PREFACE

Movement of population from one place to another in search of employement, educational facilities etc. has assumed much importance in the recent decades. The migration of people from rural parts to urban centres and *vice versa* plays a significant role in estimating the growth of population. In the present developing economy, such migration is of significant interest to sociologists, demographers, planners and administrators.

The present volume contains six tables on the migrational aspects of the population of Tamil Nadu as gathered from the individual slips of 1971 Census. The data are estimated from at 10 per cent sample for rural areas and 20 per cent sample for urban areas.

An introductory note has been presented which spells out the scope and contents of the migrational data compiled. A fly leaf explaining, in brief, the data presented in the table precedes each table.

S/Sri T. V. Srinivasan and M. Thangaraju, Deputy Directors and Sri M. Panchapakesan, Assistant Director of Census Operations rendered able assistance in compiling the materials for this publication. S|Sri R. Narayana and S. Packiaraj, Tabulation Officers assisted by Smt. B. Jayalaksmi, Statistical Assistant and S/Sri R. Lakshminarayanan and R. Srinivasan, Research Assistants helped in the scrutiny and finalisation of tables. Sri K. Kannappan, Sri K. Sundaram, Kum. R. Premakumari, Kum. V. Santha, Kum. S. Ambujam, Smt. G. Vasantha, Kum. S. Philomina, Assistant Compilers and Smt. B. Rajeswari, Lower Division Clerk were all associated in the prepartion and fair-copying of the tables and I wish to record my appreciation of their enthusiasm and co-operation in bringing out this publication.

I wish to place on record my thanks to Sri R. B. Chari, I.A.S. former Registrar General, India for the help given to me for releasing the 1971 Census results in timely publications. Sri K. K. Chakravorty, Assistant Registrar General (Census) and the officers and staff of the Data Processing and Census Divisions of the Office of the Registrar General, India deserve my thanks for the preparation of sample tables and prompt clearance of estimated tables of Tamil Nadu published in this volume.

Lastly, I convey my thanks to Sri S. K. Verma, Manager, Govt. of India Press, Ringh Road, New Delhi and his officers for their co-operation in the printing of this book in a short time.

K. CHOCKALINGAM,
Director of Census Operations,
Tamil Nadu and Pondicherry.

Madras;
12-1-1978.

INTRODUCTORY NOTE

This volume contains six tables known as "Migration Tables of 1971 Census" relating to Tamil Nadu. According to earlier Censuses, migration was based on the place of birth but the concept was enlarged at this Census. The extent of migration is determined not only with reference to the place of birth but also with reference to the place of last residence, since statistics based on the place of birth alone, do not reveal the intermediary movements of population between various places. As such, a person who was moving from place to place will not be considered as a migrant if he happened to be at the place of birth at the time of enumeration. During 1961 census an attempt was made to enlarge the scope of enquiry in the field of migration and data were collected to fill up the gap felt in migration statistics. The following information was elicited.

*Qn.*4(a) Birth place

4(b) Birth place R/U (Rural/Urban)

4(c) Duration of residence if born elsewhere

*Qn.*5(a) Nationality

In order to get a more meaningful picture on migration, the movement of population relating to the place of last residence is taken into account. However to maintain comparability with 1961 figures on migration, one table is prepared with reference to the place of birth. The collection of data on Nationality has been dropped during this Census.

In 1971 Census, the information on migration has been ascertained from the following questions.

Qn. No. 7. Birth place

(a) Place of Birth

(b) Rural/Urban

(c) District

(d) State/Country

Qn. No. 8. Last residence

(a) Place of last residence

(b) Rural/Urban

(c) District

(d) State/Country

Qn. No. 9. Duration of residence at the village or town of enumeration

Informationon the place of birth, rural/urban status of the place of birth; district and state/country of the place of birth are ascertained from Question 7. Similar details on the place of last residence are ascertained from Question 8. Question 9 gives the duration of residence at the village/town of enumeration if a person had another place of normal residence irrespective of his place of birth, before he came to the present place where he is enumerated. Even if a person were born at the place of enumeration and if by the nature of his work or for studies etc., he had shifted subsequently to another village or town and had come back again to thep lace of enumeration, he should be deemed to have had another place of residence prior to his enumeration in that place.

An extract of the Instructions to Enumerators for recording answers to these questions on migration is reproduced in Annexure I.

Based on the data collected with the help of these questions on migration and other general questions such as Sex (Question 3); Age (Question 4); Marital status (Question 5); Literacy (Question 12); Educational Level (Question 13) Main Activity (Question 16), the following characteristics of migrants could be had in the Migration tables, which have been prepared, on 10% sample in the case of rural areas, and on 20% sample in the case of urban areas.

1. Rural-urban nature of birth places and of the places of enumeration with cross classifications for,
   a. Born in place of enumeration
   b. Born elsewhere in the district of enumeration
   c. Born in other districts of the State of enumeration
   d. Born in any of the other States or Union Territories in India
   e. Born outside India (No rural—urban classification of place of birth was made) (Table D---I)
2. Rural-urban nature of place of last residence and of the places of enumeration with the same cross classification as in item 1 above (Table D.II)
3. Migrants (based on the place of last residence) to cities/urban agglomerations having more than one lakh of population classified by sex, broad age-groups, educational level and in case of workers by occupational divisions (Table D—III)
4. Distribution of population of cities/urban agglomerations having more than one lakh of

population as migrants and non-migrants. In case of migrants (based on the place of last residence), in-migrants from rural areas and from other urban areas to cities/urban agglomerations classified with reference to the spells of stay at the place of enumeration (i) for less than 3 years and (ii) for 3 years and more (Table D-IV).

5. Migrants (based on the place of last residence) classified into workers and non-workers according to main activity with cross classifications as in item 2 above (Table D-V).

6. Classification of migrants by place of last residence and marital status (Table D-VI).

To arrive at the final estimated tables D-V to D-VI, the figures in the sample tables have been multiplied uniformly by 10 in case of rural and by 5 in case of urban. For D-I, multipliers have been used for estimation. A note on Sampling Procedure adopted in 1971 Census given in Annexure II.

ANNEXURE I

Extract from Instructions to Enumerators for filling up the Individual slip

Question 7 : Birth Place

48. Answer to this question has to be filled with reference to the place of birth of the persons enumerated and the particulars recorded under the four sub-items of this question.

7 (a) Place of Birth

49. Write 'PL' for a person born in the village or town where he is being enumerated. Where 'PL' is noted against this question, put 'X' against sub-items (b), (c) and (d).

For those born outside the village or town of enumeration write the actual name of the place against sub-item (a) and fill the other details against sub-items (b), (c) and (d).

7 (b) Rural/Urban

50. For those born outside the village or town of enumeration ascertain if the place of birth was a village or town at the time of his birth. To enable a person to determine whether the place was a town or a village he may be required to indicate the status of the place of birth in comparison with a known town in the neighbourhood of the place of enumeration. You may mention some important urban characteristics to enable the person to make out if the place of his birth was rural or urban, e.g., existence of a local administrative body, industrial townships declared as towns etc.

For a person born in a village, write 'R'.

For a person born in a town/city, write 'U'.

For a person born in a foreign country put 'X' against this sub-item and also against sub-item (c). If all efforts to classify the place of birth as rural/urban fail, write 'not known'.

7 (c) District

51. For a person born outside the village or town of enumeration but within the district of enumeration write 'D'. For a person born in another district of the State of enumeration, or other State/Union Territory in the country, write the name of the district. If the person cannot name the district, write 'not known'.

7 (d) State/Country

52. For persons born within the State of enumeration write 'X' against this item. Make sure that the earlier entries made in sub-items (a), (b) and (c) are consistent with such an answer ; that is 'PL' might have already been written against sub-item (a) or 'D' is written against sub-item (c) or any other district of the State of enumeration is mentioned against sub-item (c).

53. For persons born outside the State of enumeration but within the country, write the name of the State/Union Territory where born.

54. For those born outside India, note merely the name of the country and there is no need to enter the name of the constituent State of the foreign country . Where a person cannot name the country, the name of the continent may be noted.

55. For a person born on sea, record 'born at sea', against this sub-item and put 'X' against sub-items (a), (b) and (c). If a person was born in a train, boat or bus etc., within the country, write the particulars in (a), (b) and (c) with reference to the administrative territory where the event occurred or was registered.

Question 8 : Last Residence

56. Answer to this question will have to be filled in respect of every person if he had another place of normal residence irrespective of his place of birth, before he came to the present place where he is enumerated. Even if a person were born at the place of enumeration, by the nature of his work or for studies etc., he had shifted subsequently to another village or town and had come back again to the place of enumeration, he should be deemed to have had another place of residence prior to his enumeration here.

The last previous residence is relevant only if he had been outside the village or town of enumeration and not simply in another house or locality in th same place. For example, if a person born in one part of Bombay City is found residing in another part of Bombay at the time of enumeration, the change of residence should not be treated as change of place of residence because both the areas are comprised in the same City of Bombay. Similarly, a person born in hamlet 1 of village, Rampur and found in hamlet 2 of the same village at the time of enumeration, should not be deemed to have had any other place of residence than the village where he is enumeraed. Where a person had merely gone out to another place or had been shifting from place to place purely on tour or pilgrimage or for temporary business purposes, he should not be deemed to have had another residence different from the place where he or his family normally resides but if the person had his normal residence, i.e., if his normal home had been elsewhere any time before he is enumerated at his place of present residence, irrespective of where he was born, such place of his previous residence should be recorded here.

8 (a) Place of last residence

57. For a person who had been in the village or town of enumeration continuously since birth (except for shifting to other places outside the village or town

of enumeration for a purely temporary stay) write 'PL' against sub-item (a) and put 'X' against sub-items (b), (c) and (d).

For a person who had had his last previous residence at any place outside the village or town of enumeration (irrespective of his place of birth), write the actual name of the village or town where his last residence was against sub-item (a) and fill the other details against sub-items (b), (c) and (d).

8 (b) Rural/Urban

58. For a person who had previously resided outside the place of enumeration, ascertain if the place of last previous residence was rural or urban and record the answer. For a person whose last previous residence was a village write 'R'. For a person whose last previous residence was a town/city, write 'U'. For a person who last resided in a foreign country write 'X'. For a person whose last previous residence cannot be classified, write 'Not known'.

Rural or Urban status has to be determined with reference to the time of migration from the place of last previous residence to the place of enumeration.

For helping the person to determine whether a place was rural or urban, you may mention important urban characteristics as indicated in the instructions against item 7 (b) in para 50.

8 (c) District

59. For a person who had previously resided in another place, i.e., for whom 'PL' is not written against sub-item (a) you have to fill in this item in the manner indicated below :—

For a person who previously resided in another village or town within the district of enumeration write 'D'. For a person who previously resided in another district of the State/Union Territory of enumeration or of other State/Union Territory in the country, write the name of the district. If he cannot name the district write 'Not known'. For a person whose last previous residence was outside India write 'X' against this sub-item.

8 (d) State/Country

60. For a person whose last previous residence was outside the village or town of enumeration but within the State or Union Territory of enumeration write 'X' against this item; but if it was outside the State or Union Territory of enumeration but within the country write the name of the State/Union Territory. For a person whose last previous residence was outside the country, write the name of the country and if name of the country is not forthcoming write the name of the continent.

For persons who had not moved out at all from the present place of enumeration from birth (except for purely temporary stay) this sub-item need not be filled and 'X' should be put in respect of persons against this sub-item.

Question 9 : Duration of Residence at the village or **town of enumeration.**

61. Note here the period of the existing continuous residence in the village or town where the person is being enumerated, in completed years. This will apply to even a person born at the place of enumeration. If he had left this village or town and had lived elsewhere for some time, i.e., in Q. 8 another place of last residence is reported and has come back again to this village or town, then the duration of residence to be noted against this question is the period of the last continuous residence. But if a person had been away on a temporary visit or tour etc., that should not be taken as a break in the period of his continuous residence here. If the person was born at the place of enumeration and also had no other place of last residence, i.e., 'PL' has been noted in Q. 8 (a) then 'X' may be put against Q. 9.

For a person whose duration of continuous residence at the place of enumeration is less than 1 year, it should be noted as '0'.

ANNEXURE II

A note on sampling procedure adopted in 1971 Census

Sample size : From the individual slips relating to the rural parts of a tehsil/anchal/police station, a ten per cent sample of the slips was selected linear systematically with a random start. For the urban part of the district, a twenty per cent systematic sample of the individual slips was selected with a separate random start. The sample sizes were adopted on consideration of required precision, available resources and operational convenience.

Selection procedure : The sample design adopted was a stratified systematic sample of individual slips. For the purpose of sample selection, each district was divided into three sub-regions as follows :—

1. Tehsil/anchal/police station (Rural)
2. Non-city urban district
3. City (urban unit with population of 100,000 and above).

These sub-regions were termed as operational units. If, however, any of the operational unit was unduly large, it was divided into sub-operational units of at least 20,000 persons. Similarly, small-sized operational units were either clubbed together or tagged on to a contiguous unit so as to form an "effective operational unit" of the required minimum size. Adoption of these operational units ensured accuracy in sample selection, maintaining at the same time stability in the sampling fraction within the tabulated areas. The procedure adopted has ensured effective control over sample selection within each block, as also in the entire operational unit.

For the purpose of the PCA, the individual slips were sorted out according to eleven broad industrial categories and nine broad age-groups for each of the sexes. The industrial categories of workers and non-workers were as follows :—

Categories :

I Cultivators

II Agricultural Labourers

III Livestock, forestry, fishing, hunting and plantations, orchards and allied activities

IV Mining and quarrying

V(a) Manufacturing, processing, servicing and repairs in *household industry*

V(b) Manufacturing, processing, servicing and repairs in *other than household industry*

VI Construction

VII Trade and commerce

VIII Transport, storage and communications

IX Other services

X Non-workers

The nine age-groups into which the slips belonging to each industrial category were sorted were 0–14, 15–19, 20–24, 25–29, 30–39, 40–49, 50–59, 60 and above and 'age not stated'. Thus the individual slips of a particular operational unit were sorted out in $11 \times 9 = 99$ cells separately for males and females. Sampling was done in each of the operational units independently by taking separate random starts. The slips were then distributed into 10 (or 5) pigeon-holes for rural (or urban) samples and one pigeon-hole was selected at random. The slips falling in the selected pigeon-hole constituted the sample. For operational details of the sampling procedure and instructions, the 'Manual of instructions on sorting, compilation (manual processing) & sampling procedures' may be consulted.

Estimation procedure : The tables prepared for each of the districts/states from the 10% rural and 20% urban sample slips have been inflated to give the final estimated tables. Table D-I and its appendices have been estimated by making use of the population figures available from the tables prepared on a full count basis, namely, PCA and B-I part A as controls.

This way of estimating the cell frequencies ensured column/row totals of estimated tables tally with that of the full-count tables. This is convenient to the user because, after adjustment, the identical column/row totals are found in tables having the same marginal specification. "The adjustment diminishes the sampling variance to some extent ; the more the controls, the smaller the sampling variance of the adjusted frequencies". Further, adjustment to known control totals has at the same time the effect of eliminating biases in the nature of inherent differences between the sample and complete count.

Tables D-II to D-VI present the characteristics of migrants by place of last residence. In table D-III and D-IV, data are presented at city level, in D-V & D-VI at district level and in D-II at State level. Since the characteristics of the migrants can be expected to be strikingly different from that of the total population, it was not considered appropriate to apply the multiplier derived from the total population.

In the absence of direct controls for multipliers, sample tables D-II to D-VI have been multiplied uniformly by 10 in case of rural and by 5 in case of urban to arrive at the final estimated tables.

Reliability of estimates : No exact formula can be given for the precision of the estimates in view of the systematic sampling design adopted. A rough estimate of the relative standard error on the basis of simple random sample could be $(1-f)\sqrt{\frac{1-p}{np}}$ where 'f' is the proportion sampled (0.10 in case of rural areas and 0.20 in case of urban areas) 'p' is the estimated proportion in any cell and 'n' is the sample size being equal to 10% of individual slips in rural areas and 20% in urban areas.

TABLE D-I

POPULATION CLASSIFIED BY PLACE OF BIRTH

D-I Population classified by Place of Birth

Fly Leaf

This table presents the distribution of population by sex with reference to the place of birth for the State and districts with rural-urban break up.

The place of birth has been classified into two broad categories viz. (1) born in India and (2) born in countries outside India. "Born in India", has further been divided into two sub-groups viz., I. Born within the State of enumeration and II. Born outside the State of enumeration (separately for each State/ Union Territory). The sub-group, 'Born within the State of enumeration' has been further classified into the following :

(a) Born in place of enumeration;

(b) Born elsewhere in district of enumeration; and

(c) Born in other districts of the State.

Persons, born within India have been further classified by Rural, Urban and Unclassifiable with reference to the fact whether the place of birth was a village or town at the time of birth or unclassifiable where the nature of the birth place was not ascertainable.

For persons born outside India, data are furnished for the countries in Asia, Europe, Africa, America and Oceania. Separate figures are shown in the table itself for certain countries only in each continent and the data for the remaining countries are clubbed and shown under 'Elsewhere'.

The countries in each continent for which data are furnished are as follows :

1. Countries in Asia beyond India (Incl. U.S.S.R.)
   Afghanistan
   Burma
   Ceylon
   China
   Nepal
   Pakistan
   Malaysia
   U.S.S.R.
2. Countries in Europe (Excl. U.S.S.R.)
   U.K. (Incl. N. Ireland)
   Ireland
3. Countries in Africa
   Kenya
   Mauritius
   Mozambique
   Union of South Africa
4. Countries in two Americas
   Canada
   U.S.A.
5. Countries in Oceania
   Australia New Zealand.

This table corresponds to Table D-II of 1961 Census presented in Part II C(ii) (i) Migration Tables of Madras State.

D-I Population classified by Place of Birth

Birth Place	Rural Urban Unclassifiable	Enumerated in Rural or Urban areas of Tamil Nadu

2. *Includes Mizo district now constituted as Union Territory of Mizoram.

TABLE D-II

MIGRANTS CLASSIFIED BY PLACE OF LAST RESIDENCE AND DURATION OF RESIDENCE IN PLACE OF ENUMERATION

2 DCOT&P/77—9

D-II. Migrants classified by place of last residence and duration of residence in place of enumeration

Fly Leaf

This table presents the distribution of migrants by duration of residence at the place of enumeration for the State as a whole. The migrants for this table are those whose place of birth is outside the place of enumeration and those born in the place of enumeration but lived outside for some time and have subsequently come to the place of enumeration. This will not however include persons who were away temporarily on tour or visit etc. Data are shown separately for rural and urban areas of the State.

The last residence has been classified into two broad categories viz.

(A) Last residence elsewhere in India; and

(B) Last residence in countries outside India

Category A. Last residence elsewhere in India is further sub-divided into two sub-divisions which are as follows:—

I. Within the State of enumeration but outside the place of enumeration; and

II. States in India beyond the State of enumeration (Separately for each State/Union Territory).

Again, Sub Division I viz. 'Within the State of enumeration but outside the place of enumeration' has been classified into the following two groups:

(a) Elsewhere in district of enumeration.

(b) In other districts of State of enumeration.

In the case of migrants whose last residence was within India, the data have been sub classified into rural, or urban with reference to the fact whether the place of last residence was a village/town at the time of their last residence or unclassifiable if the rural or urban character of the last residence was not ascertainable.

Data on migrants whose last residence was outside India have been shown for the continents of Asia, Europe, Africa, America and Oceania. Under each continent data have been given for certain important countries and for others clubbed under "elsewhere". The classifications adopted for place of last residence is similar to the classification shown in Table D-I presented earlier.

The duration of residence at the place of enumeration has been classified as : 1. Less than one Year; 2. 1 to 4 years; 3. 5 to 9 years; 4. 10 to 19 years; 5. 20 years and above and 6. Period not stated.

This table is similar to Table D-III of 1961 Census where the duration of residence at the place of enumeration was determined with reference to place of birth only. In the 1971 Census this table has been prepared with reference to the place of last residence instead of the place of birth.

TABLE D—III

MIGRANTS TO URBAN UNITS (INCLUDING AGGLOMERATIONS) HAVING 100,000 AND ABOVE POPULATION CLASSIFIED BY SEX, BROAD AGE-GROUPS, EDUCATIONAL LEVELS AND IN CASE OF WORKERS BY OCCUPATIONAL DIVISIONS

D—III Migrants to urban units (including agglomerations) having 100,000 and above population classified by sex, broad age-groups, educational levels and in case of Workers by occupational divisions

Fly Leaf

This table presents the distribution of migrants to urban units including urban agglomerations having a population of 100,000 and above, by sex, broad age-groups and educational levels.

The broad age-groups adopted are 15-29 and 30–59. The educational levels shown in this table are as follows:

1. Illiterate
2. Literate (without educational level)
3. Primary
4. Middle
5. Matriculation or Higher Secondary
6. Non-Technical diploma not equal to degree
7. Technical diploma or certificate not equal to degree
8. Graduate degree other than technical degree
9. Post-graduate degree other than technical degree
10. Technical degree or diploma equal to degree or post-graduate degree with details under engineering and technology, medicine, agriculture, veterinary and dairying, teaching and others.

The figures are first presented for total migrants followed by workers and last by non-workers. In the case of workers, figures are shown separately for cultivators, agricultural labourers, and in the case of non-agricultural workers by occupational divisions. The migrants referred to above has the same connotation as in Table D-II and is based on "the place of last residence".

The trends of migration to bigger urban units with a population of 100,000 and above can be known from this table. The occupational details which are cross-classified with age-groups and educational levels will indicate the nature of occupations that attract more people to cities/urban agglomerations with a population of one lakh and above. So also the educational levels will show insight into the migration of skilled and unskilled labour. The presentation of figures for the place of last residence is similar to the table D-II, presented earlier in this volume.

In Tamil Nadu there are twelve urban agglomerations and four cities with a population of 100,000 and above. The figures presented for Erode relates to Erode (M) alone and not for Erode Urban Agglomeration.

D-III Migrants to urban units (Including Agglomerations) having 100,000 and above population classified by sex

TABLE D-IV

POPULATION OF URBAN UNITS (INCLUDING AGGLOMERATIONS) HAVING 100,000 AND ABOVE POPULATION CLASSIFIED BY PLACE OF LAST RESIDENCE AND DURATION OF RESIDENCE

2 DCOT&P/77—91

D-IV—Population of Urban Units (Including Agglomerations) having 100,000 and above population classified by place of last residence and duration of residence

Fly Leaf

This Table presents the distribution of population of urban units (including agglomerations) having 100,000 and above population into non-migrants (born locally) and migrants whose last residence was rural/urban areas of India. In the case of migrants the figures are presented under two major groups viz.,

1. Last resided in rural areas of India; and

2. Last resided in urban areas of India.

Under each major group there are three sub-groups for which the presentation of data is made. They are as follows:

(1) Within the district of enumeration;

(2) Other districts of enumeration but within the State of enumeration; and

(3) Other States in India with separate figures for Sikkim.

For migrants, the duration of last residence has been indicated as

(a) less than 3 years; and

(b) 3 years or more.

This Table excludes (1) population whose last residence could not be classified as rural or urban, (2) population whose place of last residence itself was unclassifiable and (3) population whose last residence was outside India. Population who did not report any specified period of residence in the urban unit are included in the duration of residence '3 years or more'.

This Table will help to know the extent of in-migration to the cities and urban agglomerations from rural and other urban areas of the country.

The figures presented for Erode relates to Erode Municipality alone and not for ErodeUrban Agglomeration.

D—IV Population of Urban Units (including Agglomerations) having 100,000 and above Population
