INTRODUCTION

INTRODUCTION

The 1981 Census is the twelfth Census of India, the fourth since Independence and the second for Haryana. The provisional population figures of the 1981 Census were published in Paper I of 1981 and its Supplement whereas the final population and Scheduled Castes population have been brought out in the form of a small booklet entitled "Final Population Totals—Haryana".

Though the Primary Census Abstract for Scheduled Castes prepared manually will be included in Part II-B along with the Primary Census Abstract for general population it is being published independently in this paper to meet the urgent requirements of data users. The data have been presented at district, tahsil and town levels.

At the time of 1981 Census, an Individual Slip for each person and a Household Schedule for each household were canvassed. There are 37 Scheduled Castes in Haryana as listed in Part I under "Haryana" of Schedule I of the Scheduled Castes and Scheduled Tribes lists (Modification Order 1956) corrected upto date. These are amongst the Hindus and Sikhs only. There are no Scheduled Tribes in Haryana. The list of Scheduled Castes is given on page 39. Each head of the household was asked whether he/she was a member of any Scheduled Caste given in this list and the information was recorded in the Household Schedule. Likewise every individual was also asked whether he/she belonged to any one of these Scheduled Castes and the information was noted in the Individual Slip.

The State of Haryana comprised of 12 districts, 39 tahsils and 81 towns as on 31st December, 1979-the date when the boundaries of the various administrative units were frozen for the conduct of 1981 Census. The data presented in the Primary Census Abstract for Scheduled Castes thus conforms to the position as on 31st December, 1979 and does not take into account subsequent territorial changes. This paper provides information about the households, population, literacy and economic activities of the population belonging to the Scheduled Castes.

According to 1981 Census, total numerical strength of these 37 Scheduled Castes is 2,464,012 accounting for 19.07 per cent of the total population of the State. The proportion of Scheduled Castes population living in rural and urban areas is 84.94 per cent and 15.06 per cent respectively as against 78.12 per cent and 21.88 per cent respectively in case of general population. It reflects that they are mainly confined to rural areas by residence. Like the general population, they are unevenly distributed in the State. Ambala district claims 13.44 per cent of the total Scheduled Castes population of the State closely followed by Hisar district where 13.32 per cent of them reside. The percentage of Scheduled Castes in the remaining districts to the total Scheduled Castes population of the State is 9.64 in Karnal, 9.44 in Rohtak, 9.30 in Kurukshetra, 7.33 in Jind, 7.25 in Sirsa, 6.85 in Bhiwani, 6.40 in Mahendragarh, 6.36 in Faridabad, 5.77 in Sonipat and 4.90 in Gurgaon.

Among the tahsils, the proportion of Scheduled Castes population to total population is the highest (29.36%) in Tohana tahsil of Hisar district and the lowest (8.09%) in Ferozepur Jhirka tahsil of Gurgaon district. By and large it is higher in the tahsils of north-western Haryana. Numerically the biggest concentration of Scheduled Castes population is in Karnal tahsil (134,803 persons) and the minimum in Bawal tahsil(12,807 persons). More than 50 per cent of the Scheduled Castes population of Haryana comes from the 12 tahsils of Karnal, Sirsa, Hisar, Jagadhri, Ambala, Sonipat, Rohtak, Thanesar, Palwal, Gurgaon, Fatehabad and Narwana. Among the towns, the highest concentration of Scheduled Castes population is found in Faridabad Complex Administration (35,329 persons)-a Class I town with the biggest industrial complex which attracts unskilled workers from the neighbouring areas. The total Scheduled Castes population of Faridabad Complex Administration in fact exceeds the total Scheduled Castes population of some tahsils like Assandh, Maham, Pehowa, Safidon, Kalka, Loharu, Nuh, Ferozepur Jhirka and Bawal. The minimum concentration of Scheduled Castes population is found in Buria town of Ambala district where only 346 members of the Scheduled Castes have been recorded.

Although in number, the two sexes are not seriously unbalanced, their disparity is of great interest to social scientists because of different roles of the two sexes in society and its economy. Haryana is a region with deficiency of females. This fact is supported by the latest Census results. The sex ratio (number of females per 1000 males) among the Scheduled Castes in Haryana is 864 against 870 for general population. The sex ratio among the Scheduled Castes in rural areas is relatively high (869) in comparison to urban areas(837). The sex ratio among the Scheduled Castes population is the highest (972) in Narnaul tahsil of Mahendragarh district and the lowest (788) in Ballabgarh tahsil of Faridabad district. Agriculturally inferior and industrially backward areas are the regions of high sex ratio on account of migration of population.

The term literate signifies a person who can read with understanding in at least one language. Literacy rates would be more substantial if we exclude the age-group 0—4 from the total population. However, at this stage, this information is not available since it will take sometime to generate the age-group data. Therefore, for the purpose of this paper the entire population has been taken into account for calculating literacy rates. The literacy rate among the Scheduled Castes population in the State as a whole is 20.15 per cent whereas in case of general population it is comparatively high (36.14%). Relatively, the literacy rate among the Scheduled Castes population is high in urban areas (28.16%) than the rural areas (18.73%). As expected the literacy rate among the males is high in the Scheduled Castes population (31.45%) as well as general population (48.20%).

Like 1971 Census, a worker in 1981 Census denotes a person whose main activity was participation in any economically productive work physically or mentally. Work involves not only actual work but also effective supervision and direction of work. Among the Scheduled Castes population, the proportion of main workers, marginal workers and non-workers is 28.89 per cent, 3.62 per cent and 67.49 per cent respectively. The proportion of main workers to total population in Scheduled Castes is the highest (31.05%) in Hisar district and the lowest (23.53%) in Mahendragarh district. Among the Scheduled Castes population, the percentage of main workers in other districts is 30.38 in Sirsa, 30.19 in Karnal, 30.00 in Jind, 29.49 in Kurukshetra, 29.27 in Bhiwani, 28.64 in Faridabad, 28.51 in Ambala, 28.47 in Sonipat, 27.33 in Rohtak and 26.87 in Gurgaon. Highest proportion of marginal workers among the Scheduled Castes population is found in Jind district (5.79%) and the lowest in Ambala district (1.07%).

Numerically 711,934 persons in all are main workers among the Scheduled Castes population. Of these 605,792 hail from rural areas and 106,142 from urban areas. Among the total main workers of the Scheduled Castes population in Haryana, 11.86 per cent are Cultivators, 51.28 per cent Agricultural Labourers, 30.56 per cent in Household Industry (Category V.a) and 33.30 per cent Other Workers (Categories III, IV, V.b., VI to IX). In the State as a whole, the proportion of male main workers to total male population of Scheduled Castes is 48.69 per cent while the proportion of female main workers to total female population is only 5.97 per cent.

This paper aims to provide the basic population characteristics of the Scheduled Castes population as a whole in the State as revealed by 1981 Census. It is hoped that the interested data-user will find it useful.

Chandigarh :

The 4th November, 1982.
