PREFACE

This volume presents 20 estimated tables pertaining to composition of the household by relationship to the head of the household, age, sex, marital status, education, bilingualism and fertility data of currently married women.

Processing of data of the state was done separately for rural and urban areas based respectively on 10 per cent and 20 per cent sample slips. Work connected with the manual processing of data obtained from the rural individual slips was taken up in the M.T. Unit of this Census Directorate while the urban components of the table were processed in the data processing division of the Registrar General's office from the punched cards sent by this state. The compilation and estimation of data for final tables presented in this publication were carried out in the M.T. Unit of this Census Directorate. The introductory note given separately in this publication would explain the salient features of the method adopted for estimation and preparation of fertility schedules.

I should place on record my grateful thanks to Registrar General, India's office and particularly to Shri K. K. Chakravorty, Assistant Registrar General (Census & Tabulation) for their help and co-operation in bringing out this volume.

In my office my thanks are due to Shri B. Mohanty, Deputy Director, Census (M.T. Unit) and Shri S.K. Swain, Assistant Director, Census (Tech.) for their valuable contribution. I would also like to place on record my appreciation of the good work done by S/Shri P.K. Rout, Investigator, C.R. Mohanty, Senior Technical Assistant, A.K. Paul, Statistical Assistant, P. Tripathy, Statistical Assistant, A.K. Mishra, Printing Inspector, K.C. Swain, Statistical Assistant, M.A. Majid, Computor, D. Sethi, Computor, P.C.Mishra Assistant Compiler and R.N. Sathia, Assistant Compiler among others associated with the publication of this volume.

For printing our thanks go to the Manager, Government of India Press, Coimbatore and his colleagues.

B. TRIPATHI

1971 CENSUS PUBLICATIONS—ORISSA

(*All the Census Publications of this State will bear Series No.* 16)

Part I	General Report on the Census, subdivided into three Sub-parts, viz.,
Part I-A	First part of the General Report covering distribution, growth and density of population, sex ratio, Rural and Urban differentials, broad literacy rates, population of Scheduled Castes and Scheduled Tribes, broad economic categories, etc.
Part I-B	The second part covering detailed analysis of the demographic, social, cultural and migration patterns.
Part I-C	Subsidiary Tables
Part II	Census Tables on Population subdivided into:
Part II-A	General Population Tables
Part II-A Supplement	General Population Tables (*Standard Urban Areas*)
Part II-B	Economic Tables
Part II-C (*i*)	Tables showing distribution of population by Mother-tongue and Religion, Scheduled Castes and Scheduled Tribes.
Part II-C (*ii*)	Social and Cultural Tables and Fertility Tables (*the present volume*)
Part II-D	Migration Tables
Part III	Establishment Report and Tables
Part IV	Housing Report and Tables
Part V	Special Tables and Ethnographic notes on Scheduled Castes and Scheduled Tribes (All India Publication).
Part VI	Town Directory, Survey Reports on Towns and Villages, sub-divided into:
Part VI-A	Town Directory
Part VI-B	Special Survey Reports on selected Towns
Part VI-C	Survey Reports on selected Villages
Part VII	Special Report on Graduates and Technical Personnel (All India Publication).
Part VIII	Administration Report (for official use only) subdivided into:
Part VIII-A	Administration Report—Enumeration
Part VIII-B	Administration Report—Tabulation
Part IX	Census Atlas
Part IX-A	Administrative Atlas
Part X	District Census Handbook (a State Government Publication) subdivided into :
Part X-A	Town and Village Directory
Part X-B	Town and Villagewise Primary Census Abstract
Part X-C	Analytical Report and Administration statements and District Census Tables....(for 13 districts)
MISCELLANEOUS	Special studies and other Reports and Tables (will be published as special paper as and when they are ready.)

A PORTRAIT OF POPULATION, ORISSA, 1971 (A Popular version)

Pocket Book of Population Statistics

INTRODUCTION

The Social & Cultural tables of the 1971 census are to be presented in two volumes viz., Part II-C(i) and Part II-C(ii). The first volume, Part II-C(i) presenting in three full-count tables data on languages/mother-tongues, religions and SCs/STs has been published separately. The present volume Part II-C(ii) would present in 20 estimated tables information with regard to composition of the household by relationship to the Head of the household, Age, sex and marital status, Educational levels, Bilingualism and fertility data on currently married women etc. This volume contains data estimated from 10% rural and 20% urban individual slips.

Each of the tables contained in this volume has been preceded by a fly-leaf which gives a gist of the table as also the scheme of its presentation.

Relevant questions of the individual slips as well as the instructions issued to the enumerators at the 1971 census for recording the answers against these questions are reproduced in Annexure I.

The sampling procedure adopted in 1971 census is common for all the tables but the technique followed in estimation of data is different for different types of tables. For facility of readers, a note on the technique of the procedure adopted in 1971 census for sampling and estimation of data for the social and cultural tables is given in Annexure II. The method of estimation adopted for preparation of fertility schedules is quite different. Therefore a note on the procedure followed in the 1971 census for sampling and estimation of data for fertility schedules is given in Annexure III.

Basing on the above procedure of sampling and estimation the following tables have been prepared and presented in this volume:

1.	Table C-I Part A	Members of households by relationship to head of household classified by age groups
2.	Table C-I Part B(i)	Households where the head is a male by relationship of members with the head
3.	Table C-I Part B(ii)	Households where the head is a female by relationship of members with the head
4.	Table C-II	Age and marital status
5.	Table C-III Part A	Age, sex and education in all areas
6.	Table C-III Part B	Age, sex and education in urban areas only
7.	Table C-IV	Single year age returns
8.	Table C-IV (Appendix)	Distribution of persons by five year age groups
9.	Table C-VI	Bilingualism
10.	Table F-I Part A	Distribution of currently married women and the related births, during the last year by religion, present age and age at marriage (Rural)
11.	Table F-I Part B	Distribution of currently married women and the related births during the last year by religion, present age and age at marriage (Urban)
12.	Table F-I (Appendix)	Distribution of currently married women and the related births during the last year by SCs/STs, present age and age at marriage (Rural/Urban)
13.	Table F-II Part A	Distribution of currently married women and the related births during the last year by education, present age and age at marriage (Rural)
14.	Table F-II Part B	Distribution of currently married women and the related births during the last year by education, present age and age at marriage (Urban)

15. Table F-III Part A · · Distribution of currently married women and the related births during the last year by religion, duration of marriage and age at marriage (Rural)

16. Table F-III Part B · · · Distribution of currently married women and the related births during the last year by religion, duration of marriage and age at marriage (Urban)

17. Table F-III (Appendix) · · Distribution of currently married women and the related births during the last year by SCs/STs, duration of marriage and age at marriage (Rural/ Urban)

18. Table F-IV Part A · · · Distribution of currently married women and the related births during the last year by education, duration of marriage and age at marriage (Rural)

19. Table F-IV Part B · · · Distribution of currently married women and the related births during the last year by education, duration of marriage and age at marriage (Urban)

20. Table F-V · · · · Distribution of currently married women and the related births during the last year by religion, education groups, present age and age at marriage (Rural/Urban)

TABLE C-I PART A

MEMBERS OF HOUSEHOLDS BY RELATIONSHIP TO HEAD OF HOUSEHOLD CLASSIFIED BY AGE-GROUPS

This is one of the three tables based on data relating to members of households. Other two tables are C-I Part B(i)—Household where the head is a male by relationship of members with the head and C-I Part B (ii)—Household where the head is a female by relationship of members with the head. Data for all these three tables have been compiled from the population records by estimation using the appropriate multiplier. Population record has been filled in by the enumerator transferring a few items of informations from the individual slips during the period of enumeration. Those items of information are Name, Relationship to head, Sex, Age, Marital status, Literacy and Description of main activity. Instructions issued to enumerators in this regard are reproduced below.

Instructions to enumerators for filling up the individual slips on the relevant questions

"Soon after you complete the enumeration of all the persons in the household you are expected to transfer certain items of information of all the individual members of each household to the Population Record. Population record form is reproduced as Appendix X. If you feel that the filling of the Population Record in the field is likely to take considerable time there is no objection to the details being posted by you later at home at the end of the day. However, soon after you complete the enumeration of all the persons in a household you must note down the Location Code No. and the Household No. on the Population Record and also copy out in Col. 2 all the names of the persons enumerated in the household. This will help you to check with the members of the household and verify if all the persons qualified to be enumerated in the household have been fully enumerated.

The Population Record forms would have been supplied to you in convenient books and each page will normally take the entries of one household. However, if in a large household there are more number of persons than that a single Population Record form can accommodate, you may continue the entries on the next form but not boldly on the top of the continued population record as "Continued".

The Population Record hardly calls for any detailed explanation. On the top of each form please note correctly the Location Code Number and the Household Number. It is important that you note the Household Number correctly as has been explained in paragraphs 24 to 28 of these instructions. Do not fail to note boldly "INST" in respect of institutional households as explained in paragraphs 27 and "o" in respect of houseless households as explained in paragraph 28.

You will be required to furnish information in the Enumerator's Abstract on the total number of occupied residential houses, the census housholds, the institutional households and houseless houhseholds in your block with reference to the entries made in this Population Record. So please make sure that you have entered the Household number correctly as this will guide you in posting the required particulars in the Enumerator's Abstract. At the right hand side below the Household number you will have to record information if the household belongs to SC/ST. You would have already ascertained if the head of the Household belongs to a SC/ST with reference to Question 11 of the Individual Slip. If the head belongs to any SC/ST, write S C /S T as the case may be and also the name of S C /S T to which the head of the household belongs.

The columns in the main body of the Population Record are self-explanatory. You have to post them with reference to the information you have collected of each member of the household in the Individual Slip against the relevant questions. However, column 9 of the Population Record may require some explanation. For those who have returned themselves as workers for their main activity against question 16(a) (i) of the Individual Slip, while you may note 'C' 'AL' as the case may be, as recorded in the box against Question 16(a)(i), in respect of those other than cultivators and agricultural labourers, you may please indicate briefly the description of work as recorded in question 16(e) of the Individual Slip. For those who have returned themselves as non-workers for their main activity you may note the same abbreviation as recorded against question 16(a) (ii)".

The filled in population records of all areas were brought to the M.T. Unit for the processing of data. Technique of two stage sampling was adopted systematically with a random start.

At the time of Post Enumeration Check (PEC) Census blocks have been revised by merging the blocks containing less than 50 households with neighbouring blocks. Blocks formed in that way were called "Effective Blocks". These effective blocks were serially numbered within a charge (PS/Part PS). Rural & Urban parts of each district were taken as two different stratum within the district. The frame of effective blocks was prepared separately for each stratum. In the first stage a 20 percent sample of effective blocks was selected independently from each stratum systematically with a random start. The procedure of selection was continuous within a stratum.

Population record books of each of the selected effective blocks were taken up without any ommission from each stratum for the next operation. Only resi-

dential households were serially numbered within each effective block. In the secnd stage a 20 per cent sample of Residential Households was taken up from each selected effective block systematically with a random start. The selected residential Households were marked 'S' with the help of stamp at the right hand top corner of the population record. Slips of the population record relating to the selected households were folded diagonally so that upper edge of the form was out of the book. Thus a 4 per cent sample of Residential households was drawn in two stages for the preparation C-I Part A, C-I Part B(i) and C-I Part B(ii).

Data of these sampled forms of Population Records relating to the sampled households were processed mechanically through the different process such as coding, punching and verifying and sample tables were prepared through the elctronic computor. Those sampled tables were estimated with the multiplier 25 and presented in this volume.

The table C-I Part A relates to the members of households by relationship to head of household.

The head of the household of each sex has been presented in three broad age groups viz., less than 30 years, 30—49 years and 50+ years. The figures of age not stated are included in "All ages". Number of members for the relationship son, brother, father, mother, other males and other females in case of married persons and son, brother, daughter, sister, father, mother, other males and other females in case of other marital status combined have also been presented. Further the figures of spouses of heads of households, unrelated persons and single member households with sex break up have been shown in this table. All these items of information have been presented for rural, urban and total areas of each district separately. This table has sociological interest indicating the extent of the joint family system. The age distribution of the heads of the household and their relations classified by marital status will further help to study the future trend of the joint family system. In the 1961 census, its corresponding table C-I was prepared on 20 per cent sample basis for rural, urban and total areas separately but classification of broad age-groups was not there. The relationship to the head was shown as "Married Sons" and "Other married relations".

TABLE C-I PART A—MEMBERS OF HOUSEHOLDS BY RELATIONSHIP TO HEAD OF HOUSEHOLD CLASSIFIED BY AGE GROUPS

TABLE C-I PART B (i)

HOUSEHOLDS WHERE THE HEAD IS A MALE BY RELATIONSHIP OF MEMBERS WITH THE HEAD

FLY LEAF

This table presents households where the head is a male by relationship of members with the head. The relationship to the head of the household has been given for son, brother, son's wife, brother's wife, daughter, sister, sister's son, daughter's husband, sister's husband, father, mother, mother's brother, other males and other females separately for married persons and for other marital status combined. Besides, households having unrelated persons of each sex, households with spouse living therein, single member households, total number of households and total population have been also presented at the district level.

TABLE C-I PART B (i)—HOUSEHOLDS WHERE THE HEAD IS

TABLE C-II

AGE AND MARITAL STATUS

FLY LEAF

This is an important demographic table which presents the number of males and females in different age groups cross-classified by their marital status. Categories of marital status which have been presented here are never married, married, widowed, divorced or separated and unspecified status. Persons with these marital status have been shown against each of the age groups 0—9, 10—14, 15—19, 20—24, 25—29, 30—34, 35—39, 40—44, 45—49, 50—54, 55—59, 60—64, 65—69, 70+ and age not stated. All these items of information have been presented for total, rural and urban areas of the state and districts separately. A similar table was prepared at the last census on full count and in 1951 on a 10 per cent sample basis whereas in 1971 this table has been estimated from a 10 per cent rural sample and a 20 per cent urban sample slips.

TABLE C-II—AGE AND MARITAL STATUS

TABLE C-III PART A

AGE, SEX AND EDUCATION IN ALL AREAS

FLY LEAF

This table presents the population figures of each sex in different educational levels, viz., primary, middle, matriculation or higher secondary, non-technical diploma or certificate not equal to degree, technical diploma or certificate not equal to degree and garaduates and above against each of the age groups, 0—4, 5—9, 10—14, 15—19, 20—24, 25—34, 35+ and age not stated at the district level. Figures for all areas have been shown n this table. Separate figures for rural/urban areas have not been indicated here. Similar table was prepared for the 1961 Census on full count basis with slight difference in educational levels and age groups.

A statement C-III.1 of the state showing the growth of literacy among the total population as well as in different age groups since the 1961 census is given below.

Statement C-III. 1—Growth of literacy in the total population as well as in the different age groups since the last census 1961, Orissa state

Age group	Total population		Growth rate of population (%)	No. of literates and educated persons		Literacy (excluding population of 0—4 age group)		Growth of literacy

TABLE C-III PART B

AGE, SEX AND EDUCATION IN URBAN AREAS ONLY

FLY LEAF

This table presents the figures for urban areas only at the state and district level. The presentation of data in this table is identical with that of the table C-III Part A. The educational levels are presented here more elaborately than that of C-III Part A. Figures of different technical degrees have been shown separately in this table since this table is meant for urban areas only.

TABLE C-III PART B—AGE, SEX AND EDUCATION IN URBAN AREAS ONLY

Age group	Total Population			Illiterate		Literate (without educational level)*		EDUCATIONAL LEVELS							
								Primary		Middle		Matriculation or Higher Secondary		Non-technical diploma or certificate not equal to degree

TABLE C-IV

SINGLE YEAR AGE RETURNS

FLY LEAF

This is an important demographic table which is being used by the census Actuary. This table presents population figures at each of the single year of age for each sex in rural, urban and total areas separately for the state only. A similar table was prepared for the 1961 census on full count basis.

TABLE C-IV—SINGLE YEAR AGE RETURNS

TABLE C-VI

BILINGUALISM

FLY LEAF

This table corresponds to table D-I Part II of the 1951 and C-VI of the 1961 census.

In this table, data on bilingualism are presented only for selected languages/mother-tongues (L/MTs). The selection of these L/MTs has been done on the basis of all India table C-VI—Bilingualism of 1961 and a list of L/MTs was devised for all India. "This list formed the basis for preparing the table on bilingualism as estimated from the processing of 10% rural and 20% urban sample slips". The rural table was processed manually and the urban table on the computor. The estimated tables for rural and urban areas as polled are presented here.

Columns 2, 3 and 4 of the table give the total number of speakers of L/MT inclusive of MTs grouped under it. Columns 5, 6 and 7 give figures of such of the speakers who returned a second language, that is to say, any other L/MT not accounted for in columns 2, 3 and 4. Column 8 contains in 'run on' fashion the names of subsidiary L/MTs inclusive of L/MTs wherever grouped by number of male and female speakers within brackets.

TABLE C-VI– BILINGUALISM

Language/Mother-Tongue	Total Speakers			Number also speaking a second Language/Other-tongue			Columns (6&7) classified by second Language/Other-tongue

TABLE F-I PART A

DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, PRESENT AGE AND AGE AT MARRIAGE (RURAL)

FLY LEAF

This table presents the distribution of currently married women alongwith their related births which occurred during the last year only by present age and cross classified with their age at marriage. Present age has been shown in 10 different age-groups, such as, less than 13, 13—17, 18—22, 23—27, 28—32, 33—37, 38—42, 43—47, 48+ and unspecified whereas age at marriage has been presented in six ranges namely less than 13, 13—17, 18—22, 23—27, 28+ and unspecified. Again all such items of information have been presented for each of the six main religions separately. Besides six main religions (Hinduism, Islam, Christianity, Sikhism, Budhism and Jainism) data for all other religions have been grouped and shown under "Others". Currently married women whose religion has not been stated they have been shown under the heading "Religion not stated". All these information have been presented for the rural areas of the state only. These data will help in deriving differentials by religion in median age at marriage and in age specific fertility rates, total fertility rate and general fertility rate for various age at marriage groups.

APPENDIX TO TABLE F-I

DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY SCHEDULED CASTES/SCHEDULED TRIBES, PRESENT AGE AND AGE AT MARRIAGE FOR RURAL AND URBAN AREAS

FLY LEAF

This table presents the data on currently married women births during the last one year, present age and age at marriage separately for all S.Cs. and all S.Ts. The statistics of the rural and urban areas of the state are separately presented in this table. The presentation of age-groups of present age and age at marriage is identical to that of the main table (Table F-I).

TABLE F-II PART A

DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY EDUCATION, PRESENT AGE AND AGE AT MARRIAGE (RURAL

FLY LEAF

This table presents figures on currently married women of rural areas only with related births which occured during the last year by present age and age at marriage for illiterates and literates with different educational levels. The classification of educational levels is literate but less than Matriculate, Matriculate and above but less than Graduate and Graduate and above. The figures of women for whom educational level has not been classified anywhere, have been included in the group "literates but less than matriculates". The groupings of age at marriage and present age are identical with those presented in the previous table. The data of this table will also help in deriving differential by education in median age at marriage and in age specific fertility rate, total fertility rate and general fertility rate for various age at marriage groups.

TABLE F-III PART A

DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, DURATION OF MARRIAGE AND AGE AT MARRIAGE (RURAL)

FLY LEAF

This table is presented at the state level for rural areas only. It shows the distribution of currently married women and the related births which occured during the last year by age at marriage and duration of marriage for each of the major six religions, viz., Hinduism, Islam, Christianity, Sikhism, Budhism, and Jainism. Data on all other religions have been combined and shown under "others". The figures of persons who have not mentioned the names of their religion clearly have been shown under "Religion not stated".

Duration of marriage has been shown as less than 1, 1—4, 5—9, 10—14, 15—19, 20—24, 25—29, 30+ and duration of marriage unspecified.

Presentation of groupings of age at marriage is similar to that of the previous tables. The data in this table will help in deriving differentials by Religion in duration specific fertility rates for various age at marriage groups.

APPENDIX TO TABLE F-III

DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY SCHEDULED CASTES/SCHEDULED TRIBES, DURATION OF MARRIAGE AND AGE AT MARRIAGE FOR RURAL AND URBAN AREAS

FLY LEAF

This table presents the data relating to the currently married women and the related births which occurred during the last year by age at marriage and duration of marriage for all S.Cs. and S.Ts. separately for rural and urban areas of the state. Presentation of duration of marriage groups and age at marriage is similar to that of F-III table.

TABLE F-IV PART A

DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY EDUCATION, DURATION OF MARRIAGE AND AGE AT MARRIAGE (RURAL)

FLY LEAF

This table provides information with regard to the distribution of currently married women and the related births which occured during the last year by age at marriage and duration of marriage for illiterates and literates by educational levels viz., literate but less than matriculate, matriculate and above but less than graduate and graduate and above. Presentation of duration of marriage groups and age at marriage is similar to that of the previous tables F-III Part A & B. The data presented at the state level relate to rural areas only. These data will help in deriving differentials by education in duration, specific fertility rates for various age at marriage groups

TABLE F-V

DISTRIBUTION OF CURRENTLY MARRIED WOMEN AND THE RELATED BIRTHS DURING THE LAST YEAR BY RELIGION, EDUCATION GROUPS, PRESENT AGE AND AGE AT MARRIAGE (RURAL/URBAN)

FLY LEAF

This table shows the distribution of currently married women and the related births which occured during the last year by age at marriage and present age for each of the six major Religions-cum-education. Presentation of data on age at marriage groups and present age is similar to that of the previous tables. Religions-cum-Education for which data have been presented are Hindu illiterate, Hindu literate but less than matriculate, Hindu matriculate and above but less than graduate and Hindu graduate and above. Similar is the case with all other religions. These data will help in deriving differentials by Religion-cum-education in median age at marriage and in age specific fertility rates, total fertility rate and general fertility rate for various age at marriage group. This table is presented for rural and urban areas separately at the state level.

ANNEXURE

ANNEXURE I

Instructions to enumerators for filling up the individual slips on the relevant questions

Question 2: Relationship to Head

31. In the case of the Head of the household write 'Head'. The Head of the Household for census purposes is a person who is recognised as such in the household. He is generally the person who bears the chief responsibility for the maintenance of the household and takes decisions on behalf of the household. The Head of the household need not necessarily be the eldest male member, but may even be a female or a younger member of either sex. You need not enter into any long argument about it but record the name of the person who is recognised by the Household as its Head.

32. In the case of institutions like boarding houses, messes or friends living together in one census house, which should be regarded as households of unrelated persons living together, which may be called institutional Households, the Manager or Superintendent or the person who has administrative responsibility or who by common consent is regarded as the head should be recorded as the Head of the household.

33. The Manager or Superintendent who does not stay normally in the institution should be enumerated at his place of normal residence. You should make sure before filling up the slip for the Manager or Superintendent etc. of an institutional household, that he/she has not been enumerated at any other household.

34. In the case of absence of a normal 'Head', the person on whom the responsibility of managing the affairs of the household falls, should be regarded as the Head.

35. All relationships in this question should be recorded in relation to the Head of the household. Write the relationship in full. Do not use words like 'nephew', 'niece or uncle', but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (for uncle), 'Son' will include 'adopted son' or 'step son', similarly for a daughter. In the case of visitors, boarders, or employees, write 'visitor', 'boarder', or 'employee' as the case may be. In the case of institution, the members should be recorded as 'unrelated'.

36. If on the check of revisional round between 1st and 3rd March 1971 the Head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as head should be recorded as Head and the relationships in all other slips will have to be suitably corrected. The slip of the deceased Head of the household will, of course, be cancelled.

Question 3: Sex

37. For males write 'M' and for females write 'F' within the circle indicated against this question. Even for eunuchs and hermaphrodites, write 'M' only. Verify with reference to the name and relationship to Head against questions 1 and 2 respectively that you have noted the sex correctly.

Question 4: Age

38. Record the age of the person in total years completed last birthday. Very often there is a tendency on the part of the individuals to return 'years running' rather than the 'years completed'. Make sure that only the actual number of years completed is recorded.

39. In respect of infants who might not have completed one year by the day of enumeration their age in completed years should be invariably shown as '0' as they have not yet completed one year of age and add 'Infant' in brackets. As was stated under general instructions make sure that infants even if a day old are invariably enumerated. You should not enter the age in months. The age of an infant who has not yet completed one year should invariably be noted as '0' only.

40. Age is one of the most important items of demographic data and you should ascertain the age with greatest care. Many persons particularly in the rural areas can not give their age correctly. They should be assisted to state the correct age by stimulating their memory with reference to any historical event etc., well known in the area. Sometimes the age can be ascertained with reference to the age of another person of a known age that may be in the same household or in the neighbouring household or that of a well known person of the village such as Headman of the village. A person can more easily say whether he was older or younger to such a person and by how many years. This will help you to record the age more accurately.

Question 5: Marital Status

41. In answering this question use the following abbreviations:

NM: Never Married

M: Currently Married

W: Widowed

S: Separated or Divorced

42. For a person who has never been married at any time before, write 'NM'. For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for the persons in stable de facto union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or is in stable de facto union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been separated from wife or husband and is living apart with no

apparent intention of living together again or who has been, divorced either by a decree of a law court or by an accepted social or religious-custom but who has not remarried, write 'S'. For a prostitute return her marital status as declared by her.

Question 6. For currently married women only

43. This question has to be answered in respect of all currently married women only i.e., all women whose marital status is shown as 'M' against Q 5. For all others a cross may be put through the two sub-parts of this question

6(a) Age at marriage

44. Age at marriage You should ascertain the age at which the currently married woman whom you are enumerating was married and record that age in completed years. If the currently married woman had been married more than once, the age at which she got married for the first time should be recorded.

6(b) Any child born in the last one year

45. Any child born in the last one year. You should ascertain if the currently married woman whom you are enumerating gave birth to a child in the last one year prior to the date of enumeration. Since it may be difficult for a person to reckon the exact year with reference to the English calendar dates, the period of one year may be ascertained with reference to a well known festival day which falls close to Feb-March, as determined by the Census Superintendent of the State. You should ask if a child was born on or after this festival day last year to the date of enumeration. Only if the child was born alive, even if the child had died soon after birth should the answer be 'yes', to this question. Still birth, i.e a child which is born dead should not be taken into account for this purpose. So while you should make sure that every case of birth of child born alive, even if it is not alive on the date of enumeration. is reported, you should not reckon it if the child was born lifeless.

46. It is common experience that the birth of the child may not be reported readily if the child is not actually surviving at the time of enumeration. Infant deaths are still high in the country There is a chance of a number of such cases being missed unless specifically questioned about them. It is necessary to record all live births even if the child had died soon thereafter or had not survived to the day of enumeration. Therefore where the initial answer to this question is 'no', you should ask a specific question if there has been a case of child having been born alive in the last one year and later dying before the enumeration date. This is a delicate question and should be asked with tact in a manner not to offend the sensibility of the respondent. Where a currently married woman first answers that she had no child born in the last one year, you may perhaps question her as follows:

"It has been found in some houses that a child was born and had died soon after or a few days or months later and such cases had not been reported. It is my hope that there are no such cases here. Am I right?".

This may bring in the required response. If she reports no' then you can be sure that no birth has been missed You have to make sure that any live birth that has occured to the currently married woman in the last one year is netted whether the child is surviving till the date of enumeration or not. Similarly, probe to eliminate still births may be necessary. For example, when the answer is 'yes' under question 6(b) the enumerator might ask if the child is here in this house. If the answer is 'yes', no further question is needed. If 'no', the enumerator might ask where he has gone. The answer may be 'dead' or he has gone elsewhere. If 'dead' then the enumerator might ask when did the child die and this will bring out the fact whether or not it was a still birth

47. Write 'yes', if the currently married woman had given birth to a live child from the prescribed festival day last year to the date of enumeration or 'no' if she had not. In case of twin or multiple births, write 2, 3, etc., as the case may be within round brackets after the entry 'yes'.

NOTE—You may find on your revisional round from 1st to 3rd March, 1971 that a child is born to a married woman in a household after your last visit but before the sunrise and of 1st March, 1971. You will have to take this into account and correct the answer against the Q.6 (b) accordingly You must enquire specifically if any such birth has taken place. While ignoring still births all other births where the child was born alive even if it did not survive long should be taken into account.

X X X

Question 12: Literacy (L or O)

67. Definition of a literate: A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but can not write is not a literate.

68 It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

69 For a person who is literate i.e., who can both read and write, record 'L' in the triangle against question 12. If there is any doubt about a person's ability to read or write, the test that may be applied for reading is his/her ability to read any portion of the printed matter in the Enumerator's instructions and similarly for writing he/she should be able to write a simple letter. Ability merely to sign one's name is not adequate to qualify a person as being able to write with understanding If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondent's word has to be taken as correct. Other members of the household may also be able to testify to the literacy of the person enumerated.

70. For a person who is illiterate i.e. who can neither read nor write or can merely read but can not write, in any language, write 'O' in the triangle against question 12. All children of the age of 4 years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words

Question 13: Educational level

71 This question will be asked of those for whom 'L' has been recorded against question 12 For a person who is

illiterate and 'O' has ben put against him in the answer to question 12, there is no advantage in ascertaining the educational level even if he had at some stage attended school and passed a standard and had relapsed into illiteracy. In such a case you should put 'X'. You have to ascertain and record the highest educational level attained by a person for whom 'L' is recorded in answer to question 12.

72. For a person who is still studying in a particular class, the highest educational level attained by him will be one that he has actually passed and not the one in which he is studying. For example a person studying in 1st year B.A. should be recorded as only 'PUC' or 'Higher Secondary', as the case may be. *Similarly, a person studying, say in the 4th year of* 'MBBS' should not be noted a 'MBBS' but as 3rd year 'MBBS' which is the highest level he has actually attained. If you are not sure whether a person has passed Primary, Middle, Higher Secondary other definite levels you may record the actual standard passed such as say IIIrd standard, VIIIth standard, 1 year B.Com. etc

The highest educational level attained by the person enumerated should be recorded. When a person holds both general and technical qualifications both of which are of equivalent level such as M.Sc (Zoology) and M.B.B.S. or B.A (Math) and B.E degree in Engineering' the technical qualification should be given preference in recording the highest educational level attained. Where the general educational level is higher than the technical educationa level or where it is not possible to decide which of the two levels is relatively higher the highest level of education as returned by the person concerned should be recorded.

In recording the highest educational level of a graduate or a post-graduate, subject of specialisation such as B.Sc. Maths.)', M.A. (Economics), M.Sc. (Botany)', B.Sc. (Agriculture), etc., should be noted. You should not use abbreviations which are not in common use. In such cases, the degree or diploma should be spelt out fully.

73 Whenever you come across graduates or post-graduates as also those with a technical diploma or degree, you will have to issue him a "Degree-holder and Technical Personnel Card' and ask the person concerned to fill it. You should note the location code on the card while issuing it. Put a tick (√) after noting the educational level against question 13 immediately after you issue a card. When you collect it after some time but before you complete the enumeration of your area, cross the tick and put a circle as ⊗

You will have to ensure that the card issued to all the graduates and the technical degree or diploma holders are collected back. The non-crossed tick, if any, against question 13 will show that the card has not been collected.

Quesition 15: Other languages

76. After recording the mother-tongue in question 14 enquire whether the person know any other language(s), Indian or foreign and record language(s) returned by him against this question. In case he does not know any language apart from his mother-tongue put 'X' against this question.

77. The number of languages recorded under this question need not be more than two. These languages should be other than his mother-tongue and they should be recorded in the order in which he speaks and understands best and can use with understanding in communicating with others. He need not necessarily be able to read and write these languages. It is enough if he has a working knowledge of these subsidiary languages to enable him to converse in that language with understanding.

ANNEXURE II

A note on the Sampling procedure adopted in 1971 census for social and cultural tables (except C-I & C-V)

Sample size: A ten percent sample of the slips was selected linear systematically with a random start from the individual slips relating to the rural parts of a tehsil/anchal/police station. In the urban part of the district, a twenty percent systematic sample of the individual slips was selected with a separate random start. The sample sizes were adopted on consideration of required precision, available resources and operational convenience.

Selection procedure: The sample design adopted in the 1971 census was a stratified systematic sample of individual slips. For the purpose of sample selection, each district was divided into three sub-regions: (1) Tehsil/anchal/police station (rural); (2) Non-city urban district and (3) City (urban unit with 100,000 and more population).

These sub-regions were termed as operational units. If, however, any of the operational unit was unduly large, it was split into sub-operational units of at least 20,000 persons. Similarly, small-sized operational units were either clubbed together or tagged on to a contiguous larger unit so as to form an "effective operational unit" of the required minimum size. Adoption of these operational units ensured accuracy in sample selection, maintaining at the same time stability in the sampling fraction within the sampled areas. This procedure has ensured effective control over sample selection within each block, as also in the entire operational unit.

For the purpose of the Primary census abstract (PCA) the individual slips were sorted into ten broad industrial categories and nine broad age groups for each of the sexes. The ten industrial categories of workers and non-workers were as follows: (I) Cultivators; (II) Agricultural labourers; (III) Livestock, forestry, fishing, hunting and plantations, orchards & allied activities; (IV) Mining & quarrying; (Va) Manufacturing, processing, servicing & repairs in *household industry;* (Vb) Manufacturing, processing, servicing & repairs in *other than household industry;* (VI) Construction; (VII) Trade & commerce; (VIII) Transport, storage & communications; (IX) Other services and (X) Non-workers.

The nine age groups into which the slips belonging to each industrial category were sorted were 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60+ and 'age not stated'. Thus the individual slips of a particular operational unit were sorted into 11 × 9 = 99 cells, separately for males and females. Sampling was done in each of the operational units independently by taking separate random starts. The slips were then distributed into 10 (or 5) pigeon-holes for rural/urban samples and one pigeon-hole was selected at random. The slips falling in the selected pigeon-hole constituted the sample. For operational details of the sampling procedure and instructions, the 'Manual of instructions on sorting, compilation (manual processing) & sampling procedures' may be consulted. All tables except A-I to A-V (Pop. tables), B-I Part A & B-II (economic tables), C-V (mother tongue), C-VII (Religion) and C-VIII (scheduled castes & tribes) have been prepared on a sample basis.

Estimation procedure: The tables prepared for each of the districts/states from the ten percent rural and twenty percent urban sample slips have been inflated to give the final estimated tables. Estimates have been obtained by making use of the cell frequencies (usually labelled as 'controls') available from the tables prepared on full count basis, namely, PCA and B-I Part A. In order to ensure the maximum possible inter-table consistency, it became necessary to use the estimated frequencies of a few of the final tables as controls for estimating some cell frequencies of other tables.

This way of estimating the cell frequencies ensured that marginal totals of estimated tables tallied with that of the full-count tables. This is convenient to the user because, after adjustment, the identical marginal totals are found in tables having the same marginal specification. "The adjustment diminishes the sampling variance to some extent; the more the controls, the smaller the sampling variance of the adjusted frequencies". Further, adjustment to known control totals has at the same time the effect of eliminating biases in the nature of inherent differences between the sample and complete count.

For the purpose of estimation of final tables, a set of multipliers was prepared for each table. A multiplier is the ratio of full-count frequency of some characteristics from PCA or Table B-I Part A and the corresponding sample frequency of the same characteristics from the sample table. The following statement gives the level of presentation of the tables and the related controls on which the multipliers are based. The details will be presented in the report on sampling procedures to be published later:—

Table	*Level of presentation*	*Control based from tables*
C-II	District	B-I Pt A & PCA
C-III A	do	,, ,,
C-III B	do	,, ,,
C-IV	State	,, ,,
C-IV App	District	,, ,,

As no such control was readily available for C VI (bilingualism), these were estimated by multiplying the sample values by 10 and 5 in rural and urban areas respectively.

Reliability of estimates: No exact formula can be given for the precision of the estimates in view of the systematic sampling design adopted. The relative standard error can be estimated roughly on the basis of simple random sampling as $\sqrt{(1-f)\frac{1-p}{np}}$ where 'f' is the proportion samples, (0.10 in case of rural areas & 0.20 in case of urban areas); 'p' is the estimated proportion in any cell and 'n' the sample size being equal to ten percent of individual slips in rural areas and twenty percent in urban areas. In the present census,

slips were sorted by sex, industrial category and age group before sampling. It is expected that the efficiency must be considerably higher than a simple random sample of identical size. Extensive studies conducted have indicated that systematic sampling of individuals is more efficient than random sampling especially when the slips were pre-sorted for most of the socio-economic characteristics covered in a census.[2] Thus the estimates prepared on the basis of the systematic sampling in the present census can be expected to be quite reliable.

A note on the sampling procedure adopted in 1971 census for C-I Part A, C-I Part B (i) and C-I Part B (ii)

Sample size: For the preparation of tables C-I Part A, C-I Part B (i) and C-I Part B (ii) on household composition, a sample of residential households was drawn in two stages. In the first stage, a twenty percent systematic sample of effective enumeration blocks (defined later) was selected systematically. In the second stage, a twenty percent sample of population records relating to residential households was selected from each of the sample block again systematically.

Selection procedure: For the purpose of sample selection, the rural and urban parts of each district were treated as separate strata. Within each stratum, a list of blocks was prepared by merging those containing less than 50 households with the neighbouring blocks. Blocks formed in this way were called 'effective enumeration blocks' or simply 'effective blocks' The list of effective blocks so formed served as a frame for the selection of the first stage unit. A twenty percent sample of effective blocks was then selected systematically. Having identified the first stage units, the population record books for the selected effective blocks were assembled. Within each selected effective block, the population records relating to residential households were serially numbered. To do this effectively instructions were issued to fold the population record relating to 'houseless households or institutional households'. Care was also taken to see that only one serial number was assigned to a population record, whenever the record relating to a household covered more than one page. In cases where 'effective blocks' were formed by merging two or more blocks, the population record books corresponding to all the census enumeration blocks constituting the effective block were assembled together and then the households were selected. Fresh random numbers were selected for each effective block. The population records corresponding to the selected households were marked 'S' at the right hand top corner with a stamp provided.

Estimation procedure: The tables prepared for each of the stratum were multiplied uniformally by 25 to give the final estimated table.

ANNEXURE III

A note on the sampling procedure adopted in the 1971 census for Fertility tables

Sample size: A ten percent sample of the slips was selected linear systematically with a random start from the individual slips relating to the rural parts of a tehsil/anchal/police station. In the urban part of the district, a twenty percent systematic sample of the individual slip was selected with a separate random start. The sample sizes were adopted on consideration of required precision, available resources and operational convenience.

Selection procedure: The sample design adopted in the 1971 census was a stratified systematic sample of individual slips. For the purpose of sample selection, each district was divided into three sub-regions: (1) Tehsil/anchal/police station (rural); (2) Non-city urban district and (3) City (urban unit with 100,000 and more population).

These sub-regions were termed as operational units. If, however, any of the operational unit was unduly large, it was split into sub-operational units of at least 20,000 persons. Similarly, small-sized operational units were either clubbed together or tagged on to a cotigruous larger unit so as to form an "effective operational unit" of the required minimum size. Adoption of these operational units ensured accuracy in sample selection, maintaining at the same time stability in the sampling fraction within the sampled areas. This procedure has ensured effective control over sample selection within each block, as also in the entire operational unit.

For the purpose of the Primary Census Abstract (PCA) the individual slips were sorted into ten broad industral categories and nine broad age groups for each of the sexes. The ten industrial categories of workers and non-workers were as follows: (I) Cultivators; (II) Agricultural labourers; (III) Livestock, forestry, fishing, hunting and plantations, orchards & allied activities (IV) Mining & quarrying; (Va) Manufacturing, processing, servicing & repairs in *household industry;* (Vb) Manufacturing, processing, servicing & repairs in *other than household industry;* (VI) Construction; (VII) Trade & commerce; (VIII) Transport, storage & communications (IX) Other services and (X) Non-workers.

The nine age groups into which the slips belonging to each industrial category were sorted were 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59, 60+ and 'age not stated'. Thus the individual slips of particular operational unit were sorted into 11 × 9 = 99 cells separately for males and females. Sampling was done each of the operational units independently by taking separate random start. The slips were then distributed into 10 (or 5) pigeon-holes for rural/urban samples and one pigeon-hole was selected at random. The slips falling in the selected pigeon hole constituted the sample. For operational details of the sampling procedure and instructions, the 'Manual of instructions on sorting, compilation (manual processing) & sampling procedures' may be consulted.

Estimation procedure: All the tables F-I to F-V are presented at state level. The sample table F-1 to F-V have been multiplied by '10' in case of rural area and by '5' in case of urban area to estimate the final tables.

Reliability of estimates: No exact formula can be given for the precision of the estimates in view of the systematic sampling design adopted. The relative standard error can be estimated roughly on the basis of simple random sampling, as $\sqrt{(1-f)\frac{1-p}{np}}$ where 'f' is the proportion samples, (0.10 in case of rural areas & 0.20 in case of urban areas); 'p' is the estimated proportion in any cell and 'n' the sample size being equal to ten percent of individual slips in rural areas and twenty percent in urban areas. In the present census, slips were sorted by sex, industrial category and age-group before sampling. It is expected that the efficiency must be considerably higher than a simple random sample of identical size. Extensive studies conducted have indicated that systematic sampling of individuals is more efficient than random sampling especially when the slips were pre-sorted for most of the socio-economic characteristics covered in a census. Thus the estimates prepared on the basis of the systematic sampling in the present census can be expected to be quite reliable.

MGIPCBE—S1—3 Census/Orissa/78—13-12-79—500

LIST OF AGENTS FOR THE SALE OF THE GOVERNMENT OF INDIA PUBLICATIONS
(As on 25th November, 1976)

Station	Sl. No.	Name of the party	Cat. of Agents
