*A Publication of the Chandigarh Administration.

The history of Chandigarh, the city beautiful, begins with the partition of the Indian Sub-Continent. Lahore the historic capital of undivided Punjab, having gone to Pakistan the need for a new capital for East Punjab arose. For a while the Government of East Punjab functioned at Jullundur. Thereafter as a make shift arrangement Simla became the Seat of Government. However, these places were not found suitable for a permanent Seat of Government. Several claims were put and finally the present site was chosen for the capital city due to its natural surroundings viz., Patiali Rao on the west, Sukhna Choe on the east, the monsoon rivers and Shivalik Hills on the north-east, which make for a check on the haphazard growth of the city. The other reasons for selecting this site were healthy climate, fertile land for growing trees, fruits and vegetables plentiful supply of water and availability of building materials like stone, sand and cement. The city was named after "Chandi", the Goddess of Chivalry. The holy shrine of Goddess 'Chandi' is located on Chandigarh-Kalka Road at a distance of about 12 kilometres in the State of Haryana.

2. *Initially the plan of Chandigarh was entrusted to Mr. Albert Mayar and Whittlesey of New York, Architects and Planners. At a later stage Monsieur Le Corbusier, a Swiss born French Architect of world fame and the chief collaborator of U.N. Buildings at New York, was associated in this work along with Monsieur Pierre Jeannert, his close associate in many of his great works of Architecture and Planning, Mr. Maxwell Fry, the acknowledged leader of modern Architecture in England and Miss Jane B. Drew, the best known women Architect in England. The present master plan of Chandigarh in execution is the outcome of the combined efforts of these experts.*

3. *The city has received wide acclaim as it represents the first major attempt at planning of a complete city which will function as a self-sufficient community. The basic planning unit of the city is the Sector. Each Sector is planned to be a self-contained unit providing for residential accommodation, a shopping centre, educational and medical facilities, place of worship, open space, etc. The industrial area is to the east while the capital complex is to the north.*

4. *The city was formaly declared open by the First President of India, Dr. Rajindra Parsad on 7th October, 1953.*

PREFACE

The present volume deals with the migration data for the Union Territory of Chandigarh. Migration data of Chandigarh, the city beautiful, will no doubt make for a fascinating study; but at this time the scope of the study would seem limited in that data are available for two censuses only, viz.; 1961 and 1971.

Following the all India pattern, data have been presented in this volume for rural and urban areas separately. The six tables presented here are explained in the fly leaves which precede each table.

I take this opportunity of thanking my colleagues in the Directorate of Census Operations of the Union Territory of Chandigarh, who undertook the onerous task of preparing these tables. To Shri M.L. Sharma are due my special thanks for the draft he gave me.

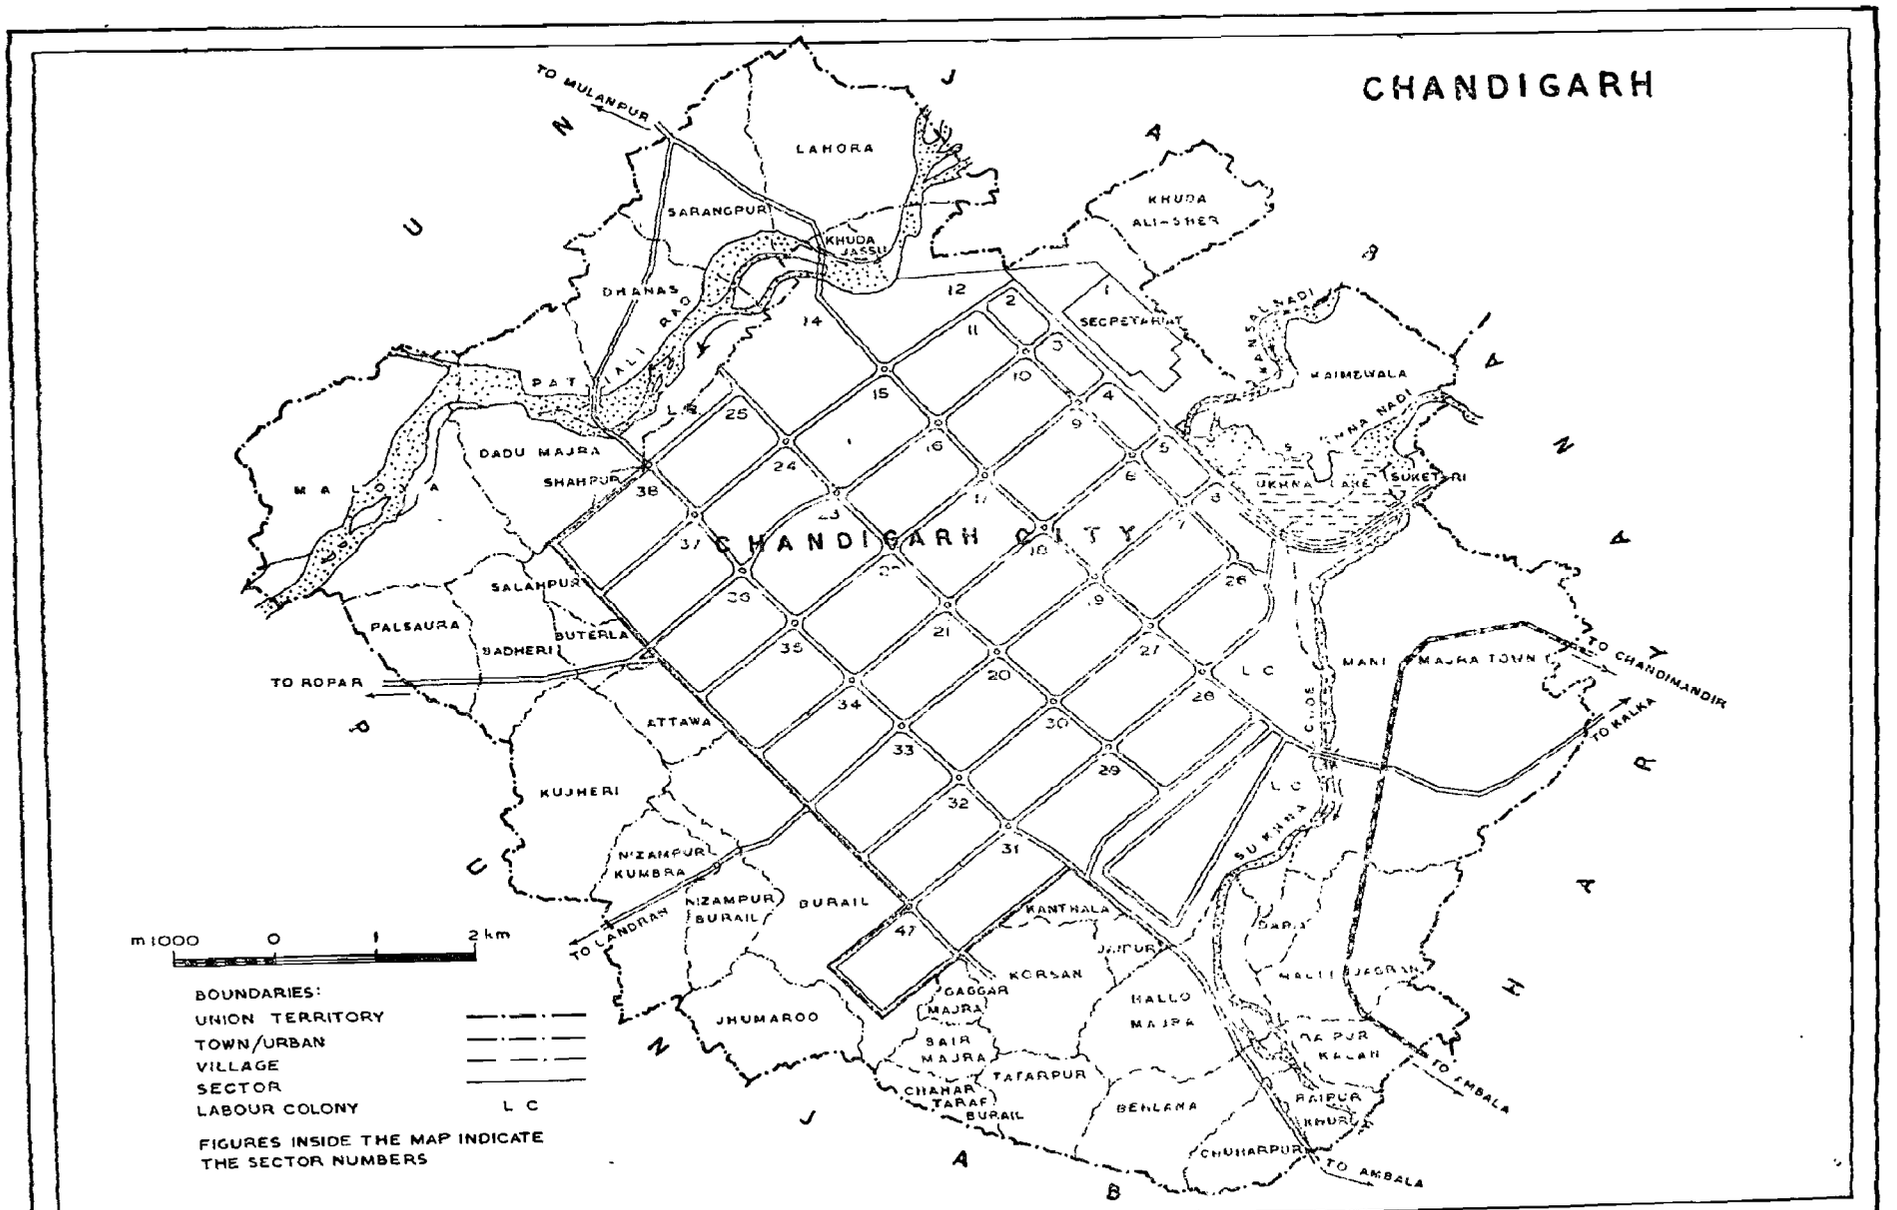

Last but not least, I thank the Controller, Printing and Stationery Department, Chandigarh Administration and his colleagues for taking interest in printing this volume.

K.K. CHAKRAVORTY

New Delhi,
Basant Panchami,
1 February, 1979.

Introductory Note

The present volume incorporates data on migration revealed by the 1971 census which incidentally happened to be the first census of the Union Territory of Chandigarh after its constitution in 1966. The subject of migration has assumed importance since the second world war. The complexity of problems posed by migration of population goes on increasing year after year due to multiple factors. The study of social and demographic processes is incomplete without a detailed study of migration in its varied aspects such as extent, direction, selectivity, motivation and adjustments etc. However, at detailed discussion of these is proposed to be undertaken separately in the main report.

The term migration connotes the change of residence from one geographical unit to another. Four migration streams can be identified, namely (i) rural to rural (ii) rural to urban (iii) urban to rural and (iv) urban to urban. In the present volume migration data are presented by the following broad categories (i) Migration within the state/union territory of enumeration (ii) Migration from other states/Union Territories but within India and (iii) Migration from other countries. In the first two cases break up by rural and urban sectors has also been presented. No such break up has, however, been given for external migration i.e. inmigration from other countries.

The political and social upheavals; natural calamities like floods, famines, earthquakes, epidemics and opening of new areas for industries and colonisation greatly stimulate the process of migration. During the second world war the development of industrial and urban centres saw large scale migration within the country. The partition of the sub continent in 1947 caused great exodus of population both ways. The factors like employment, education, marriage etc. also contribute to the process of migration. Chadigarh, the city beautiful, was built to serve as the capital of Punjab (East) due to loss of Lahore, the capital of undivided Punjab. The subsequent merger of Pepsu states with Punjab brought in its wake many Government officials alongwith families from Patiala to Chandigarh. The University, Government college of Engineering, Post Graduate Institute of Medical Science and other insitutions have large number of students on their roll from out side. Many refugees from Pakistan, who could not settle down elsewhere made Chandigarh as the permanent abode. The place of inmigration in this territory was so brisk that its population increased by 114.59 per cent during the last decade 1961—1971.

In India, data on migration has been collected by Census ever since the first synchronous census was held in the year 1881. These data were related to birth place till 1961. In the 1971 census, for the first time data on last residence migration were collected in addition to data on birth place migration. The various questions on migration have been shown in Annexure given at the end of this note.

The question on migration included in the schedules during 1961 and 1971 censuses are reproduced below :

Census Questionnaires

1961	1971
4. (a) Birth place	7. Birth place
(b) Born Rural/Urban	
(c) Duration of residence if born elsewhere	(a) place of birth (b) Rural/Urban (c) District (d) State/Country
5. (a) Nationality	
	8. Last residence
	(a) Place of last residence (b) Rural/Urban (c) District (d) State/Country
	9. Duration of residence at the villages or town of enumeration.

The answers recorded according to the above questions were tabulated as per list of tables given below.

1961

Table D-I Non-Indian Nationals.

Table D-II Place of birth

Table D-III Migrants classified by place of birth and duration of residence in the place of enumeration.

Table D-IV Migrants to cities classified by sex, broad age groups, educational levels and in case of workers also by occupational divisions and groups.

Table D-V Cities showing population born locally migrants from rural areas and migrants from other towns and cities

Table D-VI Distribution of industrial categories of workers and non-workers by place of birth.

1971

Table D-I Population classified by place of birth.

Table D-II Migrants classified by place of last residence and duration of residence in place of enumeration.

Table D-III Migrants to urban units (including agglomerations) having 100,000 and above population classified by sex, broad age groups educational levels and in case of workers by occupational divisions.

Table D-IV Population of urban units (including agglomerations) having 100,000 and above population classified by place of last residence and duration of residence.

Table D-V Migrants workers and non-workers according to main activities classified by place of last residence.

Table D-VI Migrants classified by place of last residence, age-groups, duration of residence and marital status.

It may however, be noted that though six tables were compiled on migration in 1961 none gave data separately for Chadigarh. This territory then constituted part of Ambala district which was in Punjab. 1961 Census tables on migration were not recast for Chandigarh. Hence no data are available for Chandigarh for 1961 Census. The tables presented in this volume are preceded by a flyleaf for each.

There are some perceptible changes in migration data of 1961 and 1971 Census. In 1971 Census a place was treated as urban if that was so at the time of migration from the place of usual residence of birth place. But in 1961 position was not so because a place was treated as urban if it was so at the time of enumeration. The rural/urban status of a place was taken at the time of migration in 1971 whereas it was treated as it was at the time of 1961 enumeration. Also variation in regard to duration of residence is quite noticeable, for a person born in another village or town/city of the district of enumeration. During 1961 completed years of residence were taken into account. In 1971 Census, however, the period of the existing continuous residence in the village or town where the person is enumerated was recorded in completed years even for those persons who were born at the place of enmeration. The coverage of question on migration—last place of residence in 1971 Census has been made in a more detailed manner, then in 1961 by including details of persons who were eligible as migrants according to last residence but not so by birth place.

Some of the terms used in this volume are defined below :—

1. *Migrant*—Is a person who has moved from one politically defined area to another similar area. In India such areas are generally a village in rural area and a town in urban sector.

2. *Birth Place Migrant*.—If at the time of census enumeration there is a change in the usual place of residence of an individual with reference to his/her birth place, he/she is defined as a migrant in accordance with birth place concept.

3. *Last Residence Migrant*.—If at the time of census enumeration a change in the usual place of residence of an individual is noted with reference to his/her previous usual residence, he/she is termed as a migrant in accordance with last residence concept.

4. *In-Migrant*.—A person who crosses the boundaries of a village/town for the purpose of residing at the place of enumeration is an in-migrant.

5. *Out-migrant*.—If a person moves out from the place of enumeration (village/town) to another politically defined area (village/town) for usual residence, he or she is termed as an out-migrant.

Migration according to the Birth Place

The following statement shows the extent of birth place migration by rural and urban areas in this territory.

STATEMENT I

Percentage of total migrants to total population in Union Territory Chandigarh according to Birth place

Chandigarh Union Territory	Total migrants	Migrants within U.T. Chandigarh	Migrants from other states/U.T.s. in India	Migrants from outside India	Unclassifiable
1	2	3	4	5	6
Total ..	76·01	1·31	62·40	12·28	0·02
Rural ..	46·97	4·52	40·30	2·15	..
Urban ..	79·04	0·98	64·70	13·34	0·02

Migration according to the last residence has been presented in the statement II given below:

The distribution of last residence migration

STATEMENT II

Percentage of total migrants to total population in Union Territory Chandigarh according to the place of last residence

Chandigarh Union Territory		Total Migrants	Migrants within U.T. Chandigarh	Migrants from other States, UTs. in India	Migrants from outside India	Unclassifiable
1		2	3	4	5	6
Total	..	76·28	1·47	73·41	1·36	0·04
Rural	..	46·08	6·29	38·72	0·72	0·35
Urban	..	79·43	0·96	77·03	1·43	0·01

A comparative study of statements I and II shows that extent of birth place migration and the last place of migration is quite high in this territory. This is attributable to the existence of sizeable urban sector where private and Government employees abound. They come from different parts of the country for employment. Besides the educational and technical institutions have attracted students from outside.

STATEMENT III

Migration to and from the neighbouring states by birth place

Name of the neighbouring States		Persons born in U. T. Chandigarh and enumerated in other States of India	Persons born in other States of India but enumerated in Chandigarh U. T.
1		2	3
Punjab	..	9,200	71,693
Haryana	..	3,820	26,751
Himachal Pradesh	..	1,445	15,475

ANNEXURE

Questions on migration in various censuses since 1881

1881 Census
Q. 9. Place of birth.

1891 Census
Q. 10. Birth district or country.

1901 Census
Q. 12. Birth place.

1911 Census
Q. 12. District, Province or country in which born.

1921 Census
Q. 12. Birth district.

1931 Census
Q. 13. Birth district (or country).

1941 Census
Q. 17. Were you born in this district ? If not, in what district.

1951 Census
2 (a) Nationality.
Q. 5. Birth place.
Q. 6. Displaced persons.

1961 Census
Q. 4(a) Birth place.
Q. 4(b) Whether born in rural or urban
Q. 4(c) Duration of residence, if born elsewhere.
Q. 5(a) Nationality.

1971 Census
Q. 7(a) Place of birth.
Q. 7(b) Rural/Urban.
Q. 7(c) District.
Q. 7(d) State/Country.
Q. 8(a) Place of last residence.
Q. 8(b) Rural/Urban.
Q. 8(c) District.
Q. 8(d) State/Country.
Q. 9. Duration of residence at the village or town of enumeration.

TABLE D-I

Population classified by place of birth

Fly-Leaf

This table consists of the main table and its appendix. The former has been included here whereas the latter has been ommitted as it deals with persons born in other districts of the State and enumerated in the district of enumeration. But since in the case of Chandigarh there is no other district as this Union Territory is a single district territory appendix to the main table was not compiled.

The main table corresponds to table D-IV of 1951 Census and table D-II of 1961 Census with minor changes.

The table classifies population by place of birth cross classified by place of enumeration. The place of enumeration has been divided into total, rural and urban areas with further break-down into persons, males and females. The birth places have been broadly subdivided into rural/urban/unclassifiable. A further detailed account has been presented of places of birth. The broad groups give the distribution by : A—Born in India, B—Born in countries in Asia beyond India (including U.S.S.R.), C—Countries in Europe (excluding U.S.S.R.), D—Countries in Africa, E—Countries in two Americas, F—Countries in Oceania and G—Unclassifiable. As far as numerical strength is concerned those born in India are more important. Hence a detailed account of such of the persons has been presented by : I—Within the State of enumeration and II—States in India beyond the State of enumeration. It would also be seen that while giving figures by countries only important countries have been shown whereas other countries have been grouped under 'Elsewhere' under each continent.

It may also be noted that figures of Assam include that of Mizo district which now constitutes the Union Territory of Mizoram.

D-I POPULATION CLASSIFIED BY PLACE OF BIRTH

Birth place	Rural/ Urban/ Unclassifiable	Enumerated in Rural or Urban areas of Chandigarh Union Territory

TABLE D-II

Migrants classified by place of last residence and duration of residence in place of enumeration

Fly-leaf

The table bears partial resemblance with table D-III of 1961 Census. In the 1961 Census the cross-classification was given between 'Duration of residence at the place of enumeration' and 'Place of Birth'. However, in the 1971 Census version the cross-classification of migrants has been presented by place of last residence and duration of residence in place of enumeration. It may be pertinent to point out here that during 1971 Census, data on last residence was attempted for the first time. Hence cross-classification has been presented in a modified form. During 1961 Census, study of migration was made by place of birth alone. During 1971 Census it has been made through twin aspects (i) last residence and (ii) place of birth. Thus 1971 Census approach for study of migration in a way is more broad based.

The table gives valuable data on the short term migration especially on Rural/Urban migration. It has been prepared at Union Territory level by duration of residence in place of enumeration further classified by rural, urban and unclassifiable. The term Unclassifiable has been used for those cases where rural/urban character of locality could not be ascertained. The migration data relating to place of last residence have been classified under the following seven groups :—

A. Last residence elsewhere in India ;

(i) Within the state of enumeration but outside the place of enumeration ;

(a) elsewhere in district of enumeration ;

(b) in other districts of state of enumeration ;

(ii) States in India beyond the state of enumeration :

B. Countries in Asia beyond India (including U.S.S.R.) ;

C. Countries in Europe (excluding U.S.S.R.)

D. Countries in Africa ;

E. Countries in two Americas.

F. Countries in Oceania, and

G. Unclassifiable.

The migrants have further been distributed according to their duration of residence in place of enumeration. Duration has been classified into the following six ranges : (i) Less than 1 year (ii) 1—4 years (iii) 5—9 years (iv) 10—19 years and (v) 20+ years and (vi) Period not stated. Figures under each of these groups present further sub-division by males and females. On comparison with the 1961 Census version it would be noticed that age groups have undergone slight variation. It may, however, be noted that figures of Assam include Mizo district now constituted as Union Territory of Mizoram.

APPENDIX

Migrants by state of last residence and age for duration of residence of 0—9 years—Males/females

This appendix has been introduced for the first time. Herein figures have been presented for those migrants whose duration of residence at the place of enumeration is between 0—9 years. The persons with longer duration, however, have been left out. This presents figures for males and females separately. Further this gives distribution of migrants by last residence by States/Union Territories with break down by rural and urban areas. A separate column has been provided for those whose last residence was recorded as any place outside India. These data are cross classified by various age-groups of the migrants with break down into rural and urban areas at the place of enumeration. The age-groups are : 0—2 years, 3—7 years, 8—12 years, 13—17 years, 18—22 years.....upto 68—72 years and 73+ years. Those whose age was not stated have been grouped separately.

It may, however, be noted that these data do not include those whose place of last residence was unclassifiable. The Assam figures include figures for Mizoram also which has been constituted as Union Territory of Mizoram. Also the figures relating to Sikkim have not been shown in the appendix as the rural/urban break up of the data was not available.

TABLE D-III

Migrants to urban units (including Agglomeration) having 100,000 and above population classified by sex, broad age-groups educational levels in case of workers by Occupational Divisions.

Fly-leaf

This table corresponds to table D-IV of 1961 Census with which it shows marked difference of form and content. This table deals with migrants in relation to last residence unlike 1961 when migrants were related to birth place. The table gives the distribution of migrants for Chandigarh Urban Agglomeration constituting Chandigarh City and Mani Majra town.

In this table distribution has been given of migrants into the urban areas of Chandigarh from all corners of the country and from outside India. The break down of these migrants is given by place of last residence in great detail. Those from within the country have been shown by States and Union Territories. A further breakup has been given by broad age-groups such as: (i) Total (ii) 15-29 years and (iii) 30-59 years.

The details of last residence have been cross-classified by various educational levels. A further break down of this classification has been given of workers engaged as cultivators, agricultural labourers and according to occupational divisions such as: 0—1 Professional, Technical and related workers, 2 Administrative, Executive and Managerial worker, 3 Clerical and related workers, 4 Sales workers, 5 Service workers, 6 Farmers, Fishermen, Hunters, Loggers, and related workers 7-8-9 Production and related workers, Transport equipment operators and labourers and X Workers not classified by occupations. Besides this distribution of non-workers has been given. All these data are shown by sex.

This table includes figures for educational level not classifiable. Outside India includes unclassifiable foreign countries. Figures pertaining to age-groups 0—14, 60+and age not stated are included in total. Those States/Union Territories for which data are nil have not been shown. The figures of Assam include figures of Mizo district now constituted as Union Territory of Mizoram.

TABLE D-IV

Population of urban units (including agglomeration) having 100,000 and above population classified by place of last residence and duration of residence

Fly-Leaf

This table corresponds to table D-V of 1961 Census. The 1961 Census version presented data for cities whereas in the instant table this has been presented for urban agglomerations of cities having population 100,000 and above. Since there is only one such unit in this territory the break down has not been given by city.

The data included in this table comprise the total population of the unit with break down by sex. The data have been split up between non-migrants and migrants. The non-migrants are mainly those who are locally born. These also include those persons who did not report any last residence. The migrants have been classified into three categories viz. (i) last resided in rural areas of India (ii) last resided in other urban areas of India and (iii) last resided in rural or urban areas of Sikkim. It would thus be seen that migrants from outside India have been excluded from the ambit of this table. The table gives the extent of in-migration from rural and urban areas into the urban agglomeration.

The migrants have been further classified into three *following categories : (1) Within the district of enumer*ation (2) Other districts within the state of enumeration (in case of Chandigarh this is not applicable as Chandigarh is a single district Territory) and (3) Other states in India. In the case of migrants from Sikkim this pattern is not applicable. Each of the category has been further bifurcated by period of residence at the place of last residence viz. (i) Less than 3 years and (ii) 3 years or more. In case period of residence is unspecified it has been clubbed under the category 3 years or more.

It may, however, be noted that returns wherein place of last residence rural/urban is not reported have been excluded. Also returns with unclassifiable place of last residence have been excluded from the table.

D-IV POPULATION OF URBAN UNITS (INCLUDING AGGLOMERATION) RESIDENCE AND

Serial No.	City/Urban agglomeration (District)	Total population			Non-Migrants		Last resided in rural areas of							
							Within the district of enumeration and resident for				Other district within the state of enumeration and resident for			
							Less than 3 years		3 years or more		Less than 3 years		3 years or more

TABLE D-V

Migrant workers and non-workers according to main activities classified by place of last residence

Fly-Leaf

This table corresponds to table D-VI of 1961 Census. In the present table cross-classification of workers and non-workers with break down by main industrial categories and last residence has been presented. In the 1961 Census, birth place concept was used. The concept of place of last residence has been introduced for the first time in the 1971 Census. It will, thus be observed that in the 1971 Census for studying the migration pattern a double approach has been adopted. It is widely admitted that last residence approach is technically more sound. Hence a more liberal use has been made of this variable.

This table presents distribution of workers by sex and by nine industrial categories such as I—Cultivators, II—Agricultural labourers, III—Livestock, Forestry, Fishing, Hunting and plantations orchards and allied activities, IV—Mining and Quarrying, V—Manufacturing, Processing, Servicing and repairs (a) Household industry (b) other than household industry (VI) Construction, VII—Trade and Commerce, VIII—Transport, Storage and Communications and IX—other services. Besides this, distribution has been given for non-workers, This table indicates the industrial categories attracting migrants and also tells us whether in the different industrial categories the flow of migrants is from the Rural to Urban areas or vice-versa. The data for last residence have been presented under the following groups with further break down Rural, Urban and unclassifiable ; A—Residence in India (I) Within the State of enumeration but outside the place of enumeration. (a) Elsewhere in the district of enumeration (b) In other districts of state of enumeration, (II) — States in India beyond the State of enumeration ; B—Countries in Asia beyond India (including U.S.S.R.) C—Countries in Europe (excluding U.S.S.R.); D—Countries in Africa ; E—Countries in two Americas F—Countries in Oceania and G—Unclassifiable. The total of remaining countries in each continent is given against 'elsewhere' in the table. The data have been presented for the Union Territory and urban agglomeration of Chandigarh with further breakup by total and rural areas. In the 1961 census, however, figures were shown by total/rural/urban areas. It may also be noted that Assam figures include figures for Mizo district which has been constituted Union Territory of Mizoram.

TABLE D-VI

Migrants classified by place of last residence, age-group, duration of residence and marital status.

Fly-leaf

This is a new table introduced for the first time during 1971 Census. In this table distribution of migrants cross-classified by place of last residence and place of enumeration has been presented. Distribution of migrants by period of duration, marital status and age-groups is also given. The durations of residence are ; (1) Less than 1 year; (2) 1—9 years and (3) 10 years and above. It may, however, be noted that figures in all duration include those for whom period of duration of residence is not stated. Such of the cases have not been mentioned in the table. The three marital status given are : (1) Never Married (NM); (2) Married (M) and (3) Divorced; Separated and Widowed (W & D). The various age-groups given are: (1) 0—14, (2) 15—19, (3) 20—24, (4), 25—49 and (5) 50 and above. For 'age not stated' figures are depicted separately. Sexwise breakdown has also been given for each age-group separately.

The place of last residence shows distribution into the follwing categories :—A-Resided in India, 1—Within the state of enumeration but outside place of enumeration, (a) Elsewhere in district of enumeration (b) other districts in the State of enumeration, (this is not applicable in case of Chandigarh as it is a single district territory), II-States in India beyond the state of enumeration and; B—Outside India.

The table presents figures for Union Territory/ District/Urban units (including urban agglomerations) having 100,000 and above population. In this table district figures have not been shown separately as union territory and district figures are identical. Also urban units have not been shown separately as Chandigarh Agglomeration comprises both the urban units viz. Chandigarh and Mani Majra town falling in this Union Territory.

The table presents break down of figures by rural/ urban areas. For Union Territory Rural/Urban pertain to 'Place of enumeration, whereas in case of Chandigarh Urban Agglomeration Rural/Urban pertains to 'Last residence of migrant'.

In a few cases the last place of residence as returned by the respondent could not be properly classified. These cases were treated as unclassifiable place of last residence. While presenting the data, the figure for unclassifiable last place of residence are included in total for rural and urban, whereas for urban areas these figures are also included in "Section B-Out side India". But in case of rural areas, these are included in total only. Due to the fact explained above, the rural total of Union Territory as shown in this table do not tally if it is added up sectionwise for places of last residence.

It may, however, be noted that an inter-table check reveals a discrepancy between table D-VI and table C-II pertaining to Chandigarh rural in Age Group 15—19 for Widowed and Divorced males. It would be seen that whereas the figure for the above said category in Table D-VI is 3 it is only 1 in table C-II. In fact figures in Table D-VI need not exceed the corresponding figures appearing in table C-II and that Migration data should be on the lower side when compared with C-II table. Since this discrepancy was noticed at quite a late stage this could not be reconciled without having a recourse to the primary data.

Note.— 1. Figures of unspecified marital Status are included in total.

2. All durations include figures for 'period not stated', and as such will not tally with the total of figures under less than 'one year', 1—9 years and '10 years and above'.

3. Figures for unclassfiable last place of residence are included in total for Rural and Urban. Where as for Urban these figures are included in Section 'B—Outside India' but in rural these are included in Total only.

4. NM stands for never married, M stands for married, W & D stands for widowed, divorced and separaled and A.N.S. stands for age not stated.
