CENSUS OF INDIA 1981

LIST OF PUBLICATIONS

CENTRAL GOVERNMENT PUBLICATIONS—CENSUS OF INDIA—1981

Series 7—Himachal Pradesh is being published in the following parts :

Part Number	Subject covered
I-A	Administrative Report—Enumeration } For official use only.
I-B	Administrative Report—Tabulation }
II-A	General Population Tables
II-B	Primary Census Abstract
III-A	General Economic Tables (B—Series Tables of first Priority)
III-B	General Economic Tables (B—Series Tables of second priority)
IV-A	Social and Cultural Tables (C—Series Tables of first priority)
IV-B	Social and Cultural Tables (C—Series Tables of Second priority)
V-A	Migration Tables (D—Series Tables of first priority)
V-B	Migration Tables (D—Series Tables of second priority)

PREFACE

This volume contains the basic population data based on full defacto count of the population of 1981 Census of Himachal Pradesh during the period from the 9th February to the 28th February, 1981. The sun rise of the 1st March, 1981 being the reference date.

2. On receipt of the various Schedules canvassed in the field in the second week of March, 1981, Regional Tabulation Office was established to do the tabulation of the mass of data collected for which 180 Supervisors/Checkers/Tabulators were engaged for full one year uptil the 28th February, 1982. Unfortunately, the data so prepared alongwith the rest of the records got gutted down in the fire that broke out in the Kennedy Cottage on the night of 5th/6th March, 1982 at 4.30 A.M. As a consequence of this unfortunate mishap, the entire year's progress had to be retraced in 1982 and the present volume being the result of the endeavours put in again. While tabulating the data, utmost care was taken to ensure the accuracy of the socio-economic character of each of person enumerated and timely completion of the compilation work. The credit for completion of this gigantic task, indeed, goes to the staff of this Directorate engaged on this task.

3. This volume primarily deals with the Primary Census Abstract, nonetheless, in order to make the volume more presentable and convenient to the readers, an analytical note has been given which endeavours to explain to the readers the various columns of the Primary Census Abstract, a note on Scheduled Castes and Scheduled Tribes and rural/urban definition plus other definitions connected with the presentation of the data.

4. Apart from the aforesaid analytical note, eight statements have been given in this book which deal with the statewise population of the Union of India as such, number of Households per thousand census houses and the number of households per sq. km., percentage distribution of Scheduled Castes and Scheduled Tribes in the rural/urban areas, again percentage distribution of total population of Scheduled Castes and Scheduled Tribes in the state and the districts and the total population, literacy rate and percentage distribution of population of each sex into workers, marignal workers and non-workers. A list of household industries has been also given so as to facilitate the categorisation of household industries.

5. At the end, Primary Census Abstract of the state population as such has been given. Added to this, Primary Census Abstract for Scheduled Castes and Scheduled Tribes with fly-leaves has been given so that it becomes easier for the reader to get entire mass of material of general population, Scheduled Castes and Scheduled Tribes at one place.

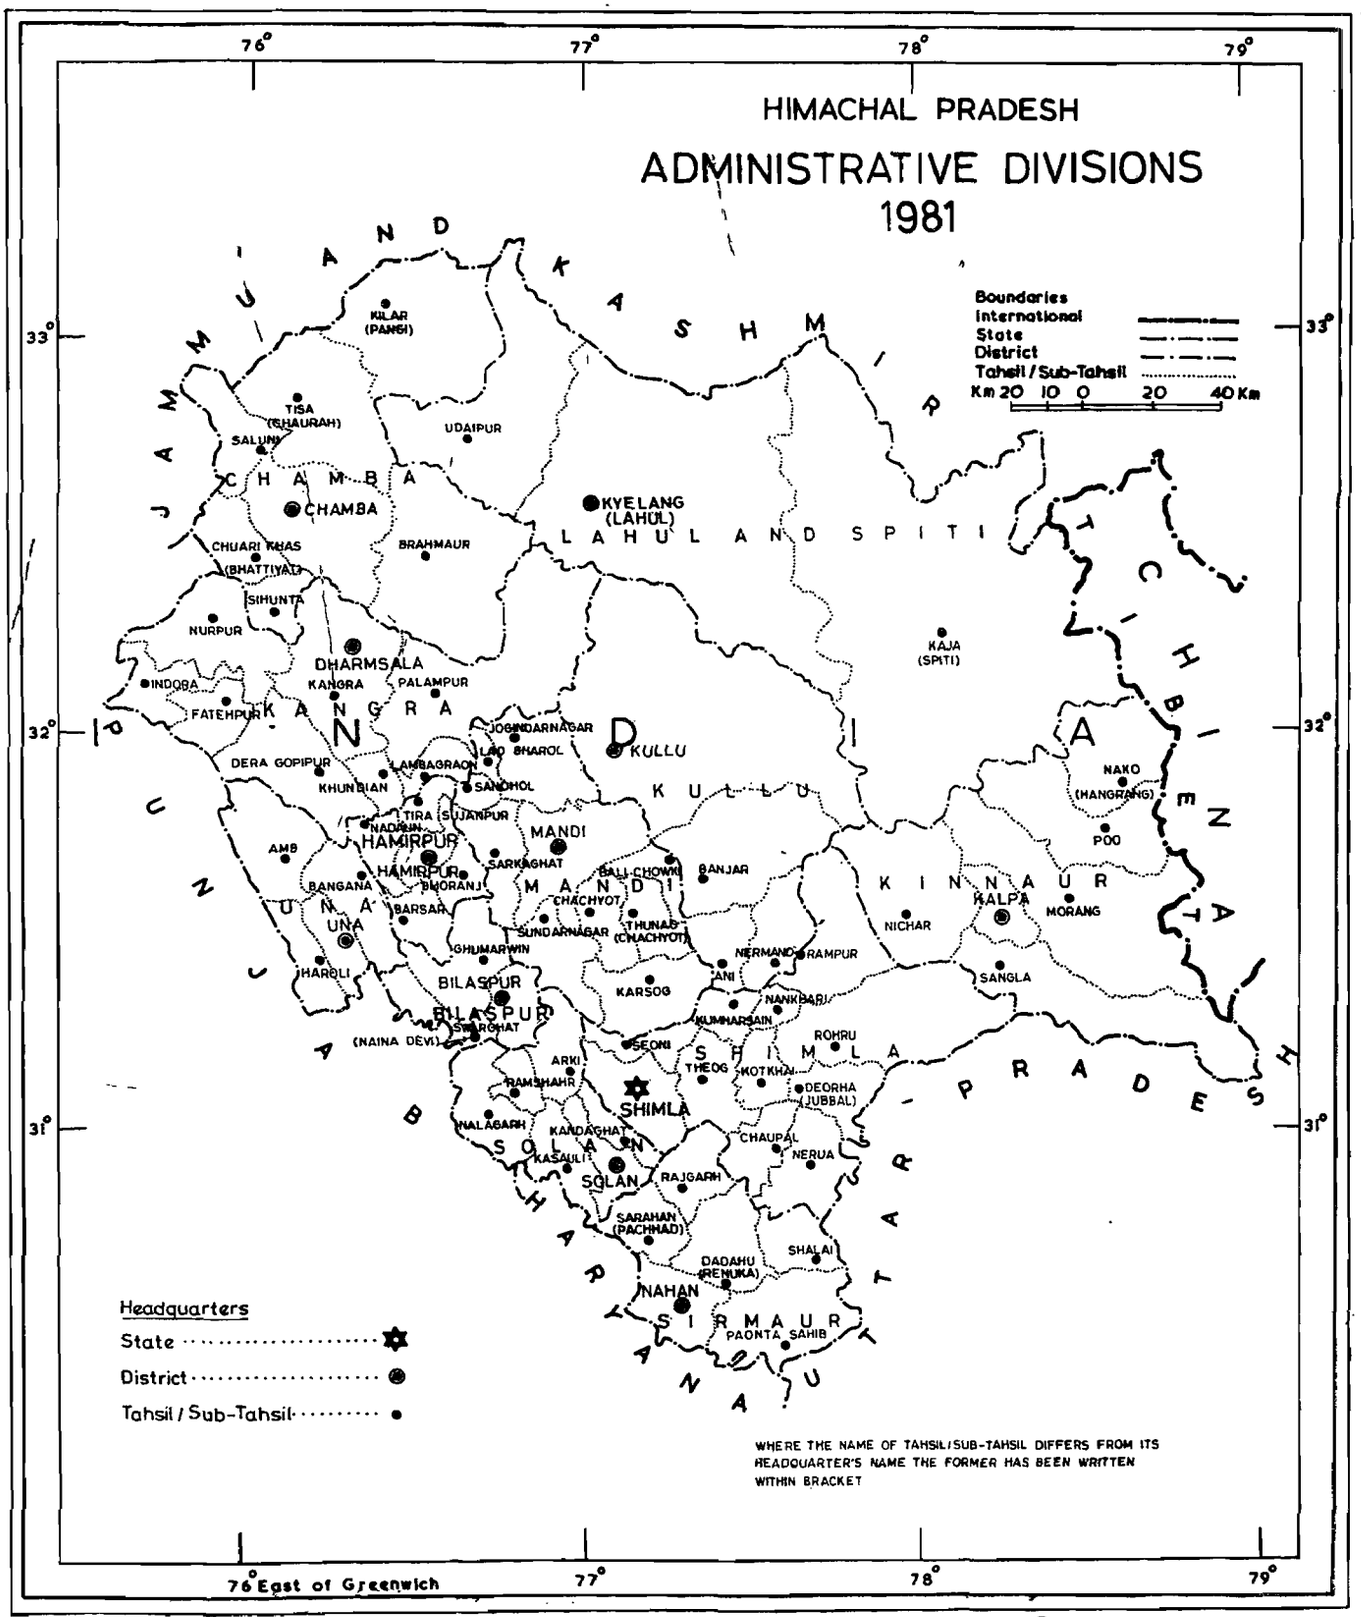

6. Some charts/bars have also been added in an attempt to enrich the content of this volume.

7. It, indeed, is a rare opportunity to express my gratitute to Shri P. Padmanabha, Registrar General and Census Commissioner, India, under whose inspiration and sustained guidance we have been able to complete this volume in a record period of time after the burning of all the records in Kennedy Cottage fire as already stated and the sincere efforts put in to rebuild the entire records of census by the Regional Tabulation Office headed by Shri T.N. Bharat, Investigator richly deserves my commendation.

8. It, indeed, was a rare opportunity for me to be associated in the production of this book and I must confess that I thoroughly enjoyed in involving myself in bringing out various publications of 1981 Census and would feel richly rewarded only if the readers find this book worthwhile.

SHIMLA,
the 16th March, 1983.

K. L. NEGI
Director of Census Operations
Himachal Pradesh.

	Inhabited	16,807		
	Uninhabited	1,914		

ANALYTICAL NOTE

The present volume i.e. part II-B General Population Tables has been analysed in eight statements and other information given in state/district Primary Census Abstracts as well as Primary Census Abstract of Scheduled Castes and Scheduled Tribes. The State/District Primary Census Abstract was published in Part II-A, General Population Tables, in 1971 Census, and Primary Census Abstract of Scheduled Castes and Scheduled Tribes was incorporated in Social and Cultural Tables Part II-C (i). Part II-B of 1971 Census contained the economic tables.

State/District Primary Census Abstract: The Primary Census Abstract is the basic population data prepared on full count and furnishes information for the State, its administrative divisions viz. district/tahsil/sub-tahsil, town and village etc. The State Primary Census Abstract gives data for total/rural/urban areas in respect of each district of the State whereas District Primary Census Abstract shows the data down to the tahsil/sub-tahsil and town level. The entire tabulation has been done manually with a view to make available the Primary Census figures to the data users at the earliest.

2. The abstract gives figures relating to the occupied census residential houses, households, sexwise population and its classification into workers and non-workers alongwith the distribution of workers among the various industrial classifications, which is broadly divided into five parts. In the first part which contains first three columns i.e. location particulars in respect of each district/tahsil/sub-tahsil and town have been given. The location code numbers to these units have been assigned during the census operations with a view to ensure the full coverage as well as to identify the places. The location code numbers have been given to each district of the state starting from the north-west to the south-east. The location code number has been given to each tahsil and sub-tahsil within the district according to their situation while the location code number to the towns within the district are continuous. In other words, while alloting the code number to the town within the district the tahsil/sub-tahsil in which the town falls has not been taken into consideration. The location code to the villages bear continuous number within the tahsil. The necessity of giving the fresh code numbers to these administrative units at each census arises due to the fact that the number of these administrative units changes between the two censuses. In the second column the name of each district and tahsil/sub-tahsil and town within the district has been given in accordance with the code numbers. The column No. 3 pertains to the classification of the area into total, rural and urban.

3. The second part of the Primary Census Abstract relates to the information pertaining to total area, number of occupied residential houses, number of households and sexwise distribution of population, sexwise population of Scheduled Castes/Scheduled Tribes and literacy figures of each district, tahsil/sub-tahsil and town. In other words, this part of the abstract primarily deals with the demographic and social aspects of the population. The area in sq. kms. has been shown under column No. 4 down to town level. The area figures of the State and of the districts are based upon the information supplied by the Central Statistical Organisation, Government of India, whereas area figures of tahsils and sub-tahsils have been obtained from the Director of Land Records of the State Government. The area figures of the towns are based on the information supplied by the respective local bodies. It may, however, be mentioned that the total area of all the tahsils is not tallying with the area figures of the district. The variation is due to the fact that the tahsil area figures relate to the village papers whereas the district figures are based upon the Surveyor General of India.

4. Column 5 depicts the information relating to the number of occupied residential houses. In this column vacant and other houses which are being used for non-residential purposes have not been included. The information is based on the Abridged Houselist of 1981 enumeration. Column No. 6 deals with total number of households as returned in the Abridged Houselist of 1981 Census. Column Nos. 7 to 9 relate to the distribution of population into persons, males and females. The sex-wise distribution of the population belonging to Scheduled Castes and Scheduled Tribes have been presented in column Nos. 10 to 15. The sexwise distribution of literates has been depicted in columns 16 to 18.

5. Columns 19 to 33 deal with the working population. In column Nos. 19 to 21 sexwise main workers have been shown whereas from columns 22 to 33 the information relating to these workers into four broad main categories of workers by sex have been presented. These categories include workers engaged as (i) Cultivators, (ii) Agricultural labourers, (iii) household industry and the (iv) remaining workers which fall under industrial categories of III, IV, V(b) and VI to IX. It may however, be mentioned that in the Primary Census Abstract of 1971 Census the main workers were classified into nine industrial occupational categories. For the current census the departure of presentation of the data of

the main workers is due to the fact that the detailed categories of the workers will be published in the Economic Tables which will be generated through the Direct Data Entry System. The four categories of workers as stated above were adopted in the 1981 Census on the suggestions of the Planning Commission as well as the Central Statistical Organisation. Besides, compilation of the figures also become handy and early presentation easy.

6. In columns 34—36 sexwise distribution of marginal workers have been presented. These workers are other than main workers who have worked less than 183 days during the reference period. This information is being presented in the Primary Census Abstract for the first time and will enable the planners to estimate the extent of under employment.

7. The 5th part deals with persons who are economically inactive and are dependent on others This information has been depicted in columns 37 to 39.

Primary Census Abstract for Scheduled Castes and Scheduled Tribes: The Scheduled Castes and Scheduled Tribes are those castes and tribes which have been notified as such by the Presidential Order in pursuance of the Articles 341 and 342 of the Constitution. The lists of the Scheduled Castes and Scheduled Tribes were notified for the first time under the Constitution (Scheduled Castes) Order, 1950 and the Constitution (Scheduled Tribes) Order, 1950. These lists have been modified or amended or supplemented from time to time. On the re-organisation of the States, the Scheduled Castes and Scheduled Tribes (Modification) Order came into force from October, 1956. However, the first one affecting Himachal Pradesh has been, the Scheduled Castes and Scheduled Tribes Order (Amendment Act) 1976. The main purpose of this Amendment Act was to remove the area restrictions in respect of Scheduled Castes and most of the Scheduled Tribes with the result most of the Scheduled Castes and Scheduled Tribes are now notified as such throughout the state, unlike in the 1956 Order where these were notified in relation to different regions of the State registering area restrictions.

2. In pursuance of latest Presidential Order referred above, following 56 castes have been treated as Scheduled Castes throughout the State at the time of 1981 Census :

1. Ad Dharmi.
2. Badhi, Nagalu.
3. Balmiki, Bhangi, Chuhra, Chura, Chuhre.
4. Bandhela.
5. Bangali.
6. Banjara.
7. Bansi.
8. Barad.
9. Barar, Burar, Berar.
10. Batwal.
11. Bauria, Bawaria.
12. Bazigar.
13. Bhanjra, Bhanjre.
14. Chamar, Jatia Chamar, Rehgar, Raigar, Ramdasi, Ravidasi, Ramdasia, Mochi.
15. Chanal.
16. Chhimbe, Dhobi.
17. Dagi,
18. Darain.
19. Darai, Daryai.
20. Daule, Daole.
21. Dhaki, Toori.
22. Dhanak.
23. Dhaogri, Dhuai.
24. Dhogri, Dhangri, Siggi.
25. Doom, Doommna, Dumna, Dumne, Mahasha.
26. Gagra.
27. Gandhila, Gandil, Gondola.
28. Hali.
29. Hesi.
30. Jogi.
31. Julaha, Julahe, Kabirpanthi, Keer.
32. Kamoh, Dagoli.
33. Karoach.
34. Khatik.
35. Kori, Koli.
36. Lohar.
37. Marija, Marecha.
38. Mazhabi.
39. Megh.
40. Nat.
41. Od.
42. Pasi.
43. Perna.
44. Phrera, Pherera.
45. Rehar, Rehara.
46. Sanhai.
47. Sanhal.
48. Sansi, Bhedkut, Manesh.
49. Sansoi.
50. Sapela.
51. Sarde, Sarera, Sarare, Saryare, Sarehde.
52. Sikligar.

53. Sipi.
54. Sirkiband.
55. Teli.
56. Thathiar, Thathera.

3. Similarly, the Scheduled Tribes Order (Amendment Act) 1976 as promulgated under Presidential Order declares the following tribes as the Scheduled Tribes throughout the State :

1. Bhot, Bodh.
2. Gaddi (Excluding the territories specified in sub-section (1) of section 5 of the Punjab Reorganisation Act, 1966 (31 of 1966) other than the Lahul & Spiti district).
3. Gujjar (excluding the territories specified in sub-section (1) of section 5 of the Punjab Reorganisation Act, 1966 (31 of 1966).
4. Jad, Lamba, Khampa.
5. Kanaura, Kinhara.
6. Lahaula.
7. Pangwala.
8. Swangla.

4. Thus from the preceding para, it is clear that the tribes at serial number 1, 4, 5, 6, 7 & 8 have been treated as Scheduled Tribes throughout the state of Himachal Pradesh wherever they live, whereas in case of Gaddi and Gujjar the area restrictions still persists as given in the preceding paragraph.

5. Every enumerator drafted for 1981 Census was supplied with a list of Scheduled Castes and Scheduled Tribes which were treated as such by the Presidential Order in pursuance of the Articles 341 and 342 of the Constitution. 56 Castes given in the list were treated as Scheduled Castes throughout the state. Similarly, except for two Tribes i.e. Gaddi and Gujjar, other six Tribes were treated as Scheduled Tribes throughout the State of Himachal Pradesh.

6. While filling Q. 9 (whether SC/ST) and Q. 10 (name of Caste/Tribe) of the individual slip the enumerators were required to ascertain from the respondent if the person enumerated belong to a Scheduled Caste or Scheduled Tribe. If the answer to the question was affirmative he was to record code 1 in the case of a Scheduled Caste or code 2 in the case of a Scheduled Tribe in the box provided against Q. 9 of the individual slip. If the person enumerated returned himself/herself as a Scheduled Caste, every enumerator was to check his religion from the preceding question. He or She should have been recorded as the Hindu or Sikh against Q. 8. A person belonging to Scheduled Caste cannot belong to any other religion. Persons who belonged to a religion other than Hinduism or Sikhism were not reckoned as members of Scheduled Castes. A member of Scheduled Tribe may belong to any religion.

7. Those who returned themselves as member of Scheduled Castes/Tribes were asked to name the Caste/Tribe to which they belonged. They were reckoned as Scheduled Castes or Scheduled Tribes only if the name of the Caste/Tribe returned by them found place in the list pertaining to SC/ST list of State of Himachal Pradesh.

8. Harijan/Girijan or Achhut/Adivasi were not considered as Scheduled Caste or Scheduled Tribe until he became known to the one which belong to the list of Scheduled Castes or Scheduled Tribes. In order to ascertain correct information about SC/ST the enumerator was required to put probing questions about it. If any person was negligent and insisted on calling himself/herself merely "Harijan" or "Achhut" or "Adivasi" or "Girijan", as the case may be or repeated to synonym or generic name of a Caste/Tribe he was told that the description given by him is not adequate for Census purposes and pursuaded to give the actual name of a caste or a tribe. Even after making repeated enquiries if the enumerator could not elicit the correct information, the respondent he/she was not to be taken as Scheduled Caste or Scheduled Tribe. But there was no problem in this regard nor any representation to this effect was received. If a Caste or a Tribe considered as a Scheduled Caste or a Scheduled Tribe in some other States/Union Territories but do not figure in the list pertains to Himachal Pradesh, in this case a person returned as Caste/Tribe was not reckoned as Scheduled Caste or Scheduled Tribe.

9. If the person belonged to both Scheduled Caste and Scheduled Tribe, he was given the option to record himself/herself either as Scheduled Caste or Scheduled Tribe as the case may be.

10. Primary Census Abstracts of Scheduled Castes and Scheduled Tribes have been prepared separately and runs into 31 columns. Column 1 gives the serial number of the district in the State and tahsil/sub-tahsil within the district. These serial numbers are in conformity with the location code numbers given to these administrative units at the time of preparation for the conduct of 1981 Census. Column 2 shows the names of the administrative units viz. districts, tahsil/sub-tahsil and town and column 3 depicts the classification of the area into total, rural and urban. The number of households belonging to Scheduled Castes has been given under column 4. Columns 5 to 7 give the sexwise Scheduled Castes population. The sexwise literacy figures have been given under columns 8 to 10. The sexwise

breakup of the main workers has been depicted under columns 11 to 13 whereas columns 14 to 25 give the break-up of these workers into four broad industrial categories viz. (i) cultivators, (ii) agricultural labourers, (iii) household industry and (iv) other workers. The number of marginal worker has been given in column Nos. 26 to 28. Columns 29—31 give the sexwise breakup of non-workers or economically inactive population.

11. The Primary Census Abstract of Scheduled Tribes also contains the identical columns except column No. 4 wherein the number of households with Scheduled Tribes members is the only variation as compared to the Primary Census Abstract of Scheduled Castes.

Census Definitions and Concepts: In order to understand the precise import of the meaning of words used in the analysis of the data in this publication, it would be pertinent to briefly explain the census concepts and definitions of various words and phrases herein. The practice of presenting the data for urban and rural areas separtely is customary almost in all the countries of the world. Such a classification is necessary to assess the differentials in the social, economic, cultural and demographic characteristics of the population living in two district milieu. The definition of an urban area as adopted in 1981 Census which is identical to the definition adopted during 1961 and 1971 is given as under :

(a) all places with municipality, corporation, cantonment board or notified area committees:

(b) all other places which satisfy the following criteria :

(i) a minimum population of 5,000.

(ii) at least 75 per cent of male working population engaged in non-agricultural pursuits. There is a slight deviation in the definition adopted in 1981 Census with regard to the non-agricultural activities as compared to earlier censuses. In 1981 Census activities like livestock, fishing, logging, plantation, forestry, hunting, orchards and allied activities etc. were treated as agricultural activities during 1961 & 1971 Censuses, these were treated as non-agricultural activities for the purpose of applying the criterion of 75 per cent of male working population.

(iii) a density of population of atleast 400 persons per sq. km. (1,000 persons per sq. mile).

2. "All places which were not treated as urban were treated as rural".

Urban Agglomeration : The Urban Agglomeration represents a continuous urban spread containing a town and its adjacent urban outgrowth or more physically contiguous town together with contiguous urban outgrowth which may actually fall within revenue limits of a village/villages. These "Urbanised" village or outgrowths deserve to be reckoned alongwith the town in conformity with the contiguous urban spread. The urban agglomeration represents a spatial urban spread at a given time. The Standard Urban Area, on the other hand, is the projected growth area of a city or town as it would be in 1991, taking into account not only the towns or villages which are expected to get merged with it but also intervening rural areas which are potentially urban. This covers all extra municipal outgrowths such as suburb (industrial and residential), railway colonies, civil lines, cantonments and villages and rural area which are likely to be urbanised by 1991.

Census House : A Census House is a building or part of a building having separate entrance from the road or courtyard or staircase, etc. used or recognised as a separate unit, it may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

Household : A household is a group of persons who commonly live together and would take their meals from the common kitchen unless exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated household are Boarding House, Messes, Hostels, residential Hostels, Rescue Homes, Jails and Ashrams. These are called "Institutional" households. There may be one member households, two member households or multi-member households. For Census purposes, each one of these types is regarded as a 'Household.' The important link in finding out whether there is a household or not is a common kitchen.

Literate : A person who can both read and write with understanding in any language is to be treated as literate. A person who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have a formal education or should have passed any minimum educational standard. Children upto the age of four years have been treated as illiterate irrespective of whether they attend the school or not.

Work : Work is defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

Main Worker : A person who has primarily worked for a major period of the year is a main worker. By major part of the year it is intended to find out that the person has worked for 183 days or more or in other words worked for 6 months or more. There reference period of 1 year preceds the date of enumeration.

Marginal Worker : A person who has worked for less than six months or 183 days but worked at least a day during the last one year before enumeration is considered as marginal worker.

Non-Worker : A person who has not worked at all during the preceding one year from the date of enumeration is a non-worker.

Cultivator: A person is a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or Institutions for payment of any money, kind or share. Cultivation includes supervision or direction of cultivation.

Agricultural Labourer : A person who works in any person's land for wages and money, kind or cash is regarded as an agricultural labourer. He or she has no risk in cultivation but he or she merely workers in another person's land for wages. An agricultural labourer has no right to lease or control on land on which he/she works.

Household Industry : It is an industry which involves atleast manufacturing, or processing, or servicing, or repairing conducted by the head of the household himself/herself and or by member of the household at home or within the village in rural area and only within the premises of the house where the household lives in the urban area. The large proportion of the workers in a household industry should consist of members of the household including the head. The industry should not be run on a scale of a registered factory which should qualify or has to be registered under the Indian Factories Act. A list of Household Industries is given in the Annexure.

Other Workers : All workers i.e. those who have been engaged in socio-economic activities during the last one year who are not cultivators or agricultural labourers or in household industry are other workers. The type of worker that comes under this category includes factory workers, plantation workers, those in trade and commerce, business, transport, mining, constructions, all Government servants, municipal employees etc. In fact, all those who work in fields of economic activities other than cultivation, agricultural labourer or household industry are other workers.

Enumeration of Houseless and Institutional Population: In census, every human being is to be counted. None is to be left out of count and at the same time it has got to be ensured that no one is counted twice. The enumeration period of 1981 Census commenced from the 9th February, 1981 to the 28th February, 1981 with a revisional round from the 1st March, 1981 to the 5th March, 1981. in the snow-bound areas the enumeration was done from the 10th September to the 30th September, 1980 with a revisional round from the 1st October, 1980 to the 5th October, 1980. During this enumeration period the enumerators contacted the households at their respective places of residences/houses. As the reference period of the 1981 Census is the sunrise of the 1st March, 1981 the enumerators were instructed to keep a note about the likely places of the houseless persons who generally live on the road sides, pavements, in hume pipes, under staircases, or in the open temples, mandaps, plateforms and the likely places. In order to ensure complete coverage and avoid duplication as stated above these persons were to be enumerated on the night of the February 28th/1st March, 1981, but before the sunrise of the 1st March, 1981. In case there were large number of houseless persons in a block the additional enumerators were deployed for covering the houseless persons. Such persons were enumerated between the night of 30th September/1st October, 1980 in the snowbound areas. The particulars of such households were also recorded in the Abridged Houselist prepared for the enumeration of 1981 Census. As the heading shows the columns relating to building number and house number were left blank.

Inmates of Institutions: The inmates of institutions cover the convicts or under trials in jails, inmates of a penal, mental or charitable institutions, indoor patients, inmates of orphanages. These persons were enumerated by taking them as a single household. The economic status of these persons were determined in accordance with their status in the institution or prior to their entering into these institutions.

2. On the basis of Primary Census Abstract seven statements have been generated which are disscused at length hereafter.

The above statement shows total population of India/State/Union Territory for total, rural and urban areas separately. The population of the country for 1981 Census stands at 685,184,692. The figures for rural and urban areas being 525,457,335 and 159,727, 357 respectively.

Statement 2 deals with number of Households as per one thousand Census houses and the number of households per Sq. Km. in 1981.

STATEMENT 2

1. Chamba	1,070	1,076	1,013	9	8	267
2. Kangra	1,012	1,012	1,011	31	29	288
3. Hamirpur	1,006	1,005	1,020	52	49	361
4. Una	1,008	1,008	1,013	38	36	142
5. Bilaspur	1,017	1,017	1,013	37	35	212
6. Mandi	1,010	1,010	1,011	29	27	624
7. Kullu	1,005	1,004	1,013	8	8	392
8. Lahul & Spiti . . .	1,011	1,011	..	N	N	..
9. Shimla	1,018	1,019	1,013	19	15	584
10. Solan	1,012	1,013	1,005	29	25	472
11. Sirmaur	1,014	1,013	1,022	19	17	361
12. Kinnaur	1,013	1,013	..	2	2	..

The statement reveals that the households mostly reside in independent houses as for every one thousand occupied residential census houses there are 1,016 households for the State as a whole. The corresponding figures for 1971 Census was 1,046. A house may be used as a dwelling only or as a shop-cum-dwelling or workshop-cum-dwelling. All these categories of census houses have been treated as occupied residential houses. Between the rural and urban areas, the difference in the number of households in relation to the number of occupied residential houses is quite negligible i.e. 1,016 in rural areas and 1,012 in urban areas. The comparatively less congestion in the urban areas, perhaps is due to the fact that majority of the towns in Himachal Pradesh are of very small size, with regard to population but proportionately large in area.

2. Among the districts, the houheholds-house ratio is highest in Chamba district with 1,070. The other districts where this ratio is higher than the State figure of 1,016 are Shimla 1,018 and Bilaspur 1,017. In the remaining nine districts, this ratio is below the state average and ranges between 1,014 in Sirmaur district to 1,005 in Kullu district. The position in the rural areas of the districts is almost similar to that of the total areas i.e. Chamba has the highest ratio i.e. 1,076 followed by Shimla 1,019 and Bilaspur 1,017 against the State average of 1,016 and in the remaining districts this proportion varies between 1,013 each in Solan, Sirmaur and Kinnaur districts and 1,004 in Kullu district. In the Urban areas, Sirmaur district has got the maximum number of households, 1,022 per thousand occupied residential houses closely followed by Hamirpur 1,020 and Chamba, Una, Kullu, Shimla and Bilaspur 1,013 each. The remaining districts are having the proportion less than the state average figure. The Solan district which has returned the proportion of 1,005 households per 1,000 occupied residential census houses is at the tail end.

3. The average density of households per Sq. Km. in the State is 14 in 1981 Census; rural and urban average density of households comes to 13 and 366 respectively. The corresponding figures for 1971 Census are 12, 11 & 385 respectively. Aforesaid figures reveal more households per Sq. Km. in the total and rural areas of the State whereas in the urban area density has shown a downward trend. This can partly be explained that during the 1981 Census, 11 new towns have been notified which are of small size with regard to population and have more spread over with regard to area. Among the total areas of the district, Hamirpur district has the highest density of 52 followed by Una 38, Bilaspur 37, Kangra 31, while Lahul & Spiti has the lowest density of households per Sq. Km. i.e. 0.47 and Kinnaur comes next from below. The other district which are having lesser density as compared to the State are Kullu and Chamba with 8 & 9 households per Sq. Km. respectively.

4. In the case of rural areas where the density of households per Sq. Km. for the State as a whole is

83-L/P(D)90DCO(HP)—2

13. Hamirpur district leads with 49 households per Sq. Km. followed by Una 36, Bilaspur 35, Kangra 29 and Mandi 27 and Lahul & Spiti district again has the lowest density of households in its rural areas as compared to other districts while Kinnaur is the second lowest having density of only two households per Sq. Km. It may, however, be mentioned that these two districts are entirely rural and in terms of area rank first and third respectively. The other districts having density less than the State average are Chamba and Kullu with 8 each. In urban areas Mandi district has the highest density of households with 624 per Sq. Km. followed by Shimla with 584 and Solan 472. The districts having density higher than the state average is Kullu. The lowest density of households in urban areas has been returned from Una with 142 and the second lowest is Bilaspur. The comparison of density in the urban areas is not very realistic as the area figures of all the urban towns are not compiled uniformly. In some towns only the built-up area has been accounted, while in some others the entire area including the agricultural land have been accounted.

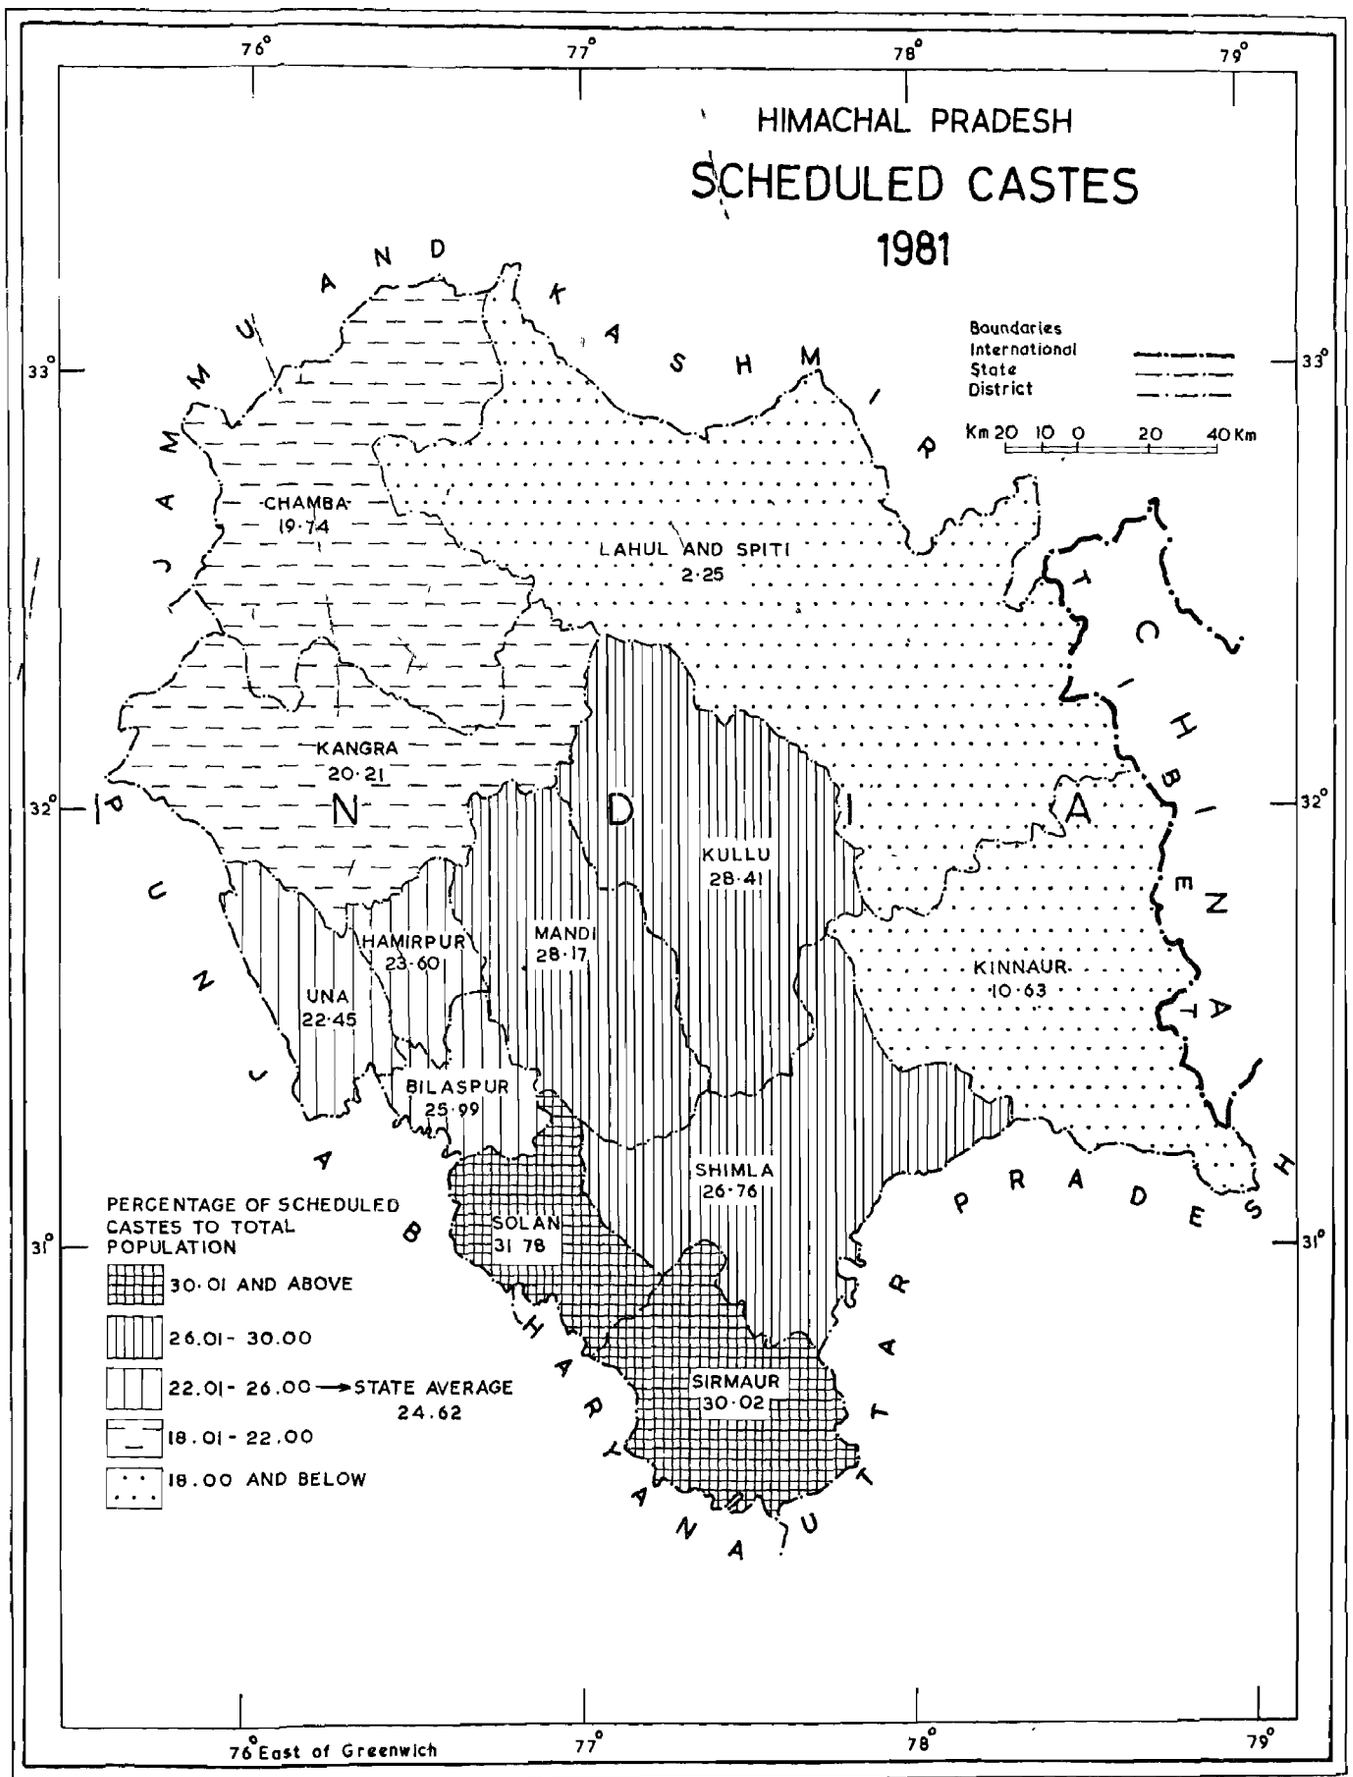

Statement 3 gives the percentage distribution of members of Scheduled Castes and Scheduled Tribes in rural and urban areas to the total population.

2. Out of total State population of 42,80,818 persons the Scheduled Castes constitute 10,53,958 or 24.62 per cent of the total population. The Scheduled Tribes comprise 1,97,263 or 4.61 per cent of the total population. The rural population of Scheduled Castes constitute 25.22 per cent while Scheduled Tribes constitute 4.91 per cent of the rural population. Both clubbed together, they represent 30.13 per cent of the rural population of the State. In the urban areas the Scheduled Castes constitute 17.34 per cent of the total urban population, while, the Scheduled Tribes consist 0.96 per-cent.

3. The analysis of the data contained in Statement 3 shows that out of 100 persons belonging to Scheduled Castes a big chunk i.e. 94.64 per cent live in rural areas and only 5.36 per cent in the urban areas. Excluding Lahul & Spiti and Kinnaur districts which are entirely rural the maximum percentage of Scheduled Castes have been returned from Kangra district where 96.78 per cent of the Scheduled Castes population are rural, closely followed by Hamirpur district with 96.66 per cent and Kullu with 96.37 per cent and the lowest percentage has been returned from Solan district with 92.93 per cent. In respect of male Scheduled Castes population, Kangra district again tops with 96.66 per cent male Scheduled Castes population closely followed by Hamirpur with 96.32 Kullu with 96.25 and the lowest comes in Shimla district with 89.30 per cent male Scheduled Castes from the rural areas against the State figure of 94.27 per cent. The same trend has been noticed in respect of female population too.

4. In respect of urban areas it is observed that the proportion of Scheduled Castes varied between 9.52 per cent in Shimla to 3.22 per cent in Kangra against the State average of 5.36 per cent. Both sexes put together, the state as well as districtwise average do not show much variation.

5. The distribution of Scheduled Tribes reveal a more interesting picture. The percentages in the rural areas of the state as a whole is 4.91 per cent. For districts, it is 74.04 per cent in Lahul & Spiti, and 74.87 per cent in Kinnaur district and 32.82 per cent in Chamba. In the remaining districts of the state their proportion is extremely low. Out of 100 Scheduled Tribes as much as 98.42 per cent belong to the rural areas while only 1.58 per cent to the urban areas of the State. As stated above, leaving aside Lahul & Spiti and Kinnaur districts which are entireley rural, the percentage of Scheduled Tribes living in rural areas varies from 99.50 in Bilaspur, 99.37 in Chamba and 99.23 per cent in Sirmaur. Hamirpur district is at the lowest rung in the ladder with 45.61 per cent Scheduled Tribes. There is not much variation in sexwise distribution of Scheduled Tribes in the rural areas. The percentage of Scheduled Tribes in the urban areas constitute 1.58 per cent of its total population. Among the males the percentage works out to be 1.80 and the females 1.35 per cent.

The Statement 4 depicts the percentage distribution of total population of Scheduled Castes and Scheduled Tribes in the State and Districts as per 1981 Census.

STATEMENT 4

Percentage distribution of total population of members of Scheduled Castes and Scheduled Tribes in State/Districts, 1981

State/District	Percentage of Scheduled Castes and Scheduled Tribes to total population of State/District	Percentage of Scheduled Castes to total population of State/District	Percentage of Scheduled Tribes to total population of State/District	Distribution of 100 members of Scheduled Castes among Districts	Distribuion of 100 members of Scheduled Tribes among Districts
1	2	3	4	5	6

12. Kinnaur	85.50	10.63	74.87	1	

83-L/P(D)90DCO(HP)—2(a)

2. As per statement 4 the Scheduled Castes and Scheduled Tribes population constitute 29.23 per cent of the total population of the State. The Scheduled Castes share a proportion of 24.62 and the Scheduled Tribes 4.61 per cent of the total population. Among the districts Kinnaur district ranks first with 85.50 per cent Scheduled Castes and Scheduled Tribes population followed by Lahul & Spiti district with 76.29 per cent. Chamba ranks third with 50.51 per cent. In the remaining nine districts the percentage of population belonging to these categories varies between 32.35 in Solan to 20.29 per cent in Kangra district.

3. The percentage of Scheduled Castes population to total population varies between 31.78 per cent in Solan district to 2.25 per cent in Lahul & Spiti district. The districts having higher proportion of Scheduled Castes population as compared to the State average of 24.62 per cent are Sirmur 30.02 per cent, Mandi 28.17 per cent, Kullu 28.41 per cent, Shimla 26.76 per cent, Bilaspur 25.99 per cent. The districts having proportion less than the State average are Chamba 19.74 per cent, Kangra 20.21 per cent, Hamirpur 23.60 per cent, Una 22.45 per cent and Kinnaur 10.63 per cent. The comparatively low proportion of Scheduled Castes population in the districts of Lahul & Spiti, Kinnaur and Chamba can perhaps be attributed to the fact that the Scheduled Castes living in the tribal areas invariably prefer to record as Scheduled Tribes rather than Scheduled Castes.

4. Scheduled Tribes constitute 4.61 per cent to the total population of the State. This proportion varies between 74.87 per cent in Kinnaur district to 74.04 per cent in Lahul & Spiti district and 30.77 per cent in Chamba district. In the remaining districts the proportion varies betwen 3.10 per cent in Kullu district to 0.01 per cent in Una.

5. Out of 100 Scheduled Castes persons in the State maximum of 19 have been returned from the Kangra district followed by Mandi 17, Shimla 13, while in the case of Kinnaur the proportion comes to one and in Lahul & Spiti, it is negligible. In the case of distribution of 100 Scheduled Tribes persons in the State, the maximum number of 49 persons have been returned from Chamba followed by 23 in Kinnaur and 12 from Lahul & Spiti. In the case of remaining nine districts this proportion varies from 4 each in Mandi and Kullu to one or less than one in Solan, Kangra, Hamirpur and Una districts.

Statement 5 gives the percentage of members of Scheduled Castes and Scheduled Tribes in the rural and urban areas to the total population of 1981 Census.

2. As already stated, the Scheduled Castes and Scheduled Tribes constitute 29.23 per cent of the total population in the State. Males being 29.39 per cent and females 29.06 per cent. In the rural areas the percentage of Scheduled Castes and Scheduled Tribes comes to 30.13 per cent. 30.44 per cent being males and 29.82 per cent females. In the urban areas the proportion comes to 18.30 per cent males being 17.97 per cent and females 18.70 per cent. The maximum proportion of Scheduled Castes and Scheduled Tribes come from Kinnaur district where it is 85.50 per cent, 78.76 per cent males and 93.12 per cent females followed by Lahul & Spiti district where it is 76.29 per cent, 67.75 per cent males and 87.43 per cent females, Chamba district ranks third with 50.51 per cent, 49.90 per cent males and 51.14 per cent females, of the remaining nine districts, four districts viz. Solan, Sirmaur, Kullu and Mandi have higher proportion than the State average and the proportion in these districts varies between 32.35 to 29.41 per cent. Five districts having lesser proportion as compared to the State average are Kangra, Hamirpur, Una, Bilaspur and Shimla. The two sexes do not show much variation in all the districts except in the entirely rural district of Lahul & Spiti and Kinnaur where the percentage of females are quite high as compared to males. This trend, perhaps, can be attributed to greater mobility among males than females.

3. Taking the rural areas alone, the percentage of Scheduled Castes and Scheduled Tribes population to total population comes to 30.13 per cent, 30.44 per cent males and 29.82 per cent females. Rest of the districts in descending order of percentage proportion of these categories are Kinnaur, Lahul & Spiti, Chamba, Solan, Sirmaur, Kullu, Shimla, Mandi, Bilaspur, Hamirpur, Kangra and Una.

4. In the urban areas they constitute 18.30 per cent of the total population. The males, being 17.97 per cent and females 18.70 per cent. Districtwise, the percentage varies between 22.62 per cent in Kullu district to 13.20 in Kangra district.

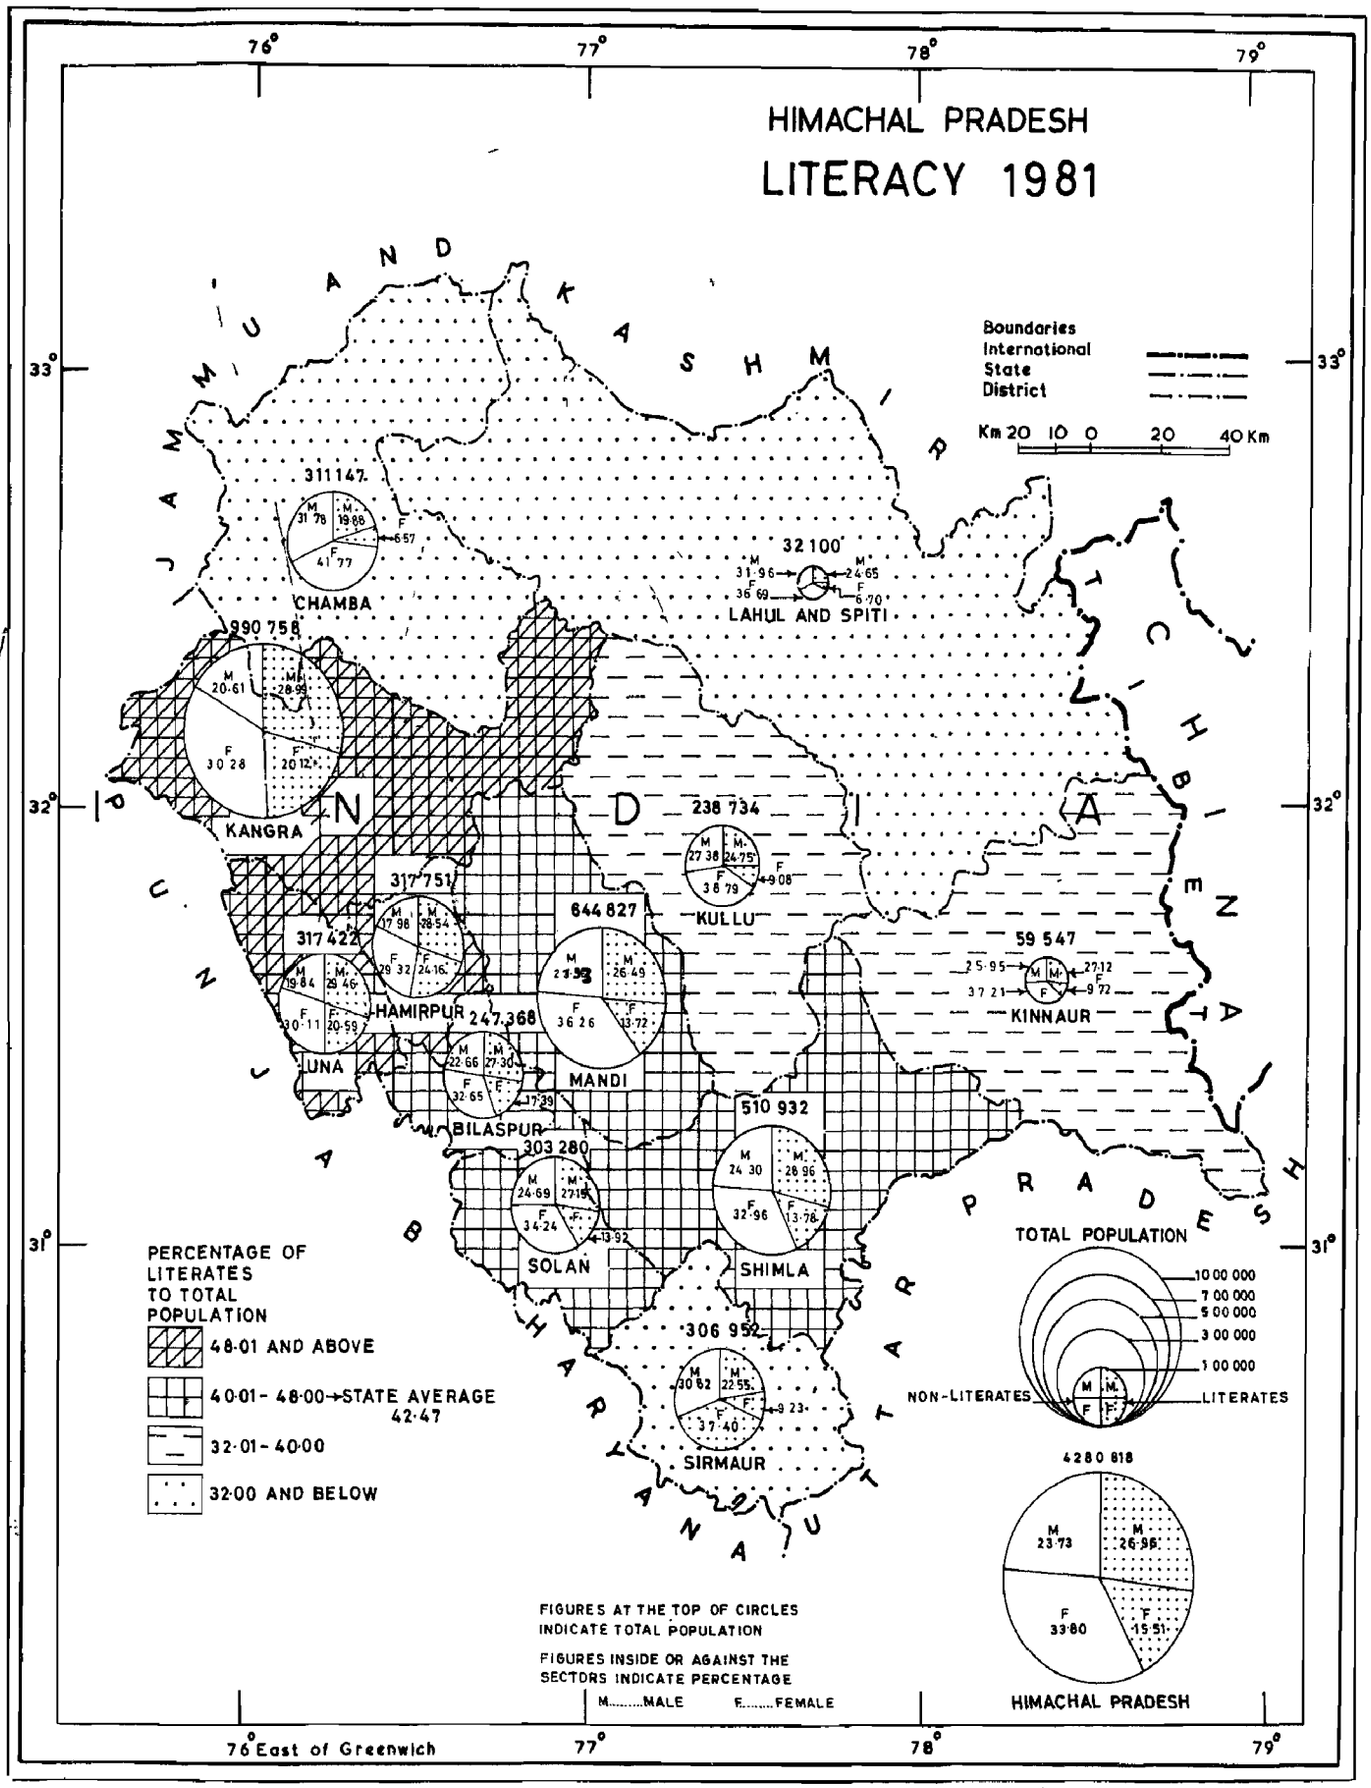

Statement 6 shows the percentage of literate to total population with rural/urban and sexwise break-up. A person who can both read and write with understanding in any language is taken as literate. It is, however, not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 4 years or less are treated as illiterate even if they were going to schools and may have picked up reading and writing a bit but they are not supposed to have developed the understanding to qualify to be literate. Sexwise figures of literate and educated persons are given under columns 16 to 18 of the Primary Census Abstract.

STATEMENT 6

LITERACY RATES IN 1981

(The percentage have been calculated on the total population inclusive of the population in age-group 0—4)

2. The aforesaid statement shows that the state had a literacy of 42.48 per cent in 1981 Census. The rural and urban literacy being 40.42 per cent and 67.44 per cent, respectively, which shows a wide disparity in the literacy percentage between rural and urban areas. The rural male literacy percentage comes to 51.36 per cent while urban male literacy percentage comes to 73.32 per cent. Similiarly, the rural female literacy is 29.36 per cent, whereas it is 60.04 per cent in the urban areas. Amongst the districts, Hamirpur with 52.70 per cent literates is on the top closely followed by Una district with 50.05 per cent, Kangra with 49.12 per cent and Chamba with a literacy rate of 26.45 per cent is at the tail end. The highest literacy rate among the males is in Hamirpur district with 61.35 per cent literates followed by Una with 59.75 per cent Kangra with 58.46 per cent and Chamba with a literates followed by Una with 59.75 per cent, bottom. Amongst the female literacy rate, Hamirpur ranks first with 45.17 per cent, followed by Una with 40.62 per cent, Kangra with 39.93 per cent and Chamba has the lowest literacy rate of 13.59 per cent against the state average of 31.46 per cent.

3. In the rural areas Hamirpur district has the highest literacy rate with 51.90 per cent literates followed by Una with 49.14 per cent and Kangra with 48.39 per cent against the state average of 40.42 per cent. At the bottom comes Chamba district with 23.67 per cent. Same trend applies in respect of males and females literacy too.

4. The statement also indicates that the urban literacy is much higher as compared to rural. The urban areas of Shimla district has the highest literacy rate among the districts with 72.70 per cent literates followed by Mandi with 70.03 per cent and Kullu with 70 per cent and Una has the lowest literacy rate with 61 per cent against the State average of 67.44 per cent. It may be of interest to note that Una district which otherwise ranks second among the districts in literacy has been relegated to the lowest rung of the ladder in respect of urban literacy. The above figures also show that there is not much disparity in the literacy rates of males and females in the urban areas.

5. As already mentioned in the preceding paragraphs the Primary Census Abstract also contains the information relating to the economic activity of the population. Columns 19—36 show a classification of population by workers and marginal workers whereas columns 37—39 show the number of non-workers. In 1971 Census a person whose main activity was participation in any economically productive work by physical or mental was treated as worker. The main activity is one in which one engages oneself mostly. Work involves not only actual work but effective supervision and direction of work. Reference period for determining the working status was one week prior to the date of enumeration in case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of these days during the reference period and that work was returned as his main activity, the person was categorised accordingly. As against this the main activity in case of seasonal work such as cultivation, gur making etc., was ascertained with reference to such work in the preceding season/one year. Thus in 1971 Census the entire population was divided into two groups of workers and non-workers. The workers were further classified into nine broad industrial categories according to their main activities.

6. In 1981 Census the concept of main activity was slightly changed. Like the previous census, the work involves not only actual work but also effective supervision and direction of work. Again the work is defined as participation in any economically productive activity. A person was classified as main worker if he or she has worked for more than 183 days preceding the date of enumeration.

7. A person who has worked for less than six months or 183 days but worked occasionally during the year before the enumeration is treated as marginal worker. A person who has not worked at all during the preceding one year from the date of enumeration is a non-worker.

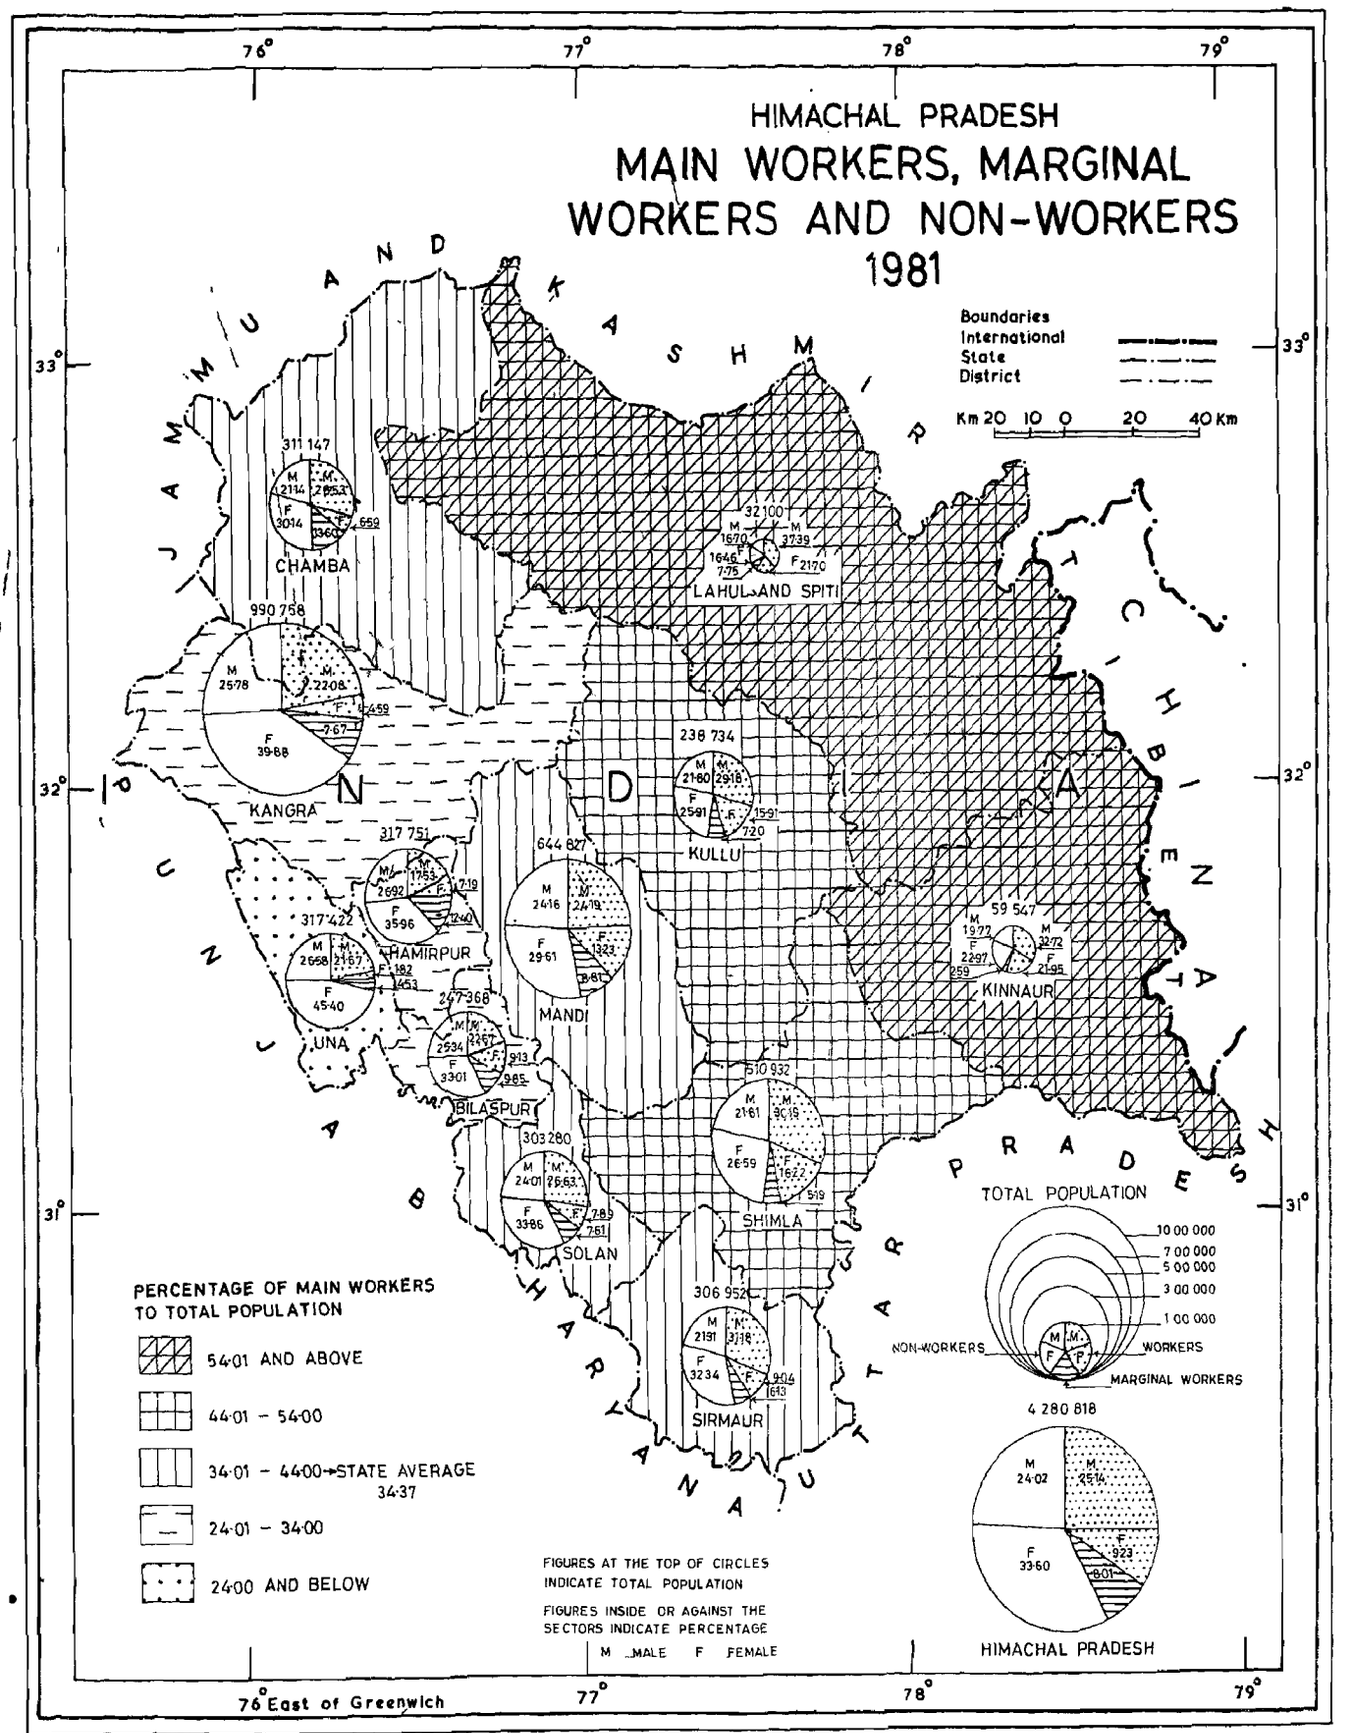

8. Unlike the 1971 Census where the workers were classified into nine broad categories, during the 1981 Census the main workers have been classified into four broad categories namely (i) cultivators (ii) agricultural labourers, (iii) household industry and (iv) other workers. This classification has been adopted at the instance of the Planning Commission and Central Statistical Organisation with a view to make the data available to the data users at the earliest. In order that the concepts are clear to the reader, definitions have been already given in the preceding pages.

Statement 7 given hereunder shows the percentage distribution of population of each sex into workers, marginal workers and non-workers.

STATEMENT 7

Percentage distribution of population of each sex into Workers, Marginal Workers and Non-Workers in State/Districts in 1981 (Main Workers being further distributed by broad Industrial Categories of 1981 Census)

2. In the state as a whole, 52.61 per cent of the male population has been classified as workers. Of this, main workers account for 49.59 per cent and marginal workers 3.02 per cent. The remaining 47.39 per cent of the male population fall under the categories of non-workers. The highest percentage of male workers in the state as such is in Lahul & Spiti district which is 70.50 per cent followed by Kinnaur district with 62.75 per cent, Sirmaur with 60.07 per cent, Chamba with 59.09 per cent and Shimla with 59.04 per cent come next in descending order. Hamirpur district is at the bottom with 42.14 per cent of the male population as workers.

3. In the case of male main workers Lahul & Spiti district with a percentage of 66.06 is at the top followed by Kinnaur with 61.65 per cent, Sirmaur with 58.42 per cent and Hamirpur is again at the bottom with 37.66 per cent.

4. Of the total male population the largest proportion among workers fall under the category of cultivators which come to 29.85 per cent. Other workers come next with 17.09 per cent. Agricultural labourers constitute 1.54 per cent and the persons engaged in household industry as the main activity constitute 1.11 per cent. In the districts, the percentage of cultivators of total males varies between 41.20 per cent in Kullu to 22.26 per cent in Hamirpur as against the state average figure of 29.85 per cent. Agricultural labourers constitute 2.88 per cent of the total males in Una district followed by Kangra with 2.42 per cent and Kinnaur with 2.28 per cent. The lowest percentage of these workers has been returned from Chamba district as against the state average figure of 1.54. The percentage of males engaged in household industry varies between 2.23 per cent in Kinnaur to 0.20 per cent in Lahul & Spiti district as against the state average of 1.11 per cent. With regard to male main workers under other workers, Lahul & Spiti district with a proportion of 39.99 per cent ranks first amongst the districts followed by Kinnuar with 28.14 per cent and Shimla with 23.38 per cent and Hamirpur district is at the lowest rung with 12.85 per cent as against the state average of 17.09 per cent.

5. Hamirpur district has 4.48 per cent male marginal workers followed by Lahul & Spiti with 4.44 per cent and Bilaspur with 3.89 per cent as against the state average of 3.02 per cent. Kinnaur with a proportion of 1.10 per cent is at the bottom and Sirmaur district with 1.65 per cent is just above Kinnaur from bottom.

6. Of the total female population only 31.86 per cent fall under the category of workers. The main female workers constitute 18.72 per cent and marginal female workers 13.14 per cent in the state. The overwhelming majority of main workers fall under the category of cultivators which is 16.76 per cent followed by other workers which is 1.50 per cent while the share of agricultural labourers and workers engaged in household industries are 0.32 per cent and 0.14 per cent, respectively. Districtwise, Lahul & Spiti with 62.06 per cent and Kinnaur with 51.05 per cent rank first and second in respect of proportion of female workers to total female population. While Una with 10.45 per cent of female population falling in this category of workers is at the bottom. In the case of female main workers the same trend is being obtained in the districts.

7. Kinnaur district ranks first with 39.39 per cent main female workers as cultivators followed by Lahul & Spiti with 36.32 per cent, Una is at the bottom with 2.57 per cent against the state average of 16.76 per cent. The proportion of female workers who are working as agricultural labourers varies between 3.61 per cent in Kinnaur to 0.14 per cent in Hamirpur district as against the state proportion of 0.32 per cent. Kinnaur also leads in the proportion of other workers with 3.55 per cent of the total female main workers followed by Shimla district with 2.76 per cent and Hamirpur is at the tail end where only 0.67 per cent female main workers fall under the category of other workers as against the state average of 1.50.

8. Chamba district leads in the districts with regard to the proportion of marginal workers to total female population where 24 per cent of the female population has been classified as marginal workers followed by Bilaspur district with 15.81 per cent, Mandi with 14.30 per cent while Kinnaur district has the minimum proportion of marginal workers among the females.

9. The percentage of male non-workers to total male population come to 47.39 per cent. Districtwise, Hamirpur district has the highest proportion of non-workers where 57.86 per cent of the male population fall under the category followed by the Una district with 53.90 per cent and Kangra district with 51.98 per cent, while on the other hand Lahul & Spiti district has the minimum proportion of non-workers with 29.50 per cent and Kinnaur is the second lowest with 37.25 per cent.

10. The proportion of female non-workers are higher as compared to the males in all the districts of the State. Una district ranks first with 89.55 per cent female non-workers, followed by Kangra district with 79.11 per cent and Solan with 70.30 per cent from the bottom. Lahul & Spiti has 37.94 per cent female non-workers and second lowest is Kinnaur district with 48.95 per cent.

Statement 8 gives distribution of 1,000 persons, males and females of total, rural and urban areas among the main workers, marginal workers and non-workers for broad industrial categories of main workers.

2. In the state as a whole out of the 1,000 persons 423.75 (343.63 main workers and 80.12 marginal workers) are engaged in one or other type of economic activity and the remaining 576.25 are non-workers. The corresponding figurers for males are 526.08 and 473.92 respectively. In the case of females 318.56 are workers and 681.44 are non-workers per 1,000 of females. In the case of rural areas, out of 1,000 population, 429.63 are workers and remaining 570.37 are non-workers while for the urban areas the figures are 352.48 and 647.52. Amongst the districts the maximum number of workers per thousand population has been returned from Lahul & Spiti district, which comes to 668.35 and Una district with 280.21 is the lowest. The same ranking applies to the rural areas too. Shimla district tops in the proportion of workers to total population amongst urban areas of the state. So also is the trend in respect of main workers. In respect of cultivators Kullu district tops with 363.18.

3. Of the 1,000 persons, only 94 have been classified as other workers. The figures for the rural and urban areas are 76.25 and 309.39 respectively. The proportion of males for total, rural and urban areas are 170.91, 141.65 and 491.27 respectively. Only 14.95 per cent per thousand of female population fall as other workers. In case of rural areas it is 10.13 whereas for urban areas this comes to 80.61. The highest proportion of other workers per thousand population for total areas has been from Lahul & Spiti district, which is 277.73. The district again ranks first in respect of males and females, other workers separately.

PRIMARY CENSUS ABSTRACT

The Primary Census Abstract gives basic information-occupied residential houses, number of households, total population, Scheduled Castes and Scheduled Tribes population, Literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each area unit upto District/Tahsil/Sub-Tahsil and Town level.

PRIMARY CENSUS ABSTRACT
FOR
SCHEDULED CASTES

The Primary Census Abstract for Scheduled Castes exclusively deals with Scheduled Castes population. It gives data upto District/Tahsil/Sub-Tahsil/Town level for Total, Rural and Urban areas separately. It has been prepared almost on the same lines as the general Primary Census Abstract except that in column 4 number of Households with Scheduled Castes members have been provided.

PRIMARY CENSUS ABSTRACT
FOR
SCHEDULED TRIBES

The Primary Census Abstract has been prepar
on the same lines as Primary Census Abstract f
Scheduled Castes except that in Column 4 Numb
of households with Scheduled Tribes members ha
been given. The information has been given for t
District, Tahsil/Sub-Tahsil and Town level and al
separately for the Rural and Urban areas.
