PREFACE

Several publications are brought out after every census based on the data collected during Houselisting and Census enumeration. These volumes provide the basic figures that are much sought after for important uses by the Government Departments, research bodies, industrial and commercial undertakings and others. The present publication (Part II-B) containing the "Primary Census Abstract" is one of the few priority publications of 1981 census.

The Primary Census Abstract or 'PCA' presented in this volume relates to the general population as also Scheduled Castes and Scheduled Tribes. The general PCA which relates to the whole population is given for the state and districts first in the 'State PCA', followed by the 'District PCA' in which figures for every taluk, town and urban agglomeration are given. The data given here include the population, literates, scheduled castes and scheduled tribes, main workers divided into four categories, marginal workers and non-workers. All these are given separately for males and females and are available for rural, urban as well as all areas. The area figures in square kilometres, occupied census houses and households are also indicated here. The Primary Census Abstract for Scheduled Castes and Scheduled Tribes, given after the State and District Primary Census Abstract, also contain all the above characteristics for these sections of the population, except area and occupied census houses. A descriptive note highlighting certain important characteristics of the population as revealed by the data contained in Primary Census Abstract along with some of the conceptual definitions is included in the beginning for the convenience of the data users.

The companion volume, Part II-A, will contain the five important 'general population tables' giving area, houses and population, decadal variation in population since 1901 of districts, villages classified by population size, population of towns/urban agglomerations with decadal variation since 1901 and a table giving data on Standard Urban Areas. These basic tables will also be of immense use as they contain valuable data.

The census operations are carried out only through the State hierarchy and I was fortunate in having the fullest cooperation from the District Collectors, Tahsildars/Municipal Commissioners and the Executive Officers of Municipal Townships and Cantonments. The Commissioners of the Corporations of Madras and Madurai, the Heads of Departments of the Tamil Nadu Government as also several Heads of Offices of the Central Government were very helpful in our work whom I thank. I wish to record my sincere thanks to the Government of Tamil Nadu for their help and support throughout the census operations.

Shri P. Padmanabha, the Registrar General, India has indeed been a tower of strength to me and throughout the operations his guidance and encouragement at different stages had been immensely helpful and I express

my profound gratitude to him. Shri K. K. Chakravorty, Shri V. P. Pandey, Shri N. G. Nag, Deputy Registrar Generals and a number of other officers of the Office of the Registrar General, India have been very helpful in our work and I wish to record my thanks to all of them.

The compilation of the Primary Census Abstract, which involved scrutiny, editing and matching of schedules, was done in the nine Regional Tabulation Offices headed by Deputy Directors. I acknowledge the able and sincere services rendered by the Regional Deputy Directors, Shri N. Alappillai, Shri M. Gopalakrishnan, Shri G. Joseph Edwin, Shri M. Panchapakesan, Shri M. Rajagopalan, Shri M. Satyamoorthy, Shri K. Thangavelu, Shri M. Thangaraju and Shri R. Veeraraju. I also thank their staff which included tabulators, checkers and supervisors who performed the basic compilation work in accordance with the instructions issued by my office.

I also thank the City Census Officer, Shri S. Mohanasundaram and his assistants who organised the census count in Madras City and successfully completed the enumeration. Shri N. Rama Rao, the then Deputy Director of Census Operations, was with me during the enumeration and helped me a lot in organising the census count. I wish to acknowledge his sincere and devoted work.

The final scrutiny of the Primary Census Abstracts and the compilation and finalisation of the State level Primary Census Abstract was done under the guidance of Shri M. Thangaraju, Deputy Director of Census Operations and Shri R. Narayanan, Assistant Director of Census Operations. Both of them also helped me in finalising the descriptive notes. I acknowledge their able and sincere assistance rendered in this regard. I am also indicating separately a list of staff members of the Directorate who were involved in the checking and finalisation of the Primary Census Abstracts and preparation of maps/charts included in this volume and to whom my thanks are due.

I also thank the Government of India Press, Coimbatore and its Manager, Shri V. Narasimhan and the Assistant Managers, Shri C. A. Mathew and Shri K. A. Sivasubramanian who took personal interest in the quick printing of this volume.

MADRAS,
August, 1983

PRIMARY CENSUS ABSTRACT 1981

GENERAL NOTE

The tables presented in this volume contain the basic census data compiled on a full count basis from the census schedules. There are three types of tables *viz.*, State Primary Census Abstract/District Primary Census Abstract and Primary Census Abstracts for Scheduled Castes and Scheduled Tribes.

The State Primary Census Abstract contains the basic data for Tamil Nadu and its 16 districts with rural-urban break-up. The District Primary Census Abstract, containing similar information, is presented at taluk level (total, rural and urban areas) along with data for Cities/Towns and Urban Agglomerations under each taluk. In the Annexes to the District Primary Census Abstract, data for the Urban Agglomerations and their constituent units are given in respect of the Urban Agglomerations cutting across two or more taluks and districts.

The Primary Census Abstracts for Scheduled Castes and Scheduled Tribes contain the basic data in respect of the Scheduled Caste/Scheduled Tribe population and is presented for State, Districts, Taluks (total, rural and urban areas) and Cities/Towns and Urban Agglomerations, as in the District Primary Census Abstract for the general population. Here too, Annexes for Urban Agglomerations cutting across two or more districts/taluks are given.

The Primary Census Abstract of 1981 which corresponds to the Primary Census Abstract of 1961 and 1971 contains the following particulars.

1. Area (in Km^2);
2. Occupied Residential Houses;
3. Number of Households;
4. Total Population (including Institutional and Houseless Population) with sex break-up;
5. Scheduled Castes with sex break-up;
6. Scheduled Tribes with sex break-up;
7. Literates with sex break-up;
8. Main workers with sex break-up;
9. Marginal workers with sex break-up; and
10. Non-workers with sex break-up.

Further, the main workers are classified under the following four broad categories as well.

1. Cultivators;
2. Agricultural Labourers;
3. Those engaged in Manufacturing, Processing, Servicing and Repairs in Household Industry; and
4. Other workers.

In the 1971 Primary Census Abstract, the workers were classified under nine broad industrial categories. They were:—

I—Cultivators;

II—Agricultural Labourers;

III—Persons engaged in livestock, forestry, fishing hunting and plantations, orchards and allied activities;

IV—Mining and Quarrying;

V—Manufacturing, Processing, Servicing and Repairs;

(a) At Household Industry;

(b) Other than Household Industry;

VI—Construction;

VII—Trade and Commerce;

VIII—Transport, Storage and Communications; and

IX—Other Services.

The first three sub-divisions of main workers of 1981 census correspond to categories I, II and V(a) of 1971 census respectively while 'Other Workers' (fourth sub-division) of 1981 census includes all other categories of 1971 census (*i.e.*, III, IV, V(b), VI, VII, VIII and IX).

Workers.—In the 1981 Census, the basic concept of worker is the same as in 1961 and 1971 censuses, and it is opposed to the 'income' or 'economic independence' concept used in the censuses prior to 1961. Work is defined as participation in any economically productive activity. The criterion for classification of a worker has, however, been changed now. In the 1961 and 1971 Censuses, different approaches, namely, usual status and current status were adopted with reference period of one year in both the Censuses in the case of seasonal work and one week in 1971 and fifteen days in 1961 in the case of regular work. But, at the 1981 census, the usual status approach is adopted uniformly for all work.

In 1961, a person was treated as worker if he had worked regularly during the last season or if he had worked at least for a day in the case of non-seasonal work during the fortnight preceeding the day of enumeration. As a result, a full-time student who spent some time in his father's shop for even a day in the preceding fortnight was considered as a worker. Similarly, if a woman who, mainly engaged in household duties, did some work such as pounding of rice for sale or wages, making and selling of cowdung cakes or any such work, she was treated as a worker.

Thus, in 1961, even if a person's contribution to work was extremely marginal, he was categorised basically as a worker.

In 1971, every individual was asked to declare himself/herself what according to him/her was the 'main activity' *i.e.*, how he/she engaged himself/herself mostly. Accordingly, all persons were divided into two broad streams of main activity as workers and non-workers. The reference period for classifying a person as a worker in 1971 was one year in the case of persons engaged in seasonal work like cultivation, livestock keeping, plantations, some types of household industry etc., which were not carried on throughout the year and in the case of other regular work, one week prior to the day of enumeration. If a person had participated in any such regular work in any one of the seven days prior to the day of enumeration or any seasonal work during the last one year and if that activity had been returned as 'main activity', then such person was classified as worker and categorised accordingly. In 1971, a full-time student or a housewife engaged marginally in any of the economic activities was treated as a non-worker and such participation in economic activity had been categorised as 'secondary work'.

In 1981 census, both for regular and seasonal work, the period of reference was one year. If a person was engaged in any economic activity in any one of the days during the last one year prior to enumeration, then he was considered as a worker. The dichotomy of worker/non-worker of 1961 and 1971 censuses has been discarded at the 1981 census and instead a trichotomy as main workers, marginal workers and non-workers has been adopted For main worker, the time criterion adopted is one's engagement in work for the major part of the year, *i.e.*, at least 183 days and those who had worked for some time during the last year but not for the major part of the year (*i.e.*, less than 183 days or six months) are treated as marginal workers. The remaining population is classified as non-workers. This trichotomy partially permits a comparability of 1981 census economic data with that of 1971 as well as 1961. The main workers of 1981 census can be expected to correspond to the workers of 1971 and the main workers and marginal workers of 1981 together to correspond to the workers of 1961. In all these cases, work involved not only actual work, but also effective supervision or direction of work.

'Marginal worker' is a new category of workers introduced for the first time in 1981 census. Though a person has been basically a worker in the last one year, if his participation in economic activity was less than six months or 183 days, the person concerned was treated as marginal worker.

Since the basic idea was to net all the workers including those whose contribution to economically productive work was marginal in the course of the last one year, the enumerators were asked to put probing questions regarding the work done at any time last year or in any of the seasons in the reference period, particularly in the case of women and children in the rural areas.

Non-Worker.—A person who had not done any work at all in the reference period of one year and hence did not qualify for treatment as 'main worker' or 'marginal worker' was categorised as a 'non-worker'. In the case of such non-workers, details as to how the person spent the time mostly was ascertained and such non-workers were categorised under one of the following groups: (i) Household Duties, (ii) Students, (iii) Dependents, (iv) Retired persons or rentiers, (v) Beggars, etc (vi) Inmates of institutions and (vii) Other non-workers.

Census Houses and Households.—Columns 5 and 6 of the Primary Census Abstract give the total number of occupied residential census houses and the number of households respectively.

A 'Census House' is defined as a building or part of building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for residential or non-residential purpose or for both. If a building has a number of flats or blocks which are independent of one another, having separate entrances of their own from the road or a common stair-case or common courtyard leading to a main gate, they are also considered as separate census houses.

In certain urban areas, a flat may have five rooms, each room having direct entrance to the common staircase or courtyard and this may be occupied by a single household. In such cases, as it is not realistic to treat them as five separate census houses, singleness of use of these rooms along with the main house is taken into consideration and the entire flat treated as a 'Census House'.

Similarly, in some parts of the country especially in rural areas, a group of huts located in a compound, whether enclosed or unenclosed, may be occupied by one household, each hut being used for a different purpose by the family. Though each of the huts is a separate structure, they form a single housing unit and therefore, is treated collectively as a single census house. In some municipal towns and cities, every site, whether built upon or not, is numbered by the municipal authorities on property basis for revenue purposes. Such open sites, even if they are enclosed by a compound wall, are not treated as census houses. Usually, a structure will have four walls and a roof. But, in some cases, the very nature of the construction of houses is such that there may not be any wall, like, for example, a conical hut having the roof almost touching the ground with an entrance. Such structures are also treated as census houses. Pump houses, temples and other similar buildings are also considered as Census Houses, if they are not so small that no person can live in them. Only occupied residential houses have been indicated in the Primary Census Abstract.

A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a house-

hold of persons related by blood or a household of unrelated persons or having a mix of both. The households of unrelated persons such as boarding houses, hotels, messes, hostels, rescue homes, jails, ashrams etc., are called "Institutional households". If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they do not constitute an institutional household. Each such person is treated as a separate household.

While the institutional households were enumerated as and when the enumerator came across such household in his area during the enumeration period, the houseless households were enumerated only on the night of February 28, 1981, the last day of the enumeration period. It had been clearly instructed that during the period of enumeration, the enumerators should note the possible places where houseless population live, such as on the road-side, pavements, in hume pipes or in the open, platforms and the like. On the night of February 28/March 1, 1981, but before sunrise of March 1, 1981, the enumerators were asked to quickly cover all such houseless households and enumerate them. Similarly, the enumerators were asked to keep watch on the large settlements of nomadic population who camp on the outskirts of the villages, so that they could be covered on the night of February 28, 1981, after making sure that they had not been enumerated elsewhere.

Rural-Urban areas of 1981 Census:

It has been the practice in census to present data separately for rural and urban areas. Census statistics of the rural and urban population have many important uses. What constitutes an urban area in census is based on certain criteria adopted at each census. In the 1981 census, the definition of an urban unit is more or less the same as in the 1961 and 1971 censuses but for some minor variations. The urban areas of 1981 census are:

(a) All places with a Municipality, Corporation or Cantonment Board or notified town area;

(b) All other places which satisfied the following criteria:

(i) A minimum population of 5,000.

(ii) At least 75 per cent of the male working population engaged in non-agricultural (and allied) activity.

(iii) A population of at least 400 per Sq. Km. (or one thousand per square mile).

In 1971 and earlier censuses, urban areas in Tamil Nadu included some places with population below 5,000 on the basis of certain considerations like density, social and historical importance. In 1981, however, the test was strictly applied and no area was included on local considerations alone. This procedure has been followed with a view to presenting a correct perspective of urbanisation in Tamil Nadu.

The total number of urban units recognised in Tamil Nadu for 1981 Census is 434. Of the 434 urban units or towns, two (viz., Madras and Madurai) are Municipal Corporations, 99 are Muncipalities, eight are Municipal Townships and two are Cantonments. The rest are town/village panchayats, other townships and units under railway administration. Of the urban units recognised in 1971 Census, some were derecognised as 'rural' in 1981. While some towns got merged with the neighbouring cities/towns and thus lost their independent identity, a few new places were recognised for the first time during 1981 Census.

The places not recognised as 'urban' in census fall under 'rural' areas. They include revenue villages, forest units and parts of villages whose other parts are included in urban units.

Urban Agglomeration:

Urban Agglomeration, a new concept adopted in 1971 is being continued in 1981. This concept is defined as under:

Very often, large railway colonies, university campuses, port areas, military camps, etc. come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a continuous spread with the town, they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit and called "urban agglomeration". An urban agglomeration may constitute:

(a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) or

(c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

In Tamil Nadu, 32 urban agglomerations were recognised in 1971. Two new urban agglomerations, (*Viz.*, Karur and Neyveli Urban Agglomerations) have been recognised in 1981. The earlier 32 urban agglomerations recognised in 1971 are also being continued though there have been changes in the constituent units of some of these urban agglomerations. These changes are due to the recognition of new towns, jurisdictional changes resulting in expansion of some towns, etc. All the constituent units of the 34 urban agglomerations in the state, are also independent urban units. No rural part or spill over of urban outgrowth outside the statutory towns etc., form as constituent units in the urban agglomerations recognised in the state. Thus, the urban agglomerations represent the continuous urban spread of some intense urban areas where the process of urbanisation has actually extended to contiguous neighbouring units also and the entire area forms an integrated unit with necessary economic, commercial and transport link-up.

Of the 434 urban units or census towns recognised in 1981, 223 towns are included in the 34 urban agglomerations as their constituent units and the remaining 211 towns stand alone as separate units (*i.e.* without forming part of any urban agglomeration).

Scheduled Castes and Scheduled Tribes:

The population of Scheduled Castes and Scheduled Tribes and their break-up by sex are given in columns 10 to 15 of the State and District Primary Census Abstract.

In addition, separate Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in this volume. This is the first time that the Primary Census Abstracts for Scheduled Castes and Scheduled Tribes are presented separately in this volume. The present Primary Census Abstract for Scheduled Caste/Scheduled Tribes corresponds to table C-VIII of 1971. The Primary Census Abstracts for Scheduled Castes and Scheduled Tribes are similar in contents to the Primary Census Abstract for general population except that the area in Sq. Km. and occupied residential houses presented in the general Primary Census Abstract are not given here. Each census enumerator was furnished with a list of Scheduled Castes and Scheduled Tribes applicable to the State as per the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976). He was instructed to record a person as belonging to Scheduled Caste or Scheduled Tribe only when the name of the Scheduled Caste or Scheduled Tribe as returned by the person figured in the list. If the person belonging to Scheduled Caste or Scheduled Tribe returned his caste or tribe by any synonym or generic name of the caste or tribe, it was reckoned as Scheduled Caste or Scheduled Tribe only when the name was also found in the list.

The Scheduled Castes and Scheduled Tribes list for Tamil Nadu, as given to the enumerators, is reproduced below. Scheduled Castes are recognised only among Hindus and Sikhs while the members of the Scheduled Tribes may belong to any religion.

LIST OF SCHEDULED CASTES

1. Adi Andhra.
2. Adi Dravida.
3. Adi Karnataka.
4. Ajila.
5. Arunthathiyar.
6. Ayyanavar (in Kanniyakumari District and Shencottah Taluk of Tirunelveli District).

36. Uraly.

A review of certain characteristics:

The number of households per 1,000 census houses and the number of households per Sq. Km. are given for state and districts in Statement-1. The ratio of households to census houses is 1030 for the state. Comparatively higher ratios of households to houses are noticed in North Arcot (1141) and Kanniyakumari (1077) districts. Such ratios are generally more in the urban areas (due to congestion) than in the rural areas though there are exceptions in the case of some districts. These are Coimbatore, Madurai, Tiruchchirappalli and Kanniyakumari. In these districts, the urban ratios are slightly lower than the rural ratios.

In the state as a whole, there are 79 households per Sq. Km. In 1971, this figure was 66. The variation between the rural and urban areas is high. In rural areas, the density of households is 57 per Sq. Km. and in urban areas it is 553 per Sq. Km. The highest density of households per Sq. Km. is observed in Madras (3,704). While it is 165 per Sq. Km. in Kanniyakumari district and 106 in the case of Thanjavur district, in the remaining districts, it is less than 100. The highest density for 'rural' is observed in Kanniyakumari (140) and the lowest in Nilgiri (36). For urban areas, Madras (3,704) and Kanniyakumari (1,100) stand out as the districts with very large number of households per Sq. Km.; the lowest is in Nilgiri district (85).

It may be observed from the statement that about 80% of the Scheduled Caste population of the State live in rural areas. A little over 90% of the Scheduled Tribes in Tamil Nadu are living in rural areas. Among the districts, the highest proportion of Scheduled Caste population (94.30%) in rural areas is recorded in Dharmapuri district while the least is found in the rural areas of the Nilgiri district (48.83%). Among the tribal population, Salem district rural has the highest proportion of Scheduled Tribe population (98.98%). This is due to the fact that this district has many mountainous regions which are inhabited by tribal population in large numbers. The proportion of Scheduled Castes as well as Scheduled Tribes is found to be generally higher in rural areas as compared to urban areas in almost all the districts. But, in Nilgiri district, the Scheduled Caste population is higher in urban areas than in rural. Similarly, the concentration of Scheduled Tribe population in the urban areas of Thanjavur district is more than what is found to be in the rural areas of that district.

The following statement (Statment—3) gives the percentage of Scheduled Caste and Scheduled Tribe population to total population in the State and districts.

STATEMENT—3

PERCENTAGE OF SCHEDULED CASTE AND SCHDULED TRIBE POPULATION TO TOTAL POPULATION OF STATE/DISTRICTS, 1981

State/District	Percentage of Scheduled Castes and Scheduled Tribes to Total Population of State/District	Percentage of Scheduled Castes to Total Population of State/District	Percentage of Schedule Tribes to Total Population of State/District	Distribution of 100 Members of Scheduled Castes among Districts	Distribution of 100 Members of Scheduled Tribes among Districts

9. Nilgiri	26.35	23.04	3.31	1.64	4.01
10. Madurai	15.63	15.33	0.30	7.83	2.62
11. Tiruchchirappalli	19.96	18.62	1.34	7.57	9.28
12. Thanjavur	23.36	23.21	0.15	10.62	1.16
13. Pudukkottai	16.70	16.57	0.13	2.16	0.29
14. Ramanathapuram	16.88	16.68	0.20	6.26	1.27
15. Tirunelveli	16.82	16.49	0.33	6.64	2.30
16. Kanniyakumari	4.68	4.23	0.45	0.68	1.22

In 1981, Scheduled Castes constitute 18.35% of the total population of the State. It was 17.76% in 1971. The percentage of Scheduled Tribe population to total population has also increased from 0.76% in 1971 to 1.07% in 1981. It may be seen that the ratio of Scheduled Castes is the highest (26.21%) in Chengalpattu district and the least (4.23%) in Kanniyakumari district. In the case of Scheduled Tribe population, the highest ratio is recorded in Salem district (3.56%) while the least ratio is in Pudukkottai district (0.13%).

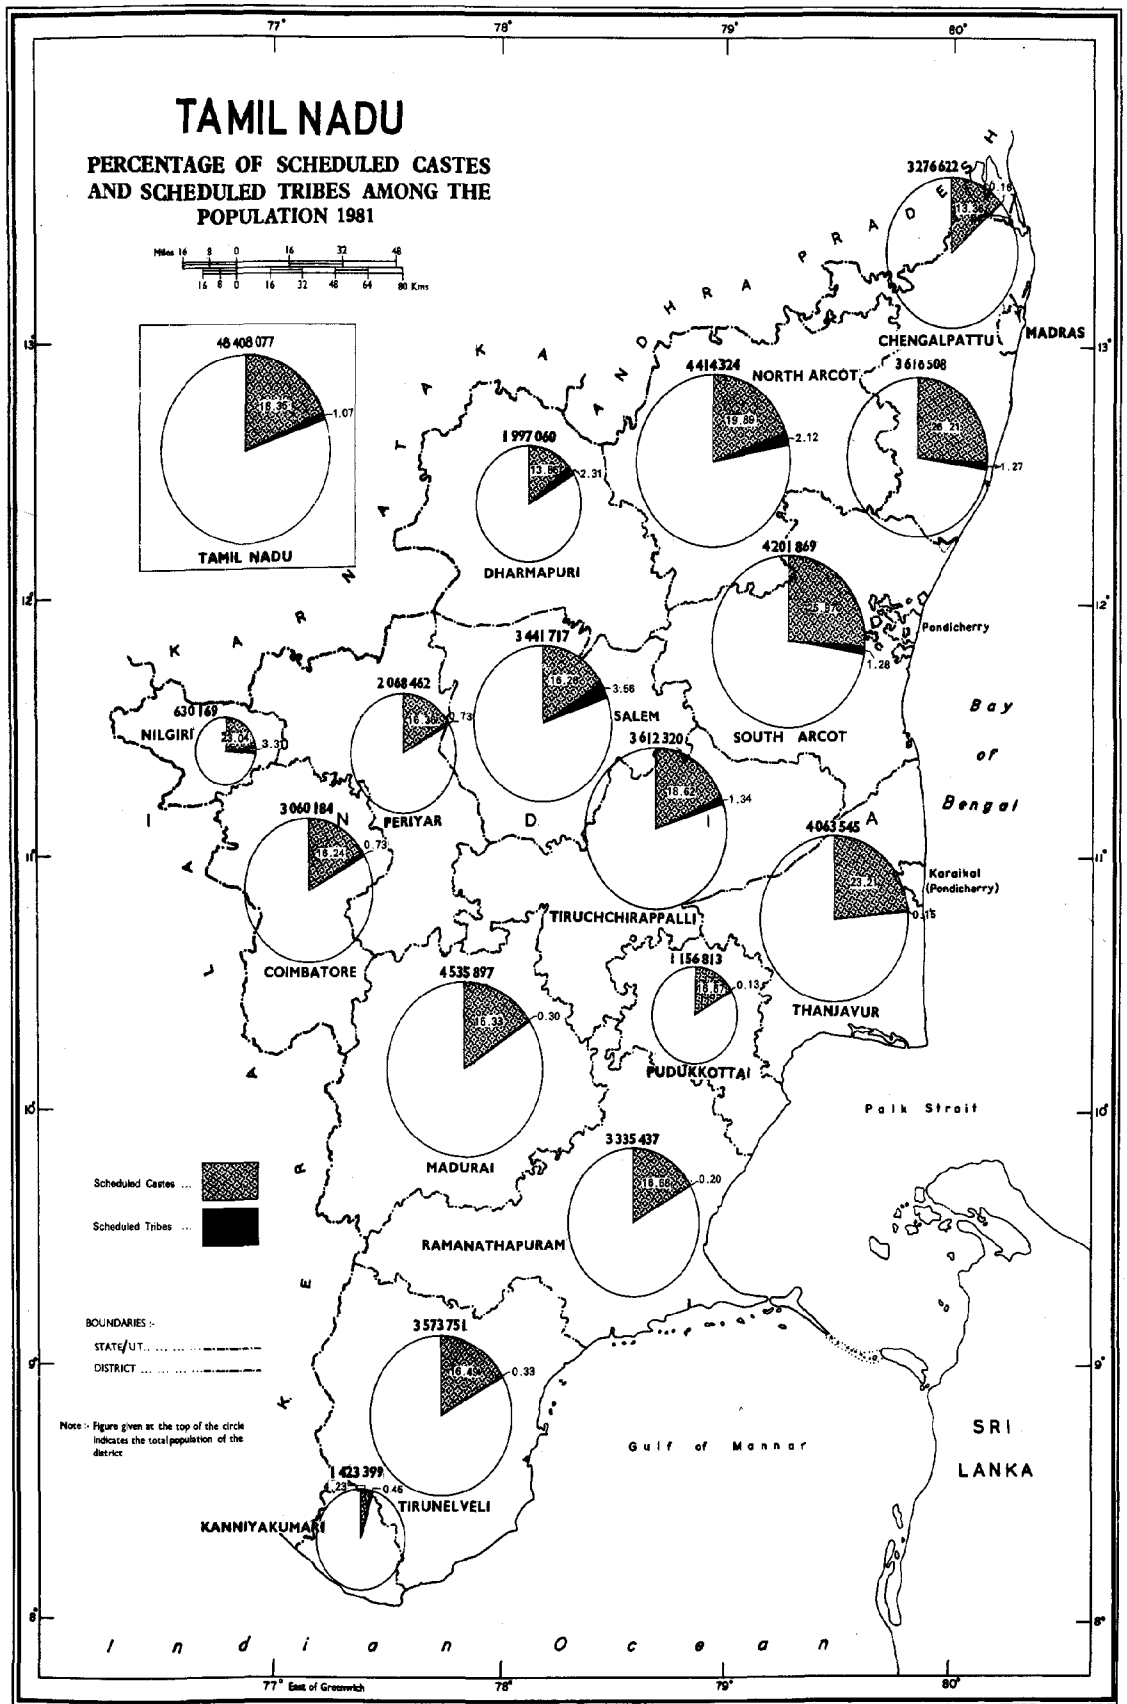

When the proportion of Scheduled Castes to total population of each district is considered, it is found that higher percentages than that for the State as a whole (18.35%) have been recorded in six districts *viz.*, Chengalpattu (26.21%), South Arcot (25.97%), Thanjavur (23.21%), Nilgiri (23.04%), North Arcot (19.89%) and Tiruchchirappalli (18.62%). As regards the Scheduled Tribes, seven districts have recorded higher proportion of Scheduled Tribe population to total population than the State average of 1.07%. They are Salem (3.56%), Nilgiri (3.31%), Dharmapuri (2.31%), North Arcot (2.12%), Tiruchchirappalli (1.34%), South Arcot (1.28%) and Chengalpattu (1.27%). The southern districts have very low percentages of Scheduled Tribe population.

Of the State's total Scheduled Caste population of 8.88 million, South Arcot district accounts for nearly one-eighth. Kanniyakumari district accounts for a mere 0.68% of the State's Scheduled Caste population and this is the lowest ratio among the districts. Also, this is the only district having less than one per cent of the State's Scheduled Caste population. The districts with over 10 per cent of the State's Scheduled Caste population are South Arcot (12.29%), Chengalpattu (10.67%) and Thanjavur (10.62%).

Among the Scheduled Tribe population, nearly one-fourth of the total Scheduled Tribe population of the State are in Salem district (23.54%), followed by North Arcot district with 18.01% and South Arcot with 10.34%. Pudukkottai district accounts for the least proportion *viz.*, 0.29% and it is the only district having less than one per cent of the State's Scheduled Tribe population.

The Scheduled Caste population has increased from 7.32 million in 1971 to 8.88 million in 1981 and this amounts to an increase of 21.40%. The Scheduled Tribe population has gone up from 3.12 lakhs in 1971 to 5.20 lakhs in 1981 which accounts for an increase of 67% over 1971.

While the growth rate of Scheduled Caste population is in tune with the growth of the total population as a whole in most of the districts, the decadal increase is quite high in the case of Madras and Nilgiri districts. The growth of Scheduled Tribe population is rather high in the State and especially in the districts of South Arcot, Tiruchchirappalli, Tirunelveli, Madras and Thanjavur.

15.	Tirunelveli	15.78	16.49	0.05	0.33
16.	Kanniyakumari	3.89	4.23	0.23	0.45

The area restriction for Scheduled Tribes, which was in vogue in 1971 has been removed in many cases in 1981. In Kallakurichchi taluk of South Arcot district, where the Scheduled Tribe population has gone up from 74 in 1971 to 28,946 in 1981, Malayalis have returned themselves as Scheduled Tribes due to removal of area restrictions.

The following statement (Statement-5) furnishes the combined percentages of both Scheduled Castes and Scheduled Tribes to total population as also separately for Scheduled Castes and Scheduled Tribes. The details are given for total, rural and urban areas separately and also by sex.

STATEMENT—5

The Scheduled Caste population in the rural areas form 21.85% of the total rural population of the State, as against 21.06% in 1971. The corresponding ratio of Scheduled Tribe population is 1.45% as against 1.02% in 1971.

In the urban areas of the State, the proportion of Scheduled Caste population to total urban population has increased from 10.15% in 1971 to 11.23% in 1981. The ratio of Scheduled Tribe population in urban areas has doubled from 0.14% in 1971 to 0.32% in 1981.

Nearly one-fifth of the total population of the State (19.42 per cent) are Scheduled Castes and Scheduled Tribes. In the rural areas, 23.30 per cent of the State's population are Scheduled Castes and Scheduled Tribes, while in urban areas they constitute 11.55 per cent.

Among the Scheduled Caste population in rural areas of the districts, the highest proportion of 39.18% is in Chengalpattu district while the least is in Kanniyakumari district (4.36%). In urban areas, the highest ratio (24.13%) of Scheduled Caste population is seen in Nilgiri district while the least (3.61%) is in Kanniyakumari district.

As regards Scheduled Tribes in rural areas, Salem district has the highest ratio of 4.95% while Thanjavur has the least ratio of 0.08%. In urban areas, the highest ratio of 2.09% is recorded in Nilgiri district while the least (0.12%) is in Coimbatore district.

Considering both Scheduled Castes and Scheduled Tribes together, among the districts, the highest percentage of 27.48% is recorded in Chengalpattu district. The lowest proportion of 4.68% of Scheduled Castes plus Scheduled Tribes is in Kanniyakumari district Among the rural areas of the districts, again Chengalpattu district tops with 34.85% while Kanniyakumari is in the bottom with 4.86%. Nilgiri district ranks first with a ratio of 26.22% of Scheduled Caste and Scheduled Tribe population in urban areas while Kanniyakumari maintains the last place with 3.81%.

Literate and Educated Persons:

Columns 16 to 18 of the Primary Census Abstract give the total number of literates with sex break-up for each unit of presentation. A person who can both read and write with understanding in any language has been recorded as a literate in census. A person who can only read but cannot write, is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any educational standard. The test for reading was the ability to read any portion of a simple book of any language and similarly for writing, the ability to write a simple letter in any language was considered sufficient. Ability to sign merely one's name is not adequate to qualify a person as literate. All children aged 4 years and below were treated as illiterate even if the child was going to school and had picked up reading and writing a few words.

The following statement (Statement-6) gives the percentage of literates to total population in total, rural and urban areas of the State and districts by sex.

STATEMENT—6

16. Kanniyakumari	63.85	68.55	59.08	61.80	66.63	56.90	73.68	77.85	69.49

In Tamil Nadu, 46.76% of the total population are literates. In 1971, this percentage was 39.46%. Among the districts, Madras district (conterminous with Madras city) has the highest rate of 68.40%, followed by Kanniyakumari district with 63.85%. The least rate is in Dharmapuri district (29%). The male literacy rate has increased from 51.78% in 1971 to 58.26% in 1981, while the female literacy rate has gone up to 34.99% in 1981 from 26.86% in 1971. The male literacy rate ranges from 38.98% in Dharmapuri district to 75.60% in Madras while the female literacy rate varies from 18.60% in Dharmapuri district to 60.69% in Madras district. The literacy percentage among males is more than 50 per cent in all except the three districts of South Arcot, Dharmapuri and Salem. The female literacy rates are over 50% only in Madras and Kanniyakumari districts. In the rural areas, 38.56% of the population are literates. The highest literacy rate among the rural population is recorded in Kanniyakumari district (61.80%) while the least rate of 26.24% is in Dharmapuri district. The male literacy rate in rural areas of the state is 51.16% while the female literacy rate is 25.80%. As regards sex-wise literacy rates in rural areas, Kanniyakumari district ranks first among the 15 districts with literacy rates of 66.63% for males and 56.90% for females while Dharmapuri ranks last with 36.26% and 15.81% respectively. Kanniyakumari is the only district in the State where the rural female literacy rate is over 50 per cent.

Nearly two-thirds of urban population are literates. In the urban areas of the State, the male and female literacy rates are 72.50% and 53.99% respectively. The highest literacy rate in urban areas is in Kanniyakumari district with 73.68% for the total population and 77.85% for males and 69.49% for females. Among urban literacy rates, the lowest is recorded in Salem district (55.51 per cent). Among male literacy rates in urban areas, Dharmapuri district has the least (*i.e.*, 65.07%). In regard to females of urban areas, the lowest rate of 45.18 per cent is observed in Salem district.

Classification of workers by industrial categories:

As stated earlier, the population had been divided into main workers, marginal workers and non-workers, the definitions of which have been explained earlier. Further, main workers have been divided into four industrial categories as follows:—

1. Cultivators.
2. Agricultural Labourers.
3. Workers engaged in Household Industry and
4. Other workers.

In the presentation of main workers by industrial categories, a departure has been made in 1981 Census on the basis of the recommendation of the Planning Commission and the Central Statistical Organisation. In 1981 Primary Census Abstract only the four main categories are given while in 1971 census, the workers were categorised under the nine broad categories (explained earlier). While three categories *viz.* Cultivators, Agricultural Labourers and Household Industry workers are presented separately in 1981 as in 1971, the rest of the categories of 1971 are now combined under 'others', and given as the fourth category.

Cultivator:

A person was treated as a cultivator if he/she was engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

A person who had given out his/her land to another person or persons for cultivation for money, kind or share of crop and who did not even supervise or direct cultivation of land was not considered as a cultivator. Similarly, a person working in another person's land for wages in cash or kind or a combination of both (agricultural labourers) was not treated as cultivator.

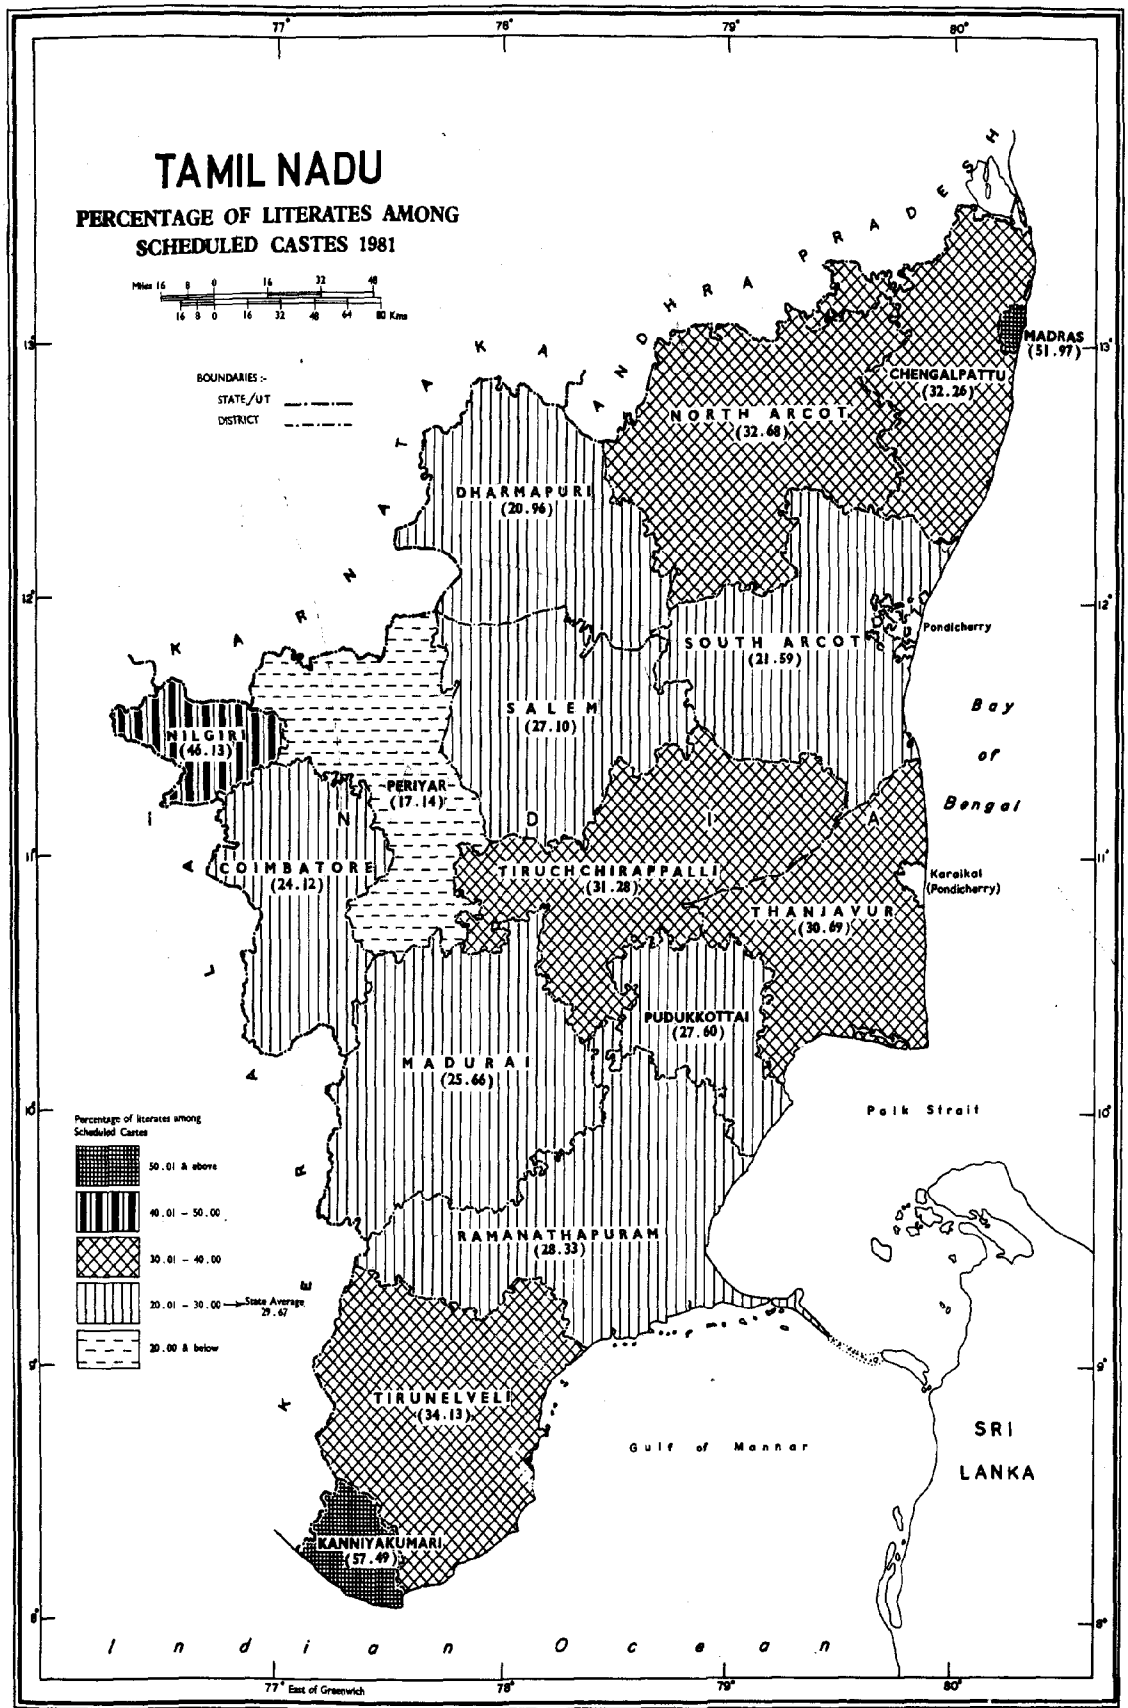

Persons engaged in production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugarcane, groundnut, tapioca etc., and pulses, raw jute and kindred fibre crop, cotton etc., were considered as cultivators while persons engaged in fruit growing, vegetable growing or keeping orchards or groves, plantation of tea, coffee, rubber, cinchona and other medicinal plantations were not treated as cultivators.

Agricultural Labourer:

A person who worked in another person's land for wages without any risk in the cultivation was regarded as agricultural labourer. An agricultural labourer has no right of lease or contract on the land on which he/she works.

Household Industry:

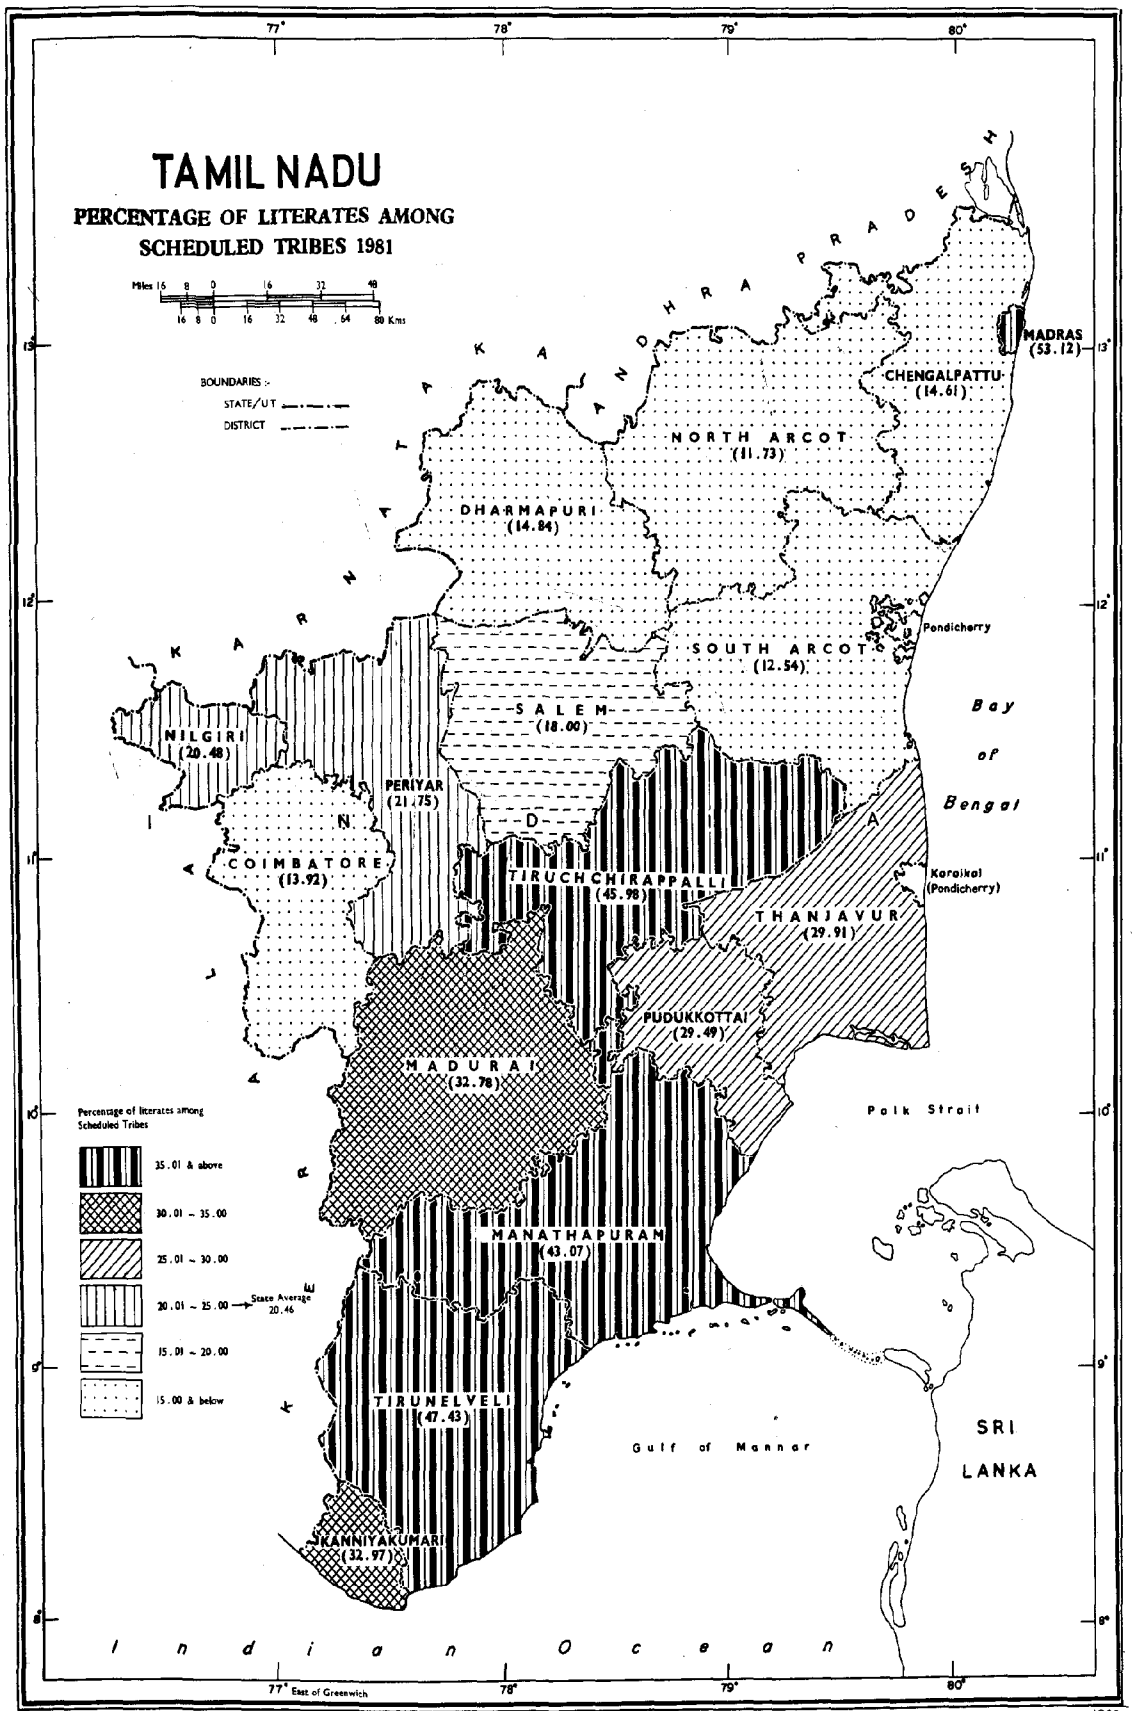

It is defined as an industry, conducted by the head of the household himself/herself and/or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on a large scale which would qualify to be registered as a factory under the Indian Factories Act. That is, it should not be run with 10 or more persons when power is used or 20 or more persons where power is

not used, even if they all belong to a large joint family. The main criterion of a household industry is the participation of one or more members of a household. Further, household industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods such as handloom weaving, dyeing, carpentry, bidi rolling, pottery manufacture, bicycle repairing, blacksmithy, tailoring etc. It does not include professionals such as pleader, doctor, barber, musician, dancer, dhobi, astrologer etc., even if such professions, trade or services are run at home by the members of the household.

The following statement (Statement-7) gives the percentage distribution of population, males and females into main workers (with four categories), marginal workers and non-workers in State/Districts.

It may be observed from the statement that 41.73% of the population are workers (including marginal workers) while the corresponding ratio for males is 56.58% and for females, 26.52%.

Among the districts, Periyar ranks first with 51.78% workers while Madras ranks last with 28.31%.

In the State, main workers constitute 39.31% of the population while marginal workers form 2.42%. Of the four broad categories of workers, 'Other workers' constitute 13.49% of the population of the State, closely followed by agricultural labourers with 12.47%. The cultivators constitute 11.49% and household industry workers 1.86%. Among the districts, the proportion of cultivators is the highest in Dharmapuri district (22.98%) while that of the agricultural labourers is the highest in Periyar district (18.79%). In the case of workers engaged in household industry, Tirunelveli district tops with a ratio of 4.45%. Nilgiri district accounts for the highest proportion (34.53%) of 'Other Workers' among the districts. This district is known for its tea, coffee, cinchona and other plantations and vegetable and fruit growing and these fall under the 'Other' category of workers. Madras city with a large number of workers engaged in offices, trade, commerce and industry has the second highest percentage of 27.33 under 'Other Workers'. Pudukkottai district has the highest proportion of marginal workers with 4.86%. The proportion of marginal workers is generally found to be higher among females than males. At the State level, the percentage of marginal workers among males is only 0.73 while it is 4.16 per cent among females.

The following statement (Statement 8) gives the distribution of 1000 persons, males and females of total, rural and urban areas among the main workers, marginal workers, non-workers and by the four broad industrial categories of main workers. Similar to Statement 8, distribution is presented for Secheduled Caste and Scheduled Tribe Population in Statements 9 & 10 respectively.

Based upon Survey of India map with the permission of the Surveyor General of India

STATE PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

Fly Leaf

The Primary Census Abstract of 1981 gives certain basic census particulars. These are: area in square kilometres, number of occupied residential houses, households, the total population (including institutional and houseless population), Scheduled Castes and Scheduled Tribes, literates, the number main workers and non-workers. The main workers have further been classified into four broad industrial categories viz., cultivators, agricultural labourers, household industry workers and other workers. Figures for each of the above characteristics are given for males and females as also for total, rural and urban areas. Data are presented for Tamil Nadu as a whole, for 16 districts and 151 taluks and independent sub-taluks. Under each taluk, data for each town/urban agglomeration falling under it are presented. In the case of urban agglomerations cutting across more than one district/taluk, data for each such urban agglomeration along with the data for their constituent units are presented at the end in Annexes I and II.

The total area figures for the State and districts are based on the area figures supplied by the Surveyor General of India.

The area figures for urban units and for taluks are those supplied by local bodies and state revenue authorities respectively. The total area figures for urban areas of each taluk have been arrived at by adding the area of all the towns falling under the taluk and these are rounded off to one decimal. The rural area of the taluks had been arrived by substracting the area of the urban parts from the taluk area figures supplied by the Tahsildar/Collector. The total for urban areas of each district has similarly been obtained by totalling the area of all urban units of taluks. The total urban area of each district, thus arrived at had been subtracted from the total area of the district, supplied by the Surveyor General of India to arrive at the area figures for rural parts of the district.

The Primary Census Abstract for general population is followed by the Primary Census Abstracts for Scheduled Castes and Scheduled Tribes separately. The contents and order of presentation of the Primary Census Abstract for Scheduled Castes/Scheduled Tribes are similar to that of Primary Census Abstract for general population except for area and occupied census houses which are not given in Primary Census Abstract for Scheduled Castes/Scheduled Tribes. The Scheduled Castes/Scheduled Tribes Primary Census Abstract for the urban agglomerations cutting across districts/taluks have been given under Annexes and as is given in the Primary Census Abstract for general population.

The following abbreviations have been used to indicate the civic status of the towns.

1. M.C. — Municipal Corporation
2. M. — Municipality
3. T.S. — Township
4. P. — Panchayat
5. Cantt. — Cantonment
6. S.Rly. Admn. — Southern Railway Administration

NOTE : 1. The following abbreviations have been used to denote the status of a town.

M.C.	—	Municipal Corporation	P	—	Panchayat
M	—	Municipality	Cantt.	—	Cantonment
T.S.	—	Township	S.Rly.Admn.	—	Southern Railway Administration

2. The alphabets given in brackets like (a), (b) & (c) etc. before town names in Column 2 indicate that they are the constituent towns of the Urban Agglomeration indicated above them.

3. The area figures given in Column 4 for the State and districts represent provisional "Geographical Area" figures supplied by the Surveyor General, India. Figures for urban areas are those supplied by the local bodies. Area figures for rural areas are derived by subtracting the urban area figures from the total area of the district.

NOTE:— 1. The following abbreviations have been used to denote the status of a town,

M.C. —Municipal Corporation
M —Municipality
T.S. —Township
P —Panchayat
Cantt. —Cantonment
S. Rly. Admn. —Southern Railway Administration.

2. The alphabets given in brackets like (a), (b) etc. before town names in Column 2 indicate that they are the constituent towns of the Urban Agglomerations indicated above them.
