GENERAL ECONOMIC TABLES

B-V to B-IX

C. C DOCTOR
of the Indian Administrative Service
DIRECTOR OF CENSUS OPERATIONS, GUJARAT

PREFACE

Part II-B of the 1971 Census publications is expected to present the economic tables in the India series, as also in each State series The economic tables of the census are in the alphabet 'B' series There are nine tables in all—some with more than one part Only two of them, viz, B-I Part A and B-II, were produced on a full count. These two tables relating to Gujarat and its sub-divisions have already been published under the title Part II-B(i).

The volume, designated as Part II-B (ii), comprises of Tables B-I Parts B, B-III Parts A & B & B-IV Parts A,B,C & D; and Part II-B (iii) gives the remaining economic tables relating to Gujarat and its sub-divisions All these tables have been estimated on the basis of a 10% sample of individual for rural areas and of a 20% sample for urban areas. The sampling fraction being different for the rural from that for the urban, it became necessary to blow up the sample values to 100 per cent in order to present the estimates in these tables. Thus, the tables present 100 per cent value estimates. None of the tables presents sample values.

The job of blowing up the sample values to 100 per cent has taken not only considerable time, but has also taxed the abilities of the staff to a considerable extent. In the case of most of the tables it became necessary to work out multipliers for each of the cells in the tables and to estimate the 100 per cent value separately for each cell by applying the concerned multiplier. This was because it was considered necessary that the peripheral totals in the estimated tables be fully consistent arithmetically with the figures presented in the full count tables already published. In the case of rural tables, all this, that is, working out of multipliers and then arriving at the estimates in each cell by applying the concerned multiplier, was done by the staff in the State Census directorate. In the case of the urban areas, the Data Processing Division of the Registrar General's office produced on the electronic computer the tables showing the sample values and also the multipliers. The job of arriving at the 100 per cent estimates and of ensuring consistency of the figures not only with the full count tables, but as also between one estimated table and another, had again to be done by the staff in the State Census directorate. The final tables thus prepared had to be referred again to the Census Division in the Registrar General's office for clearance. An idea as to the number of processes that had to be gone into before the final tables were produced can be had from the above description of the jobs which were involved in their preparation The complicated processes involved this time explain the considerable time-lag in presenting these tables to the reader

Shri CC Doctor held the office of Director of Census Operations, Gujarat, till September 1973. The credit for the progress made till then in producing these tables naturally goes to him He, however, left us at a juncture when the estimated tables of the 1971 Census were not even halfway through. The Data Processing Division had not even taken up production of the Gujarat tables on the computer till then. The bulk of the work relating to tables presented in this volume was attended to later, that is, after the departure of the Director of Census Operations. I assumed charge of the Census Directorate of Gujarat on 1 January 1976. The explanatory notes to the various tables presented in this volume happen to be my humble contribution, reinforced by very valuable assistance from Shri M.L. Sharma, Asstt. Director (Tech.).

The arduous task of scrutiny and compilation of the tables and preparation of the fly-leaves and appendices fell on the Census Tabulation Section of this directorate. I am grateful to all my colleagues for the pains they took to bring out this volume. Particular mention has been made of some of them at the end of this note.

Our sincere acknowledgements are due to Shri A. Chandra Sekhar, who as Registrar General, India, directed the 1971 Census Operations. We have received equally valuable guidance and encouragement from Shri R.B. Chari, who succeeded Shri A. Chandra Sekhar, as Registrar General, India, towards the end of 1973. I place on record our acknowledgement of gratitude to him.

I should not fail to mention that had it not been for the keen interest and enthusiasm displayed by the Data Processing Division and the Census Division of the office of the Registrar General, India, headed by able ARGs Shri S.C. Sharma and Shri K.K. Chakravorty, it would hardly have been possible for us to bring out this publication.

Further, this directorate is grateful to M/s. Sunlight Printers, Delhi for the interest they took in the printing of this volume.

INTRODUCTORY NOTE

Economic data are being collected right from the first regular Census which was conducted in 1872. The concept and definition adopted for economic classification of the population however, varied from census to census. The earlier Censuses adopted the concept of 'Source of Livelihood' for presenting economic classification of the population. Under each livelihood class, three sub-classifications viz. (i) self supporting, (ii) earning dependents, and (iii) non-earning dependents, were presented by applying the criterion of income earned. Only the 'self-supporting' category based on the concept of 'income derived' was treated as economically active in the particular field. The income approach had the effect of excluding unpaid family workers i.e. persons who took part along with members of the family in carrying on cultivation or a household industry as a family enterprise. Persons deriving income from land or property etc. although not working were also treated as economically active.

At the 1961 Census, every individual who participated in 'work' as defined was classified as economically active. The 'work' approach counted also family workers who were not in receipt of any income and working children who could not earn enough for their maintenance as 'workers'. Work included not only actual work but effective supervision and direction also.

The concept of worker at the 1961 Census proved to be too liberal since even one hour's work a day was considered sufficient for treating the individual in question as a 'worker'. This resulted in an inflated figure of workers. Persons who were basically non-workers, like housewives, students etc. were also regarded as workers even though their participation in economic activity was only marginal. In the 1971 Census, therefore, the emphasis was on 'main activity' of a person. The main activity of a person was defined as activity in which he was engaged mostly. Every person has been categoraised as 'worker' or 'non-worker' according to the main activity reported by him.

A 'worker' Census has defined as a person whose main activity is participation in any economically productive work by his physical or mental activity. Work includes not only actual work but effective supervision and direction of work.

The following economic questions were asked in respect of every individual at the 1971 Census :—

Q. 16. Main Activity

(a) Broad Category—

(i) Worker (Cultivator or Agricultural labourer or Household Industry or other worker), or

(ii) Non-worker (Household duties or student or retired person or dependent or beggar or vagrant or inmate of charitable or penal institution or other non-worker).

(b) Place of work (Name of village/town)

(c) Name of establishment

(d) Nature of industry, trade, profession or service

(e) Description of work

(f) Class of worker

Q. 17. Secondary Work

(a) Broad category (Cultivator or Agricultural labourer or Household industry or other worker)

(b) Place of work (Name of village/town)

(c) Name of establishment

(d) Nature of industry, trade, profession or service.

(e) Description of work

(f) Class of worker

The relevant extract of the instructions to the enumerators for filling up the individual slips in regard to economic questions have been given in Annexure-I

15	B-VI Part B (ii)	Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in rural areas only.
16	B-VII	Secondary work i.e., persons having main activity (i) cultivators (ii) agricultural labourers (iii) household industry (iv) non-household industry, trade, business or service and (v) non-workers classified by sex and by secondary work (i) cultivator (ii) agricultural labourer (iii) household industry (iv) non-household industry, trade, business or service.
Appendix to B-VII		Distribution of persons having secondary work as non-household industry.
17	B-VIII	Persons classified as non-workers according to main activity crossclassified by sex, age-groups and type of activity.
18	B-IX Part A	Non-workers categorised as others aged 15 and above classified by sex, age-groups and educational levels in urban areas only.
19	B-IX Part B	Non-workers categorised as others aged 15 and above classified by sex, age-groups and educational levels in rural areas only.

It is for the first time at the 1971 Census that sampling has been resorted to for generating the tables which present classification of the population by various detailed characteristics. Of the General Economic Tables mentioned above only the first two, viz., B-I Part A and B-II are based on full count and

have already been published in a sub-part i.e. Part II-B(i) of this series. The present volume is the second sub-part viz. Part-B (ii) contains the remaining 17 tables and the two Appendices. All the tables that are presented in this volume are based on the data generated by processing 20% sample slips in respect of urban areas and 10% sample slips in respect of rural areas. A technical note on the sampling procedure adopted at the 1971 census is given as Annexure-II to this note.

Industrial and occupational classification of workers

For a better appreciation of the data presented in the various economic tables, it would be necessary to understand the industrial and occupational classifications that have been followed in classifying the working population (i) according to the industry in which a person was working and (ii) according to the occupation of each individual. This has been done on the basis of the information obtained against Q.16(d) and Q.16(e) of the individual slips.

For the two fold 'industrial' and 'occupational' classification of the working population, the "National Industrial Classification 1970" (NIC 1970) as adopted by the office of the Registrar General, India and the 'National Classification of Occupation 1968' have been used. The classifications are based on the three digit codes. In respect of the industrial classification, the first digit represents 'Industrial Division', the second represents 'Major Group' and the third respresents 'Minor Group' while in the case of occupational classification the first digit represents 'Occupational Division', the second, Occupational Group' and the third 'Occupational Family'. The three-digit code lists of Industrial Classification and Occupational Classifications are reproduced as Annexures III & IV respectively to this note.

On the basis of industry the working population has further been classified into nine broad industrial categories viz. Category I i.e., as cultivators; Category II i.e., as Agricultural labourers; Category III i.e., in Livestock, forestry, fishing, hunting and plantations, orchards and allied activities; Category V i.e. Mining and Quarrying, Category V i.e. in Manufacturing, processing, servicing and repair; Category VI i.e. in construction; VII i. e. in Trade and Commerce; VIII i.e. in Transport, storage and communications; and category IX i.e. in other services. Category V is divided into two sub-categories viz. V(a) i.e. at Hosehold Industry and V(b) other than household industry.

The correspondence between the nine industrial categories and the industrial division of NIC, 1970 is given below :—

Category	*Industrial classification of NIC*
I	These two categories formed distinct
II	Categories in themselves and have been classified as such These categories therefore need no separate coding as per NIC.
III	Industrial Division 0
IV	Industrial Division 1
V(a) V(b)	Industrial Divisions 2 & 3
VI	Industrial Division 5
VII	Industrial Divisons 6 & 8
VIII	Industrial Division 7
IX	Industrial Divisions 4, 9 & X

It follows that two digit codes (i.e. Major Groups) or three digit codes (i.e. Minor Groups) wherever they appear beginning with the first digit say 7, would mean the economic activities relating to category VIII i.e., transport, storage and communications. For example figures appearing against Minor Group say 751 in Table B-IV Part A indicate the number of workers engaged in telephone communication.

Similarly figures appearing against Family 942 in Table B-V Part A indicate the number of workers having their occupation as 'Basketry weaving and Brush making'.

There is a slight departure from the 1961 Census, as regards presentation of data into the nine industrial categories this time. Mining and quarrying have been assigned a separate category i.e. Category IV in 1971 as against the combined category III in 1961 viz. Mining, quarrying, livestock, fishing, hunting plantation, orchards and allied activities. The 1961 category IV of household industry is a sub-category viz category V(a) in 1971. At the 1961 Census Household industry included like cattle rearing, bee keeping, orcharding, plantation etc. apart from those activities falling under Division 2 & 3 i.e., manufacturing and processing, servicing, repairs etc. At the 1971 Census, Household industry is confined to activities falling under Division 2 & 3.

ANNEXURE I

EXTRACT FROM THE INSTRUCTIONS TO ENUMERATORS FOR FILLING UP INDIVIDUAL SLIP, CENSUS 1971

Question 16 : Main Activity

78. Every person will be asked what his main activity is, that is, how he engages himself mostly. For the purpose of this question, all persons will get themselves divided into two broad streams of main activity namely, (1) as workers and (2) as non-workers according as the type of main activity that the person returns himself as engaged in mostly.

79. *'Worker' defined*: A 'worker' is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work.

80. *Reference periods:* The reference period is one week perior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during this reference period and this has been returned as his main activity, the person will be categorised accordingly. A person who normally works but had been absent from work during this reference period on account of illness or travel, holiday, temporary breakdown, strike etc., the person should be treated as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages should be considered, as economically active and recorded as working. A person who has merely been offered work but has not actually joined it, is not to be treated as engaged in work.

81. There are certain types of works which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry, etc. A person's main activity should be ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration. It is likely that even when a person is engaged in some other work during the period of one week prior to the date of enumeration, the main activity of the person may be cultivation, agricultural labour or some other work attended to normally by him in the course of the year. Care must be taken to see that the main activity is properly ascertained in such cases. For example, a person's main activity may be agricultural labour and in the week prior to enumeration he may be engaged as a sugarcane factory labourer or as a road coolie. He should be categorised for his main activity as agricultural labourer only as returned by him as he engages himself mostly in that work and the other work should be treated as his subsidiary work.

82. A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a student attending institution, even if such a person helps in the family economic activity but not as a full time worker should *not* be treated as a worker for the main activity. On the other hand, if a person is primarily engaged in some economic activity but at the same time does also attend to some household chores or attends a night school etc., he or she should be treated basically as a worker for the main activity and categorised accordingly.

83. A person who merely receives an income such as a rent receiver or a pensioner who does not have to work for receiving the income, will not be treated as economically active unless the person is also engaged in some economic activity and if that activity is returned as the main activity of the individual.

Q. 16(a) Broad Category (i) Worker (C, AL HHI, OW) (ii) Non-worker (H,ST,R,D,B,I,O).

84. The main activity returned by the person will entitle him to be categorised either as a worker in 16 (a) (i) or as a non-worker under 16 (a) (ii).

16 (a)(i) Worker (C, AL, HHI, OW)

85. Where the main activity of a person qualifies him to be treated as a worker he should be further categorised according to the type of work and one of the appropriate abbreviations indicated against this question should be entered in the box provided for the purpose. If the person is not engaged in any economic activity an 'X' should be noted in the box. The abbreviations to be used for workers are explained below :

C : CULTIVATOR

86. For a person who returns his main activity as working as a cultivator, the abbreviation 'C' should be used.

87. *Defination of Cultivator* : For purposes of the census a person is working as cultivator if he or she is engaged in cultivation by oneself or direction in one's capacity as the owner or lessee of land held from Govt. or as a tenant of land held from private persons or institutions for payment of money, kind or share.

88. Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy jowar, bajra ragi etc., and pulses, raw jute and kindred fibre crop, cotton etc., and other crops such as sugarcane, groundnuts tapioca, etc., and does not include fruit growing, vegetable-growing or keeping orchards or groves or working of plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

89. A person who merely owns land but has given out land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land for wages in cash, kind or share (Agricultural labourer) will not be treated as cultivator in this question.

AL : Agricultural Labourer

90. A person who returns his main activity as engaged as agricultural labourer, the abbreviation 'AL' should be used in the box.

91. *Definition of an Agricultural Labourer* : A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He has no risk in the cultivation but he merely works in another person's land for wages. The labourer could have no right of lease or contract on land on which he works.

H.H.I. : Household Industry

92. For a person who returns his main activity as engaged in some production, processing servicing or repair of articles of goods such as, say, handloom weaving, dyeing, carpentry, *bidi* rolling, pottery manufacturer, bicycle repairing, blacksmithy, tailoring etc., it has to be ascertained if it is a household industry, and if so, it should be indicated by the abbreviation 'HHI' in the box.

93. *Definition of a Houeshold Industry*

A Household Industry is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

94. The main criterion of a Household Industry is the participation of one or more members of a household. This criterion should apply to urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the Houschold Industry should be confined to the precincts of the house where the participants live.

In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home, it will not be considered a household industry. It should be located within the precincts of the house where the members live.

95. A Household industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as a pleader or doctor or barber, musician, dancer, waterman, *dhobi*, astrologer, etc., or merely trade or business, even if such professions, trade or services are run at home by members of household. A list of a few typical Household Industries is appended to these instructions at Appendix III.

96. Sometimes it is likely that the person who may not be working in his own Household Industry may be working as a petty employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry as an employee and record as per instructions given above.

OW : Other Workers

97. If a person gives his main activity as engaged in any other work which is not cultivation, agricultural labour or household industry, this may be indicated by merely noting 'OW' in the box. The type of workers that may come under the 'Other Workers' category are factory workers, those working in trade or transport, all Government servants, municipal employees, teachers, mining workers, political or social workers, building labourers, etc. etc. In effect, all types of economic activity not covered by cultivation, agricultural labour or household industry will come under this residual category. Workers engaged in plantation or forestry should not be treated as cultivators or agricultural labourers but as 'Other workers'.

98. Further details pertaining to this 'Other' category of workers, as also those engaged in household industry, will be recorded in the subsehuent sub-parts (b) to (f) of question 16.

16(a) (ii) Non-worker (H, ST, R, D, B, I, O)

99. As was stated earlier, question 16 is intended to ascertain the main activity of every individual whether he or she is economically active or not. While 16 (a) (i) helps to broadly categories all those who have returned some work as their main activity, 16 (a) will help to categorise those whose main activity is not engaged in any economically productive work, but are basically non-workers. These may be categorised under seven broad heads whose abbreviations are indicated against this question. The appropriate abbreviations will have to be entered in the box provided. The abbreviations are explained below :

H : Household Duties

100. This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. The main activity of such a person should be entered as 'H'. If a person whose main activity is attending to household duties, also engages oneself in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale etc., that economic activity will be covered as secondary work under question 17. On the other hand, a woman who works primarily as a factory worker or plantation labourer or an agricultural labourer or in some office or shop etc.. and also attends to household duties, obviously her main activity will be the economic activity in which she is mostly engaged in and should not be categorised as 'H' for her main activity in this question. She should have been treated basically as a worker and her main economic activity should have been recorded against 16 (a) (i).

ST : Student

101. This refers to those whose main activity is returned as a student. This will cover all fulltime students or children attending school. Even if such persons participated in some work but not to the same extent as a full-time worker,

by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity. 'ST' should be entered in the box. The other economic activity, if any, that such persons attend to will be reflected under question 17 as secondary work.

R : Retired Person or a Rentier

102. A person who has retired from service and is doing no other work *i.e.* not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work, will come under this category, 'R' should be noted in the box for a person coming under this cotegory.

D : Dependent

103. This category will include all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. If a girl or an old woman attends to household duties she should be categorised under 'H' for her main activity rather than 'D'.

Dependents will include all non-workers even if able-bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

B : Beggars etc.

104. This will cover beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

I : Institutions

105. This will cover convicts in jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc., in such institutions. An under-tria prisoner in a jail should not, however, be brought under this category but has to be indicated according to the main activity he was engaged in before he was apprehended. Inmates of such institutions will be noted as 'I'.

O : OTHER NON-WORKERS

106. This will include all non-workers who may not come under any of the six categories above but are seeking work, they should be noted as 'O' in the box. A boy or girl who has completed education or has stopped studying and is seeking work, will come under this category. If a person is merely spending his time at home as a dependent and is not doing any work and is not seeking any work will come under 'D' rather than 'O'. A person irrespective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work will come under this category.

107. If the main activity of the person who is enumerated does not qualify a person to be treated as a worker and he does not fall under any of the four broad categories of workers covered by 16 (a) (i) and an 'X' has been put in the box against that question, then he must necessarily be categorised under any one of the seven broad types of non-workers and the appropriate abbreviation entered in the box opposite to question 16 (a) (ii). Conversely if a person has already been treated as a worker and his main activity has been indicated in the box against question 16 (a) (i), then question 16 (a) (ii) will not apply to the person and an 'X' should be put in the box against question 16 (a) (ii). Thus 16 (a) (i) and 16 a (ii) are mutually exclusive.

Q. 16 (b) to 16 (f)

108. These sub-parts of question 16 will have to be filled only to describe the details of the household industry or other work indicated against question 16 (a) (i). If the main activity has been shown as 'C' or 'AL' against 16 (a) (i), there is no need to give the details of the cultivation or agricultural labour in these sub-sections.

109. Similarly, if the main activity of an individual has been returned as a non-worker against Q. 16 (a) (ii), sub-sections (b) to (f) will not apply and a 'X' may be put right across all these questions.

Q 16(b): Place of work (Name of village/town)

110. Ascertain from each person who is already taken as a worker other than in cultivation or agricultural labour *i.e.* question 16 (a) (i) has been answered as HHI or OW, the village or town where he or she works. If the place of work is the same as the village or town of enumeration write 'PL'. In all other cases you should write the name of the place fully. If a person has no fixed place of work such as, say, a travelling vendor of vegetables or a pedlar or a rickshaw puller who may go from one village or town to another, note 'No fixed place of work'. If he works in one particular town or village that should be noted.

Q. 16(c) : Name of Establishment

111. This question and the subsequent sub-sections of question 16 need not be answered for cultivators and agricultural labourers who are already noted as 'C' or 'AL' against question (16) (a) (i).

Record here the exact name of the factory, firm, workshop, business house, company, shop, office etc., and in respect of public offices you should clearly indicate whether they are Central or State Government or local body offices, etc. If the establishment does not have any definite name such as, say, in the case of a household industry like hand pounding of rice, gur making, bee keeping, handloom weaving, potter's house, blacksmithy etc., note 'No particular name'.

Q. 16(d) : Nature of Industry, Trade, Profession or Service

112. The answer to this question will have to be adequately precise to enable proper classification of the sector of economy in which the person is working. The sector of economy in which a person works may relate to (i) Plantation, Forestry, Fishing, Livestock etc., (ii) Mining and/or Quarrying (iii) Manufacturing (iv) Construction (v) Electricity, Gas or Water Supply (vi) Transport and Communications (vii) Trade and Commerce (viii) Professions and Services. Full details of the type of industry, trade, profession or service in which the person is engaged will have to be recorded here. To help you to appreciate the details that may have to be furnished to classify the economic activity appropriately, substantial description of various economic activities are furnished in Appendix II, categorised under certain broad classifications. The list in Appendix II is not exhaustive. You shall have to describe the nature of industry, Profession, Trade or Service whatever it is, in as precise a detail as possible.

Q. 16 (e) Description of work

113. This question has to be filled up for all persons for whom the main activity is shown as 'HHI' or 'OW' in question 16 (a) (i) and for whom you should have also to answer the other sub-sections of question 16. Under this question, the description of the actual work that the person enumerated is doing is to be recorded irrespective of which type of industry, trade, profession or service he may be working and which is already recorded under question 16 (d). His actual work should also be given in sufficient detail. If for example a person is merely recorded as say, clerk with no other details, it will be impoissible to properly categorise him as to the type of work he does. He may be a clerk attending to correspondence or book keeping or accounting. Similarly if a person were merely to be recorded as a mechanic, it will not help to determine what type of mechanic ; electrical mechanic or a motor mechanic or a locomotive mechanic, etc., he is. The description of the actual work done by a person should be ascertained in adequate detail and recorded against this question.

114. To guide you in answering question 16 (e), the types of particulars that need to be ascertained in respect of a few typical occupations are given in Appendix III.

Appendix III is by no means exhaustive. This just illustrates the need to ascertain the full details of the particulars of work performed by an individual for being recorded against question 16 (e).

115. It has been found in the past that substantial number of persons are recorded merely as general labourers. It is necessary to make a probe and find out in which type of work he is mostly engaged as a labourer such as, say, a road coolie, a loader or unloader at a market, a construction labourer, etc.

116. For those in Military Service it is enough if it is merely noted as 'in the service of the Central Government'. Other details need not be given.

General :

117. There need be no confusion as to the scope of 16 (d) and 16 (e). 16 (d) would represent the nature of industry, trade, profession or service i.e. the field of economic activity in which a person is engaged in work and 16 (e) represents the occupation or the actual work that the person does in the industry, trade, profession or service in which he is engaged. Thus, for example the answer to question 16 (d) may be say Cotton Textile manufacture and the answer to question 16 (e) may be Chemical Engineer in that industry or a clerk or an accountant in that industry or a labourer in that industry or a truck driver or the managing director of that industry and so on. Similarly in question 16 (d) the nature of service may be some department of the State Government Service and in question 16 (e) the description of work may be a clerk or an accountant, a Dircetor of the Deptt., jeep driver in the Deptt. etc., etc. Again say, against question 16 (d) the answer may be private medical practice and in 16 (e) may cover orthopaedic surgeon or nurse or a sweeper etc., working in that private medical practitioner's nursing home. The sample answers furnished in the specimens (Appendix IV) at the end of this annexure the Industrial and Occupational lists in Appendix II & III and the instructions given by your Superior Census Officers may help you to clear any doubts you may have in your mind regarding the scope of questions relating to Nature of Industry, Trade, Profession or Service covered by question 16 (d) and the description of actual work of the individual enumerated covered by question 16 (e)

Q. 16 (f) : Class of Worker :

118. For a person who is;

(i) an Employer, that is, who hires one or more persons in his work described in question 16 (e), write ... ... ER

(ii) an Employee, that is, who does his work described in question 16 (e) under others for wages or salary in cash or kind write ... ... EE

(iii) a Single Worker, that is, who is doing his work described in question 16 (e) without employing others except casually and without the help of other members of the family except casually and a participants in work as members of co-operatives, write ... ... SW

(iv) a Family Worker, that is, who is doing his work described in question 16 (e) in a family enterprise alongwith other members of the family without wages or salary in cash or kind write .....FW

For a person for whom an 'X' is put in questions 16 (d) and 16 (e) put an 'X' in this question also.

Explanation :

119. An Employer is a person who has to employ other persons in order to perform the work entered in question 16 (e). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in business mentioned in question 16 (e). But a persons who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

120. An Employee is a person who usually works under some other persons or salary for wages in cash or kind. There may be person who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees as explained above, and should not be regarded as employers.

121. A Single Worker for the purpose of question 16 (f) is a person who works by himself. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This defination

of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producer's co-operative. Each one of the partners or members of such producers' co-operatives sholud be recorded as 'Single Worker'.

122. A Family Worker is a member who works without receiving wages in cash or kind, in an industry. business, trade or service. For example, the working members in a family of *Dhobies* where they all participate and each does not receive wages separately will be family workers. There may be family workers in industry, trade or professions as well. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative.

123. Members of the household who help solely in household duties should not be treated as family workers.

124. In the case of persons engaged in household industry *i.e.*, in the case of persons for whom the answer to question 16 (a) (i) is 'HHI,' there will be three classes of workers *viz.*, Family Worker, Single Worker and Employee. There will be no Employer. Household industry by its very definition is conducted by the head of the household himself or/and other members of the household the role of hired workers being secondary. If the head alongwith the members of the household, working in a household industry employing hired workers, the head and other members who are working should be treated as 'Family workers'. If the head alone is working with the assistance of hired worker (s) whose role would be secondary as indicated above, he would be treated as a 'single worker'.

Some illustrations for filling the questions 16 or 17 are given in Appendix IV.

Q. 17 : Secondary Work

125. This question should be asked to every person whether he has returned some work as his main activity against 16 (a) (i) or had returned himself under any of the basically non-working categories against question 16 (a) (ii). As was noted earlier. 16 (a) (ii) will cover cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activty, still participating in some other economic activity such as helping the household in several items of work, as in cultivation or in household industry or in looking after the cattle, In attending to family business etc. but not to the extent as a fulltime worker. Such participation will be considered as secondary work of these persons.

126. Ask of each person if, besides what he had already returned as his/her main activity against questions 16 (a) (i) or 16 (a) (ii) he/she participated in any secondary work. A number of unpaid family workers participating in the household enterprises, who might have returned themselves mainly as 'H' or 'ST' or 'R' under question 16 (a) (ii) for their main activity will be noted here for their economic activity which is subsidiary. Mere rendering of service for ones own home or production of goods for purely domestic consumption are not to be treated as economic activity. For example, a servant who works as a cook in his or her employer's home for wages will be considered economically active but, a housewife, even if she may work much more than a paid servant, in having to cook for the family or looking after the household will not be treated as economically active for the purpose of this classification. Similarly, women who may produce cloth on a loin loom at home for domestic consumption will not be treated as economically active unless the products are sold and the household derives an income. Participation in work that goes to augment the income of the household will only be treated as economic activity. A boy whose main activity is shown as a student under 16 (a) (ii), can have the secondary work to say, cultivation if he helped the head of the household in the family cultivation during some parts of the season. But if a girl student, whose main activity is shown as 'ST' under 16 (a) (ii), also helped in weaving cloth purely for domestic consumption on a loin loom at

home, or helped in attending to household chores, she will not be treated as having any secondary work. Secondary work will be reckoned only if the person is engaged in some economic activity even if marginal in addition to whatever is the main activity under question 16. A person whose main activity is shown as say, a clerk in a Government Office or a teacher under question 16, also attends to some cultivation by his direct supervision or undertakes some tuition, this will be shown as secondary work undes question 17. A person's main activity may be cultivation in question 16 and his subsidiary activity money lending in question 17. Again main activity may be agricultural labourer and subsidiary work sugar factory labourer and so on and so forth.

125. The instructions for the usage of abbreviations in categorising workers under 16 (a) (i) and filling in the details under 16 (b) to (f), will apply *mutatis mutandis* to question 17 (a) to (f) except that while question 16 (a) (i) will cover the main work. Q. 17 (a) is intended to cover secondary work which may be possibly part-time. It may also be noted that the non-working categories of activity will not be reprted as secondary work under question 16.

ANNEXURE II

A note on the Sampling Procedure adopted in the 1971 Census

Sample Size

From the individual slips relating to the rural parts of a Tehsil/Anchal/Police Station, 10% sample of the slips was selected linear systematically with a random start. In the Urban part of the district a 20% systematic sample of the individual slips was selected with separate random start. The sample sizes were adopted on consideration of required precision, available, resources and operational convenience.

Selection procedure

The sample design adopted in 1971 census was stratified systematic sample of individual slips. For the purpose of sample selection, each district was divided into three—sub regions as follows :—

1 Tehsil/Anchal/Police Station (Rural)

2. Non-city Urban district

3. City (Urban unit with 100,000 & above Population)

These sub-regions were termed as operational units. If, however, any of the operational unit was unduly large, it was divided into sub-operational units of at least 20,000 persons. Similarly, small-sized operational units were either clubbed together or tagged on to a contiguous larger unit so as to form an "effective operational unit" of the require minimum size. Adoption of these operational units ensured accuracy in sample slection maintaining at the same time stability in the sampling fraction within the tabulated areas. The procedure adopted has ensured effective control over sample selection within each block, as also in the entire operational units.

For the purpose of the primary Census Abstract (PCA) the individual slips were sorted out according to ten broad industrial categories and nine broad age-groups for each of the sexes. The ten industrial categories of workers were as follows :-

Category

I	Cultivators
II	Agricultural labourers
III	Livestock, forestry, fishing, hunting and plantations, orchards and allied activities
IV	Mining and quarrying
V(a)	Manufacturing, processing, servicing and repairs in **household industry**
V(b)	Manufacturing, processing, servicing and repairs in **other than household** industry
VI	Construction
VII	Trade and commerce
VIII	Transport, storage and communications
IX	Other services
X	Non-workers

The nine age-groups into which the slips belonging to each industrial category were sorted, were 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59 60+ and 'age not stated'. Thus, the individual slips of a particular operational unit were sorted out in $11 \times 9 = 99$ cells separately for males and females. Sampling was done in each of the operational units independently by taking separate random starts. The slips were then distributed into 10 (or 5) pigeon holes for Rural (Urban) samples and one pigeon hole was selected at random, the slips falling in the selected pigeon hole constituting the sample. For the operational details of the sampling procedure and instructions, 'Manual of instructions on sorting, compilation (manual processing) & sampling procedures' may be consulted.

Estimation procedure :

The tables prepared for each of the Districts /States from the 10% rural and 20% urban sample slips have been inflated to give the final estimated

tables. Estimates have been obtained by making use of the cell frequencies (usually labelled as 'controls') available from the tables prepared on full count basis, namely, PCA and B-I Part A.

In order to ensure maximum possible inter-table consistency, it became necessary to use the estimated frequencies of a few of the final tables as controls for estimating some cell frequencies of other tables.

This way of estimating the cell frequencies ensured marginal totals of estimated tables tally with that of the full-count tables. This is convenient to the user, because after adjustment, the identical marginal totals are found in tables having the same marginal specification. "The adjustment diminishes the sampling variance to some extent; the more the controls the smaller the sampling variance of the adjusted frequencies".[1] Further, adjustments to known control totals has at the same time the effect of eliminating biases in the nature of inherent differences between the sample and complete count.

For the purpose of estimation of final tables, a set of multipliers was prepared for each table. A multiplier is the ratio of full count frequency of some characteristics from PCA or Table B-I Part A (or some estimated frequency from some already estimated table) and the corresponding sample frequency of the same characteristics from the sample table. The following statement gives the level of presentation of the tables and the related controls on which the multipliers are based. The details will be presented in the report on sampling procedures to be published later.

Table	Level of presentation	Control based from Table
B-I Part B	State	B-I Pt A & PCA

Reliability of the estimates: No exact formula can be given for the precision of the estimates in view of the systematic sampling design adopted. A very rough estimate of the relative standard error on the basis of simple random sample may be estimated as $\sqrt{(1-f)\frac{1-p}{np}}$ where 'f' is the proportion sampled (0.10 in case of rural areas and 0.20 in case of urban areas) and 'p' is the estimated proportion in any cell and 'n' the sample size being equal to 10% of individual slips in rural areas and 20% in urban areas. The size of the universe for the various values of the proportion from 0.000001 to 0.9 by percentage relative standard error shown in table I and II will help in deriving quickly an idea of the level of precision of any cell. Since in the present census, slips were sorted by sex, industrial category and age-group before sampling, it is expected that the efficiency must be considerably higher than a simple random sample of identical size. Extensive studies conducted have indicated that systematic sampling of individuals is more efficient than random sampling specially when the slips were pre-sorted for most of the socio-economic characteristics covered in a census[2]. Thus the estimates prepared on the basis of the systematic sampling in the present census can be expected to be quite reliable. Hence the standard error indicated by the table should be treated as an upper limit.

TABLE B—V PART A

NOTES

This table gives the occupational distribution of workers engaged in non-agricultural occupations cross-classified by industrial categories.

Data have been presented for total and urban areas of the State. Data for 'rural' areas can be worked out by substracting the 'urban' figures from 'total'.

For description of occupational codes, please see Annexure IV to the Introductory Note. The various industrial categories have been explained in the Introductory Note.

A word by way of caution is indicated in regard to the certain inconsistencies appearing in the data presented in this table. Some occupations are found to have been classified under inappropriate industrial categories which is due mostly to wrong coding of industrial categories. Such inconsistencies are listed in the statement appended hereto wherein the appropriate industrial category has been indicated alongside of each such inconsistent cases.

The magnitude of such error is however small and will not vitiate the quality of data presented in the table.

Table B—V Part A of 1971 corresponds to Table B—V of 1961 but this time data have been presented only for the State, while in 1961 data were presented for the State and its districts.

Table B-V Part B

Notes

This table gives the distribution of workers other than those engaged in cultivation (i.e. category I and category II) and Household Industry by Divisions, and Groups of National classification of occupations further classified into different class of workers.

Data have been presented for 'total' and 'urban' areas of the state. The figures pertaining to 'rural' areas can be obtained by working out the difference between 'total' and 'urban'.

For description of Division and Group codes of NCO, please see Annexure IV to the Introductory Note.

For definition of the terms 'Employers', 'Employees', 'single workers' and 'Family workers', please see paras 119 to 124 of the instructions to Enumerators for filling up individual slips, extract reproduced in Annexure I to the Introductory Note.

A point of note is that there is no one to one correspondence in the figures of 'total' appearing under columns 5 to 12 against 'All Divisions' in this table i.e. Table B-V Part B with those appearing respectively under columns 9 to 16 against 'All ages' in Table B-IV Part C and under columns 5 to 12 against 'All Divisions' in Table B-IV Part D which should normally exist. The difference is, however, very small in each case which has resulted because of the different sets of multipliers used for inflating the figures in these tables.

Classification of data of the type presented in Table B-V Part B was not attempted in earlier censuses. This is, therefore, a new table for 1971 Census.

Table B-VI Part A (i) & A (ii)
Table B-VI Part B (i) & B (ii)

NOTES

Table B-VI has two main parts viz B-VI Part A and B-VI Part B. Each part has two sub-parts viz. B-VI Part A (i) and B-VI Part A (ii) which present data relating to urben areas while sub-parts B-VI Part B (i) and B (ii) present data relating to rural areas. All the four sub-parts give the distribution of workers who are engaged in non-agricultural occupations by different characteristics as indicated below :—

Data have been presented in each sub-part for the state and its districts.

Table B-VI Part A (i) :—This sub-part gives the distribution of workers by occupational Divisions and Groups further cross-classified by eight age-groups viz. 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, 60+ and further group returning no age.

Table B-VI Part A (ii);—This sub-part gives the distribution of workers by occupational Divisions and Groups cross-classified by educational levels. The other two sub-parts viz. B-VI Part B (i) and B-VI Part B (ii) present data similar to those of B-VI Part A (i) and B-VI Part A (ii) but for rural areas as already indicated earlier.

Age of a person was recorded in complete years i.e. age at last birthday. For an infant below one year the age recorded was '0'.

The educational levels presented in Table B-VI Part A (ii) and B-VI Part B (ii) are respectively identical to those presented in Table B-III Part A and B-III Part B. For description of educational levels, please see notes in the fly-leaf to Table B-III Part A & B.

For description of Division and Group codes of NCO appearing under column 1 of each sub-parts please see Annexure IV to the Introductory Note.

In the 1961 Census, similar information as presented this time in 1971 in Table B-VI Part A (i) and A (ii) was furnished in a single table B-VI but the occupational classification presented in 1961 was up to Division level only. The other sub-parts viz. B-VI Part B (i) and B-VI Part B (ii) are new additions in the 1971 Census.

The departure in 1971 as regards classification of educational levels as compared to that of 1961 has been explained in the fly-leaf to Table B-III Part A & B.

Divisison X - Workers not classified by occupations.

Note—**(ii) In Gujarat State only two levels of education are recognized, viz., (i) Primary (From standard I to VII) and (ii) Secondary (Standard VIII to XI). With a view to presenting these figures on uniform basis as for the rest of the county and to ensure comparability of figures presented in All India Tables, the "Middle" level has been introduced. These figures have been classified for the following levels according to the Standards mentioned against each of them :—

(i) Primary—Passed standard V but not VIII
(ii) Middle—Passed standard VIII but not XI
(iii) Higher Secondary—Passed standard XI but had not acquired a University degree or diploma.

Persons have been classifiedin "Primary" level if they have passed standard V. If they were reading in VI or VII, VIII, but had not passed VIII, they have been classfied under "Primary" level. Those who have passed the standard VIII, have been classified under "Middle. This will include those reading in IX, X or XI standard but not passed standard XI. Those who have passed standard XI but not passed any University degree or diploma examination, have been classified under "Higher Secondary."

*(i) Literates (without educational levels) includes figures for educational levels not classifiable.
(iii) The Dangs district being entirely rural has no urban area.

TABLE B—VII

Notes

The data presented in this table relate to secondary work. It gives cross-classification of data in respect of persons having their main activity as Cultivators; Agricultural labourers; at Household Industry; at Non-household Industry; Trade; Business or Service or Non-Workers doing secondary work either (i) as Cultivator or (ii) as Agricultural labourer or (iii) at Household Industry or (iv) at Non-household industry, Trade, Business, Service, etc.

Data have been presented for total, rural and urban areas of the state and its districts.

Secondary work :—In respect of persons who were engaged in more than one economically productive work, the main activity was that in which he engaged himself mostly. The secondary work was that which was next to his main activity. Information pertaining to the main activity was recorded against Q. 16 (a) (i) while that pertaining to his secondary work against Q. 17 (a). Similarly in respect of persons who returned themselves basically as non-workers on the basis of their main activity such as housewives, students, etc. if found engaged in addition in some economically productive activity, the information was recorded against Q. 17 (a). For further details in regard to the definition of secondary work, please see paras 125 to 127 of the instructions to Enumerators for filling up individual slips, extract reproduced in Annexure I to the Introductory Note.

This table is supplemented by an appendix which gives detailed distribution of persons whose secondary work was at non-household industry. The main activity has been presented at one digit level of National Industrial Classification, 1970 while the secondary work has been presented at 2 dight level i.e. showing Major Groups.

The data presented in this appendix are only at the State level for total, rural and urban areas.

For description of Industrial Divisions and Major Groups, please see Annexure III to the Introductory Note.

Data similar to the one presented in Table B-VII and its Appendix in 1971 were presented in Table B-VII Parts A & B in 1961 but in a slightly different way.

(i) Persons seeking employment for the first time and (ii) Persons employed before but now out of employment and seeking work. The age-groups adopted in 1971 are 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60+ and Age not stated as against the age-groups 0-14, 15-34, 35-59, 60+ and Age not stated in 1961.

Age of a person was recorded in completed years i. e. age at last birthday—For children below one year, the age recorded was 'O'.

Note :—*Includes educational levels not classifiable.

In Gujarat State only two levels of education are recognised viz., (i) Primary (from Std. I to VII) and (ii) Secondary (Std. VIII to XI). With a view to presenting these figures on uniform basis as for the rest of the country and to ensure comparability of figures presented in All India Tables, the 'Middle' level has been introduced. These figures have been classified for the following levels according to the standards mentioned against each of them.

(i) Primary—Passed Standard V but not VIII.
(ii) Middle - Passed Standard VIII but not XI.
(iii) Higher Secondary—Passed Standard XI but had not acquired a University degree or diploma.

Persons have been classified in 'Primary' level if they have passed Standard V. If they were reading VI or VII or VIII but had not passed VIII, they have been classified under 'Primary' level. Those who have passed the standard VIII have been classified under 'Middle'. This also includes those reading in IX, X, or XI Standard but not passed any University classes. Those who have passed Matriculation have been classified under ' Higher Secondary."
