PREFACE

This volume contains tables pertaining to age, sex, marital status and education.

Processing was done separately for rural and urban areas based respectively on 10 per cent and 20 per cent sample slips, except in the case of Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Nagaland, Sikkim, Tripura and all the union territories. Data were processed on full count basis for these states and union territories. Estimated figures were derived from the rural and urban sample tables and pooled. A technical note on sampling and estimation procedure has been included as an annexure to the introductory note which follows.

The tables were initially prepared in the respective state/union territory offices. The urban component of the tables had however, been prepared in the data processing division of the Registrar General's Office and supplied to the states/union territories. The task of scrutiny of tables fell on the census division of the Registrar General's Office. Shri M. G. Kini, Research Officer and his colleagues in the central tabulation unit (names overleaf) organised the scrutiny and compilation of this volume. I thank them all for the pains they took.

For printing our thanks go to Manager, Government of India Press, Faridabad and his colleagues.

INTRODUCTORY NOTE

Part II-C is devoted to the 'C' (Social and cultural) series of the 1971 census tables. It has been split into three sub-parts.

Part II-C(i) presents the full count tables, namely C-V, C-VII and C-VIII. These relate to mother tongue, religion, scheduled castes and scheduled tribes.

Part II-C(ii) the present volume contains the following tables.

1.	C-II	Marital status;
2.	C-III Part A ..	Age, sex and education in all areas;
	C-III Part B ..	Age, sex and education in urban areas only;
3.	C-IV	Single-year age return;
	C-IV	Single-year age return. —Appendix Distribution of persons in five year age groups.

Part II-C(iii), which will follow, will contain all the fertility tables (F—series) and tables C-1 Part A, C-I Part B (i & ii) and C-VI.

The tables included here have been tabulated from the answers recorded against the following questions in the individual slip at the 1971 census. The form and content of the individual slip are given in Part II-A General population tables, 1971.

Question No.	Description
3	Sex
4	Age
5	Marital status
10	Religion
11	Scheduled caste/ Scheduled tribe
12	Literacy
13	Educational level.

Each table presents statistics for all India and each state/union territory. Similar statistics for districts will be found in the respective part II-C volumes of the states/union territories.

Each table is preceded by a fly-leaf. The fly-leaf gives the census question relevant to the table along with the instructions for filling up the answers. The nature of statistics presented in the tables is also briefly described. For the facility of users, certain derived tables giving proportions are also given in the fly-leaf.

A note on the sampling procedure adopted in the 1971 census for social and cultural tables is given as an annexure to this note.

ANNEXURE

A note on the sampling procedure adopted in the 1971 census for social and cultural tables (except C-I and C-V)

Sample size : A ten per cent sample of the slips was selected linear systematically with a random start from the individual slips relating to the rural parts of a tehsil/anchal/police station. In the urban part of the district, a twenty per cent systematic sample of the individual slips was selected with a separate random start. The sample sizes were adopted on consideration of required precision, available resources and operational convenience.

Selection procedure : The sample design adopted in the 1971 census was a stratified systematic sample of individual slips. For the purpose of sample selection, each district was divided into three sub-regions : (1) Tehsil/anchal/police station (rural); (2) Non-city urban district and (3) City (urban unit with 100,000 and more population).

These sub-regions were termed as operational units. If, however, any of the operational unit was unduly large, it was split into sub-operational units of at least 20,000 persons. Similarly, small-sized operational units were either clubbed together or tagged on to a contiguous larger unit so as to form an "effective operational unit" of the required minimum size. Adoption of these operational units ensured accuracy in sample selection, maintaining at the same time stability in the sampling fraction within the sampled areas. This procedure has ensured effective control over sample selection within each block, as also in the entire operational unit.

For the purpose of the Primary census abstract (PCA) the individual slips were sorted into ten broad industrial categories and nine broad age groups for each of the sexes. The ten industrial categories of workers and non-workers were as follows : (I) Cultivators; (II) Agricultural labourers; (III) Livestock, forestry, fishing, hunting and plantations, orchards & allied activities (IV) Mining & quarrying; (Va) Manufacturing, processing, servicing & repairs in *household industry;* (Vb) Manufacturing, processing, servicing & repairs in *other than household industry* (VI) Construction; (VII) Trade & commerce; (VIII) Transport, storage & communications; (IX) Other services and (X) Non-workers.

The nine age groups into which the slips belonging to each industrial category were sorted were 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, 60+and 'age not stated'. Thus the individual slips of a particular operational unit were sorted into $11 \times 9 = 99$ cells, separately for males and females. Sampling was done in each of the operational units independently by taking separate random starts. The slips were then distributed into 10 (or 5) pigeon-holes for rural/urban samples and one pigeon-hole was selected at random. The slips falling in the selected pigeon-hole constituted the sample. For operational details of the sampling procedure and instructions, the 'Manual of instructions on sorting, compilation (manual processing) & sampling procedures' may be consulted. All tables except A-I to A-V (population tables), B-I Part A-B II (economic tables), C-V (mother tongue), C-VII (Religion) and C-VIII (scheduled castes & tribes) have been prepared on a sample basis.

Estimation procedure : The tables prepared for each of the districts/states from the ten per cent rural and twenty per cent urban sample slips have been inflated to give the final estimated tables. Estimates have been obtained by making use of the cell frequencies (usually labelled as 'controls') available from the tables prepared on full count basis, namely, PCA and B-I Part A. In order to ensure the maximum possible inter-table consistency, it became necessary to use the estimated frequencies of a few of the final tables as controls for estimating some cell frequencies of other tables.

This way of estimating the cell frequencies ensured that marginal totals of estimated tables tallied with that of the full-count tables. This is convenient to the user because, after adjustment, the identical marginal totals are found in tables having the same marginal specification. "The adjustment diminishes the sampling variance to some extent; the more the controls, the smaller the sampling variance of the adjusted frequencies[1]." Further, adjustment to known control totals has at the same time the effect of eliminating biases in the nature of inherent differences between the sample and complete count.

For the purpose of estimation of final tables, a set of multipliers was prepared for each table. A multiplier is the ratio of full-count frequency of some characteristics from PCA or Table B-I Part A and the corresponding sample frequency of the same characteristics from the sample table. The following statement gives the level of presentation of the tables and the related controls on which the multipliers are based. The details will be presented in the report on sampling procedures to be published later :

Table	Level of presentation	Control based from tables
C II	District	B I Pt A & PCA
C III A	Do.	,, ,,
C III B	Do.	,, ,,
C IV	State	,, ,,
C IV App.	District	,, ,,

1. Deming, W. E., Statistical adjustment of data Ch. VII.

As no such control was readily available for C-VI (bilingualism), these were estimated by multiplying the sample values by 10 and 5 in rural and urban areas respectively.

Reliability of estimates : No exact formula can be given for the precision of the estimates in view of the systematic sampling design adopted. The relative standard error can be estimated roughly on the basis of simple random sampling as $(1-f)\frac{1-p}{np}$, where 'f' is the proportion samples, (0·10 in case of rural areas & 0·20 in case of urban areas); 'p' is the estimated proportion in any cell and 'n' the sample size being equal to ten per cent of individual slips in rural areas and twenty per cent in urban areas. In the present census, slips were sorted by sex, industrial category and age-group before sampling. It is expected that the efficiency must be considerably higher than a simple random sample of identical size. Extensive studies conducted have indicated that systematic sampling of individuals is more efficient than random sampling especially when the slips were presorted for most of the socio-economic characteristics covered in a census.[2] Thus the estimates prepared on the basis of the systematic sampling in the present census can be expected to be quite reliable.

C-II AGE AND MARITAL STATUS

FLY-LEAF

This table corresponds to table CII-Age and marital status of 1961, which was based on 100 per cent processing. The 1971 table is based on 10 per cent rural and 20 per cent urban sample for all states except Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Nagaland, Sikim and Tripura. For these states and all union territories the table is based on full count.

The question on marital status and the instructions for filling them up at the 1971 census are reproduced below :

"Question 5-Marital status

In answering this question use the following abbreviations :

NM : Never married

M : Currently married

W : Widowed

S : Separated or divorced

"For a person who has never married at any time before, write 'NM'. For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living, write 'M'. Write 'M' also for person who are recognised by custom or society as married and for the persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or is in stable *de facto* union. For a widowed person whose husband or wife is dead and who has not been married again, write 'W'. For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been divorced either by a decree of a law court or by an accepted social or religious custom but who has not remarried, write 'S'. For a prostitute return her marital status as declared by her."

For instructions to fill in the question on 'age', please see fly-leaf to table C-IV.

The table gives data for persons, males and females classified by total, rural and urban in the age groups of 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70+ and 'age not stated' separately for never married, married, widowed, divorced or separated and unspecified status. For the purpose of the all India table and all state tables, the age group 0-9, was regarded as never married. Data are presented in the table for all India, each state and union territory; figures at district level will be found in Part II-C of the respective states/union territories.

Percentage distribution of population by marital status in rural and urban, India (1971)

Marital status	Total		Rural		Urban	
	Males	Females	Males	Females	Males	Females
1	2	3	4	5	6	7
Never married	54·9	45·6	54·3	44·8	57·3	49·1
Married	41·9	45·1	42·2	45·7	40·6	42·5
Widowed	2·9	8·9	3·2	9·1	2·0	8·1
Divorced or separated	0·3	0·4	0·3	0·4	0·1	0·3

The following statements give: (i) distribution of population under each marital status cross-classified by age group; (ii) distribution of population in each age group and sex by type of marital status.

STATEMENT I

C-III AGE, SEX AND EDUCATION (PARTS A AND B)

FLY-LEAF

This table has been prepared separately for total and urban areas and presented as Part A and Part B respectively in 1971 unlike. In 1961 it was presented in three parts (Parts A, B & C) for total, rural and urban areas respectively. Rural data in 1971 can be derived easily from parts A & B.

The present table is based on 10% rural and 20% urban for all states except Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Nagaland, Sikkim and Tripura. For these states and all union territories it is based on full count. Corresponding tables were prepared on full count in the 1961 census with a different set of age groups and educational levels. These are discussed below:

The age groups adopted now are 0—4, 5—9, 10—14, 15—19, 20—24, 25—34, 35+ and 'age not stated.' The age groups in 1961 were, 0—4, 5—9, 10—14, 15—19, 20—24, 25—29, 30—34, 35—44, 45—59, 60+ and 'age not stated'. It will be seen that the two age groups, 25—29 and 30—34 of 1961, have been combined as '25—34' and age groups 35—44, 45—59 and 60+ have been collapsed into one '35+ in 1971.

During 1961 census the educational levels adopted for all areas and rural areas were presented by:

(*i*) Illiterate;

(*ii*) Literate (without educational level):

(*iii*) Primary or junior basic; and

(*iv*) Matriculation and above.

For urban areas, however, figures were given for the following educational levels:

(*i*) to (*iii*) same as *all areas*—rural areas;

(*iv*) Matriculation or higher secondary;

(*v*) Technical diploma not equal to degree;

(*vi*) Non-technical diploma not equal to degree;

(*vii*) University degree or post-graduate degree other than technical degree;

(*viii*) Technical degree or diploma equal to degree or post-graduate degree in—

(*a*) Engineering; (*b*) Medicine; (*c*) Agriculture; (*d*) Veterinary and dairying; (*e*) Technology; (*f*) Teaching; and (*g*) Others

The educational levels for which data are presented in 1971 are,

All areas

(*i*) Illiterate;

(*ii*) Literate (without educational level);

(*iii*) Primary;

(*iv*) Middle;

(*v*) Matriculation or higher secondary;

(*vi*) Non-technical diploma or certificate not equal to degree

(*vii*) Technical diploma or certificate not equal to degree;

(*viii*) Graduate and above;

Urban areas

(*i*) to (*vii*) as above.

(*viii*) Graduate degree other than technical degree;

(*ix*) Technical degree or diploma equal to degree or post-graduate degree:

(*a*) Engineering & technology; (*b*) Medicine; (*c*) Agriculture, veterinary and dairying; (*d*) Teaching; (*e*) Others.

Figures for all India, states and union territories are presented in this volume. The same at district level will be found in Part II-C volume of the respective state/union territory.

The questions on the individual slip at the 1971 census for literacy and educational level and the instructions for filling them up were as follows.

"Question 12 : Literacy (L or O).

Definition of a literate: A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not a literate.

It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

For a person who is literate, that is, who can both read and write, record 'L' in the triangle against question 12. If there is any doubt about a person's ability to read or write, the test that may be applied for reading is his/her ability to read any portion of the printed matter in the enumerators instructions and similarly for writing he/she should be able to write with understanding. If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondents' word has to be taken as correct. Other members of the household may also be able to testify to the literacy of the person enumerated.

For a person who is illiterate, that is, who can neither read nor write or can merely read but cannot write, in any language, write 'O' in the triangle, against question 12. All children of the age of four years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

Question 13 : Educational level

This question will be asked of those for whom 'L' has been recorded against question 12. For a person who is illiterate and 'O' has been put against him in the answer to question 12, there is no advantage in ascertaining the educational level even if he had at some stage attended school and passed a standard and had relapsed into illiteracy. In such a case you should put 'X'. You have to ascertain and record the highest educaional level attained by a person for whom 'L' is recorded in answer to question 12.

For a person who is still studying in a particular class, the highest educational level attained by him will be one that he has actually passed and not the one in which he is studying. For example, a person studying in the first year B.A. should be recorded as only 'PUC' or higher secondary, as the case may be. Similarly, a person studying, say, in the fourth year of 'M.B.B.S.' should not be noted as 'M.B.B.S.' but as third year 'M.B.B.S.' which is the highest level he has actually attained. If you are not sure whether a person has passed primary, middle, higher secondary or other definite levels, you may record the actual standard passed such as say third standard, eighth standard, first year B. Com. etc.

The highest educational level attained by the person enumerated should be recorded. When a person holds both general and technical qualifications both of which are of equivalent level such as say B. Sc. (Zoology) and M. B. B. S. or B. A. (Maths) and B. E. (Bachelor of Engineering), the technical qualification should be given preference in recording the highest educational level attained. Where the general educational level is higher than the technical educational level or where it is not possible to decide which of the two levels is relatively higher, the highest level of education as returned by the person concerned should be recorded.

In recording the highest educational level of a graduate or a post graduate, subject of specialisation such as B. Sc. (Maths.), M.A. (Economics,) M. Sc. (Botany), B. Sc. (Agriculture), etc., should be noted. You should not use abbreviations which are not in common use. In such cases, the degree or diploma should be spelt out fully.

The terms 'primary', 'middle' and 'higher secondary' do not have the same significance in all the states. In Gujarat, only two levels of education are recognised (*i*) Primary from standards I to VII and (*ii*) secondary from VIII to XI. In Goa, Daman Diu, the primary level is upto standard IV, middle level from V to VII and secondary level from VIII to XI. In Kerala, the secondary level is from VIII to X. In Uttar Pradesh, the middle level is called junior high school. To bring these standards at par with the levels in vogue in the majority of states and those of central schools, some adjustment have been made in presenting the data.

At the time of all-India consolidation, a few doubtful entries appearing in table C-III Part A were detected, but as it was too late to do anything in the matter the inconsistencies have been allowed to remain. These are (*i*) In age group 5—9, nine males are reported under matriculation or higher secondary in Madhya Pradesh (2) In the same age group, there are nine males and two females at middle level in Arunachal Pradesh.

As in 1961, a specially designed card relating to the degree holders and technical personnel was canvassed at the 1971 also. During his visit to each household between 10 and 31 March 1971, the census enumerator was required to leave these special cards, one for each of the members of such household holding a degree or technical qualification with a request that the card should be completed by the

C-IV SINGLE YEAR AGE RETURNS

FLY-LEAF

This table corresponds to table C-IV of the 1961 census, the difference being that while in 1961, the table was based on full count, in 1971 it is based on 10% rural and 20% urban sample for all states except Tamil Nadu, Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Nagaland, Sikkim, Tripura and all union territories. For these, it is based on full count.

An appendix to this table is also prepared at the country, state and union territory level giving five-year age groups. In a few schedules, the age was not recorded. These are shown under 'age not stated.'

The question on age and instructions for filling it up at the 1971 census are reproduced below :

Question 4: Age

Record the age of the person in total years completed last birthday. Very often there is a tendency on the part of the individuals to return 'years running' rather than the 'years completed' Make sure that only the actual number of years completed is recorded.

In respect of infants who might not have completed one year by the day of enumeration their age in completed years should be invariably shown as '0' as they have not yet completed one year of age and add 'Infant' in brackets. As was stated under general instructions make sure that infants even if a day old are invariably enumerated. You should not enter the age in months. The age of an infant who has not yet completed one year should invariably be noted as '0' only

Age is one of the most important items of demographic data and you should ascertain the age with greatest care. Many persons particularly in the rural areas cannot give their age correctly. They should be assisted to state the correct age by stimulating their memory with reference to any historical event, etc; well known in the area. Sometimes the age can be ascertained with reference to the age of another person of a known age that may be in the same household or in the neighbouring household or that of a well known person of the village such as headman of the village. A person can more easily say whether he was older or younger to such a person and by how many years. This will help you to record the age more accurately.

This table gives figures by total/ rural/ urban separately for each single year of age. Figures of ages above 100 years have also been shown individually. 'Age not stated' at the end show the cases where age was not recorded at the time of enumeration.
