PUBLICATION PROGRAMME

PONDICHERRY

Series 30 will relate to Pondicherry Union Territory only. Under this series, the following publications will be issued.

Portrait of Population	A Descriptive Analysis of 1971 Census data
Part I	General Report and Subsidiary Tables
*Part II—A	General Population Tables (A Series)
Part II-B	Economic Tables (B Series)
@Part II-C (i)	Social and Cultural Tables—Religion and Scheduled Castes
Part II-C (ii)	Other Social & Cultural Tables and Fertility Tables
Part II D	Migration Tables
*Part III	Establishments—Report and Tables
*Part IV	Housing Report and Tables
@Part V A	Special Tables on Scheduled Castes
Part VI B	Special Survey Reports on Selected Towns
Part VI C	Survey Reports on Selected Villages
Part VIII A & B	Administration Report on Enumeration and Tabulation (for official use only)
Part IX	State Census Atlas
Part X	District Census Hand Books
*A & B	Village and Town Directory and Primary Census Abstract
C	Analytical Report, Administrative Statements and District Census Tables Special Studies and other Miscellaneous Reports

ALL INDIA PUBLICATIONS

Volumes similar to those indicated above are being published at the All India level. Apart from these, All India Census Tables on 1% sample basis, as Part II (special) and a Special Report on Graduates and Technical Personnel as Part VII are also being published.

*Already published. @Present publication.

PREFACE

The present volume on the 1971 census of Pondicherry Union Territory contains tables relating to religion and scheduled castes. Table C VII relates to religion and Table C VIII Part A relates to scheduled castes. These two tables form part of the Social and Cultural Tables of the 1971 census tabulation programme. In addition, four special tables (SC I to IV) giving data on different characteristics of the scheduled caste population are presented. The compilation of these special tables was done after the main tabulation was completed. In Table C VIII, figures for the scheduled caste population as a whole are given while in the special tables, individual scheduled caste data are presented. These tables are comparable to similar tables published in 1961 census for this territory.

In the finalisation of the materials printed in this volume, I had the assistance of my Deputy Directors S/Sri T. V. Srinivasan and M. Thangaraju, and of Sri M. Panchapakesan, Asssistant Director, S/Sri A. V. Vallinathan, Investigator and C. K. Somasundaram, Senior Technical Assistant assisted by Sri R. Srinivasan, Smt. A. M. Mangayarkarasi, Research Assistants attended to the compilation and preparation of the tables for printing. Kum. B. Sundarambal, Upper Division Clerk and Kum. P. Susheela, Smts. N. Anuradha and K. Sakuntala and Sri R. Balasubramanian, Assistant Compilers attended to initial compilation of tables. S/Sri S. Natarajan, A. Radhakrishnan and R. Sankara Sharma, Smts. R. Saroja Bai and V. Manimekalai, Assistant Compilers attended to the preparation of the manuscripts for the press. I place on record my appreciation of the good work done by the officers and staff above mentioned in bringing out this publication.

I am also grateful to Sri R. B. Chari, I.A.S., Registrar General, India and Sri K. K. Chakravorty, Assistant Registrar General (Census) for their co-operation in ensuring the clearance of the census tables for printing early.

Lastly my thanks are also due to the Manager, Government of India Press, Coimbatore and his Assistant Managers for their efforts to complete the printing of this book in the quickest time possible.

INTRODUCTORY NOTE

The present volume contains two parts, namely Part II C(i) Social and Cultural Tables and Part V A—Special Tables on Scheduled Castes relating to Pondicherry Union Territory. In Part II C(i), two tables and in Part V A, four tables are presented. Out of eight tables under Social and Cultural tables, only two are given in this volume and the other six tables are being published in another volume as Part II C(ii) along with Fertility Tables.

No tribe has been scheduled in the President's order for this Union territory and hence there are no tables for Scheduled Tribes.

The tables that are given in this volume are:

II C (i) Social and Cultural Tables.

C VII—Religion

C VIII — Part A—Classification by literacy and Industrial category of workers and non-workers according to main activity among Scheduled Castes.

V A—Special Tables on Scheduled Castes

SC I—Industrial classification of persons at work and non-workers by sex for Scheduled Castes.

SC II—Age and marital status for Scheduled Castes.

SC III—Education for Scheduled Castes.

SC IV—Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes.

All the above tables have been tabulated on full count basis from the information recorded in the individual slips. The concepts adopted and the details of statistics given in each table are explained in the concerned fly-leaf which precedes each table. Readers may also please refer to the "Instructions to Enumerators for filling up the Individual Slip" reproduced in Annexure II of Part IIA—General Population Tables of Pondicherry, published earlier.

Part II-C(i)--SOCIAL AND CULTURAL TABLES

(C-VII and C-VIII—PART-A)

TABLE C-VII

RELIGION

C-VII—Religion

Fly Leaf

This table gives the distribution of population by major religions. The table shows data for the Union Territory/Area/Commune with rural/urban break up and for each town. Population is presented by sex. Data for Pondicherry Urban Agglomeration is given in the Annexure to this table.

The table presents population figures under six major religions arranged in alphabetical order. The six major religions are Buddhists, Christians, Hindus, Jains, Muslims and Sikhs. There were returns of persons who had religions other than the six mentioned above. They have been grouped together and shown under "other religions and persuasions" in the table. There were also others in the population who did not report their religion and they have been shown under "Religion not stated". In the appendix to this table, details of individual religions grouped under "other religions and persuasions" as also the population coming under each with sex break up is given at the Union Territory/area level for rural and urban areas separately.

Out of a total population of 471,707 in 1971, 400,793 or 84.97% are Hindus. Christians number 41,296 and form 8.76% of the population. Muslims come third with 6.18% of the total population. A statement showing the population percentage coming under the major religions in 1971 and 1961 censuses for the Union Territory is given below:--

Religion	Percentage to total population	
	1961	1971
1	2	3
Hindus	84.32	84.97
Christians	9.20	8.76
Muslims	6.36	6.18
Jains	0.02	0.05
Sikhs	N	0.01
Buddhists	0.01	N
Other religions and persuasions	0.09	0.02
Religion not stated	..	0.01

'N' denotes negligible figures.

The proportion of Hindus has increased by 0.65% while the percentages of Christians and Muslims have come down by 0.44% and 0.18% respectively during the decade 1961—71. In the country as a whole Hindus, Muslims and Christians come in that order. While Hindus are the predominant religious group in Pondicherry Union Territory, Christians form the second major religious group and Muslims come next to it.

The growth rate of Pondicherry Union Territory during the decade 1961—71 is 27.81%. Hindus have increased by 28.78% during the same period. Muslims show a growth rate of 24.17% and Christians 21.65%. The increases shown by Sikhs and Jains are over 200% but in actual number these religious groups do not have significant numbers in this Union Territory. Buddhists and other religious persuasions show decreases during 1961—71.

Among the four areas of this Union Territory, under Hindus, Yanam has the highest percentage (93.11%) while Mahe has the lowest percentage of 73.09. Pondicherry area has only 2.80% of Muslim population while Mahe area has 24.44% of Muslims. Karaikal Area has also got 13.56% of its population under this religion. Yanam Area has 2.05% of its population as Christians while Karaikal Area has 10.28% of its population under this religious group. Buddhists and Jains are found only in Pondicherry Area while Sikhs are found in Pondicherry and Karaikal areas.

TABLE C-VIII PART A

CLASSIFICATION BY LITERACY AND INDUSTRIAL CATEGORY OF WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY AMONG SCHEDULED CASTES

C—VIII—Scheduled Castes and Scheduled Tribes

C-VIII Part A—Classification by literacy and industrial category of workers and non-workers according to main activity among Scheduled Castes.

Fly Leaf

In this table, data on Scheduled Castes are presented. The Scheduled Caste population have been presented by sex under literates and illiterates and workers and non-workers. The workers have been further classified into the nine industrial categories as adopted in the Primary Census Abstract. The data are presented for the Union Territory/Area/Commune with rural/urban break up and for each town and urban agglomeration.

In the appendix to this table, figures for each scheduled caste classified as literates and illiterates are presented for the units shown in the main table.

In the 1971 Census, each enumerator was provided with a list of Scheduled Castes recognised in the Union Territory for census enumeration. This list contained the names of Scheduled Castes as found in the President's order of Scheduled Castes as amended from time to time. The enumerator was instructed to record an individual as a Scheduled Caste provided this name was found in the concerned area, as per the list supplied to the enumerator. If a person belonging to any Scheduled Caste returned his caste by a synonym or generic name, that caste name as returned by the individual was recorded in the individual slip only if that caste was found in the list furnished to the enumerator. The enumerator was instructed not to write the name of the Scheduled Caste as "Harijan" or "Achut" etc. The correct name of the Scheduled Caste as in the notified list alone was to be recorded.

Scheduled Castes are recognised only among Hindus and Sikhs. There are 15 castes which have been recognised in the list for Pondicherry Union Territory. All the names are applicable in all the four areas of this Union Territory.

All the castes found in the President's list have been returned in 1971 Census.

Scheduled Caste population as per 1971 Census is 72,321. The Scheduled Caste population account for 15.45% of the total population of the Union Territory. Scheduled Castes in the country as a whole form 14.60% of the country's population. The proportion of scheduled caste population in the Union Territory is a little higher than the proportion in the country as a whole. Scheduled Castes in rural areas constitute 21.07% of the rural population and in urban areas they form 7.72% of the urban population.

Literates among Scheduled Castes is 18.70% and the literates in the total population is 46.02%. The literacy rate among Scheduled Castes is lower. Literacy percentage among Scheduled Caste males is 27.49%. This is low as compared to the male literacy rate of 57.29% in the total population. Literates among Scheduled Caste females are 9.60% while the rate is 34.62% for female literates in the total population. Like males, female literacy rate among Scheduled Castes is much lower than the rate for females in the total population.

Percentage of workers and non-workers in the total population and among Scheduled Castes are as follows:

	Total Population			Scheduled Castes		
	Persons	Males	Females	Persons	Males	Females
Workers	29.90	48.65	10.94	42.41	56.38	27.97
Non-workers	70.10	51.35	89.06	57.59	43.62	72.03

As between the female population of Scheduled Caste and non-Scheduled Caste the percentage of workers among the former is 27.97 while the latter is a only 7.87.

The proportion of workers is higher among the scheduled caste than that of the workers among the general population. It is quite significant among females; while only 10.94% of females are workers among the general female population 27.97% of the scheduled caste females are workers.

In the rural areas, a majority of the Scheduled Caste workers, viz. 86.02%, are engaged in agricultural labour and only 4.78% are cultivators. About 3% each are engaged in other services and manufacturing, processing or servicing and repairs conducted as non-household industry. In the urban areas too, 32.38% are engaged as agricultural labourers. Manufacturing etc. engaged 21.88% of the Scheduled Caste workers in urban areas. Another 21.84% of the Scheduled Caste workers in urban sector are engaged in other services. A little less than 10% are found working in transport, storage and communications in urban areas.

Of the total Scheduled Caste population of all castes, in the Union Territory, 74.02% are in Pondicherry Area, 23.51% in Karaikal Area, 0.03% in Mahe Area and 2.44% in Yanam Area. 79.01% of them live in rural areas and 20.99% in urban areas.

The six major scheduled castes in the Union Territory and their percentages to total scheduled castes population are given below:

Name of scheduled caste	Population	Percentage to all scheduled castes
1. Paraiyan, Parayan (Sambavar)	39,919	54.74
2. Adi-Dravida	21,944	30.09
3. Valluvan	1,713	2.35
4. Adi-Andhra	1,543	2.12
5. Chakkiliyan	1,419	1.95
6. Pallan	1,359	1.86

The list of Scheduled Castes notified for 1971 Census is given below:

1. Adi-Andhra
2. Adi-Dravida
3. Chakkiliyan
4. Jambuvulu
5. Kuravan, Sidhanar
6. Madiga
7. Mala, Mala masti
8. Paky
9. Pallan
10. Paraiyan, Parayan (Sambavar)
11. Samban
12. Thoti
13. Valluvan
14. Vetan
15. Vettiyan

Part V-

A SPECIAL TABLES ON SCHEDULED CASTES

(S.C. I to S.C. IV)

TABLE SC-I PART A

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES (RURAL)

TABLE SC-I PART B

INDUSTRIAL CLASSIFICATION OF PERSONS AT WORK AND NON-WORKERS BY SEX FOR SCHEDULED CASTES (URBAN)

SC-I Industrial classification of persons at work and non-workers by sex for Scheduled Castes

Fly Leaf

This table presents details of total population, workers and non-workers by sex for each Scheduled Caste recognised in Pondicherry Union Territory and returned in1971 Census. The data are presented for the Union Territory as a whole and for the four areas separately as well. Part A of the table relates to rural areas and Part B relates to urban areas.

This table is similar to Table SCT I Part A presented in 1961. (Part III-Vol. XXV of Pondicherry). The Industrial categories adopted for presentation of data are based on the National Industrial Classification, 1970. The nine industrial categories into which the workers have been classified are as under:

I Cultivators
II Agricultural labourers
III Livestock, forestry, fishing, hunting and plantations, orchards and allied activities
IV Mining and quarrying
V Manufacturing, processing, servicing and repairs:—
(a) Household industry
(b) Other than household industry
VI Construction
VII Trade and commerce
VIII Transport, storage and communications
IX Other services

Non-workers have been classified and placed under category X for the sake of convenience.

Mining and quarrying which were included under category III in 1961 has been separated and shown as category IV in 1971. Consequently the household industry which was shown as IVth category has been shown as a sub-category under category V—manufacturing, processing, servicing and repairs. In 1961 census, household industry included activities under cattle rearing, orchardry, plantations, forestry, fishing, mining and quarrying along with those coming under manufacturing and repairs. In 1971 census, activities falling under household industry cover only those pertaining to manufacturing, processing, servicing and repairs.

The definition of worker in 1971 differs from that of 1961 census. In 1961, a person was considered as a worker according to his participation in any economically productive work. In the case of regular employment in any trade, profession, service, business or commerce a person who was employed during any of the 15 days preceding the day of enumeration was considered a worker. In the case of seasonal occupations, like cultivation, livestock rearing, dairying etc., to treat a person as a worker it was enough if that person had an hour's work a day throughout the greater part of the working season. Work included not only actual work but effective supervision and direction of work. A full-time student who spent some time in his father's shop during the reference period of a fortnight was also treated as a worker in 1961. Again, when a woman engaged mostly in household duties is engaged, in addition, in pounding rice for sale or wages or in domestic work for wages or rearing cattle and the like she was also treated as a worker. Thus a person was considered as a worker even if the person's contribution to work was marginal.

In 1971 Census, every person was asked about their main activity (i.e.) how he/she engaged himself/herself for most of the time. All persons were thus divided into two broad groups of workers and non-workers. A worker was defined as a person whose main activity was participation in any economically productive work by his physical or mental activity. Work included not only actual work but also effective supervision and direction of work. The reference period was one week prior to the day of enumeration in the case of regular work in trade, professions service or business. If a person had participated in any such regular work on any one of the days during the week preceding the day of enumeration and if this work had been returned as his main activity, only then, that person was treated as a worker. A person who normally worked but had been absent from work during the reference period on account of illness or travel or holiday, temporary breakdown, strike etc. was also treated as engaged in regular work but for his temporary absence. Apprentices or persons under training irrespective of whether they got stipends or not were considered as economically active and treated as workers. Those who were offered work but did not undertook it was not considered as engaged on work. For those engaged in seasonal work like cultivation, cattle rearing, dairying, plantations and some types of household industry which are not carried out throughout a year a person's main activity was ascertained with reference to such work in the last one year even if that person was not economically active in the week prior to enumeration. When a person does not come under the definition of worker he was treated as a non-worker. The non-workers in turn, were classified into several groups according to the nature of activity they are engaged in. Thus, a person engaged solely in household duties or a student attending an institution or school or a rent receiver was classified as such for his main activity and was treated as a

non-worker. The readers may refer to the introductory note and fly leaves to the Economic Tables of 1971 Census published as Part II-B of Pondicherry Union Territory for more detailed information on these aspects.

As per the President's order 15 castes have been listed as Scheduled Castes in this Union Territory. All the castes have been returned is 1971 Census. Scheduled caste population as per 1971 Census in 72,921 and forms 15.46% of the total population of the Union Territory. Scheduled Castes in rural areas form 21.07% of the rural population and in urban areas they constitute 7.72% of the urban population. About 79% of the scheduled caste population live in rural areas and only 21% are in urban centres.

The worker and non-worker composition of scheduled Castes in rural areas, works out to 45.10% and 54.90% respectively. In urban areas, scheduled caste workers form 32.28% of the scheduled caste population and non-workers form 67.72%. Thus a higher proportion of workers in rural areas as compared to urban areas is noticed among scheduled castes.

In the rural areas, majority of the scheduled caste workers (86.02%) are engaged in agricultural labour. 4.78% of the scheduled caste workers are cultivators. About 3% each are engaged in other services and manufacturing, processing or servicing and repairs exclusive of household industry. In the urban sector also, a large proportion of scheduled caste workers (32.38%) are engaged as agricultural labourers. This proportion is considerably less than that in the rural areas. Significant proportion of scheduled caste workers in urban areas come under manufacturing, processing, servicing or repairs in non-house hold industries (21.88%) and other services (21.84). 9.80% of scheduled caste workers in urban areas come under the industrial category of transport, storage and communications.

TABLE SC-II

AGE AND MARITAL STATUS FOR SCHEDULED CASTES

SC-II Age and marital status for scheduled castes

Fly Leaf

Data on individual scheduled castes cross classified by marital status and broad age-groups are shown in this table. The data are presented for the Union Territory and the four areas without rural/urban break-up. This table is similar in content to Table SCT II Part A of 1961 Census. The age-groups adopted in this table are 0-14, 15-44 and 45 and above. Figures for marital status of the scheduled caste population are shown under 5 groups of never married, married, widowed, divorced or separated and unspecified.

Age refers to the number of completed years and not the running age. A person who has never been married at any time was considered as 'never married'. Any person who was currently married whether for the first time or subsequently and whose marriage was subsisting at the time of census enumeration was considered as 'married'. Persons who were recognised by custom or society as married and persons in stable defacto union were considered as married. A widowed person was one whose husband or wife had died and had not re-married. Persons separated from wife or husband as the case may be and living separately without any intention of living together again or those who were divorced either by a decree of a court or by an accepted social or religious custom but who have not married again were treated as separated or divorced respectively. Such of those who did not indicate any of the four marital status above were taken as coming under 'unspecified status'.

Among scheduled caste males, 54.24% are never married and 42.63% are married. Widowed males represent only 2.75% of the male scheduled caste population. Among scheduled caste females, 45.11% are married while 43.82% are never married. The widowed proportion is significant among females and constitutes 10 47% of the female scheduled caste population. The divorced or separated category show a higher percentage among females as compared to males. Both among males and females of age group 0-14 only a negligible proportion comes under married. Early or child marriage does not seem to be popular among scheduled caste population. In the age-group 15-44 while about two-third of the males are married, among females this proportion rises to more than four-fifth. Males who are never married in this age-group is a little higher than one-third (34.94%), and among females, this proportion is 10.21%. In the age-group 45+ while more than 86% of males are married, and about 12% are widowed, among females more than half (51.50%) are widowed and about 46% are married.

TABLE SC-III PART A

EDUCATION IN URBAN AREAS ONLY FOR SCHEDULED CASTES

TABLE SC-III PART B

EDUCATION IN RURAL AREAS ONLY FOR SCHEDULED CASTES

SC-III Education for Scheduled Castes

Fly Leaf

In this table, statistics on the educational level of scheduled caste population are presented by sex and for each of the scheduled caste returned in this Union Territory. This table is presented in two parts—Part A relating to urban areas and Part B relating to rural areas. Data are presented for the Union Territory as a whole and for the four areas. This table is similar to Table SCT III Part A (i) and Part B (i) of 1961 census.

The total population of each caste has been classified as illiterates and literates with different educational levels. Persons who can both read and write with understanding in any language have been considered as literates. Anyone who was able to merely read but cannot write was not treated as a literate. It was not necessary for a literate to have undergone formal education or to have passed some minimum educational standard. The test for one's capacity in writing is the ability to write at least a simple letter in a language. Children aged 4 years and less were treated as illiterates though some of them were attending school and had picked up reading and writing a few words. In the case of literates, the highest educational level attained was ascertained. For those currently undergoing study in a particular class, the highest educational level was the one actually passed and not one in which they were studying. In the case of persons having both general and technical qualifications, both of which are of equivalent level, the technical qualification was preferred in recording the highest educational level.

The educational levels adopted for presentation of data for rural and urban areas differ. In the urban table, the educational levels adopted are (1) Primary of Junior Basic; (2) Matriculation or Higher Secondary, (3) Non-technical diploma not equal to degree; (4) Technical diploma not equal to degree; (5) University degree or Postgraduate degree other than technical degree and (6) Technical degree or diploma equal to degree or post-graduate degree. On the other hand in the rural tables only three educational levels are shown. They are (1) Primary or Junior basic; (2) Matriculation and above but below graduate and (3) Graduate and above.

Of the total scheduled caste population, only 18.70% are literates. Illiterates account for more than 80%. Among Scheduled Caste males and females literates form 39.89% and 20.05% respectively in urban areas while in the rural areas the literacy percentages are 24 20% for males and 6.82% for females. A wide disparity in the literacy percentages are seen between urban and rural sectors and among males and females. The percentage urban scheduled caste population in each educational level is higher than their counterparts in rural areas.

SC-III PART A EDUCATION IN URBAN AREAS ONLY

TABLE SC-IV

PERSONS NOT AT WORK CLASSIFIED BY SEX, TYPE OF ACTIVITY AND EDUCATIONAL LEVELS FOR SCHEDULED CASTES

SC IV—Persons not at work classified by sex, type of activity and educational levels for Scheduled Castes

Fly Leaf

In this table data on non-workers among all scheduled castes are presented by sex, type of activity and educational levels. Individual caste-wise figures are not presented. Statistics are given seperately for the total, rural and urban areas of the Union Territory and for the four areas.

A non-worker in Census is one who has returned as 'not engaged in any economically productive work'. The definition adopted for worker and non-worker has been explained in brief in the Fly Leaf to Table Scheduled Caste I presented earlier.

The non-workers have been broadly classified under seven categories as given below.

1. Full time students.
2. Household duties.
3. Dependents and infants.
4. Retired, rentiers and persons of independent means.
5. Beggars, vagrants etc.
6. Inmates of penal, mental and charitable institutions and
7. Others.

In this table data have been given for non-workers under these seven categories.

All those persons whose main activity is attending an educational institution were treated as students. This covered all full time students including children attending school. Even if such persons participated in some work such as just helping casually as an unpaid family worker in family cultivation, household industry, trade or business but not to the same extent as a full time worker, they were considered primarily as students if that was their main activity. Household duties cover all persons basically engaged in unpaid home duties and doing no other work. Even if they participate in some other work but not to the same extent as a whole-time worker their main activity is returned as household duties. Dependents consist of all infants or children not attending school and persons permanently disabled from work because of illness or old age. A person who has retired from service and doing no work or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or divident or any other person of independent means for securing of which he does not have to work will come under "Retired, rentiers and persons of independent means." Beggars, vagrants or independent women without indication of source of income and those of unspecified source of subsistence and who are not engaged in any economically productive work are classified under beggars etc. Convicts in jails, inmates of penal, mental or charitable institutions, even if such person under compulsion was doing some work such as carpentry, weaving, vegetable growing etc. were classified as inmates of institutions. An under trial prisoner in jail was not included in this category but was treated according to the main activity in which he was engaged in before he was apprehended. Other non-workers not included in any of the six categories mentioned above including those who were seeking work were classified under the residuary category "others".

Three educational levels viz. (1) Primary or Junior Basic, (2) Matriculation and above but below graduate and (3) Graduate and above are adopted for presentation of data in this table.

Among scheduled caste male non-workers, dependents account for the largest percentage (64.68%) and students come next with 27.99%, household duties and others constitute a little less than 3% each. Among non-working females, those engaged in household duties share a higher portion of 47.07% closely followed by dependents with 45.23%. Students among scheduled caste female non-workers (6.73%) is considerably less as compared to males.
