PREFACE .. .. (v)

Table: POPULATION IN STATES AND UNION TERRITORIES .. (vii)—(ix)

GENERAL NOTE 1

PRIMARY CENSUS ABSTRACTS 3

State Primary Census Abstract .. .. 6—9

District Primary Census Abstract .. .. 10—21

State Primary Census Abstract for Scheduled Castes .. .. .. 24—25

District Primary Census Abstract for Scheduled Castes .. .. .. 26—33

State Primary Census Abstract for Scheduled Tribes .. .. .. 36—37

District Primary Census Abstract for Scheduled Tribes .. .. .. 38—45

CENSUS HOUSES AND HOUSEHOLDS 47

Statement—1: Number of Households per 1,000 Census Houses and the number of Households per km.^{2}, 1981 .. .. 49—51

SCHEDULED CASTES AND SCHEDULED TRIBES 53

Statement—2: Statement showing the percentage distribution of members of Scheduled Castes and Scheduled Tribes in rural and urban areas to the total population of SC and ST, 1981. 54

Statement—3: Percentage distribution of total population of members of Scheduled Castes and Scheduled Tribes in States/Union Territories and Districts, 1981. .. 55

Statement—4: Percentage of members of Scheduled Castes and Scheduled Tribes in rural and urban areas to the total population, 1981. .. 56—59

LITERATES AND EDUCATED PERSONS 61

Statement—5: Literacy rates in 1981 (the percentages have been calculated on the total population inclusive of the population in the age-group 0-4) Map on Literacy Rates in 1981. .. .. 62—63

CLASSIFICATION OF WORKERS BY INDUSTRIAL CATEGORIES 65

Statement—6: Percentage distribution of population of each sex into workers, marginal workers and non-workers in districts in 1981 (Main workers being further distributed by broad industrial categories of 1981 Census). .. 67

Statement—7: Distribution of 1,000 persons, males and females of total, rural and urban areas among the main workers, marginal workers and non-workers for broad industrial categories of main workers. .. 68—72

Preface

The Primary Census Abstracts for the general population as well as for Scheduled Castes and Scheduled Tribes population of Manipur at the 1981 Census are presented in this volume. These tables have been prepared on a full count basis.

The State PCA furnishes data upto the district level while the District PCA presents data down to Sub-division and City/Town levels. In the case of PCA for Scheduled Castes and Scheduled Tribes the units of presentation remain the same as that of the general population irrespective of whether there is SC/ST population or not. Besides, a few Statements with analytical notes on workers and non-workers, Census houses and households, Scheduled Castes and Scheduled Tribes, Literates and educated persons, and also a map showing the literacy rates in the districts have been presented.

I am grateful to Shri P. Padmanabha, Registrar General, India, and Shri K. K. Chakravorty, Deputy Registrar General for their guidance and advice in compiling the various data contained in this volume and bringing out this publication.

* Includes projected figures of Assam where census could not be held due to disturbed conditions prevailing there at the time of 1981 Census.

† The population figures exclude population of area under unlawful occupation of Pakistan and China where census could not be taken.

** Projected figures for 1981.

General Note

The Primary Census Abstract or PCA for short is the basic census table prepared on a full count basis and it is presented under the following heads: Sl. No.; State/District; Total/Rural/Urban; Area in Km^2 ; Number of occupied residential houses ; Number of Households ; and Total Population (including institutional and houseless households) ; Scheduled Castes ; Scheduled Tribes; Literates; Total Main Workers (I—IX) ; Cultivators (I) ; Agricultural Labourers (II); Household Industry—Manufacturing, Processing, Servicing and Repairs [V (a)] ; Other Workers [III, IV, V (b), & VI to IX] ; Marginal Workers, and Non-Workers. Three columns under each category stand for figures for Persons, Males and Females. The unit of presentation is upto the district for the State PCA. As for the District PCA, the units of presentation are extended to State/District/Sub-division/City/Town.

This table corresponds to the PCA of 1971 Census where-in nine industrial categories of workers had been presented. In the presentation of these nine industrial categories of workers in the 1981 Census PCA, categories III, IV, V (b) & VI to IX have been clubbed into a single category of 'Other Workers' and thereby the total number of the main workers' categories have come down to four only the other three being I—Cultivators; II—Agricultural Labourers and III—Household Industry—Manufacturing, Processing, Servicing and Repairs [V (a)].

At the 1981 Census, a worker has been defined liberally as a person who participates in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. Any other person whose work does not satisfy the above definition is generally treated as a non-worker. Detailed explanations on the concepts and definitions of workers and non-workers have been given in the treatment on 'Classification of Workers by Industrial Categories' in the sequel.

At the 1981 Census, the population of the State is, therefore, classified into two broad categories of 'Workers' and 'Non-workers'. Among the workers further probing has been made whether a worker is a full-time or main worker. A worker who has worked for 6 months or more in the one year preceding the date of enumeration has been treated as a full-time or main worker. The population of the non-workers also has been classified into seven broad categories namely (i) Household duties, (ii) Students, (iii) Dependants. (vi) Retired persons or rentiers, (v) Beggars, etc., (vi) Inmates of institutions, and (vii) other non-workers.

A new concept of 'marginal worker' has been developed at the 1981 Census. A marginal worker is essentially a non-worker who has not done any work over the major part of the last year but has worked occasionally any time last year.

At the 1981 Census the populations of the Scheduled Castes and the Scheduled Tribes have been found to be less than those in the preceding census in some districts. The general explanation for the fall in the population of Scheduled Castes and Scheduled Tribes in some districts is that a large number of names, either synonym or generic, have been returned which find no place in the list of Scheduled Castes and Scheduled Tribes of the State.

PRIMARY CENSUS ABSTRACT

Table—STATE PRIMARY CENSUS ABSTRACT

Table—DISTRICT PRIMARY CENSUS ABSTRACT

FLYLEAF

The Primary Census Abstract is the basic census table prepared on a full count basis and it is comparable with the PCA of 1971 Census. The State PCA gives data upto the district level and the presentation of the nine industrial categories has been done in the manner described in the General Note above. That is, industrial categories III, IV, V (b) & VI to IX have been clubbed into a single category of 'Other Workers', and this along with the remaining three categories of I—Cultivators, II—Agricultural Labourers and V (a)— Household Industry—Manufacturing, Processing, Servicing and Repairs has been presented in the said table. As has been explained earlier, data on marginal workers have also been furnished.

The District PCA is an expanded version of the State PCA in that the information and data provided go down to the Sub-divisional and town levels.

N.A. Stands for "Not available"

* Provisional

** The area figures of Thoubal NAC are not available and hence the rural area figures which are derived by deducting urban areas from the total areas are inflated to that extent.

Table—**STATE PRIMARY CENSUS ABSTRACT FOR SCHEDULED CASTES**

Table—**DISTRICT PRIMARY CENSUS ABSTRACT FOR SCHEDULED CASTES**

FLYLEAF

The Primary Census Abstract for Scheduled Castes is exclusively meant for the Scheduled Castes population of the State, and the style of presentation is the same as that of the PCA for general population with slight variation. Unlike the PCA for general population, in the PCA for the Scheduled Castes, the area figures, the number of occupied residential houses, and the general population figures have not been furnished. As in the case of PCA for general population, the PCA for Scheduled Castes is also prepared on a full count basis. The units of presentation in Column No. 2 are State and District in the case of State PCA, and State/District/Sub-division/City/Town in the case of District PCA. All the units mentioned therein have been listed irrespective of whether there is or is no Scheduled Castes population.

Table—**STATE PRIMARY CENSUS ABSTRACT FOR SCHEDULED TRIBES**

Table—**DISTRICT PRIMARY CENSUS ABSTRACT FOR SCHEDULED TRIBES**

FLYLEAF

The Primary Census Abstract for Scheduled Tribes is exclusively meant for the Scheduled Tribes population of the State, and the style of presentation is the same as that of the PCA for general population with slight variation. Unlike the PCA for general population, in the PCA for the Scheduled Tribes, the area figures, the number of occupied residential houses and the general population figures have not been furnished. As in the case of PCA for general population, the PCA for Scheduled Tribes is also prepared on a full count basis. The units of presentation in column No.2 are State, and District in the case of State PCA, and State/District/ Sub-bivision/City/Town in the case of District PCA. All the units mentioned therein have been listed irrespective of whether there is or is no Scheduled Tribes population.

CENSUS HOUSES AND HOUSEHOLDS

CENSUS HOUSES AND HOUSEHOLDS
(II)

STATEMENT—1

Number of households per 1,000 census houses and the number of households per Km², 1981

State/ District	Number of households per 1,000 census houses			Number of house-holds per Km²		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
Manipur	1,032	1,016	1,081	10	8	394
Manipur North	1,006	1,006	1,003	8	8	199
Manipur West	1,039	1,036	1,074	2	2	143
Manipur South	1,017	1,002	1,077	5	4	302
Tengnoupal	1,013	1,010	1,031	3	3	1,552
Manipur Central	1,043	1,021	1,087	66	47	429
Manipur East	1,009	1,007	1,026	3	3	217

While explaining the table on Primary Census Abstract a detailed account on each of the columns of the said table had been given already. Column No. 5 of the PCA gives the total number of occupied residential census houses and Column No.6 shows the number of households. The total number of occupied residential census houses in the State at the 1981 Census is 223,905 as against 231, 123 census households. The disparity between the two figures where the number of households is more than the number of occupied residential census houses indicates that more than one household is found in a census house.

In census connotation, the words building, census house and household mean more than what are commonly understood. The definitions adopted at the 1981 Census for these units are given below.

"**Building**: A building is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, work shop-cum-residence, office-cum-residence, etc."

"**Ceusns House**: A Census House is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be be used for a residential or non-residential puspose or both".

"**Household**: A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashrams*, etc. These are called 'Institutional households'. There may be one member households, 2-member households or multi-member households. For census purposes, each one of these types is regarded as a 'Household'.

"If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person should be treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen."

RURAL AND URBAN AREAS

For the purpose of census, the basic area of enumeration is recognised as either rural or urban, and data are presented generally for these two categories separately. A village whether surveyed or not, is usually treated as a rural area.

At the 1981 census, the definition adopted for an urban area at both the 1961 and 1971 censuses was followed, namely:

(a) all places with a Municipality, Corporation or Cantonment or Notified Town Area;

(b all other places which satisfy the following criteria:—

(i) a minimum population of 5,000;

(ii) at least 75 per cent of the male working population was non-agricultural;

(iii) a density of population of at least 400 per sq. km. (i. e., 1,000 per sq. mile).

In respect of some marginal cases, the Director of Census Operations of a State or Union Territory was given some discretion to classify in consultation with the RG/State Govt. places as rural or urban taking into consideration local circumstances.

URBAN AGGLOMERATION AND STANDARD URBAN AREA

The concepts of "urban agglomeration" and "standard urban area" were adopted for the first time at the 1971 Census. An urban agglomeration includes a core town and the area over which its influence extends. By definition, it must form a continuous urban spread constituting a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. A standard urban area, on the other hand, is the projected growth area of a city or town having 50,000 population or more in 1971, as it would be in 1991, taking into account not only the towns and villages which will get merged into it but also the intervening areas which are potentially urban. Thus, it is a long term planning area and is to remain as a statistical reporting unit during the three successive censuses of 1971, 1981 and 1991.

ENUMERATION OF INSTITUTIONAL POPULATION

In the case of institutional households such hostels, boarding houses, jails, etc., the warden or the manager or the Superintendent who has administrative responsibility or who by common consent is regarded as the head has been recorded as the head of such an institutional household and appropriate designations like warden, manager, superintendent, jailer, etc., as the case may be have been written in the appropriate place of the Household Schedule. In the case of an institutional household, all the members of the household have been treated as unrelated even if the son or the daughter of the head of the household happens to be an inmate of he household. Hence, while filling up the Household Schedule Part II—Population Record, names of the inmates of such a household beginning with that of the head are entered in Column No. 2, and in Column No. 3 against the names of the inmates other than the head they have been entered as 'unrelated', i. e., relationship to the head has not been shown. While filling up the Individual Slip also, the relationship to head has been shown as 'unrelated'. With regard to the recording of work a person's work before he/she was admitted into the institutional household was recorded. As for long-term inmates, that is, inmates living in institutional households for 6 months or more, 'I' has been recorded.

Enumeration of Houseless Population : During the period of enumeration carried out between February 9 and February 28, 1981, our enumerators took note of the possible places where houseless population is likely to live, such as on the roadside, foothpath, in the open temple, mandav and the like. On the night of February 28/March 1, 1981, but before sunrise of March 1, 1981, the enumeration of the houseless households was done in all blocks so that there should not be any omission of such population.

In Statement I, the number of households per 1,000 census houses and the number of households per Km^2 at the 1981 Census have been shown in the State as well as in the districts. It will be seen from the said Statement that the number of households per 1,000 census houses in the State as well as in the districts in both the rural and urban areas is above parity. In other words, there is more than one household in a census house. In the State there are 1032 households per 1,000 census houses. In the districts, Manipur Central has the highest number of households (1043) per 1,000 census houses

and a close second position goes to Manipur West with 1039 households. The last position goes to Manipur North with 1006 households.

Coming to the rural and urban areas, in the State there are 1081 households per 1000 census houses in the urban areas as against 1016 households per 1000 census houses in the rural areas indicating thereby more conjestion or pressure on housing in the urban areas than in the rural areas,. Heavier pressure on housing is prevalent in all the districts except in Manipur North where the number of households in the rural areas (1006 households is more than that in the urban areas (1003 households) per 1000 census houses.

Heaviest concentration of households per 1000 census houses in the urban areas is found in Manipur Central district with 1087 households; this is closely followed by Manipur South and Manipur West with 1077 and 1074 households respectively. In the remaining districts, the excess of households over 1000 census houses is not very high.

The number of households per Km^2 of land is only 10 in the State. In the districts, excepting Manipur Central, the number of households is not above 8 households per Km^2. In Manipur West, the number of households per Km^2 is as low as 2 only. In Manipur Central where the concentration of population is highest, the number of households per Km^2 of land is 66. In the rural areas, Manipur Central has 47 households per Km^2 of land as against 8 households of the State. Manipur North also has 8 households only, but in the remaining districts the number of households is below the average of the State. In the urban areas, the number of households per Km^2 in the State is 394. The highest number of households (1552 households) is found in Tengnoupal district followed by Manipur Central with 429 households only. Manipur South occupies a distant third position with 302 households only among the districts. The least number of households is found in Manipur West with 143 households only.

SCHEDULED CASTES AND SCHEDUEED TRIBES

SCHEDULED CASTES AND SCHEDULED TRIBES

(III)

Enumeration of Scheduled Castes & Scheduled Tribes

The populations of the Scheduled Castes and the Scheduled Tribes have been given in Column Nos. 10—15 of the Primary Census Abstract. Every enumerator has been furnished with a list of Scheduled Castes and Scheduled Tribes of the State to facilitate ascertaining whether a person is a Scheduled Caste or a Scheduled Tribe. If a person belonging to a Scheduled Caste or a Scheduled Tribe returns the name of caste or tribe to which he or she belongs, the name is examined carefully and if the name finds place in the list, such a person is reckoned as belonging to Scheduled Castes or Scheduled Tribes as the case may be. If a person merely claims to be a Scheduled Caste or a Scheduled Tribe but says that he/she does not belongs to any of the notified communities as reflected in the list, he/she is not treated as belonging to a Scheduled Caste or a Scheduled Tribe. After ascertaining that a person is actually a Scheduled Caste or a Scheduled Tribe appropriate entries have been made in the Individual Slips. The names of the Scheduled Castes and the Scheduled Tribes recognised throughout the State are furnished below:

SCHEDULED CASTES	SCHEDULED TRIBES
1. Dhupi, Dhobi	1. Aimol
2. Lois	2. Anal
3. Muchi, Ravidas	3. Angami
4. Namasudra	4. Chiru
5. Patni	5. Chothe
6. Sutradhar	6. Gangte
7. Yaithibi	7. Hmar
	8. Kabui

	15. Maram
	16. Maring
	17. Any Mizo (Lushai) tribes
	18. Monsang
	19. Moyon
	20. Paite
	21. Purum
	22. Ralte
	23. Sema
	24. Simte
	25. Sahte
	26. Tangkhul
	27. Thadou
	28. Vaiphui
	29. Zou

The proportions of Scheduled Castes and Scheduled Tribes populations living in the urban and rural areas to the total Scheduled Castes and Scheduled Tribes populations in the State as well as in the districts have been presented in Statement—2. It will be observed that the proportion of Scheduled Castes living in the urban areas is 16.66 per cent as against 11.64 per cent of the Scheduled Tribes. With regard to the sexes, more males are found living in the urban areas than the females, and the proportions of males of both Scheduled Castes and Scheduled Tribes living in the urban areas are 16.98 and 11.69 per cents respectively as against 16.33 and 11.59 per cents of the females of Scheduled Castes and Scheduled Tribes respectively. In other words, the proportions of Scheduled Castes and Scheduled Tribes living in rural areas are much higher than those found in the urban areas.

Coming to the districts, in Tengnoupal the whole of its Scheduled Castes population is confined in its rural areas, there being no Scheduled Castes population in the urban areas of the said district. The highest proportion of Scheduled Castes population in the urban areas is recorded in Manipur West with 85.71 per cent closely followed by Manipur South with 80.73 per cent. The lowest proportion is found in Manipur N rth with 9.59 per cent only. In Manipur Central which is the "home district" of the Scheduled Castes and where the bulk of the Scheduled Castes popolation is found, their proportion of urban population is 16.53 per cent only. Thus, excepting Manipur West and Manipur South, in the remaining districts, more than 80 per cent of Scheduled Castes population is found living in the rural areas.

Among the Scheduled Tribes whose ancestral home is in the hill districts and where urbanisation is of recent origin, it is but natural to find the bulk of the Scheduled Tribes population in the rural areas of the districts. Excepting Manipur Central where the proportion of urban Scheduled Tribes population is as high as 56.43 per cent, in the remaining districts, the highest proportion is recorded in Manipur South with 14.49 per cent and the lowest in Manipur West with an incredible 0.99 per cent.

In Statement—3 the percentage distribution of Scheduled Castes and Scheduled Tribes population to the total population in the State and the districts and also the distribution of 100 members each of Scheduled Castes and Scheduled Tribes in the districts have been presented. The combined proportion of Scheduled Castes and Scheduled Tribes populations to the total population in the State is 28.55 per cent while the individual proportions are 1.25 and 27.30 per cents for Scheduled Castes and Scheduled Tribes respectively. In the districts, the combined proportion of Scheduled Castes and Scheduled Tribes populations is highest in Manipur East with 89.54 per cent and the second position goes to Manipur South with 86.34 per cent. The lowest proportion is found in Manipur Central with 4.44 per cent only. The proportion of Scheduled Castes population in Manipur Central is 1.85 per cent while in each of the remaining districts the proportion is below one per cent. Among the Scheduled Tribes, the proportions in all the districts are naturally high except in Manipur Central where the proportion is only 2.59 per cent.

It will be noticed from Statement—3 above that out of 100 Scheduled Castes members, 96.58 is found in Manipur Central and a far distant second position goes to Manipur North with 1.53 and the third position to Tengnoupal with 1.05. In the remaining districts, the proportion is below 1. As regards Scheduled Tribes, out of 100 members, the highest proportion is found in Manipur South with 29.96 followed by Manipur North with 27.23 and the third position goes to Manipur East with 19.14. The lowest proportion of 6.22 goes naturally to Manipur Central District.

In Statement—4, the percentages of Scheduled Castes and Scheduled Tribes populations to the total population by sex in both the rural and urban areas have been shown. It will be seen from the above table that the proportion of the Scheduled Castes population to the total population of the State is 1.25. In the rural and urban areas, the proportions are 1.42 and 0.79 respectively. Coming to the sexes, the proportions of the males in both the rural and urban areas are higher than that of the females in the respective areas. Except in Manipur Central district, the proportions of Scheduled Castes for both males and females are higher in the urban areas than in the rural areas in the other districts.

With regard to the Scheduled Tribes population, the proportion of males living in the rural areas is less than that of the females. Coming to the districts, the highest percentage of males in the rural areas is found in Manipur South with 89.62% followed by Manipur East with 87.08%. The least male proportion is recorded in Manipur Central with 1.77%. As for the females, the highest proportion is found in Manipur East and the second position goes to Manipur South, and the last position goes again to Manipur Central. In respect of urban areas, the percentage of females is less than that of the males in the State, but in the districts, the excess of percentage of the females over that of the males is recorded in all the districts except Manipur Central. The combined percentages of males and females of Scheduled Castes and Scheduled Tribes populations in the rural and urban areas in the State as well as in the districts have been shown in Columns 20—28 of the Statement.

Note :—N.A.C. stands for "Notified Area Committee"

LITERATES AND EDUCATED PERSONS

(IV)

The population of the literates and educated persons has been given in Column Nos. 16, 17 and 18 of the Primary Census Abstract. For the purpose of census, a person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not treated as literate. Receiving of formal education or passing of any educational standard is not necessary for treating a person as literate. All childern of the age of 4 years or less have been categorically treated as illiterate.

In Statement—5, the proportion of the literates and educated persons to the total population inclusive of the population in the age-group 0—4 years have been shown among the total as well as rural and urban population. It will be observed that the proportion of the literates to the total population in the State is 41.35% while in the rural and urban areas the proportions are 37.37% and 52.44% respectively. The proportions in Manipur South, Manipur Central and Manipur East in that order, are above the State figure. As regards male literates, Manipur Central with 56.68% is the only district above the State figure while for the females, three districts viz. Manipur South, Manipur East and Manipur Central have literacy proportions above the State figure. The proportions of male and female literates in the urban areas are naturally higher than in the rural areas.

CLASSIFICATION OF WORKERS BY INDUSTRIAL CATEGORIES

(V)

At the 1981 Census, 'work' has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. For judging a person as a worker or a non-worker by his activity, the reference period is the one year preceding the date of enumeration during which the activity takes place. Certain types of works such as agriculture and household industry are carried on either throughout the year or only during certain seasons or parts of the year depending on local circumstances. In such cases the reference period has been the broad time span of the agricultural seasons preceding the enumeration. Subject to fulfilment of the above conditions, those who have worked any time at all during the last year have been treated as 'workers' and those who have not worked at all naturally come under the category of 'non-workers'. The workers have further been classified into main workers and marginal workers. The main workers are those who have worked in some economic activity for a major part of the year preceding the enumeration or over a period of six months or more or in both the agricultural seasons.

At the present census, a new concept of 'marginal worker' has been introduced. A marginal worker is a person who has worked any time at all in the year preceding the enumeration but has not worked for the major part of this year. Hence, a marginal work is the work done any time last year by a person who is not essentially a full-time worker.

There are a few special cases where a person is to be treated as a worker and these are:—

(i) A person who normally works but has been absent from work during the reference period on account of illness, holiday, temporary closure, strike etc., must be treated as engaged in the work he/she would otherwise have been doing but for his/her temporary absence.

(ii) Persons under training such as apprentices, with or without stipends or wages, should be treated as workers.

(iii) A full-time public or social service worker who is actively engaged in public service activity or a full-time political worker who is also actively engaged in furthering the political activity or his/her party will be recorded as a worker. Such persons will include members of Parliament, State Legislatures, Local authorities, etc.

The non-workers are those who have not worked any time at all in the year preceding the enumeration. In other words, any person who participates in any activity which is not economically productive during the reference period will be treated as a non-worker. The following persons come under the category of non-workers provided they do not perform any economically productive work to earn some income from the sale of their products or labour.

(1) A person who has merely been offered work but has not actually joined yet.

(2) A person who is engaged primarily in own unpaid household duties only.

(3) A person who merely receives an income such as a rent receiver or a pensioner or a beggar, etc.

(4) Full time students and children attending schools.

(5) Infants and children not attending schools, persons permanently disabled from work because of illness or old age, and able bodied persons depending on others for subsistence and not seeking works.

(6) Inmates of penal or charitable or mental institutions if detained for 6 months or more.

(7) Any other persons other than those mentioned above who is seeking work.

List for Household Industry:

The following is the list of a few typical ndustries that can be conducted on a households industry basis.

Foodstuffs

Production of flour by village chakkis or flour mills; milling or dehusking of paddy; grinding of chillies, turmeric, etc.,; production of gur, khandsari, boora, etc.; production of pickles, chutney, jams, etc.,; processing of cashewnutes; making of dried vegetables; manufacture of sweetmeats and bakery products, production of butter, ghee, etc.,; slaughtering and preservation of meat and fish; fish curing etc.,; oil pressing ghani.

Beverages

Manufacture of country liquor, toddy; production of soda water, ice, ice-cream, sharbats, etc.,; processing of c ffee, etc.

Tobacco Products

Manufacture of bidi, cigars, cherroots, tobacco, snuff, etc.

Textile Cotton

Cotton ginning, carding, pressing and baling, spinning, etc.,; dyeing and bleaching of cloth; weaving of handlooms or powerlooms or manufacture of khadi, cloth printing, making of fishing nets, mosquito nets, cotton thread, rope, twine, etc.

Textile Jute, Wool or Silk

Similar type of production or processing as mentioned under Textile Cotton but pertaining to the material concerned.

Textile Miscellaneous

Making of durries, carpets, hosiery, embroidery work; lace garland making; manufacture of chrochet headgear; making of newar, bed covers, (curtains, pillow, pillow cases, etc.); making of mattress, quilt (rezai), etc.; making of namda felt, coconut fibre for upholstery, making of brushes, brooms etc. from cocconut fibres; coir spinning, manufacture and repair of umbrellas; manufacture of dolls and toys (rage and cotton), etc.

Manufacture of Wood and Wood Products

Sawing and planing of wood, manufacture of wooden furniture, structural goods like beams, door and window frames, e c., wooden agricultural implements and their repair, wooden lacquerware, wooden toys, wood carving, sawdust and plaster figure making, inlay work; match splinters, plywood and vernners, etc.; making palm leaf mats, fans, umbrellas, etc., baskets and broomsticks, caning of chairs; making of chicks and khas khas tatties; making of cart wheels, wooden sandals, etc.

Paper and Paper Products

Manufacture of pulp and paper by hand; making of envelopes, paper made articles; card board boxes, paper flower, paper kites, toys, etc.

Printing and Publishing

Printing works, lithography, block-making, book binding etc.

Leather and Leather Products

Flaying and processing hides and skins; making leather footwear, wearing apparel of leather and fur; repair of shoes or other leather products.

Rubber, Petroleum and Coal Products

Vulcanising tyres and tubes; manufacture of chappals from torn tyres and other rubber footwear; manufacture of rubber products from natural and synthetic rubber.

Chemical and Chemical Products

Manufacture of toys, paints, colours, etc., manufacture of matches, fireworks, perfumes, cosmetics; manufacture of ayurvedic medicines, soap, plastic products, celluloid goods; manufacture of ink, candles, boot polish etc.

Non-metallic Mineral Products—other than Petroleum and Coal

Making of bricks, roofing tiles, sanitary fittings, cement statues, stone or marble carvings, manufacture of stone structurals, stone dressing and stone crushing, mica splitting and manufacture of other mica products; making of earthenware and pottery, crockery, glass beads and bangles, earthen toys; manufacture of glass products, etc.

Basic Metals and their Products except Machinery and Transport Equipment

Manufacture of iron arms and weapons and their service and repair, iron and steel furniture, brass, bell-metal utensils, aluminium utensils, tin utensils, copper utensils, etc.; nickeling and electroplating, blacksmithy; manufacture and repair of agricultural implements such as ploughshare, etc.; making and repairing of locks and trunks, cutlery; manufacture of scales, weights and measures and foundry industry, etc.

Machinery (all kinds other than Transport) and Electrical Equipment

Manufacture of small machine tools and parts; repairing and servicing of fans, radios, domestic electrical appliances, etc.

Date Loaned

Transport Equipment

Repairing and servicing of automobiles; manufacture of cycle parts, rickshaw parts, boats and barges; manufacture of animal-drawn and hand-drawn vehicles such as bullock carts, wheel barrow, etc.

Miscellaneous Manufacturing Industries

Repair of spectacles, photographic equipment; goldsmithy, silver filigree industry; gold covering work, bidriware, repair of musical instruments, fountain pens; making of cowdung cakes, manufacture of sports goods; repairing of petromax lights; making of buttons and beads from conchshell and horn goods.

Presentation of Data : At the 1971 Census, the working population had been presented into nine industrial categories, namely, I-Cultivator, II-Agricultural Labourers, III-Livestock, Forestry, Fishing, Hunting, and Plantations, Orchards and allied activities, IV-Mining and Quarrying, V-Manufacturing Processing, Servicing and Repairs -(a) Household Industry (b) Other than Household Industry, VI-Constructions, VII-Trade and Commerce, VIII-Transport, Storage and Communications, and IX-Other Services. At the present Census of 1981, the presentation of the population of main workers in the PCA is in the following manner: I-Cultivators, II-Agricultural Labourers, III-Household Industry—Manufacturing, Processing, Servicing and Repairs, [V (a)] and IV-Other Workers [III, IV V(b) & VI to IX]. The last category namely other workers, corresponds to the total of workers under categories III, IV, V (b) and VI to IX of 1971 Census. The presentation of data on main workers in four industrial categories in the above manner has been done on the recommendation of the Planning Commission and the Central Statistical Organisation.

The percentage distributions of population by sex into main workers, marginal workers and non-workers have been presented in Statement-6, while Statement-7 shows the distribution of 1,000 persons, males and females of total, rural and urban areas among main workers, marginal workers and non-workers.
