

CENSUS OF INDIA 1981

SERIES–23

WEST BENGAL

Part II–A

GENERAL POPULATION TABLES

S.N. GHOSH
of the Indian Administrative Service
DIRECTOR OF CENSUS OPERATIONS
WEST BENGAL

PREFACE

This is the first Table Volume brought out as part of the 1981 Census publications. The data contained in this Volume Part II-A—'General Population Tables' are of vital importance to the Primary Census data-users, interested in the basic demographic trends in growth for different decades in the State. The present Volume containing Tables A-1 to A-V has been prepared on the basis of the data available in the Primary Census Abstracts as also collected from other sources like different departments of the State Government.

The instant publication is a glowing testimony to the competent leadership and personal involvement of Shri S.N. Ghosh, former Director of Census Operations, West Bengal who had conducted the 1981 Census very ably. This Volume is in fact the product of his labour of love, dedication and sincerity. Shri Ghosh had to resume his duties under the State Government in public interest, before this Volume could be finalised and printed. The credit for the successful operation of 1981 Census goes entirely to Shri Ghosh.

One should not forget the innumerable officials right from the level of Enumerators to that of the Principal Census Officers in making the field operation a success. Nor can one lose sight of the fixed-pay employees in the various Regional Tabulation Offices who have prepared the tables, knowing fully well that one day they would all be thrown out into the street as retrenched Census-employees. No word of praise is enough to pay a tribute to their hard labour and dedication.

In bringing out the Volume we are extremely grateful and indebted to Shri P. Padmanabha, former Registrar General, India, Shri V. S. Verma, present Registrar General, India, Shri V.P. Pandey, Joint Registrar General, India, Shri K. K. Chakraborty, Deputy Registrar General, (C&T), Dr. N.G. Nag, Deputy Registrar General, (S.S.), Dr. B.K. Roy, Deputy Registrar General (Map), Shri N. Rama Rao, Assistant Registrar General, (C&T), Shri Madan Singh, Senior Research Officer and Shri S. C. Srivastava, Assistant Central Tabulation Officer in the Census Division of Registrar General's Office for various assistance and suggestions offered to us in different stages of the work.

In thanks-giving one often faces the difficulty as to which name one should specially mention among a band of dedicated officials. Even then, a word or two of gratitude for the excellent efforts in bringing out the Volume will not be out of place. Shri. M.N. Sarkar, Assistant Director of Census Operations, West Bengal (since retired) and Shri Swapan Guha, Investigator who had worked under Shri A.K. Dutta, Deputy Director of Census Operations, in preparing the manuscripts, writing analytical notes, fly leaves etc., did an excellent job. Shri M.N. Sarkar had, however, shared the major burden of the work in preparing the analytical notes. Shri Dutta had overseen the work ably assisted by Shri Swapan Guha. Both of them did excellent jobs in their own spheres.

Shri Guha was assisted remarkably well in his work by Smt. Anjali Das, Statistical Assistant, Smt. Sucheta Dutta, Statistical Assistant, Smt. Nira Chakraborty, Computor, Smt. Mira Banerjee, Computor, Smt. Kalpana Chowdhury, Computor, Smt. Banani Ghosh, Computor, Smt. Pravati Munshi, Computor, Smt. Nandita Dutta, Computor and Sri Prasanta Kr. Burman, Proof Reader.

Whatever is said in the preceding paragraphs relates to the preparation of the manuscript only. Another phase of the work starts with printing. Here too, Shri A.K. Dutta, Deputy Director of Census Operations, West Bengal came forward energetically to take up the challenge. He was provided excellent support by Shri Guha, Investigator and Sri Himangshu Saha Chowdhury, Printing Inspector. We are grateful to all of them.

We believe this Volume will be of interest to one and all.

SUKUMAR SINHA

Joint Director of Census Operations,
West Bengal

Calcutta,
Dated : 1st January, 1986

GENERAL NOTE

This publication contains all A-series tables, i.e., Tables A-1 to A-5 and several appendices. These are basic population data compiled manually and based on full count.

Although this volume does not contain the Primary Census Abstract (PCA), it is necessary to explain in brief what the P.C.A. is as the PCA is an adjunct of "A" series Tables. The Primary Census Abstract is an important general population table which gives basic information relating to area, occupied residential houses, number of households, total population, scheduled castes and scheduled tribes population, main workers (sub-divided into four broad categories of workers, i.e., cultivators agricultural labourers, workers in household industry, and other workers), marginal workers and non-workers by sex in respect of each area unit down to the Police Station and town levels.

The 1981 Census Enumeration was conducted during February-March 1981. The enumeration commenced on 9th February 1981 and ended on 28th February, 1981 with a revisional round from 1st March to 5th March, 1981 to bring the data up-to-date with reference the Census moment, i.e., the sunrise of 1st March, 1981.

PREPARATORY MEASURES

Preparation for evolving the Census Questionnaires, concepts and procedures for 1981 Census were taken in hand by the office of the Registrar General, India sometime in 1976. The draft questionnaire and the formats were prepared by the office of the Registrar General, India and were thrown open to the discussion in the First Data Users' Conference held in New Delhi between February 13 to 15, 1978. The object of the Data Users' Conference was to find out what the data users wanted and how their wants could be accommodated in 1981 Census Questionnaire. Data Users from different walks of life were present in the conference including the data users of the Central Government, various State Governments and the academic circles. The discussion in the conference evoked great enthusiasm and covered almost the entire gamut of Census including census dates, Enumeration procedure, Enumeration units, Tabulation Plan, Data Processing, Census Schedules, Evaluation of Census data, Dissemination of Census results, sampling procedure and finally analysis of the Census Data. On the basis of this discussion in the conference, the draft questionnaire, specially the economic questions underwent some important changes.

The next step was to put the questionnaire so devised into practical test in the form of a Pilot Study in West Bengal alonwith nine other States of India. The Pilot Study was conducted in West Bengal from 12-6-78 to 21-6-78 keeping itself confined to canvassing of the Individual (Universal) slips. The object of the Pilot Study was to ascertain the feasibility of canvassing the economic questions in particular of the Individual (Universal) slip. The personnel of the Office of the Director of Census Operations, West Bengal were deployed as Enumerator and Supervisor and all of them conducted the Pilot Study in this State very successfully.

The experiences and results gathered from the Pilot Study led the Registrar General, India, to have another field survey which was called the First Pre-Test conducted between 15-9-78 and 3-10-78 all over the country, but in West Bengal for some compelling reasons the First Pre-Test was conducted between 19-9-78 and 3-10-78. The First Pre-Test called for going through all the stages required in the 1981 Census i.e., preparation of Notional Maps, House-numbering, House-listing, canvassing of the Household Establishment schedule, canvassing of the Individual slip—both universal and sample and filling up of the population Record form. In addition to these, a Degree Holder and Technical Personnel Schedule designed by the Council of Scientific and Industrial Research was also to be distributed among eligible individuals of the Households which were to be covered in the First Pre-Test. Once again the First Pre-Test was conducted by the employees of this directorate under the supervision of the Senior Technical personnel of this Directorate. Unfortunately, the First Pre-Test held in West Bengal did not reach its logical culmination due to the devastating flood that submerged almost the entire lower Bengal towards the late September and early October in that year.

On the basis of the experiences gathered in canvassing the various Census schedules in the Pilot Study and the First Pre-Test and the results obtained therefrom the 2nd Data Users' Conference was convened by the Registrar General, India during 21st to 23rd December, 1978. The representatives of various Ministries and Departments of the Govt. of India and State Govts., Planning Commission, Research Insti utions etc., joined the conference. In this conference, there was a detailed discussion on each item of the basic Census documents like the individual slips, the Houselists, Establishment Schedules, Population Record, etc. The economic questions in particular were a matter of detailed discussion with special reference to the experiences gathered from the earlier field studies. In this conference the questions were oriented in such a manner as would yield meaningful information specially on the economic characteristics, fertility and migration which were considered great important. In this conference, there was a detailed and fruitful discussion on the question of fulfilment of the basic requirement of availability of data on a fairly wide spectrum and in the process achieving comparability with the results of earlier Censuses. The suggestions of the Registrar General, India about insertion of some new questions in certain Census Schedules as improvement over earlier censuses were discussed in details in the conference and they were accepted in the House.

On the basis of the discussion in the 2nd Data Users' conference as referred to above, the 1981 Census questionnaires and schedules were finalised and they were tested in the Second Pre-Test held in West Bengal during the period from 1-6-79 to 21-6-79. One of the most important distinctions of the Second

Pre-Test was that the Enumerators were, in many cases, drawn from among the School teachers, Village level workers, Gram Sevaks, Panchayat officers and employees of the local bodies. The idea of deploying the above noted staff as Enumerator was to simulate as far as possible, the conditions that would prevail at the time of actual census taking. The ins'ructions to Enumerators for filling up the Houselists an Individual Slips and the connected schedules were translated into Bengal and printed before the Second Pre-Test held. The enumeration of the Second Pre-Test extended over 19 days from 6th to 18th June wi h a revisional round for 3 days from 19th to 21st June, 1979. The reference census moment was the sunrise of the 19th Cune, 1979.

In the end the following schedules were finalised and canvassed in 1981 Census :

(1) Houselist

(2) Houshold Schedule (Part I & II)

(3) Individual Slips (both universal and sample)

The Establishment schedule canvassed in 1971 Census was dropped in 1981 Census as the economic census conducted through Enterprise List was integrated with the Houselisting Operation. The "Enterprise List" devised by the Central Statist'cal Organisation was canvassed along wth houselist by the census Enumerators. The filled in schedules were, later on, passed on to the Bureau of Applied Economics and Statistics, Govt. of West Bengal for processing the data. In West Bengal the instructional booklets on Houselisting and Enumeration were printed in Bengali and Nepali languages. Individual Slips, Household Schedules, Houselists, Houselist Abstracts, Abrid Houstlists etc. were printed in Bengali, included Nepali, Hindi, and English languages for West Bengal.

HOUSELIST

The Houselisting operation in West Bengal started on 28-8-80 and completed on 7-10-80. During this period the notional maps and layout sketches for each Houselisting block which was later more or less coterminous with the Enumeration block were also prepared. Alongwith the work of Houselisting the Enterprise list, a substitute for 1971 Establishment Schedule, was canvassed as a part of economic census which was integrated with the Houselisting operation. The filled in Enterprise lists were handed over to the Bureau of Applied Economics and Statistics, Govt. of West Bengal, for processing the required data at their end at the instance of the Central Statistical Organisation.

Beside the identification particulars of the Enumeration block, building No. and census House No. certain few other information were collected through the Houselist. They are—purpose for which census house is used, household No., name of the head of household, whether the household is engaged in an enterprise outside the census house and without premises or not, number of persons normally residing in the household and the number of physically handicapped persons. If the Census house is wholly or partly used for non-residential purpose and if the household is engaged in an enterprise outside the census house and without premises, the enterprise list is to be filled in. The last item of the information collected through the Houselist was to record the number of physically handicapped i.e., totally blind, crippled or dumb persons of the household. This is the item introduced for the first time in the Census of free India as demanded by the Social Welfare Department in particular and other data users in general. In the end it may be said that the Houselist form canvassed in 1981 Census was very simple as compared to that canvassed in 1971 Census.

HOUSEHOLD SCHEDULE, INDIVIDUAL SLIP AND DEGREE HOLDERS AND TECHNICAL PERSONNEL CARD

In 1981 Census, during the period of enumeration which is the main and most impor ant operation of the entire census operations, Household Schedule, Individual Slip and Degree Holders and Technical Personnel card were canvassed to collect through these schedules the valuable information about the land and the people of West Bengal along with other parts of the country at a given point of time.

HOUSEHOLD SCHEDULE—PART I : HOUSEHOLD PARTICULARS

The Household Schedule has been re-introduced in 1981 Census with a greater scope than the Household Schedule canvassed in 1961 Census. In 1971 Census the Household Schedule was dropped. Special features of the Household Schedule of 1981 Census are that most of the items of 1971 Census Houselist have been included in the Household Schedule of 1981 Census considering the concensus in the Data Users Conference that this schedule will provide more useful data. Beside these, some new items have been included in this Schedule. This Schedule was filled in for each household—whether normal or institutional or houseless household. Part-I Household particular of this schedule contains, beside the identification particulars recorded in numeral five element code, 16 items on information pertaining to name of head of household, religion of the head of houseold, name of scheduled caste/scheduled tribe to which the head of household, household lives in owned house or not, if not, does the household own a house or house site in the village or town of enumeration, predominant construction material of wall, roof or floor of the house occupied by the household, facilities available to the household—drinking water supply with source within or outside premises, electricity or toilet (for urban area only), number of living rooms, number of married couple, does the household cultivate land, if yes, whether owned, rented or owned and rented, local name of tenancy and total population of the household.

The new items included in the schedule are religion of the head of household, specific name of scheduled caste/scheduled tribe of the head of household, language mainly spoken in the household does the household own a house or house site in the village or town of enumeration if the household does not live in owned

house, construction material of floor, facilities available to the household—drinking water, electricity and toilet (for urban areas only), number of married couples usually living in the household and local name of tenancy of the cultivated land.

HOUSEHOLD SCHEDULE—PART II : POPULATION RECORD

There are altogether 35 columns in the form of the population Record of which cols. 1 to 7 were canvassed directly from the houschold before the enumeration of individual members of the household was taken up by the enumerator. Cols. 1 to 7 depict the information such as serial no. of the individual members of the household, name of individual member, relationship to head of household (indicating sl. no. of mother within brackets if present in the household for children up to 10 years) males, females, age and marital status. The entries in cols. 8 to 35 had to be entered with reference to those in the Individual Slip which was filled up for each member of the household, cols. 8 to 35 are divided into two compartments—one for the males (cols. 8 to 21) and the other for the females (cols. 22 to 35). In cols. 8 to 21 or 22 to 35 the information such as name of SC/ ST, literate or illiterate, worker or non-worker, four broad categories of main activities, marginal worker and lastly whether seeking or available for work. In 1981 Census, the enumerator prepared the working sheet for preparing enumerator's abstract on the basis of the information entered in the population record.

The Population Record was the bas's for compilation of Provisional Population Tables more elaborately in 1981 than in earlier Censuses. In comparison to 1981 Census, the Population Record of 1971 contained only 9 cols., i.e., sl. no., name, relationship to head, male or female, age, marital status, literacy and description of main activity.

INDIVIDUAL SLIP

The Individual Slip, a key schedule of population census of 1981 consisted of altogether 22 questions which are given below :

INDIVIDUAL SLIP

(Universal)

1. Name
2. Relationship to head
3. Male/Female
4. Age
5. Marital Status
6. Mother tongue
7. Two other languages known
8. Religion
9. Whether scheduled caste/scheduled tribe
10. Name of Caste/Tribe
11. Literate/Illiterate
12. Educational attainment
13. Attending School/College.

14A. Worked any time at all last year? Yes/No i.e. worker/non-worker broad category of non-worker i.e. H for Housewife, ST for Student, D for Dependent, R for Retired persons or Rentiers, B for Beggars, etc., I for Inmates of Institutions and O for other Non-workers.

14B. If yes in 14A did you work for major part of last year? Yes/No.

15A. Main activity last year? If yes in 14B Broad category of worker i.e. C for Cultivator, AL for Agricultural Labourer, HHI for Household Industry, OW for Other Workers. If no in 14B, broad category of non-workers.

If HHI/OW in 15A the following particulars are to be collected :

(i) Name of establishment
(ii) Description of work
(iii) Nature of industry, trade or service
(iv) Class of worker.

15B. Yes in 14B—any other work any time last year? If yes broad category of worker (i.e., secondary work). No in 14B—work done any time last year? If yes broad category of worker (i.e., marginal worker).

If HHI/(OW) in 15B, the following particulars are to be collected :

(i) Name of establishment,
(ii) Nature of indus ry, Trade or service,
(iii) Description of work,
(iv) Class of worker.

16. If No in 14A (i.e., non-workers) or in 14B (i.e., marginal worker) seeking/available for work? Yes/No.

INDIVIDUAL SLIP (SAMPLE)

1. Birth-place—(a) Place of birth, (b) Rural/ Urban, (c) District, (d) State/Country.
2. Last residence—(a) Place of last residence, (b) Rural/Urban, (c) District, (d) State/ Country.
3. Reason for migration from place of last residence (code) i.e., employment (1) Education, (2) Family moved, (3) Marriage, and (4) Other (5).
4. Duration of residence at the village or town of enumeration.
5. For all ever-married women only—(a) Age at marriage (b) Number of children surviving at present (Male/Female/Total), (c) Number of children ever born alive (Male/ Female/Total).
6. For currently married women only—Any children born alive during last one year.

The scope of the Individual slip had been extended in 1981 Census. For the first time in the Indian Census some items of information pertaining to individual were canvassed on a sample basis. The Individual slip of 1981 Census therefore, consisted of two sets of items of information—one is universal and the other is sample. The universal question were canvassed for every individual, while the sample questions were canvassed for every individual covered by 20% sample enumeration blocks both in rural and urban areas in addition to the universal questions.

It may be mentioned here that in West Bengal along with a few other States, both the sample questions of Individual slips were canvassed on cent percent basis.

In respect of demographic, social and cultural items (excluding fertility and migration) all questions in 1981 Census were the same as in 1971 except for the item on school/college attendance which was a new item included in 1981 Census questionnaire. These items have already been briefly described earlier.

The economic questions, however, were different in the 1981 Census. The "work" concept of 1961 and 1971 Censuses was adopted for 1981 Census. This was opposed to the "income" or "economic independence" concept of the earlier Censuses. Though the "work" concept of 1961 and 1971 Census was the same as adopted in 1981 Census, the criteria for classification of persons as workers was different in 1981 Census from that in 1961 and 1971 Censuses. In the 1961 and 1971 Censuses usual status and current status were adopted with reference period of one year and one week for seasonal and for regular work respectively. But in the 1981 Census the usual status approach was adopted for all work. In the 1961 Census a person was treated as a worker if he had worked regularly during the last season or if he had worked at least for a day in regular work during the preceding fortnight from the day of enumeration. But in the 1971 Census a person was treated as a worker only if he had spent his time mainly in seasonal work, or if he had worked at least for a day in regular work during the preceding week from the day of enumeration. The dichotomy of wokers and non-workers of 1961 and 1971 Censuses was replaced in 1981 Census by trichotomy of main workers, marginal workers and non-workers on the basis of time of engagement in work. The main workers were those who engaged themselves in work for the major part of the year, i.e., at least 183 days, while those who worked for some time during the last year but not for the maior part of the year were treated as marginal workers. Those who had never worked during the last year were treated as non-workers.

In the 1971 Census there was no direct question on unemployment, but the unemployed were generally expected to fall in the residuary category of non-worker, *i.e.*, "other non-workers". In the 1981 Census a direct question on unemployment was asked. This was a new item "seeking/available for work" added to the economic question of the 1981 Census.

The sample Individual Slip contained information on migration and fertility. Some of the information on migration and fertility was collected in the 1971 Census Individual Slip on a universal basis, but further details of information on migration and fertility were included in sample Individual Slip of 1981 Census. These details were "reason for migration" "number of children ever born" and "number of children surviving" for ever married women. It will appear from the questions on fertility that in the 1981 Census the details of current as well as cumulated fertility were collected.

DEGREE-HOLDERS AND TECHNICAL PERSONNEL CARD

As in the 1961 and 1971 Censuses, a Census of degree holder and technical personnel was taken in the 1981 Census by canvassing a schedule called "Degree Holders and Technical Personnel Survey" which was finalised by the Council of Scientific and Industrial Research. The enumerator was asked to leave one or more of these schedules, as the case might be, with the household wherever he came across a graduate or a post-graduate as also those with a technical diploma or degree, for filling in the schedule(s) by the eligible person(s) in the household. The enumerator was instructed to collect the filled in schedule(s) from the respondent(s) at the time of his visit to the household during his revisional round or even earlier but before completing the enumeration. The respondent could also directly post the schedule to the addressee by whom the postage could be paid.

The schedule of degree holders and technical personnel survey contained the following items of information : Name, designation and address, date of birth, sex, marital status, scheduled caste/tribe, Home state, all academic and professional qualifications, training undergone, post graduate specialisations, professional specialisation/technical skills through experience present status, duration of present unemployment, employment—present/previous/first—name of organisation public/private sector and lastly visits abroad for study/training/employment. The filled in schedules collected by the enumerators were sent to the Council of Scientific and Industrial Research for compilation and tabulation of the necessary data.

The specimens of the Houselist, Individual Slip (both universal and sample), Household Schedule (both Part I and Part II) and the Degree Holders and Technical Personnel Survey schedule canvassed in the 1981 Census have been reproduced as Annexure "A" in this volume. The instructions to enumerators for filling up the Household Schedule and Individual Slip have also been reproduced as Annexure "B" in this volume.

PREPARATION OF MAPS

A Census must ensure that every person in the country is enumerated only once and without any omission. With this primary objective in view, the map of West Bengal State (showing district and police station boundaries) its 15 district maps (showing police station boundaries) excluding Calcutta district and police station map (showing village boundaries) were procured from the office of the Director of Land Records and

Surveys of the Govt. of West Bengal well in advance. These maps were updated by the Draughtsmen of this Directorate taking into consideration of all the administrative changes those had taken place since 1971 and till the time for freezing the boundaries of the administrative units. The boundaries are generally frozen a year in advance of the Census enumeration. The up-to-date maps of the municipal towns, cantonments, notified areas, town committees were procured from the respective competent authorities in West Bengal. Beside these, the project town maps were collected from the project authorities. All these maps were very useful for conducting the census in West Bengal. The map for each ward of Calcutta was collected from the Corporation of Calcutta.

At the time of Houselisting operation in 1980, the enumerators had prepared the Notional maps and layout sketches of their respective enumeration blocks, both in villages and towns locating and numbering in it every house of the enumeration block concerned. These Notional maps and lay-out sketches were drawn free-hand by the enumerators and they were very much helpful in achieving the total coverage both in area and people. These Notional maps and lay-out skeches are systematically preserved in bound Register volumes in the Directorate of Census Operations, West Bengal.

RURAL AND URBAN AREAS

It has been the tradition of the Indian Census to present Census data for rural and urban areas separately. The basic unit for rural areas in West Bengal is the mouza (village) which has definite surveyed boundaries. The lists of such mouzas (villages) for each Police Station were collected from the office of the Director of Land Records and Surveys of the Govt. of West Bengal and they were verified with reference to the lists of mouzas (villages) obtained from the Block Development Officers, Govt. of West Bengal and then the lists of mouzas (villages) were finalised. In unsurveyed mouzas (villages) within forest areas each habitation area with locally recognised boundaries within each forest range officer's beat was treated as one unit.

Urban areas are specially defined for Census purposes. To determine the urban areas in the 1981 Census, same criteria as adopted in the 1961 and 1971 Censuses were adopted with only some minor variation. Urban areas in the 1981 Census were :

(a) All places with a municipality, corporation, cantonment, notified area, town committees or Municipal Corporation;

(b) All other places which satisfied the following criteria;

  (i) A minimum population of 5,000;

  (ii) At least 75% of the male working population engaged in non-agricultural (and allied) activities;

  (iii) A density of population of at least 400 per km² (or 1,000 per sq. mile).

The Urban criterion of the 1981 Census varies slightly from that of the 1961 and 1971 Censuses. In the 1961 and 1971 Censuses, the male working population engaged in "Livestock, forestry fishing, hunting, plantations, orchards and allied activities" were treated as non-agricultural, but in the 1981 Census they were treated at par with the agricultural workers for the purpose of this criterion.

On the basis of the criteria as laid down against item (b) above, 78 new towns were created in West Bengal for the first time in the 1981 Census. These 78 towns all of which are non-municipal towns, included 7 Project towns namely—(i) Jaldhaka Hydel Power Project Town, (ii Haringhata Dairy Farm Town, (iii) Bandel Thermal Power Project Town, (iv) Kolaghat Thermal Power Project Town, (v) Digha Township (a Tourist Centre), (vi) Saontaldih Thermal Power Project Town and (vii) Bakreswar Tourist Centre Town.

URBAN AGGLOMERATION

Apart from the statutory towns and non-municipal towns, a concept of Urban Agglomeration was adopted in the 1981 Census. The concept of Urban Agglomeration adopted for the first time during the 1971 Census was an improvement on the concept of town group adopted in the 1961 Census. The concept of Urban Agglomeration had been adopted in the 1981 Census also and data had been presented on the same line as in the 1971 Census. An Urban Agglomeration formed a continuous urban spread constituting a town and its adjoining urban outgrowths, or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. It is necessary to explain what these urban outgrowths are. In several areas around a core city or statutory town or non-municipal town have come up fairly large well-recognised railway colonies, university campuses, port areas, military camps etc. it may not be altogether realistic to treat such areas lying outside the limits of a town as rural units; at the same time each such individual area by itself may not satisfy the criterion of minimum population size for being qualified to be treated as an independent town. Such areas deserve to be reckoned along with the town(s) to which they are contiguous as an integrated urban area. In West Bengal there were altogether 79 villages, each in its entirity which were contiguous to statutory or non-municipal towns and which did not satisfy the criterion of minimum populations size, but satisfied the other two criteria were treated as urban outgrowths.

The following were the possible different situation in which Urban Agglomeration were constituted :

(i) a city or town with a continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

(ii) two or more adjoining towns with their outgrowths as in (i) above; and

(iii) a city and one or more adjoining towns with their outgrowths all of which formed a continuous spread.

The area constituting an Urban agglomeration may keep on changing from one census to another depending upon the changing boundaries of the existing town(s) as well as the extent of urban outgrowth(s). These changes were not exception in West Bengal. There were altogether 13 Urban agglomerations in West Bengal in the 1971 Census. Of these the boundaries of 7 Urban agglomerations had undergone changes, the boundaries of one urban agglomeration remained unchanged and 5 other urban agglomeration had lost their individual identity by dint of being merged with Calcutta Urban Agglomeration as modified in the 1981 Census. In West Bengal there were altogether 32 Urban agglomerations in the 1981 Census—8 old and 24 new urban agglomerations.

STANDARD URBAN AREA

A new concept of Standard Urban Area (SUA) was at first adopted in the 1971 Census which envisaged a constant statistical spatial reporting unit which was to serve as the basis of urban development planning for the concerned city or town. The Standard Urban Area (SUA) was defined as "the projected growth area of a city or town having 50,000 or more population in 1971, as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially Urban". Thus, it was a long-term planning area and was to remain as a statistical reporting unit during the three successive censuses—1971, 1981 and 1991. The essential requirements for the constitution of SUA were : (i) it should have a core town of a minimum population of 50,000, (ii) the contiguous areas made up of other urban as well as rural administrative units should have mutual socio-economic links with the core town and (iii) in all probability this entire area should get fully urbanised in a period of two or three decades.

In West Bengal 20 SUA, were delineated in the 1971 Census on the basis of the criteria mentioned above and some basic data were presented for 1951, 1961 and 1971 for each of these 20 SUAs and their rural/urban components. It was proposed to present similar data for the SUAs in the 1981 Census also. The idea behind the presenting of basic data for these areas for four or five decades was that the urbanisation process in those areas could be studied. There were minimum changes in the boundaries of the SUAs of 1981 as compared to those of 1971 except the formation of a new SUA namely Balurghat SUA in the district of West Dinajpur in West Bengal in the 1981 Census. In the 1971 Census there were 20 SUAs as against 21 SUAs in the 1981 Census in West Bengal.

THE CENSUS HIERARCHY

The Registrar-General and Census Commissioner of India is responsible for conducting the population census which is a Union subject under the charge of the Ministry of Home Affairs. He is assisted by several officers who look after the different branches of work within his office.

For each of the States and Union Territories an Officer called "Director of Census Operations" is appointed.

The Census hierarchy of 1981 Census in West Bengal was as follows :

Director of Census Operation	
Joint Director	1
Deputy Directors	3
Regional Deputy Directors	6
Assistant Directors	4
Principal Census Officers	15
Distt. Census Officers	15
Addl. Distt. Census Officers	15
Subdivisional Census Officers	52
Municipal Census Officers/Non-Municipal Town Census Officers	105
Charge Officers for Rural areas including special charges of Tea Gardens and forests	637
Charge Supdt. for Urban areas	658
Special Charge Officers for Military & Para Military areas	33
Circle Supervisors	16,475
Enumerators	88,039

The Director of Census Operations of West Bengal for the 1981 Census was in position on 22-4-79 to conduct the gigantic Census Operations of West Bengal in 1981 with the assistance of a good number of Deputy/Assistant Directors and other officials. Following the Indian tradition the administrative machinery of the Govt. and local governments in West Bengal were called upon to assist the Director in conducting the Census in the State. This was done in view of the national importance of the Census. The 1981 Census hierarchy in the State of West Bengal followed the normal administrative set-up. For each district (except Calcutta), the administrative head of the district, i.e. District Magistrate/Deputy Commissioner was designated as Principal Census Officer who undertook the census duties in addition to his normal duties. Although the Principal Census Officer himself remained responsible the smooth and proper conduct of the Census Operation in his district, a competent Deputy Magistrate and Deputy Collector of his office who was designated as the District Census Officer actually looked after the Census work of the district. Each District Census Officer was assisted by the District Statistical Officer of the Bureau of Applied Economics and Statistics of the Govt. of West Bengal who was designated as Additional District Census Officer. This was a new assignment in the 1981 Census as the Economic Census was conducted during the Houselisting Operation in close collaboration with the Bureau of Applied Economics and Statistics. The Principal Census Officer was virtually responsible for delineation of the Census jurisdiction—such as charge, Circle and enumeration block, appointment and training of the enumeration personnel, execution and supervision of every stage of Census Operations within his district and he got these executed through the District Census Officer.

The District was subdivided into its normal administrative units, such as Subdivision, municipal/non-municipal town/Development Block etc. Each Subdivisional

officer was designated as Subdivisional Census Officer, each municipal Chairman/Executive officer was appointed Municipal Census Officer, an official or non-official selected by the District Census Officer or the Subdivisional Census Officer was designated as Town Census Officer for the non-municipal town having more than one charge, each Block Development Officer was designated as Charge Officer and under his guidance and supervision the census of non-municipal town(s) within the jurisdiction of his Development Block was conducted. The Divisional Forest Officer and the Tea Garden Managers or their authorised persons were also designated as Charge Officers (Special) to conduct the Census in their forest and Tea Garden areas respectively.

In urban areas, those selected by the Municipal Census Officer/Town Census Officer were designated as Charge Superintendents. If the urban area—be it a municipality/Notified area/Cantonment, etc., or non-municipal town—had less than 50,000 population, the entire urban unit was treated only one Charge and for that urban unit only one Charge Superintendent was appointed. The big cities and towns (except Calcutta and Haora cities) were subdivided into more than one Charge—each Charge with 50,000 population or so. There were 33 special charges in military and paramilitary areas all over the state. In the Railway Settlement (Town) areas, such as Kharagpur Railway Settlement area (NM) and Adra (NM), the persons nominated by the Railway authorities were appointed Charge Superintendent(s) and for the Project Towns, the persons authorised by the Project authorities were designated as Charge Superintendents.

As in the 1961 and 1971 Censuses, the taking of Census in Calcutta City was the direct responsibility of the Director of Census Operations of West Bengal in the 1981 Census. For the first time in the 1981 Census the Census of Haora City was also conducted under the direct control of the Director of Census Operations of West Bengal. Naturally, the organisations of Census in Calcutta and Haora cities had to be set up on a separate footing by the Director of Census Operations of this State. Calcutta Corporation had 100 wards each of which constitute a Census Charge and beside these, there were 12 Special Charges in Calcutta City, namely (1) Fort, (2) Port land area, (3) Canals, (4) Sea-going Vessels (Port), (5) Inland vessels (Port), (6) Eastern Railway (Sealdah), (7) Eastern Railway (Chitpore), (8) South Eastern Railway, (9) Calcutta Police, (10) Border Security Force Offices and installations within Calcutta district, (11) Indian Navy Offices and installations within Calcutta district, and (12) Indian Air Force Offices and installations within Calcutta district. For these 12 Special Charges, 12 Charge Superintendents were appointed and they were all nominated by their respective authorities. Thus there were, in all, 112 charge Superintendents in Calcutta district. Calcutta City was divided into three Regions for each of which one Regional Census Officer was appointed. Three Investigators of this Directorate took over Charge as Regional Census Officer. Again each region was sub-divided into 2 or 3 zones and there were altogether 8 zones in Calcutta City and a Zonal Census Officer was appointed for each zone consisting of about 12 to 13 Calcutta Corporation Wards. 8 Statistical Assistants of this Directorate took over charge as Zonal Census Officers. The Charge Superintendents of the Charges, other than the Special Charges, were mostly non-officials who were men of local eminence and influence. 100 Charge Assistants were recruited by the Director of Census Operations to assist 100 Charge Superintendents. In Calcutta City there were, on the top, two Deputy Directors and immediately below them there were two Assistant Directors. They had to shoulder the responsibility of the taking of Census in Calcutta with the assistance of the three Regional Census Officers, eight Zonal Census Officers and 100 Charge Assistants who were all Census men.

In Haora Municipal Corporation, the Census was taken in the 1981 Census in the same manner as in Calcutta City. The Regional Deputy Director of Haora and Hugli Region remained in Charge of Census in Haora City and he was assisted by an Assistant Director. There were neither Regional Census Officers nor Zonal Census Officers in Haora City. The Regional Director and the Assistant Director were assisted by 10 Officials deputed from this Directorate. They included such variety of officials like Tabulation Officer, Statistical Assistant, Computer and Assistant Compiler. Haora Municipal Corporation had 50 wards for each of which one Charge Superintendent was appointed. It had only one Special Charge which was Eastern Railway Special Charge covering Haora Railway Station and other Railway installations located within Haora City. For 50 municipal corporation wards, 50 part-time charge Assistants were appointed with a monthly honorarium of Rs. 100 each. They were all the employees of the Haora Municipal Corporation.

Each Charge both in rural and urban areas, were divided in more than one Census Circle each consisting of, on an average, five Enumeration Blocks. At the lowest rung of the ladder of Census hierarchy was the Enumerator assigned with enumeration work of one Enumeration Block and in rare cases of two Enumeration Blocks of the optimum population size of the two Enumeration Blocks come to that of one Enumeration Block. Each Census Charge was placed under one Charge Officer or Charge Superintendent, each Census Circle was placed under the Charge of a Circle Supervisor and ultimately each Enumeration Block was placed under the Charge of one Enumerator who was the basic census worker. In rural areas a whole Mouza (Village) or part of a Mouza (Village) constituted one Enumeration Block having approximately 750 population. In no case, the parts of two mouzas (village) did form an Enumeration Block. In urban areas, on the other hand, each Enumeration Block consists of 600 population approximately. The appointment of Charge Officers/Charge Superintendents has already been discussed in foregoing paragraph. Mainly from among the non-official volunteers, the Circle Supervisors were appointed on the recommendation of the Charge Officers/Charge Superintendents. Mostly the Primary School teachers were appointed as Enumerators in rural areas. Others in rural areas appointed as Enumerator were selected from among the village level workers and Panchyat workers and local unemployed

youngmen. In Urban areas, on the other hand, the employees of the local bodies and mostly the unemployed youngmen of the town concerned were appointed as Enumerators.

The District Census Officers, Subdivisional Census Officers, Charge Officers/Charge Superintendents—all were required to attend to Census duties as part of their normal duties. They were paid some honorarium for their performance. The Circle Supervisors and the Enumerators were also honorary part-time census workers and they were also paid honorarium for their census work.

TRAINING

Training was a very important part of the Census Operations and every census worker had to take training for being equipped fully to undertake the census duties with proper understanding. Each one in the census hierarchy had to be very clear as to what his duties and responsibilities were. He had to understand the different census concepts adopted for census very clearly. Manuals of instructions issued by the Registrar-General and Census Commissioner, India were translated into Bengali and were issued to every census workers down to the level of Enumerators. These manuals of instructions contained specimens of a few typical filled in schedules.

Training was imparted at two stages—Houselisting stage and Enumeration stage. Four days' training at Houselisting stage and five days' training at enumeration stage were given to each kind of census workers. The training programme was divided into two parts—one theoretical and the other practical. The District Census Officers & the Additional District Census Officers got training from the Director of Census Operations, West Bengal and in their turn they imparted training to the Charge Officers/Charge Superintendents. Apart from the District Census Officers, about a dozen trainers including the Director of this Directorate had imparted intensive training to the Charge Officers and the Charge Superintendents. The Charge Officers and the Charge Superintendents themselves trained their Circle Supervisors and Enumerators. Every Circle Supervisor had to ensure that each of the Enumerators under him had got sufficient training for perfect and smooth Houselisting and Enumerations. Training of Census personnel in this State continued from April to August, 1980 preceding the Houselisting Operation and from September, 1980 to January 1981 preceding the enumeration operation. The trainees took keen interest in the training classes and a great enthusiasm was observed among them. On completion of training course including practical training of each batch of Census personnel, the mistakes found in the practical training were elaborately discussed and rectified.

THE CENSUS ACT

The Census is conducted under the Census Act (Act No. XXXVII of 1948). This Act empowers the Central Government to notify and conduct a census in the whole or part of the country. The Census Commissioner of India and the Directors of Census Operations are appointed to supervise the taking of census. The Act empowers the States or such authority to whom the State Governments delegate power to appoint Census Officers at various levels to aid in, supervise and take the census. The Act authorises the Census-takers to ask the prescribed census questions and enjoins upon all person to answer the questions truthfully. The law lays down that the information collected at the census will be used only for statistical purposes and that the information about individuals will be kept confidential and cannot be used as evidence even in a court of law. The Act gives extra-ordinary powers to secure all kinds of assistance from the local bodies or any other person in order to complete the taking of census. The Census Act is reproduced as Annexure 'C' in this volume.

PROVISIONAL TOTALS

Soon after the 1981 Census enumeration in West Bengal was over on the 5th March, 1981, the provisional totals were communicated from the enumerator, upwards to the Director of Census Operations and ultimately to the Registrar-General, India by the quickest possible means.

In the 1981 Census, the enumerators had to prepare the "Working Sheet for preparing Enumerator's Abstract" which contains more detailed information for provisional totals than in earlier censuses. In West Bengal, on completion of the revisional round during the period between 1st and 5th March, 1981, the enumerators completed the preparation of Enumerator's Abstracts (compiled from the working sheet for preparing Enumerator's Abstract) and submitted to the Circle Supervisors along with other documents by the evening of the 6th March, 1981. The Circle Supervisors made necessary scrutiny of the Enumerator's Abstracts received from the Enumerators and submitted to the Charge Officers by the evening of the 7th March, 1981. The Charge Officers, on receipt of the Enumerator's Abstract through the Circle Supervisors, prepared the Charge Abstracts and handed over the same to the District Census Officer by the evening of the 10th March, 1981. The District Census Officers, on their turn, prepared the District Abstracts with rural urban break-up on the basis of the Charge Abstracts after thorough scrutiny and communicated the same to the Director of Census Operations, West Bengal and the Registrar-General, India on the 11th March, 1981 through telegrams, telephones and Police Wireless grids.

On receipt of the District Abstracts the provisional totals for the State of West Bengal were prepared at this Directorate and the same was communicated to the Registrar-General, India on the 12th March, 1981. Within 11 days from 12-3-81 this Directorate was able to publish the volumes called "Paper I of 1981 —Provisional Population Totals" of this State on 23rd March, 1981 and with this ended the phase of 1981 Census enumeration in the State of West Bengal.

POST-ENUMERATION CHECK

The Post Enumeration Check is essential for any systematic and comprehensive enquiry like the population census. It goes into the coverage and validity

of the results. Along with 13 other major States and Union Territory of Delhi, the Post Enumeration Check was held in the State of West Bengal after the 1981 Census Enumeration was over. The Post Enumeration Check was carried out in West Bengal during the period between 23rd March and 8th April (both days inclusive) 1981. The instructions, objectives, sample design, methods of data collection and organisation of field work, results etc. in connection with the Post Enumeration Check are given an Annexure "D" in this volume.

COMPUTERISATION

A significant change in the 1981 Census has been the introduction of Direct Data Entry (DDE) System for processing the Census data of all kinds except those of population Tables and Primary Census Abstract which were compiled manually. All other tables will be generated on the DDE System. Processing the data on DDE System means the Operators will key the data through numeral coders assigned to the entries in the Census schedules and these will directly go to the disc through the operator's terminal and from the disc the data will go on to the tape through Supervisor's terminal. These tapes are then sent to the office of the Registrar-General, India, New Delhi for generation of tables in computor machine.

TABULATION

It has been a continuing endeavour to present tabulations which are essential and useful to the data user in each census. Based on the experience of the previous censuses, it has been a constant attempt to improve upon the presentation of data and the tabulation plan so that maximum utilisation of census data is made possible. With this objective in view, a comprehensive tabulation plan to bring out the housing stock, the quality of housing, the extent of physically handicapped, the socio-economic, cultural and demographic profile of the people in general and of the Scheduled Castes and Scheduled Tribes in particular and the household economic situation has been drawn up to meet the requirements of various departments of Government and other data users.

According to the tabulation plan of the 1981 Census, the following series of tables will be prepared:—

A. Series—General Population Tables (in all 5 tables and 8 appendices).

B. Series—General Economic Tables (in all 29 table including part tables).

C. Series—Social and Cultural Tables (in all 18 tables including part tables).

D. Series—Migration Table (in all 13 tables).

F. Series—Fertility Tables (in all 51 tables including part tables).

H. Series—Tables on Houses and Disabled population (in all 2 tables).

HH. Series—Household Tables (in all 35 tables including part tables and also one appendix).

SC. Series—Special Tables for Scheduled Castes (in all 7 tables including part tables).

ST. Series—Special Tables for Scheduled Tribes (in all 10 tables including part tables).

VILLAGE AND TOWN DIRECTORIES

Of these, the tables of H-Series are based on the Houselist, the tables of HH-Series on the Household schedule and all the tables of the remaining series, except the village and Town Directories on the Individual Slip. The Village and Town Directories are mainly based on information external to census.

At the 1971 Census an Establishment schedule was canvassed on the basis of which tables were produced and presented as E-Series. As mentioned earlier, at the 1981 Census an Enterprise list was canvassed and the processing and tabulation of this had been taken over by the Central Statistical Organisation in the 1981 Census, it was, therefore, not proposed to generate tables of E-Series. Similarly the Tables of G-Series relating to data on Degree holders and Technical personnel would be presented by the Department of Science and Technology.

PUBLICATION

The 1981 Census publication will be made up of 32 series, the first which covering the all-India publications and the remaining series one for each state and Union Territory in alphabetical order. They are as follows:

Sl. No.	Territorial Units
1.	India
2.	Andhra Pradesh
3.	Assam
4.	Bihar
5.	Gujarat
6.	Haryana
7.	Himachal Pradesh
8.	Jammu & Kashmir
9.	Karnataka
10.	Kerala
11.	Madhya Pradesh
12.	Maharashtra
13.	Manipur
14.	Meghalaya
15.	Nagaland
16.	Orissa
17.	Punjab
18.	Rajasthan
19.	Sikkim
20.	Tamil Nadu
21.	Tripura
22.	Uttar Pradesh
23.	West Bengal

Sl. No.	Territorial Units
24.	Andaman & Nicobar Islands
25.	Arunachal Pradesh
26.	Chandigarh
27.	Dadra & Nagar Haveli
28.	Delhi
29.	Goa, Daman & Diu
30.	Lakshadweep
31.	Mizoram
32.	Pondicherry

In each of these series the different series of tables will be brought out as different parts. Apart from these District Census Handbooks will be published for each district in the State of West Bengal. These will contain District Primary Census Abstract, the village and town Primary Census Abstract of each Police Station of the district, Enumeration, Block-wise population and Scheduled Caste/Tribe population of town, village and Town Directories and alphabetical list of villages. The village and town Directories comprise compilations of statistics, external to the census relating to the villages and towns, which in conjunction with Census data will be very useful to data users.

The series number for West Bengal is 23. The publication programme of the State of West Bengal started from the bringing out of the publication namely, "Paper-I of 1981—Provisional Population Totals" on the 23rd March, 1981 followed by Supplement to "Paper-I of 1981—Provisional Population Totals". The Paper-I of 1982 namely "Final Population Totals" had also been brought out. The next publication will be "Paper-I of 1983—Primary Census Abstract of Scheduled Castes and Scheduled Tribes". This is in press.

For all-India and for each State and Union Territory the Census Publications and reports will be published according to the following plan.

Part No. and subject covered	Sub-part No. if any, and the topics covered
1	2
Part I—Administraton Report (for official use only)	Part IA—Administration Report—Enumeration Part IB—Administrative Report—Tabulation.
Part II—General Population Tables	Part IIA—General Population Tables A—Series. Part IIB—Primary Census Abstract.
Part III—General Economic Tables	Part IIIA-B—Series Tables of first priority covering population by economic activity, industrial category of main workers, marginal workers and their cross classification by age, literacy, educational level, sex, and non-workers and marginal workers by type of activity, seeking/available for work and their cross classification by age, literacy, educational level and sex. Part III-B—Series Tables of second priority covering industrial classification of main workers and marginal workers, occupationa classification and class of workers of main workers and main activity and seeking/available for work of marginal workers and non-workers and their cross classification by age, sex and educational level.
Part IV—Social and Cultural Tables	Part IVA-C—Series Tables of first priority covering age, sex and marital status, compositon of the population, single year age returns, educational level and school attendance. Part IVB-C—Series Tables of second priority covering mother tongue, bilingualism and religion of population. Part IVC—Household Composition on the basis of population record.
Part V—Migration Tables	Part VA-D—Series Tables of first priority covering distribution of population by place of birth, migrants by place of last residence, by duration of residence and reason for migration and economic activity of migrants reporting "Employment" as reason and their cross-classificaton by age and literacy. Part VB-D—Series Tables of second priority covering migration for "Employment" to urban areas from rural and urban within State and outside State origins, their composition by age sex and educational level and seeking/available for work and duration of last residence.

1	2
Part VI—Fertility Tables	Part VIA-F—Series Tables of first priority. This part will cover the age at marriage pattern, current fertility and cumulated fertility for ever married and currently married women by present age and duration of marriage at State and disrtict levels. At State level the further cross classification by the socio-economic factors, religion, Scheduled Tribes, educational level and occupation will be covered. Part VIB-F—Series Tables of second priority covering the surviving children of currently married women by present age and duration of marriage, religion etc., and also current fertility by duration of marriage at district level.
Part VII—Tables on Houses and Disabled population	Part VIIH—Series Tables covering census houses and their uses and disabled population by type of disability, with analytical notes.
Part VIII—Household Tables	Part VIIIA-HH—Series Tables covering material of construction of houses occupied by households, housing facilities available to households, household size and number of couples living in households and households by number of main worker, seeking/available for work and literate members, cultivating and non-cultivating households by tenure of land for general and Scheduled Castes and Scheduled Tribe households, literacy among Scheduled Castes and Scheduled Tribes and economic activity of members of Scheduled Caste, and Scheduled Tribe households. These tables will also cover the household population by religion of head of household and language, mainly spoken in the household. Part VIIIB—This part will contain HH-Series tables on tenancy. Part VIIIC—Report on Households covering an analytical report on the data presented in Part VIIIA and Part VIIIB.
Part IX—Special Tables on Scheduled Castes and Scheduled Tribes	Part IX will contain the Tables of SC and ST—Series for Scheduled Castes and Scheduled Tribes respectively. This will cover industrial categories of main workers and marginal workers, type of activity of marginal workers and non-workers, seeking/available for work among marginal workers and non-workers, age, sex, marital status, composition of Scheduled Caste and Scheduled Tribe population and their educational level (for each caste/tribe separately). These tables also cover for Scheduled Tribes, their composition by religion, mother tongue and bilingualism.
Part X—Town Directory Survey Reports on Towns and villages	Part XA—Town Directory. Part XB—Survey Reports on selected towns. Part XC—Survey Reports on selected villages.
Part XI	Ethnographic notes and special studies on Scheduled Castes and Scheduled Tribes.
Part XII—Census Atals	Part XIIA—Census Atlas. Part XIIB—Administrative Atlas.
Part XIII—District Census Handbook	Part XIIIA—Village and Town Directory. It contains two sections. Section I—Village Directory covering Police Station map, alphabetical list of villages, note explaining the codes used in village Directory, village directory and appendices (I—IV) to the Village Directory for each police station of a district. Section II—Town Directory covering note explaining the codes used in the Town Directory, Town Directory Statements (I to VI and IVA) and Appendix to the Town Directory. Part XIIIB—Primary Census Abstract covering District Primay Census Abstract showing figures for each police station with rural/urban break-up and police station-wise Primary Census Abstract showing village-wise figures and townwise figures and wardwise figures within the town and an appendix showing Enumeration blockwise population and Scheduled Caste/Scheduled Tribe population of the town.

86-M/P(D)42DCO(Calcutta)—2

The following special papers are also planned and will be published as and when they are ready as 1981 Census papers :

(a) Special studies taken up by the Director of Census operations.
(b) Special Areas Surveys
(c) Special Tables for Standard Urban Area
(d) Language Survey Reports
(e) Post Enumeration Check Report
(f) Age Tables
(g) Life Tables
(h) Reports on estimates of inter-censal birth and death rates using 1971—1981 Life Tables and age data
(i) Development of Vital Statistics in India

Besides these special papers, some monographs based on 1981 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1981 Census Monographs.

It is also proposed to carry out some special studies of 1981 Census data in collaboration with other organisations and the results of such studies will be published as occasional papers of the 1981 Census.

ANCILLARY STUDIES

(1) SURVEYS AND MONOGRAPHS

It has been proposed to have a thorough study of socio-economic and demographic aspects of three towns and restudy of three villages and to study on three rural crafts in West Bengal. This will be taken up sometime after February, 1984.

(2) CENSUS ATLAS PROJECT

The Census Organisation has been the largest single producer of maps of Indian sub-continent apart from the Survey of India and the Geological Survey. A Census Atlas as such and Administrative Atlas were brought out in the 1971 Census in West Bengal. The tradition is being continued in the 1981 Census also.

IMPORTANT INSTRUCTIONS

1 Record location code on each schedule and form, etc.

2 Do not leave any household or person uncovered in your block.

3 Do not forget to enter columns 1 to 7 of the Population Record before starting individual enumeration.

4 Do not forget to make repeated enquiries about young children, newly born babies and visitors not enumerated elsewhere.

5 Enter serial number of mother if present in the household against her son and daughter aged 10 years and below.

6 While making entries for names of Scheduled Castes/ Scheduled Tribes, check names of Scheduled Castes/ Scheduled Tribes with list supplied to you by your supervisor.

7 Write legibly.

8 Do not do overwriting.

9 Do not hesitate to ask your supervisor if you have doubt on any matter.

10 Do not allow your work of filling up of entries in the Population Record to accumulate. It should be completed for enumeration done at the end of each day's work.

11 Do not misplace or lose any of your forms or papers while performing duties as census enumerator.

12 During revisional round, fill in fresh slips for newly born babies and update the Population Record.

13 Cover households which have shifted to your block after your first visit but before sunrise of 1st March, 1981, if not enumerated already in some other block.

14 In case of any death in your block before sunrise of 1st March, 1981, cancel slip of that person if enumerated by you and make necessary corrections in the Population Record also.

15 While ticking for information in columns 8 to 35 in the Population Record, make sure that columns 8 to 21 refer to males and columns 22 to 35 to females.

16 Check totals of columns in the Population Record before posting in working sheets for enumerator's abstract.

ANNEXE-B

INSTRUCTIONS TO ENUMERATORS FOR FILLING UP THE HOUSEHOLD SCHEDULE AND INDIVIDUAL SLIP

1. **Part I—Household Particulars :** You will have to record the Book No. and Form No. at the top right hand corner of this form. Book No. is given on the cover page of the Household Schedule book and you have merely to copy this number on each Household Schedule form. The Form No. will run serially from 1 for each book.

Location Code

2. At the top on the left hand side of the schedule you will find Location Code. The Location Code numbers have been alloted to each State, District, Tehsil/Taluk/Police Station/Development Block/Circle or town, village (each separated by oblique stroke) and enumeration block (E.B.) number within brackets. Your Charge Officer or Supervisor would have already indicated to you the coplete Location Code number of the rural or urban block assigned to you and noted these particulars on the cover page of the booklet. You should enter on each form the complete Location Code number of your enumeration block, comprising State/District/Tehsil, *etc.* or town/village or ward and enumeration block numbers (within brackets). Please note that the code for town is to be given in Roman numbers while codes for all other units will be given in international numerals.

2.1. Location Code is a device by which every village or town in a Tehsil/Taluk/Police Station/Development Block/Circle of every District in a State/Union Territory is identified by a combination of numbers. The enumeration blocks for villages and towns have also been assigned numbers and these constitute the last element of the Location Code and is recorded in the Location Code within brackets. By a combination of these numbers one can exactly identify the enumeration block within a village or town. Thus, Code No. 2/10/3/46 (138) would mean enumeration block No. 138 falling in village No. 46 in Tehsil No. 3 of District No. 10 in State No. 2. Similarly. Location Code 10/6/II/5(22) would mean enumeation block No. 22 falling in ward No. 5 of town No. II in District No. 6 of the State No. 10.

2.2 If you have, by any chance, been put in-charge of more than one rural or urban enumeration block, please make sure that you have *separate books and pads for each rural or urban enumeration block.* Do not use the same book or pad for different enumeration blocks even if blank forms are available in a particular book or pad.

2.3 Please check that the Location Code tallies with the Location Code indicated in the filled in Abridged Houselist supplied to you. If they do not tally, refer the matter immediately to your Supervisor for further instructions.

Serial number of household

3. The serial number of the household as given in column 7 of the Abridged Houselist will have to be entered in the Household Schedule at the appropriate place. As you will notice, serial number of household has been entered in Section 2 of the Abridged Houselist in a continuous manner. If, however, you come across a household during the course of enumeration, which does not find mention in the Abridged Houselist, you should enter the particulars of this household in Section 3 of the Abridged Houselist as per instructions given in Appendix I. You may come across a new household in the following situations :

(i) A household has moved into a new building which has come up after the houselisting operations;

(ii) A household has moved into an existing building or census house which was not used for residential purposes before;

(iii) A new household has come in by sharing accommodation with other household(s) who were existing at the time of houselisting.

3.1 However, you may come across a new household which has replaced a household listed during the houselisting operations. In such a case, the serial number of the household given in column 7 of the Abridged Houselist need not be changed. You should merely change the name of the head of the household in column 6 in Section 2 and adopt the serial number already entered in column 7 for this new household. Similarly, if the head of household has changed, you have merely to make change in column 6 of the Abridged Houselist and no change in the serial number given in column 7 of the Abridged Houselist is called for. Please do not forget to read the instructions for filling up the Abridged Houselist ond updating the same as given in Appendix I *before you start filling up* the Household Schedule and the Individual Slip.

Type of household

4. At the top right hand corner, below the Book No. and Form No. of the Household Schedule, you will have to record the type of household, whether institutional or houseless by symbols as per instructions given in the foot note of the form itself. There are three types of households, *viz.*, normal, institutional and houseless. While you are enumerating the members of the household, you will come to know whether the household falls in the category of normal household or institutional household or houseless household. For institutional write 'I' and for houseless households write 'O'. For normal household no entry need be made.

Q. 1 : Name of head of household

5. The head of the household for census purposes is the person on whom falls the chief responsibility for the maintenance of the household. Thus, the head of the household need not necessarily be the oldest male member but may be a female or even a younger member of either sex. However, you need not enter into an argument about this. You should record as head of the household the name of the person who is actually acknowledged as such.

5.1 In respect of institutional households such as hostels, boarding houses, messes, jails, *etc.*, the warden or the manager or the superintendent, who has administrative responsibility or who, by common consent, is regarded as the heod, should be recorded as the head of the household. In such cases, write warden, manager, superintendent, jailer, etc., as the case may be, or write the name of the person if there is no designation. If in a census house, in which there is an institutional household, separate families are also living, then each such family should be treated as a census household and a separate Household Schedule should be filled. In such cases, care should be taken to enter the name of the head of the household and not that of the head of the institution.

Q. 2 : Religion of the head of household

6. You have to record the religion of the head of the household as given by him against this question. While writing the religion, you have to write the abbreviations as follows on the line against this question and *not* in any of the dotted boxes provided at the end of the dotted line against this question :

For Hindus—write H
For Muslims—write M
For Christians—write C
For Sikhs—write S
For Buddhists—write B
For Jains—write J

6.1 For 'others' record actual religion as returned fully. If a perso says that he has no religion, it may be recorded accordingly. If a person refuses to state his religion, you may write 'religion not stated'. You should not enter into any argument with the household for fillig up this question. You are bound to record faithfully whatever religion is returned by the head of the household. For institutional households, put 'X' against this question.

Q. 3 : Whether head of household belongs to S.C. or S.T.

7. You will be supplied with a list of Scheduled Castes (S.C.) and Scheduled Tribes (S.T.) in relation to your State/Union Territory by your Supervisor. While filling up the Household Schedule you will have to ascertain from the head whether he is a member of a Scheduled Caste or a Scheduled Tribe. If in reply to this question, the answer is in the affirmative, you have to record '1' in the case of a Schedule Caste or '2' in the case of a Scheduled Tribe in the box provided against this question. If the head returns himself as Scheduled Caste, you have to check his religion. He or she should belong to Hinduism or Sikhism. A person belonging to a Scheduled Caste cannot belong to any other religion. Persons who belong to a religion other than Hinduism and Sikhism will not be treated as a member of any of the Scheduled Castes. But a member of a Scheduled Tribe may belong to any religion. In case of institutional and non-S.C./S.T. head of household, write 'X' in the box.

Q. 5 : Name of caste/tribe of head household

8. If you have recorded '1' or '2' for Scheduled Caste or Scheduled Tribe, as the case may be, against Question 3 you have to enter here the name of the Scheduled Caste or Scheduled Tribe which finds place in the list provided to you. You have to be careful that only that name of Scheduled Castes or Scheduled Tribes should be entered which is given in the list pertaining to your State/Union Territory. If the head returns any other name which does not find a place in the list, it is not to be recorded and the head should be told that you are authorised to record only those castes and tribes which are given in your list in relation to the State or Union Territory concerned. It is quite likely that at this point the head might return the name of the caste or tribe which finds mention in your list. If, however, the head returns any other name which does not find place in the list it should not be recorded and the entry in Question 3, if any, in the box should be corrected accordingly. In case the head replies that he does not belong to S.C. or S.T. you have to put 'X' on the line and *not* in the box against this question. For institutional and non-S.C./S.T. households, write 'X' on the line.

Q. 5 : Language mainly spoken in the household

9. You have to ascertain from the head of the household about the language which is mainly spoken in the household. You have to record the answer faithfully as returned. There may be cases where one or two persons of the household may be speaking other languages also, but the language to be recorded here is the one which is spoken mostly by the members of the household among themselves. The language spoken in the household should not be confused with the mother tongue of each individual member of the household. For institutional households put 'X' on the line. Do not enter anything in the dotted boxes against this question.

Q. 6 : Does the household live in owned house ?

10. If a household is occupying a census house owned by itself and is not paying anything to anybody in the form of rent, then the household may be considered as living in owned house. This should be recorded by putting '1' in the box provided against this question. A household living in a flat or a house taken on 'ownership' basis on payment of instalments, should be regarded so living in its own house, notwithstanding the fact that all instalments have not been paid.

10.1 If the household lives in a rented house or in the house which is not owned, write '2' in the box. A housing unit is rented if rent is paid or contracted for, by the occupants in cash or in kind. Where an owner permits a household to live in a house, rent free, even then the household should be treated as living in a rented house, as for example, rent free accommodation provided to employees by Government, Institutions, Companies, *etc.* In such cases, the answer would be 'No' and you should write '2' in the box. For institutional and houseless households, put a cross (X) in the box.

Q. 7 : If 'No' in 6, does the household own a house or house site in the village or town of enumeration?

11. If you have recorded '2' in the box for Question 6, *i.e.*, the household does not live in its owned house then you have to ask this question. You have to enquire whether that particular household owns a house of its own or a house site elsewhere in the place of enumeration, *i.e.*, elsewhere in the village or town of enumeration. If the answer to the question is in the affirmative, *i.e.*, 'Yes', you have to record '1' in the box provided against this question. If the answer is in the negative, *i.e.*, 'No' and the head of the household replies that this household does not have a house or house site in the village or town of enumeration you have to indicate it by recording '2' in the box provided. It is obvious that this question is not applicable to institutional and houseless households because you will have to put a crosr (X) against Question 6 for such households.

Q. 8 : Predominant construction material of the house occupied by household

12. This question has been divided into three parts, *i.e.*, (a) material of wall; (b) material of roof; (c) material of floor. For your convenience the description of the predominant construction material has been indicated within rectangles under each item, *i.e.*, wall, roof and floor. A numerical code for a group of materials has been indicated. What you have to do is to enquire about the material and enter the appropriate code in the box provided with reference to the description given within the rectangles for each of the materials of wall, roof and floor respectively. This question is not applicable to institutional and houseless households. In the case of such households put a cross (X) in the box.

(a) Material of wall

13. For material of wall, 10 codes have been provided which are indicated in the schedule itself. In order to determine the material of wall you have to take into account the material out of which the major portions of the walls of the house are made and then select the appropriate code. The code thus selected should be entered in the box provided against this question.

(b) Material of roof

14. For material of roof, 8 codes have been provided. These are indicated in the schedule itself. For determining the material of the roof, you have to take into account the material out of which the outer roof exposed to the weather and *not* the ceiling, is made, *i.e.*, tiles, thatch, corrugated iron, zinc or asbestos cement sheets or concrete, wood, mud, *etc.* If the roof is mainly made of bricks and stone and has a mud plaster, cement plaster or lime plaster exposed to the sky, the material of roof in such cases will not be mud, cement or lime but it will be bricks, stone, *etc.*, which constitute the fabric of the roof. In multi-storeyed buildings the intervening floor will constitute the roof of the lower floor. After ascertaining the material of the roof you have to give the suitable numerical code in the box provided against this question.

(c) Material of floor

15. For material of floor, 7 codes have been provided as indicated in the schedule itself. For the material of floor you have again to take the major portion of material out of which the floor of the house is made. For example, if in a house only the drawing room has mosaic floor while all other rooms and corridors have just cement flooring, the material of floor to be recorded here will be 'cement', *i.e.*, code 5. Again, if a house has tiled floor in the bath room and all other rooms have cement floor the material of floor will again be 'cement'. For multi-storeyed buildings the floor of the upper storeys will be determined in the usual manner as discussed above. It may be noted that the material of the roof of the intervening floors of multi-storeyed buildings does not automatically become the the material of floor of the upper storeys. The floor material of the upper storey could be different from the fabric of the roof for the lower storey. For example, in a two storeyed building, the roof of the ground floor could be RCC while the floor material of the first floor could be mosaic.

15.1 It is again emphasised that while recording the materials of wall, roof and floor you have only to give the code number in the box provided against this question and *not* description.

Q. 9 : Facilities available to the household

16. This question is divided into three parts, *i.e.*, drinking water supply, electricity and toilet. The latter is meant for urban areas only. This question is not applicable to institutional and houseless households. In the case of such households put a cross (X) in the boxes.

(a) Drinking water supply

17. This question relating to drinking water supply has been divided into two sub-parts. The first sub-part deals with the source of drinking water supply. The sources have been put within blocks along with international numerical code against each. You have to enter the appropriate numerical code in the box provided.

17.1 If a household gets drinking water from two or more sources throughout the year, the source availed of during the greater part of the year should be recorded. After recording the numerical code in the box, proceed further for recording the answer of the sub-part (ii) of the same question, namely, whether the drinking water supply is within the premises or

outside premises. If the water supply is available within the premises write '1' in the box provided. If the water supply is not available within the premises, write '2' in the box provided.

17.2 You may have a problem in determining whether water supply is available within the premises or not. Local conditions vary tremendously in this country. We may have a well, a hand pump or tube well within the house or even the backyard of the house opening to a river or canal. In all such cases, if within the house site the source of water is located, we may take it that drinking water supply is available within the premises. Otherwise it is not available within the premises.

(b) Electricity

18. If electricity is available to the household, enter '1' in the box; if it is not available record '2' in the box. It should be noted that we are concerned with the availablity of electricity to the household as distinct from actual use of electricity by the household. The household may or may not be using electricity at the time of the visit but the fact that it is available is what we are interested in.

(c) Toilet (for urban area only)

19. This question is to be canvassed for urban areas only. If toilet facilities are available to the household within the premises of the house, write '1' in the box, otherwise record '2'.

Q. 10 : Number of living rooms in occupation of household

20. A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, *i.e.*, it should have a length of not less than 2 metres and a breadth of atleast 1½ metres, and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, *etc.*, should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattleshed and laterine and rooms in which a household industry such as a handloom is located, which are not normally usable for living or sleeping are excluded from the definition of a living room for the purpose of this question.

20.1 One is likely to come across conical shaped hut or tent in which human-beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut, etc., may by itself be construed to be a room.

20.2. In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattleshed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.

20.3. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household. Write the number of rooms available to household in the box provided.

20.4. A living room which is shared by more than one households will not be counted for any of them. In other words, only living room exclusively in possession of the household will be counted. For example, if two households share a single living room and therefore neither has a living room exclusively, write "No regular room" in the line and also enter "0" in the box in the Household Schedule of each of the households. If two households have a living room each but in addition also share a common living room, then common room will not be counted for either of the households. This question is not applicable to institutional and houseless households. In the case of such households put a cross (X) in the box.

Q. 11 : Number of married couples usually living in the household

21. Enter the number of married couples usually living in the household in the box provided against this question. Count those couples who are usually living together in the household even if one of the spouses is temporarily absent and therefore not included as part of that household for the purpose of enumeration in Part II. You may take into consideration such persons for arriving at the number of couples.

21.1. This question must be canvassed for houseless households also. However, in the case of institutional households, put a cross (X) in the box.

Q. 12 : Does the household cultivate land ?

22. Enquire if the household is cultivating land or not. If the household cultivates land, enter '1' in the box provided, otherwise record '2' in the box. For determining whether a household is cultivating land or not, if would be necessary to ascertain if one or more persons in the household are engaged in cultivation of land or supervision or direction of cultivation. Encroachers who cultivate land encroached upon, will be regarded as cultivating household for the purpose of this question. If the household has a visitor who cultivates land elsewhere, it cannot be deemed that the household as such is a cultivating household. For the purpose of this question either the head of the household or one of the usual members of the family should be cultivating land. This need not be the main activity. The land may be either owned or taken on rent in cash or kind The size of land cultivated is irrelevant. The land cultivated need not be in the place of enumeration. It may be anywhere.

22.1. A household whose members merely work on somebody else's land for wages should not be treated as a cultivating household.

22.2. Please note that cultivation is reckoned as such on the basis of the growing of certain crops only. In other words, a household will be considered as cultivating land if the household is engaged in growing the following crops only:

(i) **Cereal and millet crops:** Paddy, wheat, jowar, bajra, maize, ragi, barley, gram *etc.*

(ii) **Pulses:** Arhar, moong, masur, urd, khesari, *etc.*

(iii) **Fibre crops:** Raw cotton, jute, mesta, sunhemp and kindred fibre crops.

(iv) **Oil seeds:** Sesamum, ground-nut, rape, mustard, linseed, castor, *etc.*

(v) Ganja, cinchona, op'um and medicinal

22.3. The growing of the following crops *will not be considered as cultivation*:

(i) **Plantation crops:** Tea, coffee, rubber, tobacco, pepper, cardamom, *etc.*

(ii) **Edible-nuts (other than ground-nut):** Walnut, almond, cashewnut, *etc.*

(iii) **Fruits:** Bananas, apples, grapes, mangoes, oranges, *etc.*

(iv) Coconut.

(v) Ganja, cinchona, opium and medicinal plants.

(vi) Betel-nuts (areca).

(vii) Flowers.

(vii) Roots and tubers, chillies and spices (other than pepper and cardamom).

(ix) Vegetables.

(x) Other crops not specifically included under cultivation.

22.4. This question must be canvassed in the case of houseless households also. However, in the case of institutional households, put a cross (X) in the box.

Q. 13: If 'Yes' in 12, category

23. If you have noted code '1' against Question 12, *i.e.*, the household is cultivating land, enquire whether the land is owned, rented or partly owned and partly rented. If it is owned record '1', if it is entirely rented record code '2' and if it is partly owned and partly rented record code '3'. Enter the appropriate code in the box. Encroached land will be treated as 'rented', because it does not belong to the person cultivating it.

Q. 14: If Rendted, enter local name of tency

24. If in Question 13 you have recorded 2 or 3, *i.e.*, the household cultivates rented land either wholly or in combination with owned land, ask the local name of the tenancy. This local name should be recorded fully. For example, a household may be cultivating land taken on mortgage. It is known by different names in different parts of the country, like *sudbharana, etc.* Again, a household may be cultivating land as a 'share cropper' and the tenancy is known by different names in different parts of the country, like *Batai, tehai, bargadar, etc.* You may also come across cases where the household cultivates land taken on cash rent locally known in some parts of the country as *Lagan Par, etc.* You have to record the local name of the tenancy in all such cases. If a household cultivates different parcels of rented land under different systems of tenancy, record here the local name of tenancy relating to the largest parcel of such rented land.

Q. 15: Total population of the household

25. Enter the total population of the household in the box provided. This should be done after you fill up columns 1 to 7 of the Population Record. Total of entries in column 2 of the Population Record should be copied here.

FILLING UP OF THE HOUSEHOLD SCHEDULE, PART II—POPULATION RECORD—COLUMNS 1 TO 7

26. Part II of Household Schedule gives the format of the Population Record. There are altogether 35 columns in this form. You have already been told that columns 1 to 7 of this form should be filled up first before you take up the numeration of the individual members of the household. It must be re-emphasised that it is absolutely necessary to fill up columns 1 to 7 of this form after you have filled in Part I of the Household Schedule and before you take up individual enumeration of the members of the household. This will mainly help you in counting all members of the household, missing none, and in recording age of the individuals more precisely.

27. The next question that arises is as to who are the persons to be enumerated in the household. In other words, it is necessary to know who are the persons who are eligible for enumeration. Generally speaking, persons who are present in the household during the entire period of enumeration or who are known to be usual residents of the household and have stayed there for part of the enumeration period or who are expected to return before the February 28, 1981 are eligible to be enumerated as members of the household concerned. So also, visitors who may be present in the household which is being enumerated by you and who have been away from their place of usual residence during the entire enumeration period will also be treated as residents of the household.

27.1. Thus, when you visit a household for the purpose of enumeration, you will enumerate the following persons :

(i) All those who normally stay and are present in the household during the entire period of enumeration, *i.e.*, from February 9 to February 28, 1981 (both days inclusive);

(ii) Also those who are known to be normally residing and had actually stayed during a part of the enumeration period (February 9—28, 1981) but are not present at the time of your visit;

(iii) Also those who are known to be normally residing and are not present at the time of your visit but are expected to return before February 28, 1981; and

(iv) Visitors who are present in the household censused by you and are away from the place(s) of their usual residence during the entire enumeration period. For the purpose of enumeration such visitors will be treated as normal residents of the household where they are actually found during the enumeration period provided they have not been enumerated elsewhere.

27.2. Please note that if a person has been away from his normal or usual place of residence throughout the enumeration period, he will not be eligible for enumeration as a member of the household in which he is a normal resident. He will be enumerated wherever he is actually found during the enumeration period. Similary, a person who would have normally resided at another place but has been absent from that place for the entire enumeration period, will be enumerated by you if he is found in any household in your jurisdiction as a visitor. Such persons should, however, be cautioned that they should not get themselves enumerated again, in case they move from this place.

Col. 1 : Serial No.

28. This column relates to serial number and hardly calls for any explanation. However, in entering the members of the household in the Population Record it would be better if some system is followed. After entering the name and other particulars of the head of the household (columns 1—7), you should cover the near relations such as wife or husband of the head of the household, sons and daughters, each son's wife and children, each daughter's husband and children, then other relations such as brothers, sisters, mother, father, *etc.*, of the head of the household, then domestic servants, visitors, boarders if any, *etc.* Please see that all these persons must form part of the household and must be entitled to be enumerated in terms of the eligibility criteria spelt out in the various paragraphs. Such a system listing and entering of particulars in the Population Record will ensure that omissions are avoided, particularly of small children. It will also help in cross-checking replies regarding age.

28.1. ONE WORD OF CAUTION—You must ask probing questions regarding relations such as unmarried sisters, parents, domestic servants and children. Otherwise, the head of the household may not indicate that there are such persons as members of the household. *Please make repeated enquiries about infants and very young children because they are often liable to be left out of the count.*

Col. 2 : Name

29. Again, this question hardly calls for any explanation. The name of the person enumerated, starting with the head of the household, should be entered here. At this point you may please recall the provisions of Section 8(2) of the Census Act reproduced in paragraph 3.

29.1. Do not insist on the name of the female member of the household if the respondent does not volunteer to give it. Similarly, do not insist on a female respondent giving the name of her husband or of any other relation if by custom she is forbidden to do so.

86 M/P(D)42DCOCal.—3

In the case of infants also some times the name may not be forthcoming. In all such cases it should suffice if in this column, you write so and so's wife or sister or mother or father or son or daughter as the case may be. It needs hardly any re-emphasis that the members of the household should be enumerated and entered in a systematic order as discussed above. In the case of an institutional household, there may be a non-resident 'Head'. He is not eligible to be enumerated as a member of this household.

29.2. Household Schedule form which contains Population Record would hove been supplied to you in sufficient quantity. For each household you have to fill one form. Even if a form has been filled in for a one member household and there is enough space to enter particulars of another household you should not make further use of the form. You should take up a fresh form for each household. However, if in a large household there are more persons than what the population Record form can accommodate, you should continue the entries on the next form, but do not forget to write the word "continued" on the top of the next Household Schedule and Population Record which you are using. The word "continued" should be written in capital letters and re-write the Location Code and Serial No. of the household in the second Household Schedule form also. Other entries in Part I of the second Household Schedule form need not be filled in such cases.

Col. 3 : Relationship to head (Indicate Serial No. of mother within brackets if present in the household for children upto 10 years)

30. In this column you will have to record the relationship to head in full. In the case of the head write 'Head'. For others write the full relationship. Do not use words like 'nephew', 'niece' or 'uncle', 'aunt' but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother, father's or mother's sister's husband (for uncle), or father's or mother's sister or father's or mother's brother's wife (for aunt). Son or daughter will include adopted son or adopted daughter or step son/daughter. For brother-in-law, write wire's brother or sister's husband as the case may be. For grandson, write son's son or daughter's son as the case may be. In the case of visitors, boarders or domestic servants/ cooks, *etc.*, who are enumerated as members of the household, write visitor, boarder or domestic servant/ cook, as the case may be. In the case of an institutional household, however, all the members of the household should be treated as unrelated. It is possible that in a hostel, the resident superintendent's son or daughter also happens to be a boarder, while the superintendent himself/herself is the head. Even here the relationship of his/her son/daughter should be recorded as unrelated, because it is an institutional household.

30.1. In the case of children of age 10 years and below, please enquire if the mother of the child is present in the household, *i.e.*, she is eligible for enumeration in this household and you have entered her name in column 2 of the Population Record and other particulars in columns 3 to 7. In such a case, please note serial number of the mother (column 1 gives her serial number) against the child's name in column 3 after 'relationship to head' within brackets. For purpose of this question, step mother or adopted mother will not be reckoned.

30.2. However, there may be cases, where the mother though alive has not been enumerated in this household because she was not present during the enumeration period and hence, not eligible to be enumerated here. Please note that in such cases, no attempt should be made to record her name here for the purpose of this question.

30.3. The following illustration will help you in understanding the instructions better :

Sl. No.	Name	Relationship to head	Sex M	Sex F	Age	Marital status
1	2	3	4	5	6	7
1.	Smt.ABC	Head		√	53	W
2.	Shri DEF	Son		√	32	M
3.	Smt.GHI	Son's wife		√	25	M
4.	Shri.JKL	Son's Son(3)		√	5	NM
	and so on					

Col. 4 & 5 : Sex

31. For males, put tick √ in column 4 and for females put tick √ in column 5 against the particular person. For eunuchs and hermaphrodites, put tick √ under column 4. Verify the reference to the name and relationship to head recorded under columns 2 and 3 respectively that you have noted the sex correctly. It is obvious that there cannot be a tick in both columns 4 and 5 in the same line.

Col. 6 : Age

32. Record the age of the person in total years completed last birthday in the column. Very often there is a tendency on the part of individuals to return 'years running' rather than the 'years completed'. Make sure that only the actual number of years completed is recorded.

32.1 In respect of infants who might not have completed one year by the day of enumeration, their age in completed years must be shown as '0', as they have not yet completed one year of age. As has been stated earlier make sure that infants even if one day old are invariably enumerated. You should not enter the age in months. The age of an infant who has not yet completed one year should invariably be noted as '0' only.

32.2. Age is one of the most important items of demographic data and you should ascertain the age with greatest care. Many persons, particularly in the rural areas often times do not give their age correctly. They should be assisted to state the correct age by

stimulating their memory with reference to any historical event, *etc.*, well-known in the area. Sometimes the age can be ascertained with reference to the age of another person of a known age, who may be living in the same household or in the neighbouring household or that of a well known person of the village such as Headman of the village. A person can then easily say whether he was older or younger than such a person and by how many years. This will help you to record the age more precisely.

33. The advantage of recording all eligible members of the household in the Population Record columns 1 to 7 first should now be obvious to you. For, you will have an opportunity of checking the consistency of the age reported for each member of the household in relationship to the age of other members. In case of any doubt you can certainly check back with the respondent and ascertain correct age which should be recorded here.

34. Please recall the instructions which have been given under column 3—Relationship to head. You are required to indicate against the name of a child of age 10 years and below the serial number of the mother in brackets in column 3. When you find that the age of any child whose details you are entering in the Population Record is 10 years or below, please go back to column 3 to make sure that you have entered the serial number of the mother in brackets against the name of such a child, provided of course that the mother has also been enumerated as part of this household.

Col. 7 : Marital status

35. In answering this question use the following abbrevia ions :

NM : Never married;
M : Currently married;
W : Widowed;
S : Separated or Divorced.

35.1. The entry is to be made in the manner indicated below:

(a) For a person who has never been married at any time before, write **'NM'.**

(b) For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living, write **'M'.** Write **'M'** also for persons who are recognised by custom or society as married and for the persons in stable *de facto* union. Even if a marriage is disputed in the locality, write **'M'** if the person concened says he or she is married or is in stable *de facto* union.

(c) For a widowed person whose husband or wife is dead, and who has not been married again, write **'W'.**

(d) For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been divorced either by decree of a law court or by an accepted social or religious custom but who has not re-married, write **'S'.**

(e) For an independent woman return he marital status as declared by her.

35.2. This question must be answered for all person irrespective of age. For very young children, though we may know that they are not marred, the appropriate abbreviation must be entered.

35.3. **'M'** is the abbreviation for 'currently' married. The word 'currently' does not mean 'recently'. It only means 'at present'. For example, a man may be 80 years old and may have been married 50 years ago, if his wife is still alive and the marriage subsists, they are 'currently married'.

35.4. The only conditions for the marital status to be reckoned as 'currently married' are that the man and woman are both alive and that their marriage subsists, *i.e.*, they are not divorced or separated. Please note that we are not concerned with the legality of a union.

36. Having filled in Part I—Household Particulars and columns 1 to 7 of Part II—Population Record, you are now set for taking up individual enumeration of all the members of the household listed in column 2 of the Population Record. Column 8 to column 35 of the Population Record are to be entered with reference to the entries made in the individual Slip. The instructions for making the entries in column 8 to column 35 are given later, after the instructions on the Individual slip.

FILLING UP OF THE INDIVIDUAL SLIP (UNIVERSAL)

37. In this booklet, you have been told that you will be required to canvass the Household Schedule for each household and an Individual Slip, containing 16 questions with parts, for each individual in the household enumerated in your jurisdiction. If you are an enumerator in a sample area, 6 additional ques ions will have to be canvassed. The operations will be carried out in two stages, (a) enumeration during the period February 9, 1981 to 28, February 1981, and (b) revisional round between March 1, 1981 and March 5, 1981. You have also been told in paragraph 13 that the reference date for the 1981 Census will be the sunrise of **March 1, 1981.** In the same paragraph, instructions have been given as to how the revisional round should be conducted.

38. In paragraph 27 of this booklet, you have been told as to who are the persons to be enumerated in a particular household of your jurisdiction. The instructions are beriefly recapitulated below.

"Generally speaking, persons who are present in the household during the entire period of enumeration or who are known to be usual residents of the household and have stayed there for part of the enumeration period or who are expected to return before the February 28, 1981 are eligible to be enumerated as members of the household concerned. So also, visitors who may be present in the household which is being enumerated by you and who have been away from their place of usual residence during the entire enumeration period will also be treated as residents of the household.

Thus, when you visit a household for the purpose of enumeration, you will enumerate the following persons :

(i) All those who normally stay and are present in that household during the entire period of enumeration, *i.e.,* from February 9 to February 28, 1981 (both days inclusive);

(ii) Also those who are known to be normally residing and had actually stayed during a part of the enumeration period (February 9—28, 1981) but are not present at the time of your visit;

(iii) Also those who are known to be normally residing and are not present at the time of your visit but are expected to return before February 28, 1981; and

(iv) Visitors who are present in the household censused by you and are away from the place(s) of their residence during the entire enumeration period. For the purpose of enumeration such visitors will be treated as normal residents of the household where they are actually found during the enumeration period provided they have not been enumerated elsewhere.

Please note that if a person has been away from his normal or usual place of residence throughout the enumeration period, he will not be eligible for enumeration as a member of the household in which he is a normal resident. He will be enumerated wherever he is actually found during the enumeration period. Similarly, a person who would have normally resided a. another place but has been absent from that place for the entire enumeration period, will be enumerated by you if he is found in any household in your jurisdiction as a visor. Such persons should, however, be cautioned that they should not get themselves enumerated again, in case they move from this place."

39. In paragraph 26 of the booklet you have been told that columns 1 to 7 of the Population Record (Part II of the Household Schedule) should be filled up first before you take up the enumeration of the individual paticulars of the household. In paragraphs 28 to 35, you have been told hop columns 1 to 7 of the population Record are to be filled. The concepts and definitions associated with each column have also been explained at appropriate places. You are now set for taking up the individual enumeration of all the members of the household listed in column 2 of the Population Record.

40. You will be required to fill up an Individual Slip (Universal) for each member of the household. If you are an enumerator of a sample block or you have been asked to canvass the sample questions also in your block you will have to canvass the relevant questions contained in the Sample Slip which will be found on the reverse of the Individual Slip (Universal) for each persons. The instructions for filling up the Individual Slip (Universal) are given hereafter. Those for filing up the Sample Slip will be given at the end of the instructions of the Individual Slip (Universal).

INDIVIDUAL SLIP (UNIVERSAL)

41. A specimen of the Individual Slip (Universal) is given on page 31 Please note that this document is marked 'Confidential' which means that the particulars entered in this slip will have to be treated as confidential. Your attention at this stage is invited to the relevant provisions of the Census Act, 1948 reproduced of this booklet.

Pad No. and Slip No.

42. On the right hand top corner of the slip will be found Pad No. and Slip No. You will have to note the Pad No. on each slip of the pad. The Pad No. will have been indicated on the cover page of the pad supplied to you by your Charge Officer/ Supervisor. The Slip Nos. for each pad will run from 1 to 50 or 1 to 25, as the case may be. In some pads, the actual number of Individual Slips may, by mistake in binding, be a little more or little less. The last serial number in such pads will, therefore, vary accordingly. The idea is that every slip should be allotted the Pad No. already assigned by your Charge Officers well as the distinct serial number on each slip in a sequence starting from 1.

Location Code

42.1 You will have to note the Location Code on each slip, as per instructions given in paragraph 2 of this booklet. Your Charge Officer or Supervisor would have already indicated to you the complete Location Code of the rural or urban block assigned to you and noted these particulars on the cover page of the pad. The Location Code consists of five elements, namely, State/Union Territory code, District, code, Tehsil/Taluk/PS/Development Block/Circle or Town code, village or the ward code (each separated by oblique stroke and enumeation block (EB) District and Charge code (Tehsil, *etc.*, or Town) would have been rubber-stamped on each slip of the pads suplied to you. such cases, you will have to enter the remaining two elements namely, village or ward and EB code. If however, no such rubber-Stamping has been done, you will have to write the full Location Code consisting of the aforesaid five elements, as given by your Charge Officer or Supervisor, on each Individual Slip. It is advisable to Note the Location Code on each slip at home before starting actual enumeration, so that you do not waste your valuable time in the field in filling up the Location Code. Please not that the code for town is to be given in Roman numbers, while codes for other units will be given in international numerals. For example, Location Code 2/10/3/46(138) would mean enumeration block No. 138 falling in village No. 46 in Tehsil No. 3 of District No. 10 in State No. 2. Similarly, Location Code 10/6/II/5(22) would mean enumeration block No. 22 falling in ward No. 5 of Town No. II in District No. 6 of State No. 10.

42.2 If by any chance, you have been put in charge of more than one enumeration block, *please make sure that you have separate pads for each enumeration block*. Do not use the same pad for different enumeration blocks even if blank forms are available in a particular pad.

42.3 Please note that the Location Code tallies with the Location Code indicated in the filled in Abridged Houselist and the Household Schedule on the basis of which you are enumerating the individuals in a particular household.

Si. No. of Household

43. The serial number of the household as given in column 7 of the Abridged Houselist supplied to you will have been entered by you in the Household Schedule at the appropriate place. This number has to be entered on each slip of the members in relation to a particular household. It would be worthwhile your recalling the instructions given under paragraph 3 of this booklet at this stage.

Q. 1 : Name

44. This question hardly calls for any explanation. It is obious that the name of each member of the household will have to be filled against this question on different slips. At this point, you will be well-advised to recall the instructions.

45. *Please remember that you have to fill in one Individual Slip for each member of the household recorded in column 2 of the Population Record. Please also remember to fill the slips relating to the members of the household in the sequence in which the names of the members of the household have been entered in column 2 of the Population Record.*

Q. 2 : Relationship to head

46. It will be noticed that enough space has been provided for writing the relationship to head. You should record the relationship to head in full. The instructions in this regard are given in this booklet which may be read for refreshing your memory. In the case of the head of the household, write "Head". Please do not write anything in the dotted boxes.

Q. 3 : Male(I)/Female (2)

47. For male, write '1' and for female, write '2' in the box provided against this question. For eunuchs and hermaphrodities, write '1' in the box. Verify with reference to the name and relationship to head recorded under columns 2 and 3 respectively of the Population Record that you have noted the sex correc ly.

Q. 4 : Age

48. Record the age of the person in total years compared last birthday in the rec angle provided against this question. The age should be recorded in international numerals. Very often, there is a tendency on the part of individuals to return 'year running' rather than 'years completed'. Make sure that only the actual number of years completed is recorded. In respect of infants who might not have completed one year by the day of enumeration, their age in completed years must be shown as '0' as they have not yet completed one year of age. Make sure that infants even if one day old are invariably enumerated. You shoud not enter the age in months. The age of an infant who has not yet completed one year should invariable be noted '0' only. It will be useful to recall the instructions in this booket in this connection.

Q. 5 : Marital status

49. Intructions given under the booklet may be followed. You will have to use the following abbreviations in answering this question :

For never-married, write 'NM'

For currently married, write 'M'

For widowed, write 'W'

For separated or divorced, write 'S'

49.1. The entry as above will have to be made on the line and *not* in the dotted box.

NOTE : *The entries in Question 1 to 5 correspond to the entries in columns 2 to 7 of the Population Record and you will be well advised to make a tally of the entries as and when you are filling up on Individual Slip for each of the members entered in column 2 of the Population Record.*

Q. 6 : Mother tongue

50. Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded.

50.1. Record mother tongue in full, whatever be the name of the language returned by the respondent and *do not use abbreviations*. Please note the following :

(a) You are not expected to determine if the language returned by a person is a dialect of another language,

(b) You should not try to establish any relationship between religion and mother tongue.

(c) You are bound to record the language as the person as his mother tongue and you should not enter into any argument with him/her and try to record any language other than what is returned, and

(d) If you have reasons to suspect that in any area due to any organised movement, the mother tongue is not being truthfully returned, you should record the mother tongue as *actually* returned by the respondent and make a report to your supervisory officers for verification. *You are not authorised to make any correction on your own.*

50.2. The mother tongue as returned by the respondent should be recorded in full on the lines. You should *not* write any thing in the four dotted boxes provided against this question.

50.3. At this point, you may please recall the definition of a household as given in this booklet. Since a household may consist of persons related by blood or of unrelated persons or a mix of both, it is absolutely to ask of every person about his mother tongue because the mother tongue of each member of a household need not necessarily be the same—these may be different for different persons in the household.

Q. 7 : Two other languages known

51. You have recorded the mother tongue in Question 6. Enquire whether the person knows any other language, Indian or foreign, and write languages returned by him/her on the lines and *not* in the dotted boxes, against this question. In case he/she does not know any language apart from his/her mother tongue, put 'X' on the line against this question.

51.1. The number of languages recorded under this question should not be more than *two*. These languages should be other than the mother tongue of the person enumerated and these should be recorded one after the other in the order in which the person speaks and understands them best and can use with understanding in communicating with others. The person need not necessarily be able to read and write these languages. It is enough if he/she has a working knowledge of these two languages to enable him/her to converse in those languages with understanding. Please do not write anything in the dotted boxes.

Q. 8 : Religion

52. In answering this question, use the following abbreviations :

For Hindus, write 'H'

For Muslims, write 'M'

For Christians, write 'C'

For Sikhs, write 'B'

For Buddhists, write 'B'

For Jains, write 'J'

For the others record the actual religion as returned fully.

52.1. If the person says that he has no religion this answer may be recorded accordingly. Do not mistake religion for caste which will not be recorded here. You should also not try to establish any relationship between religion and mother tongue. Do not write any thing in the dotted boxes but write on the line.

Q. 9 : Whether S.C. (1)/S.T.(2)

53. You have been furnished with a list of Scheduled Castes and Schedule Tribes in relation to your State/Union Territory. Ascertain if the person enumerated belongs to a Scheduled Caste or a Scheduled Tribe and if he does, write '1' for Scheduled Caste and '2' for Scheduled Tribes in the box provided against this question. For a person who is not a member of and '2' for Scheduled Tribe nthe box provided against the box.

53.1. If the person belonging to a Scheduled Caste or a Scheduled Tribe returns his/her caste or tribe by a synonym or generic name of a caste or a tribe, it should be reckoned as Scheduled Caste or Scheduled Tribe only if the name finds place in the list furnished to you. Similarly, if the answer to this question is in general terms, like Harijan/Girijan or Achhut/Adivasi, you should not reckon the person enumerated as belonging to Scheduled Caste/Scheduled Tribes, as the case may be. In such a case, you should ascertain the name of the caste/ ribe fully and if that name finds place in your list, you should reckon the person as belonging to Schedu'ed Caste or Scheduled Tribe, as the case may be. If a person is negligent and insists on calling himself/herself merely 'Harijan' or 'Achhut' or 'Adivasi' or 'Girijan', as the case may be, or reports the synonym or generic name of a caste or tribe please tell him/her that this description is not adequate for census purposes and persuade him/her to give the actual name of the Scheduled &aste or Scheduled Tribe. This may bring out he actual name of the Scheduled Caste or Scheduled Tribe, as the cast may be, and record '1' or '2' in the box as may be applicab'e. If the person merely claims to be a Scheduled Caste or Scheduled Tribe, but says that he/she does not belong to any of the no ified communities applicable to the area as reflected in the list supplied to you, he/she will not be reckoned as belonging to a Scheduled Caste or a Scheduled Tribe.

53.2. Scheduled Castes can belong to Hindu or Sikh religion. If a person belong to S.C., he/she will be either 'H' or 'S' in the answer to Question 8 : Religion. Scheduled Tribes can belong to any religion.

Q. 10 : Name of caste/tribe

54: For the person recorded as a Scheduled Caste, *i.e.,* code '1' in the box against Question 9, write the name of the caste in full on the lines and *not* in the dotted boxes. For those for whom code '2' (that is S.T.) is recorded in the box against Question9, write the name of the tribe in full on the lines and *not* in the dotted boxes.

54.1. Please check that the name of caste/tribe, as the case may be, appears in the list of Scheduled Castes/Scheduled Tribes supplied to you by your Charge Officer or Supervisor.

54.2. For those persons for Whom 'X' has been recorded against Question 9, there will be no entry in Question 10 and you should put a cross on the line.

Q. 11 : Literate (1)/Illiterate (2)

55. **Definition of a literate.** A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

55.1. For a person who is literate, *i.e.,* who can both read and write with understanding in any language '1' in the box provided against this question. If there is any doubt about a person's ability to read or write, the test that may be applied for reading is his/her ability to read any portion of the printed matter in the Enumerator's Instruction Booklet (provided the person is familiar with the language used in the booklet) and similarly, for writing, he/she should be able to write a simple letter. Ability merely to sign one's name is not adequate to qualify a person as being able to write with understanding. If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondent's word has to be taken as correct. Other members of the household may also be able to testify to the literacy of the person enumera ed.

55.2. For a person who is illiterate, *i.e.,* who can neither read nor write or can merely read but cannot write in language, write '2' in the box against 'his question. All children of the age of 4 years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

Q. 12 : Educational attainment

56. This question will be asked of only those who are literate and for whom '1' has been recorded against Question 11. For a person who is illiterate and for whom '2' has been recorded in the answer to Question 11, there is no question of ascertaining the educational attainment even if he/she had at some stage attended school and passed a standard and had relapsed into illiteacy. In such a caser, you should put a dash (—). We ae insisting that a dash (—) should be put if there is no educational attainment and *no* cross (X), because we want to avoid confusion with 10th standard which a cross may signify. You will have to ascertain and record the highest educational level attained by a person for literates, *i.e.,* for whom '1' is recorded in answer to Question 11.

56.1. For a person who is still studying in a particular class, the highest educational level attained by him/her will be one that he/she has actually passed and *not* the one in which he/she is studying. For example, a person studying in 1st year B.A. should be recorded as only 'PUC' or 'Higher Secondary', as the case may be. Similarly, for a person studying, say, in the 4th year of M.B.B.S., his/her educational attainment should be 3rd year of M B B S, which is the highest level he/she has actually attained. You must record the actual standard passed such as. III standard, VIII standard, 1st year B. Com., etc. However, if a person merely says that he/she has passed primary, middle, matriculation, school final, secondary or other definite levels, record him/her as such.

56.2 The highest educational level attained by the person enumerated should be recorded. When a person holds both general and technical qualifications both of which are of equivalent level or of varying levels such as B Sc. (Zoology) and M B.B S. or B A. (Maths) and B E (Bachelor of Engineering), both the technical and general qualifications should be recorded against this question. In the case of pass courses, indicate the degree only.

56.3. In recording the educational level of a graduate or a post-graduate, the major subject such as B.Sc. (Maths.). M.A. (Economics). M. Sc. (Botany), B.Sc. (Agriculture), *etc.*, should be noted. You should not use abbreviations which are not in common use. In such cases, the degree or diploma should be spelt out fully. For example, M.A. (Hindi) and diploma in Library Science or M.A. (Soc.) and Diploma in Labour Relations. Adequate space has been provided in the slip and you are urged to record the qualification accurately and in sufficient detail. This information is vital for manpower planning and should receive your careful attention.

57. Whenever, you come across graduates or post-graduates as also those with a technical diploma or degree and those with certificates from the Industrial Training Institutes (ITI), you will have to issue to such persons 'Degree Holder and Technical Personnel Schedule' and ask the person(s) concerned to fill the schedule which will be collected by you during your revisional round between March 1 to 5, 1981. You will be supplied with adequate number of Degree Holder and Technical Personnel Schedules and you are urged to issue as many schedules as there might be graduates or post-graduates or technical diploma or degree hoders in the household that you have enumerated. This information will be readily available when you have ascertained information regarding educational attainment against Question 12 of the Individual Slip. While issuing the Degree Holder and Technical Personnel Schedule for each eligible person in the household, you should not he Location Code in the Schedule while issuing it. You should put a tick (√) against Question 12 of the person concerned for whom a Degree Holder and Technical Personnel Schedule has been issued. You will be required to furnish a statement giving the number of blank schedules issued to you, number of schedules issued to eligible persons, number of filled in schedules collected by you and number of blank schedules returned by you to your Supervisor. Therefore, it is necessary that you identify with the help of a tick (√) against Question 12 of the persons concerned for whom a Schedule has been issued in oder to give an accurate account of schedules issued to eligible persons. During your revisional round between March 1 and 5, 1981 about which instructions are given in this booklet, you must please collect all the filled in Degree Holder and Technical Personnel Schedules issued by you to the members of the household in your jurisdiction and hand them over to your Supervisor. While collecting the Degree Holder and Technical Personnel Schdeule, you must put a reverse stroke (/) on the tick (√) against question 12 of the individual concerned for whom you have put the tick, while issuing the schedule. When you do this, the marking will appear as (√) to signify that the filled in schedule in respect of that individual has been collected. If, however, any particular individual in a household says that he has not been able to find time to fill in the schedule, you may please request him to do so immediately and post it at the nearest post office or letter box. The individual may be told that he has to fold the form, paste and post it. No postage will be required as this will be paid by the addressee.

Q. 13 : Attending school/college, Yes (1)/No—(2)

58. After you have recorded the answer to Question 12, you have further to ask whether the person whom you are enumerating is attending any school or college. If the answer is 'Yes', you have to record '1' in the box provided against this question. If the answer is 'No', you should record '2' in the box. *Please note that illiterates (code 2 against Question 11) can be found attending school.* Therefore, this question should be asked of all persons, including elderly men and women.

58.1. In recording answers to this question you are not required to ascertain whether the school/college being attended by the person enumerated is a recognised or unrecognised institution. The choice should be left to the respondent as to whether the person is attending school/college. Thus, if a person is receiving education through a correspondence course or attending some vocational course or attending the Adult Education Programme and returns himself as attending school/college, he/she will be entered as such and code '1' will be recorded in the box against this question.

ECONOMIC QUESTIONS

59. In the 1981 Census we intend collecting information regarding the economic activity of the people in great detail so that those who use these data have the type of information they want. The economic questions consist of three parts, namely :

I Q. 14A Worked any time at all last year? Yes / No (H/ST/D/R/B/I/O

Q. 14B if yes in 14A, did you work for major part of last year ? Yes (1) No (2)

II Q. 15A Main activity last year ? Yes in 14B (C/AL/HHI/OW / No in 14B (H/ST/D/R/B/I/O)

Q. 15B 14B Yes- Any other work any time last year ? Yes (C/AL/HHI/OW)/No
14B No -Work done any time last year (C/AL/HHI/OW)

III Q 16 If No in 14A or 14B seeking/available for work ? Yes (1)/No (2)

59.1. These questions must be canvassed for every person, irrespective of age or sex. *Every person must be asked Question 14A, including the very young or very old and the answer to this question must be filled in.* The other questions will have to be filled in the case of those to whom they are applicable. The instructions for filling these questions follow.

59.2. These questions are meant to get details of the work done by the people with reference to last year. We may, therefore, first consider what is meant by 'work' and what the 'reference period' is

Definition of work

60. Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Reference Period

61. In all the questions, the reference period is the one year preceding the date of enumeration. Certain types of work such as agriculture, household industry like, *gur* making *etc.*, are carried in either throughout the year or only during certain seasons or parts of the year, depending on the local circumstances. In such cases what we are concerned with is the broad time-span of the agicultural seasons preceeding the enumeration.

Explanation

62. There should be no confusion regarding these questions. What we are trying to find out is the number of workers and since workers can be full-time workers or seasonal workers or marginal workers, it is necessary to collect data that will give us the correct picture. This is what Questions 14A and 14B and Question 15A and 15B seek to do. The detailed explanation and instructions for each of these questions are given separately but it will be useful if we look at these together to understand their purpose better.

62.1.Question 14A seeks to find out if a person has done any work at all during the last year or whether he or she did not work at all and if it is the latter, how the person spent his/her time as a non-worke Then Qnestion 14B seeks to find out who among the persons returning 'Yes' in Question 14A had worked for the major part of the year. By major part of the year, it is intended to find out how many had worked for 183 days or more or in other words, worked for 6 months or more. Those who have worked for 183 days or more, will answer 'Yes' for Question 14B. For them code '1' has to be recorded in the box. But those who have worked for less than six months or 183 days will say 'No', and for them code '2' is to be recorded in the box for this question. Question 15A seeks to elicit information on the main activity of the workers in Question 14B, *i.e.* those for whom '1' has been recorded in the box. It will also elicit information about the main activity of the 'marginal workers' covered in Question 14B, *i.e.*, those who have returned 'No' and for whom '2' has been recorded in the box against Question 14B.

62.2. The person may have worked for six months or 183 days or more in more than one activity. For example, he/she may have worked for 3 months in cultivation, one month in *gur* making and 3 months as an agricultural labourer. In Question 15A, he/she is required to indicate which of these three activities according to him/her was his/her main activity, i.e., in which capacity he/she spent more time. In the instant case since the person has spent three months each in cultivation and as agricultural labourer the choice as to which of these two would be his/her main activity should be left to him/her. Those who have returned 'No' for Question 14B, *i.e.*, those who have worked for less than six months or 183 days during the last year and for whom code '2' has been recorded in the box, will have to state whether according to them, they were engaged mainly in household duties, or as student, or dependent or as retired person, rentier, or beggar or inmates of institutions, and if not in any of these categories, the person(s) should be put under 'Other' in Question 15A.

62.3 In Question 15B, details of secondary work or marginal work are sought to be obtained. Those who have worked for the major part of the year, *i.e.* those for whom '1' has been recorded in the box against Question 14B, may have had secondary work and this should be entered in Question 15B. Those who have not worked for the major part of the year and for whom code '2' has been recorded in the box against Question 14B, must have done some marginal work and these details will be entered in Question 15B. It is important that probing questions are asked to elicit correct information in this question.

62.4. In Question 16, it is proposed to ask all persons returning 'No' in Question 14A, *i.e.* H/ST/D/R/B/I/O in Question 14A or 'No' in Question 14B, *i.e.*, code '2' in Queston 14B, whether he or she has been seeking work or is available for work.

62.5. It will thus be seen that these questions on economic aspects have been so designed as to identify all the workers, regular or seasonal, and non-workers with reference to the activities during the last one year prior to the date of enumeration. It is very important to remember that the period referred to in Questions 14A, 14B, 15A and 15B is one year preceding the enumeration. Thus, if in some areas, a person has been a cultivator or an agricultural labourer, or has worked in an industry, *etc.*, only in one season *i.e.*, less than 6 months/183 days he/she is not to be treated as a worker for Question 14B. His/her economic activity will be reflected in Question 15B. Thus, all those returning 'Yes' in Question 14A must be netted as 'Yes' in Question 14B or in Question 15B or both.

63. Certain important points that need special emphasis are the following and these should be kept in mind :

(i) A person who normally works but has been absent from work during the reference period on account of illness, holiday, temporary closure, strike, *etc.*, must be treated as engaged in the work he/she would otherwise have been doing but his/har temporary absence.

(ii) Persons under training such as apprentices, with or without stipends or wages, should be treated as workers.

(iii) A person who has merely been offered work but has not actually joined yet, should not be treated as engaged in this work.

(iv) A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a student, even if such a person helps in the family economic activity but not as a full worker should not be treated as a worker for Question 14B, even though he or she may be recorded as 'Yes' in Question 14A. On the other hand, if a person is primarily engaged in some economic activity for major part of the year but at the same time does also attend to some household chores or attends a night school, etc., he or she would be treated basically as a worker for Question 14B and categorised suitably in Question 15A.

(v) A person, who merely receives an income, such as a rent receiver or a pensioner who does not have to work for receiving the income, will not be treated as ecnomically active unless the person is also engaged for some part of the year in some economic activity. Similarly, beggars, pensioners, receivers of agricultural or non-agricultural royalty or of rents or dividends who may be earning on income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, possession, business or commerce.

(vi) An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purpose of this question. If however, in addition to her household work she engages herself in work, such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle for wages or selling firewood or making and selling cowdung cakes or grass, *etc.*, or any other work like cultivation, *etc.*, she should be treated as working under Question 14A.

(vii) A man or a woman who is doing household duties may be producing or making something *only* for the domestic consumption of the household and not for sale. Such a person is not a worker, even though from his or her point of view the activity is productive.

(viii) For an undertrial prisoner enumerated in a jail, he/she should be recorded for the work he/she was doing before he/she was apprehended. Similarly for a person temporarily in a hospital or similar institution he/she should be recorded for the kind of work he/she was doing before he/she was admitted into hospital or institution. But for a convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work should not be recorded, but 'I' should be recorded. A question arises as to what should be deemed to be long-term. For census purposes, inmates of penal or charitable or mental institutions if detained for 6 month or more should be recorded as 'I'.

(ix) A full-time public or social service worker who is actively engaged in public service activity or a full-time political worker who is also activity engaged in furthering the political activity of his/her party will be recorded as a worker and entered accordingly. Such persons will include members of Parliament, State Legislatures, Local authorities, *etc.*

64. Each of the economic questions can now be considered in detail. *Please study these instructions, carefully. It will help if you read the general introduction given above and those that follow more than once so that the scope of the questions are familiar to you.*

Q. 14A : Worked any time at all last year ?

65. This question is intended to divide the population into broad streams on the basis of a liberal definition of work. The reference period is one year. This question is expected to net all workers irrespective of the amount of time they have spent on work. In other words, this question will find out the number of all workers which will include full-time workes, part-time workers, marginal workers and even workers whose contribution would otherwise be considered insignificant.

66. The reference period is one year and this includes the agricultural seasons also. A person may have worked as a cultivator or as an agricultural labourer throughout the year or in some season such as only *kharif* or *rabi*, or only for a few days. In all these cases this person has worked at some time in the year and the answer to this question should be 'Yes'. 'Yes' should be written on the line and *not* in the dotted box. One may have been a cultivator, an agricultural labourer, or engaged in a household industry or any other work. The definitions of these terms are given later, but the important point is that we are determining the fact that one has done some work some time during the last one year.

67. Obviously, probing questions will have to be asked specially in the case of those who are not regular workers. *It is particularly important to ask such probing questions regarding the work done at any time last year or any of the seasons in the reference period in the case of women and children in the rural* areas. Women and children in the rural areas work in the fields in the sowing, harvesting or other seasons and this may be on their own land or as labourers on someone else's land. This is usually seasonal work only, while they run the house and do all the household work. Unless questions are asked about such work, the usual answer may be that they do only household work.

68. It must be remembered that a man or a woman who is doing only household duties or making something only for domestic consumption (and *not* for sale) is not doing any work in census terminology. It is true that a housewife may be working harder than the others in the home because she has to cook, look after the children, run the house, etc., but for the purposes of census she is not a worker.

69. In this question every worker (even marginal workers) will be identified and in their cases the answer will be 'Yes'. You must enquire regarding each person that you enumerate, whether he or she worked anytime at all during the last year. Even if the person has worked only for a few days, you have to record him/her as 'Yes', against this question.

70. If the individual has not worked at all during the last year, the answer will be 'No'. Then ascertain how he or she spent his or her time and record 'H' or 'ST' or 'D' or 'R' or 'B' or 'I' or 'O' as the case may be, below the line against this question.

71. In Question 14A we are trying to find out whether a person has worked any time or has been a non-worker throughout. If he or she is a non-worker throughout, the category has also to be ascertained which is as follows :

(i) Household duties—H

(ii) Student—ST

(iii) Dependents—D

(iv) Retired persons or rentiers—R

(v) Beggars, *etc.*—B

(vi) Inmates of institutions—I

(vii) Other non-workers—O

The symbols which should be used to indicate these categories are also shown above against each category.

72. The definitions of the seven categories of non-workers are given in the following paragraphs.

Household duties—H

72.1. This covers all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year. Such persons should be entered as 'H'.

72.2. If a person who normally attends to household duties is also engaged in some economic activity, then he or she is a worker for the purposes of Question 14A and not a non-worker. For example, a housewife may help in family cultivation or agriculture or make and sell cowdung cakes at odd times, or prepare *papad, achar, etc.* and sell them. She is a worker and should be recorded as 'Yes' in Question 14A though she is mainly a housewife. On the other hand, a woman may be working in a factory or office or as a labourer or cultivator and may also be attending to household duties. Such a person is of course a worker and will be categorised appropriately in Question 15A later, and she will be recorded as 'Yes' in Question 14A.

72.3. It will be necessary for you to ask probing questions, particularly in the case of women, to find out if they have any economic activity, even if it is marginal, apart from household duties. If they have, they would be workers for the purposes of Question 24A, but the fact that they are mainly engaged in household duties will be reflected in Question 14B and 15A as we will see later.

Students—ST

73. This will cover all full-time students and children attending school. For student, write 'ST'.

73.1. If a student participates in some economically productive work, say by helping sometimes as an unpaid family worker in family cultivation, or in household industry, trade or business, such student should be treated as a worker for the purposes of Question 14A *and not as a student.* In such cases, even though such a person is no doubt mainly a student, he or she is a worker for the purposes of Question 14A. The fact that such a person is mainly a student, will be reflected in Question 14B and 15A, as we shall see later.

73.2. Please note that a person has to be a full-time student for being classified as 'ST' in Question 14A. For example, a person who is mainly attending to household duties but taking a correspondence course or attending part-time classes will not be classified as 'ST' but would be 'H' in Question 14A.

73.3. Please do not presume that a person does not do any work because he is a student. It is very important to ask probing questions from students so as to net marginal workers.

73.4. Please note that in most houses, the daughters help in the household work though they are studying full-time. In such cases we are more interested in finding out if they are students and for this purpose you must ask if such girls are students or not. If they are, they should be recorded as 'ST' and *not* as 'H'.

Dependents—D

74. This category includes all dependents such as infants or children *not* attending school or a person permanently disabled from work because of illness or old age.

74.1. Dependents will include even able-bodied persons who cannot be categorised in any othr category of non-worker but are dependent on others. However, if such a person who is dependent on others for subsistence is seeking work, he or she should be categorised as 'O'.

74.2. If a girl or an old women attends to household duties she should be categorised as 'H' rather than 'D'. As you are aware, many persons may be dependents in the general sense of the word but are also doing household work, studying or looking for work. In such cases, they should be entered as 'H', 'ST' or 'O' as the case may be, and *not* as 'D'. It is, therefore, necessary for you to ask whether a person who is said to be dependent is s udying or looking for work, *etc.*, and if so, categorise him or her accordingly rather than as 'D'. Such persons would particularly include unemployed daughters, sisters, brothers, *etc.*

Retired persons or Rentiers—R

75. A person who has retired from service and is doing no other work, *i.e.*, not employed again in some full-time work or not engaged in some other work such as cutivation, business, trade, *etc.* or a pesron who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he/she does not have to work, will come under this category. 'R' should be noted for a person coming under this category in the space provided.

75.1. However, in such cases also a careful probe is necessary. A retired person may be drawing pension and be doing some work, as for example, a retired engineer may be working as a contractor. In such cases, he/she is a worker and should be entered as such.

Beggars, etc.—B

76. This will cover beggars, vagrants or cases such as persons without indication of source of income and those with unspecified sources of subsistence who are not engaged in any economically productive work.

76.1. For such persons, 'B' should be written in the space provided.

Inmates of institutions—I

77. This will cover convicts in jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, *etc.*, in such institutions. But an undertrial prisoner enumerated in a jail should be recorded for the work he/she was doing before he/she was apprehended. Similarly, a person temporarily in a hospital or similar institution should be recorded for the kind of work he/she was doing before he/she was admitted into the hospital or institution. But for a long-term undertrial prisoner or convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work should *not* be recorded, but 'I' should be recorded. A person will be considered as "long-term" if he or she is in such an institution for 6 months or more.

Other non-workers—O

78. This will include all non-workers who may not come under any of the above *six categories* but who are looking for work. They should be noted as 'O' in the space provided. A boy or girl who has completed education or has stopped studying and is looking for work will come under this category. A person who is merely spending his/her time at home as a dependent and is not doing any work and is not seeking any work will come under 'D' rather than 'O'. A person irrespective of age and whether educated or not, if he or she reports that he or she is not engaged in any other activity *but is seeking work* will come under this category.

78.1. It must be noted that this category includes only those who do not fall into any of the other categories of non-workers discussed earlier. There may be cases of students who may be seeking work and quite prepared to give up studies if they got a job. Such persons are students (ST) for Question 14A. The fact that they are seeking jobs will be reflected in Question 16. Thus, category 'O' need not necessarily represent all those who are seeking work.

Q. 14B : If yes in 14A, did you work major part of last year? Yes (1)/No (2)

79. As mentioned earlier, through Question 14A you have classified all people into two broad streams of workers and non-workers. In doing so, workers would include all those who have worked irrespective of the quantum of their contribution to the economy. Even marginal workers are categorised as workers in Question 14A.

79.1. Having found out that the person had worked any time at all during the last year (Yes in 14A), you have now to ascertain whether the person worked for the major part of last year. By major part of last year, is meant that the person had worked for 183 days or more, or in other words worked for six months or more. If the answer to this question is in the affirmative you should record '1' in the box against Question 14B. If the person has worked for less than six months or 183 days during the last year, you should record '2' for that person in this question.

79.2. A person may have worked in different capacities during last year. For example, he/she may have worked as a daily wage labourer for 4 months, as an agricultural labourer for 1 month and as a cultivator for 2 months. There could even be breaks in between the different types of work performed by him/her. In computing whether the person worked for major part of the year, you should reckon all the three spells of economic activity and if it satisfies the concept of work for major part of the year, treat him/her as 'Yes' for Question 14B and record '1' in the box. Similarly if the total period of work falls short of six months or 183 days, treat him/her as 'No' and record '2' in the box for that person.

Q. 15A : Main activity last year?

Yes in 14B (C/AL/HHI/OW)
No in 14B (H/ST/D/R/B/I/O)

80. In Question 14B you would have ascertained whether a person had worked for major part of the year or not. Now in Question 15A, you will be required to ascertain his or her main activity during last year.

That is to say how he or she engaged himself or herself mostly. Main activity of a person who was engaged in more than one activity will be reckoned in terms of time disposition. For example, if a person has worked as a daily wage labourer for 4 months, as an agricultural labourer for 1 month and as cultivator for 2 months and for him/her, you have recorded '1' in the box against Question 14B, then that person will be reckoned as daily wage labourer for Question 15A and you will record 'OW' on the line (and *not* in the box), since he/she spent more time in this activity than as a cultivator or agricultural labourer. Similarly, for a person for whom you have recorded '2' in the box in Question 14B, you should ascertain how he or she spent his/her time mostly as a non-worker and record the appropriate symbol below the line in the space provided and *not* in the box.

81. The main activity of workers is classified into four categories, *viz.*, cultivator, agricultural labourer, household industry, and other work. These terms are explained below.

Cultivator

82. For purposes of the census a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

82.1. A person who has given out his/her land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as cultivator. Similarly, a person working in another person's land for wages in cash or kind or a combination of both (agricultural labourer) will not be treated as cultivator in this question.

82.2. Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, *etc.*, and other crops such as sugarcane, ground-nuts, tapioca, *etc.*, and pulses, raw jute and kindred fibre crop, cotton, *etc.*, and *does not* include fruit growing, vegetable growing or keeping orchards or groves or working of plantations like tea, coffee, rubber, cinchona and other medicinal plantations. For a person who is a cultivator, write 'C' in the space provided.

Agricultural labourer

83. A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He or she has no risk in the cultivation but he/she merely works in another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

83.1. For a person who returns his/her economic activity as agricultural labourer, write 'AL' in the space provided.

Important

84. For certain reasons, the growing of certain crops is not considered as agriculture. If a person is engaged in the growing of such crops he or she will *not* be considered as a cultivator or agricultural labourer.

84.1. You must remember that a person can be classified as a cultivator or as an agricultural labourer *only on the basis of the crops grown*. The growing of the following crops is considered as cultivation. Therefore, a person who grows these crops or who works on land on which these crops are grown can be classified either as a cultivator or an agricultural labourer as the case may be.

(i) **Cereal and millet crops**: Paddy, wheat, jowar, bajra, maize, ragi, barley, gram, *etc.*

(ii) **Pulses**: Arhar, moong, masur, urd, khesari, *etc.*

(iii) **Fibre crops**: Raw cotton, jute, mesta, sunhemp and kindred fibre crops.

(iv) **Oil seeds**: Sesamum, ground-nut, rape, mustard, linseed, castor, *etc.*

(v) **Cash crops**: Sugarcane.

The growing of the following crops *will not be considered as cultivation*:

(i) **Plantation crops**: Tea, coffee, rubber, tobacco, pepper, cardamom, *etc.*

(ii) **Edible nuts (other ground-nut)**: Walnut, nut, almond, cashewnut, *etc.*

(iii) **Fruits**: Bananas, apples, grapes, mangoes, oranges, *etc.*

(iv) Coconut.

(v) Ganja, cinchona, opium and medicinal plants.

(vi) Betal nuts (areca).

(vii) Flowers.

(vii') Roots and tubers, chillies and spices (other than pepper and cardamom).

(ix) Vegetables.

(x) Other crops not specifically included under cultivation.

85. Please remember that you must use the abbreviations given in the instructions, namely, 'C' or 'AL'. It will be evident that you will have to ask a specific question regarding the crops grown in all cases where one merely says he/she is a cultivator or an agricultural labourer.

Household Industry

86. For a person who returns his/her main activity as engaged in some production, processing, servicing or repair of articles or goods such as handloom weaving, dyeing, carpentry, *bidi* rolling, pottery

manufacture, bicycle reparing, blacksmithy, tailoring, *etc.*, it has to be ascertained if it is a household industry and if so, it should be indicated by the abbreviation 'HHI' in the space provided.

86.1. Household Industry is defined as an industry conducted by the head of the household himself/herself and or by, the members of the household at home or within the village in rural areas and only within the precints of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

86.2. There may be an industry which is being run by a large joint family of more than 10 persons and where power is used or more than 20 persons where power is not used. In such cases, though only family members are involved, this will not be treated as 'HHI'. Thus, the meaning of the term 'run on the scale of a registered factory' refers to such cases even if these are not registered as such.

86.3. The main criterion of a Household Industry is the participation of one or more members of a household. This criterion will apply in urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the Household Industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home, it will not be considered a Household Industry. It should be located within the precincts of the house where the members live in the case of urban areas.

86.4. A Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as a Pleader or Doctor or Barber, Musician, Dancer, Waterman, *Dhobi,* Astrologer, *etc.*, or merely trade or business, even if such professions, trade or services are run at home by members of the household. A list of a few typical Household Industries is appended to these instruction at Appendix II.

86.5. Sometimes it is likely that the person who may not be working in his/her own Household Industry may be working in another Household Industry. You should, therefore, enquire whether the person who is not working in his/her own Household Industry is working in any other Household Industry and record as per instructions given above.

86.6. As mentioned earlier, a Household Industry should relate to production, processing, servicing repairing, or making and selling of goods. However, a household can be engaged in certain other activities collectively but these may not qualify for being considered as Household Industries.

86.7. Certain activities even though conducted by members of the same household will not constitute a Household Industry. These are indicated below and therefore the members of the family working in such industries will be classified as 'OW' and *not* 'HHI'.

(i) Plantation work.

(ii) Livestock maintenance and production such as cattle, goats, sheep breeding, poultry farms, bee-keeping, rearing of silk worm and production of cocoons and *raw silk,* production of milk, eggs, honey, wax, bones, *etc.*

(iii) Hunting, trapping and selling of the catch.

(iv) Forestry and logging : log, fuel, charcoal production, gathering and selling of fodder and other forest produce, *etc.*

(v) Fishing including rearing of fish, collection of pearls, shells, sea products, *etc.*

(vi) Mining and quarrying.

86.8. In our country Household Industry is a very important part of our economy. We must get accurate data regarding those engaged in 'HHI'. You must carefully read these instructions and understand them. The main points are again indicated below.

'HHI' stands for worker in Household Industry. The main characteristics of the Household Industry are the following :

(a) One or more members of the household must participate. Participation by hired labour must be minimum.

(b) The activity should relate to some production, processing, servicing, repairing or making and selling of goods.

(c) The goods produced should not be for consumption by the household itself but should be wholly or partly for sale.

(d) In an urban area the industry must be carried on *in the precincts of the house in which the household lives.* In the rural areas, the industry may be anywhere within the limits of the village.

(e) The activity should not be on the scale of a Registered Factory.

(f) Professions such as those practised by Pleader, Doctor, Barber, Musician, Dancer, *Dhobi,* Astrologer, *etc.*, will not be 'HHI'.

Other workers

87. All workers, *i.e.*, those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or in Household Industry, are 'Other Workers'—'OW'. The type of workers that come under this category of 'OW' include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc. In effect, all those who work in any

field of economic activity other than cultivator, agricultural labourer or household industry, are 'Other Workers'. They will be entered as 'OW'.

87.1. You will recall that it was mentioned that the growing of certain crops is not agriculture. Those engaged in this activity would have to be classified as 'OW'.

Q. 15A—Further explanation

88. In Question 15A we are trying to find out what a person's main activity is. You will see that if a person is recorded as a worker in Question 14A but has not worked for the major part of the year, the answer in Question 14B would be 'No', *i.e.*, for him/her you would have recorded '2' in the box against Question 14B. In such a case, you must find out what such a person has been doing mostly. He or she may have mainly been doing household duties, or studying, or being a dependent or rentier or beggar or lodged in an institution or may fall under the category 'O' described earlier. In any case, even for these persons, we are interested in finding out their work details, though this may not be what they were mostly doing. The work details will be obtained through Question 15B, as we will see later where the marginal or secondary work of a person is netted.

88.1 Question 15A gives information about all workers on the basis of what they have been doing mostly.

88.2. If in reply to Question 14A a person has said that he/she has worked any time at all in the last one year (for season) you would have entered him or her as 'Yes' against Question 14A. What you have now to do is to find out if this is what this person did or does mostly, *i.e.*, whether it is his or her main work, on which the greater part of his/her time is spent. You do this in Question 14B, where you ascertain whether the person has worked for major part of the year, *i.e.*, for six months or 183 days or more or less than six months or 183 days. In the latter case you have recorded code '2' in the box against Question 14B. At this stage you may recall the instructions given under Question 15A (Paragraph 80) where it has been stated that the person may have been engaged in more than one activity and for the purposes of Question 15A, his/her main activity has been identified. In such a case his/her secondary work will be reflected in Question 15B, as we will see later. Similarly, such persons who are identified as non-workers for their main activity in Question 15A as H/ST/D/R/B/I/O will give details of their marginal work (on the basis of which they were recorded as 'Yes' in Question 14A) will be reflected in Question 15B.

88.3. What is meant by main activity or the work that a person has been doing mostly can be easily understood from the following examples :

(a) A person is a cultivator (C) but during the non-agricultural season works as a construction worker or as a *hamali* (OW). He/she is a cultivator mainly and next 'other worker'. He/she should be recorded as 'C' in Question 15A and 'OW' in Question 15B.

(b) A housewife (H), is generally engaged in running her household but works on the family land during the sowing or harvesting season (C). She is mainly engaged in household duties and should be recorded as 'H' for Question 15A and as 'C' for Question 15B. In this example, if she works as an agricultural labourer or in a Household Industry, she would be 'AL' or 'HHI', as the case may be, for Question 15B.

(c) A person may be mainly an agricultural labourer (AL) but may have worked in a Khandsari sugar factory during the lean season (OW). He would be 'AL' for Question 15A and 'OW' for Question 15B

(d) A student (ST) may be working for a few hours in a shop to earn some money for fees, etc., (OW). He/she is mainly 'ST' for Question 15A and 'OW' for Question 15B.

(e) A person who is mainly a cultivator (C) also keeps cows and sells the milk. He/she would be entered as 'C' in Question 15A and 'OW' in Question 15B.

These examples will help you to understand the concepts better.

89. In the case of those who are mainly engaged in Household Industry (HHI) or as other workers (OW), certain details should be collected regarding name of establishment, description of work, nature of industry, trade, profession or service, and class of worker. These details will have to be filled in Question 15A(i) to 15A(iv).

89.1. As you will see from the question itself, these parts are applicable to persons for whom you have recorded 'HHI' or 'OW' against Question 15A. If the economic activity has been shown as 'C' or 'AL' against Question 15A, there is no need to fill in the sub-sections (i) to (iv) of this question. Similarly, if an individual has been recorded as 'No' against Question 14B, *i.e.*, code '2' has been recorded in the box against Question 14B and H/ST/D/R/B/I/O, as the case may be, has been recorded in Question 15A, sub-sections (i) to (iv) will not apply. In such cases a cross (×) may be put on each of the lines against these sub-sections.

Q. 15A (i) : Name of establishment

90. Record here the name of the factory, firm, workshop, business house, company, shop, office, *etc.* In respect of public offices you should clearly indicate whether they are Central or State Government or local body offices, *etc.* If the establishment does not have any definite name such as, in the case of a household industry, like hand pounding of rice, *gur* making, handloom weaving, potter's house, blacksmithy, *etc.*, enter the proprietor's name and the type of shop so that if necessary a link can be established between the various sub-sections of this question. For example, instead of 'No particular name' the entry could read as 'Babulal's Paintshop', *etc.* For refence and other similar personnel as may be indicated to you, put a cross (×) on the line.

Q. 15A (ii) : Description of work

91. Under this question, the description of the actual work, *i.e.*, the occupation that the person enumerated is doing is to be recorded irrespective of the type of industry, trade, profession or service that he/she may be working in and which is to be recorded under sub-section (iii) of Question 15A.

91.1. His/her actual work or occupation should always be given in sufficient detail. If, for example, a person is merely recorded as 'clerk' with no other details, it will be impossible to properly categorise him/her by the type of work he/she does. He/she may be a clerk attending to correspondence or book-keeping or accounting. Similarly, if a person were merely to be recorded as a technician, it will not help to determine what type of technician mechanic he/she is, whether computer-technician or a meter-mechanic or a locomotive-mechanic, *etc.* The description of the actual work done by a person should be ascertaned in adequate detail and recorded against this question. Similarly, in a trading establishment there could be a proprietor, cashier, book-keeper, salesman, *etc.*

91.2. It is necessary to describe the actual occupation adequately. It is not enough to say that one is a Government official. Whether one is a Bill-clerk or Section Officer, Tehsildar, Police Chowkidar or Research Officer, *etc.*, has to be spelt out. There may be Assistant Directors, Deputy Directors, *etc.*, doing different functions. It is necessary to describe the occupation adequately in their case for proper classification, *e.g.*, Assistant Director (Agriculture), Assistant Director (Soil Conservation), Senior Research Officer (Vital Statistics), Deputy Director (Health), Sub-Inspector (Excise), Treasury Officer, Village Officer (Revenue), Panchayat Secretary, Malaria Control Officer, Traffic Inspector (Transport Department), *etc.*

91.3. To guide you in answering Question 15A (ii), the type of particulars that need to be ascertained in respect of a few typical occupations are given in Appendix III.

91.4. Appendix III is by no means exhaustive. This just helps in bringing home the need to ascertain the full details of the particulars of work performed by an individual for being recorded against Question 15(A) (ii).

91.5. It has been found in the past that a very large number of persons are recorded merely as 'general labourers'. It is necessary to make a probe and find out in which type of work the person is mostly engaged as a labourer, such as a road mazdoor, a loader or an unloader in market, a construction labourer, *etc.*

91.6. For those in defence and similar service, it is enough if it is merely noted as 'Service'. Other details need not be given. For other Government servants full details must be given and the description of the work should be as detailed as possible.

Q. 15A (iii) : Nature of industry, trade or service

92. The answer to this question will have to be given in detail to enable proper classification of the sector of economy in which the person is working. The sector of economy in which a person works may relate to (i) Plantation, Forestry, Fishing, Livestock, *etc.*, (ii) Mining and/or Quarrying, (iii) Manufacturing, Processing, Servicing and Repairing, (iv) Construction, (v) Electricity, Gas or Water Supply, (vi) Transport and Communications, (vii) Trade and Commerce ,(viii) Professions and Services. In order to enable us to classify a person properly, full details of the nature of the industry, trade, profession or service should be given. Please avoid vague answers. Full details of the type of industry, trade, profession or service in which the person is engaged will have to be recorded here. It is not enough to say 'plantation' or 'livestock'. You should say whether it is tea plantation or banana plantation or sheep rearing or cattle breeding. Similarly, it is not enough to say 'manufacturing'. You should say whether it is manufacturing of cotton textile in handloom or manufacturing *khadi* textile or manufacturing silk textile. Likewise mere 'trade' is not enough. It should be recorded as wholesale trading in food grains or pulses or retail trading in spices or grocery and so on. For defence and similar personnel, write 'Service'.

92.1. To help you to appreciate the details that may have to be furnished to classify the economic activity appropriately, illustrative description of various economic activities are furnished in Appendix IV, categorised under certain broad classifications. It should, however, be noted that the list in Appendix IV is by no means exhaustive. You must describe the nature of industry, profession, trade or service of whatever it is, in as detailed a manner as possible. In the case of industries, the articles which are produced o serviced or processed should be given. In the case of service, please describe fully the nature of the service to which the person belongs, except in the case of defence or similar other personnel.

Important

93. There need be no confusion as to the scope of Questions 15A (ii) and 15A (iii). Question 15A (iii) would represent the nature of industry, trade, profession or service, *i.e.*, the sector of economy in which a person is engaged in work and Question 15A (ii) represents the occupation or the actual work the person performs in the industry, trade, profession or service in which he/she is engaged. Thus, for example, if the answer to Question 15A (iii) is 'cotton textile manufacture in mill', the answer to Question 15A (ii) could be 'chemical engineer' or 'bill clerk' or 'accountant' or 'labourer' or 'truck driver' or the 'managing director' of that industry and so on. Similarly, in Question 15A (iii) the nature of service may be some department of State Government Service and in Question 15A (ii) the description of work may be 'bill clerk' or 'accountant', 'Director of the department', 'jeep driver' in the department, etc. Again against Question 15A (iii) the answer may be 'private medical practice' and in Question 15A (ii) 'orthopaedic surgeon', or 'nurse' or a 'sweeper', *etc.*, working in that private medical practitioner's nursing home. The sample answers furnished in Appendix V at the end of this

booklet, the Industrial and Occupational classifications in Appendices IV and III and the instructions given by your Supervisor and other Census Officers will help you to clear any doubts you may have regarding the scope of the questions relating to nature of industry, trade, profession or service covered by Question 15A (iii) and the description of actual work of the individual enumerated covered by Question 15A (ii).

Q. 15A (iv) : Class of worker

94. For a person who is :

(i) an Employer, that is, who hires one or more persons in his work described in Question 15A (ii), write ....ER

(ii) an Employee, that is, who does his work described in Question 15A (ii) under 'Others' for wages or salary in cash or kind, write ..... EE

(iii) a Single Worker, that is who is doing his work described in Question 15A (ii) without employing others except casually, and without the help of other members of the family except casually and a participant in work as member of cooperative, write....SW

(iv) a Family Worker, that is, who is doing his work described in Question 15A (ii) in a family enterprise along with other members of the family without wages or salary in cash or kind, write .....FW.

Explanation

94.1. An Employer is a person who has to employ other persons in order to get the work mentioned in his/her case in Question 15A (ii) performed. That is to say, such a person is not only responsible for his/her own personal work but also for giving work to others for carrying out the activity mentioned in Question 15A, (iii). Please note that a person who employs domestic servants for household duties is not an employer. So also, a person who has subordinates under him/her in an office where he/she himself/herself is employed by others, is not an employer, even if he/she has the power to appoint another person in his/her office on behalf of his/her own employer. A head of department or a local manager of a company may have the power to appoint people but they are themselves employees of someone else, in this case, government or the main office of the company, and cannot, therefore, be an employer. A government servant irrespective of the post he/she holds is an 'employee'.

94.2. An Employee is a person who usually works under some other person for salary or wages in cash or kind. These may be persons who are employed as managers, superintendents, agents, *etc.*, and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers. Please note that a cook or domestic servant engaged by someone is an employee. The fact that his master may himself/herself be an employee is irrelevant.

94.3. A Single Worker is a person who works by himself/herself. He/She is not employed by any one else and in his/her turn does not employ anybody else. This definition of a Single Worker will include person who works in joint partnership with one or several persons hiring no employees, and also a member of a producer's cooperative. Each one of the partners or members of such producer's cooperatives should be recorded as 'Single Worker'. Political workers and social workers are to be treated as 'SW'.

94.4. A Family Worker is a member who works without receiving wages in cash or kind, in an industry, business, trade or service. For example, the working members in a family of *dhobies* where they all participate and each does not receive wages separately, will be family workers. There may be family workers in industry trade or professions as well. Family workers must be related by ties of blood or marriage but such workers can belong to different households. Thus, what is important is that such workers must necessarily be related even though they may be living in different households. The family workers may or may not be entitled to a share of the profits in the work or the business carried on either by the person or head of the household or other relative.

94.5. *Please note the following important cases* :

(a) In the case of persons engaged in Household Industry, *i.e.*, in the case of persons for whom the answer to Question 15A is 'HHI', there will be three classes of workers generally, *viz.*, Family Worker, Single worker and Employee. There may not be a formal 'Employer'. Household Industry by its very definition is conducted by the head of the household himself/herself and/or other members of the household, the role of hired workers being secondary. If the head along with the members of the household is working in a Household Industry employing hired workers, the head and other members who are working should be treated as 'Family Workers'. If the head alone is working with the occasional assistance of hired worker(s), whose role should be secondary as indicated above, he/she should be treated as a 'Single Worker', although one might argue that in effect he/she becomes an employer. The hired workers are of course employees.

(b) Members of the household who help solely in household duties, *i.e.*, economically non-productive work, should not be treated as Family Workers. In fact, they are not workers.

(c) Members of a producer's cooperative society who have no other occupation or work except this, should be categorised as Single Worker—SW.

(d) In the case of partnership in which all the partners are related, treat them as Family Workers—FW. The partnership firm may or may not employ others, but this will not change the category of the partners. They would be 'FW'.

(e) In the case of a partnership firm in which some of the partners are not related, treat all the partners, including those that may be related, as Single Worker—SW. The firm may or may not employ others, but this will not change the category of the partners. They will all be 'SW'.

(f) Full-time political workers and social workers should be treated as 'SW'.

(g) Doctors and lawyers who do not employ any person should be treated as 'SW'. One may come across doctors and lawyers employing certain person on a regular basis in the doctor's dispensary or clinic or in the lawyer's office or chamber. In this case the doctor or lawyer would become an 'Employer' and so 'ER' should be recorded. However, sometimes lawyers have been found to take the help of clerks who remain attached to them on a regular basis but without being formally employed on wages. The clerk usually earns his remuneration independently from the lawyer's clients. In such a case, both the lawyer and the clerk should be treated as Single Workers—SW.

95. Some illustrations for filling the Question 15A are given in Appendix V.

14B Yes—Any other work any time last year?
Q. 15B Yes/(C/AL/HHI/OW)/No

14B No—Work done any time last year? (C/AL/HHI/OW)

96. You will recall that in Question 14A you have identified all those who have done any work at all in the last one year. In Question 14B, you must have categorised them either 'Yes', *i.e.*, code '1' or 'No', i.e., code '2'. In Question 15A you have divided these persons on the basis of what they have been mostly doing. It is quite possible that those who have been categorised as 'C' or 'AL' or 'HHI' or 'OW' in Question 15A, based on the type of work they have been doing mostly, may have done some other work in addition to what they have been doing mostly. Similarly, a person who is mostly doing household duties or is mainly a student, or mainly a dependent or a rentier or a beggar or belongs to the categories of 'I' and 'O' must have done some work at some time during the last one year. This is the information we are trying to get in Question 15B.

96.1. Please note the way in which Question 15B has been worded. This question deals with two separate situations. The first relates to those persons who have worked for the major part of last year and may or may not have some other secondary work. The second part relates to persons who have worked at any time in the last year but not for the major part of the year. In the case of those who have worked in the major part last year, you would have entered code '1' in Question 14B and you would have categorised them as 'C' or 'AL' or 'HHI' or 'OW' in Question 15A. Such persons may or may not have had secondary work in addition to their main work. If, on inquiry, you find that such a person has had any other work any time last year, you would have to enter on the line, 'C' or 'AL' or 'HHI' or 'OW', depending upon the type of work and scroe out the answer 'No' printed on the line.

96.2. If a person who has worked any time last year, but has not worked for the major part of the last year, you would have recorded code '2' in Question 14B and in Question 15A you would have categorised such a person as 'H' or 'ST' or 'D' or 'R' or 'B' or 'I' or 'O'. Such a person must have done some work any time last year and this is the work which we are trying to catch in Question 15B so far as such a person is concerned. For such a person after inquiry, you will have to enter the appropriate category, viz., 'C', or 'AL' or 'HHI' or 'OW' below the line in Question 15B.

96.3. This question is meant to elicit information on the secondary or marginal work which a person might have done any time at all during the last one year, apart from the main work or other activity which will have come out in Question 15A. It is obvious that, irrespective of whether the answer is 'Yes' or 'No', *i.e.*, code '1' or '2' in Question 14B, there could be an answer in Question 15B because a full-time worker may have done some other work or a person who is essentially a non-worker, though he/she has not done any work over the major part of the last year, might also have done some work occasionally. This, therefore, should give us details of secondary and marginal work in respect of both workers and those who are mainly non-workers.

96.4. This question should be asked of every person who has returned 'Yes' against Question 14A. *It is re-emphasised that all those who have answered 'Yes' against Question 14A and for whom you have recorded 'Yes' or 'No', i.e., code '1' or '2' in Question 14B, this Question 15B should be asked without fail.* In answer to this question if the individual says 'Yes' then you should find out the type of work and categorise him or her as 'C' or 'AL' or 'HHI' or 'OW' as the case may be. These abbreviations refer to Cultivators, Agricultural Labourers, Household Industry, and Other Workers and have been fully explained earlier in the instructions under Question 15A in paragraphs 82 to 87. You may refer to these again before recording the appropriate category on the line. It is sufficient if you write the category on the line. If the respondent gives reply in the negative it should be indicated by the word 'No' on the line. Please do not make any entry in the dotted box.

96.5. Ask of each person if, besides what he/she had already returned as his/her main activity against Question 15A, he/she participated in any other work or did any work any time last year. A number of unpaid family workers participating in household enterprises who might have returned themselves mainly as 'H' or 'ST' or 'R' under Question 15A will be netted here for their involvement in such economic activity. Mere rendering of service for one's own home

or production of goods for purely domestic consumption are not to be treated as economic activity. For example, a servant who works as a cook in his or her employer's home for wages will be considered economically active but, a housewife even if she may work much more than a paid servant in having to cook for the family or looking after the household will not be treated as economically active for the purposes of this classification. Similarly, women who may produce cloth on a loom at home for domestic consumption will not be treated as economically active unless at least a part of the product is sold. A boy who is categorised as a student under Question 15A, can have a marginal work, say, cultivation if he helped the head of the household in the family cultivation during some parts of the season. But if a girl student, who is shown as 'ST' under Question 15A also helped in weaving cloth purely for domestic consumption on a loom at home, or helped in attending to household chores, she will not be treated as having any marginal work.

96.6. Any other work or secondary work will be reckoned only if the person is engaged in some economically productive work, even if marginal, in addition to whatever is his/her activity under Question 15A. If a person whose economic activity is shown, as a clerk in a government office or a teacher, also attends to some cultivation even by way of direction or supervision or undertakes some tution, this will be shown as 'any other work any time last year' under Question 15B. A person's main activity may be cultivation and his secondary work may be money lending. Again, main activity may be agricultural labourer and secondary work could be sugar factory labourer or *vice versa.*

96.7. After it is established that the person is doing some work and he or she has been recorded accordingly in Question 15B in any of the categories of C, AL, HHI, OW, you have to proceed further and fill up the details of sub-sections of Question 15B(i) to (iv) in respect of entries 'HHI' or 'OW' only. The instructions for filling up the details in these sub-sections will be the same as given under Question 15A and are explained in detail in paragraphs 90 to 94. For those who are recorded as 'C' or 'AL' or for whom you have entered 'No' in Question 15B, you have to put a 'X' against these subsections on the line.

97. A few illustrations showing specimen entries are appended at Appendix VII and some illustrations for recording answers against Questions 15A and 15B are given in Appendix VI. You are advised to study these instructions and illustrations before starting actual enumeration and also consult these and the instructions whenever you are in doubt during field operations about what to record as the answer.

Important

98. It must particularly be noted that if there is an entry 'No' *i.e.*, code '2' in Question 14B and H/ST/D/R/B/I/O, as the case may be, in Question 15A, there must be an entry in Question 15B and *this cannot be blank or cross (×). This is because* a person who has worked any time at all last year, and has been entered as 'Yes' in Question 14A must be reflected somewhere. Since the person has not worked in major part of the year as reflected by code '2' in Question 14B and also H/ST/D/R/B/I/O, as the case may be, in Question 15A the work done by him/her and netted in Question 14A, must therefore be reflected in Question 15B. Again, a person who has worked in major part of the year and for whom code '1' has been recorded in Question 14B, you may have recorded as 'C' or 'AL' or 'HHI' or 'OW' for his main activity in Qustion 15A. It is quite possible that he/she may have done some other work, though not on the scale of main activity. This secondary work should also be reflected in Question 15B. You will thus appreciate that probing questions are essential and you must ask questions again and again to find out if a person has had some secondary work and marginal work in the case of those for whom code 2 has been recorded in the box against Question 14B and record the same in Question 15B.

98.1. It would follow that if the answer to Question 14A is 'No' i.e., you have recorded H/ST/D/R/B/I/O, as the case may be, there will be a cross (×) on the lines against each of the Questions 14B, 15A including sub-sections and 15B including sub-sections.

Q. 16 : If No in 14A or 14B seeking/available for work ? Yes (1)/No (2)

99. This question is intended to elicit some information on the number of unemployed. If an individual has replied that he/she has not worked at all last year or during the major part of last year under Question 14A or 14B respectively and you have recorded 'No' against either of these two questions you have to ask from him or her whether he or she is seeking work or available for work? This question should be asked of all persons for whom you have recorded H/ST/D/R/B/I/O, as the case may be, either in Question 14A or in Question 15A. Seeking work means that the person may have got himself/herself registered in the employment exchanges or he/she may be applied for jobs or he/she may have made other efforts for a job, such as looking into the newspaper advertisements with a view to applying for a job, the intention being in suitable cases, this person will offer himself/herself as a candidate. It may be remembered that seeking work is more applicable in urban areas where there are facilities of employment exchanges and greater awareness about availability of jobs. In rural areas there may be no facilities of employment exchanges. The person may be available for work but not actually seeking work either because of lack of knowledge of work being available or absence of employment exchanges.

99.1. As mentioned earlier we are mainly interested in obtaining information on the unemployed. You may come across people who already held jobs or do not normally want to take up employment but may give you such general answers that they would not mind taking up work if the salary is attractive enough. We *are not interested in such persons since they obvi*ously are already employed or are not really job seekers. You will have to make a prob to get the facts.

However, generally speaking, if in answer to this question a person says that he is seeking or is available for work, you must enter code '1' in the box.

99.2. If the person replies that he/she is seeking or available for work, you have to record '1' in the box provided. In case his/her reply is 'No' you have to record '2' in the box.

99.3. It should be remembered that if the answer to Question 14B is 'Yes' and you have recorded '1' in the box against this question and in Question 15A you have recorded C/AL/HHI/OW, as the case may be, Question 16 is not applicable. You should put a cross (×) on the line against this question and *not* in the box.

Summary

100. It would be useful to summarise the main points with regard to the economic questions, *i.e.,* Questions 14A, 14B, 15A, 15B and 16. These are indicated below.

(i) In Question 14A we are finding out if a person has worked any time at all last year. The word 'year' includes all the seasons for agricultural and associated activities. Even marginal workers must be covered by this question.

(ii) If the answer to Question 14A is 'No' then categorise at H/ST/D/R/B/I/O.

(iii) The work on the basis of which 'Yes' is recorded in Question 14A may be the main work of a person or what he/she has done or does mostly. If so, 'Yes' *i.e.,* code '1' in Question 14B and C/AL/HHI/OW, in Question 15A would have been recorded. If this person is not doing this work mostly 'No' *i.e.,* code '2' in Question 14B and H/S/TD/R/B/I/O, in Question 15A would have been recorded. These details are recorded in Question 15A.

(iv) Secondary work or the marginal work of those recorded as C/AL/HHI/OW or as H/ST/D/R/B/I/O respectively in Question 15A is obtained through Question 15B.

(v) Note that if a person has been entered as 'Yes' in Queston 14A, 'No' *i.e.,* code'2' in Question 14B, *there must be an entry such as C/AL/HHI/OW, in Question 15B.*

(vi) Question 16 is to be asked of all those whom 'No' has been written in Question 14A or code '2' in Question 14B.

(vii) Details of name of establishment, industry, occupation and class of worker, in Questions 15A and 15B need be entered for 'HHI' and 'OW'.

Important

101. You must read the explanations and instructions on the economic questions very carefully. Questions 14A, 14B, 15A and 15B should be canvassed together, otherwise, the full and correct answers will not be available and you may have to make corrections. For example, if a lady is asked whether she is working, the usual answer is that she is working, because household work is naturally considered as work by her. It is only if you ask further questions as to what she mostly does that her marginal work, if any, will come out and you will get a correct picture of the facts. *It is advisable to ask questions covering Questions 14A, 14B, 15A and 15B together and then fill up the details.*

102. Certain situations would call for some explanation so that the enumerator is clear in his/her mind regarding classifying such activities. A few typical cases are indicated below.

(a) If a sweet-meat makes, *i.e.,* a *Halwai* makes sweets and sells them also, this would be manufacturing and can be a 'HHI' too in appropriate cases.

(b) If a *Halwai* only sell sweets, having brought them from some other place, he would be carring on a trade and, this would *not* be an industry.

(c) In many cases there are what are called tea shops, *dhabas, chat* shops, *etc.,* where eatables are prepared and sold. For example, in a *dhaba,* substantial meals such as *chapaties, dal, etc.,* are prepared and sold. This will not be an industry. It will be classified as service, namely, running eating place. Therefore, even if a household carried on this activity it will not be classified as 'HHI', but only as 'OW'.

(d) In many places, there are presons who keep small electrical or hand-mixers or fruit crushers and crush fruits to sell the juice. In such cases since the juice is produced for consumption on the spot and is not bottled as such for sale, such units are carrying on trade and *not* manufacturing. Therefore, even if a household caries on this business this would not be 'HHI', but 'OW'. On the other hand, if there are manufacturing units, whether big or small, which bottle juice and sell it as bottled, this would be manufacturing and should be classified as industry.

(e) Tailoring is an industry and a household that carries on tailoring on household industry basis can be 'HHI'.

(f) There may be cases of a person who sells cloth and also provides tailoring services. In such cases, the person may be asked

which activity he considers more important, *i.e.,* the one on which he spends more time. If he says that he considers selling of cloth is more important then he is carrying on a trade. On the other hand, if the tailoring business is more important to him than the sale of cloth, such a person should then be considered as manufacturing. If a household carries on a business of this kind, this household will be considered as 'HHI' or non-HHI depending on whether the household is involved mainly in trade or manufacturing and taking into consideration the definition of 'HHI'.

103. Having filled in the Individual Slip, you may find it rewarding to go through all the entries. This will enable you to cross check the information, and gaps if any, can be filled in then and there. This will obviate the need to visit the household again to collect the missing information.

104. As stated in paragraph 40 you will be required to fill up Individual Slip (Universal) for all members of the household. During the course of your day's work you will have covered a large number of households and filled in the requisite number of Individual Slips. After completing the day's work, you must fill in columns 8 to 35 of the Population Record of the concerned household, in Part II of the Household Schedule. Please do not allow this work to accumulate. Instructions for filling up columns 8 to 35 of the Population Record will be found in Chapter VI (Paragraphs 147—164). This will afford another opportunity to you to detect errors or gaps in the information collected, which you can conveniently collect by re-visiting the household(s).

FILLING UP OF THE INDIVIDUAL SLIP
(SAMPLE)

105. As stated in paragroph 37, if you are an enumerator in a sample area, six additional questions as appearing in the Sample Individual Slip (specimen appearing on page 32) will have to be canvassed by you for each individual. The Sample Individual Slip will, however, be canvassed in all areas of Andaman and Nicobar Islands, Arunachal Pradesh, Assam, Chandigarh UT, Dadra and Nagar Haveli, Delhi UT, Goa, Daman and Diu, Himachal Pradesh, Jammu and Kashmir, Lakshadweep, Maharashtra, Manipur, Meghalaya, Mizoram, Nagaland, Pondicherry, Sikkim, Tripura and West Bengal. In the remaining states, this slip will be canvassed in sample blocks only but will include all the households in the sample block.

106. The Sample Slip contains six questions with sub-parts, dealing with migration and fertility. These questions appear on the reverse of the Universal Individual Slip. The instructions for filling up the Universal Individual Slip are given in paragraphs 37—104. You will be required to canvass the Universal Individual Slip for every person in your block, irrespective of the age or sex, and canvass the sample questions appearing on the reverse of the Individual Slip for each person in the household. It is obvious that the fertility questions will be applicable to women only, as will explained at the appropriate place.

107. It is important for you to remember that both the slips should be canvassed for every person in your block, *i.e.,* in every block of the 19 States and Union Territories mentioned above and the sample blocks of the remaining states. The term "Universal Slip" means that the questions in this slip will be canvassed in all the blocks in the country, while the term "Sample Slip" means that the questions in this slip will be asked only in the specified blocks, as stated above, in addition to those in the Universal Slip, except in the 19 States and Union Territories where it will be canvassed everywhere.

Q. 1 : Birth place

108. Certain details regarding the place in which the person enumerated was born are to be collected and entered in the sub-parts of this question. For defence and similar personnel as may be indicated to you, this question and its sub-parts are not applicable. The explanation and instructions as to how the four sub-parts are to be filled are as follows :

Q. 1 (a) : Place of birth

109. Write 'PL' for person born in the village or town where he/she is being enumerated. Where 'PL' is noted against this question put '×' against sub-(c) and (d).

109.1. For those born outside the village or town of enumeration write the actual name of the place against sub-part (a) and fill the other details against sub-parts (b), (c) and (d).

109.2. In indicating the birth place, only the full name of town or village would have to be indicated and not hamlet or mohalla/ward names. The name of a ward/hamlet should not be entered but the name of the town/village to which it belongs should be entered.

Q. 1 (b) : Rural (1)/Urban (2)

110. For those born outside the village or town of enumeration ascertain if the place of birth is a village or town at present. To enable a person to determine whether the place is a town or a village, he/she may be required to indicate the status of the place of birth in comparison with a known town in the neighbourhood of the place of enumeration. You may mention some important urban characteristics to enable the person to make out if the place of his/her birth is rural or urban, *e.g.,* existence of a local administrative body, industrial townships declared as towns, *etc.*

For a person born in a village, write '1' in the box. For a person born in a town/city, write '2' in the box.

For a person born in a foreign country, put '×' in the box against this sub-part and also against sub-part (c) on the line.

110.1. If all effort to classify the place of birth as rural/urban fail, write 'not known' on the line.

Q. 1 (c) : District

111. For a person born outside the village or town of enumeration but within the district of enumeration, write 'D' on the line.

111.1. For a person born in another district of the State of enumeration, or in a district in some other State/Union territory in the country, write the name of the district.

111.2. If the person cannot name the district, write 'not known'.

Q. 1 (d) : State/Country

112. For persons born within the State of enumeration, write '×' against this sub-part on the line. Make sure that the earlier entries made in sub-parts (a), (b) and (c) are consistent with such an answer; that 'PL' might have already been written agaist sub-part (a) or 'D' is written against sub-part (c) or any other district of the State of enumeration is mentioned against sub-part (c).

112.1. For persons born outside the State of enumeration but within the country, write the name of the State/Union Territory where born.

112.2. For those born outside India, note merely the name of the country and there is no need to enter the name of the constituent state of the foreign country. Where a person cannot name the country, the name of the continent may be noted.

112.3. For a person born on the high seas, record 'born at sea', against this sub-part and put '×' against sub-parts (a), (b) and (c).

112.4. If a person was born in a train, boat or bus or aircraft, *etc.*, within the country, write the particulars in sub-part (a), (b) and (c) with reference to the administrative territory where the event occurred or was registered.

Q. 2 : Last residence

113. The answer to this question will have to be filled in respect of every person if he/she had another place of normal residence irrespective of his/her place of birth, before he/she came to the present place where he/she is enumerated. Even if a person was born at the place of enumeration but because of his/her work or for studies, *etc.*, he/she had shifted subsequently to another village or town and had come back again to the place of enumeration, he/she should be deemed to have had another place of residence prior to his/her enumeration here. For defence and similar personnel, this question is not applicable.

113.1. The immediate previous village or town of residence is relevant only if he/she hod been outside the village or town of enumeration and not simply in another house or locality in the same place. For example, if a person born in one part of Bombay City is found residing in another part of Bombay at the time of enumeration, the change of residence should not be treated as change of place of residence because both the areas are within the same city of Bombay. Similarly, a person born in hamlet 1 of village Rampur and found in hamlet 2 of the same village at the time of enumeration, should not be deemed to have had another place of residence than the village where he/she is enumerated. Where a person had merely gone out to another place or had been shifting from place to place purely on tour or pilgrimage or for temporary business purposes, he/she should not be deemed to have had another residence different from the place where he/she or his/her family normally resides. In the case of a person who is enumerated elsewhere than in his normal place of residence because of eligibility criteria laid down in paragraphs 38—40, the place of his immediate previous normal residence will be recorded as the place of last residence. Similarly, if a person is enumerated at a place other than his place of birth and if he had no other place of normal residence before coming to the place of enumeration, the place of birth would be the place of last residence.

113.2. It would not be possible to specify the duration of stay which will qualify for reckoning last residence. The circumstances of each case would have to be taken into consideration, in deciding whether a person has had a last residence or not. For example, an officer who has been transfered for a short period, must be considered as moving from his/her place of previous posting which would become his/her place of last residence, irrespective of his/her stay in the new posting. However, temporary movement like women moving into a hospital for delivery, a person moving into a hospital for treatment, *etc.*, at a place other than their usual residence, will be ignored and these places will not be treated as the last residence. In the case of a child born in a hospital into which the mother has moved temporarily for delivery which is different from the usual place of residence of the mother, the place where the hospital is, will be treated as the place of last residence for the child, though the place where the hospital is will not be the place of the last residence of the mother.

Q. 2 (a) Place of last residence

114. For a person who has been in the village or town of enumeration continuously since birth (except for shifting to other places outside the village or town of enumeration for a purely temporary stay), write 'PL' against sub-part (a) and put '×' against sub-parts (b), (c) and (d). But for a person who had his last previous residence at any place outside the village or town of enumeration (irrespective of his place of birth), write the actual name of the village or town or his actual previous residence against this sub-part (a) and fill the other details against sub-parts (b), (c) and (d).

Q. 2 (b) : Rural (1) Urban (2)

115. For a person who had previously resided outside the place of enumeration, ascertain if the place of last previous residence is rural or urban and record the answer. For a person whose last previous residence is a town/city, write '2' in the box, and for 'Rural', write '1'. For a person who last resided in a foreign country, write '×'.

115.1. For a person whose immediate previous residence cannot be classified, write 'not known'.

115.2. Rural or urban status has to be determined with reference to the status existing at the time of enumeration.

Q. 2 (c) : District

116. For a person who had previously resided in another place, *i.e.*, for whom 'PL' is not written against sub-part (a), you have to fill in this sub-part after enquiry.

116.1. For a person who previously resided in another village or town within the district of enumeration, write 'D'.

116.2. For a person who previously resided in another district of the State/Union Territory of enumeration or in a district in any other State/Union Territory in the country, write the name of the district. If he/she cannot name the district, write 'not known'.

116.3. For a person whose last previous residence was outside India, write × against this sub-part.

Q. 2 (d) : State/Country

117. For a person whose last previous residence was outside the village or town of enumeration but within the State or Union Territory of enumeration, write '×' against this sub-part but if it was outside the State or Union Territory of enumeration but within the country, write the name of the State/Union Territory.

117.1. For a person whose last previous residence was outside the country, write the name of the country and if name of the country is not forthcoming, write the name of the continent.

Q. 3 : Reasons for migration from place of last residence

118. The question will be asked in the case of a person for whom information has been recorded in Question 2, *i.e.,* last residence. However, please note that this question will not be canvassed in the case of those for whom you may have written 'PL' against place of last residence. This is because they have had no place of last residence. In all the other cases you must find out the reasons for migration from the place of last residence and note the reasons by entering the appropriate code. The codes which must be entered for the various reasons for migration are as follows :

(a) Employment	1
(b) Education	2
(c) Family moved	3
(d) Marriage	4
(e) Others	5

118.1. These codes have been printed at the bottom of the Sample Slip. You must enter a code depending on the reasons for migration in the box against this question. For defence and similar personnel as may be indicated to you by the Director of Census Operations, this question will also not apply, since you will not have canvassed the Question 1 and 2 of the Sample Slip.

119. A person will have moved for employment in the following cases :

(a) If he or she has moved in search of a job or hoping to get a job.

(b) Because he/she has got a job and has moved to take up the job.

(c) Having already got a job, he/she has moved because of a transfer, even if this is on promotion.

119.1. If a person has moved for any of these reasons, note code '1' in the box.

120. A person can be said to have moved for educational purposes if he or she has moved to the place of enumeration from his/her place of last residence for joining a school/college or any other type of educational institution either for the first time or for continuing his/her studies. However, please note that if this particular person has moved along with his/her family because the entire family has moved due to any reason, you must note that this person has not moved for educational purposes. In such a case the right code to be entered will be code '3', namely, 'Family moved'.

121. The reason 'Family moved' code '3' will refer to cases where the entire family moves. Such cases will come up if the head of the household or the person on whom the family is dependent has moved due to any reason such as transfer, etc. There are cases where one or more members of the family move along with the person who has moved in search of employment or education or for other reasons. While person who has moved for a particular reason will be assigned the appropriate code, the other members who moved along with that person will be assigned code '3', *ie.,* 'Family moved'.

122. If a person has moved consequent on getting married, assign code '4' for that person.

123. Code '5' 'Others' will include all other reasons for migration not covered by employment, education, family moved or marriage. This may include cases like movement due to retirement, movement for economic reasons such as setting up of shops, starting of a business, *etc.*

124. It is important to note that the reasons for migration are being noted for each person separately since in any case you will have to fill up Sample Individual Slips for each person separately. Therefore, in the same household, there may be cases where the reasons for migration are different for different members of the household. For example, if the head of the household is promoted and transferred, in his/her slip against Question 3 you will have to assign code '1' because his/her movement is consequent on employment, while the spouse and other dependents should be assigned code '3' because the family moves. There are also cases, particularly from the rural areas to urban areas, where a boy or a girl moves to a town or city for higher studies and in order to look after him or her an elderly person also moves. In such a case, in the case of the person who moves for higher studies the reasons for migration will be 'Education' code '2' while in the case of the elderly person, the reason will be 'Others' code '5'. If in case the entire family has moved along with the student, for all the other members of the family you will have to assign code '3' 'Family moved'. It is, therefore, necessary for you to make coreful enquiries and not to get confused with the different reasons which may be applicable to different persons of the same household.

125. In particular, please note that you must make detailed enquiries in the case of any unrelated members of the household, such as cook, servant, *etc.* In their cases, their movement from the place of last residence may have been due to employment. Similarly, in the case of those members of the household who are rather distantly related to the head of the household, you must also make such detailed enquiries.

126. It must be remembered that the reason 'Family moved', code '3', can only come up in cases where some other member of the family has moved for any of the other reasons mentioned in the Sample Slip. The members of the family moved because either the head of the household or the person on whom the family depends has moved because of employment or for any other reason.

127. Please note that in the case of every person who has come into India from any other country as a result of partition or has been repatriated, the reasons for migration will be noted as 'Others', code '5' and not any other code.

Q. 4 : Duration of residence at the village or town of enumeration

128. Note here the period in completed years of the continuous residence in the village or town where the person is being enumerated. This will apply even to a person born at the place of enumeration. But this question does not apply to defence and similar personnel.

128.1. If he/she had left this village or twon and had lived elsewhere for sometime, *i.e.*, in Question 2 another place of last residence is reported and has come back to this village or town, then the duration of residence to be noted against this question is the period of the *latest continuous residence*. But if a person had been away on a temporary visit or tour, *etc.*, that should not be taken as a break in the period of his/her continuous residence here.

128.2. If the person was born at the place of enumeration and also had no other place of last residence, *i.e.*, 'PL' has been noted in Question 2(a), then '×' may be put against Question 4 in the box.

128.3. For a person whose duration of continuous residence at the place of enumeration is less than 1 year, write '0' in the box.

Q. 5 : For all ever-married women only

129. This question will be asked in the case of all ever-married women. It will not be asked for a women who has never been married. Please note that the term 'ever-married' does not necessarily mean 'currently married'. The 'ever-married' would include all women who may be currently married, the widowed, the separated and the divorced. This question, in other words, will be asked of all women except those who are 'Never Married'. For all women for whom 'M' or 'W' or 'S' is entered in Question 5 of the Universal Slip, this question will be asked. In the case of women who are 'NM' in Question 5 of the Universal Slip, put '×' in all parts of th's question.

Q. 5 (a) : Age at marriage

130. You should ascertain the age at which the woman, whom you are enumerating, was married and record that age in completed years. If a woman has been married more than once, the age at which she got married for the first time should be recorded.

Q. 5 (b) : Number of children surviving at present

131. In this question, you will have to find out how many of the children born are still surviving, *i.e.*, at the time of enumeration.

131.1. Please note that the children need not necessarily be staying with the mother, *i.e.*, the woman you are enumerating. They may be elsewhere due to any reason. What is important is whether they are alive, not where they live. They may be any where, even outside the country. The important point is the number alive.

131.2. Having ascertained this number, enter the details by sex and total in the boxes provided.

131.3. If there are no male or female children surviving at the time of enumeration, write '0' in the appropriate box or boxes.

Q. 5 (c) : Number of children ever born alive

132. You should ascertain the total number of children that the woman you are enumerating gave birth to from the time she got married. If married, more than once, all the children born to her should be ascertained.

132.1. The number of children born would include all children born alive, even if later unfortunately any child died. Many persons, specially older people may only count children living with them. It is, therefore, essential to enquire about the number of children living at home, those living elsewhere and also those who were born alive but who are unfortunately not alive now. Even if the child died with a few hours of his/her birth, he/she should be included in the count. Still births, *i.e.*, children born dead should not be included in counting this number of children ever born. You will have to ask politely but appropriate questions for getting this information.

132.2. You should ensure that all live births are ascertained irrespective of whether the children are alive now.

132.3. It is our experience that the birth of a child may not be reported readily if the child is not actually living at the time of enumeration. The children who are born but may have died before the enumeration may not be indicated by the respondent unless you make detailed enquiries. This would be particularly true in the case of children who may have died as infants. There is, therefore, need for a detailed probe to ensure that you get the correct number.

132.4. Ascertain the number of children ever born alive by sex and write the figures in international numerals in the boxes provided. Also give the total in the box provided.

132.5. If the woman reports that she has had no male or female children born alive, write, '0' in the appropriate box or boxes.

Q. 6 : For currently married women only

133. This question has to be answered in respect of all currently married women only, *i.e.*, all women whose marital status is shown as 'M' against Question 5 of the Universal Slip. For all others, a cross (×) may be put against this question on the line.

Any child born alive during last one year

134. You should ascertain if the currently married woman, whom you are enumerating, gave birth to a child in the last one year prior to the date of enumeration. If the respondent is not able to reckon one year, you can find out if a child was born alive in 1980 to the woman you ore enumerating on or after any of

the festival indicated to you by the Director of Census Operations. Only if the child was born alive, and even if the child had died soon after birth, the answer should be 'Yes', to this question. *Still birth, i.e., a child which is born dead should not be taken into account for this purpose.* So while you should make sure that every case of birth of a child born alive, even if it is not alive on the date of enumeration, is reported, you should not reckon it if the child was born lifeless.

134.1. It is common experience that the birth of the child may not be reported readily if the child is not actually surviving at the time of enumeration. Infant deaths are still high in the country. There is a chance of a number of such cases being missed unless specifically questioned about. It is necessary to record all live births even if the child had died soon thereafter or had not survived to the day of enumeration. Therefore, where the initial answer to this question is 'No', you should ask a specific question if there has been a case of a child having been born alive in the last one year and later dying before the enumeration date. This is a delicate question and should be asked with tact in a manner not to offend the sentiments of the respondent. Where a currently married woman first answers that she had no child born in the last one year, you may perhaps question her as follows :

"It has been found in some houses that a child was born and had died soon after or a few days or months later and such cases had not been reported. It is my hope that there are no such cases here. Am I right ?"

134.2. This may bring in the required response. If she reports 'No' then you can be sure that no birth has been missed. You have to make sure that any live birth that has occurred to the currently married woman in the last one year is netted whether the child is surviving till the date of enumeration or not. A similar probe to eliminate still births may also be necessary. For example, when the answer is 'Yes' under this question, you might ask if the child is here in the house. If the answer is 'Yes', no further question is needed. If 'No', you might ask where the child has gone. The answer may be 'dead' or that it has gone elsewhere. If dead, then you might ask when the child died and this will bring out the fact whether or not it was a still birth. If the answer is 'Yes', then enter 'Yes' in the space below the question; if the answer is 'No' enter 'NO' in the space. Do not write in the dotted box.

134.3. In a case where the woman has had twins or multiple births, please write 2, 3, *etc.*, next to 'Yes' as the case may be, thus 'Yes' (2) or 'Yes' (3).

135. On the reverse of Appendices VII-1 to VII-14 specimen entries in answer to questions included in the Sample Slip have been shown for your facility.

NOTE : You may find on your revisional round from March 1 to March 5, 1981 that a child is born to a currently married woman in a household after your last visit but before the sunrise of **March 1, 1981**. You will have to take this into account and correct the answers against Question 6 accordingly. You must enquire specifically, if any such birth has taken place. While ignoring still births all other births where the child was born alive even if it did not survive long should be taken into account.

ENUMERATION OF HOUSELESS POPULATION AND REVISIONAL ROUND

136. The enumeration of the houseless population will have to be carried out in all blocks irrespective of whether you are only incharge of a universal block or incharge of a sample block. This is because the houseless can be found in any place and they should not be omitted.

137. The Revisional Round, the instruction for which are part of this chapter, must be carried out for all blocks irrespective of whether it is a universal or sample block. This is because the revisional-round is an extremely important and essential step in the total process of enumeration and it is only after the revisional round is over that the correct population figures will be available. Therefore, do not neglect to carry out the revisional round of the block which you are enumerating.

Enumeration of the Houseless

138. As stated earlier you will be required to enumerate the houseless population in your enumeration block(s) on the night of February 28, 1981. In order to do this, it would be necessary for you to complete the enumeration of all the persons in all the households living in census houses in your jurisdiction between February 9 and February 28, 1981. During the period, you will have taken note of the possible place where houseless population is likely to live, such as on the roadside, pavements, in hume pipes, under staircases, or in the open, temple mandaps, platforms and the like. On the night of February 18/March 1, 1981, but before sunrise of March 1, 1981, you will have to quickly cover all such houseless households and enumerate them. If there is likely to be a very large number of houseless persons in your jurisdiction whom you may not be to enumerate single-handed in one night, you should report to your Supervisor in advance, so that one or more extra enumerators can be deputed to assist you in the one-night enumeration of such houseless persons. You should keep particular watch on the large settlements of nomadic population who are likely to camp on the outskirts of the village. These people will have to be covered on the night of February 28, 1981. You should of course make sure that these persons have not been enumerated elsewhere.

139. At this point, please read the instruction about updating and filling up of the Abridged Houselist. You will be required to enter the details of the houseless households in Section 3 of the Abridged Houselist in the manner described therein. Also please recall the instruction given in paragraph 4 of this booklet where you have been told that for houseless households, you should record 'O' in bold letters. In giving the Serial number of the household, you will have to indicate the Serial number of the household with a prefix 'O' separated by a desh (—), as explained in the instructions.

140. Please remember that Household Schedule will be filled for each houseless household in the manner explained in this booklet. Thereafter, you will have to fill up the Universal Individual Slip for each member of the household, as per instructions given in paragraphs 37—104. If you happen to be an enumerator for a sample block or the enumerator in any of the 19 States and Union Territories mentioned in paragraph 105 you will be required to fill in Questions 1 to 6 of the Sample Slip also, for each individual, as per instruction given in paragraphs 105 to 135. Thereafter, you will be required to fill in columns 8 to 35 of the Population Record (Part II of the Household Schedule), as per instructions given later.

Revisional Round

141. You have been told in this booklet that in the next five days, i.e., from March 1, 1981 to March 5, 1981, you will have to revist all the households in your jurisdiction and record any new births that had taken place after your last visit, but before the sunrise of March 1, 1981 and any visitor(s) that had moved into the household and who had been away from his/her/their place of normal residence throughout the enumeration period, i.e., from February 9, 1981 to February 28, 1981, or an entire household that has moved into your jurisdiction during this period and which has not been enumerated anywhere before. At this point, you may recall the instructions given in paragraph 27 of this booklet where instructions about persons eligible to be enumerated in a particular household have been given.

142. It is important to remember the following in this connection:

(1) If you are enumerating a new household in your block during the revisional round, please recall the instruction given in paragraph 3 about Serial number of household and updating and filling up a Abridged Houselist.

(2) In respect of every new birth, you should make sure that you give the correct Location Code including the Serial number of household, fill up an Individual Slip and make necessary entries in Part II of the Household Schedule concerned. Also correct the entry in Question 6 of the Sample Slip (if applicable in your case, *i.e.*, if you are an enumerator in a sample block or in any of the 19 States and Union Territories mentioned earlier) pertaining to the mother of the child whom you are enumerating during the revisional round. Please make sure that the birth has taken place before the sunrise of March 1, 1981.

(3) You will have to ascertain if any death had unfortunately taken place in any of the households since your last visit and the sunrise of March 1, 1981 and cancel the Individual Slip of the dead person writing boldly across it as 'died'. Please remember to make necessary correction in Part II of the Household Schedule concerned.

143. If you have exhausted the entire Population Record for recording the particulars of any household and it becomes necessary to record a new birth or visitor, then you will fill in another Household Schedule containing Population Record form in continuation of that Household Schedule, taking care that the Location Code and other particulars are noted in the second Household Schedule form properly. In such a case, please write on the top right hand corner of the fresh Household Schedule 'continued' and note the Book and Form number of the connected Household Schedule. Similarly, on the connected Schedule note the word 'continued' and give the Book and Form number of the additional Household Schedule form.

144. Changes made in the Population Record like additions for new births or recording of visitors or deletion of entry in respect of deaths, should be done neatly and consequential changes in the total should be made. It is this final total that must be entered in Question 15 of Part I of the Household Schedule.

145. You are now set for taking up the desk work at home in connection with the census enumeration that you have just completed. These are, as you will recall from this booklet, (1) filling up of the enumerator's Working Sheet for preparing the Enumerator's Abstract, (2) filling up of the Enumerator's Abstract, (3) filling up of Section 1 of the Abridged Houselist and (4) handing over all documents to your Supervisor, the documents being the Notional Map, the Layout Sketch, all filled in Household Schedule books, all filled in Individual Slip pads (Universal and Sample, where applicable), filled in and updated Abridged Houselist, the Working Sheets for preparing the Enumerator's Abstract, the filled in Enumerator's Abstract and all blank Household Schedule books, Individual Slip pads and other blank forms.

146. In addition, you have to collect the filled in Degree Holder and Technical Personnel Schedules from the households and individuals for whom you had issued these schedules vide instructions given in paragraph 57. You have to hand over the filled in schedules to your Supervisor. You will also be required to return the blank Degree Holder and Technical Personnel Schedules remaining surplus with you together with a statement giving an account of the number of blank forms given to you, number of forms issued to eligible persons in the households, number of filled in schedules collected and number of blank forms returned to the Supervisor.

FILLING UP OF THE HOUSEHOLD SCHEDULE, PART II—POPULATION RECORD—COLUMNS 8 TO 35

147. As mentioned in the instructions relating to the filling up of columns 1 to 7 of the Population Record (Part II of the Household Schedule), columns 8 to 35 of the Population Record have to be entered with reference to the entries in the Individual Slip. For each member of the household, you will have filled up an Individual Slip. You will be required to copy out or to enter the relevant particulars from the Individual Slip in the line relating to that person in column 8 to column 35 of the Population Record. The following instructions tell you how to do this.

148. Please note that you should not allow this work to fall into arrears. You must fill up these columns in the case of those households whom you have enumerated each day at the end of the day itself. This would save you a lot of trouble and will also ensure that there are no errors.

149. It would be noticed that columns 8 to 21 relate to males and columns 22 to 35 relate to females. Column 1 placed between columns 13 and 14 is a mere copy of column 1 already entered by you. This is repeated on page 3 of the Household Schedule to facilitate your work, by obviating the need to trace back the entries for columns 14 onwards to column 1 on page 2. The instructions that follow will indicate how the entries from the Individual Slip should be carried over to the appropriate columns (8 to 35) of the Population Record separately for males and females.

Cols. 8 & 22 : Name of Scheduled Caste

150. For each person recorded in column 2 of the Population Record, check whether in the corresponding Individual Slip (Universal), '1' is recorded in the box against Question 9. If so, copy out the name of the Scheduled Caste written against Question 10 of the Individual Slip in column 8 if the person is a male or in column 22 if the person is a female on the corresponding line. Please do not make any mistake is copying out the correct spelling.

Cols. 9 & 23 : Name of Scheduled Tribe

151. As in the previous paragraph, for these columns also, you will have to check from the corresponding Individual Slip of the person entered in column 2 of the Population Record if code '2' is recorded in the box against Question 9. If so, the name of the Scheduled Tribe written against Question 10 of the Individual Slip should be copied in column 9 of the Population Record for males and in column 23 for females.

151.1. *It must be noted that if there is a cross (×) against Question 9 of the Individual Slip for the person entered in column 2 of the Population Record, the corresponding columns 8 and 22 and 9 and 23 of the Population Record should be left blank.*

Cols. 10 & 24 Literate

152. For the person entered in column 2 of the Population Record, check from the corresponding Individual Slip whether '1' is recorded in the box against Question 11. If so, put a tick (√) under column 10 for males or a tick (√) mark under column 24 for females in the corresponding line.

Cols. 11 & 25 : Illiterate

153. As in the previous paragraph, check if '2' is recorded in the box against Question 11 of the Individual Slip for the person entered in column 2 of the Population Record and if so, give tick (√) mark under column 11 for males or tick (√) mark under column 25 for females in the corresponding line.

Cols. 12 & 26: Entry in Q. 14A of Individual Slip 'Yes'

154. For the person entered in column 2, check whether 'Yes' is recorded against Question 14A of the corresponding Individual Slip. If the person is a male, put tick (√) under column 12 and if female, put tick (√) under column 26.

Cols. 13 & 27 : Entry in Q. 14A of Individual Slip 'No'

155. As in the preceding paragraph, check if 'No', *i.e.*, 'H' or 'ST' or 'D' or 'R' or 'B' or 'I' or 'O' is entered against Question 14A of the Individual Slip for the person entered in column 2 of the Population Record. If so and if the person is a male, put a tick (√) under column 13 and if female, put a tick (√) under column 27.

Cols. 14 & 28 : Entry in Q. 14B of Individual Slip 'Yes'

156. For the person entered in column 2 of the Population Record, check against Question 14B of the corresponding Individual Slip if '1' is entered in the box. If so, put a tick (√) under column 14 for male, but if the person is a female, put the tick (√) under column 28 in the corresponding line.

Cols. 15 & 29 : Entry in Q. 14B of Individual Slip 'No'

157. Check if '2' is recorded in the box against Question 14B of the Individual Slip in respect of the person entered in column 2 of the Population Record. If so, put tick (√) under column 15 in the case of a male, but if the person is a female, put the tick (√) under column 29 in the corresponding line.

Cols. 16 & 30: Entry in Q. 15A of Individual Slip 'C'

158. For the person entered in column 2 of the Population Record, check if 'C' is recorded against Question 15A of the corresponding Individual Slip and if so, put the tick (√) under column 16 if male, and if the person is a female, put the tick (√) under column 30 of the corresponding line.

Cols. 17 & 31, 18 & 32, 19 & 33 : Entry in Q. 15A of Individual Slip 'AL'/'HHI'/'OW'

159. As in the previous paragraph, check from Question 15A of the Individual Slip relating to the person entered in column 2 of the Population Record whether 'AL' or 'HHI' or 'OW' is entered for the person entered in column 2 of the Population Record. If so, a tick (√) should be put under the appropriate column 17 or 18 or 19, as the case may be, in case the person is a male and under column 31 or 32 or 33, as the case may be, if the person is a female.

Cols. 20 & 34: Whether seeking/available for work 'Yes'

160. For the person recorded in column 2 of the Population Record, check from the corresponding Individual Slip whether '1' is entered in the box against Question 16. If so, put a tick (√) under column 20 in the case of male, but if the person is a female, the tick (√) should be put under column 34.

Cols. 21 & 35 : Whether seeking/available for work 'No'

161. As in the previous paragraph, check if '2' is recorded in the box against Question 16 of the Individual Slip for the person entered in column 2 of the Population Record. If so, put a tick (√) under column 21 in the case of a male and if female, put the tick (√) under column 35.

162. *Please note that there cannot be a tick (√) on the same line in columns 8 and 22, column 9 and column 23, column 10 and column 24, column 11 and 25, column 12 and column 26, column 13 and column 27, column 14 and column 28, column 15 and column 29, column 16 and column 30, column 17 and column 31, column 18 and column 32, column 19 and column 33, column 20 and column 34, and column 21 and column 35 just as there cannot be a tick (√) on the same line in column 4 and 5 of the Population Record.*

162.1. *Similarly, there cannot be a tick (√) on the same line in both columns 10 and 11, 12 and 13, 14 and 15, 20 and 21, 24 and 25, 26 and 27, 28 and 29, and 34 and 35. It will be obvious from the form itself that there cannot be a tick (√) on the same line in more than one of the column 16, 17, 18, 19 and 30, 31, 32, 33.*

163. Having entered these particulars in columns 8 to 35 for all the person enumerated in the household, you will have to strike the totals. Instructions for striking totals for columns 2, 8, 9, 22 and 23 are given in the foot-note of the form itself. However, this is recapitulated for your facility. Count the number of entries in column 2 and enter the figure against the total for this column. You will notice that the last serial number would tally with the total given under column 2. Similarly, for striking totals for columns 8, 9, 22, and 23, count the number of entries under each column and enter the figure in the relevant rectangle against the total. In striking totals for columns 4, 5, 10 to 21, and 24 to 35, there should be no difficulty. You have merely to count the ticks (√) under different columns and enter the total in the cell provided for writing the total.

164. Having struck the totals, your job in respect of this Household Schedule form is over and you should sign at the bottom right hand corner and give date also. At this point you must please remember that Question 15 of Part I of the Household Schedule, *i.e.*, total population of the household will have to be filled after you have derived the total of column 2 of Part II of Population Record taking into account the extra forms you may have used in the case of large households.

APPENDIX I

PRINCIPLES OF HOUSE-NUMBERING

Definition of Building, Census House and Household

1.1. You have to give numbers to 'Buildings' and 'Census Houses' in all areas. The instructions given hereafter will guide you to determine what a building and a census house are for the purpose of houselisting. A building is a readily distinguishable structure or group of structures which is taken as the unit for house-numbering. The entire building may be deemed one census house or sometimes part of it, as will be explained. The objectives is to ultimately number and list out all physical units of constructions which are used for different purposes, residential or otherwise.

1.2. **Building :** A building is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores, *etc.* It is also possible that buildings which have component units may be used for a combination of purposes such as shop-*cum*-residence, workshop-*cum*-residence, office-*cum*-residence, etc.

1.3. Sometimes a series of different buildings may be found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and likely to have been built at different times and owned by different persons, in such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion should be treated as a separate building and given a separate number. On the other hand, you may come across cases particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks one building, the flats are owned by different persons. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure should be treated as one building and each flat as a separate census house.

1.4. Sometimes in metropolitan cities the local authorities may have considered the flats in a block or in large colonies as separate buildings and numbered them as such. If the house-numbering system of the local authorities is adopted as such, you may treat each such flat as a separate building because this would avoid your having to renumber these.

1.5. If within a large enclosed area there are separate structures owned by different persons then each such structure should be treated as one or more separate buildings. Sometimes there may be a number of structures within an enclosed area or compound owned by an undertaking or company or government which are occupied by their employees. Each such structure should be treated as a separate building. If such buildings have a number of flats or blocks which are independent of one another having separate entrance from a common courtyard or staircase and occupied by different households each such flat or block should be considered as a separate census house.

1.6. Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. For example, a conical roof almost touches the ground and an entrance is also provided and there will not be any wall as such. Such structures should be treated as buildings and census houses, as the case may be.

1.7. If there is more than one structure within an enclosed or open compound (premises) belonging to the same person, *e.g.*, the main house, the servants' quarters, the garage *etc.*, only one building number should be given for this group and each of the constituent separate structures assigned a sub-number like 1(1), 1(2), 1(3), and so on, provided these structures satisfy the definition of a 'Census House' given hereafter.

1.8. The buildings should be numbered as follows :

(i) If in a vallage the locality consists of a number of streets, buildings should be numbered continuously. Streets should be taken in uniform order from North-west to South-east. It has been observed that the best way of numbering the buildings is to continue with one consecutive serial on one side of the street and complete numbering on that side before crossing over to the end of the other side of the street and continue with the serial, stopping finally opposite to where the first number began.

(ii) In a town/city enumeration block, the numbering will have to run along the axis of the street and not in any arbitrary geographical direction.

(iii) International numerals *i.e.*, 1, 2, 3 . etc., should be used for building numbers.

(iv) A building under construction, the roof of which has been completed should be given a number in the serial.

(v) If a new building either *Pucca* or *Kutcha* is found after the house-numbering has been

completed or in the midst of buildings already numbered, it should be given a new number which may bear a sub-number of the adjacent building number, *e.g.*, 10/1.

NOTE : There should not be numbered as 10(1) or 10(2), *etc.*, as such numbering would apply to census houses within the same building. On the other hand, 10/1 would mean a separate building that has come up after building No. 10.

2. **Census House :** A Census House is building or part of a building having a separate main entrance from the road or common courtyard or staircase, *etc.*, used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

2.1. If a building has a number of flats or blocks which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within a large enclosed area, there are separate buildings owned by different persons, then each such building should be treated as one or more separate buildings. You may come across cases where within an enclosed compound there may be separate buildings owned by an undertaking or company or even government, actually in occupation of different persons. For example, I.O.C. colony where the buildings are owned by the Corportation but these are in occupation of their employees. Each such building should be reckoned as a separate building. But if in any one of these buildings there be flats in occupation of different households, each such flat should be treated as a separate census house.

2.2. It may be difficult to apply the definition of census house strictly in certain cases. For example in an urban area, a flat has five rooms, each room having direct entrance to the common staircase or courtyard. By definition this has to be treated as five census houses. If all these five rooms are occupied by a single household, it is not realistic to treat them as five census houses. In such a case, singleness of use of these rooms along with the main house should be considered and the entire flat should be treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the three rooms together should be treated as one census house and the remaining rooms as another census house. But if each room is occupied by an independent household, then each such room should be treated as a separate census house.

2.3. In case of hostels, hotels, *etc.*, even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/hotel building should be treated as one census house. But if such hostels/hotel have outhouses or other structures used for different purposes or the same purpoes then each such structure attached to the main hostel/hostel should be treated as a separate census house and will be given sub-numbers of the main building. In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, *baithak, etc.* Though each of the huts is a separate structure, they form a single housing unit and, therefore, have to be treated collectively as a single census house. If some of the huts are used by one household and the others by a second household as residence, then the two group of huts should be treated as separate census houses. However, if there are also other huts in the compound used for other purposes and not as part of the household's residence such as, cattleshed, workshed *etc.*, they should be treated as separate census houses.

2.4. It is also possible that a household uses another structure., *e.g.*, a *baithak,* separated from the main residence by some distance or by other structure or by a road. In such cases, it may become necessary to treat that separate structure used as *baithak* as a separate census house.

2.5. It is usual to find in municipal towns and cities that every site, whether built upon or not, is numbered by the municipal authorities on property basis. Such open sites, even if they are enclosed by a compound wall, should not be listed for census purposes. Only cases where a structure with roof has come up should be treated as a census house and listed. But in some areas, the very nature of construction of houses is such that there may not be any wall. For example, a conical roof almost touches the ground and an entrance is also provided and there will not be any wall as such. Such structures should of course be treated as buildings and census houses and numbered and listed.

2.6. Pump houses, temples and other similar structures must also be numbered and given census house numbers. These are places where people can also live. Obviously such structures need not be numbered if they are so small that no person can live in them.

2.7. Each census house should be numbered. If a building by itself is a single census house, then the number of the census house will be the same as the building number. But if different parts or constituent units of a building qualify to be treated as separate census houses each census house should be given a sub-number within brackets after the building number as 10(1), 10(2), *etc.*, or ,11(1), 11(2) 11(3), *etc.*

3. **Households :** A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses,

messes, hostels, residential hotels, rescue homes jails, *ashrams, etc.* These are called 'Instiutional households'. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household.'

3.1. If a group of persons who are unreleated to each other live in a census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person should be treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen.

3.2. Each household will be listed according to the instructions that follow and a distinguishing number allotted to each household. As each household will be related to the physical structure of a census house, the household number as such need not be painted on the door of each census house. Only the building and census house number will be painted.

APPENDIX II

LIST OF A FEW TYPICAL INDUSTRIES THAT CAN BE CONDUCTED ON A HOUSEHOLD INDUSTRY BASIS

Foodstuffs

Production of flour by village chakkis or flour mills; milling or dehusking of paddy; grinding of chillies, turmeric, *etc.;* production gur, khandsari, boora, *etc.;* production of pickless, chutney, jams, *etc;* processing of cashewnuts; making of dried vegetables; manufacture of sweet-meats and bakery products; production of butter, ghee, *etc.;* slaughtering and preservation of meat and fish; fish curing, *etc.;* oil pressing ghani.

Beverages

Manufacture of country liquor, toddy; production of soda water, ice, ice cream, sharbats, *etc.;* processing of coffee, *etc.*

Tobacco Products

Manufacture of bidi, cigars, cherroots, tobacco, snuff, *etc.*

Textile Cotton

Cotton ginning, carding, pressing and baling, spinning, *etc.;* dyeing and bleaching of cloth; weaving in handlooms or powerlooms or manufacture of khadi; cloth printing; making of fishing nets, mosquito nets, cotton thread, rope, twine, *etc.*

Textile Jute, Wool or Silk

Similar type of production or processing as mentioned under Textile Cotton but pertaining to the material concerned.

Textile Miscellaneous

Making of durries, carpets, hosiery, embroidery work; lace garland making; manufacture of chrochet headgear; making of newar, bed covers, (curtains, pillow, pillow cases, *etc.*); making of mattress, quilt (*rezai*), *etc.;* making of namda felt, coconut fibre for upholstery; making of brushes, brooms, *etc.*, from coconut fibres; coir spinning; manufacture and repair of umbrellas; manufacture of dolls and toys (rags and cotton), *etc.*

Manufacture of Wood and Wood Products

Sawing and planing of wood, manufacture of wooden furniture, structural goods like beams, door and window farmes, *etc.*, wooden agricultural implements and their repair, wooden lacquerware, wooden toys, wood carving, sawdust and plaster figure making, inlay work; match splinters, plywood and veneers, *etc.;* making palm leaf mats, fans, umbrellas, *etc.*, baskets and broomsticks, caning of chairs; making of chicks and khas khas tattics; making of cart wheels, wooden sandals, *etc.*

Paper and Paper Products

Manufacture of pulp and paper by hand; making of envelopes, paper made articles, card board boxes, paper flower, paper kites, toys, *etc.*

Printing and Publishing

Printing works, lithography block-making book binding *etc.*

Leather and Leather Products

Flying and processing of hides and skins; making leather footwear, wearing apparel of leather and fur; repair of shoes or other leather products.

Rubber, Petroleum and Coal Products

Vulcanising tyres and tubes; manufacture of chappals from torn tyres and other rubber footwear; manufacture of rubber products from natural and synthetic rubber.

Chemicals and Chemical Products

Manufacture of toys, paints, colours, *etc.;* manufacture of matches, fireworks, perfumes, cosmetics; manufacture of ayurvedic medicines, soap, plastic products, celluloid goods; manufacture of ink, candles, boot polish, *etc.*

Non-metallic Mineral Products—other than Petroleum and Coal

Making of bricks, roofing tiles, sanitary fittings, cement statues, stone or marble carvings, manufacture of stone structurals, stone dressing and stone crushing, mica splitting and manufacture of other mica products; making or earthenware and pottery, crockery, glass beads and bangles, earthen toys; manufacture of glass products, *etc.*

Basic Metals and their Products except Machinery and Transport Equipment

Manufacture of iron arms and weapons and their service and repair, iron and steel furniture, brass, bell-metal utensils, aluminium utensils, tin utensils, copper utensils, *etc.;* nickeling and electroplating, blacksmithy; manufacture and repair of agricultural implements such as plough-share, *etc.;* making and repairing of locks and trunks, cutlery, manufacture of scales, weights and measures and foundry industry, *etc.*

Machinery (all kinds other than Transport) and Electrical Equipment

Manufacture of small machine tools and parts; repairing and servicing of fans, radios, domestic electrical appliances, *etc.*

Transport Equipment

Repairing and servicing of automobiles; manufacture of cycle parts, rickshaw parts, boats and barges; manufacture of animal-drawn and hand-drawn vehicles such as bullock carts, wheel barrow, *etc.*

Miscellaneous Manufacturing Industries

Repair of spectacles, photographic equipment; goldsmithy, silver filigree industry; gold covering work, bidriware; repair of musical instruments, fountain pens; making of cowdung cakes, manufacture of sports goods; repairing of petromax lights; making of buttons and beads from conchshell and horn goods.

APPENDIX III

CLASSIFIED LIST OF ECONOMIC ACTIVITIES AGRICULTURE, HUNTING, FORESTRY AND FISHING

(Do not merely say plantation or fishing, *etc.*, but indicate the appropriate details as given here).

Plantation Crops

Indicate the type of plantation such as tea, coffee, rubber, tobacco, edible nuts, fruits, ganja, betel nuts, *etc.*

Livestock Production

Indicate what kind of livestock is reared such as goats, sheep, horses, pigs, ducks bees, silk worm, *etc.* Production of wool, raw silk, *etc.*, are also covered in this.

Agricultural Services

Indicate what type of agricultural service, *e.g.*, pest destroying, spraying, operation of irrigation system, animal shearing and livestock services (other than veterinary services), grading agricultural and livestock products, soil conservation, soil testing, *etc.*

Hunting

Indicate hunting, trapping and game propagation for commercial purpose only.

Forestry and Logging

Apart from planting and conservation of forests, felling and cutting of trees, *etc.*, this would cover production of fuel, gathering of fodder, gums, resins, lac, *etc.*

Fishing

Sea, coastal and inland water fishing, pisci-culture, collection of pearls, conches, shells, sponges, *etc.*

MINING AND QUARRYING

(Do not merely say mining or quarrying but indicate further details.) Indicate what is mined such as coal, lignite, crude petroleum, natural gas, iron ore, manganese, gold, silver, copper ore, quarrying of stones, clay and sand pits, precious and semi-precious stones, mica, gypsum, *etc.*

MANUFACTURING AND REPAIR

(Do not merely say engaged in a factory, but indicate what the manufacturing is concerned with as detailed here).

Manufacture of Food Products

Slaughtering, preparation and preservation of meat, dairy products; canning and preservation of fruits and vegetables; fish, grain mill products; bakery products; sugar; boora; common salt; edible oils including vanaspati; processing of tea or coffee; manufacture of ice; animal feeds, starch, *etc.*

Manufacture of Beverages, Tobacco and Tobacco Products

Rectifying and blending of spirits, wine industries; country liquor and toddy, carbonated water industries, bidi, cigar, cigrarette, zerda, snuff, *etc.*

Manufacture of Cotton Textiles

Cotton ginning, cleaning and baling; spinning weaving and finishing of cotton in textile mills; printing; dyeing and bleaching of cotton textiles; cotton spinning other than in mills (charkha); khadi production; weaving *etc.* in handloom and powerlooms, *etc.*

Manufacture of Wool, Silk and Synthetic Fibre Textiles

Wool cleaning, baling and pressing, weaving and finishing in mills and other than in mills, dyeing and bleaching; printing of silk, synthetic textiles, *etc.*

Manufacture of Jute, Hemp and Mesta Textiles

Spinning and pressing and baling of jute and mesta; dyeing; printing and bleaching of jute textiles and manufacture of jute bags are also covered in this.

Manufacture of Textile products

(Including wearing apparel other than footwear) knitting mills, manufacture of all types of threads; cordage, ropes, *etc.;* embroidery; carpets; rain coats; hats; made up textile goods (except garments), oil cloth, tarpaulin; coir and coir products, linoleum, padding, wadding, *etc.*, are also covered in this.

Manufacture of Wood and Wood Products, Furniture and Fixtures

Manufacture of veneer, plywood and their products; sawing and planing of wood; wooden and cane boxes, crates, drums, barrels, *etc.* beams, posts, doors and windows, wooden industrial goods like blocks, handles; *etc.*, cork products; wooden, bamboo and cane furniture and fixture, *etc.*

Paper and Paper Products and Printing, Publishing and Allied Industries

Manufacture of pulp; paper, paper boards and newsprints; container and paper boxes; printing and publishing of newspapers; periodicals, books, *etc.*, engraving, block making, book binding *etc.*

Leather and Fur Products

Tanning currying etc., of leather; footwear (excluding repair); coats, gloves, currying, dyeing *etc.*, of fur, and skin rugs, *etc.*

Rubber, Plastic, Petroleum and Coal Products

Tyre and tube industries; footwear made of valcanized or moulded rubber; rubber and plastic products; petroleum refineries, production of coaltar in coke ovens, *etc.*

Chemical and Chemical Products

Manufacture of chemicals such as acids, alkalis, gases, *etc.*, fertilizers and pesticides; paints, varnishes, drugs and medicines; perfumes, cosmetics, lotions; synthetic resins, *etc.*, explosive and ammunition and fireworks, *etc.*

Non-metallic Mineral Products

Structural clay products; glass and glass products; earthen ware and earthen pottery; china ware and porcelain ware, cement, lime and plaster; asbestos, cement, *etc.*

Basic Metal and Alloys Industries

Iron and steel industries; casting foundries; ferro-alloys; copper, brass, zinc and brass manufacturing *etc.*

Metal Products and Parts except Machinery and Transport Equipment

Metal cans from tin-plate, sheets metal, burrels, drums, pails, safe, *etc.;* structural metal products; metal furniture and fixture; hand tools; utensils, cutlery, *etc.*

Machinery, Machine tools and Parts except Electrical Machinery

Agricultural machinery, cranes; road rollers; boilers, diesel engine; refrigerators, air conditioners, *etc.*

Electrical Machinery, Apparatus, Appliances and Supplies and Parts

Electrical motors, generators, transformers, insulated wires and cables; dry and wet batteries; radio, television, *etc.;* X-ray apparatus; electric computors. *etc.*

Transport Equipments and Parts

Ship building and repairing locomotives and parts; Railway wagons; coaches, *etc.*, rail road equipments; motor vehicles; bicycles; aircrafts; push-carts and hand-carts, *etc.*

Other Manufacturing Industries

Do not say other manufacturing industries but write clearly what is being manufactured like manufacture of medical, surgical and scientific equipments; photographic and optical goods; watches; minting of coins; musical instruments, *etc.*

ELECTRICITY, GAS AND WATER

Indicate if generation and transmission of electric energy or distribution is involved, *e.g.*, manufacture of gas in gas works and its distribution; water supply, *i.e.*, collection, purification and distribution of water, *etc.*

CONSTRUCTION

(Do not merely say engaged in construction but give further particulars. Clear details of the type of construction and maintenance such as buildings, road, railways, telegraph, telephone, water ways and water reservoirs, hydro electric projects, industrial plants, activities allied to construction such as plumbing, heating and air conditioning installation, setting of tiles, marble, brick, *etc.* construction of electrical installation *etc.*, should be given).

WHOLESALE AND RETAIL TRADE AND RESTAURANTS AND HOTELS

Food, Textiles, Live Animals, Beverages and Intoxicants

Indicate clearly that the wholesale trade is done in cereals, pulses; foodstuff; textiles and textile products, *e.g.*, garments, shirtings, etc., beverages, intoxicants like wines, opium, ganja, tobacco, *etc.;* wholesale trade in animals, straw and fodder is also covered in this.

Fuel, Light, Chemicals, Perfumery, Ceramics and Glass

Wholesale trade in medicines, chemicals, fuel lighting products; toilets; porcelain, glass utensil, crockery, *etc.*

All types of Machinery, Equipment, including Transport and Electrical Equipment

Agricultural and industrial machinery, *e.g.*, harvesters, threshers, *etc.;* electrical machinery; transport equipments, *etc.*

Miscellaneous Manufacturing

Wholesale trade in furniture, rubber and rubber products, building materials, clocks, *etc.;* eye-glasses, *etc.;* medical and surgical instruments; precious metals, stones and jewellery, *etc.*

Retail Trade in food and food-articles, beverages, tobacco and intoxicants

Indicate clearly that the retail trade is carried in grocery, vegetable, fruit selling, meat, poultry, bakery products, dairy products, pan, bidi, aerated water, *etc.*

Retail Trade in Textiles

Do not merely say engaged in retail trade in textile, but indicate clearly what the retail trade is concerned with. Dealers in textile (non ready-made), ready-made garments, are some examples.

Retail Trade in Others

Indicate clearly what kind of retail trade it is, like medical shops, booksellers, building material, *etc.*

Restaurants and Hotels

Restaurants, cafes and other eating places, hotels. rooming houses, camps and other lodging places.

TRANSPORT, STORAGE AND COMMUNICATION

(Do not merely say engaged in land, water, air transport but give further particulars). Indicate what kind of transport such as railways, tramways, motor buses, bullock carts, ekka, tonga, *etc.;* ocean and coastal water, inland water transport, air transport, services rendered to transport such as packing, crating, travel agencies, *etc.* It also includes storage, warehousing, communication such as postal, telegraph, wireless, telephone, *etc.*

FINANCING, INSURANCE, REAL ESTATE AND BUSINESS SERVICES

Indicate clearly whether services belong to banking; credit institutions other than banks, *e.g.,* loan societies, agricultural credit institutions, *etc.,* money lenders, financiers, *etc.* provident services, insurance carriers life, fire marine accident, health, etc. It also includes business services, *e.g.,* purchase and sale agents and brokers, auctioneering; accounting; data processing, engineering; advertising services, *etc.;* legal services rendered by advocates, barristers, pleaders *etc.*

COMMUNITY, SOCIAL AND PERSONAL SERVICES

It should be clearly indicated whether service belongs to public administration, union government, state government, police service, quasi-government bodies, sanitary services, education, scientific and research, *etc.*

Personal Services

Do not merely say engaged in personal service but *indicate clearly whether it is domestic service,* services relating to laundaries, cleaning and dyeing plants, hair dressing, photographic studios, international and other extra territorial bodies, *etc.*

APPENDIX-IV

CLASSIFIED LIST OF OCCUPATIONS

i.e., DESCRIPTION OF WORK

(Questions 15A and 15B)

Professional, Technical and Related Workers

(Do not merely say an Engineer, Doctor, Teacher, *etc.*, in describing the work of an individual but furnish more precise particulars as given below). Indicate clearly in respect of engineers to what branch they belong such as civil, mechanical, electrical, metallurgical, mining, *etc.* in respect of physicians, state if they are allopathic, ayurvedic, homoeopathic, *etc* Physiologists and dentists, *etc.*, should be recorded. As regards teachers, state if they are university teachers, Secondary School, Middle School, Primary School or Kindergarten teachers. There are various other types of chemists, physicists, archaeologists, nurses, pharmacists, health technicians, jurists, social scientists such as economists, statisticians, geographers, historians, anthropologists, *etc.*, as also artists, writers, painters, sculptors, actors, *etc.*, draughtsmen, laboratory assistants, librarians, ordained religious workers, astrologers *etc.*, who will have to be recorded with particulars of their work.

Administrative, Executive and Managerial Workers

(Do not merely say Government Officer, an officer in a private firm or concern but give further particulars). They may be in Government service or under a local body or in a business firm, manufacturing establishment or a catering establishment or a transport company and so on. Their full description should be recorded such as for example, Secretary to the Government of India, District Collector, Municipal Commissioner, Executive Officer of a Panchayat, Director of a firm, Manager of a business concern, Proprietor and Manager of a hotel, elected and legislative officials, aircrafts and ships officers, *etc.*

Clerical Workers

(Do not merely denote the work of a person as clerk or office worker but furnish further particulars). State clearly the type of work done such as, cashier, accountant, stenographer, typist, computing clerk, key punch operator, office assistant, guard, brakeman, traffic controller, railway ticket inspector, postman, telephone/teleprinter/wireless operator, record keeper, despatcher, *etc.*, office workers would also include peons, daftries, *etc.*

Sale Workers

(Do not merely say a worker in a shop but give details). It should be clearly recorded whether the proprietor of a business concern engages himself in wholesale or retail trade. Salesman or shop assistants, agents of insurance, brokers in share, auctioners commercial, travellers, hawkers and street vendors, money lenders, pawn brokers, *etc.*, will also be covered.

Service Workers

(There are all types of service workers such as those engaged as domestic servants or in personal services or in police service or watch and ward, *etc.* Give precise particulars). Hotel and restaurant keepers, housekeepers, matrons and stewards (domestic and institutional), cooks, waiters, bartenders and related workers (domestic and institutional) maids and related house-keeping service workers, building care-takers, sweepers, cleaners and related workers, launderers, dry cleaners and pressers, hair dressers, beauticians and related workers, protection service workers, such as watchmen, chowkidars, gate keepers, *etc.*, other service workers.

Farmers, Fishermen, Hunters, Loggers, etc. and related workers

Deep sea fishermen, inland river water fishermen, shell gatherers, forest rangers, charcoal burners, forest product gatherers, plantation managers, farm machine operators, gardeners, toddf tappers, rubber tappers, hunters, bird trappers, etc., will be covered.

Production and other related workers, Transport equipment Operators and Labourers

(This may cover a very large variety of craftsmen and operators, *etc.*, whose work will have to be given in adequate detail.) Examples : minerals, quarrymen, well drillers, cotton ginners, spinners, dyers, knitters, lace makers, carpet makers, *etc.*, tailors, cutters, hat makers, embroiders, shoe makers or repairers; saddle makers, leather cutters, *etc.*, blacksmiths, furnacemen, moulders, *etc.*, cart builders, wheel wrights, cabinet makers, *etc.*, stone cutters, bricklayers, masons, hut builders, thatchers, well diggers, *etc.*, jewellers, goldsmiths, watch and clock makers or repairers, welders and plate cutters, sheet metal workers, machine tool operators, electricians, electrical and electronic wire fitters, radio mechanic, electric linemen, cable jointers, carpenters, joiners, sawers, *etc.*, printing type machine operators, proof Readers, photo-litho operators, book binders, potters, moulders, firemen, kilnmen, blowers and makers of glass, millers, bakers, confectioners, sweetmeat makers, food canners, coffee or tea planters, tobacco curers, graders and blenders of tobacco, bidi or cigar makers, snuff or zarda makers, tyre builders, crane or hoist operators, loaders and unloaders, *etc.*

ANNEXURE C

THE CENSUS ACT, 1948

Act No. 37 of 1948

An Act to provide for certain matters in connection with the taking of census.

[3rd September, 1948]

Whereas it is expedient to provide for the taking of census in [1] * * * India or any part thereof whenever necessary or desirable and to provide for certain matters in connection with the taking of such census ;

Short title and extent

It is hereby enacted as follows:—

1. (1) This Act may be called the Census Act, 1948.

[2][(2) It extends to the whole of India[3] * * *]

[4]Rule of construction respecting enactments not extending to Jammu and Kashmir

4. [2. Any reference in this Act to the Indian Penal Code or the Indian Evidence Act, 1872 (45 of 1860, 1 of 1872) shall, in relation to the State of Jammu and Kashmir, be construed as a reference to the corresponding enactment in force in that State.]

Central Government to take census

3. The Central Government may, by notification in the Official Gazette, declare its intention of taking a census in the whole or any part of the territories to which this Act extends, whenever it may consider it necesssary or desirable so to do, and thereupon the census shall be taken.

Appointment of census staff

4. (1) The Central Government may appoint a Census Commissioner to supervise the taking[5] of the census throughout the area in which the census is intended to be taken, and Directors of Census Operations[1] to supervise the taking of the census within several States.

(2) The State Government may appoint persons as census-officers to take or aid in, or supervise the taking of, the census within any specified local area and such persons, when so appointed, shall be bound to serve accordingly.

(3) A declaration in writing, signed by any authority authorised by the State Government in this behalf, that any person has been duly appointed a census-officer for any local area shall be conclusive proof of such appointment.

(4) The State Government may delegate to such authority as it thinks fit the power of appointing census-officers conferred by sub-section 2).

Status of census authorities as public servants

5. The Census Commissioner, all Directors of Census Operations[1] and all Census-officers shall be deemed to be public servants within the meaning of the Indian Penal Code. (45 of 1860)

Discharge of duties of census-officers in certain cases

6. (1) Where the District Magistrate or such authority as the State Government may appoint in this behalf, by a written order so directs :—

(a) Every officer in command of any body of man belonging to the naval, military or air force, or of any vessel of war, of India,

(b) every person (except a pilot or harbour-master) having charge or control of a vessel,

(c) every person in charge of a lunatic asylum, hospital, workhouse, prison, reformatory or lock-up or of any public, charitable, religious or educational institution,

(d) every keeper, secretary or manager of any serai, hotel, boarding-house, lodging-house, emigration depot or club,

(e) every manager or officer of a railway or any commercial or industrial establishment, and

(f) every occupant of immovable property wherein at the time of the taking of the census persons are living,

shall perform such of the duties of a census-officer in relation to the persons who at the time of the taking of the census are under his command or charge, or are inmates of his house, or are present on or in such immovable property or are employed under him as may be specified in the order.

(2) All the provisions of this Act relating to census-officers shall apply, so far as may be, to all persons while performing such duties under this section, and any person refusing or neglecting to perform any duty which under this section he is directed to perform shall be deemed to have committed an offence under section 187 of the Indian Penal Code (45 of 1860).

1. The words "the provinces and Acceding States" were rep., by the A. O. 1950.
2. Subs. ibid., for the former sub-section.
3. The words "except the State of Jammu & Kashmir" omitted by Act. 22 of 1959, S. 2.
4. Ins. by s. 3, ibid. The Original s. 2 was omitted by Act 36 of 1957, s. 2 and sch.
5. Subs for the words "Superintendents of Census Operations" by Sec 3 of Repealing and Amending Act, 1974. (Act No. 56 of 1974).

Power to call upon certain persons to give assistance

7. The District Magistrate, or such authority as the State Government may appoint in this behalf for any local area, may, by written order which shall have effect throughout the extent of his district or of such local area, as the case may be, call upon—

(a) all owners and occupiers of land, tenure-holders, and farmers and assignees of land revenue, of their agents,

(b) all members of the district, municipal, panchayat and other local authorities and officers and servants of such authorities, and

(c) all officers and members of staff of any factory, firm or establishment, to give such assistance as shall be specified in the order towards the taking of a census of the persons who are, at the time of the taking of the census, on the lands of such owners, occupiers, tenure-holders, farmers and assignees, or in the premises of factories, firms and other establishments, or within the areas for which such local authorities are established, as the case may be, and the persons to whom an order under this section is directed shall be bound to obey it and shall, while acting in pursuance of such order, be deemed to be public servants within the meaning of the Indian Penal Code. (45 of 1860).

Asking of questions and obligation to answer

8. (1) A census-officer may ask all such questions of all persons within the limits of the local area for which he is appointed as, by instructions issued in this behalf by the State Government and published in the official Gazette, he may be directed to ask.

(2) Every person of whom any question is asked under sub-section (1) shall be legally bound to answer such questions to the best of his knowledge or belief :

Provided that no person shall be bound to state the name of any female member of his household, and no woman shall be bound to state the name of her husband or deceased husband or of any other person whose name she is forbidden by custom to mention.

Occupier to permit access and fixing of numbers

9. Every person occupying any house, enclosure, vessel or other place shall allow census-officers such access thereto as they may require for the purposes of the census and as having regard to the customs of the country, may be reasonable and shall allow them to paint on, or affix to, the place such letters, marks or numbers as may be necessary for the purposes of the census.

Occupier or manager to fill up schedule

10. (1) Subject to such orders as the State Government may issue in this behalf, a census-officer may, within the local area for which he is appointed, leave or cause to be left a schedule at any dwelling house or with the manager or any officer of any commercial or industrial establishment, for the purpose of its being filled up by the occupier of such house or of any specified part thereof or by such manager or officer with such particulars as the State Government may direct regarding the inmates of such house or part thereof, or the persons employed under such manager or officer, as the case may be, at the time of the taking of the census.

(2) When such schedule has been so left, the said occupier, manager or officer, as the case may be, shall fill it up or cause it to be filled up to the best of his knowledge or belief so far as regards the inmates of such house or part thereof or the persons employed under him, as the case may be, at the time aforesaid, and shall sign his name thereto and, when so required, shall deliver the schedule so filled up and signed to the census-officer or to such person as the census-officer may direct.

Penalties

11. (1) (a) Any census-officer or any person lawfully required to give assistance towards the taking of a census who refuses or neglects to use reasonable diligence in performing any duty imposed upon him or in obeying any order issued to him in accordance with this Act or any rule made thereunder, or any person who hinders or obstructs another person in performing any such duty or in obeying any such order, or

(b) any census-officer who intentionally puts any offensive or improper question or knowingly makes any false return or, without the previous sanction of the Central Government or the State Government discloses any information which he has received by means of, or for the purposes of, a census return, or

(c) any sorter, compiler or other member of the census staff who removes, secretes, damages or destroys any census document or deals with any census document in a manner likely to falsify or impair the tabulations of census results, or

(d) any person who intentionally gives a false answer to, or refuses to answer to the best of his knowledge or belief, any question asked of him by a census-officer which he is legally bound by section 8 to answer, or

(e) any person occupying any house, enclosure, vessel or other place who refuses to allow a census-officer such reasonable access thereto as he is required by section 9 to allow, or

(f) any person who removes, obliterates, alters, or damages any letters, marks or numbers which have been painted or affixed for the purposes of the census, or

(g) any person who, having been required under section 10 to fill up a schedule, knowingly and without sufficient cause fails to comply with the provisions of that section, or makes any false return thereunder, or

(h) any person who trespasses into a census office, shall be punishable with fine which may extend to one thousand rupees and in case of a conviction under part (b) or (c) shall also be punishable with imprisonment which may extend to six months.

(2) Whoever abets any offence under sub-section (1) shall be punishable with fine which may extend to one thousand rupees.

Sanction required for prosecution

12. No prosecution under this Act shall be instituted except with the previous sanction of the State Government or of an authority authorised in this behalf by the State Government.

Operation of other laws not barred

13. Nothing in this Act shall be deemed to prevent any person from being prosecuted under any othr law for any act or omission which constitutes an offence under this Act :

Provided that no such prosecution shall be instituted except with the previous sanction referred to in section 12.

Jurisdiction

14. No Court inferior to that of a Presidency Magistrate of the second class[1]***, shall try, whether under this Act or under any other law, any act or omission which constitutes an offence under this Act.

Records of census not open to inspection nor admissible in evidence

15. No person shall have a right to inspect any book, register or record made by a census-officer in the discharge of his duty as such, or any schedule delivered under section 10, and notwithstanding anything to the contrary in the Indian Evidence Act, 1872, (1 of 1872) no entry in any such book, register, record or schedule shall be admissible as evidence in any civil proceeding whatsoever or in any criminal proceeding other than a prosecution under this Act or any other law for any act or omission which constitutes an offence under this Act.

Temporary suspension of other laws as to mode of taking census in municipalities

16. Notwithstanding anything in any enactment or rule with respect to the mode in which a census is to be taken in any municipality, the municipal authority, in consultation with the Director of Census Operations[2] or with such other authority as the State Government may authorise in this behalf, shall, at the time appointed for the taking of any census cause the census of the municipality to be taken wholly or in part by any method authorised by or under this Act.

Grant of statistical abstracts

17. The Census Commissioner or any Director of Census Operations[2] or such person as the State Government may authorise in this behalf may, if he so thinks fit, at the request and cost (to be determined by him) of any local authority or person, cause abstracts to be prepared and supplied containing any such statistical information as can be derived from the census returns for[3] [India or any State], as the case may be, being information which is not contained in any published report and which in his opinion it is reasonable for that authority or person to require.

Power to make rules

18. (1) The Central Government may make rules for carrying out the purposes of this Act.

(2) In particular, and without prejudice to the generality of the foregoing power, the Central Government may make rules providing for the appointment of census-officers and of persons to perform any of the duties of census-officers or to give assistance towards the taking of a census, and for the general instructions to be issued to such officers and persons.

---

1. The words "or in a Part B State, A Magistrate corresponding to a Magistrate of the second class" ins by Act 51 of 1950, S. 4 omitted by the Adoption of Laws (No. 3) Order, 1956.
2. Subs for the words "Superintendents of Census Operations" by Sec 3 of the Repealing and Amending Act. 1974 (Act No. 56 of 1974).
3. Subs by the A.O. 1950, "for the provinces of India or the Province".

ANNEXURE B

POST ENUMERATION CHECK

Introduction

Just after the 1981 Census Enumeration was over, a number of Census Directorates were to hold a Post Enumeration Check Survey. Apart from the State of West Bengal, 13 other major states the Union Terriory of Delhi conducted the Post-Enumeration Check (PEC).

Objectives

The objectives of the PEC were to evaluate the coverage error and the content error. The coverage error to be investigated in the PEC were of two types. The one was omission or duplication of persons due to omisslon or duplication of households and the other was omission or duplication of individuals in censused households. These errors were called Type-1 and Type-2 errors respectively. The content errors to be investigated in the PEC were to check on the quality of information on items collected in the 1981 Census like age, literacy, whether worked any time during last one year and main activity. Three schedules were canvassed. These schedules were called PEC Form I, PEC Form II and PEC Form III. Forms I and II related to coverage error and Form III to content error.

Sample Design

The Enumeration Blocks where the PEC was to be conducted were selected in the office of the Registrar-General, India New Delhi on sample basis, i.e. by systematic sample. Out of the total of 3,862 Enumeration Blocks selected for this purpose all over India, our share in West Bengal was 350. For drawing the sample Enumeration Blocks, sample frames separately for rural, city urban and non-city urban were prepared at the concerned State/Union Territory Census Directorate and seat to the office of the Registrar-General, India, New Delhi. For rural area, the sample frame contained the number of Enumeration Blocks by size class of population, that is less than 300, 300—499, 500—749 and 750+ for each police station of each district. Continuous notional numbers were assigned to the Enumeration Blocks starting from the first block in the size class of less tran 300 and ending at the last block in the size class of 750 +. In the case of city and non-city urban the sample frames contained the number of Enumeration Blocks arranged in ascending order separately for each city and town of each district.

In each block selected for PEC., a 10% sub-sample of Households was drawn at the State/Union Territory Census Directorate linear systematically. In doing so the Institutional and Houseless households were excluded. Re-numbering of the normal households was made in the Abridged Houselist in a continuous serial and then every 10th household was selected after assigning the random number between 1 and 10 to the first selected household. For these 10% households, Form-II was canvassed. The content error schedule i.e., Form III was canvassed in a sub-sample of 50 blocks in each State in 10% household.

Method of data collection

There were three stages in the post Enumeration Check Survey, i.e., Listing and Enumeration, (b) Desk match between the PEC and the corresponding Census records and (c) Field reconciliation.

(a) Listing and Enumeration—At this stage the operations to be performed were—(i) The relisting of the Census houses in the selected Enumeration Blocks; (ii) re-enumeration of all the members of a 10% sub-sample of households which had been enumerated in the Census; and (iii) collection of certain particulars like age, literacy, economic activity etc. in respect of individuals in the 10% sub-sample of censused households for the purpose of content error check in a sub-sample of 50 Enumeration Blocks. Before the Enumerator was sent to the field, a list of households had to be selected from the Abridged House List. The notional maps and the layout sketches of the selected PEC Block and adjoining Blocks were to be assembled.

(b) Desk match between the PEC and the corresponding Census records : At this stage, the entries in the Form I were matched with those in the Abridged House List of the corresponding Enumeration Block. Similarly, the entries in the Form II and III of the PEC were matched with the corresponding entries in the Population Record, i.e., Household Schedule Part II. Before the Desk match started all the entries in the population record were thoroughly checked with the corresponding entries in the Individual slips in order to ensure that no mistake had been committed in transcribing the particulars from one record to another.

(c) Field reconciliation : Reconciliations was made in the field about the particulars of the households or individuals the entries in respect of which or whom were not unequivocally matched between the PEC and relevant Census records. At this stage, additional information were also collected wherever needed.

Organisation of Field work

In West Bengal where no Regional Tabulation offices were set up at the time of PEC Survey, we had to

deploy the State Government Employees with the concurrence of the Registrar-General, India in conducting the PEC Survey. The services of the Assistant Compilers as well as some of the charge Assistants of this Directorate were utilised as Enumerators in the Enumeration Blocks selected in and around Calcutta. In other districts, the District Magistrates/ Deputy Commissioners were requested to select some of the State Govt. employers at the Community Development Block level to work as Enumerator in the PEC. In few cases where State Govt. employees were not available, some non-officials were selected to work as Enumerator. This mixed lot of people did the first operation of listing and canvassing of the PEC forms Then the result were brought to the District/Subdivisional Headquarters for desk matching. A suitable number of Collectorate employees conducted the desk matching and as soon as the desk matching was over, the same set of Enumerators conducted the field reconciliation, but they had to cover the Enumeration Blocks where they did not listing work earlier. The Charge Assistants of this Directorate acted as Supervisors. They supervised the listing work, desk match and finally the field reconciliation. On completion of the entire operations, they had to collect all the relevant PEC records and submit them to this Directorate.

Calender for Field work of PEC

The following time-schedule for PEC Survey field work was followed in West Bengal—

(a) Listing and canvassing by the Enumerators from the 23rd March to 31st March, 1981.

(b) Desk matching from the 1st April to 4th April, 1981.

(c) Field reconciliation from the 5th April to 8th April, 1981.

The Results

The results of the PEC are significant in the sense that it showed to what extent we were wrong in Census enumeration. In order to throw some light on the results of the PEC., a brief discussion is quoted below from the paper 4 of 1982—Report on Post Enumeration Check published by the Registrar-General, India :

The PE Cresults have been presented separately for each of the five zones, i.e., the Southern, Eastern, Central, Western and Northern zones and also at national level. In the following paragraphs we shall be discussing on the result of coverage error only. The net omission rate at the zonal level was estimated with reasonable precision. The number of persons omitted, net of duplication and the number of persons enumerated have been estimated by unbiased method. The omission rate which is the ratio of the persons omitted (net) divided by the number of the persons enumerated, is a ratio of two estimated numbers. Therefore, the formula for ratio estimate assuming simple random sampling has been used to estimate the variance.

The constituent units of the Zones are as follows :

(1) Southern Zone—Andhra Pradesh, Karnataka, Kerala and Tamilnadu.

(2) Eastern Zone—Bihar, Orissa and West Bengal.

(3) Central Zone—Madhya Pradesh and Uttar Pradesh.

(4) Western Zone—Maharashtra and Gujarat.

(5) Northern Zone—Delhi, Haryana, Punjab and Rajasthan.

At the national level, the omission rate is 17.95 per 1,000 persons enumerated in the Census Count. In the case of males, the omission rate is 17.10 per 1,000 while in the case of female it is 18.85 per 1,000. The rates of net omission do not differ significantly for males and females both in the rural and urban areas, but the rural-urban difference in the omission rate is significant. The omission rate in the rural areas is 15.04 per 1,000 persons, while in the urban areas it is 27.63 per 1,000 persons. The omission rate of 17.95 per 1,000 persons at the national level has a percentage relative standard error (PRSE) of 4.69 per cent.

The omission of persons due to the missing of the entire household in the Census is very low being 1.47 per 1,000. It is extremely low in the rural areas being 0.64 1,000 as against 4.14 per 1,000 in the urban areas. The major component of the omission rate is the omission of persons in the households covered during the Census. It may, therefore, be said that the coverage of households in the Census was fairly total.

The statement below shows the omission rate for the nation and the zones;

STATEMENT—I

Net omission rate per 1,000 persons enumerated

India/Zones	Males	Females	Persons
1	2	3	4
India	17.10	18.85	17.95
Southern	15.55	14.71	15.14
Eastern	11.52	11.95	11.72
Central	22 66	28.64	25.50
Western	17.09	16.95	17.03
Northern	19.70	23.20	21.81

The above statement indicates that the omission rate in the Central Zone is the highest (25.50 per 1,000), followed by that in the Northern Zone (21.81 per 1,000). The omission rated in the Western zone is close to that of India (17.03 per 1,000). The omission rate in the Eastern zone is the lowest (11.72 per 1,000), while that in Southern zone is 15.14 per 1,000 persons. The statement also shows that the male-female difference in the omission rate is very significant both

in the Central and Northern Zones. In both the cases the omission rate among the females is very higher comparison to that among the males.

The comparison of the all-India omission rate with the omission rate obtained in relation to 1971 Census shows that the omission rate has remained fairly constant. At the national levl, the omission rate in the 1971 Census was 16.74 per 1,000 as against 17.95 per 1,000 persons in the 1981 Census. The comparison of omission rate of the 1971 Census with that of the 1981 Census for the Southern and Eastern Zones is possible as these zones of the 1981 Census are indent al to those adopted in the 1971 Census PEC. In both these zones the omission rate of the 1981 Census is the same as that obtained in relation to the 1971 Census.

The net omission rate in the age-group 0—4 is the highest (26.98 per 1,000) of those in the other age-groups and also that for all ages (17.95 per 1,000). In the age-group 5—9, 30—39, 40—49 and 50—59, the net omission rates are lower than the omission rate for all ages together at the national level. Besides the younger age-group 0—4, the omission rates in the age-groups 10—19, 20—29 and 60 +- are higher than that for all ages together.

The net omission rates by literacy do not differ significantly, being 17.75 per 1,000 in the case of the literates and 18.06 per 1,000 in the case of the illiterates at the national level. Except for the northern zone, in all other zones, the omission rates for illiterates appear to be numerically a little higher than that for literates. The literate-illiterate differentials in the net omission rates in the case of urban males in the eastern and western zones seem to be of some significance. The illiterates seem to have been omitted among the males more in these areas probably because these include the large metropolitan agglomeration of Calcutta and Bombay.

While we consider the omission rate by relationship to head of the household, it is observed that the omission rate in the case of members of the nuclear families is 11.53 per 1,000 against 39.86 per 1,000 in the case of members of the other families. For this purpose, a nuclear family is defined as consisting of the head of the household, his or her spouse and his or her sons and daughters. The difference in omission rates are high in al the zones, being particularly high in the southern zone.

Analysis of omission rates by marital status indicates that the widowed/divorced/separated tend to be omitted more. In their cases the omission rate is 23.64 per 1,000 as against 20.20 per 1,000 in the case of the never married and 14.65 per 1,000 in the case of the married.

The omission rates are higher in the case of females among the married and widowed/divorced/separated being 16.65 per 1,000 and 25.51 per 1,000 respectively as against 12.53 per 1,000 and 17.92 per 1,000 respectively in the case of males. In the case of the never married, the omission rates among females and males are very close being 19.85 per 1,000 and 20.51 per 1,000 respectively. In urban areas, the widowed/divorced/separated males and females are omitted relatively more everywhere. Of all the zones, in rural areas of the eastern, central and northern zones, the widowed/divorced/separated females tend to be omitted relatively more than married or single females. Among males, the widowed/divorced/separated have a higher omission rate only in the rural areas of the Northern Zone.

A-1 AREA HOUSES AND POPULATION

Table A-1 is the basic population table of 1981 Census which corresponds to the general population table A-1 of the 1971, 1961 and 1951 Census. The 1981 Census data in this table have been presented for the State/District/Police Station/Town/Outgrow-the (O.G.) separately and upto level of Police Station separately for rural and urban areas. Besides these, the data have also been presented for each Urban Agglomeration (U.A.). For Calcutta and Haora Municipal Corporation the figures have been presented upto the level of Corporation ward. In this table, the figures pertaining to area in sq. km. density of population per sq. km., number of inhabited and uninhabited villages separately, number of towns, number of occupied residential houses, number of households and population by sex according to the 1981 Census have been presented for each territorial unit.

The area figures for the State and Districts shown against "Total" in col. 3 are those computed and supplied by the Surveyor General. These figures of the Surveyor General, are not available below the level of district or by rural/urban break-up. The urban area figures for each district and Police Station have been computed on the basis of the figures supplied by the local bodies for the statutory towns and on the basis of the area figures of other non-statutory towns. The figures of all towns in a district/Police Station have been added up and put in col. 3 against "Urban". In arriving at the area figures of the "Rural" the area figures of "Urban" have been abstracted from the "Total" area figures of the district/Police Station.

It may be noted here that the area figures of Police Station are those supplied by the Directorate of Land Records & Surveys, Govt. of West Bengal. Hence the summation of area figures of Police Stations (Total & Rural) may not agree with that (Total & Rural) of the district. The derived district area figures (rural/urban) have been added up to arrive at the State areas figures rural/urban).

The density figures per sq. km. shown under col. 4 for urban area of the State/District/Police Station have been worked out using the area figures corrected upto second place of decimals obtained by adding up the area figures of individual towns in the State/District/Police Station and not using the area figures as given in the table against the corresponding units. For "Total" and "Rural" the density has been worked out using the area figures corrected upto first place of decimals.

Table A-1 Area, Houses and population has three Appendices and these are as follows:

Appendix-1 shows 1981 territorial units and changes during 1971--81. During the decade 1971—81, it will appear from the Appendix-1 that the State of West Bengal was not affected by any inter State transfer of territories. Inter district transfer of territories has affected only the districts of Murshidabad and Nadia due to transfer of 7 villages from the Karimpur Police Station of Nadia district to the Jalangi Police Station of aurshidabad District. During the last decade, there have been considerable inter police station changes within the district concerned and these have occurred mostly for creating new police stations by transferring villages from the existing police stations. The new police stations created during the last decade are Banarhat in Jalpaiguri district, Airport, Salt Lake, Lake Town, Nimta, Regent Park, Baguiati and Kasba in Twenty four Parganas district; Belda, Goaltor Durgachak and Haldia in Madinipur district; Santaldih in Puruliya District and coke oven and new Township in Bardhaman district.

Appendix-2 gives the number and population of villages with population of 5,000 and over and of towns with population under 5,000. It is evident from this Appendix that West Bengal had, according to the 1981 Census 784 such villages with their population of 5,691,402 as against 464 and 3,383,561 respectively revealed in the 1971 Census. The percentage of the population of such villages to total rural population of West Bengal came to 14.18 in 1981 as against 10.41 in 1971. It proves that the number of villages with population of 5,000 and more had considerably increased in 1981 over that in 1971. The total number of towns each with population under 5,000 in the State had also increased to 20 with their total population of 69,040 in 1981 from 9 with their total population of 36,422 in 1971. The percentage of the population of such towns to total urban population of the State had registered an increase in 1981 (0.48) over that in 1971 (0.33). The District/Police Stationwise break-up of such villages and towns with their other statistics can be had of the Appendix 2 given hereafter.

Appendix-3 gives the Houseless and Institutional population with sex break-up, Houseless households and Institutional households for the State/District/Police Station/Town/Urban agglomeration of the state of West Bengal separately for "Total" "Rural" and "Urban" areas. It appears from the Appendix that the Houseless poulation of the State of West Bengal have increased to 132,802 in 1981 from 94,433 in 1971 and the Institutional population have also increased to 372,995 in 1981 from 341,316 in 1971. In case of Housless population all the districts except Calcutta and Barddhaman have marked a considerably increase in 1981 over that in 1971. The

86-M/P(D)42DCOCal.--6

Houseless population of Calcutta and Barddhaman have gone down to 37,462 and 10,099 in 1981 from 48,802 and 13,552 in 1971 respectively. In case of Institutional population, all the districts except Murshidabad, Calcutta and Barddhaman have accounted for a sizeable increase in 1981 over that in 1971. The Institutional population of Murshidabad, Calcutta and Barddhaman have dwindled to 4,860; 149,573 and 20,857 in 1981 from 6,156; 206,541 and 23,687 in 1971 respectively.

AREA FIGURES

Considerable changes have taken place in the boundaries of State of West Bengal and of its districts from time to time, but as the State of West Bengal was created only in 1947, it is not possible to have a retrospective account of the changes in its area since 1901. Similar is the case with the districts affected by the partition of Bengal. The affected districts are Jalpaiguri, West Dinajpur, Maldah, Nadia, Twentyfour Parganas and Puruliya. Under the Bihar and West Bengal (Transfer of Territories) Act 1956, territories were transferred to West Bengal from two district of Bihar viz., the districts of Purnea and Manbhum.

The area figures in sqr. kilometer have ben shown in col. 3 of Table A-1 against total for State and districts. These area figures supplied by the Surveyor General are not available below the level of district or by rural-urban break-up. Hence the area figures for urban areas are those supplied by the local bodies and are based on the area figures of individual towns. Rural area figures have been derived by substracting the urban area figures from the total geographical area of each district. District rural area figures thus derived were added up to arrive at the State Rural area figures.

The following Statement-1 shows the geographical area figures of State and districts supplied by the Surveyor General and also shows the ranking of the districts of West Bengal according to area figures :

STATEMENT—I

Ranking of State/Districts in terms of Area

State/Districts	Area in Km. 2 given by Surveyor General	Proportion to Total area of State	Ranking of State/District
1	2	3	4
WEST BENGAL	**88,752.0**	**100.00**	..
1 Koch Bihar	3,387.0	3.82	12
2 Jalpaiguri	6,227.0	7.02	6
3 Darjiling	3,149.0	3.55	13
4 West Dinajpur	5,358.0	6.04	7
5 Maldah	3,733.0	4.21	11
6 Murshidabad	5,324.0	6.00	8
7 Nadia	3,927.0	4.42	10
8 Twenty Four Parganas	14,136.0	15.93	1
9 Calcutta	104.0	0.12	16
10 Haora	1,467.0	1.65	15
11 Hugli	3,149.0	3.55	14
12 Medinipur	14,081.0	15.86	2
13 Bankura	6,882.0	7.75	4
14 Puruliya	6,259.0	7.05	5
15 Barddhaman	7,024.0	7.91	3
16 Birbhum	4,545.0	5.12	9

The area figures of the State of West Bengal as shown in the Statement-I abovt are 88,75.0 KM^2 according to 1981 Census. According to area the district of Twentyfour Parganas ranks first with the area of 14,136.0 KM^2 and the district of Calcutta ranks last with the area of 104.0 KM^2. The District of Twentyfour Parganas accounts for 15.93% of the total area of the state, while Calcutta shares only 0.12%, Medinipur district is just below the district of Twentyfour Parganas having area of 14,081.0 KM^2 and accounting for 15.86% of the total area of the State. In other words, it may be said that according to area, Twentyfour Parganas is the biggest district and the second biggest district is Medinipur the figures of which are very close to one another.

URBAN AREAS

It has been the Indian Census tradition since 1951 to present Census data separately for rural and urban areas. Such dichotomy of rural and urban has considerable significance and is necessary from the view

point of assessing the differential in the social, economic, cultural and demographic characteristics of the population. Difficulties, however, arise on account of lack of uniform definition of urban areas. Neverthless, a fairly strict definition of urban areas had started to be adopted in India from the 1961 Census. For 1981 Census the definition adopted for urban area was by an large the same as that of 1961 and 1971.

In 1981 Census, besides the Municipal Corporation Municipalities, Notified Area Authorities, Town Committees and Cantonments, some selected places with (a) density of not less than 400 persons per km², (b) a population of 5,000 and more and (c) 75% of the male working population engaged in non-agricultural persuit and any other place(s) which according to the Director of Census Operations possess pronounced urban characteristics and amenities were treated as urban. Under the last category was noted above, certain project towns were declared in West Bengal in 1981.

It may be pointed out here that in 1961 and 1971 Censuses, non-agricultural pursuit mentioned in criterion (c) above included male workers engaged in livestock, forestry, logging, fishing, plantation, etc., but in 1981 Census these male workers have been treated at par with the agricultural workers and therefore, excluded from the non-agricultural workers for this purpose.

The following Statement-2 gives a brief historic survey of the changing definition of urban areas between 1891 and 1981 :

STATEMENT—2

Tests of eligibility for places to be treated as towns, 1891—1981

1981	1971	1961	1951	1941
1	2	3	4	5
1. Municipal Corporation	Municipal Corporation	Municipal Corporation	Municipal Corporation	Municipal Corporation
2. Municipal area	Municipal area	Municipal area	Municipal area	Municipal area
3. Town Committee	Town Committee	Town Committee	Town Area Committee	..
4. Notified Area Committee	Notified Area Committee	Notified Area Committee	Civil lines not included in municipal limits.	All civil lines not included in municipal limits.
5. Cantonment Board	Cantonment Board	Cantonment Board	Cantonment	Cantonment
6. Selected place with (*a*) density of not less than 400 persons per Km²; (*b*) a minimum population of 5,000; and (*c*) at least 75 percent of the male working population engaged in non-agricultural (and allied) activities.	Selected place with (*a*) density of not less than 400 persons per Km²; (*b*) a population of 5,000; (*c*) three-fourths of the working population should be outside agriculture; (*d*) or any other place which, according to Director, possesses pronounced urban characteristics and amenities.	Selected places with (*a*) density of not less than 1000 per sq. mile; (*b*) a population of 5,000; (*c*) three-fourths of the working population should be working outside agriculture; (*d*) or any other place, which according to the Superintendent of the state, possesses pronounced urban characteristics and amenities.	Test prescribed for distinguishing towns from villages in different states were based on ideas common to all states, but they were not indentical nor had they been applied with meticulous uniformity. In the case of princely states, the definition of town was applied a little indiscriminately.	Every continuous collection of houses in habited by not less than 5,000 persons which the provincial Superintendent may decide to treat as a town.

All civil lines not included in municipal limits.	All civil lines not included in municipal limits.	All civil lines not included in municipal limits.	All civil lines not inlcuded in municipal limits.	
Cantonment	Cantonment	Cantonment	Cantonment	Cantonment
Every other continuous collection of houses inhabited by not less than 5,000 persons, which the provincial Superintendent decide to treat as urban. In making this decision consideration was given to (*a*) the character of the population (*b*) relative density of the dwellings; (*c*) importance in trade, historic associattions and to avoid treating as towns overgrown villages without urban characteristics.	Every other continuous collection of houses inhabited by not less than 5,000 persons, which the provincial Superintendent may decide to treat as a town for census purposes. In Indian states where there were no municipalities, this definition was required to be extensively applied. Note : "In dealing with questions arising under head (6), the provincial Superintendents will have regard to the character of the population, the relative density of the dwellings, the importance of the place as a centre of trade and its historic associations and will bear in mind that it is undesirable to treat as towns overgrown villages, which have no urban characteristics."	Every other continuous collection of houses inhabited by not less than 5,000 persons, which the provincial Superintendent may decide to treat as a town for census purposes. Note : However, a few places, chiefly in the Native states which did not satisfy the requirements were treated as towns for special purposes. "The Provincial Superintendents were however, instructed, when considering the question the question of treating places as towns on the basis of their population to take care to, exclude such as are merely overgrown villages and have no urban features. It is true that the discreation thus allowed has occasionally led to a certain want of uniformity.	Every other continuous collection of houses permanently inhabited by not less than 5,000 persons, which the provincial Superintendent may decide to treat as a town for census purposes.	(*a*) Every place where the proportion of the trading and industrial population to the total is equal to or greater than that of the agricultural population; (b) every other continuous group of houses inhabited by not less than 5,000 people.

PROGRESS IN THE NUMBER OF TOWNS: The following Statement 3 inicates the extent of progress in the State of West Bengal and its districts in number of towns since 1901.

STATEMENT-3

Progress in the number of towns 1901-1981.

State/Districts	1981	1971	1961	1951	1941	1931	1921	1911	1901
1	2	3	4	5	6	7	8	9	10
WEST BENGAL	**291**	**223**	**184**	**120**	**105**	**94**	**89**	**81**	**78**
1. Koch Biar	7	7	6	6	6	4	4	4	4
2 Jalpaiguri	12	8	7	2	1	1	2	2	2
3 Darjiling	7	4	4	4	6	6	2	2	2
4 West Dinajpur	8	7	6	3	1	..	..	..	..
5 Maldah	4	2	2	2	2	2	2	2	2
6 Murshidabad	13	11	9	6	7	7	7	6	5
7 Nadia	16	13	12	7	6	6	6	6	6
8 Twenty Four Parganas	74	70	49	33	29	27	28	26	25
9 Calcutta	1	1	1	1	1	1	1	1	1
10 Haora	35	27	23	4	2	2	2	2	2
11 Hugli	26	17	16	12	11	11	11	9	9
12 Medinipur	19	16	14	11	9	9	8	8	7
13 Bankura	5	5	5	5	4	4	4	3	3
14 Puruliya	8	7	5	5	5	3	3	3	3
15 Barddhaman	49	22	19	14	10	9	6	6	6
16 Birbhum	7	6	6	5	5	2	3	1	1

The above Statement-3 indicates that there has been constant increase in the number of towns in the State of West Bengal since 1901 and the increase from 223 to 291 during the decade 1971—81 is remarkable. In 1981 Census 78 new towns have been declared and two towns namely Kharagpur Rly. Settlement Area and Bally Municipality which were merged with Kharagpur City and Haora Municipal Corporation respectively in 1971 have been shown as separate towns in 1981. So in 1981, 80 towns were added. Jadabpur Municipality which was created after 1971 including 9 existing towns of 1971, viz., Purba Putiary, Chakdaha, Bansdroni, Kamdahari, Bademasar, Rajapur, Santoshpur. Garfa and Kasba. Gaychpur Notified Area, Authority created after 1971 Census also included one existing town in 1871, viz., Kataganj, Gokulpur Government Colony. Beside these, two towns of 1971 namely Narayanpur and Haripal were declassified in 1981 Census. Thus in West Bengal 12(9 +1+2) towns existed in 1971 were reduced in 1981 either by losing their separate identity or being declassified. Finally in 1981 the total number of town comes to 291 (223 80—12). The highest contribution to total number of towns in 1981 is of the district of Twenty-four Parganas having 74 towns, followed by Barddhaman (49), Hoara (35), Hugli (26) and Medinipur (19). The highest increase in number of towns from 22 in 1971 to 49 in 1981 has been recorded by the district Barddhaman, while during the decade 1961—71, the district of Twenty-four Porganas had recorded the highest increase from 49 in 1961 to 70 in 1971. It is evident from the statement that the number of towns has increased in the industrially developed districts, i.e., Twenty-four Parganas, Haora, Hugli and Barddhaman.

It may be mentioned here, that beside the creation of 78 new towns in 1981 in West Bengal as many as 79 Urban Outgrowths were treated for the first time in 1981. Urban outgrowth is, as explained earlier, a unit geographically contiguous to a town and fulfilling the criteria of density and work-participation, but not fulfilling the population criterion.

PROGRESS IN URBAN POPULATION

The following statement-4 shows the progress in urban population for every census year since 1901 :

STATEMENT—4

Progress in Urban Population of State Districts 1901-1981.

State/Districts	1981	1971	1961	1951	1941	1931	1921	1911	1901

1 Koch Bihar	870	687	508	357	191	128	123	112	100
2 Jalpaiguri	3,025	1,634	1,203	643	270	184	144	114	100
3 Darjiling	1,319	842	676	442	272	203	134	115	100
4 West Dinajpur	3,865	2,498	1,424	603	100	..	..	..	..
5 Maldah	558	391	292	202	156	113	99	104	100
6 Murshidabad	456	327	258	178	159	121	116	110	100
7 Nadia	803	525	396	261	146	108	100	101	100
8 Twenty Four Parganas	1,136	952	640	390	261	183	155	137	100
9 Calcutta	354	337	313	289	232	125	113	109	100
10 Haora	760	575	468	296	244	145	124	114	100
11 Hugli	654	473	360	246	200	144	127	110	100
12 Medinipur	637	467	372	281	209	154	108	113	100
13 Bankura	340	285	229	178	173	126	114	107	100
14 Puruliya	633	503	351	298	233	152	131	117	100
15 Barddhaman	1,639	1,028	647	374	257	150	110	109	100
16 Birbhum	1,996	1,435	1,159	794	694	240	267	105	100

It is evident from the above statement-5 that the growth in urban population is very significant in the State and in several districts as well. The maximum index in 1981 is indicated by the district of West Dinajpur although its base year is 1941 and not 1901, having the index of 3,865 in 1981. This is followed by Jalpaiguri (3,025), Birbhum (1,336). Bardhaman (1,639), Twenty-four Parganas (1,336). and Darjiling (1,319) in 1981 compared to 100 in base year 1901 against the State index of 699 in 1981 compared to 100 in base year of 1901. Indices recorded in 1981 in comparison to 1901 by the districts of Maldah (558), Murshidabad (456), Calcutta (354), Hugli (654), Medinipur (637), Bankura (340) and Puruliya (633) are below the index of the State being 699. Phenomena of Calcutta district are quite different from other districts as Calcutta has only one town i.e. Calcutta Municipal Corporation and there is no possibility of increase in number of town in this district like other districts. Moreover the population of Calcutta Municipal Corporation has been increasing at a very lower rate from decade to decade.

The following statement-6 provides the information pertaining to the places not treated as towns in 1971 but treated as such in 1981 arranged by State and districts and by size class (class 1 with population 100,000 and above, Class II with population of 50,000—99,999; Class III with population of 20,000—49,999; Class IV with population of 10,000—19,999; Class V with population of 5,000—9,999 and Class VI with population below 5,000):

STATEMENT—6

No. and Population of places not treated as town in 1971 but treated as such in 1981 arranged by State and Districts.

12 Barddhaman	27	210,816	..	..	..	..	..	..	5	65,703	17	125,020	5	20,093
3 Birbhum	1	186	..	..	..	..	..	..	..	..	..	..	1	186

The above statement-6 indicates that as many as 78 new towns have been added up in 1981 Census with a population of 664,962 in the State of West Bengal. Of the 78 towns as many as 46 towns are falling in Class V followed by 17 in Class VI and 13 in Class IV. To the total 78 new towns of West Bengal, Barddhaman district has contributed as many as 27 followed by Twentyfour Parganas having 14, Hugli having 10 and Haora having 7 new towns. The contributions of Barddhaman district to the total new towns of the State in Class IV, in Class V and in Class VI are the greatest being 5, 17 and 5 respectively. Only one town is in Class II which is contributed by the district of Jalpaiguri. The name of this town is Dabgram (NM) which is influenced by Siliguri Town close to each other. Again only one town is in Class III which is contributed by the district of Twentyfour Parganas. The name of this town is Bidhannagar Township (NM).

RURAL AREAS

As already mentioned earlier that it is a Census tradition to present the census data by rural/urban break-up. Now it is question which are the rural areas. Places which are not classified as urban on the basis of the criteria mentioned earlier have to be treated as rural. The basic unit of the rural area is a revenue village having definite surveyed boundaries which are recognised by the district administration. The revenue village is the ultimate unit of area into which the country is divided for purpose of land revenue. This revenue village may contain some hamlets not having definite boundaries. The hamlets are not considered as separate unit for presentation of Census data which are presented only revenue villagewise. There may be some unsurveyed villages in the forest where the forest workers and their families may habitate. Such places, having no surveyed boundaries, have also been treated as village for the purpose of census. To ensure complete coverage in the census, even the uninhabited villages have been taken as separate rural units. There may be some villages the areas of which fully or partly have been merged with or included in their adjoining towns. In case of merging a part of village with a town, the remaining part lying outside the limits of the town, whether inhabited or uninhabited, has been treated as rural.

The following Statement-7 shows State and district-wise number of villages and towns in 1981 with the break-up of villages fully or partly included in town and also the number of uninhabited villages: —

STATEMENT—7

State and District-wise number of villages and towns in 1981

State/Districts	Total No. of Villages	No. of uninhabited villages	No. of villages included in town		No. of inhabited villages	No. of towns
			Fully	Partly		
1	2	3	4	5	6	7

14 Puruliya	2,689	237	10	24	2,452	8
15 Barddhaman	2,679	109	135	53	2,570	49
16 Birbhum	2,461	232	22	16	2,229	7

The above statement 7 shows that there are 41,107 total villages in West Bengal as per 1981 Census and out of these 38,024 are inhabited and 3,083 are uninhabited. The corresponding inhabited and uninhabited villages in 1971 were 38,074 and 3,318 respectively. There are 291 towns in 1981 in the State as against 223 in 1971. Total villages accounting for 11,796 in the district of Medinipur are numerically the highest, followed by Bankura having 3,825 villages and Twenty-four Parganas having 3,813 villages. The smallest number is 710 found in the district of Darjiling. The number of inhabited villages is the highest in the district of medinipur having 10,468 followed by Twenty-four Parganas (3,744) and Bankura (3,540). The lowest number of inhabited villages is again found in the district of Darjiling (659). As many as 960 villages fully an 401 villages partly are included in 291 towns in the State of West Bengal.

The following Statement-8 gives the total number of inhabited villages of the State and districts for the Census year 1901 to 1981.

STATEMENT—8

No. of Inhabited villages at each Census 1901-1981.

16 Birbhum	2,229	2,235	2,234	2,207	2,211	2,402	2,299	2,216	3,317

Note : State level figures for 1901-1941 have not been shown as adjusted figures for Puruliya district for these years are not available.

From the above statement-8 it is observed that there is fluctuation in the number of inhabited villages in the districts of West Bengal, mostly decrease and in few cases increase from one census year to another. This may be due to splitting up or amalgamation of villages during resettlement conducted by the State Government at intervals and inclusion of inhabited villages in urban areas and also declassification of a number of towns in each Census. During the decade 1971—81, the Director of Land Records and Surveys, Government of West Bengal conducted the resettlement due to which there has been a considerable changes in the number of inhabited villages of the districts of Darjeeling West Dinajpur and Medinipur during the last decade. In other districts the number of inhabited villages has decline in 1981 from 1971 because of mostly declined in 1981 from 1971 because of mostly inclusion of villages inurban areas. In the Statement-8 the State level figures for 1901—41 have not been given as adjusted figures for the district of Puruliya for these years are not available.

The Statement-9 gives the progress in rural population of the State and districts for the Census year 1901 to 1981

STATEMENT—9

Progress in rural population of State and Districts 1901—1981

State/Districts	Rural Population

9 Calcutta	..	..	..	..	..	..	..	..	..
10 Haora	1,628,068	1,403,753	1,213,385	1,089,053	1,060,615	843,647	778,893	742,102	674,258
11 Hugli	2,506,777	2,111,346	1,652,005	1,210,165	1,094,748	910,703	901,144	939,152	915,693
12 Medinipur	6,170,039	5,089,091	4,007,569	3,106,142	3,002,600	2,660,509	2,569,791	2,719,346	2,699,238
13 Bankura	2,193,568	1,879,304	1,542,356	1,224,641	1,197,664	1,044,479	959,052	1,081,464	1,063,136
14 Puruliya	1,687,039	1,470,508	1,267,538	1,090,627	1,026,943	932,040	797,106	853,684	751,462
15 Barddhaman	3,414,219	3,024,184	2,521,539	1,867,719	1,667,572	1,445,809	1,339,025	1,439,682	1,441,555
16 Birbhum	1,922,296	1,651,137	1,345,389	997,896	987,973	926,677	828,474	931,031	898,199

From the above Statement-9, it appears that at the State level the rural population have shown a constant trend of increase from one Census to another except for the Census year 1921 when the population declined from that in 1911. In West Bengal the rural population in 1981 have increased to 40,133,926 from 33,344,978 in 1971. The same trend is noticed in all the districts of West Bengal. Although during the decade 1911—1921 the rural population of the State had declined, the same trend was not observed in all the districts. The rural population of the districts of Jalpaiguri, Darjiling, Twenty-four Parganas and Haora had a sizeable increase during the decade 1911—1921.

CENSUS HOUSE AND HOUSEHOLD :

Columns 8 and 9 of Table A-1 gives the number of occupied residential houses and households respectively for the State, each district, each Police Station, each town and each urban Agglomeration. Occupied residential houses are those which are used wholly or partly for the purpose of residence by one or more households.

At the 1981 Census, the following definitions were adopted for Census house and households :

CENSUS HOUSE :

A census house is a building or part of a building having a separate entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

If a building has a number of flats or blocks which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate Census houses. If within a large enclosed compound, these are separate buildings owned by different persons, then each such building should be treated as a separate building, but if in any of these buildings there be flats or block in occupation of different house holds, each such flat or block should be treated as a separate Census house.

HOUSEHOLD :

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be household of persons related by blood or a household of unrelated persons or having a mix or both. Examples of households of unrelated members are boarding houses, messes, hostel, residential hotels, rescue homes, jails, *ashrams*, etc. These are called "Institutional households". There may be one member households, 3 member households or multi-member households, 2 mebers households or multi-member types is regarded as a "household".

Density per KM²

The density figures per sq. KM shown in col. 4 of the table A-1 have been worked out by dividing the total population by the area figures pertaining to a particular unit. In case of "Urban" areas of the State/District/Police Station, density has been worked out using the area figures corrected upto second place of decimals obtained by adding up the area figures of indivisual towns of the State/District/Police Station concerned and not using the area figures as given against "Urban" of the corresponding unit shown in the table: For "Total" and "Rural" the density has been worked out using the area figures corrected upto first place of decimals.

The following Statement-10 gives the umber of persons per 100 occupied residential census houses and per 100 households, number of females per 1,000 males and percentage of rural and urban population to total population of the State and Districts of 1981 Census :

STATEMENT—10

Persons per 100 occupied residential census houses and per 100 households No. of females per 1,000 males, percentage of rural and urban populations to total population in States and Districts

State/Districts	Persons per 100 occupied census houses			Persons per 100 households			No. of females per 1000 males			Percentage of rural and urban to total populations

15 Barddhaman	548	572	498	523	537	492	897	934	815	100.00	70.61	29.39
16 Birbhum	574	574	572	559	560	542	962	966	920	100.00	91.72	8.28

The above statement 10 reveals that less than six persons are occupying a census house in the State and in almost all the districts both in rural and urban areas. In the State, in case of rural areas 5.8 persons and in case of urban areas 5.4 persons are occupying a Census house in 1981 Census as compared to 5.9 and 5.6 persons respectively in 1971 Census. It shows that there is very little improvement in accommodation both in rural and urban areas in 1981 over 1971 all over the State. There are three districts, namely Nadia, Haora and Hugli where more than six persons are occupying a Census House in rural areas, while in urban areas also three districts, namely West Dinajpur, Maldah and Murshidabad where more than six persons are occupying a census house.

When we look at the statistics of household size, it is observed that there are 5.7 and 5.3 persons per household in 1981 Census in rural and urban areas respectively against the corresponding figures of 5.6 and 5.1 recorded in 1971 at the State level. It proves that the size of the household has slightly increased in 1981 over that in 1971. There are seven districts, i.e., Koch Bihar, Jalpaiguri, Darjiling, West Dinajpur, Puruliya, Barddhaman and Birbhum where the household size is below the State average in 1981 Census in rural areas. Similarly in urban areas there are five districts, namely Darjiling, Twenty-four Parganas, Haora, Hugli and Barddhaman where the household size is below the State average according to 1981 Census.

The statistics of sex ratio of both rural and urban West Bengal reveal a very interesting characteristics. In rural areas in 1901 the sex ratio, i.e., number of females per 1,000 males was 994 and since then the sex ratio had been declining gradually till 1951 when it was 939.

In 1961 the sex ratio came to 943, in 1971 it was 942 and in 1981 it rose to 947. On the other hand, the sex ratio in urban West Bengal too had been declining from 1901, when it was 652, till 1941 when the sex ratio was 559. From 1951 the sex ratio had been indicating an upward trend till 1981. The sex ratios as recorded in 1951, 1961, 1971 and in 1981 in urban areas were 660, 701, 751 and 819 respectively. The quantum of increase in sex ratio in urban areas from decade to decade during the period between 1951 and 1981 is much more than recorded in rural West Bengal.

During the last three decades the sex ratios have shown a steady upward trend in urban West Bengal. In other words, it may be said that the number of females per 1,000 males has increased in urban areas. The probable reasons may be—(1) female counter parts are joining their male Counter parts urban areas, (2) female migration to urban areas from rural areas to urban areas on matrimonial ground, (3) females are coming to urban areas on getting employment and (4) treating of new urban units having the rural characteristics in sex ratio.

The sex ratios in rural areas of all the districts except the districts of Maldah, Murshidabad, Nadia and Birbhum have increased in 1981 from those in 1971. On the other hand, in urban areas of all the districts, the sex ratios have gone up substantially. The highest sex ratio has been recorded by the districts of Bankura and Birbhum both having 966 in their rural areas followed by Puruliya (962) and Murshidabad (958). In urban areas of the districts of Jalpaiguri (885), Darjiling (830), Twenty-four Parganas (847), Calcutta (712), Haora (787), Hugli (833) and Barddhaman (815) the sex ratios are below 900. Of these seven districts, Jalpaiguri and Darjiling are having vast tea plantation areas which might have attracted more female tea-leaf pluckers and the remaining five districts are industrially developed areas where the sex ratios are found to be lower than those in the agricultural districts and districts of plantations. The highest sex ratio (968) in urban areas has been recorded by the district of Murshidabad, followed by Nadia (954) and Bankura (943).

A looy at the above Statement-10 which also presents the rural-urban proportion of population of the State and the districts will show a significant differentials in the proportions of urban population from district to district. The proportion of urban population to total population at the State level shows that the extent of urbanisation during the decade 1971—81 has indicated an upward trend. The proportion of urban population of West Bengal in 1971 was 24.75% and in 1981 it has come up to 26.47%. Beside the district of Calcutta which is entirely urban, five districts, namely Darjiling (27.55), Twenty-four Parganas (38.82), Haora (45.12), Hugli (29.53) and Barddhaman (29.39) have recorded the higher proportions of urban population in 1981 than that of 26.47% accounted for by the State of West Bengal. The proportion of urban population in the district of Darjiling which is in the northern extremity of the State and far away from the neighbourhood of Calcutta industrial zones is found to be pretty high. It is perhaps, because of the expansion of newly emerging town of Siliguri which is called the gate way of north-eastern India. The total urban population of Darjiling district as per 1981 Census is 2.82 lakh and Siliguri town alone has 1.54 lakh population, i.e. more than 50% of the total urban population of the district. It is obvious that the districts of Twenty-four Parganas, Haora and Hugli which are within the Calcutta Industrial Belt and the district of Barddhaman having Asansol-Durgapur Industrial Complex and vast area of mining should have higher proportions of urban population than those in other agricultural districts. Nadia district has 21.59% urban population as per 1981 Census which is nearer to the State average and it has gained the above noted proportion in 1981 from 18.74% in 1971. Except the districts of Koch Bihar, Maldah and Bankura which have gained very little in proportions of urban population in 1981 from those in 1971, all other districts have recorded a substantial gain in the proportion of urban population during the decade 1971—81. The highest proportion is recorded by the district of Haora (45.12) and the lowest one is recorded by the district of Maldah (4.78).

A-1—AREA, HOUSES AND POPULATION
GENERAL NOTE

This is the basic population table of the 1981 Census which furnishes the population by sex for territorial units at different levels, separately for rural and urban areas. Table A 1 of 1981 Census corresponds to Table A 1 of 1951, 1961 and 1971 Census. Besides population, this table also presents the area (in sq. kms.), density of population, number of inhabited and uninhabited villages, number of towns, number of occupied residential houses and number of households for each of the territorial units. The data, in this table, are presented upto the level of police station for rural areas and upto the level of town and out-growth of a town, if any. Further, the data have been presented each urban agglomeration. The area figures for State and District shown against "Total" in col. 3 are those computed by the Surveyor General. The area figures as supplied by the Surveyor General are not available below the district level or by rural/urban break-up. The area figures for the territorial units below the district level have been supplied by the Directorate of Land Records and Survey, Government of West Bengal or other local bodies.

Note : *The Urban area of Durgapur P.S. i.e. 154.2 Sqr. km. includes the Urban area to the extent of 61.0 Sqr. km. accounting for New Township and Coke Oven P.S.

(New Township 14.0 and Coke Oven 47.0)

** :—It may please be noted that there is actually no rural population in Coke-Oven Police Station, but in our paper I of 1982—Final Population Totals of West Bengal at pages 92-93, the rural population which actually relate to Kaksa Police Station has wrongly been shown.

Note:—1. Total area figures given in col. 3 against State and District represent the area figures provided by the Surveyor General, India. The area figures shown agianst Police Station have been Provided by he State Director of Land Records and Survey. The area figures shown against statutory towns have been obtained from the local bodies and those for the non-municipal Towns and OGs (out growths) have been Computed from the area figures of the constituent Mouzas (villages) of the non-municipal town and O.G. The area figures for Rural areas have been derived by subtracting the urban area figures from the total area figures of the State/District/Police Station. The summation of the area figures of the Police Stations under each district will not tally with the concerned district area figures because the former represents those supplied by the State Director of Land Records and Survey while the latter represents those supplied by the Surveyor Genreal, India.

2. The density figures per Sqr.Km. shown in col. 4 for urban Areas of the State/District/Police Station have been worked out using the area figures corrected upto 2nd place of decimals obtained by adding up the area figures of all the urban Units under State/District/Police Station and not using the area figures shown in col. 3 against "Urban" of the State/District Police Station. Density for "Total and Rural" areas of the State/District/Police Station have been worked out using the area figures as shown against them, *i.e.*, area figures corrected upto one place of dicimal.

3. Towns Treated for the first time in 1971 and also continuing as town in 1981 have been marked with asterisk (*) mark on their left.

4. Towns treated for the first time in 1981 have been *underlineds*

5. The following abbreviations have been used for the status of Towns

MC –Municipal Corporation.
M—Municipal Town.
NA—Notified Area Authority
NM - Non-municipal Town
Cantt.—Cantonment
T.C. Town Committtee
O.G Out growth of Town

A-2—DECADAL VARIATION IN POPULATION SINCE 1901

General Note

This table gives statistics on adjusted population for the nine censuses from 1901 to 1981 for the State of West Bengal and its sixteen districts conforming to the present jurisdiction. This table corresponds to Table A-II of 1971, 1961 and 1951 Censuses.

To ensure comparability, the figures furnished in this table for previous censuses have been adjusted, wherever necessary, to correspond to the territorial limits as on 1-3-81 of the State and districts. For districts which have not undergone any change in jurisdiction since 1971 Census, adjusted population figures of the Census years prior to 1981 Censuses, have been reproduced from the table-II of 1971 Census. The details of territorial transfers between 1971 and 1981 have already been provided in Appendix I to Table A-1. Between 1971 and 1981 only two districts i.e., Nadia and Murshidabad have been affected due to transfer of seven villages from Karimpur Police Station of Nadia district to Jalangi Police Station of Murshidabad district. Hence, for these two districts population have been adjusted for the back years from 1971.

Decade variation in population has been shown in col. 4 of this table in absolute figures and those in terms of percentages have been shown in col. 5. In cols. 3, 6 and 7 of this table the adjusted figures for the census years prior to 1981 of the districts of Nadia and Murshidabad have been given and for the unaffected districts by any territorial change have been reproduced from Table A-II of 1971 Census. This table, therefore, gives much needed comparable data about growth of population for the census years from 1901—81. This table has only one Appendix which contains "State and Districts at the 1981 Census showing 1971 area and population according to Territorial jurisdiction in 1971, change in population of 1971 adjusted to jurisdiction of 1981".

ADJUSTMENT OF POPULATION

The recasting of population of the affected districts and police stations by transfer of territories was done in this Directorate on the basis of the instructions issued by the office of the Registrar General, India. The adjustment or recasting of Population figures for 1951, 1961 and 1971 Censuses was very simple as the villagewies population figures were avialable for these Census Years. For these three Census Years, the population of the villages males and females separately —of the districts transferred were subtracted and added upto the district to which they were transferred. But these villagewise figures were not available for 1941 Census and earlier Censuses. For these Census years the following methods were adopted for recasting the population figures :

For 1941 (Males) : Males of the transferred villages for 1951 / Males of the district from where the villages have been transferred for 1941

Males of the district from where the villages have been transferred for 1951

The similar method has been adopted for the recasting of males for the year 1931 and back. The method adopted for male has also adopted for recasting the female population. For These Census years the population of the areas transferred has been estimated on the assumption that it bears to the population of the next bigger unit i.e., district from which the areas have been transferred and for which population figures for these Census years are available.

The following Statement-1 illustrates the method of estimation of previous censuses population for transferred territories.

STATEMENT-1

Illustrating the method of estimation of previous censuses —Population for transferred territories—Population

The above statement 2 shows that the population of West Bengal has registered a growth of 22.20% in 1981 from 1901. The population of West Bengal, in other words, rose to 54.58 million in 1981 from 16.94 million in 1901. The highest growth rate has been recorded during the decade 1951—61 i.e., 32.80% increase in population during the decade. This high growth rate was due to influx of displaced persons from East Pakistan (now Bangladesh) after partition. The negative growth rate to the extent of 2.91% was recorded during the decade 1911—21. This was, perhaps, due to the dreaded epidemic of influenza broke out in the country during the same decade. Since 1961 the growth rate has been declining till 1981. During the decade 1961—71 the growth rate was 26.87%, while during the decade 1971—81 it has come down to 23.17%. The population in rural West Bengal have shown more or less the same trend in the growth rate as indicated in all areas of West Bengal, while the growth rate of population in urban West Bengal has shown a positive trend with fluctuations from decade to decade. This trend also indicates the extent of urbanization in the State of West Bengal.

Looking at the population growth rate in different districts of West Bengal, it is evidenced that in all the districts except the districts of Darjiling, Nadia and Haora, the growth rate has gone down in the decade 1971—81 from those in the decade 1961—71. In the districts of Darjiling, Nadia and Haora the

86-M/P(D)42DCO Cal.—13(a)

growth rate of population in the decade 1971—81 have gone upto 31.02, 33.29 and 22.74 from 25.16, 29.91 and 18.58 respectively recorded in the decade 1961—71. The districts of Calcutta (4.96), Haora (22.74), Medinipur (22.39), Bankura (16.93), Puruliya (15.65) and Birbhum (18.01) have accounted for the growth rates which are below the State average (23.17) during the decade 1971—81. The highest growth rate (33.29) has been marked by the district of Nadia, during the decade 1971—81 and the lowest is recorded by Calcutta (4.96). The highest growth rate (85.16) in urban population during the decade 1971—81 has been recorded by the district of Jalpaiguri, followed by Barddhaman (59.33), Darjiling (56.57), West Dinajpur (54.72), Nadia (53.06 and Twenty Four Parganas (40.37).

The following Statement 3 shows the changes in sex-ratio (females per 1,000 males) for the State of West Bengal and its 16 districts during the last 80 years separately for total, rural and urban areas:—

Sex-ratio is an important demographic characteristic which helps in studying the birth rate, death rate and availability of man power etc. Sex ratio is expressed in Indian Census by number of females per 1,000 males. From the Statement 3 above, it appears that there has been a preponderance of males over females in the whole of West Bengal since 1901 with variations from decade to decade. Since 1901, the sex ratios both in rural and urban areas have been declining till 1941 in West Bengal. In rural area, the same has declined even in 1951 also, but in 1981 the sex ratio has come up to 947. In urban areas, since 1951 the sex ratios have gained from 660 in 1951 to 819 in 1981. In Statement 10 under Table A-I above detailed discussion on sex-ratio has been made. It is indicated that sex-ratio has never remained Static. The main factors affecting the differences in numbers of males and females have been attributed to different al birth, differential death or high female mortalities, or selective sex migration, etc.

*A-2 DECADAL VARIATION IN POPULATION SINCE 1981

GENERAL NOTE

This table A-2 gives statistics on adjusted population for nine censuses from 1901 to 1981 for the State of West Bengal and its sixteen districts conforming to the present jurisdiction. This table corresponds to table A-II of 1971, 1961 and 1951 censuses.

The important purpose of this table is to indicate the growth of population from decade to decade on the basis of the present administrative jurisdiction. The decadal variation has been computed both in absolute figures and in percentage figures. To ensure comparability, the figures furnished in this table for previous censuses have been adjusted, wherever necessary, to correspond to the territorial limits as on 1-3-81 of the State and districts. For districts which have not undergone any change in jurisdiction since 1971 Census, adjusted population figures of the census years prior to 1981 censuses have been reproduced from the table A-II of 1971 Census. Only two districts i.e. Nadia and Murshidabad have been affected due to transfer of seven villages from Karimpur police station of Nadia district to Jalangi police station of Murshidabad district.

TABLE A-2—DECADAL VARIATION IN POPULATION SINCE 1901

Note : The differences in area figures between 1971 and 1981 are due to revised computation as supplied by the Survey of India.

**7 (Seven) Villages (Mouzas) have been transferred from Karimpur police Station of Nadia district to Jalangi Police Station of Murshidabad district. The Particulars of the seven villages (Mouzas) with 1971 population within bracket are given below :

J.L. No. 102	Char Badra (Uninhabited)
J.L. No. 103	Muradpurdiar (913)
J.L. No. 104	Paraspu.diar (1,049)
J.L. No. 105	Godagaridiar (725)
J.L. No. 106	Udaynagar (Uninhabited)
J.L. No. 107	Char Sankarpur (Uninhabited)
J.L. No. 106/156	Undaynagar Khanda (3,672)

*A-3 VILLAGES CLASSIFIED BY POPULATION

Fly-Leaf

This table corresponds to Table AIII of 1971, 1961 and 1951 Censuses and gives the total number of inhabited villages with total rural population classified by seven broad population ranges viz. (1) less that 200—499, (3) 500—999 (4), 1,000—1,999 (5) 2,000—4,999 (6) 5,000—9,999 and (7) 10,000 and above. In each range of population the number of inhabited villages and their population with sex break-up have been shown for the State, districts and police Station.

This table shows that there are 38,024 inhabited villages in the 1981 Census with 4,033,926 rural population in the State of West Bengal as against 38,074 and 3,33,44,978 respectively in 1971 Census. As revealed from the Table, the district of Medinipur has contributed the largest number (10,468) of inhabited villages to the total number of those of the State as per 1981 Census, followed by Twenty Four Parganas (3,744), Bankura (3,540) and West Dinajpur (3,036).

The following statement 1 gives the percentage of population living in villages of various population sizes with reference to the total rural population of the unit concerned in 1981 Census for the State of West Bengal and its 15 districts:

STATEMENT-1

Percentage of population living in villages of various population sizes with reference to the total rural population in 1981.

State/District	Percentage of population living in village of population size.						
	Less than 200	200—499	500—999	1,000—1,999	2,000—4,999	5,000—9,999	10,000
1	2	3	4	5	6	7	8

It is evident from the above statement 1 that the maximum population (32.36%) of the State of West Bengal are found to be living in the villages with range of population of 2,000—4,999 in 1981 as against 29.19% in 1971 which was also the highest percentage in that year. In population ranges of less than 200, 200—499, 500—999, and 1,000 to 1,999 the percentages of population to total rural population in 1981 Census have gone down from those in 1971 Census in the State of West Bengal while those in population ranges of 2,000—4,999, 5,000—9,999 and 10,000+ have gone up. In all the districts except in the districts of West Dinajpur (16.69), Medinipur (21.31), Bankura (15.94), Puruliya (17.73) and Birbhum (21.73), percentages are high in the villages with population ranges of 2,000—4,999. The highest percentage in this range is recorded by the district of Haora (55.05) and the lowest is of Bankura (15.94). There are only four districts, namely Darjiling, West Dinajpur, Bankura and Puruliya where no village is found in the population range of 10,000+ . In this range it is also found that the district of Jalpaiguri has the highest percentage (15.67), followed by the Murshidabad (7.69) and Nadia (5.17). More than 50% of around 40 per cent population are found to be living in the villages with population range of less than 1,000 in the districts of Bankura, Puruliya, Medinipur, Birbhum and West Dinajpur.

The following statement 2 gives percentage of villages and population by class of villages in 1971 and 1981 for the State and district:

STATEMENT-2

Percentage of villages and population by class of villages in 1971 and 1981

From the above statement-2, it appears that the percentage of number of villages in size class of less than 500 in the State of West Bengal is the highest (41.88) in 1981 Census in comparison to 48.75 in 1971 which was also the highest in 1971. It has gradually declined in the next higher classes both in 1981 and 1971 Censuses. In the size class of less than 500, the percentages of villages have gone down in 1981 from those in 1971 in the State and in all the districts. The highest decline (from 63.88 in 1971 to 49.47 in 1981) is recorded by the district of West Dinajpur.

In 1981 Census the highest percentage of villages in the size class of less than 500 is recorded by the district of Medinipur (63.69 as against 70.11 in 1971) and the lowest is recorded by the district of Jalpaiguri (8.56 as aginst 9.14 in 1971). In 1981 Census in the size class of 500—999 the percentage at the State level is 24.71 and below this State average come those of the districts of Koch Bihar (21.42), Jalpaiguri (10.33), Maldah (22.97), Murshidabad (23.51), Nadia (21.67), Twenty Four Parganas (23.88), Haora (16.03), and Medinipur (20.48). Regarding the percentage of population this has been dealt with while discussing on the data of the Statement 1 above.

*A-3 VILLAGES CLASSIFIED BY POPULATION SIZE

GENERAL NOTE

This table A-3 corresponds to table A-III of 1971, 1961 and 1951 Censuses and gives the distribution of inhabited villages with reference to the seven broad population sizes such as (1) less than 200, (2) 200—499, (3) 500—999, (4) 1,000—1,999, (5) 2,000—4,999, (6) 5,000—9,999 and (7) 10,000 and above. The figures in this table have been presented for the State, District and Police Station by sex and by population range of villages.

This table shows that there are 38,024 inhabited villages in the 1971 Census with 40,133,926 rural population in the State of West Bengal as against 38,074 and 33,344,926 respectively.

TABLE A-3—VILLAGES CLASSIFIED

A-4—TOWN AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1981 WITH VARIATIONS SINCE 1901

Fly-Leaf

This table corresponds to table A-IV of 1951, 1961 and 1971 Censuses and gives the variation in urban population separated by males and females, decade variation and percentage decade variation for each town and urban agglomeration during the last eighty years. In col. 3 of the table the name of the district to which the town belongs has been entered. In column 5, the status of each town has been shown in abbreviations which have been explained at the end of the table, while in col. 6, the area figures of each town and urban agglomeration has been, recorded in Km^2. In the cases of the towns which have been continuing from a Census Year prior to 1961 and those created as towns for the first time in 1961, the area figures have been shown for the Census years 1961, 1971 and 1981. Decade variations in absolute figures and those in percentage have been shown in cols. 8 and 9 respectively.

The urban agglomerations and towns have been arranged according to their size class of populations and in each size class the urban agglomerations and towns have been arranged in the order of population size. Again in each urban agglomeration, the towns have been arranged in the discending order of population size. As in 1971, all towns and urban agglomerations have been grouped into the following six classes according to population size:

Class I—Population of 1,00,000 and above.
Class II—Population of 50,000 to 99,999.
Class III—Population of 20,000 to 49,999.
Class IV—Population of 10,000 to 19,999.
Class V—Population of 5,000 to 9,999.
Class VI—Population of less than 5,000.

The total urban population of the State of West Bengal for each Census year from 1901 to 1981 has been shown at the beginning of this table followed by classwise to totals of the similar figures and those of each urban agglomeration and town in the respective size class.

The classification of towns shown in the table is based on their 1981 Census population. Many towns have changed their class since 1901, so the class totals shown in this table for previous Census years are not the totals of respective population of all towns shown in that class in 1981. They are actually the totals of population of all towns which on the basis of population were included in that class in those Census years except the towns which are the constituents of urban agglomerations.

The table indicates the growth of urban population alone and as such the figures for previous census year to the census year in which a town has been created for the first time have not been shown in this table as the population of the town for the previous year rural population. Again, if any place was treated as a town in any Census year and declassified as rural in subsequent census year(s) and again classified as town, then in such cases the population particulars have been given only for those Census year(s) in which it was a town. In some cases a town might have been merged with any other town, then the population of the town so merged has been shown as included in those of the town with which it was merged for the back Census years. In every such case a suitable foot note has been appended at the relevant page of the table. In some cases also the population of a town in back Census years has had to be adjusted with reference to 1981. A suitable foot note has also been given in the table in this respect.

The definitions of town and urban agglomeration have already been discussed earlier in great details. The concept of town group as adopted in 1961 Census had been replaced by the concept of urban agglomeration in 1971 Census with a stricter and more uniform definition. In short it may be defined that an urban agglomeraton was formed by taking into account a continuous urban spread constituting a town and its adjoining urban outgrowths, or two or more physically contiguous towns together with continuous well recognised urban outgrowth(s), if any, of such town(s).

In striking class totals, an urban agglomeration has been created as a unit not only for 1981, but also for previous Census years. In doing so, a constituent of an urban agglomeration has been reckoned not according to its class in a particular Census year, but according to the class of urban agglomerations as a whole in that Census year. In case of merger of towns, the merged units are treated as absorbed in the unit in which it/they merged. So the unit and not the merged town, has been presented according to its class in each Census year prior to that Census year in which the merger took place.

An alphabetical list of all towns and urban agglomerations of West Bengal as per 1981 Census showing the name of town, name of district to which it belongs, class of town and page no. of the table where it is inserted is given at the end of the Fly Leaf.

The Table A-4 has been supplemented by the following four appendices, one sub-appendix and explanatory notes of appendix:

Appendix-1 presents the area and population of the new towns added in 1981 and of the towns declassified in 1981. The population for new towns and the

towns declassified have been shown for the Census years 1981 and 1971. In the case of new towns the population shown for 1971 is the rural population and in the case of declassified town the population shown for 1981 is the rural population. The abbreviation "NA" mentioned in coulmn 5 of the appendix indicates that the population of 1971 is not available. This relates to only to the project towns and Bidhannagar township which are constituted by parts of some villages the population of which could not be ascertained. This appendix shows that as many as 78 new towns had been added in 1981, while only one town, *i.e.*, Horipal in the district of Hugli had been declassified.

Explanatory Notes of Appendix-1, furnishes the particulars of the constituents of new towns of 1981 Census.

These particulars relate to the name of village constituting the new town, area in Km^2 and population of 1971 Census. If a village has wholly formed the town, the word "while" has been noted against the village within brackets and in case of part of the village has been included in the new town, the word "part" has been noted.

Sub-appendix to Appendix-1 contains the particulars of the villages which have been treated as urban outgrowth in 1981. The definition of urban outgrowth has been discussed in great details earlier. This sub-appendix shows that as many as 79 urban outgrowths had been created in 1981. Alongwith the name of district, the names of Police Stations in which the outgrowth(s) are located have been mentioned in col. 1 of the sub-appendix.

Appendix-2 gives the particulars of places classified as new towns in 1981 with a population under 5,000 as per 1981 Census. It appears from the appendix that there are 17 towns out of 78 new towns of 1981 having population below 5,000 as per 1981. Three towns each of which has population below 1,000 as per 1981 Census are the project towns.

Appenix-3 furnishes the places with population below 5,000 in 1971 which were towns in 1971 but have been declassified in 1981.

Appendix-4 shows the changes between 1971 and 1981 in area and population of towns and reasons for change in area. There are in all, 43 towns in West Bengal the areas of which had undergone changes during the decade 1971-81. Out of these 43 towns for 20 towns the reasons for area changes are computational error, while the reasons of area changes for the remaining 22 towns are due to inclusion of additional areas and Bally(M) which was included Haora (MC) in 1971 has been shown as independent town in 1981.

The following Statement-1 shows the growth in number of cities and towns and their population in the State of West Bengal and in it's sixteen districts during 1901-81 arranged classwise :—

STATEMENT-1

Growth in the number of cities and towns and their population in West Bengal State and Districts 1901-1981

Note : The constituents of an Urban agglomeration where the constituents were reckoned as separate towns in their own right have been classified according to their own population and not according to the population of Urban agglomeration. Where, however, U.A.S. were formed with outgrowth, the population of the outgrowth(s) was added to the town whose outgrowth it was. The combined population of town and outgrowth(s) was taken for determination of the class in the above Statement.

The above statement-1 indicates that there are 291 cities and towns in West Bengal as per 1981 Census against 223 as per 1971 Census. Thus, there has been a net increase of 68 towns during the decade 1971-81 in West Bengal. Similarly the urban population has also gone up from 10,967,033 in 1971 to 14,446,721 in 1981. The growth of urban population during the decade has been to the extent of 31.73 per cent. The highest increase is noticed in Class IV towns where 32 towns have been increased during the decade 1971-81 followed by class VI(11), Class II(9), class I(9), Class V(4) and Class III(3). It is significant that the number of cities, *i.e.*, class I towns has increased from 15 in 1971 to 24 in 1981. Accirding to Indian Census convention, any town with a population of 100,000 and more is called a city. Till 1931, the number of cities remained 2 from 1901, but from 1941 the number of cities in West Bengal started increasing steadily. According to 1971 and 1981 Censuses, the number of towns in Class IV is the highest, *i.e.*, in 1971 it was 60 and in 1981 it is 92 This is due to creation of new towns. The increase in the number of towns in Class I and Class II since 1901 is steady, but it marks the fluctuation, of course very little, in other classes. Of the total 291 towns in 1981, the contribution of the district of Twenty Four Parganas is the highest (74), followed by Barddhaman (49), Haora (35) and Hugli (26)—all of which are industrially developed areas. Of the 24 cities in West Bengal as per 1981 Census, the share of Twenty Four Parganas is to the extent of 11 *i.e.*, nearly half of the total cities.

The following Statement-2 gives the percentage of towns in percentage of population in each class to towns and percentage of population in each class to total urban population from 1901 to 1981 for the state of West Bengal and its sixteen districts :

The above Statement 2 shows that the proportion of number of towns is the highest in 1981 Census in Class IV (31.62), while that of population is in the Class I (55.63). Similar is the case with 1971 Census with 26.91 per cent in number of towns and 54.91 per cent of population. In all other Census years the percentages of population in Class I are the highest, but the highest percentage of number of towns varies from one class to another in others Census Years. It appears from the statement that the percentage of population in Class I is more than 50% in the Census years 1941—1981. The lowest percentage of population in all the Census Years is noticed in Class VI. In the district of Twenty Four Parganas the percentage of population in Class I has been increasing steadily since 1941 prior to which there was no Class I town in that district. In 1941 the percentage was only 13.42 and it has gone upto 54.67 in 1981.

The following Statement-3 gives the percentage of area of towns in each class to total urban area of the State of West Bengal and density of population per Km.^{2} in each Class :

STATEMENT-3

Percentage of area of town in each class to total urban area of State of West Bengal and density of population per Km^2 in each class

Class	1981		1971	
	Percentage of area to total urban area	Density per Km^2	Percentage of area to total urban area	Density per Km^2
1	2	3	4	5
WEST BENGAL				
I	53.67	7,839	46.51	9,004
II	15.37	3,819	12.33	4,736
III	17.37	2,342	20.40	2,481
IV	8.85	2,202	12.89	1,798
V	4.03	1,415	7.63	1,296
VI	0.71	1,212	0.24	1,678

The above Statement-3 reveals that both in 1971 and 1981 Census Class I town account for the largest share of total urban area of West Bengal, having 53.67% in 1981 and 46.51% in 1971. Next come the Class III towns having the share of 17.37% in 1981 and 20.40% in 1971. The percentages of area figures in 1981 have increased to 53.67 in 1981 from 46.51 in 1971 for Class I towns to 15.37 in 1981 from 12.33 in 1971 for Class II, and to 0.71 in 1981 from 0.24 in 1971 for Class VI. For all other classes the percentages of area figures have gone down in 1981 from those in 1971.

It is also evident from the above Statement-3 that the density has decreased in 1981 compared to that in 1971 in all classes except the classes IV & V. Another phenomenon that density increases from lower class to upper classes both in 1971 and 1981 is noticed from the Statement, but in 1971 the density in Class V is less than that in Class VI. This is the only variation between the characteristics of density of 1971 and 1981.

The following Statement-4 gives the number and population of cities and towns of 1971 and 1981 Censuses arranged in six classes, i.e. Class I to Class VI for the State of West Bengal.

STATEMENT-4

Number and population of cities ond towns of 1971 and 1981 Censuses arranged in Six Class I to VI.

State	Class of Town	1981		1971		Increase and decrease in No. of Town	Increase and decrease in population of Class	Percentage increase or decrease 1971—1981
		No. of Town	Total Populations	No. of Town	Total Populations			
1	2	3	4	5	6	7	8	9

	(*a*) Cities with one million and above population	1	3,305,006	1	3,148,746	..	+156,260	+4.96

STATEMENT-4—*contd.*

1	2	3	4	5	6	7	8	9
	(*b*) Cities with 500,000 to 999,999 Population	1	744,429	1	737,877	..	+6,552	+0.89
	(*c*) Cities with 100,000 to 499,999 Population	22	3,987,874	13	2,135,342	+9	+1,852,532	+86.76
	Class-II	40	2,905,113	31	2,125,395	-9	+779,718	+36.69
	Class-III	52	1,631,120	49	1,517,674	+3	+113,446	+7.47
	Class-IV	92	1,314,159	60	824,642	-32	+489,517	-59.36
	Class-V	63	489,567	59	440,935	4	+48,632	+11.03
	Class-VI	20	69,453	9	36,422	+11	+33,031	+90.69

In the above Statement-4 the statistics of Class I cities have been sub-divided into 3 categories, viz., (a) cities with one million and above population, (b) cities with 500,000 to 999,999 population and c ties with 1000,000 to 499,999 popula'ion. This statement will indicate how the towns have moved from one class to the next higher classes during the decade 1971—81. To Class I cities alone in the population range of 100,000 to 499,999 nine towns have moved from lower class and the percentage of increase in this class during the decade 1971—81 is the second highest (86.76), and the highest is recorded in Class VI (90.69). The number of towns in Class IV has increased to 32 during the decade accounting for 59.36% growth. Increase in number of towns in this class is the highest during the decade mostly because of new towns in 1981.

The following Statement-5 furnishes the movement of cities and towns from one class to another during 1971—81 for the State of West Bengal and its district :

STATEMENT-5

Note :—@Does not include the population of towns given in Annexure 'A' Statement.

The above Statement 5 indicates the mobility of towns *i.e.* moving up or moving down from one class to another during the decade 1971—81.

The figures against (a) indicate number and population of towns which a particular class of 1981 has received by process of decrement from the higher class range(s) of 1971, those against (b) indicate number and population of towns which a particular class of 1981 has received by process of increment from the next lower or any other lower range of 1971 and those against (c) indicate number and population of towns which a particular class of 1971 has passed down by a process of decrement to the next lower or any other lower range of 1981.

It is evident from the above Statement 5 that at the State level as may as 31 towns have moved from Class V to IV during the decade 1971—81, followed by 17 from Class IV to Class III, 14 from Class III to Class II and 8 from Class II to Class I. Another town namely Jadabpur Municipality which was newly created after 1971 has got population of Class I cities in 1981, but this has not been shown here as Jadabpur (NM) of 1971 with population of only 12,685 in 1971 has got the population of 251,968 as Jadabpur Municipality in 1981 engulfing 9 more non-municipal towns of 1971. Only two towns have moved from Class VI to V. It is also interesting to notice that one town each from Class V and Class VI have gone to the higher Class III during the decade of 1971—81. Only two towns of Class III in 1971 have gone down to Class IV in 1981 The Statement also shows the similar mobility of towns for each district.

The following Statement-6 gives the percentage variation of population during the decade 1971-81 of places which were not treated as towns in 1971 but treated as such in 1981 classified by State and district and by size Class :

STATEMENT—6

Note :—Those towns for which 1971 comparable population is not available have not been taken into account both for 1971 and 1981 Censuses.

86-M/P(D)42DCOCalcutta—16

ANNEXURE-A
OF
STATEMENT-6

Statement showing places which were not treated as towns in 1971 but treated as such in 1981 for which comparable 1971 population is not available.

State	Class	Name of Towns	1981 Population
1	2	3	4
WEST BENGAL	III	Bidhannagar Township	33,175
	V	Saontaldih Thermal Power Project Town	5,305
	VI	Jaldhaka Hydel Power Project Town	3,533
	VI	Kolagat Thermal Power Project Town	1,303
	VI	Bandel Thermal Power Project Town	678
	VI	Bakreswar Tourist Centre Township	186

The above Statement-6 contains the statistics of 72 towns out of 78 new towns of 1981. Six towns—5 falling in Class VI and one falling in Class III—have not been taken into account in this Statement as they do not have comparable 1971 population data. As many as 45 new towns which fall in Class V have been created in 1981 at the State level out of which the share of Barddhaman district is 17, followed by Hugli (8), Twenty Four Parganas (8) and Haora (5). In this class the percentage growth of population during the decade is 29.13 as against 26.05 in Class IV in which again—as many as 13 new towns are there in 1981. Except in Class VI where the negative growth of population has been accounted by 15.27 per cent, in all other classes there has been a substantial positive growth.

The following Statement-7 gives the percentage variation of population during the decade 1971—81 of places treated as towns in 1971, but removed from the list of towns in 1981 classified by State and District and by size Class :

STATEMENT-7

Percentage variation of Population 1971-1981 of places treated as towns in 1971 but removed from the list of town in 1981 classified by State/District and size class.

Class	Number of Town	Population in 1971	Population in 1981	Percentage variation in 1981 population over 1971 *i.e.* 1981-1971 × 100 / 1971
1	2	3	4	5
WEST BENGAL				
I	..	..	..	..
II	..	..	..	..
III	..	..	..	..
IV	..	..	..	..
V	1	8,445	10,089	+19.47
VI	..	..	..	..
HUGLI				
I	..	..	..	..
II	..	..	..	..
III	..	..	..	..
IV	..	..	..	..
V	1	8,445	10,089	+19.47
VI	..	..	..	..

The above Statement 7 shows that only one town in West Bengal has been declassified in 1981. Haripal is the only town in the district of Hugli which has been declassified.

The following Statement 8 gives the number of town of each class during period 1901—81 for the State of West Bengal and its districts:—

While preparing the above Statement 8, an urban agglomeration has been classified according to its populaton size. In other words, the urban agglomeration of 1981 has been treated as a single unit in the previous decades also and classified according to the derived population of urban agglomeration in that Census Year.

The main utility of the statement is that it gives, at a glance, the comparative picture of number of towns including urban agglomerations of 1981 during the last 80 years which is not available in the main Table, A-4.

The Statement shows that, at the State level, the number of towns of all classes together maintains a steady increase from 1901 to 1981. In 1901 it was only 49 and it has gone up to 130 in 1981. The increase during the decade 1971—81 is the largest having 112 in 1971 and 130 in 1981. If we look at the classwise number of towns for each Census Year since 1901 to 1981 at the State level, it is noticed that no where the number of towns has decreased, on the other hand it either remained static in some Census Years or it increased in Classes I to III. In Class IV the number shows a steady increase since 1931, but in Classes V and VI the number shows a capricious trend. The districtwise statistics need not be discussed in details as they are self-explanatory.

ALPHABETICAL LIST OF TOWNS, 1981

Sl. No.	Name of Town	District	Class of Town
1	2	3	4
1	Adra (NM)	Puruliya	III
2	Aistala (NM)	Nadia	IV

A-4—TOWN AND URBAN AGGLOMERATION CLASSIFIED BY POPULATION IN 1981 WITH VARIATION SINCE 1901

GENERAL NOTE

This table gives all the towns including Urban agglomerations and their population by sex since 1901 and its decadal variation both in absolute figures and in percentage figures. The cities/towns/urban agglomerations have been arranged in discending order of their 1981 population and shown under the six population size classes, *i.e.*, I—Population of 1,00,000 and above; II—Population of 50,000 to 99,999; III—Population of 20,000 to 49,999; IV—Population of 10,000 to 19,999; V—Population of 5,000 to 9,999 and VI—Population less than 5,000. Under urban agglomeration, data have also been presented for each of its constituent units. The importance of this table is to indicate the trend of population growth of each unit since 1901.

In Col. 3 of the table the name of the district to which the urban unit belongs has been noted. In Col. 5, the status of each urban unit has been shown in abreviations which have been explained at the end of the table. In Col. 6, the area figures in Sqr. Km. have been shown for each town since 1961.

TABLE A-4—TOWNS AND URBAN AGGLOMERATIONS CLASSIFIED BY POPULATION IN 1981 WITH VARIATIONS SINCE 1901

(Class of Towns and number of Towns/Urban Agglomerations in that class)

Class I—100,000 and above
Class II—50,000—99,999
Class III—20,000—49,999
Class IV—10,000—19,999
Class V—5,000 –9,999
Class VI—Less than 5,000

Note :—†Does not include males and females of Chandannagar as they are not available separately.

++Includes the population of persons 12,019 (Males 6,297 and females 5,722) of Kanchrapara Rural Development Colony which gave place to Kalyani and Gayespur Govt. Colony towns. Separate figures of Kalyani and Gayespur Govt. Colony's portions are not available and as such these figures have not been included in any class of town, but the "ALL CLASSES included the said figure.

*Includes the Population of persons 581 (Males 501 and Females 80) in 1901, Persons 296 (Males 258 and Females 38) in 1911 and Persons 293 (Males 200 and Females 93) in 1921 of Buxa Cantonment in the district of Jalpaiguri which was treated as town in 1901, 1911 and 1921 and was declassified as rural since 1931.

**Includes the population of Persons 23,259 (Males 15,030 and Females 8,229), Persons 26,868 (Males 17,528 and Females 9,340) and Persons 37,432 (Males 24,837 and Females 12,595) respectively for the years 1921, 1931 and 1941 of the town Rishra-Konnagar". Separate figures for Rishra and Konnagar towns are not available for the said years.,

‡‡1951 Population figures have not been shown against Kalyani town though this place was the part of Kanchrapara Rural Development Colony. Separate figures for Kalyani is not available. For the same reasons figures for Calcutta Urban Agglomeration as also for class I total does not include the figures of Kanchrapara Rural Development Colony though Kalyani is on of its constituents.

††Cossipur—Chitpur was a separate town in 1901, 1911 and 1921 with a population of persons 40,750 (Males 26,189 and Females 14,561), Persons 48,178 (Males 30,793 and Females 17,385) and Persons 56,474 (Males 36,289 and Female 20,185) in the respective Census years. In 1931 this town was merged in Calcutta. The 1901, 1911 and 1921 Population figure of Calcutta shown in this table include Maniktala was a separcte town in 1901, 1911 and 1921 with the Population of Person 32,387 (Males 19,142 and Females 13,245), Persons 53,767 (Males 31,735 and Females 22,032) and Persons 67,372 (Male 40,996 and Females 26,376) in the respective Census years. In 1931 this town was merged in Calcutta. The 1901, 1911 and 1921 population figures of Calcutta shown in this table include the figures for Maniktala.

Tollygurge was a separate town in 1901, 1911, 1921, 1931, 1941 and 1951 with the population of persons 12,821 (Males 7,222 and Females 5,599), Person 18,433 (Males, 19,183 and Females 7,250), Persons 21,637 (Males 13,326 and Females 8,311) Persons 24,476) Males 14,800 and Females 9,676) Persons 58,594 Males, 36,458 and Females 22,096) and Persons 149,817) (Males 84, 178 and Females 65,139) in the respective Census Years. In 1961 this town was merged in Calcutta. The 1901, 1951 Population figures of Calcutta shown in this table include the figures for Tollygunge.

(*a*) Includes the area and Population of Calcutta (M.C.) and other four separate charges.

(*b*) Denotes the area figures as supplied by the Surveyor General for Calcutta. It is known as Calcutta City and includes the Population of Calcutta (MC) and four Special Charges 101,103,104, and 105 which are outside Calcutta. (M.C.).

(NM) " Non-municipal Town.

A-5—STANDARD URBAN AREAS

GENERAL NOTE

(1) **History and definition of the Standard Urban Area (SUA), concept including criteria for delineation of the SUAs.**

The Census organisation has been endeavouring to process and present census data on certain well defined areas, delineated on the basis of a number of physical and demographic characterstics, in response to evergrowing demand of planners, administrators, scholars and others. The introduction of the concept of town group in 1961 was one such attempt in this direction to provide suitable data on the trend of urbanisation. The town group was formed comprising independent urban units not necessarily contiguous to one another. The concept of the town group had some limitations as it was realised that the data of this unit became incomparable from one Census to another owing to the changes in areas of the towns, and intermediate areas being left out of reckoning. For preparing the master plan for cities and towns, the town planners were finding it difficult to assemble census data for the urbanisable areas around the urban centres. In any case the data of the town group were not deemed to be much useful for preparing master plans for cities and towns or for perspective planning for urban areas. The International Geographical Conference held in New Delhi in 1969 emphasized on the desirability of evolving a suitable concept which would ensure comparability over space and time and help in urban planning.

This is how the idea of SUA was mooted and this was further developed and refined through discussion in a series of meetings participated by the representatives of the Ministry of Works and Housing, Town and Country Planning Organisation and the Office of the Registrar General, India. Thus, in the 1971 Census, the concept of town group was replaced by two other concepts, viz., the concept of urban agglomeration (UA) and the concept of SUA.

The U.A. represents a contiguous urban spread constituting a town and its adjoining urban outgrowths or two or more physically contiguous towns together with contiguous well recognised urban outgrowths, which may actually fall within the revenue limits of a village or villages. These urbanised villages or outgrowths deserve to be reckoned along with the town in conformity with the continguous urban spread. In other words, it may be said that the U.A. represents a spatial urban spread at a given time. The S.U.A.. on the other hand, is the projected growth area of a city or town as it would be in 1991. This take into account not only the towns and villages which are expected to get merged with it, but also intervening rural areas which are potentially urban. This covers all extra municipal growths such as suburbs (industrial and residential), railway colonies, civil lines, cantonments and villages which are likely to be urbanised by 1991. The difference between the U.A. and S.U.A. is that the former represents the actual urban spread at a given point of time, while the latter represents a larger areal unit which includes not only the urban units, but also all the surrounding and intervening rural areas which are expected to be urbanised by 1991 and thus it stands as a constant statistical reporting unit for three Censuses, viz., 1971, 1981 and 1991—irrespective of the change in the local administrative boundaries of Units within the limits of SUA. The suitability of the concept of SUA basically lies in the fact that when the limits of existing towns change, the S.U.A. area as such is not expected to undergo any change. Consequently, the data generated by the Census for S.U.A.s become more meaningful as it is comparable with different decades.

The characteristic feature of the SUA is that it (i) should have a core town of a minimum population of 50,000 (ii) contiguous areas made up of other urban as well as rural administrative units should have close mutual socio-economic linkages the core town and (iii) the probability is that the entire area will get urbanised within a period of 2-3 decades.

The SUA is normally identified with respect to the administrative units such as cities, towns or villages encompassed by it. The boundary of a SUA remains coterminous with the administrative boundaries of the peripheral units.

Prior to 1971 Census, for delineation of SUA, the State Town and Country Planning Department with the assistance of the State Directorate of Census Operations formulated tentative proposals for showing the urban areas, limits, of cities and towns, and the villarges and towns on the periphery of the core-city/ town which together were to constitute the SUA tract. In identifying the units of composition of SUA, the following yardsticks were conventionally used :

(a) A core town with a population of 50,000 and above by 1971 Census.

(b) Predominant urban land use.

(c) Intensive inter-action with the urban centres as reflected in commutation for the purposes of work and secondary education facilities; extension of city bus services; sales of commodities like milk, daily products, vegetables (other than those transported by rail or truckhaul) and purchase of food-grains, cloth and general provisions, etc., by the consumers directly.

(d) Antcipated urban growth as a result of locational decisions relating to industry, market, transport and communication, administrative and servicing functions.

(e) Existence of big villages with a large proportion of working forces engaged in non-agricultural categories.

It is clear from the concept that the SUA is a constant areal statistical reporting unit and it is not supposed to undergo any areal change after its initial delineation. But, in a few cases, in view of the urban policy of the State Government and unexpected growth of town, it became necessary to change the boundary of S.U.A. slightly. On the eve of 1981 Census, 28 fresh S.U.As have been delineated all over the country which had population of 50,000 or more in 1971 census but some how could not be then included. Balurghat S.U.A. in the district of West Dinajpur of our State is one of the 28 fresh SUAs of the country. It is emphasised that this should not give the impression that fresh SUAs are required to be deineated during the succeeding Census of 1981 and thereafter in respect of such core towns having population of 50,000 or more at the 1981 Census or subsequently.

(ii) **List of SUAs of West Bengal**

Sl. No.	Name of S. U. A.	Name of district in which it is located
1	2	3
1.	Koch Bihar	Koch Bihar
2.	Jalpaiguri	Jalpaiguri

19.	Asansol	Barddhaman
20.	Durgapur	do
21.	Barddhaman	do

Note :— *Asterisk(*) mark indicates that the Balurghat SUA has been delineated fresh in 1981 Census.

(iii) **Inset Table with Explanatory Note**

According to the concept of SUA which is a dynamic areal spread, it is obvious that the constituent units within the SUA tract are supposed to undergo various changes—both physical and Demographic over the period of 1971-81. The nature of identifiable changes in general at the 1981 Census may be the following :

(a) Annexation of village(s) wholly/partly from within the SUA tract to one of the urban components.

(b) Merger of outgrowths (OGS)/any other urban component with another urban component.

(c) Formation of new towns(s)/OG(s) in 1981 Census from among the rural components of the SUA.

(d) Declassification of constituent towns(s)/ OG(K) of the SUA.

(e) Deurbanisation of a portion of constituent urban unit of the SUA.

The following inset table-1 shows the changes in constituent units of urban components in the SUA including change the boundary between 1971—1981 and nature and reason(s) of changes:

INSET TABLE-1

CHANGE IN CONSTITUENT UNITS OF URBAN COMPONENTS IN STANDARD URBAN AREA INCLUDING CHANGE IN BOUNDARY BETWEEN 1971-1981 AND NATURE AND REASONS OF CHANGE

Name of Standard Urban Area	Urban Components in 1971			Urban Components in 1981			Nature & reasons of change between 1971-81 (Specify)

Note : In case of Bankura (M) and Barddhaman(M) there is a change in area figures reported in 1971, if compared with 1981 figures In the formar case the change is due to inclusion of additional area in the statutory town whereas in the latter case it is due to computational error.

The above inset table-1 has been prepared for only those SUAs in which change in status of the constituent urban units or change in their boundary has taken place during the decade 1971—81. In column 1 of the inset table 1, the name of SUAs have been shown and in column 2 and 5 the names of the urban component have been provided according to the frame of SUAs in 1971 and 1981 respectively with status in abreviation in brackets. In colmuns 3 and 6 area figures of each component and total urban group for 1971 and 1981 have been shown respectively and the population figures for the same units for 1971 and 1981 have been provided in column 4 and 7 respectively.

From this inset table-1 the readers will easily make an idea of the extent of change in number of urban components, of change in area figures and of change in population which have taken place during the decade 1971—81.

The reasons for changes in the boundaries of the urban sectors of the SUAs have been clearly described in column 8 of the above inset tabe-1. In maximum cases it will be noticed that a considerable number of rural units of 1971 SUA tracts have become urbanised in 1981 being treated as new towns, outgrowths or being included in 1971 existing towns.

The extent of urbanisation within the limits of 1971 SUA tracts can be studied from the figures at a glance provided in the following inset table-2 prepared on the basis of the descriptions of reasons shown in inset table-1.

INSET TABLE-2

Showing the nature of changes in number of components of 1971 SUA in 1981 (Urban Components only).

Sl. No.	Name of S.U.A.	No. of rural units of 1971 SUA included *in 1971 town or created in 1981 as*				No. of rural units outside the 1971 SUA *added to 1981 as*				No. of *Urban* units outside 1971 SUA added to 1981	No. of *1971 Urban* units of 1971 SUA merged with other towns

10	Kharagpur	..	..	7	7	..	..	..	..	..	..
11	Asansol	12	9	3	24	3	4	..	7	..	..

Note : (1) This inset table has been prepared with reference to the descriptive note on reasons of changes of col. 8 of inset Table-1
(2) The figures within brackets in col. 3 and 6 indicate number of part villages included in urban area in 1981.

The above inset table-2 reveals that as many as 138 villages (rural units including 4 part villages of the 1971 SUAs in the State of West Bengal as a whole have been treated either as new towns or outgrowths, or included in 1971 existing towns due to their encompassing the adjoining areas. Of the 138 villages, the share of Calcutta Metropolitan SUA is to the extent of 92, while that of Asansol SUA is to the extent of 24. It proves how quickly the village encompassed by the 1971 SUAs are getting urbanised. It is significant that Calcutta Metropolitan SUA has spread over the areas mostly of the districts of Nadia, Twenty Four Parganas, Haora and Hugli bes de Calcutta district which is entirely urban area, and Asansol SUA is spread over the industrial belt and coal mining areas where the vilages are getting urbanised with a quicker space.

The figures within brackets indicate the parts of the number of villages have been urbanised. Of the 138 villages, 41 including 4 part villages have been treated as non-municipal towns for the first time in 1981, while 52 villages have been treated as outgrowths and 45 villages have been included in 1971 existing towns.

15 villages which were outside the 1971 SUA tracts have been added to the 1971 SUAs in 1981 in the whole of West Bengal being treated as new towns or outgrowths or included in 1971 existing towns. These villages being treated as urban units in 1981 have been included in 1981 SUA being the constituent units of one or other urban agglomerations (UA). The number of urban units which were outside the 1971 SUAs, but included in 1981 SUA being the constituent units of one or other UAs is to the extent of 4 only. 10 towns of 1971 SUAs have been merged with one or other towns in 1981 Census.

The following inset table-3 shows rural-urban components of the SUAs in 1971 and 1981.

INSET TABLE-3

Showing the comparative Statement of rural and urban components of the SUAs for 1971 and 1981

Sl. No.	Name of S.U.A.	Name of District in which the the SUA is located	Number of rural components in		Number of Urban components in	
			1971	1981	1971	1981
1	2	3	4	5	6	7
	WEST BENGAL—ALL SUAs		**812**	**685**	**131**	**235**
1	Koch Bihar	Koch Bihar	5	4	2	3
2	Jalpaiguri	Jalpaiguri	1	1	1	1
3	Siliguri	Darjiling	35	33	1	3
4	Balurghat (New SUA)	West Dinajpur	..	3	..	3
5	Rayganj	Do.	5	4	1	2
6	Maldah English Bazar	Maldah	12	9	2	4
7	Baharampur	Murshidabad	16	17	2	3
8	Krishnanagar—Nabadwip	Nadia	22	19	2	6
9	Ranaghat	Nadia	13	11	1	5
10	Santipur	Nadia	7	7	1	1
11	Ashok Nagar-Habra	Twenty Four Parganas	7	5	2	2
12	Bangaon	Do.	9	9	1	1
13	Basirhat	Do.	10	10	1	1
14	Calcutta Metropolitan	Nadia, Twenty Four Parganas, Calcutta, Haora, and Hugli	475	385	98	155
15	Kharagpur	Medinipur	22	17	1	2
16	Medinipur	Medinipur	11	11	1	1
17	Bankura	Bankura	12	12	1	1
18	Puruliya	Puruliya	5	5	1	1
19	Asansol	Barddhaman	123	100	10	38
20	Barddhaman	Barddhaman	14	14	1	1
21	Durgapur	Barddhaman	8	9	1	1

Notes : (1) Rural units each in part have been included in urban in 1981.

(2) 7 Rural units wrongly included in urban in 1971. they have been treated as rural unit in 1981.

(3) 3 Rural units have been added newly as constituent of Balurghat SUA, new SUA in 1981.

The above inset table-3 indicates that there were 812 rural units in 1971 as against 685 in 1981 in whole of West Bengal. It means as many as 127 rural units have been urbanised during the decade 1971—81, but in inset table-2 it is noticed that 138 rural units have been urbansed. The discrepancy of 11 is due to fact that 4 rural units each partly have been included in Urban, while 7 rural units which were wrongly shown as urban in 1971 have been actually shown as rural in 1981. The table also indicates that the number of towns has increased to 235 in 1981 from 131 in 1971.

(iv) **Fly Leaf and Explanatory Note to A-5 Table**

This table corresponds to A-V table of 1971 with only change that 1971 table contained total population of 1951, 1961 and 1971 in columns 16, 17 and 18 respectively, while in 1981 they contain the total populaton of 1961, 1971 and 1981. In this table the basic data, such as, area in Km², density, number of occupied residential houses, number of households, population with householls and population with sex break-up for the houseless sex break-up, and institutional households, etc., for each component of the standard urban Area (SUA) have been presented in this table. The population shown in column 16 and 17 are the adjusted population figures of 1981 and 1971 with reference to the territorial changes accounted for in 1981 Census.

In 1971 there were 20 SUAs in the State of West Bengal, while in 1981 there are 21 S.U.A.s with the addition of Balurghat SUA in the district of West Dinajpur in 1981. For facilities for easy identification of the components of Calcutta Metroplitan S U.A. which spread over the districts of Nada, Twenty Four Parganas, Calcutta and Hugli, the Calcutta Metropolitan S.U.A. has been divided into 15 sub-units. In case of rural components of the USAs, the names of Police Stations in which the villages are located have been noted in column 2 of the table.

STATEMENT

All SUAs of West Bengal

Year	Total Rural Urban	Area in Sqr. Kms.	No. of Occupied Resdential Houses	No. of Households	Population	Houseless		Institutional	
						Households	Populations	Households	Populations.
1	2	3	4	5	6	7	8	9	10
1981	T	2,970,15	2,549,501	2,587,541	13,789,498	23,633	81,009	22,398	254,006
	R	1,286,95	251,510	253,718	1,423,067	702	3,126	709	9,227
	U	1,683,20	2,297,991	2,333,823	112,366,431	22,931	77,883	21,689	244,779
1971 ..	T	2,724,32	1,935,644	2,143,133	10,588,235	35,117	66,052	44,461	265,715
	R	1,527,79	253,294	277,228	1,028,737	1,304	4,455	1,574	7,781
	U	1,196,53	1,682,350	1,865,905	9,559,498	33,813	61,597	42,887	257,934
				Decadal Percentage of growth rate (1971—1981)					
	T	+9.02	+31.71	+20.74	+30.23	—32.70	+22.64	—49.62	—4.41
	R	—15.76	—0.70	— 8.48	+38.33	—46.17	—29.83	—54.96	+18.58
	U	+40.46	+36.59	+25.08	+29.36	—32.18	+26 44	—49 43	—5 10

It is evident from the above Statement that the total area has increased by 9.02% during the decade 1971—81 mainly because of addtion of one S.U.A. (Balurghat SUA) in 1981. In rural areas the growth rate of area has shown a negative result to the extent of 15.76, while that in urban areas has accounted for as much as 40.67 per cent. Because of the fact that many rural units of 1971 in the SUAs have been treated as towns for the first time in 1981 or treated as urban outgrowths, the rural area has gone down and the urban area has gone up in 1981 from those of 1971. Population in all area have substantially increased in 1981 from those of 1971.

The statistics of the above statement further indicates that the urbanisation has extended considerably within the SUAs during the decade 1971—81. This contention is proved by the fact that in all cases the figures have gone down in the rural sector except those for population and institutional population. It is expected that in 1991 there will be further more urbanisaton within the limits of the SUAs.

A-5—STANDARD URBAN AREAS

NOTE

This table gives the area, density, number of occupied residential houses, number of households and the population by sex of 1981 for Standard Urban Areas and their rural and urban components. It also provides the population of 1961 and 1971 Censuses for each Standard Urban Area and its rural and urban components, hence it will facilitate for comparison of growth of population of the Standard Urban Areas between the two decades, *i.e.*, 1961—1971 and 1971—1981. This table also contains the Houseless and Institutional households and their population by sex in such areas. New Standard Urban Areas have been indicated by an asterisk (*) in this table.

TABLE A-5—STANDARD
