	Males	31.58	18.67	81.91
	Females	12.29	8.21	52.92

INTRODUCTORY NOTE

INTRODUCTORY NOTE

The provisional totals of Andhra Pradesh State were released on 23rd March, 1981. This was done through the publication of Paper I of 1981 entitled "Provisional Population Totals". The details in the said paper were confined to the following items :

1. Decennial population growth rates 1971–'81
2. Density of population 1981
3. Sex-ratio
4. Literacy

Cities with a population of over 100,000 were also indicated therein. The purpose of Paper I was necessarily limited to these items to enable dessimation of the provisional figures as quickly as possible to the citizens and data users.

The figures contained in the supplement as in Paper I are purely provisional. An accurate description must await the results of final tabulations which are under way. I would also request the reader not to attempt an exact tally of the figures given in the supplement with those given in Paper I. In an operation involving over a lakh of enumerators discrepancies are bound to creep in. These discrepancies will be reconciled during the process of final tabulations and therefore the purist must await the publication on these results. In the meantime awry though they be in a few respects the figures will, I hope to a great extent assist the data users in arriving at broad conclusions and would serve the purpose till more refined figures are made available.

The content of the supplement to Paper I of 1981 is based mainly on the responses elicited to the economic questions. The economic questions canvassed for 1981 census are different from the earlier censuses. The 'work' concept of 1961 and 1971 censuses, as opposed to the 'income' or 'economic independence' concept of the earlier censuses was adopted for 1981 census. But the criterion for classification of persons as workers has been changed. While in the 1961 and 1971 censuses different approaches, namely, usual status and current status, were adopted with reference period of one year and one week for seasonal and for regular work respectively, at the 1981 census the usual status approach has been adopted uniformly for all work. In the 1961 and 1971 censuses classification as worker or non-worker was made through different criteria. In 1961, a person was qualified as a worker if he had worked regularly during the last season or if he had worked atleast a day in regular (non-season) work during the preceding fortnight. At the 1971 census a person was treated as a worker only if he had spent his time mainly in work if he had worked atleast for a day in regular (non-seasonal) work during the preceding week. The dichotomy of worker/non-worker of 1961 and 1971 censuses has been discarded at the 1981 census and instead a trichotomy as main workers, marginal workers and non-workers has been adopted. For main workers the time criterion of engagement in work for major part of the year, i. e., atleast 183 days has been adopted while those who worked for sometime during the last year but not for the major part (i. e., less than 183 days) have been treated as marginal workers. Those who have never worked during the last year are non-workers. This trichotomy partially permits a comparison of 1981 census economic data with that of 1971 as well as 1961. The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main and marginal workers of 1981 together correspond to the workers of 1961.

The new item 'seeking/available for work has been added to the economic question of the 1981 census. This supplement, however, does not deal with this category.

As in the previous censuses, the 1981 census data are presented by rural and urban areas. The basic unit for rural areas is the revenue village which has definite surveyed boundaries.

Urban areas are specially defined for census purpose. In the 1981 census the same criteria as adopted in 1961 and 1971 censuses

with only minor changes have been adopted. Urban areas in the 1981 census comprise ;

a) All places with a Municipality, Corporation or Cantonment Board or notified town areas;

b) All other places which satisfied the following criteria :

(i) A minimum population of 5,000;

(ii) Atleast 75% of the male working population engaged in non-agricultural (and allied) activity;

(iii) A population of at least 400 persons per Sq. Kilometer (or one thousand per sq-mile).

The urban criterion of 1981 varies slightly from that of 1961 and 1971 censuses, in which the males working in activities such as fishing, logging, etc., were treated as engaged in non-agricultural activity and, therefore, contributed to the 75% criterion in 1961 and 1971 censuses, whereas in the 1981 census, these activities are treated as on par with cultivation and agricultural labour for the purpose of this criterion.

Urban Agglomeration

Apart from town/city the 1971 concept of urban agglomeration has also been adopted for the 1981 census. An urban agglomeration may constitute :

a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages) ;

b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) ;

c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

In this supplement the following data will be found :

Supplement Table 1 : Rural and Urban composition of population by districts.

Supplement Table 2 : Population of towns.

Supplement Table 3 : Urban population by size class of towns.

Supplement Table 4 : Distribution of main workers by districts.

Supplement Table 5 : Distribution of main workers by cultivators, agricultural labourers, household industry and other workers by districts.

Primary Census Abstract Part I

Primary Census Abstract Part II

Primary Census Abstract is provided for each district and includes information on area, population by sex, density, sex-ratio, number of literates and literacy rates, workers, marginal workers and non-workers by sex. Information for rural and urban areas separately is presented in the Primary Census Abstract.

Besides the data, six maps are also presented in this publication illustrating different demographic characteristics of the population.

These are :

1. Proportion of urban population to total population.

2. Proportion of urban population in each size class of towns to total urban population 1971 and 1981 ;

3. Location of Class I towns (population with 100,000 and above) and their growth rate 1971-81;

4. Proportion of male workers to total male population, 1981 ;

5. Proportion of female workers to total female population ;

6. Various categories of workers and their proportion to total workers.

I take this opportunity to thank the members of my staff for the hard work put in to bring out this supplement.

ANALYTICAL NOTE

ANALYTICAL NOTE

Provisional Population Figures Reported in Paper I of 1981

Since the publication of the Provisional Population totals in Paper I of 1981 on the basis of consolidated totals received from the rural and urban charges, a check has resulted in revised figures in respect of some charges. However, the overall picture of the provisional figures for the State has not undergone a significant revision. The revised total population of the State is 53,592,605 as against the figure of 53,403,619 published in Paper 1 of 1981, thus indicating an overall increase of 188,986 or forming about 0.35% of the provisional total indicated in Paper 1. The growth rate of population for 1971-81 given in the earlier publication as +22.76% stands revised to +23.19%.

Rural and Urban Population in Andhra Pradesh

It has been the tradition of the Indian Census to tabulate and publish the data collected at every Census for rural and urban areas separately. Such a classification is necessary to assess the differentials in the social, economic, cultural and demographic characteristics between the two strata over a definite period of time. In the rural areas, the lowest administrative unit is a village or revenue village as commonly known. The revenue village generally has one or more groups of settled habitations surrounded by agricultural fields and with definite surveyed boundaries. Each such village is treated as a separate administrative unit. The village may have one or more hamlets.

For the 1981 Census all places with a municipality, corporation or cantonment or notified area were treated automatically as urban. All other places which satisfy the following criteria were also considered as urban.

(i) A minimum population of 5,000.

(ii) Atleast 75% of the male working population is in non-agricultural pursuits.

(iii) A density of population of atleast 400 persons per Sq. Km.

Concept of Urban Agglomeration

This concept was first introduced at the 1971 Census and followed in the 1981 Census also. An urban agglomeration is defined as a continuous urban spread constituting a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous and well recognised outgrowths, if any, of such towns.

Such urban agglomeration takes into its fold all such areas which have sprung up on the periphery of the town, but may be falling outside the statutory limits of the individual local body.

The following places were treated as urban agglomerations in Andhra Pradesh for the purpose of 1981 Census.

Serial Number	Name of the District of each constituent unit included in the Urban Agglomeration shown in Col. (3)	Name of Urban Agglomeration with constituent units
1	2	3
1.	Vishakhapatnam	**Vishakhapatnam U. A.**
		1. Vishakhapatnam, Municipal Corporation

1	2	3

		17. Macha Bolaram (P)
		18. Kowkur (O.G. to Macha Bolaram (P))
		19. Yapral (P)
		20. Qutubullapur (P)
		21. Kapra (P)
		22. Moosapet (P)

Rural Urban Composition

Out of the total provisional population of the State at 1981 Census, viz., 53,592,605, Rural and Urban components are 41,134,896 and 12,457,709 persons respectively. This indicates that 76.75% of the total population is rural and 23.25% is urban. The corresponding figures at the 1971 Census for the State were 80.69% and 19.31% respectively.

During the period 1971-1981 when the overall growth rate was 23.19% the urban population has grown by 48.26% while the rural component has shown a growth rate of only 17.19%.

The following statement sets out the proportions of rural and urban population by districts in the State.

Sl. No.	State / District	Percentage of rural and urban population to total population		No. of urban Units		percentage to State urban population	
		Rural	Urban	1971	1981	1971	1981
1	2	3	4	5	6	7	8
	ANDHRA PRADESH	**76.75**	**23.25**	**224**	**252**	**100.00**	**100.00**
1.	Srikakulam	88.59	11.41	11	11	1.95	1.74
2.	Vizianagaram	83.98	16.02	9	10	2.62	2.33
3.	Vishakhapatnam	68.42	31.58	11	10	6.16	6.39
4.	East Godavari	77.80	22.20	13	17	7.06	6.60
5.	West Godavari	79.16	20.84	10	11	5.00	4.78
6.	Krishna	67.36	32.64	16	17	8.09	7.97
7.	Guntur	72.40	27.60	16	15	8.46	7.59

10.	Chittoor	83.18	16.82	13	13	3.66	3.71
11.	Cuddapah	80.59	19.41	8	13	2.66	3.00
12.	Anantapur	79.74	20.26	11	11	4.47	4.26
13.	Kurnool	75.48	24.52	10	11	4.79	4.73
14.	Mahbubnagar	89.08	10.92	11	11	2.06	2.15
15.	Rangareddy	76.01	23.99	11	16	1.87	3.04
16.	Hyderabad	...	100.00	6	5	20.02	17.98
17.	Medak	88.16	11.84	8	10	1.49	1.74
18.	Nizamabad	80.72	19.28	6	7	2.49	2.60
19.	Adilabad	80.66	19.34	11	12	2.44	2.54
20.	Karimnagar	84.28	15.72	11	12	2.50	3.08
21.	Warangal	82.74	17.26	4	4	2.99	3.19
22.	Khammam	83.21	16.79	6	7	2.22	2.35
23.	Nalgonda	88.61	11.39	6	10	1.45	2.08

Of the 23 districts in Andhra Pradesh State, Hyderabad district is unique with a cent per cent urban population. The districts which have recorded an urban population higher than the State average are Krishna (32.64%), Vishakhapatnam (31.58%), Guntur (27.60%), Kurnool (24.52%), and Rangareddy (23.99%). The rest of the districts of Andhra Pradesh have an urban proportion lower than the State average. Mahbubnagar district with 10.92% has recorded the lowest proportion of urban population in the State.

Number of Urban units in Andhra Pradesh as at different Censuses are given below:

Year	No. of Towns
1901	116
1911	133
1921	153
1931	176
1941	212
1951	291
1961	212
1971	207
1981	234

Comparision of Rural/Urban Proportion of Population with other States

The following statement shows the total population, urban population and percentage of urban population to total population in the States and Union Territories based on the 1981 Census provisional population figures.

Urban Population in the States and Union Territories, 1981 (Provisional)

Sl. No.	India/State/Union Territory	Total Population	Urban Population	Percentage of Urban population to total population
1	2	3	4	5
	INDIA	658,140,676	156,188,507	23.73
	States			
1.	Andhra Pradesh	53,592,605	12,457,709	23.25
2.	Bihar	69,823,154	8,699,013	12.46
3.	Gujarat	33,960,905	10,556,431	31.08
4.	Haryana	12,850,902	2,821,829	21.96
5.	Himachal Pradesh	4,237,569	327,162	7.72
6.	Karnataka	37,043,451	10,711,103	28.92

14.	Punjab	16,669,755	4,620,495	27.72
15.	Rajasthan	34,108,292	7,140,421	20.93

1	2	3	4	5
16.	**Sikkim**	314,999	51,110	16.23
17.	**Tamil Nadu**	48,297,456	15,927,952	32.98
18.	**Tripura**	2,047,351	224,881	10.98
19.	**Uttar Pradesh**	110,885,874	19,973,223	18.01
20.	**West Bengal**	54,485,560	14,433,486	26.49
Union Territories				
1.	A & N Islands	188,254	49,632	26.36
2.	Arunachal Pradesh	628,050	39,715	6.32
3.	Chandigarh	450,061	421,256	93.60
4.	Dadra & Nagar Haveli	103,677	6,914	6.67
5.	Delhi	6,196,414	5,752,538	92.84
6.	Goa, Daman & Diu	1,082,117	351,235	32.46
7.	Lakshadweep	40,237	18,633	46.31
8.	Mizoram	487,774	122,765	25.17
9.	Pondicherry	604,182	316,085	52.32

The percentage of urban population to the total in Andhra Pradesh works out to 23.25% which is slightly less than the All-India average of 23.73%. Though Andhra Pradesh State occupies fifth place in India in population size, it occupies eighth place in the composition of urban population in the country. Not taking into account the Union Territories in view of their smallness in size, the most urbanised State in our country as revealed from the provisional population figures of 1981 Census is Maharashtra in which more than one third (35.03%) of the total population of the State live in urban areas. Tamil Nadu following Maharashtra closely has returned 32.98% of its total population as urban. Gujarat (31.08%), Karnataka (28.92%), Punjab (27.72%), West Bengal (26.49%) and Manipur (26.44%) follow in descending order. Himachal Pradesh is the least urbanised State in the country with only 7.72% of its population in its urban areas.

Number and Size Class of Towns in Andhra Pradesh State

Two hundred and fifty two places were recognised as urban areas at the 1981 Census. The classification of towns into six population size classes was adopted at the Census and is as follows:

Class	I Towns	Population size of 100,000 and above (cities)
Class	II Towns	-do- 50,000 to 99,999
Class	III Towns	-do- 20,000 to 49,999
Class	IV Towns	-do- 10,000 to 19,999
Class	V Towns	-do- 5,000 to 9,999
Class	VI Towns	-do- Less than 5,000

The following statement shows the number of Towns and the total population contributed by each class and the proportion of the population to each class to the total urban population

Class	1981			1971		
	No. of towns	Population	percentage of Population	No. of towns	Population	Percentage of population
1	2	3	4	5	6	7
Total	234	12,457,709	100.00	207	8,402,527	100.00
Class I	20*	6,688,001	53.69	13	4,063,441	48.36
Class II	30	2,014,465	16.17	17	1,121,533	13.35
Class III	88	2,609 863	20.95	59	1,757,439	20.92
Class IV	64	912,455	7.32	76	1,126,783	13.41
Class V	28	218,244	1.75	38	318,026	3.78
Class VI	4	14,681	0.12	4	15,305	0.18

*Includes 4 Urban agglomerations and their 18 constituent towns.

As against 207 towns in the State in 1971 there are 234 towns recorded in 1981 Census. It may be observed from the above table that the number of Class I towns has increased from 13 in 1971 to 20 in 1981. Thus more than half of the urban population fall into the fold of Class I towns, i.e., cities. The composition of population in Class II towns increased from 13.35% at 1971 Census to 16.17% during 1981 Census. Number of towns in this class has increased from 17 during 1971 to 30 at the 1981 Census. The position of Class III towns in terms of percentage of population is stabilised even though the number of towns in this class has increased from 59 in 1971 to 88 in 1981. However, the percentage of population and the number of towns in Class IV and Class V have decreased when compared to 1971

Work participation Rates

At the 1981 Census, the information regarding the economic activity of the people was collected in great detail. The economic questions consist of three major parts, viz.:

I. Q. 14A worked any time at all last year ?

Yes / No. (H/ST/D/R/B/I/O)

Q. 14B If yes in 14A, did you work for major part of last year ?
Yes (1)/No. (2)

II. Q. 15A Main activity last year ?

Yes in 14B (C/AL/HHI/OW) / No in 4B (H/ST/D/R/B/I/O)

14B Yes - Any other work any time last year ?Yes (C/AL/HHI/OW)/No

Q. 15B

14B No-Work done any time last year ? (C/AL/HHI/OW)

III. Q. 16 If No in 14A or 14B seeking/ available for work ? Yes (1)/No (2)

The definition of work adopted in Census is as follows :-

" Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work".

For all the above questions, the reference perind was one year preceding the date of enumeration.

In the field of economic questions, a significant departure has been made at the 1971 Census. Information on employment aspect of the population is being collected in Census from 1881 onwards though the concepts adopted varied from Census to Census. Income or economic independence was made the criterion in the earlier Censuses for determining the economy of the country. At the 1931 Census a new category of economic semi-dependence was introduced and it was called 'working dependent'. At the 1941 Census, this category was termed as partly dependent and the same was called earning dependent in 1951. During 1961 Census, emphasis was laid on work so that all people who work including family workers, who were not in receipt of any income or do not earn enough for their maintenance, could also be included as 'Workers'. A person is qualified as a worker if he had worked regularly in the last season or atleast for a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 Census the main activity of a person was initially enquired according as he spent his time basically as a 'worker', engaged in production of goods and services, or as a 'Non-worker'. For regular work in organised sector, the reference period was the week prior to enumeration, and for seasonal work such as agriculture, etc., the last one year. Persons engaged atleast for a day in regular (non-seasonal) work during the preceding week were treated as workers. The work of a person who was basically a non-worker such as a student, or housewife and made some marginal contribution to work was classified as secondary work and this was recorded separately for this non-worker.

At the 1981 Census it was considered desirable to have as detailed a profile of the working population as possible, maintaining the comparability with 1961 and 1971 data. It was attempted to find out if a person had done any work at all during the last year. It will thus be seen that the questions on economic aspects have been designed to distinguish all the workers, regular or seasonal and non-workers, with reference to the activities during the last one year prior to the date of enumeration. It was intended to find out how many had worked for 183 days or more, i.e., 6 months or more and information regarding the secondary work done by regular workers and also the marginal work done by the non-workers was collected. It was felt in the present context that usual status of worker was more appropriate when compared with the approach of current status of worker followed earlier. In order to elicit some information on the number of unemployed, a question was canvassed to those who were basically non-workers and also to those who had not worked for 6 months and above, as to whether they were seeking or available for work.

Statement I sets out the total workers by sex and by rural/urban at 1961, 1971 and 1981 Censuses and also the work participation rates pertaining to Andhra Pradesh State. Work participation rate refers to the proportion of workers to total population and is different from the proportions of labour force to total population. While analysing the data on work participation rates, it is desirable to recall the definitions of main workers, marginal workers and non-workers. The categories of main workers, marginal workers and non-workers are mutually exclusive and when added provide the total population itself. At the 1961 Census, information regarding the secondary work was not collected while at 1971 Census, a separate enquiry was made regarding secondary work of workers as well as non-workers. As discussed earlier at the 1981 Census, the information relating to main workers and marginal workers was collected which form exclusive categories. During 1961-1971 total number of main workers declined from 18,663,042 to 18,005,999 while between 1971 and 1981 there has been an increase of 25.55 percent among workers.

Taking the main workers into consideration at 1971 and 1981 Censuses and comparing with 1961 data, it will be noticed that the work participation rate declined from 51.87 per cent at the 1961 Census to 41.39 per cent at the 1971 Census and stood at 42.18 per cent at the 1981 Census. Between 1961 and 1971 participation rates for total, rural and urban in the case of both sexes have shown a declining trend. At the 1981 Census the participation

rates for total and rural (both sexes combined) have shown slightly increasing trend over 1971 level while for urban areas, there has been a slight fall. Analysis of sex-wise data indicate that participation rates have shown consistently declining trend for males in almost all areas, while for females there is an upward trend. Data for All India presented in Statement II indicates almost an identical trend.

The main workers of 1981 Census along with the marginal workers and the workers of 1971 Census along with the non-workers having secondary work are expected to correspond to the workers of 1961. The situation as envisaged above is presented in Statement I, which reveals the increasing trend from one decade to another. The comparable figures for workers as presented indicate 18,663,042 workers in 1961, 18,874,361 in 1971 and 26,729,239 in 1981. But the comparison of participation rates at the 1971 Census present a declining trend between 1961 and 1971 for both the sexes in all areas, while an increasing trend is noticed between 1971 and 1981. The increase in participation rates in respect of females is more conspicuous than for males. This falls in line with the trend observed at All India level.

Statement III and IV give the participation rates for Andhra Pradesh and All India respectively distributed into the three broad categories of Cultivators, Agricultural Labourers and Other Workers, at the three Censuses. For purposes of Statements III and IV, workers in Household Industry have been included in the Other Workers category. These rates are presented for Total, Rural and Urban by sex. It is interesting to note that the participation rates between 1971 and 1981 in respect of males in the category of Cultivators and Agricultural Labourers have shown a slightly declining trend in all areas while there has been an upward trend in respect of females. In the case of 'other workers' for the same period, males have registered a decreasing trend both in Rural and Urban areas in Andhra Pradesh while this has fallen only in Urban areas in respect of All India. Females have recorded an increasing trend in all areas both in Andhra Pradesh and All-India during this period.

Participation rates (Main Workers) by districts for both sexes at 1971 and 1981 Censuses

District-wise distribution of workers and their percentage to total population at 1981 Census and proportion of workers to total population at 1971 Census are presented in Supplement Table 4. The data presented relate to main workers only. As discussed earlier, between 1971 and 1981 a slightly increasing trend for persons, and slightly decreasing trend for males has been noticed in most districts with certain exceptions while for females the trend is increasing, ranging between +0.10 per cent in Srikakulam and +8.40 per cent in Nizamabad. The districts which have shown decrease in participation rates (in terms of points) for persons are, Srikakulam (—2.14), Vishakhapatnam (—0.51), East Godavari (—0.20), West Godavari (—1.09), Rangareddy (—1.90), Hyderabad (—0.30) and Medak (—0.65). The participation rate for males has shown a slightly declining trend for All-India and Andhra Pradesh State (in most of the districts) during 1971-1981. The districts of Krishna and Guntur are exceptions and show an increase of +1.17% and +0.26% points respectively, in the male participation rates during 1971-1981. In the case of female participation rates, the exception is East Godavari district where the 1981 rate has decreased by 0.04% points over that of 1971.

Comparison of rates of 1981 between districts

Considering the participation rates for both sexes combined, Karimnagar has recorded highest participation rate of 48.56 per cent, followed by Nizamabad (48.01%) and Mahbubnagar (47.43%). Hyderabad with a participation rate of 27.81 per cent takes the last place. Taking the State average participation rate of 42.18%, the districts are divided into two groups; those which have recorded rates lower than the State average and those that have recorded rates higher than the State average.

Statement showing the distribution of districts that have recorded lower and higher work participation rates when compared with State average.

State average 42.18%

Lower than the State average (%)		*Higher than the State average (%)*	
1. Chittoor	41.81	1. Karimnagar	48.56
2. Nellore	41.64	2. Nizamabad	48.01
3. Cuddapah	41.26	3. Mahbubnagar	47.43
4. Krishna	40.53	4. Nalgonda	45.45
5. Srikakulam	40.44	5. Medak	44.96
6. West Godavari	39.52	6. Kurnool	44.64
7. Vishakhapatnam	39.29	7. Guntur	43.83
8. East Godavari	38.13	8. Vizianagaram	43.78
9. Hyderabad	27.81	9. Adilabad	43.46
		10. Rangareddy	43.44
		11. Warangal	43.18
		12. Khammam	42.95
		13. Prakasam	42.73
		14. Anantapur	42.23

A glance at the participation rates by sex reveals 56.16 per cent of the males and 27.87 per cent of females form working population at the State level. The districts which have recorded lower participation rates than State average for males are Srikakulam (54.14%), Vishakhapatnam (56.08%), West Godavari (55.21%), Prakasam (54.16%), Anantapur (54.54%), Kurnool (55.66%), Rangareddy (55.70%), Hyderabad (45.83%), Nizamabad (56.13%) and Warangal (55.64%). All other districts have returned higher male participation rates than State average. Hyderabad district has recorded the lowest male participation rate of 45.83% while Karimnagar has the highest male participation rate of 58.52%. The second and third ranks in male participation rates go to East Godavari district (58.37%) and Mahbubnagar district (58.22%) respectively.

Review of participation rates for females indicates that the following nine districts have recorded rates less than the State average of 27.87% viz., Srikakulam (27.17%), Vishakhapatnam (22.33%), East Godavari (17.75%), West Godavari (23.69%), Krishna (22.86%), Nellore (26.67%), Chittoor (26.13%) Cuddapah (25.53%) and Hyderabad (8.26%). All other districts have recorded higher female participation rates compared to the State average. Hyderabad district has recorded the lowest female participation rate of 8.26% while Nizamabad district has recorded the highest female participation rate of 39.99%. The second and third positions are taken by the districts of Karimnagar (38.54%) and Mahbubnagar (36.46%) respectively.

Distribution of main workers into broad categories

Main workers are broadly divided into four categories viz., Cultivators, Agricultural labourers, Household Industry and Other Workers. Supplement Table No. 5 details the district-wise distribution of main workers and their categories by sex. For comparison, percentage distribution of main workers in the above four categories are given for 1971 and 1981 Censuses.

Combining both sexes, the proportions of cultivators, workers in household industry and other workers have increased during 1971-1981 for the State as a whole, while in respect of Agricultural labourers the proportion has slightly declined. Looking at male proportions, there has been slight decline in Cultivators and Agricultural Labourers, while there has been increase in 'Other Workers' (from 29.83% in 1971 to 31.58 per cent in 1981). The proportion of workers in household industry has slightly increased from 5.09 per cent in 1971 to 5.13 per cent in 1981. On the other hand an increasing trend is noticed in respect of female proportions for the categories of Cultivators and workers in Household Industry, while the other two categories, viz., Agricultural Labourers and Other Workers have shown a declining trend. There has been considerable increase in female proportion of Cultivators and workers in Household Industry during 1971-1981. The proportion of Cultivators has gone up from 19.43 per cent in 1971 to 24.20 per cent in 1981 while that of Household Industry has increased from 4.24 per cent in 1971 to 6.05 per cent in 1981.

The district-wise break-up of main workers available in Table 5 makes an interesting study. Composition of Cultivators among the main workers at the 1981 Census has been highest in Mahbubnagar district (44.68 per cent) followed by Medak (44.64 per cent) and Chittoor (43.08 per cent) while at 1971 Census, the first three positions were held by Medak (44.34 per cent), Chittoor (43.54 per cent) and Vishakhapatnam (43.28 per cent). Hyderabad district with 0.71 per cent and 1.56 per cent respectively at the 1971 and the 1981 Censuses occupies the lowest position.

In respect of Agricultural Labourers, the district-wise proportions at the 1981 Census indicate the order of greater concentration in West Godavari (47.69 per cent), Kurnool (46.72 per cent) and Guntur (45.23 per cent) while at 1971 Census almost similar pattern existed with West Godavari (50.02 per cent), Kurnool (47.79 per cent) and Nellore (47.09 per cent) taking the first three places. Hyderabad district continued to occupy the lowest position at both the 1971 and 1981 Censuses with 1.17 per cent and 1.36 per cent respectively.

Considering the district-wise composition of workers in Household Industry in 1981 Census, Nizamabad (12.63 per cent), Karimnagar (9.47 per cent) and Nalgonda (6.40 per cent) districts occupy the first three places while in 1971 Census the districts in order of concentration were Karimnagar (8.97 per cent), Nizamabad (7.88 per cent) and Mahbubnagar (6.80 per cent). Hyderabad district has recorded the least proportion of workers in Household Industry at the 1971 Census with 2.12 per cent while at the 1981 Census, Guntur stands at the bottom with 3.82 per cent.

Lastly, a glance at the proportions of 'Other Workers' among the main workers by districts in 1981 Census, indicate the order of concentration of Hyderabad (92.53 per cent) followed by Rangareddy (33.80 per cent) and Vishakhapatnam (31.90 per cent). The pattern of high concentration at 1971 was Hyderabad (96.00 per cent) followed by Krishna (30.94 per cent) and East Godavari (29.27 per cent). The least concentration of 'Other Workers' among the districts, however, is returned against Mahbubnagar district in both the Censuses with a proportion of 14.62 per cent and 16.75 per cent respectively for 1971 and 1981.

Primary Census Abstract (P.C.A.)

Tables giving the Primary Census Abstract covering the area, population by sex, density of population, sex ratio, number of literates and literacy rates, number of male and female workers by categories, marginal workers and non-workers by sex in each district upto the taluk/town level are also presented. Tables indicating the comparable data for 1971 Census by district are presented in this volume which will serve as ready reference to the data users.

Marginal workers and non-workers

A significant feature of the 1981 Census was the collection of information on marginal workers who had done some work for a period of less than 6 months during the reference year prior to Census taking.

At the 1971 Census, though this concept was not introduced, there was an equivalent category called 'non-workers with secondary work'. The statement given below presents the percentage distribution of workers, marginal workers/non-workers with secondary work and 'non-workers' to the total population at the 1971 and 1981 Censuses. These proportions are given by T/R/U for both the sexes.

		Percentage to Total Population								
		Workers			Marginal workers			Non-workers		
		P	M	F	P	M	F	P	M	F
Andhra Pradesh										
	T	42.18	56.16	27.87	7.69	4.57	10.89	50.13	39.27	61.24
1981	R	45.76	58.48	32.85	8.34	4.69	12.04	45.90	36.83	55.11
	U	30.36	48.62	11.11	5.58	4.20	7.02	64.06	47.18	81.87
	T	41.39	58.21	24.16	2.00	0.17	3.88	56.61	41.62	71.86
1971	R	43.94	60.24	27.37	2.32	0.18	4.50	53.74	39.58	68.13
	U	30.73	49.90	10.54	0.63	0.11	1.18	68.64	49.99	88.28

Marginal workers form 7.69% of the total population in 1981 Census while the equivalent group in 1971 Census was only 2.00% of the total population indicating an increase in the marginal workers. This increase is steep in females than in males. Also the increase in proportion of marginal workers during 1971-81 is more in rural areas than in urban.

Non-workers form 50.13% of the total population at the 1981 Census while the same formed 56.61% of the population at the 1971 Census, thus clearly indicating the decline in the proportions of non-workers. But in absolute numbers the non-working population has increased from 24,628,347 at the 1971 Census to 26,863,366 at the 1981 Census. There has been a marked decrease in proportions of non-working female population than male population. The proportion of female non-workers has declined from 71.96% in 1971 Census to 61.24% in 1981 Census while for male non-workers the proportion declined from 41.62% to 39.27% during the said period. In this category, the reduction in rural sector has been more prominent than in urban sector.

Participation Rates by Regions

Work participation rates for the three regions in Andhra Pradesh during the 1971 and 1981 Censuses are presented below:

Work participation Rates for the Regions in Andhra Pradesh at 1971 and 1981 Censuses

	1971			1981		
	Persons	Males	Females	Persons	Males	Females
Andhra Pradesh	41.39	58.21	24.16	42.18	56.16	27.87
Coastal Andhra	40.22	58.21	22.06	40.94	56.52	25.20
Rayalaseema	41.47	57.85	24.39	42.52	55.86	28.56
Telangana	42.81	58.40	26.71	43.48	55.88	30.71

Looking at the data, participation rates for Telangana region are higher than the State average, while for Coastal Andhra, these rates are lower in both the Censuses. The rates for Rayalaseema region are almost similar to the State averages. The higher participation rates in Telangana region and lower participation rates in Coastal Andhra are mainly due to the levels of female participation rates. By and large male participation rates in all the three regions at both censuses are almost identical with State averages. Male participation rates have declind during 1971-81 in all the regions, while the female participation rates have registered an increasing trend.

Distribution of Workers as C/AL/HHI/OW - Analysis by Region

Proportions of workers in categories of cultivators, agricultural labourers, household industry and other work are presented in the following statement for the three regions of Andhra Pradesh at 1971 and 1981 Censuses. The data are presented for persons, males and females.

Proportion of Workers in C/AL/H H.I/OW at 1971 and 1981 Censuses

Name of the Region	Cultivators						Agricultural Labourers					
	1971			1981			1971			1981		
	P	M	F	P	M	F	P	M	F	P	M	F
Andhra Pradesh	32.18	37.35	19.43	32.60	36.68	24.20	37.92	27.73	63.08	36.68	26.61	57.46
Coastal Andhra	28.52	33.56	15.09	28.83	32.90	19.60	41.69	32.25	66.83	40.19	30.39	62.42
Rayalaseema	35.24	41.70	19.24	35.99	40.84	26.07	39.95	28.85	67.44	37.70	27.33	58.92
Telangana	34.99	39.84	24.05	35.19	39.11	27.86	32.53	21.61	57.17	32.31	21.81	51.97

	Household Industry						Other Workers					
	1971			1981			1971			1981		
	P	M	F	P	M	F	P	M	F	P	M	F
Andhra Pradesh	4.85	5.09	4.24	5.43	5.13	6.05	25.05	29.83	13.25	25.29	31.58	12.29
Coastal Andhra	4.04	4.38	3.15	4.74	4.73	4.76	25.75	29.81	14.93	26.24	31.98	13.22
Rayalaseema	4.78	5.27	3.57	4.69	4.84	4.38	20.03	24.18	9.75	21.62	26.99	10.63
Telangana	5.82	5.88	5.69	6.54	5.74	8.04	28.66	32.67	13.09	25.96	33.34	12.13

As seen from the statement, Rayalaseema and Telangana regions have higher proportions of cultivators (at both the censuses) than the State average; while in Coastal Andhra Region the proportion is lower. Similar pattern is noticed in respect of both males and females. Of course, as in the case of State average, the proportion of cultivators has slightly increased during 1971-81 in all the regions.

The proportion of agricultural labourers has declined during 1971-81 in all the regions following the pattern of State average. The decline in proportions is noticed in respect of both the sexes also.

At the 1971 Census, the proportion of workers in household industry was higher than the State average in respect of only Telangana region and the same pattern continued in the 1981 census also. Looking at the sexwise breakup of proportions in 1971 female participation rates in household industry were less than those for males for all the regions in the State, while the pattern is otherwise during 1981 Census, with the exception of Rayalaseema region.

Proportion of workers engaged in 'Other Work' are higher than the State average in respect of Coastal Andhra and Telangana regions for both the censuses, while Rayalaseema region has registered a rate lower than the State average.

Physically Handicapped Persons

The last time data of physically handicapped persons was collected in 1931 Census. After independence the data for the physically handicapped persons in our country were collected again for the first time, along with the Houselisting operations held in May, 1980. The physically handicapped persons covered are of the three types of disabilities, i.e., totally blind, totally crippled and totally dumb. "The term 'totally crippled' refers to such persons who have lost their arms or limbs. The loss of arms or legs or all the four limbs refers to loss of both the arms or loss of both the legs. It is not necessary that the disabled should have lost both arms and legs. The loss of either of these, i.e., both arms or both legs would be sufficient for classification as totally crippled. Loss of only one arm and/or one leg will not classify a person as totally crippled. The loss here refers to the inability to use and not necessarily physical absence. Thus, a paralytic who has lost the use of both the legs or both the arms, will be totally crippled, though the legs or arms as such are still physically present".

The survey of physically handicapped persons was conducted along with the Houselisting operations, and as such, the physically handicapped persons who were available in the census houses were alone covered in the survey. The houseless do not, therefore, find a place in this survey.

A statement showing the distribution of physically handicapped persons by districts in our State is given as an appendix to this volume.

Out of the total of 100,552 persons recorded as physically handicapped, i.e., totally blind, totally crippled and totally dumb in the State as many as 89,581 persons forming 89.09% are from rural areas only. Among the total physically handicapped in the State 39.68% are totally blind, 29.91% are totally crippled and 30.41% are totally dumb.

The survey revealed that Guntur district has recorded the highest number of physically handicapped persons accounting for 6,392 persons closely followed by Prakasam district with 6,281 persons and Anantapur district with 6,105 persons. Srikakulam, East Godavari, Krishna and Chittoor have recorded physically handicapped persons ranging between 5,000 to 6,000. The remaining districts have recorded less than 5,000 persons, the lowest being Hyderabad district with 1,073 persons.

SUPPLEMENT TABLES

Supplement Table 1 — Rural and Urban

State/District	Population - 1981		
	Total	Rural	Urban

Towns treated as such for the first time in Census 1981 are printed in ITALICS

\+ : Civic status not yet determined

* : Denotes towns as such for the first time in Census 1971 and continuing as towns in Census 1981

(M C) : Municipal Corporation

(M) : Municipality

(P) : Panchayat

(NAC) : Notified Area Committee

(O.G.) : Out Growth

Based on the preliminary notifications issued by Government of Andhra Pradesh, the following taluks have been treated as independent taluks for the 1981 Census :

1.	P. Gannavaram Taluk	... ...	East Godavari District
2.	Ganapavaram Taluk	... ...	West Godavari District
3.	Penumantra Taluk	... ...	West Godavari District
4.	Tadikonda Taluk	... ...	Guntur District
5.	Amruthalur Taluk	... ...	Guntur District
6.	Pamur Taluk	... ...	Prakasam District
7.	Kondapi Taluk	... ...	Prakasam District
8.	Nallamada Taluk	... ...	Anantapur District

ANNEXURE
PRIMARY CENSUS ABSTRACT, CENSUS - 1971
