INTRODUCTORY NOTE

This volume Part II-B General Economic Tables of Delhi presents B-series tables B-I to B-IX. Table B-I part A (workers and non-workers according to main activity classified by sex and age-groups) and table B-II (workers and non-workers in cities and non-city urban areas according to main activity classified by sex and age-groups) were prepared manually. In case of remaining tables B-III to B-IX, the rural part was prepared manually while the urban part was generated on computor. In case of Delhi, all the tables were prepared on full count basis.

It is in the field of economic questions that a significant departure has been made at the 1971 Census. In the earlier Indian censuses, income or economic independence was made criteria for measuring the economy of the country. At the 1931 Census, an intermediate category of economic semi-dependence was introduced and it was called working dependence. In 1941, this category was known as partly dependent and earning dependent in 1951. At the 1961 Census, stress was laid on work so that all people who work, including family workers who are not in receipt of any income, and or who can not earn enough for their maintenance could also be included as workers. At the 1971 Census the main activity of a person is first ascertained according as he spends his time basically as a *'worker'* producing goods and services or as a *'non-worker'*. For regular work in industry, trade or service the reference period is the week prior to the enumeration (a fortnight in 1961) and for seasonal work such as agriculture etc., the last one year. The person is categorised according to the main activity returned by an individual.

The following economic questions were asked in the 1971 Census.

16. *Main Activity* :

(*a*) *Broad category*

(*i*) *Worker*
(*C, AL, HHI, OW*)

(*ii*) *Non-worker*
(*H, ST, R, D, B, I, O*)

(*b*) *Place of work*
(*Name of Village/Town*)

(*c*) *Name of Establishment*

(*d*) *Nature of Industry, Trade, Profession or Service*

(*e*) *Description of work*

(*f*) *Class of worker*

17. *Secondary work:*

(*a*) *Broad Category* (*C, AL, HHI, OW*)

(*b*) *Place of work*
(*Name of Village/Town*)

(*c*) *Name of Establishment*

(*d*) *Nature of Industry, Trade, Profession or Service*

(*e*) *Description of work*

(*f*) *Class of worker*

The instructions to enumerator as to how these questions were to be canvassed are reproduced in Appendix I to this note. For the purpose of Q. 16 all persons are classified into workers or Non-workers depending on their main activity. The main activity of a person is how he engages himself mostly (in terms of time and not income). After a person has been classified as a worker or non-worker, he is further classified into various categories of worker or non-worker.

Industrial Categories

For the purpose of presentation of Census data, all workers have been divided into nine broad industrial categories which are given below :

Industrial category	*Description*
I	*Cultivators*
II	*Agricultural labourers*
III	*Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities*
IV	*Mining and Quarrying*
V	*Manufacturing, Processing, Servicing & Repairs*
V-(a)	*Household Industry*
V-(b)	*Other than Household Industry*
VI	*Construction*
VII	*Trade & Commerce*
VIII	*Transport, Storage and Communications*
IX	*Other Services*

At this point it is relevant to point out the difference between the Industrial categories adopted at the 1971 and 1961 censuses. At the time of 1961 Census, category III included Mining and Quarrying, besides Livestock Forestry, Fishing, Hunting and Plantations, Orchards and allied activities and Household Industry was categorised as category IV. At the time of 1971 Census, Mining and Quarrying has been categorised separately as category IV and Household Industry has been brought under category V. The industrial categories of 1971 and 1961 censuses are given below :

Industrial category	*1971*	*1961*
Cultivators	*I*	*I*
Agricultural Labourers	*II*	*II*
Livestock, Forestry, Fishing, Hunting and Plantation, Orchards and allied activities	*III*	*III*
Mining and Quarrying	*IV*	
Manufacturing, Processing, Servicing and Repairs-Household Industry	*V-(a)*	*IV*
Other than Household Industry	*V-(b)*	*V*
Construction	*VI*	*VI*
Trade & Commerce	*VII*	*VII*
Transport, Storage & Communications	*VIII*	*VIII*
Other Services	*IX*	*IX*
Non-workers	*X*	*X*

In the 1961 Census, household industry included activities are under division 0, (Agriculture, Hunting, Forestry & Fishing), division 1 (Mining and Quarrying) besides activities under division 2 & 3 (Manufacturing & Repair). In the 1971 Census, the activities falling under division 0 & 1 are excluded from Household Industry and thus this covers activities falling under division 2 & 3 only.

Concept of Worker—1961 and 1971

In 1961, questions 8 to 12 of the individual slip covered the economic activity of the person concerned. All the four questions were to be compulsorily asked in respect of every human being in the order they are presented. It was only in the case of those to whom none of the questions 8 to 11 would apply, that question 12 would be asked. Description of questions 8 to 12 is given below:

8. Working as Cultivator

9. Working as Agricultural Labourer

10. Working at Household Industry

(a) *Nature of work*

(b) *Nature of Household Industry*

(c) *If employeed*

11. Doing work other than 8, 9 or 10

(a) *Nature of work*

(b) *Nature of Industry, Profession, Trade or Service*

(c) *Class of worker*

(d) *Name of Establishment*

12. Activity, If not working

It was felt that the economic questions of the 1961 census tended to categorise a person as a worker even if his contribution to work was extremely marginal. Thus a housewife who might only be occasionally helping in the family field would be recorded as a cultivator because that question would elicit a positive reply.

The following quotation on this matter can be seen :

"Confining ourselves to the Indian definitions of the 1961 Census and the 1971 Census, with which we are now immediately concerned, it was the opinion of experts that the 1961 definition of work was on the libral side which had exaggerated participation rates. At that Census, a person was categorised basically as an economically active worker even if such a person's contribution to work was extremely marginal. In respect of seasonal work like agriculture or household industry, if a person had put in an hour's work a day during the major part of working season, such a person was treated basically as an economically active worker. So much so, if a women who is basically engaged in attending to household duties, went to her husband's field taking his lunch and for about an hour or so she tended the cattle, she was straightaway, treated as engaged in cultivation. Similarly a full time student, if he sat for a little time, however short the period might have been in his father's shop even on a ingle day in a fortnight, he was treated as an economically active worker and his basic characteristic as a whole-time student was ignored. Besides, the sequence of questioning to ascertain the economic activity at the 1961 Census was as follows.

*Every individual was compulsorily asked if he was engaged (i) in cultivation (ii) in agricultural labour (iii) at household industry and (iv) in any other work in the above order. A person who is basically an agricultural labourer even if he cultivated a couple of cents of land in his back-yard, declared himself first as cultivator and then as an agricultural labourer. No doubt, instructions were issued at a later stage that after ascertaining the economic activity under the 4 items referred to above, the enumerators will be required to put a circle against the question which represented the main work i.e., the one on which the person spent most of his time and to tick the entry relating to the item that formed the secondary work. But if so happened that several enumerators could not follow these instructions either due to the belated receipt of instructions or on account of non-appreciation of the concepts. At the stage of editing the schedules in the Tabulation Offices subsequently, the instructions were issued to the effect that where economic activity was recorded against, cultivation, agricultural labour and household industry and if there was no indication as to which among them formed the main activity, cultivation should be treated as the main activity. This introduced a definite bias in favour of persons being categorised as cultivators. Therefore, the participation rate in cultivation at the 1961 Census, obviously got inflated. There was also a possibility that during the period when there was much talk of land reforms, several agricultural labourers were tempted to declare themselves as cultivators of land rather than as agricultural labourers with the hope of establishing a right as cultivator. There were also instructions to the effect that if a person besides attending to any economic activity was also attending to household duties the fact of such a person being engaged additionally as a housewife should also be recorded in parenthesis. The intention apparently was to bring out the picture of such of the workers who might have been basically housewives but participated in work marginally. But unfortunately no tabulation was attempted of the cases where a person was basically housewife or wholetime student but had been noted as economically active worker for classification. This deficiency in the 1961 Census concept was sought to be rectified by adopting a different approach at the 1971 Census."**

As a result of the 1961 Concepts, the scope of the economic questions in the 1971 Census was considered by expert groups. The proceedings of the Planning Commission held on May, 24, 1969 on this issue are reproduced below :

"The concept of worker and non-worker came up for detailed consideration. The reference period proposed for the 1971 Census was one week for regular work and last working season for seasonal work. For regular work, an individual would be classified as a worker if he had put in gainful work on any one day of the previous week, For seasonal work, an individual was proposed to be classified as worker if he had put in regularly at least half normal day's work during the major part of the last working season. At the 1961 Census the reference period for regular work was a fortnight and for seasonal work a person was deemed to be a worker if he had put in at least one hour work a day during the major part of the working season.

It was felt that the concept of worker at the 1961 Census tended to inflate workers as persons who were basically non-workers like housewives, students etc., were included in the category of workers even though their participation was very marginal. The concept of half a day's normal work proposed for 1971 Census for seasonal work was also considered not realistic. While the reference period of one week for regular work was alright, for regular work, what was essential was that every person should be basically classified according to his/her main activity, particularly those not engaged in regular work. Certain activities like cultivation, agricultural labour, etc., are not carried out throughout the year. Therefore, a person enumerated should be asked to state what his main activity was and even if he was not engaged in that activity during the reference period of one week, if he had engaged himself in the main activity reported by him in the course of the last one year, that shall be treated as his main activity. In the case of persons who are basically occupied as house workers, students, rent receivers etc., they should be classified as such for their main activity. If they were also engaged in some economic activity obviously not to the same extent as full-time workers, that activity should be ascertained under the head of secondary work. The secondary work, if any, of those who are basically classified as workers will also be ascertained.

Summarising the above, the following decisions were taken :

Individual Slip

(*ix*) Every person will be categorised with respect to the main activity as reported by him.

(*x*) Persons who are basically students, house workers and rent receivers, etc., will be classified accordingly for their main activity. Any gainful activity that these individuals may have but not on the scale of full-time workers will be shown under secondary work.

(*xi*) Census data may not provide data on under or unemployment as such."

Thus it was after deep consideration and with expert advice, the present concept of worker and non-worker came to be adopted for the 1971 Census of India.

At this Census every individual was required to declare himself what according to him was his main activity. If his answer indicated that he was economically active worker, he was classified as working as a cultivator or an agricultural labourer, or at household industry or in other work, such as forestry, mining, manufacturing, trade, transport, services, etc. If a person returned himself basically as not engaged in any economic activity, such a person was required to state if he or she was engaged in household duties, or was a student, retired person or a rentier, a dependent, a beggar or vagrant, inmate of a charitable or penal institution or other non-worker such as being mostly an unemployed person. In addition, at this Census every one was also asked to state if he or she attended to any secondary work so as to get an account also of the marginal contribution to work made by persons who had declared themselves basically as a housewife or a full-time student etc."

At the 1971 Census, every individual was asked to declare his main activity and he was classified as Cultivator, Agricultural Labourer or engaged in household industry or as other worker according to his main economic activity. The persons were also asked if they did any secondary work in addition to their main activity. If so, the details were appropriately recorded in Q. 17. Thus a student who occasionally helps his father in his business would be recorded as 'Non-worker' in Q. 16 and his secondary work would be entered in Q. 17 whereas in the same situation in 1961 he would have been reported as a worker primarily.

This change in concept partially explains the apparent disparities between the participation rates of 1961 and 1971.

Economic Concepts 1881-1971

Economic question has been the part of the Census questionnaire since 1872. In the Census of 1872, an attempt was made to collect data on "occupation" but the classification was elementary. In the 1881 Census, no distinction was made between earners or dependents workers or non-workers. In 1891, economic data was collected for both workers and those dependent on them

The main economic questions in the Censuses of 1891-1921 were related to livelihood or occupation or means of subsistence of each worker. In actual practice, however, even person who was not working but was receiving income from land, property etc., was considered as economically active. The concept of income was specifically introduced in 1931, 1941 and 1951. Thus in 1931 the population was divided into three classes of 'earner', 'working dependent' and 'non-working dependent'. In 1941, the classifications were 'wholly dependent' 'partly dependent and 'other.' In 1951 there was a further change and the classification was 'self-supporting person', 'earing dependent' and 'non-earning dependent'. In 1961, the population was divided into workers and non-workers while in 1971 the division into workers and non-workers was on the basis of main activity.

The following statement gives the economic questions asked at the various Censuses from 1901 onwards.

For the first time in 1971 Census, female workers and non-workers according to main activity were further classified by marital status and age-groups. The workers in each occupational division other than those in cultivation were cross tabulated by age-groups and educational levels for rural areas also while in 1961 Census, it was restricted to urban areas only.

According to tabulation plan, most of the B-series tables are to be prepared at the State/District level but all these tables are being presented upto town level in this volume which will be more useful to various data users.

APPENDICES

APPENDIX I

Economic Questions—1971 Census

Question 16: Main Activity

Every person will be asked what his main activity is, that is, how he engages himself mostly. For the purpose of this question, all persons will get themselves divided into two broad streams of main activity namely, (1) as workers and (2) as non-workers according as the type of main activity that the person returns himself as engaged in mostly.

'Worker' Defined

A 'worker' is a person whose main activity is participation in any economically productive work by his physcal or mental activity. Work involves not only actual work but effective supervision and direction of work.

Reference Periods

The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during this reference period and this has been returned as his main activity, the person will be categorised accordingly. A person who normally works but had been absent from work during thisreference period on account of illness or travel, holiday, temporary breakdown, strike etc., the person should be treated as engaged in regular work in which he would nave otherwise been employed but fort his emporary absence. Persons under training such as apprentices with or without stipends or wages should be considered as economically active and recorded as working. A person who has merely been offered work but has not actually joined it, is not to be treated as engaged in work.

There are certain types of works which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry, etc. A person's main activity should be ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration. It is likely that even when a person is engaged in some other work during the period of one week prior to the date of enumeration, the main activity of the person may be cultivation, agriculturall abour or some otner work attended to normally by him in the course of the year. Care must be taken to see that the main activity is properly ascertained in such cases. For example, a person's main activity may be agricultural labour and in the week prior to enumeration he may be engaged as a sugarcane factory labourer or as a road coolie. He should be categorised for his main activity as agricultural labourer only as returned by him as he engages himself mostly in that work and the other work should be treated as his subsidiary work.

A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a student attending institution, even if such a person helps in the family economic activity but not as a full time worker should not be treated as a worker for the main activity. On the other hand, if a person is primarily engaged in some economic activity but at the sametime does also attend to some household chores or attends a night school etc., he or she should be treated basically as worker for the main activity and categorised accordingly.

A person who merely receives an income such as a rent receiver or a pensioner who does not have to work for receiving the income, will not be treated as economically active unless the person is also engaged in some ecouomic activity and if that activity is returned as the main activity of the individual.

Question 16 (a) Broad Category (i) Worker (C, AL, HHI, OW) (ii) Non-worker (H, ST, R, D, B, I, O)

The main activity returned by the person will entitle him to be categorised either as a worker in 16(*a*) (*i*) or as a non-worker under 16 (*a*) (*ii*).

16 (a) (i) Worker (C, AL, HHI, OW)

Where the main activity of a person qualifies him to be treated as a worker he should be further categorised according to the type of work and one of the appropriate abbreviations indicated against this question should be entered in the box provided for the purpose. If the person is not engaged in any economic activity an 'X' should be noted in the box. The abbreviations to be used for workers are explained below :

C : Cultivator

For a person who returns his main activity as working as a cultivator, the abbreviation 'C' should be used.

Definition of Cultivator—For purposes of the census a person is working as cultivator if he or she is engageed in cultivation by one self or by supervision or direction in one's capacity as the owner or lessee of land held from Govt. or as a tenant of land held from private persons or institutions for payment of money, kind or share.

Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and pulses, raw jute and kindred fibre crop, cotton etc., and other crops such as sugar-cane, groundnuts tapioca, etc., and does not include fruit growing, vegetable growing or keeping orchards or groves or working of plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

A person who merely owns land but has given out land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another persons' land for wages in cash, kind or share (Agricultural labourer) will not be treated as cultivator in this question.

AL : Agricultural Labourer

A person who returns his main activity as engaged as agricultural labourer, the abbreviation 'AL' should be used in the box.

Definition of An Agricultural Labourer: A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He has no risk in the cultivation but he merely works in another person's land for wages. The labourer could have no right of lease or contract on land in which he works.

H. H. I. : Household Industry

For a person who returns his main activity as engaged in some production, processing, servicing or repair of articles of goods such as, say, handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacturer, bicycle repairing, blacksmithy, tailoring etc. it has to be ascertained if it is a household industry, and if so, it should be indicated by the abbreviation 'HHI' in the box.

Definition of a Household Industry: A Household Industry is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not berun on the scale of a registered factory.

The main criterion of a Household Industry is the participation of one or more members of a household. This criterion should apply to urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located any where within the village limits. In the urban areas where organised industry takes greater prominence the Household Industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home. It will not be considered a household industry. It should be located within the precincts of the house where the members live.

A household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely sellings) of goods. It does not include professions such as a pleader or doctor or barber, musician, dancer, waterman, dhobi, astrologer, etc., or merely trade or business, even if such professions trade or services are run at home by members of household. A list of a few typical Household Industry is appended to these instructions at Annexure-1.

Sometimes it is likely that the person who may not be working in his own Household Industry may be working as a petty employee in anither Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry as an employee and record as per instructions as given above.

OW : Other Workers

If a person gives his main activity as engaged in any other work which is not cultivation, agricultural labour or household industry, this may be indicated by merely noting 'OW' in the box. The type of workers that may come under the 'Other Workers' category are factory workers, those working in trade or transport, all Government

servants, municipal employees, teachers, mining workers, political or social workers, building labourers, etc. etc. in effect, all types of economic activity not covered by cultivation, agricultural labour or household industry will come under this residual category. Workers engaged in plantation or forestry should not be treated as cultivators or agricultural labourers but as 'Other Workers'.

Further details pertaining to this 'Other' category of workers, as also those engaged in household industry will be recorded in the subsequent sub-parts (*b*) to (*f*) of question 16.

16 (*a*) (*ii*) Non-Worker (H. ST, R, D, B, I, O)

As was stated earlier. question 16 is intended to ascertain the main activity of every individual whether he or she is economically active or not. While 16(*a*) (*i*) helps to broadly categorise all those who have returned some work as their main activity, 16(*a*) (*ii*) will help to categorise those whose main activity is not engaged in any economically productive work, but are basically non-workers. These may be categorised under seven broad heads whose abbreviations are indicated against this question. The appropriate abbreviation will have to be entered in the box provided. The abbreviations are explained below :

H : Household Duties

This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. The main activity of such a person should be entered as 'H'. If a person whose main activity is attending to household duties, also engages oneself in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale etc., that economic activity will be covered as secondary work under question 17. On the other hand, a woman who works primarily as a factory worker or a plantation labourer or an agricultural labourer or in some office or shop etc., and also attends to household duties, obviously, her main activity will be the economic activity in which she is mostly engaged in and should not be categorised as 'H' for her main activity in this question. She should have been treated basically as a worker and her main economic activity should have been recorded against 16(*a*) (*i*).

ST : Student

This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending school. Even if such persons participated in some work but not to the same extent as a full-time workers, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity. 'ST' should be entered in the box. The other economic activity, if any, that such persons attend to will be reflected under question 17 as secondary work.

R : Retired Person or a Rentier

A person who has retired from service and is doing no other work *i.e.*, not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work, will come under this category. 'R' should be noted in the box for a person coming under this category.

D : Dependent

This category will include all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. If a girl or an old woman attends to household duties she should be categorised under 'H' for her main activity rather than 'D'.

Dependents will include all non-workers even if able bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

B : Beggars etc.

This will cover beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

I : Institutions

This will cover convicts in jails or inmates of a penal mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc., in such institutions. An under-trial prisoner in a jail should not however, be brought under this category but has to be indicated according to the main activity he was engaged in before he was apprehended. Inmates of such institutions will be noted as 'I'.

76-M/J(D)11DCODelhi—2

C. OTHER NON-WORKERS

This will include all non-workers who may not come under any of the six categories above but are seeking work, they should be noted as 'O' in the box. A boy or girl who has completed education or has stopped studying and is seeking work, will come under this category. If a person is merely spending his time at home as a dependent and is not doing any work will come under 'D' rather than 'O'. A person irrespective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work will come under this category.

If the main activity of the person who is enumerated does not qualify a person to be treated as a worker and he does not fall under any of the four broad categories of workers covered by 16 (a) (i) and an 'X' has been put in the box against that question, then he must necessarily be categories under any one of the seven broad types of non-workers and the appropriate abbreviation entered in the box opposite to question 16 (a) (ii). Conversely if a person has already been treated as a worker and his main activity has been indicated in the box against question 16 (a) (i), then question 16 (a) (ii) will not apply to the person and an 'X' should be put in the box against question 16 (a) (ii). Thus 16 (a) (i) and 16(a) (ii) are mutually exclusive.

Q. 16 (b) to 16 (f)

These sub-parts of question 16 will have to be filled only to describe the details of the household industry or other work indicated against question 16 (a) (i). If the main activity has been shown as 'C' or 'AL' against 16 (a) (i), there is no need to give the details of the cultivation or agricultural labour in these sub-sections

Similarly, if the main activity of an individual has been returned as a non-worker against 16 (a) (II), sub-sections (b) to (f) will not apply and a 'X' may be put right across all these questions.

Q. 16 (b) Place or work (Name of Village/Town)

Ascertain from each person who is already taken as a worker other than in cultivation or agricultural labour i.e. question 16 (a) (*I*) has been answered as HHI or OW, the village or town where he or she works. If the place of work is the same as the village or town of enumeration write 'PL'. In all other cases you should write the name of the place fully. If a person has no fixed place of work such as, say, a travelling vendor or vegetable or a pedlar or a rickshaw puller who may go from one village or town to another, note 'No fixed place of work'. If he works in one particular town or village that should be noted.

Q. 16 (c) Name of Establishment

This question and the subsequent sub-sections of question 16 need not be answered for cultivators and agricultural labourers who are already noted as 'C' or 'AL' against question (16) (*a*) (*i*).

Record here the exact name of the factory, firm, workshop, business house, company, shop, office etc. and in respect of public offices you should clearly indicate whether they are Central or State Government or local body offices, etc. If the establishment does not have any definite name such as, say, in the case of a household industry like hand pounding of rice, gur making, bee keeping, handloom weaving, potter's house, blacksmithy etc., note 'No particular name.'

Q. 16 (d) Nature of Industry, Trade, Profession or Service

The answer to this question will have to be adequately precise to enable proper classification of the sector of economy in which the person is working. The sector of economy in which a person works may relate to (*i*) Plantation, Foresty, Fishing, Livestock etc. (*ii*) Mining and/or quarrying (*iii*) Manufacturing (*iv*) Construction (*v*) Electricity, Gas or Water Supply (*vi*) Transport and Communications (*vii*) Trade and Commerce (*viii*) Professions and Services. Full details of the type of industry, trade-profession or service in which the person is engaged will have to be recorded here. To help you to appreciate the details that may have to be furnished to classify the economic activity appropriately, substantial description of various economic activities are furnished in Annexure II, categorised under certain broad classifications. The list in Annexure II is not exhaustive. You shall have to describe the nature of Industry, Profession, Trade or Service whatever it is, in as precise a detail as possible.

Q. 16 (e) Description of work

This question has to be filled up for all persons for whom the main activity is shown as 'HHI' or 'OW' in question 16(*a*) (*i*) and or whom you should have also to answer the other sub-sections of question 16. Under this question, the description of the actual work that the person enumerated is doing is to be recorded irrespective of which type of industry, trade, profession or service he may be working and which is already recorded under question 16(*d*). His actual work should also be given in sufficient detail. If for example a person is merely recorded as say, Clerk with no other details, it will be impossible to properly categories him as to the type of work he does. He may be a clerk attending to correspondence or book keeping or accounting. Similarly, if a person were merely to be recorded as a mechanic, it will not help to determine what type of mechanic, electrical mechanic, or

a motor mechanic or a locomotive mechanic, etc., he is. The description of the actual work done by a person should be ascertained in adequate detail and recorded against this question.

To guide you in answering question 16(*e*), the types of particulars that need to be ascertained in respect of a few typical occupations are given in Annexure—III.

Annexure III is by no means exhaustive. This just illustrates the need to ascertain the full details of the particulars of work performed by an individual for being recorded against 16 (*e*).

It has been found in the past that substantial number of persons are recorded merely as general labourers. It is necessary to make a probe and find out in which type of work he is mostly engaged as a labourer such as, say a road coolie, a loader or unloader at a market, a construction labourers, etc.

For those in Military service it is enough if it is merely noted as 'in the service of the Central Government'. Other details need not be given.

General

There need be no confusion as to the scope of 16(*d*) and 16(*e*). 16(*d*) would represent and nature of industry, trade, profession or service i.e., the field of economic activity in which a person is engaged in work and 16 (*e*) represents the occupation or the actual work that the person does in the industry, trade, profession or service in which he is engaged. Thus, for example the enswer to question 16(*d*) may be say Cotton Textile manufacture and answer to question 16(*e*) may be Chemical Engineer in that industry or a clerk or an accountant in that industry or a labourer in that industry or a truck driver or the managing director of that industry and so on. Similarly in question 16(*d*) the nature of service may be some department of the State Government Service and in question 16(*e*) the description of work may be a clerk or an accountant, a Director of the Deptt., jeep driver in the Deptt. etc., ete. Again say, against question 16(*d*) the answer may be private medical practice and in 16(*e*) may cover orthopaedic surgeon, or nurse or a sweeper etc., working in that private medical practitioner's nursing home. The sample answers furnished in the specimens (Annexure IV), the Industrial and Occupational lists in Annexure II & III and the instructions given by your superior Census Officers may help you to clear any doubts you may have in your mind regarding the scope of questions relating to Nature of Industry, Trade, Profession or Service covered by question 16 (*d*) and the destription of actual work of the individual enumerated covered by question 16(*e*).

Q. 16 (f) Class of worker

For a person who is ;

(*i*) an Employer, that is, who hires one or more persons in his work described in question 16(*e*), write .....ER

(*ii*) an Employee, that is who does his work described in question 16(*e*) under others for wages or salary in cash or kind, write.....EE

(*iii*) a Single Worker, that is, who is doing his work described in question 16(*e*) without employing others except casually, and without the help of other members of the family except casually and a participant in work as members of co-operatives, write.....SW

(*iv*) a Family worker, that is, who is doing his work described in question 16(*e*) in a family enterprise alongwith other members of the family without wages or salary in cash or kind, write .....FW

For a person for whom an 'X' is put in question 16 (*d*) and 16(*e*) put an 'X' in this question also.

Explanation

An Employer is a person who has to employ other persons in order to perform the work entered in question 16(*e*). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in business mentioned in question 16(*e*). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

An Employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

A single worker for the purpose of question 16 (*f*) is a person who works by himself. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees, and also

a member of a producer's co-operative. Each one of the partners or members of such producer's co-operatives should be recorded as 'Single Worker'.

A family worker is a member who works without receiving wages in cash or kind, in an industry, business, trade or service. For example, the working members in a family of Dhobies where they all participate and each does not receive wages separately will be family workers. There may be family workers in industry, trade of professions as well. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

In the case of persons engaged in household industry i.e., in the case of persons for whom the answer to questions 16 (a) (*i*) is 'HHI' there will be three classes of workers viz., Family Worker, Single Worker and Employee. There will be no Employer. Household industry by its very definition is conducted by the head of household himself or/and other members of the household, the role of hired workers being secondary. If the head alongwith the members of the household is working in a household industry employing hired workers, the head and other members who are working should be treated as 'Family Workers'. If the head alone is working with the assistance of hired worker (*s*) whose role would be secondary as indicated above, he would be treated as a 'single worker'

Some illustrations for filling the questions 16 or 17 are given in Annexure IV.

Q. 17 Secondary work

This question should be asked of every person whether he has returned some work as his main activity against 16 (*a*) (*i*) or had returned himself under any of the basically non-working categories against question 16 (*a*) (*ii*) . As was stated earlier, 16 (*a*) (*ii*) will cover cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation or in household industry or in looking after the cattle, in attending to family business etc., but not to the extent as a full-time worker. Such participation will be considered as secondary work of these persons.

Ask of each person if, besides what he had already returned as his/her main activity against question 16 (*a*) (*i*) or 16 (*a*) (*ii*), he/she participated in any secondary work. A number of unpaid family workers 'participating in the household enterprises, who might have returned themselves mainly as 'H' or 'ST' or R under question 16(*a*) (*ii*) for their main activity will be netted here for their economic activity which is subsidiary. Mere rendering of service for ones own home or production of goods for purely domestic consumption are not to be treated as economic activity. For example, a servant who works as a cook in his or her employer's home for wages will be considered economically active but, a housewife, even if she may work much more than a paid servant, in having to cook for the family or looking after the household will not be treated as economically active for the purpose of this classification. Similarly, women who may produce cloth on a loin loom at home for domestic consumption will not be treated as economically active unless the products are sold and the household derives an income. Participation in work that goes to augment the income of the household will only be treated as economic activity. A boy whose main activity is shown as a student under 16(*a*) (*ii*), can have the secondary work of say, cultivation if the helped the head of the household in the family cultivation during some parts of the season. But if a girl student, whose main activity is shown as 'ST' under 16(*a*) (*ii*), also helped in weaving cloth purely for domestic consumption on a loin loom at home, or helped in attending to household chores, she will not be treated as having any secondary work. Secondary work will be reckoned only if the person is engaged in some economic activity even if marginal in addition to whatever is the main activity under question 16. A person whose main activity is shown as, say, a clerk in a Government Office or a teacher under question 16, also attends to some cultivation by his direct supervision or undertakes some tuition, this will be shown as secondary work under question 17. A person's main activity may be cultivation in question 16 and his subsidiary activity money lending in question 17. Again main activity may be agricultural labourer and subsidiary work sugar factory labourer and so on and so forth.

The instructions for the usage of abbreviations in categorising workers under 16(*a*) (*i*) and filling in the details under 16(*b*) to (*f*) will apply *mutatis mutandis* to question 17 (*a*) to (*f*), except that while question 16 (*a*) (*i*) will colver the main work, Q. 17(*a*) is intended to cover secondary work which may be possibly part-time. It may also be noted that the non-working categories of activity will not be reported as secondary work under question 17.

B-I PART A-WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY BY SEX AND AGE GROUPS

FLY LEAF

This is the basic economic table and is similar to table B-I of 1961. It gives the distribution of entire population into two broad classes of 'workers and 'non-workers'. The workers are further classified into nine industrial categories. Data have been presented by sex and broad age-groups viz., 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60+ and age not stated. The term 'age not stated' was used where the age was not recorded in the individual slips.

The workers are classified into nine broad industrial categories as given below :—

Category I—Cultivators

For the purpose of census a person engaged in cultivation by himself or by supervision or direction in his capacity as the owner or lessee of land held from Government or as a tenant of land held from private persons or institutions for payment or money, kind or share has been recorded as a cultivator. Cultivation involve ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jawar, bajra, ragi etc. and pulses, raw jute and kindred fibre crop, cotton etc. and other crops such as sugar-cane, ground nuts, tapioca, etc. and does not include fruit growing, vegetable growing or keeping orchards or groves or working of plantations, like tea, coffee, rubber, cinchona and other medicinal plantations. If a person who merely owned land but had given it to another person for cultivation has not been treated as a cultivator. Similarly, a person working in another person's land for wages, in cash; kind or share, has not been treated as a cultivator.

Category II—Agricultural Labourer

A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He has no risk in the cultivation but he merely works in another person's land for wages. The labourer could have no right of lease or contract on land on which he works.

Category III

Workers in livestock, forestry, fishing, hunting, plantations, orchards and allied activities are included in this category. This includes livestock production, hunting, trapping and game propagation, forestry and logging, fishing in sea, coastal and inland waters, collection of pearls, conches and other sea products etc

Category IV

Workers in mining and quarrying are included in this category. This includes coal mining, crude petroleum, natural gas, metal ore mining, stone quarrying and other type of mining, salt, chemicals, precious stones, mica and gypsum etc.

Category V

A Household Industry is defined as an industry conducted by the head of the household himself/herself and/or by the members of the household at home or within the village in rural areas and only at home in urban areas. In urban areas, the industry must be confined to the house or atleast a major part of the work must be located at home. The household industry is not run on the scale of a factory. A household industry should relate to the production, servicing processing, repairing or making and selling of goods but should not be confined to the process of buying and selling only. It does not, therefore, include establishments exclusively engaged in buying and selling professions such as doctor, astrologer, pleader etc. The workers in household industry are classified under Category V-(*a*).

Workers in manufacturing other than household industry include those engaged in all types of production, processing, servicing or repairing of goods. This category does not include production or processing which may be classified as 'Household Industry'. Such workers are classified under Category V-(*b*).

Category VI

This category includes workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraphs, telephones, water-ways, reservoirs etc.

Category VII

This category includes workers engaged in any capacity in wholesale or retail trading activity and commercial transaction relating to imports and exports, real estate and property, stocks and share, insurance, money lending, banking, etc.

Category VIII

This category includes workers engaged in transport activity by air, rail, road or water and in services incidental to transport such as packing, carting, loading, unloading, etc. Workers engaged in storage, warehousing and communication services such as posts, telegraph, telephones, wireless signalling, information and broadcasting are also included.

Category IX

This category includes (*i*) public utility services like electricity or gas or water supply, sanitary services (*ii*) central, state or municipal employees; (*iii*) professional services; (*iv*) trade or labour associations, recreational services, etc.

The age-groups adopted at the 1961 Census were 0-14, 15-34, 35-59, 60+ and age not stated. Splitting of the two age-groups of 15-34 and 35-59 into six age-groups as indicated above in 1971 will be of special significance to various data users.

This table has been prepared for total, rural and urban areas of Delhi union territory. The relevant instructions are given in Appendix I to this volume.

B-I PART B –FEMALE WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY MARITAL STATUS AND AGE-GROUPS

FLY LEAF

This is a new table attempted for the first time at the 1971 Census and is intended to show female workers and non-workers according to the main activity classified by marital status and broad age-groups. The age-groups are similar to those of table B-I Part A. The female workers are further classified into nine industrial categories the details of which are given in table B-I Part A. The data have been presented for marital status viz: never married, married, widowed, divorced or separated and unspecified status.

Question No. 5 of the individual slip gives information regarding marital status. The instructions for this question are given below :—

Question 5 Marital Status

In answering this question use the following abbreviations:

NM : Never Married

M : Currently Married

W : Widowed

S : Separated or Divorced

For a person, who has never been married at any time before, write 'NM'. For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for the persons in stable de facto union.

Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or is in stable deffacto union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been divorced either by a decree of a law court or by an accepted social or religious custom but who has not re-married, write 'S'. For a prostitute return her marital status as declared by her.

The statistics have been presented for total, rural and urban areas of Delhi union territory and its three towns namely (1) New Delhi Municipal Committee (2) Delhi Cantt. and (3) Delhi Municipal Corporation (Urban). In case of towns, data have been presented for urban only.

B-II WORKERS AND NON-WORKERS IN CITIES AND NON-CITY URBAN AREAS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY SEX AND AGE-GROUPS

FLY LEAF

This table is similar to table B-I part-A with the difference that it is presented for urban areas only and secondly, the data are presented in this table for individual city/city urban Agglomeration/Non-City Urban/Town agglomeration/Town. In case of Union Territory of Delhi, there is only one urban agglomeration which constitutes of all the three towns namely N.D.M.C., Delhi Cantt. and D.M.C. (Urban) and as such this table has been presented for Delhi Urban agglomeration alongwith its constituent units.

The concept of urban Agglomeration at the 1971 Census.

In 1961 Census, a new concept of town-group was adopted, whereby two or more towns lying in very close proximity were treated as one town-group. It was felt that though such towns were under different civic administration, they actually constituted one compact unit. As such it was decided to adopt the concept of town-group and to present the data for the group of such towns as a whole as well as for the constituent towns separately.

The concept of town group as adopted in 1961 was given up mainly on account of lack of uniformity in defining the town-group as applied in different states. For the 1971 Census, the term town-group has been replaced by "Urban Agglomeration" with a stricter and more uniform definition. An urban agglomeration must form a continuous urban spread constituting of a town and its adjoining urban outgrowths if any, of such towns. In the town-group concept of 1961 census, it was not always the contiguous urban units that formed such a group. Even urban units cut off from one another were taken together ignoring the intervening regions.

The following are the situations in which urban agglomeration would be constituted at the 1971 Census :

(*a*) *A city with continuous outgrowth (the part of outgrowth being out of the statutory limits but falling within the boundaries of the adjoining village or villages*)

(*b*) *One town with similar outgrowth or two or more adjoining towns with these outgrowth as in* (*a*) *and*

(*c*) *A city and one or more adjoining towns with their outgrowth all of which forming a continuous spread.*

In varying local conditions, there could be similar other combinations which could be termed as agglomeration, the basic consideration of continuity having been satisfied. The area constituting an urban agglomeration may keep on changing from census to census depending upon the changing boundaries of the statutory main urban units as well as the extent of other urban outgrowths. To take care of all such changes another concept of 'Standard Urban Area' has been adopted at the 1971 Census. As stated earlier, in Delhi Union Territory one urban agglomeration was constituted namely 'Delhi Urban Agglomeration' which includes all the three towns, viz., New Delhi Municipal Committee, Delhi Cantt. and Delhi Municipal Corporation (Urban). No part of rural Delhi was tagged with it.

The following statement gives the distribution of 1,000 persons in each class range for Delhi urban Agglomeration into nine industrial categories of workers and non-workers by sex.

B-III PART-A—CLASSIFICATION OF WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY BY EDUCATIONAL LEVELS IN URBAN AREAS ONLY

B-III PART-A—CLASSIFICATION OF WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY BY EDUCATIONAL LEVELS IN URBAN AREAS ONLY

FLY LEAF

Table B-III Part-A relates to urban areas only. The educational levels adopted for this table are more elaborate than those for table B-III Part-B for rural areas. Educational levels are given below:—

1. *Illiterate*
2. *Literate (without educational level)*
3. *Primary*
4. *Middle*
5. *Matriculation or Higher Secondary*
6. *Non-technical diploma or certificate not equal to degree*
7. *Technical diploma or certificate not equal to degree*
8. *Graduate degree other than technical degree*
9. *Post-Graduate degree other than technical degree*
10. *Technical degree or diploma equal to degree or post-graduate degree*
    - (*i*) *Engineering and Technology*
    - (*ii*) *Medicine*
    - (*iii*) *Agriculture, Veterinary and Dairying*
    - (*iv*) *Teaching*
    - (*v*) *Others*

This table gives the distribution of population classified by sex into nine industrial categories further cross-classified by educational levels for Delhi urban and three towns, namely N.D.M.C., Delhi Cantt. and D.M.C. (U)

This table is similar to table B-III Part-A of 1961. At the 1971 Census an additional educational level 'Middle' has been shown in this table and 'University degree post-graduate degree other than technical degree' of 1961 has been bifurcated into two separate educational levels viz (i) Graduate degree other than technical degree and (ii) Post-Graduate degree other than technical degree at the 1971 Census. Further Engineering, technology, Agriculture and Veterinary & Dairying shown separately at the 1961 Census have been combined as (i) Engineering and Technology' and (ii) Agriculture, Veterinary and Dairying at the 1971 Census.

Question Nos. 12 and 13 of the individual slip give information regarding literacy and educational level. The instructions for these two questions are given below. The other relevant question is Q. No. 16 which alongwith the instructions has been reproduced in Appendix I of this volume.

Question 12 : Literacy (L or O)

Definition of a literate : A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but can not write is not a literate.

It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

For a person who is literate i.e., who can both read and write, record 'L' in the triangle against question 12. If there is any doubt about a person's ability to read or write, the test that may be applied for reading is his/her ability to read any portion of the printed matter in the Enumerator's Instructions and similarly for writing he/she should be able to write a simple letter. Ablity merely to sing one's name is not adequate to qualify a person as being able to write with understanding. If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondent's word has to be taken as correct. Other members of the household may also be table to testify to the literacy of the person enumerated.

For a person who is illiterate i.e. who can neither read nor write or can merely read but cannot write, in any language write 'O' in the triangle against question 12. All children of the age of 4 years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

Question 13 : Education level :

This question will be asked of those for whom 'L' has been recorded against question 12. For a person who is illiterate and 'O' has been put against him in the answer to question 12, there is no advantage is ascertaining the educational level even if he had at some stage attended school and passed a standard and had relapsed into illiteracy. In such a case you should put 'X'. You have to ascertain and record the highest educational level attained by a person for whom 'L' is recorded in answer to question 12.

For a person who is still studying in a particular class, the highest educational level attained by him will be one that he has actually passed and not the one in which he is studying. For example, a person studying in 1st

year B.A. should be recorded as only 'PUC' or 'Higher Secondary', as the case may be. Similarly, a person studying, say in the 4th year of 'MBBS' should not be noted as 'MBBS' but as 3rd year 'MBBS' which is the highest level he has actually attained. If you are not sure whether a person has passed Primary, Middle, Higher Secondary or other definite levels, you may record the actual standard passed such as say IIIrd standard VIIIth standard, 1st year B. Com. etc. III.

The highest educational level attained by the person enumerated should be recorded. When a person holds both general and technical qulifications both of which are of equivalent level such as say B.Sc. (Zoology) and M.B.B.S. or B.A. (Maths) and B.E. (Bachelor in Engineering), the technical qualification should be given preference in recording the highest educational level attained. Where the general educational level is higher than the technical educational level or where it is not possible to decide which of the two levels is relatively higher, the highest level of education as returned by the person concerned should be recorded.

In recording the highest educational level of a graduate or a post-graduate, subject of specialisation such as (B.Sc.) (Maths.), M.A. (Economics), M.Sc. (Botany), B.Sc. (Agriculture), etc., should be noted. You should not use abbreviations which are not in common use. In such cases, the degree or diploma should be spelt out fully.

The following statement gives the distribution of 1,000 workers in each industrial category by educational levels in urban areas.

B-IV PART-A—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN AT CULTIVATION AS MAIN ACTIVITY BY SEX AND DIVISIONS, MAJOR GROUPS AND MINOR GROUPS

B-IV PART-A—INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK OTHER THAN AT CULTIVATION AS MAIN ACTIVITY BY SEX AND DIVISIONS, MAJOR GROUPS & MINOR GROUPS

FLY LEAF

This is one of the main economic tables of 971 Census and gives the industrial classification of workers other than cultivators (Category I) and Agricultural labourers (Category II), by divisions, major groups and minor groups of National Industrial Classification, 1970 which is reproduced in Appendix II of this volume.

The correspondence between the industrial categories and N.I.C. 1970 adopted for table B-IV is given below:

Category	Industrial divisions of N.I.C. 1970
I & II	*These have not been separately coded for industrial classification as they form district categories in themselves*
III.	*Industrial division 0 (except minor groups 000 to 006)*
IV	*Industrial division 1*
V(a)	*Industrial division 2 & 3, if the industry is a household industry*
V(b)	*Industrial division 2 & 3, if the industry is not a household industry*
VI	*Industrial division 5.*
VII	*Industrial division 6 & 8*
VIII	*Industrial division 7*
IX	*Industrial division 4 & 9*

At the 1971 Census also, the workers have been classified both according to their industry and their occupation as done at the time of 1961 Census. This table gives the classification according to industry while tables B-V and B-VI gives the occupational distribution. The comparative chart of National Industrial Classification 1970 and Standard Industrial Classification 1960 as adopted by Registrar General's Office is given in Appendix III of this volume.

In this table data on employment status have not been given but the figures for minor groups of N.I.C. 1970 have been published.

The data are presented for Delhi Total and Delhi Urban. In case of N.D.M.C., Delhi Cantt. and D.M.C. (Urban) the data are presented in the table for urban areas only. As the figures for 'Total and 'Urban' in these cases will be the same, the same have been presented for urban only.

This table is supplemented with an appendix which gives the same information as table B-IV Part-C of 1961 in so far it relates to manufacturing, processing servicing and repairing workers. In this appendix, the workers have been classified by household industry and non-household Industry. As already pointed out in the note, the household industry at the 1971 Census covers activities falling under divisions 2 & 3 only as against the activities under divisions 0, 1 and 2 & 3 coverd at the 1961 Census.

The following statements based on Table B-IV Part-A and its appendix give the distribution of 1,000 persons into different characteristics of the main table.

B-IV PART-B—INDUSTRIAL CLASSIFICATION OF WORKERS IN MANUFACTURING, PROCESSING, SERVICING AND REPAIRS ON HOUSEHOLD INDUSTRY BASIS AS MAIN ACTIVITY BY SEX AND CLASS OF WORKERS

B-IV PART-B-INDUSTRIAL CLASSIFICATION OF WORKERS IN MANUFACTURING, PROCESSING, SERVICING AND REPAIRS ON HOUSEHOLD INDUSTRY BASIS AS MAIN ACTIVITY BY SEX AND CLASS OF WORKEKS.

FLY LEAF

This table gives the statistics of workers in household industry for total, rural and urban areas by sex. The workers are further classified by class of workers i.e. employees and single workers for divisions and major groups of N.I.C. 1970.

This table broadly corresponds to table B-IV Part-A of 1961 Census with the only difference that in 1971, this table provides data for two classes of workers, namely employees and single workers and the number of family workers can be derived from the table itself while at the time of 1961 Census, the data were presented for employees and others only in table B-IV Part-A.

This statisties have been presented for total, rural and urban areas of Delhi Union Territory and its three towns namely (1) New Delhi Municipal Committee (2) Delhi Cantt. and (3) Delhi Municipal Corporation (Urban). In case of towns, the data have been presented for 'urban' only.

The relevent instructions are given in Appedix I and the description of divisions and major groups of N.I.C. 1970 can be found in Appendix II to this volume.

B—IV PART-C CLASSIFICATION OF WORKERS IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE AS MAIN ACTIVITY BY CLASS OF WORKERS BY AGE AND SEX

FLY LEAF

This table is an innovation of 1971 Census and has been prepared for total and urban areas. It gives age-composition of each class of workers engaged in activities in non-household industries, trade, business, profession or services. The age-groups adopted in this table are 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60 + and age not stated. The workers other than cultivation (category I & II) and household industry (category V (a)) are further classified into the class of workers namely (1) Employers (2) Employees (3) Single workers and (4) Family workers. This table gives very significant information to the various data users.

The relevant instructions are given in Appendix I to this volume.

This table has been prepared for total and urban areas of Delhi. The data for rural areas have not been presented separately but can be had by substracting the urban figures from the total figures. The statistics have also been presented separately for three towns of Delhi namely (1) New Delhi Municipal Committee (2) Delhi Cantt. and (3) Delhi Municipal Corporation (Urban). In case of towns the data have been presented for urban only as the figures for total and urban are same in these cases.

The following statement gives the distribution of 1000 workers of each age-group, into different class of workers by sex for total and urban areas of Delhi

FLY LEAF

This table relates to workers other than those engaged in cultivation (Category I—Cultivators and Category II—Agricultural labourers) or in household industry (Category-V(*a*)) and gives their distribution by each class of workers viz., employers, emplyees, single workers and family workers by divisions and major groups of N.I.C. 1970 which is reproduced in Appendix II to this volume.

This table corresponds to table B-IV Part-B of 1961 and is presented for total and urban areas. The statistics for rural areas are not presented separately but can be easily derived by substracting the figures of urban from total. The data have also been presented separately for the three towns of Delhi Union territory namely (1) New Delhi Municipal Committee (2) Delhi Ca tt. and (3) Delhi Municipal Corporation (Urban.) In these cases, the data have been presented for urban only as the figures for total and urban are same.

This table is based on the answers to question 16 (*f*) of the individuals slip. The question and the instructions have been reproduced in Appendix I to this volume. The classes of workers are same as those in table B-IV Part-C.

The following statement gives the distribution of 1,000 workers in each sex by class of workers in each industrial division for total and urban areas of Delhi.

B-V PART-A---OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION

B-V PART-A—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION

FLY LEAF

This table corresponds to table B-V of 1961 and gives the occupational distribution of workers who are engaged in non-agricultural occupations according to the three digit code structure of N.C.O. 1968. According to this code structure, all occupations are classified into occupational divisions (one digit code numbers), occupational groups (two-digit code numbers) and occupational families (three-digit code numbers). This code structure is reproduced in Appendix IV to this volume for ready reference.

Occupational data presented in this table is cross-classified with the following broad industrial categories of workers :

Category III	*Livestock, forestry, fishing, hunting and plantations, orchards and allied activities*
Category IV	*Mining and Quarrying*
Category V	*Manufacturing processing, servicing and repairs*
(*a*)	*At household industry*
(*b*)	*Other than household industry*
Category VI	*Construction*
Category VII	*Trade & Commerce.*
Category VIII	*Transport, storage and Communications*
Category IX	*Others Services*

This table has been compiled from the material available from Q. 16 (*e*) of the individual slip. The instructions to enumerators on the mode of recording answers to the economic questions are reproduced in Appendix I to this volume.

In this table, data are presented for total and urban areas of Delhi. Figures for rural areas can be had by substracting the figures of urban areas from the total figures. In case of N.D.M.C ,Delhi Cantt. and D.M.C.(U) the figures of total and urban being thesame, these have been presented for urban in the table thereby restricting the columns of the table upto 4 only. Nil entries have been ommitted from the table.

The following three statements give :

(*i*) *percentage of workers in each occupational division among total workers excluding those engaged in cultivation for Union Territory of Delhi,*

(*ii*) *percentage distribution of workers in each occupational division into broad industrial category (other than categories I & II), and*

(*iii*) *percentage distribution of workers in each broad industrial category (other than in categories I & II) among the occupational divisions.*

STATEMENT I

Percentage of workers in each occupational divisions among total workers excluding those engaged in cultivation for Union Territory of Delhi.

B-V PART-B OCCUPATIONAL CLASSIFICATION BY SEX AND CLASS OF WORKERS IN NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS, PROFESSION OR SERVICE AS MAIN ACTIVITY

FLY LEAF

This table has been attempted for the first time at the 1971 Census and gives the distribution of workers other than those engaged in cultivation or in household industry, by divisions and groups of National Classification of Occupations. These have been further classified into different classes of workers i.e. employers, employees, single workers and family workers. The industrial classification by sex and class of worker was available at the 1961 census also but occupational classification by sex and class of workers is an innovation of 1971 census and gives very useful information in respect of workers of all industrial categories [other than those in categories, I, II and V (a)] in regard to their employment status in different occupations.

The table has been prepared for total and urban areas of Delhi. The figures for rural areas could be had by substracting the figures for urban areas from the 'total figures. The statistics have also been presented separately for the three towns of Delhi union territory namely (1) New Delhi Municipal Committee (2) Delhi Cantt. and (3) Delhi Municipal Corporation (Urban). In these cases, data have been presented for urban only as the figures for total and urban are same.

The relevant instructions are givea in Appendix I and the description of divisions and groups of National Classification of Occupation is given in Appendix IV to this volume.

The following statement gives the distribution of 1,000 workers [other than category I, II and V (a)] in each sex by class of workers in each occupational division for total and urban areas of Delhi.

FLY LEAF

This table presents the occupational distribution of persons at work other than at cultivation by sex and broad age-groups upto divisions and groups of National Classification of Occupation for urban areas only. The population under each division and group of N.C.O. has been classified by nine age-groups 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, 60+ and age not stated. This is a very useful information available at the 1971 Census in respect of workers both illiterate and literate of all categories except categories I & II. In 1961, such information was available in respect of literate workers upto Occupational divisions only.

The relevant, instructions are given in Appendix I and the description of divisions and groups of N.C.O. is available in Appendix IV to this volume.

The statistics have been presented for urban areas of Delhi Union territory and its three towns namely (1) New Delhi Municipal Committee (2) Delhi Cantt. and (3) Delhi Municipal Corporation (Urban). Age-groups having nil figures have not been shown in the table.

The following statement gives the distribution of 1,000 workers of each occupational division by age groups.

The combined information compiled in table B-VI part A (*i*) and B-VI Part A (*ii*) of 1971 was available in only one table B-VI table of 1961 upto occupational divisions only.

The relevant instructions are given in Appendix I and the description of occupational divisions and groups is available in Appendix IV to this volume.

The statistics have been presented for urban areas of Delhi Union territory and its three towns namely New Delhi Municipal Committee (2) Delhi Cantt. and (3) Delhi Municipal Corporation (Urban).

The following statement gives the distribution of 1,000 literate workers other than cultivation in each occupational division by educational levels.

B-VI PART-B (i)—OCCUPATIONAL CLASSIFICATION OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION BY SEX AND AGE-GROUPS IN RURAL AREAS ONLY

B-VI PART B (I)—OCCUPATIONAL CLASSIFICATION OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION BY SEX AND AGE-GROUPS IN RURAL AREAS ONLY

FLY LEAF

This is a new addition at the time of 1971 Census. It gives the occupational classification of persons at work other than at cultivation by sex and broad age-groups upto divisions and groups of National Classification of Occupation for rural areas only. The age-groups are similar to those adopted in table B-VI Part-A (*i*). Age-groups having nil figures have not been shown.

In 1961, the occupational classification by age-groups and educational levels was presented together in one table for urban areas only.

The following statement gives the distribution of 1,000 workers of each occupational division by age-groups.

B-VI PART B(ii)—OCCUPATIONAL CLASSIFICATION OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION CLASSIFIED BY SEX AND EDUCATIONAL LEVELS IN RURAL AREAS ONLY

FLY LEAF

This is new addition at the time of 1971 Census. It gives the occupational distribution of persons at work other than at cultivation by sex and educational levels upto divisions and groups of National Classification of Occupation for rural areas only.

The educational levels adopted for this table are as follows :

Primary

Middle

Matriculation or Higher Secondary

The educational levels viz., (*i*) Non-technical diploma or certificate not equal to degree and (*ii*) Technical diploma or certificate not equal to degree which appear separately in table B-III Part B relating to rural areas, have been merged with educational level, 'Matriculation or Higher Secondary' in this table.

The relevant instructions are given in Appendix I and the description of occupational divisions and groups can be found in Appendix IV to this volume.

The following statement gives the distribution of 1,000 literate workers other than cultivation in each occupational divisions by educational levels in rural areas only.

This is a comprehensive table providing statistics of main activity by secondary work. The persons having main activity as cultivators ; agricultural labourers ; working at household industry ; at non-household industry, trade, business or service have been further cross-tabulated in case of persons whose secondary work is either (*i*) cultivation or (*ii*) agricultural labourer or (*iii*) household industry or (*iv*) non-household industry, trade, business or service.

For the first time in Census history, an attempt was made during 1961 Census to collect information about the principal and subsidiary work in respect of persons engaged in more than one type of work and also. to tabulate the work in respect of certain categories of subsidiary work. Two tables B-VII Part-A and B-VII Part-B were prepared in 1961. Part-A showed the distribution of persons whose principal work was given as cultivator, agricultural labourer or working at household industry and whose secondary work was any one of the remaining two categories Part-B presented the distribution of persons whose principal work was as non-household industry, trade, business, profession or service and whose secondary work was shown as household industry.

Thus table B-VII of 1971 gives more detailed information in respect of persons having secondary work Even the persons whose main activity has been classified as non-worker and have any secondary work, have been taken into account at the 1971 Census.

This table is supplemented by an appendix giving detailed distribution of persons having secondary work as non-household industry. The secondary work is presented upto major group level (two digit code of N.I.C.) and the main activity is presented at division level (one digit code of N.I.C.). Details of persons whose main activity is a housewife or a student or other non-workers but who also participate in some work as a secondary work have also been shown here.

This table alongwith its appendix has been prepared for total, rural and urban areas of Delhi Union Territory and its three towns namely (1) New Delhi Municipal Committee (2) Delhi Cantt. and (3) Delhi municipal Cirporation (Urban).

The relevant instructions have been given in Appendix I to this volume. The description of divisions and major groups of N.I.C. 1970 have been given in Appendix II to this volume.

Non-workers are classified into seven types and their distribution by sex and broad age-groups into each of these types is shown in table B-VIII. This table covers largely the unemployed persons categorised as others aged 15 and above in urban areas only. The non-working population of age-groups 15—19, 20—24, 25—29 and 30+who were categorised as others at census enumeration has been further classified by various educational levels which are similar to those presented in table B-III Part-A.

This table has been prepared for urban areas of Delhi Union Territory and its three towns namely (1) New Delhi Municipal Committee (2) Delhi Cantt. and (3) Delhi Municipal Corporation (Urban).

The relevant instructions have been given in Appendix I to this volume. The questions on 'literacy' and educational level, have been discussed in the fly-leaf to table B-III Part-A.
