NOTE

For the first time in the history of Indian Census, an attempt was made in 1961 to collect economic data on the basis of households in addition to the one collected on the basis of individuals. In earlier censuses, the only information available for households was their total number, size and composition and the entire information on economic activity was based on individual (and not on household) participation in different sectors. In the case of countries of such economic status as ours where not all the goods produced enter the money market and where such of the goods produced are consumed by the family itself the collection of information purely on the basis of individuals tends to a distorted picture unless such information is supplemented by data concerning the economic activities of the household as an entity. The Household Schedule was, therefore, included as one of the three schedules for the 1961 Census and designed specially to collect comprehensive material on Household Cultivation and Household Industry.

The Household Schedule consisted of two parts, the first part dealing with particulars of Household Cultivation and Household Industry along with the workers in the Household Cultivation or Household Industry or both and the second part giving the name, sex, relationship to head, age, marital status and description of work of the members of the household. The first part of the Household Schedule has enabled the classification of households in accordance with their being engaged in any Household Industry or Household Cultivation or both, or not being so engaged, thereby throwing considerable light on the economic activity of a household as such and the persons engaged in household undertakings. The second part of the Household Schedule viz., the Census Population Record, is meant to serve as a National Register of Citizens in the place of a similar one maintained in the 1951 Census but in a different form. The Household Cultivation for the purpose of the schedule has been defined to cover plots or parcels of land which are cultivated by the household itself viz., lands which lie within the village or in an adjacent village or within such a distance as to enable the household to work on the land or actively supervise its cultivation. If, however, the Head of the household insisted that he is cultivating the land situated at a distance from his household his version was accepted and such land also treated as coming within the scope of Household Cultivation. Cultivation was taken to involve ploughing, sowing and harvesting and consisted of the production of the cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maise, roots and tubers like potato, yam, beat-root, sugarcane etc., production of pulses such as arhar, moong, masur, urd, khesari and other grams and production of raw jute, raw cotton and kindred fibre crops. The Household Industry was defined as an industry not on the scale of a registered factory conducted by the Head of the household himself and/or mainly by the members of the household at home or within the village in rural areas and only at home in urban areas. Participation of the Head of the household and/or members of the household was considered an important element of this definition. Industry for purposes of the above definition was taken to relate to production, processing, servicing or repairing. A specimen each of the Household Schedule and the Census Population Record is given in Appendix I to this note. A list of common Household Industries with their industrial code number is also given in Appendix II. The classification scheme of Household Industries was prepared in Registrar General's Office, New Delhi.

The Household Schedules were filled up by the enumerators at the time of 1961 Census enumeration. The instructions issued to the enumerators for filling up the Household Schedule are reproduced below:-

Instructions for filling up the Household Schedule

At the top of the schedule you will find the Location Code. You will have to write the Location Code of the household here. Your supervisor will give you the code numbers representing your district, taluk, town/village/forest division/special area, kara/muri/desom/ward/forest range/special area. You should take care to write those four numbers connected together by oblique strokes in between on every Household Schedule.

When you are visiting each household for enumeration you should write the code number of the household also on the Household Schedule. For purposes of the census, a Census house has been defined as a structure or part of a structure, a dwelling, a shop, workshop, factory or place of business, or

shop-cum-dwelling giving on the road or a common staircase or a common courtyard leading to a main gate or enjoying a separate entrance. A household means the entire group of persons who commonly live together in the same Census house and take their meals from a common mess unless the exigencies of work prevent them from doing so. In some Census houses there may be more than one group of persons, each group with a common mess. In such cases, each group should be regarded as a separate household for purposes of the census and a separate Household Schedule should be prepared. You should write the household number from the extracts of the House-list given to you by your supervisor. If, in any case, you find a Census house or a household satisfying the definitions given above has not been numbered you should bring it to the notice of your supervisor and have a separate number given to the house or household and enumerate the household.

At the right hand corner of the Location Code you will find a question "Is this an institution?" with a rectangle below it. If you are enumerating, any penal, charitable or mental institution, hostel, hotel, hospital, boarding house, etc., you should write the nature of the institution within the rectangle like jail, hospital, etc.

Below the Location Code you will find a column for recording the full name of the Head of the household. The Head of the household for census purposes is a person on whom falls the chief responsibility for the maintenance of the household. Thus the Head of the household need not necessarily be the eldest male member but may even be a female or a younger member of either sex. You need not, however, make any elaborate enquiry about this and should record as Head of household the name of the person who is actually acknowledged as such.

Institutions like boarding houses, messes and chummeries should also be regarded as Census households but of 'unrelated persons living together'. In such a household the manager or superintendent or the person who has administrative responsibilities or who by common consent is regarded as the Head, should be recorded as Head of the household. If in an Institution separate families are also living, each such family should be treated as a Census household and a separate Household Schedule should be filled. In such cases the full name of the recognised Head of the household should be written.

If the Head of the household is a person who spends the weekdays in town and spends the week-ends at home, he should be recorded as Head of household and entered for enumeration at his home. If he should be away for a fairly long time which covers the entire enumeration period then the person who is in charge in his absence should be recorded as the Head of the household.

You will find a parallelogram at the right hand side against the full name of the Head of the household marked SC/ST. If the Head of the household is a member of the Scheduled Caste or Scheduled Tribe obtaining in your State or in your district you should write the name of the Scheduled Caste/Scheduled Tribe to which the Head of the household belongs within the parallelogram. If the Head of the household does not belong to the Scheduled Caste/Scheduled Tribe you should put 'X' within the parallelogram. If the person belonging to a SC/ST returns the Caste/Tribe by a synonym or generic name of a Caste or Tribe write the name as returned and the name of the relevant Caste/Tribe as per the list of Scheduled Castes and Scheduled Tribes given to you within brackets. A list showing the synonyms or generic names with the corresponding name of the Scheduled Caste or Scheduled Tribe is appended to this. But this list should not be treated as exhaustive or final. Even if a synonym or generic name, which is not included in the list of synonyms or generic names, is mentioned by a person belonging to a Scheduled Caste/Scheduled Tribe you should record it in the same manner as if it had been included in the list of synonyms or generic names given to you. The correctness of the synonyms or generic names will be examined before tabulation.

You should then fill up the part of the Household Schedule relating to Cultivation and Household Industry. Sub-part 'A' relates to Cultivation; sub-part 'B' to Household Industry and sub-part 'C' to Workers at Cultivation or Household Industry.

Sub-part 'A' relating to Cultivation will have to be filled in only where the household cultivates land. (Land includes all land normally used for cultivation purposes including temporary fallows). Three categories of land are given in items 1 (i), 1 (ii) and 2. Items 1 (i) and 1 (ii) relate to land actually cultivated by the household. Item 2 relates to land which is not cultivated by the household but has been given by it to private persons for cultivation for payment in money, kind or share. In each of the three cases the total of separate plots or parcels of land in different places, owned or held, or taken or given should be made and entered. A number of lines have been provided for this purpose in 1 (i) and 1 (ii) to account for separate plots or parcels of land held or owned or taken under different recognised local rights. If the household (a) cultivates land owned or held from Government or

taken from private persons or institutions or (b) has given land to private persons for cultivation purposes you should ascertain the local name of the right on such land and record in the column relating to 'local name of right on land'. Category 1 (i) land owned or held from Government, will include the total of all pieces of land owned or held in owner-like possession, e.g., land held directly from Government under a grant, lease or assignment, (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession, but without the right of transfer and (iii) temporary or conditional leases of any kind with the Government. Category 1 (ii) land taken from private persons or institutions for payment in money, kind or share, will include land (i) with rights of permanent, heritable and transferable possession, (ii) with rights of permanent and heritable possession but without right of transfer, (iii) held in a variety of tenancies or tenures which may be broadly classified as follows:

(a) tenants holding land with permanent and heritable rights whose land cannot be resumed by the owner on grounds of personal cultivation (such tenants may in some cases have the right of transfer also);
(b) tenants who have been given permanent rights subject to the right of resumption by the owner (in some cases the tenant has the right to acquire ownership of the non-resumable area. In other cases he does not possess the right);
(c) tenants holding land in area where interim measures have been enacted for stay of ejectment or for continuing the leases for a specified period;
(d) tenants holding land on temporary leases who are liable to ejectment; and
(e) areas held on condition of rendering service either to a village community or to Government (This also includes cases where labourers on plantations are given some land for cultivation with permanent rights); and

(iv) the following:–

(a) land taken for a fixed amount of money,
(b) land taken for a fixed amount of produce,
(c) land taken for a share of the produce,
(d) land for which money is paid partly in one and partly in any other form mentioned above, and
(e) land held free of consideration.

Category 2 land given to private persons for cultivation for payment in money, kind or share will include the classifications mentioned in category 1 (ii).

Categories 1 (i) and (ii) will include only those plots or parcels of land which are cultivated by the household itself, that is, lands which lie within the village, or in adjacent villages, or within such a distance as enables the household to work on the land or actively supervise the cultivation. They will not include land owned or held in distant places where distance itself is a bar to active cultivation, constant supervision or direction. But Category 2 will include land in any part of the country whatsoever. You should ascertain the extent of land in each category of local right and record it in acres and cents in the column relating to 'Area in acres'. You should write the total of separate plots or parcels of land under the same right if they are situated in different places. If it is not possible to ascertain the extent of land in acres you should, if possible, make a conversion from the local measure given to you. Even if this is not possible write the area in local measure giving invariably the name of the measure adopted.

This sub-part will not apply to households which do not possess any land. Thus, it will not apply to households which consist of only agricultural labourers without any land. In such cases put an 'X' in all the spaces provided in the right hand side and put a bold cross on this sub-part.

Land under any of the items in sub-part 'A' includes rent free land, lands enjoyed in permissive possession or gifts without encumbrance or consideration. A household which is a member of a co-operative farm will record only that amount of land in the co-operative farm which had belonged to it before and under right enter 'co-operative farm'. Labour hired by such a co-operative farm should not be entered for this household.

Cultivation for purposes of sub-part A of the Household Schedule involves ploughing, sowing and harvesting and consists of the following:–

1. Production of cereal crops (including Bengal gram) such as rice, wheat, jowar, bajra, maize, roots and tubers like potato, yam, beet etc., sugarcane etc.
2. Production of pulses, such as arhar, moong, masur, urd, khesari, other gram.
3. Production of row jute and kindred fibre crops.
4. Production of raw cotton and kindred fibre crops.

It is not possible for the household to supervise the cultivation of land situated at a great distance from the household. But at the same time if the Head of the household insists that he is cultivating the land it would not be feasible to question

his statement. In such a case the position should be explained to the Head of the household as per the above instructions. Even after explaining the position if the Head of the household insists that the land is cultivated by the household it should be recorded as such.

Sub-part 'B' relates to Household Industry. This part will be filled up only where there is a Household Industry conducted by the Head of the household himself and/or mainly by members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be on the scale of a registered factory. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. In a rural area the Household Industry can be located either at home or within the village. But in an urban area the Household Industry or at least the major part of its work must be located only at home. A Household Industry should relate to production, processing, servicing or repairing and includes makers and sellers of goods.

The test for a Household Industry is mainly threefold.

(a) Household Industry should embrace manufacture, processing or servicing and may include sale but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household should be manufactured or processed by members of the household.

(b) Household Industry should be on the household scale where the workers mainly will be the Head of the household himself and members of the household, the role of hired workers from outside being of secondary importance. Thus, in any Household Industry, members of the household should be in a position to lend a hand in the industry whenever they find the time in the course of their daily chores. Household Industry cannot, therefore, be on the scale of a registered factory but can use machinery and employ power like steam engine or oil engine or electricity to drive the machinery.

(c) Location also is important, for proximity decides participation by members of the household. In a village this participation is possible if the Household Industry is located at home or within the village, because village organisation is such as makes it possible for members of the household to move about freely in the village to look after their work. In urban areas such a free movement is not possible and, therefore, for Household Industry in urban areas we should consider only those industries which are located at home. Where, however, part of the work is done outside the house, e.g., preparing and dyeing the yarn for weaving or winding into warp and woof or cleaning metal surfaces before electroplating in baths, it should still be considered a Household Industry, even in urban areas, as the main operation of weaving or of electroplating is conducted within the house and only one or two operations are conducted outside.

The following activities should also be regarded as illustrative of Household Industry. Bidi-makers who either alone or with help of members of the family roll bidis at home, for wages at piece rates, while the contractor supplies the materials. Certain processes like buttoning and handsewing of tailored cloths, dyeing and printing of cloth, are carried out at home by members of the household both at residence and at 'place of work' or where womenfolk of the household fill in at home with lac gold ornaments prepared at the shop by male members of the household.

Ascertain from the Head of the household whether there are any Household Industries and write the nature of the industry (s) in the column provided, if there are any. Then ascertain for how many months in a year roughly they are conducted and put down the number of months in the appropriate column. If the industry is conducted throughout the year write '12'. If there is no Household Industry of any sort put an 'X' in each of the places in the right hand corner where the answers will be written and put a bold cross on this sub-part.

Sub-part 'C' relates to Workers in Cultivation or Household Industry.

In the case of households which are engaged only in cultivation, if the Head of the household is working write 1 under the column 'Head', and ascertain how many other male and female members of the family are working. Write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total'. Then ascertain whether any hired workers are employed and, if so, write the number of such workers in the column allotted for it. The hired workers should have been in whole-time employment during last working season or should be in wholetime employment during current working season.

Similarly in the case of households engaged in Household Industry only, if the Head of the household is working write 1 in the column relating to the 'Head', and also ascertain how many male members and female members of the family are working and write the numbers in the respective columns. Write the total number of family workers including the Head, if he is working, in the column relating to 'Total' and then ascertain the number of hired workers, if any, and then write the number of hired workers in the appropriate column.

If a household is engaged both in Cultivation and Household Industry ascertain whether the Head is working and write 1 under the column relating to the Head and also ascertain how many male and female members of the family are working both at Cultivation and the Household Industry and write the numbers in the respective columns. Write the total number of family workers in the column relating to 'Total'. Ascertain the number of hired workers engaged by the family both for Cultivation and Household Industry and write the number in the appropriate column. In a household engaged both in Household Cultivation and Household Industry, you need not ascertain how many are engaged in Household Cultivation and Household Industry separately.

Even if any of the members of the family working or hired labourers are absent during the period of the census count they should be counted for the purposes of the Household Schedule.

In the case of households engaged in Cultivation only, put 'X' in the columns relating to 'Household Industry only' and 'Both in Household Cultivation and Household Industry'. Similarly in the case of households engaged in Household Industry only put 'X' in the columns relating to 'Household Cultivation only' and 'Both in Household Cultivation and Household Industry'. If a household is engaged both in Household Cultivation and Household Industry put 'X' in the columns relating to 'Household Cultivation only' and 'Household Industry only'. If a household is not engaged in either Household Cultivation or Household Industry or both put 'X' in all the columns and a bold 'X' on this sub-part.

The test for a worker is whether a person is actually working in Cultivation or Household Industry or supervising or directing work thereon.

Processing of data

The Household Economic Tables have been prepared from the Household Schedules by mechanical tabulation on the basis of 20% sample of the family households. The entire process consisted of sampling of Household Schedules, coding of the information contained therein, punching the information on cards, verification of the punched cards and finally, sorting and tabulation of punched cards on machines. The sampling and part of the coding of the Household Schedules were done in this office and the remaining work in the office of the Registrar General, India, New Delhi. The following instructions were issued regarding the selection of sample households:

"For purposes of tabulation every fifth schedule from the starting random household will be selected to make a 20% sample. The sample household will be marked continuously for rural areas of a tehsil/taluk and for urban areas of a district i. e., the households left over in a Household Schedule pad should be carried over to the next Household Schedule pad for the selection of sample households.

Before marking the sample households the Household Schedule pad should be arranged in the order of Location Code Number of villages in a tehsil/taluk in the case of rural areas and in the order of Location Code Number of towns in a district for urban areas. The first sample schedule should be chosen randomly among the first five households in the first Household Schedule pad and stamped (S) as selected. This random number (random start) should be chosen separately for rural areas of each tehsil/taluk and for urban areas of the district. From the first random household every fifth household should be continuously stamped as selected. A rubber stamp will have to be specially prepared for this purpose. The samples should be continuously marked for all pads of villages in tehsil/taluk or urban area in a district. If in a particular Household Schedule pad at the end, some households (this will be four or less) are left after marking sample households, the households left over should be carried over to the next Household Schedule pad and the appropriate household in that pad should be marked as a sample household.

In short the following points should be strictly followed while selecting the sample households.

(i) (a) All pads of Household Schedules of rural areas of one tehsil should be arranged in order of ascending number of Location Codes of villages. If in a village more than one pad is used, these pads should also be arranged according to the serial number given to the pads for that village.

(b) Similarly all pads of urban areas in a district should be arranged in ascending order of Location Code Numbers. Within an urban area these pads will be arranged in the order of block numbers.

(ii) After selection of the first sample schedule the sample will be continuously picked up

without a break until the last pad of the tehsil is exhausted in the rural areas and the district in urban areas.

(iii) The sample households will be indicated by stamping the selected schedule in the right hand top corner with a rubber stamp (s).

(iv) The sample schedules (i.e. those having rubber stamp mark) will be carefully removed from the pad and tied together for a tehsil in the sequence of villages within the tehsils and in the sequence of towns in the case of urban areas the slips being arranged in the same order as when the samples were removed.

(v) In case two or more Household Schedules are utilised for a household on account of large size of the household, all such schedules utilised for one household should be considered as one schedule for the purpose of counting every fifth schedule in the pad for sample selection.

(vi) We are not concerned with institutions, and therefore, in taking out sample we should discard institutions and confine the samples only to family households. In counting every fifth Household Schedule, therefore, the schedules for institutional households should be left out, the order of the sample being confined only to the schedules of households".

The following Household Economic Tables prepared on the basis of the data collected on the Household Schedules are presented in this part.

Table B X - Sample Households (i) Engaged neither in Cultivation nor Household Industry, (ii) Engaged either in Cultivation or Household Industry but not in both and (iii) Engaged both in Cultivation and Household Industry for all areas

Table B XI - Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural and Urban areas separately

Table B XII - Sample Households engaged in Cultivation only classified by size of land cultivated and number of family workers and hired workers in Rural and Urban areas separately

Table B XIII - Sample Households engaged both in Cultivation and Household Industry showing size of land cultivated classified by Principal Household Industry in Rural and Urban areas separately

Table B XIV - Sample Households engaged only in Household Industry classified by Principal Household Industry in all areas

Part A - Households classified by Major Groups of Principal Household Industry and number of persons engaged

Part B - Households classified by Minor Groups of Principal Household Industry

Table B XV - Sample Households engaged both in Cultivation and Household Industry classified by size of land in Rural and Urban areas separately

Table B XVI - Sample Principal Household Industry classified by period of working and total number of workers engaged in Household Industry in all areas

Table B XVII - Sample Households classified by (i) number of male and female members by size of Households and (ii) Engagement (a) neither in Cultivation nor in Industry (b) in Household Industry only and (c) in Cultivation sub-classified by size of land cultivated

Besides the eight tables mentioned above the following tables were also prepared on the basis of 20% sample of Household Schedules.

CI - Composition of Sample Households by relationship to head of family classified by size of land cultivated

SCT V Part A - Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only for members of Scheduled Castes
(Households of members of Scheduled Castes in a 20% sample of all households)

SCT V Part B - Sample Households engaged in Cultivation classified by interest in land and size of land cultivated in Rural areas only for members of Scheduled Tribes
(Households of members of Scheduled Tribes in a 20% sample of all households)

Of these, Table CI is presented in Part II C and Table SCT V Part A and Part B in Part V-A.

FLYLEAF TO TABLE B XI

This table gives a cross classification of the cultivating households consisting of households engaged in cultivation only and households engaged in both cultivation and household industry by the interest in land and the size of land cultivated. The interest in land is classified into (a) owned or held from Government, (b) held from private persons or institutions for payment in money, kind or share or (c) partly held from Government and partly from private persons for payment in money, kind or share. The size of holdings is grouped under less than 1 acre, 1.0 — 2.4 acres, 2.5 — 4.9 acres, 5.0 — 7.4 acres, 7.5 — 9.9 acres, 10.0 — 12.4 acres, 12.5 — 14.9 acres, 15.0 — 29.9 acres, 30.0 — 49.9 acres, 50 + acres and size unspecified. The table is prepared for the rural and urban areas of State and districts and for the rural areas of taluks.

FLYLEAF TO TABLE B XII

This table shows the classification of households engaged in cultivation only according to the number of persons engaged in cultivation by the size of holding groups in acres. The number of persons engaged in cultivation are grouped under 1 person, 2 persons, 3 – 5 persons, 6 – 10 persons, more than 10 persons and unspecified. In the case of households where more than 1 person is working, the family workers and hired workers have been shown separately. The table is prepared for the rural and urban areas of the state and districts and for the rural areas of taluks.

FLYLEAF TO TABLE B XIII

This table shows the distribution of households engaged both in cultivation and household industry by the size of land cultivated. The household industries are classified according to divisions and major groups of Indian Standard Industrial Classification (I. S. I. C.). The table is prepared for rural and urban areas of State and districts.

The major groups of household industry having less than 10% of the figures of the respective divisions are not given in this table. A mark of asterisk (*) is given on such divisions and the figures of those major groups are shown in the appendix to this table.

B XIII — SAMPLE HOUSEHOLDS ENGAGED BOTH IN CULTIVATION AND HOUSEHOLD INDUSTRY SHOWING SIZE OF LAND CULTIVATED CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN RURAL AND URBAN AREAS SEPARATELY

(Based on 20% Sample)

Major groups of household industry having less than 10% of the figures of the respective divisions are omitted from this table. Such divisions are marked with an asterisk (*) on their left and the figures of the major groups are given in the appendix.

APPENDIX TO TABLE B XIII

Major groups of Household Industry which are less than 10 per cent of the respective division have not been shown in the main table which shows such divisions by an asterisk. Major groups thus dropped from the main table are given run on in this Appendix. The figure preceding the bracket represents the code number of the major group dropped from the table. Alphabets given in brackets are abbreviations meant for different ranges of holdings in acres as explained below. The numerical figure given after the alphabet denotes the number of households in that particular range indicated by that alphabet.

Abbreviation		Class ranges of land in acres	Abbreviation		Class ranges of land in acres
A	means	Less than 1 acre	G	means	12.5 – 14.9 acres
B	,,	1.0 – 2.4 acres	H	,,	15.0 – 29.9 ,,
C	,,	2.5 – 4.9 ,,	I	,,	30.0 – 49.9 ,,
D	,,	5.0 – 7.4 ,,	J	,,	50 + ,,
E	,,	7.5 – 9.9 ,,	K	,,	Unspecified
F	,,	10.0 – 12.4 ,,			

The major groups dropped from the main table are given below:–

FLYLEAF TO TABLE B XIV

This table prepared in two parts gives the classification of households engaged only in household industry by divisions, major groups and minor groups of I. S. I. C. for total, rural and urban areas of State and districts. Part A of the table shows for each division and major group of I. S. I. C. the number of households according to the number of persons engaged in household industry. The number of persons engaged in household industry are grouped under 1 person, 2 persons, 3—5 persons, 6—10 persons and more than 10 persons.

In table B XIV Part A major groups of household industry having less than 10% of the figures of the respective divisions are not given in the table. A mark of asterisk (*) is given on such divisions and the figures of those major groups are shown in the appendix to this table.

Part B of the table gives the number of households engaged only in household industry by each minor group of I. S. I. C.

B XIV — SAMPLE HOUSEHOLDS ENGAGED ONLY IN HOUSEHOLD INDUSTRY CLASSIFIED BY PRINCIPAL HOUSEHOLD INDUSTRY IN ALL AREAS

(Based on 20% Sample)

Part A — Households classified by major groups of Principal Household Industry and number of persons engaged

Major groups of household industry having less than 10% of the figures of the respective divisions are omitted from this table. Such divisions are marked with an asterisk (*) on their left and the figures of the major groups are given in the appendix.

APPENDIX TO TABLE B XIV PART A

Major groups of household industry which are less than 10 per cent of the respective division have not been shown in the main table, which shows such divisions by an asterisk. Major groups thus dropped from the main table are given run on in this Appendix. The figure preceding the bracket represents the code number of the major group dropped from the table. Alphabets given in brackets are abbreviations meant for class ranges of persons engaged in the household industry as explained below. The numerical figure given after the alphabet denotes the number of households in that particular range indicated by that alphabet.

Abbreviation		Class range of persons	Abbreviation		Class range of persons
A	means	1 person	D	means	6 – 10 persons
B	,,	2 persons	E	,,	More than 10 persons
C	,,	3 – 5 persons	F	,,	Unspecified

The major groups dropped from the main table are given below.

FLYLEAF TO TABLE B XV

This table shows the classification of households engaged both in cultivation and household industry by the size of land cultivated and the number of persons engaged in household industry. In the case of households where more than 1 person is engaged in household industry the number of family workers and hired workers have been given separately. The table is prepared for the rural areas of the State, districts and taluks and the urban areas of State and districts.

FLYLEAF TO TABLE B XVI

This table shows the classification of households engaged in household industry by the period of working grouped under 1-3 months, 4-6 months, 7-9 months and 10 months to 1 year. Under each of these groups the number of households, the number of family workers by sex and the number of hired workers are given. The information is available for each of the divisions and major groups of principal household industry. Households engaged in household industry have been divided into those "with cultivation" and "without cultivation". The table is prepared for total, rural and urban areas of the State and districts.

Major groups of household industry having less than 10% of the figures of the respective divisions have been omitted in this table. Such divisions are marked with an asterisk (*) and the figures of these major groups are shown in the appendix to this table.

This table furnishes valuable data on the seasonality of various household industries.

APPENDIX TO TABLE B XVI

Major groups of Household Industry which are less than 10 per cent of the respective divisions have not been shown in the main table which shows such divisions by an asterisk. Major groups thus dropped from the main table are given run on in this Appendix. The figure preceding the bracket represents the code number of the major group dropped from the table. Alphabets given in brackets are abbreviations meant for different ranges of period of working in the Household Industries 'with' or 'without' cultivation as explained below. The numerical figure given after alphabet denotes the number of households in that particular range indicated by that alphabet.

Abbreviation		With cultivation	Class range of period of working	Abbreviation		Without cultivation	Class range of period of working
A	means	,,	1 to 3 months	E	means	,,	1 to 3 months
B	,,	,,	4 to 6 ,,	F	,,	,,	4 to 6 ,,
C	,,	,,	7 to 9 ,,	G	,,	,,	7 to 9 ,,
D	,,	,,	10 months to 1 year	H	,,	,,	10 months to 1 year
X	,,	,,	Months not stated	Y	,,	,,	Months not stated

The major groups dropped from the main table are given below:—

FLYLEAF TO TABLE B XVII

This table shows the classification of households by the size, such as households having single member, 2 - 3 members, 4 - 6 members, 7 - 9 members and 10 or more members. The number of male and female members of the households in each of these groups also are given separately. The table is prepared for the total, rural and urban areas of the State and districts. In the case of rural areas the households are divided into 3 groups viz. (i) Households engaged neither in cultivation nor in household industry (ii) Households engaged in household industry only (iii) Households engaged in cultivation. Households engaged in cultivation are further classified according to the size of land cultivated.

The total number of households and the total household population in the total, rural and urban areas of the State and districts are given below. The total number of households is the same as that given in the Primary Census Abstract (P. C. A.) and the total household population is the total population as per P. C. A. excluding houseless and institutional population.
