PART — II-B

ECONOMIC TABLES

J. TAYENG, I. A. S.
DIRECTOR OF
CENSUS OPERATIONS
MEGHALAYA

PREFACE

Collection of economic data has been one of the main planks of the Indian Census from the very beginning. During the four decades till 1921, the main economic questions related to livelihood or occupation or means of subsistence of each worker. The income concept was introduced in 1931, according to which persons were divided into three classes viz., "earners", "working dependents" and "non-working dependents". The earner was defined as a person with permanent and regular work for which return was obtained in cash or in kind which helps to augment the income. The working dependent was classified as a person who assisted in the work of the family and contributed to its maintenance without actually earning any wages. The ceoncept underwent a slight change in 1941 where people were classified as "wholly dependent", partly dependent" and 'Others'. In 1951, there was further change and classification was "Self-supoorting", "earnong dependent" and 'non-earning dependent". A "self-supporting person" was one who was in receipt of income which was sufficient at least for his own maintenance. A person who earns income which was not sufficient for his own maintenance was classified as "earning dependent". This income approach has the effect of excluding the unpaid family workers. The economic data in 1961 was collected on the basis of "work" according to which population was divided into two classes - workers and non-workers. The work approach counted such family workers also who were not in receiot of any income and working children who could not earn enough for their maintenance as workers. Thus in 1961 Census, the bais of work in the case of seasonal workers was that a person should have some regular work of more than one hour a day throughout the greater nart of the current year or previous working season. In the case of regular workers, work for atleast a day throughout the previous fortnight was adequare and absence due to illness or other cause was not a bar to being treated as a worker.

The concept of "work" accepted in 1961 Census was now considered to be too liberal and tended to inflate the number of workers. Persons who were basically non-workers like house-wives, students, etc., were included in the category of workers even though their participation is very marginal. This defficiency in the 1961 Census ceoncept of work was sought to be removed in 1971 where every person has been categorised either as a "worker" or a 'non-worker' with respect to the kind of activity returned by him. The emphasis has been laid on main activity of a person. The main activity of a person was ascertain on the basis of activity in which he was engaged mainly for regular work in any industry, trade or service. The reference period was a week prior to the enumeration and for seasonal work such as manufacture of sugar, gur etc, the last one year.

The classification of person as worker or non-worker on the basis of main activity resulted in a sharp fall in the percentage of workers to the total population e.g. while in 1961 the percentage of total workers, male workers and female workers to the total population and total male and female population was 52.31, 58.32, 45.89 respecticely, during 1971 Census, the percentage has gone down to 44.16, 53.21, 34.57 resoectively for total population, male and female. This is primarily on account of omission of persons spending a major part of their time on household duties or as students from being taken as main workers. The following economic questions were put to every individual in 1971 Census in order in which they are presented below:-

(a) Broad Category : (i) Worker :

A worker was defined as a person whose main activity is participation in economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. Workers were divided into Cultivators, Agricultural Labourers, Household Industry and other workers.

(ii) The other group was 'non-worker'. A non-worker is one who is not engaged in any main activity or in any economically productive work. Non-workers could be categorised into persons engaged in household duties, students,retired persons or rentiers, dependents, beggars,institutions and other non-workers.

(b) - Place of work.
(c) - Name of Establishment.
(d) - Nature of industry, trade, profession or service.
(e) - Description of work.
(f) - Class of worker.

These questions were asked in question 16 of the individual slip. Question 17 enquired about the secondary work (a) broad category of workers, viz., cultivators, agricultural labourers, household industry or other worker. (b) Place of work, (c) name of establishment, (d) nature of industry, trade, profession or service, (e) description of work (f) class of work.

1961 Census for the first time introduced distinct questions in order to classify working population into two groups - viz., according to occupation and according to industry in which he or she is working. The same pattern was followed in 1971 also without any variation in the definition of the terms "Occupation" and "Industry". In the 1971, the occupational classification of working population has been done as per National Classification of Occupations 1968 and Industrial Classification was done based on the Industrial Classification 1970. On the basis of industry, workers have been divided into 9 categories in which they are reported to be working viz., (i) Cultivators, (ii) Agricultural Labourer, (iii)Livestock, forestry, fishing, hunting, plantations, orchards, and allied activities, (iv) mining and quarrying, (v) Manufacturing processing, servicing and repairs (vi) Construction, (vii) Trade and Commerce, (viii) Transport, storage and communications, (ix) other services.

In all there are 19 tables in which the economic tables have been presented in this volume.

1. B.I Part A- Workers and non-workers according to main activity classified by sex and age-groups.

2. B-I Part B--Female workers and non-workers according to main activity classified by marital status and age groups.

3. B-II - Workers and non-workers in cities and non-city urban areas according to main activity aclassified by sex and age-groups.

4. B-III-Part A- Classification of workers and non-workers according to main activity by educational levels in urban areas only.

5. B-III Part B- Classification of workers and non-workers according to main activity by educational levels in rural areas only.

6. B-IV-Part A - Industrial classification of persons at work other than at cultivation as main activity by sex and divisions, major groups and minor groups.

Appendix to B-IV-Part -A.
- Distribution of workers in manufacturing, processing, servicing and repairs by household industry and non-household industry.

7. B-IV-Part B - Industrial classification of workers in manufacturing, processing, servicing and repairs on household industry basis as main activity by sex and class of workers.

8. B-IV-Part C - Classification of workers in non-household industry, trade, business, profession or service as main activity by class of workers, age and sex.

9. B-IV-Part D - Industrial classification by sex and class of workers of persons at work in non-household industry, trade, business profession or service as main activity.

10. B-IV-Part-A - Occupational classification by sex of persons at work according to main activity other than cultivation.

11. B-V-Part B - Occupational classification by sex and class of worker in non-household industry, trade, business, profession or service as main activity.

12. B-VI-Part A(i)-Occupational classification of persons at work according to main activity other than cultivation classified by sex and broad age-groups in urban areas only.

13. B-VI-Part A(ii)-Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in urban areas only.

14. B-VI-Part B(i)-Occupational classification of persons at work according to main activity other than cultivation by sex and age-groups in rural areas only.

15. B-VI Part B(ii) -Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in rural areas only.

16. B-VII - Secondary work i.e. persons having main activity (i) cultivators (ii)agricultural labourers (iii) household industry, (iv) non-household industry, trade, business or service and (v) non-workers classified by sex and by secondary work (i) Cultivators, (ii) Agricultural Labourers (iii) Household Industry, (iv) non-household Industry, trade, business or service.

Appendix to B-VII -Distribution of persons having secondary work as non-household industry.

17. B-VIII - Persons classified as non-workers according to main activity cross-classified by sex, age-groups and type of activity.

18. B-IX-Part A -Non-workers categorised as other aged 15 and above classified by sex, age-groups and educational levels in urban areas only.

19. B-IX-Part B- Non-workers categoriesd as others aged 15 and above classified by sex, age-groups and educational levels in rural areas only.

These economic tables were comoiled during the tenure of my predecessor Shri J.M.Jala,I.A.S, now Commission-er of Division. I would place on record my gratitude to him and the bandof dedicated colleagues who assisted him in compiling the Economic Tables.

I would also like to place on record my gratitude to Shri P.Padmanabha, I.A.S, Registrar General,India and Shri N.C.Nag, Deputy Registrar General (Social Studies) who have been unfailing sources of inspiration and guidance to me in bringing out this volume.

I would like to record my aporeciation to Shri M.K.Rajeeve , L.D.Clerk who has single-handedly undertaken the typing of the tables and Shri Dilaram Pandey, Junior Gestetner Operator who has done a very clean work in cyclo-styling the tables.

Keeping the dictum,"better late than never", this volume has been brought out though belatedly as the data on economic activities of the people of our state is considered as vital informations and with the fond hope that it will come in handy to the scholars and administrators.

Dated Shillong
the 27th May,1982

J.TAYENG,

B - ECONOMIC TABLES

B.1 Part A - Workers and non-workers according to main activity classified by sex and age-groups.

Fly-leaf.

This is the basic economic table which corresponds to Table B-I of 1961 Census. The Table classifies the entire population into two broad classes of 'workers' and 'non-workers' and further gives their break-up by sex for total, rural and urnan areas upto district level. The workers have further been classified into the following nine industrial categories :-

I. Cultivators;
II. Agricultural labourers;
III. Livestock, forestry, fishing, hunting and plantations, orchards and allied activities;
IV. Mining and quarrying;
V. Manufacturing, processing, servicing and repairs;
   (a) Household industry;
   (b) Other than household industry
VI. Construction;
VII. Trade and Commerce;
VIII. Transport, storage and communications;
... and
IX. Other services.

The non-workers and various categories of workers have been cross classified by the following nine age-groups.

1. 0-14 years
2. 15-19 years
3. 20-24 years
4. 25-29 years
5. 30-39 years
6. 40-49 years
7. 50-59 years
8. 60 + years
9. Age not stated.

In 1961 Census, only five age groups viz. 0-14, 15-34, 35-59, 60 + and age not stated were adopted.

B.I Part B

Female workers and non-workers according to main activity classified by marital status and age groups.

Fly leaf.

This table is an innovation of 1971 Census and relates only to female workers and non-workers according to main activity classified by marital status and age group. This table gives the data separately for total, rural and urban areas for the state as a whole on full count. As in table B-I Part A, the female workers have been further cross-classified into nine broad industrial categories and nine age-groups. The marital status groupings adopted for this table are never married, married, widowed, divorced or separated, and unspecified status.

This table provides valuable data on the participation of female workers in various sectors of the state of Meghalaya.

B.II- Workers and non-workers in cities and non-city Urban areas according to main activity by sex and age-groups.

Fly-leaf.

This table is similar to table B-I Part A with a difference that it is confined to the presentation of data for city and non-city urban areas only. It gives detailed information regarding the distribution of workers by industrial categories as also the number of workers and non-workers by sex and broad age-groups.

One of the innovation adopted at the 1971 Census is the concept of urban agglomeration which is an imporovement over the town group concept of 1961 Census. The urban agglomeration is a continuous urban spread constituted of core town and its adjoining urban out-growths or two or more physically contiguous towns together with continuous well recognised urban out-growths, if any, of such towns. Under this definition, only one urban agglomeration viz., Shillong Urban agglomeration was formed in Meghalaya.

It will be seen from the table that in respect of U.K & J Hills district, non-city urban does not exist as all the three towns viz., Nongthymmai, Mawlai and Shillong Cantonment are contiguous to Shillong town and form Shillong Urban Agglomeration.

B-II WORKERS AND NON-WORKERS IN CITIES AND NON-CITY URBAN AGE

B.III Classification of workers and non-workers according to main activity by educational levels.

Fly-leaf.

As in 1961 census, table B-III has been split into two parts at the 1971 census. Part A deals with the urban areas and part B with the rural areas. The figures presented in this table are based on full count upto district level. The table gives data relating to the literacy and educational levels of working population under the broad industrial categories and of non-working population. The classification of literacy and educational levels adopted for both parts are given below :-

Part-A (Urban areas).

1. Illiterate.
2. Literate (without educational level).
3. Primary.
4. Middle.
5. Matriculation or Higher Secondary.
6. Non-technical diploma or certificate not equal to degree.
7. Technical diploma or certificate not equal to degree.
8. Graduate degree other than technical degree.
9. Post-graduate degree other than technical degree.
10. Technical degree or diploma equal to degree or post-graduate degree.
    (i) Engineering and technology
    (ii) Medicine.
    (iii) Agriculture, veterinary and dairying.
    (iv) Teaching.
    (v) Others.

Part-B (Rural areas).

1. Illiterate.
2. Literate (without educational level).
3. Primary.
4. Middle.
5. Matriculation or Higher Secondary.
6. Non-technical diploma or certificate not equal to degree.
7. Technical diploma or certificate not equal to degree.
8. Graduate and above

Co ntd.../2/....

At present in Meghalaya classes I to III constitute the Primary section while classes IV to VI the Middle. The High School section has classes VII to X.

The data given in this table will reflect the incidence of literacy among workers engaged in activities falling under the nine industrial categories and will be of si nificance for assessment of the educational standards of available manpower.

B-IV INDUSTRIAL CLASSIFICATION OF WORKERS BY MAIN ACTIVITY.

Part A- Industrial classification of persons at work other than at cultivation as main activity by sex and divisions, major groups and minor groups. (There is an appendix to this table which gives data on distribution of workers in manufacturing, processing, servicing and repairs by household industry and non-household industry).

Part B: Industrial classification of workers in manufacturing, processing, servicing and repairs on household industry basis as main activity by sex and class of workers.

Part C: Classification of workers in non-household industry, trade, business, profession or service as main activity by class of workers, age and sex.

Part D: Industrial classification by sex and class of workers of persons at work in non-household industry, trade, business, profession or service as main activity.

Fly-leaf

Part A gives sex-wise distribution of working population other than those engaged in cultivation by divisions, major groups and minor groups of the National Industrial Classifications, 1970. This table has been prepared on full count for all areas and urban areas of the state down to the district level. The appendix to this table gives data on workers engaged in manufacturing, processing, servicing and repairs classified by household industry and non-household industry.

Part B- gives the details of workers at household industry for total rural and urban areas of the state by sex. The workers are further classified by class of workers viz., employees and single workers. The number of family workers is not presented separately in this table but it can be derived from the table itself. The data in the table have been presented by divisions and major groups of N.I.C, 1970.

Part C: is an innovation of 1971 census and gives the age composition of each class of workers engaged in activities in non-household industries, trade, business, professions or services. These are represented by industrial categories III to IX except V(a). The table has been prepared for all areas and urban areas of the state as a whole and not its districts. The age-groups adopted for this part are 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60 + and age not stated.

Part D gives data on the distribution of workers by each class of worker viz. employer, employee, single worker and family worker by sex and also by divisions and major groups of N.I.C 1970. This table has been prepared for total and urban areas of the state down to district level.

After the 1961 Census, a technical committee consisting of the representatives of the office of the Registrar General, India, Directorate General of Employment and Training, Ministry of Internal Trade and Industry and the Central Statistical Organisation was contituted to work out a threedigit level of standard classification of industry. The Committe prepared the NIC 1970. This has been adopted by the office of the Registrar General, India with suitable modifications. The NIC 1970 consists of 10 divisions, 66 major groups and 385 minor groups. The description of each division, major group and minor group of NIC 1970 are given in appendix II.

B-IV PART A INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN AT CULTIVATION AS MAIN ACTIVITY BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS.

TABLE B-V

PART A- Occupational classification by sex of persons at work according to main activity other than cultivation.

PART B- Occupational classification by sex and class of workers in non-household industry, trade, business, profession or service as main activity.

FLY-LEAF

This is one of the two tables on occupation of workers, the other being table B-VI - Occupational classification of persons at work other than cultivation classified by sex, broad age groups and educational levels in both rural and urban areas.

The table B-V has been divided in two parts viz., Part A and Part B. Part A corresponds to table B-V of 1961 and has been prepared for total and urban area for the state as a whole. It gives the occupational distribution of workers who are engaged in non-agricultural occupations cross classified by industrial categories.

Part B gives the distribution of workers in household industry, trade, business, profession or service by divisions and groups of National classification of occupation, 1968, cross classified into different class of workers i.e. employers, employees, single worker and family workers. This part has also been prepared for total and urban area for the state as a whole.

Occupational classification has been based on the National classification of occupation (NCO), 1968 under 'division', 'group' and 'family'. The description of each division, group and family is reproduced in annexure.

B-V PART A OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION.

TABLE B-VI

Part A(i) Occupational classification of persons at work according to main activity other than cultivation classified by sex and age groups in urban areas only.

Part A(ii) Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in urban areas only.

Part B(i) Occupational classification of persons at work according to main activity other than cultivation classified by sex and age groups in rural areas only.

Part B(ii) Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in rural areas only.

FLY-LEAF

This table like table B-V is based on occupational classifications and presents data by sex of persons at work other than cultivation. The presentation is, however, combined to the two-digit code, i.e., group level only. It is divided into two parts, each with tow sub divisions: Parts A(i) and A(ii) furnish data for urban areas and B(i) & B(ii) for rural areas.

B-VI A(i) has been prepared for urban areas and upto division and groups levels of the National classification of occupation (NCO). The population under each division and group of NCO has been classified by eight age-groups 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60 + and age not stated.

B-VI Part A(ii) has been prepared for urban areas and at division and group levels by NCO. These have been further cross-classified by broad educational levels.

Tables B-VI Part B(i) and B(ii) relate to rural areas only. The presentation of data follows the pattern adopted for table B-VI Part A(i) & A(ii). However, in table B-VI Part B(i), the educational levels are fewer in number than in table B-III part B. The educational levels adopted are literate(without educational level) Primary, Middle, Matriculation or Higher Secondary and Graduate and above.

Date are presented in these tables for state and district.

B-VI PART A (1) OCCUPATIONAL CLASSIFICATION OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION CLASSIFIED BY SEX AND AGE-GROUP IN URBAN AREAS ONLY.

B-VII- Secondary work i.e. Persons having main activity (i) Cultivators, (ii) Agricultural labourers (iii) household industry, (iv) non-household industry, trade, business or service and (v) non-workers classified by sex and by secondary work (i) cultivator, (ii) agricultural labourer, (iii) household industry or (iv) non-household industry, trade, business or services.

Fly leaf :

Table B-VII has been prepared for total, rural and urban areas of the state and districts. It gives data on secondary work. The persons having main activity as cultivator agricultural labourers, household industry, non-household industry, trade, business or service and non-workers have been further cross tabulated in case of persons whose secondary work is either (i) cultivation, or (ii) agricultural labourer (iii) household industry, trade, business, service etc.

The table has been supplemented by an appendix giving detailed distribution of persons whose secondary work is non-household industry. The secondary work has been presented upto the level of major group of NIC-1970. The main activity has been presented at division level of NIC and non-workers by household duties, students and all others. The appendix has been prepared for total, rural and urban areas of the state only.

B-VII SECONDARY WORK i.e. PERSONS HAVING MAIN ACTIVITY(i)CUL-(iv) NON-HOUSEHOLD INDUSTRY,TRADE,BUSINESS OR SERVICE AND (i) CULTIVATORS (ii) AGRICULTURAL LABOURERS (iii)HOUSEHOLD TRADE, BUSINESS

Industry,are given at two digit level of

Trade,Business or Service"are given at one
as H.W.,S.T. and all other Non-Workers.
Students.

B-VIII- Persons classified as non-workers according to main activity cross classified by sex, age-groups and type of activity.

Fly-leaf :

This table gives data about non-working population of the state and its districts separately for rural and urban areas. The non-working population has been classified into the following seven categories as against eight categories in 1961 Census.

(i) Students
(ii) Persons engaged in household duties.
(iii) Dependents and infants.
(iv) Retired, rentier and persons of independent means.
(v) Beggars, vagrants, etc.
(vi) Inmates of penal, mental and charitable institutions.
(vii) Others.

The last category 'Others' largely comprises the 'unemployed'. These categories of non-workers have further been cross-classified by nine, age-groups viz. 0-14,15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60 + and age not stated.

This table will be of immense use for studies relating to man-power utilisation.

B- IX - Non-workers categorised as 'others' aged 15 and above classified by sex, age-group and educational levels.

Fly-leaf:

This table covers the last category of non-workers viz., 'others' who comprise largely the unemployed persons. The table has been divided into two parts viz., Part A and Part B. Part A of the table relates to urban areas and gives the sexwise distribution of non-workers categorised as 'Others' by four age-groups viz., 15-19, 20-24, 25-29, and 30 +, crossclassified by nine educational levels as adopted for B-III Part A.

Part B of the table relates to rural areas and gives the distribution of non-workers categorised as 'others' aged 15 and above, by same age-groups as in case of Part A, further classified by educational levels as adopted for B-III Part B.
