

CENSUS OF INDIA 1981

SERIES 18

RAJASTHAN

PART II-B

PRIMARY CENSUS ABSTRACT

I. C. SRIVASTAVA

of the Indian Administrative Service

Director of Census Operations, Rajasthan

PREFACE

The Primary Census Abstract presents a clear population profile of the State as revealed by 1981 Census. The basic information on the characteristics of our population was compiled from Individual Slip and Household Schedule record on full count basis before it was finally tabulated for various territorial units.

In the analytical note, which precedes the statistical tables, an attempt has been made to furnish some background material in the form of definitions and brief analysis. At the end, special abstracts in respect of Scheduled Castes and Scheduled Tribes have also been added. All concerned in the welfare of Scheduled Castes and Scheduled Tribes especially planners at all levels and data-users in various fields will find the special abstracts quite useful and interesting.

Extremely grateful as I am to Shri P. Padmanabha, the Registrar General, India for his sustained support and encouragement throughout our endeavours, I would like to express my sincere thankfulness to Shri V. P. Pandey, Dy. Registrar General, India; Shri K. K. Chakravorty, Dy. Registrar General (C & T) and Shri N. G. Nag, Dy. Registrar General (S.S.) and other colleagues at the Headquarters.

My collegues in the Directorate including Mrs. M. Hooja, Dy. Director (Adm.); Sarvashri S. R. Luhadia, Dy. Director (Technical); R. C. Chandnani, Assistant Director (Adm.); and Shamsher Singh, Assistant Director (S.S.) and finally, of course, the six Regional Deputy Directors and Investigators and their teams comprising the Tabulators, Checkers and Supervisors have all put in labour of love, wages apart, in timely compilation and completion of work at all stages and deserve placing on record my sincere thanks and appreciation of their hard work. In particular, Shri R. C. Bhargava, Assistant Director (Census) and his team of devoted workers who spared no efforts in giving this volume its present shape richly deserve commendation and my gratefulness The members of the staff associated with this volume are mentioned overleaf.

PRIMARY CENSUS ABSTRACT (For Scheduled Tribes)	199

ANALYTICAL NOTE

The basic demographic and economic data in respect of the people of the State collected during 1981 Census which have been compiled in the form of, what is called, 'The Primary Census Abstract' are being presented in this volume. This abstract displaying the data separately for the State, districts and tehsils and within tehsils for each city/town and urban agglomeration generally corresponds to primary census abstract of 1971. This is the basic table produced on a full count basis and furnishes information for the occupied residential houses, households, the total population, the Scheduled Caste and Scheduled Tribe population, literates, workers by broad categories of main workers, marginal workers and non-workers by sex. It, therefore, indicates the basic socio-economic characteristics of the population for the territorial units. The same information at the level of villages in rural areas and wards in urban areas is given in Urban/Village Primary Census Abstracrs which are being included in the series of District Census Handbooks (Part XIII) to be published for each district separately.

Additionally, a Special Primary Census Abstract is also being given separately for Scheduled Caste and Scheduled Tribe population for the State, its districts, tehsils for rural areas and towns alongwith urban agglomerations, if any.

In 1971 Census, the workers were classified under the following nine industrial categories :—

(i) Cultivators
(ii) Agricultural Labourers
(iii) Livestock, Forestry, Fishing, Hunting, Plantations, Orchards and allied activities
(iv) Mining and Quarrying
(v) Manufacturing, Processing, Servicing and Repairing in:—
  (a) Household Industries, and
  (b) Other than Household Industries
(vi) Construction
(vii) Trade and Commerce
(viii) Transport, Storage and Communications, and
(ix) Other Services.

In 1981 Census a departure has been made in the presentation of data from the 1971 Census. In 1981, the main workers have been classified in four broad categories only viz., cultivators, agricultural labourers, engaged in household industries and other workers. The category 'Other Workers' of 1981 Census thus also includes persons who were categorised in 1971 under the following heads:—

(i) Livestock, Forestry, Fishing, Hunting, and Plantation, Orchards and Allied activities.
(ii) Mining and Quarrying
(iii) Manufacturing, Processing, Servicing and Repairs in establishment other than Household Industries
(iv) Construction
(v) Trade and Commerce
(vi) Transport, Storage and Communications
(vii) Other Services.

The criteria for classification of persons as workers have undergone certain changes. While in the 1961 and 1971 Censuses different approaches namely 'usual status' and 'current status' were adopted with the reference period of one year and one week for seasonal and 'regular work' respectively, in the 1981 Census the 'usual status' approach has been adopted uniformly for all types of work. In 1961, a person qualified as a worker if he had worked regularly during the last season or if he had worked at least for a day in regular/non-seasonal work during the preceding fortnight. At the 1971 Census a person was treated as worker only if he spent his time in any economic activity or if he worked at least for a day in regular (non-seasonal) work during the preceding week.

Thus, the dichotomy of worker and non-worker adopted in 1961 and 1971 Censuses is discarded in the 1981 Census and instead a trichotomy viz., main-workers, marginal workers and non-workers is adopted. For main-workers the time criterion of engagement in work for the 'major part' of the year i.e. 183 days is the basis while those who worked for sometime during the last year but not for the 'major part' are treated as marginal workers. Those who had never worked in the preceding year are treated as non-worker. This trichotomy partially permits a comparability of 1981 Census economic data with that of 1971 as well as 1961. Thus the main-workers of 1981 Census are expected to correspond to the workers of 1971 and main-workers and marginal workers of 1981 together with the workers of 1961.

2—605 DCO (Raj)/82

The four categories of main-workers have been defined and analysed below:—

Cultivator : For purposes of Census, a person is accepted as a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation. A person who has given out his/her land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct such cultivation of land will not be treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both will not be treated as cultivator. Cultivation involves ploughing, sowing and harvesting and includes production of cereals and millet crops e.g. wheat, paddy, jowar, bajra etc. and such other crops as sugarcane, ground-nuts etc. but does not include fruit growing, vegetable-growing or nurturing orchards or groves or working of plantations like tea, coffee, rubber etc.

Agricultural Labourer : A person who works in another person's land for wages in money, kind or share is recorded as an agricultural labourer. He or she has no risk in the cultivation but merely works in another person's land for wages. An agricultural labourer has no right of lease or contract of the land on which he/she works.

Household Industry : Household Industry is defined as an industry conducted by the head of the household himself/herself and/or by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The larger proportion of workers in a household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

There may be an industry which is being run by a large joint family of more than 10 persons where power is used, or more than 20 persons where power is not used. In such cases, though only family members are involved, this will not be treated as a household industry. Thus, the meaning of the term 'run on the scale of a registered factory' refers to such cases even if these are not registered as such.

The main criterion of a Household Industry is the participation of one or more members of a household. The criterion applies in urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating within the village limits. In the urban areas where organised industry takes greater prominence, the household industry should be confined to the premises of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home, it will not be considered a household industry. It should be located within the precincts of the house where the members live in the case of urban areas.

A household industry relates to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as a pleader or doctor or barber, musician, dancer, waterman, washerman, astrologer etc., or merely trade or business, even if such professions, trade or services are run at home by members of the household.

As mentioned earlier, a household industry should relate to production, processing, servicing, repairing, or making and selling of goods. However, a household can be engaged in certain other activities collectively but these may not qualify for being considered as household industries. A list of a few typical industries that are generally conducted as household industry is given in Annexure-I.

Other-Workers : All workers, i.e., those who have been engaged in some economic activity during the last one year, who are not cultivators or agricultural labourers or in household industry, are 'Other Workers'. The type of workers that come under this category include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists etc. In effect, all those who work in any field of economic activity other than cultivator, agricultural labourer or household industry, are 'Other Workers'.

Marginal Workers : Marginal workers are those who have worked any time at all in the year preceding the enumeration but have not worked for a major part of this year. In other words those who have worked any time at all in the year preceding the enumeration, but the period for which they have worked is less than 183 days are categorised as marginal workers.

Non-Workers: Non-workers are those who have not worked any time at all in the year

preceding the Enumeration. Thus a person engaged only in household duties such as cooking for one's own household or performing one's own household duties or student attending an institution or a rent receiver, dependants including infants and children not attending school, beggars or inmates of institutions including convicts in jails or inmates of a penal, mental or charitable institutions and all those who may not come under any of the above categories but are looking for work are treated as a non-worker. If the person was also engaged in some economic activity, obviously not to the same extent as a full time worker, such a person is treated as a marginal worker and not as non-worker.

Census House and Households : Columns 5 and 6 of the Primary Census Abstract give the total number of 'occupied residential census houses' and the number of 'households' respectively, which concepts as adopted for 1981 Census Operations are explained and analysed below:—

Building: A building has been defined as generally a single structure on the ground. Sometimes it may be made up of more than one component unit which are used or likely to be used as dwelling (residences) or establishments such as shops, business-houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that a building which have such component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Sometimes a series of different buildings found along a street are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion has been treated as a separate building and given a separate number. On the other hand, one may come across cases, particularly in large cities, of multi-storeyed ownership flats. In these cases, while the structure looks like one building, the flats are owned by different persons. In case of such multi-storeyed structures having a number of flats owned by different persons, the entire structure has been treated as one building and each flat as a separate Census house.

Sometimes in metropolitan cities the local authorities have considered the flats in a block or in large colonies as separate buildings and numbered them accordingly. If the house-numbering system of the local authorities has been adopted as such, each flat has also been treated as a separate building in order to avoid renumbering of these houses.

If within a large enclosed area there are separate structures owned by different persons, each such structure has been treated as one or more separate buildings. Sometimes there may be a number of structures within an enclosed area or compound owned by an undertaking or company or Government which are occupied by their employees. Each such structure is treated as a separate building. If such buildings have a number of flats or blocks which are independent of one another having separate entrance from a common courtyard or staircase and occupied by different households, each such flat or block will be considered as a separate census house.

Usually, a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. For example, a conical roof almost touches the ground and an entrance is also provided and there will not be any wall as such. Such structures have been treated as buildings and census houses, as the case may be.

If there is more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarters, the garage, etc., only one building number has been given for this group and each of the constituent separate structures assigned a sub-number, provided these structures satisfy the definition of a 'Census House' given hereinafter.

Census House : A Census House is a building or part of building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

If a building has a number of flats or blocks which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, they are considered separate census house. If within a large enclosed area, there are separate buildings owned by different persons, then each such building is treated as one or more separate building. One may come across cases where within an enclosed compound there may be separate buildings owned by an undertaking or company or even Government, actually in occupation of different persons. Each such building is to be reckoned as a separate building.

But if in any one of these buildings there be flats in occupation of different households, each flat is treated as a separate Census house.

It is difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, a flat has five rooms, each room having direct entrance to the common staircase or courtyard. By definition this has to be treated as five Census houses. If all these five rooms are occupied by a single household, it is not realistic to treat them as five Census houses. In such a case, singleness of use of these rooms alongwith the main house is considered and the entire flat is treated as one Census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together are treated as one Census house and the remaining rooms as another Census house. But if each room is occupied by an independent household, then each such room is treated as a separate Census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room as it happens almost invariably the entire hostel/hotel building is treated as one Census house. But if such hostel/hotels have out houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel is treated as a separate Census house. In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts located in a compound, whether enclosed or unenclosed is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bathroom, baithak etc. Though each of the huts is a separate structure, they form a single housing unit and, therefore, have to be treated collectively as a single Census house. If some of the huts are used by one household and the others by a second household as residence, the two groups of huts are treated as separate Census houses. However, if there are also other huts in the compound used for other purposes and not as part of the household's residence such as, cattleshed, workshed etc., they are treated as separate Census houses.

In some cases a household uses another structure e.g., a baithak, separated from the main residence by some distance or by other structures or by a road. The separate structure used as baithak has been treated as a separate Census house.

On the other hand, in certain municipal towns and cities every site, whether built upon or not is numbered by the municipal authorities on property basis. Such open sites, even if enclosed by a compound wall, are not listed for census purposes. Only in cases where a structure has a roof, it is treated as Census house, and listed. But in some areas, the very nature of construction of house is such that there is practically no wall and a conical roof almost touches the ground. Such structures are of course treated as buildings and Census houses. Pump houses, temples and other similar structures have also been treated as Census houses because these are places where people can be found living.

Household : A household is group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mixture of both. Such unrelated households may be boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams, etc. These are called 'Institutional Households'. There may be one member households, two-member households or multimember households, for Census purposes, each one of these types is regarded as a 'household'.

If a group of persons who are unrelated to each other live in Census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person is considered a separate household. The important link in finding out whether there is a household or not is a common kitchen.

Procedure of Enumeration of Houseless and Institutional Population :

The enumeration of houseless population was conducted on the night of February 28, 1981, simultaneously in all the Census blocks* of the State to ensure full coverage of homeless population which could be found anywhere. During the enumeration period (February 9—February 28, 1981) the Enumerators were called upon to keep a note of places within the blocks where houseless people were likely to be found, living or staying, for example roadsides, pavements, hume-pipes, platforms, under staircases etc. On the night of February 28 and before the sunrise of 1st March 1981, a quick round of the area was made by all of them to cover and enumerate such houseless households. In some blocks, however, if it was not possible to count the houseless population

*A block : The smallest administrative census unit assigned to one enumerator comprising about 600-750 population in rural areas and 400-600 population in urban areas.

during one night because of the numbers being too large, assistance of other enumerators was also sought. Particular care was taken to see that persons living on the out-skirts and fringes of villages/towns were not left out from the census count or doubly counted.

The Institutional Household population was counted during the enumeration period, alongwith the rest of the population. An institutional household included, among others, convicts in jails, or inmates of a mental or charitable institution, patients in a hospital, boarders in a hostel etc. apart from a group of persons who were living together and sharing a common kitchen.

The following statement shows the number of households per 1,000 census houses and per square kilometre in rural and urban areas as enumerated and found residing in various districts of the State :

NUMBER OF HOUSEHOLDS PER 1,000 CENSUS HOUSES AND THE NUMBER OF HOUSEHOLDS PER Km², 1981

State District	No. of Households per 1000 Census Houses			No. of Households per Km²		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
RAJASTHAN	**1,017**	**1,015**	**1,026**	**17**	**14**	**280**
1. Ganganagar	1,038	1,029	1,073	16	13	675
2. Bikaner	1,033	1,033	1,034	5	3	314
3. Churu	1,035	1,026	1,058	10	7	212
4. Jhunjhunun	1,023	1,021	1,029	31	25	256
5. Alwar	1,004	1,004	1,004	33	29	259
6. Bharatpur	1,007	1,005	1,014	37	30	404
7. Sawai Madhopur	1,004	1,004	1,004	25	21	294
8. Jaipur	1,006	1,007	1,005	40	25	471
9. Sikar	1,044	1,035	1,085	27	22	198
10. Ajmer	1,007	1,005	1,010	30	18	246
11. Tonk	1,010	1,009	1,016	18	15	156
12. Jaisalmer	1,040	1,046	1,005	1	1	49
13. Jodhpur	1,011	1,007	1,019	12	7	526
14. Nagaur	1,024	1,018	1,062	15	13	139
15. Pali	1,026	1,014	1,084	19	16	172
16. Barmer	1,012	1,010	1,033	7	6	270
17. Jalor	1,007	1,006	1,018	15	14	201
18. Sirohi	1,015	1,015	1,014	20	17	405
19. Bhilwara	1,013	1,013	1,017	25	22	151
20. Udaipur	1,017	1,017	1,016	26	23	355
21. Chittaurgarh	1,017	1,016	1,025	23	20	220
22. Dungarpur	1,015	1,015	1,017	32	30	485
23. Banswara	1,017	1,018	1,014	30	28	314
24. Bundi	1,037	1,040	1,026	19	16	133
25. Kota	1,022	1,020	1,024	23	16	300
26. Jhalawar	1,015	1,016	1,014	22	19	291

It would be seen from the above statement that the highest average of 1,044 households per 1,000 Census houses is found in Sikar district while the lowest average of 1,004 households is noticed in Alwar and Sawai Madhopur districts. In the rural areas also, the latter two districts have recorded the lowest average of 1,004 households each while the highest average has been recorded in Jaisalmer district. In the urban areas, on the other hand, Sikar district has recorded the highest average of 1,085 households closely followed by Pali district (1,084) while districts of Alwar and Sawai Madhopur registered the lowest average of 1,004 households per 1,000 Census houses closely followed by Jaipur and Jaisalmer districts, each recording an average of 1,005 households.

However, the highest average of 675 households per square kilometre is recorded in the urban areas of Ganganagar district while in rural areas, Bharatpur and Dungarpur districts have the highest average of 30 households each in each sq. kilometre. Jaisalmer district has the lowest number of households per square kilometre. In the total as well as in its rural areas the average comes to only about one household for every square kilometre of area while in its urban areas, it is about 49 households.

In Rajasthan, an average household consists of 6 members. It is equally applicable to both rural and urban areas of the State. The following statement presents the data regarding the average size of household in the various districts of the State :

AVERAGE SIZE OF HOUSEHOLDS

State/District	Total	Rural	Urban
1	2	3	4
RAJASTHAN	**5·88**	**5·92**	**5·74**
1. Ganganagar	6·14	6·23	5·81
2. Bikaner	6·43	6·43	6·44
3. Churu	6·81	6·79	6·85
4. Jhunjhunun	6·58	6·58	6·55

18. Sirohi	5·19	5·19	5·19
19. Bhilwara	5·04	5·02	5·18
20. Udaipur	5·15	5·14	5·20
21. Chittaurgarh	5·04	5·05	4·95
22. Dungarpur	5·59	5·61	5·29
23. Banswara	5·88	5·94	5·13
24. Bundi	5.49	5·53	5·30
25. Kota	5·49	5·60	5·28
26. Jhalawar	5·77	5·82	5·47

Population of Scheduled Castes and Scheduled Tribes : The Constitution of India embodies certain safeguards for Scheduled Castes and Scheduled Tribes under Articles 341 and 342. At the time of 1981 census operations, each enumerator was furnished with a list of Scheduled Castes and Scheduled Tribes applicable to his State and issued under The Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976) dated the 18th Sept. 1976. He was instructed to record a person as member of Scheduled Caste or Scheduled Tribe only after verifying the name of the caste as returned by the person in the prescribed list. If the person belonging to a Scheduled Caste or Tribe returns his/her caste or tribe by any synonym or generic name of a caste or tribe not mentioned in the list, he/she was not eligible to be entered as belonging to a Scheduled Caste or Tribe.

The Scheduled Castes are recognised only among Hindus and Sikhs while the members of the Scheduled Tribes may belong to any religion. The Scheduled Castes and Scheduled Tribes as listed in the Scheduled Castes and Scheduled Tribes (Amendment) Act, 1976 for the State of Rajasthan are given in Annexure II.

The population figures of Scheduled Castes and Scheduled Tribes and their break-up by sex are given in columns 10 to 15 of the Primary Census Abstract.

There are about 58·4 lakh members of Scheduled Castes and about 41·8 lakh members of Scheduled Tribes in Rajasthan. Above 17 percent of our people belong to Scheduled Castes, while 17·71 percent of the population in the rural areas of the State falls in this category. In urban areas their proportion to total population is 14·54 percent only. The population of the Scheduled Tribes is, however, smaller and only 12·21 percent of the State's population comprises tribal communities. The proportion of the tribal population in rural areas of the State is 14·89% while in urban areas it is only 2·16%. The statement below presents the percentage distribution of members of Scheduled Castes and Scheduled Tribes to their total population in the State and in its various districts by total, rural and urban areas:

PERCENTAGE DISTRIBUTION OF AND SCHEDULED TRIBES IN RURAL AND OF SCHEDULED CASTES AND

State/District	Percentage of Scheduled Castes								
	Total			Rural			Urban

It would be seen from the above statement that a little more than 82 percent of the total population of the Scheduled Castes resides in rural areas while only about 18 percent are found living in urban areas of the State. At the district level Jalor district has the highest proportion (92·39%) of Scheduled Castes living in rural areas while the lowest proportion of 54·90% has been recorded in Ajmer district.

Among the members of the Scheduled Tribes, more than 96 percent of their total population still resides in rural areas of the State while only about 4 percent are urban dwellers. At the district level Banswara has the highest proportion (99·06%) of Scheduled Tribes living in rural areas while the lowest proportion of 30·61% has been recorded in Bikaner district.

If we look at the dispersal of Scheduled Caste population at the district level, we notice that the percentage strength of the Scheduled Castes to total population is the highest (29·05%) in Ganganagar district. Thirteen districts namely Bikaner, Churu, Alwar, Bharatpur, Sawai Madhopur, Ajmer, Tonk, Nagaur, Pali, Sirohi, Bundi, Kota and Jhalawar have a higher proportion of Scheduled Castes than the State average of 17·04 percent. Twelve districts, however, have lower proportion ranging from as low as 4·51 percent of Dungarpur and 4·72 percent of Banswara, to 17·01 percent of Jalor and Bhilwara districts. In terms of absolute population, the highest contribution to total population of the Scheduled Castes in Rajasthan is made by district Ganganagar. Districts of Jaipur, Bharatpur, Alwar, Sawai Madhopur, Nagaur, Kota and Ajmer, however, also contribute substantially. Indeed these eight districts together make up more than half of the total population of the Scheduled Castes in the State. The tribal districts of Dungarpur and Banswara and the desert district of Jodhpur, not surprisingly, have less than one percent of the total Scheduled Caste population of the State.

Among Scheduled Tribes, the highest concentration is noticeable in Banswara and Dungarpur districts where their proportions to total population of the district come to 72·63 and 64·44 percent respectively. The other districts with higher proportions are Udaipur (34·33%), Sirohi (23·11%), Sawai Madhopur (22·67%), Bundi (20·11%), Chittaurgarh (18·16%) and Kota (14·83%).

Looking at the dispersal of tribal population of the State in various districts in terms of absolute population we observe the highest proportion of 19·34% of the total tribal population residing in Udaipur district followed by 15·40% in Banswara, 10·52% in Dungarpur, 9·09% in Jaipur and 8·32% in Sawai Madhopur districts. As a matter of fact, these five tribal districts together have more than sixty percent of the State's tribal population. The remaining districts have low, rather very low proportions. The districts with less than one percent of the total State's tribal population are Ganganagar, Bikaner, Churu, Jhunjhunun, Sikar, Ajmer, Jaisalmer, Jodhpur and Nagaur.

The following statement gives districtwise percentage of Scheduled Castes and Scheduled Tribes, together and separately to total population. Besides, it also presents the percentage distribution of members of Scheduled Castes and Scheduled Tribes at the State and district levels:

PERCENTAGE DISTRIBUTION OF TOTAL POPULATION OF MEMBERS OF SCHEDULED CASTES AND SCHEDULED TRIBES IN STATE/DISTRICT, 1981

State/District	Percentage of Scheduled Castes and Scheduled Tribes to total population of State/district	Percentage of Scheduled Castes to total population of State/district	Percentage of Scheduled Tribes to total population of State/district	Distribution of 100 members of Scheduled Castes among districts	Distribution of 100 members of Scheduled Tribes among districts

It is evident from the statement that the Scheduled Castes and Scheduled Tribes taken together constitute 29·25 percent of the total population of the State. While 32·60 percent of the population living in the rural areas of the State constitutes this combined category of Scheduled Castes and Scheduled Tribes, only 16·70 percent of the urban population falls into this category.

At the district level, the combined proportion of Scheduled Castes and Scheduled Tribes to the total population is the highest in Banswara district (77·35%) followed by Dungarpur (68·95%). This is equally true in case of rural areas wherein Banswara district comes up with the highest proportion (81·34%) followed by Dungarpur (72·04%). However, in the total areas of the State, Sikar district has recorded the lowest proportion (16·40%). If the two categories are taken together, in rural areas Jhunjhunun district ranks last with its proportionate strength of 17·19%. In urban areas of the State, Sirohi district has the highest proportion of 25·91 percent while the lowest proportion has been registered in Bikaner district (11·24%).

Literates and Educated Persons : Literacy is one of the most important demographic characteristics of the population revealed in Census. A person who can read and write with understanding in any language is considered literate for purposes of Census. A person who can merely read (but can not write), is not treated as literate. It is not necessary that a literate person should have attained any minimum educational standard. However, all children of the age of 4 years or less are treated as illiterate even if many among them may be going to school and may have picked up reading and writing a few odd words.

Literacy data by sex are given in columns 16 to 18 of the Primary Census Abstract. The literacy rates presented in this volume are based on population including the children in age group 0-4 for the purpose of present calculations. Thus the effective literacy rate will slightly go up when the break-up of this age-group becomes available for exclusion for purposes of calculating effective literacy rates.

The broad stratum of literates in Rajasthan forms 24·38 percent of the total population as ascertained during 1981 Census. While 48·35% among the urban people know how to read and write, only 17·99% of the rural population had this attainment. There is a marked difference in the literacy rates as between the two sexes. Female literacy rates are falling behind male literacy rates in all parts of the State. Male literacy level in the State is 36·30%. While it is 29·65% in case of rural areas, the literacy among urban males population is fortunately 60·55%. On the contrary, female literacy rate in the State comes to only 11·42% and it is depressingly low 5·46% in case of rural areas. It is comparatively much better with 34·45% female literates in urban areas of the State. The statement below presents the literacy rates by sex and by total, rural and urban areas of various districts:

LITERACY RATES IN 1981

(The Percentages have been calculated on the Total Population inclusive of the Population in Age-group 0-4)

26. Jhalawar	22·11	34·01	9·27	18·11	29·88	5·44	52·47	64·88	38·70

Among the districts, the literacy levels for the total areas vary from 12·29% in Barmer district to 35·30% in Ajmer district. Ten districts have the literacy rates higher than the State average of 24·38%. As for the male population, Ajmer comes on top with 47·65% male literates followed by Kota 45·96% and Jhunjhunun 45·07%. However, the lowest literacy rate is brought out in Barmer district at 20·04%. Ajmer district also leads in female literacy with 21·92% followed by Bikaner with 17·57%. The lowest female literacy rate is observed again in Barmer district.

In rural areas, the range of literacy variation among different districts swings from 9·33% in Barmer district to 25·76% in Jhunjhunun district. In case of rural males, the highest literacy rate of 42·49% is registered in Jhunjhunun district and the lowest in Barmer district with 16·22%. In case of rural females, however, the highest literacy rate of 8·78% was recorded in Ganganagar district and only 1·57%, the lowest in the desert district of Jaisalmer.

In case of urban areas, the literacy rate ranges from 59·29% in Banswara district to 35·78% in Nagaur district. Banswara district has had the privilege of recording the highest literacy rate in both sexes of its population with 69·02% for males and 48·22% for females. The lowest male and female literacy rates in urban areas are recorded in Nagaur district.

In the cities having one lac population and above the highest literacy rate 62·41% has been recorded in Udaipur city closely followed by Ajmer city 60·47%. As between the two sexes, Udaipur again tops the list having recorded 72·33% literacy rate among the males and 50·80% among females. Sikar, which was a town earlier has, as a city, now recorded the lowest literacy rate for both the sexes. The statement below presents the literacy rates for all the cities of the State separately for males and females:

LITERACY IN CITIES

Cities	Persons	Males	Females
Jaipur . . .	54·64	64·53	43·14
Jodhpur . . .	51·90	62·26	40·01
Ajmer . . .	60·47	70·63	49·17

Bhilwara . . .	48·03	60·66	33·80
Bharatpur . .	51·14	61·88	38·26
Sikar . . .	39·09	53·21	23·65

Classification of workers by Industrial categories: Among working population of the State, the main workers i.e. the real work force constitute 30·48 percent while the marginal workers only 6·13 percent of the total population. Between the two streams of workers and non-workers a little over 63·00 percent of the population of the State consists of non-workers. However, the male main workers constitute 49·92 percent of the total male population of the State and luckily, out-number male non-workers 49·10 percent. Surprisingly, the male marginal workers constitute even less than one percent (0·98 percent) of the total population. Women have yet to catch up with the economic activities. Out of the total female population, about 9·32 percent are recorded as main workers and only 11·74 percent as marginal workers while the rest 78·94 percent are non-workers. The statement below presents the percentage distribution of population of each sex into main-workers, marginal workers and non-workers at State and district levels. Main workers are further classified into four broad industrial categories for the purposes of 1981 Census:

PERCENTAGE DISTRIBUTION OF POPULATION OF EACH SEX INTO WORKERS, MARGINAL WORKERS AND NON-WORKERS IN STATE/DISTRICT IN 1981 (MAIN WORKERS BEING FURTHER DISTRIBUTED BY BROAD INDUSTRIAL CATEGORIES OF 1981 CENSUS)

State/District	Sex	Total Population	Total Workers	Total Main Workers	Main Workers				Marginal workers	Non-workers

At the district level, the largest concentration of main workers is seen in Bhilwara (38·50%) and the lowest in Sikar district (246·2%). Similarly, the highest percentage of marginal workers is found in Dungarpur district (17·24%) and the lowest in Ajmer district (2·95%). Sikar district has the highest proportion of non-workers to total population while Chittaurgarh has its lowest share in this regard. The highest concentration of main workers amongst females is revealed in Bhilwara district (18·87%) and the lowest in Bharatpur district (2·72%). As regards marginal workers amongst females, the highest proportion is observed in the tribal districts of Dungarpur (31.12%) followed by Banswara (26·78%) where tribals are generally found dependent on forest produce and shifting cultivation or labour. Ajmer district has the minimum share of 5·55% of female marginal workers. The maximum number (89·99%) of non-workers among female population is found in Ganganagar district while Dungarpur district (61·85%) has their smallest component.

The above statement also brings out the proportion of workers engaged in agriculture and other economic activities, to total population. It would be seen that about 18·77% of the total population of the State is engaged in cultivation and another 2·23 percent in agricultural labour. Of the total population only 1 percent are engaged in household industries and the remaining 8·48 percent have been found engaged in other productive and economic activities, viz. livestock, forestry, fishing and plantation, orchards and allied activities, mining and quarrying, manufacturing, processing, servicing and repairs besides construction, trade and commerce, transport, storage, communications and other services. Among the male working population, the percentages of workers to total population in different categories are cultivators (30·30%), agricultural labourers (2·94%), household industries (1·66%) and other economic activities (15·02%). In case of female workers, 6·22 percent of the total female population is occupied in cultivation, 1·46 percent in agricultural labour and 1·38 percent in other services. It is rather depressing to observe that only 0·26 percent females are found engaged in household industries.

The distribution of population among main workers and its four broad categories on the one hand and marginal workers and non-workers on the other is presented in the statement below. In order to make the picture more clear the proportions of these categories have been calculated by assuming as 1,000 all the units of presentation i.e. persons, male and female population separately for both urban and rural areas:

DISTRIBUTION OF 1,000 PERSONS, MALES AND FEMALES OF TOTAL, RURAL AND URBAN AREAS AMONG MAIN

ANNEXURE—I

LIST OF HOUSEHOLD INDUSTRIES

Typical industries that can be conducted on a household industry basis are given below :

Foodstuffs : Production of flour by village chakkis or flour mills; milling or dehusking of paddy; grinding of chillies, turmeric, etc.; production of gur, khandsari, boora, etc.; production of pickles, chutney, jams, etc.; processing of cashewnuts; making of dried vegetables; manufacture of sweetmeats and bakery products; production of butter, ghee, etc.; slaughtering and preservation of meat and fish; fish curing etc.; oil pressing ghani.

Beverages : Manufacture of country liquor, toddy, production of soda water, ice, ice cream, sharbats, etc.; processing of coffee, etc.

Tobacco Products : Manufacture of bidi, cigars, cherroots, tobacco, snuff, etc.

Textile Cotton : Cotton ginning, carding, pressing and baling, spinning, etc.; dyeing and bleaching of cloth; weaving in handlooms or powerlooms or manufacture of khadi; cloth printing; making of fishing nets, mosquito nets, cotton thread, rope, twine, etc.

Textile Jute, Wool or Silk : Similar type of production or processing as mentioned under Textile Cotton but pertaining to the material concerned.

Textile Miscellaneous : Making of durries, carpets, hosiery, embroidery work; lace garland making; manufacture of chrochet headgear; making of newar, bed covers (curtains, pillow, pillowcases, etc.); making of mattress, quilt (rezai), etc.; making of namda felt, coconut fibre for upholstery; making of brushes, brooms, etc., from coconut fibres; coir spinning; manufacture and repair of umbrellas; manufacture of dolls and toys (rags and cotton), etc.

Manufacture of Wood and Wood Products : Sawing and planing of wood, manufacture of wooden furniture, structural goods like beams, door and window frames, etc., wooden agricultural implements and their repair, wooden lacquerware, wooden toys, wood carving, sawdust and plaster figure making, inlay work, match splinters, plywood and veneers, etc.; baskets and broomsticks, caning of chairs, making of chicks and khas khas tatties, making of cart wheels, wooden sandals, etc., making palm leaf mats, fans, umbrellas, etc.

Paper and Paper Products : Manufacture of pulp and paper by hand; making of envelopes, paper made articles, card board boxes, paper kites, toys, paper flowers, etc.

Printing and Publishing : Printing works, lithography, block-making, book binding etc.

Leather and Leather Products : Flaying and processing of hides and skins; making leather footwear, wearing apparel of leather and fur; repair of shoes or other leather products.

Rubber, Petroleum and Coal Products : Vulcanising tyres and tubes; manufacture of chappals from torn tyres and other rubber footwear; manufacture of rubber products from natural and synthetic rubber.

Chemicals and Chemical Products : Manufacture of toys, paints, colours, etc.; manufacture of ayurvedic medicines, soap, plastic products, celluloid goods, manufacture of ink, candles, boot polish, etc.; manufacture of matches, fireworks, perfumes, cosmetics, etc.

Non-metallic Mineral Products—other than Petroleum and Coal : Making of bricks, roofing tiles, sanitary fittings, cement status, stone or marble carvings, manufacture of stone structurals, stone dressing and stone crushing, mica-splitting and manufacture of other mica products; making of earthenware and pottery, crockery, glass beads and bangles, earthen toys; manufacture of glass products etc.

Basic Metals and their Products except Machinery and Transport Equipment : Manufacture of iron arms and weapons and their service and repair, iron and steel furniture, brass, bell-metal utensils, aluminium utensils, tin utensils, copper utensils, etc.; nickeling and electroplating, blacksmithy manufacture and repair of agricultural implements such as ploughshare, etc.; making and repairing of locks and trunks, cutlery; manufacture of scales, weights and measures and foundry industry etc.

Machinery (all kinds other than Transport) and Electrical Equipment : Manufacture of small machine tools and parts; repairing and servicing of fans, Radios, domestic electrical appliances etc.

Transport Equipment : Repairing and servicing of automobiles; manufacture of cycle parts, rickshaw parts, boats and barges; manufacture of animal-drawn and hand-drawn vehicles such as bullock carts, wheel barrow etc.

Miscellaneous Manufacturing Industries ; Repair, of spectacles, photographic equipment; goldsmithy, silver filigree industry; gold covering work, bidriware; repair of musical instruments, fountain pens; making of cowdung cakes, manufacture of sports goods; repairing of petromax lights; making of buttons and beads from conchshell and horn goods.

STATE AND DISTRICT
PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

FLY-LEAF

The Primary Census Abstract, containing the main characteristics of the population includes area in square kilometres, the number of occupied residential houses, households, the total population (including institutional and houseless population), population of Scheduled Castes and Scheduled Tribes, literate and educated persons, main workers, marginal workers and non-workers. The main workers are further classified into four broad categories viz. cultivators, agricultural labourers, workers in household industries and other workers. Figures for each characteristic are classified by sex for total, rural and urban areas. The data are presented for the State, district, tehsils and towns including the urban agglomerations, if any.

The information regarding presentation of area figures is taken from two sources. The figures for the total area of the district have been taken from the department of Survey of India. The actual urban area for a district has been deducted from the figures supplied by Surveyor General of India for the district as a whole in order to give the rural area at the district level. The area for urban units have, of course, been collected from the municipalities. At the tehsil level, however, the total area has been arrived at by adding the actual urban and rural areas, the latter having been obtained by totalling up the areas of all its constituent villages. Thus while the urban area figures of the tehsils will add up to the urban component at the district level, the same is not true for rural area inasmuch as the tehsil level rural area figures will not add up to the rural areas as reported at the district level. At the district level, the total area has been given in sq. km. upto one place of decimal but upto two places of decimal in case of urban centres and in case of rural areas upto one decimal place only.

Moreover, the Primary Census Abstract has been compiled separately for Scheduled Castes and Scheduled Tribes though not separately for each caste or tribe. These two Special Primary Census Abstracts are also being published in this volume up to State, district, tehsil and town levels.

The following abbreviations have been used for the civic status of the urban units:

UA—Urban Agglomeration

OG—Outgrowth

M—Municipality

CT—Census Town

NAC—Notified Area Committee

CB—Cantonment Board.

NOTE : 1. The following abbreviations stand for :

U.A. = Urban Agglomeration
O.G. = Outgrowth
M = Municipality
C.T. = Census Town
N.A.C. = Notified Area Committee
C.B. = Cantonment Board

2. Towns treated as such for the first time in 1971 Census and continuing as such in 1981 bear an asterisk (*) on their left.

3. Towns treated as such for the first time in 1981 Census are printed in italics.

4. District 'Total' of area figures represent "Geographical Area" supplied by the Surveyor General. Figures for Urban area are those supplied by the Local Bodies. Area figures for Rural area are derived by substracting the Urban area from the total area of the district. The total of the area figures of the tehsils will not tally with the district figures because the former represent land use area and are derived from the figures supplied by the Director of Land Records.
