Appendix D	Population Record	262
Appendix E	Census Calendar for 1971 Census.	263–265

PREFACE

The compilation and publication of Part II-A General Population Tables marks the culmination of the process of abstraction and tabulation of data collected during 1971 Census. This publication contains the data cast in the four tables of A-series together with several appendices plus the Primary Census Abstract. Particulars of the data covered in tables of A-series are as follows:

Table A-I	Area, Houses and Population
Table A-II	Decadal Variation in Population since 1901
Table A-III	Villages classified by Population
Table A-IV	Towns and Urban Agglomerations classified by Population in 1971 with Variation since 1901

The A-series tables cover the information which was canvassed in the individual slips and the population record both of which were required to be filled in by the enumerator during 1971 Census. When this record was received in the tabulation offices it was subjected to a regorous scrutiny before it was accepted for inclusion in the tables presented here. The total number of slips canvassed and received in the tabulation offices amounted to 26.6 millions and they were divided among three Regional Tabulation Offices at Surat, Rajkot and Bhavnagar which were attending to the work of slips from rural areas and one Urban Tabulation Office at Ahmadabad which was attending to the work of slips from urban areas of the State.

We commenced our work with the sampling of 1% slips for both rural as well as urban areas. The intention was to give some indicators about the changing demographic pattern during 1971 Census before the entire bulk of slips were sorted and results published. Therafter we sorted the slips simultaneously for the urban and rural areas in different offices upto a certain stage. Therafter 20% sampling of the slips of the urban area was done and the data was transferred on punched cards which was ultimately fed to the magnetic tapes at the Zonal Computer Centre at Bombay, from which finally the State and National level tables would be generated at Registrar General's office, New Delhi. As far as rural slips are concerned, a 10% sampling was done at the same stage as the urban slips and the sampled slips were manually sorted at the three Regional Tabulation Offices described above. The figures so arrived at were inflated to 100% by following the estimation procedure prescribed by the Registrar General. The tables for the rural areas which have been manually prepared on sample basis here will be combined with the computarised tables of the urban areas when received from Registrar General's Office, to present a comprehensive picture of the State.

So far as the tables of A-series are concerned, they are all on full count, the slips for which have been manually sorted and tabulated. The Primary Census Abstract given towards the end of this volume determines the population for each administrative unit for which the data has been subsequently tabulated in tables of different series. The tables of the A-eries with which this volume is mainly concerned, are General Population Tables and includes information described above. Further particulars about each table and its appendices will be found in the flyleaves inserted before each.

The compilation and tabulation of the data in the above tables in the State Census Office has meant considerable amount of work after the slips were sorted and tabulated at the Regional Tabulation Offices. For example for the purpose of preparing Table A-I on Area, Houses and Population, we had to ascertain besides the population, the area in sq. km. and workout population per sq. km. etc., and divided the villages into inhabited and uninhabited. The number of occupied residential houses and the number households had also to be ascertained from the primary record namely the enumerator's abstract. Similar and varied exercises had to be done in respect of other tables and appendices in the course of which past census volumes from 1901 onwards had to be referred.

All the tables included in these series except Table A-III were built up in the Central Tabulation Unit of this office at Ahmadabad. TableA-III—Villages classified by population—was initially prepared at the Regional Tabulation Offices and was later scrutinised by Central Tabulation Unit of this office which was specially carved out for the purpose.

It is a matter of deep satisfaction that the compilation of this volume has been completed within a very short time after the taking of the census. Unfortunately its publication was long delayed after the compilation was completed because the agency for printing could not be finalised due to circumstances beyond our control.

I am deeply indebted to Shri A. Chandra Sekhar, IAS, Registrar General, India and Shri K. D. Ballal, IAS, Deputy Registrar General, India for the valuable instructions and guidance received from them in

the matter of preparation of these tables from time to time. I am also grateful to Shri K. K. Chakravorty, Central Tabulation Officer, for clearing the tables very early and making various suggestions to improve their usefulness. The accuracy of the data presented has been verified by the Central Tabulation Unit of the Registrar General's Office for which many thanks are due to it.

I would like to place on record my appreciation of the services rendered by Shri B. I. Patel, Tabulation Officer in charge of the Central Tabulation Unit (I) for shouldering the responsibility for the compilation of all the tables and the Primary Census Abstract except Table A-III which was checked under the guidance of Shri V. A. Dhagia, Tabulation Officer, Central Tabulation Unit (II) to whom similar thanks are due. They were ably assisted by S/Shri R. V. Sanghani, K. P. Patel and R. R. Upadhyay, all Statistical Assistants. Shri K. F. Patel, Dy. Director of Census Operations (HQ) with the backing of his experience of 1961 Census guided them properly in this task and prepared the flyleaves for which I am thankful to him also.

I am grateful to the Chief Controller of Printing and Stationery for having agreed to entrust the printing of this volume to the Government Central Press, Nasik. I have to sincerely thank Shri K. K. Chakravorty, Central Tabulation Officer, Registrar General's Office for using his good offices in the matter of entrusting this publication to the above press. But for the personal interest taken by him, this volume would not have seen the light of the day earlier than this as a serious bottleneck had developed in entrusting the printing work of 1971 Census, Gujarat to private presses.

Last but not the least, I shall be failing in my duties if I do not mention how grateful I am to the Deputy Directors in-charge of the Rural and Urban Tabulation Offices for having sorted and tabulated the data and prepared the Primrary Census Abstract in what can be considered to be the shortest possible time. My thanks are also due to a number of other persons due to whose efforts this publication has been possible, but whose names I am unable to individually mention for want of space.

AHMADABAD
5TH FEBRUARY, 1973

C. C. DOCTOR
Director of Census Operations, Gujarat.

INTRODUCTION

General

1. The 1971 Census is a pioneer in the introduction of sampling procedures to a considerable extent. It has been decided to give the Primary Census Abstract and data collected in individual slip in respect of questions on mother tongue, religion and Scheduled Castes and Scheduled Tribes and broad age-group on full count, and to give the data collected in respect of other questions of the individual slips on sample basis of 10 per cent slips of rural areas and 20 per cent slips of urban areas.

2. It has been decided to prepare a number of tables under the following series :

A—Series	General Population Tables (Full Count)
B—Series	Economic Tables (Table B-I-Part A and Table B-II on Full Counts; Others on Sample Basis).
C—Series	Social and Cultural Tables (Tables C-V, C-VII and C-VIII-Parts A and B on Full Count; Others on Sample Basis)
D—Series	Migration Tables (On Sample Basis)
E—Series	Establishment Tables (Full Count)
F—Series	Fertility Tables (On Sample Basis)
G—Series	Special Tables for Degree Holders and Technical Personnel (based on Degree Holder and Technical Personnel Cards)
H—Series	Housing Tables (On Sample Basis)

3. This volume contains the following tables of A Series and Primary Census Abstract on full count :

(1) Table A-I Area, Houses and Population
(2) Table A-II Decadal Variation in Population since 1901
(3) Table A-III Villages classified by Population
(4) Table A-IV Towns and Urban Agglomerations classified by Population in 1971 with Variation since 1901

4. A brief review of the preparatory measures taken and how the actual enumeration was done is given below :

I Preparatory Measures

Pre-testing of Census Schedules

5. The following census schedules have been canvassed at the 1971 Census :

(1) Houselist
(2) Establishment Schedule
(3) Individual Slip
(4) Population Record

6. Before these schedules were finally adopted, they were pretested twice. The first draft schedules were pre-tested by the State Census Offices in selected areas towards the end of 1967. The results of the pre-test were discussed at the conference of the Directors of Census Operations and the representatives of Central Statistical Organisation, National Sample Survey, Army Statistical Organisation, and Industrial Research and National Building Organisation.

7. A set of second draft schedules was then developed which were pre-tested during the first quarter of 1969. The results of second pre-test were discussed at the conference of the Directors of Census Operations and representatives of other organisations in May 1969.

8. The census schedules are reproduced at the end of this volume, as Appendices A,B,C, and D.

9. Brief details of each of the schedules are given below.

The Houselist

10. This schedule is intended to provide a complete list of all census houses and households in every village and town and also the approximate population to form the basis for the fixing of population census enumerator's block in such a way as to ensure complete coverage without omission or overlapping of the households. Since 1961 this Houselist has served as a kind of Housing Census Schedule. Particulars of the purposes for which census houses are used, the material of wall and roof of each census house, whether the census households live in owned or rented houses, the name of head of household and the number of members in each household are collected here. The houselist of 1971 by and large follows the pattern of the 1961 Census Houselist. The improvements are that in respect of vacant houses the reasons for vacancy are ascertained, for at the 1961 Census a number of dilapidated houses and sometimes even vacant sites were allotted house numbers and shown as vacant which gave a misleading impression that a large number of houses were vacant. If the head of a household belongs to a Scheduled Caste or Scheduled Tribe it is specially recorded.

The households engaged in cultivation are recorded as such so that the list may form a frame for any sample survey of agricultural households that a future agricultural census may attempt. In the 1961 Houselist some simple data on houses used as factories or workshops were collected. At the 1971 Census a separate schedule called the Establishment Schedule was canvassed along with Houselisting and its scope is much larger covering all establishments as explained in the paragraphs below.

The Establishment Schedule

11. This is a new schedule developed for the 1971 Census. It covers all Establishments including Manufacturing, Trade or Other establishments where people work. An Establishment is defined as a place where goods are produced or manufactured not solely for domestic consumption or where servicing and or repairing is done such as a factory, workshop or household industry or a place where educational, religious, social or entertainment services are rendered. It is necessary that in all these places one or more persons should be actually working.

12. The Establishment Schedule gathers particulars on whether the establishment is a government, quasi-government, private or cooperative institution, average number of persons working; if used as a manufacturing establishment, whether it is a household industry, registered factory or unregistered workshop, the description of products processed or servicing done, type of power used; if it is a trade establishment the description of goods bought or sold and whether retail or wholesale and if used as other establishment, its description such as an office, hotel, theatre, etc.

13. This schedule is designed to yield very useful data particularly in regard to the unorganised sector, classifying the establishments by the size of employment and the industrial or trade categories; correlating the power used and size of employment; indicating public or private or cooperative institutions by the size of employment. The Establishment Schedule will also serve as a very good frame for any type of future sample surveys. It may, however, be remembered that the Establishment Schedule covers only the establishments run within the same building which is listed and will not cover open air establishments or itinerant establishments with no regular building in which located.

The Individual Slip

14. This is the basic schedule of the 1971 Census. It was canvassed in respect of every individual irrespective of age and sex during the enumeration period. It contains 17 main questions as against 13 in the 1961 Census. These questions cover name, sex, age, marital status, fertility, relationship to head of household, birth place, place of last residence, scheduled caste or tribe, religion, mother tongue, other languages, literacy, education, main activity and secondary work.

15. The Individual Slip is a fairly comprehensive schedule which attempts to collect all essential demographic, social and economic characteristics of every individual that can possibly be collected at an operation of this naturer. Any attempt to collect more would be beyond the capacity of the census agency as it is constituted now. The concepts have been made as simple as possible and such as could be easily understood and applied by the census enumerator who is basically a primary school teacher. The census questions have been designed in such a way that they would not require deep probes.

New Features of the Individual Slip

16. The new features of the 1971 Census Individual Slip as compared to that of the 1961 counterpart are: (i) an attempt is made to collect data on current fertility, (ii) migrational particulars with reference to the place of last residence are collected which are expected to yield valuable and realistic data on internal migration and (iii) considerable departure is made in respect of the economic questions. The main activity of a person is ascertained according as he spends his time basically as a worker producing goods and services or as a non-worker. For regular work in Industry, Trade or Service the reference period is the week prior to the enumeration and for seasonal work such as agriculture the last one year. A person is categorised according to the main activity returned

by an individual. The secondary work, if any, of a worker is also recorded in question 17. Where a person who is basically a non-worker such as a student or housewife and does make some marginal contribution to productive activity, that secondary work is recorded in question 17. Experience of the 1961 Census had shown that census was not a proper agency to collect reliable data on unemployment as such. Therefore the 1971 Census does not ask a question on unemployment directly but the unemployed are expected to fall in the residuary category of non-workers and data in respect of them will be provided which has to be utilised subject to all its limitations.

The Population Record

17. In the Population Record, which is a separate schedule for each household, are entered certain basic particulars of all the members of each household copied out from the Individual Slips. The Population Record helps to give a good picture of the composition of the households and these schedules which will be maintained in convenient books for each administrative unit will serve as a good frame for future surveys.

18. At the 1961 Census, on the obverse of the Population Record then developed there was a Household Schedule in which certain particulars of the holdings and land rights of agricultural households were recorded as also details of the household industry. Since an agricultural census was proposed to be conducted by the government as recommended by the F. A. O. in the 1970s, it was felt wise not to attempt collection of any data on holdings, land rights, etc., at the population census lest it might give rise to any confusion on account of conflict of concepts and so on. The Household Schedule of 1961 Census was therefore not adopted for the 1971 Census.

Census Calendar

19. The Census Calendar adopted for Gujarat is given at the end of the volume as Appendix E.

Need for Maps

20. Maps showing the boundary of each administrative unit are necessary in order to ensure that not a single unit is missed or there is no overlapping. Such maps are also necessary for assigning location codes to the administrative units.

21. 184 taluka maps showing the boundaries of each village within a taluka were prepared on tracing paper. The changes in the jurisdiction such as amalgamation of villages, transfer of villages from one taluka to another, etc., were carried out in the maps prepared. These maps were finalised in consultation with the District Inspectors of Land Records.

Freezing of Territorial Boundaries

22. With a view to ensure complete coverage at the Census, it is necessary to freeze the boundaries of the administrative units at least a year in advance of the Census taking. The Government of India, Ministry of Home Affairs, therefore, requested the State Governments to carry out all proposals for changes of jurisdictions of administrative units before 1-1-70 and not to issue any orders pertaining to territorial changes from 1-1-70 to 30-6-71. The State Government issued orders accordingly in December 1969 freezing the boundaries of the administrative units. However, there were some cases, in which Government had issued orders effecting territorial changes. This was brought to the notice of Government. No changes were effected by Government thereafter.

Location Code Numbers

23. For the purposes of the census, it is customary to know the district, taluka and village/town by giving a definite code number to it. The object in doing so is to give complete detail of the place without the necessity of writing the name of district, taluka and village/town on every occasion. It would save labour, time and space. Location code is a device by which it is possible to recognise even the smallest administrative unit by a combination of numbers.

24. The location code numbers to districts are given beginning from the north-west corner, proceeding in a serpentine order towards the south-east corner.

25. While giving the location code numbers to talukas/mahals, the taluka/mahal in which the district headquarters is located is given number one. Thereafter, the taluka/mahal to its south is given No. 2 and then proceeding in a clock-wise direction, the remaining talukas/mahals are given consecutive numbers. All the 19 districts and 184 talukas/mahals are given location code numbers in this manner.

26. The location code numbers to villages are given in serpentine manner, beginning from the north-west corner and ending at the south-east corner.

27. All the urban areas in a district are given consecutive numbers beginning with Roman Figure I and proceeding further as II, III, IV, V, etc.

28. The location code numbers to districts, talukas/mahals and villages are given in Arabic numerals while the location code numbers to towns are given in Roman numerals.

House-numbering and House-listing

29. House-numbering and House-listing is done as a preliminary to the census taking.

30. The hall-mark of 1971 Census is the introduction of the Permanent House Numbering Scheme in the rural and urban areas of the State. A total number of 4,517,879 number plates have been affixed in rural areas and 314,434 are being affixed in urban areas at present. This was primarily done to help the indentification of the enumerator's block. But it will be extremely helpful for demarcating panchayat, municipal, assembly and parliamentary constituencies. It would help the local bodies in the recovery of taxes etc. It would facilitate research and study of socio-economic and demographic character, etc. for a frame would be readily available for any such project.

31. Before introducing the Permanent House Numbering Scheme in the State, the entire area was divided into the blocks of 125 to 150 houses in rural areas and 100 to 125 houses in urban areas. In order to facilitate the work of the enumerator we had prepared the notional maps in respect of each and every block of rural and urban area. On these maps the kutcha houses are depicted by a triangle and the pucca houses by a square. The non-residential houses are distinguished by drawing hatched lines within the triangle or square. The names of the streets are written on the maps and the boundaries of the block are shown distinctly We have today in the Census Office of Gujarat notional maps of all the eighteen thousand and odd villages and 210 urban areas of the State. They are neatly bound in a separate volume for each taluka. It is a proud possession of the Gujarat Census Office.

32. In rural areas Panchayat secretaries and primary school teachers were appointed as enumerators. Similarly for municipal areas and nagar panchayat areas, the employees of these local bodies were normally appointed as enumerators. Circle Inspectors, Gram Sevaks, Senior Clerks and Aval Karkuns were appointed as Supervisors. Normally one enumerator was given 5 blocks and one supervisor had to supervised the work of 5 enumerators.

33. The training for house-numbering and houselisting was imparted in six classes at various centres by the charge officers or their representatives.

34. The house-numbering and houselisting was carried out within a period of one and half months *i.e.* 1-2-70 to 15-3-70.

Building up the Hierarchy of Census Officers

35. Population Census is a Union subject and the Ministry of Home Affairs in the Government of India is looking after this subject. The office of Census Commissioner for India is attached to the Home Ministry. A senior officer of the Indian Administrative Service is generally chosen and appointed as the Census Commissioner. For each State and Union Territories an officer is appointed as Superintendent of Census Operations under the Census Act. He was designated during 1971 Census as Director of Census Operations and ex-officio Superintendent of Census Operations in each State. This officer is directly responsible to the Census Commissioner of India for organising and supervising the Census Operations within his area.

36. The census hierarchy in the State or Union Territories follows the normal administrative hierarchy. The State is already divided into Districts and for each district, the District Collector was designated as the District Census Officer who undertook the census duties in addition to his normal duties. The district is further sub-divided into sub-divisions and talukas/mahals. The responsibility for taking the census in the area comprising of a sub-division was cast on the Assistant/Deputy Collector and so far as the taluka/mahal was concerned, this responsibility was cast on the concerned Mamlatdar/Mahalkari. In the area of the municipal corporation, such responsibility was of the Municipal Commissioner or of the officer appointed by him on his behalf, and in the municipal areas it was of the Chief Officer or Secretary of the concerned municipality. Every Mamlatdar/Mahalkari of the taluka/mahal was designated as the Charge Officer in respect of his jurisdiction for the purpose of the census. On the same analogy, Chief Officers or Secretaries of Municipalities were known as Charge Officers of their respective areas. To give statutory recognition to this arrangement, the State Government issued necessary notification, in pursuance of sub-section (2) of Section 4 of the Census Act.

37. Besides these, there were certain special areas, *e.g.* Railway Colony, Irrigation Colony, Forest area, Military area, etc. in respect of which special arrangement for appointment of the officers of these departments as Charge Officers was made.

Census Enumerators and Supervisors

38. In rural area the charge was divided into blocks of 750 to 1000 persons and in urban areas into blocks of 600 to 750 persons. The blocks formed for the first stage *i.e.* Houselisting, were kept in tact. Wherever necessary

more than two blocks were clubbed together to form a new block for the second stage. Each block was put in charge of an enumerator who was responsible for recording particulars in respect of each individual in the individual slip provided for the purpose. For every five enumerators there was one supervisor. It was the duty of the supervisor to see that the particulars filled in by the enumerator was correct and he did not make any mistake in following any concept.

39. 39,671 persons were appointed as enumerators and 8,416 persons as supervisors. Additional 10 per cent were appointed as "reserve" enumerators and supervisors. The number of normal and special charge officers was 241 and 91 respectively. Thus nearly 50,000 persons participated in the census taking in Gujarat.

Printing of Census Schedules

40. The printed forms of Houselists and Establishment Schedules were supplied by the Registrar General, India, New Delhi.

41. The following census schedules were centrally printed at Government Central Press, Nasik:

(1) Individual Slip

(2) Population Record

42. The following census material was printed at State Government Press:

(1) Instructions to Enumerators for filling up Houselist and Establishment Schedule

(2) Instructions to Enumerators for filling up Individual Slip

(3) Enumerator's Daily Posting Statement for Males

(4) Enumerator's Daily Posting Statement for Females

(5) Enumerator's Abstract

Translation into Regional Language

43. The census schedules and instructions for filling up them were translated into Gujarati. The Direct Census Operations, Dy. Directors of Census Operations and Tabulation Officer sat together for a number of to finalise the translation of the census schedules and the instructions for filling up them. It was a trying experi to find adequate words in Gujarati language to convey the exact meaning of certain concepts and terms.

Training

44. It is very necessary to give proper training to the personnel appointed for census work.

45. During the first stage of census, the Director of Census Operations personally imparted training to all the district level officers, Assistant/Deputy Collectors, taluka level officers and Charge Officers of normal and special charges. The Charge Officers in turn imparted training to other trainees as well as to the supervisors and enumerators in six classes for filling up of Houselist and Establishment Schedule. The training was imparted from 15-11-69 to 31-1-70.

46. In the second stage of Census also the Director of Census Operations personally imparted training to all the district level officers, Assistant/Deputy Collectors, taluka level officers and Charge Officers of normal and special charges. The Dy. Directors of Census Operations remained present to supplement the training given by the Assistant/Deputy Collectors, taluka level officers and Charge Officers to other trainees as well as to enumerators and supervisors in respect of the districts allotted to them. The Charge Officers were authorised to give special training to the Training Assistant/Instructors who in turn gave training to the supervisors and enumerators in six classes.

47. As the reference date for taking of the Census had changed from 1-3-71 to 1-4-71 due to mid-term elections, one or two additional training classes were held at each training centre for refreshing the memory of the enumerators and supervisors.

48. The training was given from 1-9-70 and completed on 22-1-71.

Publicity

49. During the first stage of census, the publicity was organised at all India level through the Director of Advertising and Visual Publicity, Government of India who arranged for advertisements to appear in the local newspapers in English and Gujarati, to be selected by the Director of Census Operations for each region of the State.

50. During the second stage, the following publicity measures were taken :

(1) Advertisements in local newspapers in Gujarati and English

(2) Display of stickers and posters

(3) Distribution of folders on "Population Census—Why should we have one ?" in English and Gujarati
(4) Radio talks by leading persons
(5) Films
(6) Articles on census contributed by leading persons

II ENUMERATION

Reference Date

51. The reference date for the population census of 1971 was the sunrise of 1st April, 1971.

52. Originally it was fixed as the sunrise of 1st March, 1971 but due to mid-term polls, it was changed to 1st April, 1971.

Period of Enumeration

53. The period of enumeration was fixed from 10-3-71 to 31-3-71, with revisional round from 1-4-71 to 3-4-71.

Enumeration of Houseless Persons

54. The enumeration of houseless persons was done on the night of 31st March, 1971. In big cities, the houseless persons were collected at the nearest police chowkies where they were enumerated.

De-Facto and De-jure Enumeration

55. An important question pertaining to enumeration that is always raised at a population census is as to whether the population should be counted on "de facto" basis, *i.e.*, at the place where a person is actually found on the reference date of the census or on "de jure" basis, *i.e.*, count a person only according to the place of his normal residence.

54. The census of 1971 has been taken on de-jure basis. The following persons were considered eligible for enumeration in 1971 Census :

(i) All those who normally stayed and were present in the household during the entire period of enumeration *i.e.* 10th March to 31st March, 1971 (both days inclusive),
(ii) All those who were known to be normally residing, and has actually stayed during a part of the enumeration period (10-31 March) but were not present at the time of the enumerator's visit,
(iii) All those who were known to be normally residing and were not present at the time of enumerator's visit but were expected to return before 1st April, 1971, and
(iv) Visitors who were present in the household censused by the enumerator but had been away from the place (s) of their usual residence during the entire enumeration period. For the purpose of enumeration such visitors were treated as normal residents of the place (household) where they were actually found during the enumeration period provided they had not been enumerated elsewhere.

Intensive Supervision

57. One supervisor was put in charge of five enumertors on an average. Instructions were given to the supervisors to fix up a place and time for meeting their enumerators daily during the enumeration period to clear their doubts and difficulties. The supervisors were asked to supervise the work of the enumerators while the work was in progress and to see that nobody was left out of count or counted twice. The supervisors were also asked to check up the work of the enumerators every evening and to point out any difficiency or omission in enumeration, to the enumerator so as to avoid repetition of the mistakes. The check-points in detail were circulated among the supervisors.

58. Ten per cent of the total enumerators and supervisiors were appointed as reserve staff so as to meet with any emergency where any enumerator or supervisor could not attend to the work entrusted to him.

Relay of Provisional Population Figures

59. Census Circulars No. 20 and 20(A) prescribed the procedure regarding communication of provisional totals about population, literacy, scheduled castes, scheduled tribes and workers according to main activity by sex. The Charge Officers were asked to compile the above information from the Enumerator's Abstracts. They were requested to communicate the provisional population figures of their charges including those of special charges and military areas by the quickest possible means to the District Census Officer and the Director of Census Operations in a prescribed form. The use of police wireless grid was authorised wherever telegraph facilities did not exist. The District Census Officers were asked to consolidate the totals for the district and communicate the same to the Director of Census Operations, Ahmedabad by telegram or telephone and to the Registrar General, India, New Delhi by express telegram in the prescribed form on 6-4-71. The information received from the Charge Officers was consolidated in the office of the Director of Census Operations, and the provisional population figures for the State and for each district were communicated to the Registrar General, India on 8-4-71.

Release of Provisional Population Totals—Paper No. 1

60. On the basis of the information received from the Charge Officers, Paper No. 1 of 1971—Provisional Population Totals was issued by this office. It contained the following information :

(1) Population of States of India in 1961 and 1971, Decennial Growth Rate and Density of Population per sq. km.

(2) Distribution of Population, Sex Ratio, Growth Rate and Density of Population by Districts

(3) Decadal Variation in Population since 1901

(4) Population by Sex of Cities over 100,000 population in 1971 and Growth Rate of Population 1961-71

(5) Literacy in 1961 and 1971

61. Supplement to Paper 1 of 1971 was also issued by this office. It contained the following information:

(1) Rural and Urban Composition of Population in 1971, Percentage of Urban to Total Population in 1961 and Decennial Growth Rate 1961-71

(2) Population of Towns in 1971, Growth Rate 1951-61 and 1961-71, Sex Ratio in 1971 and Proportion of Population in each size class to Total Urban Population

(3) Distribution of Population by Workers and Non-workers

(4) Distribution of Working Population by Agricultural and Other Workers in 1961 and 1971

Collection of Filled up Census Schedules

62. The instructions were issued that the enumerators and supervisors should hand over the filled up census schedules to their normal Charge Officers on 4-4-71. The special charge officers were asked to hand over the census schedules to the normal charge officer of their areas on 4-4-71. Instructions were issued to bind the census material of one block in one bundle.

63. The normal charge officers were asked to send the records of their charge to the District Census Officer or to the Dy. Director of Census Operations at the Regional Tabulation Offices opened at Ahmedabad, Surat, Rajkot and Bhavnagar, as may be convenient.

64. Instructions were issued to pack the records for urban and rural areas separately in deal wood boxes.

Post-Enumeration Check

65. After the census enumeration was over the Post-Enumeration Check was conducted in selected blocks (1) to evaluate and identity the sources of coverage error of type (a) due to omission or duplication of individual resulting from omission and duplication of houses and type (b) due to omission or duplication of individual in census houses and (2) to evaluate the content error in respect of few selected items recorded in the individual slip.

66. In all 270 effective blocks were selected of which 170 were from rural, 60 from non-city urban and 40 from city areas.

67. For assessing the content error a sub-sample of 50 blocks from the above 270 blocks were selected.

Processing of Data

68. Though for the first time in the census history considerable part of the 1971 Census data has been processed on electronic computer, the manual sorting could not be altogether avoided. For the purpose of providing the primary census data and the data on mother tongue, religion and scheduled caste and scheduled tribe and broad age-groups the Individual Slips were processed manually during 1971 Census at the Regional Tabulation Offices as was being done at the previous census. The data pertaining to 20 per cent of the Urban Individual Slips was transferred on to punch cards and thence to magnetic tape and all the cross-tabulation for the urban data was generated by processing it on electronic computer. The cross-tabulation of the rural data has been derived from 10 per cent sample of the Individual Slips which were processed manually. The 10 per cent figures in respect of rural areas have been inflated to 100 per cent according to the methodology suggested by the Registrar General, India.

69. The tabulation of Houselist data was also processed on 20 per cent sample basis. The establishment schedules were processed on full count basis. The data relating to the housing and establishments has been processed on electronic computer.

Release of Final Population Figures

70. After the figures of Primary Census Abstract were finalised, the booklet entitled "Paper 1 of 1972—Final Population Totals" was published in June 1972. It contained Population, Scheduled Castes and Scheduled Tribes by sex for State/District/Taluka/Mahal/Urban Agglomeration/City/ Town.

A-I AREA, HOUSES AND POPULATION

Comparison with 1961

This table is similar to the one given in 1961 Census except that in 1971 the area for the administrative units has been given only in sq. kms. and not in sq. kms and sq. miles both as was done in 1961. In 1961, this table provided for two sets of area figures for "Total" in Union Table A-I, *viz.*, (i) figures given by Surveyor General and (ii) figures given by the State Survey Department. In 1971, the provisional figure of the total area of each district has been provided by the Surveyor General, India. The figures in respect of urban areas have been obtained from the local bodies concerned. The figures for rural areas have been derived by substracting the figure of urban area from the total area of the district. In 1961, the density was given per sq. mile. In 1971, the same has been given per sq. km.

Concepts and Definitions

The terms used in the table are explained as under :

Village :

A village has been defined under the Land Revenue Code as a place which includes a town or city and all the land belonging to a village, town or city. The same definition has been adopted for the purpose of this volume. This definition is very useful in so far as it enables us to determine exactly the limits of a unit about which we are referring. As all the villages, towns and cities in the State have been surveyed, there is no difficulty in establishing the identity of any.

Urban Areas :

(i) All places where there is a municipal corporation or a municipality or a town committee or a notified area or a cantonment board are treated as urban areas.

(ii) Other places have been treated as urban only if the following conditions are fulfilled :

(a) the estimated population at 1971 Census should be at least 5,000 persons;

(b) the density of population per square kilometre should not be below 400;

(c) 75 per cent of the male working population should follow non-agricultural pursuits; and

(d) in the opinion of the Director of Census Operations any other place where urban characteristics are found.

Urban areas with a population of 100,000 or more have been treated as cities, while the remaining urban areas have been treated as towns. Even some Gram and Nagar Panchayat areas which fulfilled the above conditions have been treated as urban areas.

Occupied Residential House :

Occupied residential house is a Census House used as dwelling. It also includes shop-*cum*-dwelling and workshop-*cum*-dwelling.

Household :

Household is a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Rural and Urban Classification

Traditionally, census data are presented by rural and urban areas. In all Censuses throughout the world this dichotomy of rural and urban areas is recognised and the data is generally presented for the rural and urban areas separately. In the rural areas the smallest area of habitation, namely, the village follows the limits of revenue village that is recognised by the normal district administration. The revenue village need not necessarily be a single agglomeration of the habitations. But the revenue village has a definite survey boundary and each village is a separate administrative unit. It may have one or more hamlets. The entire revenue village is one unit. There may be unsurveyed villages within forests, etc.

Against 181 places treated as urban areas in 1961, 216 have qualified to be treated as urban in 1971 Census. Certain areas treated as urban in 1961 were declassified in 1971 as they did not fulfil the conditions prescribed. Some new places which fulfilled the conditions were, however, added. There were no changes necessitated in size class I and II. Such changes were limited to size class III, IV, V and VI. The details of urban areas of class IV, V and VI of 1961 declassified in 1971 with population of 1961 and 1971 as also new urban areas of class III, IV, V and VI listed in 1971 with their names and population in 1971 are given in Statements A and B below.

STATEMENT A

Urban areas of class IV, V and VI of 1961 declassified in 1971 with population of 1961 and 1971

State/District	Class	Name and number of towns	Population	
			1961	1971
1	2	3	4	5
Total for State		**11**	**78,910**	**90,676**
	IV	**1**	**12,318**	**15,576**
	V	**8**	**57,479**	**64,470**
	VI	**2**	**9,113**	**10,630**
Total	**Class IV**	**1**	**12,318**	**15,576**
Rajkot		(1) Bhayavadar	**12,318**	**15,576**
Total	**Class V**	**8**	**57,479**	**64,470**
Rajkot		(1) Maliya	5,830	7,453
		(2) Jamkandorna	5,030	6,674
Surendranagar		(3) Muli	7,537	8,435
		(4) Chuda	8,150	8,988
Amreli		(5) Chital	7,583	7,080
Mahesana		(6) Dhinoj	7,580	8,964
Kheda		(7) Dharmaj	8,718	9,208
		(8) Bhadran	7,051	7,668
Total	**Class VI**	**2**	**9,113**	**10,630**
Rajkot		(1) Vasavad	4,836	5,549
		(2) Lilia	4,277	5,081

Gorwa Town has been amalgamated with Vadodara Municipal Corporation limit and Rander Town with Surat Municipal Corporation limit during 1971 Census.

STATEMENT B

New Urban areas of class III, IV, V and VI listed in 1971 with their names and population in 1971

State/District	Class	Name and number of towns	Population	State/District	Class	Name and number of towns	Population
1	2	3	4	1	2	3	4
Total for State		**49**	**458,086**	**Total**	**Class III**	**4**	**115,364**
	III	**4**	**115,364**	Gandhinagar		Gandhinagar	24,055

Ahmadabad		(1) Hansol	4,107
Valsad		(2) Atul	4,494
		(3) Udwada	4,129

The population of the eleven places which were treated as urban in 1961 and which are declassified in 1971, was 78,910 in 1961. The population of 49 new urban areas added in 1971 comes to 458,086.

Discrepancy between area figures given in P.C.A. and Table A-I

As the method adopted for rounding area figures of less than one Km². in the Primary Census Abstract was different from the method adopted here, there is a very slight difference between the two figures at some places, particulars of which are given below.

District/Taluka	Rural Urban	Area figures given in P.C.A.	Area figures given in Table A-I (in Km.²)
1	2	3	4
GUJARAT STATE	**R**	**191,369.5**	**191,369.1**
	U	**4,614.5**	**4,614.9**

N.A.=Not Available

Note :—The figures for Valsad District are included in Surat District for the years 1901—1941 as separate figures for Valsad District for these years are not available.

The entire area of the present State of Gujarat was not divided into regular districts in the past. There were several Princely States and Agency areas which were known by some local name. After independence and the merger of States, regular districts were carved out for the first time so as to cover the entire area of the State. The number of villages for the year 1901-1941 shown in the above statement has been arrived at by working out the area now falling within a particular district, to the area of a Princely State, Agency area or Thana as the case may be. The villages falling under the title "Rest of the Agency" includes areas for which full particulars are not available in the old Census records, where they have been included under this heading.

It would be seen from the above table that the lowest number of inhabited villages was recorded in 1911 at 17,598, while the highest number was reported at 1951 Census with 18,724 villages. In 1901 the number of inhabited villages was 17,919 while in 1971 the number of such villages is 18,275. The maximum number of such villages is, however, recorded in Panch Mahals district at 1,903 followed by Vadodara with 1,677. The lowest number of such villages is, however, reported from Gandhinagar district where the number of inhabited villages is only 75.

In Table A-I, 18,275 villages are shown as inhabited and 422 villages are shown as uninhabited. In addition, the following 9 villages which were included in the rural areas in the first stage of Census have been agglomerated with the urban areas shown against them in the second stage of Census :

District	Taluka	Village	L.C. No. in rural series	Name of Urban areas with which agglomerated
1	2	3	4	5
Sabar Kantha	Idar	Jawanpura	105	Idar
Ahmadabad	Ahmadabad City	Asarwa	4	Ahmadabad
		Rakhiyal	7	
		Rajpur-Hirpur	8	
		Bagfardos	15	
		Khokhara Mehmedabad	16	
Valsad	Valsad	Bhagda Khurd	35	Valsad
		Pardi Sondhpur	47	
		Mogarwadi	48	

Village Motipura (L.C. No. 106 of Himatnagar Taluka of Sabar Kantha district) has been included in Himatnagar Town.

The following two villages which were treated as rural in the first stage of Census have been treated as urban in second stage.

District	Taluka	Village	L.C. No. in rural series	L.C. No. in urban series
1	2	3	4	5
Ahmadabad	Ahmadabad City	Danilimda	14	12/XXII
Surat	Songadh	Ukai	23	17/XI

The above twelve villages have not been counted as 'villages' in 'A' Series tables.

The following statement give districtwise particulars of total number of villages borne on the jurisdictional lists and its break-up into inhabited and uninhabited. The number of urban areas are shown separately in the last column.

Number of Villages and Towns in the State, 1971

Sl. No.	State/District	Total No. of village borne on the jurisdiction lists	Number of inhabited villages	Number of uninhabited villages	Nuamber of towns

Sex, Density etc.

The following statement gives persons per occupied census house, number of females per 1,000 males, percentage of rural and urban population to total population and density per sq. km.

The average number of persons per occupied census house in the State as a whole is 5·86. The average for the rural is 5·97 and that for the urban areas is 5·58. The average number of persons per occupied census house is the highest in Rajkot district where it is recorded at 6·37 and is followed by Jamnagar and Junagadh at 6·30 each. The lowest number of persons per occupied census house has been recorded in Gandhinagar at 5·05 and is followed by Kutch at 5·15. The highest number of persons per occupied census house in the rural areas is found in Rajkot where it is 6·63 and is followed by Jamnagar at 6·53 and Junagadh at 6·52. The lowest number of persons per occupied census house is reported from Kutch where it is 5·15 and is followed by Gandhinagar at 5·18. The highest number of persons per occupied census house in the urban areas is found in Amreli district where it is 6·01. The lowest number of persons per occupied census house in the urban areas is reported from Gandhinagar, where it is 4·28 and is followed by Banas Kantha at 5·05 and Kutch and Mahesana both at 5·14.

The sex ratio means the number of females per 1,000 males. This ratio is 934 for the State as a whole and 951 for the rural areas and 893 for the urban areas. The highest sex ratio is reported from Kutch district where it is 1,012. This is mainly due to the fact that the male members from this district always go outside Kutch alone in search of work. The lowest sex ratio is reported from Ahmadabad district where it is 866. A slightly higher sex ratio is recorded in Kheda district where it is 894. As regards rural areas also the highest sex ratio is noticed in Kutch district where it is 1,037 and the lowest sex ratio is noticed in Kheda district where it is 896. As regards urban areas also the highest sex ratio is found in the district of Kutch where it is 944 and is followed by Banas Kantha at 940 and Amreli and Rajkot, the ratio at each of which is 939. Ahmadabad district is showing sex ratio at 838 which is the lowest among the urban areas of the districts.

The percentage of population living in the rural areas of the district is the highest in Sabar Kantha where it is 91·25 and only 8·75 per cent of the population is living in urban areas. The highest percentage of urban population is reported from Ahmadabad district where 66·86 per cent of the population lives in urban areas and only 33·14 per cent of the population lives in rural areas.

The density for the State as a whole is 136 persons per sq. km. It is the highest in Kheda district, where it is 341 followed by Ahmadabad with 334. The lowest density is recorded in Kutch district with only 19 persons per sq. km. So far as the rural areas of the districts are concerned, the highest density is recorded in Gandhinagar district where it is 298 followed by Kheda at 286. The lowest density in the rural areas is reported from Kutch district where it is only 14. For the urban areas of the districts, the highest density is reported from Surat district where it is 4,618 followed by Ahmadabad where it is 4,327. The lowest density is reported from Gandhinagar district where it is 424.

It will be seen from Table A-I that in some units the figures of occupied residential houses shown in Col. No. 8 are more than the figures of households shown in Col. No. 9 of the table. Normally the total number of houses should not exceed the total number of households in a unit. However, it was found during the scrutiny of the Population Records that there were several units in which the total number of houses exceeded the total number of households. This could possibly happen if one household is using more than one house.

Persons per occupied census house, number of females per 1,000 males, percentage of rural and urban population to total population and density per Km². 1971

State/District	Persons per occupied census house			No. of females per 1,000 males			Percentage of rural and urban population to total population			Density per Km².

NOTE: (i) † These represent provisional "geographical area" figures supplied by the Surveyor General. Figures for urban area are those supplied by the local bodies. Area figures for rural area are derived by substracting the urban area from the total area of the district.

(ii) The *density* figures (Persons per Km.²) shown under Col. 4 for urban area of State/Districts are worked out using the area figures corrected upto two places of decimals obtained by adding the area of individual town in the respective unit and not using the area figures given in the table upto one place of decimal. For 'Total' and 'Rural' the density is worked out on area figures corrected upto one place of decimal, as given in the table.

(iii) In case of a few urban units which are appearing as constituent units of Urban Agglomerations i.e. O.G. area figures are not available separately and are included in the rural area.

NOTE :

(i) Towns treated as such for the first time in 1961 Census which continue as towns for 1971 Census are shown with asterisk (*) on their left.

(ii) Towns treated as such for the first time in 1971 Census are printed in italics.

(iii)† These figures represent provisional "Geographical Area" figures supplied by the Surveyor General. Figures for urban areas are those supplied by the local bodies. Area figures for rural area are derived by substracting the urban area from the total area of the district. The total of the area figures of talukas/mahals will not tally with the district figures because the former represents 'Land use area' and are derived from the figures supplied by the Director of Land Records.

(iv) The density figures (Persons per Km.² shown under Col. 4 for urban area of State/District/Taluka/Mahal are worked out using the area figures corrected upto two places of decimals obtained by adding the area of individual town in the respective units and not using the area figures given in the table. For "Total" and "Rural" the density is worked out on area figures corrected upto one place of decimal.

(v) In case of a few urban units which are appearing as constituent units of Urban Agglomerations i. e. O. G. area figures are not available separately and are included in the rural area. The urban density in such cases has been worked out only for those units for which the area figures are available. In other cases N. A. has been shown in Cols. 3 and 4 of the table.

(vi) The following abbreviations have been used in this table to describe the civic status of the towns :

U. A. = Urban Agglomeration
M. Corp. = Municipal Corporation
M = Municipality
N.A.C. = Notified Area Committee
Cantt. = Cantonment
N.P. = Nagar Panchayat
V.P. = Village Panchayat
N.M. = Non Municipal
O.G. = Out Growth

(*ii*) M. Corp. stands for Municipal Corporation.

A–II VARIATION IN POPULATION DURING LAST 70 YEARS

Table A–II of 1971 Census is the same as at 1961 Census with the only difference that the variations here have been given for the last 70 years instead of 60 years as was done in 1961. The table ensures comparability with the corresponding table of 1961. It will be helpful in estimating the trends and growth of population in different districts.

Adjustment of Population from 1901 to 1961

The districts which have been affected by the territorial changes during the period of last decade were subjected to detailed examination for arriving at population according to their boundaries in 1971. During this decade also some villages were transferred from one district to another as usual. The population figures of each village according to 1951 and 1961 Censuses are available in the respective District Census Hand Book. The population of each district according to the jurisdiction of 1971 Census has been worked out and given separately for both the Censuses. The villagewise population figures for the previous censuses from 1901 to 1941 are, however, not available. They have, therefore, been worked out in accordance with the formula prescribed by the Registrar General. The break-up of the population into males and females was determined on the basis of male and female distribution of population in a particular district in which relevant territorial unit was situated at the time of transfer. The figures thus arrived at have been given in Table A–II.

Annexure A illustrates for one district the method of estimation for the population for the various censuses from 1901 to 1941 adjusted to its present territorial limits.

Changes in Territories and Population between 1961 and 1971

During the last decade inter-district changes have taken place in six districts, while in seven other districts territorial changes have occured from one taluka to another within the district. The remaining six districts have not been affected. In fact, in 1961 there were only 17 districts in the State of Gujarat. Two more districts, *viz.*, Valsad and Gandhinagar have since been added. The district of Valsad has been formed by bifurcating Surat district into two and Gandhinagar district has been formed by transferring some villages from Ahmadabad and Mahesana districts. The population of the State as returned by the Census of 1971 is 26,697,475 persons as against 20,633,350 Persons during 1961. This gives a net increase of 6,064,125 persons during the decade. Net gains or losses in 1961 population of the following districts on the basis of jurisdiction of 1971 are as under :

District	Increase(+)	District	Decrease(−)
Ahmadabad	+155	Surendranagar	—155
Gandhinagar	+137,063	Mahesana	—56,981
Valsad	+1,137,801	Ahmadabad	—80,082
		Surat	—1,137,801

Both Valsad and Gandhinagar districts have been created by transferring some villages of Surat, Ahmadabad and Mahesana districts. These two districts cannot strictly be construed as having gained any net increase because they have been new creations. However, the creation of Valsad district has resulted in the net reduction of corresponding population of Surat district. Similarly the creation of Gandhinagar district has resulted in the net reduction of corresponding population of Ahmadabad and Mahesana districts.

Percentage Variation of Population, 1901-1971

The following statement shows the percentage variation of population of the State and the districts from 1901 and 1971.

Percentage Variation of Population 1901—1971

During the last 70 years from 1901 to 1971, the population of Gujarat State has become nearly three times having risen from 9,094,748 in 1901 to 26,697,475 in 1971. The percentage variation during the period of last 70 years is 193·55 per cent increase, while the urban population of the State has increased by 296·46 per cent over that obtaining in 1901; the corresponding increase in the rural population is 166·54 per cent. There has been a steady increase in the migration of population from rural to urban areas due to various reasons of which the main has always been search of employment opportunities. The highest increase during the last 70 years has been registered in the small tribal and entirely rural district of the Dangs where it has been 413·75 per cent. Next in order of merit come the districts of Ahmadabad and Panch Mahals where the total increase during the said period has been 302·97 per cent and 302·41 per cent respectively. Sabar Kantha district has shown an increase of 260·04 per cent. The lowest percentage increase is recorded in Kutch district where it is only 74·13 per cent. This has happened mainly due to the fact that people of this district have migrated to other parts of the country in search of work. In Panch Mahals district the increase of population during the last 70 years in the rural areas has been found to be 307·61 per cent followed by Sabar Kantha where it is 256·32 per cent and Junagadh where it is 237·83 per cent. It is noteworthy that the rural areas of the districts which have registered very high increase in population are the tribal districts of the Dangs, Panch Mahals and Sabar Kantha. The highest increase in the urban areas of the districts is recorded in Ahmadabad district where the percentage increase is 668·16 followed by Rajkot where it is 360·54 per cent, Jamnagar 345·12 per cent and Vadodara 326·13. Surat district has recorded an increase of 288·44 per cent in the urban areas during the past 70 years. These are districts in which big cities with the population of more than a lakh are located. These large cities have expanded out of proportion to other urban areas because of their large employment potential. The lowest increase in the urban areas is reported in the Kutch district at 129·05 per cent.

The percentage increase in population during the last decade for the State is 29·39. The total percentage increase is the highest for Gandhinagar district which is 46·39, followed by Ahmadabad 36·62, Surat 36·01, Rajkot 34·39 and Jamnagar 34·15. The lowest increase in population is reported from Kutch district where it is 22·02 per cent. The percentage increase in the rural areas during the decade is 24·72 for the State. The highest increase in the rural areas is recorded in Jamnagar district where it is 34·44 per cent followed by Junagadh where it is 30·97 percent, the Dangs 31·60 per cent and Rajkot 30·22 per cent. The lowest increase among rural areas is reported from Kutch district where it is 13·17 per cent

only during the decade 1961-71. The percentage increase during the last decade for the urban areas of the State is 43.13. The highest percentage increase among urban areas is reported from Sabar Kantha district where it is 69·85 per cent followed by Banas Kantha 69·26 per cent, Surat 67·15 per cent and Kutch 58·81 per cent. The lowest increase in the urban areas is reported in the Bhavnagar district where it is 27·58 per cent followed by Amreli where it is only 29·10 per cent.

Changes in Sex Ratio. 1901-1971

The following statement gives the changes in the proportion of sex ratio from 1901 to 1971.

Sex ratio means number of females per 1,000 males. The sex ratio for Gujarat State in 1961 was 940. In 1971, it is reduced to 934. The sex ratio for rural areas is 951, while for urban areas it is only 893. The highest sex ratio is recorded in Kutch district where it is 1,012. The lowest sex ratio is reported from Ahmadabad district where it is 866. The sex ratio of Ahmadabad district as a whole is influenced by the ratio of the urban areas of the district which is 838. The highly urbanised character of this metropolitan city attracts the male members to come to work leaving their families behind which explains the preponderence of males over females here.

A review of the position of the last 70 years will reveal that the highest sex ratio was recorded in 1901 when it was 954. The second high was recorded in 1951 when it was 952. The lowest was, however, recorded during the Census of 1971 when it was reduced to 934. The variation during the last 70 years is, however, only twenty. From the figures of the rural areas of the State it will be noticed that the highest sex ratio was found in 1961 when it was 956 and the lowest was recorded in 1911 when it was 942. This shows a reduction of only 14 females per 1,000 males in 50 years. The present ratio for the rural areas is 951 only. The sex ratio for the urban areas was recorded the highest in 1901 when it was 968. The lowest has been recorded in 1971 when it is ony 893.

ANNEXURE A

Method of Estimation of Previous Census Population for Transferred Territories

District	Population of 1901	1911	1921	1931	1941	1951	Remarks
1	2	3	4	5	6	7	8

M. 1289 M/TLC 1064- L dated 27-11-64, Indroda (1424—08), Dhola-Kuva (541—22), Adiwada (899—30), Borij (2317—31), Kelwada (4446—10), Vavol (4200—17), Sargasan (1806—34) Pethapur (14189—02), Vasna Hadmatia (167—28), Sardhav (2869—02), Sonipur (819—00), Jalund (1346—20), Titoda (2449—16), Adraj-Moti (2904—16), Rupal (4257—10), Randheja (3506—05), Vasan (1987—24), Unau (3477—22), Pindharada (1473—02), Pipalaj (2886—26), Kundasan (1807—19), Randesan (861—10), Shertha (3108—33), Bhoyan-Rathod (1862—12), Pundrasan (634—15) Villages of Kalol Taluka of Mahesana District were transferred to Gandhinagar District newly constituted.

APPENDIX—*Contd.*

††Under Gujarat Government, Revenue and Agriculture Department, Order No. G. H. M. 1289 M/TLC 1064-L dated 27-11-64, Gandhinagar District was newly constituted of:

(a) Indroda (1424—08), Dhola-Kuva (541—22), Adiwada (899—30), Borij (2317—31), Kolwada (4446—10), Vavol (4200—17), Sargasan (1806—34), Pethapur (14189—02), Vasna Hadmatia (167—28), Sardhav (2869—02), Sonipur (819—00), Jalund (1346—20), Titoda (2449—16), Adraj-Moti (2904—16), Rupal (4257—10) Randheja (3506—05), Vasan (1987—24), Unau (3477—22), Pindharada (1473—02), Pipalaj (2886—26), Kundasan (1607—19), Randesan (861—10), Shertha (3108—33), Bhoyan-Rathod (1862—12), Pundrasan (634—15), villages of Kalol Taluka of Mahesana District.

(b) Village Motera (1269—32) of City Taluka of Ahmadabad District.

(c) Rayapur (1557—17), Medra (1162—27), Valad (3939—31), Rayasan (876—14), Koha (1871—08), Karai (1229—25), Limbadia (869—32), Ranasan (716—35), Chiloda (1237—33), Bhatt (1717—10), Nabhoi (719—10), Pore (1450—36), Budthal (1357—30), Sugad (1056—06), Amiyapur (487—26), Koteshwar (732—36), Chandkheda (2589—21), Jundal (1652—37), Khoraj (1885—13), Adalaj (4426—13), Tarapur (875—01), Unvarsad (4267—24), Jamiyatpur (913—37), Dantali (987—05), villages of Daskroi Taluka of Ahmadabad District.

(d) Lekawada (1876-31), Palaj (3659-30), Basan (1005-09), Shahpur (2091-10), Rajpur (645-06), Chekhlarani (805-00), Vasna-Dolarana (2657—19), Bhundia (954—31), Alampur (917—12), Dashela (2880—16), Dhanap (2518—15), Giyod (2138—06), Chhala (5359—20), Jakhora (1479—03), Shiholi Moti (1754-13), Chiloda (1438-26), Mahudra (2108—34), Mota Isanpur (3175—21), Magodi (3350—13), Dabhoda (5701—27), Lavarpur (1065—11),, Prantiya (1198—04), Vadodara (3150—28) Vankanerda (1183—13), Galudan (1765—27), Sonarda (1809—07), Vira Talavdi (638—19), Pirojpur (1463—39), Ratanpur (1288—39), villages of Dehgam Taluka of Ahmadabad District.

‡Under Gujarat Government, Revenue and Agriculture Department, Order No. G. H. M. 1289 M/TLC 1064-L dated 27-11-64,

(a) Village Motera (1269—32) of City Taluka of Ahmadabad District was transferred to Gandhinagar District newly constituted.

(b) Rayapur (1557—17), Medra (1162—27), Valad (3939—31), Rayasan (876—14), Koha (1871-08), Karai (1229—25), Limbadia (869—32), Ranasan (716—35), Chiloda (1237—33), Bhatt (1717—10), Nabhoi (719—10), Pore (1450—36), Budthal, (1357—30), Sugad (1056—06), Amiyapur (487—26), Koteshwar (732—36), Chandkheda (2589—21), Jundal (1652—37), Khoraj (1885—13), Adalaj (4426—13), Tarapur (875—01), Unvarsad (4267—24), Jamiyatpur (913—37), Dantali (987—05) villages of Daskroi Taluka of Ahmadabad District were transferred to Gandhinagar District newly constituted.

(c) Lekawada (1876—31), Palaj (3659—30), Basan (1005—09), Shahpur (2091—10), Rajpur (645—06), Chekhlarani (805—00), Vasna-Dolarana (2657—19), Bhundia (954—31), Alampur (917—12), Dashela (2880—16), Dhanap (2518—15), Giyod (2138—06), Chhala (5359—20), Jakhora (1479—03), Shiholi Moti (1754—13), Chiloda (1438—26), Mahudra (2108—34), Mota Isan pur (3175—21), Magodi (3350—13), Dabhoda (5701—27), Lavarpur (1065—11), Prantiya (1198—04), Vadodra (3150—28), Vankanerda (1183—13), Galudan (1765—27), Sonarda (1809—07), Vira Talavdi (638—19), Pirojpur (1463—39), Ratanpur (1288—39), villages of Dehgam Taluka of Ahmadabad District were transferred to Gandhinagar District newly constituted.

‡‡ Under Gujarat Government, Revenue and Agriculture Department, Resolution No. TLC 1054—L dated 12th May, 1964 Surat District was divided into two new districts *viz.* (1) Surat District and (2) Valsad District.

The newly constituted Surat District consisted of the following Talukas/Mahals:

1. Chorasi Taluka (141,929—09), 2. Olpad Taluka (161,363—30), 3. Kamrej Taluka (93,814—31), 4. Mangrol Taluka (246,519—12,) 5. Mandvi Taluka (176,764—36), 6. Songadh Taluka (284,872—30), 7. Uchchhal Taluka (139,854—23), 8. Nizar Taluka (97201—07), 9. Vyara Taluka (201,990—19), 10. Valod Mahal (49,953—14), 11. Bardoli Taluka (93,666—00), 12. Mahuva Taluka (85,546—22), 13. Palsana Mahal (49549—03).

§ Under Gujarat Government, Revenue and Agriculture Department, Resolution No. TLC 1054-L dated 12th May, 1964 Surat District was divided into two new districts *viz.* (1) Surat District and (2) Valsad District.

The newly constituted Valsad District consisted of the following Talukas/Mahals :

1. Navsari Taluka (182,512—06), 2. Bansda Taluka (147,042—00), 3. Chikhli Taluka (139,487—09), 4. Valsad Taluka (126,680—38), 5. Dharampur Taluka (408,668—17), 6. Pardi Taluka (110,325—12), 7. Umbergaon Taluka (91,706—19), 8. Gandevi Mahal, (91,088—17).

NOTE : Figures in Brackets show area in Acres and Gunthas.

A-III VILLAGES CLASSIFIED BY POPULATION

This table gives for the State and each district the total number of inhabited villages and the total rural population by sex. It also classifies all inhabited villages into three broad size classes. The first two size classes are further sub-divided into four and two sub-groups each, while the third size class remains as it is. The particulars of population for the following group in each size class are also given.

Size class	*Broad Group*	*Sub-group*
I	Less than 2,000	(i) Less than 200
		(ii) 200—499
		(iii) 500—999
		(iv) 1,000—1,999
II	2,000—4,999	(v) 2,000—4,999
		(vi) 5,000—9,999
III	10,000 and above	(vii) 10,000 and above

The following table gives the percentage of the population living in villages of various population sizes with reference to the total rural population in each district.

Percentages of population living in villages of various population sizes with reference to the total rural population in each district, 1971

State/District	Less than 200	200—499	500—999	1,000—1,999	2,000—4,999	5,000—9,999	10,000+

Sabar Kantha	2.33	14.91	25.50	29.34	23.22	3.78	0.92
Mahesana	0.24	3.33	12.01	29.06	40.14	14.59	0.63
Gandhinagar	0.07	0.69	4 23	24.13	36.57	34.31	..
Ahmadabad	0.27	3.32	14.65	32.34	41.07	8.34	..
Kheda	0.25	1.61	7.27	21.86	41.46	21.64	5.91
Panch Mahals	2.21	11.44	21.66	33.95	24.95	5.00	0.79
Vadodara	2.10	13.09	25.28	27.77	24.26	5.92	1.58
Bharuch	2.07	13.62	27.43	29.10	22.54	5.24	..
Surat	1.32	8.79	23.87	32.68	25.19	7.25	0.90
Valsad	0.61	3.45	14.13	33.87	37.15	10.79	..
The Dangs	15.39	57.37	15.99	2.17	3.32	5.76	..

It will be seen from the above table that over 81 per cent of the population of the State lives in villages having population between 500 to 4,999 persons. The percentage of population living in villages below 500 is 9·12 per cent of the rural population of the State. Villages of the smallest size i.e. less than 200 accommodate 1·23 per cent of the rural population. Among the districts, the small tribal district of the Dangs inhabits 15·39 per cent of its population in villages with a population of less than 200 persons. In the remaining districts the population in the villages of this group varies from 0·07 per cent to 4·14 per cent. It is noteworthy that 57·37 per cent of the population of the Dangs district resides in villages of 200-499 size. This means that 72·76 per cent of the total population of the Dangs district resides in villages with population less than 500. An entirely different picture obtains in Kheda district where 21·86 per cent of population lives in villages with population between 1,000-1,999. The villages in size class 2,000-4,999 carry population of 41·46 per cent and villages in 5,000-9,999 size carry the population of 21·64 per cent. Mahesana is another district where maximum population is recorded in the villages varying in size from 1,000-4,999.

Appendix to Table A-III gives sub-totals of the following groups of villages at district level :—

(i) 0—499

(ii) 500—1,999

(iii) 2,000—4,999

(iv) 5,000 and above

By regrouping of the seven categories of villages as given in Table A-III into four as given in the Appendix the distribution of population among them is revealed as under :—

Group	*Population (Per cent)*
Under 500 (Small)	9·12
500—1,999 (Medium)	51·48
2,000—4,999 (Large)	29·94
5,000 and above (Very Large)	9·46

It would be seen from the above that more than half the rural population of the State is living in medium size villages (500-1,999). The large size villages (2,000—4,999) accommodate 29·94 per cent of the rural population of the State. Both together account for 81·42 per cent of the rural population. Population covered by small size as well as over size villages is 9·12 per cent and 9·46 per cent respectively.

The following statement gives the percentage of number of villages and population by size class of villages for Censuses of 1901, 1921, 1951, 1961 and 1971.

NOTE : The figures for Valsad District are included in Surat District for the year 1901, as separate figures for Valsad District for that year are no available.

*Figures of Ahmadabad District in 1901 are according to jurisdiction at the time of 1961 Census.

Table A-III of 1951 gave combined figures of towns and inhabited villages classified according to size of population. Table A-III of 1961 gave figures of villages classified by population only. Table A-III of 1951 has been recast by deducting the urban population from the respective classes and adjusted to rural population according to jurisdiction prevailing at the 1971 Census. After taking into consideration the inter-district transfers between 1961 and 1971 the population and villages of 1961 have been adjusted to the jurisdiction prevailing in 1971. The above procedure of arriving at rural population by deducting the urban from the total population was also followed in 1901. It has not been possible to compile the figures for 1921, as Table A-III here does not give separate figures for the constituent units of the existing districts.

The following statement gives the percentage of population and percentage of villages for the years 1901 and 1971 for four broad size classes of villages :

Class		Per cent of population		Per cent of villages	
		1901	1971	1901	1971
I	Below 500	35·65	9·12	76·19	35·05
II	500 to 1,999	49·60	19·78	21·75	52·75
III	2,000 to 4,999	14·50	61·64	2·04	10·75
IV	5,000 and over	0·25	9·46	0·02	1·45

It would be seen from the above that 76·19 per cent of the villages were in the lowest size class of population i.e., below 500 in 1901. This percentage is reduced to 35·05 in 1971. This indicates that the number of small villages is on the decline. This size class of villages which accommodated 35·65 per cent of rural population of the State in 1901, are now accommodating 9·12 per cent of the same population.

In the case of medium size villages (500-1,999) the increase of percentage is very high as it has risen from 21·75 per cent in 1901 to 52.75 per cent in 1971. This size class of villages cover nearly $\frac{1}{5}$th the population of the State in 1971, though they covered slightly less than $\frac{1}{4}$ the rural population of the State in 1901.

Large size villages (2,000-4,999) constituted only 2·04 per cent of the total number of villages in 1901. In 1971 they have risen to 10·75 per cent. The population covered by this size class of villages is, however, the highest in 1971 being 61·64 per cent of the rural population of the State as against 14·50 per cent in 1901.

The population covered by very large size villages (5,000 and above) is as large as 9·46 per cent in 1971 against 0·25 per cent in 1901. This size class of villages formed an insignificant percentage (0·02) in 1901 but it has risen to 1·45 per cent in 1971.

UNION TABLE A-III VILLAGES

A-IV TOWNS AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1971 WITH VARIATION SINCE 1901

This table gives data relating to area of the towns in Sq. Kms. from 1951 to 1971 and the figures of population since 1901 showing decadal variation of each town from Census to Census. As in case of Table A-II percentage variation is given here from decade to decade for towns and urban agglomerations. The total population of the city or urban agglomeration alongwith that of its constituents is given according to the classification of the city or urban agglomeration. Following are the six classes into which the towns are cast in Table A-IV according to size of the population.

Class	*Population*
I	100,000 and above
II	50,000 to 99,999
III	20,000 to 49, 999
IV	10,000 to 19,999
V	5,000 to 9,999
VI	Less than 5,000

The term 'town' has been defined in the flyleaf to Table A-I.

Urban Agglomeration

In several areas around a core city or statutory town have come up fairly large well recognised railway colonies, university campuses, port areas, military camps, etc., and even though these are outside the statutory limits of a corporation, municipality or cantonment, they fall within the revenue boundary of the place by which the town itself is known. It may not be altogether realistic to treat such areas lying outside the statutory limits of a town as rural units and at the same time each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit. Such areas deserve to be reckoned alongwith the main town and the continuous spread including such urban outgrowths would deserve to be treated as an integrated urban area, what is being called Urban Agglomeration at the 1971 Census. There are different situations in which urban agglomerations would be constituted for example :

(a) A city with continuous outgrowth, (the part of outgrowth being out of the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a); and

(c) A city and one or more adjoining towns with their outgrowth all of which forming a continuous spread.

City : A place having a population of 100,000 and over has been classified as a city. There are seven cities in Gujarat State, *viz.*, Ahmadabad, Vadodara, Surat, Rajkot, Bhavnagar, Jamnagar and Nadiad. In addition Porbandar and Chhaya towns form a town agglomeration of Class I.

If a place was not treated as a town or having once been so treated was declassified later, the population figures for the census during which it was not treated as urban are not given.

The population shown against each census year from 1901 to 1971 under all classes and class totals is the total urban population of all towns of that class treated as such in the respective census year.

The following statement shows the changes in classification of towns from 1901 to 1971.

Changes in Classification of Towns 1901 to 1971

Urban Agglomeration/City/Town	1971	1961	1951	1941	1931	1921	1911	1901

The following statement gives number of towns in each class during 1901-1971 :

Number of towns in each class during 1901-1971

Class	1971	1961	1951	1941	1931	1921	1911	1901
Total	**200**	**167**	**231**	**187**	**168**	**163**	**152**	**163**
Class I	8	6	6	4	3	2	2	3
Class II	17	12	6	4	2	2	2	2
Class III	37	37	32	24	20	14	15	14
Class IV	66	48	37	40	36	31	29	37
Class V	67	56	118	78	70	61	57	60
Class VI	5	8	32	37	37	53	47	47

NOTE:—A Town Agglomeration has been classified according to total population.

It will be seen from the above table that with the exception of 1911, the number of towns has continuously increased from 163 in 1901 to 231 in 1951. Then there is a drop to 167 in 1961 and the number has risen to 200 in 1971. Now, there are 8 Class I towns including agglomerations in the State, as against 6 in 1961. The number of Class II towns has also increased from 12 in 1961 to 17 in 1971. The number of towns in Class III has remained at 37 in both the censuses. In case of the Class IV and V towns, the number has increased from 48 and 56 in 1961 to 66 and 67 in 1971 respectively. The number of Class VI, towns has gone down from 8 in 1961 to 5 in 1971.

The extent of urbanisation in the State and its varying position from census to census is shown by the following table which gives the percentage of towns in each Class to total number of towns and percentage of population in each class to total urban population.

Percentage of towns in each class to total number of towns and percentage of population in each class to total urban population, 1901-71

NOTE :—A Town agglomeration has been classified according to total population.

It will be seen that the percentage of Class I towns in 1901 was 1·84 to total number of towns. The number has risen to 4% in 1971. While the percentage of number of towns has nearly doubled in Class I, the population inhabiting the towns in this class has risen to nearly 2½ times. In case of Class II towns, their number has increased from 1·23 in 1901 to 8·50% in 1971. The coverage of population by Class II towns has increased from 5·43% in 1901 to 15·44% in 1971. In other classes, *viz.*, Class III, IV, V, and VI towns, the percentage of population covered has actually gone down. The figures indicate that the concentration of population is increasing in higher classes of towns where opportunities of employment are greater than those offered by smaller towns.

The following statement gives percentage of area of towns in each class to total urban area of the State and density of population per sq. km. in each class.

Percentage of area of towns in each class to total urban area of the State and density of population per Km² in each class, 1901-1971

NOTE : (1) The area figures for the years 1901, 1911, 1921, 1931, and 1941 are not available for any of the six classes.

(2) The density per Km² for the year 1951 has been worked out for Classes IV, V and VI after deducting the population and omitting the area of 62 towns declassified in 1961 for which correct area in 1951 is not available.

NOTE : (i) Towns treated as such for the first time in 1971 Census are printed in italics.

(ii) Towns treated as such for the first time in 1961 which continue as towns in 1971 are shown with an asterisk(*) on their left.

(iii) The total area of All Classes comes to 4614·47 Km.² in Table A-IV whereas the Total Urban Area given in Table A-I (Union/State) is 4614·9 Km.² The difference 0·43 Km.² is due to the fact that the area shown in Table A-I has been derived by adding up the Urban Area of each town within a Taluka/Mahal and rounding the same up to one place of decimal.

(iv) In the case of Gujarat State for a few urban units which are appearing as constituent units of Urban Agglomerations, i.e., Out Growth, area figures are not available separately and are included in the Rural Area of respective Talukas. In such cases 'N.A.' has been shown in col. 6.

(v) Class totals have been worked out according to Urban defination of respective census year.

(vi) The following abbreviations have been used in this table to denote the status of the town.

P/V P.	=	Village Panchayat
N.P.	=	Nagar Panchayat
M	=	Municipality
M & C	=	Municipality & Cantonment
M.C.	=	Municipal Corporation
N.M.	=	Non-Municipal
C/Cantt.	=	Cantonment
O.G.	=	Out Growth
N.A.	=	Not Available
N.A.C.	=	Notified Area Committee

A-IV. TOWNS AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1971 WITH VARIATION SINCE 1901

PRIMARY CENSUS ABSTRACT

The Union Primary Census Abstract gives figures for the State/District while State Primary Census Abstract gives figures for State/District/Taluka/Town. It is similar to Union Primary Census Abstract of 1961 Census, in every respect except that in 1971, the area is given in sq. kms. instead of sq. miles and the classification of workers has been revised with regard to Industrial Category-III, IV and V. The other categories of workers, however, remain unchanged. It also gives data pertaining to Scheduled Caste/Scheduled Tribe and non-workers. The definition of various terms occurring in the Union/State Primary Census Abstract and the changes between the Union/State Primary Census Abstract of 1961 and 1971 are explained as under.

Occupied Residential House :—Occupied Residential House is a census house used as dwelling. It also includes shop-*cum*-dwelling and workshop-*cum*-dwelling. Household is a group of persons who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so.

Following industrial categories of workers have been regrouped and the categories revised are shown against them in juxta position.

1961	1971
III In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and Allied Activities	III Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activities
IV A Household Industry	IV Mining and Quarrying
V In Manufacturing other than Household Industry	V Manufacturing, Processing, Servicing and Repairs
	(a) Household Industry
	(b) Other than Household Industry

The following statement gives percentage of households to number of houses in rural and urban areas of each district.

Percentage of Households to Number of Houses, 1971

State/District	Total	Rural	Urban
Gujarat State	**102·80**	**103·26**	**101·69**
Jamnagar	101·59	101·66	101·47
Rajkot	102·37	102·81	101·74
Surendranagar	102·11	102·27	102·70
Bhavnagar	101·64	101·57	101·78
Amreli	101·73	101·86	101·26
Junagadh	102·06	102·17	101·82
Kutch	101·61	101·63	101.57
Banas Kantha	101·34	101·46	100·27
Sabar Kantha	101·85	101·83	102·05
Mahesana	102·11	102·23	101·63
Gandhinagar	104·01	104·49	101·12
Ahmadabad	101·74	103·00	101·13
Kheda	102·87	103·05	102·18
Panch Mahals	103·21	103·41	101·82
Vadodara	103·49	104·34	101.71
Bharuch	105·39	105 94	103.01
Surat	105·45	107·08	102·31
Valsad	106·23	106·82	103·67
The Dangs	105·76	105·76	

The following table gives density of households per sq. km. for total, rural and urban areas districtwise

Density of Households per Sq. Km.

State/District	Total	Rural	Urban
Gujarat State	**24**	**17**	**296**
Jamnagar	13	8	159
Rajkot	23	14	431
Surendranagar	14	10	116
Bhavnagar	21	14	204
Amreli	20	17	95
Junagadh	25	18	161
Kutch	4	3	119
Banas Kantha	18	16	152
Sabar Kantha	29	27	148
Mahesana	43	36	298
Gandhinagar	64	60	100
Ahmadabad	62	22	807
Kheda	62	52	278
Panch Mahals	35	31	342
Vadodara	45	31	614
Bharuch	22	18	360
Surat	40	27	789
Valsad	49	40	432
The Dangs	11	11	..

It will be seen from the above table that density of the households per sq. km. in Gujarat is 24. It is 17 for rural areas and 296 for urban areas of the State. Total density is the highest in Gandhinagar district where it is 64 households per sq. km. followed by Ahmadabad and Kheda both of which have density of 62 households per sq. km. The lowest density is reported in Kutch district where it is 4 followed by the tribal district of the Dangr where it is 11 households per sq. km. Next to the Dangs is Jamnagar having 13 and Surendranagar having 14 households per sq. km.

In rural areas, the highest density is also reported in Gandhinagar district where it is 60, followed by Kheda where it is 52. The lowest density is in Kutch where it is 3 followed by Jamnagar (8), Surendranagar (10) and the Dangs (11).

In the urban areas of the district, the highest density is recorded in Ahmadabad district where it is 807 followed by Surat (789) and Vadodra (614). The lowest density is reported from Amreli district where it is 95.

(*a*) *Scheduled Castes and Scheduled Tribes :* Special safeguards have been provided for Scheduled Castes and Scheduled Tribes in the Constitution of India. The list of Scheduled Castes and Scheduled Tribes as per the Scheduled Castes and Scheduled Tribes List Modification Order 1956 as corrected from time to time for the State of Gujarat is given at Annexure B.

(*b*) *Houseless Persons :* Persons such as beggars, vagrants, tramps and pavement dwellers, who have no room to dwell under, have been treated as houseless and enumerated on the night of 31st March, 71.

(*c*) *Institutional Population :* Comprises of people living in institutions such as penal or charitable or mental institutions, jails, hospitals, boarding houses, hotels, etc.

(*d*) *Literacy and Education :* A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write i not a literate.

All children of the age of 4 years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

In case of literate persons, the highest educational level attained was to be recorded. Thus, the highest educational level attained indicated the educational level of literate persons.

(c) *Economic Classification:* It is in the field of economic questions that a significant departure has been made at the 1971 Census. In the earlier Indian Censuses income or economic independence was made criterian for measuring the economy of the country. At the 1931 Census an intermediate category of economic semi-dependence was introduced and it was called working dependent. In 1941 this category was known as partly dependent and earning dependent in 1951. At the 1961 Census, stress was laid on work so that all people who work, including family workers, who are not in receipt of any income, and/or who cannot earn enough for their maintenance could also be included as "workers". At the 1971 Census, the main activity of a person is first ascertained according as he spends his time basically as worker producing goods and services or as a 'non-worker'. For regular work in industry, trade or service the reference period is the week prior to the enumeration (a fortnight in1961) and for seasonal work such as agriculture etc., the last one year. The persons is categorised according to the main activity returned by an individual. Where a person, who is basically a non-worker such as a student or housewife, does make some marginal contribution to work, that secondary work is recorded in a separate question of the individual slip. Experience of the 1961 Census had shown that census was not a proper agency to collect reliable data on unemployment. Therefore the 1971 Census did not ask any question on unemployment directly but the unemployed are expected to fall in the residuary category of non-workers and data in respect of them will be provided which has to be utilised subject to all the limitations.

The term "workers" and "non-workers" have been defined as under :

A "worker" is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work includes not only actual work but effective supervision and direction of work.

A "non-worker" is a person whose main activity is not engaged in any economically productive work· they have been categorised under the following seven broad heads.

(1) *HOUSEHOLD DUTIES :* This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties.

(2) *STUDENT :* This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending school. Even if such persons participated in some work but not to the same extent as a full-time worker, by merely helping casually as an unpaid family worker in family cultivation household industry, trade or business, they should be treated primarily as students, if that is their main activity.

(3) *RETIRED PERSON OR A RENTIER :* A person who has retired from service and is doing no other work, *i.e.*, not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work, will come under this category.

(4) *DEPENDENT :* This category will include all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age.

Dependents will include all non-workers even if able-bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

(5) *BEGGARS, ETC. :* This will cover beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

(6) *INSTITUTIONS :* This will cover convicts in jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc., in such institutions.

(7) *OTHER NON-WORKERS :* This will include all non-workers who may not come under any of the six categories above but are seeking work.

(f) *Household Industry :* A household industry is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory

The main criterion of a household industry is the participation of one or more members of a household. This criterion should apply to urban areas too. Even if the industry is not actually located at home in rural areas, there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominance, the household industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home, it will not be considered a household industry. It should be located within the precincts of the house where the members live.

A household industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as pleader or doctor or barber, musician, dancer, waterman, dhobi, astrologer, etc., or merely trade or business, even if such professions, trade or services are run at home by members of household.

In the statement given below, percentage of Schrduled Castes and Scheduled Tribes severally to total males and females by rural and urban areas of each district and in cities and towns of 50,000 and over have been given along with figures for other towns where the proportions are higher than the State average.

Percentage of Scheduled Castes and Scheduled Tribes Severally to Total Males and Females by Rural and Urban Areas of each District and in Cities and Towns of 50,000 and for Towns where the Proportions are Higher than the Average for the State.

	U	919	173	116	604	173	122	229	63	257	74	12	347	1,650
The Dangs District	R	946	441	436	704	134	769	406	31	131	59	15	230	1,601

For the State as a whole the sex ratio is 934. It is 951 for rural areas and 893 for urban areas. This has been discussed in the flyleaf to Table A-1. The combined sex ratio among workers of all categories is 187 for the State. It rises to 217 for the rural areas and drops to 103 for the urban areas. Among the districts it is the highest, *i.e.*, 441 in the tribal district of the Dangs. The lowest sex ratio is in Kheda district where it is 88. Among the total workers for rural areas, the highest sex ratio among workers is in Surat district where it is 432.

Among different categories of workers, the highest sex ratio is found among agricultural labourers, industrial category II, where it is 513 for the State, which rises to 515 for the rural areas and drops to 473 for the urban areas of the State.

It will be seen from State Primary Census Abstract that in some units the figures of occupied residential houses shown in col. 5 are more than the figures of households shown in col. 6 of the table. Normally in a unit the total number of houses would not exceed the total number of households. However, cases have come to notice, while editing the population record in which the total number of households have been found to be less than the total number of houses, due to the fact that some households were using more than one house. Such cases have been carefully examined and have borne the test of scrutiny.

ANNEXURE B

Lists of Scheduled Castes/Scheduled Tribes on the basis of Scheduled Castes/Scheduled Tribes Lists Modification Order 1956 and subsequent Corrigenda and Notifications issued after 1956

THE SCHEDULED CASTES

1. In the districts of (1) Banas Kantha, (2) Sabar Kantha, (3) Mahesana, (4) Gandhinagar, (5) Ahmadabad, (6) Kheda, (7) Panch Mahals, (8) Vadodara, (9) Bharuch, (10) Surat, (11) Valsad and (12) The Dangs.
    1. Ager
    2. Bakad or Bant
    3. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit or Samgar
    4. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar or Zadmalli
    5. Chalvadi or Channayya
    6. Chenna Dasar or Holaya Dasar
    7. Dhor, Kakkayya or Kankayya
    8. Garoda or Garo
    9. Halleer
    10. Halsar, Haslar, Hulasvar or Halasvar
    11. Holar or Valhar
    12. Holaya or Holer
    13. Lingader
    14. Mahar, Taral or Dhegu Megu
    15. Mahyavanshi, Dhed, Vankar or Maru Vankar
    16. Mang, Matang or Minimadig
    17. Mang-Garudi
    18. Meghval or Menghvar
    19. Mukri
    20. Nadia or Hadi
    21. Pasi
    22. Shenva, Chenva, Sedma or Rawat
    23. Tirgar or Tirbanda
    24. Turi
2. In the district of the Dangs and Umbergaon taluka of Valsad district:
    Mochi
3. In the districts of (1) Jamnagar, (2) Rajkot, (3) Surendranagar, (4) Bhavnagar, (5) Amreli and (6) Junagadh
    1. Bawa (Dedh) or Dedh-Sadhu
    2. Bhangi or Rukhi
    3. Chamadia
    4. Chamar, Nalia or Rohit
    5. Dangashia
    6. Garoda
    7. Garmatang
    8. Hadi
    9. Meghwal
    10. Senva
    11. Shemalia
    12. Thori
    13. Turi
    14. Turi-Barot or Dedh-Barot
    15. Vankar, Dhedh or Antyaj

4. In the district of Kutch:
   1. Bhangi
   2. Chamar
   3. Garoda
   4. Meghwal
   5. Turi
   6. Turi-Barot

THE SCHEDULED TRIBES

1. In the districts of (1) Banas Kantha, (2) Sabar Kantha, (3) Mahesana, (4) Gandhinagar, (5) Ahmadabad, (6) Kheda, (7) Panch Mahals, (8) Vadodara, (9) Bharuch, (10) Surat, (11) Valsad and (12) The Dangs
   1. Barda
   2. Bavacha or Bamcha
   3. Bhil including Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri, Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava and Vasave
   4. Chodhara
   5. Dhanka including Tadvi, Tetaria and Valvi
   6. Dhodia
   7. Dubla including Talavia or Halpati
   8. Gamit or Gamta or Gavit including Mavchi, Padvi, Vasava, Vasave and Valvi
   9. Gond or Rajgond
   10. Kathodi or Katkari including Dhor Kathodi or Dhor Katkari and Son Kathodi or Son Katkari
   11. Kokna, Kokni, Kukna
   12. Koli Dhor, Tokre Koli, Kolcha or Kolgha
   13. Naikda or Nayaka including Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka and Nana Nayaka
   14. Pardhi including Advichincher and Phanse Pardhi
   15. Patelia
   16. Pomla
   17. Rathawa
   18. Varli
   19. Vitolia, Kotwalia or Barodia
2. In The Dangs district:
   Kunbi
3. In Surat and Valsad districts:
   (a) in Umbergaon taluka, Koli Malhar, Koli Mahadev or Dongar Koli
   (b) in the other talukas, Chaudhri
4. In the districts of (1) Jamnagar, (2) Rajkot, (3) Surendranagar, (4) Bhavnagar, (5) Amreli and (6) Junagadh
   Siddi
5. In Nasses area in the forests of Alech, Gir and Barda:
   1. Bharwad
   2. Charan
   3. Rabari
6. In Surendranagar district:
   Padhar
7. In Kutch district:
   1. Bhil
   2. Dhodia
   3. Koli
   4. Paradhi
   5. Vaghri

(1) † These figures represent provisional 'Geographical Area' figures supplied by the Surveyor General. Figures for urban area are those supplied by the local bodies Area figures for rural area are derived by substracting the urban area from the total area of the district. The total of the area figures of talukas/mahals will not tally with the district figures because the former represents 'Land use area' and are derived from the figures supplied by the Director of Land Records.

(2) In case of a few urban units which are appearing as constituent units of Urban Agglomerations i.e., O.G. area figures are not available separately and are included in the rural area. In such cases N.A. has been shown in Col. 4 of the table.

(3) The following abbreviations have been used in this table to describe the civic status of the towns.

U.A.	—	Urban Agglomeration
M.C.	—	Municipal Corporation
M	—	Municipality
N.A.C.	—	Notified Area Committee
Cantt.	—	Cantonment
N.P.	—	Nagar Panchayat
V.P.	—	Village Panchayat
N.M.	—	Non-Municipal
O.G.	—	Out Growth
