1971

INTRODUCTORY NOTE

The figures presented in this paper give some basic particulars of the population as on the sunrise of 1st April, 1971 as recorded at the 1971 Census of India. These figures are only crude totals compiled from the Abstracts furnished by the Census Enumerators themselves from the Census Schedules. The figures were compiled from the Abstracts collected from Enumerators and bound to have their own limitations and are purely provisional which can be confirmed only after the Census Schedules have been fully processed in the Tabulation Office later. After the final tabulation, apart from providing the Primary Census data down to every village, enumerator's block of a town, a series of cross tabulation of Census data will be made to present the demographic, social and economic characteristics of the population in a meaningful way such as by sex, broad age groups, educational levels etc. It is our anxiety to make available to the Government and the people the provisional results of the 1971 Census count as quickly as possible after the completion of the enumeration, which has impelled us to compile and present this Paper of Provisional Population figures.

Area demarcation :

The Union Territory of Tripura is surrounded on three sides by Pakistan without any natural boundary at most places. The international boundary between Tripura and East Pakistan is being demarcated by the Joint Indo-Pakistan Survey Teams. For the purpose of 1971 Census Operation, however, the existing boundary has been followed.

The lands in Tripura were not cadastrally surveyed in the past. It is only in 1961 that Cadastral Survey throughout the territory was taken up and completed by 1970 except a few villages. The Settlement Department of the Government of Tripura could not furnish us the required Mouza-wise maps which they expect to be able to print in course of another two years or so. Therefore, for the purpose of enumeration the new revenue villages (mouzas) formed after the Cadastral Survey could not be followed by us for 1971 Census. We had to unavoidably follow the villages which were taken into account during 1961 Census Operation including new villages if any sprung up in the intervening period. In the first phase of Census Operation for 1971 the houselisting and housenumbering and Establishment Schedules were prepared during April-May, 1970 on the basis of old villages and tehsils. For the purpose of administration the entire Union Territory of Tripura with its 10 Sub-divisions used to be treated as one district. For rural census operation each Sub-division has been treated as a district, but for urban census operation the entire territory of Tripura has been treated as one district.

With effect from August, 1970 the Government of Tripura divided the union territory into three districts, viz., North Tripura, West Tripura and South Tripura districts with the Sub-divisions of Dharmanagar, Kailashahat and Kamalpur under North district, Khowai, Sadar and Sonamura under the West Tripura district and Udaipur, Amarpur, Belonia and Sabroom under the South Tripura district. Simultaneously the Government of Tripura increased he number of tehsils from 45 to 284 by recasting the tertritorial jurisdiction of the existing tehsils without changing, however, the territorial jurisdiction of the existing Sub-divisions. The actual implementation of this reorganised set-up of the administration particularly at the tehsil level took place only by about the end of 1970. The changes in the revenue and administrative units were so belatedly introduced that it was not possible for this Directorate to adjust the Census operation with the changed territorial limits of the district and tehsils—particularly after the completion of the 1st phase of the work. For the purpose of 1971 Census, therefore, the territorial jurisdiction of the old revenue villages and tehsils had to be followed. As soon as the required maps of the new revenue villages and tehsils are available from the Government of Tripura it may, perhaps, be possible afterwards to compile the population figures etc. according to the revised revenue villages, tehsils and districts.

Urban Areas :

In Tripura there is only one town which has got a municipality. But 5 more Sub-divisional towns have been taken as urban areas on the basis of the criterion prescribed by the Registrar General, India and relevant datas collected accordingly.

Acknowledgement :

The Census Operation in Tripura commenced from the 10th of March ending on 31st of March, 1971 with revisional rounds from the 1st to the 3rd of April. The parliamentary election in Tripura was held on the 7th of March, 1971 with counting on the 10th of March. This affected the programme of census enumeration to a great extent as a very large number of the Enumerators trained for Census Operation were detailed on election duty including counting on the 10th of March. These Enumerators therefore, could not commence work until about the middle of March, 1971. Sudden influx of displaced persons from Bangla Desh (East Bengal) from the 26th March created new problems not only for the Enumerators but also for the Sub-divisional Officers and others who had to engage their immediate attention to relief work. This had its natural impact on the Census work.

The tasks associated with the 1971 Census enumeration were challenging in several ways particularly in the inaccessible hill areas not unoftenly disturbed by hostile mizo activities. If the census enumeration could be completed successfully, it was solely due to the wonderful co-operation of the people of Tripura and the devoted and extremely hard work put in by our Census workers in the field, viz. the Enumerators, Supervisors, Charge Superintendents and the Sub-divisional Officers. I would like to express my gratitude and admiration to all those workers. I would also like to express my gratitude to the Assistant Directors and other staff of the Directorate for their sincerest co-operation and hard labour, but for which we would not have been able to present the data contained in this Paper.

I joined the Census Directorate only on 1st December, 1970. Major part of the Census Operation including the operation in the first phase right upto the training of the Charge Superintendents for the second phase was performed by my predecessor Shri C. R. Paul. I am indebted to him for the work already done by him.

The Sub-divisional Officers in Tripura were directly involved and responsible for the Census work in their respective areas and most of them have done their job admirably well.

I would like to express my gratitude to all Heads of Departments particularly to Dr. G. N. Chatterjee, Director of Education and Shri A. Dasgupta his Deputy Director, who constantly and ungrudgingly provided us with men for work even at the last moment.

I am extremely grateful to Shri A. L. Dias, I.C.S., Lieutenant Governor of Tripura, who took very keen interest in the progress of Census Operation in Tripura and encouraged me with his invaluable advice, guidance and all help needed by me. It was due to his personal intervention that the difficulties in securing the services of the Panchayat staff for Census work could be overcome.

I am also grateful to the Registrar General, India but for whose continuous guidance and encouragement it would not have been possible for me to successfully complete the Census Operation in Tripura after assuming charge of the Director at as late a stage as December last.

TRIPURA

Figures at a glance

(CENSUS OF INDIA 1971–PROVISIONAL POPULATION TOTALS)

A.	Population of Tripura	Total	15.56,822
		Males	8,02,509
		Females	7,54,313
B.	Decennial Population Growth Rate 1961-71		36.32
C.	Density of Population	149 per Sq. Km.	
D.	Sex Ratio	940 females per 1000 males.	
E.	Proportion of Urban Population to total Population.		7.82
F.	Literacy Rate	Total	30.86
		Males	40.56
		Females	20.55

A BRIEF NOTE ON THE TABLES

The Statement 1 shows a comparative picture of population of the various States and Union Territories in India. Next in order in this series are one pie chart showing the population in different Sub-Divisions of Tripura, Two maps showing the Density and Growth of population of Tripura and five tables about the Population distribution, Growth rate, Sex Ratio, Decadal variation, Rural Urban composition, Town size and Literacy Rates in different Sub-Divisions of the Territory.

The Population in this territory as on 1.4.71 is 15,56,822. This is an increase of more than four lakhs i.e., 4,14,817 in ten years. It shows a rapid increase of population during the decade by pointing out the Decinnial Growth rate as 36.32 per cent whereas India records 24.57 per cent. However during 1951-61 the growth rate registered 78.71 per cent in Tripura which, in addition to natural increase, is attributable to the population influx from East Pakistan.

Among the Sub-Divisions Sadar covers maximum of population and Sabroom the least. Belonia Sub-Division records the highest growth rate with 62.91 per cent increase during 61-71 and Sonamura shows the least increase with 29.44 per cent. The Sub-Divisions of Khowai, Kamalpur, Dharmanagar, Udaipur and Amarpur have growth rate slightly above the territory average, percentage ranging between 37.06 to 42.80.

The density of Population in Tripura is 149 per Sq. Km. in 1971 and that in 1961 was 107 per Sq. Km. Among the Sub-Divisions the highest and lowest density recorded both in 1961 and 1971 are in Sadar and Amarpur respectively. In the Sub-Divisions of Khowai, Kamalpur, Kailasahar, Sonamura, Udaipur and Belonia the density varries between 100 to 200 per Sq. Km.

The present Sex Ratio, expressed in terms of number of females per 1000 males, in this territory, appears to be 940 and in 1961 the Sex Ratio was 932. The highest Sex Ratio is found in the Sub-Division of Udaipur (969) following another adjoining Sub-Division Sonamura (957) whereas the lowest Sex Ratio is recorded in the Sub-Division of Amarpur (914). In most of the Sub-Divisions it varries between 930 to 960.

The Literacy Rate in Tripura according to 1971 Census is 30.86 per cent as against 20.25 per cent in 1961. Literacy Rate among males and females are 40.55 per cent and 20.55 per cent respectively. Sadar Sub-Division records the highest Literacy rate (36.73) next to which stands Dharmanagar (34.64). In most of the Sub-Divisions the Literacy Rates are between 25 to 30 per cent. Amarpur Sub-Division records the lowest rate of literacy with 14.49 per cent.

PAPER I OF 1971—SUPPLEMENT

INTRODUCTORY NOTE TO THE SUPPLEMENT

In the previous pages it has already been covered the Provisional Figures for the Territory in five tables showing the following information by Sub-Divisions viz.,

i) Population by Sex
ii) Decennial Population Growth, 1961-71
iii) Density of Population
iv) Sex Ratio
v) Literacy
vi) Rural urban composition of Population
vii) Population of Towns

In this supplement the provisional figures of economic characteristics of the Population is being presented in two tables by Sub-divisions as follows :

i) Distribution of Population by workers and Non-workers—Table VI.

ii) Distribution of working Population by Agricultural and other workers–Table VII.

From Table VI it will appear that there are 4,34,796 workers in the whole Territory which includes 3,95,000 male workers and 39,796 female workers. The work Participation rate i.e., Proportion of Total workers to Total Population in the Territory is 27.9 percent. Among male and female Population the work Participation rates are 49.2 percent and 5.3 percent respectively. The Amarpur Sub-Division shows the highest proportion of workers (31.7 percent) to total Population and Sadar records the lowest proportion (26.2 percent).

The total number of workers i.e., 4,34,796 are again classified into Cultivators (2,34,615), Agricultural Labourer (85,650) and other workers (1,14,531) and these are shown by Sub-Divisions in Table VII.

It will appear that in the territory as a whole the proportion of Agricultural worker to total workers is 73.7 percent. In this proportion of Agricultural workers 54.0 percent is Cultivators and 19.7 percent is Agricultural Labourer. It follows accordingly that 26.3 percent of Total workers are engaged in non-agricultural pursuits in the Territory. Among the Sub-Divisions the proportion of Agricultural workers to total workers is found highest in Amarpur (84.3) and lowest in Sadar (73.7). Among Cultivators and Agricultural Labourer, their proportion to total workers varies between 50 to 70 percent and 18 to 30 percent respectively in all Sub-Divisions for both males and females; but exception to this is found in case of Females in Sabroom Sub-Division where 24.7 percent engaged in Cultivation and 60.4 percent are Agricultural Labourer.

TABLE VI

Distribution of Population by Workers and Non-Workers

State/District/Sub-division	Persons/Males/ Females	Total Population	Workers	Non-workers	Percentage of Workers to Total Population
