INTRODUCTORY

Towards the end of August 1953, the Government of Mysore asked me to undertake the extraction of figures relating to Scheduled Castes and Scheduled Tribes, for submission of circle-wise statements to the Delimitation Commission. Just when the work was about to be taken on hand accordingly, the Prime Minister happened to announce in Parliament that a High-Power Commission was shortly to be appointed to go into the question of reorganisation of States. Since this meant that sooner or later there would be a demand for villagewise language data, at least in respect of bilingual areas in the State, I sought the permission of the Deputy Registrar General to extract the language figures simultaneously with the extraction of figures for Scheduled Castes and Scheduled Tribes.

The Deputy Registrar General, India, readily fell in with my view but suggested that the extraction of villagewise language data be confined only to taluks lying 'on either side of a linguistic dividing line.' Accordingly, figures were extracted for the villages of the following 13 clearly bilingual taluks :—

Bangalore District	Tumkur District	Kolar District	Chitaldrug District
Hoskote	Pavagada	Malur	Challakere
Devanhalli	Koratagere	Kolar	
Anekal	Madhugiri	Goribidnur	
Dodballapur		Chikballapur	
		Sidlaghatta	

With villagewise language data compiled for the above taluks, I thought I had anticipated all possible demands. But just as I was flattering myself on this, there came from certain members of the State Assembly, a call for figures relating to twelve more taluks, in addition to those for which figures had already been abstracted. As this demand had necessarily to be complied with, I undertook villagewise language sorting for these additional taluks with the approval of the State Government and the Deputy Registrar General. While doing so, I decided to take in Sira Taluk also in my stride, as there was the possibility of eleventh-hour demands being sprung on me in respect of this taluk, on the plausible ground of its sharing its north-eastern boundary with the Anantapur District of Andhra State. Including this taluk, the additional taluks taken up for villagewise language sorting were the following :—

Bangalore District	Kolar District	Tumkur District	Chitaldrug District
Bangalore South	Srinivasapur	Sira	Molakalmuru
Bangalore North	Mulbagal		Chitaldrug
	Chintamani		Hiriyur
	Bagepalli		Jagalur
	Gudibanda		
	Bangarpet		

In compiling language data for the above 26 taluks, all possible precautions were taken to ensure absolute accuracy. The 20 Sorters and 2 Supervisors who were engaged on the job were specially picked men. The work of each sorter was checked by another and if the mother-tongue of either of them happened to be Kannada or Telugu the concerned figures were over-checked by one of the Supervisors who was a Tamilian. As a further measure of precaution, the figures were subjected to a random check by my Assistant. These precautionary measures, fool-proof though they were, would not perhaps have been sufficient in themselves to allay suspicions as to the genuineness of the figures, had not the figures been abstracted from the original 1951 enumeration records, namely the National Register of Citizens and the Enumeration slips. Since these records had emerged at the regular decennial census, at a time when the storm of linguistic controversy had not yet burst on the political sea, the figures extracted from them cannot but be regarded as authentic, particularly in view of the fact that differences between the 1951 sorting and the present language sorting, are altogether insignificant (*vide* statement of differences appearing on page iv).

I have stated above that the villagewise language figures have been abstracted from the National Register of Citizens and the Enumeration slips of the 1951 Census. It may not be out of place to add that while figures for the first batch of bilingual taluks were extracted from the National Registers, those for the second batch of 13 bilingual taluks were tapped from the Enumeration slips. Difference in source does not, however, affect the results in the least, as the information contained in these two records is identical.

The figures emerging from villagewise sorting are exhibited in the following pages. For obvious reasons, details are furnished here for the main languages only (*viz.*—Kannada, Telugu, Tamil and Hindustani) while figures for all other languages have been combined and shown under "Others". In order to enable the language position to be seen in sharper focus, percentages are also given along with absolute values. Preceding the villagewise data of each taluk will be found an abstract revealing the language position in each of the towns and Revenue Circles of that taluk.

For reasons we need not go into here, a separate brochure is published for each district. Each district brochure contains, apart from statistical data, a District Language map showing in colours the areas of dominance of each of the main languages (namely, Kannada, Telugu, Tamil and Hindustani) and taluk maps showing the predominant language in each village of the bilingual taluks dealt with in the publication. As these taluk maps are too small to accommodate village names, serial numbers have been given instead, corresponding to the village serials contained in the respective taluk language statements. It is hardly necessary to add that bechirak or uninhabited villages are left uncoloured in the taluk language maps.

Along with the maps and statements, it will be seen, each district brochure contains a review of the present position of the main languages in the district and the position each of them had occupied in the past.

In the work of abstracting villagewise data and in bringing out the Language Brochures, I was ably assisted by Sri G. Nanjundiah, my First Assistant. He has brought to bear on this subject the same sense of thoroughness which was abundantly in evidence in his Census assignment. It has become part of his nature to shoulder increasing responsibilities of a varied nature and to do the work entrusted to his care with energy, devotion and assiduity.

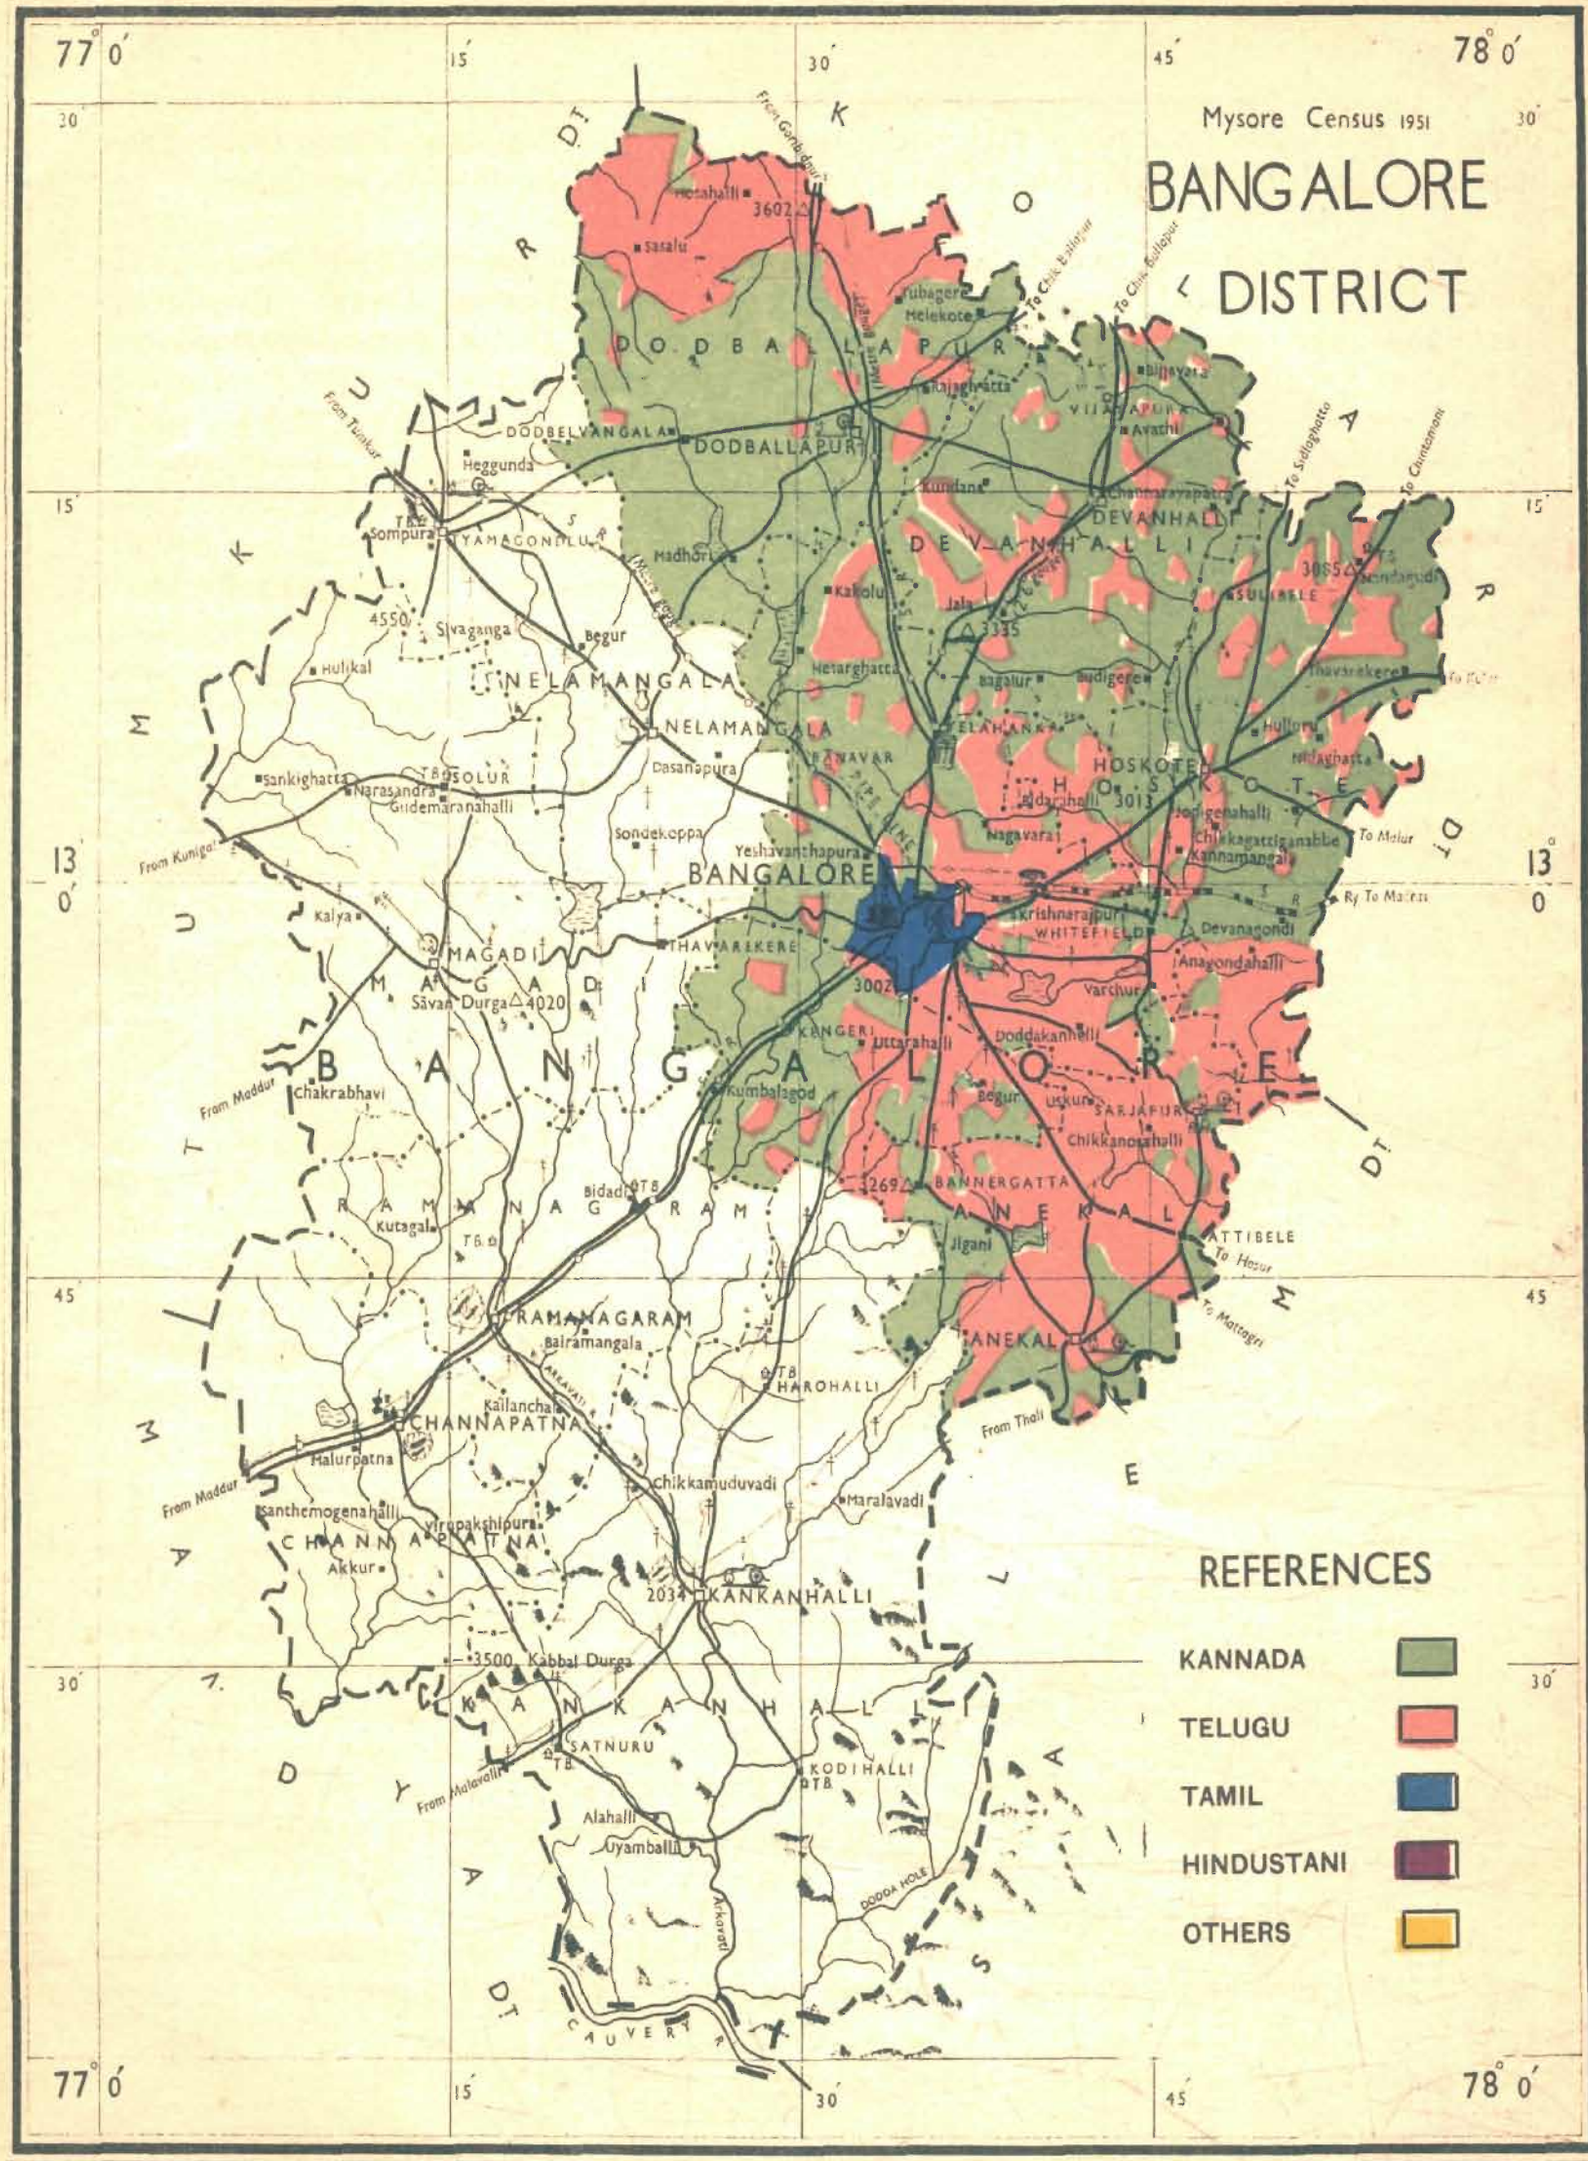

The staff recruited for language sorting did a splendid job and though for obvious reasons their names are not mentioned here individually, every one of them is entitled to my thanks. Special mention might, however, be made of the outstanding efforts of Sriyuths S. S. Krishna Murthy, V. S. Sreenivasa Iyengar and S. S. Ronald. In spite of his being saddled with the additional duties of Manager and Accountant, my Stenographer Sri U. V. Sreenivasa Rao cheerfully attended to the large volume of typing work connected with the publications. To him also my thanks are due.

The printing of the Language Handbooks was in the capable hands of Sri D. S. Gurubasavappa and his Assistants Sriyuths M. A. Sree Rama and B. P. Mallaraj Urs. They have bestowed personal attention to the work and with the assistance of Sri C. Seetharama Setty the General Supervisor, and Sri M. Nanjappa, Supervisor of the Photo-Zinco Section have made the publications outstanding in their get-up. And for that reason, they have all of them earned my thanks.

I am particularly indebted to Shri Rajeshwari Prasad, I.A.S., the Deputy Registrar General, for his unfailing courtesy and for the readiness with which he came to my aid in solving the hundred and one problems with which the work of villagewise language sorting was literally bristling.

BANGALORE,
24th May 1955.

J. B. MALLARADHYA,
Census Commissioner for Mysore

LANGUAGE PATTERN OF BANGALORE DISTRICT

Of the sixty-five languages spoken in the State, as many as 59 have been retu district. The most important of them are Kannada, Telugu, Tamil and Hindus four languages between them claim as much as 97.3 per cent of the district's popul

With its 64.1 per cent contribution to the district total, Kannada completely d show. It is the principal language in all the taluks of the district except Anekal. exceptional taluk where Telugu takes the lead, nearly a third of the population—: to be exact—speak Kannada as their mother-tongue. One remarkable feature of composition of Anekal Taluk is that its Kannada proportion which was as high as 77 1901 as against Telugu's 9.4 per cent, has for some obscure reason been going down i till it touched the lowwater mark of 27.8 per cent in 1951. Telugu's hold on the ever, rather tenuous since it claims no more than 43.2 per cent of the total. It that of the ninety and odd inscriptions discovered in this taluk, only one happe Telugu.*

Telugu claims but 17.8 per cent of the Bangalore District population and, by a dence, claims roughly about the same percentage of the State Telugu total. It fiddle to Kannada in all the taluks of the district except Anekal where it displace with a modest claim of 43.2 per cent. Though in as many as five taluks in the distri proportion is less than 5 per cent, (Kankanhalli 4.9 per cent, Ramanagaram *cum* 3.1 per cent and Magadi *cum* Nelamangala 4.1 per cent) the over-all ratio stan 17.8 per cent because the remaining taluks boast of fairly respectable Telugu prope proportion, it might be observed incidentally, is the highest among the Kannac the State.

Next to Kannada and Telugu and limping far behind the two, comes Tamil with 8 per cent. The Tamilians of this district have however the satisfaction of knowin the districts theirs is the highest contribution to the State Tamil total. Among the district, Anekal boasts of the highest Tamil proportion (21.7 per cent) and the Mag mangala Tract the lowest (0.6 per cent). Bangalore North and South each clain 19 per cent and Hoskote comes behind with 10.9 per cent. The Tamil element, it to note, has always been strong in this district and indeed at one time in its cheq when it formed part of the Chola dominion this language had usurped the place the local language.

Close on the heels of Tamil comes Hindusthani which claims 7.4 per cent of population. When Randulha Khan, the Bijapur General captured Bangalore Gowda in 1638, and made it his chief residence, the Hindusthani element naturall introduced. This was further strengthened when in 1758 the fort and district of B conferred on Haidar as a *jagir* and thus came to be under Muslim rule till the fall of in 1799. In spite, however, of the district being under Muslim rule for a consid Hindusthani could never succeed in holding a position of dominance. But the or of this language is that it is improving its position in the district although very slowly by the fact that from 6.7 per cent in 1931, the Hindusthani claim creeped up to 6. to 7.4 in 1951.

In addition to these four languages, fifty-five other languages have been ret district. But their combined contributions add up only to a piddling 2.7 per cent
