NOTE

This is the second of the two volumes which together comprise the six main 1961 Census tables on migration. Tables D-I, D-II and D-III covering the subjects of nationality, birth place and duration of residence have been produced in Part II-C(ii). The present volume includes Tables D-IV, D-V and D-VI.

Tables D-IV and D-V relate only to cities, i.e., *towns with population of 100,000 and above. The former classifies the immigrants in each city by age, education and, in case of workers, occupation. The latter groups the city population into those born locally, migrants from rural areas and migrants from urban areas, the migrants having been further classified broadly by distance of migration and duration of residence. Table D-VI shows the distribution of Industrial Categories of workers and non-workers by place of birth in the rural and urban population of each district and in the population of each city.*

The 1961 Census was the first occasion on which information about duration of residence and rural-urban status of place of birth of the migrants was collected. One of the principal objects in view with regard to the collection of this additional information was the aid thereby gained in extending the scope of the study of the birth place statistics to details hitherto unattainable. It is hoped that the tables now presented will stimulate such study.

MIGRANTS TO CITIES CLASSIFIED BY SEX, BROAD AGE-GROUPS, EDUCATIONAL LEVELS AND IN CASE OF WORKERS ALSO BY OCCUPATIONAL DIVISIONS AND GROUPS

TABLE D-IV—MIGRANTS TO CITIES CLASSIFIED BY SEX, BROAD AGE-GROUPS, EDUCATIONAL LEVELS AND IN CASE OF WORKERS ALSO BY OCCUPATIONAL DIVISIONS AND GROUPS

This table relates to cities only. A city for Census purposes is a town with a population of 100,000 and above. The table covers individual cities not town-groups. For cities which are constituent units of town-groups, information in this table has been given of the cities alone, not of the town-groups concerned. The twelve cities have been arranged in the descending order of population.

2. The table classifies the migrants to a city, separately for Workers and Non-workers, by Sex, broad Age-groups, Literacy and Educational levels. The migrants who are workers have been further classified by Occupational Divisions and Groups, along the National Classification of Occupation. The age-groups are 0-14, 15-34, 35-59, 60+, and Age not stated. The classification by literacy and levels of education are the same as in Table C-III Part B, *i.e.*,

Illiterate

Literate (without educational level)

Primary or Junior Basic

Matriculation or Higher Secondary

Technical diploma not equal to degree

Non-technical diploma not equal to degree

University degree or post-graduate degree other than technical degree

Technical degree or diploma equal to degree or post-graduate degree :

Engineering
Medicine
Agriculture
Veterinary and Dairying
Technology
Teaching
Others

3. For economy in space, lines with nil entries have been omitted and Occupational Groups having less than 5 per cent (2·5 per cent in case of Groups in Division 7-8) of the figures of the respective Division have not been printed in the main table. A mark of asterisk (*) has been given against the Division thus affected in the main table and the figures of these numerically smaller Groups have been shown in an Appendix to the table in run on lines giving the number of the Group, Age-group and Educational level in abbreviation, and the number of males and females in brackets.

4. This is a new table of the 1961 Census and an important one at that because it pinpoints the occupations which specially attract migrants to a city. The classification of migratns by literacy and educational levels will show the magnitude of influx of skilled and unskilled workers into the city, while information by age-groups will have special significance to economic productivity and growth.

CITIES SHOWING POPULATION BORN LOCALLY, MIGRANTS FROM RURAL AREAS AND MIGRANTS FROM OTHER TOWNS AND CITIES

TABLE D-V—CITIES SHOWING POPULATION BORN LOCALLY, MIGRANTS FROM RURAL AREAS AND MIGRANTS FROM OTHER TOWNS AND CITIES

This is yet another new table of the 1961 Census. Like the preceding table this one also has been prepared for the twelve cities only. It classifies the population of a city into the following three groups :

(A) Born in Rural Areas,

(B) Born in City of Enumeration,

(C) Born in other Urban Areas.

2. Group (A) has been sub-classified into :

(i) Born in Rural Areas of the same district and resident in the city for less than 3 years,

(ii) Born in Rural Areas of the same district and resident in the city for 3 years and more,

(iii) Born in Rural Areas outside the district but within the State and resident in the city for less than 3 years,

(iv) Born in Rural Areas outside the district but within the State and resident in the city for 3 years and more,

(v) Born in Rural Areas outside the State and resident in the city for less than 3 years,

(vi) Born in Rural Areas outside the State and resident in the city for 3 years and more.

3. This sub-classification has also been adopted *mutatis mutandis* for Group (C).

4. It is important to note that a person has been treated as born in a town if the place of his birth was considered a town at the time of the enumeration, even if it was not so considered at the time of birth.

5. This table shows the extent of in-migration into a city from villages and towns, near and far, and indicates whether the flow is increasing, steady or subsiding.

6. The cities have been arranged in descending order of population.

This table does not include that portion of the immigrant population (i) who were born outside India, (ii) whose birth places were not recorded as rural or urban and (iii) whose duration of residence was not stated.

D-VI

DISTRIBUTION OF INDUSTRIAL CATEGORIES OF WORKERS AND NON-WORKERS BY PLACE OF BIRTH

TABLE D-VI—DISTRIBUTION OF INDUSTRIAL CATEGORIES OF WORKERS AND NON-WORKERS BY PLACE OF BIRTH

This table has a limited correspondence to Subsidiary Table (i) to Union Table D-IV of 1951 which classified the population born in other States of India but enumerated in West Bengal and Sikkim by Sex, place of Birth and Livelihood Classes. It did give no account of persons born elsewhere within the State or born outside India. In 1961, Industrial Categories replaced the Livelihood Classes. Apart from the consequential difference owing to change in the basis of economic classification, the scope of the table this time has been so enlarged as to include within its fold all classes of migrants and also persons born at the place of enumeration.

2. The table has been prepared for Total, Rural and Urban population separately. There is a fourth part of the table which relates to the cities only. Calcutta, which is both a city and an entirely urban district, has been shown only in the Urban portion of the table for avoiding duplication. In case of 'Total' and 'Urban' tables, the classification of the population by place of birth has been done on the same lines as in Table D-II, *i.e.*, by the following groups :

A. Born in India

I. Within the State of Enumeration

(*a*) Born in place of Enumeration

(*b*) Born elsewhere in the District of Enumeration

(*c*) Born in other Districts of the State

II. States in India beyond the State of Enumeration

(*a*) State 1

(*b*) State 2 etc.

B. Born in countries in Asia beyond India (including U.S.S.R.)

(*a*) Afghanistan

(*b*) Burma etc.

C. Countries in Europe (excluding U.S.S.R.)

D. Countries in Africa

E. Countries in Two Americas

F. Countries in Oceania

G. Born at Sea

H. Unclassifiable

2.1 The Group A has been further classified according as the place of birth is rural, urban or unclassifiable but the line for 'Unclassifiable' in Col. 2 is omitted as the total figure under this category is less than 5 per cent of the total population in the particular main group in Col. 1.

2.2 The 'Total' and 'Urban' tables exclude the information of those States under Group A-II, from where the immigrants have been less than 1 per cent of the *total immigrants* in that Group. The States thus omitted are shown in the Appendix I to this table. The percentage for Appendix I has been calculated on the immigrants of the 'Total' table. Thus the Appendix I has been prepared for 'Total' only, and the figures for urban areas have been inserted below the total figures of the State concerned. For economy in space the Appendix I has been prepared in run on lines.

2.3 So far as the countries beyond India are concerned, the important countries have been shown in the 'Total', 'Urban' and 'City' tables and the statistics of remaining countries have been clubbed and presented under respective continents of Groups B, C, D, E, etc., against "Elsewhere". The details of "Elsewhere" have been presented in Appendix II to Table D-VI. For economy of space Appendix II to Table D-VI (for 'Total', 'Urban' and 'City') has been prepared in run on lines.

3. So far as the 'Rural' part of the table is concerned, it is prepared for the following groups of immigrants only :

A. I. Within the State of Enumeration

(*a*) Born in place of Enumeration

(*b*) Born elsewhere in the District of Enumeration

(*c*) Born in other Districts of the State

II. Four numerically most important States of immigration

3.1. The selection of the States for Group A-II has been made separately for each unit of presentation, *viz.*, for State, each Division and each District. States have been selected on the total number of immigrants of the 'Rural' table, *not* of the 'Total' table, and have been exhibited in the descending order of migrants.

4. So far as the remaining part of the table relating to cities of population of one lakh and over is concerned, it has been presented in full except the abridgement and omission indicated in paragraphs 2.1 and 2.3.

APPENDICES

APPENDIX I TO TABLE D-VI

For economy in space, the main tables for 'Total' and 'Urban' exclude information of those States under Group A-II of migrants (*i.e.*, born in States beyond the State of enumeration), from where the number of immigrants has been less than 1 per cent of the *total immigrants* in that group. The States thus omitted are shown in this appendix.

2. The percentage for purposes of this appendix has been calculated on the immigrants of the 'Total' table. Thus there has been only one appendix for 'Total' only, and the figures for urban areas have been inserted below the total figures of the State concerned.

3. Figures have been shown in this appendix in run on lines for economy in space.
