PREFACE

This is a companion Volume to Part II-C (ii) (i). In this volume will be found the remaining Table D-VI of D - series. A preliminary note has also been added to the previous volume in which the concepts and principles of classification have been explained. The discussion based on these tables will be found in my General report on Madras State.

P. K. NAMBIAR.

EXPLANATORY NOTE

In table D-VI, migrants have been classified by place of birth and industrial categories. This table has been prepared for Total, Rural, Urban and also for Cities with a population of more than one lakh.

In the case of "Total" and "Urban" the table has been presented for all birth places. But in the case of "States in India beyond the State of enumeration", those States from which migrants are less than 1 per cent of total immigrants, have been omitted from the main table and have been shown in Appendix I. However the total shown against group A-II is the total of migrants born in States in India beyond the State of enumeration. Appendix II to this table indicates those countries which have been grouped under "Elsewhere" in the main Table.

In the case of rural, the table has been prepared only for the following :

1. Within the State of enumeration.
2. Born in place of enumeration.
3. Born elsewhere in the district of enumeration.
4. Born in other districts of the State.
5. Four numerically most important States.

Wherever the line for unclassifiable has been omitted in column 2 it should be assumed that the total figure under this category is less than 5 per cent of the total population in the particular main group in column 1.

TABLE D-VI

Distribution of Industrial Categories of Workers and Non-workers by Place of Birth

FLY LEAF

This presents figures of migrants from each place of birth classified under the categories of workers and non-workers. The classification of places of birth adopted in this table is similar to the classification found in Table D-II. The migrants from each of the birth places have been classified as workers and non-wrokers with a further sub-classification of workers into nine categories like cultivators, agricultural labourers, etc. Unlike table D-IV and table D-V, this gives the total number of migrants in the State of enumeration. It is possible to study the disposition of migrants by nine industrial categories of workers from rural and urban areas within the State as well as outside the State.

TABLE

Distribution of Industrial Categories of Workers

Country/State/District where born	Rural/Urban	Total			Total Workers
