PREFACE

The present is the First Housing Census of the country when certain basic data on the housing and living conditions of the people have been collected for the first time. The house-list form adopted in the earlier censuses was not uniform. Numbering and listing of houses which are the most important census preliminaries were confined in the past to occupied census houses used as dwellings only. Non-residential houses, such as temples, mosques, factories, workshops, schools, sarais, office premises, business houses, etc., were not entered in the house-list, as that was not necessary for the purposes of enumeration. All these have been brought under the purview of the current Census with a view to account for all structures either dwellings or non-dwellings. A uniform house-list schedule has been designed and brought into use throughout the country during the Census of 1961 by giving it a statutory recognition. Through this schedule are collected data on housing, such as purpose for which a census house is used, material of wall and roof, tenure status, number of rooms, as well as essential data relating to establishments, workshops and factories, like name of the proprietor of the establishment, name of products, number of persons working and the kind of fuel and power, if machinery is used. Such an enquiry which is the first of its kind and which perhaps no other country has so far attempted has been commended by the Third Session of the Conference of the Asian Statisticians of the ECAFE Region held in April, 1960. It has also filled in the gap in the industrial statistics available to countries in the region on the character and level of activities of smaller establishments. Thus the Housing Census of 1961 provides certain basic information on the structure of industrial segments and also furnishes a frame for selecting samples of industrial establishments for carrying out further study and research.

The results of the Housing Census will be published in two parts, viz., (1) Report on Housing Tables and (2) E-Series of Tables on Housing and Establishments classified according to power and size of employment for all the important minor groups of the National Standard Industrial Classification. It is the latter Series of Tables that has been included in this volume. Both these publications will, it is hoped, remove the existing unsatisfactory position with regard to housing statistics and meet the long felt need of planning.

Superintendent of Census Operations,

TABLE E-I

CENSUS HOUSES AND THE USES TO WHICH THEY ARE PUT

Table E-I prepared on full count gives figures of census houses separately for total, rural and urban areas of the State, districts, talukas, cities and towns with population of 50,000 and over, classified into different categories according to the uses to which they are put. Those found vacant at the time of house-listing have also been shown separately as such. The following are the various types of houses into which occupied houses have been classified:—

Dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings, hotels, hostels, sarais, dharamshalas, tourist homes and inspection houses, shops excluding eating houses, business houses and offices, factories registered under the Factories Act and worksheds and workshops not so registered, schools and other educational institutions including training classes, coaching and shop classes, restaurants, sweetmeat shops and eating places, places of entertainment and community gathering (Panchayat Ghar), public health and medical institutions, hospitals, health centres, doctor's clinics, dispensaries, etc.

Others

Occupied census houses which do not fall in any of the above categories have been classed as 'Others'.

With a view to understand the significance of statistics incorporated in E Series of Tables, the concepts and definitions of the terms occuring in the Table are given below:—

Census house

" A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop-*cum*-dwelling, or a place of business, workshop, school, etc., with a separate entrance."

Census household

" A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so."

Shop

" A shop is a place where articles are sold for cash or for credit."

Workshop

" A workshop is a place where some kind of production, processing, repair or servicing is undertaken or where goods or articles are made and sold, and is not a factory registered under the Factories Act." Following are some of the instances:—

Paper-making, shoe-making, tailoring, cycle-repairing, motor-servicing, ***halwai's*** shop, pottery-making, goldsmith, blacksmith, etc.

Factory

" A factory is a large workshop which has been registered under the Indian Factories Act."

Business houses

Business houses are those premises where transactions in money or other articles are taking place.

Detailed explanation of all these will be found in the Introductory Chapter of the Report on Housing Tables.

TABLE E-II

TENURE STATUS OF SAMPLE CENSUS HOUSES USED AS DWELLINGS

This table has been prepared on the basis of 20% sample. Census households used as dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings, and dwellings with other uses have been taken into account for the purpose of marking the samples. Shop-*cum*-dwellings and workshop-*cum*-dwellings are census houses which are partly used for residential or dwelling purposes and partly used as a shop or workshop. The total number of households given in column 4 of this table gives the total of such samples classified into the aforementioned four categories of dwellings, which have been further classified according to their tenure status, whether owned or rented, for the whole State, all the districts, talukas and towns with population of 50,000 or more as also for total/rural/urban.

TABLE E-III

CENSUS HOUSES USED AS FACTORIES AND WORKSHOPS CLASSIFIED BY INDUSTRY, *POWER* AND *NO POWER* USED AND SIZE OF EMPLOYMENT

This table which gives for the first time, statistics of census houses used as factories, workshops and worksheds classified by power and no power used and size of employment has been prepared on the basis of full count. Establishments enlisted in the house-list have been classified into 3-digit industrial codes of minor group number of National Standard Industrial Classification. They pertain only to manufacturing industries which include repairing or servicing of the articles produced. The table is thus restricted to Divisions 2 and 3 of the Industrial Classification *plus* establishments relating to all the minor groups except 047 under major group 04 of Division 0. To facilitate identification of industries, the description of these Divisions, major and minor groups has been given in the annexure to this table.

All the establishments have been further classified according to the kind of fuel or power used, viz.,

(i) Electricity
(ii) Liquid fuel
(iii) Coal, Wood and Bagasse
(iv) Other power
(v) No power

Note: Entries having nil figures have been omitted from this table.

The classification of industries according to power or fuel is made in case of only those industries which use machinery. Wherever, therefore, machinery is not used, the fuel used in the manual process has not been taken into consideration and such industries have been classified as industries using 'No power'.

The table further gives details of the persons employed classified into the following seven categories.

1 person
2-5 persons
6-9 persons
10-19 persons
20-49 persons
50-99 persons
100 persons and above

Average number of persons working per day during the week preceding the day of enumerator's visit has been taken as criterion for number of persons employed. For the purpose of computing average number of persons, the total number of workers including apprentices, paid or not paid, employed in the factory or workshop including the owner or proprietor and any of his family members have been taken into account. The table gives details for the State, districts, and cities and towns with a population of 50,000 or more with rural/urban break-up. Definitions of the terms and concepts used in this table are the same as those explained in the fly-leaf to Table E-I.

Like all other tables in E-series, Table E-III has also been compiled down to taluka. But as printing of Table E-III for talukas is likely to occupy much space, it has been decided that the statistics of village industries extracted from the house-lists should be printed in the District Census Handbook. Those interested in such detailed distribution will find this information in the Census Handbook of the district concerned.

STANDARD INDUSTRIAL CLASSIFICATION

Division 2 & 3-Manufacturing-*Concld.*

Major Group (Code)	Description	Minor Group (Code)
37	*Machinery (All kinds other than Transport) and Electrical Equipment-Contd.*	
	Manufacture of heavy electrical machinery and equipment such as motors, generators, transformers	374
	Manufacture of electric lamps and fans	375
	Manufacture of insulated wires and cables	376
	Manufacture of all kinds of battery	377
	Manufacture of electronic equipment such as radio, microphone	378
	Manufacture of electric machinery and apparatus, appliances not specified above	379
38	*Transport Equipment*	
	Manufacture, assembling and repairing of locomotives	380
	Manufacture of wagons, coaches, tramways and other rail road equipment other than that covered by code No. 363	381
	Manufacture and assembling of motor vehicles of all types (excepting motor engines)	382
	Manufacture of motor vehicles, engines parts and accessories	383
	Repairing and servicing of motor vehicles	384
	Manufacture of bicycles and tricycles and accessories such as saddle, seat frame, gear	385
	Building and repairing of water transport equipment such as ships, boats and manufacture of marine engines	386
	Manufacture and repair of air transport equipment including aeroplanes, aeroengines	387
	Repairing of bicycles and tricycles	388
	Manufacture of other transport equipment not covered above such as animal drawn and handdrawn vehicles	389
39	*Miscellaneous Manufacturing Industries*	
	Manufacture of optical instruments and lenses, opthalmic goods and photographic equipment and supplies	390
	Manufacture of scientific, medical and surgical instruments and equipment and supplies	391
	Assembling and repairing of watches and clocks	392
	Manufacture of jewellery, silverware and wares using gold and other precious metals	393
	Manufacture and tuning of musical instruments	394
	Manufacture of stationery articles not covered elsewhere such as pencil, penholder, fountain pen	395
	Manufacture of sports goods	396
	Manufacture and repair work of goods not assignable to any other group	399

TABLE E-IV

DISTRIBUTION OF SAMPLE HOUSEHOLDS LIVING IN CENSUS HOUSES USED WHOLLY OR PARTLY AS DWELLING BY PREDOMINANT MATERIAL OF WALL AND PREDOMINANT MATERIAL OF ROOF

This table has been prepared on 20% sample basis. Census Households used as dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings and dwellings with other uses have been taken into account for the purpose of marking the sample. The total number of houses given in col. 3 of this table gives the totals of all such sampled households. The material out of which most of the walls are made or where a house consists of separate structures, each of different materials, the material out of which the walls of the main bedrooms are made has been entered. The wall material has been classified into the following nine categories:—

(1) Grass, leaves, reeds or bamboo
(2) Timber
(3) Mud
(4) Unburnt bricks
(5) Burnt bricks
(6) C.I. sheets or other metal sheets
(7) Stone
(8) Cement concrete
(9) All other material

The material out of which most of the outer roof exposed to the weather and not the ceiling is made, i.e., tiles, thatch, corrugated iron, zinc or asbestos cement sheets or concrete, etc., or in the case of multi-storeyed building, the material out of which the intermediate floor or floors has been made, have been entered and classified into the following seven categories:—

(1) Grass, leaves, reeds, thatch, wood or bamboo
(2) Tiles, slate, shingle
(3) Corrugated iron, zinc or other metal sheets
(4) Asbestos cement sheets
(5) Brick and lime
(6) Concrete and stone slabs
(7) All other material

This table has been prepared for the State, districts, talukas and cities and towns with population of 50,000 or more, as also for Total/Rural/Urban.

TABLE E-V

Sample households classified by number of members and by number of rooms occupied

This table has been prepared on 20 per cent sample basis. Census Households used as dwellings, shop-*cum*-dwellings, workshop-*cum*-dwellings and dwellings with other uses have been taken into account for the purpose of marking the samples. The figures given in Column 3 of this table are the totals of all such sampled households. The sex break-up of the total number of members occupying such sampled households as also the total number of rooms in these households are shown separately. All the sampled households have been further classified into the following six categories :—

Households with

(i) no regular room
(ii) one room
(iii) two rooms
(iv) three rooms
(v) four rooms
(vi) five rooms or more

The classification of households into the above categories gives not only the number of households in each category, but also the number of occupants by sex. The units for which this table has been compiled are State, districts, talukas and cities and towns with population of 50,000 or more, as also Total/Rural/Urban.
