as the case may be, once. There is no need to repeat Cols. 3 to 7 in each line for which entries are made for more than one household against that census house in Cols. 8 to 16.

47. The name of the Head of each household should be written. The Head of the household for census purposes is a person who is recognised as such in the household. He is generally the person who bears the chief responsibility for the maintenance of the household and takes decisions on behalf of the household. The Head of the household need not necessarily be the eldest male member, but may even be a female or a younger member of either sex. You need not enter into any long argument about it but record the name of the person who is recognised by the Household as its Head. In the case of institutions like boarding houses, messes, chummeries which should be regarded as households of un-related persons living together and which may be called Institutional Households, the manager or superintedent or the person who has administatrive responsibility or who by common consent is regarnded as the Head should be recorded as the Head of the household. In the case of an absentee *dejure* 'Head', the person on whom the responsibility of managing the affairs of the household falls at the time of enumeration, should be regarded as the Head.

Col. 9 : Name of the head of household.

48. You will have been furnished with a list of Scheduled Castes and Scheduled Tribes notified your area. Ascertain if the head of the household belongs to a Scheduled Caste or a Scheduled Tribe and check whether the Caste/Tribe is scheduled as per your list. If so.

Col. 10 : If S. C. for S. T., write name of caste/ tribe

for Scheduled Caste write "S.C." and record name of caste,

for Scheduled Tribe write "S.T." and record name of tribe,

for others write "X"

For a household belonging to Scheduled Caste, check religion of the head of the household. He or she should be either a Hindu or a Sikh. There cannot be a S.C. in any other religion. Scheduled Tribes my belong to any religion.

49. In a case where the head of the household belongs to Scheduled Caste/Scheduled Tribe even if any other member of the household (except institutional households) does not belong to SC/ST then write SC/ ST as the case may be and mention the Caste/Tribe to which he belongs. On the other hand if the head does not belong to SC/ST but any other member of the household does belong to SC/ST ; write 'X' in this column.

In the case of all 'Institutional Households' write 'X' in this column irrespective of whether the head belongs to a S.C./S.T. or not.

51. A room should have four walls with a door way with a roof over head and should be wide and long enough for a person to sleep in *i.e.*,, it should have a length of not less than 2 metres and breadth of at least 1½ metres, and 2 metres in height. An enclosed room, however, which is used in common for sleeping, sitting, dining, storing and cooking etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located which are not normally usable for living or sleeping etc., are excluded from the definition of a room for the purpose of this column.

Col. 11 : No. of living rooms in the occupation of Census Household

52. If there is only one household in a census house the counting of rooms will not be difficult. But if a census house consists of a number of households, the number of rooms occupied by each household has to be entered against the name of each Head of household. In cases where a room is occupied by more han one household or they share more than one room, the number of rooms should be given together against a bracket as common to such households.

53. One is likely to come across conical shaped hut or tent in which human beings reside. In such mprovised accommodation, there will be no four walls to a room and, therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., may in itself be construed to be a room.

54. If a household is occupying a census house owned by itself and is not paying anything to anybody in the form of rent then the household may be considered as living in own house. This should be recorded by 'O'. A household living in a flat or a house taken on 'ownership' basis on payment of instalments, should be regarded as living in its own house notwithstanding that all instalments have not been paid.

Col. 12 : Does the household live in owned or rented house (i) Owned (O), (ii) Rented (R)

55. If the household lives in rented house write 'R'. A housing unit is rented if rent is paid or contracted for, by the occupants in cash or in kind. Where an owner permits a household to live in a house, rent free even then the household should be treated as living in a rented house. For example, rent-free accommodation provided to employees by Government Institutions, Companies, etc. In such cases, you should treat the house as rented and write 'R'.

56. Enter the number of males normally residing in the household in column 13; females in col. 14 and total number of persons in column 15 (Col. 13+ Col. 14).

Cols. 13 to 15 : No. of persons normally residing in census household on day of the visit of the enumerator

57. In these columns normal residents are to be recorded even though some of them may be absent on the day of enumerator's visit. Casual visitors should be excluded as they will be considered at their respective places of normal residence. But a person who has stayed with the household for a period of 3 months more should, however, be included. Correspondingly, normal residents absent for over 3 months or more or should be excluded from the household in which they normally reside.

Total of these columns should be struck at the end of each page and after completion of houselisting grand total of the block should be struck at the bottom of the last form.

Col. 16 : Does the household cultivate land ? (Yes or No)

58. If the household is cultivating any land then you have to record the answer 'Yes' otherwise 'No. For determining whether a household is cultivating or not, it should be necessary to ascertain if one or more persons in the household are engaged in cultivation of land or supervision or direction of cultivation of land owned or held from Government or from private persons or Institutions for payment in money, kind or share. Enchroachers who cultivate land encroached upon will be regarded as cultivating households for the purposes of this column. If the household has a visitor who cultivates land elsewhere, it cannot be deemed that the household as such is a cultivating household, unless the Head/or other members of the household are engaged in cultivation of their own, the household should not be reckoned as a cultivating household. A household whose members merely work on somebody else's land for wages should not be treated as a cultivating household.

Col. 17 : Remarks

59. If there is an entry in Col. 6 as "Vacant", you have to record the reason such as "dilapidated" "under repair", "incomplete construction", "want of tenant" etc. in this column.

60. After you have completed filling up of the houselist for your block, you will prepare a duplicate copy of the houselist, for which you would be given adequate number of blank forms.

INSTRUCTIONS TO ENUMERATORS FOR FILLING UP THE HOUSELIST AND ESTABLISHMENT SCHEDULE

INSTRUCTIONS—PART II

ESTABLISHMENT SCHEDULE

61. Instead of loading the main Houselist form itself with questions pertaining to Estalishments, it has been decided to have a separate schedule in which particulars of each establishment are to be recorded. (See] the Establishment Schedule on page 355).

62. The term "Establishment" has been defined in para 40 of this booklet. You are requested to study it carefully, before filling the 'Establishment Schedule'.

63. *The respondents should be fully assured that the information collected in these schedules will be treated as completely confidential and is meant for statistical purposes and will not be used as evidence against any individual or establishment for any purpose. The respondents should be encouraged to furnish truthful replies without any reservation.*

64. At the top of the schedule provision is made for noting the Location Code No. and name of the areas concerned. This should be the same as those noted on the top of the Houselist which you will be canvassing simultaneously. You should fill the Location Code Nos. etc., correctly.

65. The columns of the Establishment Schedule can be classified into four broad groups :

(i) Columns 1 to 5 are of uniform applicability and entries have to be made in respect of all the establishments;

(ii) Columns 6 to 8 pertain to manufacturing, processing, etc.—establishments;

(iii) Columns 9 to 10 relate to trading establishments; and

(iv) Column 11 refers to "other" Establishments which are not covered in columns 6 to 10.

Thus, it will be seen that the columns falling within groups (ii) to (iv) are mutually exclusive, while those in group (i) are common to all.

66. In this column the establishments are to be entered one after another serially. Arabic numerals should be used for this purpose, *i. e.*, 1,2,3 etc.

Col. 1: Sl. No.

67. The Census house number to be noted is the same as that in column 3 of the Houselist and against which 'Yes' is written in column 7 of the Houselist indicating that the Census house is used as an establishment.

Col. 2 : Census House No.

68. A point to be noted here is that it is likely that a single factory or workshop may be spread over more than one Census house adjoining one another. Therefore, while in Col. 2 of this schedule a number of Census houses may be noted in respect of that particular unit of production, processing or repairing, trade or business etc., the entries in Col. 3 onwards will be one only for that group of houses covered by a single unit of production or business etc. establishment. For example, if a single tea factory in Assam or business establishment in Calcutta should be spread over two or three adjacent buildings, each of the buildings should not be shown as a separate factory or establishment but the House Nos. of all these buildings shown in Col. 2 should be bracketted together and the particulars of the single tea factory or establishment entered in the subsequent columns against this group of houses. If on the other hand the activities of a large firm or an office are carried on in buildings located far away in different localities, each of the Census houses in the different localities will have to be treated as a separate establishment and the particulars of the establishment relating to that particular Census house should be listed in this schedule.

69. In this column write the name of the establishment in the case of factories, large manufacturing concerns, a shop or business establishment, banks, office etc. which usually bear a distinct name. Where an establishment has no separate name as in the case of small workshops and establishments like confectionaries, small tea shops, Dhobi's establishment, household industries etc. write the name of the owner as "So and so's Halwai shop" etc. This is to help easy identification.

Col. 3 : Name of the Establishment or of the proprietor

70. Enter here whether establishment enumerated belongs to public sector *i. e.*, Govt./Quasi Govt. managed, including establishments run by local authorities, or to private sector, or a co-operative enterprise. Please do not write in the column only (a) or (b) or (c) but write

Col. 4: Is the Estabilsh ment (a) Govt./Quasi Govt. (b) Private(c) Co-operative Institution

(1) "Govt.—Public Sector, or Quasi Govt.— Public Sector, or Local Authority—Public Sector

(2) Private

or

(3) Co-operative.

There may be many schools or libraries etc. which are not owned by any particular individual or group of individuals. These may be owned by people in general and managed by Managing Committees. Such etstablishments should be treated as "private" as distinguished from Govt./Quasi Govt. or run by local authorities or co-operative enterprises.

71. An establishment will be treated as a Govt./Quasi Govt. institution if the Central or State Govt. or a Local Authority such as the Zilla Parishad, City Corporation or Municipality etc. completely owns or has a majority of shares as to control the management of the establishment.

72. Private establishments are those owned and managed by private individuals or corporate bodies not being co-operative institution or Govt. or Quasi Govt. Institutions.

73. Establishments registered under the co-operative Societies Registration Law of the State, alone fall in the category of "Co-operative".

Col. 5 : Average number of persons working daily last week or in the last working season, including proprietors and/or family workers.

74. In this column, the information has to be entered relating to the total number of workers including the apprentices, paid or unpaid and also including owner(s) or proprietor(s) of the establishment and any of their family members if they also work in the establishment and also the hired workers, if any. It is not necessary that an establishment should necessarily have paid workers. A small shop run in the same house where the owner lives and the business is attended to by just one person of the household is also an establishment. The average number of persons working per day in the establishment during the week preceding the day of your visit should be recorded. For computing the average number of persons working per day 'if the establishment remained closed owing to holiday etc., such day(s) should be ignored and only the 'days' on which the establishment worked should be taken into account. If during the week preceding your visit, the establishment remained closed either due to strike or lock-out, the week during which the establishment worked preceding such strike or lockout should be taken into account for reckoning the average number of persons working. The hired workers should normally be in full time employment.

75. Some establishments such as a sugar factory, rice mill etc. may be seasonal in character and may not be actually working at the time of the present listing. You should then ascertain the particulars of such establishments with reference to the last working season.

76. In case more than one product is produced, or more than one item of business is conducted or several types of services are rendered, it is not necessary to enquire the number of persons employed in the production/business/servicing of each type of product, business or service that is covered against that serial number. For example in a large textile mill there may be the weaving section, dyeing section, laboratory, repairing section, sales section etc. It is not necessary to ascertain the employment in each section. The employment has to be ascertained. The major activity of the establishment will be described in subsequent total columns.

"Columns 6, 7 and 8:—If any manufacturing processing or servicing is done".

77. These columns relate only to such establishments in which goods are manufactured or some kind of processsing or servicing is done and/or repairs are carried on.

Col.6 : Is it (a) Household Industry (b) Registered Factory (c) Unregistered workshop.

78. *Household Industry : Definition*

A 'Household Industry' is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas, and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

79. Thus, there are four ingredients of a household industry :—

(i) nature of activity

(ii) participation

(iii) location

(iv) size

80. (i) *Nature of activity*:—A Household industry should relate to production, processing, servicing, repairing, or making and selling (but not merely selling) of goods. It *does not* include professions such as a pleader or doctor or barber, musician, dancer, washerman (Dhobi), astrologer etc. or merely trade or businesseven if such professions, trade or services are conducted at home by members of household.

81. (ii) *Participation*:—The Head of the household and/or one or more members of the household must participate in such an industry. If it is run primarily by hired labourers, the 'participation' ingredient of the household members will not be satisfied and it will not be a 'Household Industry'. The industry may run with the help of hired workers but the head and/or members of the household must be mainly participating in the industry and not solely dependent on hired workers. Besides "actual work", participation also includes "supervision and direction".

82. (iii) *Location*:—The industry should be located within the premises of the house where the household lives in urban areas; if it is situated at a place other than at home, it will not be termed as household industry in urban areas. In rural areas, however, the industry may be either at home or anywhere within the village limits. In rural areas, even though, the industry is not situated at home, there is a greater possibility of the members of the household participating in it if it is located within the village limits.

83. (iv) *Size.*—The industry should not be on the scale of a registered factory. Irrespective of the location and participation by the members of the household, if the industry or workshop is registered under the Factories Act, then it will not be a household industry.

84. Thus it will be clear that any industry which can be termed as 'Household Industry' must satisfy all the four ingredients mentioned above.

85. (b) *Registered Factory:*—A factory which is registered under the Indian Factories Act should be treated as a "Registered Factory". Any other workshop merely licenced by the Municipal or any other authority or registered for any other purpose should not be treated as a registered factory unless it is registered under the Indian Factories Act.

86. (c) *Unregistered Workshop:*—Workshop is a place where some kind of 'production' processing servicing, repairing or making of goods for sales is going on. A Workshop which is registered under the Indian Factories Act should be treated as a registered factory and others as unregistered workshops. Workshops which are run as household industry should be treated as household industry and entered as such.

87. When you come across an establishment where some kind of manufacturing, processing or servicing etc., is done, you should ascertain whether it is a Household Industry or a registered factory or a workshop not registered under the Factories Act and write whatever it actually is in this column. Please note that workshops merely licenced or entered in the registers of a local authority are not to be considered as registered factories unless registered under the Indian Factories Act. All workshops other than household industries and not registered under the Indian Factories Act should be treated as unregistered workshops even if they are merely licenced as workshops by the local authorities. Please do not write (a) or (b) or (c) in the column but write "Household Industry", or "Registered Factory" or "Unregistered Workshop", as the case may be.

Col. 7 : Description of the products, processing or servicing done.

88. The description of the actual work relating to product, processing and servicing which is done in the Household Industry, factory or workshop that is being listed is to be recorded here, *e.g.*, handloom weaving, lace knitting, *oil ghani* etc., manufacturing of G.I. pipes, electroplating, motor or cycle repairing, iron foundry, paper making or book binding, printing and dyeing, shoe making, sweetmeat making etc. If in any establishment more than one article is produced or more than one kind of processing or servicing or repairing is done, indicate only the major kind of products or processing or repairing or servicing etc.

Col. 8 : Type of fuel or power used.

89. Enter here the description of the power or fuel used for the running of the factory, workshop (or household industry if it is run on power or fuel). The fuels can be kerosene, soft coke, petrol, diesel, gas, coal, wood, etc., Electricity and steam etc. are some of the sources of power. Some units may be run by animal power such as *oil ghani*. Some may be run by merely human energy such as carpet-making, pottery making etc. Enter the description of fuel or power used for the production, processing, servicing etc. that is carried on in the establishment. There may be instances where more than one fuel or power is used, in such cases, only the fuel or power which is used in running the primary unit of the industry will be noted in this column.

90. *Columns* 9 *and* 10 *are to be filled in respect of trading establishments or establishments which render commercial services only.*

91. Trading or business establishments are those where some trading *i. e.*, transactions involving sale and/or purchase of goods go on.

Establishments rendering commercial services are the banks, money lending firms, Pawn shops, etc.

Col. 9 Description of goods bought/sold

92. If it is a trading establishment, you should ascertain what are the goods bought and/or sold and write the description in this column. If there are more than one type of goods bought/sold by the establishment, you should give description of the main item of goods bought/sold by the establishment.

93. In the case of establishments rendering commercial services such as in the case of Banks etc., you should write the description of the services rendered, as in the case of a bank, you should write "banking services".

Col. 10 : Whether (a) wholesale or (b) retail

94. For all trading establishments, you should as certain in respect of the goods mentioned in column 9, whether they are sold/bought in wholesale or in retail and write as the case may be.

95. You may come across certain establishments wherein both types of trade *i. e.*, wholesale and retail go on. In such cases, you should ascertain in which category (*i.e.*, wholesale or retail) the volume of trade is greater and record the category accordingly.

96. In the case of establishments rendering commercial services, *e.g.*, bank etc. please do not write any of the two categories *i.e.* 'wholesale' or 'retail' but put in 'X' in this column.

Col. 11: If used as any other establishment describe e. g., Govt. office, school, Hospital, Railway Station, Barber's Saloon, Cinema Theatre, Hotel, Tea shop, etc.

97. Two specific types of establishments have been covered in columns 6 to 10. Column 11 relates to the remaining types of establishments not covered by columns 6 to 10. You have to describe such establishments in this column, *e.g.*, Govt. Office, school, hospital, Railway Station, orphanage, Rescue Home, Barber's saloon, cinema theatre, hotel, tea shop, lawyer's office, doctor's clinic, laundry, etc.

98. It is possible that in a particular establishment, more than one activity is being undertaken within the same premises. For example, say in a betel shop, *bidi* rolling is also being undertaken or in a grocery shop a flour mill is also located, or in the doctor's clinic medicines are sold. In such cases, the establishment should be identified having regard to the major activity and recorded as such in the relevant columns pertaining to the major activity.

99. But if different activities are undertaken in different census houses quite cut off from one another though under the same title or ownership, each such census house should be treated as a separate establishment and recorded as such against that census house in this schedule. It may, however, be noted that where processing for the production of an article is carried on, in separate adjoining census houses, all the census houses should be treated as a single establishment and recorded as such. If on the other hand the activities of a large firm or an office are carried on in buildings located far away in different localities, each of the census houses in the different localities will have to be treated as a separate establishment and the particulars of the establishment relating to that particular census house should be listed in this schedule.

100. After you have completed filling up of the Establishment Schedule for your block, you will prepare a duplicate copy of the Establishment Schedule, for which you would be given adequate number of blank forms.

ANNEXURE 'B'

NATIONAL INDUSTRIAL CLASSIFICATION (N.I.C.)—1970

(As adopted by the office of the Registrar General, India, for the Industrial Classification of 'Establishment' and 'economically active population')

INTRODUCTION

Industrial Classifications are used in the Classification of economically active population, in the presentation of statistics of industrial production and distribution, labour statistics and economic data like national income etc., Comparability of statistics available from various sources on different aspects of economy and the usability of data for economic analysis demand standardisation of the system of Industrial Classification.

The Industrial Classification used in the population Census differed from one census to another and till 1951 Census, it was generally an amalgam of industrial and occupational features.

In the 1961 Census, the Indian Standard Industrial Classification (ISIC) evolved in 1958 by the Directorate General of Employment and Training was used. There has been a variety of Industrial Classifications in India such as Labour Bureau's-Industrial classification of factories, Standard Industrial Classi fication evolved by Central Statistical Organisation etc,. While attempts have been made in several cases to bring the classifications inline with the I.S.I.C. these have produced different versions depending on the nature of the respective needs. An attempt at evolving a Standard Industrial Classification was made when an interdepartmental meeting, in which all concerned departments of the Central Government along with other important users were represented, was held in April, 1964 to consider the subject. After a detailed consideration of general principles for a Standard Industrial Classification, the meeting appointed a Technical Committee consisting of representatives of the Registrar General, India, Directorate General of Employment and Training, Ministries of Internal Trade and Industry and the Central Statistical Organisation (C.S.O.) to work out a three digit level standard classification of industries. In the meantime, the Statistical Office of the United Nations was also considering the revision of the I.S.I.C. 1968. This was ready in September, 1968 and it was circulated by the C.S.O. among all concerned organisations inviting their suggestions. After a number of meetings of the representatives of these organisations, the National Industrial Classification (N.I.C.) 1970 was finalised. This has been adopted by the Office of the Registrar General, India, with suitable modification.

Like the I.S.I. C.-1969, the National Classification attempts to group together economic activities which are akin in terms of the process adopted, the raw materials used and the finished products produced. The Classification does not draw any distinction according to the type of ownership or type of economic organisation And except in cases like textiles etc., where traditional processes of production are in vogue in significant measures, the Classification does not endeavour to distinguish between various modes of operation as for instance ,using power or not using power, factory or household , large-scale or small-scale. Identification of the special features of the Indian economy, where in certain sectors traditional processing is substantial, has been attempted in the two-digit and three-digit levels in the N.I.C. 1970.

The basis of classification being the nature of economic activity carried on in an establishment, it follows that the unit classification should be an establishment. The term 'establishment, may be defined as an economic unit which is engaged in one or predominately one kind of activity usually at a single physical location under single ownership or control. A firm or enterprise may have more than one establishment either on the same location or on different locations engaged either in the same economic activity or in different economic activities. In either case, each establishment is to be counted separately and classified appropriately. It is also likely that some establishments are engaged in more than one economic activity. To the extent possible, it is desirable to treat each technical unit, or ancillary unit or welfare unit, engaged in a different type of activity as a separate establishment. Examples of technical units are the departments of textile mills which spin yarn, weave cloth, and dye the cloth or Departments of a meat packing plant which produce *lard lure bacon* or can meat. Clearest examples of ancillary units are central administration offices, ware houses, garages, repairshops and electric power plants which primarily serve their parent units. Examples of welfare units are schools or dispensaries run by say, steel mills for the benefit of their employees. Where it is not possible to separate technical, ancillary and welfare units from their parent establishments, the establishment will have to be classified into one or other of the minor groups in the Classification according to the major activity of the establishment. The major activity of the establishment should generally be ascertained by reference to value added by the production of different products or services rendered or net revenue derived from the various activities. Where such an assessment is not possible, the classification may be determined in terms of gross revenue attributable to the products or services put by the establishment, the number of persons employed on various activities or the proportion of labour-cost assignable to those activities whichever may be convenient and appropriate. Where the integration of activities in an establishment and in the case of a factory producing pulp as well as paper, the classification will have to depend on the final product irrespective of the magnitude of the value added at different levels of production. In the Indian economy, it sometimes becomes necessary to classify by industry persons who are own-account workers, as in the censuses of population and sample surveys of households. In such cases the distinction between industrial and occupational classifications becomes blurred. In the case of such own-account workers, it is desirable to classify them under industries appropriately akin to their occupations.

The National Industrial Classification (N.I.C.)-1970 consists of

10 Divisions (at the first digit level);

66 Major Groups (at the second digit level); and

386 Minor Groups (at the third digit level).

While adopting the N.I.C.-1970, Office of the Registrar General, India, have made a modification in the classification of 'Repairing' or 'Repair-service-establishments.

In the N.I.C.-1970 'Repair work' has been included in 'Manufacture' in some cases like, Minor Groups

"351-Manufacture and repair of drills, coal cutting machines etc., etc.," and

"359-Manufacture and repair of non-electrical machines etc., etc.";

While in case of other repairing establishments, such as "Repair of Footwear and Leather goods etc., Electrical repair shops, repair of Motor Vehicles and Motor Cycles, etc., these have been classified under Major Group 97-"Repair Services" and yet another Division 'Y' and Major Group 'YO' as 'Repair Service (if not included under Major Group 97)', has been provided.

It was felt that 'Repairs' or servicing should be assigned to 'Manufacturing or processing' activity under Division '2&3' which incidentally makes for comparability of classification at the 1961 Census. Accordingly a Major Group '39-Repair' has been inserted under Division 2 & 3 with the following Minor Groups:

390-Repair of Footwear and other leather goods.

391-Electrical Repair shop

392-Repair of Motor Vehicles and Motor Cycles

393-Repair of watch, clock and jewellery

394-Repair of Bicycles and Cycle-rickshaws

395-Repair enterprises not elsewhere classified

The N.I.C.,-1970 incorporates some of the major revisions contained in the I.S.I.C., 1969, e.g., transfer of 'Restaurants and Hotels' from 'Services' to 'Trade', clubbing of Banking, Insurance, Real Estate, and Business services; transfer of veterinary service from Agricultural Services to Medical and Health Services, treating sanitary services among community services etc.

NATIONAL INDUSTRIAL CLASSIFICATION (NIC)—1970

This classification groups the industries into :

10	Division (0 to 9 & 'X')
66	Major Groups
385	Minor Groups

The Divisions, Major Groups and Minor Groups with their code numbers are listed below :

DIVISIONS

(One digit level of classification)

0	—	Agriculture, Hunting, Forestry and Fishing
1	—	Mining and Quarrying
2 & 3	—	Manufacturing and Repair
4	—	Electricity, Gas and Water
5	—	Construction
6	—	Wholesale and Retail Trade and Restaurants & Hotels
7	—	Transport, Storage and Communications
8	—	Financing Insurance, Real Estate and Business Services
9	—	Community, Social and Personal Services
X	—	Activities not Adequately Defined

MAJOR GROUPS

(Two digit level of classification)

Major Group		Description
		Division 0 —Agriculture, Hunting, Forestry and Fishing
00	—	Agricultural Production
01	—	Plantation
02	—	Livestock Production
03	—	Agricultural Services
04	—	Hunting, Trapping and Game Propagation
05	—	Forestry and Logging
06	—	Fishing
		Division 1—Mining and quarrying
10	—	Coal Mining
11	—	Crude Petroleum and Natural Gas
12	—	Metal Ore Mining
19	—	Other Mining
		Division 2 & 3—Manufacturing and Repair
20-21	—	Manufacture of Food Products
22	—	Manufacture of Beverages, Tobacco & Tobacco Products
23	—	Manufacture of Cotton Textiles
24	—	Manufacture of Wool, Silk and Synthetic Fibre Textiles
25	—	Manufacture of Jute, Hemp, and Mesta Textiles
26	—	Manufacture of Textile Products (including Wearing Apparel other than Footwear)
27	—	Manufacture of Wood and Wood Products Furniture & Fixtures
28	—	Manufacture of Paper and Paper Products & Printing Publishing and Allied Industries
29	—	Manufacture of Leather, Leather & Fur Products, (except repair)
30	—	Manufacture of Rubber, Plastic Petroleum and Coal Products
31	—	Manufacture of Chemicals and Chemical Products (except Products of Petroleum and Coal)
32	—	Manufacture of Non-Metallic Mineral Products
33	—	Basic Metal and Alloys Industries
34	—	Manufacture of Metal Products and Parts except Machinery and Transport Equipment
35	—	Manufacture of Machinery, Machine Tools and Parts except Electrical Machinery
36	—	Manufacture of Electrical Machinery Apparatus, Appliances and Supplies and Parts
37	—	Manufacture of Transport Equipment and Parts
38	—	Other Manufacturing Industries
39	—	Repair
		Division 4—Electricity, Gas and Water
40	—	Electricity
41	—	Gas and Steam
42	—	Water Works and Supply
		Division 5—Constructions
50	—	Construction
51	—	Activities Allied to Construction
		Division 6—Wholesale and Retail Trade and Restaurants & Hotels
60	—	Wholesale Trade in Food, Textiles, Live Animals : Beverages and Intoxicants
61	—	Wholesale Trade in Fuel. Light, Chemicals, Perfumery, Ceramics, Glass

Major Group		Description
62	—	Wholesale Trade in Wood, Paper Other Fabrics, Hide and Skin and Inedible Oils
63	—	Wholesale Trade in All Types of Machinery Equipment including Transport and Electrical Equipment
64	—	Wholesale Trade in Food and Miscellaneous Manufacturing
65	—	Retail Trade in Food and Food Articles, Beverage, Tobacco and Intoxicants
66	—	Retail Trade in Textiles
67	—	Retail Trade in Fuel and Other Household Utilities and Durables
68	—	Retail Trade in Others
69	—	Restaurants and Hotels
		Division 7—Transport, Storage and Communications
70	—	Land Transport
71	—	Water Transport
72	—	Air Transport
73	—	Services incidental to Transport
74	—	Storage and Warehousing
75	—	Communications
		Division 8—Financing Insurance, Real Estate and Business Services
80	—	Banking and Similar Type of Financial Institutions
81	—	Providents and Insurance
82	—	Real Estate and Business Services
83	—	Legal Services
		Division 9—Community, Social and Personal Services
90	—	Public Administration & Defence Services
91	—	Sanitary Services
92	—	Education Scientific and Research Services
93	—	Medical & Health Services
94		Community Services
95	—	Recreational & Cultural Services
96	—	Personal Services
98	—	International and other Extra Territorial Bodies Services
99	—	Services not elsewhere classified
		Division X—Activities not Adequately Defined
XO	—	Persons without any Affiliation to any particular industry (including fresh entrants to labour force)
X1	—	Activities not Adequately Defined (Other than that in XO).

MINOR GROUPS

(Three digit level of classification)

Major Group	Minor Group	Description
		Division 0—Agriculture, Hunting, Forestry & Fishing
00		*Agricultural Production*
	000	Cereal Crops (paddy wheat jowar, bajra, maize, ragi, barley & gram, etc.).
	001	Pulses (arhar, moong, masur, urd etc.)
	002	Raw cotton.
	003	Raw jute, mesta.
	004	Suann hemp and other kindred fibres.
	005	Production of oilseeds such as seasamum groundnut, rape, mustard, linseed, castor seeds, etc.
	006	Sugarcane.
	007	Roots and tubers, vegetables, pan, singhara chillies and spices (other than pepper and cardamom) and flowers and parts of plants.
	008	Agricultural production not elsewhere classified.
01		*Plantations*
	010	Tea.
	011	Coffee.
	012	Rubber.
	013	Tobacco.
	014	Pepper.
	015	Cardamom.
	016	Edible nuts (excluding coconut and ground nut), walnut, almond, cashewnut, etc.
	017	Production of fruits, coconuts e.g. bananas apples, grapes, mangoes, oranges.
	018	Production of ganja, cinchona, opium, etc.
	019	Crops of plantations, not elsewhere classified (*e.g.* Betel nuts, etc.).
02		*Livestock Production*
	020	Cattle and goats-breeding, rearing, ranching etc. and production of milk.
	021	Rearing of sheep and production of woo
	022	Rearing horses, mules, camels and other pack animals.
	023	Rearing of pigs and other animals
	024	Rearing of ducks, hens and other birds and production of eggs.
	025	Rearing of bees and production of honey and wax.
	026	Rearing of Silk-worms and production of cocoons and raw silk.
	029	Rearing of livestock and production of live stock products not elsewhere classified.

Major Group	Minor Group	Description
		Division 0—Agriculture, Hunting, Forestry & Fishing—contd.
03		*Agricultural Services*
	030	Pest destroying, spraying, pruning of infected stems.
	031	Operation of irrigation system.
	032	Animal sharing and livestock services (other than veterinary services).
	033	Grading agricultural and livestock products.
	034	Horticultural and nursery services.
	035	Soil conservation.
	036	Scientific services like soil testing.
	039	Agricultural services not elsewhere classified. (like land clearing, land draining etc.).
04		*Hunting, Trapping and game Propagation*
	040	Hunting, trapping and game propagation for commercial purposes (other than for sport).
05		*Forestry and Logging*
	050	Planting, replanting and conservation of forests.
	051	Logging-felling and cutting of trees and preparation of rough, round, hewn or riven logs (including incidental hauling).
	052	Production of fuel (including charcoal by burning) by exploitation of forests.
	053	Gathering of fodder by exploitation of forests
	054	Gathering of uncultivated materials such as gums, resins, lac, barks, herbs, wild fruits and leaves by exploitation of forests
	059	Other forests products not elsewhere classified. such as munjh.
06		*Fishing*
	060	Ocean, sea and coastal fishing.
	061	Inland water fishing.
	062	Pisciculture—rearing of fish.
	063	Collection of pearls, conches, shells, sponge and other sea products.
	069	Fishing and allied activities not elsewhere classified.
		Division —1 Mining and Quarrying
10		*Coal Mining*
	100	Coal.
	101	Lignite.
11		*Crude Petroleum and Natural Gas*
	110	Crude Petroleum.
	111	Natural gas.

Major Group	Minor Group	Description
		Division 1—Mining and Quarrying—contd.
12		*Metal Ore Mining*
	120	Iron ore.
	121	Manganese.
	122	Chromite.
	123	Bauxite.
	124	Gold and Silver Ores.
	125	Copper Ore.
	126	Lead and Zinc Ores.
	127	Limenite and Rutile.
	128	Wolfram.
	129	Metal Ores not elsewhere classified.
19		*Other Mining*
	190	Stone quarrying, clay and sand pits.
	191	Chemicals and fertilizer mineral mig (such as soda ash, sulphur, phosphates, nitrates. etc.).
	192	Salt mining and quarrying including crushing screening and evaporating in pans.
	193	Precious and semi-precious stones.
	194	Mica.
	195	Gypsum.
	199	Other mining not elsewhere classified (asbestos, quartz, tale and Soap stone natural abrasives other than sand, graphite, etc)
		Division 2 & 3 —Manufacturing and Repair
20-21		*Manufacture of Food Products*
	200	Slaughtering, preparation & preservation of meat.
	201	Manufacture of dairy products.
	202	Canning and preservation of fruits and vegetables.
	203	Canning, preserving and processing of fish crustacea and similar foods.
	204	Grain mill products.
	205	Manufacture of bakery products.
	206	Manufacture and refining of sugar (vacuum pan sugar factories).
	207	Production of indigenous sugar boora, khandsari, gur, etc. from sugar-cane, palm juice.
	208	Production of common salt.
	209	Manufacture of cocoa, chocolate and sugar confectionery (including sweetmeats)
	210	Manufacture of hydrogenated oils, Vanaspati ghee, etc.
	211	Manufacture of other edible oils and fats e.g mustard oil, ground nut oil, til oil, etc (Inedible oils shown under 315).

Major Group	Minor Group	Description
		Division 2 & 3—*Manufacturing and Repair*—contd.
	212	Tea processing.
	213	Coffee curing, roasting and grinding.
	214	Cashewnut processing like drying, shelling roasting, salting, etc.
	215	Manufacture of ice.
	216	Manufacture of prepared animal feeds.
	217	Manufacture of starch.
	219	Manufacture of food products not elsewhere classified.
22		*Manufacture of Beverages, Tobacco and Tobacco Products*
	220	Distilling, rectifying and blending of spirits
	221	Wine industries.
	222	Malt liquors and malt.
	223	Production of country liquor and toddy.
	224	Soft drinks and carbonated water industries.
	225	Tobacco stemming, redrying and all other operations which are connected with preparing raw leaf tobacco for manufacture.
	226	Manufacture of bidi.
	227	Manufacture of cigars, cigarettes, cheroots and cigarette tobacco.
	228	Manufacture of chewing tobacco, zarda and snuff.
	229	Manufacture of tobacco & tobacco products not elsewhere classified.
23		*Manufacture of Cotton Textiles*
	230	Cotton ginning, cleaning and baling.
	231	Cotton spinning, weaving, shrinking, sanforizing, mercerising and finishing of cotton textiles in mills.
	232	Printing, dyeing and bleaching of cotton textiles.
	233	Cotton spinning other than in mills (charkha)
	234	Production of khadi.
	235	Weaving and finishing of cotton textiles in handlooms, other than khadi.
	236	Weaving and finishing of cotton textiles in powerlooms.
	239	Cotton textiles not elsewhere classified.
24		*Manufacture of Wool, Silk and Synthetic Fibre Textiles*
	240	Wool cleaning, baling and pressing.
	241	Wool spinning, weaving and finishing in mills
	242	Wool spinning and weaving (other than in mills).
	243	Dyeing and bleaching of woollen textile.
	244	Manufacture of wool not elsewhere classified
	245	Spinning, weaving and finishing of silk.
	246	Printing, dyeing and bleaching of silk textiles.
	247	Spinning, weaving and finishing of other textiles—synthetic fibres, rayons, nylons etc.
	248	Printing, dyeing and bleaching of synthetic textiles.
	249	Silk and synthetic fibre textiles not elsewhere classified.
25		*Manufacture of Jute, Hemp and Mesta Textiles*
	250	Jute and Mesta pressing and baling.
	251	Jute and Mesta spinning and weaving.
	252	Dyeing, printing and bleaching of jute textiles.
	253	Preparing, spinning, weaving and finishing of hemp and other coarse fibres
	259	Manufacture of jute bags and other jute textiles not elsewhere classified.
26		*Manufacture of Textile Products (including Wearing Apparel other than Footwear)*
	260	Knitting mills.
	261	Manufacture of all types of threads, cordage, ropes, twines, nets, etc.
	262	Embroidery and making of crapes laces and fringes.
	263	Weaving carpets, rugs and other similar textile products.
	264	Manufacture of all types of textiles, garments including wearing apparel.
	265	Manufacture of rain coats, hats, etc.
	266	Manufacture of made up textile goods (except garments) such as curtains mosquito nets, etc.
	267	Manufacture of water proof textiles such as oil cloth, tarpaulin, etc.
	268	Manufacture of coir and coir products.
	269	Manufacture of textiles not elsewhere classified like linoleum, padding, wadding, upholstering, filling.
27		*Manufacture of Wood and Wood Products, Furniture and Fixtures.*
	270	Manufacture of veneer, plywood and their products.
	271	Sawing and planing of wood (other than plywood).
	272	Manufacture of wooden and cane boxes, crates, drums, barrels and other wooden containers, baskets and other rattan, bamboo, read and willow wares made entirely or mainly of cane, rattan, reed, bamboo and willow.
	273	Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors and windows (excluding hewing and rough shaping of poles, bolts and other

Major Group	Minor Group	Description
		Division 2 & 3.—*Manufacturing and Repair*—contd.
		wood material which is classified under logging).
	274	Manufacture of wooden industrial goods, such as bobbins, blocks, handles, saddling and similar equipment and fixtures.
	275	Manufacture of cork and cork products.
	276	Manufacture of wooden furniture and fixtures.
	277	Manufacture of bamboo and cane furniture and fixtures.
	279	Manufacture of wood and reed, bamboo and cane products not elsewhere classified.
28		*Manufacture of Paper and Paper Products and Printing, Publishing and Allied Industries*
	280	Manufacture of pulp, paper and paper board including newsprint.
	281	Manufacture of container and boxes of paper and paper board.
	282	Manufacture of pulp products not elsewhere classified like dolls.
	283	Manufacture of paper and paper board articles not elsewhere classified.
	284	Printing and publishing of newspaper.
	285	Printing and publishing of periodicals, books, journals, atlases, maps, sheet music directories.
	286	Printing of bank notes, currency notes, postage stamps; security presses.
	287	Engraving, etching, block making, etc.
	288	Book Binding.
	289	Printing, publishing and allied activities not elsewhere classified like envelope printing, picture postcard printing, embossing.
29		*Manufacture of Leather and Leather and Fur Products (except Repair)*
	290	Tanning, currying, finishing, embossing and japanning of leather.
	291	Manufacture of footwear (excluding repair) except vulcanized or moulded rubber or plastic footwear.
	292	Manufacture of wearing apparel like coats, gloves, etc. of leather and substituteds of leather.
	293	Manufacture of Leather Consumer Goods (Otherthan apparel and footwear).
	294	Scrapping, currying, tanning, bleaching and dyeing of fur and other pelts for the trade.
	295	Manufacture of wearing apparel of fur and pelts.
	296	Manufacture of fur and skin rugs and other articles.
	299	Manufacture of Leather and Fur Products not elsewhere classified.

Major Group	Minor Group	Description
		Division 2 & 3.—*Manufacturing and Repair*—contd.
30		*Manufacture of Rubber, Plastic, Petroleum and Coal Products*
	300	Tyre and tube industries.
	301	Manufacture of footwear made primarily of vulcanized or moulded rubber and Plastic
	302	Manufacture of rubber products not elsewhere classified.
	303	Manufacture of plastic products not elsewhere classified (Except house furnishing).
	304	Petroleum refineries.
	305	Manufacture of products of petroleum not elsewhere classified.
	306	Production of coal tar in coke ovens.
	307	Manufacture of other coal and coal tar products not elsewhere classified.
31		*Manufacture of Chemicals and Chemical Products (except Products of Petroleum and Coal)*
	310	Manufacture of basic industrial organic and inorganic chemicals and gases such as acids, alkalies and their salts; gases like acetylene, oxygen, nitrogen, etc.
	311	Manufacture of fertilisers and pesticides.
	312	Manufacture of paints, varnishes and lacquers.
	313	Manufacture of drugs and medicines.
	314	Manufacture of perfumes, cosmetics, lotions hair dressings, tooth pastes, soap in any form, synthetic detergents, shampoos, shaving products, cleansers, washing and scouring products and other toilet preparations.
	315	Manufacture of inedible oils.
	316	Manufacture of turpentine, synthetic resins, plastic materials and synthetic fibres like nylon, terylene except glass.
	317	Manufacture of matches.
	318	Manufacture of explosives and ammunition and fire works.
	319	Manufacture of chemical products not elsewhere classified (including photo-chemicals, sensitised films and paper).
32		*Manufacture of Non-Metallic Mineral Products*
	320	Manufacture of structural clay products.
	321	Manufacture of glass and glass products.
	322	Manufacture of earthen-ware and earthen pottery.
	323	Manufacture of china-ware and porcelain-ware.
	324	Manufacture of cement, lime and plaster.
	325	Manufacture of mica products.
	326	Manufacture of structural stone goods, stone dressing and stone crushing, stone ware.

Major Group	Minor Group	Description
		Division 2 & 3.—*Manufacturing and Repair*-contd.
	327	Manufacture of earthen and plaster statutes and other products.
	328	Manufacture of asbestos, cement and other cement products.
	329	Manufacture of miscellaneous non-metallic mineral products such as slate products, abrasives, graphite products, mineral wool, silica products and other non metallic mineral products not elsewhere classified.
33		*Basic Metal and Alloys Industries*
	330	Iron and steel industries.
	331	Foundaries for casting and forging iron and steel.
	332	Manufacture of ferro-alloys.
	333	Copper manufacturing.
	334	Brass manufacturing.
	335	Aluminium manufacturing.
	336	Zinc manufacturing.
	339	Other non-ferrous metal industries.
34		*Manufacture of Metal Products and Parts except Machinery and Transport Equipment*
	340	Manufacture of fabricated metal products such as metal cans from tin-plate, terne plate or enamelle sheet metal, metal shipping containers, barels, drums, kegs, pails, safes, vaults, enamelled, sanitary and all other fabricated metal products not elsewhere classified.
	341	Manufacture of structural metal products.
	342	Manufacture of furniture and fixtures primarily of metal.
	343	Manufacture of hand tools and general hardware.
	344	Enamelling, japanning, lacquering, galvanising, plating and polishing metal products.
	345	Manufacture of metal utensils, cutlery and kitchenware.
	349	Manufacture of metal products except machinery and transport equipment not elsewhere classified, like typefounding.
35		*Manufacture of Machinery, Machine tools and Parts except Electrical Machinery.*
	350	Manufacture of agricultural machinery and equipment and parts.
	351	Manufacture and repair of drills, coal cutting machines, earth moving, lifting and hoisting machinery, cranes, conveyors and road rollers and other heavy machinery and equipment used by construction and mining industries.
	352	Manufacture of prime movers, boilers and steam generating plants such as diesel engines and parts.
	353	Industrial Machinery for Food and Textile Industries.
	354	Industrial Machinery for other than Food and Textiles Industries.

Major Group	Minor Group	Description
		Division 2 &3.—*Manuacturing and Repair*—contd.
	355	Manufacture of Refrigerators, Airconditioners, and Fire Fighting Equipment, and other parts, components and accessories.
	356	Manufacture, alteration and repair of general items of non-electrical machinery, components, equipment and accessories not elsewhere classified., e.g., manufacture and repair of size reduction equipment like Pentagraph, Mapograph etc., crushers, conveyors, bucket elevators, ship hoist cranes, derricks, etc., mixers and reactors, centrifugal machines, driers, etc., power driven pumps, etc., air gas, compressors & vacuum pumps (excludings electrical furnaces), etc.
	357	Manufacture of Machine Tools, their parts and accessories.
	358	Manufacture of office computing and accounting machinery and parts.
	359	Manufacture and repair of non-electrical machinery, equipment, components and accessories not elsewhere classified, (such as sewing machines automatic merchandising machines, washing, laundry, dry-cleaning and pressing machines, cooking ranges and ovens, other service industry machines, arms and armaments etc.).
36		*Manufacture of Electrical Machinery, Apparatus Appliances and supplies and Parts*
	360	Manufacture of electrical industrial machinery and apparatus and parts (such as electrical motors, generators, transformers, electro-magnetic clutches and brakes etc.)
	361	Manufacture of insulated wires and cables.
	362	Manufacture of dry and wet batteries.
	363	Manufacture of electrical apparatus, appliances and their parts such as lamps, bulbs, tubes, sockets, switches, fans, insulators (except porcelain), conductors, irons, heaters, shavers, vacuum cleaners, etc, excluding repairing.
	364	Manufacture of radio and television transmitting and receiving sets including transistor radio sets, sound reproducing and recording equipment including tape recorders, public address systems, gramophone records and pre recorded magnetic tapes, wire and wireless, telephone and telegraph equipment, signalling and detection equipment anda pparatus, radar equipment and installations; parts and supplies specially used for electronic apparatus classified in this group.
	365	Manufacture and repair of Radiographic X-ray apparatus and tubes and parts.
	366	Manufacture of Electronic Computers, Control Instruments and other Equipment.
	367	Manufacture of electronic components and accessories not elsewhere classified.
	369	Manufacture of electrical machinery apparatus, appliances and supplies and parts not elsewhere classified.

Major Group	Minor Group	Description
		Division 2&3—Manufacturing and Repair—contd.
37		*Manufacture of Transport Equipment and Parts*
	370	Ship building and repairing.
	371	Manufacture of Locomotives and parts.
	372	Manufacture of Railway wagons and coaches and parts.
	373	Manufacture of other rail-road equipment.
	374	Manufacture of motor vehicles and parts.
	375	Manufacture of motor-cycles and scooters and parts.
	376	Manufacture of bicycles, cycle-rickshaw and parts.
	377	Manufacture of aircraft and its parts.
	378	Bullock-carts, push-carts, hand carts etc.
	379	Manufacture of transport equipments and parts not elsewhere classified.
38		*Other Manufacturing Industries*
	380	Manufacture of medical, surgical and scientific equipment.
	381	Manufacture of photographic and optical goods (excluding photo chemicals, sensitised paper and film)
	382	Manufacture of watches and clocks.
	383	Manufacture of jewellery and related articles
	384	Minting of coins.
	385	Manufacture of sports and athletic goods.
	386	Manufacture of Musical instruments.
	387	Manufacture of stationery articles like fountain pens, pencils, pens, pin cushions, tags, etc., not elsewhere classified.
	389	Manufacture of miscellaneous products not elsewhere classified such as costume jewellery, costume novelties, feather, plumes, artificial flowers, brooms, brushes, lamp shades, tobacco pipes, cigarette holders, ivory goods, badges, wigs and similar articles.
39		*Repair*
	390	Repair of footwear and other leather goods.
	391	Electrical repair shops.
	392	Repair of motor vehicles and motorcycles.
	393	Repair of watch, clock and jewellery.
	394	Repair of bicycles and cycle rickshaws.
	399	Repair of enterprises not elsewhere classified.
		Division 4—Electricity, Gas and Water
40		*Electricity*
	400	Generation and transmission of electric energy.
	401	Distribution of electric energy to household industrial and commercial and other users.
		Division 4—Electricity, Gas and Water—Contd
41		*Gas and Steam*
	410	Manufacture of gas in gas works and distribution through mains to household, industrial and commercial and other users.
42		*Water Works and Supply*
	420	Water supply *i.e.* collection, purification and distribution of water.
		Division 5—Constructions
50		*Construction*
	500	Construction and maintenance of building (including aerodromes).
	501	Construction and maintenance of roads railways, bridges, tunnels, pipe lines, ports, harbours runways, etc.
	502	Construction and maintenance of telegraph and telephone lines and other communication systems.
	503	Construction and maintenance of waterways and water reservoirs such as bunds embankments, dams, canals, tanks, wells tube wells, etc.
	504	Construction of hydro-electric projects.
	505	Construction of industrial plants including thermal plants.
	509	Construction not elsewhere classified.
51		*Activities allied to Construction*
	510	Plumbing.
	511	Heating and air conditioning installation, lift installation, sound profing, etc.
	512	Setting of tile, marble, brick, glass and stone.
	513	Plumber works such as fixing of doors, windows panels, painting and decorating.
	514	Electrical installation.
	519	Other activities allied to construction not elsewhere classified, such as fixing of hand-pumps
		Division 6— Wholesale and Retail Trade and Restaurants and Hotels
60		*Wholesale Trade (W.T.) in Food, Textiles, Live Animals Beverages and Intoxicants*
	600	Wholesale trade in cereals and pulses.
	601	Wholesale trade in Foodstuff other than cereals and pulses.
	602	Wholesale trade in textiles and textile products, like all kinds of fabrics, garments, shirtings, suitings, hosiery goods.
	603	Wholesale trade in beverages other than intoxicants, e.g., aerated water.
	604	Whoelsale trade in intoxicants like wines and liquors including bottling.
	605	Wholesale trade in intoxicants like opium, ganja etc.
	606	Wholesale trade in tobacco and tobacco products.

Major Group	Minor Group	Description
		Division 6—Wholesale and Retail Trade and Restaurants and hotels—contd.
	607	Wholesale trade in animals.
	608	Wholesale trade in straw and fodder
61		*Wholesale trade in Fuel, Light, Chemicals, Perfumery, Ceramics, Glass.*
	610	Wholesale trade in medicines and chemicals.
	611	Wholesale trade in fuel and lighting products
	612	Wholesale trade in toilets, perfumery and cosmetics.
	613	Wholesale trade in metal, porcelain and glass utensil crockery and chinaware.
62		*Wholesale trade in Wood, Paper, Other Fabrics and Skin and Inedible Oils*
	620	Wholesale trade in petrol, mobil oil and allied products.
	621	Wholesale trade in wood, cane, bamboo, thatches, etc.
	622	Wholesale trade in paper and other stationery goods.
	623	Wholesale trade in skin, leather and fur etc.
63		*Wholesale trade in All Types of Machinery, Equipment, including Transport and Electrical Equipment*
	630	Wholesale trade in agricultural and industrial machinery, e.g., harvestors, sowing machines, etc.
	631	Wholesale trade in electrical machinery and equipment.
	632	Wholesale trade in transport and storage equipment.
64		*Wholesale trade in Miscellaneous Manufacturing*
	640	Wholesale trade in furniture and fixtures.
	641	Wholesale trade in rubber and rubber products.
	642	Wholesale trade in household and equipment not elsewhere classified.
	643	Wholesale trade in building materials.
	644	Wholesale trade in clocks, eye-glasses and frames.
	645	Wholesale trade in hardware and sanitary equipment.
	646	Wholesale trade in scientific, medical and surgical instruments.
	647	Wholesale trade in precious metals, stones and jewellery.
	649	Wholesale trade in goods not elsewhere classified.

Major Group	Minor Group	Description
		Division 6—Wholesale and Retail Trade and Restaurants and Hotels—contd.
65		*Retail trade (R.T.) in Food and Food Articles, Beverage, Tobacco and Intoxicants.*
	650	Grain and grocery store.
	651	Vegetable and fruit selling.
	652	Dealers in meat, fish and poultry.
	653	Dealers in sweetmeat, bakery products, dairy products and eggs.
	654	Pan, bidi, cigarette shops.
	655	Dealers in aerated water, soft drinks and ice cream.
	656	Wine and liquor shops.
	659	Retail trade in food and food articles, beverage, tobacco and intoxicants not elsewhere classified.
66		*Retail trade in Textiles*
	660	Dealers in textiles (non-ready made).
	661	Dealers in ready-made garments.
67		*Retail trade (R.T.) in Fuel and Other Household Utilities and Durables.*
	670	Dealers in firewood, coal and kerosene oil.
	671	Utensil shops.
	672	Fancy stores (including crockery and glassware dealers).
	673	Dealers in electrical and electronic goods.
	674	Furniture shops.
	675	Jewellery marts.
	676	Footwear shops.
	679	Retail trade in fuel and other household utilities and durables not elsewhere classified
68		*Retail Trade in Others*
	680	Medical shops.
	681	Booksellers and stationers.
	682	Dealers in buildings material.
	683	Dealers in transport equipment.
	684	Petrol fillings stations.
	689	Retail trade in others not elsewhere classified
69		*Restaurants and Hotels*
	690	Restaurants, cafes and otners eating and drinking places.
	691	Hotels, rooming houses, camps and other lodging places.

Major Group	Minor Group	Description
		Division 7—Transport, Storage and Communications
70		*Land Transport.*
	700	Railway transport.
	701	Passenger transport by tramway and bus-services.
	702	Passenger transport by other motor vehicles.
	703	Freight transport by motor vehicles.
	704	Hackney carriages bullock-carts, *ekka*, tonga, etc.
	705	Transport by animals like horses, elephants mules, camels, etc.
	706	Transport by man (including rickshaw pullers, hand-cart pullers, porters, coolies etc.)
	707	Pipeline transport.
	708	Supporting services to land transport, like operation of highway bridges, toll roads, vehicular tunnels, parking lots, etc.
71		*Water-transport*
	710	Ocean and coastal water transport.
	711	Inland water transport.
	712	Supporting services to water-transport like operation and maintenance of piers, docks, pilotage, light houses, loading and discharging of vessels, etc.
72		*Air Transport*
	720	Air-transpotr carriers (of passengers and freight).
	721	Supporting services to air-transport, like operation of airports, flying facilities radio beacns flying control centres, rader stations etc.
73		*Services Incidental to Transport*
	730	Services incidental to transport, such a packing, crating travel agency, etc.
74		*Storage and Ware-Housing*
	740	Ware-Housing.
	741	Cold-storage.
	749	Storage and ware-housing not elsewhere classified.
75		*Communications*
	750	Postal, telegraphic, wireless and signal communication.
	751	Telephone communication.
	759	Communication not elsewhere classified.

Major Group	Minor Group	Description
		Division 8—Financing, Insurance, Real Estate and Business Services
80		*Banking and Similar Type of Financial Institutions*
	800	Banking.
	801	Credit Institutions other than banks, such as saving and lone associations, agricutural credit institution industrial development banks, etc.
	809	Other financial institutions such as pawn brokers, money lenders, financiers, chit funds, etc.
81		*Providents and Insurance*
	810	Provident Services.
	811	Insurance carriers, Life.
	819	Insurance carriers other than life, such as fire, marine accident, health, etc.
82		*Real Estate and Business Services*
	820	Purchase, sale letting and operating of real estate such as residential and non-residential buildings, developing and sub-dividing real estate into lots, lessors of real property, real estate agents, brokers and managers engaged in renting, buying and selling, managing and appraising real estate on contract or fee basis.
	821	Purchase and sale, agents and brokers.
	822	Auctioneering.
	823	Accounting, auditing and book-keeping services.
	824	Data processing and tabulating services.
	825	Engineering, architectural and technical services.
	826	Advertising and publicity services.
	827	Machinery and equipment, rental and leasing.
	828	News Agencies e.g., P.T.I., U.N.I. Reuter, etc.
	829	Business services, except machinery and equipment rental and leasing, not elsewhere classified.
83		*Legal Services*
	830	Legal Services, such as those rendered by advocates, barristers, solicitors, pleaders mukhtiars, etc.
		Division 9—Community, Social and Personal Services, Public Administration and Defence Services
	900	Public services in the union Government including Defence Services.
	901	Public Services in State Governments including Police Services.
	902	Public Services in local bodies departments and offices engaged in administration like local taxation, business regulations, etc.
	903	Public Services in Quasi-government bodies

ANNEXURE 'C'

No. 23/1/67-Map

Government of India

Ministry of Home Affairs

Office of the Registrar General, India

New Delhi-11, the 4-4-67.

To

The Chief Secretary to the Govt. of

SUBJECT : *Scheme on Permanent House Numbering.*

Sir,

I have the honour to enclose herewith a copy of Manual of Instructions to implement a Scheme on Permanent House Numbering on a countrywide basis. The advantages of good house numbering need hardly be stressed. The present scheme of systematic and permanent house numbering is being suggested not merely to serve the purpose of the next population Census but to meet the needs of various branches of governmental and local administration and public utility services as also of the public themselves. At the 1961 Census although an attempt was made to have a permanent system of house numbering which was intended to be utilized for all purposes, such as electoral rolls, municipal assessment, postal address, housing surveys, public health surveys etc., yet in some areas the maintenance of the house numbers was badly neglected. There has been some fundamental alterations in the old building structures and new constructions have come up in several areas but all these may not have been assigned proper house numbers to fit in to the general house numbering scheme. In a few localities even the original house numbering was done in a defective manner on account of inadequate preparation. I hope the introduction of permanent house numbering scheme even now instead of rushing through on the eve of Census taking offers considerable advantage of less rush and less inconvenience to the State Govts. and local bodies.

I shall feel extremely grateful if the State Govt. kindly constitutes a committee as suggested at the beginning of Chapter II of the Manual and issues necessary instructions to all local bodies and all others concerned to bring the extsting house numbering system up-to-date in the light of the instructions contained in the Manual.

Yours faithfully,

Sd/-

(A. Chandra Sekhar)

Addl. Registrar General, India.

No. 231/67-Map

Government of India

Ministry of Home Affairs

Office of the Registrar General, India.

2A, Mansingh Road, Kotah House Annexe, New Delhi-11, the 5-5-67

To

The Superintendent/Deputy Superintendent of Census Operations,

SUBJECT: *Permanent House numbering—Preparation of House numbering plans for urban units.*

Sir,

In the Manual of Instructions for Permanent Housenumbering a suggestion has been made to prepare detailed housenumbering plans for each urban units. During my recent tour to one of the States I had occasion to examine the town maps prepared by the National Sample Survey. These are admirable maps showing the detailed lay-out of towns divided by investigator units and subdivided into blocks. The detailed investigator unit maps show the lay-out of every street and lane and the identification points at the corner of each block. It is found that several streets and lanes do not have any local names. The N.S.S. maps clearly showed the need for every street and lane to be properly named. If these are brought into the notice of the concerned civic authorities they can take steps to have every street properly named.

2. Now coming to the question how these maps prepared by the N.S.S. could be used for census purposes, it is felt that while these maps serve as a good frame work it is necessary to further enlarge each investigator unit maps and indicate on it every house by a number along every street and lane. Almost all the towns have a system of housenumbering. The numbers already adopted by the town authorities can be shown on such enlarged maps. When once this is done the preparation of houselists and the taking of a Housing Census will become easier and greatly facilitate the demarcation of the census enumerators' jurisdictions. The jurisdiction of every census enumerator will have to be clearly defined with reference to boundaries as also the actual housenumbering that will constitute his block.

3. You are requested to contact N.S.S. authorities and take tracings of these maps already prepared by them and then enlarge them by a Pentograph and those enlarged maps can be sent to each town and every house marked on it. It may be desirable to first take this up as a pilot project and cover one large city and one small town. You may use your own office staff to visit the towns and note the housenumbers. In due course, the work can be entrusted to the concerned municipal auhorities so that up-todate and accurate maps of every town showing the lay-out as also details of the houses are available. It may be necessary to prepare 5 copies of such maps, one copy for Registrar General, India's Office, one copy for Superintendent Census Operations' Office and one copy for the town civic office, one copy in the taluk office and one copy to be kept spare in SCO's office. These can form an invaluable frame-work for Census coverage as well any type of sample studies. Please initiate action and let this Office know of the progress from time to time.

Yours faithfully,

Sd!-

(A. Chandra Sekhar)

Addl. Registrar General, India.

LIST OF AGENTS FOR THE SALE OF GOVERNMENT OF INDIA PUBLICATIONS AS ON 31-3-1970

Station	Serial No.	Name of the Party	Cate. of Agents
