ACKNOWLEDGEMENTS

I am thankful to Shri K.D. Ballal, Central Tabulation Officer, Delhi, and his staff who very kindly checked the tables for accuracy and made useful suggestions for improvement.

In the Maharashtra Census Office, Shri D. V. Rangnekar, Deputy Superintendent of Census Operations, rendered valuable assistance in compilation of the tables and notes. I should also specially mention Shri A. W. Mahatme, Tabulation Officer, and Sarvashri Vyas Rao and J. S. Natekar, Statistical Assistants, for their very hard and sincere work for the volume.

I am also grateful to the Manager and the Staff of the Government of India Press, Nasik, for the expeditious printing for the Volume.

B. A. KULKARNI.

INTRODUCTION

THIS PART of the Census Report presents occupational data for workers in Maharashtra, its four administrative divisions and twenty-six districts cross-tabulated by sex, broad industrial categories, age-groups and educational levels. Only two tables are presented here. But they are voluminous and we had to make an independent volume for them. Such exhaustive material on occupational classification of workers is being presented here for the first time in India.

2. A note is added at the beginning of each table to explain its layout, method of presentation, concepts, definitions and limitations of the material presented. These notes do not, however, contain any analysis or review of the material presented in the Tables. That is reserved for Part I-A of the Census Report.

The 1961 Census

3. The 1961 Census was conducted between the 10th and 28th February, 1961. The enumerators called on each household in their assigned areas and filled in Census Forms by interviewing one or more responsible members of the household. They revisited all the households between the 1st and 5th March, and corrected their forms for changes due to births and deaths occurring between their first visit and the Census reference date, *viz.*, sunrise of 1st March, 1961.

Urban Areas

4. Urban areas or towns are places which either have a municipality or cantonment or have been treated as towns because they have—

(*a*) a population of 5,000 or more; and

(*b*) 75 per cent or more of male workers engaged in non-agricultural pursuits.

Economic Questions

5. Information collected in the Census for each individual included the following economic questions:—

" 8 Working as Cultivator.

9 Working as Agricultural labourer.

10 Working at Household Industry—

(*a*) Nature of work,

(*b*) Nature of Household Industry,

(*c*) If Employee.

11 Doing work other than 8, 9 or 10—

(*a*) Nature of work,

(*b*) Nature of industry, profession, trade or service,

(*c*) Class of Worker,

(*d*) Name of Establishment."

Entries made against Questions 8 and 9 related to workers at cultivation and entries against Questions 10 and 11 to persons at work other than cultivation. The material presented in this Part relates only to the latter group of workers and has been compiled mainly from the answers to Questions 10 (a) and 11 (a) mentioned above. Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations like tea, coffee, rubber, cinchona and other medicinal plantations. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations have been entered in Question 10 or Question 11 as the case may be.

Economic Classification

6. The 1961 Census scheme of economic classification is altogether different from that used in 1951 or earlier Censuses. In those former Censuses, income or economic independence was made a criterion for measuring the economy of the country. Economically independent and economically dependent persons had been classified separately. They were called earners and dependants. An intermediate category of economic semi-dependence was introduced in 1931, and continued in 1941 and 1951. They were called working dependants in 1931, partly dependants in 1941 and earning dependants in 1951.

7. In practice, however, this intermediate category did not seem to have worked well. It was felt that the strict application of the criterion of economic independence suppressed those who worked in family economic activities but did not actually earn an income.

8. The 1961 Census, therefore, laid stress on " work " so that all people who worked (including family workers, who were not in receipt of any income, or working children who did not earn enough for their maintenance) were included as workers. The concept of dependency has now been completely abandoned for economic classification of the population. Instead, the classification is into workers and non-workers.

Workers and Non-workers

9. A person is classified as a worker if—

(*a*) in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., he has had some regular work of more than one hour a day throughout the greater part of the working season; and

(*b*) in the case of regular (non-seasonal) employment in any industry, trade, profession or service, he was employed during any of the fifteen days preceding the day of the enumerator's visit to the household.

10. A person who was working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other cause has been treated as a worker. A person who had been offered work but had not actually joined has been treated as a non-worker.

11. "Work" includes not only actual work but effective supervision and direction of work also.

12. Persons under training as apprentices with or without stipend or wages are regarded as workers.

13. An adult woman who was engaged in household duties but doing no other productive work to augment the family's resources has not been considered as working. If, however, in addition to her household work she engaged herself in work such as rice-pounding for sale or wages, or in domestic services for wages for others, in minding cattle or selling firewood or making and selling cow-dung cakes, or grass, etc., or any such work, she has been treated as a worker.

14. Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers who earn an income but who are not participating in any productive work are not treated as workers unless they also work in cultivation, industry, trade, profession or service.

15. A public or social service worker who is engaged in public service actively or a political worker who is actively engaged in furthering the political activity of his party is regarded as a worker.

16. The population classified as workers here is the economically active population including family workers but not including unemployed persons.

17. The Census Questionnaire did not ask any question to determine the extent of full employment or underemployment.

18. Classification of workers doing two or more different types of work, has been done on the basis of their principal work, *i.e.*, the work which consumes larger portion of their time and not necessarily the work which earns larger portion of their income. The occupational classification figures presented in these tables relate to their principal work only.

19. As described earlier, the period of reference for regular (non-seasonal) work in any industry, trade, profession or service was 15 days preceding the day of the enumerator's visit to the household. In the case of seasonal work like cultivation, livestock, dairying, household industry, etc., it was the greater part of the last or current working season. Entries in regard to industry and occupation were not corrected in the second round visits with reference to the date of reference, *viz.*, 1st March, 1961. The material presented here, therefore, relates to the reference period approximating to the conditions as on 1st March, 1961.

Broad Industrial Categories

20. In the 1951 Census, the entire population was divided into eight livelihood classes. Economically semi-active people known as earning dependants were divided according to their secondary means of livelihood and the economically inactive people or dependants were divided on the basis of livelihood classes of persons on whom they were dependant.

21. In the 1961 Census, non-workers are not classified by their dependence on one or the other sector of economy. The working population alone is classified in the following nine broad industrial categories :—

I. Cultivator.
II. Agricultural labourer.
III. Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities.
IV. Household Industry.
V. Manufacturing other than Household Industry.
VI. Construction.
VII. Trade and Commerce.
VIII. Transport, Storage and Communications.
IX. Other Services.

Category I

22. This category includes both owner cultivators and tenant cultivators. Along with workers doing manual work on land are also included persons who are engaged in active supervision or direction of cultivation. All persons working in cultivation of land on which they have either ownership or tenancy rights are included in this category.

Category II

23. All other persons working on land as labourers on wages without holding any right upon the land are classified as agricultural labourers and included in the second category.

Category III

24. Workers in mining, quarrying, livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category.

Category IV

25. "Household Industry" is defined as an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to processing, servicing, repairing or making of goods. This may include sale of goods, but should not be confined merely to buying and selling. Thus, the main criteria for household industry are its smaller scale, its being run at home in urban areas and within the village in rural areas and the participation of the head of the household and/or one or more members of the household. Professional, personal and such other 'Services' are not covered by this definition, although they may be run at home. A person working as an employee in another person's household industry has also been treated as working at household industry.

Category V

26. "Manufacturing" includes all types of production, processing, servicing or repairing of goods. This category does not include production, processing, etc., which may be classified as household industry.

Category VI

27. This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines, waterways, reservoirs, etc.

Category VII

28. This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, moneylending, banking, etc.

Category VIII

29. This category includes workers engaged in transport activities by air, rail, road and water and in services incidental to transport such as packing, carting, loading, unloading etc. Workers engaged in storage, warehousing and communicati on services such as Posts, Telegraphs, Telephones, Wireless Signalling, Information and Broadcasting are also included in this category.

Category IX

30. This category includes (i) Public Utility Services like electricity, gas or water supply and sanitary services; (ii) Central, State, Quasi-Governments or Municipal employees in administrative departments or offices; (iii) professional services; and (iv) Trade or labour associations, recreational services, etc.

Industrial Classification

31. In addition to the primary classification in the nine broad categories mentioned above, the 1961 Census has also classified the workers according to the Indian Standard Industrial Classification Scheme into divisions, major groups and minor groups of Industry. Tables showing the distribution of workers by such elaborate classification of industry cross-tabulated by sex, age, educational levels and employment status are presented in Part II-B (i) of the Census Report.

Occupational Classification

32. The two tables presented in this volume show the distribution of workers by their occupations classified according to the National Occupational Classification Scheme which is reproduced as an Appendix to this note.

33. "Occupation" of a worker is the function which he personally performs by engaging himself in work in any branch of economic activity which is called his industry. The concept of "Occupation" is thus distinct from that of "Industry". The latter is defined as the sector of economic activity in which a worker is engaged. A worker, no doubt, follows his 'Occupation' within a certain 'industry' but the basis for classification of the latter is the character of the establishment or the field of activity in which he is working, while that for classification of the former is the work performed personally by the individual concerned. Thus, for a clerk working in a cotton textile mill, the industry is 'manufacture of cotton textiles', while the occupation is that of a 'clerk'. A clerk working in a bank is engaged in an identical occupation but his industry is 'banking'. The 'industry' of a spinner working in a cotton textile mill is identical with that of the former clerk, but he engages himself in a different 'occupation', *viz.*, spinner.

34. Although the concepts of "Occupation" and "industry" are different, certain occupations are normally found to exist in only one industry. For example, the occupation "fisherman" will be confined only to the 'fishing' industry, and the occupation 'miner' only to the 'mining' industry. But a great number of occupations are found to exist in several industries. Occupations falling in Divisions 3, 4 and 5 of the National Classification of Occupations, will be found confined mainly to particular industrial categories, although a few of these may be found returned in small numbers in other industrial categories also. Division 3 'Sales workers' will be found confined mainly to industrial Category VII mentioned above and Division 4 'Farmers, Fishermen, Loggers, etc.' and Division 5 'Miners, Quarrymen, etc.' to Category III if the industry is a non-household industry and to Category IV if it is a household industry.

35. A question about a person's occupation had been asked in the Indian Censuses right from the earliest Census in 1872. But the word had been used more to indicate the means of subsistence or livelihood or the supporting sector of economy. It had never been used to mean the exact function performed by the individual in any branch of economic activity. Only in the Census of 1931, there were two separate economic questions regarding the principal occupation of earners and dependants and the industry in which they were employed. Unfortunately, no separate tables had been prepared even at that Census on industries and the entire Census classification of occupations from 1872 to 1951 has, therefore, been into the means of livelihood which at best were a combination of both industry and occupation.

36. For the first time in the 1961 Census, the two concepts of 'industry' and 'occupation' have been used with specific meanings distinct from each other and Tables have been prepared separately with very elaborate classification of the working population both by Industry and Occupation.

37. Question 10 (a) of the 1961 Census Questionnaire pertained to the nature of work performed by the individual at household industry. Question 11 (a) was about the nature of work performed by the individual in economic activity other than cultivation, agricultural labour and household industry. Questions 10 (b) and 11 (b) were about the nature of household industry and the nature of non-household industry, profession, trade or service, respectively. Questions 10 (a) and 11 (a) thus elicited information about the Occupation in which he was working.

38. In the Tabulation Offices, Census Slips were first sorted for males and females, then for workers and non-workers and from among the workers separately for each of the nine broad industrial categories. The population included in Categories III to IX covered all persons whose work had been returned either against Question 10 or Question 11. These slips were then coded separately for occupation and industry. For urban slips, the coding was however done before the slip pads were broken for purposes of sorting. The answers returned against Questions 10 (a) or 11(a) were coded for occupations under the National Occupational Classification Scheme (*see* Appendix) and answers against questions 10 (b) and 11 (b) were coded for industries under the Indian Standard Industrial Classification Scheme. The two Tables presented in this volume have been compiled from the coded answers against Questions 10 (a) and 11 (a).

Limitations

39. Both the Tables presented in this volume deal with workers only. The unemployed persons with previous work experience or otherwise are not included here. They are not even shown in division X of workers unclassifiable by occupation.

40. There was no age-limit applied for recording an individual's occupation or industry. The workers shown in the two Tables, therefore, include workers of all ages.

Method of Presentation :

41. The Tables in this Part present the Census material for 31 units, *i. e.* the State, the 4 divisions and the 26 districts. For purposes of the 1961 Census the districts had been given a serial (location code) number running from north-west to south-east. The order of presentation uniformly followed in the tables is based on those code numbers and is shown below :—

TABLE B-V

OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

EXPLANATORY NOTE

This Table shows the occupational classification of workers other than those engaged in cultivation, cross-tabulated by sex and broad categories of economic activity.

2. Occupational classification is according to the National Classification of Occupations (Appendix at pages 5 to 8) in 11 occupational divisions (one-digit), 75 occupational groups (two-digits) and 331 occupational families (three-digits). Material is first presented for the total of all occupational divisions. It is followed by entries for occupational division 0 with break-up for its groups and families presented in the order given in the National Classification of Occupations. The next occupational division 1 follows with its groups and families and so on. Since this table relates to the Occupational Classification of persons actually working, the occupational families X00, X08 and X09 meant for workers without occupations (that is, unemployeds) are not shown in the table. Occupational families 400, 401 and 414 which relate to workers at cultivation also do not appear since the table is restricted to persons at work other than cultivation.

3. Material is presented only for total and urban areas for the State, each administrative division and each district separately. Material for the State is presented first. Bombay Division follows with its constituent districts. Then Poona Division and its districts, and so on.

4. Entries for the rural area of any administrative unit can be worked out as the difference between the figures for the total and the urban area.

5. Cross-tabulation by industry is in seven categories III to IX, as cultivators and agricultural labourers (Categories I and II) are not included in the table. The break-up for categories under any occupational division, group or family is shown by vertical spread under column 1. Each entry for an occupational division, group or family starts with a line for the total of all categories which is followed by a line for each category separately.

6. For economy of space, lines for occupational divisions, groups or families which do not have entries for the State, a division or a district have been omitted from the table relating to that administrative unit.

7. Similarly, the lines for categories having only 'nil' entries under any occupational division, group or family are not presented in the table. The line for the total of all categories is not shown under a Division, Group or Family if there is only one category under it.

8. As a further step for economy, entries for occupational families having less than 1 per cent of the workers of the respective occupational division have not been printed in the table. Instead, the entries for these families are shown in an Appendix to this Table in a run-on style. An asterisk mark is given to the particular occupational division and a cross-reference with the appendix is provided by abbreviations. In respect of Occupational Division 7-8, the limit for shifting entries to the appendix is 0·5 per cent instead of 1 per cent. These limits have been applied with reference to the figures for the total area of the administrative unit (not the urban area) and for the total of all categories.

9. A few occupational entries may appear improbable for rural areas. It will, however; be realised that they are not so if the point is taken into account that the Census was taken with reference to the place of residence and not with reference to the place of work. A few workers may also have been on leave during the reference period and may have been enumerated at their native places far away from their places of work.

10. A miscellaneous code within a Division or a Group has been given wherever adequate details of the occupation were not found recorded on the Individual Slip to enable a specific code being assigned.

11. Some occupations may appear improbable under certain industrial categories. A few examples are quoted below. In all the cases, the industrial Categories reported in the Census have not, however, been disturbed :

(*i*) Under occupational family 220 for computing clerks and calculating machine operators, 7 males and 14 females have been reported for Maharashtra and Greater Bombay under Category IV Household Industry. An industry employing calculating machines or computors may probably be of a scale larger than household industry and this occupational entry may perhaps be more appropriate under Category V Non-household Manufacturing Industry ;

(*ii*) Under occupational family 229, office machine operators not elsewhere classified, 138 males and 2 females are similarly reported for Maharashtra and Greater Bombay under Category IV Household Industry. These occupations may also be more appropriate under industrial Category V Non-household Manufacturing Industry ;

(*iii*) Under occupational family 630, railway engine drivers, 22 males have been reported for Maharashtra under Category III Mining, quarrying, forestry, etc. (20 in Nagpur District and one each in Dhulia and Satara Districts). These drivers are paid by the railways and not by the mining concerns and, therefore, the more appropriate industrial Category may have been VIII Transport ;

(*iv*) Under occupational family 670 telephone operators, 3 males and 1 female have been reported for Maharashtra and Greater Bombay under Category IV Household Industry. If maintaining a telephone is taken as a reflection on the scale of the household industry, the more appropriate industrial category may probably be V Non-household Manufacturing Industry ;

(*v*) Under occupational family 763, installers and repairmen, telephone and telegraph, 21 male workers have been reported for Greater Bombay and four other districts. This type of work is exclusively carried out by the Posts and Telegraphs Department and the more appropriate category may probably be VIII Transport and Communications. They have been classified under Category IX probably because of their reporting service under Government of India;

(*vi*) Under occupational family 795, well diggers, 42 male and 13 female workers have been reported for Poona and six other districts in Category V Manufacturing Industry. These workers were perhaps engaged in construction of buildings for factories or workshops. However, the more appropriate industrial category may have been VI Construction;

(*vii*) Under occupational family 874, operators of earth moving and other construction machinery not elsewhere classified, 97 male workers have been reported for Greater Bombay and seven other districts in the Industrial Category IX Other Services. Some of these workers were perhaps in the employ of the Bombay Port Trust, in which case Category IX would be correct. Otherwise, the more appropriate classification may probably be under Category VI Construction.

Occupational Distribution

12. The percentage distribution of non-agricultural workers in the State in the different Occupational Divisions is as shown below. It will be seen that Occupational Division 7-8 craftsmen, production process workers and labourers not elsewhere classified is the biggest group with 46 per cent. The second biggest is Division 3 of sales workers with 12 per cent. Division 9 of service, sport and recreation workers and Division 2 of clerical and related workers follow in rank with 10 per cent and 9 per cent respectively. Division 4 of farmers, fishermen, hunters, loggers, etc. accounts for nearly 8 per cent although workers at 'cultivation' are excluded from this Table. Division 1 of administrative, executive and managerial workers and Division 6 of workers in transport and communication occupations make almost equal proportions (about 4 per cent). The smallest percentage is in the Occupational Division 5 of miners, quarrymen and related workers.

Percentage of Workers in each Division to Workers in all Divisions

Occupational Divisions	No. of workers	Percentage of workers in each Division to total workers in all Divisions	Percentage of Urban workers to total workers in each Occupational Division
All Divisions	**5,701,404**	**100·00**	**64·01**
0—Professional, technical and related workers	365,707	6·42	62·02
1—Administrative, executive and managerial workers	221,833	3·89	67·34
2—Clerical and related workers	519,610	9·11	89·13
3—Sales workers	697,478	12·23	70·73
4—Farmers, fishermen, hunters, loggers and related workers	435,669	7·64	15·54
5—Miners, quarrymen and related workers	42,595	0·75	25·92
6—Workers in transport and communication occupations	203,408	3·57	79·07
7-8—Craftsmen, production process workers and labourers not elsewhere classified	2,623,384	46·01	61·92
9—Service, sport and recreation workers	585,714	10·27	76·62
X—Workers not classifiable by occupation	6,006	0·11	62·64

Rural-Urban Distribution

13. The above Statement also shows the proportion in the urban areas of the total workers in each occupational division. Occupational Division 2 of clerical and related workers is a predominantly urban Division with 89·13 per cent of workers in urban areas. So are the Occupational Divisions 6, 9, 3 and 1. Only Occupational Division 4 of fishermen, hunters, loggers and related workers and Division 5 of miners, quarrymen and related workers are predominantly rural.

14. Occupational Division 7-8 of craftsmen, production process workers and labourers not elsewhere

classified does not appear highly concentrated in urban areas only because it includes thousands of village craftsmen, carpenters, potters, wool gatherers, etc. and others engaged in household industries.

Occupations and Broad Industrial Categories

15. The percentage distribution of workers for each occupational division in broad Industrial Categories III to IX is as follows :—

Percentage of workers in different Occupational Divisions by categories of economic activity

Categories	Occupational Divisions									
	0	1	2	3	4	5	6	7-8	9	X
III	N	1	1	...	78	99	N	1	1	1
IV	N	N	N	N	20	1	N	28	N	3
V	6	12	20	2	N	...	6	42	4	24
VI	2	5	2	...	N	N	1	7	1	3
VII	1	11	17	98	...	...	2	2	1	4
VIII	2	3	13	N	N	...	84	7	3	5
IX	89	68	47	...	2	...	7	13	90	60
All Categories	100	100	100	100	100	100	100	100	100	100

N=Negligible.

Occupational Divisions 0, 1 and 9 are mostly in Category IX Other Services. Occupational Division 2 clerical and related workers has the largest percentage (47%) in IX Other Services but is also spread over V Manufacturing (20%), VII Trade and Commerce (17%) and VIII Transport, Storage and Communications (13%). Occupational Division 3 of sales workers is naturally concentrated (98%) in Category VII Trade and Commerce. Division 4 of farmers, fishermen, loggers, etc. is concentrated in Categories III and IV. Division 5 of miners, etc. is naturally concentrated (99%) in Category III. So is the Occupational Division 6 of transport workers, etc. concentrated in Category VIII Transport, Storage and Communications. Occupational Division 7-8 is spread over all categories but has the bulk (70%) in Category IV Household Industry and V Manufacturing. Occupational Division 9 is naturally concentrated (90%) in Category IX Other Services.

Categories and Occupations

16. The percentage distribution of workers in each category of economic activity by Occupational Divisions is as shown below. Category IX Other Services has the highest proportion of Occupational Divisions 0, 1 and 9. Category VIII Transport and Communications has the highest proportion of Occupational Division 2 clerical and related workers. Even in Categories VI Construction and VII Trade and Commerce, the clerical occupations have significant proportions of 5·2% and 10·5%, respectively. Category V Manufacturing has 83·9% workers in Division 7-8, 7·9% workers in clerical occupations, 2·1% in administrative, executive or managerial divisions and 1·8 in professional, technical or related occupations. In other words, out of 1000 workers engaged in non-household manufacturing industries in Maharashtra there are 839 manual workers, 79 clerical or white collar workers, 21 executive or managerial staff and 18 professional or technical workers.

N. B.—Occupational Families having less than 1 per cent. of workers in the respective Occupational Division in the case of Divisions other than 7-8 and less than 0·5 per cent. in the case of Division 7-8 are not exhibited in this Table. Figures for such Families have been shown in run-on lines under the respective administrative unit in the Appendix to this Table at pages 371-444.

TABLE B-VI

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

EXPLANATORY NOTE

This Table presents the occupational distribution of persons at work other than cultivation by sex, broad age-groups and educational levels in urban areas only. Material is presented for the State, for each of the four administrative divisions and for each district separately.

2. Occupational break-up is limited to the ten Occupational Divisions (one degit codes) of N.C.O.

3. Age-groups used in column 2 for cross-tabulation are 0-14, 15-34, 35-59 and 60+. A line is added for those who had not stated their age.

4. Cross-tabulation by educational levels is shown by the total literate workers (columns 6 and 7) and then by a break-up of the literate workers for thirteen educational levels (columns 8 to 33).

5. The distribution of literate workers is shown for each age-group and educational level for males and females separately.

6. Occupational and age-group break-up of illiterate workers is not shown here.

7. So far as " total workers " (columns 3 to 5) are concerned, age-group break-up is shown against " All Occupational Divisions " only. It was not compiled for each occupational division separately.

8. For economy of space, age-group lines with ' nil ' entries have been omitted. Where all the workers in an Occupational Division are illiterate, only one line for the 'total' with entries in columns 3 to 5 and blanks in columns 6 to 33 has been presented, and age-group lines have been omitted. Where an Occupational Division has no workers at all, the entry for that Division has been omitted completely.

9. The distribution shown here is of workers excluding those at cultivation (both cultivators and agricultural labourers). The figures against Occupational Division 4 are, therefore, exclusive of those which could be classified in families 400, 401 and 414 relating to " cultivators " and " agricultural labourers ".

10. Literacy is defined as ability to read and write a simple letter. If the person could both read and write and had in addition passed one or more examinations, the highest examination passed was recorded against question 6 in his Individual Slip. The classifica ion by educational levels is based on those returns which indicate the levels actually attained by the workers.

11. Literates have been classified initially into three categories, *viz.* (i) literate without educational level, (ii) primary or junior basic (*i.e.* below matriculation), (iii) matriculation or higher secondary, and further by holders of technical and non-technical diplomas not equal to degrees, university non-technical degrees or post-graduate degrees and technical degrees or post-graduate degrees in Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and Others.

12. *The large figure under "Others" below the indention "Technical Degree or Diploma equal to Degree or Post-Graduate Degree" is due to the inclusion of B.Scs., M.Scs. etc. in general science subjects like Chemistry, Physics, Mathematics, Botany, Zoology, Microbiology, Geology, Geophysics, etc., in this category. The number of persons passing out from the Universities with degrees in such subjects is much larger than the number passing out with degrees in other subjects specifically classified in the Table.*

13. The educational levels shown in columns 8 to 33 are mutually exclusive. The figures for lower educational levels do not include the numbers which appear in higher categories.

14. The distribution of one thousand literate non-agricultural workers in the urban areas of the State in each occupational division by broad age-groups is shown in Statement 1 on page 448.

15. Among the occupational divisions, the proportion of workers in the age-group 0-14 is higher in Division 4—farmers, fishermen, hunters,l oggers, etc.and in Division 9—service, sport and recreation workers. Similarly, the proportion of workers in the age-group 60+ is higher in Division 3 of sales workers and Division 0 of professional, technical and related workers. In all occupational divisions, the proportion of workers in the age-group 15-34 is higher than that of workers in the age-group 35-59. None of the occupational divisions shows that entry is possible only with maturity through some years of experience. Those trends would perhaps appear if the data are analysed by occupational groups and families.

16. The distribution of one thousand literate non-agricultural workers in the urban areas of the State in each occupational division by educational levels is shown in Statement 2 on page 449.

17. Among the occupational divisions, the proportion of literates (without educational level) is higher in Occupational Divisions 4, 5, 7-8 and 9. But, it is significant that even in Occupational Division 1 of executive and managerial group of workers, literate workers without educational level make as much as 18·3% and in Division 0 as much as 8·7% of the total literate workers. The explanation is that in Occupational Division 1, Groups 11 and 13 account for the bulk of the workers and in Division 0, Groups 08 and 0X contribute a substantial number. Similarly, the proportion of workers with only primary or junior basic level is the highest (53%) in Occupational Division 3 of " sales workers ". The proportion of workers who have reached

the educational level " Matriculation " is 44·5% in Division 2 of clerical and related workers and 27·4% in Division 1 of administrative, executive officials, etc. Matriculates account for only 17·6% in Division 6 of workers in transport and communication occupations and for only 4% in Division 9.

18. Among the occupational divisions the actual numbers of workers with educational level " Technical Diploma not equal to Degree " are higher in Divisions 0, 1 and 7-8. Their actual number is significantly low in Occupational Division 6 of transport and communication workers. Similarly, the non-technical degree holders are more in Occupational Divisions 0 (12·4%), 1 (10·8%) and 2 (6·4%).

19. Most of the technical degree holders are in Occupational Divisions 0, 1 and 2. This broad analysis does not itself show that certain occupational divisions are reserved for higher non-technical or technical education. Such trends may become evident if analysis is attempted for occupational groups and families.

20. Some technical degree holders appear in Occupational Division 7-8. Occupational Division 0 of " Professional, Technical and Related Workers " may perhaps have been more appropriate in those cases. Inadequate description of occupations recorded on some of the slips rendered classification of workers into technical workers and production process workers or craftsmen difficult. Moreover, some occupations like Textile designers, Electricians (electrician, aircraft), Radar Mechanics, Supervisors, Telephone and Telegraph, shown in Occupational Division 7-8 may require higher educational or technical qualifications.

21. A few designations commonly used in some industries may also have led to wrong classification of occupations. The terms " spinner " and " weaver " are used in a textile mill to indicate the highly paid and technically qualified spinning and weaving masters as well as workers working as spinners and weavers. Some spinning or weaving masters may have, therefore, been classified in Occupational Division 7-8 instead of in Division 0.
