# PREFACE

The District Census Handbook of the North-East Frontier Agency gives the population figures *of its plains portion only*. The latter, excepting a fraction, have since been transferred to the plains districts of Lakhimpur and Darrang. The villages involved in the transfer are indicated by an asterisk in the Primary Census Abstract. As practically all the villages of Mishmi Hills plains portion have been transferred to Lakhimpur, no indication is given against its villages. As these changes took place after the Census Date (1st March, 1951), the statistics of the transferred areas could not be incorporated in the figures of the districts concerned.

2. The area given by the Surveyor General of India for the entire districts of Mishmi Hills, Abor Hills, Tirap Frontier Tract, Balipara Frontier Tract (Se-La Sub-Agency and Subansiri area) and Naga Tribal Area (Tuensang) is reproduced in Table A-1 of this Handbook. It should, however, be clearly noted that the population figures of these Frontier districts take into account only their plains portions for which full data were secured and tabulated on slips and *excludes entirely their Part B Tribal Areas*. I give below the approximate area of the plains portions which were regularly censused, as well as the total area of the hill districts of the North-East Frontier Agency before the above mentioned transfer took place.

| | *Total area* | *Area actually censused* |
|---|---|---|
| 1. Mishmi Hills ... ... ... ... ... ... | 9,389·5 | 391·7 |
| 2. Abor Hills ... ... ... ... ... ... | 8,544·5 | 273·9 |
| 3. Tirap Frontier Tract ... ... ... ... ... | 2,876·4 | 124·8 |
| 4. Se-La Sub-Agency (Balipara Frontier Tract) ... ... ... | 12,103·9 | 531·2 |
| 5. Naga Tribal Area ... ... ... ... ... | 2,054·6 | 50·0 |
| Total ... | 34,968·9 | 1,371·6 |

It is not possible at this stage even to form a firm and reasonably accurate estimate of the population of the entire districts contained within the Part B Tribal Areas as a whole. Even regarding the population figures of the plains portions of the Nort-East Frontier Agency, the unwarry reader is warned against any hasty comparison with those of the previous censuses. The population of the plains portions of Mishmi Hills shows a very small increase of 0·2 per cent. while that of the plains portions of Abor Hills and Tirap Frontier Tract registers a tremendous decrease of 39·1 and 62·0 per cent. respectively. This phenomenon is not accounted for by any demographic reasons but merely by the omission from the 1951 Census of some villages which were fully censused in 1941, as they now fall within the Part B Tribal Areas of Assam. Only the figures of Balipara Frontier Tract (Se-La Sub-Agency and Subansiri area) are fully comparable with those of the past censuses. A small portion of the Naga Tribal Area (Tuensang) covering only about 50 square miles was censused for the first time at the present census.

# INTRODUCING THE DISTRICTS

## Mishmi Hills

*Political.*—With the old Sadiya subdivision of the Lakhimpur district as a nucleus, a new district was formed in 1912 A. D. with Sadiya as its headquarters under the name " Central and Eastern Sections, North-East Frontier ". The name was later changed to Sadiya Frontier Tract. It consisted of two subdivisions, *viz.*, Sadiya and Pasighat. A portion of the Sadiya subdivision was detached in 1942 when a new Tirap Frontier Tract was constituted. On 3rd October, 1947, these two subdivisions were formed into independent districts under the new names of Mishmi Hills and Abor Hills. Mishmi Hills comprises an area of 9,389·5 square miles of which the plains portion (391·7 square miles) to which alone the census operations had to be confined, has since been transferred to Lakhimpur.

*General appearance.*—Mishmi Hills includes the mountains on the southern face of the main Himalayan Divide and the western and north-western slopes of the Dapha and Phukan ranges which separate India from the extreme north of Burma. The general appearance of the district as well as that of Abor Hills is that of mighty mountains over-hanging tree-covered plain and of grassy expanse everywhere intersected by large river-beds and water courses. The mountains are very steep and the rivers debouching from the higher levels spread over miles of country. The whole area is very sparsely populated with, but little of the old alluvial soil which constitutes the wealth of Assam. Communications are mainly on the surface of the rivers or else hug their banks and such villages as there are confined to the neighbourhood of the main rivers.

*River System.*—West of Sadiya, the Lohit-Brahmaputra which is the principal river of the district is joined by the main stream of the Brahmaputra, twenty miles south of Pasighat. The Lohit rises in Estern Tibet where it is known as the Zayul and flows southward entering Mishmi Hills 25 miles south of Rima which is situated on the left bank. In its course it receives many additions, the Dou, Delei, Tidding, Digaru, Dibang, Kamlung, Noa-Dehing and many smaller rivers which carry off the drainage of the huge mountain systems on both sides of its bed. The Lohit-Brahmaputra is known to the Mishmi tribes as the Tellu and enters the plains at Parasuram Kund, 46 miles from Sadiya, a place of pilgrimage for the Hindus. The Dibong which joins it a short distance below Sadiya drains the mountain masses north of Sadiya and is notable for the deep gorges and inhospitable country of its upper reaches.

*Climate.*—The climate of Mishmi and Abor Hills on the whole compares favourably with the rest of Assam ; in fact Sadiya has a good reputation for health. There is a reasonable rainfall and the snow covered mountains visible from the river not only add to the natural beauty of the place but are the source of the melting snows which feed the river and soften the fierce heat of the summer season. There are, however, great variations in rainfall, very high figures being recorded in places close to the hills. Thus Pasighat has a normal rainfall of 177 inches, aganist a little over 100 inches of Sadiya. At places like Pasighat where the large rivers debouch on the plains, regular gorge winds occur nightly for months on end.

*Fauna.*—The fauna is well varied but no species occurs in any great number except possible wild elephant, buffalo and tiger. Sambhur, hog deer and barking deer are found. There is not a single specimen of the rhinoceros left, yet at one time both the Rhinoceros Indicus (the one-horned Aisatic rhino) and another small kind were found, the latter possibly the Ceralorhinus Sumatrensis (small two-horned). All have been shot out by the tribesmen for their meat, hide and horns. The domesticated mythen is very common amongst tribesmen and is the chief standard of wealth and barter. The Abors breed it largely for sale.

*Minerals.*—There is evidence of oil and gas in the Dihing Valley. The gravels of many of the rivers contain minute quantities of gold. The proportion is greatest in the Subansiri, but even here the amount is so small that it is unlikely that its extraction could be made a paying proposition. The Hkamptis obtain small amounts of coal, copper, lead, silver and iron from the hills east of Brahmakund, but there is no evidence of any large occurrence of these ores. In any case, the inaccessibility of the country will make working difficult.

*Trade and Industry.*—The principal market is Sadiya, the headquarters of the district, with a population of 5,044 situated on the north bank of the Lohit-Brahmaputra at the Kundil river confluence. Rail head is 6 miles away at Saikhowaghat on the Assam Railway. Practically all trade in the town of Sadiya is in the hands of the Marwaris, who are the only people in the district possessing capital, enterprise and business instincts. The Sadiya Bazaar, during the cold weather months, teems with primitive hillmen who come down to sell their produce or in the case of the Digaru and Miju Mishmis to work at jungle-clearing, cane cutting, etc. The chief trade is in clothes, yarn, salt, utensils and agricultural implements on the one hand and musk, gur and Abor rugs, and Mishmi ' teeta" on the other.

*Communications.*—Communications in the plains portion are largely by river. Roads radiate from Sadiya. One goes to Nizamghat (34 miles) serving as an outlet for the Dibong and Sisseri villages. Another is the Lohit Valley Road which follows the river to the border with Tibet.

Owing to the many large rivers the maintenance of through road communications is extremely difficult. Saikhowaghat Railway Station, the terminus of the Assam Railway, is the rail head for Sadiya, Pasighat, Morkongselek and Kobo.

*Floods.*—During the decade under review many floods occurred in the district. The more serious ones were in the month of July, 1942 and 1946. The floods of 1942 and 1946 affected only the standing crops of the paddy fields of the flood stricken areas, doing very little damage to houses and granaries, but the floods occurring in the wake of the Great Earthquake of 15th August, 1950, spared nothing that crossed their path. All the standing crops throughout the paddy fields of the affected areas were totally washed away and the affected paddy fields rendered wholly or partially unfit for future cultivation through silt of mud and sand. Many villages were completely washed away and the affected people rendered homeless. The frequent and heavy floods of the Dibang and the heavy erosion by the Lohit have considerably retarted the progress in developing this frontier district. The serious erosion by the Lohit has eaten up the right bank quickly, 8 villages and some thickly populated portions of the town of Sadiya having disappeared in the river. The floods caused greater damage to roads and bridges than ever the earlier earthquake.

*Earthquake.*—Mishmi Hills suffered terribly from the Great Assam Earthquake of 1950 which took place on the night of 15th August. The tremors and convulsions lasted for more than 7/8 minutes, followed by frequent tremors at short intervals for days together. These quakes took their toll in the shape of destruction and damage to houses and buildings, both public and private. A full account of the earthquake will be found in the Assam Report volume in an Appendix. Roads and bridges were damaged beyond repair ; some bridges in places became totally untraceable. The level of the earth sank for about 10 feet on an average and river beds arose almost up to the earth level at places. As a result of these, the slightest rise in the level of rivers leads to the inundation of the whole area.

*Archaeology.*—There are many traditions about the origin of Sadiya, all pointing to its former importance. On the Deopani and Dibang rivers and probably the Kundil also, are many tanks, some as big as 6 acres in area, perfect oblongs with brick-size and ghats. Perhaps the most interesting of these relics is what is known as the Sadiya Stone Pillar. This is octagonal in shape, 11′ in height on a base 15″ square, with a vase capital of serpentent wined thereon with raised carvings and all sculptured from a single block of stone. It was found lying in the jungle on the eastern side of the road from Sadiya to Nizamghat and bears an inscription in the Ahom language. There are other relics of ancient monu-

ments, shrines, monasteries, tanks and roads round about Sadiya town. There are also local traditions attributing to Bismak, the father of Rukmini, the consort of Lord Krishna having his kingdom Kundilnagar, round Sadiya. There are ruins of the fort of Bismaknagar near Sunpura about 27 miles east of Sadiya river. Another notable ruin is the Tamreswari Mandir of the so-called Copper Temple about 30 miles east of Sadiya, where human sacrifice was practised for 600 years. The roof of the temple was said to be covered with sheets of beaten copper. The following 'thans' or shrines are also in existence, that of Bolia Bhava, Bairagibaba and of Patarhal where sacrifices of goats, ducks and pigeons are still in practice once a year. These shrines were primarily Chutiya places of worship, a tribe which was established at Sadiya and was the master of the country westward as far as the Disang river, before the Ahoms entered the country in 1228 A. D. Some 2 miles beyond the Tamreswari shrine, along the pilgrim cart road which proceeds for Digarumukh, Tezumukh and Temeimukh where the Lohit is crossed, one reaches Parasuramkund, where the Lohit-Bramaputra rivers emerge from the hills. Here the Lohit emerges through a magnificent defile, forms a backwater or pool in the rocks. This is a sacred place of pilgrimage for all the Hindus and is visited yearly by some thousands.

## Forests

The activities of the Forest Department in the Sadiya Division (about half the area of which has since gone under the North-East Frontier Agency for which separate figures and accounts are not available at the present moment) is confined to the plains portion of the pre-war Sadiya Frontier district except the Manabhum Reserve which is a part of the spur forming the Manabhum Range of the Miju Hills and Patkoi Hills. The terrain is drained by a number of rivers and streams—the south-eastern portion by the Noadihing and Burhidining with their tributaries and the rest by the three big rivers, the Lohit, Debang and Dehang which ultimately form the Bramaputra river having numerous tributaries running through the area. This affords excellent extraction facilities at cheap rate, an important advantage from forest point of view. The forest area under the control of the forest Department being chiefly in plains, work with elephants, which are locally available in plenty is possible and taken recourse to the fullest degree.

Before the start of forest reservation in the twenties of the century, the entire area was subjected to shifting cultivation chiefly by the Miris, the effects of which are even now visible in the existing reserves. With the gradual reservation of the comparatively well stocked areas, the jhuming activities were checked from expansion, which again was further restricted under the executive orders of the Political Officer delimiting the so-called village areas with the idea of preventing village-shifting from place to place.

The forest areas of the terrain now fall under three main categories :—

(*i*) *Reserve Forests.*—Covering roughly an area of 350 sq. miles, which include about 50 sq. miles of Fuel Reserves constituted with a view to ensure future firewood supply to the surrounding villages and towns.

(*ii*) *Protected Forests.*—Covering over an area of 43 sq. miles constituted under the executive orders of the Political Officer to serve the same objects as reservation does but without the same legal footing.

(*iii*) *Unclassed State Forests.*—Which practically covers the whole area of the district excluding the reserves, Protected Forests and the settled Tract round about Saikhowaghat and Sadiya, the area roughly being 2488 sq. miles. This type of area being open to unrestricted felling and settlement cannot be actually counted upon as "Forests", which are now on the verge of disappearance as real forest areas.

The principal forest products of value extracted from this division are timber (hardwood and softwood), firewood, bamboos, canes, grass, agar and elephants, as detailed below:—

*Timber.*—The greatest consumer is the Assam Saw Mills of the Bird and Company, running one of the biggest veneer mills and Saw Mills in the Indian Union. Unfortunately their factory at Murkongsellek has since been washed away with all machinery, buildings, etc. by the Brahmaputra and efforts are being made to re-install the factory with its present nucleus at Namsai. The Assam Saw Mills consume annually about 5 lakhs cubic feet (round) of Holock and 2 lakhs cubic-feet of Hallong, the two principal timber species of the division for the purpose of manufacturing 3-ply veneer for tea box. The mill also uses some quantity of Simul as light battens for corner pieces of the tea boxes. Apart from this the mill uses a lot of constructional timber for its buildings, bridges and sleepers for its trolley lines.

The division contains a number of species, which are very good furniture timber, such as Hollock, Bola, Sopa, Sam and Gonserai and in addition to the constructional timber a good quantity of furniture wood is readily consumed once it reaches Dibrugarh town, where the dealers have their depots and business centres.

Sadiya Division has earned the reputation of being the most substantial supplier of Simul to the Dhubri Match factory from its Simul areas on the banks of its big streams and rivers affording excellent floating facilities. Roughly speaking, about 3 lakhs cubic feet (round) of Simul and other soft wood is supplied to match industry.

From the source of timber under all categories, the division annually earns a revenue of Rs. 4 lakhs approximately.

*Firewood.*—Chiefly the unclassed state forests near about river banks and to certain extent areas clearfelled on suitable localities for plantations are the sources of supply. Consumers are tea gardens *via* Saikhowaghat and Dibrugarh town.

*Bamboos.*—The most prized bamboos namely, Jati, is found in plenty only in this division in Unclassed State Forests. They are in fact homegrown and found in abandoned village sites left by the people on their migration. A lot of Kako with other bamboos are also available.

*Canes.*—Jati, the most important cane is found plenty in the Unclassed State Forests and reserves of this division which is one of the biggest cane suppliers to the outside market. About a lakh of rupees is derived annually from cane in the division.

*Grass.*—Thatch is the most important saleable grass and thatch of the Brahmaputra Chaparis are liked most by the purchasers. This division has got such very good Chaparis within its fold and it derives roughly an annual revenue of one lakh rupees.

*Agar.*—The revenue derived from Agar is not much but its importance lies in the fact that the finished product has a market in other places within and outside India.

*Elephants.*—Of late, elephant has become a good source of revenue from all divisions and Sadiya division contributes to the Treasury about three-quarters of a lakh of rupees annually from this source.

The position of the division with reference to its gross revenue, expenditure and net surplus which can be judged from the figures of the year 1949-50, for which the figures have been compiled in the Annual Report is as follows :—

| | Rs. |
|---|---|
| Revenue ... ... ... ... ... ... ... ... ... | 6,38,082 |
| Expenditure ... ... ... ... ... ... ... ... ... | 2,17,722 |
| Surplus ... ... ... ... ... ... ... ... ... | 4,20,360 |

The last catastrophic earthquake and subsequent floods have seriously affected the division, the extent of which has yet to be assessed. The transfer of part of its area to the North-East Frontier Agency has affected the long standing management and it will take some time to readjust matters.

*History.*—The principal tribe inhabiting the Part B Tribal Areas of the Mishmi Hills district is the Mishmis, divided into 3 tribes: (1) Chulikata, (2) Digaru and Miju (Bebejiya) and (3) Abors (Padam), the Hkamptis and Singphos. Preceded by early visits of individual officers to the Mishmi country, *e.g.* Lieutnant Wilcox in 1827, Dr. Griffith in 1836 and Lieutenant Rowlatt in 1845,an expedition under Lieutenant Eden at the head of 60men was sent to punish the murderers of M. Krick, a French Missionary, in 1851. In spite of this demonstration, the Chulikatas showed no inclination to respect the British Frontier and continued to perpetrate minor raids. This led to the trying out of an experiment of supplying arms to the Hkampti settlers of the frontier in order that they would form a screen against the aggression of the Mishmis. This experiment proved a complete success and for years the peace of the frontiers was undisturbed so far as the Mishmis were concerned. After a few more raids, the Mishmis settled down on the whole, without giving the authorities much trouble. Of recent years, the relations with all the 3 tribes of the Mishmis have remaind uniformly satisfactory.

Regarding the Hkampti tribe, the Hkampti Chief, "Chousalan Sadiya Khawa Gohain", was recognised as the local Governor of Sadiya by the British after the expulsion of the Burmese. His son was deposed for disregarding the orders of the Political Officer and Sadiya brought directly under the administration of the Company in 1835. As a result, he led an insurrection of the Mishmis in 1839 capturing Sadiya and murdering the Political Officer Colonel White. Their courage failed them after delivering this attack and they retreated into the hills. The Singphos, Mataks and Abors all offered their assistance in quelling this revolt. Several expeditions were led into the hills and by December 1843, the last of the insurgents submitted.

The Singphos made common cause with the Burmese in 1825, a number of their villages were destroyed and a number of Assamese whom they had kept as slaves released. They made two small raids, in 1830 on Sadiya and 1834 on two frontier posts An expedition was sent against them which crushed all resistance and since that date there was no further disturbance.

The Abor expedition under Major General Bower on account of the murder of Mr Williamson and Mr. Gregorson in 1911 led to the formation in 1914 of the North-East Frontier District as an administrative unit separate from Lakhimpur, in order to have closer relations with the hill tribes. This expedition established British prestige firmly among the frontier tribes and thus rendered possible during the ensuing years a period of peaceful and almost uninterrupted progress.

## ABOR HILLS

1. Political
2. General Appearance
3. Climate
4. Fauna
5. Forests

*See* under Mishmi Hills.

6. *River System.*—The main artery of the State, the Brahmaputra, enters Assam in the Abor Hills district. Arising near the Manos Sarowar Lake, away north of Kashmir, it flows eastwards as the Tsangpo through Tibet, being crossed by the Indo-Lasha road at Chaksam Ferry not far from Lasha and then turns southward cutting the main Himalayan axis at a point approximately 29·35° long. The Tsangpo receiving many tributaries in its course through the Abor Hills, the Ringong, Sigeng, Shimong, Siyon, Yamura, etc., is known to the Abors as the Tsiang. It leaves the hills and enters the plains at Pasighat. A few miles below Pasighat, it divides into two channels, the Dihang and the Lalli, the island between known as the Lalli Chapri, being a game reserve.

Feeder steamers could, before the Earthquake of 1950 pass up the Brahmaputra at all seasons as far as Morkongselek, which lies 40 miles up stream from Dibrugarh, while from May to November they could penetrate a further 50 miles. As can be readily understood, the river is subject to big floods and at such time the junction between Sadiya and Kobo of the main stream and its two chief confluents, the Lohit and the Dibang, is a site of savage relentless strength and beauty. The actual bed of the river is wide and in the cold weather it wanes among the huge Chapris (island of pure sand formed by the river and covered by grass or small tree jungle). The main stream is continually changing its course with in its banks, eroding both sides in turn. This erosion has already destroyed one part of Sadiya and is even now a source of imminent danger to the existing town.

7. *Communications.*—The communications became worse after the Great Earthquake of 1950. There is only one motorable road running from Pasighat, the headquarters of the district, to Morkongselek where the Assam Saw Mill was situated. The recent floods have extensively damaged it. The Brahmaputra and the Burisuti are the only other means of communication. There are some bridle paths and foot paths in the hills. The foot paths link all important places like Pangin, Along and Karko. Recently, air-strips have been constructed at Pasighat and Along, in order to link them with the outside world. (*See* under Mishmi Hills also.)

8. *Trade and Industry.*—Hand-made clothes constitute the only industry among the tribes. The Gallongs lack in this respect. The Minyongs and the Padams produce Jins (Abor rugs) and other colourful clothes, *e.g.*, Abor bags, coat, etc. They also make fine cane hats in which the Gallongs are expert. Jhum is the main cultivation in the hills.

9. *Earthquake.*—The people of the plains portion were more or less self-sufficient but the recent earthquake has affected the whole social structure. The topography of the area changed, beds of the river were forced up almost to the level of the land in some cases and many people and tribes rendered homeless, causing widespread damage to roads, communication, buildings and huts. (For a fuller account please refer to the Report Volume I, on Assam, Tripura and Manipur.)

10. *History.*—The people inhabiting this district can be divided mainly into 3 groups namely (1) Padams, (2) Minyongs and (3) Gallongs. The most important section of the Abor tribe is the Padams who occupy the country lying between the Dibang and the Dihang. They are distinguished by their independent bearing. A friendly visit to their villages was paid by Bedford and Wilcos in 1826 ; in 1840 they rendered assistance to the British in the suppression of the rising of the Khamtis. The initial collision with the Abors occurred in 1848, which led to the abortive expedition of 1858 and later of 1859, resulting

in the submission of the Pasis ; however the Minyongs continued to be hostile. Their raid in 1861 led to the establishment of a chain of forts along the frontier, awed by this display of enery, overawed them and induced them to make peace. Various sections of the tribes entered into agreements with the Deputy Commissioner to keep the peace and not to take the law into their own hands. They behaved with less friendliness during the late eighties of the last century, leading to the Abor Expedition of 1893-94, causing the Abors considerable loss in killed and wounded and destruction of property. Relations with the Padam Abors thereafter were satisfactory till the Pasi-Minyongs murdered Mr. Williamson, Assistant Political Officer, Sadiya, and his companion Dr. Gregorson. This led immediately to strong operations on the frontier under Major General Bower to exact severe punishment and reparation for the crimes. This expedition established British military superiority in the estimation of the Abor tribes generally and the Minyongs in particular, and confirmed the friendliness of the Padams. With the conclusion of these operations, a new district, named "the North-East Frontier District", was formed in 1914 A. D. as an administrative unit separate from Lakhimpur, in order to have closer relations with the hill tribes. It also rendered possible during the ensuing years a period of peaceful and almost un-interrupted progress.

## TIRAP FRONTIER TRACT

Tirap Frontier Tract is a newly-born district constituted only in the year 1942, and consists of parts of the old Sadiya Frontier Tract, the old Lakhimpur Frontier Tract and the Naga Tribal Area.

General Appearance ... ... ... ...
Climate ... ... ... ... ... } *See* under Mishmi Hills.
Fauna ... ... ... ... ...
Forest ... ... ... ... ...
Communications ... ... ... ...

*History.*—The hills of the Tirap Frontier Tract are inhabited by various tribes of Nagas. In the hills south of Joypur are living the Namsangias and further south again the Bordurias. The Namsang and Borduria Control area is now included within the Tirap Frontier Tract. The development of the coal mines near Margherita and the opening up of the Makum Garden have offered a fair field for the employment of Naga labour on jungle-cutting and similar rough work of which they were not slow to avail themselves. There has been hardly any disturbance on this Frontier in recent times.

## SE-LA SUB-AGENCY AND SUBANSIRI AREA

### (Balipara Frontier Tract)

1. The district of Balipara Frontier Tract was constituted in September, 1914, being then known as "Western Section-North-East Frontier", but after some years the name was changed to Balipara Frontier Tract. The Census was taken only in the plains portion (531 square miles), the hills portion which falls in the Part B Tribal Areas being left out of regular census operations. The plains portion was originally a part of the district of Darrang and is again merged with that district in February, 1951. The plains portion is mostly covered by Reserved Forests with small un-inhabited areas known as Unclassed State Forests. The Part B Area is now divided into 2 divisions the Se-La Sub-Agency and the Subansiri Area each under a Political Officer.

1.(*a*) The villages in the plains area are all scattered and have been established and inhabited by groups of people of one or two caste or tribes, living together in the villages amicably following their own social customs. The Tezpur-Balipara Railways serves a portion of this area.

(*b*) With the formation of the district, Lokra, named after the pond 'Lokhora' still existing there but dried up, was established as the district headquarters. Lokra was the first village in the new district all other villages being established subsequent to it. With the formation of the Fifth Battalion of the Assam Rifles with its headquarters at Lokra, district headquarters was transferred to Charduar in 1921.

2. *Rivers.*—Many rivers drain the hills on this portion of the frontier. The largest are the Subansiri and the Bhoreli, both of which break through the main snow range in the north having their sources in the table lands of Tibet.

3. *Climate.*—The annual rainfall during the decade was 92 56 inches recorded at Charduar the highest being 104·41 inches in 1949 and the lowest 78·54 inches in 1951.

4. *Fauna.*—Wild animals are found in the tract, especially Elephants, Buffalo, Bison, Mithon, of deer are found the Sambhar, Hog-deer, Chital, Swamp, Musk and Barking deer. The Tiger, Leopard, clouded Leopard, Bear, Pig, wild Dog and many kinds of Cats also found.

5. *Floods, Epidemics and Earthquake.*—There was no outbreak of epidemic diseases nor was there any earthquake during the decade, though small-pox and cholera are said to be prevalent in as many as 11 villages. Some damage was caused by high floods to the bridges and road way of the Charduar Bhaluk Pung road and to the rice plantation in Amloga village during the rains in 1949 and 1950

6. *Industry and Trade.*—Gold is found in varying quantities in all these streams. A few sonaris are carrying on small operations from time to time. There is a good deal of mica in the low hills. Samples sent to Calcutta and London have been well reported on. Coal exists in large quantities in the foot hills bodering on Bhutan. The trade is largely with Tibet which imports wool, blankets, ponies, chillies, musks, bees' wax and baskets, receiving from the district mainly rice, salt, cotton cloth and Assam silk. From the plains there are a considerable numbers of passes into the hills, the principal being the Udalguri-Amratulla trade route which is actually the shortest route between India and Lhassa (311 miles as against 350 miles by the Chumbi Valley route).

6. *Ancient Monuments.*—The only ancient monument of interest is the remain, of the old Bhalukpung Fort or palace which are still to be seen on the Bhalukpung Hill (1,000 feet) in the gorge of the Bhorali river, where the river debouches into the plains. It is 21 milles to the north of Charduar and Lokra and there is a good motorable road to-day from these two places. Bhalukpung is said to have been named after Bhaluka, grandson of Ban Raj of the legendary history of Darrang. The Akas to this day claim descent from this mighty prince.

## NAGA TRIBAL AREA

There is little to report about this area. Only 16 villages with an approximate area of 50 square miles were censused in Tuensang (Naga Tribal Area) by the Deputy Commissioner who extended regular census operations there for the the first time.

## Tribes inhabiting the North-East Frontier Agency

The following are some of the main tribes who inhabit these areas :—

*Mishmi Hills.*—(1) The Mishmis (*a*) Chulikata,

(*b*) Digaru (or Taroan).

(*c*) Miju.

(2) The Abors.

(3) The Hkamptis.

(4) The Singphos.

The word ' Mishmi ' is a general name for the tribes inhabiting the Lohit Valley and the Valley of the Dibang and its tributaries.

*Abor Hills.*—The tribes inhabiting this district can be divided mainly into 3 groups, *viz.*,

(1) Padams,

(2) Minyongs and

(3) Gallongs.

West of the Mishmis come the Abors—a term signifying fierce and independent. The most important section of these tribes are Padams who occupy the eastern portion between the Sisseri and the Dihang in the Yamne Valley. West of them, on both the banks of the Siyom, mainly on the right, come the Minyongs, who spread upto about 100 miles to the north of Pasighat ; and further west again, in the Siyom Valley and the areas between the Syom and the Subansiri right below to the foot hills lies the abode of the Gallongs who are in a majority in the total population of this district.

*Tirap Frontier Tract.*—The Nagas occupy the hills in the eastern portion of the southern area of the old Sadiya Frontier Tract between the plains of Assam and Burma. Actually they occupy the entire country from the Buri Dehing to the Kapili river in Nowgong and south to the confines of Manipur and Cachar. They may be conveniently divided into (1) those between the plains area of Tirap Frontier Tract and the Patkoi ridge, *i.e.*, Cis-Patkoi and (2) those between the main Patkoi ridge and the Assam-Burma boundary—Trans-Patkoi. The area between the Patkoi ridge, the Upper Chindwin district of Burma, the Hukong Valley on the east and the Naga Hills district of Assam on the west is practically an unexplored area, inhabited by the Rangpang and other Nagas. The Cis-Patkoi tribes are (1) Laju and Hatut clans, (2) the Moglum, (3) the Lengri, Moshang, Longphi, Rongrang and Tulen—all Rangpang clan ; Ungkup, Kamlau and Tikoks live in the Namchik river basin eastwards.

According to tribes, this Tribal Area can be divided into two groups: Konyak and Non-Konyak. Of these, the various sections of Konyaks form the largest Naga tribe in the entire area. These again are primarily those who live in the Namsang-Borduria Control Area on the east of the Dilli river and those who live in the region on the west of the Dilli

river between the Namsang-Borduria Control Area and the Naga Control Area. The Konyaks of the Namsang-Borduria Control Area are more " administered " than their neighbours.

The following tribes are represented in the Non-Konyak groups: Kachins, Hkamti Shans, Moshangs, Morangs Longchangs, Tikoks, Luangphis, Rongrangs, Sangkeys, Lanshings, Maimongs, Ponthais, Joglis, Moglums and Yonkuks.

**Se-La Sub-Agency and Subansiri Area (Balipara Frontier Tract)**

The tribes which inhabit these areas are as follows :—

(*a*) The Daflas who inhabit the portion of the Himalayas from the Bhoreli river eastward to the Khru river, a tributary of the Subansiri.

(*b*) The Akas who live in the area directly to the west of the Bhoreli river and inhabit both the north and south banks of the Bichong river.

(*c*) The Khowas living in the Tenga Valley under the Akas.

(*d*) The Sherdukpens, a small tribe of Mombas living in the large villages of Shergaon and Rupa with a number of subsidiary smaller villages which are in reality groups of houses built on their own cultivation sites.

(*e*) The Mombas who inhabit the western end of the Digion river right up to the Se-La range.

(*f*) The Mijis inhabiting the Upper Valley of the Bishong and occupying the northern and central areas of the Se-La Sub-Agency.

In the Subansiri Area we find (*a*) the Daflas, *b*) the Apatanis and (*c*) the Hill Miris who inhabit the Subansiri Valley as far as the plains. The Hill Miris should in no way be confounded with the Miris living in the plains of Assam. The latter are descended from men of the Dafla Hill Miris and Abor tribals who have in the past left the plains and settled in the hills now becoming a distinct community.

I had compiled interesting accounts of all these tribes inhabiting the North-East Frontier Agency areas based mainly on the accounts of the Political Officers as well as the District Gazetteers of Darrang, Lakhimpur, Sibsagar and Sadiya and Balipara Frontier Tracts. Considerable help was derived from Dalton's Descriptive Ethnology of Bengal, Sir William Hunter's Statistical Account of Assam, Volume I, and the previous Census Reports for a brief description of their customs, manners and way of life. The North-East Frontier Agency administration is engaged at present in bringing out a District Gazetteer for its areas, which will embody a detailed and authoritative account of these tribes. Hence, as desired by the Adviser to His Excellency the Governor of Assam for the Tribal Areas, the account of all these various hill tribes compiled by me has been omitted from this handbook. The inquisitive reader, I trust, will not have to wait long for an account of these tribes, which is expected to be available before the year is out.

## Growth of Population

Table A-II for tribal areas reveals certain features which need explanation. I may first finish with the small Naga Tribal Area (Tuensang) which was censused for the first time in 1951. As no figures for previous censuses regarding it are available, I cannot give its total or percentage growth during the last or previous decades.

Only the figures of Balipara Frontier Tract are comparable over all the 3 censuses. They show an increase of 40·4 per cent. in 1921-31, and 36·8 per cent. in 1931-41, and the immense increase of 49·3 per cent. at the present census. During the last as well as the previous decade, Balipara Frontier Tract carries away the palm in returning the higher percentage rate of increase in any area of Assam, hills or plains, for which separate figures are available. This phenomenal increase is mainly due to (1) removal to this district of tea garden labourers' lines of Balipara Tea Estate from Darrang district ; (2) settlement of retired Assam personnel in pensioners' village and Sonai Pam village ; and the settlement of indigenous persons from the adjoining villages in Darrang as also *ex*-tea garden labourers; (3) driven by low economic prospects and poverty in their hills, some Hill Daflas have come down to settle in the plains Dafla settlement at Lokra ; (4) moreover, nearly 570 squatters were censused in the Gohpur Reserve Forest, who have settled there from the adjoining districts of Darrang, Lakhimpur and Goalpara. These causes are mainly responsible for this immense increase of Balipara Frontier Tract. The natural growth of the existing population, the presence of a floating population (800) in temporary camp working in Forest Reserves and the reformation of the 5th Assam Rifles Battalion with its increased personnel after 1941 are other causes which account for the rest of the increase.

For the remaining 3 frontier areas, Mishmi Hills, Abor Hills and Tirap Frontier Tract, the reader is cautioned against uncritically comparing the 1951 figures with previous ones without the following reservations. Mishmi Hills, for example, shows an increase of only 1·2 per cent. against that of 13·8 and 39·9 per cent. in the two preceding decades. On the other hand, Abor Hills and Tirap Frontier Tract reveal an unbelievably large percentage *decrease* of 39·0 and 61·7 per cent. at the present census. It should be clearly noted that the extremely small rate of growth in Mishmi Hills or the tremendous decline in Abor Hills and Tirap Frontier Tract is not due to demographic reasons but to the omission of a number of villages from the 1951 census as they fell in Part B Tribal Areas, though these were regularly censused in 1941. In Mishmi Hills, for example, the Political Officer reports the omission of 94 villages from the present census. They are estimated by the Political Officer to have a population of 10,698. If this is added to the present population in order to make it comparable with that of 1941, Mishmi Hills will show a percentage increase of 34·6 which is entirely satisfactory. In Tirap Frontier Tract 76 villages with an estimated population of 9,638 and in Abor Hills 68 villages with 11,304 were similarly omitted. If these population figures are added to their existing population, Abor Hills and Tirap Frontier Tract will show a percentage growth of 16·3 and 9·1 respectively.

The Language Tables will show many new names which are not traceable in Sir Grierson's Index or previous Census Reports but they have been retained as they were returned subject to further scrutiny.

## Introducing the Statistics

In the past, village statistics for each district used to be printed after the census, giving the population of each village and showing the distribution of communities and of literate persons. In view of the importance of the 1951 census, at which in addition to the usual population data, valuable information was collected concerning the social and economic life of the people, it was decided to publish a District Census Handbook containing the more important census abstracts and tables.

The Primary Census Abstract gives the details of each village by the 8 Livelihood Classes. There are five general population tables of the 'A' Series, three economic tables of the 'B' Series, five household and age (sample) tables of the 'C' Series, seven social and cultural tables of the 'D' Series and one table 'E' giving summary figures for the district and thanas. As far as possible, these tables furnish district data with break-up for census tracts within the district.

Each district was, therefore, divided for purposes of the Census into a number of rural and urban tracts according to the size of the population.

At the 1951 Census, the economic classsfication was substituted for the classification based on *religion*. The people have been divided into two broad livelihood categories, namely, the agricultural classes and the non-agricultural classes. There are four agricultural classes defined as below :—

I. Cultivators of land wholly or mainly owned and their dependants.

II. Cultivators of land wholly or mainly un-owned and their dependants.

III. Cultivating labourers and their dependants.

IV. Non-cultivating owners of land, agricultural rent receivers and their dependants.

There are similarly four non-agricultural classes defined as persons including dependants who derive their principal means of livelihood from—

V. Production other than cultivation.

VI. Commerce.

VII. Transport.

VIII. Other services and miscellaneous sources.

The above eight classes have been referred to as livelihood classes.

Each of the above eight livelihood classes has been divided into three sub-classes with reference to the economic status as below :—

(i) Self-supporting persons ;

(ii) Non-earning Dependants ; and

(iii) Earning Dependants.

(i) A 'Self-supporting Person' is one who earns an income in cash or kind sufficient at least for his own maintenance.

(ii) A 'Non-earning Dependant' is a person who has no income of his own either in cash or in kind.

(iii) An 'Earning Dependant' is a person who earns a regular (not casual) income not sufficient even for his own maintenance. It includes seasonal income also.

All self-supporting persons are, ordinarily, economically active. But there are certain classes and groups which constitute an exception to this rule. These are mentioned below:—

(i) All self-supporting persons of Agricultural Class IV.

(ii) The following groups of self-supporting persons who are included in Non-Agricultural Class VIII, and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :—

(a) Non-working owners of non-agricultural property.

(b) Pensioners and remittance holders.

(c) Persons living on charity and other persons with unproductive occupations, and

(d) Inmates of penal institutions and asylums.

Economically active persons engaged in industries and services are classified in economic table B-III into the ten divisions and 88 subdivisions mentioned above, and are further divided into three sections, namely :—

(i) Employers,

(ii) Employees, and

(iii) Independent workers.

A person should be treated as an 'Employer' only if he has necessarily to employ any person in order to carry on the business from which he secures his livelihood, provided that employee is regularly employed and derives his Principal Means of Livelihood by such employment. Part-time or casual employment which does not provide the Principal Means of Livelihood of the employee should not be taken into account. A person employing a cook or other servants for domestic services is not an employer.

An 'Employee' is a person who ordinarily works under some other person for a salary or wage in cash or kind, as the means of earning his livelihood. Managers, superintendents, agents, etc. and all Government servants should be recorded as employees only even though they may have power of employing or appointing subordinate officers or assistants.

An 'Independent Worker' means a person who is not employed by anyone else and who does not employ anybody else in order to earn his livelihood.

The Age (Sample) tables were prepared from the original enumeration slips by taking a ten per cent. sample in accordance with the following instructions of the Registrar General, India.

The 'D' Series social and cultural tables include Table D-V relating to the displaced persons giving particulars about their arrival into India. Table D-VI gives details of the non-Indian nationals and Table D-VII is designed to show the distribution of educated man-power among the different livelihood classes.

Important population data for the district and the thanas have been summarised in Table 'E' which also gives the classification of the people by livelihood classes.

The main Report of the 1951 Census for the States of Assam, Tripura and Manipur will be found in two parts entitled "Census of India 1951—Volume XII—Assam, Manipur and Tripura". Part I contains an analysis of the statistics collected and Part II, statistics arranged in different tables for the States, their natural divisions and districts.

In addition to these Volumes there are National Registers of Citizens prepared for every village and ward and maintained in manuscript giving important census details for each person. These registers are preserved as permanent records in the district head-quarters.

From the data collected at the Census of the small-scale Industries, three tables were prepared which are included in the District Census Handbook, giving village or wardwise distribution of small-scale industrial establishments, employment in textile establishments for Census tracts and employment in non-textile establishments for the same tracts.

While the accuracy in respect of the details actually recorded by the Enumerators during the Census of the small-scale Industries has been reported to be good, the District Officers were of the view that there was tendency towards under-enumeration of the establishments, due to the failure of the enumerating staff to make *intensive efforts to discover all establishments* within the areas allotted to them. The figures in the tables for the Small-scale Industries should, therefore, be regarded as *illustrative* of the nature of small industries prevalent in the different parts of the district and should not be relied upon as giving *accurate number* of specific type of establishments in different localities.

## INSTRUCTIONS FOR TABULATION OF VILLAGE NOTES

Important information for every village was separately recorded on printed forms and has been incorporated in columns 3 and 4 of Primary Census Abstract using the symbols given below :—

**1. Floods—**

*Write.*—'F' If it is liable to flood of any category.

2. **Epidemics—**

For Entries like Cholera, Small-pox, Kala-azar, Malaria, *write* Ch. Sp. Ka. or Mal. For all other epidemics mentioned in this column, enter it in full.

**3. Water Supply—**

A.—The village has a source of water supply provided by the Government or Local Board.

B.—Natural sources of supply like rivers and bils.

C.—Private supply.

D.—Acute scarcity.

Underlined, it will indicate that quality of drinking water is bad.

**4. Medical Facilities—**

a.—The village has a Local Board or Government reglar dispensary wi hin 5 miles radius.

b.—There is no regular dispensary but a Public Health Dispensary within 5 miles radius.

c.—There is no dispensary but a private qualified doctor within 5 miles radius.

d.—No medical facilities of any sort.

**5. Educational Facilities—**

1.—Served by a Local Board or Government School within 2 miles radius.

2.—Served by a Private Venture School only within 2 miles radius.

3.—No educational facilities of any kind (Mission Schools have been generally treated as private schools although in some areas where they get grant-in-aid they have been shown as Government Schools by Enumerator).

## CENSUS TRACT—SAMPLE POPULATION AND DISPLACED PERSONS

Census statistics of the urban and rural population can be studied in various ways. The results of such studies in comparing the condition and characteristics of the urban and rural people in the matter of births, deaths, sex composition, sanitation, levels of living etc., would be of great value in economic planning and development of social welfare work in the State and its different parts.

Preparatory to the sorting and tabulation of census information, rural and urban areas of a district were grouped into Census Tracts on the basis of instructions issued by the Registrar General of India. With his approval, the following rural and urban tracts were formed in the case of North-East Frontier Agency :—

| | Rural | Urban |
|---|---|---|
| Tract No. | 50. Mishmi hills | 11. Sadiya town. |
| | 51. Abor hills | |
| | 52. Balipara Frontier Tract. | |
| | 53. Tirap Frontier Tract. | |
| | 9. Naga Tribal Area. | |

In several Tables the term "Sample Population" has been used. This sample was drawn according to the following intruction of the Registrar General of India. Enumeration was done on pads of 100 slips each, a slip containing the record of an individual.

"Break each pad and stack the slips of the pad; and "cut" the stack as in a card game. Place the lower portion above the upper portion and then deal the slips into the pigeon holes. You should deal the slips into pigeon holes in the *order* of 1, 2, 3, 4, 5, 'S' 6, 7, 8, and 9 successively. All the time, you should watch the slips of 'Displaced Persons'. If you come across any slip of a displaced person deal it in the pigeon hole separately labelled for 'Displaced Persons'. Thus there were three bundles ; (*i*) general, Slips, *i.e.*, Slips combined for holes labelled for 1,2,3,4,5,6,7,8 and 9 (*ii*) Sample bundles, Slips, *i.e.*, Slips in the hole marked 'S' and (*iii*) Displaced Persons.

Hence it will be seen that the sample is not a sample of the total population but of the latter excluding the 'Displaced Population'.

The check factors for the sample population are—

Mishmi hills.—

| | | | |
|---|---|---|---|
| 1,000 S/G | Rural Total | ... ... | =112·36 |
| 1,000 S/G | Urban area Total | ... ... | =111·11 |
| 1,000 S/G | District Total | ... ... | =112·17 |

| | | |
|---|---|---|
| Abor hills ... ... ... | 1,000 | S/G=110·69 |
| Tirap Frontier Tract ... ... | 1,000 | S/G=109·04 |
| Balipara Frontier Tract ... | 1,000 | S/G=110·48 |
| Naga Tribal area ... ... | 1,000 | S/G=110·67 |

A 'Displaced Person' was defined by the Registrar General of India as follows:—

"A 'Displaced Person' means any person who has entered India having left or being compelled to leave his or her home in Western Pakistan on or after the 1st March, 1947 or his/her home in Eastern Pakistan on or after the 15th October 1946 on account of civil disturbances or the fear of such disturbances or on account of the setting up of the two Dominions of India and Pakistan".
