Central Government Publications

Census Report, Series 11—Maharashtra, is published in the following Parts—

I-A and B	General Report
I-C	General Report (*contd.*)
II-A	General Population Tables (*the present volume*)
II-B	Economic Tables
II-C	Social and Cultural and Tables
II-D	Migration Tables
III	Establishments—Report and Tables
IV	Housing Report and Tables
V	Special Tables on Scheduled Castes and Scheduled Tribes
VI-A	Town Directory
VI-B	Survey Reports on Selected Towns
VI-C	Survey Reports on Selected Villages
VIII-A	Administration Report—Enumeration (For official use only)
VIII-B	Administration Report—Tabulation (For official use only)
IX	Census Atlas of Maharashtra

State Government Publications

25 Volumes of District Census Handbooks in English

25 Volumes of District Census Handbooks in Marathi

Alphabetical List of Villages in Maharashtra

PREFACE

The 1971 census was conducted during the period 10 March 1971 to 31 March 1971 with the sunrise of 1 April 1971 as reference date. Within a fortnight of completion of census enumeration, Census paper I of 1971 giving provisional population totals based on the enumerators' field abstracts was published. This was followed by a supplement to that paper in May 1971.

The data collected in the census were processed in the eight regional tabulation offices established in the state. The present volume is based on the primary census abstracts compiled by these offices. The A-Series tables included in this volume are based on a full count and provide the final census figures for the administrative units down to the tahsils and towns. The village and urban blockwise census figures are presented in part B of the district census handbooks printed separately.

All through the work of organising and conducting the census and the later task of analysis and publication, we were sustained by the prompt guidance and all-out encouragement we received from Shri A. Chandra Sekhar, Registrar General and Census Commissioner, India.

We are grateful to Shri K. D. Ballal, Deputy Registrar General, and Shri K. K. Chakravorty, Central Tabulation Officer, for arranging scrutiny of the tables and for their valuable suggestions.

In the Maharashtra office, Shri D. V. Rangnekar, Deputy Director (Hq.) rendered valuable assistance in planning and conducting the various stages of census work. He supervised the entire tabulation programme and prepared the notes. Technical assistance was provided by Shri A. W. Mahatme, Assistant Director (Tech.).

The compilation of this volume has been possible on account of the ungrudging co-operation and sustained efforts of a team of young and energetic statistical assistants, computors and assistant compilers who worked under the guidance of Kumari V. I. Nimbalkar, Tabulation Officer. The officers and staff of the regional tabulation offices worked zealously and spared no pains in completing the primary tabulation in the stipulated time. Shri P. D. Pradhan looked after administrative matters connected with the volume. Shri S. Y. Pradhan prepared the maps and charts included in it. Shri C. M. Kane was of considerable help in supervising printing arrangements.

I am grateful to Shri S. R. Sethi, Manager, Government of India Press, Nasik, and his colleagues for their co-operation, the promptness with which the work was done and the good quality of printing.

INTRODUCTION

This is the first of the 1971 census reports for Maharashtra. It presents the general population tables A-I to A-V with their appendices and the primary census abstracts prepared on a full count basis. Tables A-I to A-IV are the same as the A series of 1961. Table A-V on the 'standard urban areas' of Maharashtra is a new feature.

2. Paper 1 of 1971 and its supplement brought out within ten days and two months respectively after completion of census enumeration provided the first set of provisional basic population figures for Maharashtra, its districts and cities and towns having 20,000 or more population. These figures were crude totals compiled from the field abstracts furnished by thousands of census enumerators engaged in the 1971 census. The figures had their own limitations and as such were treated as purely provisional. After the processing of the individual slips and other relevant census records in the regional tabulation offices, primary census abstracts for each administrative unit down to every village and every enumerator's block of a town were compiled. The A series tables included in this report are mainly based on these primary census abstracts.

3. An explanatory note has been added as a fly leaf to each table to explain its layout and the definition, and scope of the terms and concepts used in the census. A few inset tables are included in the fly leaves for comparison either with data of earlier censuses or between various administrative units for correlating different aspects of the 1971 census material. The fly leaves are not exhaustive nor do they present detailed analysis or discussions on findings for which General Report, Part I-A will have to be referred to.

4. The first decennial population census in India was taken in 1872 and the 1971 census is the eleventh of the series and the third since independence. This census has thus a special significance as it marks the completion of 100 years of modern census taking in our country.

5. This is the second census in Maharashtra. The 1961 census conducted immediately after the creation of this state provided benchmark data. The 1971 census data will be useful for appraisal of the progress made in the state during the past decade and will provide guidelines for future development.

6. The entire census programme was conducted in two stages according to the calendar which is reproduced below:

CALENDAR OF CENSUS OPERATIONS

STAGE I

(Covering preliminary arrangements and housenumbering and houselisiting stage)

July 1969 to August 1969

1. Preliminary discussions with the state government regarding appointment of census officers.

2. Arrangements for preparation of up-to-date tahsil and town maps.

3. Recognition of new towns that qualify and declassification of existing ones if they do not satisfy the definition of a town.

4. Checking of tahsil maps with village lists.

5. Collection of area figures from the Directorate of land records, municipal corporations and municipal councils in respect of districts, tahsils, cities and towns.

6. Collection of administrative statistics (non-census data) for compilation of the town and village directories.

7. Delineation of standard urban areas in terms of rural and urban units.

September 1969

1. Finalisation of towns for 1971 census and location code numbers for tahsils, villages and towns.

2. Notification of the 1971 census questionnaires and instructions in the *Maharashtra Government Gazette* as required by the census act.

3. Notifications regarding appointment of district census officers, charge officers, etc.

4. Finalisation of estimates of requirements of houselist and establishment schedule forms.

5. Arrangements for receipt and supply of census forms in the district offices and charge offices.

6. Contacting officers concerned with defence establishments, railway colonies, forest areas to ensure their co-operation.

October 1969

1. Delimitation of blocks and circles for housenumbering and houselisting operations.

2. Preparation of charge registers.

3. Estimates of requriement of personnel for the housenumbering and houselisting stage.

4. Contacting local officers of various government departments to make sure of availability of personnel, preparing provisional list of personnel to be appointed as enumerators, supervisors, instructors, section officers and making arrangements for their postings.

5. Preparation of census scheme for each charge and its submission to the Collectors.

November 1969 to December 1969

1. Preparation of census scheme for the district and forwarding it to the Director of census operations before 15 November.

2. Issue of instructions explaining housenumbering and houselisting operations.

3. Training classes for district officers and charge officers on housenumbering and houselisting and establishment schedule.

4. Despatch of houselist and establishment schedule forms and instructions booklets, stationery, etc., to district officers.

5. Appointment of enumerators and supervisors for housenumbering and houselisting operations.

6. Drawing of a training programme for enumerators and supervisors for houselisting.

January 1970

1. Publicity to housenumbering and houselisting stage.

2. Training classes for enumerators and supervisors for housenumbering and houselisting operations including canvassing of houselist and establishment schedule, with practical exercises through training schedules.

3. Supply of census material, houselist schedules, establishment schedules, etc.

February 1970

Commencement of housenumbering and houselisting from 10 February onwards.

March 1970

Completion of housenumbering and houselisting (30 March).

April 1970

Intensive checking and scrutiny of houselisting work (1 to 10 April).

Despatch of completed houselists, establishment schedules, houselist abstracts, etc. (15 April).

May 1970

Commencement of scrutiny and coding of houselist and establishment schedules in the central tabulation unit at the state headquarters.

June 1970

Finalisation of town directories for all towns.

Establishment of machine tabulation unit and commencement of punching and verification operations at the state headquarters.

STAGE II

(Covering preliminary arrangements and census enumeration)

June 1970 to April 1971

June to September 1970

Verification of enumerators' blocks, supervisors' circles and up-dating them for the enumeration of individuals in February-March 1971.

Preparation of list of instructors, supervisors and enumerators for census enumeration.

Assessment by district census offices of requirements of individual enumeration slips and other forms on the basis of houselist population.

October 1970

Finalisation of enumerators' blocks and supervisors' circles by charge officers and preparation of final charge registers for census enumeration.

Final selection of supervisors and enumerators.

Despatch of census material, individual slips and other forms to district census offices for onward transmission to charge offices.

November 1970

Training of census charge officers, sub-divisional officers and other training instructors in enumeration at the district level in two rounds (minimum).

Issue of appointment letters to supervisors and enumerators.

December 1970 to January 1971

Training of supervisors and enumerators in two rounds at tahsil level or other convenient centres, preparation of abridged houselist for their use.

February 1971

Publicity for census enumeration.

Distribution of instructions booklets for filling individual slips to supervisors and enumerators.

Finalisation of village directory (non-census data).

Intensive publicity.

March 1971

Actual census enumeration—10 to 31 March.

Enumeration of houseless population—Night of 31 March.

April 1971

Revisional round—1 to 3 April.

Submission of block abstracts by enumerators and supervisors to charge officers—4 April.

Communication of provisional population figures by charge officers to Collectors—4 April.

Communication of provisional population figures by Collectors to Director of census operations, Maharashtra and Registrar General, India—5 April.

Despatch of individual slips, population records, abstracts, etc., to regional census tabulation offices—10 April to 20 April.

April and May 1971

Post-enumeration check—25 April to 15 May.

Commencement of tabulation work in regional census tabulation offices—1 May.

7. The first stage of census, comprising the preliminary arrangements, housenumbering and houselisting, was completed during the period July 1969 to April 1970; the second stage of preliminaries and the actual census count were completed during June 1970 to April 1971. The reference date for the 1971 census was 1 April 1971. On account of the mid-term poll to Parliament it was postponed by one month from the original date of 1 March to 1 April 1971. The actual period of enumeration (population count) was of 25 days, 10 March to 3 April 1971. The period was divided into two stages. The first round of enumeration was from 10 March to 31 March 1971. During this round, the enumerators called at each household in their assigned blocks and by interviewing one or more responsible members of the household filled in the census questionnaires for the persons living in these blocks. The houseless population was counted on the night of 31 March 1971. The second revisional round was of three days from 1 April to 3 April 1971. During this period, the enumerators called at each household for the second time and recorded all new births, deaths and fresh arrivals which might have occurred between the visit of the first round and the sunrise of 1 April 1971, and thus related the data collected to the sunrise of 1 April 1971.

8. The 1971 census had universal coverage in respect of four ultimate units of enquiry, *viz.*, house, household, establishment and individual person. The census schedule designed for collection of information on the above units were (*i*) houselist for houses and households residing therein, (*ii*) establishment schedules for establishments, (*iii*) individual slip for each individual, and (*iv*) population record for all individuals in a household. The first two schedules were canvassed during the housenumbering and houselisting stage and the other two during the census enumeration.

9. Information regarding houses and households was collected through the houselist on the following items :

(A) House

(*i*) Purpose for which the census house was used, *e.g.*, residence, shop, shop-*cum*-residence, business, factory, workshop, workshop-*cum*-residence, school, bank, commercial house, office, hospital, hotel, etc., or remaining vacant.

(*ii*) Material of wall.

(*iii*) Material of roof.

(B) Household

(*iv*) Name of the head of the household.

(*v*) Whether the head of the household belonged to a scheduled caste or scheduled tribe.

(*vi*) Whether the household lived in owned or rented house.

(*vii*) Number of persons normally residing in the household (a) males, (b) females, (c) total.

(*viii*) Whether the household cultivated any land.

10. Two new questions were included in the 1971 houselist form, *viz.*, (*v*) and (*viii*). The former elicited information about housing conditions of scheduled caste and scheduled tribe households. The latter provided an exhaustive list of cultivating households in the country which could be used as a frame for future investigation.

11. If a house was used as an establisment, information on the following items was collected in a separate schedule known as the establishment schedule :

(*i*) Name of the establishment or of its proprietor.

(*ii*) Type of establishment, *e. g.* (a) government/quasi-government, (b) private or (c) co-operative institution.

(*iii*) Average number of persons working daily the week prior to the enumerator's visit or in the last working season, including proprietor and/or family workers.

(*iv*) If any manufacturing, processing or servicing was done, whether it was on the basis of (a) household industry, (b) a registered factory, (c) an unregistered workshop, (d) description of the products, processing or servicing done, and (e) type of fuel or power used.

(*v*) If used as a trading establishment (i) description of goods bought and sold, (ii) whether it was on the basis of (a) wholesale or (b) retail.

(*vi*) If used as any other establishment, its description, *e.g.*, government office, school, hospital, railway station, barber's shop, cinema theatre, hotel, tea shop, etc.

12. This new feature of the 1971 census was designed to provide an exhaustive inventory of all types of establishments in the country, it will serve as a frame for further investigation on establishments in the future.

13. The houselist form and the establishment schedule used during the 1971 census and instructions to enumerators to fill them will be found in the census reports on housing and on establishments.

14. The main census schedule (Individual slip) or obtaining information in respect of each person in the country contained the following demographic, social and economic questions.

Identification

(1) Name, (2) Relationship to head of household.

Demographic questions

(3) Sex, (4) Age, (5) Marital status, (6) (a) Age at marriage, (b) Whether any child was born in the last one year (For currently married women only), (7) Birth place,—(a) Place of birth, (b) Place—rural/urban, (8) Last residence— (a) Place of last residence, (b) Place—rural/urban, (9) Duration of residence at village or town of enumeration.

Social questions

(10) Religion, (11) Scheduled caste or scheduled tribe, (12) Literacy, (13) Educational level, (14) Mother-tongue, (15) Other languages known.

Economic questions

(16) Main activity—(a) Broad category (i) workers, *e. g.*, working as cultivators, working as agricultural labourers, working at household industry and other workers, (ii) Non-workers and their activities, (b) Place of work, (c) Name of establishment, (d) Nature of industry, trade, profession or service, (e) Description of work, (f) Class of worker.

(17) Secondary work—(a) Broad category of worker, *e. g.*, working as cultivator, working as agricultural labourer, working at household industry and 'other workers', (b) Place of work, (c) Name of establishment, (d) Nature of industry, trade, profession or service, (e) Description of work, (f) Class of worker.

15. The scope of the questions on migration was extended by adding new questions on place of last residence, etc. [8(a) to 8(d)]. A classification of the population by place of birth hitherto gave a crude measure of the source and volume of migration. The new questions provide data about migration between the time of birth and the time of entry in the given area. The newly introduced questions 6(a) and 6(b) were designed to provide information about current fertility among the currently married females.

16. The social questions followed the usual pattern except that the usual qustion on 'nationality' was dropped. There were questions on religion, scheduled castes and scheduled tribes, literacy and educational level, mother-tongue and other languages known. The definition of 'literacy' was the ability both to read and write with understanding in any language. A person who could merely read but could not write was not treated as a literate. If a person could both read and write and had also passed a written examination or examinations as a proof of an educational standard attained, the highest examination passed was recorded. For languages other than mother-tongue, any language which a person understood best and could use with ease in communicating with others was recorded. The number of such languages recorded were not to be more than two.

17. There were 12 economic questions [16(a) to (f) and 17(a) to (f)] in the individual slip. As in 1961, the 1971 census laid stress on work (economic activity) instead of 'earning' or 'dependency' in deciding whether a person was a worker (economically active) or a non-worker. Consequently all persons who worked (including family workers who were not in receipt of any income or working children who could not earn enough for their maintenance) were included as workers if their main activity was reported as an economic activity. The reference period for work proposed for the 1971 census was one week for regular work and the last working season for seasonal work. For regular work, an individual was classified as a worker if he had been economically active on any one day of the previous week. For seasonal work, the 1961 norm of at least one hour's work a day during the major part of the working season was done away with. The person enumerated was classified as a worker or non-worker on the basis of his main activity. The concept of 'worker' at the 1961 census, it was thought, tended to inflate the number of workers as persons who were basically non-workers like housewives, students, etc., were included in the category of workers even though their participation was marginal. In the case of persons who were basically occupied in 1971 as house-workers, students, rent-receivers, pensioners, etc., they were classified as such for their main activity and were grouped under 'non-workers'. If they were also engaged in some economic activity obviously not to the same extent as full-time workers, that activity was ascertained and recorded under the head of secondary work. The secondary work, if any, of those who were basically classified as workers was also ascertained. For workers, therefore, their principal work and secondary work, if any, were recorded. In the case of non-workers engaged marginally in some economic activity, their main activity was considered as non-workers and secondary work was the marginal activity in which they participate.

18. To make sure that no person engaged in any economic activity was omitted, the activity of a person who was a non-worker was also ascertained and the non-working population was classified into eight categories.

19. Another important question added to the questionnaire was the place of work, which yielded useful data about commuting from rural to urban areas. The following extract from the All-India supplement to census paper 1 of 1971 brings out the difference in the concepts of 'workers' (economically active persons) used in 1961 and 1971.

Extract from all-India Paper 1 of 1971—Supplement: Provisional population totals, page 27

Confining ourselves to the Indian definitions of the 1961 census and the 1971 census, with which we are now immediately concerned, it was the opinion of experts that the 1961 definition of work was on the liberal side which had exaggerated participation rates. At that census, a person was categorised basically as an economically active worker even if such a person's contribution to work was extremely marginal. In respect of seasonal work like agriculture or household industry, if a person had put in an hour's work a day during the major part of a working season, such a person was treated basically as an economically active worker. So much so, if a woman who is basically engaged in attending to household duties, went to her husband's field taking his lunch and for about an hour or so she tended the cattle, she was straightaway treated as engaged in cultivation. Similarly, a full time student if he sat for a little time, however short the period might have been, in his father's shop even on a single day in a fortnight, he was treated as an economically active worker and his basic characteristics as a whole-time student was ignored. Besides, the sequence of questioning to ascertain the economic activity at the 1961 census was as follows :

Every individual was compulsorily asked if he was engaged in (i) cultivation (ii) in agricultural labour (iii) at household industry and (iv) in any other work in the above order. A person who is basically an agricultural labourer even if he cultivated just a couple of cents of land in his backyard, declared himself first as cultitvator and then as an agricultural labourer. No doubt, instructions were issued at a later stage that after ascertaining the economic activity under the 4 items referred to above, the enumerators will be required to put a circle against the question which represented the main work *i. e.*, the one on which the person spent mosttime and to tick the entry relating to the item that formed the secondary work. But it so happened that several enumerators could not follow these instructions either due to the belated receipt of instructions or on account of non-appreciation of the concepts. At the stage of editing the schedules in the tabulation offices subsequently the instructions were to the effect that where economic activity was recorded against cultivation, agricultural labour and household industry and if there was no indication of which among them formed the main activity, cultivation should be treated as the main activity. This introduced a definite bias in favour of persons being categorised as cultivators. Therefore, the participation rate in cultivation at the 1961 census obviously got inflated. There was also a possibility that during the period when there was much talk of land reforms, several agricultural labourers were tempted to declare themselves as cultivators of land rather than as agricultural labourers with the hope of establishing a right as cultivator. There were also instructions to the effect that if a person besides attending to any economic activity was also attending to household duties, the fact of such a person being engaged additionally as a housewife should also be recorded in parenthesis. The intention apparently was to bring out the picture of such of the workers who might have been basically housewives but participated in work marginally. But unfortunately no tabulation was attempted of the

cases where a person was basically housewife or whole-time student but had been noted as economically active worker for classification. This deficiency in the 1961 census concept was sought to be rectified by adopting a different approach at the 1971 census.

Professor D. R. Gadgil, the Vice-Chairman of the Planning Commission, who unfortunately passed away in May 1971 was kind enough to call a special meeting of the Planning Commission to consider the scope and concepts for the 1971 census as the Planning Commission was the largest user of the census data. The meetting also had the benefit of the presence and advice of the representatives of Ministry of Labour and Employment, the Indian Statistical Institute, the Central Statistical Organisation, the Ministry of Health and Family Planning, the Demographic Training and Research Centre and other experts. The relevant proceedings of this special meeting of the Planning Commission held on May 24, 1969 are reproduced below :

The concept of worker and non-worker came up for detailed consideration. The reference period proposed for the 1971 census was one week for regular work and last working season for seasonal work. For regular work, an individual would be classified as a worker if he had put in gainful work on any one day of the previous week. For seasonal work, an individual was proposed to be classified as worker if he had put in regularly at least half normal day's work during the major part of the last working season. At the 1961 census the reference period for regular work was a fortnight and for seasonal work a person was deemed a worker if he put in at least one hour work a day during the major part of the working season.

It was felt that the concept of worker at the 1961 census tended to inflate workers as persons who were basically non-workers like housewives, students, etc. were included in the category of workers even though their participation was very marginal. The concept of half a day's normal work proposed for 1971 census for seasonal work was also considered not realistic. While the reference period of one week was all right for regular work, what was essential was that every person should be basically classified according to his/her main activity, particularly those not engaged in regular work. Certain activities like cultivation, agricultural labour, etc., are not carried out throughout the year. Therefore, a person enumerated should be asked to state what his main activity was and even he was not engaged the activity during the reference period of one week if he had engaged himself in the main activity reported by him in the course of the last one year, that shall be treated as his main activity. In the case of persons who are basically occupied as house workers, students, rent receivers, etc., they should be classified as such for their main activity. If they were also engaged in some economic activity, obviously not to the same extent as full-time workers, that activity should be ascertained under the head of secondary work. The secondary, work if any, of those who are basically classified as workers will also be ascertained.

* * * * *

Summarising the above, the following decisions were taken :

* * * * *

Individual Slip :

* * * * *

(ix) Every person will be categorised with respect to the main activity as reported by him.

(x) Persons who are basically students, house workers and rent receivers etc., will be classified accordingly for their main activity. Any grainful activity that these individuals may have but not on the scale of full time workers will be shown under secondary work.

(xi) Census data may not provide data on under or unemployment as such.

* * * * * *

Thus it was after deep consideration and with expert advice, the present concept of worker and non-worker came to be adopted for the 1971 census of India.

At this census every individual was required to declare himself what according to him was his main activity. If his answer indicated that he was economically active worker, he was classified as working as a cultivator or as an agricultural labourer, or at household industry or in other work, such as forestry, mining, manufacture, trade, transport, services, etc. If a person returned himself basically as not enagaed in any economic activity, such a person was required to state if he or she was engaged in household duties, or was a student, retired person or a rentier, a dependent, a beggar or vagrant, inmate of a charitable or penal institution, or other non-worker such as being mostly an unemployed person. In addition, at this census every one was also asked to state if he or she attended to any secondary work so as to get an account also of the marginal contribution to work made by persons who had declared themselevs basically as a housewife or a full-time student etc.

20. As in 1961, a 'population record' was compiled for each household from the individual slips. It contains names of all persons in each household and shows characteritics like (i) relationship to head, (ii) sex, (iii) age, (iv) marital status, (v) literacy, and (vi) main activity, This census population record would serve as a national register of the citizens in the country. It provides useful data regarding the size and composition of the households and would be an excellent framework for all future surveys and investigations. Daily posting forms introduced this time facilitated compilation of the enumerators' abstracts. This paved the way for expeditious compilation of provisional census totals and their release within a few days after completion of census enumeration.

21. The census schedules were designed in consultation with various ministries, state governments and the planning commission and on the basis of field experience of two pre-tests conducted by the census offices in the states. The questions, their scope and concepts of various terms used were determined with due regard to the type of primary agency used in the census, the magnitude of the task and the short time available for the field work. Economy has been the main criterion in determining the size of the schedules. Marathi forms were used in Maharashtra except in Greater Bombay and some cantonment areas where on practical grounds individual slips in English were used. As in 1961, the census questions were printed on the questionnaire form itself. Answers to questions in abbreviations were printed on the census form itself so that enumerators could use these abbreviations for recording the answers. This led to a clearer understanding and a better response to the questions and a more accurate record of census data.

22. The individual slip, population record and instructions to enumerators to fill in the slip are reproduced in appendices I, II & III respectively to this note.

23. The government of Maharashtra under section (2) of the Indian census act, appointed district collectors, resident deputy collectors, sub-divisional officers, tahsildars and chief officers of municipal councils to work as census officers within the areas of their jurisdiction. Census operations in the districts were carried out under the general control and guidance of the district collectors. The work of direction and execution in practice was carried out by his immediate assistant—the resident deputy collector—who was designated as the district census officer. The tahsildars were the charge officers in the tahsils and the chief officers of municipal councils acted as charge officers for their municipal areas. There were separate charge officers for cantonments and military areas. The Executive health officer, Bombay municipal corporation, and the Medical officer of health, Poona municipal corporation, worked as charge officers for the Bombay and Poona municipal corporations respectively.

24. The state governement had issued orders to all its departments and offices to spare the services of their employees for census work which was to be done as

a part of their normal duties. Similar orders were issued by various ministries of the govt. of India. The enumerators and supervisors were appointed from among the employees of the state and central governments and the local bodies. During the first stage of housenumbering and houselisting, mostly the services of the revenue agency, school teachers and other employees of local bodies were utilised. The second stage of operation of census count which had to be completed in the stipulated time, required a very large number of persons. The services of the employees of various offices of central and state government and municipalities were also availed of in addition to those of talatis, school teachers etc. The majority of census workers in the rural areas was the primary school teachers and village talatis. For every four or five enumerators one supervisor was appointed. In Maharashtra 94,452 enumerators and 20,235 supervisors worked during the census enumeration. In Bombay city 10,041 enumerators and 20,235 supervisors were appointed.

25. Preparation for census started immediately after appointment of district census officers at the district level and census charge officers at the tahsil and municipal headquarters level. Preliminaries and preparatory work undertaken during the first stage of operations comprised(i) preparation of up to date frames of administrative units including district, tahsils and villages and towns, (ii) preparation of notional maps for each village and ward of municipal areas showing the houses and the numbers assigned to them, (iii) housenumbering and houselisting. This was followed by demarcation of blocks which were the ultimate units of census enumeration. During this stage, houselist and establishment schedules were canvassed. They yielded important and useful census data on houses and housing conditions, and establishments. The second stage operations comprised (i) updating the enumerators' blocks which were prepared first on the basis of the houselisting, (ii) appointment of enumerators and supervisors for the final census count, (iii) intensive training of enumerators and supervisors, (iv) supply and distribution of census schedules, and (v) actual census count which started on 10 March 1971 and ended on 3 April 1971.

26. The training for enumerators and supervisors was organised separately for the two stages of work. The first stage training for housenumbering and houselisting was arranged between December 1969 and February 1970. The intensive training for the second and more important stage of enumeration was organised in three stages. The first between Nov.-Dec. 1970, the second between Dec. 1970– Jan. 1971 and the third between Jan.-Feb. 1971. Each officer appointed as an instructor was required to undergo at least two rounds of training imparted by the Director of census operations or the Deputy directors of census operations. Each enumerator and supervisor had to be trained in all the three rounds. Each round consisted of two classes and included practical work covering a specified number of households and canvassing of individual slips.

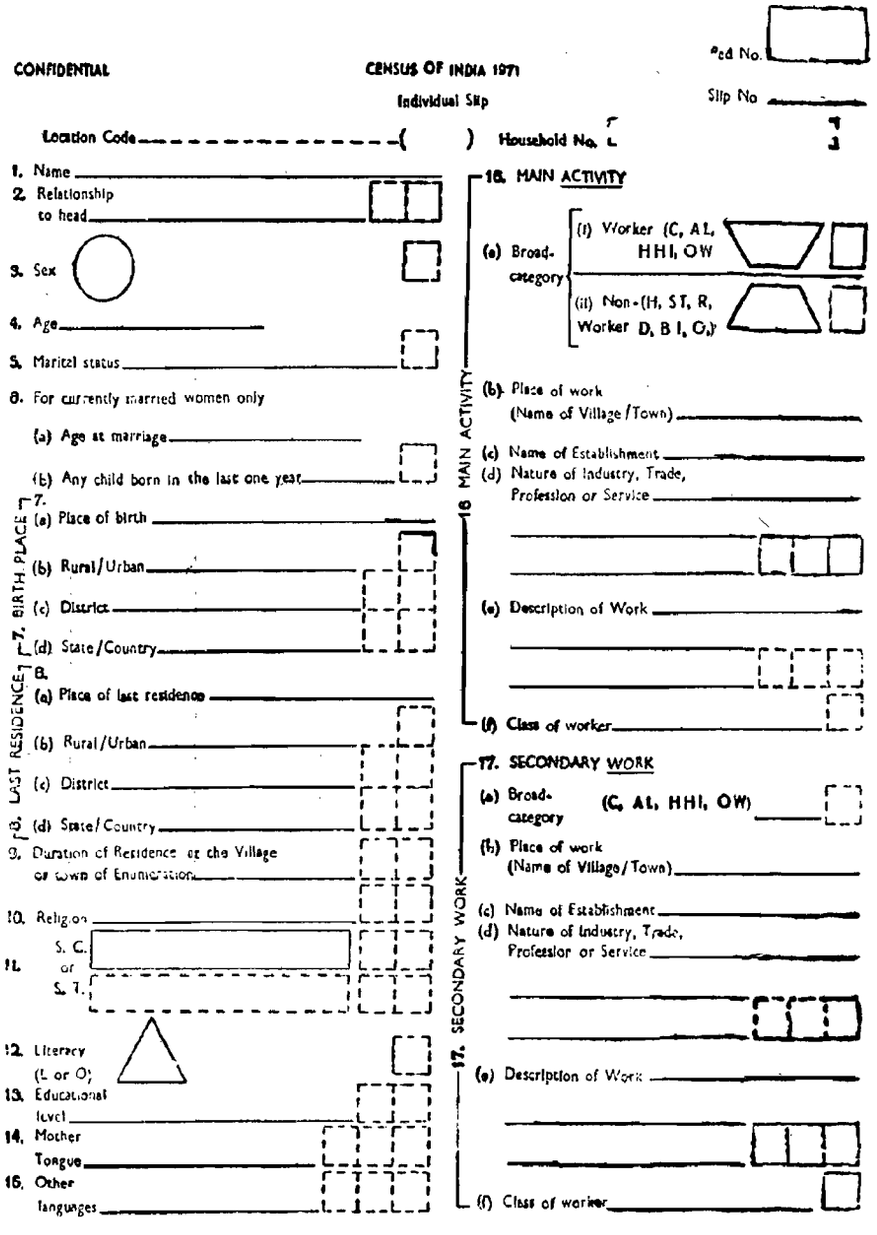

27. Enumerators and supervisors were paid honoraria for census work. This was done to meet out of pocket expenses incurred by them on travelling and purchase of stationary articles. As far as possible the enumerators and supervisors were entrusted with the work of the block or blocks which were near to their residence or place of work so that unnecessary travelling for contacting the households was avoided.

28. After completion of census enumeration during 10 March to 31 March 1971 with the census reference date as 1 April 1971 and the revisional round of three days from 1 to 3 April 1971, provisional totals were compiled and communicated to the Registrar General, India, on 7 April 1971, that is, four days after completion of enumeration. The enumerators compiled abstracts and sent them to the charge officers who prepared charge abstracts for the census charges and sent them to the district headquarters for compilation of the district abstracts. The district census officers communicated provisional population figures based on these abstracts in two stages. In the first stage, the total population and its break-up into males and females, male literates and female literates were reported by 7 April 1971. In the second stage, other details like scheduled castes/scheduled tribes, workers classified by main activity, non-workers, houseless and institutional population, etc., were communicated in the second fortnight of April 1971. These figures were published in census paper 1 and its supplement which came out on 13 April 1971 and 24 May 1971, respectively. After communicating the charge abstracts and provisional totals, the filled in census schedules were received in the eight regional tabulation offices in Maharashtra which were entrusted with tabulation of census data. In these tabulation offices which opened on 15 April 1971 individual slips, population records and other relevant census record were processed and the primary census abstracts and other tables on the basis of full count were prepared. In addition to this tabulation these offices selected one per cent sample of slips for advance tabulation at the national level, ten per cent sample for rural areas and twenty per cent sample for urban areas for further processing, and tabulation. In respect of urban areas the census tables on twenty per cent sample basis are prepared on the computor in the machine cell of the Registrar General's office and tables for rural areas based on a ten per cent sample are processed mannually and prepared in the state census offices.

29. After completion of enumeration, a post-enumeration check on a sample basis was carried out in May-June 1971. In all, 400 sample enumerators' blocks were selected of which 100 were located in the Greater Bombay area. The field work in respect of the post-enumeration, check and tabulation was carried out by the state office. The result of this survey are published in Part I-General report.

APPENDIX I

INDIVIDUAL SLIP

APPENDIX II

POPULATION RECORD

CONFIDENTIAL (To be compiled from Individual Slip) CENSUS 1971

Location Code..... Household No. .....

Name of village or town..... If the head belongs to S. C. or S.T.?.....

Sl. No.	Name	Relationship to head	Sex		Age	Marital Status	Literacy (L or O)	Description of Main Activity
			M	F				
1	2	3	4	5	6	7	8	9

Signature of Enumerator..... Signature of Supervisor.....

Date..... Date.....

APPENDIX III

INSTRUCTIONS TO ENUMERATORS FOR FILLING UP THE INDIVIDUAL SLIP

* * * * * *

REFERENCE DATE AND ENUMERATION PERIOD

5. The reference date for the population census of 1971 is the sunrise of 1 March 1971 *i.e.*, the census is expected to provide a picture of the population of the country as it exists at sunrise of 1 March 1971. It is obviously not possible to ascertain the particulars of every individual throughout the length and breadth of the country at this fixed point of time Therefore, the enumerator will actually commence his work of enumeration on 10 February, 1971 and end it on 28 February 1971. You will, therefore, have to cover your jurisdiction and enumerate every person as will be explained in the succeeding paragraphs during that period of 19 days. But in order to bring the picture up-to-date as at sunrise of 1 March 1971 *i.e.*, the reference date for the census, you will have to quickly go round your jurisdiction again on a revisit from 1 to 3 March 1971 and enumerate any fresh arrival in your jurisdiction who might not have already been enumerated elsewhere and also take account of any fresh births that might have taken place in any of the households after your previous visit and before the sunrise of 1 March 1971 and fill in fresh census schedules to cover such cases. As a corollary you will have to also cancel the census schedules relating to persons who may have unfortunately died since your last visit to a household but prior to the sunrise of 1 March, 1971. Births or deaths and arrivals of visitors that had taken place after the sunrise of 1 March 1971 need not be taken note of by you.

PAD NO. AND SLIP NO.

6. The census charge officer or the supervisor would have issued the required number of enumeration schedule pads of individual slip to you. Some may be in pads of 100 schedules and some of 25. On the top of the pad, the pad number would have been noted prominently by the charge officer. soon after you receive your pads, you should check them and note on the right hand corner of each individual slip, within each book in the space provided for the purpose, the pad no. as given on the top of the cover and you should also allot serial number to each schedule. The serial number of the schedules will have to be given by yourself in one sequence starting with one on the first schedule of the pad and ending with 100 in case of pads of 100 schedules and ending with 25 in case of pads of 25 schedules. In some pads the actual number of schedules may by mistake be a little more or little less. The last serial number in such pads may, therefore, vary accordingly. The ultimate idea is that every slip should be allotted the pad number as well as the distinct serial number.

LOCATION CODE AND YOUR JURISDICTION

7. On the top cover page of each book you will also find the location code number of your village or town indicating the district number, the tahsil or thana or town number and the village number. You may find that the district no. and the tehsil no. have been already stamped on each slip in the rural pads. In the case of urban areas, the town no. may also be rubber stamped along with the district no. In rural areas you will have to note in addtion the village no. and the enumerator block no. and for towns ward no., if any, and enumerator block no. But if on any slip, location code has not been stamped through oversight, you will have to note the combined location code no. made-up of the district no., tehsil or thana or town no. and the village/ward no. and enumerator block no. on each schedule on the left hand top corner in the space provided for the purpose. Elements of each code should be separated by oblique strokes. The enumerator block number may be noted within round brackets at the end of the location code. Please also see the instructions in para. 22 below. You must get yourself fully acquianted with the complete code numbers allotted to your area. This will be intimated to you by your census charge officer.

8. If you have, by any chance been put in charge of more than one village or urban block, please make sure that you have separate pads for each village or urban block. Do not enumerate the population of a second village or a second urban block in continuation of the first in a common pad. The enumeration schedule pads of each village or urban block will have to remain separate.

9. Your appointment order would have defined your census jurisdiction. You must acquaint yourself with your jurisdiction immediately your appointment order is received. You should get to know the relevant house numbers of the houses which you are expected to visit for enumeration. Any new houses that might have come up within the limits of your jurisdiction for which no number had been allotted be fore, should be indicated by a sub-number to the adjoining house number. You should also know the dividing line between you and the adjoining enumerator. Make sure that he also knows the boundaries of your jurisdiction so that there is no ambiguity, and overlapping or omission. In case of any doubt you should immediaely consult your supervisor or the charge officer.

10. Immediately you are appointed a census enumerator please prepare a detailed sketch of the area allotted to you showing the streets, other prominent land marks and also the location of the actual houses that you enumerate. This sketch is important in order that your area may be identified by any one even at a later date. This sketch will also ensure complete coverage at the census. You will be required to give this sketch with your final abstract to your supervisor immediately after the census enumeration is completed.

PERSONS TO BE ENUMERATED

11. While your appointment order may indicate all the houses that fall in your jurisdiction you will have to locate every household in your area. A household is defined 'as the entire group of persons who commonly live together and take their meals from a common mess unless the exigencies of work prevent them from doing so'. A household can be either a one person household *i.e.*, a person who makes provision for his own food or other essentials for living without combining with any other person to form part of a multi-person household. It may be a multi-person household *i.e*, a group of two or more persons who make common provision for food or other essentials for living. They may be related or unrelated persons or a combination of both. Households usually occupy a whole or part of not more than one housing unit but they may also be found living in camps, in boarding houses or hotels or other institutions or they may be homeless.

12. You will have to make note of the areas within your jurisdiction where there is a likelihood of houseless persons such as the pavement dwellers or nomads living. Those houseless persons should all be censused on the night of 28 February 1971. You will also have to cover that night, persons living in boats, if any, in your jurisdiction.

13. All persons normally residing at a place within your jurisdiction during the census enumeration period are eligible for enumeration. A person is considered as normally residing there if he normally stays in that place during the enumeration period *i.e.* from 10 February till 28 February 1971, and had in fact actually resided there during any part of the enumeration period. If a person had been away throughout the enumeration period he is not to be considered eligible for enumeration here. He will be enumerted wherever he is actually found during the enumeration period. Similarly, a person who would have normally resided at another place during the enumeration period but in fact was absent during the entire period from that place will be enumerated if he is to be found in any household in your jurisdiction as a visitor. Such persons should, however, be cautioned that they should not get themselves enumerated again in case they may move from this place.

14. Thus when you visit a household for the purpose of enumeration, you will enumerate the following persons :

(i) All those who normally stay and are present in that household during the entire period of enumeration *i.e.* from 10 February to 28 February (both days inclusive);

(ii) Also those who are known to be normally residing and had actually stayed during a part of the enumeration period (10-28 February) but are not present at the time of your visit;

(iii) Also those who are known to be normally residing and are not present at the time of your visit but are expected to return before 1 March 1971; and

(iv) Visitors who are present in household censused by you but had been away from the place (s) of their usual residence during the entire enumeration period. For the purpose of enumeration such visitors will be treated as normal residents of the place (household) where they were actually found during the enumeration period provided they have not been enumerated elsewhere.

15. You should plan out your work in such a way that you will be able to cover your entire jurisdiction in a systematic manner and you do not leave the work to be accumulated towards the end.

16. Your task is simple. You will be required to canvass only one simple individual slip containing 17 questions for each individual to be enumerated in your jurisdiction. You will have to later post some particulars on the population record and you have to also prepare an abstract. You have to record the answers as laid down in the succeeding constructions briefly.

CENSUS SCHEDULE (INDIVIDUAL SLIP)

17. The census schedule which is called the individual slip that you will be required to canvass is given on opposite page.†

18. One slip will have to be filled for each individual in each household that you visit in your jurisdiction. You should first enumerate the head of the household followed by the other members of the household in the most convenient order and ensure that none of the persons in the household is left out. Perhaps it is best that after enumerating the head of the household, you cover the near relatives first such as, the wife, sons and daughters, son's wife and son's children, daughter's husband and their children forming part of the household, then distant relatives, and domestic servants or other boarders or visitors, forming part of the household and entitled to be enumerated here. *Please make repeated enquiries about infants and very young children for they are often liable to be left out of count.*

19. The various items to be canvassed on the individual slip are explained in the following instructions:

Pad no. and slip no.

20. Make sure that the pad no. and the slip no. have been noted by you on the top right hand corner of each schedule against the item provided as already indicated earlier under the general instructions. The noting of pad no. and the slip no. is necessary for, you will be later required to tabulate in an abstract certain items of information of each schedule on a separate form where you will have to indicate the slip no. concerned against which you will be posting the data. The pad no. is the number already furnished on the top of the enumeration schedule pad and the slip no. is the serial number that you will be giving for each schedule in this pad. You are also advised to use the pads in a sequence starting with the lowest pad number.

21. In case your jurisdiction covers more than one village or more than one urban block please ensure that you do not make use of a common pad of schedules for all the villages or urban blocks in your charge. There should be separate pads for each village or urban block even if there were a few blank schedules left over in the pad of a particular village or urban block.

Location code

22. Though this has already been referred to generally earlier, it is worth elaborating. The location code is the method by which every village or town in a tahsil/taluk/police station/anchal/island in every district of a state is identified by a combination of numbers. For this purpose, every district, tahsil, taluk, police station, anchal or island, village or town in your state would have been allotted code numbers. Your charge officer would have indicated to you the district, tahsil, taluk, police station, anchal or island and the village or town numbers as also the ward number of the town pertaining to your jurisdiction. By a combination of these numbers one can exactly locate your village or town. Thus, a code number running as 10/3/46 would mean village no. 46 in tahsil no. 3 of district no. 10 of a state, or a code number running as 6/II/5 would mean ward no. 5 in town no. II of district no. 6. Note that the town no. is given in roman figure to distinguish it from rural code no. At the end of the location code you should add within round brackets the enumeration block number that has been allotted to you by your charge officer thus 10/3/46(60) or 6/II/5(4). You will be identified by enumerators' block number and this has to be entered in your daily posting statement. (The enumerators' block numbers will be a continuous number for the tahsil/taluk/ town etc.).

23. Make sure that you know the correct location code of the area allotted to you. You should note down the location code on each blank individual slip immediately the enumeration pads are issued to you. This will save you the trouble of noting the location code number later when you actually visit each household within your block for enumeration. When you visit the household you may have to then note only the household number as indicated in the next para by the side of the location code number which you would have already indicated.

Household no.

24. The identifying household number of the household that you are covering at the census should be noted within the square brackets provided for the purpose. As you may be aware, houselisting and housenumbering operation was undertaken during 1970 with a view to numbering each census house and locating all households living in census houses. In the course of this operation, each census house was given a number and households found therein would also have been allotted a number. The census house numbers would be painted on the houses at prominent place, like the pillar of the main gate, top of the main door etc. Sometimes there may be more permanent housenumbering plates affixed. In the case of thatched houses, numbers may have been written out on a tin plate or wooden board and left with the households with a request to preserve the same. You should use this number.

25. It may happen that when you visit your area for census taking you may come across some census houses which did not exist at the time of houselisting and therefore, no numbers had actually been allotted to them. You should allot a number after consulting the order of numbering prevailing in your jurisdiction (please see Appendix II)† and locate the households living therein. For example if in between buildings 9 and 10 another building has come up; you should allot the number 9/1 to this structure and in case more than one building have come up numbers like 9/1, 9/2, 9/3 and so on should be used for the new structures then locate the census houses in accordance with the instructions in Appendix II and thereafter locate the households and allot numbers in the prescribed manner. The household number will be the

†Not reproduced here.

same as the house number if only one household is living in a house. If there were more than one household then alphabetical sub-numbers within brackets as 19(a), 19(b), etc. will have to be added to the house number to distinguish each household. It may also happen that the number given at the time of houselisting has been obliterated. You should allot the correct number having regard to the preceding and succeeding buildings.

26. For the purpose of conveniently understanding the housenumbering system, the instructions governing the numbering of buildings, census houses and households are given in Appendix II†.

27. *If the household happens to be an institutional household such as a boarding house, hostel, hotel, chummery etc. where a group of unrelated persons stay together then add 'INST' to the household number.*

28. *If you are enumerating the houseless persons, you should record 'O' boldly in the space provided for the household number.*

29. In all the individual slips pertaining to the members of the same household, the household number will be repeated. You will then start recording the particulars of each individual against questions indicated in the individual slip according to the instructions that follow.

Please do not write anything in the spaces enclosed by dotted lines in question Nos. 2, 3, 5, 6(b), 7(b), 7(c), 7(d), 8(b), 8(c), 8(d), 9, 15, 16(a), 16(d), 16(e), 16(f), 17(a), 17 (d), 17(e) and 17(f). These are meant for writing code numbers in the tabulation offices.

Question 1 : Name

30. Write the name of the person enumerated. If a woman's name is not given out, describe her as 'so and so's wife mother or daughter'. By custom if a woman finds it difficult to give the name of her husband and if the man is absent at the time of enumeration but his particulars have to be recorded write 'so and so's husband' if you have failed to ascertain the name even from the neighbours.

For newly born infants who have not yet been given the name write "baby" and add father's or mother's name.

Question 2 : Relationship to Head

31. In the case of the head of the household write 'Head.' The head of the household for census purposes is a person who is recognised as such in the household. He is generally the person who bears the chief responsibility for the maintenance of the household and takes decisions on behalf of the household. The head of the household need not necessarily be the eldest male member, but may even be a female or a younger member of either sex. You need not enter into any long argument about it but record the name of the person who is recognised by the household as its head.

32. In the case of institutions like boarding houses, messes or friends living together in one census house, which should be regarded as households of unrelated persons living together, which may be called institutional households, the manager or suprintendent or the person who has adminstrative responsibility or who by common consent is regarded as the head should be recorded as the head of the household.

33. The manager or superintendent who does not stay normally in the institution should be enumerated at his place of normal residence. You should make sure before filling up the slip for the manager or sueprintendent etc. of an institutional household, that he/she has not been enumerated at any other household.

34. In the case of absence of a normal 'Head', the person on whom the responsibility of managing the affairs of the household falls, should be regarded as the head.

35. All relationships in this question should be recorded in relation to the Head of the household. Write the relationship in full. Do not use words like 'nephew', 'niece' or 'uncle', but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (for uncle) 'Son' will include 'adopted son' or 'step son'; similarly for a daughter. In the case of visitors, boarders, or employee write 'visitor', 'boarder', or 'employee' as the case may be. In the case of institution, the members should be recorded as 'unrelated'.

36. If on the check of revisional round between 1 and 3 March 1971 the Head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as head should be recorded as head and the relationship in all other slips will have to be suitably corrected. The slip of the deceased head of the household will, of course, be cancelled.

Question 3 : Sex

37. For males write 'M' and for females write 'F' within the circle indicated against this question. Even for eunuchs and hermaphrodites, write 'M' only. Verify with reference to the name and relationship to head against questions 1 and 2 respectively that you have noted the sex correctly.

Question 4 : Age

38. Record the age of the person in total years completed last birthday. Very often there is a tendency on the part of the individuals to return 'years running' rather than the 'years completed'. Make sure that only the actual number of years completed is recorded.

39. In respect of infants who *might not have completed one year* by the day of enumeration their age in completed year should be invariably shown as '0' as they have not yet completed one year of age and add 'Infant' in brackets. As was stated under general instructions make sure that infant even if a day old are invariably enumerated. *You should not enter the age in months.* The age of an infant who has not yet completed one year should invariably be noted as '0' only.

40. Age is one of the most important items of demographic data and you should ascertain the age with greatest care. Many persons particularly in the rural areas cannot give their age correctly. They should be assisted to state the correct age by stimulating their memory with reference to any historical event etc., well known in the area. Some times the age can be ascertained with reference to the age of another persons of a known age that may be in the same household or in the neighbouring household or that of a well known person of the village such as Headman of the village. A person can more easily say whether he was older or younger to such a person and by how many years. This will help you to record the age more accurately.

Question 5 : Marital Status

41. In answering this question use the following abbreviations :—

NM : Never married

M : Currently married

W : Widowed

S : Separated or divorced

42. For a person who has never been married at any time before, write 'NM'. For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for the persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or is in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again

†Not reproduced here.

write 'W'. For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been, divorced either by a decree of a law court or by an accepted social or religious custom but who has not remarried, write 'S'. For a prostitute return her marital status as declared by her.

Question 6 : For currently married women only

43. This question has to be answered in respect of all currently married women only *i.e.*, all women whose marital status is shown as 'M' against Q. 5. For all others a cross may be put through the two sub-parts of this question.

6(a) Age at marriage

44. You should ascertain the age at which the currently married woman whom you are enumerating was married and record that age in completed years. If the currently married woman had been married more than once, the age at which she got married for the first time should be recorded.

6(b) Any child born in the last one year

45. You should ascertain if the currently married woman whom you are enumerating gave birth to a child in the last one year prior to the date of enumeration. Since it may be difficult for a person to reckon the exact year with reference to the English calender dates, the period of one year may be ascertained with reference to a well known festival day which falls close to Feb-March, as determined by the Census Superintendent of the State. You should ask if a child was born on or after this festival day last year to the date of enumeration. Only if the child was born alive, even if the child had died soon after birth, should the answer be 'Yes', to this question. *Still birth, i.e. a child which is born dead should not be taken into account for this purpose.* So while you should make sure that every case of birth of child born alive, even if it is not alive on the date of enumeration, is reported, you should not reckon it if the child was born lifeless.

46. It is common experience that the birth of the child may not be reported readily if the child is not actually surviving at the time of enumeration. Infant deaths are still high in the country. There is a chance of a number of such cases being missed unless specifically questioned about them. It is necessary to record all live births even if the child has died soon thereafter or had not survived to the day of enumeration. Therefore where the initial answer to this question is 'no', you should ask a specific question if there has been a case of child having been born alive in the last one year and later dying before the enumeration date. This is a delicate question and should be asked with tact in a manner not to offend the sensibility of the respondent. Where a currently married woman first answers that she had no child born in the last one year, you may perhaps question her as follows.

"It has been found in some houses that a child was born and had died soon after or a few days or months later and such cases had not been reported. It is my hope that there are no such cases here. Am I right ?"

This may bring in the required response. If she reports 'no' then you can be sure that no birth has been missed. You have to make sure that any live birth that has occurred to the currently married woman in the last one year is netted whether the child is surviving till the date of enumeration or not. Similarly, probe to eliminate still births may be necessary. For example, when the answer is 'yes' under question 6(b) the enumerator mihgt ask if the child is here in this house. If the answer is 'yes' no further question is needed. If 'no', the enumerator might ask where he has gone. The answer may be 'dead' or he has gone elsewhere. If 'dead' then the enumerator might ask when did the child die and this will bring out the fact whether or not it was a still birth.

47. Write 'Yes', if the currently married woman had given birth to a live child from the prescribed festival day last year to the date of enumeration or 'no' if she had not. In case of twin or multiple births, write 2, 3 etc., as the case may be within round brackets after the entry 'Yes'

Note .—You may find on your revisional round from 1 to 3 March 1971 that a child is born to a married woman in a household after your last visit but before the sunrise of 1 March 1971. You will have to take this into account and correct the answer against the Q. 6 (b) accordingly. You must enquire specifically if any such birth has taken place. While ignoring still births all other births where the child was born alive even if it did not survive long should be taken into account.

Question 7 : Birth place

48. Answer to this question has to be filled with reference to the place of birth of the persons enumerated and the particulars recorded under the four sub-items of this question.

7(a) Place of birth

49. Write 'PL' for a person born in the village or town where he is being enumerated. Where 'PL' is noted against this question put '×' against sub-items (b), (c) and (d).

For those born outside the village or town of enumeration write the actual name of the place against sub-item (a) and fill the other details against sub-items (b), (c) and (d).

7(b) Rural/Urban

50. For those born outside the village or town of enumeration ascertain if the place of birth was a village or town at the time of his birth. To enable a person to determine whether the place was a town or a village he may be required to indicate the status of the place of birth in comparison with a known town in the neighbourhood of the place of enumeration. You may mention some important urban characteristics to enable the person to make out if the place of his birth was rural or urban *e.g.* existence of a local administrative body, industrial townships declared as towns etc.

For a person born in a village, write 'R'.

For a person born in a town/city, write 'U'.

For a person born in a foreign country put '×' against this sub-item and also against sub-item (c). If all efforts to classify the place of birth as rural/urban fail, write 'not known'.

7(c) District

51. For a person born outside the village or town of enumeration but within the district of enumeration write 'D'. For a person born in anotner district of the state of enumeration, or otherstate/union territory in the country write the name of the district. If the person cannot name the district, write 'not known'.

7(d) State/Country

52. For persons born within the state of enumeration write '×' against this item. Make sure that the earlier entries made in sub-items (a), (b) and (c) are consistent with such an answer; that is 'PL' might have already been written against sub-item (a) or 'D' is written against sub-item (c) or any other district of the state of enumeration is mentioned against sub-item (c).

53. For persons born outside the state of enumeration but within the country, write the name of the state/union territory where born.

54. For those born outside India, note merely the name of the country and there is no need to enter the name of the constituent state of the foreign country. Where a person cannot name the country, the name of the continent may be noted.

55. For a person born on sea, record 'born at sea', against this sub-item and put '×' against sub-items (a), (b) and (c). If a person was born in a train, boat or bus etc., within the country, write the particulars in (a), (b) and (c) with reference to the administrative territory where the event occurred or was registered.

Question 8 : Last residence

56. Answer to this question will have to be filled in respect of every person if he had another place of normal residence irrespective of his place of birth, before he came to the present place where he is enumerated. Even if a person were born at the place of enumeration, by the nature of his work or for studies etc. he had shifted subsequently to another village or town and had come back again to the place of enumeration, he should be deemed to have had another place of residence prior to his enumeration here.

The last previous residence is relevant only if he had been outside the village or town of enumeration and not simply in another house or locality in the same place. For example, if a person born in one part of Bombay city is found residing in another part of Bombay at the time of enumeration, the change of residence should not be treated as change of place of residence because both the areas are comprised in the same city of Bombay. Similarly, a person born in hamlet 1 of village Rampur and found in hamlet 2 of the same village at the time of enumeration, should not be deemed to have had any other place of residence than the village where he is enumerated. Where a person had merely gone out to another place or had been shifting from place to place purely on tour or pilgrimage or for temporary business purposes, he should not be deemed to have had another residence different from the place where he or his family normally resides but if the person had his normal residence, *i.e.*, if his normal home had been elsewhere at any time before he is enumerated at his place of present residence, irrespective of where he was born, such place of his previous residence should be recorded here.

8(a) Place of last residence

57. For a person who had been in the village or town of enumeration continuously since birth (except for shifting to other places outside the village or town of enumeration for a purely temporary stay) write 'PL' against sub-item (a) and put '×' against sub-items (b), (c) and (d).

For a person who had had his last previous residence at any place outside the village or town of enumeration (irrespective of his place of birth), write the actual name of the village or town where his last residence was against sub-items (a) and fill the other details against sub-items (b), (c) and (d).

8(b) Rural/Urban

58. For a person who had previously resided outside the place of enumeration ascertain if the place of last previous residence was rural or urban and record the answer. For a person whose last previous residence was a village write 'R'. For a person whose last previous residence was a town/city write 'U'. For a person who last resided in a foreign country write '×'. For a person whose last previous residence cannot be classified write 'not known'.

Rural or Urban status has to be determined with reference to the time of migration from the place of last previous residence to the place of enumeration.

For helping the person to determine whether a place was rural or urban, you may mention important urban characteristics as indicated in the instructions against item 7 (b) in para. 50.

8(c) District

59. For a person who had previously resided in another place, *i.e.*, for whom 'PL' is not written against sub-item (a) you have to fill in this item in the manner indicated below :—

For a person who previously resided in another village or town within the district of enumeration write 'D'. For a person who previously resided in another district of the state/union territory of enumeration or of other state/union territory in the country, write the name of the district. If he cannot name the district write 'not known'. For a person whose last previous residence was outside India write '×' against this sub item.

8(d) State/Country

60. For a person whose last previous residence was out side the village or town of enumeration but within the state/or union territory of enumeration write '×' against this item but if it was outside the state or union territory of enumeration but within the country write the name of the state/union territory. For a person whose last previous residence was outside the country write the name of the country and if name of the country is not forthcoming write the name of the continent.

For persons who had not moved out at all from the present place of enumeration from birth (except for purely temporary stay) this sub-item need not be filled and '×' should be put in respect of persons against this sub-item.

Question 9 : Duration of residence at the village or town of enumeration

61. Note here the period of the existing continuous residence in the village or town where the person is being enumerated, in completed years. This will apply to even a person born at the place of enumeration. If he had left this village or town and had lived elsewhere for sometime *i.e.* in Q. 8 another place of last residence is reported and has come back again to this village or town, then the duration of residence to be noted against this question is the period of the last continuous residence. But if a person had been away on a temporary visit or tour etc., that should not be taken as a break in the period of his continuous residence here. If the person was born at the place of enumeration and also had no other place of last residence *i.e.*, 'PL' has been noted in Q. 8(a) then '×' may be put against Q. 9.

For a person whose duration of continuous residence at the place of enumeration is less than 1 year, it should be noted as '0'.

Question 10 : Religion

62. In answering this question use the following abbreviations : —

H : Hinduism

I : Islam

C : Christianity

S : Sikhism

B : Budhism

J : Jainism

for others record the actual religion as returned fully.

63. If a person says that he has no religion it may be recorded accordingly. Do not mistake religion for caste which will not be recorded here.

Question 11 : Scheduled caste or scheduled tribe

64. You have been furnished with a list of scheduled castes and scheduled tribes notified for your state.

Ascertain if the person enumerated belongs to a scheduled caste or scheduled tribe and if he does, then record the name of the scheduled caste or scheduled tribe which should find place in the list furnished to you. The answer should be recorded against the correct rectangle provided for the purpose against this question. For a person who is not a member of any scheduled caste or scheduled tribe write '×' in both the rectangles.

65. If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by synonym or generic name of a caste or a tribe it should be entered only if it finds a place in the list furnished to you. Do not write the names of scheduled castes in general terms as 'Harijan' or Achhut'. You should ascertain the name of the caste when it is returned and write it in the rectangle provided for recording the name. Similarly, do not write the names of scheduled tribes in general term as 'Adivasi'. You should ascertain the name of the tribe when it is returned and write it in the rectangle with broken lines provided for recording the same. If a person is negligent and insists on calling himself merely 'Harijan' or 'Achhut' or 'Adivasi' as the case may be, tell him that this description is not adequate for census purposes and persuade him to give out the actual name of the caste or tribe. You should make all efforts to ascertain the correct name of the scheduled caste or scheduled tribe as found in the notified list. If the person merely claims to be a scheduled caste or scheduled tribe but says that he does not belong to any of the notified communities applicable to the area, he will not be entered as a scheduled caste or scheduled tribe.

66. Scheduled castes can belong only to the Hindu or Sikh religions. If a person belongs to scheduled caste, there will be either 'H' or 'S' in the answer to question 10. Scheduled tribes may belong to any religion.

Question 12 : Literacy (L or O)

67. *Definition of a literate :* A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not a literate.

68. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

69. For a person who is literate *i.e.*, who can both read and write, record 'L' in the triangle against question 12. If there is any doubt about a person's ability to read or write, the test that may be applied for reading is his/her ability to read any portion of the printed matter in the enumerator's instructions and similarly for writing he/she should be able to write a simple letter. Ability merely to sign one's name is not adequate to qualify a person as being able to write with understanding. If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondent's word has to be taken as correct. Other members of the household may also be able to testify to the literacy of the person enumerated.

70. For a person who is illiterate *i.e.* who can neither read nor write or can merely read but cannot write, in any language, write 'O' in the triangle against question 12. All children of the age of 4 years or less should be treated as literate even if the child is going to a school and may have picked up reading and writing a few odd words.

Question 13 : Educational level

71. This question will be asked of those for whom 'L' has been recorded against question 12. For a person who is illiterate and 'O' has been put against him in the answer to question 12, there is no advantage in ascertaining the educational level even if he had at some stage attended school and passed a standard and had relapsed into illiteracy. In such a case you should put '×'. You have to ascertain and record the highest educational level attained by a person for whom 'L' is recorded in answer to qusetion 12.

72. For a person who is still studying in a particular class, the highest educational level attained by him will be one that he has actually passed and not the one in which he is studying. For example, a person studying in 1st year B. A. should be recorded as only 'PUC' or 'Higher Secondary', as the case may be. Similarly, a person studying, say, in the 4th year of 'MBBS' should not be noted as 'MBBS' but as 3rd year 'MBBS' which is the highest level he has actually attained. If you are not sure whether a person has passed Primary, Middle, Higher Secondary or other definite levels, you may record the actual standard passed such as say IIIrd standard, VIIIth standard, 1st year B. Com. etc.

The highest educational level attained by the person enumerated should be recorded. When a person holds both general and technical qualifications both of which are of equivalent level such as say B.Sc. (Zoology) and M.B.B.S. or B.A. (Maths.) and B.E. (Bachelor in Engineering), the technical qualification should be given preference in recording the highest educational level attained. Where the general educational level is higher than the technical educational level or where it is not possible to decide which of the two levels is relatively higher, the highest level of education as returned by the person concerned should be recorded.

In recording the highest educational level of a graduate or a post-graduate, subject of specialisation such as B. Sc. (Maths.), M.A. (Economics), M.Sc. (Botany), B.Sc. (Agriculture), etc., should be noted. You should not use abbreviations which are not in common use. In such cases, the degree or diploma should be spelt out fully.

73. Whenever you come across graduates or post-graduates as also those with a technical diploma or degree, you will have to issue him a "Degree-holder and Technical Personnel Card" and ask the person concerned to fill it. You should note the location code on the card while issuing it. Put a tick (√) after noting the educational level against question 13 immediately after you issue a card. When you collect it after some time but before you complete the enumeration of your area cross the tick and put a circle.

You will have to ensure that the card issued to all the graduates and the technical degree or diploma holders are collected back. The non-crossed tick, if any, against quertion 13 will show that the card has not been collected.

Question 14 : Mother-tongue

74. *Definition.*—Mother-tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the persons home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother shall be recorded.

75. Record mother-tongue in full whatever be the name of the language as returned and avoid use of abbreviations. You are not expected to determine if the language returned by a person is the dialect of another major language and so on. You should not try to establish any relationship between religion and mother-tongue. *You are bound to record the language as returned by the person as his mother-tongue and you should not enter into any argument with him and try to record anything other than what is returned.* If you have reason to suspect that in any area due to any organised movement, mother-tongue was not being truthfully returned, you should record the mother-tongue as actually returned by the respondent and make a report to your superior Census Officers for verification. You are not authorised to make any correction on your own.

Question 15 : Other languages

76. After recording the mother-tongue in question 14 enquire whether the person knows any other language(s) Indian or foreign and record language(s) returned by him against this question. In case he does not know any language apart from his mother-tongue put '×' against this question

77. The number of languages recorded under this question need not be more than two. These languages should be other than his mother-tongue and they should be recorded in the order in which he speaks and understands best and can use with understanding in communicating with others. He need not necessarily be able to read and write these languages. It is enough if he has a working knowledge of these subsidiary languages to enable him to converse in that language wich understanding.

Question 16 : Main Activity

78. Every person will be asked what his main activity is, that is how he engages himself mostly. For the purpose of this question, all persons will get themselves divided into two broad streams of main activity namely, (1) as workers and (2) as non-workers according as the type of main activity that the person returns himself as engaged in mostly.

79. *'Worker' defined :* A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work.

80. *Reference periods :* The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during this reference period and this has been returned as his main activity, the person will be categorised accordingly. A person who normally works but had been absent from work during this reference period on account of illness or travel, holiday, temporary breakdown, strike etc., the person should be treated as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages should be considered as economically active and recorded as working. A person who has merely been offered work but has not actually joined it, is not to be treated as engaged in work.

81. There are certain types of works which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry, etc. A person's main activity should be ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeartion. It is likely that even when a person is engaged in some other work during the period one week prior to the date of enumeration the main activity of the person may be cultivation, agricultural labour or some other work attended to normally by him in the course of the year. Care must be taken to see that the main activity is properly ascertained in such cases. For example, a person's main activity may be agricultural labour and in the week prior to enumeration he may be engaged as a sugarcane factory labourer or as a road cooly. He should be categorised for his main activity as agricultural labourer only as returned by him as he engages himself mostly in that work and the other work should be treated as his subsidiary work.

82. A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a ttudent attending institution, even if such a person helps in the family economic activity but not as a full time worker should *not* be treated as a worker for the main activity. On the other hand if a person is primarily engaged in some economic activity but at the same time does also attend to some household chores or attends a night school etc., he or she should be treated basically as a worker for the main activity and categorised accordingly.

83. A person who merely receives an income such as a rent receiver or a pensioner who does not have to work for receiving the income, will not be treated as economically active unless the person is also engaged in some economic activity and if that activity is returned as the main activity of the individual.

Q. 16(a) Broad Category (i) Worker (C, AL, HHI, OW) (ii) Non-Worker (H, ST, R, D, B, I, O).

84. The main activity returned by the person will entitle him to be categorised either as a worker in 16 (a) (i) or as a non-worker under 16 (a) (ii).

16(a)(i) Worker (C, AL, HHI, OW)

85. Where the main activity of a person qualifies him to be treated as a worker he should be further categorised according to the type of work and one of the appropriate abbreviations indicated against this question should be entered in the box provided for the purpose. If the person is not engaged in any economic activity a 'X' should be noted in the box. The abbreviations to be used for workers are explained below :

C : CULTIVATOR

86. For a person who returns his main activity as working as a cultivator, the abbreviation 'C' should be used.

87. *Definition of cultivator :* For purposes of the census a person is working as cultivator if he or she is engaged in cultivation by oneself or by supervision or direction in one's capacity as the owner or lessee of land held from government or as a tenant of land held from private persons or institutions for payment of money, kind or share.

88. Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and pulses, raw jute and kindred fibre crops, cotton, etc., and other crops such as sugarcane, groundnuts tapioca, etc., and does not include fruit growing, vegetable growing or keeping orchards or groves or working of plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

89. A person who merely owns land but has given out land to another person or persons for cultivation for money kind or share of crop and who does not even supervise or direct cultivation of land will not be treated as working as cultivator. Similarly, a person working in another person' land for wages in cash, kind or share (agricultural labourer) will not be treated as cultivator in this question.

AL : AGRICULTURAL LABOURER

90. A person who returns his main activity as engaged as agricultural labourer, the abbreviation 'AL' should be used in the box.

91. *Definition of an agricultural labourer :* A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He has no risk in the cultivation but he merely works in another person's land for wages. The labourer could have no righs of lease or contract on land on which he works.

HHI : HOUSE HOLD INDUSTRY

92. For a person who returns his main activity as engaged in some production, processing, servicing or repair of articles of goods such as, say, handloom weaving, dyeing, carpentry, *bidi* rolling, pottery manufacturer, bicycle repairing, blacksmithy, tailoring etc., it has to be ascertained if it is a household industry, and if so, it should be indicated by the abbreviation 'HHI' in the box.

93. *Definition of a household industry :* A household industry is defined as an industry conducted by the head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

94. The main criterion of a household industry is the participation of one or more members of a household. This criterion should apply to urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the household industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home, it will not be considered a household industry. It should be located within the precincts of the house where the members live.

95. A household industry should relate to production, Processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as a pleader or doctor or barber, musician, dancer, waterman, *dhobi*, astrologer, etc., or merely trade or business, even if such professions, trade or services are run at home by members of household. A list of a few typical household industries is appended to these instructions at Appendix III†.

96. Sometimes it is likely that the person who may not be working in his own household industry may be working as a petty employee in another household industry. You should, therefore, enquire whether the person who is not working in his own household industry is working in any other household industry as an employee and record as per instructions given above.

OW : OTHER WORKERS

97. If a person gives his main activity as engaged in any other work which is not cultivation, agricultural labour or household industry, this may be indicated by merely noting 'OW' in the box. The type of workers that may come under the 'other workers' category are factory workers, those working in trade or transport, all government servants, municipal employees, teachers, mining workers, political or social workers building labourers, etc. etc. In effect, all types of economic activity not covered by cultivation, agricultural labour or household industry will come under this residual category. Workers engaged in plantation or forestry should not be treated as cultivators or agricutlural labourers but as 'other workers'.

98. Further details pertaining to this 'other' category of workers, as also those engaged in household industry, will be recorded in the subsequent sub-parts (b) to (f) of question 16.

16 (a) (ii) Non-worker (H, ST, R, D, B, I, O)

99. As was stated earlier, question 16 is intended to ascertain the main activity of every individual whether he or she is economically active or not. While 16 (a) (i) helps to broadly categorise all those who have returned some work as their main activity, 16 (a) (ii) will help to categorise those whose main activity is not engaged in any economically productive work, but are basically non-workers. These may be categorised under seven broad heads whose abbreviations are indicated against this question. The appropriate abbreviation will have to be entered in the box provided. The abbreviations are explained below :—

H : HOUSEHOLD DUTIES

100. This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. The main activity of such a person should be entered as 'H'. If a person whose main activity is attending to household duties also engages oneself in some other economic activity such as helping in family cultivation or preparing cow dung cakes at odd times for sale etc., that economic activity will be covered as secondary work under question 17. On the other hand, a woman who works primarily as a factory worker or a plantation labourer or an agricultural labourer or in some office or shop etc., and also attends to household duties, obviously her main activity will be the economic activity in which she is mostly engaged in and should not be categorised as 'H' for her main activity in this question. She should have been treated basically as a worker and her main economic activity should have been recorded against 16 (a) (i).

ST : STUDENT

101. This refers to those whose main activity is returned as a student. This will cover all full time students or childern attending school. Even if such persons participated in some work but not to the same extent as a full-time worker, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity. 'ST' should be entered in the box. The other economic activity, if any, that such persons attend to will be reflected under question 17 as secondary work.

R : RETIRED PERSON OR A RENTIER

102. A person who has retired from service and is doing no other work, *i.e.* not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work, will come under this category. 'R' should be noted in the box for a person coming under this category.

D : DEPENDENT

103. This category will include all dependents such as infant or children not attending school or a person permanently disabled from work because of illness or old age. If a girl or an old woman attends to household duties she should be categorised under 'H' for her main activity rather than 'D'.

Dependents will include all non-workers even of able bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

B : BEGGARS ETC.

104. This will cover beggars, vagrants or such cases as independent woman without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

I : INSTITUTIONS

105. This will cover convicts in jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc., in such institutions. An under-trial prisoner in a jail should not, however, be brought under this category but has to be indicated according to the main activity he was engaged in before he was apprehended. Inmates of such institutions will be noted as 'I'.

O : OTHER NON-WORKERS

106. This will include all non-workers who may not come under any of the six categories above but are seeking work, they should be noted as 'O' in the box. A boy or girl who has completed education or has stopped studying and is seeking work, will come under this category. If a person is merely spending his time at home as a dependent and is not doing any work and is not seeking any work will come under 'D' rather than 'O'. A person irrespective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work will come under this category.

107. If the main activity of the person who is enumerated does not qualify a person to be treated as a worker and he does not fall under any of the four broad categories of workers covered by 16(a) (i) and a 'X' has been put in the box against that question, then he must necessarily be categorised under any one of the seven broad types of non-workers and the appropriate abbreviation entered in the box opposite to question 16(a) (ii). Conversely if a person has already been treated as a worker and his main activity has been indicated in the box against question 16 (a) (i), then question 16(a) (ii) will not apply to the person and a 'X' should be put in the box against question 16(a) (ii). Thus 16(a) (i) and 16 (a) (ii) are mutually exclusive.

Q. 16(b) to 16 (f)

108. These sub-parts of question 16 will have to be filled only to describe the details of the household industry or other work indicated against question 16(a) (i). If the main activity has been shown as 'C' or 'AL' against 16(a) (i), there is no need to give the details of the cultivation or agricultural labour in these sub-sections.

109. Similarly, if the main activity of an individual has been returned as a non-worker against 16(a) (ii), sub-sections (b) to (f) will not apply and a 'X' may be put right across all these questions.

†Not reproduced here.

Q. 16(b) : Place of work (name of village/town)

110. Ascertain from each person who is already taken as a worker other than in cultivation or a agricultural labour *i.e.* question 16(a) (i) has been answered as HHI or OW, the village or town where he or she works. If the place of work is the same as the village or town of enumeration write 'PL'. In all other cases you should write the name of the place fully. If a person has no fixed place of work such as, say, a travelling vendor of vegetables or a pedlar or a rickshaw puller who may go from one village or town to another, note "No fixed place of work" If he works in one particular town or village that should be noted.

Q. 16(c) : Name of establishment

111. This question and the subsequent sub-sections of question 16 need not be answered for cultivators and agricultural labourers who are already noted as 'C' or 'AL' against question (16) (a) (i).

Record here the exact name of the factory, firm, workshop, business house, company, shop, office etc., and in respect of public offices you should clearly indicate whether they are central or state government or local body offices, etc. If the establishment does not have any definite name such as, say, in the case of a household industry like hand pounding of rice, gur making, bee keeping, handloom weaving, potter's house, blacksmithy etc., note 'no particular name'.

Q. 16(d) : Nature of industry, trade, prossseion or service

112. The answer to this question will have to be adequately precise to enable proper classification of the sector of economy in which the person is working. The sector of economy in which a person works may relate to (i) plantation, forestry, fishing, livestock etc., (ii) mining and/or quarrying, (iii) manufacturing, (iv) construction, (v) electricity, gas or water supply, (vi) transport and communications, (vii) trade and commerce, (viii) professions and services. Full details of the type of industry, trade, profession or service in which the person is engaged will have to be recorded here. To help you to appreciate the details that may have to be furnished to classify the economic activity appropriately, substantial description of various economic activities are furnished in Appendix IV†, categorised under certain broad classification. The list in Appendix IV is not exhaustive. You shall have to describe the nature of industry, profession, trade or service whatever it is, in as precise a detail as possible.

Q. 16 (e) : Description of work

113. This question has to be filled up for all persons for whom the main activity is shown as 'HHI' or 'OW' in question 16(a) (i) and for whom you should have also to answer the other sub-sections of question 16. Under this question, the description of the actual work that the person enumerated is doing is to be recorded irrespective of which type of industry, trade, profession or service he may be working and which is already recorded under question 16(d). His actual work should also be given in sufficient detail. If for example a person is merely recorded as say, clerk with no other details, it will be impossible to properly categorise him as to the type of work he does. He may be a clerk attending to correspondence or book keeping or accounting. Similarly if a person were merely to be recorded as a mechanic, it will not help to determine what type of mechanic—electrical mechanic or a motor mechanic or a locomotive mechanic, etc., he is. The description of the actual work done by a person should be ascertained in adequate detail and recorded against this question.

114. To guide you in answering question 16 (e), the types of particulars that need to be ascertained in respect of a few typical occupations are given in Appendix V†.

Appendix V is by no means exhaustive. This just illustrates the need to ascertain the full details of the particulars of work performed by an individual for being recorded against question 16 (e).

115. It has been found in the past that substantial number of persons are recorded merely as general labourers. It is necessary to make a probe and find out in which type of work he is mostly engaged as a labourer such as, say, a road coolie, a loader or unloader at a market, a construction labourer, etc.

116. For those in military service it is enough if it is merely noted as 'in the service of the central government'. Other details need not be given.

General :

117. There need be no confusion as to the scope of 16 (d) and 16 (e). 16(d) would represent the nature of industry, trade, profession or service *i.e.* the field of economic activity in which a person is engaged in work and 16 (e) represents the occupation or the actual work that the person does in the industry, trade, profession or service in which he is engaged. Thus, for example the answer to question 16 (d) may be say cotton textile manufacture and the answer to question 16 (e) may be chemical engineer in that industry or a clerk or an accountant in that industry or a labourer in that industry or a truck driver or the managing director of that industry and so on. Similarly in question 16 (d) the nature of service may be some department of the state government service and in question 16 (e) the description of work may be a clerk or an accountant, a director of the deptt., jeep driver in the deptt. etc. Again say, against question 16(d) the answer may be private medical practice and in 16 (e) may cover orthopaedic surgeon, or nurse or a sweeper etc., working in that private medical practitioner's nursing home. The sample answers furnished in the specimens (Appendix VI†) at the end of this book, the industrial and occupational lists in Appendices IV & V and the instructions given by your superior census officers may help you to clear any doubts you may have in your mind regarding the scope of questions relating to nature of industry, trade, profession or service covered by question 16(d) and the description of actual work of the individual enumerated covered by question 16(e).

Q. 16(f) : Class of worker

118. For a person who is

(i) an employer, that is, who hires one or more persons in his work described in question 16 (e), write .. ER

(ii) an employee, that is, who does his work described in question 16 (e) under others for wages or salary in cash or kind, write .. .. .. EE

(iii) a single worker, that is, who is doing his work described in question 16 (e) without employing others except casually and without the help of other members of the family except casually and participant in work as members of co-operatives, write .. .. SW

(iv) a family worker, that is, who is doing his work described in question 16 (e) in a family enterprise along with other members of the family without wages or salary in cash or kind, write .. .. ..FW

For a person for whom an 'X' is put in questions 16 (d) and 16 (e) put a 'X' in this question also.

Explanation :

119. An employer is a person who has to employ other persons in order to perform the work entered in question 16 (e). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in business mentioned in question 16 (e). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

120. An employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

† Not reproduced here.

121. A single worker for the purpose of question 16 (f) is a person who works by himself. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a single worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'single worker'.

122. A family worker is member who works without receiving wages in cash or kind, in an industrty, business, trade or service. For example, the working members in a family of *Dhobis* where they all participate and each does not receive wages separately will be family workers. There may be family workers in industry, trade or professions as well. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

123. Members of the household who help solely in household duties should not be treated as family workers.

124. In the case of persons engaged in household industry *i.e.*, in the case of persons for whom the answer to question 16(a) (i) is 'HHI', there will be three classes of workers, *viz.*, family worker, single worker and employee. There will be no employer. Household industry by its very definition is conducted by the head of the household himself or/and other members of the household, the role of hired workers being secondary. If the head alongwith the members of the household is working in a household industry employing hired workers, the head and other members who are working should be treated as 'family workers'. If the head alone is working with the assistance of hired worker(s) whose role would be secondary as indicated above, he would be treated as a 'single worker'.

Some illustrations for filling the question 16 or 17 are given in Appendix VI†.

Q. 17 : Secondary work

125. This question should be asked of every person whether he has returned some work as his main activity against Q. 16 (a) (i) or had returned himself under any of the basically non-working categories against question 16 (a) (ii). As was noted earlier, Q. 16 (a) (ii) will cover cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work as in cultivation or in household industry or in looking after the cattle, in attending to family business etc., but not to the extent as a full-time worker. Such participation will be considered as secondary work of these persons.

126. Ask of each person if besides what he had already returned as his/her *main* activity against questions 16(a) (i) or 16 (a) (ii), he/she participated in any secondary work. A number of unpaid family workers participating in the household enterprises, who might have returned themselves mainly as 'H' or 'ST' or 'R' under question 16 (a) (ii) for their main activity will be netted here for their economic activity which is subsidiary. Mere rendering of service for ones own home or production of goods for purely domestic consumption are not to be treated as economic activity. For example, a servant who works as a cook in his or her employer's home for wages will be considered economically active but, a housewife, even if she may work much more than a paid servant, in having to cook for the family or looking after the household will not be treated as economically active for the purpose of this classification. Similarly, women who may produce cloth on a loin loom at home for domestic consumption will not be treated as economically active unless the products are sold and the household derives an income. Participation in work that goes to augment the income of the household will only be treated as economic activity. A boy whose main activity is shown as a student under 16(a) (ii), can have the secondary work of say, cultivation if he helped the head of the household in the family cultivation during some parts of the season. But if a girl student whose main activity is shown as 'ST' under 16 (a) (ii), also helped in weaving cloth purely for domestic consumption on a loin loom at home, or helped in attending to household chores, she will not be treated as having any secondary work. Secondary work will be reckoned only if the person is engaged in some economic activity even if marginal in addition to whatever is the main activity under question 16. A person whose main activity is shown as, say, a clerk in a government office or a teacher under question 16, also attends to some cultivation by his direct supervision or under takes some tuition, this will be shown as secondary work under question 17. A person's main activity may be cultivation in question 16 and his subsidiary activity money lending in question 17. Again main activity may be agricultural labourer and subsidiary work sugar factory labourer and so on and so forth.

127. The instructions for the usage of abbreviations in categorising workers under 16 (a) (i) and filling in the details under 16(b) to (f) will apply *mutatis mutandis* to question 17 (a) to (f) except that while question 16 (a) (i) will cover the main work, Q. 17 (a) is intended to cover secondary work which may be possibly part-time. It may also be noted that the non-working categories of activity will not be reported as secondary work under question 17.

128. A few slips showing specimen entries appear as Appendix VII† and some illustrations for recording answers against Q. 16 are given in Appendix VI†. You are advised to study the specimen entries and illustrations before starting actual enumeration and also consult these and the instructions whenever you are in doubt in recording any answer during field operation.

* * * * *

ENUMERATION OF HOUSELESS POPULATION

130. You must complete the enumeration of all the persons in all the households in your jurisdiction between 10 February and 28 February 1971. During this period you should also take note of the possible places where homeless population is likely to live such as on the road side, pavements or in open temple mandaps and the like. On the night of 28 February 1971 you will have to quikly cover all such houseless population and enumerate them. If there is likely to be a very large number of houseless persons in your jurisdiction whom you may not be able to enumerate single handed in one night you should report to your supervisor so that one or more extra enumerators may be deputed to assist you in the one night enumeration of such houseless persons. You should keep particular watch on the large settlements of nomadic population who are likely to camp on the outskirts of villages. These people will have to be covered on the 28 February. You shou d of course make sure that they have not been enumerated elsewhere. As per instructions in para. 28 you should record 'O' in bold letters for houseless persons in the space provided for household number.

REVISIONAL ROUND

131. In the next three days, *i.e.* from 1 March 1971 to 3 March 1971, you will have to revisit all the households in your jurisdiction and enumerate any new births that had taken place after your last visit but before the sunrise of the 1 March 1971 and any visitor (s) that had moved in to the household and who had been away from his/their place of normal residence throghout the eumeration period *i.e.* from 10 February to 1 March 1971 or an entire household that has moved in to your jurisdiction during this preriod and had not been enumerated anywhere before. In respect of every new birth make sure that you correct the entry in question 6 (b). Please also see the note under para. 47.

You will have to ascertain if any death(s) had taken place in any of the households between your last visit and the sunrise of 1 March 1971, and cross out the individual slip of the dead person writing boldly across it as 'Died'.

If such a deceased person was recorded as 'head of the house hold' then you will have to find out who is recognised as 'head' in that household after the deceased person. Accordingly, you will have to put 'head' in Q. 2 in the individual slip of the person who is now recognised as 'head' and correct the relationship of all members of the household in their respective individual slips, with reference to their relationship with 'head' now recognised.

TABLE A-I

AREA, HOUSES AND POPULATION

MAHARASHTRA

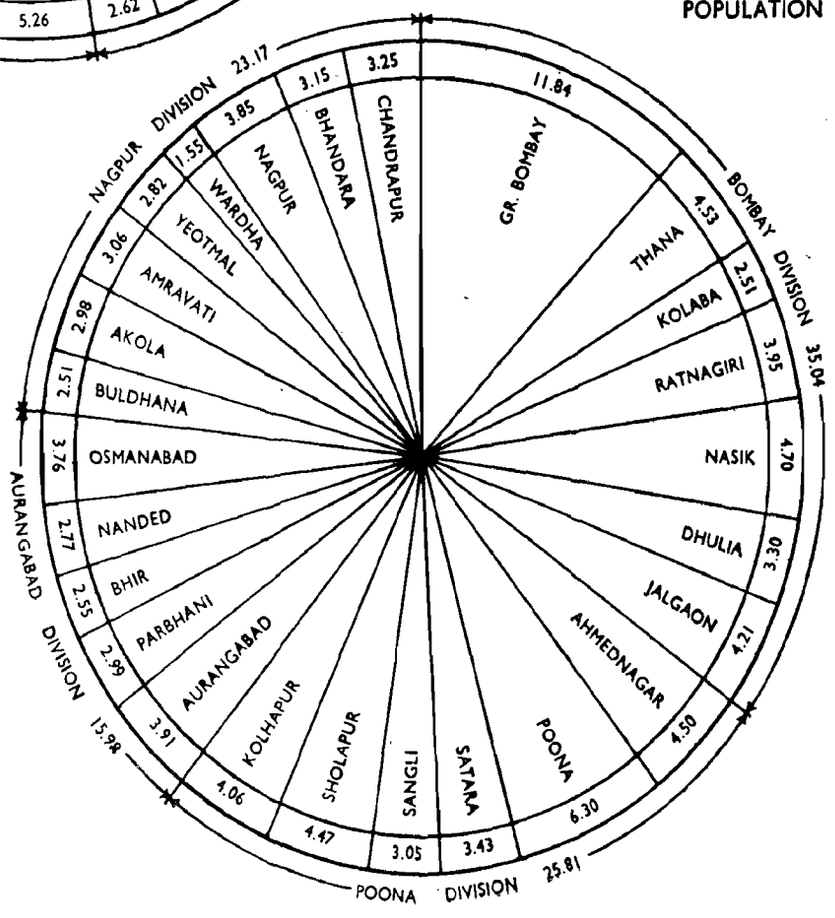

Area and population by districts

Each circle is divided among the 26 districts according to the percentage its area or population bears to that of the state. Percentage figures are also shown.

AREA

POPULATION

EXPLANATORY NOTE

Maharashtra state was formed on 1 May, 1960 when the composite bilingual Bombay state was split into Maharashtra with 26 districts and Gujarat with 17 districts. The decades 1941-50 and 1951-60 saw a number of major territorial changes and adjustments of areas in the country, first on account of independence and integration of the princely states and secondly because of adjustments of territories when the states were reorganised. Compared to these two decades, there were very few changes in Maharashtra during 1961-70. There was no addition or transfer of areas so far as Maharashtra was concerned. The changes were confined to a few inter-district and inter-tahsil transfers of areas, creation of new tahsils by bifurcation of old tahsils, amalgamation of certain villages and conversion of certain hamlets into full-fledged revenue villages. The major changes are shown below.

Creation of new tahsils—

2. (*i*) Just as the census results of the 1961 were being tabulated, a new mahal called Talasari mahal consisting of the following 27 villages of Umbargaon tahsil was created in 1961.

(1) Achhad, (2) Kajali, (3) Upalat, (4) Bormal, (5) Sambha, (6) Amagaon, (7) Kochi, (8) Ghimniye, (9) Dongari, (10) Varwade, (11) Sawroli, (12) Anwir, (13) Girgaon, (14) Zari, (15) Talasari, (16) Sutrakar, (17) Borigaon tarf Deheri, (18) Vevaji, (19) Vasa, (20) Kawade, (21) Zai, (22) Karajgaon, (23) Sawane, (24) Vadwali, (25) Kunzre, (26) Kodad, (27) Udhawa.

(*ii*) Two new tahsils, Kavathe Mahankal (40 villages) and Atpadi (32 villages) with headquarters at Kavathe Mahankal and Atpadi respectively were created by transferring villages from Miraj and Khanapur tahsils of Sangli district.

Villages in Kavathe Mahankal—

(1) Ghatnandre, (2) Tisangi, (3) Rayewadi, (4) Wagholi, (5) Ghorpadi, (6) Dudhebhavi, (7) Nimaj, (8) Chorochi, (9) Kundlapur, (10) Kerewadi, (11) Arewadi, (12) Dhalgaon, (13) Chudekhindi, (14) Jakhapur, (15) Agalgaon, (16) Langarpeth, (17) Dhalewadi, (18) Malangaon, (19) Jaigavan, (20) Kuchi, (21) Irali, (22) Borgaon, (23) Shirdhon, (24) Nangole, (25) Moghamwadi, (26) Karoli (T), (27) Alkud(M), (28) Haroli, (29) Kavathe Mahankal, (30) Alkud (S), (31) Kharsing, (32) Desing, (33) Hingangaon, (34) Ranjani, (35) Kokale, (36) Kukatoli, (37) Mhaisal (M), (38) Dhulgaon, (39) Sarati, (40) Kognoli.

Villages in Atpadi—

(1) Vibhutwadi, (2) Zare, (3) Pimpari Bk. (4) Jambulani, (5) Gharniki, (6) Ghanand, (7) Kamat, (8) Walwan, (9) Chinchale, (10) Kharsundi, (11) Nelkaranji, (12) Banpuri, (13) Tadvale, (14) Gomewadi, (15) Kargani, (16) Hivathad, (17) Shetphale, (18) Rajewadi, (19) Lingivare, (20) Umbargaon, (21) Palaskhel, (22) Dighanchi, (23) Nimbavade, (24) Galvewadi, (25) Awalai, (26) Vithalpur, (27) Sherewadi, (28) Kautholi, (29) Pimpri Kh., (30) Atpadi, (31) Bombewadi, (32) Madgule.

(*iii*) A separate tahsil called Ulhasnagar with headquarters at Ulhasnagar and comprising 94 villages was created in Thana district by transferring villages from Kalyan tahsil.

Villages in Ulhasnagar tahsil—

(1) Chinchpada, (2) Ashele, (3) Javasai, (4) Dwarli, (5) Manere, (6) Adivali-Dhokali, (7) Vasar, (8) Pale, (9) Jambhivali, (10) Chikhaloli, (11) Belivali, (12) Valivali, (13) Sai, (14) Umbroli, (15) Bhal, (16) Nevali, (17) Mangrul, (18) Gorpe, (19) Kakole, (20) Katrap, (21) Manjarli, (22) Chinchvali, Bk. (23) Dhoke, (24) Shiravali, (25) Bohonoli, (26) Pali, (27) Chirad, (28) Posari, (29) Amboshi, (30) Kharad, (31) Ambhe, (32) Narhan, (33) Karavale Kh. (34) Kumbharli, (35) Sakharoli, (36) Kushivali, (37) Asode, (38) Usatane, (39) Wadi, (40) Burdul, (41) Bandhanwadi, (42) Dapivali, (43) Dhoke, (44) Ambeshiv Kh., (45) Pachon, (46) Karand, (47) Yeranjad, (48) Ambeshiv Bk. (49) Chon, (50) Sagaon, (51) Padirpada, (52) Vashivali Bhokri, (53) Sonivali, (54) Rahatoli, (55) Umbroli, (56) Asnoli, (57) Chandap, (58) Shirgaon, (59) Jambilghar, (60) Mulgaon, (61) Sonavale, (62) Pimpaloli, Tarf Chon, (63) Savaroli, (64) Mankivali, (65) Joveli, (66) Kharvai, (67) Yeve, (68) Varade, (69) Dahivali Tarf Chon. (70) Chamtoli, (71) Jambhale, (72) Kanhor, (73) Chargaon, (74) Bhoj, (75) Sape, (76) Tan, (77) Devaloll, (78) Khuntivali, (79) Bendshil, (80) Kasgaoni, (81) Savare, (82) Indgaon, (83) Shil Tarf Chon, (84) Chinchavali, (85) Goregaon, (86) Kudsavare, (87) Karav, (88) Dhavale, (89) Vangani, (90) Donn and urban areas—(91) Ulhasnagar, (92) Ambarnath, (93) Badlapur, (94) Kulgaon.

Inter district transfer of villages—

3. The following ten villages from Ramtek tahsil of Nagpur district were transferred to Bhandara tahsil of Bhandara district.

(1) Chikhali, (2) Kharbi, (3) Thana, (4) Kharadi, (5) Parsodi, (6) Rajedahegaon, (7) Saori, (8) Kondhi, (9) Lohara, (10) Peotha.

Intra-district transfers

(Transfer of villages of one tahsil to other tahsil within the district).

4. (*a*) Seven villages (Amali, Ankushvihir, Jamli, Umarkuwa, Khadake, Khatwani, Kumbharkhan, Thanavihir) were transferred from Taloda tahsil in Dhulia district to Akkalkuwa tahsil of the same district.

(*b*) Five villages (Abhanpur Kh., Bhatane, Mamane, Taradi T.Tarhad, Tarhad) were transferred from Shahada tahsil of Dhulia district to Shirpur tahsil of the same district.

(*c*) One revenue village Dapodi (an urban area) of Haveli tahsil of Poona district was transferred to Poona city tahsil. This village is included in the Poona municipal corporation.

(*d*) One village, Bardi from Mohol tahsil of Sholapur district, was transferred to Pandharpur tahsil of the same district.

(*e*) One village, Watangi from Gadhinglaj tahsil of Kolhapur district was transferred to Ajra tahsil of the same district.

(*f*) Two villages, Wadhavi and Isafpur from Akola tahsil in Akola district, were transferred to Murtazapur tahsil of the same district.

Some survey numbers of certain villages were transferred to other villages in the same tahsils. These changes are not shown here.

5. Maharashtra state comprises four revenues divisions, twenty six districts and 232 tahsils as shown in Statement 1 in the next column :—

STATEMENT 1

Division	*District*	*No. of tahsils*
Bombay . . .	Greater Bombay	..
	Thana	13
	Kolaba	14
	Ratnagiri	15
	Nasik	13
	Dhulia	10
	Jalgaon	13
Poona . . .	Ahmednagar	13
	Poona	14
	Satara	11
	Sangli	8
	Sholapur	11
	Kolhapur	12
Aurangabad . . .	Aurangabad	12
	Parbhani	8
	Bhir	7
	Nanded	8
	Osmanabad	11
Nagpur . . .	Buldana	5
	Akola	6
	Amravati	6
	Yeotmal	5
	Wardha	3
	Nagpur	5
	Bhandara	3
	Chandrapur	6

6. The number of districts in the state remains the same as that in 1961 but that of tahsils has increased from 229 in 1961 to 232 on account of creation of new tahsils of Kavathe Mahankal and Atpadi in Sangli district and Ulhasnagar in Thana district. The number of tahsils is, however, exclusive of three tahsils (Andheri, Borivli and Kurla) which form part of the Greater Bombay municipal corporation area. The census and other statistics for these tahsils are being presented as those of the sections of the Greater Bombay municipal corporation.

7. Greater Bombay district is an entirely urban area. It comprises Bombay city and Bombay suburban district. Although the latter is treated as a separate revenue district for revenue and land administration, for all other practical purposes it forms a part of the Greater Bombay municipal corporation area

8. Similarly Rajura, though treated as a separate district for revenue purposes, is a tahsil in Chandrapur district. Rajura was a part of Adilabad district of the erstwhile Hyderabad state and was transferred to Nanded district in 1956. Owing to its geographical location, it was transferred from Nanded district to Chanda district in March 1969. A different set of laws inherited from the Hyderabad administration is in force in Rajura. It is, therefore, notified as an independent district and a division in itself and is placed under the Collector of Chandrapur district and the Commissioner of Nagpur division for administrative purposes. As in 1961 census it has been treated as a tahsil in Chandrapur district and census figures are compiled and presented as for the tahsil as in other state government publications.

9. The following is the order of presentation of census data in the census table upto the tahsil level. The figures for Maharashtra are presented

first followed by those of Bombay division and then its first district followed by tahsils, in that district. It is then followed by the next district and its tahsils and so on. After completion of the last tahsil in the last district of the division, the figures for the next division, district and so on are presented.

10. There have been only two changes in the names of districts and the tahsils after 1961. The name of Chanda district was changed to Chandrapur and that of Mominabad tahsil to Ambejogai tahsil. Generally, the names of tahsils correspond to those of their headquarters. The following tahsils have names different than their tahsil headquarters.

District	*Tahsil*	*Tahsil hq.*
Kolaba	Sudhagad	Pali
Ratnagiri	Sangameshwar	Devrukh
Nasik	Baglan	Satana
Dhulia	Akrani	Dhadgaon
Poona	Ambegaon	Ghodegaon
	Mawal	Vadgaon
	Haveli	Poona
	Mulshi	Paud
	Purandhar	Saswad
Satara	Jaoli	Medha
	Khatav	Vaduj
	Man	Dahiwadi
Sangli	Khanapur	Vita
	Walwa	Uran Islampur
Kolhapur	Karvir	Kolhapur
	Bhudargad	Gargoti
Amravati	Melghat	Dharni
Yeotmal	Kelapur	Pandharkaoda

11. The census statistics are published for revenue administrative units like districts, tahsils and villages and for municipal and non-municipal towns. It has not been possible to compile census data for the community development blocks as these blocks have not been treated as territorial units for collection and collation of census data. Community development blocks are not always co-terminus with tahsils. When the boundaries of some of the blocks cut across those of tahsils, only one of the two units, the tahsil or the block, can be considered as a unit. Further, urban areas of the tahsils include both municipal and non-municipal towns. The block areas which are considered as rural areas *i.e.* which exclude municipal towns are inclusive of non-municipal towns. The categorisation into rural and urban as envisaged in the census cannot, therefore, be strictly applied to the development blocks. Since the primary census abstract are compiled for each village, it should be possible to have the basic census data for the community development block by adding the data for all villages within the block.

12. As in 1961, Table A-I is presented in two parts. The first is the Union Table A-I which gives details for Maharashtra, its four divisions and twenty-six districts only. The second part is the State Table A-I. It presents similar figures for smaller units down to tahsils and towns. A new feature of this table is that data are presented for urban agglomerations for the first time. In 1961 separate figures were published for the town groups (see explanatory note on Table A-IV).

13. Table A-I shows the area, population number of inhabited and uninhabited villages, number of towns, number of occupied residential houses, number of households, total population and its break-up for males and females. For each division, district and tahsil figures are presented separately for total, rural and urban areas. Table A-I is a basic census table which provides census data for each administrative unit. The towns located in a tahsil are shown immediately following the entries for the tahsil's total, rural and urban areas. They are arranged in the order of code numbers assigned to them with reference to their geographical location except in the case of the second and further constituents of urban agglomerations which appear immediately below the main constituent. The area of each administrative unit is shown in square kilometres. The density of (population per km^2) is worked out on the basis of area figures shown in column 3 of the table.

14. In 1961, two sets of area figures, available from the Surveyor General, India, and the Director of land records, Maharashtra, were used in the census publications for the state and the districts. The area figures reported by the Director of land records were obtained by totalling village areas calculated from cadastral survey records and those of the Surveyor General obtained by drawing district boundaries on large scale maps and by measuring areas by planimeter. As a result there were differences in the two sets of figures, which were more marked in the case of Greater Bombay, Thana, Dhulia, Jalgaon, Ahmednagar and Aurangabad districts. The Surveyor General's figures were then treated as provisional and very approximate as adjustments due to territorial changes had not been finally adjusted. In 1971 only one set of area (total) figures is presented at the state and district level; this is the one supplied by the Surveyor General of India. The state and district figures of area which are still provisional are shown in Statement 2 on page 24.

STATEMENT 2

Area figures for districts and state

State/District	Area in km²
Maharashtra State	**307,762·0**
Greater Bombay	603·0
Thana	9,553·0

Wardha	6,307·0
Nagpur	9,928·0
Bhandara	9,214·0
Chandrapur	25,641·0

15. The Surveyor General's figures are not available, below district level. Therefore, for presentation of area for units below the district level, the following method is used. The urban area figures for district and tahsil are based on those supplied by the local bodies for their respective areas. The rural area figures at the district level are derived by subtracting 'urban' area from the 'total' area figures supplied by the Surveyor General. The state rural and urban area figures have been arrived at by adding the respective areas of the districts. The total of area figures (total and rural) of the tahsils will not tally with the district figures because the former represents land use area and the latter represents the geographical area. The tahsil's rural areas, are arrived at by adding area figures of villages within the respective tahsils. Similarly urban areas in tahsils are arrived at by adding the areas of towns falling within tahsils. The total area of the tahsil is the same total of rural and urban areas so derived.

16. For facility of comparison the 1971 census population of India, states and union territories is shown in Statement 3 on page 25–26. Maharashtra with its area of 307,762·0 km² and its 1971 population of 50,412,235 is the third largest state in India both by area and population and accounts for 9·63 per cent of the area 9·20 per cent of the population of India. Uttar Pradesh and Bihar have larger populations and Madhya Pradesh and Rajasthan have larger areas than Maharashtra. In both regards Maharashtra has maintained its respective rank in 1961 and 1971.

17. Among the districts of Maharashtra, Greater Bombay which is entirely an urban area has the largest population (5·97 million). The next three districts in rank are Poona (3·18 million), Nasik (2·37 million) and Thana (2·28 million). Wardha has the smallest population (0·78 million).

18. Chandrapur district with an area of 25,641·0 km² is the largest district in Maharashtra. It is an exceptionally large district. It has more than 50 per cent of its geographical area under forest and is a sparesly populated district. Ahmednagar district which is the second largest district in the state has an area of only 17,035·0 km². Greater Bombay with an area of 603·0 km² is the smallest district in the state. Its comprises only the area included in the limits of the Greater Bombay municipal corporation. For revenue purposes, the area is administered as two units, Bombay city and Bombay suburban district. For all other administrative purposes, it is treated as one district. As in 1961, Greater Bombay has also been treated as one district for census purposes. The second smallest district is Wardha which has an area of 6,307·0 km².

19. The largest tahsil in Maharashtra is Sironcha in Chandrapur district which has an area of 8,000 km²; the smallest is the Poona city tahsil which has an area of only 184.1 km². This tahsil comprises besides the Poona municipal corporation area only one village. Nagpur tahsil which includes the Nagpur municipal corporation had the largest population (1.1 million) which is higher than that of the neighbouring district of Wardha (0.78 million). The smallest population of a tahsil is found in Mahabaleshwar tahsil (30,191). The average area and population per tahsil is higher in Nagpur division which has exactly half the number of tahsils as that of Bombay division. The average area and average population per tahsil for the state and its four divisions are shown in Statemet 4.

Kolaba	1,263,003	24	24
Buldana	1,262,978	25	23
Wardha	779,562	26	26

21. Sixteen districts have kept their 1961 respective ranks in 1971. Sholapur district which was third in 1961 has slipped, in favour of Nasik, to sixth. The other districts to lose their ranks are Ratnagiri, Bhandara and Buldana. Bhandara and Chandrapur have exchanged their ranks. Thana district with its industrial expansion and absorption of the overflow of population of Greater Bombay has moved from eight in 1961 to fourth in 1971. The districts which have come up by one rank are Nasik, Ahmednagar and Kolhapur. Bhir district has moved up by two ranks.

22. In Table A-I, as in the case of the primary census abstract population figures on different items for each administrative unit are shown separately for rural and urban areas. It is customary to classify the population of administrative units as rural and urban at a census for assessing differentials in social, economic, cultural and demographic characteristics of the population. Population census results on different aspects are, therefore, collated and presented separately for the rural and urban sectors of population.

Urban areas

23. Prior to 1961, the criteria for classifying any place as urban or rural were not followed uniformly by all states in India or even within a state. Uniform tests for recognition of urban or rural areas were prescribed in 1961. As in the past censuses all municipal areas, cantonments and civil lines were recognised as urban areas regardless of their size or composition of population. For places having no municipality, cantonment or civil lines, three tests were prescribed (*i*) a population not less than 5,000, (*ii*) at least 75 per cent of the male working population being employed in pursuits other than agriculture, and (*iii*) a density of not less than 1,000 per sq. mile. The criterion regarding density of population was not applied in Maharashtra in 1961 owing to certain practical difficulties,

24. For any place to be recognised as an urban area (town) for the 1971 census, it was to have a municipal corporation or an area under a municipal council or a cantonment or a civil line. If it did not have any of these urban local bodies to administer its affairs, the following empirical tests were applied, (*a*) a minimum population of 5,000 (estimated for 1971); (*b*) a density of not less than 400 per km² (1,000 per sq. mile); (*c*) 75 per cent of the male working population pursuing occupations falling outside agriculture; (*d*) the place should have, according to the Director of census operations of the state, a few pronounced urban characteristics and amenities.

25. A list of urban areas was finalised much in advance of the first stage of census of house-numbering and houselisting. Originally, it was intended to have an area sampling for the purpose of canvassing certain schedules and it became necessary to finalise the list of urban and rural areas even before the census stages of collection of data. For application of the criteria of minimum population of 5,000 and the prescribed proportion of male workers in non-agriculture persuits in the case of certain places the population at 1971 had to be estimated on the basis of a trend of growth during 1951 and 1961. In 1961, even at a stage as late as compilation of the primary census abstract some of the places considered as towns tentatively were declassified when the 1961 total population and its composition were known. Such further examination on the basis of final 1971 figures was not done this time. Therefore, some of the towns which do not, strictly satisfy the criteria mentioned above are treated as urban areas.

26. Only eight non-municipal towns (Badlapur, Rasayani, Shirgaon, Alore, Kuran Kh. Bhade, Humbrali and Gokul Tarf Helwak) do not satisfy the criterion of minimum population of 5,000. The population of these towns is only 0·16 per cent of the total urban population of Maharashtra. Further 15 non-municipal towns having 5,000 or more population do not have the prescribed proportion of their male workers engaged in non-agricultural pursuits. These towns are Sandor, Dahanu, Vada, Dabhol, Nate, Vani, Ravalgaon, Chandor, Nandgaon (N.M.), Ozar, Pimpalgaon Basvant, Nawapur, Wari, Dehu and Sasti. The total population of these towns is only 0.89 per cent of the total urban population of Maharashtra.

27. On account of the uniform definition of urban areas adopted during 1961-71, urban population figures are now comparable from state to state except for the limitation introduced by the clause relating to municipalities, cantonment etc. Requirements of population size applied in the states for municipalities differ. In Maharashtra, there are five local bodies (municipal councils) which have less than 5,000 population and there are 48 places having more than 5,000 population where there are no municipalities. In 1971, there were 289 towns (urban areas) in Maharashtra of which four were municipal corporations and 221 were municipal councils. The number of urban areas or towns has varied from census to census as will be seen from Statement 6 on page 29 which shows district-wise number of towns in Maharashtra from 1901 to 1971.

28. The number of towns in Maharashtra has steadily increased from 219 in 1901 to 289 in 1971. There was an unusual increase in this number in 1951 because of the loose definition of an urban area adopted at that time. Besides municipal areas, cantonments, etc, all places which had 5,000 or more population and showed urban characteristics were recognised as towns (urban areas). As no specific criteria were laid down for defining the urban characteristics, the number of towns got inflated to 383 in that year. In 1961 and 1941 the number of towns remained 266.

29. Whereas the percentage growth in the number of towns in Maharashtra during 1901-71 was 31·9, the percentage increase in the urban population during the same period was 388. This shows continued expansion of existing towns and comparatively slow emergence of new centres attracting fresh urbanisation and development of new towns.

30. There has been no increase in the number of towns either in Aurangabad division or any of its districts during 1961-70. In Buldana the number of towns (9) has remained the same for the last 70 years. Bombay division has the highest number of towns (96) and Aurangabad division the lowest (53). The other two divisions, Nagpur and Poona, have the same number of towns (70) each. There has been no change in the number of towns in 1961-70 in the five districts of Aurangabad division, all districts of Nagpur division except Nagpur and Chandrapur and in Dhulia, Poona, Sholapur and Kolhapur districts.

31. Table A-IV shows the variation of urban population and growth of individual towns during the last 70 years (1901-1971). The subject has been further dealt with in the explanatory note on that table.

32. Out of the 266 towns in Maharashtra in 1961, no town was declassified because of municipalities getting defunct or the places not satisfying the prescribed criteria. Five urban areas of 1961, however, merged with other urban areas. Dapodi merged with the Poona municipal corporation; Satara suburban merged with the Satara municipal council; Bhosari, Pimpri Waghere and Chinchwad because of the Pimpri Chinchwad industrial complex,

STATEMENT 6

Progress in number of towns in Maharashtra

33. The following new towns have been added in 1971 :

District	Town	Population
Thana	Majivade	22,126
	Manikpur	7,610
	Badlapur	4,703
	Kulgaon	6,758
Kolaba	Rasayani	2,018
	Khopoli New Township (M)	18,152
Ratnagiri	Shirgaon	3,172
	Alore	3,369
Nasik	Vani	6,548
	Manmad (Non-M)	10,490
	Nandgaon (Non-M)	7,096
	Ozar	21,260
	Pimpalgaon Basvant	12,289
Jalgaon	Varangaon	8,179
Ahmednagar	Ahmednagar cantt.	30,169
Poona	Pimpri-Chinchwad New Township (M)	83,542
	Dehu Road cantt.	24,709
	Dhond (Non-M)	19,387
	Kuran Kh.	2,898
Satara	Bhade	2,391
	Sadashivgad	7,861
	Patan	6,182
	Humbrali	4,421
	Gokul T. Helwak	2,270
Sangli	Madhavnagar	8,853
Nagpur	Kanhan (Pipri)	6,600
Chandrapur	Ghugus	8,262
	Desaiganj (M)	11,783

Rural areas

34. For purposes of the census, rural area has always been defined negatively. The urban area is defined meticulously and the remaining area is treated as rural area. Urban population resides in towns (urban areas). Rural population resides in villages which do not satisfy the criteria of the prescribed urban definition and are not considered as towns.

35. For the census the village is always the revenue village which is the ultimate unit of area into which the country is sub-divided for purposes of land revenue administration. A few past censuses concerned themselves only with those revenue villages which had some population and did not take into notice the so-called deserted or uninhabited revenue villages. As in 1961, the revenue villages which did not have any residential population are also included in the 1971 census definition of villages. They are included in the census list of villages but are described as 'uninhabited' villages to distinguish them from the remaining inhabited villages. A village in the 1971 census is thus a revenue village having defined boundaries and a separate set of land records irrespective of whether that defined area has any population or not and if it has some population whether that population resides in one residential locality (gaothan) or is, in addition, spread over one or more identifiable clusters of population known as wadis, padas, mazras (hamlets). The hamlets do not have defined boundaries or areas distinctly marked or allotted to them; nor do they have any legally recognised status. On the other hand, each revenue village has a specified area marked as its own and its boundaries with the other adjoining villages have always enjoyed a traditional sanctity. The hamlets are situated within the areas earmarked for the village. They do not function as self-contained social or economic groups and have always been treated socially and economically as integral parts of the village community to which they belong. Where a revenue village situated on the outskirts of a town is wholly or partly merged in that urban area, it has been treated as a separate revenue village. The population residing in its area which is statutorily merged in the town limits has been treated as urban population of that town and the residual population, if any, residing upon its area left out of the limits of the town is treated as the population of that village. Thus a few partly merged villages have returned some populations. The rural population for all fully merged villages is shown as 'nil'.

36. While the 1971 census villages are thus completely identified with the revenue villages, forest villages are exception. They are population centres situated within the reserved forest area. Their population mainly comprises forest labourers and their families. Most of them are permanent or semi-permanent localities and also have attached cultivated areas leased out by the forest department under certain conditions. Such forest villages have also been treated as villages. The inhabited villages shown in column 5 includes (i) all revenue villages which have got residential population except those which have been entirely merged in the urban areas and in respect of which separate population has not been, shown and (ii) inhabited forest villages. They exclude uninhabited villages and those which are entirely merged in urban areas.

37. The number of villages which have been completely merged in urban areas is 488. Their population is included in urban population and their number is not included in the number of inhabited villages shown in column 5. In case of villages only partly included in urban areas their population outside the municipal limits has been treated as rural population and number of such partly included villages is included in the number of inhabited or uninhabited as the case may be. The number of partly included villages is 258 and each village has been counted separately and is included in the figures of inhabited villages in Table A-I. All the cases of villages fully or partly included in urban areas or towns are listed in Statement 7 below. The presentation is districtwise and in each case of inclusion of a village, the name of the town and the name(s) of the village(s) included in it either fully or partly are shown separately. The population of such included areas is however treated as urban population.

38. Statement 8 on page 35 shows the number of inhabited villages in Maharashtra, its four divisions and districts for 1961 and 1971.

39. Maharashtra had 35,778 inhabited villages in 1971 as against 35,851 in 1961. This decrease in the number of villages is due to (i) small villages especially forest villages get depopulated; (ii) some of the villages are amalgamated with adjacent villages; (iii) some villages are fully included in urban areas, (iv) a few villages have also gone under submergence in the new irrigation projects ect.

Nagpur	5	1,625	325
Bhandara	3	1,500	500
Chandrapur	6	2,840	473

40. Among the divisions, Nagpur division has the largest number of inhabited villages (12,932) and among the districts Chandrapur district ranks first with 2,840 villages. The next three districts in ranks are Aurangabad with 1,866, Kolaba with 1,699 and Yeotmal with 1,647. Sangli district has the smallest number of inhabited villages (539).

41. The number of inhabited villages in a tahsil ranges from 1 in Poona city tahsil in Poona district to 866 in Gadnchiroli tahsil of Chandrapur district. The average number of inhabited villages per tahsil for Maharashtra and its divisions and districts are given in Statement 9.

42. The number of inhabited villages has generally shown a decrease during the 1961-71 decade except in eight districts (Dhulia, Sangli, Sholapur, Buldana, Amravati, Yeotmal, Bhandara and Chandrapur) where it has shown slight increase.

43. Column 8 of Table A-I shows the number of occupied residential houses for the state and for administrative units down to tahsils and separately for total, rural and urban areas and also for each town. Occupied residential houses are census houses used for residential purposes excluisvely or along

with any other use. A census house is a 'building' or part of a building having a separate main entrance from the road or a common courtyard, staircase, etc. used or recognised as a separate unit. It may be used for residential or non-residential purposes or both. The houses are classified by their use *viz.*, dwellings, shops, workshops, temples, schools, offices, etc. Some houses are used partly for residential purposes and partly as shops, etc. They are classified as shop-cum-dwelling or as the case may be. The figures of occupied residential houses shown in this table are those of census houses actually used as residence (dwelling) or residence-cum-other use on census day. The number of occupied residential houses thus includes besides residential houses, workshops, factories, garages shops, depots, etc., where one or more persons (like watchmen, peons, drivers, attendants, etc.) were found to be residing at the time of census. On the other hand, it does not include houses which are residential houses but which at the time of the census were either vacant or where no person was found to be residing (i.e. those exclusively used for non-residential purposes).

44. Statement 10 below shows persons per occupied census house, number of females per 1,000 males, percentage of rural and urban population to total population of 1971 and density per km^2.

STATEMENT 10

Persons per occupied census house, sex ratio, percentage of rural and urban population and density per square kilometre

45. The average number of persons per occupied census house in 1971 varies from 5·0 in Greater Bombay which is entirely an urban area, to 7·1 in Kolhapur district. The state average of persons per occupied census house is 5·9. In 1961, the state average was 5·5 and the variation was from 4·7 in Wardha to 6·3 in Kolhapur. The average number of persons per occupied census house in rural areas is more than in urban areas of the state. Although the density of population is higher in urban areas than in rural the number of persons per house is generally lower in urban than in rural areas. A heavier concentration of population in urban areas does not necessarily lead to a higher average of persons per occupied house. This may be because of the definition of 'house' adopted in the census which does not bring out the housing shortage in the urban area. In rural areas the houses are larger and though different portions may be occupied by different groups or families, each of the portions used by those families may not have an independent access. By definition such accommodation is treated has only one house. On the other and, houses in urban areas are generally designed to provide separate entrances to each family (tenant); the number of houses is higher in urban areas and cases of two or more households sharing a house with one main entrance may not be many.

46. Generally, the number of persons per occupied residential house should be in conformity with the density of population. Kolhapur district, with a density of 254 has the highest number of persons per occupied census house. It is also seen that the number of persons per occupied census house is not strictly proportionate to density in all cases. The density per sq. kilometre in Chandrapur district is 64 and the average number of persons per occupied census house is 5·6, while in Wardha, district the density is 124 and the number of persons per occupied house is 5·1.

47. Leaving aside the union territories, the most urbanised state in India is Maharashtra in which 31·17 percent or nearly one-third of the population is urban. Maharashtra has the highest number of persons in absolute figures and in percentage staying in urban areas than in any other state. High industrialization has led to a comparatively greater concentration of the population in urban centres. Maharashtra is closely followed by Tamil Nadu in which 30·28 per cent of population is urban. The corresponding percentages in India, Maharashtra and other states are shown in Statement 11; Statement 12 shows percentage of urban population to total population for 26 districts.

48. Within Maharashtra, Greater Bombay is entirely an urban area. The percentage of urban to total population in Maharashtra increased from 28.22 to 31.17 during the last decade. The districts which have higher percentages of urban population

than the state percentage of 31·17 are Nagpur (54·32), Poona (41·84) and Thana (36·23). Next to Greater Bombay, Nagpur district is highly urbanised. Only three other districts, Nasik (28·64), Sholapur (27·36) and Amravati (27·56) have more than 25 per cent of their population as urban. The lowest urbanised district is Ratnagiri (8·40). In all districts the percentage of the urban to the total population has increased in 1971 except in Sholapur whose urban population had gone down marginally from 27·95 per cent to 27·36 per cent. This appears to be due to the faster rate of growth of population in its rural areas than in urban areas. Sholapur city, which is the largest urban area in the district, has shown a decennial growth of rate of only 18·00 per cent during 1961-71 compared to 40·75 per cent for Maharashtra.

49. The density of population in Maharashtra is 164 per sq. km or 424 per sq. mile against the Indian average of 167 per sq. km. Ten districts have densities higher than the state average of 164. They are Greater Bombay (9,901), Thana (239), Kolaba (175), Jalgaon (180), Poona (203), Satara (165), Sangli (180) Kolhapur (254), Nagpur (196) and Bhandara (172). The lowest density is in Chandrapur which has more than 50 percent of its total geographical area under forests. None of the five districts of Aurangabad division has a density higher than the state average. In Nagpur division also only two districts, viz., Nagpur and Bhandara have a higher density than that of the state. Poona and Nagpur have high densities on account of their large urban population. Thana's high density is due partly to its large urban population and partly to the overflow of Greater Bombay. Bhandara, Kolaba and Ratnagiri are rice producing districts while Kolhapur and Sangli have rich soils under intensive cultivation and cash crops.

50. In columns 10, 11 and 12 total population and its break-up by males and females is shown. This population represents the residential population as at the sunrise of 1 April 1971 plus houseless population counted during the night of 31 March 1971. The total population shown here is inclusive of institutional and houseless population. Institutional and houseless population is shown in Appendix III to Table A-I.

51. The houseless population includes persons who do not have any fixed place of residence but move from place to place, camp at night or just live on the streets, in gardens or in open places without erecting a hut or a similar structure. They may include domestic servants and other workers who do not reside in any house but sleep in the corridors, verandahs, passages in the buildings, or on the streets; wandering or nomadic tribes found to be staying in temporary huts or residing on the grounds; beggars, vagrants, sadhus, fakirs, etc., who are found on the foot-paths, streets and in big places likes, parks gardens sea-shores, railway yards, etc. All such houseless persons were separately enumerated on the night of 31 March 1971.

52. According to the definition a household comprises a group of persons living in the same house and eating from the same kitchen. These persons may not necessarily belong to the same family or be blood relations. The inmates of institutions like jails, hospitals, lodging and boarding houses, residential hotels, etc,. are thus treated as members of households which are termed as institutional households to distinguish them from family type households. The members staying in such households and counted during the census give the institutional population. This institutional population along with houseless population is included in the population figures in columns 10,11,12 of Table A-I and shown separately in Appendix III to Table A-I.

53. As in 1961 Table A-I has three appendices. Appendix I shows the 1961 territorial units constituting the present set-up of each unit in Maharashtra. This appendix is supplemented with a statement showing the areas for 1961 and 1971 for those towns which have undergone changes in area since 1961 and shows the population for the transferred area according to the 1961 and 1971 censuses.

54. Appendix II shows the number of villages with a population of 5,000 and over and towns with a population below 5,000. One of the criteria for a place to be declared as a town is that it should normally have a population of 5,000 and over. For various reasons many places with a population of 5,000 and over are not treated as towns while a number of places with less than 5,000 population but having municipal areas are treated as towns. This appendix shows the number of such places with their population.

55. Appendix III shows the number of houseless and institutional households and houseless and institutional population separately.

UNION TABLE A-I—AREA, HOUSES AND POPULATION

(1) Total area figures of state and districts as on 1 July 1971 are as supplied by the Surveyor General of India which are provisional.

(2) The density figures in column 4 in respect of urban areas of districts, divisions and state have been worked out by using the km² area figures correct to two decimal places obtained by adding the areas of the towns in the respective units and not by using the area figures up to one decimal place indicated in this Table.

State/Division/District	Total Rural Urban	Area in km²	Population per km²	Number of villages		No. of towns	No. of occupied residential houses	No. of households	Population

@This comprises the areas —(i) Chandrapur district (23,649 km²) and (ii) Rajura district (1,992 km²) reported by the Surveyor General.

A-I—AREA, HOUSES AND POPULATION

The total area figures for the State and the districts are as supplied by the Surveyor General. The total area figures for the tahsils are as reported by the State Land Records Department. The area figures for towns are as supplied by the respective municipal corporations or councils.

The tahsil urban area is obtained by adding the areas of the towns situated therein. The tahsil rural area is obtained by deducting from the total area the urban area arrived at by adding the town area figures.

The district urban area is obtained by adding the concerned tahsil urban areas. The district rural area is obtained by deducting from the total area (as reported by the Surveyor General) the urban area arrived at by adding the tahsil urban area figures.

The State urban area is obtained by adding the district urban areas. The State rural area is obtained by deducting from the total area (as reported by the Surveyor General) the urban area arrived at by adding the district urban area figures.

Since the source for the total area figures in respect of the State and the districts is the Surveyor General, while that for the total area figures in respect of the tahsils is the State Land Records Department, the total areas, as also the rural areas, for the tahsils in district, may not add up to the corresponding figures shown against the district.

(1) Area figures of State and districts as on 1 July 1971 are as supplied by the Surveyor General of India which are provisional.

(2) Area figures of urban areas are supplied by municipal corporations and councils.

(3) Names of towns treated as such for the first time in 1961 which continue as towns in 1971, have been marked with an asterisk (*)

(4) Names of towns treated as such for the first time in 1971 have been printed in *italics*.

(5) The density figures in column 4 in respect of urban areas of districts, divisions and state has been worked out by using the km² figures correct to two decimal places, obtained by adding the areas of the towns in the respective units and not by using the area figures up to one decimal place indicated in this Table.

(6) "M" stands for municipality and "M. Corp." for Municipal Corporation.

@Since the district area figures presented in this table are as reported by the Surveyor General and since Greater Bombay is a city as also a district by itself, the district area figure given by the Surveyor General has been repeated against the city. In table A-IV the area figure indicated against Greater Bombay city, viz. 437·37 km², is as reported by the municipal corporation.

APPENDIX I

Statement showing 1961 *territorial units constituting the present set-up of Maharashtra*

NOTE—(i) The names of those units only which have undergone changes in jurisdiction since 1961 have been shown in this Appendix

(ii) Area figures are as obtained from the State Land Records and Survey Department.

(iii) Where transfers of more than three villages are involved, the names and location code numbers of the villages in question have not been shown in thi Appendix. They will be found in a separate Annexure to this Appendix. In each case where a transfer of more than three villages is involved, the entry has been marked with a number symbol in square brackets and this symbol has been repeated in the Annexure where the particulars of the villages in question have been indicated.

State/District/Tahsil (1971 Census)	1961 territorial units	Area added		Name of state/ district/ tahsil from which area is substracted	Area which has been substracted		Name of state/ district/tahsil to which area is added	Net gain/ loss +(gain) —(loss) in km²
		Name	Area in km²		Name	Area in km²

A-I—AREA, HOUSES AND POPULATION

ANNEXURE TO APPENDIX I TO TABLE A-I

(i) This Annexure shows the particulars of the villages involved in the transfers, wherever the number is more than 3. In each such case, the entry in the Appendix bears a number symbol in square brackets. This symbol has been repeated in the Annexure, and the particulars of the villages in question have been indicated against it.

(ii) The areas of the villages involved in the transfers have been indicated wherever they are available in the 1961 district census handbooks. In the case of symbol numbers 1, 2, 3, 4, 5, 6 and 7 the villagewise totals do not tally with the figures of areas gained or lost, shown in the Appendix, because of revised computation of tahsil areas reported by the State survey department.

*Jurisdictional change and revised computation of area.

£The territory added comprises in all cases some parts of villages, although in a few cases entire villages are also involved. In no case, therefore, is the exact population of the territory added available.

@It is a coincidence that the area figures for 1961 and 1971 shown in columns 4 & 5 are indentical. Panvel (M) has acquired territory after 1961 and its present extended area is 12.15 km². The identical figure (12.15 km²) shown for Panvel (M) in the 1961 census report (that is, before the recent expansion) was reported, to be incorrect.

N.A.=Not available.

TABLE A-II

DECADAL VARIATION IN POPULATION

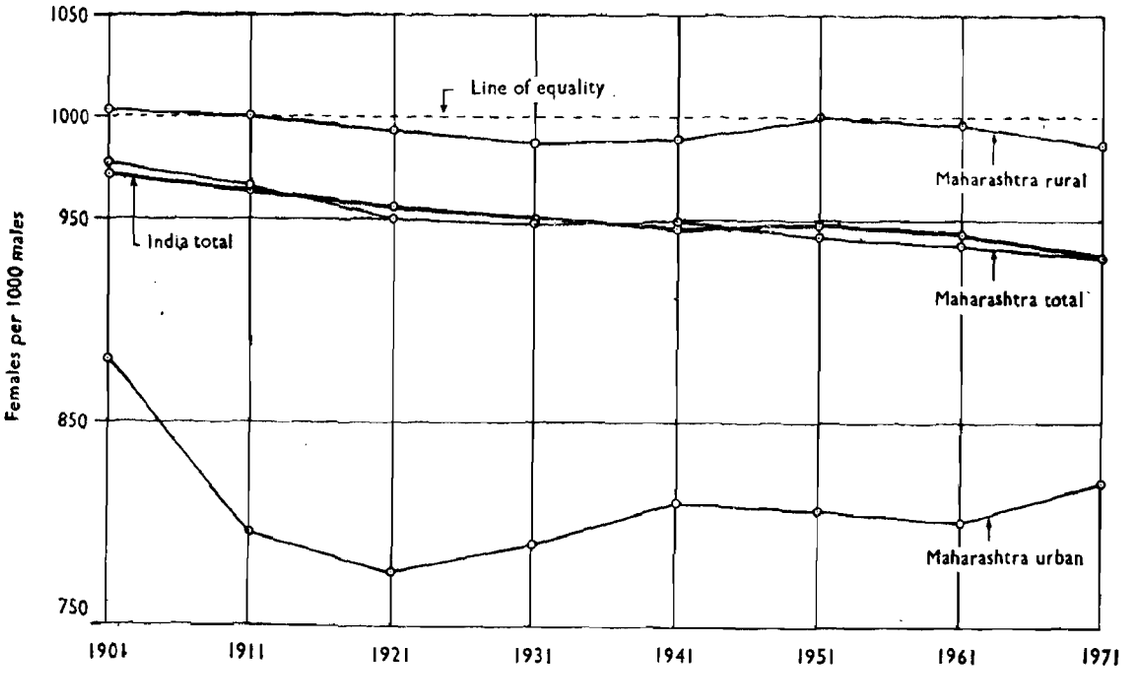

Population 1901-71

Decadal variation by percentage

Sex ratio 1901-71

No. of females per 1000 males

EXPLANATORY NOTE

This table is similar to its counterpart in 1961. It furnishes data on population for the eight censuses from 1901 to 1971 and the decadal variation of population. The growth of population from decade to decade forms the main source for estimation and projection of population with the help of such data on migration and vital statistics as are available. As in 1961, basic figures showing the change in population and the percentage variations are given for each decade. An appendix to this table shows the adjustment necessary to link the 1961 census population of a district to its jurisdiction at the time of the 1971 census.

2. The decades 1941-50 and 1951-60 saw a number of territorial changes owing to the merger of princely states and the reorganisation of states. During 1951-60, nine districts underwent territorial adjustments and transfer of areas in the wake of the formation of Maharashtra state on 1 May 1960. In the last decade, there was no addition to or transfer of area from the state. The only change in the jurisdiction of the districts after 1961 was in respect of Nagpur and Bhandara districts. Ten villages with a total population of 3,626 in 1951 and 4,352 in 1961 were transferred from Ramtek tahsil of Nagpur district to Bhandara tahsil of Bhandra district. The figures of population for all the districts of Maharashtra except Nagpur and Bhandara districts for the 1901 to 1961 censuses, therefore, remain the same as those in table A-II of 1961.

3. The population figures of the transferred areas prior to 1951 are not available in all cases. Therefore, the population for previous censuses for such areas has been estimated by using the following formula and on the assumption that the proportion of the population in the area transferred to the total population of the district in which it was situated at the time of the transfer was the same in the particular census as it was in 1951 :—

$$\frac{\text{Population according to earlier censuses, i.e., 1941, 1931 etc., of the district/tahsil in which the area transferred was situated at the time of transfer.}}{\text{Population of the district/tahsil according to 1951 census in which transferred area was situated at the time of transfer.}} \times \text{Population according to 1951 census of the transferred area.}$$

4. The sex break-up of the population so estimated for a previous census was worked out on the basis of the sex distribution of population in the particular previous census of the district in which it was situated at the time of transfer. Statement 1 on page 89 illustrates the method of estimation of previous census of population of Nagpur and Bhandara districts in respect of which there has been transfer of areas after the 1961 census.

5. Statement 2 on page 90 shows the decadal per centage growth of total, rural and urban population of Maharashtra, its four revenue divisions and 26 districts during 1901 to 1971. Column 3 shows the percentage variation in population during the last 70 years.

6. The population of Maharashtra in 1971 is more than two and half times that of 1901 (+ 159·97%). Greater Bombay district which is entirely an urban area has shown a phenomenal growth of 543·39 per cent compared to the State urban growth rate of 388·34 per cent. The lowest growth rate in the last 70 years is in Ratnagiri district (43·51). The percentage growth rates in the districts which have not developed as fast as the state are Nagpur (159·55), Sholapur (154·93), Nanded (154·02), Bhir (154·00), Yeotmal (146·69), Osmanabad (143·81), Sangli (138·90), Parbhani (132·33), Kolhapur (127·42), Jalgaon (122·53), Buldana (104.37), Satara (103·30), Wardha (101·95), Akola (99.65), Amravati (91·01) and Kolaba (75·15). The lowest growth rate in the rural areas during the last 70 years is also noticed in Ratnagiri district (40·27) and the highest in Dhulia district (266·76).

7. The decadal population of Maharashtra has been generally rising after 1921 and the growth rate of 27·45 per cent during 1961–71 is the highest achieved so far. The percentage rate of growth in all districts except Nasik, Dhulia, Satara, Sholapur, Aurangabad and Buldana during 1961 and 1971 is higher than the rate in the previous decade.

8. The population of Maharashtra increased from 39·6 million in 1961 to 50·4 million in 1971, giving a decadal growth percentage of 27·45 as against 23·60 during the previous decade. The largest decadal growth percentage is seen in Greater Bombay (43·80) and the lowest in Ratnagiri district (8·94). Thana district with its industrial area has registered a significant increase of 38·06 per cent. Besides these two districts, only Chandrapur has shown an increase of more than 30 per cent. The districts whose population has increased by less than 25 per cent are Parbhani, Bhandara, Dhulia, Wardha, Sholapur, Satara, Jalgaon, Kolaba, Buldana, and Ratnagiri. Of these, the percentage increase in the last three districts is below 20. The remaining 13 districts have a percentage growth between 25 and 30.

9. Sex composition is an important factor which influences birth, death, reproduction rates and availability of manpower. Most of the demographic, social, cultural and economic characteristics of the population are therefore shown separately for males and females in census tables. Statement 3 on page 92 shows the changes in the sex ratios during 1901 to 1971 for total, rural and urban areas of Maharashtra, its four divisions and 26 districts.

10. Sex composition is usually expressed by the number of males per 100 or 1,000 females. In India, the census convention has been to express it by the number of females per 1,000 males. In 1971, the state's population comprised 26,116,351 males and 24,295,884 females in the proportion 51·81 per cent and 48·19 per cent respectively. The sex ratio for Maharashtra in 1971 was 930. In rural areas it was 985 and in urban areas 820. The preponderance of males appears to be partly the result of a net surplus of males among the in-migrants from outside the State and partly of greater mortality losses among women than men during the last few decades.

11. Maharashtra has been deficient in females in its population for several decades. The state did not have sex parity at any time during the last 70 years. The deficiency of females has, moreover increased since 1901. The sex ratio has declined from 978 in 1901 to 930 in 1971 at an average rate of about 7 points per decade. The fall has been continuous except for a slight improvement during 1931–41. The 1971 sex ratio for Maharashtra was the lowest in the last 60 years. For the rural areas also the lowest value was in 1971 and for urban areas in 1921. The sex ratio in rural areas which improved to reach parity in 1951 further declined in the last two decades while the urban sex ratio went up by 19 points during 1961–71. The following table shows the distribution of districts of Maharashtra according to six ranges of sex ratio.

Less than 900	Greater Bombay (716), Thana (894).
901-925	Nagpur (922).
926-950	Nasik (940), Jalgaon (948), Poona (933), Sangli (949), Sholapur (933), Aurangabad (943), Osmanabad (944), Akola (941), Amravati (931), Wardha (949).
951-975	Dhulia (956), Ahmednagar (956), Kolhapur (959), Parbhani (960), Bhir (954), Nanded (955), Buldana (954), Yeotmal (961), Chandrapur (970).
976-1,000	Bhandara (987).
Above 1,000	Kolaba (1,056), Ratnagiri (1,244), Satara (1,037).

Maharashtra thus has three broad regions with a distinctive pattern of sex composition—

(i) Greater Bombay and Thana having an abnormal deficiency of females.

(ii) Kolaba, Ratnagiri and Satara districts having a preponderance of females.

(iii) The remaining 21 districts which have a deficiency of females (sex ratio ranging from 922 to 987) but which do not have such a clear imbalance between the two sexes as in the first two regions. Ratnagiri, Kolaba and Satara districts have long been known as suppliers of migrant labour to Greater Bombay and Thana. Greater Bombay and Thana with their industrial development are absorbing migrants.

STATEMENT 1

Method of estimation of previous census populations for transferred areas

Description	1901	1911	1921	1931	1941	1951	1961	Remarks
1	2	3	4	5	6	7	8	9
NAGPUR DISTRICT:—								
Total population of the district as at 1961 census	751,935	333,922	732,521	940,049	1,059,989	1,234,556	1,512,807	(1) $\frac{1,059,989 \times 4,021}{1,234,556}$

*These area figures do not agree with those shown in column 2 even where there is no jurisdictional change. The Surveyor General has reported revised area figures in respect of all districts for 1971.

(a) 10 villages of Ramtek tahsil of Nagpur district with a total area of 40.7 km² have been transferred to Bhandara tahsil of Bhandara district under *Maharashtra government notification no.* TLC 4969/15000C *(Spl) dated* 30 April 1970.

This position is not reflected accurately in the area figures shown in columns 4 and 2 for 1961 and 1971, respectively because of revised computations of area reported by the Surveyor General. The addition and substraction in terms of population will be seen in column 7.

EXPLANATORY NOTE

This table corresponds to Table A-III of 1951 and 1961 and is confined to villages. By adding the number and population of towns in different population ranges presented in Table A-IV to the respective ranges of this table, it can be made to correspond with the A-III Table of censuses prior to 1951.

2. The table shows the number and population of villages in the population groups (*i*) of less than 2,000 population, (*ii*) 2,000—9,999 and (*iii*) with population 10,000 and above. The first two groups are further sub-divided into sub-groups as shown below and the number of villages and the population covered in each group is indicated.

Less than 2,000	Less than 200
	200—499
	500—999
	1,000—1,999
2,000—9,999	2,000—4,999
	5,000—9,999

3. An appendix to this table shows the number of villages and their population according to subtotals of broad groups of villages, *viz.*, 0—499, 500—1,999, 2,000—4,999 and 5,000 and above with corresponding figures for 1961.

4. The table is presented in two parts. First comes the union table which gives distribution of villages for the state, divisions and districts. The second state table gives similar distribution down to the tahsil in each district.

5. A village has been defined in paragraph 35 of the explanatory note on Table A-I. Although separate figures for hamlets have been collected, they are included in the villages. Villages having one or more hamlets have been grouped with reference to the total population of the main village and its hamlets. In other words, the distribution of villages according to population size groups is not in each case strictly according to the size of each nucleus of rural habitation of the revenue village which may in some cases be a single nucleus of population and in others a group of two or more scattered localities called hamlets within a revenue village. The number of inhabited villages shown in the table is exclusive of those which are entirely merged in urban areas and whose population is included in the respective urban areas or towns. In the case of villages partly incorporated in urban areas, the unmerged portions of the villages which are outside the urban areas have been treated as villages and their number and population are included in this table.

6. Percentages of the 1971 rural population living in villages of various population size groups in each division and district are shown in Statement 1 on page 102.

7. Slightly more than half the rural population of Maharashtra (51·20) reside in villages with more than 500 and less than 2,000 population and three-fourths of the rural population is found in villages with more than 500 and less than 5,000 population. Villages with less than 500 population account for 10·68 per cent of the rural population of Maharashtra. Nagpur, Chandrapur, Kolaba and Wardha are the four districts in Maharashtra with more than 20 per cent of their respective population staying in small villages with less than 500 population. Actual percentages for these four districts are 27·87, 24·96, 22·30 and 21·77 respectively.

8. Poona division has the largest percentage (55·83) of rural population staying in villages of over 2,000 population; among the districts of Poona division Sangli has the largest proportion (70·74) of its rural population living in villages with more than 2,000 population. There are 75 villages having more than 10,000 population in Maharashtra. Of these, 50 are in Poona division. The highest number of villages with more than 10,000 population is in Ahmednagar district (13). Poona and Sangli have 12 and 11 villages respectively.

9. Statement 2 at page 103 shows proportion of inhabited villages of various population sizes to total number of villages in each district and division.

10. Statement 3 a t page 104 gives percentages of villages and population by class of villages for 1961 and 1971 Censuses for Maharashtra State, divisions and districts.

11. The following table shows for Maharashtra State percentages of villages and their population by size of villages for 1951, 1961 and 1971. The 1951 census figures have been adjusted to conform to the definition of urban and rural areas adopted in 1961 and 1971.

	1951	1961	1971
(*i*) Villages with pop. less than 500—			
(*a*) Percentage of total number of villages	56·13	47·72	39·52
(*b*) Percentage of total pop.	20·31	15·02	10·68
(*ii*) Villages having pop. 500-999			
(*a*) Percentage of total number of villages	25·77	28·55	29·43
(*b*) Percentage of total pop.	27·33	25·71	21·80
(*iii*) Villages having pop. 1,000—1,999			
(*a*) Percentage of total number of villages	13·09	16·62	20·79
(*b*) Percentage of total pop.	26·75	28·55	29·40
(*iv*) Villages having pop. 2,000—4,999—			
(*a*) Percentage of total number of villages	4·41	6·18	8·67
(*b*) Percentage of total pop.	19·14	22·40	25·87
(*v*) Villages having pop. 5,000—9,999—			
(*a*) Percentage of total number of villages	0·57	0·85	1·38
(*b*) Percentage of total population	5·83	7·04	9·44
(*vi*) Villages having population above 10,000—			
(*a*) Percentage of total number of villages	0·03	0·08	0·21
(*b*) Percentage of total population	0·64	1·28	2·81

12. The small villages, i.e. with less than 500 population, are losing both in numbers and percentages of population residing therein. Natural growth of population, amalgamation of some smaller villages and some smaller villages becoming uninhabited, are among the factors behind this trend.

STATEMENT 1

Percentages of population living in villages of various population sizes with reference to total rural population in each district for 1971

TABLE A-IV

TOWNS AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1971 WITH VARIATION SINCE 1901

Urban-rural ratio

Each district is represented by two circles, one for area and one for population. In both the cases the urban part is shaded. The size of each circle is based on the percentage the district represents in the State as a whole. The area of Greater Bombay is shown by a dot as it is 0.20 per cent of the State's area. Its population forms 11.84 per cent of the State's population.

EXPLANATORY NOTE

Table A-I shows the 1971 census population and other details separately for urban and rural areas and for each of the 289 towns in Maharashtra. Table A-IV, as in earlier censuses, shows the variation in urban population of each town, each class of towns during the last seventy years, *i. e.,* 1901 to 1971. Unlike in Table A-I to A-III which present data in order of each administrative unit., Table A-IV presents towns in the order of their size class fixed on the basis of population.

2. The following classification of towns on population size classes as in 1901 to 1961 has been used in 1971 also.

Class I	population	100,000 or above
Class II ..	„	50,000 to 99,999
Class III .	„	20,000 to 49,999
Class IV ..	„	10,000 to 19,999
Class V ..	„	5,000 to 9,999
Class VI ..	„	less than 5,000

3. For facilitating reference to the entries in Table A-IV an alphabetical list of all the 289 towns in Maharashtra, along with indication of serial no. of the town is given at the end of this note.

4. The order of presentation of the table is that the figures of the total urban population of Maharashtra for each census since 1901 are given in the beginning followed by similar figures for class I totals and towns included in class I arranged in the order of their population size. Then followed the total for class II and for each town included in that class arranged in order of population and so on till at the end the data are presented for the last town falling in class VI of towns.

5. The terms, "town" and "urban area" are defined in paragraphs 23-24 in the note on Table A-I. All towns in class I size, *i. e.,* having one lakh or more population are called cities by convention. Classification of towns shown in the table is based on their 1971 population. As many towns have changed their class since 1901, the class totals shown in the table for previous censuses are not the totals of respective populations of all towns shown in that class in 1971. They are the totals of populations of all towns which on the basis of population were included in that class in these censuses except the towns which are the constituents of urban agglomerations. Some of these towns might have gone to a higher or lower class and some might not have been treated as towns in later censuses.

6. As the table necessarily shows the variation in urban population alone, the entries against such of the towns which were not treated as towns for previous censuses are blank. Their population in those censuses being treated as rural, are not shown in the table. They are similarly not included in the class totals for any census.

7. Greater Bombay which is an urban area is also treated as a district and, therefore, the figures in respect of Greater Bombay as a district, appear in Table A-II and as an urban area in Table A-IV. The two sets of figures are identical only in 1961 and 1971. The figures in Table A-II from 1901 to 1951 represent the sum of rural and urban population of an area which now comprises Greater Bombay and for 1961 and 1971 they represent the urban population of the present-day jurisdiction of Greater Bombay. The differences between the two sets of figures of previous censuses thus afford a valuable clue as to how the jurisdiction of Greater Bombay was extended to the adjoining rural areas by stages, and give the component of the rural population of the respective censuses in the Greater Bombay district as it exists to-day. Because of such presentation of only urban population figures for previous censuses, the entries in this table for Greater Bombay and some other towns may not tally with the corresponding entries for those censuses in Table A-IV of 1951 where no such distinction of rural population was made in the figures for earlier censuses.

Urban agglomeration

8. In 1961 the data were presented for 16 town groups as well as their constituent urban units with their urban population for earlier censuses. Where two or more urban units were adjacent or formed a compact urban unit, they were grouped together and the group so formed was called a town group. The concept of town group as adopted in 1961 was given up mainly on account of lack of uniformity in defining the town group as applied in different states. For the 1971 census, the term "town group" has been replaced by "urban agglomeration" with a stricter and more uniform definition. An urban agglomeration must form a continuous urban spread constituted of a town and its adjoining urban outgrowths of two or more physically continuous towns, together with continuous well-recognised urban outgrowths, if any, of such towns. In the town group concept of the 1961 census, it was not always the contiguous urban units that formed such a group. At times, urban units cut off from one another were taken together ignoring the intervening region.

9. The following are the situations in which urban agglomerations would be constituted :

(*i*) A city with a continuous outgrowth (the part of outgrowth being out off the statutory limits but falling within the boudaries of the adjoining village or villages).

(*ii*) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (i).

(*iii*) A city and one or more adjoining towns with their outgrowth all of which form a continuous spread.

10. In varying local conditions, there could be similar other combinations which could be termed an agglomeration, the basic consideration of contiguity having been satisfied. The area constituting an urban agglomeration may keep on changing from census to census depending upon the changing boundries of the statutory main urban units as well as the extent of other urban outgrowths. The concept of "standard urban area" adopted for the 1971 census and explained in the note on Table A-V takes care of such changes as it is broad-based, the limits spreading well beyond the existing urban limits and encompassing both rural and urban areas in the vicinity of large towns to a limit up to which contiguous urbanisation is reasonably expected to take place in the next three decades.

11. Data are presented in Table A-IV, for the following urban agglomerations in Maharashtra.

Name of agglomeration	*Constituent units*
THANA DISTRICT	
1. Thana city agglomeration	(a) Thana (M)
	(b) Majivade
	(c) Kalwa
2. Ulhasnagar city agglomeration	(a) Ulhasnagar (M)
	(b) Kalyan (M)
	(c) Ambarnath (M)
	(d) Dombivli (M)
	(e) Mohone
	(f) Katemanivali
3. Bassein town agglomeration	(a) Bassein (M)
	(b) Manikpur
	(c) Sandor
4. Dahanu town agglomeration	(a) Dahanu
	(b) Malyan
NASIK DISTRICT	
5. Nasik city agglomeration	(a) Nasik (M)
	(b) Nasik Road Deolali (M)
	(c) Deolali cantt.
	(d) Bhagur (M)
6. Manmad town agglomeration	(a) Manmad (M)
	(b) Manmad (NM)
7. Nandgaon town agglomeration	(a) Nandgaon (M)
	(b) Nandgaon (NM)
JALGAON DISTRICT	
8. Bhusawal town agglomeration	(a) Bhusawal (M)
	(b) Kandari
AHMEDNAGAR DISTRICT	
9. Ahmednagar city agglomeration	(a) Ahmednagar (M)
	(b) Ahmednagar Cantt.
POONA DISTRICT	
10. Poona city agglomeration	(a) Poona (M Corp.)
	(b) Pimpri-Chinchwad New Township (M)
	(c) Poona cantt.
	(d) Kirkee cantt.
	(e) Dehu Road cantt.
	(f) Lohagaon
	(g) Khadakvasla
	(h) Dehu
11. Dhond town agglomeration	(a) Dhond (NM)
	(b) Dhond (M)
SANGLI DISTRICT	
12. Sangli city agglomeration	(a) Sangli (M)
	(b) Miraj (M)
	(c) Madhavnagar
KOLHAPUR DISTRICT	
13. Kolhapur city agglomeration	(a) Kolhapur (M)
	(b) Gandhinagar
AURANGABAD DISTRICT	
14. Aurangabad city agglomeration.	(a) Aurangabad (M)
	(b) Aurangabad Cantt.
AMRAVATI DISTRICT	
15. Achalpur town agglomeration	(a) Achalpur (M)
	(b) Achalpur Camp. (M)
NAGPUR DISTRICT	
16. Nagpur city agglomeration	(a) Nagpur (M. corp.)
	(b) Kamptee (M)
	(c) Kamptee cantt.

12. Columns 6 and 7 of Table A-IV show the area of each town and class of towns in square kilometres and population. Its breakup by sex is shown in columns 10 and 11. The decadal variation in population in actual figures and by percentages is shown in columns 8 and 9 respectively.

13. There are 289 towns in Maharashtra which comprise municipal or cantonment areas and non-municipal areas which satisfy the criteria laid down for treating non-municipal areas as towns. None of the 266 towns of the 1961 census has been declassified. Out of twenty eight new towns twenty have been treated as towns for the first time in 1971 and they are shown in *italics*. Five towns of 1961 have merged in other towns or are combined to form a new town. The 28 new towns have also been shown in an Appendix I to Table A-IV. That appendix shows in columns 3 and 4 the area and population of all the new towns. The constituent villages of the new towns of 1971 and their 1961 particulars have been shown in Explanatory Note A to Appendix I.

14. The Statement 1 on page 127 shows the number of towns in Maharashtra from 1901 to 1971 and the number of towns in each class of towns

STATEMENT 1

Number of towns in each class during 1901 *to* 1971

Class of town	1971	1961	1951	1941	1931	1921	1911	1901
Total .	289	266	383	266	258	238	232	219
I . .	17	12	5	4	4	4	3	3
II .	25	15	16	7	1	1	1	2
III .	65	47	39	33	29	21	11	13
IV .	98	89	84	69	57	45	50	60
V . .	70	88	196	122	119	113	111	116
VI . .	14	15	43	31	48	54	56	25

15. The number of towns in class I to IV is steadily rising since 1901. Those in class V and VI have decreased during the last two decades. Increase may be due to the natural growth of population and industrial expansion pushing the towns in to higher size classes. The number of cities (*i. e.* towns in class I) has risen from 12 in 1961 to 17 in 1971. The five new cities are Dhulia, Jalgaon, Sangli, Aurangabad and Nanded. The highest increase in the number of towns during the last decade is noticed in class III. The increase in class III and IV together is more than in the first two classes. The decrease in the number of class V and VI towns may be due to a smaller number of new municipalities coming up and strict application of criteria for treating any place as a town during 1961 and 1971.

16. The proportion of population in each size class of towns to the total urban population in the state for 1951 to 1971, is as follows :—

Class of town	Proportion of population in each size class to total urban population.		
	1951	1961	1971
Total	100·00	100·00	100·00
I	45·47	60·49	64·75
II	11·85	9·17	11·07
III	13·03	13·00	11·71
IV	12·80	11·17	8·78
V	15·05	5·65	3·39
VI	1·80	0·52	0·30

17. The proportion of population of towns in class I and class II to the total urban population has increased during the last decade while in all other classes it has decreased. Although the increase in the number of towns in class III and IV is more than that of those in class I and II, the proportion of population to total urban population has shown a decrease. This shows that the bigger towns, especially cities, are growing further at the expense of smaller towns.

18. Districtwise distribution of towns in 1971 by their class size is given in Statement 2.

STATEMENT 2

Districtwise distribution of towns by class size

State/District	All classes	I	II	III	IV	V	VI
1	2	3	4	5	6	7	8
Maharashtra	**289**	**17**	**25**	**65**	**98**	**70**	**14**
1. Gr. Bombay	1	1	..	..	..	..	..
2. Thana .	24	2	4	2	6	9	1
3. Kolaba .	14	..	..	1	7	4	2
4. Ratnagiri .	15	..	..	2	3	8	2
5. Nasik .	20	2	1	5	6	6	..
6. Dhulia .	7	1	1	2	3	..	..
7. Jalgaon .	15	1	2	5	5	2	..
8. Ahmednagar	6	1	..	4	..	1	..
9. Poona .	22	1	3	4	7	4	3
10. Satara .	14	..	1	3	3	4	3
11. Sangli .	7	1	1	2	2	1	..
12. Sholapur .	10	1	2	1	5	1	..
13. Kolhapur .	11	1	1	..	5	2	2
14. Aurangabad	10	1	1	..	4	4	..
15. Parbhani .	12	..	1	2	7	2	..
16. Bhir . .	7	..	..	3	3	1	..
17. Nanded .	11	1	..	1	3	6	..
18. Osmanabad	13	..	1	2	7	3	..
19. Buldana .	9	..	1	4	4	..	..
20. Akola .	9	1	..	5	2	1	..
21. Amravati .	13	1	..	6	4	1	1
22 Yeotmal .	8	..	1	3	3	1	..
23. Wardha .	6	..	1	3	..	2	..
24. Nagpur .	13	1	1	1	6	4	..
25. Bhandara .	5	..	1	2	2	..	..
26. Chandrapur	7	..	1	2	1	3	..

19. Thana district has the highest number of towns (24) followed by Poona district (22) and Nasik (20). The smallest number of towns is in Bhandara district (5). Out of 17 cities as many as 12 are in the Bombay and Poona divisions. Out of 42 towns in class I and II these two divisions account for two-third (28) and the other two divisions claim only 14 towns. Nagpur and Aurangabad divisions have a slight edge over the other two divisions in respect of towns in class III as they together account for 34 towns out of 65 towns in that class. Class IV towns appear to be well distributed. The share of Bombay and Poona divisions is 52 compared to 46 in other divisions out of a total of 98. Almost all towns in class VI except one are found in Bombay and Poona division.

20. Statement 3 at page 128 shows the changes in classification of each city and town during the period 1901 to 1971. The statement is also inclusive of towns which were treated as town in 1961 and earlier censuses, but are not treated as such in 1971. The statement thus gives a list of places which have been treated as towns in one or the other censuses during the last seventy years.

STATEMENT 3

Changes in classification of towns from 1901 *to* 1971

Name of town	Year

21. Out of 289 towns figuring in the 1971 census, 28 are new towns, 70 have continued in the same class from 1901, 115 have risen by only one size class, 83 have risen by two classes. Only 21 have changed by three higher stages.

22. Of the 17 cities in Maharashtra, Greater Bombay, Poona and Nagpur, in spite of the tremendous increase in population have continued to be in the same size class I right from 1901. Ulhasnagar, which came into existence as a town for the first time in 1951, and Sholapur have climbed by one stage to get into class I. Nasik, Dhulia, Ahmednagar, Kolhapur, Aurangabad, Akola and Amravati have risen by only two stages and Thana, Malegaon, Jalgaon, Sangli and Nanded have climbed three stages to get into class I during the last seventy years.

23. The changes in class of 289 towns in Maharahtra from 1901 to 1971 is shown in the Statement 4.

STATEMENT 4

Changes in class of towns from 1901 *to* 1971

1971 class of town	Changes in class during seventy years					
	Total	Loss by one	No change	One change	Two changes	Three changes

Thana city agglomeration	Thana/Thana	I/8
Ulhasnagar city agglomeration	Thana/Kalyan & Ulhasnagar	I/5

A-IV—TOWNS AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1971 WITH VARIATION SINCE 1901

(1) Area figures are as supplied by Municipal Corporations and Councils.

(2) Names of Towns treated as such for the first time in 1961, which continue as Towns in 1971, have been marked with an asterisk(*).

(3) Names of Towns treated as such for the first time in 1971 have been printed in italics.

(4) The manner of arriving at 'class totals' has been explained in the note marked ‡ on page 176.

(5) Some of the units in this table have been marked with number Symbols. The explanatory notes in regard to those units have been given at the end of the table (see pages 176-178).

Additional notes to Table A-IV

[These notes are explanations with reference to certain marks and the symbol numbers (in square brackets) appearing at certain places in the body of table A-IV]

‡According to Indian census convention, a place with a population of 100,000 or above is called a 'city'. There are some cases where two or more census towns have been grouped together to constitute an urban agglomeration and it has been designated as a 'city agglomeration' or as a 'town agglomeration' according as it has a city as one of its constituents or not. In striking 'class totals', every urban unit of 1971 (which term covers a single town or city as also an urban agglomeration) has been taken as a unit not only for 1971 but also for previous censuses. The total for any class in any past census has been worked out as the total of units of that class in that particular census. They include towns which might have been individually withdrawn in a |precedingor succeeding census. But a constituent of an urban agglomeration has been reckoned not according to its own class in a particular census but according to the class of the agglomeration as a whole in that census. In other words, the class of an agglomeration (and not that of any of its components) determined its eligibility for inclusion in a particular class total in a particular census. In the case of merger of towns, the merged unit is considered as absorbed in the units in which it merged. So the unit. (and not the merged town) has been presented according to its own class in each census. Where, however, a rural area has been merged with an urban area in a particular census, the population of only the urban area in censuses preceding that particular one has been taken as the basis for deciding the class.

†The total area of all towns/urban agglomerations in 'all classes' comes to 5,984.64 km², whereas the total urban area shown in Table A-I and the Primary Census Abstract is 6,151.0 km². The difference of 166.36 km² is due to different area figures having been presented for Greater Bombay city in the two tables and further due to the fact that the urban area given in Table A-1 and in the Primary Census Abstract have been derived by adding the urban areas of tahsils after rounding them upto one place of decimals.

ΔThis is the area reported by the Greater Bombay municipal corporation. The figure of 603.00 km² shown in Table A-I and the Primary Census Abstract against Greater Bombay city is the area reported by the, Surveryor General, India, for the city district of Greater Bombay comprising ther evenue districts of Bombay City and Bombay Suburban.

[1] (a) In 1951, the following towns of Bombay Suburban district were merged in Greater Bombay :—

(i) Bandra with a population of P. 71,789 (M. 40231, F. 31,558) in 1941, P. 43,650 (M. 24,885, F. 18,765 in 1931 including Santacruz P. 34,897 (M. 19,811, F. 15,086) in 1921 including Santacruz, P. 23,862 (M. 13,266, F. 10,596) in 1911 including Santacruz and P. 22,075 (M. 12,079, F. 9,996) in 1901.

(ii) Ghatkopar ¡Kirol with a population of P. 18,176 (M. 10,323, F. 7,853) in 1941, P. 8,168 (M. 4,821, F. 3,347) in 1931 and P. 8,064 (M. 4,772, F. 3,292) in 1921.

(iii) Juhu with a population of P. 3,393 (M. 2,074, F. 1,319) in 1941 and P. 1,203 (M. 667, F. 536) in 1931.

(iv) Kurla with a population of P. 39,066 (M. 22, 674, F. 16,392) in 1941, P. 30,311 (M. 17,914, F. 12,39) in 1931, P. 26,059 (M. 15,217, F. 10,842) in 1921, P. 15,081 (M. 8,598, F. 6,483) in 1911 and. 14,831 (M. 8,357, F. 6,474) in 1901.

(v) Chembur with a population of P. 6,198 (M. 3,364, F. 2,834) in 1941.

(vi) Vile-parle with a population of P. 38,493 (M. 22,502, F. 15,991) in 1941 and P. 15,868 (M. 9,378 F. 6,490) in 1931 including Andheri.

(b) In 1961, the following towns of Tnana district were merged in Greater Bombay:—

(i) Malad with a population of P. 45,134 (M. 25,598, F. 19,536) in 1951 P. 12,212 (M. 6,735, F. 5,477] in 1941 and P. 7,723 (M. 4,387, F. 3,336) in 1931.

(ii) Mulund with a population of P. 47,148 (M. 15,165, F. 11,983) in 1951 and P. 6,917 (M. 4,058, F. 2,859) in 1941.

(iii) Pahadi with a population of P. 16,360 (M. 10,105, F. 6,255) in 1951.

(iv) Kanheri with a population of P. 13,575, (M. 7,806, F. 5,769) in 1951.

(v) Eksar with a population of P. 8,253 (M. 4,705, F. 3,548) in 1951.

(vi) Dahisar with a population of P. 5,749 (M. 3,159, F. 2,590) in 1951.

(vii) Borivali with a population of P. 4,111 (M. 2,350, F. 1,761) in 1951.

(viii) Poisar with a population of P. 3,906 (M. 2,352, F. 1,554) in 1951.

(ix) Kandivali with a population of P. 3,396 (M. 1,903, F. 1,493) in 1951.

[2](a) In the period 1901 to 1921 Poona cantonment with a population of P. 32,777 (M. 18,420, F. 14,357) in 1901, P. 32,226 (M. 18,200, F. 14,026) in 1911 and P. 32,726 (M. 18,990, F. 13,736) in 1921 respectively was a part of the Poona m. corp. and the combined population of Poona m. corp, Poona cantonment and Kirkee cantonment (in case of 1921 only) has been shown against the Poona m. corp.

(b) In 1921, Kirkee cantonment with a population of P. 18,357 (M. 12,241, F. 6,116) was a part of Poona m. corp. and the combined population of Kirkee cantonment, Poona cantonment and the Poona m. corp. has been shown against the Poona m. corp.

(c) In 1951, Poona suburban municipality with a population of 19,994 (M. 11,010, F. 8,984) in 1941 was merged in the Poona m. corp.

(d) In 1971, Dapodi with a population of P. 7,437 (M. 4,056, F. 3,381) in 1951, P. 9,215 (M. 5,076, F. 4,139) in 1961 was merged in the Poona m. corp.

[3] The State Government has under notification dated 4 March 1970 constituted a municipality for the Pimpri-Chinchwad new township by merging together the 1961 towns Bhosari, Pimpri Waghere and Chinchwad and the villages Nigadi (1961 L.C. 10) and Akurdi (1961 L.C. 11) of Haveli tahsil.

Additional notes to Table A IV—*contd.*

[4] Dehu road cantonment was a part of town Dehu with a population of P. 4,600 (M. 3,073 F. 1,527) in 1961.

[5] In 1961, Navpada with a population of P. 11,612 (M. 6,486 F. 5,126) was merged in Thana municipality.

[6] In the period 1901 to 1951, Amravati camp with a population of P. 15,707 (M. 8,127 F. 7,580) in 1951, P. 12,338 (M. 6,523, F. 5,815) in 1941, P. 10,268 (M. 5,509 F. 4,759) in 1931, P. 4,775 (M. 2,541, F. 2,234) in 1921, P. 6,340 (M. 3,334, F. 3,006) in 1911 and P. 5,295 (M. 2,923, F. 2,372) in 1901 was merged in the Amravati municipality.

[7] For the period 1901 to 1921, separate figures are not available for Aurangabad municipality and Aurangabad cantonment. Hence this combined figures P. 36,876 (M. 19,237, F. 17,639) in 1921, P. 34,902 (M. 17,992, F. 16,910) in 1911 and P. 36,837 (M. 19,005 F, 17,832) in 1901 have been shown against the Aurangabad city agglomeration.

[8] Ahmednagar city (M) and Ahmednagar cantonment were for census purposes constituted into one urban unit and combined data were presented for this unit in 1961.

[9] In 1971, Satara suburban was merged in Satara municipality with its population of previous census as shown below:—

1901	P. 3,907 (M. 2,132, F. 1,775)
1911	P. 3,252 (M. 1,781, F. 1,471)
1921	P. 2,409 (M. 1,339, F. 1,070)
1931	P. 2,352 (M. 1,154, F. 1,198)
1941	P. 2,857 (M. 1,375, F. 1,482)
1951	P. 2,549 (M. 1,368, F. 1,181)
1961	P. 4,356 (M. 2,398, F. 1,958)

[10] Manmad (M) and Manmad (Non-mpl.) were treated as parts of one urban unit in 1961. Separate data were, however, presented for the two parts.

[11] Dhond (M) and Dhond (Non-mpl.) were treated as parts of one urban unit in 1961. Separate data were, however, presented for the two parts.

[12] The extent of adjustments in population made in successive censuses will appear from the following table in which column 3 shows figures recorded in the census tables of the particular year mentioned in column 2 and columns 4 to 9 show the figures adjusted in the years mentioned in each:—

Name of town	Year	Pop. recorded for the year	Adjustments made in					
			1911	1921	1931	1941	1951	1961
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Shirpur	1901	9,023	Same as recorded.					
	1911	4,374	..	9,019	4,374	N.A.	9,019	9,019

A-IV—TOWNS AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1971 WITH VARIATION SINCE 1901

APPENDIX I

New towns added in 1971 *and towns in* 1961 *declassified in* 1971

NOTES.— (i) Names of towns treated as such for the first time in 1971 (vide column 2) have been printed in *italics*.

(ii) Names of towns of 1961 which have lost separate identity in 1971 on account of merger with other towns have also been shown in *italics* in column 6.

(iii) Districts which have nothing to show for this Appendix have been excluded.

District	New town added in 1971				Town in 1961 which has lost separate identity in 1971			
	Name of Town	Area in km²	Population 1971	Population 1961	Name of Town	Area in km²	Population 1971	Population 1961

+Tae State Govt. has under Govt. Notification No. UDPH & HD No. MUB 1068/45915/I-A dt. 6 April 1970 constituted this as a new township municipal area by including therein villages of Khalapur tahsil.

@These towns were treated as parts of Manmad (M) and Dhond (M) respectively in 1961 and had no separate existence.

△Ahmednagar City (M) and Ahmednagar cantonment were for census purposes constituted into one urban unit and combined data were presented for this unit in 1961.

†These towns are merged with newly formed Pimpri-Chinchwad New Township (M) under Govt. notification U.D.,P.H. and H.D., No. MUP/1067/66100/70038-II-A dated 4 March 1970.

$This town has been merged with Poona (M. corp.)

¶This town has been merged with Satara (M).

N.A.—Not available.

A-IV—TOWNS AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1971 WITH VARIATION SINCE 1901

EXPLANATORY NOTE "A" TO APPENDIX I

(A) Each new town added in 1971 *showing the tahsil and village serial number, name and population as in* 1961 *of each village now constituting the town*

(i) Names of towns treated as such for the first time in 1971 have been printed in italics.

(ii) Districts which have nothing to show for this Explanatory Note have been excluded.

A-IV—TOWNS AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1971 WITH VARIATION SINCE 1901

EXPLANATORY NOTE "B" TO APPENDIX I

(B) Each town in 1961 *which has lost separate identity in* 1971 *on account of its merger with another town*

[Districts which have nothing to show for this Explanatory note have been excluded.]

District	Name of 1961 census town which has lost separate identity in 1971	Town with which merged			
		Name	Location Code No. at the 1971 Census	1971	
				Area in km².	Population
1	2	3	4	5	6
Poona	Bhosari, Pimpre Waghere, Chinchwad	Pimpri-Chinchwad New Township (M)	2/V	64·65	83,542
	Dapodi	Poona (M. Corp.)	1/I	138·85	856,103
Satara	Satara Suburban	Satara (M)	1/I	8·16	66,433

LIST A

Places with a population under 5,000 *treated as towns for the first time in* 1971

Town	District	Area in Km². in 1971	Population in 1971
1	2	3	4
Badlapur	Thana	7·25	4,703
Rasayani	Kolaba	6·06	2,018
Shirgaon	Ratnagiri	12·69	3,172
Alore	Ratnagiri	3·89	3,369
Kuran Kh.	Poona	2·07	2,898
Bhade	Satara	20·20	2,391
Humbrali	Satara	9·84	4,421
Gokul T. Helwak	Satara	7·25	2,270

LIST B

Places with a population under 5,000 *in* 1961 *which were treated as towns in* 1961 *but have been omitted from the list of towns in* 1971

Place	District	Area in km² in 1961	Population in 1961
1	2	3	4
Satara Suburban*	Satara	5·21	4,356

*This town has been merged with Satara (M).

A-IV—TOWNS AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1971 WITH VARIATION SINCE 1901

APPENDIX II

Changes in area of towns between 1961 *and* 1971 *and reasons for change in area*

(The areas indicated for 1961 and 1971 are as reported for the respective censuses by the municipal corporations and municipal councils. In some cases the differences are quite big even though very little of jurisdictional charge, if any, is involved. The reason for change has been indicated as 'revised computation'. No other explanation is forthcoming for the big differences.)

Name of town (district)	Area (in km²) 1961	Area (in km²) 1971	Population 1961	Population 1971	Reasons for change in area
1	2	3	4	5	6
Thana District					
Thana (M)	26·75	26·16	101,107	170,675	Revised computation
Bassein (M)	8·13	8·00	22,598	30,594	Revised computation
Jawhar (M)	19·32	9·07	4,732	6,110	Revised computation
Ambarnath (M)	16·81	18·13	34,509	56,276	Jurisdictional change
Kolaba District					
Alibag (M)	1·79	1·81	9,909	11,913	Jurisdictional change
@Panvel (M)	12·15	12·15	18,130	26,602	Jurisdictional change and revised computation.
Ratnagiri District					
Chiplun (M)	28·02	11·58	17,355	20,942	Revised computation
Rajapur (M)	2·05	6·19	8,270	9,017	Revised computation
Nasik District					
Nasik (M)	47·42	58·28	131,103	176,091	Revised computation
Nasik Road Deolali (M)	20·75	20·98	40,013	55,436	Revised computation
Deolali Cantonment	33·67	53·04	37,264	30,618	Revised computation
Bhagur (M)	25·95	0·67	7,196	9,536	Revised computation
Satana (M)	13·49	1·74	12,506	16,720	Revised computation
Malegaon (M)	10·44	12·95	121,408	191,847	Jurisdictional change and revised computation
Manmad (M)	2·87	9·53	23,570	29,571	Revised computation
Nandgaon (M)	50·79	3·86	13,026	15,885	Revised computation
Manmad (Non M.)	16·58	9·92	7,981	10,490	Revised computation
Yeola (M)	6·63	2·20	21,039	24,533	Revised computation
Dhulia District					
Nandurbar (M)	35·51	9·97	41,055	54,070	Jurisdictional change and revised computation
Shirpur (M)	14·84	1·94	20,846	25,746	Revised computation
Dondaicha (M)	24·06	2·36	15,578	20,185	Revised computation
Jalgaon District					
Jalgaon (M)	17·72	12·30	80,351	106,711	Revised computation
Faizpur (M)	10·57	6·60	13,073	15,192	Revised computation
Raver (M)	38·54	2·59	13,188	15,789	Revised computation
Savda (M)	0·52	2·07	13,124	14,645	Jurisdictional change
Kandari	11·40	10·44	5,127	7,908	Revised computation
Pachora (M)	13·29	18·49	18,338	24,099	Jurisdictional change
Erandol (M)	46·93	2·87	16,619	18,905	Jurisdictional change and revised computation
Amalner (M)	48·25	9·71	46,963	55,544	Revised computation

@It is a coincidence that the area figures for 1961 and 1971 shown in columns 2 and 3 are identical. Panvel (M) has acquired territory after 1961 and its present extended area is 12·15 Km². The identical figure (12·15 Km²) shown for Panvel (M) in the 1961 census report (that is, before the recent expansion) was reported to be incorrect.

EXPLANATORY NOTE

This is a new table adopted for the first time in the 1971 census. It gives census data in the form of area, density (population per sq. km), number of occupied residential houses, houseless population, institutional population and total population, for each standard urban area and its component units.

2. The concept of standard urban area has been developed for the 1971 census and has replaced the concept of town group adopted at the 1961 census. In 1961, data regarding urban areas both in terms of individual towns and cities and also in terms of 'clusters' of population called town groups were presented. The aim was to identify functionally linked urban areas-urban spills beyond the administrative boundaries and metropolitan conurbation. The town group was made up of independent urban units not necessarily contiguous to one another but to some extent interdependent. However, varying definitions and criteria adopted for delimitation of the town groups did not ensure uniformity of concept.

3. For the 1971 census the 'town group' concept has been substituted by the 'standard urban area' concept to enable the presentation of urban statistics on a uniform basis while ensuring at the same time comparability of the census data from one decade to another and with similar data available from other countries.

4. The essential features of a standard urban area are (*i*) it should have a core town of a minimum population size of 50,000, (*ii*) the contiguous areas made up of other urban as well as rural administrative units should have close mutual socio-economic links with the core town and, (*iii*) the probabilities are that this entire area will get fully urbanised within a period of two to three decades. The aim is to provide comparable adta for a definite and well demarcated area of urbanisation continuously for three decades.

5. The standard urban area may be defined as the projected growth area as it would be in 1991 of a city or town having 50,000 or more population in 1971, the area being delineated in a manner that takes into account not only the towns and villages which will get merged in it but also the intervening areas which are potentially urban. Such a tract will include all extra-municipal urban growth such as the suburbs (industrial and residential), railway colonies, civil lines and cantonments and also such of those villages and towns which are likely to be urbanised by 1991. The SUA will thus be an area which will extend beyond the main city or town and would contain all likely development over the period upto 1991. Thus it will remain as a statistical reporting unit during three successive censuses, irrespective of the changes in the boundaries of the local administrative units within the tract. The SUA is identified by the administrative units that it ecompasses, namely, city, town, thana or village. The boundaries of the SUA are the administrative boundaries of the peripheral units.

6. The preceding table, that is Table A-IV, traces the development of the urban population of each 1971 unit from 1901 to 1971. In respect of a town or city which acquired territory by merger at an intermediate census or in 1971, the population figures shown in Table A-IV for censuses prior to the one at which the territory was acquired relate only to such portion of it as was urban at the respective census and not to its area according to the 1971 jurisdiction. In other words, the population of only the urbanised area at the respective census is presented in that table against any unit.

7. The principle in presentation of data in Table A-V is slightly different. Any 'standard urban area, (SUA) for which data are presented in Table A-V is a compact *fixed territory* which represents a *potential urbanisable area.* Not all of its components have beentreated as urban for the 1971 census. Some of them are as yet rural but are considered potentially urbanisable. Data have been presented in Table A-V not only for each SUA as a whole but also for each of its components. The components have been grouped as urban or as rural according to their classification for the 1971 census. Totals have been struck for each of the two groups of components. But the population figures presented in respect of an urban component for the past censuses 1951 and 1961 relate not merely to the urbanised area of the component at the respective census but to the entire area which it now represents, even though part of it might have been rural at that census. This is a sequel to its being treated as a definite fixed territory which is to be taken as a statistical reporting unit for censuses up to 1991. Table A-V has to provide comparable data for each SUA and also for each of its components right from 1951. Hence the need for adjusting all data for past censuses to the present jurisdiction of the unit. Since in Table A-IV the data relate to such area as was already urbanised at the respective census and in Table A-V it relates to the entire area of the component as in 1971, the population figures for 1951 and 1961 given in Table A-V will in the case of urban units which have expanded after 1951 as a result of merger of rural areas be found to be higher than the figures for those censuses shown against those towns or cities in Table A-IV.

8. Differences of population figures as between Table A-IV and Table A-V for the censuses 1951 and 1961 will be seen in the case of the following units—

Urban unit	1951 Population		1961 Population	
	In A-IV	In A-V	In A-IV	In A-V
Greater Bombay city	2,966,902	2,994,444	..	..
Thana city	61,767	63,575	..	..

Amravati city	102,806	102,855	137,875	137,949
Nagpur city	449,099	449,393	643,659	643,941

A-V—STANDARD URBAN AREAS

[(1) The grouping of the components of a standard urban area under the heads 'urban' and 'rural' has been done with reference to their status for the 1971 census. It does not necessarily follow that each urban component was urban—wholly or partly—in 1951 and 1961 also, for which censuses population figures have been presented in columns 15 and 16.

(2) Towns treated as such for the first time in 1961 which continue as towns in 1971 have been marked with an asterisk(*)

(3) Towns treated as such for the first time in 1971 have been shown in *italics*.

(4) Population figures for the past censuses (*vide* columns 15 and 16) in respect of an urban component represent data adjusted for the 1971 jurisdiction of the unit, ignoring the fact whether it was rural—partly or wholly—at the respective census. Please also see the explanatory note to this table.]

EXPLANATORY NOTE

This table is presented in the form of union and state primary census abstracts. The first furnishes consolidated basic census data for Maharashtra and its territorial units of revenue divisions and districts. The second gives data for Maharashtra, its 26 districts, 232 tahsils and 289 towns. Data are provided for the territorial unit as a whole with a break-up for its rural and urban areas. Part B of the district census handbooks presents the PCA data down to the level of a village in rural areas and an enumerator's block (comprising 120 to 150 households) in a city or town.

2. The information furnished in the PCA relates to area in square kilometres, the number of occupied residential houses, households, total population (including institutional and houseless population), population of scheduled castes and scheduled tribes, literate and educated persons, the working population (workers) classified into nine broad industrial categories and non-workers as a separate category.

3. A definition of rural and urban areas in regard to column 2 is given in the explanatory note on table A-I and A-IV.

4. Column 3 shows the area of each territorial unit in km^2. The state and the district total area figures are those supplied by the Surveyor General of India and represent geographical area. They are provisional figures. The state and the district urban area are the total of areas of all towns and cities, if any, as supplied by the local bodies. The state and the district rural area figures are derived by substracting urban area figures (supplied by the local bodies) from the state and district area figures supplied by the Surveyor General. Total area figures of all tahsils will not tally with the total area figures of the district as the former are land use figures supplied by the land records department.

Occupied residential houses

5. The total number of occupied residential houses is shown in column 4. Occupied residential houses are the census houses used for residential purposes exclusively or along with any other use. A census house is a building or part of a building having a separate main entrance from the road or a common court-yard, staircase, etc., used or recognised as a separate unit. It may be inhabited or vacant. It may be used for residential or non-residential purpose or both. The figures shown in this column are those of census houses actually in use as residence or residence-*cum*-other use such as residence-*cum*-workshop, residence-*cum*-factory etc., on census day. Every census house where one or more persons were found to be residing (irrespective of the house being used only as a residence or partly as a residence and partly for some other purpose) has been classified as an occupied residential house.

6. The number of occupied residential houses shown in the PCA also includes workshops, factories, garages, shops, depots, etc. where one or more persons (watchmen, peons, drivers, etc.) were found to be residing at the time of census. It does not on the other hand include houses which are residential houses but which at the time of the census were either vacant or where no person was found to be residing.

Households

7. The number of households shown in column 5 is inclusive of institutional and houseless households. A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be one-member households, two member households or multi-member households; for census purposes each of these is regarded as a household. Groups of persons mostly related and staying together in the open spaces, pavements, gardens etc. are called houseless households.

8. There may be a household of persons related by blood or a household of unrelated persons. The latter are boarding houses, hotels, residential hotels, orphanage home, ashramas, etc. As each household is related to the physical structure of a census house and as there may be more than one household staying in a census house, there is a consistency in their figures in the sense hat the number of census houses may be equal to the number of households or more; it cannot be less.

9. Statement 1 at page 208 shows the number of households for every 100 occupied residential houses for Maharashtra and its districts with a rural and urban break-up.

10. On an average there are 111 households per 100 occupied residential houses in Maharashtra. There may be more than one household residing in a house but that house is counted as one. Eleven per cent of the households in Maharashtra are sharing houses with other households. A house is treated as shared or common when it has only one independent entrance shared by more than one household owing to structural limitations, etc., and households staying there have separate cooking arrangements within the house.

11. The coastal districts of Ratnagiri (126), Kolaba (122) and Thana (120) have a higher number of households sharing accommodation than the state average. Other districts which have a higher number than the state average are Poona (121), Kolhapur (122), Osmanabad (112), Nagpur (113), and Chandrapur (112). The number of households and houses are almost at parity in Wardha district. The highest number of households is found in the urban areas of Kolaba (136) and Osmanabad (136) districts.

STATEMENT 1

Number of households per 100 occupied residential houses and density of households

Chandrapur	112	110	125	13	11	320

12. The density of households (households per sq. km) is abnormally high (2,171) in Greater Bombay compared with the state average of 31 and the lowest in Chandrapur (13) which has a large forest area. The districts which have a higher density of households than the state average are Thana (45), Kolhapur (44), Nagpur (38), Poona (37), Jalgaon and Kolaba (34) each and Bhandara (33).

13. Excluding Greater Bombay the urban areas of Wardha district top with 1,256 households per sq. km.

14. The total population including institutional and houseless population is shown in column 6 and its break-up by sex in columns 7 and 8.

15. Institutional population includes persons enumerated in penal, charitable or mental institutions, hostels, hotels, hospitals, boarding and lodging houses.

16. Houseless population includes persons who do not have any fixed place of residence but go on moving, from place to place, camp at night or just live on the streets, in gardens or in open places without erecting a hut or a similar structure. They may include domestic servants and other workers who do not reside in any house and sleep in the corridors, verandahs, passages in the buildings or on the streets; wandering or nomadic tribes found to be staying in temporary huts or residing without any such hut on the grounds; beggars, vagrants, sadhus, fakirs, etc. who are found on the foot-paths, streets and in public places like parks, gardens, seashore, railway yards, etc. All such houseless persons were separately enumerated on the night of 31 March 1971.

Scheduled castes and scheduled tribes

17. The population of scheduled castes and scheduled tribes is shown in columns 9 and 12 respectively and its break-up by sex in columns 10, 11, 13 and 14. There is no general or standard definition of either a scheduled caste or a scheduled tribe. Under the constitution of India, scheduled castes mean such castes, races or tribes or part or groups within such castes, races or tribes as are declared to be scheduled castes by the President of India by public notification under article 341(1) of the constitution. Similarly, scheduled tribes mean such tribes or tribal communities or part or groups within such tribes or tribal communities as are declared by the President to be scheduled tribes under article 342 of the constitution.

18. The figures presented here relate to the total of all scheduled castes and scheduled tribes and not their break-up by individual scheduled caste or scheduled tribe. The groups of scheduled castes and scheduled tribes do not include backward or other backward castes or tribes, denotified tribes, nomadic tribes etc. for which certain privileges and concessions may have been allowed by the state government. They include only those scheduled castes and scheduled tribes which are included in the President's order. A list of scheduled castes and scheduled tribes in Maharashtra state with area restrictions contained in the Presidential order is reproduced below.—

List of scheduled castes

List of scheduled castes applicable in the state of Maharashtra throughout the state except the districts of Buldhana, Akola, Amravati, Yeotmal, Wardha, Nagpur, Bhandara, Chanda, Aurangabad, Parbhani, Nanded, Bhir, Osmanabad and Rajura—

(1) Ager;
(2) Baked or Bant;
(3) Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit or Samgar;
(4) Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar or Zadmalli;
(5) Chalvadi or Channayya;
(6) Chenna Dasar or Holaya Dasar;
(7) Dhor, Kakkayya or Kankayya;
(8) Garoda or Garo;
(9) Halleer;
(10) Halsar, Haslar, Hulasvar or Halasvar;
(11) Holar or Valhar;
(12) Holaya or Holer;
(13) Lingader;
(14) Mahar, Taral or Dhegu Megu;
(15) Mahyavanshi, Dhed, Vankar or Maru Vankar;

(16) Mang, Matang or Minimadig;
(17) Mang-Garudi;
(18) Meghval or Menghvar;
(19) Mukri;
(20) Nadia or Hadi;
(21) Pasi;
(22) Shenva, Chenva, Sedma or Ravat;
(23) Tirgar or Tirbanda;
(24) Turi.

2. In the districts of Buldana, Akola, Amravati, Yeotmal, Wardha, Nagpur, Bhandara and Chanda—
(1) Bahna or Bahana;
(2) Balahi or Balai;

List of scheduled tribes

List of scheduled tribes applicable in the state of Maharashtra throughout the state except the dittricts of Buldhana, Akloa, Amaravati, Yeotmal, Wardha, Nagpur, Bhandara, Chanda, Aurangabad, Parbhani, Nanded, Bhir, Osmanabad and Rajura—

(1) Barda;
(2) Bavacha or Bamcha ;
(3) Bhil, including Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava and Valvi;
(4) Chodhara;
(5) Dhanka, including Tadvi, Tetaria and Valvi;
(6) Dhodia;
(7) Dubla, including Talavia or Halpati;
(8) Gamit or Gamta or Gavit, including Mavchi Padvi, Vasava, Vasave, and Valvi;
(9) Gond or Rajgond;
(10) Kathodi or Katkari, including Dhor Kathodi or Dhor Katkari and Son Kathodi or Son Katkari;
(11) Kokna, Kokni, Kukna;
(12) Koli Dhor, Tokre Koli, Kolcha or Kolgha;
(13) Naikda or Nayaka, including Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka and Nana Nayaka;
(14) Pardhi, including Advichincher and Phanse Pardhi;
(15) Patelia;
(16) Pomla;
(17) Rathawa;
(18) Varli;
(19) Vitolia, Kotwalia or Barodia.

2. In Thana district—
Koli Malhar.

3. (a) In Ahmednagar district—
Akola, Rahuri and Sangamner talukas.
(b) In Kolaba district—
Karjat, Khalapur, Alibag, Mahad and Sudhagad talukas.
(c) In Nasik district—
Nasik, Niphad, Sinnar, Chandor, Baglan, Igatpuri, Dindori and Kalvan talukas and Surgana and Peint mahals.
(d) In Poona district—
Ambegaon, Junnar, Khed, Maval and Mulshi talukas and Velhe mahal.
(e) In Thana district—
Thana, Murbad, Bhivandi, Bassein, Vada, Shahapur, Dahanu, Palghar, Jawhar and Mokhada talukas,
} Koli Mahadev or Dongar Koli.

4. (a) In Ahmednagar district—
Akola, Rahuri and Sangamner talukas,
(b) In Kolaba district—
Karjat, Khalapur, Pen, Panvel and Sudhagad talukas and Matheran.
(c) In Nasik district—
Igatpuri, Nasik and Sinnar talukas.
(d) In Poona district—
Ambegaon, Junnar, Khed and Maval talukas.
(e) In Thana district—
Thana, Kalyan, Murbad, Bhivandi, Bassein, Vada, Shahapur, Palghar, Jawhar and Mokhada talukas.
} Thakur or Thakar including—Ka Thakur, Ka Thakar, Ma Thakur and Ma Thakar.

5. In (1) Melghat tahsil of Amravati district, (2) Gadhchiroli and Sironcha tahsils of Chanda district, (3) Kelapur, Wani and Yeotmal tahsils of Yeotmal district—

(1) Andh;
(2) Baiga;
(3) Bhaina;
(4) Bharia-Bhumia or Bhuinhar-Bhumia including Pando;
(5) Bhattra;
(6) Bhil;
(7) Bhunjia;
(8) Binjhwar;
(9) Birhul or Birhor;
(10) Dhanwar;
(11) Gadaba or Gadba;
(12) Gond, including—

Arkh or Arrakh,
Agaria,
Asur,
Badi Maria or Bada Maria,
Bhatola,
Bhimma,
Bhuta, Koilabhuta or Koilabhuti,
Bhar,
Bisonhorn Maria,
Ghota Maria,
Dondami Maria,
Dhuru or Dhurwa,
Dhoba,
Dhulia,
Dorla,
Gaiki,
Gatta or Gatti,
Gaita,
Gond Gowari,
Hill Maria,
Kandra,
Kalanga,
Katola,
Koitar,
Koya
Kirwar or Kirwara,
Kucha Maria,
Kuchaki Maria,
Madia (Maria),
Mana,
Mannewer,
Moghya or Mogia or Monghya,
Mudia (Muria),
Nagarchi,
Nagwansi,
Ojha,
Raj,
Sonjhari Jhareka,
Thatia or Thotya,
Wade Maria or Vade Maria;

(13) Halba or Halbi;
(14) Kamar;
(15) Kawar, Kanwar, Kaur, Cherwa, Rathia, Tanware or Chattri;
(16) Khairwar;
(17) Kharia;
(18) Kondh or Khond or Kandh;
(19) Kol;
(20) Kolam;
(21) Korku, including Bopchi, Mouasi, Nihal or Nahul and Bondhi or Bondeya;
(22) Korwa, including Kodaku;
(23) Majhwar;
(24) Munda;
(25) Nagesia or Nagasia;
(26) Nihal;
(27) Oraon, including Dhanka and Dhangad;
(28) Pardhan, Pathari and Saroti;
(29) Pardhi, including Bahelia or Bahellia, Ghita Pardhi, Langoli Pardhi, Phans Pardhi, Shikari, Takankar and Takia;
(30) Parja;
(31) Saonta or Saunta;
(32) Sawar or Sawara.

6. In the districts of Aurangabad, Parbhani, Nanded, Rajura, Bhir, and Osmanabad—

(1) Andh;
(2) Bhil;
(3) Gond (including Naikpod and Rajgond);
(4) Kolam (including Mannervarlu);
(5) Koya (including Bhine Koya and Rajkoya);
(6) Pardhan;
(7) Thoti.

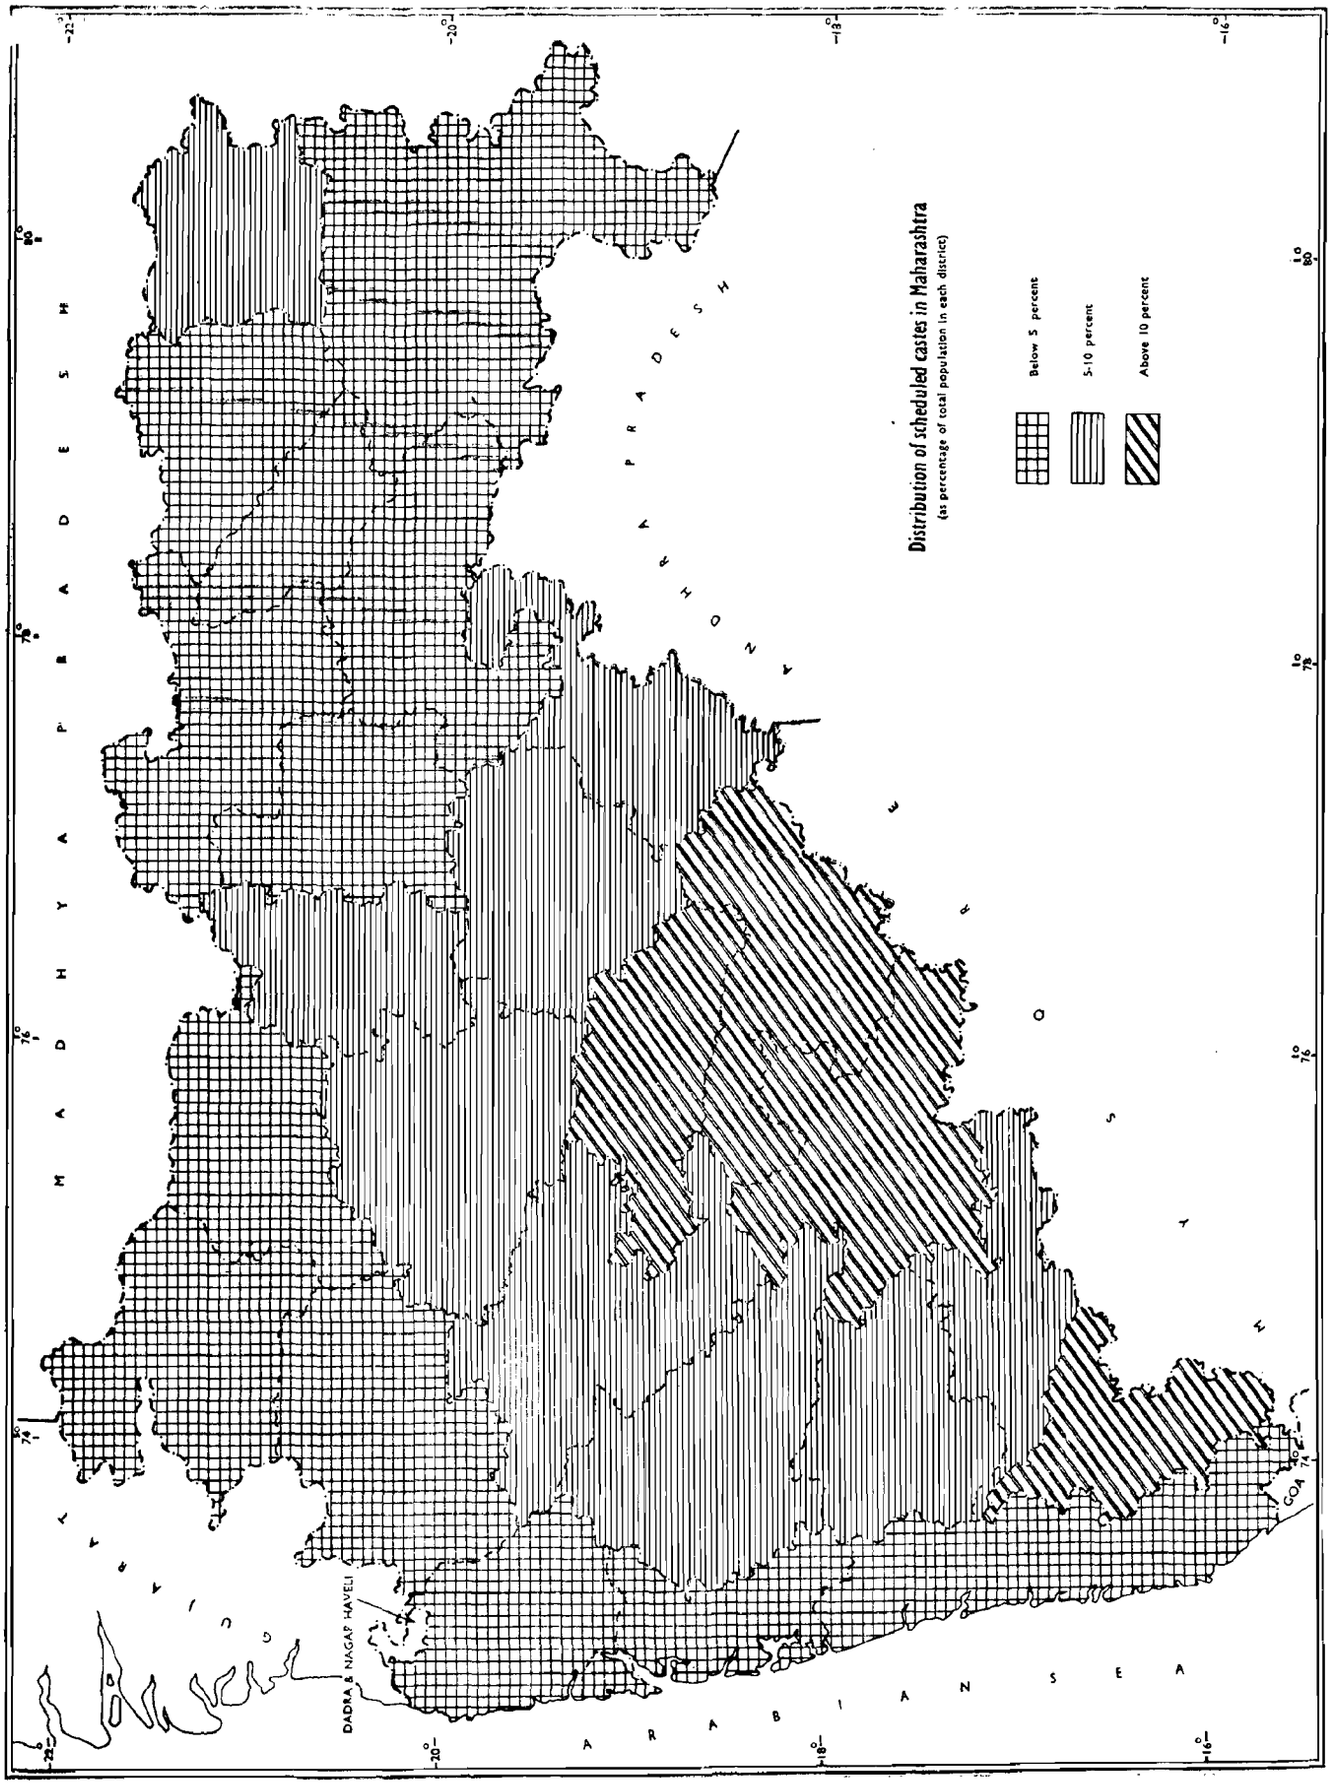

19. In cases where a caste or a tribe is declared as a scheduled caste or scheduled tribe for a specified area, that caste or tribe has been counted only for that specified area and not for any other area of the district or elsewhere.

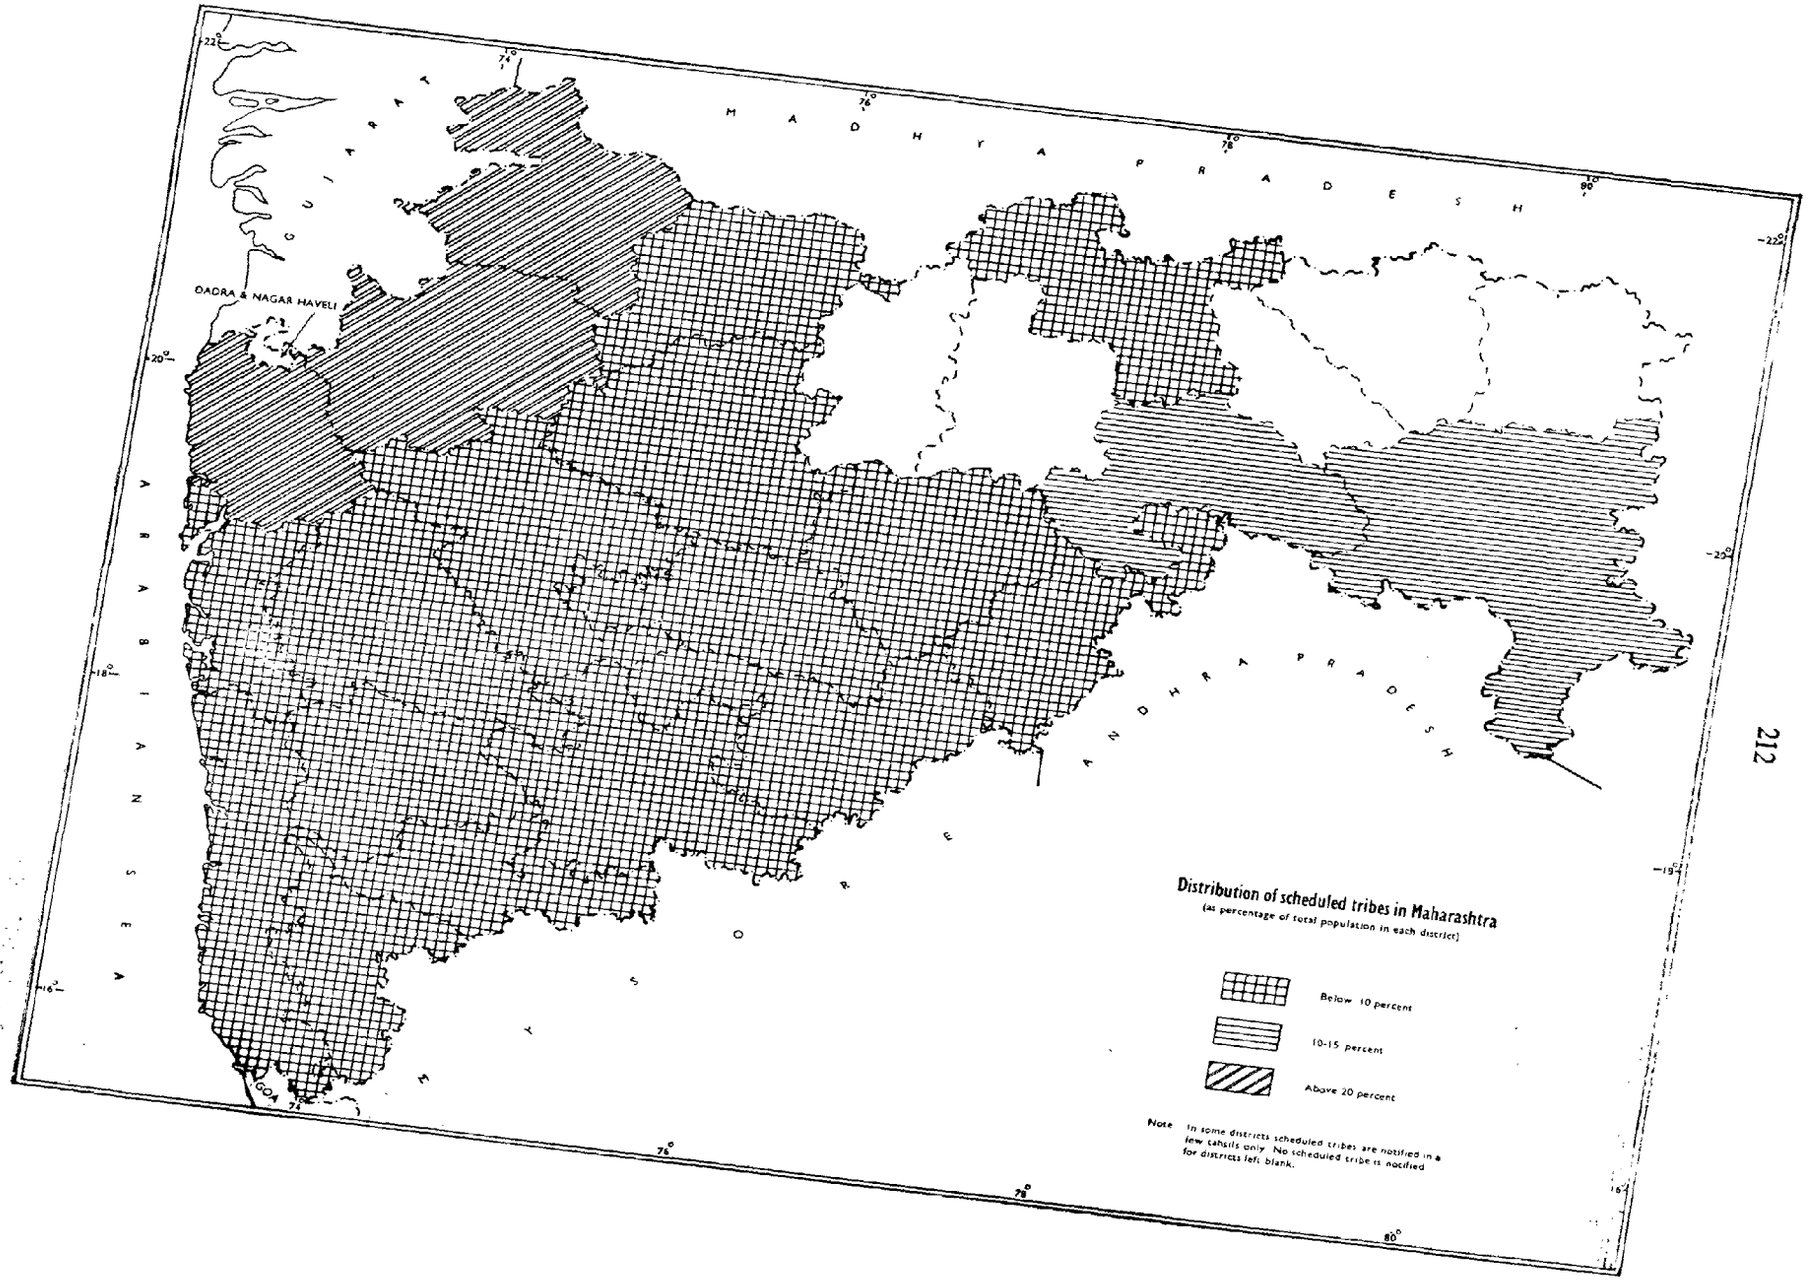

20. Maharashtra has a population of 3,025,761 persons belonging to the scheduled castes. This represents six per cent of the total population of the state. Of these, 75·32 per cent reside in rural areas. The scheduled castes population in Maharashtra has gone up from 2·23 million in 1961 to 3·03 million in 1971, an increase of 35·87 per cent as against 27·45 per cent for the total population in Maharashtra. Its proportion to total population has increased from 5·63 per cent in 1961 to 6·00 per cent in 1971.

21. Although scheduled castes are generally spread over all areas of the state, their concentration is more noticeable in Poona and Aurangabad divisions which together account for nearly two-thirds of their population in Maharashtra. The respective percentages are Poona 39·11, Aurangabad 25·35, Bombay 18·19 and Nagpur 17·35 of the total scheduled castes population. The highest percentage of scheduled castes population is found in Sholapur district (10·59) followed by Osmanabad (9·43), Kolhapur, (7·68), Ahmednagar (6·99), Greater Bombay (6·96), Poona (5·80) and Bhir (5·33). In the remaining district the percentage of scheduled castes population to the total scheduled castes population is less than 5·0. The lowest percentage is found in Kolaba district (0·51).

22. The highest percentage of scheduled castes population to the total population is found in Osmanabad district (15·04). Other districts which have more than ten per cent scheduled castes population to the total population are Sholapur (14·21), Bhir (12·53) and Kolhapur (11·35). The rural areas of Osmanabad, Sholapur and Bhir districts have almost the same proportion of scheduled castes population to the total rural population in the districts. The lowest percentage of scheduled castes population to total population is found in Kolaba district (1·22).

23. Statement 2 on page 213 shows the proportion of scheduled castes and scheduled tribes population of each district to the total scheduled castes and scheduled tribes population of Maharashtra.

24. Statements 4 (a) and 4 (b) on page 214 show the proportion of scheduled castes population to the total pupulation and proportion of scheduled tribes population to the total population.

There are 48 tahsils which have scheduled castes population more than 10 per cent of their respective population. The highest percentage is noticed in Deglur tahsil in Nanded district (19·70). The tahsils which have more than 15 per cent of scheduled castes population are Akalkot (15·06), Sholapur South (16·20), Mohol (16·77), Mangalvedha (15·86), Malsiras (15·92), Karmala (15·57), Madha (15·72) all in Sholapur district; Deglur (19·70) and Mukhed (15·11) in Nanded district; Osmanabad (15·98) Kallam (18·40), Udgir (17·30), Tuljapur (16·12) in Osmanabad district. Among 289 towns in Maharashtra the proportion of scheduled castes population to the total population is highest (48·74) in Sasti town in Chandrapur district. The tahsils with more than 10 per cent of its population as S. C. population are given in Statement 3.

26. Maharashtra has scheduled tribes population of 2,954,249 comprising 1,497,481 males and 1,456,768 females. This represents 5·86 per cent of the total Maharashtra population. The scheduled tribes population which was 2,397,159 in 1961 has risen to 2,954,249 in 1971 an increase of 23·24 per cent compared to 27·45 per cent for the total population.

27. Scheduled tribes population is mostly concentrated in Bombay and Nagpur divisions. Bombay division alone contains 68·89 per cent while Nagpur division has 17·22 per cent. Poona and Aurangabad divisions contain 9.22 per cent and 4·67 per cent of scheduled tribe population respectively. Among the districts, Dhulia, Thana and Nasik rank as the three highest both by size and population of scheduled tribes and its proportion to total population. These three districts together hold 59·46 per cent of the scheduled tribes population of Maharashtra. Chandrapur, Yeotmal, Kolaba, Ahmednagar, Jalgaon, Amravati, Nanded, Poona and Parbhani districts have sizeable proportion of scheduled tribes population. Ratnagiri, Satara, Sangli, Sholapur, Kolhapur, Bhir and Osmanabad districts have less than 0·5 per cent of the total population. There are no scheduled tribes in five districts *viz.*, Buldana, Akola, Wardha, Nagpur and Bhandara. In the three remaining districts of Nagpur division, *viz.*, Amravati, Yeotmal and Chandrapur, there are scheduled tribes only in seven tahsils, *viz.*, Melghat tahsil of Amravati district, Wani, Kelapur and Yeotmal tahsils of Yeotmal district and Rajura, Gadhchiroli and Sironcha tahsils of Chandrapur district.

28. The highest proportion of scheduled tribes population to the total population among tahsils is found in Surgana tahsil (95·77) in Nasik district; another tahsil Peint in the same district has (94.43) percentage. Statement 5 shows tahsils having more than 25 per cent of its population as tribal.

29. Columns 15 to 17 give the number of literates and educated persons with its sex break-up. For purposes of census, a person is deemed to be 'literate' if he can read and write a simple letter in any language. Persons having a higher education are also included in these figures. A person who has passed any written examination or has attained a higher educational level is deemed to be an educated person.

Literacy and education

30. Statement 6 below shows the percentage of literates including educated to total population for persons, males and females, and by total, rural and urban areas of Maharashtra, its divisions, districts and 17cities. These are gross percentages worked out for the total population including children of 0.4 years age group of the respective territorial units.

31. There are 19·75 million literates in Maharashtra comprising 13.33 million male literates and 6·42 million female literates. The literacy percentage for the state is 39·2 as against 29·8 in 1961. The percentage for males and females is 51·0 and 26·4 respectively compared to 42·0 and 16.8 in 1961. The highest literacy percentage is in Greater Bombay district (63·8) and the lowest in Nanded district (22·8). The highest and lowest literacy rates among males and females in Maharashtra are also seen in these two districts. The literacy rate for females in the rural areas of Nanded district is as low as 74 per cent.

32. Out of 26 districts, 17 districts have less than the average percentage of literacy (39·18) for the state. Of these, three are in Bombay division, all but one district (Poona) in Poona division, all the five districts of Aurangabad division and four out of eight districts of Nagpur division. The literacy percentages for the urban areas range between 63·84 of Greater Bombay and 22·78 of Nanded district. In the urban area the male literacy percentage is higher than 60 in all districts except Parbhani, Bhir, Nanded and Osmanabad which have percentages ranging between 50 to 60. In the rural areas the total literacy percentage varies from 42·21 in Jalgaon district to 19·59 in Nanded district.

33. Among the 17 cities in the state, Greater Bombay has the highest percentage of literates and among all the 289 towns Dombivali has the highest percentage (73·67).

Workers—Non-workers

34. Columns 18 to 53 show the distribution of population into workers and non-workers and of workers into nine broad industrial categories. The main economic activity returned by a person was the basis on which he was classified either as a worker or non-worker. A worker is defined as a person whose main activity is participation in any economically productive work through his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. A person may be working as a cultivator or as an agricultural labourer or in any household industry or may be engaged in doing some economically productive work. The last category may include persons who are engaged in productive activities other than cultivation such as business, trade, communication, transport or other miscellaneous services and professions.

35. In case of regular work in trade, profession, service or business, a person was considered as a worker if he had participated in such regular work on any one of the days during the week preceding the date of enumeration and that work has been returned as his main activity. A person participating in regular work, but absent from his work during the last week preceding the date he was enumerated, owing to illness, travel holiday, strike, temporary breakdown, etc., was treated as a worker. In the case of perennial work such as cultivation, livestock, plantation, some type of household industries, a person was treated as a worker or not by ascertaining whether he had participated any time during the last one year, even if, he was not economically active in the week prior to enumeration. Persons under training as apprentices with or without a stipend were recorded as workers. A public or social worker engaged actively in public or social work or a political worker actively engaged in furthering the political aims of a party was also regarded as a worker. Under trial prisoners or persons who were in jail but were not convicted by a court of law were recorded as worker if they were engaged in any of the activities which are considered as work by definition before they were arrested. Similarly, persons who were admitted to hospitals or sanatoria were considered as workers if they were engaged in activities which are considered as work before they were admitted. A person who had secured employment or has been offered a job but has not actually joined duty was not treated as a worker. A person who is engaged primarily in household duties such as cooking for ones' own household or performing one's own household duties or a boy or a girl who is primarily a student attending an institution, even if such a person helps in the family's economic activity but not as a full time worker was not treated as worker for the main activity. On the other hand, if a person is primarily engaged in some economic activity but at the same time does also attend to some household chores or attends a night school etc. he has been treated basically as a worker for the main activity. A person who merely receives income such as rent or pension and who does not have to work for receiving that income, has not been treated as a worker unless he is also engaged in some economic activity and if that activity is returned as the main activity of the individual.

36. Where the main activity of a person qualifies to be treated as a worker he has been classified according to the type of work. This categorisation is shown in the following nine broad economic categories :—

I. cultivators

II. agricultural labourers

III. livestock, forestry, fishing, hunting, plantations, orchards and allied activities

IV. mining and quarrying

V. manufacturing, processing servicing and repairs etc.—

(a) household industry

(b) other than household industries

VI. construction

VII. trade and commerce

VIII. transport, storage and communications

IX. other services

37. In this categorisation there is a departure from the 1961 tables in respect of assignment of a separate category (category IV) to "mining and quarrying" as against a combined category of mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities in 1961. The 1961 category IV of "household industry" is included in category V—manufacturing etc., treating it as a subcategory. At the 1961 census, "household industry" covered certain establishment falling under division 0 and 1 of the National industrial classification, i.e., cattle-rearing, orchards, plantations, etc. apart from division 2 and 3. At the 1971 census "household industry" is confined to division 2 and 3 only, that is it covers only manufacturing, repairing, processing or servicing only.

Category I.—This category includes both owner cultivators and tenant cultivators. Along with workers personally working on land are also included persons who are engaged in supervision or direction of cultivation. All persons working in cultivation of land wherein they have either ownership or tenancy rights are included in this category.

According to the definition, a person is said to be a cultivator if he is engaged as an employer, single worker or family worker in (i) cultivation of land or supervision or direction or cultivation of land owned or held from government; (ii) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share in the produce of crop. It is not essential that the person should own the land absolutely. Even if the land cultivated is held or leased or under a variety of tenure the person is entitled to be recorded as a cultivator. Cultivation involves ploughing, sowing and harvesting and does not include growing or keeping of orchards or groves or working in plantations like tea, coffee, rubber, cinchona or other medicinal plants. Persons engaged in tea growing or working in plantations like tea, coffee, etc. were not treated as cultivators. A person who leased out his lands to others for cultivation and was getting a return in the shape of money or a share of the crop but did not even supervise or direct cultivation of land was not treated as a cultivator. The following classification gives the activities which fall under cultivation and which do not fall under cultivation.

Field produce coming under cultivation—

(i) Production of cereal crops such as rice, wheat, jowar, bajra, maize roots and tubers like potato, yam, beat and sugar.

(ii) Production of pulses such as tur, moong, masur, urid and other gram.

(iii) Production of raw jute and kindred fibre crops.

(iv) Production of raw cotton and kindred fibre crops.

Field produce not coming under cultivation— .

(i) Production of other crops including vegetables not covered by items (i) to (iv) above.

(ii) Production of fruits and nut plantations, vines, orchards (cocoanut, arecanut etc.).

(iii) Production of wood, bamboo, cane reeds, thatching grass, etc.

(iv) Production of juice by tapping palms.

(v) Production of other agricultural produce (including fruits and nuts not covered by serial number (ii) and flowers) not covered above.

Plantation crop not coming under cultivation—

(i) Production of tea and coffee in plantation.

(ii) Production of rubber in plantation.

(iii) Production of tobacco in plantation.

(iv) Production of ganja, cinchona, opium, poppy, saffron, etc.

Category II.—All other persons working on other persons' lands for wages in cash or kind without holding any right upon the land are classified as agricultural labourers and included in this category. Thus, an agricultural labourer is a person working on anothers' land as a labourer and has no right or lease on the land on which he is working and is not therefore, responsible for taking decisions as to the kind of crop to be sown and is paid wages in cash or kind.

Category III.—Workers in livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category. This includes livestock production, hunting, trapping and game propagation, forestry and logging, fishing in sea, coastal and inland waters, collection of pearls, conches and other sea products etc.

Category IV.—Workers in mining and quarrying are included in this category. This includes coal mining, crude petroleum, natural gas, metal ore mining, stone quarrying and other type of mining, salt, chemicals, precious stones, mica and gypsum etc.

Category V.—A household industry is defined as an industry conducted by the head of the household himself and/or by the members of the household at home or within the village in rural areas and only at home in urban areas. In urban areas, the industry must be confined to the house or at least a major part of the work must be located at home. The household industry is not run on the scale of a factory. A household industry should relate to the production, servicing, processing, repairing or making and selling of goods, but should not be confined to the process of buying and selling only. It does not therefore, include establishments exclusively engaged in buying and selling professions such as doctor, astrologer, pleader, etc. Workers in manufacturing industry other than household industry include those engaged in all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as "household industry."

Category VI.—This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph, telephones, waterways, reserviors, etc.

Category VII.—This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transaction relating to imports and exports, real estate and property, stocks and shares, insurance, money-lending, banking, etc.

Category VIII.—This category includes workers engaged in transport activity by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged

in storage, warehousing and communication services such as posts, telegraph, telephones, wireless signalling, information and broadcasting are also included.

Category IX.—This category includes (i) public utility services like electricity or gas or water supply, sanitary services; (ii) central, state or municipal employees; (iii) professional services; (iv) trade or labour associations, recreational services, etc.

Category X—Non-workers

38. Non-workers are those who are not mainly engaged in any economically productive work. They comprise seven broad groups (i) those basically engaged in unpaid household duties and doing no other work, (ii) all full-time students and children attending school, (iii) retired persons, not employed again in some full-time work and rentiers, (iv) all dependents such as infants and children not attending school, persons permanently disabled from work owing to illness, old age, etc., (v) beggars, vagrants, independent women without indication of source of income, those of unspecified sources of subsistence, (vi) inmates of penal, mental or charitable institutions, convicts in jails, and (vii) all non-workers who may not come under any of the six categories but are seeking work.

39. Out of the total population of 50·4 million in Maharashtra, only 18·4 million (36·48 per cent) are workers. The percentages of workers among males and females are 52·09 and 19·70 respectively. The percentage of workers in Maharashtra has decreased from 47·91 in 1961 to 36·48 in 1971. This phenomenon is noticed in all districts. The decrease is pronounced in the case of female workers whose proportion has gone down from 38·10 to 19·70. In Greater Bombay dis rict, however, the proportion of female workers remains nearly steady.

40. The reason for this decrease in proportion of workers in 1971 appears to be the change in the concept of 'workers' adopted in 1971. According to the 1961 definition, all those seasonal workers who had some regular work of more than one hour a day throughout the greater part of the season were treated as workers. In 1971, the persons who had worked in the current or last working season for the greater part of the season were treated as workers. The 1961 definition gave scope for the inclusion of a number of housewives who had helped in cultivation or in the household industry carried on by other family members for an hour or more, as workers. The 1971 instructions stipulated that a person primarily engaged in household duties or those who were students and helped in the family economic activity but not on a full-time scale, should be treated as 'non-workers' in respect of their main activity and the economic activity in which they were marginally engaged might be considered as their secondary work. At the basic classification of workers and non-workers is in respect of the main activity, a number of housewives, who are helping in cultivation and other family enterprises only marginally do not appear to have been considered as 'workers'. This might explain the decrease in the proportion of female cultivators compared to 1961 in all the districts and the proportion of female workers remaining steady in Greater Bombay.

41. Data regarding the secondary work of worker and non-workers collected during 1971 will be available after compilation of the individual slips is completed. It might then be possible to obtain comparative corresponding figures of workers and to throw more light on the position regarding the economically active population of Maharashtra.

For further analysis of economically active population please *see* Part II B— General Economic Tables of Maharashtra.

UNION PRIMARY CENSUS ABSTRACT

(1) Total area figures of state and districts as on 1st July 1971 are as supplied by the Surveyor General of India which are provisional.

(2) Area figures of urban areas are as supplied by municipal corporations or councils.

State/Division/District	Total Rural Urban	Area in kms²	Occupied residential houses	No. of house-holds	Total population (including institutional and houseless population)			Scheduled castes			Scheduled tribes

PRIMARY CENSUS ABSTRACT

(1) Total area figures of state and districts as on 1st July 1971 are as supplied by the Surveyor General of India which are provisional.
(2) Area figures of urban areas are as supplied by municipal corporations or councils.
(3) Names of towns treated as such for the first time in 1961 which continue as towns in 1971, have been marked with an asterisk (*)
(4) Names of towns treated as such for the first time in 1971 have been printed in *italics*.
(5) "M" stands for municipality and "M. corp" for municipal corporation.
