# FOREWORD

After completion of enumeration, the next important task was the processing of various schedules in the quickest possible time. In a vast State like ours, processing of nearly 111 million individual slips and 20 million household schedules was a tremendous task. The first stage of manual processing was therefore distributed over 14 Regional Tabulation Offices (Garhwal, Meerut, Moradabad, Bareilly, Kumaon, Agra, Allahabad, Varanasi, Gorakhpur, Faizabad I & II, Lucknow, Jhansi and Kanpur). The first 13 Regional Tabulation Offices worked on the districts of their jurisdiction except the urban areas of districts in which the five KAVAL cities fall. The work of urban units of these five districts (viz. Kanpur, Allahabad, Varanasi, Agra and Lucknow) was entrusted to the Kanpur Regional Tabulation Office. In these R.T.Os. the individual slips and household schedules were scrutinised, edited and basic figures compiled in the form of Primary Census Abstracts (P.C.As.) upto the village level in case of rural areas and wards in case of urban areas. The P.C.A. comprises basic information about the area, number of occupied census houses, households, total population (including institutional and houseless), number of persons belonging to scheduled castes and scheduled tribes separately, literates, main workers by four categories (Cultivators, Agricultural labourers, at Household industry, other workers), marginal workers and non-workers. The Regional Tabulation Offices which had started working right from April, 1981 completed this work by March, 1982 except Varanasi R.T.O. which had to work till June, 1982.

On receipt of the records and tabulations from these R.T.Os., the P.C.As. general and for scheduled castes and scheduled tribes population separately were finalised. This volume (Part II-B) presents the FINAL Primary Census Abstract, Figures superseding the PROVISIONAL figures brought out earlier through Paper-1 of 1981 (Supplement), upto the charge level. A General Note and Fly-Leaf to P.C.As. and five maps showing the different demographic characteristics and administrative units are also included. The detailed P.C.As. upto village and ward level are being published in the District Census Handbooks of each district separately.

I owe a deep gratitude to Shri P. Padmanabha, Registrar General-*cum*-Census Commissioner, India for the most valuable guidance and inspiration.

My thanks are also due to Shri V. P. Pandey, Dy. Registrar General and Shri K.K. Chakravorty, Dy. Registrar General (C & T) for necessary help in all matters. Thanks are also due to the Central Tabulation Unit of

the office of the Registrar General, India for clearing the P.C.As. with utmost expedition.

I would also like to place on record my appreciation of the Regional Dy. Directors for the stupendous task completed by them in record time. I am also thankful to Sri Lal Krishan, Dy. Director under whom Sri N. C. Sinha, Assistant Director of Census Operations got them checked in the Planning and Co-ordination unit of my office and Shri M. C. Padalia, Assistant Director drafted the General note and Fly-leaf and Shri R. P. Singh, Research Officer (Map) prepared the maps included herein. S/Shri Ram Sahai, Ram Surat, Acchhu Ali, Mohan Pande, Mahatma Prasad, D. D. Sharma, Investigators and Tabulation Officers and the staff under them, who took considerable pain in finalising the P.C.As. most expeditiously and the efforts of the Printing Unit of my office headed by Shri R. K. Saxena, Serior Technical Assistant (Printing) also deserve appreciation.

PART II—B PRIMARY CENSUS ABSTRACT

# General Note

## INTRODUCTORY

1. This volume contains the Primary Census Abstract which is the basic table prepared on a full count basis. It is being presented in six parts.

| | | |
|---|---|---|
| (1) | State Primary Census Abstract | General Population |
| (2) | District Primary Census Abstract | |
| (3) | State Primary Census Abstract | Scheduled Castes only |
| (4) | District Primary Census Abstract | |
| (5) | State Primary Census Abstract | Scheduled Tribes only |
| (6) | District Primary Census Abstract | |

The State Primary Census Abstract (previously Union P. C. A.) contains figures of the state and districts with rural and urban break-ups and the District Primary Census Abstracts (previously State P. C. A ) figures down to tahsil and individual town. The P. C. A. summarises by administrative units the basic socio-economic characteristics of population and other details viz. area, occupied residential houses, households, total population, scheduled castes, scheduled tribes, literates, main workers classified by four broad categories i. e. cultivators, agricultural labourers, household industry and other workers, marginal workers and non-workers. The figures of population under different characteristics are given for persons, males and females separately. The District Primary Census Abstract for scheduled castes contains number of households, literates, main workers classified by four broad categories marginal workers and non-workers and corresponds to Table C-VIII Part A—Scheduled Castes and Scheduled Tribes—Classification by literacy and industrial categories of workers and non-workers according to main activity among scheduled castes of 1971 Census. The District Primary Census Abstract for scheduled tribes contains similar details in respect of scheduled tribe population and corresponds to Table C-VIII Part B of 1971 Census. It is only for the facility of the readers, that the Primary Census Abstracts for general, scheduled caste and scheduled tribe population are being given together in this volume, the Primary Census Abstracts for scheduled castes and scheduled tribes have already been brought out earlier as Paper 2 of 1982.

2. Before analysing the data, it will be useful to explain in brief the method of compiling the Primary Census Abstract and collection of area figures, concepts and definitions of various characteristics for which data are being presented in it. The basic changes since 1971 Census have also been mentioned where necessary.

## COMPILATION OF PRIMARY CENSUS ABSTRACT

3. In the past few censuses all manual tabulations were produced by sorting the individual slips. The 1981 Census made a major departure in the method of manual processing in that the individual slip pads as well as the household schedule books were not broken and kept intact. This was made possible by aggregation of information in the first instance from

individual slips in the population record (Part II of household schedule), and thereafter a block compilation sheet was prepared in respect of every block for aggregating household figure. Then the figures of each block were copied out in the blockwise master P. C. A., wherein totals of every village in case of rural area and for each ward for urban areas were struck. Thereafter, rural P. C. A. was prepared separately giving figures of tahsils, development blocks, nyaya Panchayats and villages arranged in order of location code. Similarly, in the urban P. C. A., prepared separately for each town, wardwise figures were given. With the help of village/townwise P.C.As., the district/state P.C.As. were prepared and presented in this volume as well as A-series tables were generated.

## RURAL AND URBAN CLASSIFICATION

4. Although the definition and criterion for rural and urban area has been discussed in volume Part II A—General Population Tables, yet it will be desirable to reproduce the definition here also for the facility of the readers.

5. Census data have always been presented for rural and urban areas separately. The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise several hamlets but the entire village has been treated as one unit for presentation of data. In unsurveyed villages within forest areas, each habitation area with thought, locally recognised boundaries within each forest range officers beat was treated as one unit.

6. Any clear-cut distinction between rural and urban has yet not been possible anywhere, far less to have a uniform definition for all countries. After giving considerable the following criteria were adopted, for treating a place as urban for the 1981 Census :—

(a) All statutory towns, *i. e.,* all places with a municipal corporation, municipal board, cantonment board or notified town area.

(b) All other places which satisfy the following criteria—

(i) A minimum population of 5,000

(ii) 75 percent of the male working population engaged in non-agricultural (and allied) activity, and

(iii) A density of population of atleast 400 per sq. km. (or 1,000 per sq. mile)

A town with a population of one hundred thousand and above was treated as a city.

7. The urban criterion of 1981 varies slightly from that of 1961 and 1971 in that the workers in occupations of fishing, livestock, hunting, logging, plantations and orchards etc. (falling in industrial category III) were treated as non-agricultural activities, whereas in the 1981 census these activities are treated on par with cultivation and agricultural labourer.

## URBAN AGGLOMERATION

8. The concept of urban agglomeration (U. A.) adopted for the 1971 Census continued for the 1981 Census. Very often large railway colonies, university campuses, port areas, military camps etc., come up outside the statutory limits of the city or town but adjoining it. Such areas may not by themselves qualify to be treated as towns but if they form a continuous spread with the adjoining town, it would only be realistic to treat them as urban. Such settle-

ments have been termed as outgrowths (O. G.), and may cover a whole village, or part of a village. Two or more towns may also be contiguous to each other. Such towns together with their outgrowths have been treated as one urban unit and called 'urban agglomeration.' An urban agglomeration, therefore, constitutes :—

(a) A city or town with contiguous outgrowth(s) the outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages; or

(b) two or more adjoining towns with their outgrowth (s); or

(c) a city with one or more adjoining towns with their outgrowths all of which form a continuous spread.

## COLLECTION OF AREA FIGURES

9. Column 4 of the Primary Census Abstract gives the area figures of each territorial unit. Total areas figures of state and districts are supplied by the Surveyor General. Figures for urban areas are those supplied by the Director, Local Bodies. The total area figures for tahsils are supplied by the Director of Land Records, U. P. (Board of Revenue). Area figures for rural areas are derived by subtracting the urban area from the total area of the district and tahsil. The area figures totalled over all the tahsils in a district, sometimes do not tally with the district figures. The discrepancy generally arises because reserved forest does not form part of land record figures. Forest authorities on the other hand kept their figures by forest ranges and forest divisons and have not allocated such areas to tahsil and development blocks.

## CENSUS HOUSES AND HOUSEHOLDS

10. Columns 5 and 6 of the Primary Census Abstract gives the figures of occupied residential houses and households respectively for each territorial unit. The concepts of census house and household have been defined in Part II—A General Population Tables. However, to facilitate readers the definition of building, census house and household is also being given under :—

## BUILDING

11. "A building is a readily distinguishable structure or group of structures which is taken as a unit of house numbering. A building is generally a single structure on the ground. Sometimes it is made up of more than one component units which are used or likely to be used as dwelling (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc".

## CENSUS HOUSE

12. "A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purposes or both".

## OCCUPIED RESIDENTIAL HOUSE

13. The information pertaining to the number of occupied residential houses was taken from Part B of section 1 of the Abridged Houselist. This part was filled up after counting the entries relating to residential houses in column 3 (census house no.) of both sections 2 and 3 of the Abridged Houselist. A census house entered in column 3 was counted as an occupied residential house if there was a corresponding entry of either wholly residential or partly residential in column 4 of the Abridged Houselist. The number of occupied residential houses was also entered in the Enumerator's Abstract from the Abridged Houselist. A specimen each of the Abridged Houselist Household Schedule and Individual Slip is given at annexure I.

## HOUSEHOLD

14. "A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, ashrams, etc. These are called 'Institutional Households'. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'."

15. The enumeration of population residing in institutional households was done by the enumerator alongwith the normal households of the block. In case of institutional households, the warden or the manager or the superintendent, who had administrative responsibility or who, by common consent is regarded as the head of the household was recorded the head of the household.

16. As in previous censuses, the enumeration of houseless was to be done in the night of February 28 and March 1, 1981. At the time of houselisting, the enumerators were required to indicate location of houseless households in the remarks column of the houselist. During the period of enumeration itself the charge officers were required to make a note of the locations of houseless population by 25th February and make necessary arrangements for patromaxes, police escorts, extra enumerators where necessary etc. for their enumeration during the night fixed for the purpose. The State Government was kind enough to issue orders for the suspension of night cinemas shows on 28th of February.

## SCHEDULED CASTES AND SCHEDULED TRIBES

17. Columns 10, 11 and 12 of the Primary Census Abstract give the figures of the scheduled caste population and columns 13, 14, 15 that of the scheduled tribe population.

18. Article 341 and 342 of the constitution lay down that for certain purposes the President can schedule a number of castes and tribes respectively for specified areas of the country. At the 1981 census the following were treated as scheduled castes and scheduled tribes in Uttar Pradesh in accordance with "the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act, 1976 (No. 108 of 1976, dated the 18th September 1976) and the constitution (Scheduled Tribes) (Uttar Pradesh) Order, 1967, C. O., 78".

### List of Scheduled Tribes

1. BHOTIA
2. BUKSA
3. JAUNSARI
4. RAJI
5. THARU

19. Each enumerator was supplied a list of scheduled castes and scheduled tribes applicable to Uttar Pradesh. The enumerators were specifically instructed to record an individual belonging to scheduled caste or scheduled tribe only when the name of scheduled caste or scheduled tribe returned by him/her found a place in the list. If a person denied to belonging to a scheduled caste or tribe but returned caste or tribe not mentioned in the list, he was not to be recorded as scheduled caste or tribe. Instructions were issued to District Census Officers to find out prevalent synonymous names for various scheduled castes and tribes and supply the same to enumerators with the instructions that where such synonyms were returned, the respondant be cross questioned to ascertain whether he belonged to a relevant notified caste or tribe. However, at the time of tabulation if instead of a name of scheduled caste or scheduled tribe as mentioned in the list, Harijan/Achhut or Adivasi/Girijan was recorded against question 9 of the individual slip such persons were treated as scheduled caste or scheduled tribes respectively.

## LITERATES AND EDUCATED PERSONS

20. The population of literates and educated persons has been given in columns 16, 17 and 18 of the Primary Census Abstract.

21. According to instructions to enumerators for filling up the individual slip, literacy for the 1981 Census was defined as "A persons who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but can not write, is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. If there is any doubt about a person's ability to read or write, the test may be applied for reading is his/her ability to read any portion of the printed matter in the Enumerator's Instruction Booklet (provided the person is familiar with the language used in the booklet) and similarly, for writing, he/she should be able to write a simple letter. Ability merely to sign one's name is not adequate to qualify a person as being able to write with understanding. If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondants word has to be taken as correct. Other members of the household may also be able to testify to the literacy of the person enumerated".

22. All childern aged 4 years or less were treated as illiterate even if they were going to school and had picked up reading and writing a few odd words.

23. The test for education was that the persons should have passed a recognised written examination as a proof of an educational level attained. The highest educational level attained by the person enumerated was taken as level for education.

24. At the 1981 Census, information on economic activity was collected through questions 14 A to 16 of the individual slip reproduced below:—

14 A. worked any time at all last year ? $\frac{\text{Yes}}{\text{No (H/ST/D/R/B/I/O)}}$

14 B. If yes in 14 A, did you work for major part of last year ?
Yes (1)/No (2)

15 A. Main activity last year ? $\frac{\text{Yes in 14 B (C/AL/HHI/OW)}}{\text{No in 14 B (H/ST/D/R/B/I/O)}}$

15 B. 14 B Yes–Any other work any time last year ?
Yes (C/AL/HHI/OW)
14 B No–Work done any time last year ?
(C/AL/HHI/OW)

16 If No in 14 A or 14 B seeking/ available for work ?
Yes (1) /No (2)

It will be appreciated that this run of questions made the collection of information easier and should have added to the quality of data. At the 1981 Census, instead of a dichotomy of workers and non-workers, a trichotomy of main (full time) workers, marginal workers and non-workers was adopted. The 'work' concept of 1961 and 1971 Censuses, as opposed to the 'income' or 'economic independence' concept of the earlier censuses, was continued. But the criterion for classification of persons as workers was changed. At the 1961 Census, a person qualified as worker if he or she had worked regularly during the last season or if he or she had worked at least a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 Census, a person was treated as worker only if he spent his time mainly in work or if he worked atleast a day in regular (non-seasonal) work during the preceding week. In 1981 Census, for main workers, a time criterion of engagement in work for major part of preceding year i. e., atleast six months or 183 days, was adopted. Those who worked for some time during the preceding year but not for the major part, were treated as marginal workers.

25. The population of main workers, marginal workers and non-workers have been given in columns 19 to 39 of the Primary Census Abstract. It also gives the figures of four broad categories of main workers, e. g., cultivators, agricultural labourers, household industry and other workers. Main workers marginal workers and non-workers were derived in the following manner :—

(a) **Main Workers**

The main workers are those who were engaged in work for major part of preceding year i. e., atleast six months or 183 days. In other words, for whom the answer was 'yes' both in Question 14 A and Question 14 B were treated as main workers.

(b) **Marginal Workers**

The marginal workers are those who have worked any time at all during the preceding year but for less than six months or 183 days. In other words, marginal workers would be those for whom the entry in Question 14 A was 'yes' and the entry in Question 14 B 'No (2)' in the individual slip.

(c) **Non-workers**

The non-workers are those who have not worked any time at all during the preceding year. In other words, non-workers would be those for whom the answer against Question 14 A of the individual slip was recorded as 'No'.

26. The three categories of main workers, marginal workers and non-workers are self exclusive. If we add the figures of main workers, marginal workers and non-workers, we get the total population of the territorial unit concerned.

27. Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

28. For all the economic questions, the reference period was the year preceding the date of enumeration. Certain types of work such as agriculture and household industry are carried on either throughout the year or only during certain seasons or parts of the year depending on local circumstances. In such cases, the reference period had been the broad time span of the agricultural seasons preceding the enumeration.

29. The main workers have been classified into four broad categories, viz. I Cultivators, II—Agricultural Labourers, III—Household Industry and IV—Other workers, as mentined earlier. Theses broad categories are defined below :—

**Cultivators**

For purpose of the Census a person is working as Cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

**Agricultural Labourer**

A person who works in another persons land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation and has no right of lease or contract on land on which he/she works.

However, one was classified as a cultivator or agricultural labourer, only when he was engaged in the growing of the following crops :—

(i) Cereals and millet crops
(ii) Pulses
(iii) Fibre-crops, raw cotton, jute, mesta, sunhemp, and kindred fibre crops.
(iv) Oil seeds
(v) Cash crops; sugar cane

The growing of plantations, orchards, flowers, vegetables, medicinal, spices crops etc. was not considered as Cultivation.

**Household Industry**

Household Industry is defined as an industry conducted by the head of the household himself/herself and/or by the members of the household at home or within the village in the case of rural areas and only within the precincts of the house in which the household lives in the case of urban areas. The workers in a household industry should largely consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act. Lastly, a household industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. List of industries which are conducted on household industry basis are given in annexure II.

**Other Workers**

All other workers, i. e., those who have been engaged in some economic activity during the last one year, but are not cultivators or agricultural labourers or in household industry, are 'other workers.

30. There is a basic difference in the presentation of information for industrial categories of workers in the Primary Census Abstracts of 1971 and 1981. While at the 1971 Census, figures for industrial categories of workers under categories I—Cultivators, II—Agricultural Labourers, III—Mining and Quarrying, IV—Livestock, Hunting, Orchards etc., V (a)—Household Industry, V (b)—Manufacturing other than Household Industry, VI—Construction, VII—Trade and Commerce. VIII—Transport, Storage and Communications and IX—Other Services were given separately, at the 1981 Census due to change in the method of manual tabulation information for four main categories e. g., I—Cultivators, II—Agricultural Labourers, III—Household Industry and IV—Other Workers only is being given separately in the Primary Census Abstract. However, for facility of data users further break-ups of main workers by divisions, major groups and minor groups will be presented in the Economic Tables as per "National Industrial Classification,1970" (as adopted by the Registrar General's office).

## OCCUPIED CENSUS HOUSES AND HOUSEHOLDS

31. The definitions of census houses and households have already been given in paras 10 to 14. It will be interesting to study the ratio of households in relation to occupied residential census houses and density of households. Statement—1 gives the number of households per 1,000 census houses and the number of households per square kilometre for the state and districts.

In district Saharanpur (1,001), the ratio is almost unity. The districts where the ratio of households per 1,000 census houses is below 1,010 are Bulandshahr (1,002), Bijnor (1,003), Ghaziabad (1,007) and Almora (1,009).

Districts where the difference in the ratio is within ten points are Tehri-Garhwal, Nainital, Fatehpur, Rae Bareli, Sultanpur, Ballia and Ghazipur.

36. For calculation of density of households, the total geographical area of the districts is based on the area figures supplied by the Surveyor General, India. The urban area figures are those supplied by the Director, Local Bodies, Uttar Pradesh and rural area figures of each district have been arrived at by subtracting the urban figures from the total geographical area.

37. It the state as a whole per every square kilometre of area there are 65 households. The density of households in rural and urban areas works out to 55 and 741 respectively.

38. In district Uttarkashi, the density of households is only 5 per square kilometre of area. Other district where the density of households is less than half of the state average are Chamoli (9), Pithoragarh (11), Tehri-Garhwal (22), Lalitpur (22), Garhwal (24), Almora (28), Nainital (29), Hamirpur (30) and Mirzapur (31) all districts belonging to Himalayan hills and Vindhyan hills. All these districts are sparsely populated and in the matter of density of population they all rank amongst the lowly placed districts of the state. The highest density of households is found in district Lucknow (149), followed by Meerut (117), Ghaziabad (111), Kanpur (110), Varanasi (109), Gorakhpur (103) and Deoria (101). The urban areas of these districts also rank amongst the first four most density populated areas, with Muzaffarnagar coming in place of Pilibhit at the second spot. The lowest density is found in district Chamoli (96), followed by Tehri-Garhwal (113), Uttarkashi (193) and Pithoragarh (195). Similar trend is observed in density of population amongst the lowly placed districts with Pithoragarh and Uttarkashi exchanging their positions.

(232,705), 95.28 per cent (221,729) is in rural areas and only 4.72 per cent (10,976) in urban areas of the state. Statement-2 gives the percentage distribution of members of scheduled castes and scheduled tribes in rural and urban areas to total population of scheduled castes and tribes for the state and districts.

42. It is evident from the above table that the percentage of scheduled castes is very much higher in the rural areas as compared to urban areas in every district. Dehra Dun ( 45.64 ) has the highest percentage of scheduled castes in the urban areas followed by Agra ( 36.63 ) and Kanpur ( 33.64 ). All these districts have also comparatively a higher proportion of urban population. In fact they rank within the first four districts of the state as for as proportion of urban population is concerned. The remaining being Lucknow, which though has the highest percentage of urban population the scheduled caste population in its urban area is only 22.20 per cent of its total scheduled caste population. Agra and Kanpur are famous for their leather work, which by and large engage a large number of scheduled castes. The percentage of scheduled caste to total population is depicted on the map opposite.

43. As mentioned earlier only five tribes have been scheduled in Uttar Pradesh and their population is not very significant. Infact they constitute only 0.21 percent of the total population. Not a single scheduled tribe has been returned from the districts of Jalaun and Hamirpur. Similar position exists in the rural areas of district Lalitpur and urban areas of districts Budaun, Shahjahanpur, Mainpuri, Farrukhabad, Etawah, Fatehpur, Hardoi, Sultanpur, Pratapgarh, Basti, Azamgarh, Jaunpur, Ballia and Ghazipur. Besides, no female scheduled tribe is returned from the rural areas of districts Bulandshahr, Budaun, Bareilly, Mainpuri, Allahabad, Rae Bareli, Sultanpur, Pratapgarh, Jaunpur, Ballia and Varanasi and urban areas of districts Sitapur, Bara Banki and Faizabad.

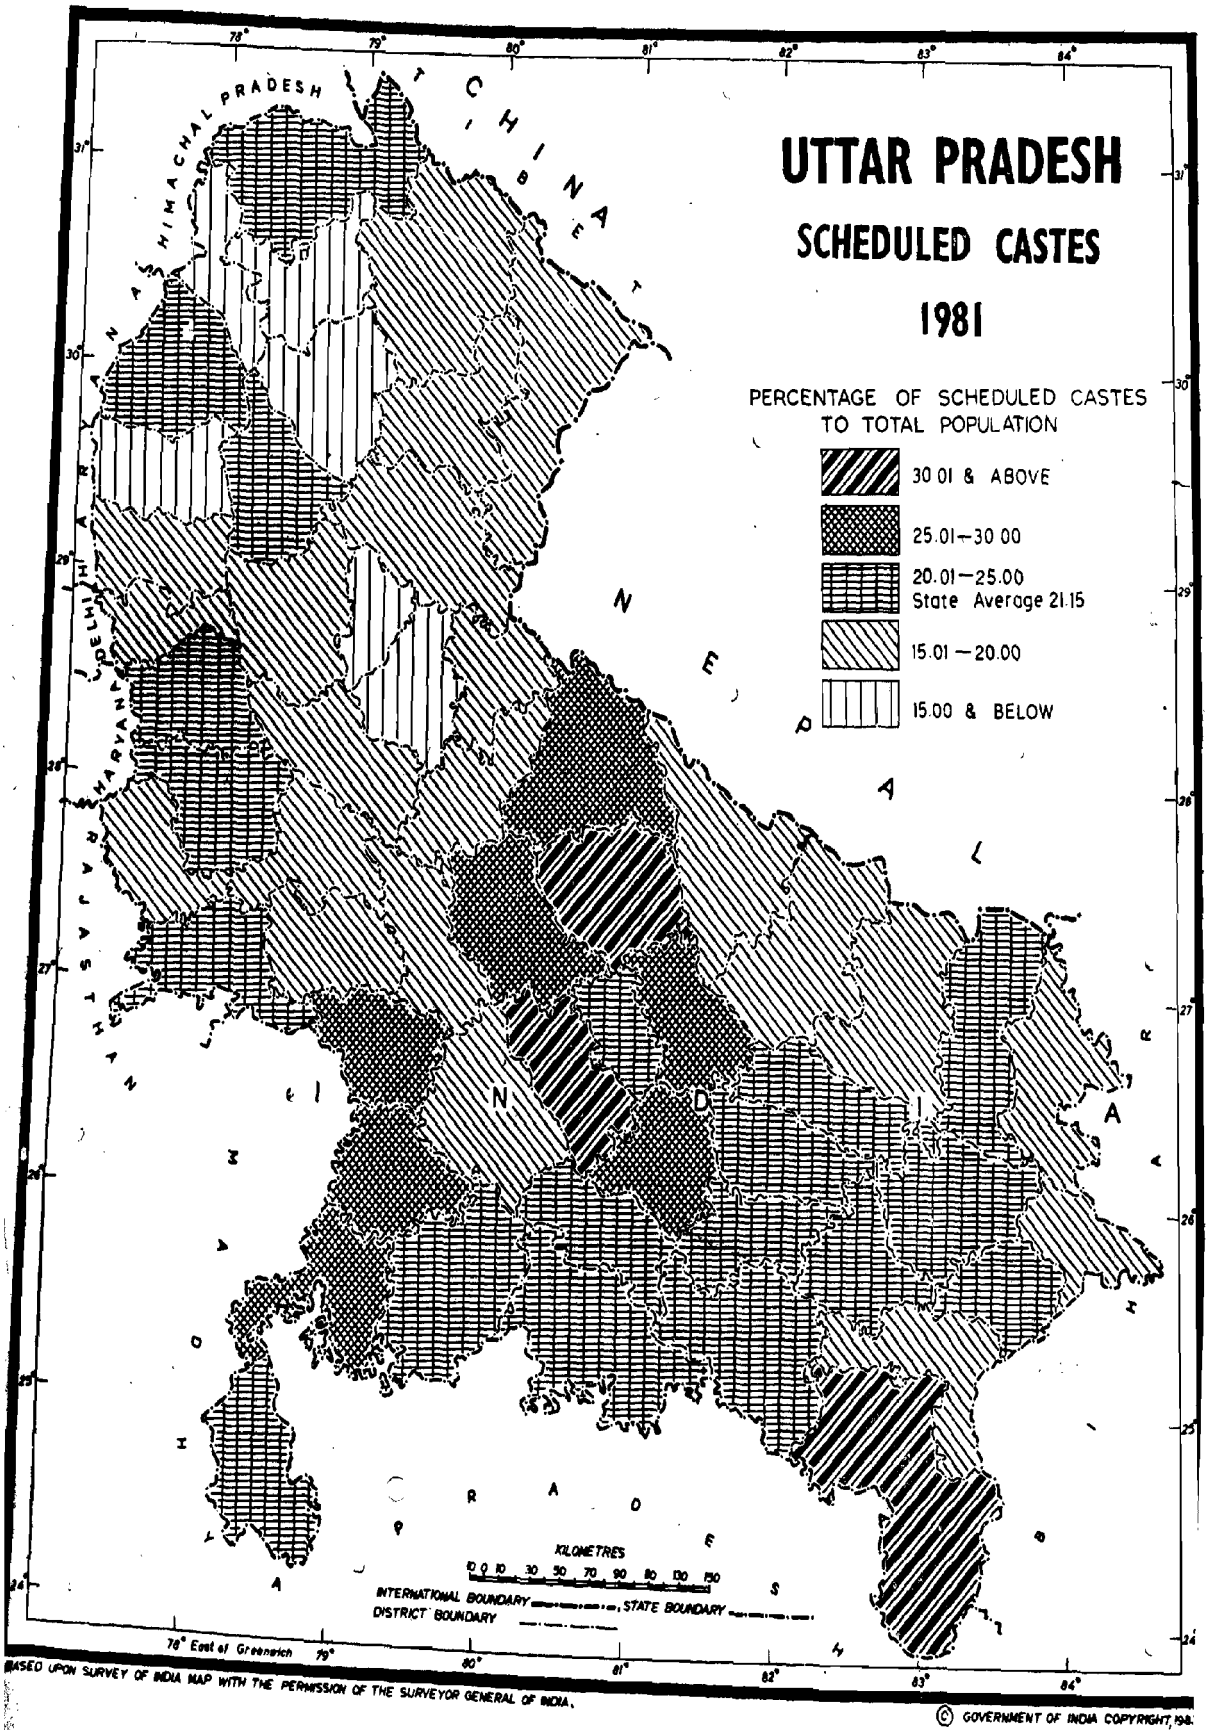

44. By and large, the scheduled tribes predominate in rural areas of the districts. The exception being districts Ghaziabad, Bulandshahr, Moradabad, Rampur, Bareilly, Aligarh, Mathura, Agra, Allahabad, Lalitpur, Banda, Lucknow, Rae Bareli and Varanasi.

45. Statement—3 below gives the percentage distribution of total population of scheduled castes and scheduled tribes in the state and districts :—

46. In 1981 the percentage of scheduled caste population to total population is 21.16 and that of scheduled tribe population 0.21. It shows a slight increase since the 1971 Census, in the percentage of scheduled castes (21.00) but percentage of scheduled tribes which was 0.22 in 1971 has gone down a little.

47. The highest percentage of scheduled castes and scheduled tribes to total population is observed in district Mirzapur (32.56). Sitapur (30.99) and Unnao (30.19) are the other districts where this percentage is more than 30. The lowest percentage is found in district Garhwal (11.91). The other districts where the percentage is below 15 are Bareilly (12.49), Tehri-Garhwal (12.78), Rampur (13.06). and Muzaffarnagar, (14.81). If the percentage of only scheduled castes is considered, same districts come at the highest ladder, while district Dehra Dun joins the other districts having low percentage of scheduled castes and tribes. This is due to large population of scheduled tribes returned in district Dehra Dun.

48. About one-tenth of the total population, (9.99 percent to be exact) of district Dehra Dun comprises of scheduled tribes. Other districts where more than one percent of the total population belongs to scheduled tribes are Nainital (6.51), Pithoragarh (3.54), Chamoli (2.52), all lying in the Himalayan hills. As mentioned earlier no scheduled tribe population has been returned from districts Jalaun and Hamirpur. In as many as 26 districts, the proportion is negligible.

49. Columns 5 and 6 of Statement—3 give the percentage distribution of total scheduled caste population and total scheduled tribe population of the state amongst the districts respectively. Allahabad (3.97), Azamgarh (3.75), Gorakhpur (3.48), Kanpur (3.15), Sitapur (3.08) and Basti (3.05) districts each account for more than 3 percent of the scheduled tribe population of the state. All these districts except Sitapur rank amongst the first six districts of the state in total size of population. The other district being Deoria. The lowest proportion is found in district Uttarkashi (0.17), Chamoli (0.26), Tehri-Garhwal (0.28), Garhwal (0.31), Dehra Dun (0.38) and Pithoragarh (0.40), who also rank amongst the six least populated districts of the state. To a great extent therefore there is a high positive correlation between scheduled caste population and total population.

50. Districts Dehra Dun (32.70) and Nainital (31.80) account for more than 60 percent of the total scheduled tribe population of the state. Kheri (7.64) and Pithoragarh (7.45) are the other two districts where the percentage is significant.

51. Statement—4 below gives percentage of each sex of scheduled castes and scheduled tribes in rural and urban areas to total population of the state and districts.

## LITERATES AND EDUCATED

60. Literacy is one of the measures of socio-economic development. The definition of the literates and educated as adopted at the 1981 Census has been given in paras 20 to 23. As mentioned therein all children of 4 years and below have been treated as illiterates. For calculation of effective literacy rates such population is excluded from the total population. Since the population of age group 0-4 will be available only after computerisation of data and which is likely to take some time, for the present only crude literacy rates have been calculated on the basis of the figures thrown up by the primary tabulations depicted in the primary census abstract. Statement—5 gives the literacy rates in total, rural and urban areas and of each sex in the state and districts:—

61. It is evident from the above statement that in the state as a whole only a little above one-fourth of the total population is literate (27.16 percent), the males and females literacy being 38.76 percent and 14.04 percent respectively. As compared to 1971 Census, when the literacy percentages were 21.70, 31.50 and 10.55 for persons, males and females respectively, there is appreciable improvment inspite of an unprecedented growth of population during the decade.

62. Dehra Dun (52.58 percent) is the only district of the state, where more than half of the population is literate. Other districts where literate account for more than two fifth of the population are Kanpur (43.67 percent), Garhwal (41.06 percent) and Lucknow (40.33 percent). The lowest percentage of literacy is found in district Bahraich (15.57), followed up by Budaun (16.10), Gonda (16.32) and Rampur (16.34).

63. In respect of male population also, Dehra Dun has the highest percentage of literacy (61.15). Pithoragarh (58.12), Chamoli (57.40), Almora (56.66), Garhwal (56.26), Kanpur (53.40), Jhansi (50.67) and Jalaun (50.16) are the other districts where more than 50 percent of

the male population is literate. Rampur (22.63 percent) comes at the bottom of male literacy. There are two other districts in the state where even one fourth of the male population is yet not literate. They are Budaun (23.03 percent) and Bahraich (24.35 percent).

64. Dehra Dun (42.03 percent) also occupies the top berth in the matter of female literacy. In districts Kanpur (31.95 percent), Lucknow (29.71 percent), Garhwal (27.13 percent) and Nainital (27.10 percent) a little above one fourth of the female population is literate. District Bahraich (5.29) has the lowest literacy, followed up by Gonda (5.45), Bara Banki (7 21), Budaun (7.54), Kheri (7.61) and Basti (7.94).

65. Even one fourth of the rural population is yet not literate, its percentage of literates being 23.06. Amongst the males, 35.18 percent are literates while female literacy rates works out to 9.49 percent. Even one-tenth of the rural female population is yet not literate. During the decade 1971-81 there has been some improvement in the matter of literacy, the increase in percentages amongst persons, males and females being 4.93, 7.16 and 2.50 respectively.

66. Amongst the districts in rural population also the highest percentage of literates is found in district Dehra Dun (38.84), followed by districts Garhwal (38.46), Pithoragarh (37.37), Almora (35.21) and Chamoli (35.16), all of Himalayan hills. Literacy is lowest in district Rampur (11.59 percent). Other districts where the percentage is less than 15 are Budaun (13.44), Bahraich (13.75) and Gonda (14.50).

67. In rural male population, district Pithoragarh has the highest literacy (56.78 percent). Other districts where more than half of the male population is literate are Chamoli (55.40 percent), Almora (54.36 percent) and Garhwal (53.74 percent). District Rampur (17.97) has the lowest percentage of literates. In 5 other districts this percentage is below 25. These are Budaun (20.49), Bahraich (22.53), Moradabad (23.62), Gonda (24.02) and Bareilly (24.13).

68. The highest percentage of female literates in rural population is again in district Dehra Dun (26.50), followed by Garhwal (25.15), Nainital (21.76), Kanpur (20.83) and Etawah (20.49). Bahraich (3.45) has the lowest female literacy. In five more districts, the percentage of female literates is even less than 5. These are Gonda (3.83), Rampur (3.91), Budaun (4.60), Bareilly (4.68) and Kheri (4.92).

69. In the urban population of the state 45.88 percent are literates. It is almost double of the literacy in rural population. The percentages of males and females being 54.73 and 35.43 respectively. It shows a slight improvement since the last census when the percentage of literates for persons, males and females was 43.63, 52.08 and 33.33 respectively.

70. In urban areas of hill districts except Nainital where it is below 50 percent, literacy rates are comparatively higher. District Almora (75.69 percent) comes at the top, followed by Pithoragarh (68.37 percent), Tehri-Garhwal (67.07 percent), Dehra Dun (66.97 percent), Uttarkashi (65.20), Garhwal (64.89), and Chamoli (63.87 percent). Lowest literacy is observed in district Rampur (29.34 percent). Districts Budaun (29.92 percent), Moradabad 32.25 percent) and Bijnor (32.99 percent) have also less than one third of the population belonging to literates and educated.

71. In male urban literacy also, Almora (83.35) is on top. Other districts where male literacy percentage is above 70 are Pithoragarh (77.54), Uttarkashi (76.04), Chamoli (75.24), Tehri-Garhwal (75.12), Garhwal (74.35) and Dehra Dun (73.25). As in case of total urban literacy, all these districts fall in the Himalayan hills. Rampur (35.77) has again the lowest percentage of urban literates. Budaun (36.61) and Moradabad (37.53) are the other two districts where the percentage is below 40.

72. Urban female literacy is somewhat better as compared to rural. District Almora again has the highest percentage (63.89). Other districts where more than half of the female population is literate are Dehra Dun (58.93 percent). Pithoragarh (55.58 percent), Tehri-Garwal (52.58 percent) and Garhwal (51.01 percent). Once again district Rampur (22.05 percent) comes at the bottom followed up by districts Budaun (22.19 percent) and Bara Banki (23.90 percent).

73. The literacy rates in the total population have been depicted in the map opposite. It will be observed from the map that all the hill districts except Uttarkashi and Tehri-Garhwal fall in the highest range and form a zone of conurbation in the northern part of the state. The districts in the lowest range form two compact zones—one comprising districts Rampur, Moradabad and Budaun and the other districts Kheri, Sitapur, Bahraich, Gonda and Bara Banki.

## ECONOMIC ACTIVITY

74. The definitions of workers, main and marginal and non-workers and changes in their concepts since the last census have been highlighted in paras 24 to 30 of the General note. Total workers are a sum total of main and marginal. The coverage of agriculture in 1981 is slightly more parvasive than in 1971. All these have to be kept in view while analysing the 1981 data with 1971 data in the background.

75. Statement—6 (i) gives the percentage distribution of population of each sex by workers, marginal workers and non-workers in state and districts in 1981. Main workers have been further distributed by broad industrial categories (i.e., cultivators, agricultural labourers, household industry and other workers) of 1981 Census.

76. A little above half (50.76 percent) of the male population consists of workers. As compared to 1971 (52.2) the percentage of workers in 1981 has gone down amongst the males. But amongst females the proportion has slightly increased from 6.7 percent in 1971 to 8.06 percent in 1981.

77. Amongst districts Uttarkashi (58.80) has the highest percentage of male workers followed by Bahraich (57.98), Kheri (56.85), Bara Banki (56.70), Gonda (56.28), Budaun (56.08) and Sitapur (56.07). They all except Budaun form a compact block. District Almora (43.03) has the lowest percentage of male workers. The other districts where the percentage

is below 45 are Ballia (44.02) and Garhwal (44.19). Although the disparity amongst the districts as far as percentage of male workers is concerned is not much in case of females it is very marked. On the one hand there are districts where more than half of the females are workers and on the other in some districts percentage of female workers is even less than one. District Tehri-Garhwal (53.03) has the highest percentage of female workers followed by district Chamoli (52.03) and Uttarkashi (51.32). In district Mainpuri female workers are even less than one percent (0.76). Other districts where this percentage is quite low are Pilibhit and Shahjahanpur (1.10 each), Bareilly (1.13) and Etah (1.14), all forming a zone of conurbation.

## MAIN WORKERS

78. The position as for total workers obtains also in the case of main workers, they being the major chunk. The only important feature worthy of note is that unlike total workers, the female main workers do not predominate in any district. This is due to the fact that in these districts the percentage of marginal workers is quite significant.

## CULTIVATORS

79. Cultivators account for 29.95 percent of the male population of the state. Amongst female the percentage of cultivators comes to 2.58. Since 1971 Census when the percentage for males and females was 30.9 and 2.9 respectively, there has been a decline in both the sexes in the 1981 Census. This appears to be primarily due to the conceptual change in the definition of workers and classification of populations according to main workers and marginal workers.

80. District Bahraich has the highest percentage (47.24) of male workers followed by districts Kheri (45.79), Gonda (44.68), Sitapur (44.50) and Budaun (44.00). District Dehra Dun (13.07 percent) comes at the bottom. Other districts where cultivators account for even less than one-fifth of the total male population are Ghaziabad (16.19 percent) Varanasi (17.33 percent), Saharanpur (18.46 percent), Kanpur (18.92 percent) and Agra (19.46 percent). Amongst females there is a marked disparity in the proportion of cultivators. In districts Uttarkashi (44.48 percent), Tehri-Garhwal (42.61 percent) and Chamoli (42.44 percent), more than two-fifth of the females are cultivators whereas in districts Bareilly (0.14), Rampur (0.16), Saharanpur Agra and Farrukhabad (0.18 each) and Pilibhit (0.19) the percentage of female cultivators is insignificant.

## AGRICULTURAL LABOURERS

81. The percentage of agricultural labourers in male and female populations works out to 7.12 and 1.90 respectively in 1981. This percentage was 9.0 for males and 3.0 for females in 1971.

82. The highest percentage of male agricultural labourers is found in disirict Saharanpur (14.97), followed by Muzaffarnagar (14.26), Hamirpur (12.17), Mirzapur (12.06) and Bijnor (12.02). District Chamoli (0.20) has the lowest percentage of male agricultural labourers. Other districts where the percentage is below one are Tehri-Garhwal (0.22), Pithoragarh (0.38), Uttarkashi (0.45), Garhwal (0.52) and Almora (0.75). Amongst females district Mirzapur (8.86 percent) occupies the top berth followed by Banda (5.56 percent), Ballia (4.86 percent), Hamirpur (4.72 percent) and Deoria (4.53 percent). District Tehri-Garhwal has the lowest percentage (0.04) of female agricultural labourers. Other districts where the percentage is below 0.10 are Bareilly (0.05), Mainpuri (0.06), Moradabad (0.07) Budaun and Etah (0.08 each).

AT HOUSEHOLD INDUSTRY

83. Household industry engages 1.79 percent of male population and 0.28 percent of female population. The corresponding figures in 1971 were 1.9 percent and 0.3 percent respectively, showing a marginal decline in this category also.

84. In household industry with a percentage of 7.21 district Varanasi occupies the top berth amongst the males, followed by districts Mirzapur (4.56 percent), Bijnor (3.56 percent), and Azamgarh (3.13 percent). In districts Kheri (0.57), Tehri-Garhwal (0.62), Garhwal and Bahraich (0.64 each) and Dehra Dun (0.68) the percentage in this category is quite low. Amongst females, only district Azamgarh (1.13) has a percentage above one.

OTHER WORKERS

85. The category 'Other workers' comprises all workers except cultivators, agricultural labourers and those engaged in household industry. A little above one tenth of the male population is comprised of other workers (11.45 percent). Amongst females, the percentage is 0.63. At the 1971 the percentages for males and females under this category were 10.4 and 0.5 respectively.

86. The highest percentage of 'Other workers' amongst males is in district Dehra Dun (34.75). Other districts where more than one fifth of the male population is in this category are Lucknow (26.31), Ghaziabad (24.29 percent) Kanpur (23.14 percent) and Agra (22.83 percent). All these districts are either industrially developed or having a large number of establishment of central and state governments and public undertakings. In districts Bahraich (4.94), Gonda (5.21), Basti (5.25), Bara Banki (5.40) and Kheri (5.43) the percentage of males under this category is very small. All these districts form a compact block and belong to the economically underdeveloped districts of the state. Amongst females, only district Dehra Dun (2.86), Lucknow (1.99), Jhansi (1.63), Ghaziabad (1.36), Nainital (1.19) and Kanpur (1.15) have a percentage of over one under this category.

MARGINAL WORKERS

87. The concept of marginal workers has newly been introduced at this census. All those persons who have worked for some time during the year preceding the enumeration but for less than 6 months or 183 days have been classed as marginal workers. The percentage of such males and females come to 0.45 and 2.67 respectively.

88. In districts Almora (2.78), Pithoragarh (2.62) Deoria (2.43), Tehri-Garhwal (2.14) and Chamoli (2.09) marginal workers account for above 2 percent of the male population. However, amongst females in districts Lalitpur (16.18), Almora (13.20), Pithoragarh (12.97), Garhwal (12.08) and Deoria (10.00), the percentage of marginal workers is 10 percent or more.

NON-WORKERS

89. Non workers are those who did not do any work at all during the one year preceding the enumeration. The percentages of male and female non-workers come to 49.24 and 91.94 respectively. The corresponding figures for males and females in 1971 were 47.8 percent and 93.3 percent respectively.

90. Amongst males Almora (56.97) has the highest percentage of non-workers followed by Ballia (55.98) and Garhwal (55.81). District Uttarkashi (41.20 percent) stands at the bottom followed by Bahraich (42.02 percent), Kheri (43.15 percent), Bara Banki (43.30 percent), Gonda (43.72 percent), Budaun (43.92 percent) and Sitapur (43.93 percent). The highest percentage of female non-workers is found in district Mainpuri (99.24) followed by districts

Pilibhit and Shahjahanpur (98.90 each), Bareilly (98.87) and Etah (98.86). District Tehri-Garhwal (46.97) has the lowest percentage of female non-workers. Chamoli (47.97) and Uttarkashi (48.68) are the other districts where less than half of the females are non-workers.

## MAIN WORKERS BY BROAD CATEGORIES

91. In statement—6 (ii) the percentage distribution of main workers of each sex amongst the four broad industrial categories of main workers, e. g., cultivators, agricultural labourers, household industry and other workers has been given.

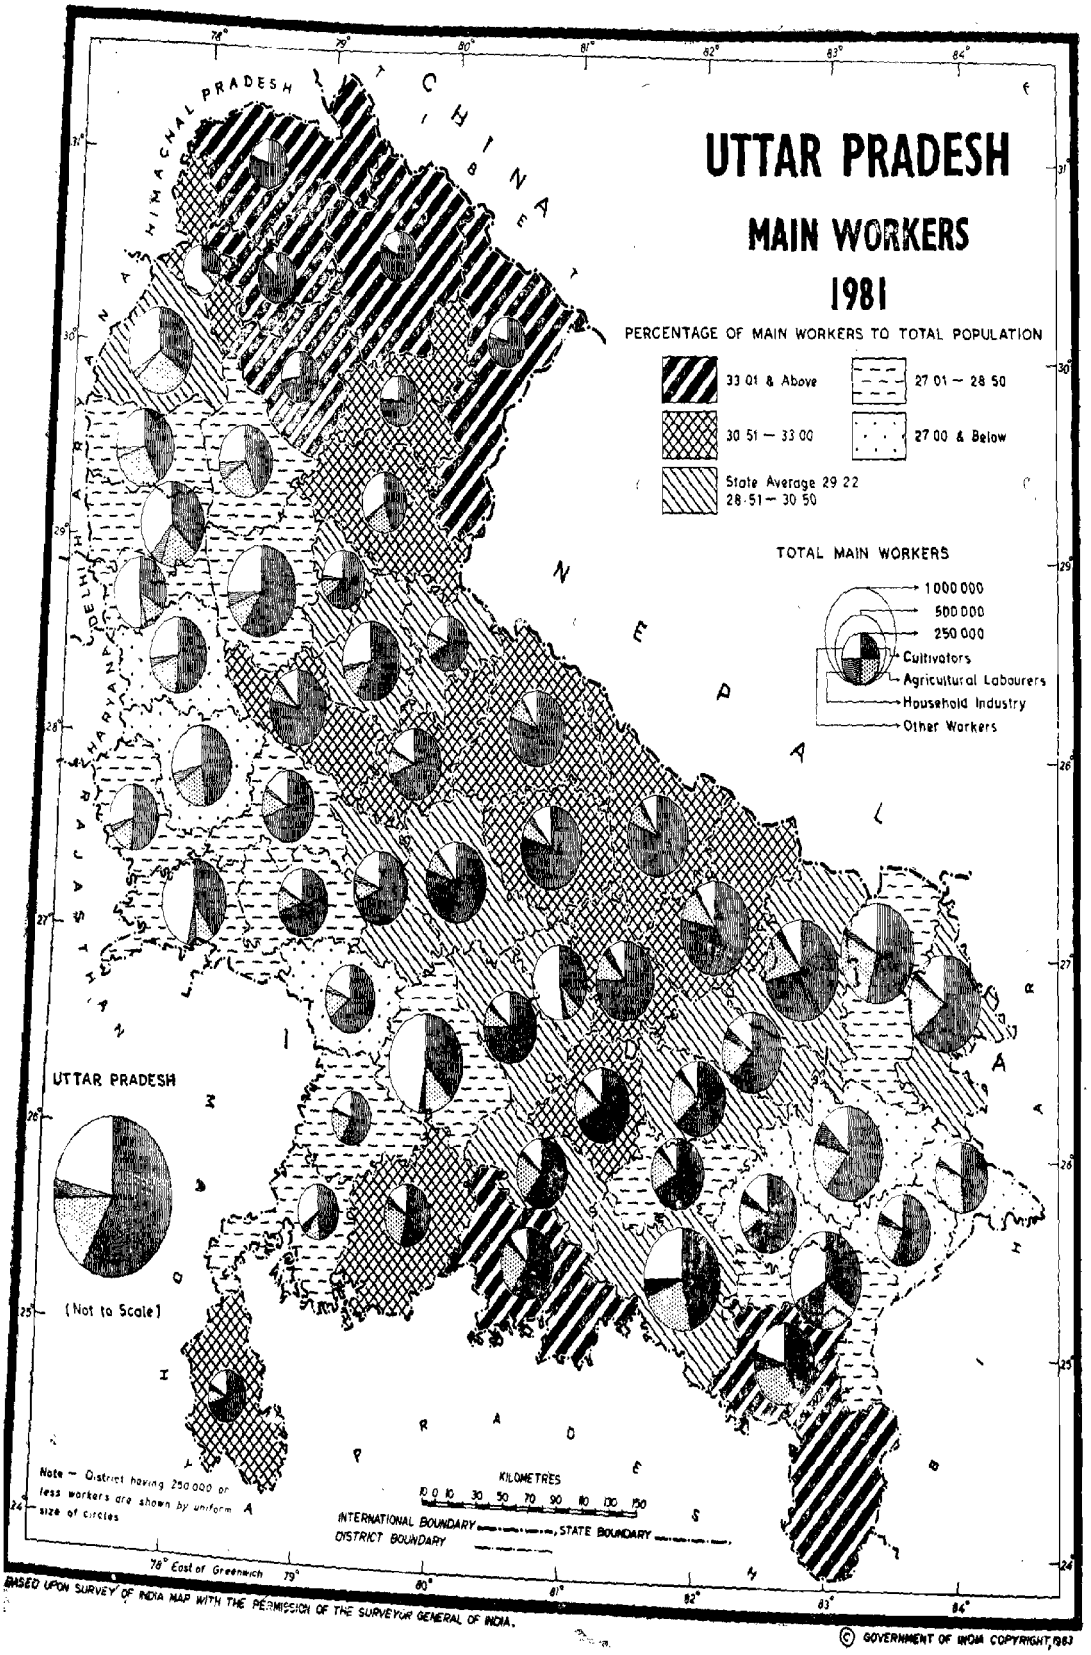

92. Cultivators accounts for 59.53 percent of the male main workers, followed by other workers (22.75 percent). Amongst females the highest percentage of main workers is again of cultivators (47.83) followed by agricultural labourers (35.23 percent).

93. By and large the districts follow the state level pattern as far as males are concerned, the exceptions being districts Dehra Dun, Meerut, Ghaziabad, Agra, Kanpur and Lucknow where the highest percentage of main workers is accounted for by category 'Other workers'. Females, in different districts show large variations with the state level pattern. In the hill districts, districts of Lucknow Division except Lucknow and district Bahraich, Gonda, Bara Banki, Pratapgarh, Basti and Jaunpur the highest percentage is of cultivators. In the districts of Fatehpur, Allahabad, Faizabad and Sultanpur and all districts of Divisions Jhansi, Gorakhpur and Varanasi (except Basti and Jaunpur) the highest proportion is of agricultural labourers. In the remaining districts of the state, the highest percentage is accounted for by category 'Other workers'. Statement 6 (ii) is given below :—

## NON WORKERS

119. Non-workers account for 72.7 percent of the urban population. The percentage amongst males and females being 52.5 and 96.5 respectively. Districts Uttarkashi and Tehri-Garhwal (60.9 percent each) and Almora (63.4 percent) have low proportions of non-workers in their towns. Amongst males, district Ballia (58.2) has the highest percentage followed by districts Ghazipur (58.0), Gorakhpur (57.1), Jhansi (56.4) and Jaunpur (56.0). Districts Tehri-Garhwal (42.9), Chamoli (43.5) and Uttarkashi (43.7) have comparatively low percentage of non-workers. District Shahjahanpur (99.0) has the higher percentage of females in this category, followed by districts Kheri (98.3) and Mainpuri (98.1). The lowest percentage is found in district Chamoli (75.8), followed by districts Azamgarh (84.2) and Pithoragarh (87.9).

## CONCLUSION

120. In the state as a whole, the highest proportion of the main workers is of cultivators, followed by categories other workers, agricultural labourers and household industry. More or less similar trend exists in the districts of the state except districts Dehra Dun, Meerut, Ghaziabad, Agra Kanpur and Lucknow where category 'Other workers' predominates. The map opposite shows the proportion of main workers by four industrial categories.

121. In the rural areas of the state also cultivators occupy the top berth followed by categories agricultural labourer, other workers and household industry. By and large districts also follow the state trend, the departure being in some of the districts where second position is occupied by other workers instead of agricultural labourers.

122. Amongst the main workers of urban areas other workers predominate, followed by categories cultivators, household industry and agricultural labourers. The districts generally follow the state trend. Azamgarh is the only district where the highest proportion is found in category household industry.
