

CENSUS OF INDIA 1981

SERIES 12

MAHARASHTRA

Paper 1 of 1981--Supplement

PROVISIONAL POPULATION TOTALS

P. P. MAHANA
OF THE INDIAN ADMINISTRATIVE SERVICE
Director of Census Operations Maharashtra

ACKNOWLEDGEMENTS

It can be said that all census operations are alike in the sense of population count, but every census is different in its own way. The 1981 census completed sometime ago, was, perhaps, the biggest and most complicated exercise of its nature undertaken in our country. This holds good both in the quantitative and qualitative senses. The success of census operations is due largely to the whole-hearted co-operation of the State and Central Government agencies at various levels. At the helm of the affairs, Shri P. Padmanabha, Registrar General, India, guided the operations through all the stages with rare ability, remarkable patience and missionary zeal. His help and advice was freely available to the officers of this directorate in general and me in particular. A great debt, is therefore, owed to the Registrar General, India personally by me which I can discharge, only inadequately, through deep and heart-felt thanks. I also take this opportunity to thank Shri V. P. Pandey and Shri K. K. Chakravorty, both Deputy Registrars General in the Registrar General's Office for their able help and guidance and willing co-operation at all stages. It will be no exaggeration to add that in the Registrar General's Office, everyone lent us a willing hand for the successful completion of the operations. My thanks are due to all of them.

It cannot be emphasised strongly enough that the census operations in the State were completed with the whole-hearted help and co-operation of the various agencies of the State Government at all levels. Shri P. G. Gavai, Chief Secretary to Government of Maharashtra always found time out of his extremely busy schedule to offer his mature help and guidance at the crucial stages. It was really a memorable experience to complete this difficult task under his steadying and guiding hand. Shri K. K. Moghe, Additional Chief Secretary to Government of Maharashtra who was directly in charge of the census in the State Government held numerous meetings at my request for securing co-operation of the State Government Departments and other agencies in many ways. He always listened patiently to my difficulties and invariably found ways of solving them. Secretaries of the State Government Departments, Municipal Commissioners and Collectors of the Districts were always willing to help promote the cause of the census. I thank them all for their enthusiastic participation in this mammoth task.

Shri B. K. Chougule, Municipal Commissioner, Greater Bombay Municipal Corporation not only found time out of his busy schedule for the census, but also made his personal contribution in providing office accommodation for the census work in a difficult situation prevailing in Bombay. I can say without reservations that without his help, census operations in Bombay and the processing of the data would have been far more difficult than they really were. I thank Shri Chougule for his invaluable help and personal involvement in

the census work. Shri M. R. Natarajan, Ex-Municipal Commissioner, Nagpur Municipal Corporation, Shri A. K. G. Desai, Administrator, Nagpur Municipal Corporation and Shri P. S. Palande, Municipal Commissioner, Pune were generously forthcoming with advice and guidance in the two major cities of Nagpur and Pune.

In the ultimate analysis, the "unsung heroes" of the 1981 census are the thousands of enumerators and supervisors, who worked unremittingly in the field against heavy odds, and in the event turned out a magnificent performance. The part played by them in the census operations must be acknowledged with a sense of appreciation and gratitude and I take this opportunity to do so.

I would also like to thank Shri R. B. Alva, Director, Government Printing & Stationery, Maharashtra; his predecessor, Shri S. A. Sapre; Shri G. D. Dhond, Manager, Government Central Press, Bombay; S/Shri B. Bracken and V. R. Joshi, Managers of Government Photo-zincographic Press, Pune; Shri M. Y. Mankame, Manager, Government Press and Book Depot, Nagpur; and Shri A. C. Sayyed, Manager, Government Press and Stationery Stores, Kolhapur for their ungrudging help in taking on massive printing work. Various publicity media like, All-India Radio, Doordarshan and newspapers gave a lot of publicity support to the census operations.

A team of statistical assistants and computors headed by Kum. V. I. Nimbalkar, investigator, was responsible for the compilation of data presented in this Supplement. Shri A. Shanmugam, senior geographer and Shri A. Braganza, geographer, prepared the maps and diagrams with the help of other draughtsmen and artists. Shri C. M. Kane, printing inspector and Shri R. C. Hirway, proof reader saw this publication through the Government Press at Kolhapur. They all deserve my thanks and appreciation for doing a good job in a timely manner.

Workers in Household Industry	3.14%
Other Workers	35.23%

INTRODUCTION

The 1981 census operations commenced on the 9th February 1981. The first stage of enumeration was completed on the 28th February. The revisional round which was undertaken to update the population count as of the sun-rise of 1st March 1981, was, completed on the 5th March. It is a matter of satisfaction that Paper 1, containing the provisional population figures for the country was brought out by the Registrar General, India on the 19th March, almost within a fortnight of completion of the field operations. Soonafter, Paper 1 of Maharashtra State was released, containing the following statements and tables :—

1. Provisional population figures at a glance.
2. Statement showing comparative population, and literacy figures of India by States/Union Territories.
3. Statement showing the population of Maharashtra by districts.
4. Table 1 showing distribution of population, sex ratio, growth-rate and density of population of Maharashtra by districts.
5. Table 2 showing decadal variation in the State's population since 1901.
6. Table 3 presenting statistics on literacy (including population in age group 0–4) by districts.
7. Table 4 giving population of cities/urban agglomerations of the population size of one lakh or above.

In the present publication entitled Paper 1 of 1981–Supplement, we are presenting the following additional statements and tables :—

1. Population figures at a glance.
2. Table 1 shows rural/urban composition of population.
3. Table 2 shows population and growth-rate of cities, urban agglomerations and towns.
4. Table 3 shows urban population by size-class of towns.
5. Table 4 gives workers and their percentage to total population.
6. Table 5 presents distribution of main workers by cultivators, agricultural labourers, those in household industry and other workers.
7. Primary Census Abstract.
8. Data on the physically handicapped persons collected in the houselisting operations during 1980.

Reader is requested to bear in mind that the population data of the 1981 census presented in Paper 1 and this Supplement are provisional as they have been compiled and built up from the abstracts prepared by the enumerator at the time of the field operations. The census information and data are now in the process of detailed scrutiny and will be presented in a final form later according to the All-India publication programme. For the benefit of reader, the publication programme of the 1981 census is reproduced at page 195.

1981 Census Concepts

In order to evaluate the provisional data that have been presented in this Supplement as well as the Paper 1 it is necessary to understand clearly the various concepts that have been applied during the field operations.

It is well known that any census is a picture of the population at a pre-determined moment of time. For the 1981 census, this reference moment is the sun-rise of the 1st March 1981. This means that the count of population resident in census houses between 9th and 28th February was checked in the revisional round and brought up to the reference moment. Such a scrutiny was not feasible in the case of houseless persons who were enumerated in a one-night operation on the 28th February.

The census data are often presented in a form in which it is easy to establish some degree of comparability with the data of the previous censuses. In view of the changing composition of the various administrative units over the decades, the data of the previous censuses have been suitably adjusted.

Rural/Urban Classification

It is customary to present the census data by rural/urban classification. Before the 1961 census, consideration of a place outside the municipal, cantonment or notified area, as an urban unit, admitted of a great deal of latitude and discretion on the part of the state census superintendent. The result was that many places which were no more than over-grown villages and had no recongnizable urban characteristics were brought within the urban fold. It was only at the 1961 census that certain empirical tests were applied to determine the eligibility of a place as urban. These tests were retained in the 1971 and 1981 censuses also. The following are the criteria applied to a place for being treated as an urban unit :—

(a) all places having a municipal body, municipal corporation, cantonment board or notified town area committee, etc.

(b) other places having the following characteristics—

(i) a minimum population of 5,000;

(ii) at least 75% of the male working population engaged in non-agricultural pursuits;

(iii) a density of population of at least 400 persons per km² (1000 persons per sq.mile).

It may be mentioned that these criteria were strictly applied at the 1981 census in respect of all non-municipal places so as to bring out a correct picture of urbanization in the State. This has resulted in 15 urban places of the 1971 census being declassified in 1981 and 31 rural places being included afresh as urban units in Maharashtra state. The number of cities and towns in all size-classes, now stands at 307.

Urban Agglomeration

Another concept carried over from the 1971 census is that of the urban agglomeration, which in a way is an improvement over the town-group concept of the 1961 census. It was necessary to present a complete picture of urbanization by considering the urban sprawl or urbanised spill-over beyond the statutory municipal limits. An urban agglomeration is a continuous urban spread constituting a town and the adjoining urban outgrowth, or, two or more physically contiguous towns together with the continuous well recognised urban outgrowth, if any, of such towns. The concept is, therefore, designed to account for the following possible situations :—

(1) A city or town with a continuous outgrowth [the outgrowth part being outside the statutory limits and spilling over the boundaries of adjoining village (s)].

(2) Two or more adjoining towns with their outgrowths as in (1) above.

(3) A city and one or more adjoining towns with their outgrowths all of which form a continuous urban spread.

At the 1971 census, there were 16 urban agglomerations in Maharashtra state. This number is 14 in 1981. Three of the urban agglomerations of 1971, namely, Manmad, Nandgaon and Achalpur have been dropped. This is because, in the case of Manmad, the erstwhile non-municipal area was later merged in the municipality and the two together became one urban unit. In the case of Nandgaon, the non-municipal area which was part of the 1971 urban agglomeration was declassified as census town. In the third case, Achalpur City and Achalpur Camp were merged in one municipal unit. Besides, one new urban agglomeration, namely Solapur has been added this time, because of the recognition of an adjoining area as urban outgrowth. Reader may kindly note that the urban population, its growth-rate and sex ratio, presented in Table 3 size-classwise, is for the towns and urban agglomerations together. The data will naturally vary if towns are considered as separate entities and regrouped size-classwise.

The cities, towns and urban agglomerations have been arranged in the following size-classes :—

Size-Class		Population
I	..	1 lakh and above
II	..	50,000 to 99,999
III	..	20,000 to 49,999
IV	..	10,000 to 19,999
V	..	5,000 to 9,999
VI	..	less than 5,000

Working Population

It has become an important aspect of the census to present the economic characteristics of the population. At the 1981 census the relevant questions in the Individual Slips were designed to elicit the following information :—

(1) Whether a person had worked *any time at all* last year, and, if he had, whether it was for the major part of the year, *i.e.* for a period of 183 days/6 months or more. In this way the entire population could be divided into the categories of main worker, marginal worker or non-worker. A main worker was one who had worked for major part of last year, while the marginal worker had worked for a period less than 183 days/6 months. A non-worker was a person who did not work at all during the reference year. Last year in this case was construed as the year preceding the date of enumeration.

(2) Having classified everyone in one of the three categories mentioned above, it was necessary to find out the nature of main activity during the last year. The work activities were classified into four categories, namely, cultivator, agricultural labourer, household industry and other work. It was also sought to place the non-workers in one of the categories, namely, household duties, student, dependent, retired/rentier, beggar, inmate of an institution or other non-worker.

Information was also sought to be obtained if the person treated as main worker, had any secondary activity in the last one year. Besides, the actual economic activity of a marginal worker was also inquired into. Finally, persons who had not worked during the last one year or who had not worked for the major part of last year were asked if they were seeking/available for work.

Work has been defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work.

In analysing the data on the working population, it is necessary to remember the concept of main worker, marginal worker and non-worker. The reader should also bear in mind that at the 1961 census no attempt was made to collect information regarding the secondary work. However, a specific enquiry was made at the 1971 census regarding the secondary work. Thus in 1971 the categories were of workers and non-workers with secondary work. In 1981 comparable categories are main workers and marginal workers.

Literacy

In the census, a person is considered to be literate if he can both read and write with understanding in any language. It was not necessary that he should have received any formal education or should have passed any minimum education standard for being considered as literate. All children of the age of 4 years or less were treated as illiterate irrespective of whether they had started going to school or not. The literacy data should, therefore, be studied with this broad concept in mind.

Physically Handicapped Persons

During the houselisting operations, conducted in the middle of 1980, information was collected on the number of totally blind, totally crippled and totally dumb persons who were found residing in the households. This information is presented in the Supplement, by districts, tahsils and towns. Since this information was collected before the enumeration operations, it does not include the houseless population.

ANALYSIS OF RESULTS

GENERAL POPULATION PROFILE

At the sun-rise of 1st March 1981, the population of Maharashtra stood at 62,715,300. This yielded a decennial growth-rate of 24.40% which was lower than the growth-rate of the 1961–71 decade (27.45%) and was also slightly lower than the All-India 1971–81 growth-rate (24.75%). In fact, the decennial growth-rate of 1961–71 was the highest peak since 1901. The 1981 provisional results show that the population curve of the State is showing a small though significant, downward trend which is a welcome sign. Districts with a growth-rate higher than the State's average are Greater Bombay, Thane, Nasik, Pune, Nanded, Nagpur and Chandrapur. The lowest growth-rate in the State has been recorded in Ratnagiri district. This is probably because of steady and continuous exodus of the male working population to the industrial areas of Greater Bombay and Thane.

In the Statement 1 below, the 1981 population of the districts has been rearranged according to the newly organised revenue divisions. It is seen that the percentage decade variation of Konkan division is the highest (31.76%) while it is the lowest for the Aurangabad division (20.71%) followed by Amravati division.

STATEMENT 1

Population and decadal variation of Maharashtra by Revenue Divisions

(1981 Census—Provisional figures)

Division	Persons	Males	Females	Absolute decade variation	Percentage decade variation
(1)	(2)	(3)	(4)	(5)	(6)
Maharashtra	**62,715,300**	**32,358,158**	**30,357,142**	**+12,303,065**	**+24.40**
1 Konkan Division	15,159,890	8,079,706	7,080,184	+ 3,654,065	+31.76
2 Nasik Division	10,367,064	5,310,620	5,056,444	+ 1,943,424	+23.07
3 Pune Division	13,136,488	6,672,234	6,464,254	+ 2,389,374	+22.23
4 Aurangabad Division ..	9,726,840	4,963,554	4,763,286	+ 1,668,493	+20.71
5 Amravati Division ..	6,925,480	3,551,038	3,374,442	+ 1,196,138	+20.88
6 Nagpur Division	7,399,538	3,781,006	3,618,532	+ 1,451,571	+24.40

The differential march of the districts in population growth can be brought out in another way by showing the variation in the growth-rate of 1971–81 over the growth-rate of the preceding decade and arranging the districts in the positive and negative ranges. Statements 2 and 3 attempt the arrangement of districts in this manner. It will be seen that in the districts of Thane, Jalgaon, Nagpur, Dhule, Pune and Buldana the growth rate of the 1971–81 decade shows increasing trend compared to the growth rate of the 1961–71 decade. In all the other districts, the growth trend compared to the 1961–71 decade is a decreasing one.

STATEMENT 2

Districts classified by ranges of percentage variation of growth rate in 1971–1981 (Positive)

+0.01 to +10.00			+10.01 to +20.00			+20.00 and above		
District	Absolute 1971–81	Per cent decade variation of growth rate	District	Absolute 1971–81	Per cent decade variation of growth rate	District	Absolute 1971–81	Per cent decade variation of growth rate

Yavatmal	+311,700	-26.07	Wardha	+ 147,175	-17.59			
Bhandara	+250,654	-35.71						
Chandrapur	+414,149	-22.26						

Sex Ratio

The sex ratio in the State is generally weighted in favour of males. There are 938 females per thousand males in 1981 as against 930 in 1971. In the urbanised setting of Greater Bombay and Thane, the sex ratio is 773 and 883, respectively. This is probably because of the large influx of male working population to the industries of these districts. There are three districts in Maharashtra, namely, Raigad, Ratnagiri and Satara in which the sex ratio is favourable to females, again, becuase of the exodus of the male working population to the adjoining industrial districts. In many districts, the number of females per thousand males has increased compared to that of 1971. In the cities and urban agglomerations of size-class I, the sex ratio is generally much lower than the State ratio, with the exception of Malegaon (Nasik district), Jalna and Gondiya.

Density of Population

The density of population in Maharashtra state, as revealed from the results of the 1981 census has gone up to 204 persons per sq. km. as against 164 persons in 1971. Maharashtra state is somewhat less densely populated compared to the country's density as a whole, which is 221 persons per sq. km. The States (excluding Union Territories) having more density of population than Maharashtra are Kerala (654 persons), West Bengal (614 persons), Bihar (402 persons) Uttar Pradesh (377 persons), Tamil Nadu (371 persons), Punjab (331 persons), Haryana (291 persons), and Assam (projected 254 persons). Within the State, Greater Bombay has the highest density of population with 13,644 persons per sq. km. Other districts having density of population above the State average are, Thane (349 persons), Kolhapur (311 persons), Pune (266 persons), Nagpur (260 persons), Jalgaon (223 persons), Sangli (213 persons), and Raigad (208 persons). The districts somewhat sparsely populated are Chandrapur (79 persons) and Yavatmal (128 persons). It will be interesting to note that the density of population in Class I cities/ urban agglomerations, is extremely high with Bhiwandi city leading with 27,975 persons per sq. km., followed by Solapur urban agglomeration, Malegaon city, Latur city, Nanded city, Ulhasnagar urban agglomeration, Greater Bombay Municipal Corporation and Jalgaon city in that order.

Literacy

In 1981, the percentage of literates to the total population has gone up to 47.02 as against 39.18 in 1971. Among the States and Union Territories of the country, Maharashtra occupies 9th position in so far as the number of literates to total population is concerned. The literacy rate in the rural areas is much lower (37.97%) compared to the rate in urban areas (63.82%). Greater Bombay district with the literacy percentage of 67.98 leads in the State, followed by Nagpur (54.68), Pune (54.11), Amravati (51.53), Wardha (50.82), and Thane (50.28). The lowest literacy percentage has been recorded in Nanded district (29.74) followed by Parbhani (30.12), Beed (31.63), Chandrapur (34.63), Osmanabad (35.49), Aurangabad (35.64), Dhule (37.43), and Yavatmal (39.23). The remaining districts fall between 40 and 50 per cent. Another noticeable feature is that literacy rate of women is much lower compared to that of men. The data on literacy may be seen in the Primary Census Abstract.

Physically Handicapped Persons

In this Supplement, Table H-2 has been included showing distribution of physically handicapped persons by districts, tahsils and towns. It will be recalled that these data were collected at the time of the houselisting operations in the middle of 1980. Out of the total of 82,392 persons recorded as physically handicapped, *i. e.* totally blind, totally crippled and totally dumb, more than 80% are in the rural areas. The highest number of physically handicapped persons has been recorded in Pune district (4,554) followed by Chandrapur (4,392), Osmanabad (4,390), Aurangabad (4,243) and Nasik (4,217) districts. Among the physically handicapped persons, 45% are totally blind, 32% totally crippled and 23% totally dumb.

RURAL AND URBAN COMPOSITION OF POPULATION

Tables 1, 2 and 3 in this Supplement present the rural and urban composition of population, population and growth-rates of cities, urban - agglomerations and towns, and urban population by size-class of towns/urban agglomerations. The three tables studied together, present, *inter alia*, a statistical picture of urbanization in Maharashtra.

The 1981 census results show that 64.97% of the State's population lives in the rural areas, as against 68.83% in 1971. This also means that the proportion of urban population has gone up from 31.17% in 1971 to 35.03% in 1981.

Statement 4 shows urban population of the States and Union Territories in the country. It will be noticed at once that Maharashtra occupies first place among the States with the highest percentage of urban population, followed by Tamil Nadu (32.98%) and Gujarat (31.08%). It is only in the Union Territories of Chandigarh, Delhi, Pondicherry and Lakshadweep that the proportion of urban population is more.

STATEMENT 4

Urban Population in the States and Union Territories 1981

(Provisional)

	India/State/Union Territory	Total Population	Urban Population	Urban population per cent of total population
	1	2	3	4
	INDIA*	658,140,676	156,188,507	23.73
	STATES—

In fact, the proportion of urban population in Maharashtra has been much more in the preceding decades also, compared to the country as a whole, as the following figures will show :—

Census Year	Percentage of urban to total population	
	India	Maharashtra
1951 ..	17.29	28.75
1961 ..	17.97	28.22
1971 ..	19.91	31.17
1981 ..	23.73	35.03

Among the districts of the State, Greater Bombay has 100% population in the urban category. Other districts which are above the State's average of urban population are Nagpur (56.74%), Pune (47.33%) and Thane (44.38%). Ratnagiri district has the lowest percentage of urban population, (8.10%) which is somewhat lower compared to 1971. Other districts with low percentage of urban population are Chandrapur (12.72%),Ahmednagar (12.98%), Satara (13.03%), Bhandara (13.11%) and Raigad (14.15%).

The decennial growth rate during 1971-81, of the rural and urban population, considered separately is 17.43% and 39.82% respectively, as compared to the total population growth rate of 24.40%. It appears that by and large, the decennial growth rate in the rural areas has not been very high, except for Thane (27.69%) and Nagpur districts (25.90%). The growth rate of urban population, considered separately, however, presents a different picture altogether. In this, Thane district (instead of Greater Bombay in the 1971 census) leads in the State with the decennial urban growth rate of 79.27%. Thane district is followed by Aurangabad (63.18%), Chandrapur (56.44%), Beed (53.97%), and Pune (48.15%). The lowest urban growth rate (2.24%) has been recorded in Ratnagiri district.

Statement 5 below, shows the distribution of towns/ urban agglomerations,and proportion of urban population by districts. It can be seen that Ratnagiri and Raigad are among the least urbanized districts in the State.

STATEMENT 5

Distribution and proportion of urban population by districts

Chandrapur District	8	261,403	1.19

To a certain extent, the size of the urban component of population depends on the determination of places as urban units. There has generally been no problem in classifying as urban, towns and cities having muncipal, and other types of statutorily constituted civic administration. The problem, however, arises when administratively rural unit like village of whatever size, has to be classified as urban on the basis of certain empirical tests, like size and density of population and predominently non-agricultural character of economic activity. In the successive censuses, since 1961, the degree of discretion with the census superintendent of the State to treat a village as an urban unit has been reduced by the strict application of the empirical tests. The result is that the growth in the number of town and city units is at a steady slow pace after the highest number reached in 1951. Statement 6 compares the number of town units in each size-class since 1901.

STATEMENT 6

Number of city and town units in each size-class from 1901 to 1981

Size-Class of Town	Maharashtra State								
	1981	1971	1961	1951	1941	1931	1921	1911	1901
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Total	**307**	**289**	**266**	**383**	**266**	**258**	**238**	**232**	**219**
Class I	29	17	12	5	4	4	4	3	3
Class II	25	25	15	16	7	1	1	1	2
Class III	88	65	47	39	33	29	21	11	13
Class IV	100	98	89	84	69	57	45	50	60
Class V	49	70	88	196	122	119	113	111	116
Class VI	16	14	15	43	31	48	54	56	25

It can be readily appreciated that since 1951, while the towns in the size-class I have appreciably increased in number, the increase is not so evident in the case of the other size-classes particularly size-classes IV to VI. This, perhaps, indicates that growth of urbanization is more pronounced in the top bracket of the size-classes rather than the bottom ones.

We can also set up comparable parameters by showing the percentage of towns and of population in each size-class. This has been done in Statement 7 below.

STATEMENT 7

Percentage of towns in each size-class to total number of towns, and percentage of population in each size-class to total urban population.

Class of Town	1981		1971		1961		1951	
	Percentage of		Percentage of		Percentage of		Percentage of	
	Towns	Population	Towns	Population	Towns	Population	Towns	Population
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Class I	9.45	71.55	5.88	64.75	4.51	60.49	1.31	45.47
Class II	8.14	7.83	8.65	11.07	5.64	9.17	4.18	11.85
Class III	28.67	11.82	22.49	11.71	17.67	13.00	10.18	13.03
Class IV	32.57	6.75	33.91	8.78	33.46	11.17	21.93	12.80
Class V	15.96	1.80	24.22	3.39	33.08	5.65	51.17	15.05
Class VI	5.21	0.25	4.85	0.30	5.64	0.52	11.23	1.80
Total ..	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00

The statement shows clearly that over the past three decades urban population seems to be gravitating to the cities in size-class I, even though the percentage of towns in that class is less than one-tenth of the total number in 1981. This cannot be said of the towns in the other size-classes which are either stagnant or at any rate growing less rapidly. This urbanization trend showing rapid population growth in the towns of size-class I, and at best uneven growth in the other size-classes, has socio-economic implications and indicates the need for reorienting our approach to urban planning.

In Table 3 of this Supplement, the number of urban units in each size-class is for towns and urban agglomerations together, whereas in the Statements 6 and 7 above, each town and city has

been treated as a separate urban unit. This is the reason for the variations in the number of urban units in two separate classifications. Obviously, the proportion of urban population in each size-class in the two types of classification also varies. This difference should be borne in mind.

In 1981, there are twelve cities/urban agglomerations in the country having population exceeding one million. Out of these, three are now in Maharashtra as against two in 1971. The absolute population of these million-plus cities/urban agglomerations in the State is given below :—

STATEMENT 8

1981 population of three major urban cities agglomerations in Maharashtra

Name of City/Urban Agglomeration	Population in 1981 (provisional)		
	Persons	Males	Females
(1)	(2)	(3)	(4)
1. Greater Bombay City (M. Corporation)	8,227,332	4,641,083	3,586,249
2. Pune City Urban Agglomeration	1,685,300	896,146	789,154
3. Nagpur City Urban Agglomeration	1,297,977	679,427	618,550
Total	**11,210,609**	**6,216,656**	**4,993,953**

This means that 51.03% of the total urban population in the State is concentrated in these three major urban centres as against 51.15% and 49.99% in 1971 and 1961 respectively. Among other things such large concentration of urban population has implications from the point of view of urban planning, housing and other civic needs.

In Maharashtra, Greater Bombay city is a class by itself. Statement 9 shows the growth of the city in the eighty years since 1901.

STATEMENT 9

Decadal variation in population since 1901 for Greater Bombay City

Year	Persons	Males	Females	Decade variation (absolute)	Percentage decade variation
(1)	(2)	(3)	(4)	(5)	(6)
1901	812,912	500,222	312,690	....	....
1911	1,018,388	662,152	356,236	+ 205,476	+25.28
1921	1,244,934	811,132	433,802	+ 226,546	+22.25
1931	1,268,306	809,433	458,873	+ 23,372	+ 1.88
1941	1,686,127	1,054,414	631,713	+ 417,821	+32.94
1951	2,966,902	1,852,402	1,114,500	+1,280,775	+75.96
1961	4,152,056	2,496,176	1,655,880	+1,185,154	+39.95
1971	5,970,575	3,478,378	2,492,197	+1,818,519	+43.80
1981	8,227,332	4,641,083	3,586,249	+2,256,757	+37.80

From just less than one million in 1901, the city has crossed 8-million mark in 1981, having grown more than ten times in the intervening period. The city reached two peaks of growth rate, one in the decade 1941–51 and second in the decade 1961–71. Even though, the growth rate in the decade 1971–81 has somewhat declined, it is still one of the highest in the State. It is, perhaps, interesting to compare the growth rate of Greater Bombay with Calcutta urban agglomeration and Calcutta city. This has been done in Statement 10. It can be seen that while Calcutta city is virtually close to the saturation point, even the Calcutta urban agglomeration is not growing as fast as Greater Bombay. At the present growth rate, it is not difficult to visualise Greater Bombay topping the ten-million mark by the turn of the century. These trends and projections have very obvious implications from the point of view of the urban amenities, housing problems and transport planning in the near future.

STATEMENT 10

Comparative percentage growth rates of Greater Bombay and Calcutta

Census Years	Greater Bombay	Calcutta urban agglomeration	Calcutta city
1941–51	75.96	28.26	24.50
1951–61	39.95	25.01	8.48
1961–71	43.80	22.57	7.57
1971–81	37.80	30.35	4.54

In view of the pre-eminent position that Greater Bombay occupies on the demographic scene of Maharashtra, we have separately presented in this Supplement data on population, literacy and sex ratio of the city by sections.

WORKING POPULATION

Statement 11 at page 12 brings out the total number of workers by sex and by distribution in the rural and urban areas in 1961, 1971 and 1981. While studying the work participation data of the three censuses, the definitional changes in the concept of worker and the scope of enquiry in each census must be kept in view. It may, however, be mentioned that at the 1981 census, a clear distinction is sought to be made between the main workers and marginal workers.

The total work participation rate, in Maharashtra *i.e.* the percentage of main workers to total population is 38.71% in 1981 as against 36.48% in 1971. Among the male population of the State, the work participation rate has only marginally increased from 52·09% in 1971 to 52·14% in 1981. There is however a sizeable increase in the work participation rate of the female population which has gone up to 24·39% from 19·70% in 1971. In so far as the rural areas are concerned the total work participation rates of males and females have registered an increase compared to 1971. This increase though slender in the case of the male population, is quite significant for females. But in the urban areas, there is a slight fall in the work participation rate of the total workers as well as the male workers, compared to 1971. It is only in the case of the female population that the work participation rate has gone up compared to 1971 even in urban areas. In fact, this position is generally repeated if the combined work participation rate of the workers and non-workers with secondary work of 1971, and, main and marginal workers of 1981 are considered. However, compared to 1961, the work participation rate of main workers or even of the combined main and marginal workers of 1981 is much less, in respect of total persons as also in the rural and urban areas. While it is difficult to offer plausible reasons for this phenomenon, a preliminary reason may be the significant differences in the work concept of the 1961 and 1981 censuses. It is also noticeable that the work participation rate of male workers has somewhat decreased compared to 1971, in Greater Bombay, Raigad, Ratnagiri, Pune, Aurangabad, Nagpur, Bhandara and Chandrapur districts. There is a significant increase in the work participation rate of female workers in all the districts, except Ratnagiri, where there is a fall by a little over 1% compared to 1971.

Statement 11 also gives data on non-workers with secondary work as recorded at the 1971 census and marginal workers of 1981 census. As against 852,179 non-workers with secondary work in 1971, there are now 2,483,702 marginal workers in the State. The increase is far more noticeable in the rural areas, than urban areas and particularly among the female workers. This indicates that the marginal work activities of the female population have been more successfully brought out in the 1981 census than ever before.

It may perhaps be interesting to compare the work participation rate of the main workers and, main and marginal workers together, with the corresponding data for the country. In Statement 12 the relevant All-India data is given without the brackets while the data for Maharashtra is shown within brackets.

STATEMENT 12

Comparison between All-India and Maharashtra State work participation rates in 1981.

	Persons	Males	Females
	I. *Main and Marginal Workers combined*		
Total	37.55 (42.67)	53.19 (53.90)	20.85 (30.70)
Rural	39.46 (48.26)	54.32 (55.60)	23.89 (40.84)
Urban	31.41 (32.30)	49.70 (50.97)	10.64 (10.35)
	II. *Main Workers*		
Total	33.44 (38.71)	51.23 (52.14)	14.44 (24.39)
Rural	34.77 (42.66)	52.21 (53.25)	16.49 (31.94)
Urban	29.17 (31.39)	48.18 (50.23)	7.57 (9.25)

It is seen that the work participation rate in Maharashtra state in 1981 both for main workers alone, and, main and marginal workers combined, is uniformly higher than the All-India rates, excluding females in urban areas (in the category of main and marginal workers combined). The trend is more pronounced for females in the rural areas.

Statement 13 at page 13 presents proportion of workers to total population and their distribution into broad categories. As stated above, the proportion of workers to total population in 1981 is higher compared to 1971 but much lower when compared to the 1961 data. This may perhaps call for a detailed analysis when all the relevant data are analysed. There is a slight increase in the proportion of cultivators over 1971. While the proportion of total agricultural labourers has registered a fall, it has somewhat increased in the rural areas, over the 1971 rates. The proportion of other workers has gone up in 1981 both in total numbers as also in the rural areas, although the picture in this regard has changed only slightly in the urban areas. Statement 14 at page 13 has been compiled to show separately the proportion of non-workers and marginal workers to total population. The proportion of non-workers to total population appears to be more in the urban areas than in the rural areas.

Primary Census Abstract (PCA)

This Supplement includes Primary Census Abstract (PCA) showing by districts, the area, occupied residential houses, number of households, total population, density of population per sq. km., sex ratio, growth-rate and literacy figures. It also includes the distribution of main workers, marginal workers and non-workers by sex and rural and urban classification. It is needless to add that the data for the 1981 census presented in the PCA as also Tables 1 to 5, are provisional and they are likely to vary in the final form after detailed editing and tabulation are over.

PUBLICATION PROGRAMME

The 1981 Census tables will be published as 32 separate series of volumes for All-India and for each State and Union Territory.

The publication series is as follows :

Series No.

1. INDIA

States—

2. Andhra Pradesh
3. Assam
4. Bihar
5. Gujarat
6. Haryana
7. Himachal Pradesh
8. Jammu & Kashmir
9. Karnataka
10. Kerala
11. Madhya Pradesh
12. Maharashtra
13. Manipur
14. Meghalaya
15. Nagaland
16. Orissa
17. Punjab
18. Rajasthan
19. Sikkim
20. Tamil Nadu
21. Tripura
22. Uttar Pradesh
23. West Bengal

Union Territories—

24. Andaman & Nicobar Islands
25. Arunachal Pradesh
26. Chandigarh
27. Dadra & Nagar Haveli
28. Delhi
29. Goa, Daman & Diu
30. Lakshadweep
31. Mizoram
32. Pondicherry

In each of these series (for All-India and each State/ Union Territory) the different series of tables (A Series–General Population Tables, B Series–General Economic Tables, etc.) will be brought out as different parts. Apart from these, District Census Handbooks will be published for each district in the country. These will contain the census tables for the district, the Village and Town Primary Census Abstract and the Village and Town Directories. The latter comprise compilations of statistics, external to the census relating to the villages and towns, which in conjunction with census data will be very useful to data users.

For All-India and for each State and Union Territory the census tabulations and reports will be published according to the following plan :—

Part No. and subject covered	Sub-part No. if any, and the topics covered
Part I–Administration Report (for official use only).	Part I-A—Administration Report—Enumeration. Part I-B—Administration Report—Tabulation.
Part II–General Population Tables	Part II-A—General Population Tables—A Series. Part II-B—Primary Census Abstract.
Part III–General Economic Tables.	Part III-A—B Series Tables of first priority covering population by economic activity, industrial category of main workers, marginal workers and their cross-classification by age, literacy, educational level, sex, and non-workers and marginal workers by type of activity, seeking/available for work and their cross-classification by age, literacy, educational level and sex. Part III-B—B Series Tables of second priority covering industrial classification of main workers and marginal workers, occupational classification and class of worker of main workers and main activity and seeking/available for work of marginal workers and non-workers and their cross-classification by age, sex and educational level.
Part IV–Social and Cultural Tables.	Part IV-A—C Series Tables of first priority covering age, sex, and marital status, composition of the population, single year age returns, educational level and school attendance. Part IV-B—C Series Tables of second priority covering mother-tongue, bilingualism and religion of population and household composition.
Part V–Migration Tables.	Part V-A—D Series Tables of first priority covering distribution of population by place of birth, migrants by place of last residence, by duration of residence and reason for migration and economic activity of migrants reporting 'Employment' as reason and their cross-classification by age and literacy. Part V-B—D Series Tables of second priority covering migration for 'Employment' to urban areas from rural and urban and within State and outside State origins, their composition by age, sex and educational level and seeking/ available for work and duration of last residence.

Part No. and subject covered	Sub-part No. if any and the topics covered
Part VI—Fertility Tables.	Part VI-A—F Series Tables of first priority. This part will cover the age at marriage pattern, current fertility and cumulated fertility for ever married and currently married women by present age and duration of marriage at State and district levels. At State level the further cross-classification by the socio-economic factors, religion, Scheduled Castes/Scheduled Tribes, educational level and occupation will be covered. Part VI-B—F Series Tables of second priority covering the surviving children of currently married women by present age and duration of marriage, religion etc., and also current fertility by duration of marriage at district level.
Part VII–Tables on Houses and Disabled Population	Part VII—H Series Tables covering census houses and their uses and the disabled population by type of disability, with analytical notes.
Part VIII—Household Tables.	Part VIII-A—H-I Series Tables covering material of construction of houses occupied by households, housing facilities available to households, household size and number of couples living in households and households by number of main workers, seeking/available for work and literate members, cultivating and non-cultivating households by tenure of land for general and Scheduled Caste and Scheduled Tribe households, literacy among Scheduled Castes and Scheduled Tribes and economic activity of members of Scheduled Caste and Scheduled Tribe households. These tables will also cover the household population by religion of head of household and language mainly spoken in the household. Part VIII-B—This part will contain Tables HH-17, HH-17 SC, & HH-17 ST on tenancy. Part VIII-C—Report on Households. This will be an analytical report of the data presented in Parts VIII-A and VIII-B.
Part IX–Special Tables on Scheduled Castes and Scheduled Tribes.	The SC and ST Series of tables for Scheduled Castes and Scheduled Tribes respectively, covering industrial categories of main workers and marginal workers, type of activity of marginal workers and non-workers, seeking/available for work among marginal workers and non-workers, age, sex, marital status, composition of Scheduled Caste and Scheduled Tribe population and their educational level (for each Caste/Tribe separately). These tables also cover for Scheduled Tribes, their composition by religion, mother-tongue and bilingualism.
Part X—Town Directory, Survey Reports on Towns and Villages.	Part X-A—Town Directory. Part X-B—Survey Reports on Selected Towns. Part X-C—Survey Reports on Selected Villages.
Part XI—	Ethnographic notes and special studies on Scheduled Castes and Scheduled Tribes.
Part XII—Census Atlas.	Union and State/Union Territory Census Atlases.
Part XIII—District Census Handbook.	Part XIII-A—Village and Town Directory. Part XIII-B—A Series Tables–General Population Tables (Tahsil and Town levels) and Village and Townwise Primary Census Abstract.

The following special papers are also planned and will be published as and when they are ready as 1981 Census papers :—

(a) Special studies taken up by the Directors of Census Operations.
(b) Special Areas Surveys.
(c) Special Tables for Standard Urban Areas.
(d) Language Survey Reports.
(e) Post Enumeration Check Report.
(f) Age Tables.
(g) Life Tables.
(h) Reports on estimates of inter-censal birth and death rates using 1971–1981 Life Tables and age data.
(i) Development of Vital Statistics in India.

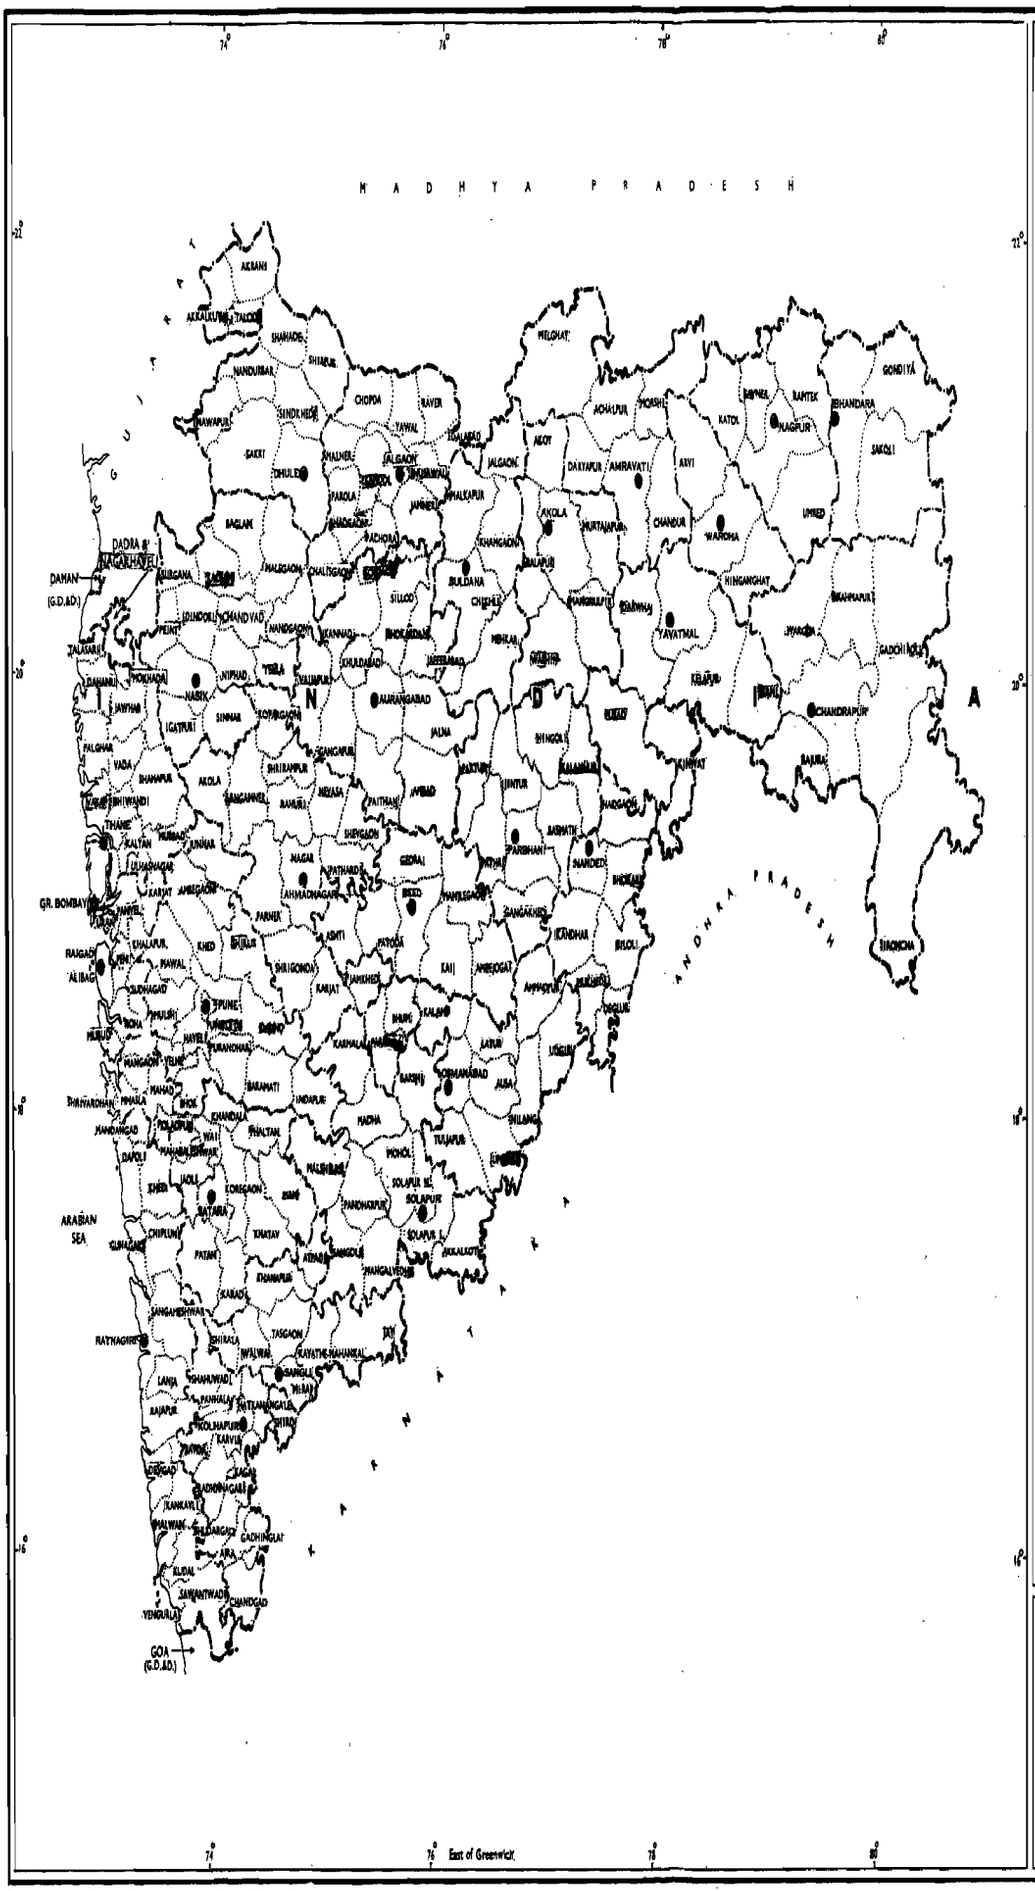

Besides these special papers, some monographs based on 1981 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1981 Census Monographs.

It is also proposed to carry out some special studies of 1981 Census data in collaboration with other organisations and the results of such studies will be published as occasional papers of the 1981 Census.
