GENERAL ECONOMIC TABLES

TABLE B-V

OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN AT CULTIVATION

This is an entirely new table in which cross tabulation of broad industrial categories and occupations is made for the first time. The 9 industrial categories of workers are :—

I As Cultivator
II As Agricultural Labourer
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities
IV At Household Industry
V In Manufacturing other than Household Industry
VI In Construction
VII In Trade and Commerce
VIII In Transport, Storage and Communications
IX In Other Services

Separate data are furnished for persons working in Household Industry and other industrial categories excepting those relating to Category I-Cultivator and Category II-Agricultural labourer. In the past censuses the term 'Occupation' was used to indicate the means of subsistence or livelihood or the supporting sector of economy. It is only in 1961 Census that the term has acquired a precise connotation as the 'function' or 'exact work which a person performs in any branch of economic activity'. The National Classification of Occupations is reproduced as Annexure I to the Table. The data have been presented only for 'total' and 'urban' for the State, Division and each district separately. Data for 'rural' areas can be worked out by substracting the 'urban' figures from 'total'.

Families having less than 1% of workers of the respective division (less than 0.5 per cent in case of families of Division 7–8) have not been shown in the table, but are given in the Appendix to this table. Divisions thus affected are marked with an asterisk (*). Lines with nil entries have been omitted.

While applying quality check in the Central Tabulation Unit, some occupations appeared to have been classified under inappropriate industrial categories vis-a-vis the occupations or the nature of work done by persons in the economic sector of their activity. Such cases are listed in Annexure II to Table B-V indicating the appropriate industrial category in which they deserve to be classified. Persons thus affected number 1,466 which form a negligible percentage of the total workers (2,703, 528). Their effect, if any, on the ultimate results would obviously be insignificant. The circumstances, however, under which such incongruities have appeared may be noted as under:-

1. According to the original plan, in rural tabulation offices from which these incongruities are found, coding for industry and occupation was undertaken after the slips were sorted for industrial categories and not before as was done in the case of urban slips.
2. At the time of coding the replies to Questions 10 and 11 of the Enumeration Slip, industrial categories were checked to ensure that definite correlation exists between the code numbers and the industrial categories adopted in the Census. No scrutiny was, however, applied with a view to establish correlation between the occupational families and the industrial categories, as the possibility of some of the occupational families being incompatible with the industrial category was not envisaged at the time of sorting.
3. Further, some of the occupational families which seem incongruous could not be detected at the sorting stage, possibly due to the fact that the description given in the enumeration slips was generally better for industries than for occupations which were sometimes vague and led to such anomalies.
4. Since such detailed coding of individual slips for industry and occupation has been undertaken in the Census tabulation for the first time, inconsistencies of the kind noted in the annexure are but natural in the absence of any previous experience about the incompatibility to be guarded against.

The Occupational Families 400–Cultivators (Owners), 401–Cultivators (Tenants) and 414–Agricultural labourers are excluded from Table B-V. Similarly Occupational Group X0–Workers without occupations and its Families X00–Workers without occupations : Matriculates and above, X08–Workers without occupations: Literates and X09–Workers without occupations: Others, are also excluded from this table. The Occupational Family 0X4–Geographers is deleted and Family 073 has been assigned to 'Geographers'. The Occupational Family '673–Teleprinter Operators' is newly added in the National Classification of Occupations.

TABLE B-VI

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN *URBAN AREAS ONLY*

This is a new table introduced for the first time in 1961. It gives occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in urbar areas only.

The literate workers under each occupational division are classified by broad age-groups : 0-14 15-34, 35-59 and 60+ and further classified according to educational levels, viz., Literate (withou educational levels), Primary or Junior Basic, Matriculation or Higher Secondary, Technical diploma not equal to degree, Non-technical diploma not equal to degree, University degree or post-graduate degree other than technical degree and technical degree or diploma equal to degree or post-graduate degree under the head Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and Others. The table thus gives useful information about those occupations which attract educated personnel.

The distribution of total workers by broad age-groups for each occupational division is not available and not shown under columns 3, 4 and 5.

All the occupational divisions are spelt out below in terms of their description in order to facilitate the reading of the table.

DIVISIONS

0 Professional, Technical and Related Workers
1 Administrative, Executive and Managerial Workers
2 Clerical and Related Workers
3 Sales Workers
4 Farmers, Fishermen, Hunters, Loggers and Related Workers
5 Miners, Quarrymen and Related Workers
6 Workers in Transport and Communication Occupations
7-8 Craftsmen, Production Process Workers, and Labourers not Elsewhere Classified
9 Service, Sport and Recreation Workers
X Workers not classifiable by occupation

Lines with nil entries have been omitted.

TABLE B-VII

PART-A—PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY (i) AS CULTIVATOR OR (iii) AGRICULTURAL LABOURER

Part A of this table is prepared for the persons whose principal work is given as cultivator, agricultural labourer or working at household industry and whose secondary work is any one of the remaining two categories. The figures are given for total/rural/urban.

In case of persons engaged in more than one productive activity that which occupied most of his time, was considered as his principal work. It was distinguished by a ring round one of the four economic questions, viz., 8, 9, 10 or 11 of the individual slip, viz., cultivator, agricultural labourer, household industry or non-household industry respectively, which occupied most of his time. The secondary work was that activity which occupied most of his time next to his principal work. Whenever a person followed only two types of activities, the activity other than principal work was treated as secondary. However, in case of persons having more than two activities, the secondary work was distinguished by a tick on the right hand side of the question number.

Table B-VII-A of 1961 gives cross-tabulation between principal work and subsidiary work of persons working in cultivation and household industry or *vice versa*. In other words it shows the extent to which cultivation is supplemented by household industry or *vice versa*.

In the stub, the principal work, viz., cultivator, agricultural labourer or household industry is shown with division and major group as against secondary work in the columns.

Major groups of household industry where persons having secondary work as cultivation or agricultural labour are less than 5 per cent of persons having the major group as principal work, have not been shown in the table but are given in the appendix to this table. Divisions thus affected are marked with an asterisk(*).

PART-B—INDUSTRIAL CLASSIFICATION BY SEX OF PERSONS WORKING IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE WHO ARE ALSO ENGAGED IN HOUSEHOLD INDUSTRY

In part B the principal work, viz., industrial classification of the non-household industry is given by divisions and major groups and the additional work, viz., household industry is also given by divisions and major groups. The figures are given for total/rural/urban. This part is prepared by cross-tabulation of persons whose principal work is non-household industry, profession, trade, business or service and who also work in household industry. In such cases Q. 11 of the individual slip is marked with a ring and there is also an entry in Q. 10 regarding household industry. The additional work in this table is confined to household industry only.

The relevant extract from the Indian Standard Industrial Classification is reproduced below to enable the reader to ascertain the descriptions of divisions and major groups occuring in the table.

TABLE B-VIII

PART-A—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN *URBAN AREAS ONLY*

PART-B—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS IN *RURAL AREAS ONLY*

This is a new table prepared for the first time in 1961. It throws light on educated unemployment in different age-groups. This will be useful for purposes of planning for employment and also assessing the available man-power.

The table is presented in two parts. Part-A of the table relates to urban areas only. It gives classification of unemployed persons by their educational levels and age-groups. Unemployed persons have been divided into two categories, viz., (i) those who are seeking employment for the first time and (ii) those who were employed before but now out of employment and seeking work. The age-groups given in the category (i) are quinquennial viz. 15-19, 20-24, 25-29, 30-34, 35+ and those given in category (ii) are 15-19, 20-24, 25-34, 35-44, 45-59 and 60+. The age-groups are further cross-tabulated with different educational levels of educated unemployed.

Part B of the table gives data for rural areas only. The educational levels in this part are, however, limited to Primary or Junior Basic and Matriculation and above.

TABLE B-IX

PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

During 1961 Census, classification of non-working population into 8 types of different activities is made for the first time. The eight-fold activities of non-workers are based on the recommendation of the United Nations Organisation.

This table is compiled for total/rural/urban from the information available in Question No. 12 of the individual slips, relating to non-working population. The activities of non-workers have been classified into eight different categories, viz., (i) Full time students, (ii) Household duties, (iii) Dependents, infants and disabled persons, (iv) Retired persons, rentiers or persons of independent means, (v) Beggars, vagrants, etc., (vi) Inmates of penal, mental and charitable institutions, (vii) Persons seeking employment for the first time and (viii) persons employed before but now out of employment and seeking work. These data are cross-tabulated by broad age-groups, viz., 0-14, 15-34, 35-59 and 60+.

Since, the basis of economic activity adopted in 1961 is work as against income or economic independence in 1951, persons in receipt of income without work who were treated as workers in 1951 are now treated as non-workers. These are rentiers, pensioners, beggars and independent women without any indication of work.

Full time students in age-groups 35-59 number 265 males and 93 females, corresponding figures in age-group 60+ being 86 males and 16 females. While it might appear unusual to have full time students in these age-groups, they relate either to (i) persons attending adult literacy classes or (ii) to those who in later years are leading a life devoted to religious studies and have therefore chosen to return themselves as such.

Another point worthy of note relates to 13,944 males returned as doing household duties. Though it is the womenfolk who generally attend to household duties, menfolk cannot be entirely ruled out from this category of work. For, as is wellknown, there are certain communities like Ahir, Rabari, etc., wherein it is the females who run the household and the males who idle away their time doing nothing except attending to some domestic work.

On account of application of quality check by the Central Tabulation Unit two types of cases have come to light, namely, (i) where the student population in the age-group 0-14 is more than the literate population in age-group 5-14 and (ii) where the student population in the age-group 0-14 is less than the literate population 5-14. The following are the cases in which the figures of the 1st or 2nd type are predominant :

1st type : Jamnagar (Male-Rural), Kutch (Male-Rural), Mehsana (Male-Urban), Baroda (Male-Urban) and Dangs (Rural)

2nd type : Mehsana (Female-Rural), Ahmedabad (Female-Urban), Broach (Rural), Panchmahals (Female-Rural), Kaira (Female-Rural), Sabarkantha (Female-Urban), Kutch (Female-Urban) and Amreli (Female-Rural)

The excess in the student population over the literate population can be attributed to the following :

(1) Persons who are students of 1st stage of Primary, Nursing and Kindergarten have not been treated as literates.

(2) Instructions to enumerators laid down that a person could be considered as literate provided he could both read and write. The test for reading was prescribed as ability to read a simple letter either in print or in manuscript and the test for writing was prescribed as ability to write a simple letter. Generally children studying upto vernacular second standard cannot be considered to have the ability to read and write. These the enumerators have not treated as literate and rightly so, although they may have been returned as full time students.

(3) If the children in the age-group 0-14 are not returned as doing any other work in addition to their study which might bring some income to the family, such cases will also contribute to increase the number in the category of students.

As regards the second type of cases it is interesting to note that the excess has mainly been reported in the category of females. This goes to show a general tendency on the part of parents in the rural areas and also in urban areas of backward districts, to remove girls beyond the age of 10 or 12 from school and utilise their services for household work.
