Director of Census Operations, Orissa

CENSUS OF INDIA 1981

ORISSA

SCHEDULED CASTES AND SCHEDULED TRIBES

SEPTEMBER, 1982

FOREWORD

On completion of the census operation in the field, Provisional Paper-1 of Census was released in March, 1981 by compiling the unedited basic data from the abstracts prepared by the Enumerators, Charge Officers and District Census Officers. Again in june, 1981 the Supplement of Paper-1 was published which presented provisional population by sex, number of literates, rural-urban break-up and workers etc. with sex break-up upto Tahasil and Town level.

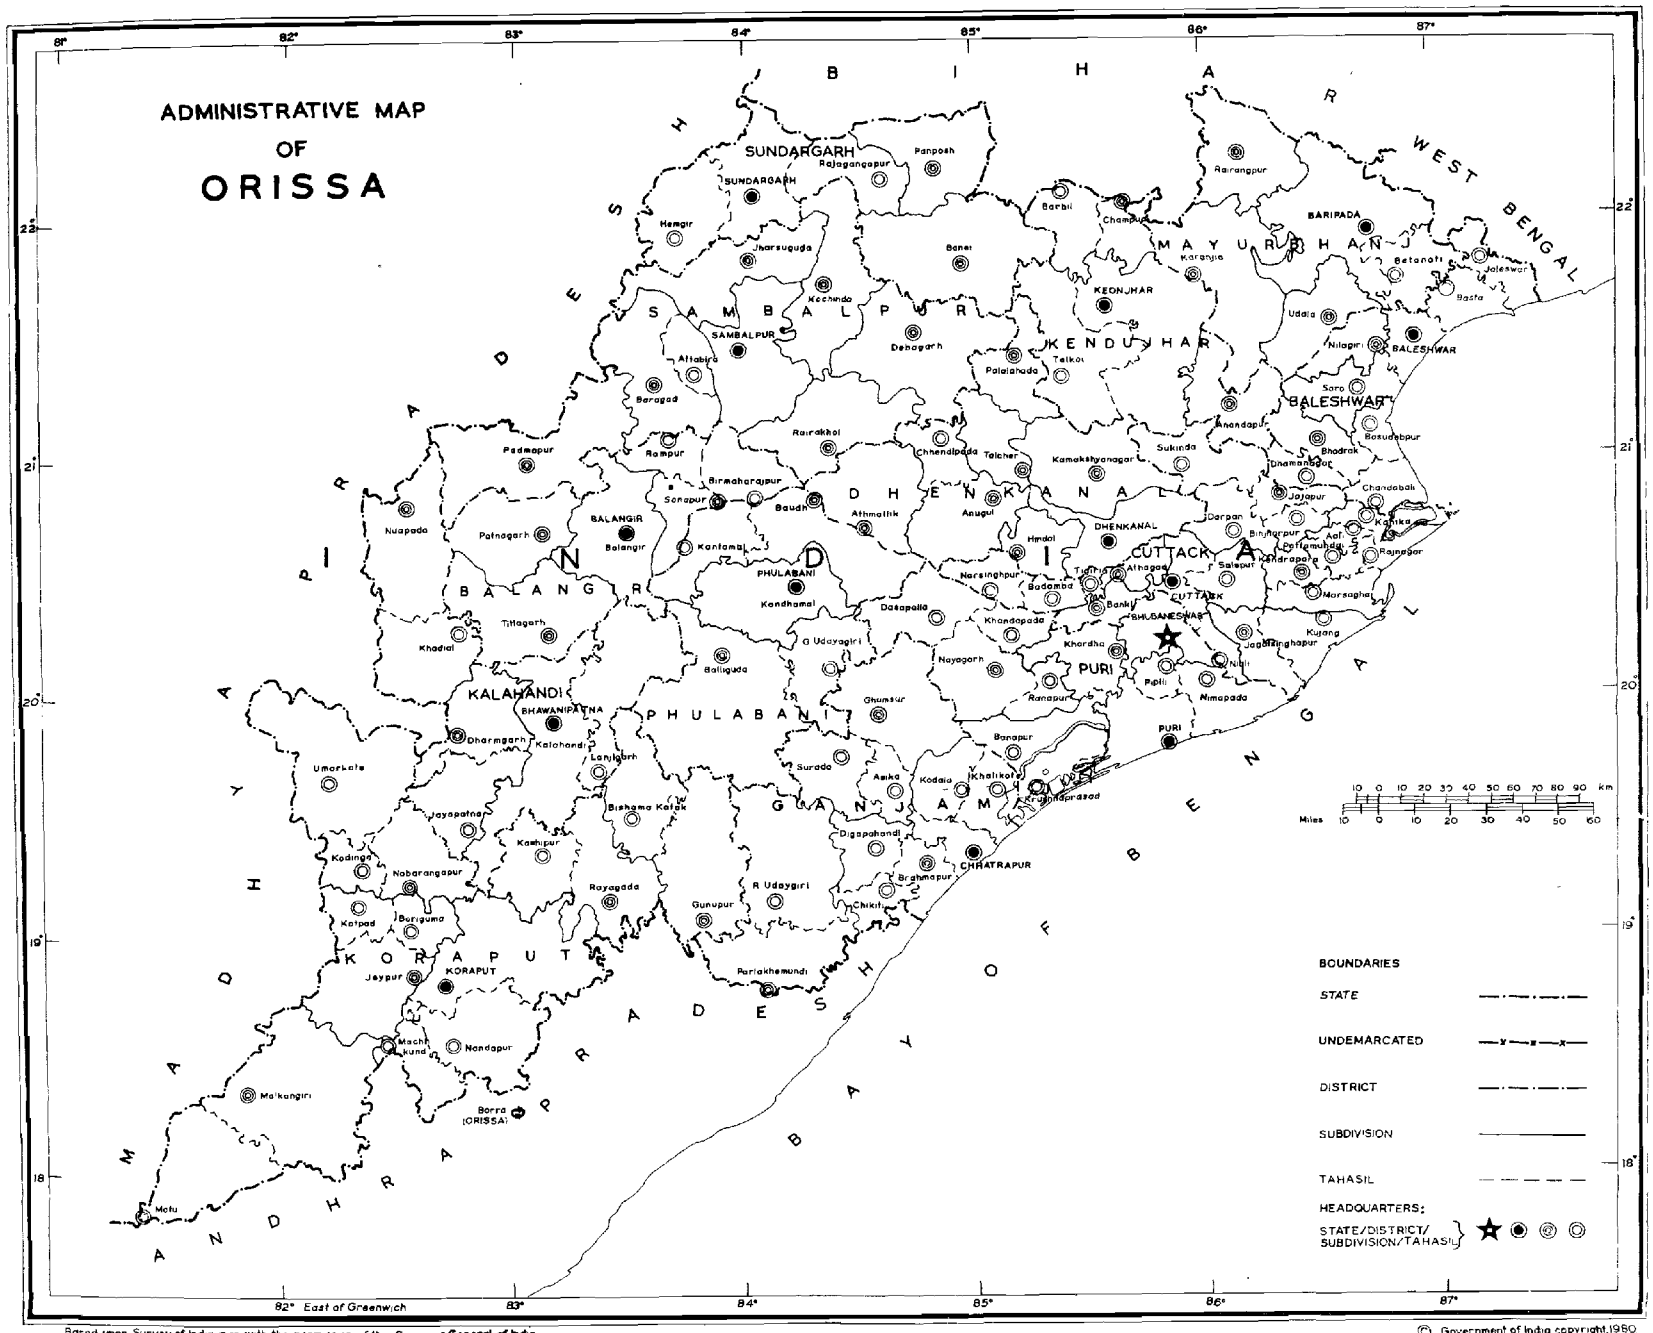

On completion of the manual edit and tabulation of data, Paper-1 of 1982 has been published recently providing limited information on the final figures of population as well as Seheduled Caste and Scheduled Tribe population upto Police Station and Town level.

In view of the pressing demand for census data on the Scheduled Caste and Scheduled Tribe communities especially in the context of the revised 20-points programme, the present Paper-2 of 1982 is being released for immediate reference of the planners, administrators and other interested data users. This paper presents the Primary Census Abstract separately for the Scheduled Caste population and Scheduled Tribe population upto the Police Station and Town level. These data include number of Scheduled Caste and Scheduled Tribe households with population, literates, main workers with their break-up of major occupational classifications, marginal workers and non-workers with sex break-up. Population of Scheduled Castes and Scheduled Tribes sex-wise at the village level as also at the ward level (in case of urban area) will be presented in the District Census Handbooks (Part-B) of each district to be published by early 1983. The data presented in this Paper would also be included in the future publications, viz, Part II-B (Primary Census Abstract) and Part XIII-B (District Census Handbooks) which will take a little more time to see the light of the day. Another important publication relating to the Scheduled Castes and Scheduled Tribes of this State will come out as "Part-IX –Special Tables on Scheduled Castes and Scheduled Tribes" after the census data are finally processed at the computer. This publication (Part-IX) will present more detailed and comprehensive data on each scheduled tribe and scheduled caste.

It is hoped that this paper will be found useful and will meet the immediate need of Government, research institutions and other data users.

INTRODUCTION

The Primary Census Abstract for Scheduled Castes and Scheduled Tribes is presented separately. These tables give the total population of Scheduled Castes and Scheduled Tribes, literates, main workers, marginal workers and non-workers. The main workers are further classified into four broad occupational categories. In both the tables data are presented for rural and urban areas separately for state, districts, tahasils, police stations and towns.

The Scheduled Castes or the Scheduled Tribes as the name denotes, are the castes or tribes listed in the Schedule to the Order by the President under Articles 341 and 342 of the Constitution of India. According to the Scheduled Castes and Scheduled Tribes List (Modification) Order, 1956 and subsequent corrigenda and notifications, there are 93 Scheduled Castes and 62 Scheduled Tribes in Orissa. The up-dated list of Scheduled Castes and Scheduled Tribes is presented towards the end of this paper. It may be mentioned here that the Scheduled Castes can belong to the Hindu or the Sikh religion only, while the Scheduled Tribes can belong to any religion.

One of the important characteristics on which information is collected through Census relates to the economic activity of the people. Therefore, it was considered desirable to obtain as detailed a profile of the working characteristics of the population as possible without losing the possibility of some comparability with the 1961 and the 1971 results. Keeping this in view the questionnaire was framed and canvassed through the Individual Slips to elicit information on the economic characteristics of the population.

The population of a country can be divided into economically active and inactive. The economically active group is generally referred to as the working population. What proportion of our population are engaged in work or are economically active and what job they do for their living, these are the issues which the census obtained through its massive operation in order to provide a broad dimensional picture of the labour force. With this back-drop it was thought appropriate to net the 'usual status' of the worker instead of 'current status' of the worker. Attempt was also made to record truthfully the participation of women and children in an accurate manner.

According to the questionnaire formulated, the population was divided into those who have worked any time at all during the last year and those who have not worked at all—the former being considered as a "worker" and the latter as a "non-worker". The worker population was further classified into two broad streams, viz., those who were engaged in some economic activity over a period of six months or more and those whose work can be considered as marginal or secondary, i.e., less than six months. The former was categorized as a "main worker" and the latter as a "marginal worker."

(i) A person is regarded as "Cultivator" if he or she is engaged either as employer, single worker, or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. "Cultivation" includes supervision or direction of cultivation.

(ii) A person who works in another person's land for wages in money, kind or share is regarded as an "Agricultural Labourer." He or she has no risk in the cultivation, but merely works in another person's land for wages.

(iii) "Household Industry" has been defined as an industry conducted predominantly by the head of the household and/or by the members of the household at home or within the village in rural area and only within the precincts of the house where the household lives in urban area. It should involve production, processing, servicing or repair

of articles or goods not on the scale of a registered factory.

(iv) "Other Workers" are those who are engaged in some economic activity for the major part of last one year, but who are not cultivators or agricultural labourers or doing household industry.

According to the Census concept, a person is considered to be "literate" if he is able to read and write in any language with understanding. A person who could merely read but could not write has not been taken as literate. Children of 4 years and below have been considered as illiterate, even though they might have picked up reading and writing of a few odd words.

The "household" according to the Census concept is a group of persons who commonly live together and would take their meals from a common kitchen unless exigencies of works prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or a household having a mixture of both.

The population of Scheduled Castes and Scheduled Tribes of Orissa works out to 14·66 and 22·43 per cent respectively of the total population of the State. Cuttack district has the highest population of Scheduled Castes in the State whereas concentration of Scheduled Tribe population is the maximum in Koraput district.

Foot Notes :

1. Towns treated as such for the first time in 1971 Census which continue as towns in 1981 Census are shown with asterisk (*) on their left.
2. Towns treated as such for the first time in 1981 Census are underlined.
3. The following abbreviations have been used to describe the civic status of the towns :

"M" for Municipality,
"N. A. C." for Notified Area Council &
"C. T." for Census Town.
