# PREFACE

Soon after the 1991 Census enumeration, it was my privilege to release the Provisional Population Totals on 26th March, 1991 through local news papers and local station of All India Radio, Port Blair. Subsequently, in the first week of April, Paper 1 of 1991 Census containing the Provisional Population Totals, Sex Ratio, Number of Literates and Literacy Rate and Density of Population of A & N Islands was released. It is now my proud privilege to present Supplement to Paper 1 of 1991 Census which contains the following tables and their analysis:

1. Population and Literates by Residence and Sex
2. Percentage of Urban Population to Total Population and Decennial Growth Rate and Sex Ratio by Residence
3. Population of Towns
4. Growth of Urban Population
5. Total Workers, Main Workers, Marginal Workers and their percentage to total Population
6. Distribution of Main Workers as Cultivators, Agricultural Labourers, Workers in Household Industry and Other Workers

The information for the Supplement has been compiled from the Charge Abstracts received from the different Census Charge Officers appointed for conducting the census operations. There are minor differences at places from those given in Paper 1 for the reason that Paper 1 was prepared on the basis of information scrutiny of the Charge Abstracts which were not received till then. The figures published in the supplement are also strictly provisional as they are likely to change further, though marginally, when thorough processing of census records is completed. I hope this document will meet most of the needs of data users till final figures at various levels are available.

I take this opportunity to thank the Hon'ble Lieutenant Governor of Andaman and Nicobar Islands, the Chief Secretary, Andaman and Nicobar Administration and Statistical Bureau of Andaman and Nicobar Administration for issuing timely instructions and orders to all the officers connected with the census operations. I also thank all the Census Officers, Supervisors and Enumerators for their whole hearted co-operation and completing their job of conducting the field operations as per census calendar.

I am also grateful to Shri A.R. Nanda, Registrar General & Census Commissioner, India for continuous inspiration and guidance. Grateful thanks are also due to Shri Mahendra Nath, Jt. Registrar General, India and Shri N. Rama Rao, Dy. Registrar General (C&T) for ready help in administrative and technical matters for completing this gigantic task efficiently.

In the Census Directorate, I congratulate Shri Balwant Singh, Deputy Director of Census Operations for planning and executing the massive operations relating to 1991 Census smoothly and sucessfully. My thanks are also due to S/Shri M.L. Puri, Assistant Director, R.K. Sharma, Geographer of Registers Grant Office, P.K.T. Nair, V.O. Koshy, K.N. Mishra, B.N. Mishra and Pradeep Das Gupta Statistical Assistants for their hard work to make the Census of 1991 a sucessful operation. Shri K.V.K. Nair Senior Stenographer also deserves appreciation for taking down dictation and typing the census instructions and manuscript neatly with high accuracy.

# ANDAMAN & NICOBAR ISLANDS

## DECADAL GROWTH RATE OF POPULATION 1901-91

# INTRODUCTORY NOTE

The population census of India 1991 was conducted in Andaman and Nicobar Islands from 9th February to 5th March, 1991 with reference point of time being the sun rise of Ist March, 1991. As per the methodology adopted for the conduct of 1991 Census, the period from 9th February to 28th February, 1991 was devoted to collect census data in the prescribed schedules and the period from Ist March to 5th March, 1991 was devoted for revisional round to update the information collected during the period of enumeration. During the revisional round all enumerators went through their enumeration blocks quickly to delete particulars in respect of the persons unfortunately died during the period from 9th February to 28th February and to add the particulars of new arrivals during this period. The night of 28th February, 1991 was devoted to collect the particulars of the houseless population by the enumerators and supervisors in their respective enumeration blocks.

*It is a well known fact that census records are the mines of information. All the information* collected in the census schedules cannot be compiled without proper scrutiny of the census schedules which is a time consuming the long process. However, the census organisation, with a view to make the basic data available to the data users immediately after the census operations are over, has devised certain proformae to prepare the summary of the basic data. The basic data which are prepared in the summary by the enumerators and supervisors and census charge officers relate to total population, total literates with breakup into males and females with urban and rural classification and also the population by workers, non-workers and marginal workers. The paper 1 of 1991 Census containing information of provisional population and literacy has already been published and made available to the data users. The present Supplement to Paper 1 aims at to present provisional population data by classification of rural urban and also number of main workers, marginal workers and non-workers in addition to revised provisional population rate of literacy and density in Andaman and Nicobar Islands. The revision of literacy rate and density of population has caused because of revision of provisional population totals which has increased from 277,989 at the time of bringing out Paper 1 of 1991 to 279,111 at the stage of bringing out the Supplement to Paper 1 of 1991.

*Rural Urban Classification*

The census data are traditionally presented by two major classification namely 'rural' and 'urban'. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In 1991 Census the definition of urban area adopted is as follows:

(a) All places with a municipality corporation, cantonment board or notified town area committee etc.

(b) All other places which satisfy the following criteria:

(i) a minimum population of 5,000;

(ii) at least 75% of the male working population is engaged in non-agricultural pursuits; and

(iii) a density of population of at least 400 persons per sq.km.

Besides above, the Director of Census Operations in States/Union Territories were allowed to include in consultation with the concerned State governments/Union Territories administrations and Census Commissioner of India, some places having distinct urban characteristics as urban even if such places do not satisfy all the criteria mentioned under category (b) above. Such marginal cases included major project colonies, area of industrial development, railway colonies, important tourist centres etc. Apart from these, the out-growths of cities and towns have also been treated as urban area under urban agglomeration. This it may be seen from the definition that there are two distinct types of urban units viz., (1) the places which have come into existence by virtue of statutory notifications and are referred to by the nomenclature adopted in the relevant notification as municipal corporation, municipal board, cantonment board, notified area committee etc. and (2) places which are defined as urban because they satisfy criteria (b) above and are referred to as census town for non-municipal town. It is worthy to mention here that for identification of places which have qualified to be classified as urban all villages which as per 1981 Census had a population of 4000 and above or

a population density of 400 persons per sq.km. and having at least 75% of the male working population engaged in non-agricultural activities were considered in consultation with the Andaman and Nicobar Administration. The Andaman and Nicobar Administration after giving due thought to the subject intimated to the Census Directorate that there is no area other than Port Blair town throughout the territory of Andaman and Nicobar Islands which could qualify to be treated as urban area in relation to the definition mentioned above.

*Urban Agglomeration*

At the 1961 Census, the concept of town group was adopted to obtain a broad picture relating to urban. The concept of 1961 Census was revised in 1971 Census with the concept of urban agglomeration to obtain better feed back in regard to urban contiguity and process and trend of urbanisation. This concept without any change or modification has remained operative in the 1981 and 1991 Censuses. An urban agglomeration forms a continuous urban spread and normally consists of a town and its adjoining outgrowth or two or more physically continuous forms together with contiguous well recognised as outgrowths in several areas around a core city or statutory town fairly with well recognised colony, campus or camps etc. might have come up even if such places are lying outside the statutory limit of the corporation, municipal area, cantonment etc. In most of the cases they fall within the revenue limits of the village or villages which are contiguous to the town. Such areas have been termed as outgrowths and reckoned with the town and designated as Urban Agglomeration. Therefore, an urban agglomeration constitutes—

(1) A city or a town with a continuous outgrowths, the outgrowth being outside the statutory limit but falling within the boundaries of the adjoining village or villages; or

(2) Two or more adjoining towns with their outgrowths having as in (1) above; or

(3) A city and one or more adjoining towns with or without outgrowths all of which form a continuous spread.

In so far as the territory of Andaman and Nicobar Islands is concerned, no urban agglomeration exists. In this territory there is only one town i.e. Port Blair Municipal Board having an urban area of 14.1. sq.km. Therefore in all the statements and tables data termed as urban relate to Port Blair town only which falls in tehsil Port Blair of district of Andamans.

*Rural Area*

In this territory, all villages and camps except Port Blair are treated as rural area. The census villages in this territory are of the following categories:

(i) all revenue villages;

(ii) all traditional tribal villages;

(iii) all places of human habitation located outside the revenue area such as forest camps, Andaman Public Works Department camps, Bush Police camps, Contractor's camps and encroachment area etc.

For the purpose of proper census taking and full coverage all places of human habitation discussed in category (iii) above which were located outside revenue boundaries were treated as separate census villages. The forest camps, Andaman Public Works Department camps, Bush Police camps etc. which were located within the revenue boundaries of any village were treated as a part of that village and therefore, their entity was not kept separate. It was only cases of such forest camps, Andaman Public Works Department camps, Bush Police camps and other places of human habitation which were located outside the boundary of revenue vllages were treated as separate census villages.

*Work (Economic questions)*

One of the important characteristics on which information is collected through the census relates to the economic activity of the people. At the 1991 Census, the economic questions consisted of 3 parts namely:

I. Q.14A Did you work any time at all last year (including unpaid work on farm or in family enterprise)

Yes

No(H/ST/D/R//B/I//O)

Q.14B If 'Yes' in 14A, did you work for major part of last year? Yes (1)/No(2)

II. Q.15A Main activity last year?

'Yes' in 14B (C/AL/HHI/OW)

'No' in 14B (H/ST/D/R/B/I/O)

Q.15B 'Yes' in 14B-Any other work any time last year? Yes (C/AL/HHI/OW/No)

'No' in 14B-Work done any time last year? (C/AL/HHI/OW)

III. Q.16A If 'No' in 14A, seeking/available for work? Yes (1)/No(2)

Q.16B If 'Yes' in 16A, have you ever worked before? Yes(1)/No(2)

As per methodology of census, the above questions were required to be canvassed for every person irrespective of age or sex. Every person was asked question 14A including the very young and very old and the answer to this question was filled in the schedule by the enumerators. The other questions were required to be filled in the case of those to whom they were applicable. These questions aims at to get details of the work done by the people with reference to last year. For the purpose of 1991 Census, the work has been defined as 'participation in any ecnomically productive activity'. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also include unpaid work on farm or in famliy enterprise.

*Reference Period*

In all questions except question 16B the reference period is the one year preceding date of enumeration. Certain types of work such as agriculture, household industry like gur making etc., are carried out on either throughout the year or only during certain season or part of the year depending on the local circumstances. In such cases, the important thing is the broad time span of the agricultural seasons preceding the enumeration. For question 16B the reference period is any time before one year preceding date of enumeration.

Question 14A actually seeks to find out if any person has done any work at all (including unpaid work on farm or in the family enterprise) during last year or whether he/she did not work at all and if it is the latter how a person spent his or her time as a non-worker (i.e. household duties, students, dependents, retired person or rentier, beggers, inmates of institutions and other non-workers). Then question 14B seeks to find out who among the persons returned 'Yes' in question 14A had worked for the major part of the year. By major part of the year mean six months (183 days) or more. Those who had worked for major part of the year were termed as main workers. Those who have not worked for the major part of the year i.e. those who had worked for less than six months (183 days) in a year are termed as marginal workers. Question 15A seeks to elicit information on the activity of the main workers in question 14B i.e. those who worked for more than six months or 183 days. It will also elicit information about the main activity of the marginal workers covered in question 14B. In question 15B, details of secondary work or marginal work are sought to be obtained. Those who had worked for major part of the year might have had secondary work and those should be entered in question 15B. In question 16A it is proposed to ask all persons returning 'No' in question 14A, i.e. household duties, student, dependent, retired person or rentier, begger, inmates of institutions and other non-workers whether he/she has been seeking work or available for work. Question 16B seeks

to find out who among non-workers returned 'Yes' in question 16A have ever worked or not. Those who had worked any time before will answer 'Yes' for question 16B and those who had not worked any time before will say 'No'. The main purpose of this question is to elicit information regarding fresh entrants in the labour market. Those returning 'No' in question 16A will be fresh entrants in the labour market. It will thus be seen that the questions on economic activities have been so designed so as to identify all the workers, main or marginal and non-workers with reference to the activity during last one year prior to the date of enumeration and also the number of fresh entrants in the labour market.

During the 1991 Census operations, special emphasis was laid on recording the economic activity of the women. Generally women are found classified as non-workers because of non-reporting of their work. It also happens that women who work for major part of the year are reported as working for less than six months. Therefore, enumerators were instructed suitably during the course of training to make special efforts for capturing women's work by asking probing questions.

It is important to mention here that a man or woman may be producing or making something only for domestic consumption of the household and not for sale. Such a person is not a worker even though from his point of view the activity is productive. The main workers have been classified into four categories viz., cultivators, agricultural labourers, workers engaged in household industry and other workers.

*Cultivators*

For the purpose of census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision and direction of cultivation. A person who is given his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land will not be treated as cultivator. Similarly, all persons working in another person's land for wages in cash or kind or a combination of both will not be treated as cultivator. Cultivation involves ploughing, sowing and harvesting and production of cereals, millets crops such as wheat, paddy, jowar, bajra, ragi etc. and other crops such as sugarcane, ground-nuts, tapioca, etc., and pulses raw jute and kindred fibre crop, cotton etc., and does not include fruit growing, vegetable growing or keeping orchards or groves or working on plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

*Agricultural Labourers*

A person who works on another persons's land for wages in money, kind or share should be regarded as agricultural labourer. He or she has no risk in cultivation but he/she merely work on any person's land for wages. An agricultural labourers has no right or lease or contract on land on which he or she works.

*Workers in Household Industry*

The household industry is defined as an industry conducted by the head of household himself/ herself and or by members of the household at home or within the village in rural areas and only within the precinct of the house where the household lives in urban area. Large proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify to be registered under the Factories Act. The main criterion of the household industry is the participation of one or more members of the household. This criterion will apply in urban area too. Even if the industry is not actually located at home in rural area there is greater possibility of members of the household participating even if it is located anywhere within the village limit. In the urban area where organised industry takes greater prominence the household industry should be confined to the precinct of the house where the participants live. In urban areas even if the members of the household by themselves

run an industry but at a place away from the precinct of their home it will not be considered as a household industry. Thus, the main characteristics of the household industries are as follows:

(a) One or more members of the household must participate. Participation of hired labourer must be minimum;

(b) The activity should relate to some production, processing, servicing, repairing or making and selling of goods;

(c) The goods produced should not be consumed by the household itself but should be wholly or partly for sale;

(d) In an urban area, the industry must be carried on in the precinct of the house in which the household lives. In the rural area, the industry may be carried on any where within the limits of the village;

(e) The activity should not be on the scale of a registered factory; and

(f) Profession such as those practiced by Pleader, Doctor, Barber, Musician, Dancer, Dhobi, Astrologer etc., will not be covered under household industry.

*Other Workers*

All workers i.e. those who have been engaged in some economic activity during last one year and who are not cultivator or agricultural labourers or are not running household industry are other workers. The type of workers that come under the category of other worker include factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social workers, all govt. servants, municipal employees, teachers, priests, entertainment artists, etc. In effect all those who are working in any field of economic activity other than cultivator, agricultural labourer or engaged in household industry are other workers.

*Literacy*

The children in the age group 0—4 were considered as illiterates by definition in the 1981 Census. At the time of preparation for the 1991 Census, the Department of Education in the Ministry of Human Resource Development and the Planning Commission desired that in the 1991 Census, the children in the age group 0—6 should be considered as illiterates even if they would be going to school and might have picked up reading and writing a few odd words. Accordingly the children in age group 0—6 were considered illiterates in the 1991 Census. Therefore, for calculating the literacy rate, the population of the age group 0—6 was excluded from the total population.

*Scope*

The scope of the supplement is to present provisional census data relating to literacy, density, population break up with urban and rural classification, number of declassified towns, population of towns by size class and population by workers and non-workers. The data relating to provisional population, literacy and sex ratio have already been released on 26th March, 1991 through press release. The same data were compiled and published in the form of Paper 1 of 1991 which was released in the month of April, 1991. The present publication—Supplement to Paper 1 contains a slightly modified data on population, literacy and sex and consists of the following tables:

| | |
|---|---|
| (1) Supplement Table 1 : | Population and literates by residence and sex, 1991. |
| (2) Supplement Table 2 : | Percentage of urban population to total population and decennial growth rate and sex ratio by residence. |
| (3) Supplement Table 3 : | Population of Towns. |
| (4) Supplement Table 4 : | Growth of urban population. |
| (5) Supplement Table 5 : | Total workers, main workers, marginal workers and their percentage to total population. |
| (6) Supplement Table 6 : | Distribution of main workers as cultivators, Agricultural labourers, Workers in household industry and Other workers. |

The data contained in the above tables are provisional which are mainly based on the abstract prepared by the Census Charge Officers and submitted to the Census Directorate. As the compilation of Primary Census Abstract will take sufficient time before it is made available to the data users, therefore, it has become necessary to make provisional data available to data users in the form of this supplement.

# ANALYSIS OF PROVISIONAL RESULTS

*Trend of Urbanisation*

Statement 1 presented below reveals the trend of urbanisation in India vis-a-vis in A & N Islands since 1901.

Statement 1

Trend of Urbanisation

| Year | India | | A & N Islands | |
|---|---|---|---|---|
| | Population | Percentage to total population | Population | Percentage to total population |
| 1 | 2 | 3 | 4 | 5 |
| 1901 | 238,396,327 | 10.84 | 24,649 | Nil |
| 1911 | 252,093,390 | 10.29 | 26,459 | Nil |
| 1921 | 251,321,213 | 11.18 | 27,089 | Nil |
| 1931 | 278,977,238 | 11.99 | 29,463 | Nil |
| 1941 | 318,660,580 | 13.86 | 33,768 | Nil |
| 1951 | 361,088,090 | 17.29 | 30,971 | 25.15 |
| 1961 | 439,234,771 | 17.97 | 63,548 | 22.15 |
| 1971 | 548,159,652 | 19.91 | 115,133 | 22.77 |
| 1981 | 683,329,097 | 23.34 | 188,741 | 26.30 |
| 1991 | 844,324,222 | 25.72 | 279,111 | 26.80 |

The analysis of Statement 1 shows that the percentage of urban population to total population in India was 10.84% in 1901 which increased to 10.29%, 11.18%, 11.99% and 13.86% in 1911, 1921, 1931 and 1941 respectively. The pace of urbanisation as revealed from Statement 1, was very slow upto 1941. However, the pace of urbanisation after independence, or say, from 1951 has increased considerably. The above statement also reveals that the percentage or urban population which was 13.86% in 1941 increased to 17.29% in 1951. However, there was no material change in the percentage of urban population during the period 1961-71 as it remained more or less constant i.e. 17.29% in 1951 and 17.99% in 1961. The pace of urbanisation got momentum during 1971-81 and 1981-91 as the percentage or urban population during these periods increased to 23.34% and 25.72% respectively. In so far as the territory of A & N Islands is concerned, there was no urban population till 1941 Census. It is in 1951 Census only that Port Blair was recognised as a census town which consisted of 25.15% of the total population of A & N Islands. However, it is interesting to note that during the two subsequent censuses i.e. 1961 and 1971, the percentage of urban population has decreased from 25.15% in 1951 to 22.15% in 1961 and 22.77% in 1971. It is only in 1981 and 1991 censuses that the percentage has slightly increased from 25.15% in 1951 to 26.30% in 1981 and 26.80% in 1991. However, as a whole it can be inferred that the percentage of urban population in this territory is more or less is at par with all-India percentage of urban population which is 25.72%.

It will be curious and interesting to have a glance over the level of urbanisation in the world over and selected countries/areas. As per the United Nations World Population Chart 1990, the percentage of urban population of the world over is 45% which is definitely much higher when compared to India as a whole as well as to the territory of A & N Islands. The highest i.e. 85% of urban population was found in Australia followed by 84% in New Zealand and lowest i.e. 10% in Nepal. Thus, the percentage of urban population in India as well as in this territory is far below when compared to the average of urban population in the selected developed and developing countries of the world. However, we are definitely ahead to certain countries of the world like Thailand, Bangla Desh, Bhutan, Nepal and Sri Lanka where the percentage of urban population is recorded as 23, 18, 16, 10 and 21 respectively.

*Decennial growth*

Statement 2 persented below reveals the decennial growth rate of rural and urban population during the decade 1981-91 in A & N Islands.

Statement 2

Decennial growth rate of rural and urban population, 1981-91

| Union Territory/District/Tahsil | Population 1991 | | | Decennial growth rate 1981-91 | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| Andaman & Nicobar Islands | 279,111 | 204,301 | 74,810 | 47,88 | 46,87 | 50,72 |
| District of Andamans | 240,089 | 165,279 | 74,810 | 51,.68 | 52.12 | 50.72 |
| Diglipur Tahsil | 23,694 | 23,694 | .. | 50.90 | 50.90 | .. |
| Mayabunder Tahsil | 21,513 | 21,513 | .. | 54.17 | 54.17 | .. |
| Rangat Tahsil | 33,295 | 33,295 | .. | 37.08 | 37.08 | .. |
| Port Blair Tahsil | 122,452 | 47,642 | 74,810 | 60.43 | 78.47 | 50.72 |
| Ferrargunj Tahsil | 39,136 | 39,136 | .. | 39.70 | 39.70 | .. |
| District of Nicobars | 39,022 | 39,022 | .. | 28.13 | 28.13 | .. |
| Car Nicobar Tahsil | 19,252 | 19,252 | .. | 24.32 | 24.32 | .. |
| Nancowry Tahsil | 19,770 | 19,770 | .. | 32.08 | 32.08 | .. |

It may be observed from the above statement that the decennial grwoth rate of population during the decade 1981-91 was recorded as 47.88% for the whole territory of A & N Islands. The statement further reveals that the rate of growth of rural population was 46.87% compared to 50.72% of urban population i.e. the population of Port Blair town. The statement also reveals that the population of district of Anadmans was 240,089 of which 165,279 was in rural area and 74,810 was in urban area. The decennial growth rate of population in district of Andamans was recorded as 51.68%. The statement reveals further that the growth rate of rural population was 52.12% compared to 50.72% of urban population i.e. the population of Port Blair municipal board. The tahsilwise analysis in the district of Andamans shows that there was no urban area in the tahsils of Diglipur, Mayabunder, Rangat and Ferrargunj. Whatever decennial growth rate of population was recorded in these tahsils was contributed by rural areas only. However, in so far as tahsil of Port Blair is concerned, it consists of both rural and urban areas. The population of tahsil Port Blair at the 1991 Census is recorded as 122, 452 of which 47,642 were residing in rural area and 74,810 were residing in urban area. The decennial growth rate in the tahsil was recored as 60.43%. The population in rural area increased by 78.47% compared to 50.72% in urban area during the decade 1981-91. In so far as the district of Nicobars is concerned, it consists of rural area only and as such whatever decennial growth rate is recorded in the district as well as in the tahsils of Car Nicobar and Nancowry is contributed by rural areas only.

It may be interesting to compare the decennial growth of population of A & N Islands with other States and Union Territories of India during the decade 1981-91. In India as a whole, the urban decennial growth rate is recorded as 36.19% compared to 50.72% in A & N Islands.There are many states which are showing higher decennial growth rate in urban population compared to A & N Islands viz., Arunachal Pradesh 152.98%, Kerala 60.89%, Mizoram 160.27%, Nagaland 74.74%, Tripura 85.75%, Dadar and Nagar Haveli 69.51%, Daman & Diu 63.79%, Lakshadweep 63.15% and Pondicherry 63.56%. Remaining all the States and Union Territories were having lower decennial grwoth rate of urban population compared to this territory. The note-worthy feature of the decennial growth rate of urban population was that of Sikkim which showed a negative growth rate of 27.60%. In so far as decennial growth rate and rural population is concerned, the territory of A & N Islands is far ahead than all-India average of 19.71% compared to 46.87% in A & N Islands. It is worthy to mention here that there were only 2 Union Territories viz., Chandigarh and Delhi which registered higher growth rate in rural population i.e. 129.69% and 108.62% respectively compared to the growth rate of 46.87% in this territory. Remaining all the States and Union Territories have registered less decennial growth rate of rural population during the decade 1981-91 compared to this territory.

*Growth of Urban Agglomerations, Cities & Towns*

As already mentioned that in A & N Islands, there is no urban agglomeration, and that there is only one town viz., Port Blair in the whole territory. The town of Port Blair was for the first time formed at the 1951 Census by clubbing 9 revenue villages, namely, Chatham, Haddo, Phoenix Bay, Aberdeen Basti, Aberdeen Bazar, Buniyadabad, South Point, Junglighat and Sadipur with a population of 7,789 persons. The boundaries of the Port Blair town was extended on 14th August, 1974 by clubbing the entire revenue area of Lamba Line, part of Minnie Bay, entire revenue area of Nayagoan, Dudhline, Corbyn's Cove, Goodwill Estate and part of School Line village. The Statement 3 presented below presents that decadal variation in population of Port Blair town whcih is indeed the urban population in whole of the territory of A & N Islands.

Statement 3

Decadal variation in population and percentage of urban population of A & N Islands (Port Blair M.B.)

| of Town/ District | Year | Population | Decadal variation in population | Decadal percentage variation |
|---|---|---|---|---|
| | 2 | 3 | 4 | 5 |
| ılair M.B.* | 1951 | 7,789 | .. | .. |
| ılair Tahsil | | | | |
| ıans District | | | | |
| | 1961 | 14,075 | +6,286 | 80.70 |
| | 1971 | 26,218 | +12,143 | 86.27 |
| | 1981 | 49,634 | +23,416 | 89.31 |
| | 1991 | 74,810 | +25,176 | 50.72 |

ort Blair MB is in Port Blair Tahsil of Andmmans District

It may be observed from the above statement that the decadal percentage increase in urban population was ɜst i.e. 89.31% at the 1981 Census followed by 86.27% in 1971, 80.70% in 1961 and 50.72% in 1991. ever, it is worthy to mention here that the decennial percentage growth rate recorded at the 1981 Census in ay can be called a real growth rate in population of Port Blair town for the reason that in August, 1974, a new villages were merged alongwith their population into Port Blair town to enlarge the boundaries of urban . However, the decennial growth rate recorded at the 1961, 1971 and 1991 censuses can be very well treated ıe real growth in the population of Port Blair town as the boundary of the town remained unchanged during ɜ periods. It may be interesting to mention here that the number of towns in India has increased from 4,029 981 to 4,689 in 1991 whereas in A & N Islands the number of towns remained unchanged during the same ɔd.

*ın population by size class of town*

ɔr the purpose of analysis and classification, towns have been classified into the following six size classes viz:

| Size classes | Population |
|---|---|
| I | 100,000 and above |
| II | 50,000-99,999 |
| III | 20,000-49,999 |
| IV | 10,000-19,999 |
| V | 5,000-9,999 |
| VI | 5,000 and below |

'able 4 in the Annexure shows that in the 1971 Census the population of Port Blair town was 26,218 and in 1981 Census its population increased to 49,634. Therefore the town of Port Blair during both the censuses ıained in size class of 20,000-49,999. However, in the 1991 Census the population of Port Blair increased from 534 in 1981 to 74,810 in 1991. Therefore, the size class of the town has also changed from 20,000-49,999 to 000-99-999. Further if we compare the town of Port Blair by size class with the towns of same class in whole India, then we find that we are one of the 345th town of our country. The total population of the town of this ɜ class comes to 23,597,111 or 10.96% of the total urban population of India. However , in our territory, the ɔulation of Port Blair town accounts for 100% urban as there is no other urban area in the whole territory

*ɜ ratio*

3y sex ratio, we mean, number of females per 1,000 males. Supplement Table 2 of the Annexure presents the ɜ ratio of rural-urban population at the level of territory, district and tahsil. It may be observed from the table ıt sex ratio in the 1991 Census for the whole territory was 820. However, in rural area, the sex ratio was 840 ich is more than the territory's average and in urban area it was found as 770 which is less than average. The ɜtrict-wise analysis shows that in the district of Andamans the sex ratio was 816 compared to 847 in the district Nicobars. Tahsil-wise analysis of sex ratio reveals that the highest sex ratio of 909 was found in Car Nicobar ısil of Nicobars district and the lowest sex ratio of 782 was found in Port Blair tahsil of Andamans district.

*orking population*

The working population consists of main workers, and marginal workers. The Statement 4 persents the ɜtribution of working population and its percentage to total population in 1981 and 1991 censuses.

Statement 4

Distribution of workers (Main and marginal) and percentage to total population

| Union Territory/District/ Tahsil/Rural/Urban | Workers | | Percentage to Total population | |
|---|---|---|---|---|
| | 1981 | 1991 | 1981 | 1991 |
| 1 | 2 | 3 | 4 | 5 |
| **India** | | | | |
| (Excluding J&K) | 244,604,986 | 314,903,642 | 36,77 | 37.64 |
| Andaman & Nicobar Islands | 69,612 | 97,357 | 36.88 | 34.88 |
| Andamans District | 57,010 | 82,589 | 36.02 | 34.40 |
| Diglipur Tahsil | 4,989 | 8,334 | 31.77 | 35.17 |
| Mayabunder Tahsil | 4,872 | 7,337 | 34.91 | 34.10 |
| Rangat Tahsil | 8,586 | 11,492 | 35.35 | 34.52 |
| Port Blair Tahsil | 28,925 | 42,992 | 37.90 | 35.11 |
| Ferrargunj Tahsil | 9,638 | 12,434 | 34.41 | 31.77 |
| Nicobars District | 12,602 | 14,768 | 41.38 | 37.85 |
| Car Nicobar Tahsil | 5,988 | 7,197 | 38.67 | 37.38 |
| Nancowry Tahsil | 6,614 | 7,571 | 44.19 | 38.30 |
| Total Rural | 51,505 | 71,602 | 37.03 | 35.05 |
| Total Urban | 18,107 | 25,755 | 36.48 | 34.43 |

It may be observed from the above statement that the number and percentage of workers in India have increased from 244,604,986 and 36.77 in 1981 to 314,903,642 and 37.64 in 1991. However, contrary to above, though the number of working population has increased from 69,612 in 1981 Census to 97,357 in 1991 Census in respect of A & N Islands. Yet its percentage to total population has come down from 36.88% in 1981 to 34.88% in 1991. The district wise analysis shows that the percentage of working population in the district of Andamans was less than the percentage of working population for the territory as a whole in 1981 as well as in 1991. In case of Nicobars district, the percentage of working population was higher than the average percentage for the union territory as a whole in 1981 as well as in 1991. Rural and urban analysis of the working population shows that in 1981 the percentage of working population in rural area was 37.03 which has come down to 35.05 in 1991. Similarly, in the urban area also the percentage of working population in 1981 was 36.48 which has come down to 34.43 in 1991. It is quite interesting to note that in both the census periods, the percentage of working population in rural areas was higher than the average for A & N Islands. However, it was vice-versa for urban area.

Statement 5 persents distribution of population by main workers and marginal workers in 1991 Census.

Statement 5

Distribution of population by main workers and marginal workers, 1991 Census

| Union Territory/District/ Tahsil/Rural/Urban | Population | | | Main workers | | | Marginal workers | | |
|---|---|---|---|---|---|---|---|---|---|
| | Persons | Males | Females | Persons | Males | Females | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| **India (Excluding J & K)** | 836,605,522 | 433,791,705 | 402,813,817 | 285,422,913 | 219,233,479 | 66,189,434 | 29,480,729 | 4,272,674 | 25,208,055 |
| A & N Islands | 279,111 | 153,323 | 125,788 | 89,223 | 78,878 | 10,345 | 8,134 | 2,300 | 5,834 |
| Andamans District | 240,089 | 132,193 | 107,896 | 75,961 | 67,841 | 8,120 | 6,628 | 2,049 | 4,579 |
| Diglipur Tahsil | 23,694 | 12,763 | 10,931 | 7,440 | 6,778 | 662 | 894 | 208 | 686 |
| Mayabunder Tahsil | 21,513 | 11,576 | 9,937 | 6,450 | 5,727 | 723 | 887 | 103 | 784 |
| Rangat Tahsil | 33,295 | 18,074 | 15,221 | 9,556 | 8,682 | 874 | 1,936 | 733 | 1,203 |
| Port Blair Tahsil | 122,452 | 68,702 | 53,750 | 41,632 | 36,711 | 4,921 | 1,360 | 499 | 861 |
| Ferrargunj Tahsil | 39,135 | 21,078 | 18,057 | 10,883 | 9,943 | 940 | 1,551 | 506 | 1,045 |
| Nicobars District | 39,022 | 21,130 | 17,892 | 13,262 | 11,037 | 2,225 | 1,506 | 251 | 1,255 |
| Car Nicobar Tahsil | 19,252 | 10,087 | 9,165 | 6,630 | 5,030 | 1,600 | 567 | 65 | 502 |
| Nancowry Tahsil | 19,770 | 11,043 | 8,727 | 6,632 | 6,007 | 625 | 939 | 186 | 753 |
| Total Rural | 204,301 | 111,051 | 93,250 | 63,829 | 56,499 | 7,330 | 7,773 | 2,035 | 5,738 |
| Total Urban | 74,810 | 42,272 | 32,528 | 25,394 | 22,379 | 3,015 | 361 | 265 | 96 |

Statement 5 reveals that in India the strength of main workers was 285,422,913 persons which consisted of 219,233,479 males and 66,189,434 females. The strength of marginal workers in India was 29,480,729 persons which consisted of 4,272,674 males and 25,208,055 females. It may be seen from the above statement that in A & N Islands also out of a total working force of 97,357 persons, the number of main workers was 89,223 which consisted of 78,878 males and 10,345 females. Similarly, the total number of marginal workers throughout the territory was 8,134 which consisted of 2,300 males and 5,834 females. The district-wise analysis shows that in the district of Andamans there were 82,589 workers of which 75,961 were main workers consisting of 67,841 males and 8,120 females and the number of marginal workers was 6,628 consisting of 2,049 males and 4,579 females. Similarly, in district of Nicobars, the total working force was of 14,768 workers of which 13,262 were main workers consisting of 11,037 males and 2,225 females. The number of marginal workers was 1,506 consisting of 251 males and 1,255 females. Tahsilwise analysis shows that the highest number of main workers i.e. 41,632 was found in Port Blair tahsil followed by 10,883 in Ferrargunj tahsil, 9,556 in Rangat tahsil, 7,440 in Diglipur tahsil, 6,632 in Nancowry tahsil, 6,630 in Car Nicobar tahsil and 6,450 in Mayabunder tahsil. In case of marginal workers the highest number i.e. 1,936 was found in Rangat tahsil followed by 1,551 in Ferrargunj tahsil, 1,360 in Port Blair tahsil, 939 in Nancowry tahsil, 894 in Diglipur tahsil, 887 in Mayabunder tahsil and 567 in Car Nicobar tahsil. A very interesting aspect which emerges out of the analysis of main workers and marginal workers is that in case of main workers males out number the females whereas in case of marginal workers females out number males.

Statement 6 persents the percentage distribution of main workers as cultivators, agricultural labourers, workers engaged in household industry and other workers in 1991 Census.

Statement 6

Percentage distribution of main workers as Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers, 1991 Census

| Union Territory/District/ Tahsil/Rural/Urban | Total Main Workers | Percentage distribution to total main workers | | | |
|---|---|---|---|---|---|
| | | Cultivators | Agriculatural labourers | Household Industry | Other Workers |
| 1 | 2 | 3 | 4 | 5 | 6 |
| **India (Excluding J & K)** | 285,422,913 | 38.75 | 26.15 | 3.63 | 31.47 |
| Andaman & Nicobar Islands | 89,223 | 16.18 | 5.46 | 6.89 | 71.47 |
| Andamans Distt. | 75,961 | 18.07 | 6.03 | 1.62 | 74.28 |
| Diglipaur Tahsil | 7,440 | 55.29 | 7.15 | 1.24 | 36.32 |
| Mayabunder Tahsil | 6,450 | 43.15 | 6.00 | 0.73 | 50.12 |
| Rangat Tahsil | 9,556 | 26.91 | 8.09 | 1.79 | 63.21 |
| Port Blair Tahsil | 41,632 | 6.52 | 2.75 | 1.60 | 89.13 |
| Ferrargunj Tahsil | 10,883 | 14.21 | 15.98 | 2.35 | 67.46 |
| Nicobars District | 13,262 | 5.37 | 2.20 | 37.05 | 55.38 |
| Car Nicobar Tahsil | 6,630 | .. | .. | 60.39 | 39.61 |
| Nincowry Tahsil | 6,632 | 10.74 | 4.39 | 13.72 | 71.15 |
| Total Rural | 63,829 | 20.52 | 7.50 | 9.19 | 60.79 |
| Total Urban | 25.394 | 0.26 | 0.32 | 1.11 | 98.31 |

Statement 6 reveals that in India the number of cultivators being 38.75% of the total main workers was highest followed by other workers 31.47%, agricultural labourers 26.15% and workers in Household industry 3.63%. Further analysis of above statement shows that in A & N Islands, there were all together 89,223 main workers of which 16.18% were cultivators, 5.46 percent were agricultural labourers, 6.89% were engaged in household industry and 71.47% were other workers. The district-wise analysis of the main workers shows that in the district of Andamans there were 75,961 main workers of which 18.07% were cultivators, 6.03% were agricultural labourers, 1.62% were in household industry and 74.28% were other workers. In Nicobars district, there were 13,262 main workers of which 5.37% were cultivators, 2.20% were agricultural labourers, 37.05% were in household industry and 55.38% were other workers. The tahsil-wise analysis shows that the highest percentage of cultivators 55.29 was found in Diglipur tahsil followed by 43.15% in Mayabunder tahsil, 26.91% in Rangat tahsil, 14.21% in Ferrargunj tahsil, 10.74% in Nancowry tahsil, 6.52% in Port Blair tahsil and there were no cultivators in Car Nicobar tahsil. The analysis of agricultural labourer shows that the highest percentage i.e. 15.98 was found in Ferrargunj tahsil followed by 8.09% in Rangat tahsil, 7.15% in Diglipur tahsil, 6.03% in Mayabunder tahsil, 4.39% in Nancowry tahsil, 2.75% in Port Blair tahsil, and nil percentage in Car Nicobar tahsil. The analysis of workers engaged in household industry shows that the highest percentage of 60.39 of such workers was found in Car Nicobar tahsil followed by 13.172% in Nancowry tahsil, 2.35% in Ferrargunj tahsil, 1.79% in Rangat tahsil, 1.60% in Port Blair tahsil, 1.24% in Diglipur tahsil and 0.73% in Mayabunder tahsil. The tahsil-wise analysis of other workers shows that the highest percentage of 89.13 was found in Port Blair tahsil followed by 71.15% in Nancowry tahsil, 67.46% in Ferrargunj tahsil, 63.21% in Rangat tahsil, 50.12% in Mayabunder tahsil, 39.61% in Car Nicobar tahsil and 36.32% in Diglipur tahsil.

The analysis of the main workers by rural and urban classification shows that out of 89,223 main workers, 63,829 were in rural areas and 25,394 were in urban area. The category-wise analysis of main workers in rural areas shows that highest number of workers i.e. 38,804 were other workers followed by 14,374 cultivators, 5,864 engaged in household industry and 4,787 agricultural labourers. The analysis of main workers in urban area shows that the highest number i.e. 24,965 were other workers followed by 283 in household industry, 80 agricultural labourers and 66 cultivators. The percentage-wise analysis of the main workers in rural areas shows that in 1991, 60.79% were other workers followed by 20.52% cultiavators, 9.19% engaged in household industry and 7.50% agricultural labourers. In urban area, 98.31% of the main workers were other workers followed by 1.11% engaged in household industry, 0.32% agricultural labourers and 0.26% cultivators.

Thus a very clear picture which emerges from the analysis is that very high percentage of main workers fall in the category of other workers both in rural and urban areas. However in rural area, the second important sector is of cultivation and agricultural labour contrary to urban area where household industry comes the second important sector.

| Nancowry Tahsil | 19,769 | 11,044 | 8,725 | 19,770 | 11,043 | 8,727 |

## APPENDIX—8

## LEVEL OF URBANISATION IN SELECTED COUNTRIES/AREAS OF THE WORLD MID 1990

| | Country/Area | Percentage of urban residence |
|---|---|---|
| | World | 45 |
| 1. | Africa | 34 |
| 2. | Latin America | 72 |
| 3. | Central America | 66 |
| 4. | South America | 75 |
| 5. | North America | 75 |
| | (i) U.S.A. | 75 |
| 6. | Asia | 34 |
| 7. | Eastern Asia | 39 |
| | (i) China | 39 |
| | (ii) Japan | 77 |
| 8. | South Eastern Asia | 30 |
| | (i) Thailand | 23 |
| 9. | Southern Asia | 27 |
| | (i) Bangaladesh | 18 |
| | (ii) Bhutan | 16 |
| | (iii) Nepal | 10 |
| | (iv) Pakistan | 32 |
| | (v) Sri Lanka | 21 |
| 10. | Western Asia | 63 |
| 11. | Europe | 73 |
| 12. | Ocenia | 71 |
| | (i) Australia | 85 |
| | (ii) New Zeland | 84 |
| 13. | U.S.S.R | 66 |
