TABLE C-I.

Household (Size and Composition).

This table has been prepared in respect of a population sample selected from the entries in the National Registers of Citizens on the basis of an approximately one-in-one thousand households; the sample households selected include roughly every tenth household in every hundredth block in rural areas and every fiftieth household in every twentieth block in urban areas. Rural and urban areas have been defined in the flyleaf to Population Table A-I.

2. The agricultural and non-agricultural classes are the four agricultural and the four non-agricultural classes referred to in Economic Table B-I. The backward classes include the Scheduled Castes and Scheduled Tribes and other classes not treated as non-backward by the State Government for the purpose of the 1951 Census. Anglo-Indians are included among the non-backward classes.

3. Columns (2) to (5) of the table relate to all the households in the entire state, division or district as the case may be while columns (6) to (35) relate to the sample households selected. Columns (18) to (23) exclude non-relations in households while the other columns include them.

TABLE C-II

Livelihood Classes by Age Groups.

This table shows the livelihood distribution by age-groups for the sample population based on a ten per cent sample taken out when the enumeration slips were initially sorted. The ten per cent sample was taken out as follows :—

Each enumeration pad which consisted generally of 100 enumeration slips was broken and the slips relating to displaced persons which had been noticed during the process of the preliminary scrutiny were removed from the pack of slips for being dealt with separately. The pack was then "Cut" as in a card game. The lower portion was placed above the upper portion and the slips were dealt as follows into two pigeon holes one marked "G" and the other marked "S".

The first five slips were placed in the pigeon hole "G" then one slip was placed in the pigeon hole "S". Thereafter for every nine slips placed in the pigeon hole "G" one slip was placed in the pigeon hole "S" until the total number of slips left was less than 9 and these residuary slips were all put in hole "G". All the slips contained in the pigeon hole marked "S" were taken out, counted and marked as "Sample" slips.

No smoothing formula has been adopted in preparing the table as in previous Censuses and the figures have been tabulated as actually returned in suitable age-groups.

TABLE C-IV
Age and Literacy

FLY LEAF TO TABLE C-IV.

This table has been prepared from the data collected by sorting the ten per cent sample slips of general population as in the case of Tables C-II and C-III. The figures have been tabulated as actually returned and no smoothing formula has been applied. For purposes of this table, age-groups slightly different from those adopted for Tables C-II and C-III were formed, age-groups '0' and '1-4' having been combined into a single age-group and age-group 5–14 having been split into '5–9' and '10–14'.

TABLE C-V

Single year age returns.

This Table is also based on a ten per cent sample taken out when the enumeration slips were initially sorted. (Vide fly-leaf to Table C-II.) The figures noted against each age represent the numbers of individuals who returned that age. In other words, the age figures given are those actually furnished by the people, and no smoothing formula has been applied.

TABLE D-V.

Displaced Population.

(i) DISPLACED PERSONS BY YEAR OF ARRIVAL AND (ii) DISPLACED PERSONS BY LIVELIHOOD CLASSES.

This table relates to displaced persons from Pakistan enumerated in Madras State and Coorg. It has been divided into two sub-tables. "Displaced Person" means any person who has entered India having left or been compelled to leave his home in Western Pakistan on or after the 1st March 1947 or his home in Eastern Pakistan on or after the 15th October 1946, on account of civil disturbances or the fear of such disturbances or on account of the setting up of the Dominions of India and Pakistan.

2. Sub-table (i) shows the distribution of displaced persons from Western and Eastern Pakistan by the year of their arrival in India—from 1946 to 1951. The figures in columns (5) to (26) of this table excludes figures for persons in regard to whom information relating to the district in Pakistan from which they came to India, has not been furnished. The figures for these persons are given below :—

TABLE D-VII.

Livelihood Classes by Educational Standards.

This table shows the distribution of the literate population among the eight livelihood classes by educational standards.

2. The total literate population in Madras State is 10,996,348 consisting of 8,135,072 males and 2,861,276 females.

3. The total literate population in Coorg is 62,430 consisting of 42,658 males and 19,772 females.

NOTE.—Under L.C. III four females with Engineering degree or diploma, one female with legal degree and five females with medical degrees or diploma have been returned for the state. These are unusual figures but it is possible that the figures under engineering graduates and diploma holders refer to the minor diplomas issued by private technical institutions and Government Polytechnic Schools. The medical diplomas possibly refer to certificates issued for training course in nursing and midwifery. The one legal graduate is probably the result of either incorrect enumeration or incorrect sorting.

TABLE L (D-VIII).

Infirmity (Incidence of Leprosy).

This table shows the incidence of leprosy among the population by the eight livelihood classes, and by rural/urban break-up.

2. Figures are given separately for 'Leprosy Cases' and 'Doubtful Cases'. The former refers to clear cases of leprosy while the latter to suspected cases of leprosy.
