FOREWORD

Soon after the 1981 Census enumeration, it was my privilege to present on March 23, 1981, Paper 1 of 1981 containing the provisional population totals. It contained basic information on population by sex, sex-ratio and percentage of literates for this State and each district of Uttar Pradesh. Besides, decennial growth rate since 1901, population of literates, density of population etc. for the State and its districts as also population figures of towns/urban agglomerations whose population exceeded hundred thousand were also given. It is now my proud privilege to present Supplement to Paper I which contains the following tables :

(i) Rural and Urban composition of Population
(ii) Population of Towns
(iii) Distribution of Main Workers
(iv) Distribution of Main Workers by Cultivators, Agricultural Labourers, Household Industry and Other workers.
(v) Union Primary Census Abstract.
(vi) District Primary Census Abstract.

It is hoped that this document will meet most of the needs of different data-users till a year hence when it will be possible to release the more detailed and final figures down to the village/ward level.

The information for this Supplement has been compiled from the charge abstracts received from different charges whereas the district level figures presented in Paper I were those received directly from districts. There are minor differences at places in district figures from those given in Paper 1, for obvious reasons. These figures are still strictly provisional as they may further change, though marginally, when thorough processing of census records is completed.

The whole hearted co-operation afforded by the vast fleet of workers drawn from all nooks and corners of this vast, heterogenous and most populous state of the Country to make the 1981 Census a success deserves individual acknowledgement. My thanks are due to them right from the District Officers and Administrators of Nagarmahapalikas down to the enumerators. Monitoring at the regional level by my Deputy Directors of Census Operations assisted by their subordinate staff did lighten my burden. They deserve my appreciation.

I owe a deep gratitude to Shri P. Padmanabha, Registrar General-*cum*-Census Commissioner, India, for the continuous inspiration and guidance. Grateful thanks are also due to Shri V. P. Pandey, Deputy Registrar General, for ready help in all administrative matters and to Shri K. K. Chakravorty, Dy. Registrar General, in all technical matters, pertaining to this gigantic task.

My thanks are also due to M/s. Prem Printing Press, Lucknow for their quality printing of this publication in time.

Lastly, I will be failing in my duty if I don't express my appreciation to members of the Planning and Co-ordination cell of my office who most ungrudgingly and silently worked, most of the days beyond office hours and even over night and on holidays, not only during the hectic days of Census Operations but also in the generation of the large tabulations and drafting of Paper I and this supplement to it. The Map unit also deserves my thanks for the maps and charts and the Printing Section in looking through the printing with utmost expedition and grace. The yeoman's task of typing out the manuscripts with voluminous tables within the shortest possible time by S/Shri Ram Dass, Narendra Kumar and Surya Kant Prasad of my office is also acknowledged.

RAVINDRA GUPTA
Director of Census Operations, U. P.

Lucknow.
Dated June 6, 1981.

CENSUS OF INDIA 1981

FIGURES AT A GLANCE

(PROVISIONAL)

		Persons	Males	Females
A. POPULATION OF UTTAR PRADESH	Total	110,885,874	58,793,073	52,092,801
	Rural	90,912,651	47,974,536	42,938,115
	Urban	19,973,223	10,818,537	9,154,686

B. PROPORTION TO TOTAL POPULATION	Rural	81.99	Percent
	Urban	18.01	Percent
C. DECENNIAL POPULATION GROWTH (1971-81)	Total	25.52	Percent
	Rural	19.70	Percent
	Urban	61.22	Percent
D. DENSITY OF POPULATION	Total	377	
	Rural	313	
	Urban	455	
E. SEX RATIO	Total	886	
	Rural	895	
	Urban	846	

		Persons	Males	Females
F. LITERACY RATE (CRUDE) (Percentage)	Total	27.40	38.90	14.42
	Rural	23.34	35.40	9.86
	Urban	45.91	54.44	35.82
G. PROPORTION OF MAIN WORKERS TO TOTAL POPULATION (Percentage)	Total	29.13	49.61	6.02
	Rural	29.57	50.17	6.54
	Urban	27.15	47.10	3.58
H. PROPORTION OF MAIN WORKERS BY BROAD CATEGORIES	Cultivators	58.02	59.26	46.43
	Agricultural Labourers	16.32	14.42	34.00
	At Household Industry	4.39	4.24	5.86
	Other Workers	21.27	22.08	13.77

BACKGROUND NOTE

BACKGROUND NOTE

The State of Uttar Pradesh is divided into 56 administrative districts including two new districts— Ghaziabad and Lalitpur, which were created during the decade 1971-81. The old Kanpur district has also been bifurcated into Kanpur Nagar and Kanpur Dehat districts—effective April 23rd, 1981. The former covers the Kanpur tahsil including Kanpur Nagar Mahapalika and the latter comprises the remaining tahsils of Bilhaur, Derapur, Akbarpur, Bhognipur and Ghatampur. Since this has come about after the completion of Census Operations, separate figures have not been presented. They can, however, be obtained from the tables presented, after allocating relevant figures of the different constituent units of Kanpur Dehat and Kanpur Nagar. In addition, some new tahsils were also constituted during the decade as per details given in Appendix. 1.

RURAL & URBAN

2. Census data have always been presented for rural and urban areas separately. In fact, this is the practice all over the world. Any clear-cut distinction between rural and urban has yet not been possible anywhere, far less to have a uniform definition for all the countries. However, after giving considerable thought, the following criteria were adopted for treating a place as urban for the 1981 Census:–

(a) All statutory towns, *i.e.*, all places with a municipal corporation, municipal board or cantonment board or notified town area.

(b) All other places which satisfy the following criteria :

  (i) A minimum population of 5,000;

  (ii) 75% of the male working population engaged in non-agricultural (and allied) activity; and

  (iii) A density of population of at least 400 per sq. km. (or 1,000 per sq. mile).

Occupations of fishing, livestock, hunting, logging, plantations and orchards etc. falling in industrial category III were treated as non-agricultural activities while classifying towns for the 1961 and 1971 Censuses. A small but meaningful change was made for the 1981 Census by treating 'fishing, logging etc.' as allied agricultural activities for examination under (b) (ii) above. Places which qualify as urban under (b) above have been termed 'Census Towns' (CT) since they have no local body *viz.* MC, MB, Cantt., NA, TA.

Most of the Town Areas do not satisfy the criteria laid under (b) above. However, since (a) and (b) are mutually exclusive, all statutory towns have to be classified as urban. Consequently, in 1981, all Town Areas irrespective of their characteristics were treated as urban. The number of towns in the state has, therefore, gone up from 325 in 1971 to 704 in 1981.

A city in census parlance is a town with a population of one hundred thousand and above.

URBAN AGGLOMERATION (UA)

The concept of urban agglomeration (UA) adopted for the 1971 Census continued for the 1981 Census. The UA defined the continuous urban spread at a place which may cover more than one town, with their urban outgrowths. This was an improvement on the Town group concept of 1961 where the urban spread was necessarily not continuous. It is common knowledge that some urban settlements like residential colonies, campuses etc. come up outside the notified limits of a town, but adjoining it. Such settlements may not by themselves qualify under clause (b) of the definition to be treated as census town but if they form a continuous spread with the adjoining town, it would only be realistic to treat them as urban. Such settlements have been termed as outgrowths (OG) and may cover a whole village or part of a village. Two or more towns may also lie contiguous to one another. A census

town (*i. e.* without a local body) may also lie contiguous to a notified town. An urban agglomeration, therefore, constitutes :-

(a) A city or town with contiguous outgrowth(s) (the outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages); or
(b) two or more adjoining towns with their outgrowth(s) as in (a); or
(c) a city with one or more adjoining towns with their outgrowths all of which form a continuous spread.

An urban agglomeration exceeding a population of one hundred thousand is called a city UA, otherwise, it is a town UA.

After finalising the list of towns and urban agglomerations in each district and tahsil, what remains is rural. The basic unit in rural areas is a revenue village which has normally well defined survey boundaries. In unsurveyed villages in forest/hill areas, locally recognised natural boundaries are adopted to define the village areas. In case of reserved forest areas which are not part of any revenue village, forest range officer's beat was treated as one forest village. This mention of a village etc. is only of topical interest here as we are not going below tahsil level presently.

Out of 382 towns which were added to the list of towns in 1981, 198 are entirely new and 184 existed as towns prior to the 1961 Census but were declassified as such in 1961 and 1971. Faizabad-cum-Ayodhya M. B. of 1971 has been bifurcated into two towns, *viz.*, Faizabad M. B. and Ayodhya M. B. in 1981. Two towns of 1971 Census, *viz.*, Rasulpur Dhulri C. T. of Meerut and Markundi C. T. of Mirzapur which did not satisfy the conditions necessary for treating a place as urban were taken out from the list of towns for the 1981 Census. Further, two independent towns of 1971 Census lost their identity having merged with other towns. They are Malyana and Kaila towns which got merged in Meerut MB and Ghaziabad MB respectively after the 1971 Census. A list of towns treated as such for the first time in 1981 is given at Appendix 2. The 704 towns of the State consist of 5 Municipal Corporations, 187 Municipal Boards, 22 Cantonment Boards, 47 Notified Areas, 418 Town Areas and 25 Census Towns. Districtwise breakup of the towns by local status is given at Appendix 3. The list of 26 urban agglomerations in the State is at Appendix 4. After clubbing constituent towns of each urban agglomeration, the number of urban agglomerations and independent towns comes to 659.

Table 2 of this Supplement gives the population figures of each town/city/UA by 6 size groups :

Class I	Above 100,000
Class II	50,000 - 99,999
Class III	20,000 - 49,999
Class IV	10,000 - 19,999
Class V	5,000 - 9,999
Class VI	Below 5,000

WORKERS AND NON-WORKERS

The population is divisible into workers and non-workers which is arrived at on the basis of entries against economic questions (14 A to 16) included in the individual slip. At the 1981 Census, instead of a dichotomy of workers and non-workers, a trichotomy of main workers, marginal workers and non-workers has been adopted. For main workers, a time criterion of engagement in work for major part of preceding year, *i.e.*, atleast six months or 183 days, was adopted while those who worked for some time during the preceding year but not for the major part, have been treated as marginal workers.

By work is meant participation in any economically productive work through physical or mental activity. It involves not only actual work but also effective supervision and direction of work.

The main workers have further been classified as (i) Cultivators, (ii) Agricultural labourers, (iii) in Household industry and (iv) Other workers, as defined below :

Cultivator

For purposes of the Census a person is working as cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Govt. or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

Agricultural Labourer

A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation and has no right of lease or contract on land on which he/she works.

However, one was classified as a cultivator or agricultural labourer only when he was engaged in the growing of the following crops:—

(i) Cereal and millet crops
(ii) Pulses
(iii) Fibre crops : Raw cotton, jute, mesta, sunhemp, and kindred fibre crops
(iv) Oilseeds
(v) Cash crops : sugarcane

The growing of plantation, orchards, flowers, vegetables, medicinal, spices crops etc. was not considered as cultivation.

Household Industry

Household Industry is defined as an industry conducted by the head of the household himself/ herself and/or by the members of the household at home or within the village in the case of rural areas and only within the precincts of the house in which the household lives in the case of urban areas. The workers in a household industry should largely consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act. Lastly, a household industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods.

Other Workers

All other workers, *i. e.*, those who have been engaged in some economic activity during the last one year, but are not cultivators or agricultural labourers or in household industry, are 'other workers'.

It may be pertinent here to mention the concepts of work adopted at the 1961 and 1971 Censuses. At the 1961 census, a person qualified as worker if he had worked regularly during the last season or if he had worked at least a day in regular (non-seasonal) work during the preceding fortnight. At the 1971 Census a person was treated as worker only if he spent his time mainly in work or if he worked at least a day in regular (non-seasonal) work during the preceding week. During the 1981 Census, the usual status approach has been adopted uniformly for all work.

Non-workers are those who did not work any time during the preceding year. They comprise those engaged whole time in household duties, as students, dependents, retired persons or rentiers, beggars etc., inmates of institutions and other non-workers.

Facsimiles of Household Schedule and Individual slip canvassed at the 1981 Census are given as Appendices 5 and 6 respectively. The individual slip canvassed universally consisted of questions 1-16 only. Additional 6 questions on migration and fertility were canvassed in a 20% sample of enumeration blocks.

PHYSICALLY HANDICAPPED PERSONS

During the Houselisting operations the number of totally blind, totally crippled and totally dumb persons normally residing with the households was collected. The houseless persons were, of course, not covered. The information thrown up is presented in Table 5 by each district and its rural and urban areas separately.

APPENDIX—1

NEW DISTRICTS/TAHSILS CREATED AFTER THE 1971 CENSUS AND BEFORE THE 1981 CENSUS

Name of the District/Tahsil (1981 Census)	Name of District(s)/Tahsil(s) from which the new District/Tahsil mentioned in column 1 was created
1	2
Newly created Districts	
1. Ghaziabad District	Entire Tahsil Ghaziabad (Distt. Meerut) and portions of Tahsils Hapur (Distt. Meerut) and Sikandarabad (Distt. Bulandshahr).
2. Lalitpur District	Entire Tahsils Lalitpur & Mahroni of Distt. Jhansi.
Newly created Tahsils	
1. Bageshwar Tahsil (Distt. Almora) ..	Portion of Tahsil Almora (Distt. Almora)
2. Kotdwara Tahsil (Distt. Garhwal) ..	Portion of Tahsil Lansdowne (Distt. Garhwal)
3. Sitarganj Tahsil (Distt. Nainital) ..	Portion of Tahsil Khatima (Distt. Nainital)
4. Dadri Tahsil (Distt. Ghaziabad) ..	Portions of Tahsils Sikandrabad (Distt. Bulandshahr) and Ghaziabad (Distt. Meerut)
5. Garhmukteshwar Tahsil (Distt. Ghaziabad) ..	Portion of Tahsil Hapur (Distt. Ghaziabad)
6. Dhaurehra Tahsil (Distt. Kheri) ..	Portion of Tahsil Nighasan (Distt. Kheri)
7. Mahmudabad Tahsil (Distt. Sitapur) ..	Portion of Tahsil Sidhauli (Distt. Sitapur)
8. Bhinga Tahsil (Distt. Bahraich) ..	Portion of Tahsil Bahraich (Distt. Bahraich)
9. Talbehat Tahsil (Distt. Lalitpur) ..	Portion of Tahsils Lalitpur & Mahroni (Distt. Jhansi)
10. Kulpahar Tahsil (Distt. Hamirpur) ..	Portions of Tahsils Charkhari & Mahoba (Distt. Hamirpur)

Note : Though the old tahsil Karchhana (Distt. Allahabad) was bifurcated into two tahsils Bara and Karchhana effective November 11, 1980, the Census data is being presented for the old Karchhana tahsil only as this change was effected after the houselisting operation.

IMPORTANT INSTRUCTIONS

1 Record location code on each schedule and form, etc.

2 Do not leave any household or person uncovered in your block.

3 Do not forget to enter columns 1 to 7 of the Population Record before starting individual enumeration.

4 Do not forget to make repeated enquiries about young children, newly born babies and visitors not enumerated elsewhere.

5 Enter serial number of mother if present in the household against her son and daughter aged 10 years and below.

6 While making entries for names of Scheduled Castes/ Scheduled Tribes, check names of Scheduled Castes/ Scheduled Tribes with list supplied to you by your supervisor.

7 Write legibly.

8 Do not do overwriting.

9 Do not hesitate to ask your supervisor if you have doubt on any matter.

10 Do not allow your work of filling up of entries in the Population Record to accumulate. It should be completed for enumeration done at the end of each day's work.

11 Do not misplace or lose any of your forms or papers while performing duties as census enumerator.

12 During revisional round, fill in fresh slips for newly born babies and update the Population Record.

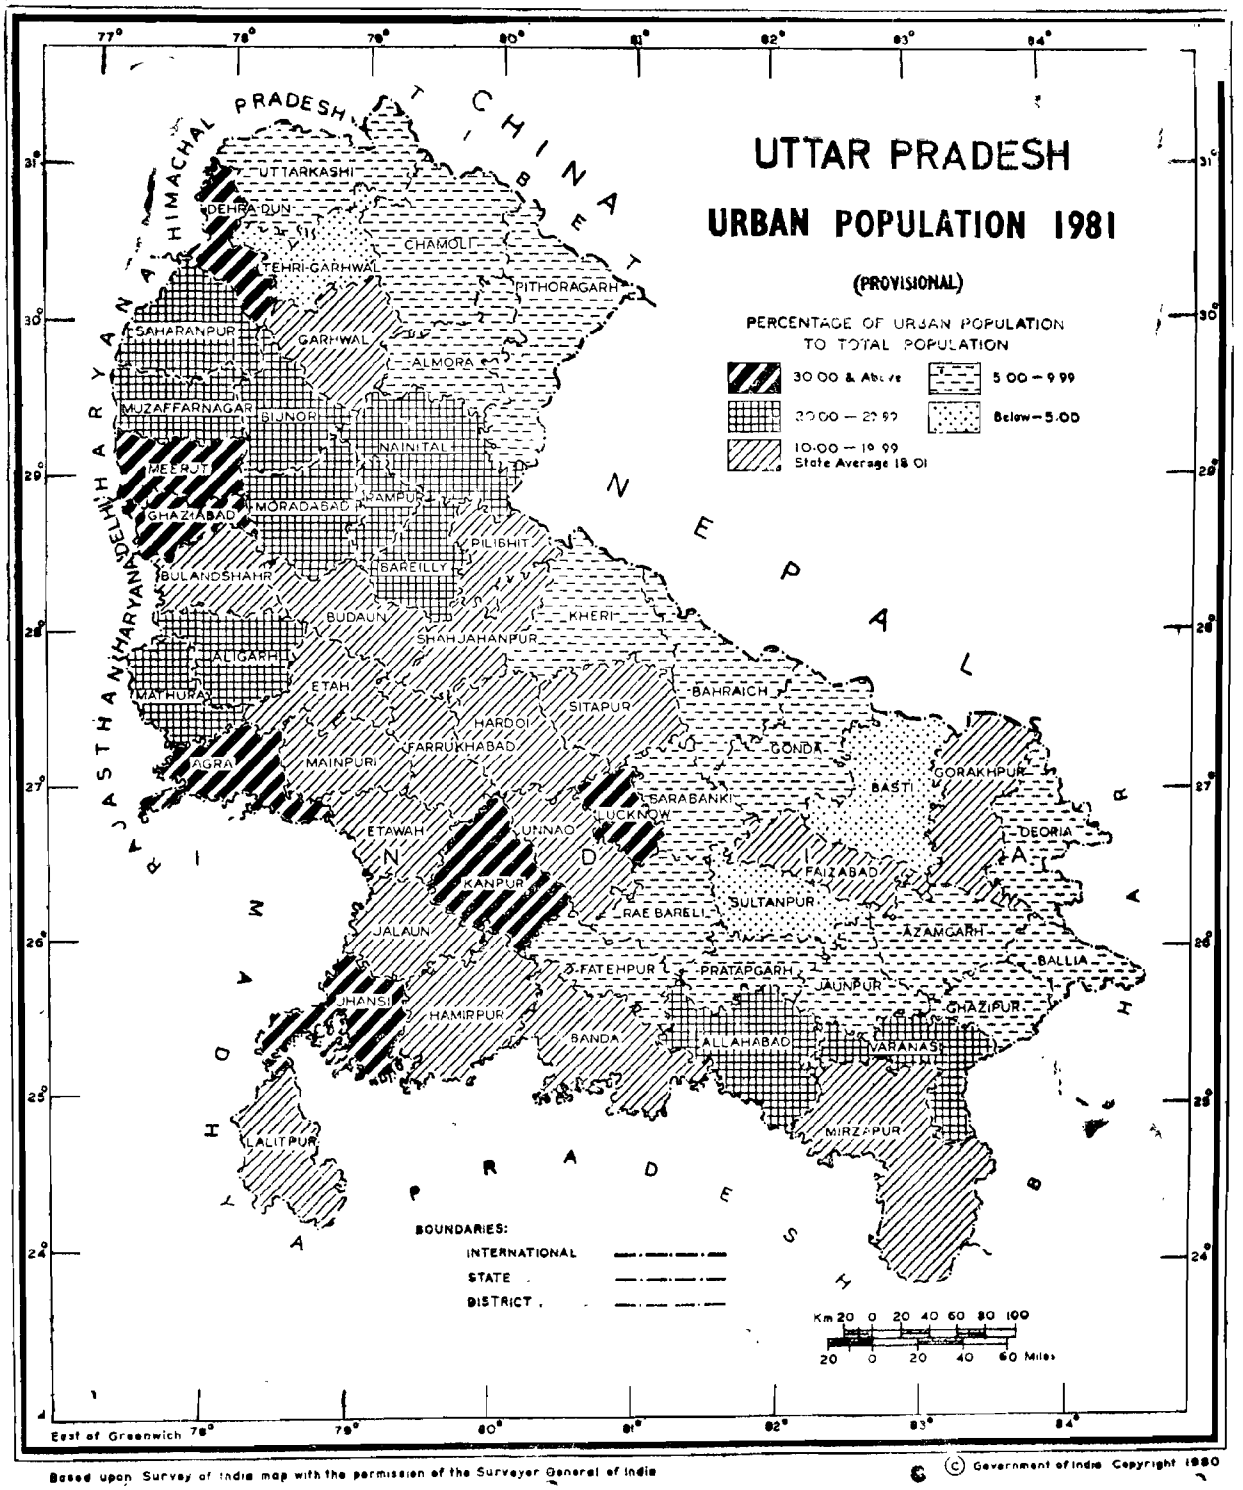

13 Cover households which have shifted to your block after your first visit but before sunrise of 1st March, 1981, if not enumerated already in some other block.

14 In case of any death in your block before sunrise of 1st March, 1981, cancel slip of that person if enumerated by you and make necessary corrections in the Population Record also.

15 While ticking for information in columns 8 to 35 in the Population Record, make sure that columns 8 to 21 refer to males and columns 22 to 35 to females.

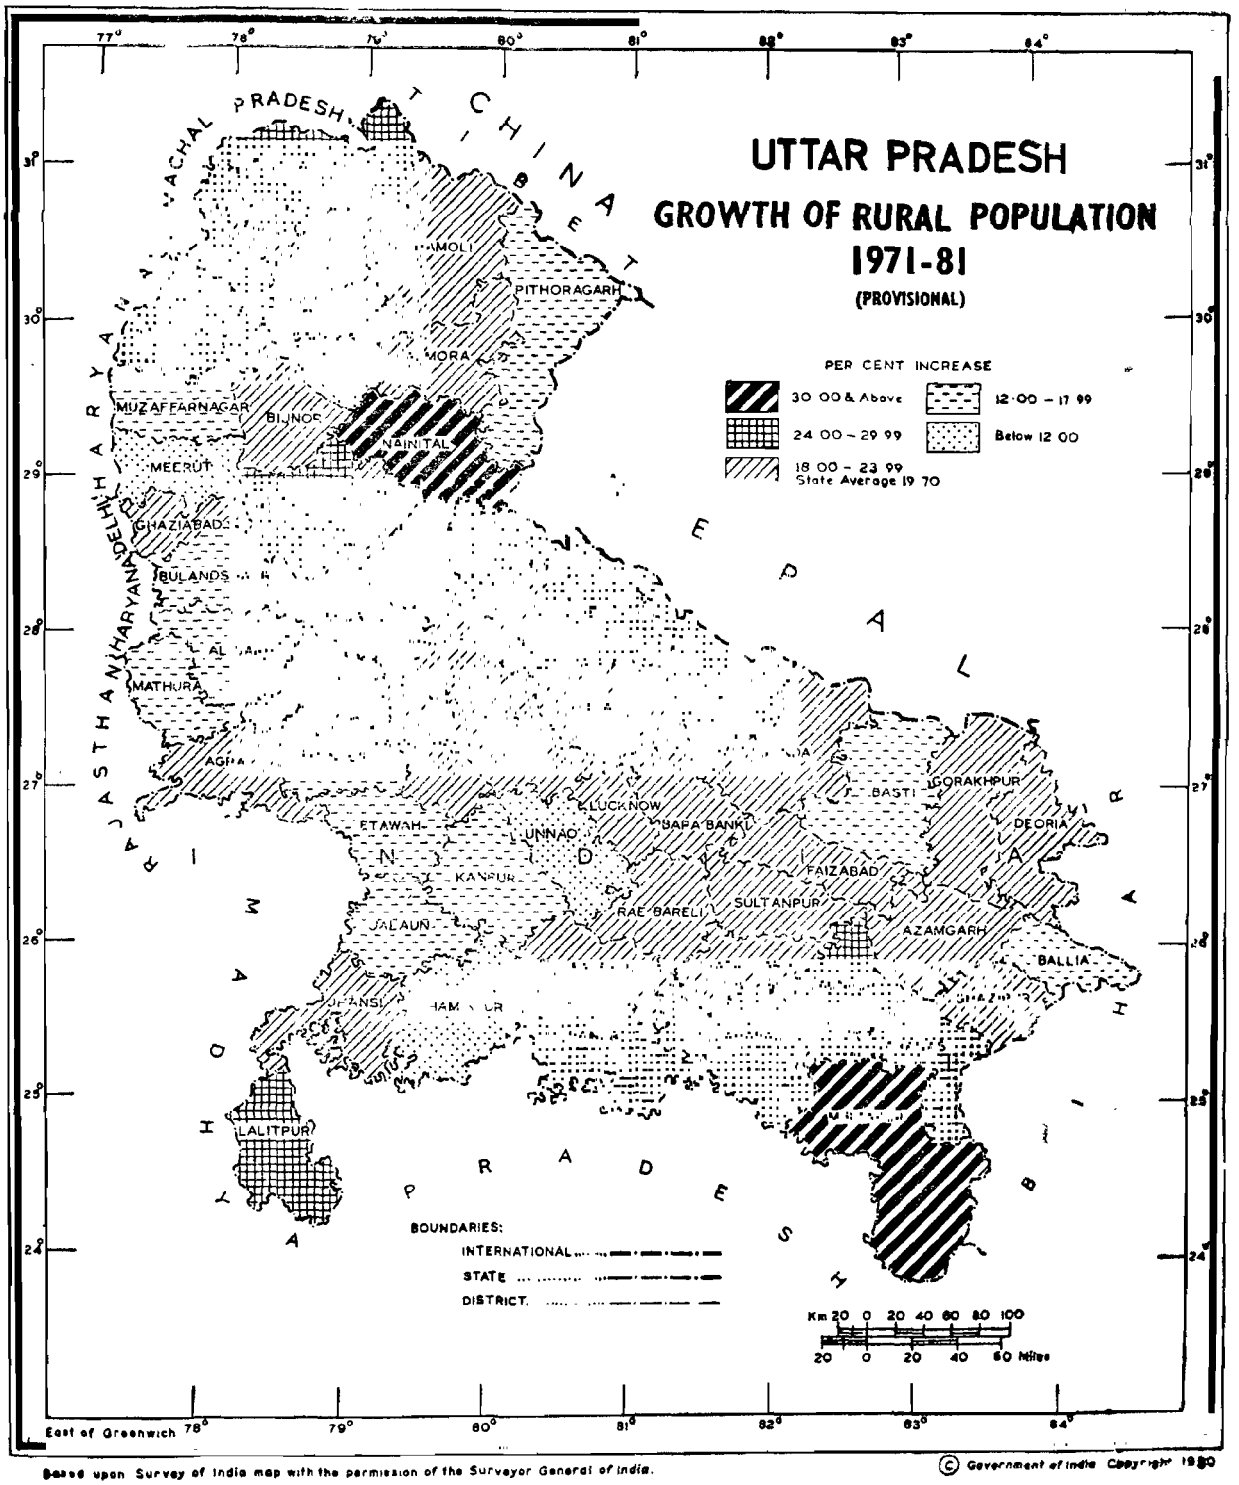

16 Check totals of columns in the Population Record before posting in working sheets for enumerator's abstract.

ANALYSIS OF DATA

Uttar Pradesh recorded a population (provisional) of 110,885,874 at the sun-rise of 1st March, 1981, comprising 58,793,073 males and 52,092,801 females. Of these 90,912,651 are in the rural areas and 19,973,223 in the urban. Gorakhpur (3,795,735) ranks first amongst the 56 districts in population followed by Kanpur, Allahabad, Varanasi, Basti and Azamgarh which all have a population above 3 million. The hill district of Uttarkashi has the lowest population of 190,571 only in the state.

RURAL/URBAN COMPOSITION

There has been an increase in the percentage of urban population in the State from 14.02 to 18.01 since 1971. Obviously nearly 82 per cent of the State as a whole is still rural. Amongst districts, Lucknow, Dehra Dun, Kanpur, Agra and Jhansi are highest on the ladder of urbanization with percentages of 52.48, 49.21, 47.03, 38.93 and 37.69 respectively. These districts have maintained their order in urbanisation during the decade. At the lowest rung of the ladder stand Sultanpur, Tehri-Garhwal, Basti, Pratapgarh and Pithoragarh where urbanisation ranges from 3.31 per cent to 5.64 per cent. Almora is the only striking case where the percentage of urban population has gone down by 0.04 per cent during the decade, due to higher growth rate of 19.22 per cent in the rural areas as against 18.42 per cent in 1971. The following statement summarises the position as obtained in 1971 vis-a-vis 1981 regarding the first five districts with maximum and minimum percentages of urbanisation in the State :

STATEMENT—1

First five districts having maximum and minimum percentage of urban to total population 1971 and 1981

Districts having maximum percentage		State average	Districts having minimum percentage	
1971				
1. Lucknow	(50.90)	14.02	1. Pratapgarh	(1.96)
2. Dehra Dun	(47.08)		2. Sultanpur	(1.97)
3. Kanpur	(42.80)		3. Basti	(2.52)
4. Agra	(36.61)		4. Unnao	(2.57)
5. Jhansi	(32.10)		5. Tehri-Garhwal	(2.65)
1981				
1. Lucknow	(52.48)	18.01	1. Sultanpur	(3.31)
2. Dehra Dun	(49.21)		2. Tehri-Garhwal	(4.17)
3. Kanpur	(47.03)		3. Basti	(4.81)
4. Agra	(38.93)		4. Pratapgarh	(5.07)
5. Jhansi	(37.69)		5. Pithoragarh	(5.64)

In absolute term, district Basti has the largest component of rural population (3,404,916) followed by Gorakhpur (3,394,899), Deoria (3,255,923), Azamgarh (3,215,334) and Allahabad (3,010,921). On the other hand Kanpur district has the largest urban population (1,782,665) followed by Agra (1,110,364) and Lucknow (1,058,633). Smallest rural population is in Uttarkashi (177,308) followed up by Chamoli (335,507), Dehra Dun (384,607), Pithoragarh (452,547) and Tehri-Garhwal (472,665). The hill districts have also very small urban components: Uttarkashi (13,263), Tehri-Garhwal (20,580), Pithoragarh (27,053) and Chamoli (28,780). Amongst the districts of the Plains and Jhansi Upland smallest rural population (509,635) is in the newly formed Lalitpur district while in urban

population Sultanpur comes at the bottom with a figure of only 67,379. Barring the districts (excluding Dehra Dun and Nainital) of Himalayan Hills, Sultanpur and Pratapgarh of the Plains and Lalitpur of Jhansi Upland, all districts of the state have an urban population exceeding one lakh.

U. P. in all India Context

Excluding Assam and Jammu & Kashmir amongst the remaining 20 states, U. P. stands 14th in urbanisation. Maharashtra stands on top while Himachal is at the bottom. However, in terms of absolute urban population, U. P. is only exceeded by Maharashtra. Statement 2 gives the urban population in the States and Union Territories as per the 1981 Census:

STATEMENT—2

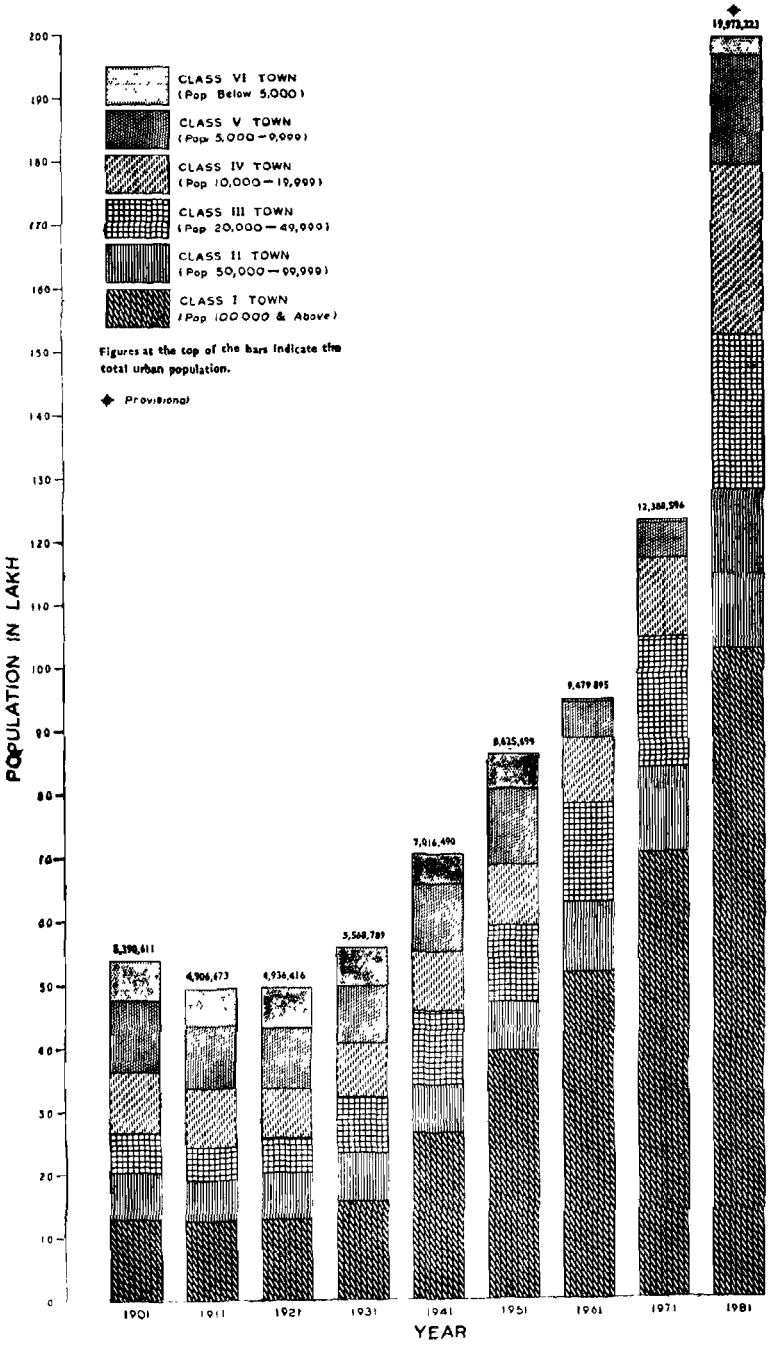

Urban Population in the States and Union Territories, 1981 (Provisional)

Sl. No.	India/State/Union Territory	Total population	Urban population	Urban population per cent of total population

*Excludes Assam and Jammu & Kashmir

PROGRESS OF URBANISATION IN UTTAR PRADESH

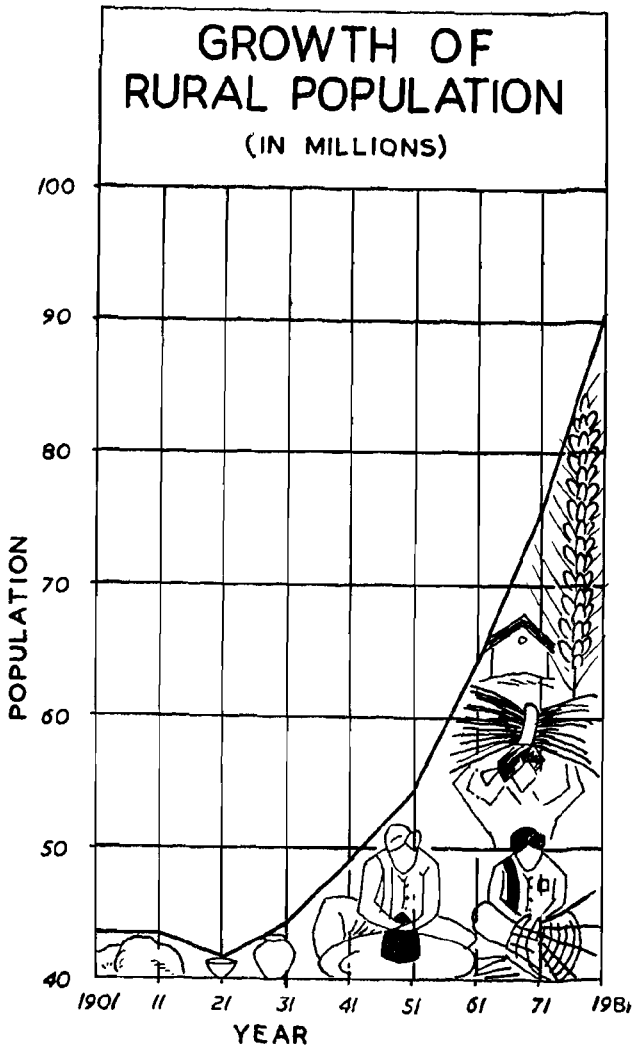

1901-1981

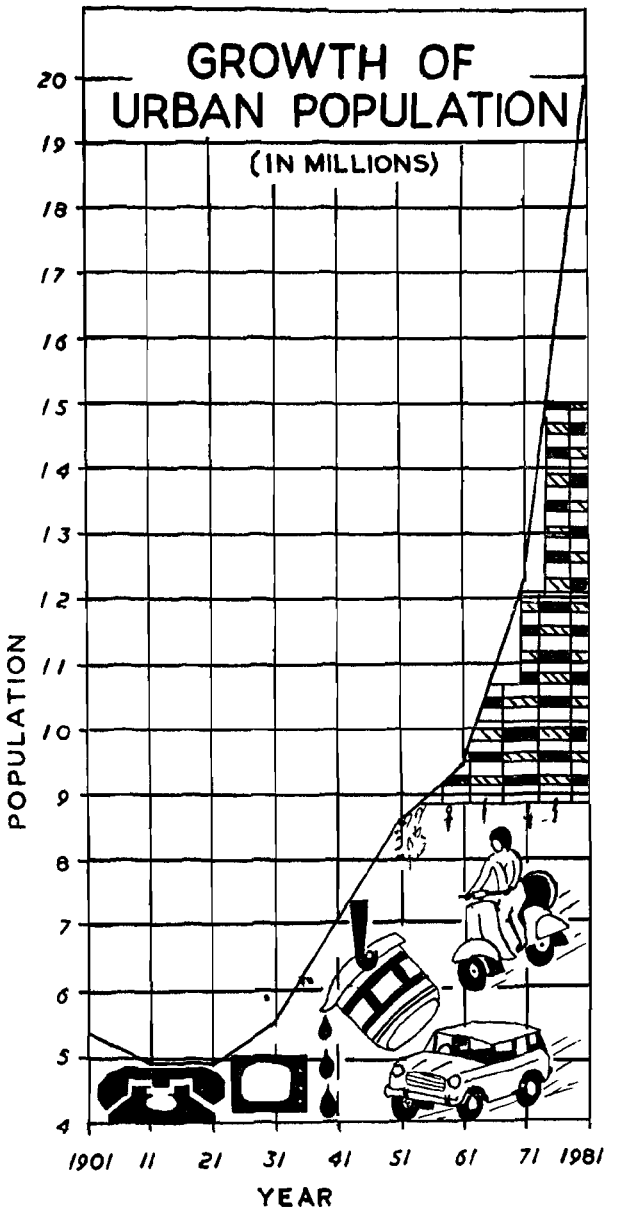

GROWTH OF POPULATION

The population of U. P. has gone up by 25.52 per cent in 1971-81 as against 19.79 per cent in 1961-71. It is higher than the decadal growth rate of the country as a whole (24.75%). Uttar Pradesh is one of the two states (the other being Karnataka) which have shown higher growth rates than the all India average in 1981, though they had, since 1901, a lower growth rate than the all India average in all the decades.

Since 1901 the population of this state has gone up from a mere 48.6 million to 110.9 million which means more than doubling itself. During 1901-11, the population declined by half a million. It further went down by one and a half million during 1911-21. Thereafter during 1921-31 it went up by 3 million and further marked an increase of 6.8 million during 1931-41. The increase remaining nearly static in the next decade, heightened its pace in subsequent decades. The decade 1971-81 seems to have touched the peak growth rate.

Amongst districts, the highest growth rate has been recorded by the Nainital district (43.42%) followed by Ghaziabad (39.22%). The districts showing a growth rate of 25% above the state average are Lalitpur (34.42 %), Pilibhit (33.80%), Kheri (32.04%) and Mirzapur (31.97%). The other districts are more or less evenly distributed on either side of the mean.

The rural population has more than doubled since 1901 from a mere 43.2 million to a staggering 90.9 million. The rural growth rate ranges from 7.91% (Garhwal) to 33.16% (Nainital). The districts which are above the state average are Uttarkashi of Kumaon Himalaya North, Dehra Dun and Tehri-Garhwal of Western Kumaon Himalaya Siwalik and Doons, Nainital of Kumaon Himalaya East, Saharanpur, Ghaziabad and

Moradabad of Northern upper Ganga Plain, Pilibhit, Shahjahanpur, Farrukhabad and Kheri of Southern upper Ganga Plain, Allahabad, Sitapur, Lucknow, Rae Bareli, Bahraich, Gonda, [redacted], Faizabad, Sultanpur and Pratapgarh of Middle Ganga Plain West, Gorakhpur, Jaunpur, Ghazipur and Varanasi of Middle Ganga Plain East, Banda and Lalitpur of Jhansi uplands and Mirzapur of Mirzapur upland.

The urban population has quadrupled from a mere 5.4 million in 1901 to 20 million to-day. During the last decade it has shown a percentage increase of 61.22 per cent. Striking growth rate has been registered in the urban areas of Unnao (465.69%), Pratapgarh (228.32%), Deoria (178.46%), Rae Bareli (172.03%), Ballia (142.00%), Chamoli (135.79%), Basti (128.25%), Ghazipur (123.53%), Uttarkashi (120.32%), Azamgarh(113.31%) Sultanpur (108.41%), Budaun (106.50%), Kheri (105.78)%, and Hamirpur (102.43%). Thus in these districts, urban population has more than doubled itself during the preceding 10 years. The lowest growth rate in urban areas has been recorded in Almora. It is noteworthy that in Almora the rural growth rate is higher than the urban growth rate. Districts where the urban growth rate is much lower (i. e., below 45 percent) than the State average are : Almora (18.42%), Lucknow (28.56%), Agra (31.37%), Jaunpur (35.45%), Dehra Dun (37.12%), Etah (37.36%), Varanasi (38.23%), Kanpur (39.02%), Allahabad (41.99%) and Mirzapur (44.29%). It is noteworthy that all the five KAVAL city districts figure in them. As the big cities form a major chunk of urban population in their districts, the urban growth rate is highly weighted by their population. Excepting Almora, Jaunpur, Mirzapur and Etah the remaining districts with a comparatively lower urban growth rate have a high percentage of urban population. The strikingly high urban growth is mainly due to the inclusion of a number of new towns due to the definitional change adopted for the 1981 Census.

DENSITY OF POPULATION

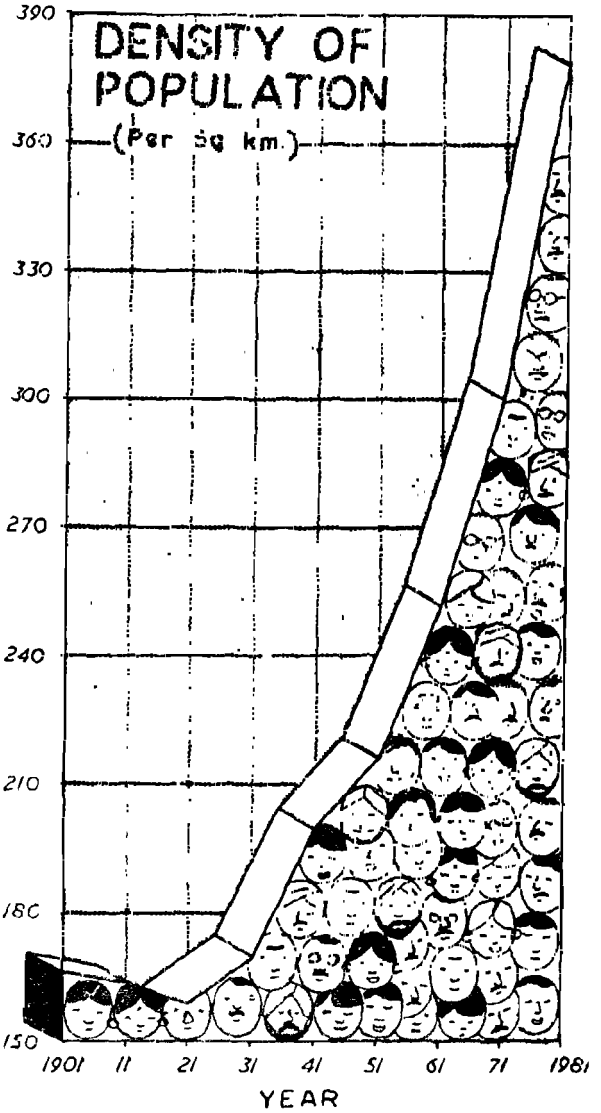

The overall density of population (i. e. persons per sq. km. area) in the State comes to 377, as against 300 in 1971. Thus 77 more persons are occupying a square kilometre area than in 1971. It has more than doubled since 1901 when it was 165.

Amongst all the 22 states of India, Uttar Pradesh stands fourth, the top three being Kerala (654) West Bengal (614) and Bihar (402). It is worthy of note that in 1901, U. P. had the same density (165) as that in Kerala, a little lower than that of West Bengal (191) and little higher than in Bihar (157). The density for the country as a whole now stands at 221, excluding Jammu and Kashmir, as against only 77 in 1901.

Amongst districts the density varies from 24 (Uttarkashi) to 798 (Lucknow). On top are Lucknow, Varanasi (726), Ghaziabad (721), Meerut (707) and Deoria (640) while at the bottom come Uttarkashi, Chamoli (40), Pithoragarh (54), Tehri-Garhwal (112) and Garhwal (115).

In the rural areas of the state, the density of population stands at 313. It varies from 22 in Uttarkashi to 607 in Deoria. The rural areas of eastern U. P. are noted for high density varying from 537 (Ghazipur) to 607 (Deoria). At the bottom come the hill districts and Lalitpur.

In case of urban areas it stands at 455 for the state as a whole varying from 432 (Chamoli) to a staggering 9587 (Varanasi). A density of over 7500 persons per sq. km. obtains in Varanasi, Shahjahanpur, Gorakhpur, Pilibhit, Agra, Moradabad and Muzaffarnagar. It is lower than the state average only in Chamoli, followed by the other Hill districts of Pithoragarh, Uttarkashi, Tehri-Garhwal, Garhwal and Almora.

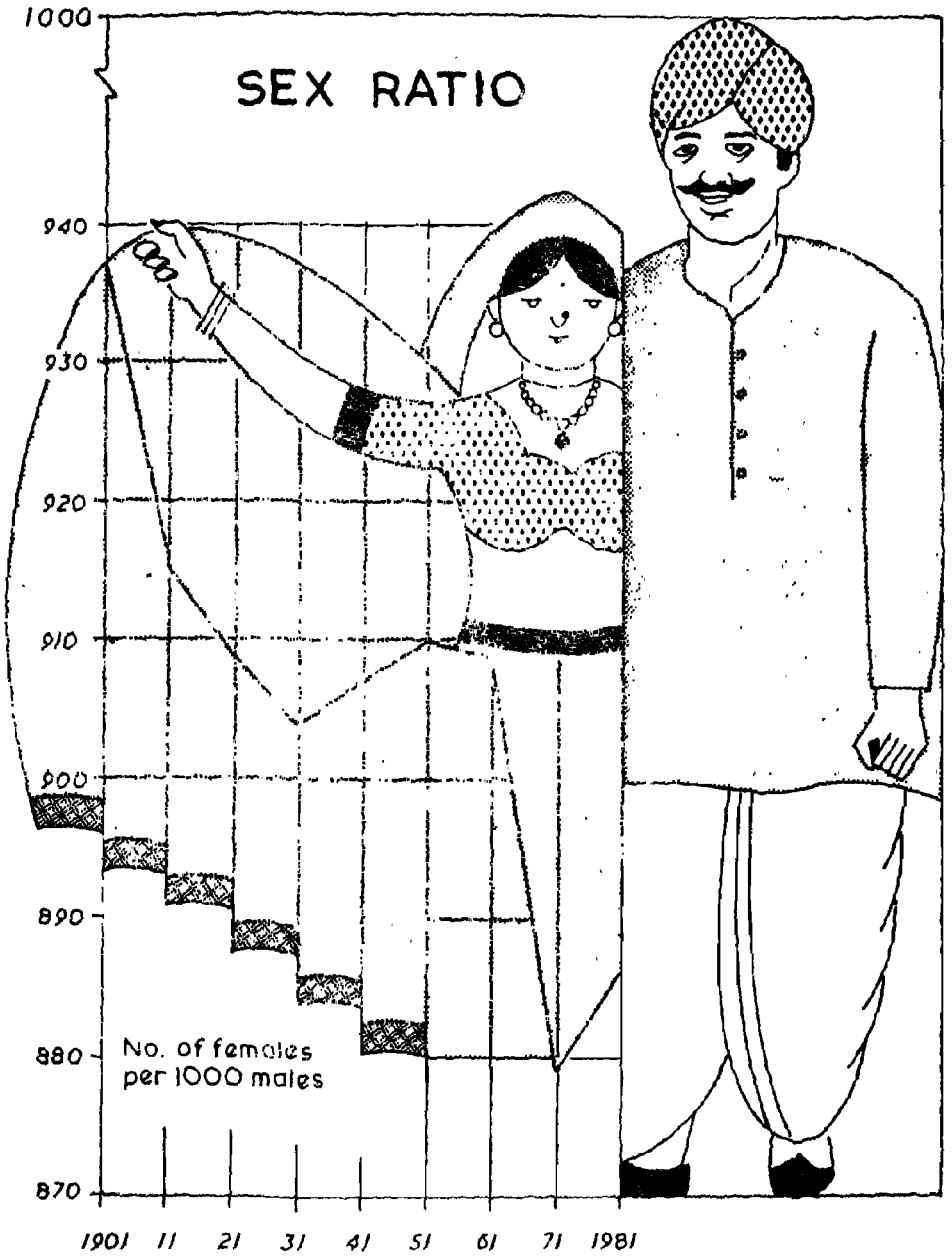

SEX RATIO

The world over empirical studies have revealed that about 106 males are born against 100 famales. This imbalance is evened by age 4 due to comparatively somewhat higher mortality amongst male children as against female. Thus if one lived where one was born there should nearly be equal sex ratio in all areas. But due to migration basically, the sex ratio, i. e., the number of females per one thousand males, varies from one administrative area to other.

The sex ratio of the state as a whole stands at 886 in 1981 as against 935 at the country level. It has marked an increase by 7 points since 1971. The sex ratio had shown a continuous decline from 1901 (937) to 1931 (904). It started rising touching 910 in 1951 but again declined to 879 in 1971.

Our State has the same sex ratio as in Punjab in 1981 and is higher than only Haryana, Arunachal Pradesh.

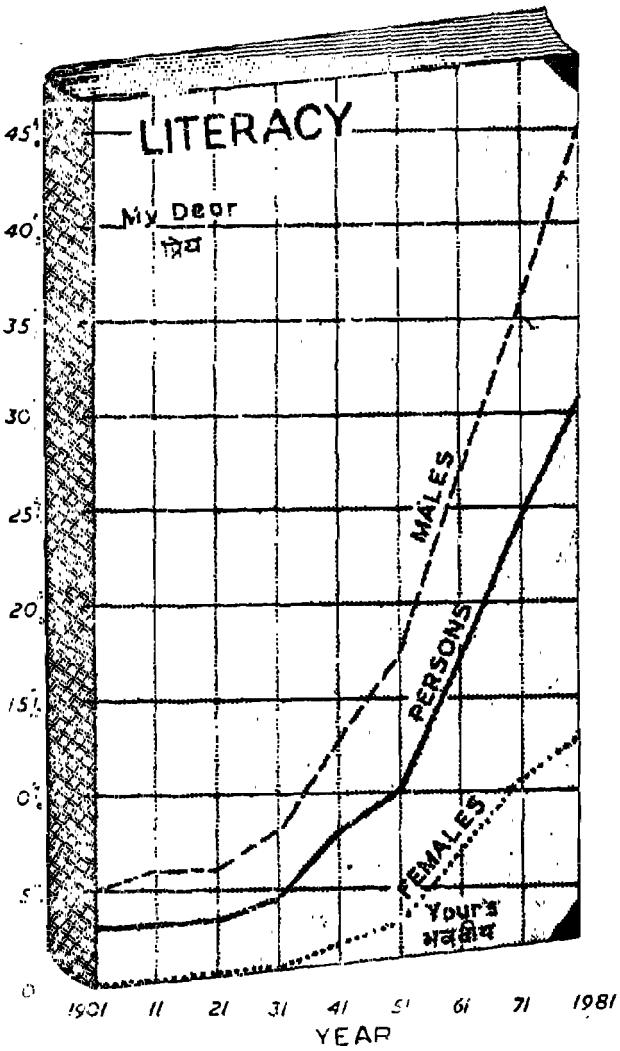

Nagaland, Sikkim, Delhi, Chandigarh and Andaman & Nicobar Islands. Sex ratio in this State has from Census to Census been always below the all India average right from 1901 to date.

The districts where females outnumber males are Garhwal, Tehri-Garhwal, Almora, Pithoragarh and Chamoli, all in the Himalayan hills, and Azamgarh, Pratapgarh, Jaunpur in the Eastern Uttar Pradesh. It appears basically due to males migrating out in large number for employment.

The sex ratio is higher (895) in the rural areas as compared to the urban areas (846) of the state. In urban areas, the lowest sex ratio is in the hill districts: 555 in Tehri-Garhwal, 568 in Uttarkashi, 615 in Chamoli, 654 in Almora, 671 in Garhwal and 717 in Pithoragarh, while highest obtains in the far eastern districts of Ballia (912), Azamgarh (907) and Ghazipur (901). Sex ratio in cities and towns will be commented upon subsequently.

The rural areas of hill districts come on top in the matter of sex ratio; Garhwal (1204) and Tehri-Garhwal and Almora (1136 each). At the bottom come Budaun (798), Shahjahanpur (801) and Mathura (807).

LITERACY

The crude literacy rate which refers to the percentage of persons who can read and write with understanding in atleast one language, now stands at 27.40 per cent as against 21.70 per cent in 1971, in the whole state. The word 'crude' has been used because we have not been able to exclude children in age group 0-4 who for obvious reasons should be excluded while measuring the literacy rate. Crude literacy in the rural areas of the state is 23.34 per cent while it is 45.91 per cent in the urban areas.

Uttar Pradesh ranks 25th amongst all the States and Union Territories excluding Jammu & Kashmir and Assam of the country in this respect. It has gone down by one position since 1971. It is way behind, the all India average of 36.17 per cent. The states, Haryana, Madhya Pradesh, Rajasthan, and Bihar which encircle Uttar Pradesh, are all below the all India average and the former two slightly above and the latter below the U. P. rate. Kerala stands right on top with a literacy as high as 69.17 per cent.

Uttar Pradesh has, however, achieved an increase of 26.18% in literacy over 1971. Only 8 States and 2 Union Territories are above it in this respect. They are Bihar, Manipur, Nagaland, Himachal Pradesh, Tripura, Haryana, Orissa and Sikkim and Dadra and Nagar Haveli, and Arunachal Pradesh. It is, however, worthy of note that in absolute terms, U. P. exceeds all the other States and Union Territories in the total population literate which equally holds good in case of males but in the case of females, only Maharashtra, Kerala, Tamil Nadu and West Bengal outstrip it.

There has been a consistent increase during the decade in both male (38.90 per cent from 31.50 per cent in 1971) and female literacy (14.42 per cent from 10.55 per cent in 1971). In absolute terms also literate population has marked an increase of over 11 million persons (8 million males and 3 million females). It is worthy of note that female literacy is picking up faster than the male literacy which in turn is bound to have a salutary effect on the pace of literacy. Need for intensifying the literacy campaign in this largest state of the country, in the context of general demographic situation, however, merits serious consideration.

Districts having the highest literacy are Dehra Dun (52.02%), Kanpur (43.73%), Garhwal (41.90%), Lucknow (40.20%) and Almora (38.90%). In the case of rural areas, districts Garhwal (39.16%), Dehra Dun

(38.19%), Almora (36.49%), Pithoragarh (36.08%) and Chamoli (35.27%), are on top while the districts Rampur (11.61%), Budaun (13.33%), Bahraich (14.44%), Bareilly (15.01%) and Gonda (15.51%), are at the bottom. Similarly in the case of urban, districts Almora (76.70%), Pithoragarh (69.14%), Tehri-Garhwal (67.56%), Uttarkashi (67.16%) and Dehra Dun (66.30%) are on the top and districts Rampur (29.32%), Budaun (30.02%), Bijnor (33.62%), Moradabad (34.13%) and Bulandshahr (36.57%) at the bottom.

District Almora is on top and Rampur and Budaun at the bottom in male literacy, both in their rural and urban areas. In female literacy, Dehra Dun is on top in its rural area and Almora in its urban area while Rampur is at the bottom both in its rural and urban areas. Both males and females have highest literacy in Almora (83.77 per cent; 65.87 per cent) and lowest in Rampur; (35.70 per cent; 22.08 per cent.)

URBAN POPULATION BY SIZE CLASS OF TOWNS

Considering each urban agglomeration as one unit, the number of urban agglomerations/towns has increased from 293 in 1971 to 659 in 1981. The distribution of UAs/towns by each size class is given in the following statement :

STATEMENT—3

Distribution of UAs/Towns by size class of towns, 1971 and 1981

Size class	Number of UAs/Towns	
	1971	1981
1	2	3
All Classes	293	659
Class I	22	30
Class II	20	37
Class III	67	85
Class IV	91	194
Class V	80	231
Class VI	13	82

Cities and city urban agglomerations are now 13 and 17 respectively. They comprise 51.48 per cent of the total urban chunk. The remaining urban population is distributed amongst the other size classes as follows: class II (12.71 per cent), class III (12.34 per cent), class IV (13.36 per cent), class V (8.65 per cent) and class VI (1.46 per cent).

The increase in the number of towns since 1971 has brought about changes in the proportion of population in each size class also. The percentage of population in class I has gone down from 57.06 to 51.48. Similarly there is a decrease in the proportion of population in size class III from 16.70 to 12.34. On the other hand, there is an increase in the proportion of population in classes II, IV, V and VI. A marked increase in class V and VI is basically due to new towns added in 1981.

The growth rate in urban population during the decades 1971-81 *vis-a-vis* 1961-71 also tells the same story excepting that the growth rate has been higher in 1971-81 as compared to 1961-71 inspite of reduction in the proportion of population in size class I.

The sex ratio, *i. e.*, females per 1000 males stands at 846 in the urban areas of U. P. It has increased by 25 points during the last ten years. In every size class the sex ratio has increased, the maximum increase being in class VI, where it has gone up from 743 to 821. In 1981 the highest sex ratio is in class IV towns followed by class III and then by class V. Lowest sex ratio of 821 in class VI is noteworthy. A low sex ratio indirectly reflects a high rate of net immigration. Therefore, the new towns added in 1981 seem to satisfy the basic qualification of having a more urban infrastructure which despite their low population of less than 5,000 each is responsible for their being declared urban at the 1981 Census. Similarly, a low sex ratio in class V as compared to class III and IV is also indicative.

The following inset table summarises the position.

STATEMENT—4

Proportion to urban population growth rate and sex ratio, 1971 and 1981

Size class	Proportion of Population in each size class to urban Population		Growth Rate		Sex ratio (Females per 1000 males)	
	1971	1981	1971	1981	1971	1981
1	2	3	4	5	6	7
All Classes	100.00	100.00	+30.68	+ 61.22	821	846
Class I	57.06	51.48	+37.00	+ 45.47	814	838
Class II	10.83	12.71	+20.37	+ 89.30	833	844
Class III	16.70	12.34	+31.07	+ 19.16	837	861
Class IV	10.44	13.36	+23.85	+106.27	833	866
Class V	4.74	8.65	+ 4.64	+194.06	803	853
Class VI	0.23	1.46	+32.14	+909.39	743	821

The sex ratio in the urban areas of the state (846) is obviously unfavourable to females. In only 5 towns, *viz.*, Mehnagar T. A. and Bilariaganj T. A. (Azamgarh), Bansdih T. A. and Maniyar N. A. (Ballia), and Karari T. A. (Allahabad) the females outnumber males. The highest sex ratio being in Mehnagar T. A. (1,039). Kedarnath N. A. situated at a height of 3584 meters has a very low sex ratio of 8. Other towns where the male population is more than double of the female population are Chakrata Cantt. (Dehra Dun), Lansdowne Cantt. (Garhwal), Muni-ki-Reti N. A. (Tehri-Garhwal), Rudraprayag T. A. (Garhwal) and Ranikhet Cantt. (Almora), all lying in the Himalayan Hills. The following statement gives the distribution of urban agglomerations/towns by ranges of high, medium, average, low and very low sex ratio by size class of towns :

STATEMENT—5

Distribution of Urban Agglomerations/Towns by ranges of high, medium, average, low and very low sex ratio by size class of towns, 1981
(State average: 846)

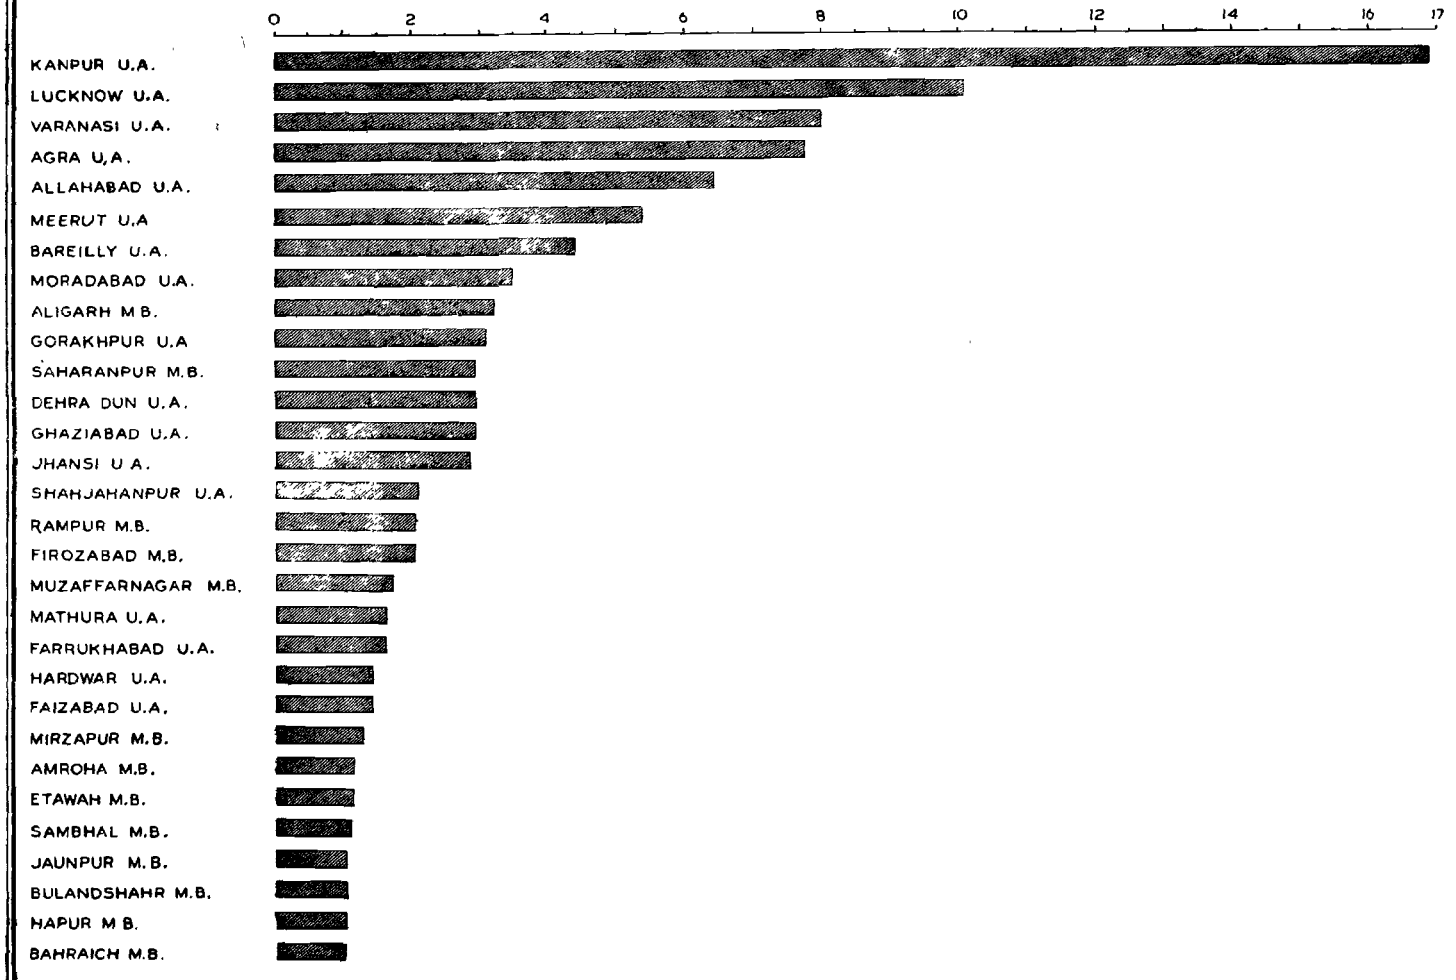

Size Class	No. of U.A.s/ Towns	High (Above 1,000)	Medium (900-999)	Average (800-899)	Low (700-799)	Very low (Below 700)
1	2	3	4	5	6	7
I	30	–	–	27	3	–
II	37	–	1	35	–	1
III	85	–	5	73	6	1
IV	194	2	43	140	5	4
V	231	3	37	175	9	7
VI	82	–	11	43	13	15
TOTAL	**659**	**5**	**97**	**493**	**36**	**28**

Growth of Urban Agglomerations/Towns

During the decade 1971-81, the highest growth has been recorded by Chopan N. A. (Mirzapur) of class V where the population has increased by nearly two and half times (245.14 per cent). Other towns

CITIES BY POPULATION SIZE

(PROVISIONAL)

where the population has doubled are Ghaziabad U. A. (128.63) of class I, Mughal Sarai U. A. (141.48) and Rae Bareli M. B. (133.31) of class II, Renukoot N. A. (108·71) and Chunar M. B. (108.18) of class III, Robertsganj M. B. (127·39) and Tehri M. B. (123·50) of class IV and Muni-ki-Reti N. A. (101·95) of class VI.

In 3 towns the population has gone down. These are Chakrata Cantt. (−14.56) of class V, Mussoorie U. A. (−10.54) of class IV and Bah Bazar (−4.66) of class VI. In Nainital U.A. (7.29), Almora U. A. (2.59) of class III, Babina Cantt. (4.08), Marehra M. B. (5.91) of class IV, Talbehat T. A. (2.19), Churk Ghurma N. A. (0.79) of class V and Bageshwar M. B. (1.32) of class VI, the decadal growth was less than 10 per cent. Lower or negative growth in the towns of hill areas may perhaps be *inter-alia* due to the difference in the reference dates in 1971 and 1981. Due to mid-term Lok Sabha Polls the enumeration in 1971 had to be postponed by one month with reference date the sunrise of April 1, 1971, whereas the reference date in 1981 was as usual the sunrise of March 1, 1981. The following statement gives the distribution of U. As/towns by high, medium, average, low and very low growth during 1971-81 by class of towns:

STATEMENT—6

Distribution of U.A.s/Towns by high, medium, average, low and very low growth during 1971-81 by class of towns

Size Class	No. of U.As./ Towns	High growth (more than 50 per cent above the state average in each size class)	Medium growth (between 25-50 per cent above the state average in each size class)	Average (± 25 per cent of the state average in each size class)	Low (Between 25-50 per cent below the state average in each size class)	Very low (Below 50 per cent of the state average in each size class or negative growth)
1	2	3	4	5	6	7
I	30	3	–	11	13	3
II	37	1	1	4	10	21
III	80	62	12	4	–	2

For the purpose of the above statement only those urban agglomerations/towns have been considered which existed in 1971. The number of U.As./towns in 1971 was 293. Rasulpur Dhulri (Meerut) and Markundi (Mirzapur) census towns of 1971 have been declassified in 1981. Kaila (Meerut) census town has been merged in Ghaziabad M. B. while Badrinathpuri N. A. was unpopulated in 1971. The following 9 towns which were independent towns in 1971 now form part of Urban agglomerations:

Town	Urban agglomeration
1. Clement Town Cantt.	Dehra Dun
2. Raipur C. T.	Dehra Dun
3. Landour Cantt.	Mussoorie
4. Bharat Heavy Electricals Ltd., Ranipur N. A.	Hardwar
5. Kankar Khera T. A.	Meerut
6. Rustamnagar Sahaspur	Bilari
7. Hansarigird C. T.	Jhansi
8. Maruadih N. A.	Varanasi
9. Ramnagar M. B.	Varanasi

ECONOMIC ACTIVITY

The main workers (32,303 thousand) comprise a little less than one third (29.13%) of the total population (110,886 thousand) of the state. Nearly half (49.61%) of the male population and only 6.02 per cent of the female population is engaged full time in some economic activity or the other.

The participation rate of both males and females has gone down as compared to the 1971 census mainly due to the definitional change highlighted in the Background Note.

Amongst the districts, Uttarkashi has the highest percentage (54.03) of main workers followed by Chamoli (44.59), Tehri-Garhwal (41.59), Pithoragarh (37.66) and Garhwal (35.60), all in Himalayan Hills. The lowest percentage is in district Ballia (24.98 per cent) which is even less than one fourth of its total population. Other districts having markedly low participation rate are Aligarh (25.03), Jaunpur (25.31), Ghazipur (25.54) and Bulandshahr (25.74).

Male Participation

Against the state level percentage of 49.61, districts having more than 55 per cent of male participation are Uttarkashi (58.69), Sitapur (56.72), Budaun (55.82), Shahjahanpur (55.41) and Gonda (55.33). The lowest rate is in Almora (36.47) followed by Garhwal (39.64), Ballia (41.85), Pratapgarh (42.60) and Pithoragarh (42.86).

Female Participation

There is a marked disparity among the districts so far as female participation rate is concerned. While in districts Uttarkashi (48.74), Chamoli (43.54), Tehri-Garhwal (39.83), Pithoragarh (32.73) and Garhwal (32.03), the percentage participation is more than 5 times the state average (6.02), it is as low as 0.64 per cent in case of Mainpuri. Other districts where it is lower than 1/5th of the state average are: Shahjahanpur (0.84), Rampur (1.01), Budaun (1.03) and Bareilly (1.07).

In 1971, Uttarkashi district had the highest percentage (63.54) of main workers and other districts having more than 25 per cent of state average (30.94) were Chamoli (58.02), Tehri-Garhwal (51.48), Gahrwal (45.40) and Pithoragarh (43.25). In 1981, the districts at the highest rung of the ladder remain at their places with Pithoragarh moving above Garhwal. Bulandshahr (25.74) had the lowest participation rate in 1971, followed by Jaunpur (26.85), Etawah (27.30), Agra (27.14) and Aligarh (27.32). Bulandshahr, Jaunpur and Aligarh are amongst the 5 districts which have kept at their low participation rate both in 1971 and 1981. The remaining two districts (Agra and Etawah) have lost their positions to Ballia and Ghazipur in 1981.

The following summarises the variations in male and female participation rates in 1981 vis-a-vis 1971, restricting to the state averages and five districts each at the maximum and minimum positions :-

STATEMENT—7

First five districts having maximum and minimum percentage of workers to total population by sex, 1971 and 1981

Districts having maximum percentage		State Average	District having minimum percentage	
		1971

5. Garhwal	(32.03)		5. Bareilly	(1.07)

Main workers by four broad categories of work

Coming to the distribution of main workers by categories of work, it will be observed that the Cultivators account for the highest proportion of main workers both in 1971 and 1981, the respective percentages being (57.43) and (58.02). The Agricultural Labourers who occupied the second place in 1971, have come down to the 3rd place below 'Other Workers' in 1981. Household Industry continues to have the lowest percentage both in 1971 and 1981. Similar trend is observed in the case of male workers. So far as females are concerned, in 1971 Agricultural Labourers(44.49)had the highest percentage followed by Cultivators (42.64). In 1981 the position has reversed with Cultivators forming 46.43 per cent and Agricultural Labourers 34.00 per cent.

The following statement gives the number of districts where percentage of workers by each category has increased or decreased in 1981 as compared to 1971.

STATEMENT—8

Number of districts where the percentage of each category has increased or decreased in 1981 as compared to 1971

Category of worker	Sex	Districts where percentage of workers has gone up	Districts where percentage of workers has gone down
1	2	3	4
1. Cultivators	Male	25	31
2. Agricultural Labourers	,,	16	40
3. Household Industry	,,	33	23
4. Other workers	,,	48	8
1. Cultivators	Female	30	26
2. Agricultural labourers	,,	7	48
3. Household Industry	,,	48	8
4. Other workers	,,	43	13

Cultivators

Coming to individual categories of main work it is observed that in as many as 31 districts the proportion of male Cultivators has gone down. The districts where such a decrease is appreciable are: Uttarkashi (75.89 : 66.79), Chamoli (73.31 : 64.42), Almora (70.89 : 61.80) and Sitapur (78.03 : 74.77). Amongst females, similar tendency is found in 26 districts among which districts Bijnor (23.55: 13.15), Moradabad (40.95 : 20.57), Rampur (34.02 : 19.04) Budaun (50.33 : 39.23), Bareilly (34.42 : 15.24), Shahjahanpur (38.48 : 22.24), Etah (45.33 : 34.38), Farrukhabad (27.41 : 11.01), Kheri (47.97 : 26.19), Sitapur (55.29 : 27.47) and Pratapgarh (42.49 : 30.52) show striking variation.

Agricultural Labourers

Both amongst males as well as females the proportion of Agricultural Labourers has gone down during the last decade. Districts showing opposite trends in males and females number 16 and 7 only respectively. In district Pratapgarh the proportion of male Agricultural Labourers has marked a phenomenal increase from 19.66 in 1971 to 25.07 in 1981. Amongst females, similar trend is observed in district Kheri, where the proportion has gone up from 33.48 in 1971 to 46.16 in 1981.

Household Industry

The proportion of main workers in Household Industry has gone up for both the sexes since 1971. Districts showing a reverse trend number 23 in case of males and 8 for females. The decline in the proportions is, however, not noteworthy, the steepest being in Ghaziabad both for males as well as females from 6.30 to 4.20 and from 11.92 to 9.02 respectively.

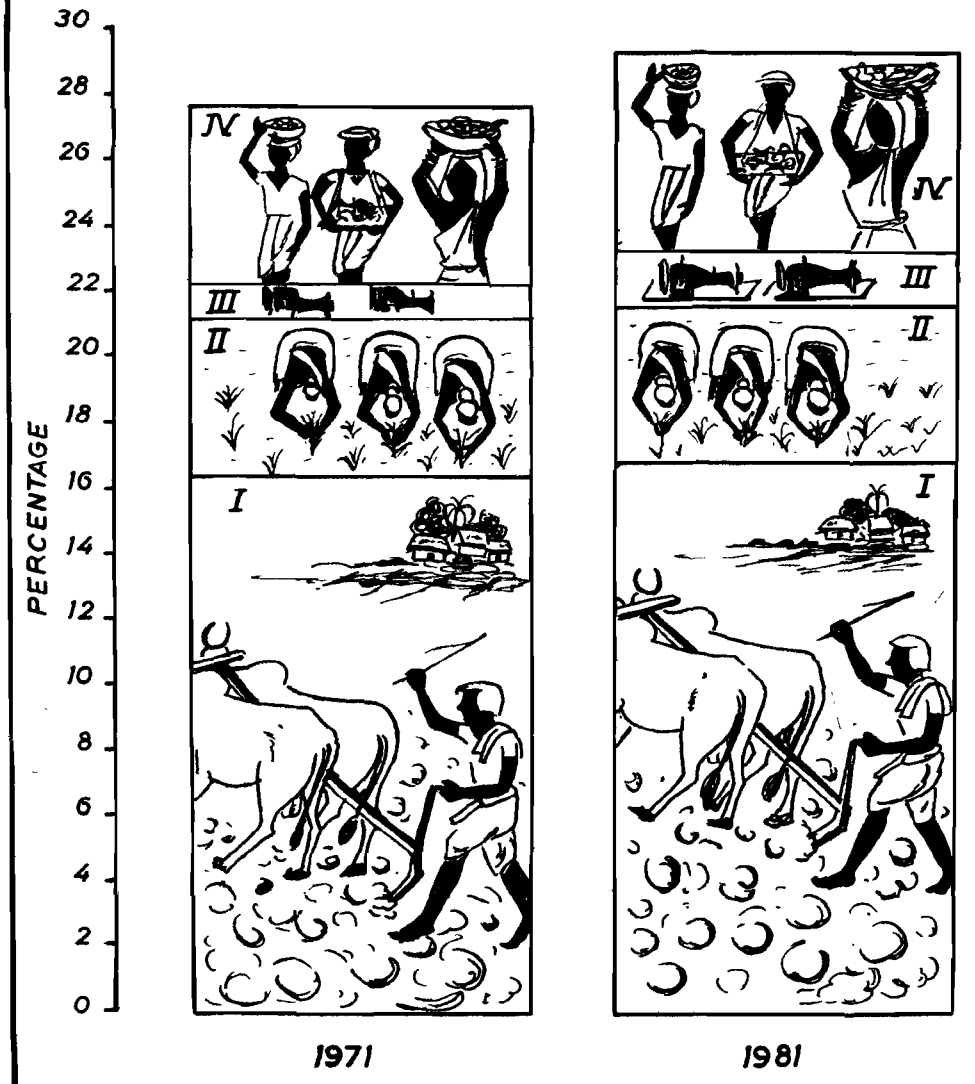

MAIN WORKERS

I Cultivators

II Agricultural labourers

III Household industry

IV Other workers

Other Workers

By and large the districts conform to the state trend of increase in the proportion of Other Workers during the last decade. The exceptions are only 7 and 12 districts for males and females respectively. As far as males are concerned, the decline is marginal, steepest being in district Lucknow (from 50.02 to 46.70). Amongst females the districts where the decrease is appreciable are Dehra Dun (42.88 : 36.05), Bijnor (38.46 : 33.46), Meerut (56.75 : 49.18), Aligarh (49.61 : 43.18), Mathura (46.61 : 40.62) and Agra (60.15 : 50.83).

Amongst all the categories of work

Category 'Cultivator' has the highest percentage of male workers in 51 districts of the state. In the remaining 5, viz. Dehra Dun, Ghaziabad, Agra, Kanpur and Lucknow 'Other Workers' form highest proportion of Workers. These districts are marked for a high proportion of urban population. In 20 districts 'Other workers' account for the highest percentage of female workers while Cultivators and Agricultural Labourers have the highest proportion in 19 and 16 districts respectively. Bijnor is the only district of the state where highest proportion of female workers is in Household Industry.

The lowest proportion of male workers in case of 48 districts is found in Household industry, whereas the remaining 8 districts have the lowest proportion of Agricultural Labourers. As far as lowest proportion of female workers is concerned, the maximum number (39) of districts fall in the category 'Household Industry' followed by 13 districts where Agricultural Labourers come at the bottom. Saharanpur has the lowest proportion of female workers amongst Cultivators and Bara Banki, Basti and Azamgarh in 'Other Workers'.

In the following statement, first five districts having maximum and minimum percentage of workers in each category of work by sex for 1981 have been given :

STATEMENT—9

		Other Workers		
1. Bareilly	(68.79)	13.71	1. Chamoli	(1.27)
2. Ghaziabad	(53.48)		2. Tehri-Garhwal	(1.46)
3. Rampur	(52.79)		3. Uttarkashi	(1.62)
4. Agra	(50.83)		4. Pithoragarh	(1.91)
5. Shahjahanpur	(50.80)		5. Garhwal	(2.05)

Males

It will be observed that proportion of Cultivators ranges from 80.70 in district Bahraich to 25.65 in district Dehra Dun around the State average of 59.26. Amongst Agricultural Labourers the highest percentage is in district Muzaffarnagar (28.51) while in Chamoli it is as low as 0.53 per cent. In Household Industry, district Agra (8.75 per cent) is at the top while Bahraich (1.24 per cent) occupies the last position. 'Other Workers' predominate in the districts of Dehra Dun (63.03), Ghaziabad (49.72), Lucknow (46.70), Kanpur (44.57) and Agra (40.99), where except Agra the percentage of workers in this category is more than double of the State average (22.08). All these districts have a high proportion of urban population. Bahraich (9.05) has the lowest proportion.

Females

More than 95 per cent of the female workers in the hill districts of Tehri-Garhwal (98.11), Garhwal (97.29), Uttarkashi (97.25), Chamoli (97.23) and Pithoragarh (95.76) are cultivators. It shows

that there is no taboo on female participation in cultivation in hill areas of the state. District Farrukhabad (11.01) has the lowest percentage in this category in the state. Districts Ballia (63.63) and Bijnor (43.26) have the highest percentage in the state in Agricultural Labourers and Household Industry respectively. Districts Bareilly (68.79), Ghaziabad (53.48), Rampur (52.79), Agra (50.83) and Shahjahanpur (50.80) have more than half of the female workers in category 'Other Workers'. All these districts have cities in them. The extremely low percentage of female workers in Agricultural Labour, Household Industry and 'Other Workers' in the hill districts of Chamoli, Tehri-Garhwal, Uttarkashi, Pithoragarh and Garhwal is due to over 95 per cent of female workers engaged is Cultivators in these districts.

As mentioned at the outset, concept of marginal worker was introduced in the 1981 Census. These are workers who worked for less than 6 months during the preceding year. It will be interesting to look at the following statement:—

STATEMENT—10

1981	*Persons*	*Males*	*Females*
1. Percentage of main workers to total population	29.13	49.61	6.02
2. Marginal workers	2,965,462	1,117,732	1,847,730
3. Percentage of marginal workers to total population	2.67	1.90	3.55
4. Percentage of main & marginal workers to total population	31.81	51.51	9.57
1971			
5. Percentage of main workers to total population	30.94	52.24	6.71

It would appear that the percentage of main workers in 1981 dropped by 1.81% as against 1971. This does not present the correct picture since the main workers of 1981 do not include all workers. If the marginal workers are taken together with the main workers, the percentage of workers to total population in 1981 has marginally increased by nearly 1%. What is more notable is that more women are going out to work as the increase in the number of female workers is nearly 3% against a drop of 0.73% in the male workers.

It will be more interesting to note the absolute growth in the number of workers as per the following statement:—

STATEMENT—11

	Persons	*Males*	*Females*
1. Total Population	22,544,730	11,776,652	10,768,078
2. Main workers	4,968,221	4,603,043	365,178
(i) Cultivators	3,042,490	2,767,977	274,513
(ii) Agricultural Labourers	(−)181,122	(−)14,630	(−)166,492
(iii) Household Industry	417,626	342,601	75,025
(iv) Other Workers	1,689,227	1,507,095	182,132
3. Main workers+Marginal workers	7,933,683	5,720,775	2,212,908
4. Non-workers	14,611,047	6,055,877	8,555,170

The total number of main workers increased by nearly 5 million over the 1971 Census figure. Majority of these i.e. 61.2% are Cultivators and 34% Other Workers. The most notable feature is that the number of Agricultural Labourers has decreased by 181,122. However, when seen in the background of percentage decrease in Agricultural Labourers during the decade (from 5,453,829 to 5,272,707) which is only 3.3% (0.3% amongst males and 13.5% amongst females), the most plausible explanation appears to be the difference in the definition of a worker between the two censuses. The 1971 definition with a

limited time reference period of preceding week could operate with impunity in case of persons, in particular females, reporting as Agricultural Labourers. One may, however, venture to forecast that the population of Agricultural Labourers seems to be stabilising.

Though, proportional share of workers in Household Industry in the over all growth of all main workers comes to 8.4% over the decade, they have shown a magnificent growth rate of 41.7% (38.4% males, 69.0% females) which augurs well for the type of economy we are trying to build up. 'Other Workers' have also shown a growth rate of 32.6% (30.6% males, 73.4% females). It is noteworthy that the growth rate of female workers in Cultivation, Household Industry, and Other Work is consistently higher than that of males though their participation is still quite low.

The total number of non-workers is 75.6 million forming 68.2% of total population. They consist of housewives, students, dependents, retired persons, beggars, invalids etc. They are about 61.3 million in the rural and 14.5 million in the urban areas forming 67.4 and 71.7 per cent of the total rural and urban populations.
