# INTRODUCTION

**Paper 1 of 1981 and the Supplement.**

In March 81, the provisional population totals of Haryana State were released barely two weeks after the enumeration was over. The actual enumeration was conducted from 9th February to 28th February, 1981 with a revisional round from 1st March to 5th March, 1981 in order to bring the Census count correct upto the reference date i.e. the sunrise of 1st March, 1981.

In Paper 1 of 1981 figures down to the district level and cities with population of 100,000 and above had been given and basic data relating to total population, sex ratio, density, decennial growth rate, literacy and sex-wise break-up of population were presented. In the present paper which is being brought out as a supplement to Paper 1 of 1981, a few other characteristics of population based on 1981 Census provisional results are being published. These figures are purely provisional, compiled from the abstracts collected from the large army of Enumerators and therefore subject to final confirmation after the detailed processing of schedules, in the Regional Tabulation Offices is completed.

**Scope of the Supplement**

In this brochure we seek to supplement the information already made available in Paper 1 with greater details down to the tahsil and town levels. It includes information on urban population and work participation rates of the male and female population. Data in the form of Primary Census Abstract and on disabled persons are included to enhance the academic value of the paper. A few detailed maps and diagrams depicting the data have also been added with the hope that they will help the reader to follow the demography of the state at a glance. A brief analysis of the data presented in the supplement has also been given.

The Census questionnaires and the publication programme at the end are intended to give the reader an idea of the information collected by us and the publications that will be brought out in future.

**Acknowledgements.**

I must acknowledge again, with gratitude, the active help and co-operation extended by the Government of Haryana at all levels and the goodwill shown by the people of the state to the Census Organisation. I would also like to record my appreciation for the devotion with which everyone in my office worked towards making this supplement useful and presentable.

I am also beholden to Shri P. Padmanabha, Registrar General, India for his constant support and guidance and to Shri V. P. Pandey, Deputy Registrar General and Shri K. K. Chakravorty, Deputy Registrar General (C & T) and my other colleagues in the Head Office for their continuous co-operation and valuable help.

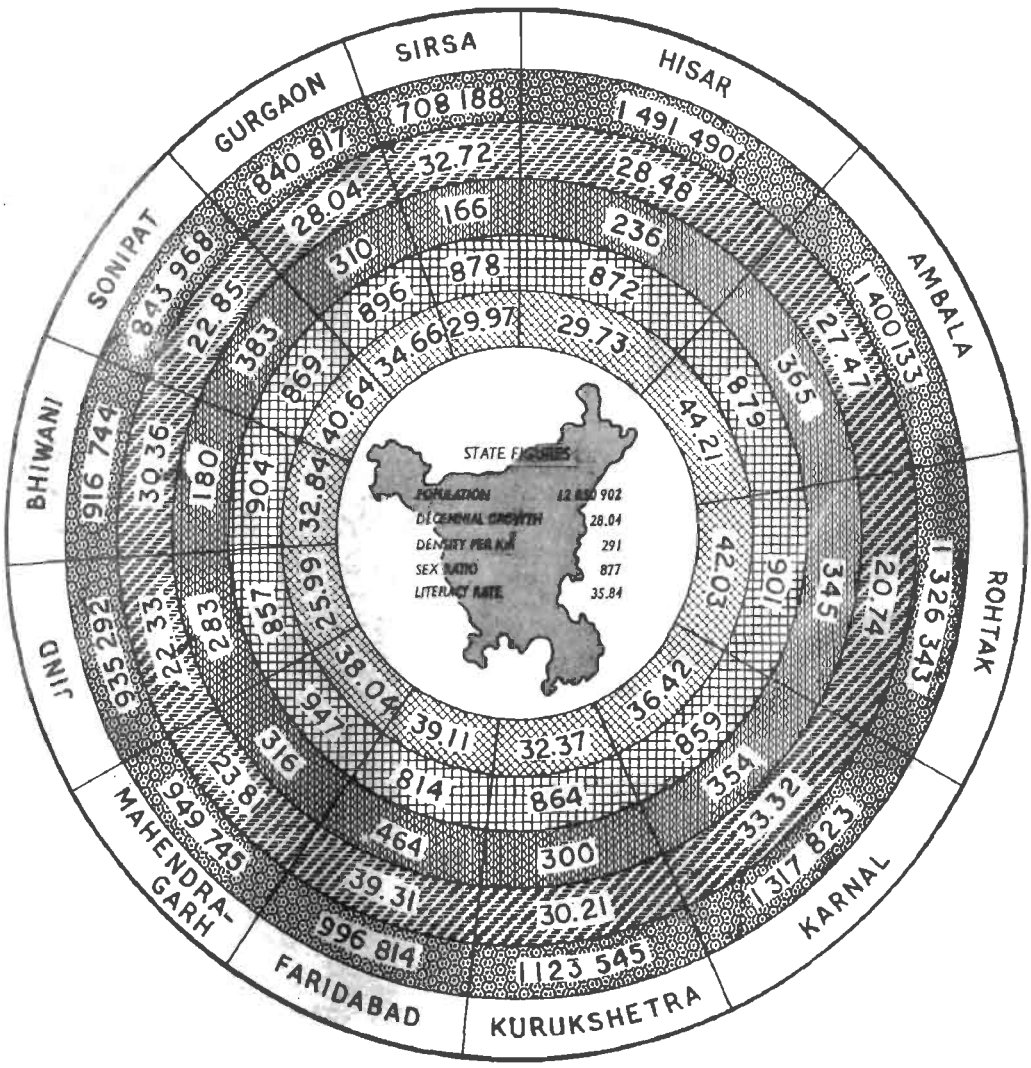

O. P. BHARADWAJ
Director of Census Operations,
Haryana, Chandigarh.

# ANALYSIS OF RESULTS

## PROVISIONAL POPULATION FIGURES- AN ANALYSIS

The 1981 Census of India has recorded 12,850,902 persons as on the sunrise of Ist March, 1981 in Haryana State, placing it at 15th position among the States/Union Territories in the country. The population of the State is unevenly distributed among its twelve districts. Hisar has claimed 11.61 per cent of the total population of the State and has emerged as the biggest district, closely followed by Ambala with 10.90 per cent. Sirsa district is the smallest with 5.51 per cent of the total population of the State..

**Rural/Urban Composition**

Broadly, population can be divided into two major streams viz. rural and urban. Out of the total population of the State, urban population with 2,821,829 persons constitutes 21.96 per cent while rural population with 10,029,073 persons accounts for the remaining 78.04 per cent.

The following definition of urban areas adopted in the 1971 Census has been retained for the 1981 Census also.

(a) All places with a municipality, corporation, cantonment board or a notified area committee etc.

(b) All other places which satisfied the following criteria :

(i) a minimum population of 5,000 ;

(ii) at least 75 per cent of male working population engaged in non-agricultural persuits ; and

(iii) a density of population at least 400 per square kilometre (1000 per square mile.)

In addition to all municipal areas/ cantonment board, four villages namely (1) Baoiyal (2) Samalkha (3) Gurgaon (rura[1]) and (4) Jharsa satisfying the above criteria have been treated as Census Towns. The total number of towns in 1981 Census is 81 as compared to 65 in 1971 Census.

The Statement at page 35 gives the revised figures for total population (excluding Assam and Jammu & Kashmir), urban population and the percentage of urban population among the States/Union Territories. These figures have been arrived at after checking field totals. Figures relating to urban population for Assam and Jammu & Kashmir have been excluded because urbanisation is so dependent on socio-economic factors that the projections will not justify the process of urbanisation prevailing there. The proportion of urban population to total population for the country as a whole is 23.73 per cent, whereas in Haryana it is 21.96 per cent as per 1981 Census. Among the States (excluding Assam and Jammu & Kashmir) the proportion of urban population is the highest in Maharashtra (35.03 per cent) and the lowest

in Himachal Pradesh (7.72 per cent). Among the Union Territories, Chandigarh claims the highest proportion of urban population (93.60 per cent) whereas the lowest percentage of urban population is found in Arunachal Pradesh (6.32 per cent).

Table-1 shows rural/urban composition of population in the State. A districtwise study reveals that Faridabad has emerged as the most urbanised district where 40.60 per cent of the total population has been classified as urban. Next, comes the Ambala district with urban population constituting 33.10 per cent of the total. Ambala district was at the top in this regard in 1971 with 31.39 per cent of the total population as urban. With its 11.08 per cent urban population Jind district was the lowest in 1971. This time in 1981, Mahendragarh with 13.20 per cent urban population comes out the least urbanised district. The percentage of urban population to the total population in the other districts in descending order is Karnal (26.27), Sirsa (20.39), Gurgaon (20.12), Rohtak (20.05), Hisar (19.35), Sonipat (18.01), Kurukshetra (16.56), Bhiwani (16.07) and Jind (13.76).

The decennial growth rate of total population reflects an increase of 28.04 per cent during 1971—81. The rural and urban population have registered a growth of 21.36 per cent and 59.16 per cent respectively during the last decade. The relatively higher growth of urban population is due to increase in the number of urban areas, and attractive civic and employment opportunities. A districtwise study of decadal urban growth rate shows Sirsa at the top where an increase of 89.36 per cent has been recorded closely followed by Gurgaon district with 83.07 per cent urban increase. The lowest urban growth rate during 1971—81 has been found in Mahendragarh district (23.40 per cent). Other districts in decending order of decadal urban growth rate are Sonipat (73.66 per cent), Karnal (70.39 per cent), Hisar (60.43 per cent), Jind (51.95 per cent), Bhiwani (42.80 per cent), Kurukshetra (38.89 per cent), Rohtak (38.24 per cent), Ambala (34.42 per cent), and Faridabad (33.71 per cent). In rural areas, Kurukshetra district has claimed 28.61 per cent population increase during 1971—81 which is closely followed by Bhiwani district with 28.22 per cent. The lowest decadal growth rate of population in rural areas viz. 9.17 per cent has been recorded in Faridabad district and may be due to the fact that many villages have come within the town limits of Faridabad Complex.

Table-2 shows population and growth rate of cities/urban agglomerations and towns while Table-3 depicts the urban population by size of towns which have been divided into six classes. All the towns/urban agglomerations having population of 100,000 and above are classified as Class I towns. Towns having population between 50,000—99,999 are classified as Class II towns. Towns with population between 20,000—49,999, 10,000—19,999, 5,000—9,999 and below 5,000 fall in classes III, IV, V and VI respectively. There are eleven Class I towns in the state, namely, Faridabad Complex, Rohtak, Yamunanagar U.A., Panipat, Hisar U.A., Karnal, Ambala U.A., Sonipat, Ambala, Bhiwani and Gurgaon U.A. The urban agglomeration of Yamunanagar includes Yamunanagar (M.C.), Jagadhri (M.C.) and Jagadhri Workshop Railway Colony (M.C.) Hisar U.A. covers Hisar (M.C.), Haryana Agricultural University and the mini secretariat (outgrowth). The two towns of Ambala Cantt and Ambala Sadar constitute Ambala U.A. Gurgaon U.A. includes Gurgaon M.C. and Gurgaon Census Town.

Class I towns have claimed 56.64 per cent of the total urban population of the state. Class II towns are Sirsa, Kaithal, Jind, Rewari and Hansi which contain 10.82 per cent of the State's urban population. In 1971, Class I towns had claimed 12.82 per cent of the urban population while 39.75 per cent urban population was recorded in Class II towns. The relatively higher proportion of urban population in Class I towns in 1981 Census may be attributed to the increase in their number on account of conversion of Class II towns to higher category due to population growth. The thirteen towns of Thanesar, Palwal, Narnaul, Bahadurgarh,

Fatehabad, Narwana, Mandi Dabwali,Charkhi Dadri, Shahbad, Gohana, Tohana, Jhajjar and Kalka have been classified as Class III towns where 14.80 per cent of the total urban population resides. There are 24 Class IV towns and 22 Class V towns which claim 11.64 per cent and 5.83 per cent of the urban population of the state respectively. Only 0.27 per cent of the total urban population live in Class VI towns namely Jakhalmandi and Ateli.

A very high growth rate of 603.34 per cent has been registered in case of Class I towns during 1971—81 as compared to 115.31 per cent for 1961—71. Towns of size Class II & III have experienced negative growth rate of—56.67 and—9.63 per cent during the last decade. This may be attributed to shifting of towns to higher category. During the decade 1961—71, these two classes of towns had claimed 48.81 per cent and 24.47 per cent growth rate respectively. The towns of Class IV and V have recorded 47.74 per cent and 18.32 per cent decadal growth rate respectively during 1971—81 while corresponding figures were 8.43 per cent and 28.99 per cent for the decade 1961—71. Class VI, which contains only a small fraction of urban population of the State, has experienced a negative growth rate of—56.52 per cent during the decade 1971—81, while during 1961—71, the growth rate in this class was —60.66 per cent.

**Sex Ratio.**

Haryana is a region with deficiency of females as sex ratio of 877 (females per 1000 males) against 935 of the whole country shows. In rural areas the sex ratio is 885 which is comparatively higher than the sex ratio of 850 in urban areas. It reflects the male selective migrations to urban areas. In comparison to all India figure the sex ratio is relatively low in Haryana both in rural and urban areas. Low sex ratio at birth and higher rate of mortality among females may explain this phenomenon. Among the various classes of towns, the sex ratio has shown an increase as one moves to lower categories of towns with an exception of Class VI towns. This trend suggests male selective migrations to bigger urban centres possibly due to relative shortage of housing accommodation and higher cost of living.

**Literacy Rate**

*Woman writing with a stylus.*
*After Khajuraho/standstone/70 cm. high.*

Literacy refers to a person who can read and write with understanding in at least one language. Literary rates would be more substantial if we exclude the age-group 0—4 from total population. However, at this stage, this information is not available as it will take time to generate age-group data. Therefore, for the purpose of this paper the entire population is being taken into account for getting literacy rates.

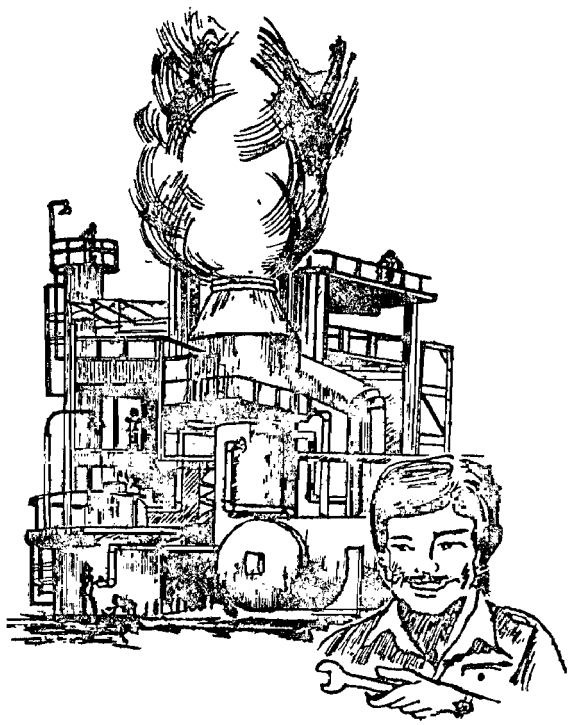

In India, the literacy rate is 36.17 per cent as compared to 35.84 per cent for Haryana according to 1981 Census. As revealed in 1981 Census ,the literacy rate for males in Haryana (47.78 per cent) is relatively higher than for India (46.74 per cent) whereas female literacy rate in the State comes to 22.23 per cent as against 24.88 per cent for the country as a whole. As expected, the literacy rate is higher in urban areas (56.78 per cent) than in rural areas (29.95 per cent) for the whole State of Haryana as per 1981 Census results. It may be attributed to availability of more educational facilities in urban areas and keen interest of the parents to give schooling to their children. In Haryana, literacy rate for males in rural areas (42.87 per cent) is relatively low as compared to urban areas (64.89 per cent). Percentage of female literacy rate is much lower in rural areas (15.34) as compared to urban areas (47.23) in Haryana. As per 1981 Census, the literacy rate is the highest in Ambala District (44.21 per cent) and lowest in Jind District (25.99 per cent). Male literacy rate is highest in Rohtak District (55.61 per cent) and the lowest in Jind District (37.83 per cent). Among the females the highest literacy rate has been registered in Ambala District (34.61 per cent) and the lowest in Jind District (12.19 per cent).

**Disabled population**

During the first phase of 1981 Census, houselisting operation was conducted in April, 1980, in which data on disabled population was collected in three types of disabilities viz., totally blind, totally crippled and totally dumb. The terms totally blind and totally dumb are self-explanatory. The term totally crippled refers to such persons who have lost both of their arms or/and legs. The loss of only one arm or/and one leg does not classify a person as totally crippled. The loss here refers to the inability to use and not necessarily physical absence. Thus, a paralytic who has lost the use of both the legs or both the arms, will be totally crippled, though the legs or arms as such are still physically present.

Statement at page 36 shows that there are 7,656 totally blind, 4,828 totally crippled and 3,359 totally dumb persons. Out of 7,656 totally blind persons in Haryana State, 6,647 are found in rural areas while 1,009 are living in urban areas. So far as totally crippled persons are concerned 4,064 are in rural areas and 764 in urban areas. The urban share in the number of totally dumb persons is 459, while in rural areas their strength is 2,900. Since these figures were collected during the houselisting operation ,it may not be very reasonable to derive proportions on the basis of the population figures.

## WORKING POPULATION

One of the important characteristics on which data is collected in Census is the economic activity of the individual. Among various population characteristics which explain man/land relationship, data on working population is the most significant. The size of working population by different categories and their sex-wise break up for rural and urban areas are the direct indices for the type of land resources, kind of society and the economic patterns. Data on economic activities throws light on the economic health of the region and is useful for socio-economic planning. Economically, the population can be divided into two main streams—workers and non-workers. Like 1971 Census, a worker in 1981 Census, is a person whose main activity is participation in any economically productive work by physical or mental activity. Work involves not only actual work but also effective supervision and direction of work. The main workers are those who have worked for 183 days or more in a year in one or more than one economic activity. A person who has worked for less than 183 days in a year is considered a marginal worker. The concept of marginal worker is a addition in 1981 Census. Non-workers are mainly engaged in household duties or as students or are dependents or retired persons, rentiers or beggars or inmates of charitable institutions or engaged in other non-productive economic activities.

In the data presented in this supplement, the persons have been categorised as main workers, marginal workers and non-workers. Data regarding marginal workers is significant for manpower planning. Data on main workers have been divided into four categories—cultivators, agricultural labourers, workers in household industry and other workers. Table 4 gives sex-wise distribution of main workers at district level and their comparison with 1971 Census results. With the increase in population of Haryana from 10,036,808 to 12,850,902 during the last decade, the main workers increased from 2,653,993 to 3,587,617 registering an increase of 933,624 workers. The proportion of main workers to total population is 27.92 per cent in 1981 as compared to 26.44 per cent in 1971. The low percentage of workers on the one hand may reflect higher capacity of workers to support larger number of dependents and on the other it may reveal the growing magnitude of unemployment. The proportion of male workers to total male population has gone up slightly from 47.27 per cent in 1971 to 48.17 per cent in 1981. The female participation in work has doubled to 4.82 per cent in 1981 as compared to 2.41 per cent in 1971.

The percentage of main workers to total population in 1981 is the highest in Sirsa District (30.00) followed in descending order by the districts of Hisar (29.76), Faridabad (29.30), Jind (29.18), Karnal (28.92), Ambala (28.74), Kurukshetra (28.56), Sonipat (28.05), Bhiwani, (27.89), Rohtak (26.38), Gurgaon (24.10) and Mahendragarh (22.85). In 1971, the proportion of main workers to total population was highest in Sirsa District (29.22 per cent) and lowest in Rohtak District (23.15 per cent). During the decade 1971—81, the proportion of main workers to total population has gone up in all the districts except in Gurgaon and Mahendragarh. The proportion of male workers to total male population has gone up during 1971—81 in nine districts namely Ambala, Kurukshetra, Karnal, Jind, Sonipat, Rohtak, Faridabad, Hisar and Sirsa and a decline in proportion is found in the remaining three districts of Gurgaon, Mahendragarh and Bhiwani. In all the districts, there is an increase in proportion of female workers to total female population during the last decade.

Table No. 5 gives the sex-wise distribution of main workers in four categories i.e., cultivators, agricultural labourers, workers in household industry and other workers and reflects the extent of diversification in the State's economy. The percentage of cultivators to total main workers has come down from 49.07 in 1971 to 44.97 in 1981 whereas the proportion of agricultural labourers has gone upto 16.40 per cent in 1981 from 16.20 per cent in 1971. The percentage of main workers in household

industry is 3.36 in 1981 in comparison to 3.26 in 1971. Other workers claim 35.27 per cent of the main workers in 1981 in relation to 31.47 in 1971. It reflects a gradual shift from agriculture to non-agricultural activities. The magnitude and direction of shift from agriculture to non-agricultural pursuits and the role of various factors in this process merit investigation. In Haryana State ,91.93 per cent of the main workers are males. Females constitute only 8.07 per cent and 71.50 per cent of the female workers are engaged in agricultural activities.

The proportion of cultivators to total workers has recorded a decline in all the districts except in Jind and Bhiwani during the last decade. The proportion of agricultural labourers to total workers has gone up in the districts of Ambala, Kurukshetra, Karnal, Gurgaon, Hisar and Sirsa during 1971 –81, while a decline has been registered in the remaining six districts namely, Jind Sonipat, Rohtak, Faridabad, Mahendragarh and Bhiwani. During the last decade, the proportion of workers in household industry has gone up in the districts of Ambala, Karnal, Faridabad, Gurgaon, Bhiwani, Hisar and Sirsa while in the remaining five districts a decline in this proportion has been recorded. During 1971- -81, except in Bhiwani District where a slight decline in the proportion of other workers has been recorded, all the remaining eleven districts have shown an increase in the proportion of other workers to total main workers. Among the eleven cities/urban agglomerations the population of which is 100,000 or more the proportion of main workers to total population is the highest in Faridabad Complex (33.75 per cent) and lowest in Ambala U.A. (25.10 per cent). The remaining nine cities/urban agglomerations have the following percentage of main workers: Panipat (30.71), Yamunanagar U.A. (30.45), Karnal (30.16), Rohtak (30.07), Hisar U.A. (29.89), Ambala (29.12), Bhiwani (28.79), Sonipat (28.22) and Gurgaon U.A. (27.75). The proportion of main workers to total population is relatively high in these cities/urban agglomerations which are important industrial centres.

Provisional data as presented in Primary Census Abstract on page 54 reveals that 77.14 per cent of the total main workers are found in rural areas and this figure is quite close to the proportion of rural population to total population which is 78.04 per cent. It reflects the agrarian character of our economy The proportion of main workers in rural areas to total workers is the highest in Jind District (87.20 per cent) and the lowest in Faridabad District (55.19 per cent).

Among the tahsils, the proportion of main workers to total population is the highest in Loharu tahsil (34.89 per cent) and the lowest in Gurgaon tahsil (19.53 per cent). There are nine tahsils namely Loharu, Kalka, Fatehabad, Guhla, Ballabgarh, Gohana, Ferozepur Jhirka, Tohana and Sirsa, where the proportion of main workers to total population is above 30 per cent. In the tahsils of Mahendragarh, Narnaul, Bawal, Jhajjar, Rewari and Gurgaon, the proportion of main workers is below 25 per cent. The proportion of main workers to total population ranges between 25—30 per cent in the remaining 24 tahsils. The proportion of male main workers to total male population is the highest in Guhla tahsil (54.50 per cent) and the lowest in Gurgaon tahsil (34.01 per cent). Among the females, the proportion of main workers is the highest in Loharu Tahsil (20.62 per cent) and the lowest in Dabwali Tahsil (1.36 per cent). Out of 39 tahsils, 24 tahsils are those where the proportion of female main workers is less than 5 per cent. In 12 tahsils, the proportion of female main workers ranges between 5—10 per cent while in the remaining 3 tahsils, the proportion of female workers is above 10 per cent. It reflects the extremely low participation of females in economic activity. As is apparent, in rural areas, the workers are mostly engaged in agricultural activities while in urban areas, the non-agricultural pursuits are absorbing the majority of workers.

*Notes.*— (1) Districts and towns treated as such for the first time in 1981-Census are printed in *italics*.

(2) Towns treated as such for the first time in 1971-Census which continue as towns for 1981-Census are shown with an asterisk (*) on their left.

(3) The following abbreviations have been used for the status of a town :—

M.C. Municipal Committee.
C.B.= Cantonment Board.
C.T.=Census Town.

(4) U.A.= Urban Agglomeration.
O.G.= Out growth.

‡Total area figures for the State and the Districts represent "geographical area" figures supplied by the Surveyor General. Figures for urban areas are those supplied by the Local Bodies. Area figures for rural areas are derived by subtracting the urban area from the total area of the district. The total of area figures of tahsils in a district will not tally with the district rural figures because the former are derived from the village-wise area figures supplied by the Tahsildars.

## APPENDIX—I

OFFICIALS WHO WORKED IN THE "PROVISIONAL POPULATION TOTALS (SUPPLEMENT)—1981 CENSUS PROJECT"

*General Supervision*

1. Shri R. K. Aggarwal, Deputy Director.

*Compilation*

1. Shri J. N. Suri, Assistant Director.
2. Shri P. N. Modgil, Tabulation Officer.
3. Shri B. S. Rai, Statistical Assistant.
4. Shri K. K. Khattar, Statistical Assistant.
5. Shri Rajinder Kakkar, Statistical Assistant.
6. Miss Saroj Bala, Computor.

*Mapping*

1. Shri S. R. Puri, Senior Geographer.
2. Shri N. P. Gupta, Artist.
3. Shri Manjit Singh, Draftsman.
4. Miss Anju Sharma, Draftsman.
5. Shri Surinder Singh I, Draftsman.
6. Miss Neelam Sharma, Draftsman.
7. Shri Surinder Singh II, Draftsman.
8. Shri Hoshiar Singh, Draftsman.
9. Shri Gobind Singh Negi, H.P.M.O.

*Printing*

1. Shri Koshy P. Zachariah, Tabulation Officer.
2. Shri Surender Verma, Statistical Assistant.
3. Shri Joginder Singh, Statistical Assistant.
4. Shri K.L. Saini, Computor.
5. Shri Jaswant Singh, Computor.
6. Shri Yashwant Singh, Computor

## APPENDIX—II

## PUBLICATION PROGRAMME

The 1981 Census tables will be published as 32 separate series of volumes for all-India and for each State and Union Territory.

The publication series is as follows :-

*Series No.*

1 INDIA
States
2. Andhra Pradesh
3. Assam
4. Bihar
5. Gujarat
6. Haryana
7. Himachal Pradesh
8. Jammu & Kashmir
9. Karnataka
10. Kerala
11. Madhya Pradesh
12. Maharashtra
13. Manipur
14. Meghalaya
15. Nagaland
16. Orissa
17. Punjab
18. Rajasthan
19. Sikkim
20. Tamil Nadu
21. Tripura
22. Uttar Pradesh
23. West Bengal
Union Territories
24. Andaman & Nicobar Islands
25. Arunachal Pradesh
26. Chandigarh
27. Dadra & Nagar Haveli
28. Delhi
29. Goa, Daman & Diu
30. Lakshadweep
31. Mizoram
32. Pondicherry

In each of these series (for all-India and each State/Union Territory) the different series of tables (A Series--General Population Tables, B Series—General Economic Tables, etc.) will be brought out as different parts. Apart from these, District Census Handbooks will be published for each district in the country. These will contain the census tables for the district, the Village and Town Primary Census Abstract and the Village and Town Directories. The latter comprise compilations of statistics, external to the census relating to the villages and towns, which in conjunction with census data will be very useful to data users.

For all-India and for each State and Union Territory the census tabulations and report will be published according to the following plan:

| Part No. and subject covered | Sub-part No. if any and the topics covered |
|---|---|
| 1 | 2 |
| Part-I—Administration Report (for official use only) | Part I A—Administration Report-Enumeration |
| | Part I B—Administration Report—Tabulation |
| Part II—General Population Tables | Part-II A—General Population Tables—A-Series |
| | Part IIB—Primary Census Abstract |
| Part III—General Economic Tables | Part IIIA—B-Series Tables of first priority covering population by economic activity, industrial category of main workers, marginal workers and their cross-classification by age, literacy, educational level, sex and non-workers and marginal workers by type of activity, seeking/available for work and their cross-classification by age, literacy, educational level and sex |
| | Part IIIB—B-Series Tables of second priority covering industrial classification of main workers and marginal workers, occupational classification and class of worker of main workers and main activity and seeking/available for work of marginal workers and non-workers and their cross-classification by age, sex and educational level. |
| Part IV—Social and Cultural Tables | Part IV A—C-Series Tables of first priority covering age, sex, and marital status composition of the population, single year age returns, educational level and school attendance |
| | Part IV B—C-Series Tables of second priority covering mother tongue, billingualism and religion of population and household composition. |
| Part V-Migration Tables | Part VA—D-Series Tables of first priority covering distribution of population by place of birth, migrants by place of last residence, by duration of residence and reason for migration and economic activity of migrants reporting Employment' as reason and their cross-classification by age and literacy |
| | Part VB—D-Series Tables of second priority covering migration for 'Employment' to urban areas from rural and urban and within State and outside State origins, their composition by age, sex and educational level and seeking/available for work and duration of last residence |
| Part VI—Fertility Tables | Part VI A—F-Series Tables of first priority. This part will cover the age at marriage pattern, current fertility and cumulated fertility for ever married and currently married women by present age and duration of marriage at State and district levels. At State level the further cross-classification by the socio-economic factors, religion, Scheduled Castes/ Scheduled Tribes, educational level and occupation will be covered. |

| Part No. and subject covered | Sub-part No. if any, and the topics covered |
|---|---|
| 1 | 2 |
| | Part VI B—F-Series Tables of second priority covering the surviving children of currently married women by present age and duration of marriage, religion etc. and also current fertility by duration of marriage at district level. |
| Part VII—Tables on Houses and Disabled Population | H-Series Tables covering census houses and their uses and the disabled population by type of disability, with analytical notes. |
| Part VIII—Household Tables | Part VIII A—HH-Series Tables covering material of construction of houses occupied by households, housing facilities available to households, household size and number of couples living in households and households by number of main workers, seeking/available for work and literate members, cultivating and non-cultivating households by tenure of land for general and Scheduled Caste and Scheduled Tribe households, literacy among Scheduled Castes and Scheduled Tribes and economic activity of members of Scheduled Caste and Scheduled Tribe households. These tables will also cover the household population by religion of head of household and language mainly spoken in the household. |
| | Part VIII B—This part will contain tables HH-17 , HH-17SC, & HH-17ST on tenancy. |
| | Part VIII C—Report on Households. This will be an analytical report of the data presented in Parts VIII A and VIII B. |
| Part IX—Special Tables on Scheduled Castes and Scheduled Tribes | The SC and ST Series of tables for Scheduled Castes and Scheduled Tribes respectively, covering industrial categories of main workers and marginal workers, type of activity of marginal workers and non-workers, seeking/available for work among marginal workers and non-workers, age, sex, marital status, composition of Scheduled Castes and Scheduled Tribes population and their educational level (for each Caste/Tribe separately). These tables also cover for Scheduled Tribes, their composition by religion, mother tongue and billingualism. |
| Part X—Town Directory, Survey Reports on Towns and Villages | Part XA—Town Directory<br>Part XB—Survey Reports on selected towns |
| | Part XC—Survey Reports on selected villages |
| Part XI | Ethnographic notes and special studies on Scheduled Castes and Scheduled Tribes |
| Part XII—Census Atlas | Union and State/Union Territory Census Atlases |
| Part XIII—District Census Handbook | Part XIII A—Village and Town Directory |
| | Part XIII B—A-Series Tables—General Population Tables (Tahsil and Town levels) and Village and Town-wise Primary Census Abstract. |

The following special papers are also planned and will be published as and when they are ready as 1981 Census papers :

(a) Special Studies taken up by the Directors of Census Operations

(b) Special Areas Surveys

(c) Special Tables for Standard Urban Area

(d) Language Survey Reports

(e) Post Enumeration Check Report

(f) Age Tables

(g) Life Tables

(h) Reports on estimates of inter-censal birth and death rates using 1971-81 Life Tables and age data

(i) Development of Vital Statistics in India.

Besides these special papers, some monographs based on 1981 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1981 Census Monographs.

It is also proposed to carry out some special studies of 1981 Census data in collaboration with other organisations and the results of such studies will be published as occasional papers of the 1981 Census.

# IMPORTANT INSTRUCTIONS

1 Record location code on each schedule and form, etc.

2 Do not leave any household or person uncovered in your block.

3 Do not forget to enter columns 1 to 7 of the Population Record before starting individual enumeration.

4 Do not forget to make repeated enquiries about young ldren, newly born babies and visitors not enumerated ewhere.

ıter serial number of mother if present in the household ,ainst her son and daughter aged 10 years and below.

/hile making entries for names of Scheduled Castes/ Scheduled Tribes, check names of Scheduled Castes/ Scheduled Tribes with list supplied to you by your supervisor.

7 Write legibly

8 Do not do overwriting

9 Do not hesitate to ask your supervisor if you have doubt on any matter

10 Do not allow your work of filling up of entries in the Population Record to accumulate. It should be completed for enumeration done at the end of each day's work.

11 Do not misplace or lose any of your forms or papers while performing duties as census enumerator.

12 During revisional round, fill in fresh slips for newly born babies and update the Population Record.

13 Cover households which have shifted to your block after your first visit but before sunrise of **1st March, 1981**, if not enumerated already in some other block.

14 In case of any death in your block before sunrise of **1st March, 1981**, cancel slip of that person if enumerated by you and make necessary corrections in the Population Record also.

15 While ticking for information in columns 8 to 35 in the Population Record, make sure that columns 8 to 21 refer to males and columns 22 to 35 to females

16 Check totals of columns in the Population Record before posting in working sheets for enumerator's abstract
