PREFACE

We have already published by now Part A and B of the District Census Handbooks for all the districts of the State. The administrative statistics and full count tables have also been published separately in Part C of the above volumes.

But yet, the persistent demand for additional basic census data for the State as a whole has remained unfulfilled. At the time when planning has reverted to the grass roots, it is but natural that there should be demand for data of every kind at the district and even taluka level. It is in order to meet with this growing demand that we have compiled the present booklet.

Pending publication of the General Report, and some other table volumes, it would provide enough material to the planners to initiate their schemes and develop them. It will help others to start thinking on lines which are clearly seen on the horizon.

As the very name indicates, it is really meant to serve as a Pocket Book. It contains tables with absolute figures though percentages have been worked out at several places. It gives data on growth of population of the State over the decades, and percentage variation of the population. It contains revealing figures on progress of literacy. Figures about proportion of urban and rural population and Scheduled Caste and Tribe population and the literacy rate among the latter upto taluka level would prove to be very interesting. It will help to pinpoint the regional imbalance in planning and help determine areas where emphasis is most needed. The growth centres could be easily located with the help of this data and their development potential fully exploited. The age composition of the population is being released for the first time. Particulars about

workers to the total population and their distribution among various industrial categories will be of immense help in any scientific study that is undertaken.

The data on housing is also being released here, though it is the subject matter of a separate report.

Some All India Tables have been given to facilitate comparison with other States on various counts.

This Directorate is implementing the Sample Registration System in selected blocks of the State. As Census figures become available every ten years only, the system was started with the idea of getting a correct picture of the annual birth and death rates. As our civil registration was found to be very deficient in giving definite indicators it was hoped that this System will help us in getting correct projections. Part II of Pocket Book contains data on vital statistics derived from Sample Registration System.

Part I of the booklet is divided in three sections (1) State Tables, (2) District Tables and (3) All India Tables.

It is hoped that this small booklet will meet the requirement of the scholars, administrators, planners and demographers and all those who are interested in the subject.

I am grateful to the State Government for having agreed to bring out this publication on the same lines as the District Census Handbook Volumes.

My sincere thanks are due to Shri R. Parthasarathy, Joint Secretary to Government of Gujarat, G. A. D. (Planning) due to whose efforts this publication has been possible. My thanks

are also due to Shri P. B. Buch, Director, Bureau of Economics and Statistics for having gone through the tables.

I am thankful to the Manager, Government Central Press, Gandhinagar, for the expeditious printing.
