GENERAL ECONOMIC TABLES

PRELIMINARY NOTE

The Tables printed in this sub-part present occupational data collected in respect of workers against questions 10 and 11 and information pertaining to non-workers collected against question No. 12 of the census questionnaire cross-classified by sex, age, educational, levels etc. In respect of workers the work is shown under the occupational families according to national classification of occupation.

Enquiries regarding the occupation in which a person engaged have been made at the successive Indian Censuses early from 1872. But these earlier enquiries were limited to ascertaining the means of livelihood which projected only a composite picture of both occupation and industry without giving a precise knowledge of the function the person discharged in his branch of economic activity.

For the first time in the 1961 census, tables of persons engaged in useful economic activity have been prepared bringing to bear on them distinct concepts of "Industry" and "occupation" and the population have been classified by these concepts and also by such other characteristics as age, sex, educational levels etc. The General Economic Tables of the 1961 Census have, on this account, necessarily to include a large mass of data, and in consequence their presentation in a single volume is rendered unwieldy.

The tables have therefore been bound and issued in two sub-parts. In the first sub-part economic tables I to IV are presented and in this the second sub-part tables V to IX are presented.

The population of each village in the revenue area and of each enumerator's block in a town was first divided into workers and non-workers. The working population was then classified under the following nine broad industrial categories viz.:—

I. As Cultivator.
II. As Agricultural labourer.
III. In Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities.
IV. At Household Industry.
V. In Manufacturing other than Household Industry.
VI. In Construction.
VII. In Trade and Commerce.
VIII. In Transport, Storage and Communications.
XI. In Other Services.

A description of the significance, meaning and import of each of the above nine industrial categories is set out below:

(i) *Cultivators:* For Census purposes a cultivator is a person who is engaged either as employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government or (b) cultivation of land or supervision or direction of cultivation of land held from private persons or institutions for payment in money, kind or share.

(ii) *Agricultural Labourers:* An agricultural Labourer is a person who works in another person's land only as a labourer without exercising any direction or supervision in cultivation.

(iii) *Workers engaged in Mining, Quarrying, Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities.*

(iv) *Workers in Household Industry:* For Census purposes, a Household Industry is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Household industries relate to production, processing, servicing, repairing or making and selling of goods. They do not cover such professions as Pleader, Doctor, Barber, Washerman or Astrologer, etc. All persons engaged in household industries have been brought under this category.

(v) *Workers in Manufacturing other than Household Industry:* Persons who are working as employers, employees, single workers, or family workers in activities connected with the production, processing, servicing or repairing of goods in factories, workshops or other similar establishments, which do not qualify to be included under Household industries as defined in the previous paragraph have been brought under this category.

(vi) *Workers in Construction:* Persons who are engaged in Construction, maintenance, upkeep, repairs and similar occupations of buildings, roads, bridges, dams, canals and construction of electrical, water supply and sanitary installations, etc., are brought under this category.

(vii) *Workers in Trade and Commerce:* Persons engaged in wholesale or retail trade in goods, or dealing with Insurance, Stocks, Shares or employed in Banking and Financial Institutions have been classified as workers in Trade and Commerce.

(viii) *Workers in Transport, Storage and Communication activities:* Persons employed in Railway, Road Transport, Post and Telegraph and other agencies have been brought under this category.

(ix) *Workers in Other Services:* This is the last category of workers which comprises employees of Central and State Governments, Local Bodies, Quasi-Governmental Bodies and those engaged in Educational and Scientific Services, Medical and Health Services, Religious and Welfare Services, Legal Services, Business Services, Community Services and Trade and Labour Associations, Recreation Services, Personal Services and other miscellaneous activities not covered by any of the categories listed above.

Tables B-V and B-VI presented in this volume show the distribution of workers by their occupations classified according to the National Occupational Classification Scheme which is reproduced as Annexure I to table B-V.

'Occupation' of a worker is the function which he personally performs by engaging himself in work in any branch of economic activity which is called his industry. The concept of "occupation" is thus distinct from that of "Industry". The latter is defined as the sector of economic activity in which a worker is engaged. Although the concepts of "occupation" and "Industry" are different certain occupations are normally found to exist in only one industry. But a great number of occupations are found to exist in several industries.

The distribution of workers doing some additional work by types of primary and secondary activity is shown in table B-VII (Parts A and B). The table B-VIII (Parts A and B) shows the distribution of unemployed persons aged 15 and above, cross-tabulated by educational levels. The last table viz., B-IX presents the classification of non workers into eight types cross-tabulated by sex and age-groups. Such elaborate classification of non-working population is presented for the first time in this census.

TABLE B-V

B-V—OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK OTHER THAN CULTIVATION

This table shows the occupational classification of workers in Industrial Categories III to IX *i.e.* all workers other than cultivators and agricultural labourers, cross tabulated by sex and broad categories of economic activity.

In the past censuses the term 'occupation' was used to indicate the means of subsistence or livelihood or the supporting sector of economy. It is only in 1961 Census that the term has acquired a precise connotation as the 'function' or 'exact work which a person performs in any branch of economic activity'. Occupational classification is according to the National Classification of Occupations in 11 occupational divisions (one digit), 75 occupational groups (two digits) and 331 occupational families (three digits). The National Classification of Occupations is reproduced as Annexure I to this table. The data have been presented only for 'Total' and 'Urban' for the State and each district separately. Figures for 'Rural' areas can be worked out by subtracting the 'Urban' figures from 'Total'.

Occupational Families having less than 1% of workers of the respective occupational division (less than 0.5 per cent in case of families of Division 7 & 8) have not been shown in the table, but are given in the Appendix to this table. Divisions thus affected are marked with an asterisk (*). Lines with nil entires have been omitted.

Since this table relates to the occupational classification of persons actually working, the occupational families X00, X08 and X09 meant for workers without occupations (that is, unemployed) do not appear in the table. Occupational families 400, 401 and 414 which relate to cultivators and agricultural labourers also do not appear since the table is restricted to workers in industrial categories III to IX.

A few occupational entries may appear improbable for rural areas. It will, however, be realised that they are not so if the point is taken into account that the Census was taken with reference to the place of residence and not with reference to the place of work. A few workers may also have been on leave during the reference period and may have been enumerated at their native places far away from their places of work.

In some cases, where the description of work was incomplete, the occupational code relating to the residuary occupations of the group concerned has been assigned during sorting, though there is a separate family which would be more appropriate for workers of this kind in the industrial category concerned.

The percentage distribution of workers for each occupational division in broad industrial categories III to IX is as follows:

NOTE:—Occuptional Families having less than 1 per cent of workers in the respective Occupational Division in the case of Divisions other than 7 & 8, and less than 0.5 per cent in the case of Division 7 & 8 are not exhibited in this Table. Figures for such Families have been shown in run-on lines in the Appendix to this Table. Divisions thus affected are marked with an asterisk (*).

TABLE B-VI

OCCUPATIONAL DIVISIONS OF PERSONS AT WORK OTHER THAN CULTIVATION CLASSIFIED BY SEX, BROAD AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

This is a new table introduced for the first time in 1961. It gives occupational divisions of persons at work other other than cultivation classified by sex, broad age-groups and educational levels in urbar areas only.

All persons who were able to read and understand, any simple letter in any language either in print or in manuscript and to write simple letter are considered literate for census purposes. If in addition to being able to read and write, any person has passed an examination or examinations as proof of an educational level attained, the highest examination passed was recorded in the enumeration slip. The classification by educational levels is based on those returns which indicate the levels actually attained by the workers.

The literate workers under each occupational division are classified by broad age-groups: 0-14, 14-34, 35-59 and 60+and further classified according to educational levels, *viz.*, literate (without educational levels), primary or junior basic, matriculation or higher secondary, technical diploma not equal to degree, non-technical diploma not equal to degree, University degree or post-graduate degree other than technical degree and technical degree or diploma equal to degree or post-graduate degree under the head Engineering, Medicine, Agriculture, Veterinary and Dairying, Technology, Teaching and others. The table thus gives useful information about the extent to which skilled jobs are handled by persons who have received academic training for such work in a college or technological institute. A comparison of the population of workers with such training to total number of workers in the age groups: 15-34 and 35-59 will indicate whether there has been any tendency in recent years to prefer persons with academic training in Engineering and Technology for skilled work.

Occupational and age-group break-up of illiterate workers is not shown here. So far as "total workers" (column 3 to 5) are concerned, age-group break-up is shown against "All Occupational Divisions" only. It was not complied for each occupational division separately. For economy of space, lines with nil entries have been omitted. All the occupational divisions from National classification of occupations are reproduced below with their description in order to facilitate the reading of the table.

DIVISIONS

0. Professional, Technical and Related Workers.
1. Administrative, Executive and Managerial workers.
2. Clerical and Related workers
3. Sales workers.
4. Farmers, Fishermen, Hunters, Loggers and Related workers.
5. Miners, Quarrymen and Related workers.
6. Workers in Transport and communication occupations.
7-8. Craftsmen, Production Process workers, and Labourers not elsewhere classified.
9. Service, sport and recreation workers.
X Workers not classifiable by occupation.

TABLE B-VII

PART-A PERSONS WORKING PRINCIPALLY (i) AS CULTIVATORS, (ii) AS AGRICULTURAL LABOURERS OR (iii) AT HOUSEHOLD INDUSTRY CLASSIFIED BY SEX AND BY SECONDARY WORK (i) AT HOUSEHOLD INDUSTRY, (ii) AS CULTIVATOR OR (iii) AS AGRICULTURAL LABOURER

For the first time in Census history, an attempt has been made during 1961 census to collect information about the principal and subsidiary work in respect of persons engaged in more than one type of work and also to tabulate the results in respect of certain categories of subsidiary work. Though Table B-II published after 1951 Census purports to give the secondary means of livelihood, a closer examination will disclose that the contents of Table B-II of 1951 do not at all correspond to those of Table B-VII Parts A and B of 1961. In Table B-II of 1951, The principal occupation of earning dependents in a family is shown as the secondary occupation of that family, the occupation of the head of the family being deemed the principal occupation of all the members included in the family. Hence the secondary means of livelihood found in Table B-II of 1951 is actually the principal means of livelihood of the earning dependents in each family. In 1961, the work of each individual has been recorded separately in the enumeration slip and no attempt has been made to relate it to the work of the head of the family. Hence the secondary work shown in Table B-VII Parts A and B is actually the secondary work in respect of a person having more than one type of economic activity.

The following instructions based on the decisions of the second conference of the Superintendents of Census Operations held in August, 1960, were issued to the Enumerators about the recording of the principal and the subsidiary work:—

"After you have filled up the answers to questions 8, to 11, if you find that in the case of any person more than one productive activity has been recorded, *i.e.*, more than one of the questions 8, 9, 10 or 11 has been filled up by some work you should ask him which one of the activities that has been recorded for him is his principal work. The principal work is the one on which the person spends most time. Put a ring round the number of the questions 8, 9, 10 or 11, according to the work in which the person says he spends most time. You should invariably ask for the principal work where more than one work is recorded and put a ring round the question relating to the principal work.

It may be that in a few cases you find that you have recorded more than two productive activities in questions 8 to 11 *i.e.*, more than two of the questions 8 to 11, would have been filled up by some work. In such cases you should first ascertain the principal work *i.e.*, the one on which the person spends most time and put a ring round the number of the question. You should then ascertain the work which is the next in importance to his principal work *i.e.*, the work after his principal work which occupies most time. You should put a tick against the question number of that work on the right hand side of the question number. The ring and the tick should be put clearly so that any difficulty will not be felt to recognise them clearly."

Under these instructions, the secondary work of persons having both the principal and secondary activities coming under question No. 11 of the enumeration slip has escaped recording. This is because, the instructions were to the effect that the question which relates to the principal work should be ringed off and the question which relates to the subsidiary activity in respect of a person having more than two occupations should be ticked. When both the principal and subsidiary activities come within the same question such marking would not be possible.

The instructions have made it clear that the principal work is the one on which a person spends most time. Time is the criterion and not the income which he gets from the activity.

Table B-VII is prepared in two parts. Part A shows the extent of inter-dependence of agriculture and household industry. This part shows the distribution of persons working as cultivators, agricultural labourers or at household industry classified by sex and by secondary work which is again shown under three heads, namely, household industry, cultivator or agricultural labourer. Part B presents the distribution of persons having principal work in categories V to IX, namely, (V) in manufacture other than household industry, (VI) in construction, (VII) in trade

and commerce, (VIII) in transport, storage and communications and (IX) in other services having household industry as their subsidiary occupation. The principal work is exhibited according to the Indian Standard Industrial Classification, the division and major group being given. The classification of the subsidiary work, *viz.*, household industry is not however given in this Part. Even in B-VII, Part A, the division and major group of the industrial activity comprising the principal work is given in respect of those workers who have household industry as the principal work.

With a view to economising space, divisions or major groups which have nil entries have been omitted altogether from both parts. If in any major group of household industry, the number of persons having secondary work is less than five per cent, such major group is not shown in the Part A, but information about secondary work for such major groups is given in the Appendix to Part A. Divisions which have been affected by this abridgment of the Table are marked by asterisk (*).

Similarly if in any major group of the Indian Standard Industrial Classification included in industrial categories V to IX, the number of persons having household industry as secondary work is less than 1% of the total number of workers in the division such major group is not shown in part B. Information about the secondary work in such major group is contained in the Appendix to Part B. This abridgement has affected almost all the Divisions as the number of workers under categories V to IX is high compared to the number of workers under category IV. The few divisions not so affected are noted as annexure at the end of the table.

The extract from the Indian Standard Industrial Classification reproduced below for ready reference gives the description of the activities comprised in each division and major group:

TABLE B-VIII

PART-A—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX, BROAD AGE GROUPS AND EDUCATIONAL LEVELS IN *URBAN AREAS ONLY*

PART-B—PERSONS UNEMPLOYED AGED 15 AND ABOVE BY SEX AND EDUCATIONAL LEVELS IN *RURAL AREAS ONLY*

This is a new table prepared for the first time in the Census of 1961. As will be explained in the Fly Leaf to Table B-IX, the activity of a person who is not working has been ascertained during enumeration and the non-workers fall into eight classes, depending on their activity. The Table B-VIII deals with only two of those eight classes, *viz.*, (*i*) persons seeking employment for the first time; and (*ii*) persons employed before but now out of employment and seeking work. It throws light on the extent of educated unemployment in different age-groups. Hence this table will be useful for purposes of planning for employment and also for assessing the available man-power.

The table is presented in two parts. Part-A relates to urban areas only and presents the distribution of unemployed persons aged 15 and above in each of the two classes by sex, age and detailed educational levels. Part-B of the table gives data for rural areas only. The educational levels in this part are limited to primary or junior basic and matriculation and above and no break-up for age-groups is given.

TABLE B-IX

PERSONS NOT AT WORK CLASSIFIED BY SEX, BROAD AGE-GROUPS AND TYPE OF ACTIVITY

This table presents the distribution of non-workers in the following eight classes cross-tabulated by sex and four broad age-groups:

(1) full-time students;
(2) persons engaged in household duties;
(3) dependents, infants and children;
(4) retired persons, rentiers and those having independent means;
(5) beggers, vagrants, etc,;
(6) inmates of penal, mental or charitable institutions;
(7) persons seeking employment for the first time; and
(8) persons employed before but now out of employment and seeking employment.

Investigation of the activities of non-workers is one of the new features of the 1961 Census. The instructions issued to the Enumerators for recording replies to question No. 12 on the enumeration slip are as follows:

"Q. 12. Activity, if Not Working.

This question will apply to a person NOT working.

Write 'X' in this question for a person who is working, that is, for whom you have recorded the work in any of the questions 8 to 11 above.

The following activities should be recorded in the case of persons NOT Working:—

1. For a full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.	write	ST
2. For a person engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.	write	HW
3. For any dependent, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.	write	D
4. For a retired persons who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.	write	R
5. For a beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence.	write	B
6. For a convict in jail (an under-trial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.	write	I
7. For a person who has not been employed before but is seeking employment for first time.	write	NE
8. For a person employed before but now out of employment and seeking employment.	write	UN

Explanation:—If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5 and write B in this question. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in Questions 8 to 11.

A person who is not working but has been offered work which he has not joined should be included in item 3 and 'D' should be written. He should not be included in items 7 or 8."

The table is compiled for total/rural/urban from the information available in replies to Question 12. The broad age-groups used in the table are the same as those used in tables B-I and B-II *viz.*, 0-14, 15-34, 35-59 and 60 and over. The persons who did not return their ages have been shown separately under "Age not stated."

Since, the basis of economic activity adopted in 1961 is work as against income or economic independence in 1951, persons in receipt of income without work who were treated as workers in 1951 are now treated as non-workers. These are rentiers, pensioners, beggars and independent women without any indication of work.

Out of the total population of 23,586,772 in Mysore State, 12,860,426 or 54.52 per cent are non-workers. The proportions of non-workers among males and females are 38.97 per cent and 61.03 per cent respectively. Out of every 1,000 total non-workers 390 are males and 610 females.
