PREFACE

Sociologists, demographers and some other research scholars will find this volume very useful for their research work on data relating to family composition, social, cultural and fertility aspects. In all there are 12 main tables having many part tables and five appendices. All these tables except Table C–I–A and C–I–B all parts relating to family composition and Table C–V relating to languages have been generated on sample basis from individual slips. Table C–I Part A and B have been generated on sample basis from population record while Table C–V has been generated from individual slips on full count. In finalisation of these tables Sarvshri J. R. Vashistha, Investigator, G. D. Singla, J. N. Suri and P. N. Modgil, Tabulation Officers; A. L. Kakkar, Jaswant Lal and Miss Inder Mohan Kaur, Statistical Assistants and Shri Hari Krishan, Computor, were of great help. Credit for Preparing maps and charts appearing in this volume and its outer cover goes to Sarvshri S. R. Puri, Cartographer, Amarjit Singh, Economic Investigator and Shri N. P. Gupta, Artist. Shri D. R. Khanna, Stenographer deserves thanks for taking dictation and typing out notes and fly-leaves etc. appearing in this volume and Sarvshri Daulat Ram, Statistical Assistant and R. D. Verma, Proof Reader for doing proof reading.

2. I am grateful to Shri K. K. Chakravorty, Assistant Registrar General, India (C) for his valuable guidance in preparing this volume and Shri M. G. Kini, Research Officer and his staff for completing scrutiny of draft report in shortest possible time.

3. I am extremely grateful to Shri R. B. Chari, Registrar General, India, for encouragement and guidance given by him for completing this report from time to time.

4. I am also grateful to Shri N. C. Mukherjee, Manager and staff members of Composing Section II of Government of India Press, Ring Road, New Delhi, for co-operation rendered by them in bringing out this volume.

Dated Chandigarh, the
18th September, 1978.

ARDAMAN SINGH
Dy. Director of Census Operations,
Haryana, Chandigarh.

INTRODUCTION

This volume contains social, cultural and fertility tables which furnish data on household composition, distribution of population by age and marital status, educational level, mother tongue, bilingualism and distribution of currently married women and related births by various cohorts.

2. Description of tables appearing in this volume is given below :—

C-I Part A	Members of Households by relationship to head of Household classified by age groups.
C-I Part B(i)	Households where the head is a male by relationship of members with the head.
C-I Part B(ii)	Households where the head is a female by relationship of members with the head.
C-II	Age and Marital Status.
C-III Part A	Age, Sex and Education in all areas.
C-III Part B	Age, Sex and Education in urban areas only.
C-IV	Single year age returns.
C-IV *Appendix*	Distribution of persons by five year age groups
C-V Part A(i)	Distribution of Languages (inclusive of Mother tongues grouped under each) specified in Schedule VIII to the Constitution of India.
C-V Part A(ii)	Distribution of Languages (inclusive of Mother tongues grouped under each) specified in Schedule VIII to the Constitution of India for District, Tahsil etc. and Towns (as the case may be).
C-V Part B(i)	Speakers of Languages/Mother tongues (inclusive of Mother tongues where grouped) other than those specified in Schedule VIII to the Constitution of India for State and Districts.
C-V Part B(ii)	Speakers of Languages/Mother tongues (inclusive of Mother tongues where grouped) other than those specified in Schedule VIII to the Constitution of India for Districts/Tahsils and Towns (as the case may be).
C-VI	Bilingualism
F-I Part A	Distribution of currently married women and the related births during the last year by religion, present age and age at marriage (Rural).
F-I Part B	Distribution of currently married women and the related births during the last year by religion, present age and age at marriage (Urban).
F-I *Appendix*	Distribution of currently married women and the related births during the last year by Scheduled Castes/Scheduled Tribes, present age and age at marriage (Rural/Urban).
F-II Part A	Distribution of currently married women and the related births during the last year by education, present age and age at marriage (Rural).
F-II Part B	Distribution of currently married women and the related births during the last year by education, present age and age at marriage (Urban).
F-III Part A	Distribution of currently married women and the related births during the last year by religion, duration of marriage and age at marriage (Rural).
F-III Part B	Distribution of currently married women and the related births during the last year by religion, duration of marriage and age at marriage (Urban).
F-III *Appendix*	Distribution of currently married women and the related births during the last year by Scheduled Castes/Scheduled Tribes, duration of marriage and age at marriage (Rural/Urban).
F-IV Part A	Distribution of currently married women and the related births during the last year by education, duration of marriage and age at marriage (Rural).
F-IV Part B	Distribution of currently married women and the related births during the last year by education duration of marriage and age at marriage (Urban).

F-V	Distribution of currently married women and the related births during the last year by religion, education groups, present age and age at marriage (Rural/Urban).

3. Data given in all tables in this volume except table C-I (all parts) and C-V have been generated by processing sample individual slips. C-V table has been processed by processing individual slips on full count. The household composition tables i.e. C-I (all parts) have been generated from a two stage sample of population record schedules.

4. Individual slip canvassed during 1971-Census, population record schedule and instructions to enumerators for canvassing and filling up questions relating to these tables and population record are reproduced.

Signature of Enumerator..... Signature of Supervisor.....

Date..... Date .....

Instructions issued to Enumerators (relevant questions only) :—

Question 1 : Name

5. Write the name of the person enumerated. If a woman's name is not given out, describe her as 'so and so's wife, mother or daughter'. By custom if a woman finds it difficult to give the name of her husband and if the man is absent at the time of enumeration but his particulars have to be recorded write 'so-and-so's husband' if you have failed to ascertain the name even from the neighbours.

5.1 For newly born infants who have not yet been given the name write "baby" and add father's or mother's name.

Question 2 : Relationship to Head

6. In the case of the Head of the household write 'Head'. The Head of the Household for census purposes is a person who is recognised as such in the household. He is generally the person who bears the chief responsibility for the maintenance of the household and takes decisions on behalf of the household. The Head of the household need not necessarily be the eldest male member, but may even be a female or a younger member of either sex. You need not enter into any long argument about it but record the name of the person who is recognised by the Household as its Head.

6.1 In the case of institutions like boarding houses, messes or friends living together in one census house, which should be regarded as households of unrelated persons living together, which may be called institutional Households, the Manager or Superintendent or the person who has administrative responsibility or who by common consent is regarded as the Head should be recorded as the Head of the household.

6.2 The Manager or Superintendent who does not stay normally in the institution should be enumerated at his place of normal residence. You should make sure before filling up the slip for the Manager or Superintendent etc. of an institutional household, that he/she has not been enumerated at any other household.

6.3 In the case of absence of a normal 'Head', the person on whom the responsibility of managing the affairs of the household falls, should be regarded as the Head.

6.4 All relationships in this question should be recorded in relation to the Head of the household. Write the relationship in full. Do not use words like 'nephew', 'niece or uncle', but state whether brother's or sister's son or daughter (for nephew or niece) or father's or mother's brother (for uncle). 'Son' will include 'adopted son' or 'step son'; similarly for a daughter. In the case of visitors, boarders, or employees, write 'visitor', 'boarder', or 'employee' as the case may be. In the case of institution, the members should be recorded as 'unrelated'.

6.5. If on the check of revisional round between 1st and 3rd April, 1971 the Head of the household as recorded previously is found to have died, the person in the household who succeeds him by common consent as head should be recorded as Head and the

relationships in all other slips will have to be suitably corrected. The slip of the deceased Head of the household will, of course, be cancelled.

Question 3 : Sex

7. For males write 'M' and for females write 'F' within the circle indicated against this question. Even for eunuchs and hermaphrodites, write 'M' only. Verify with reference to the name and relationship to Head against questions 1 and 2 respectively that you have noted the sex correctly.

Question 4 : Age

8. Record the age of the person in total years completed last birthday. Very often there is a tendency on the part of the individuals to return 'years running' rather than the 'years completed'. Make sure that only the actual number of years completed is recorded.

8.1 In respect of infants who *might not have completed one year* by the day of enumeration their age in completed years should be invariably shown as 'O' as they have not yet completed one year of age and add 'Infant' in brackets. As was stated under general instructions make sure that infants even if a day old are invariably enumerated. *You should not enter the age in months.* The age of an infant who has not yet completed one year should invariably be noted as 'O' only.

8.2 Age is one of the most important items of demographic data and you should ascertain the age with greatest care. Many persons particularly in the rural areas cannot give their age correctly. They should be assisted to state the correct age by stimulating their memory with reference to any historical event etc., well known in the area. Sometimes the age can be ascertained with reference to the age of another person of a known age that may be in the same household or in the neighbouring household or that of a well known person of the village such as Headman of the village. A person can more easily say whether he was older or younger to such a person and by how many years. This will help you to record the age more accurately.

Question 5 : Marital Status

9. In answering this question use the following abbreviations :

NM : Never Married

M : Currently Married

W : Widowed

S : Separated or Divorced

9.1 For a person who has never been married at any time before, write 'NM'. For a person currently married, whether for the first or another time and whose marriage is subsisting at the time of enumeration with the spouse living, write 'M'. Write 'M' also for persons who are recognised by custom or society as married and for the persons in stable *de facto* union. Even if a marriage is disputed in the locality write 'M' if the person concerned says he or she is married or is in stable *de facto* union. For a widowed person whose husband or wife is dead, and who has not been married again, write 'W'. For a person who has been separated from wife or husband and is living apart with no apparent intention of living together again or who has been, divorced either by a decree of a law court or by an accepted social or religious custom but who has not remarried Write 'S'. For a prostitute return her marital status as declared by her.

Question 6 : For currently married women only

10. This question has to be answered in respect of all currently married women only *i.e.*, all women whose marital status is shown as 'M' against Q. 5. For all others a cross may be put through the two sub-parts of this question.

6(a) Age at marriage

11. **Age at marriage :** You should ascertain the age at which the currently married woman whom you are enumerating was married and record that age in completed years. If the currently married woman had been married more than once, the age at which she got married for the first time should be recorded.

6(b) Any child born in the last one year

12. **Any child born in the last one year :** You should ascertain if the currently married woman whom you are enumerating gave birth to a child in the last one year prior to the date of enumeration. Since it may be difficult for a person to reckon the exact year with reference to the English calendar dates, the period of one year may be ascertained with reference to a well known festival day which falls close to February-March, as determined by the Census Superintendent of the State. You should ask if a child was born on or after this festival day last year to the date of enumeration. Only if the child was born alive, even if the child had died soon after birth, should the answer be 'Yes', to this question . *Still birth, i.e. a child which is born dead should not be taken into account for this purpose.* So while you should make sure that every case of birth of child born alive, even if it is not alive on the date of enumeration, is reported, you should not reckon it if the child was born lifeless.

12.1. It is common experience that the birth of the child may not be reported readily if the child is not actually surviving at the time of enumeration. Infant deaths are still high in the country. There is a chance of a number of such cases being missed unless specifically questioned about them. It is necessary to record all live births even if the child had died soon thereafter or had not survived to the day of enumeration. Therefore where the initial answer to this question is 'no', you should ask a specific question if there has been a case of child having been born alive in the last one year and later dying before the enumeration date. This is a delicate question and should be asked with tact in a manner not to offend the sensibility of the respondent. Where a currently married woman first answers that she had no child born in the last one year, you may perhaps question her as follows :

"It has been found in some houses that a child was born and had died soon after or a few days or months later and such cases had not been reported. It is my hope that there are no such cases here. Am I right ?"

12.2 This may bring in the required response. If she reports 'no' then you can be sure that no birth has been missed. You have to make sure that any live birth that has occurred to the currently married woman in the last one year is netted whether the child is surviving till the date of enumeration or not. Similarly, probe to eliminate still births may be necessary. For example, when the answer is 'yes' under question 6(b) the enumerator might ask if the child is here in this house. If the answer is 'yes', no further question is needed. If 'no', the enumerator might ask where he has gone. The answer may be 'dead' or he has gone elsewhere. If 'dead' then the enumerator might ask when did the child die and this will bring out the fact whether or not it was a still birth.

12.3 Write 'Yes', if the currently married woman had given birth to a live child from the prescribed festival day last year to the date of enumeration or 'no' if she had not. In case of twin or multiple births, write 2, 3, etc., as the case may be within round brackets after the entry 'Yes'.

Note.—You may find on your revisional round from 1st to 3rd April, 1971 that a child is born to a married woman in a household after your last visit but before the sunrise of 1st April, 1971. You will have to take this into account and correct the answer against the Q. 6 (b) accordingly. You must enquire specifically if any such birth has taken place. While ignoring still births all other births where the child was born alive even if it did not survive long should be taken into account.

Question 10 : Religion

13. In answering this question use the following abbreviations :

H : Hinduism

I : Islam

C : Christianity

S : Sikhism

B : Budhism

J : Jainism

For others record the actual religion as returned fully.

13.1 If a person says that he has no religion it may be recorded accordingly. Do not mistake religion for caste which will not be recorded here.

Question 11 : Scheduled Caste or Scheduled Tribe

14. You have been furnished with a list of scheduled castes and scheduled tribes notified for your State. Ascertain if the person enumerated belongs to a scheduled caste or scheduled tribe and if he does, then record the name of the scheduled caste or scheduled tribe which should find place in the list furnished to you. The answer should be recorded against the correct rectangle provided for the purpose against this question. For a person who is not a member of any scheduled caste or scheduled tribe write 'X' in both the rectangles.

14.1 If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by synonym or generic name of a caste or a tribe it should be entered only if it finds a place in the list furnished to you. Do not write the names of scheduled castes in general terms as 'Harijan' or 'Achhut'. You should ascertain the name of the caste when it is returned and write it in the rectangle provided for recording the name. Similarly, do not write the names of scheduled tribes in general term as 'Adivasi'. You should ascertain the name of the tribe when it is returned and write it in the rectangle with broken lines provided for recording the same. If a person is negligent and insists on calling himself merely 'Harijan' or 'Achhut' or 'Adivasi' as the case may be, tell him that this description is not adequate for census purposes and persuade him to give out the actual name of the caste or tribe. You should make all efforts to ascertain the correct name of the scheduled caste or scheduled tribe as found in the notified list. If the person merely claims to be a scheduled caste or scheduled tribe but says that he does not belong to any of the notified communities applicable to the area, he will not be entered as a scheduled caste or scheduled tribe.

14.2 Scheduled castes can belong only to the Hindu or Sikh religions. If a person belongs to scheduled caste, there will be either 'H' or 'S' in the answer to question 10. Scheduled tribes may belong to any religion.

Question 12 : Literacy (L or O)

15. *Definition of a literate* : A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not a literate.

15.1 It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard.

15.2 For a person who is literate *i.e.*, who can both read and write, record 'L' in the triangle against question 12. If there is any doubt about a person's ability to read or write, the test that may be applied for reading is his/her ability to read any portion of the printed matter in the Enumerator's Instructions and similarly for writing he/she should be able to write a simple letter. Ability merely to sign one's name is not adequate to qualify a person as being able to write with understanding. If a person claims to be literate in some other language with which the enumerator is not acquainted, the respondent's word has to be taken as correct. Other members of the household may also be able to testify to the literacy of the person enumerated.

15.3 For a person who is illiterate *i.e.* who can neither read nor write or can merely read but cannot write, in any language, write 'O' in the triangle against question 12. All children of the age of 4 years or less should be treated as illiterate even if the child is going to a school and may have picked up reading and writing a few odd words.

Question 13 : Educational level

16. This question will be asked of those for whom 'L' has been recorded against question 12. For a person who is illiterate and 'O' has been put against him in the answer to question 12, there is no advantage in ascertaining the educational level even if he had at some stage attended school and passed a standard and had relapsed into illiteracy. In such a case you should put 'X'. You have to ascertain and record the highest educational level attained by a person for whom 'L' is recorded in answer to question 12.

16.1 For a person who is still studying in a particular class, the highest educational level attained by him will be one that he has actually passed and not the one in which he is studying. For example, a person studying in 1st year B.A. should be recorded as only 'PUC' or 'Higher Secondary', as the case may be. Similarly, a person studying, say, in the 4th year of 'MBBS' should not be noted as 'MBBS' but as 3rd year 'MBBS' which is the highest level he has actually attained. If you are not sure whether a person has passed Primary, Middle, Higher Secondary or other definite levels, you may record the actual standard passed such as say IIIrd standard, VIIIth standard, 1st year B. Com. etc.

16.2 The highest educational level attained by the person enumerated should be recorded. When a person holds both general and technical qualifications both of which are of equivalent level such as say B.Sc. (Zoology) and M.B.B.S. or B.A. (Maths.) and B.E. (Bachelor in Engineering), the technical qualification should be given preference in recording the highest educational level attained. Where the general educational level is higher than the technical educational level or where it is not possible to decide which of the two levels is relatively higher, the highest level of education as returned by the person concerned should be recorded.

16.3 In recording the highest educational level of a graduate or a post-graduate, subject of specialisation such as B.Sc. (Maths.), M.A. (Economics), M.Sc. (Botany), B.Sc. (Agriculture), etc., should be noted. You should not use abbreviations which are not in common use. In such cases, the degree or diploma should be spelt out fully.

16.4 Whenever you come across graduates or post-graduates as also those with a technical diploma or degree, you will have to issue him a "Degree-holder and Technical Personnel Card" and ask the person concerned to fill it. You should note the location code on the card while issuing it. Put a tick (√) after noting the educational level against question 13 immediately after you issue a card. When you collect it after some time but before you complete the enumeration of your area, cross the tick and put a circle as (×).

16.5 You will have to ensure that the card issued to all the graduates and the technical degree or diploma holders are collected back. The non-crossed tick, if any, against question 13 will show that the card has not been collected.

Question 14 : Mother-tongue

17. *Definition.* Mother-tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother shall be recorded.

17.1 Record mother-tongue in full whatever be the name of the language as returned and avoid use of abbreviations. You are not expected to determine if the language returned by a person is the dialect of another major language and so on. You should not try to establish any relationship between religion and mother-tongue. *You are bound to record the language as returned by the person as his mother-tongue and you should not enter into any argument with him and try to record anything other than what is returned.* If you have reason to suspect that in any area due to any organised movement, mother-tongue was not being truthfully returned, you should record the mother-tongue as actually returned by the respondent and make a report to your superior Census Officers for verification. You are not authorised to make any correction on your own.

Question 15 : Other languages

18. After recording the mother-tongue in question 14 enquire whether the person knows any other language(s), Indian or foreign and record language(s) returned by him against this question. In case he does not know any language apart from his mother-tongue put 'X' against this question.

18.1 The number of languages recorded under this question need not be more than two. These languages should be other than his mother-tongue and they should be recorded in the order in which he speaks and understands best and can use with understanding in communicating with others. He need not necessarily be able to read and write these languages. It is enough if he has a working knowledge of these subsidiary languages to enable him to converse in that language with understanding.

Question 16 : Main Activity

19. Every person will be asked what his main activity is, that is, how he engages himself mostly. For the purpose of this question, all persons will get themselves divided into two broad streams of main activity namely, (1) as workers and (2) as non-workers according as the type of main activity that the person returns himself as engaged in mostly.

19.1 *'Worker' defined* : A 'worker' is a person whose main activity is participation in any

economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work.

19.2 *Reference periods* : The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during this reference period and this has been returned as his main activity, the person will be categorised accordingly. A person who normally works but had been absent from work during this reference period on account of illness of travel, holiday, temporary breakdown, strike etc., the person should be treated as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages should be considered as economically active and recorded as working. A person who has merely been offered work but has not actually joined it, is not to be treated as engaged in work.

19.3 There are certain types of works which are not carried on throughout the year such as cultivation, live-stock keeping, plantation work, some types of household industry, etc. A person's main activity should be ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration. It is likely that even when a person is engaged in some other work during the period of one week prior to the date of enumeration, the main activity of the person may be cultivation, agricultural labour or some other work attended to normally by him in the course of the year. Care must be taken to see that the main activity is properly ascertained in such cases. For example, a person's main activity may be agricultural labour and in the week prior to enumeration he may be engaged as a sugarcane factory labourer or as a road cooly. He should be categorised for his main activity as agricultural labourer only as returned by him as he engages himself mostly in that work and the other work should be treated as his subsidiary work.

19.4 A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a student attending institution, even if such a person helps in the family economic activity but not as a full time worker should *not* be treated as a worker for the main activity. On the other hand, if a person is primarily engaged in some economic activity but at the same time does also attend to some household chores or attends a night school etc., he or she should be treated basically as a worker for the main activity and categorised accordingly.

19.5 A person who merely receives an income such as a rent receiver or a pensioner who does not have to work for receiving the income, will not be treated as economically active unless the person is also engaged in some economic activity and if that activity is returned as the main activity of the individual.

Q. 16(a) Broad Category (i) Worker (C, AL, HHI, OW) (ii) Non-worker (H, ST, R, D, B, I, O)

20. The main activity returned by the person will entitle him to be categorised either as a worker in 16(a)(i) or as a non-worker under 16(a)(ii).

16(a)(i) Worker (C, AL, HHI, OW)

21. Where the main activity of a person qualifies him to be treated as a worker he should be further categorised according to the type of work and one of the appropriate abbreviations indicated against this question should be entered in the box provided for the purpose. If the person is not engaged in any economic activity an 'X' should be noted in the box. The abbreviations to be used for workers are explained below :

C : CULTIVATOR

22. For a person who returns his main activity as working as a cultivator the abbreviation 'C' should be used.

22.1 *Definition of Cultivator* : For purposes of the census a person is working as Cultivator if he or she is engaged in cultivation by oneself or by supervision or direction in one's capacity as the owner or lessee of land held from Govt. or as a tenant of land held from private persons or institutions for payment of money, kind or share.

22.2 Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy jowar, bajra, ragi, etc. and pulses, raw jute and kindred fibre crop, cotton etc., and other crops such as sugar-cane, groundnuts tapioca, etc., and does not include fruit growing, vegetable-growing or keeping orchards or groves or working of plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

22.3 A person who merely owns land but has given out land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land for wages in cash, kind or share (Agricultural labourer) will not be treated as cultivator in this question.

AL : AGRICULTURAL LABOURER

23. A person who returns his main activity as engaged as agricultural labourer, the abbreviation 'AL' should be used in the box.

23.1 *Definition of an Agricultural Labourer* : A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He has no risk in the cultivation but he merely works in another person's land for wages. The labourer could have no right of lease or contract on land on which he works.

H.H.I. : HOUSEHOLD INDUSTRY

24. For a person who returns his main activity as engaged in some production, processing, servicing or

repair of articles of goods such as, say, handloom weaving, dyeing, carpentry, *bidi* rolling, pottery manufacturer, bicycle repairing, blacksmithy, tailoring etc., it has to be ascertained if it is a household industry, and if so, it should be indicated by the abbreviation 'HHI' in the box.

Definition of a Household Industry

24.1 A Household Industry is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

24.2 The main criterion of a Household Industry is the participation of one or more members of a household. This criterion should apply to urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the Household Industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home, it will not be considered a household industry. It should be located within the precincts of the house where the members live.

24.3 A Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as a pleader or doctor or barber, musician, dancer, waterman, *dhobi,* astrologer, etc., or merely trade or business, even if such professions, trade or services are run at home by members of household.

24.4 Sometimes it is likely that the person who may not be working in his own Household Industry may be working as a petty employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry as an employee and record as per instructions given above.

OW : OTHER WORKERS

25. If a person gives his main activity as engaged in any other work which is not cultivation, agricultural labour or household industry, this may be indicated by merely noting 'OW' in the box. The type of workers that may come under the 'Other Workers' category are factory workers, those working in trade or transport, all Government servants, municipal employees, teachers, mining workers, political or social workers, building labourers, etc. etc. In effect, all types of economic activity not covered by cultivation, agricultural labour or household industry will come under this residual category. Workers engaged in plantation or forestry should not be treated as cultivators or agricultural labourers but as 'Other workers'.

25.1 Further details pertaining to this 'Other' category of workers, as also those engaged in household industry, will be recorded in the subsequent sub-parts (b) to (f) of question 16.

16(a) (ii) Non-worker (H, ST, R, D, B, I, O)

26. As was stated earlier, question 16 is intended to ascertain the main activity of every individual whether he or she is economically active or not. While 16 (a) (i) helps to broadly categorise all those who have returned some work as their main activity, 16(a) will help to categorise those whose main activity is not engaged in any economically productive work, but are basically non-workers. These may be categorised under seven broad heads whose abbreviations are indicated against this question. The appropriate abbreviation will have to be entered in the box provided. The abbreviations are explained below :

H : HOUSEHOLD DUTIES

27. This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. The main activity of such a person should be entered as 'H'. If a person whose main activity is attending to household duties, also engages oneself in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale etc., that economic activity will be covered as secondary work under question 17. On the other hand, a woman who works primarily as a factory worker or a plantation labourer or an agricultural labourer or in some office or shop etc., and also attends to household duties, obviously her main activity will be the economic activity in which she is mostly engaged in and should not be categorised as 'H' for her main activity in this question. She should have been treated basically as a worker and her main economic activity should have been recorded against 16(a)(i).

ST : STUDENT

28. This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending school. Even if such persons participated in some work but not to the same extent as a full-time worker, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity. 'ST' should be entered in the box. The other economic activity, if any, that such persons attend to will be reflected under question 17 as secondary work.

R : RETIRED PERSON OR A RENTIER

29. A person who has retired from service and is doing no other work *i.e.* not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or

non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work, will come under this category. 'R' should be noted in the box for a person coming under this category.

D : DEPENDENT

30. This category will include all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. If a girl or an old woman attends to household duties she should be categorised under 'H' for her main activity rather than 'D'.

30.1 Dependents will include all non-workers even if able-bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

B : BEGGARS ETC.

31. This will cover beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

I : INSTITUTIONS

32. This will cover convicts in jails or inmates of a penal, mental or charitable institution, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc., in such institutions. An under-trial prisoner in a jail should not, however, be brought under this category but has to be indicated according to the main activity he was engaged in before he was apprehended. Inmates of such institutions will be noted as 'I'.

O : OTHER NON-WORKERS

33. This will include all non-workers who may not come under any of the six categories above but are seeking work, they should be noted as 'O' in the box. A boy or girl who has completed education or has stopped studying and is seeking work, will come under this category. If a person is merely spending his time at home as a dependent and is not doing any work and is not seeking any work will come under 'D' rather than 'O'. A person irrespective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work will come under this category.

33.1 If the main activity of the person who is enumerated does not qualify a person to be treated as a worker and he does not fall under any of the four broad categories of workers covered by 16(a)(i) and an 'X' has been put in the box against that question, then he must necessarily be categorised under any one of the seven broad types of non-workers and the appropriate abbreviation entered in the box opposite to question 16 (a) (ii). Conversely if a person has already been treated as a worker and his main activity has been indicated in the box against question 16(a)(i), then question 16(a)(ii) will not apply to the person and an 'X' should be put in the box against question 16(a) (ii). Thus 16(a) (i) and 16 (a) (ii) are mutually exclusive.

Q. 16(b) to 16(f)

34. These sub-parts of question 16 will have to be filled only to describe the details of the household industry or other work indicated against question 16(a)(i). If the main activity has been shown as 'C' or 'AL' against 16 (a) (i), there is no need to give the details of the cultivation or agricultural labour in these sub-sections.

34.1 Similarly, if the main activity of an individual has been returned as a non-worker against 16(a)(ii), sub-sections (b) to (f) will not apply and a 'X' may be put right across all these questions.

Q. 16(b) : Place of work (Name of village/town)

35. Ascertain from each person who is already taken as a worker other than in cultivation or agricultural labour *i.e.* question 16(a) (i) has been answered as HHI or OW, the village or town where he or she works. If the place of work is the same as the village or town of enumeration write 'PL'. In all other cases you should write the name of the place fully. If a person has no fixed place of work such as, say, a travelling vendor of vegetables or a pedlar or a rickshaw puller who may go from one village or town to another, note 'No fixed place of work'. If he works in one particular town or village that should be noted.

Q. 16(c) : Name of Establishment

36. This question and the subsequent sub-sections of question 16 need not be answered for cultivators and agricultural labourers who are already noted as 'C' or 'AL' against question 16(a)(i).

36.1 Record here the exact name of the factory, firm, workshop, business house, company, shop, office etc., and in respect of public offices you should clearly indicate whether they are Central or State Government or local body offices, etc. If the establishment does not have any definite name such as, say, in the case of a household industry like hand pounding of rice, gur making, bee keeping, handloom weaving, potter's house, blacksmithy etc., note 'No particular name'.

Q. 16(d) : Nature of Industry, Trade, Profession or Service

37. The answer to this question will have to be adequately precise to enable proper classification of the sector of economy in which the person is working. The sector of economy in which a person works may relate to (i) Plantation, Forestry, Fishing, Livestock etc., (ii) Mining and/or Quarrying (iii) Manufacturing (iv) Construction (v) Electricity, Gas or Water Supply (vi) Transport and Communications (vii) Trade and Commerce (viii) Professions and Services. Full details of the type of industry, trade-profession or service in which the person is engaged will have to be recorded here. You shall have to describe the nature of Industry, Profession, Trade or Service whatever it is, in as precise a detail as possible.

Q. 16(e) : Description of work

38. This question has to be filled up for all persons for whom the main activity is shown as 'HHI' or

'OW' in question 16(a)(i) and for whom you should have also to answer the other sub-sections of question 16. Under this question, the description of the actual work that the person enumerated is doing is to be recorded irrespective of which type of industry, trade, profession or service he may be working and which is already recorded under question 16(d). His actual work should also be given in sufficient detail. If for example a person is merely recorded as say, clerk with no other details, it will be impossible to properly categorise him as to the type of work he does. He may be a clerk attending to correspondence or book keeping or accounting. Similarly if a person were merely to be recorded as a mechanic, it will not help to determine what type of mechanic—electrical mechanic, or a motor mechanic or a locomotive mechanic, etc., he is. The description of the actual work done by a person should be ascertained in adequate detail and recorded against this question.

38. It is necessary to ascertain the full details of the particulars of work performed by an individual for being recorded against question 16(e).

38.2 It has been found in the past that substantial number of persons are recorded merely as general labourers. It is necessary to make a probe and find out in which type of work he is mostly engaged as a labourer such as, say, a road coolie, a loader or unloader at a market, a construction labourer, etc.

38.3 For those in Military service it is enough if it is merely noted as 'in the service of the Central Government'. Other details need not be given.

General :

39. There need be no confusion as to the scope of 16(d) and 16(e). 16(d) would represent the nature of industry, trade, profession or service *i.e.* the field of economic activity in which a person is engaged in work and 16(e) represents the occupation or the actual work that the person does in the industry, trade, profession or service in which he is engaged. Thus, for example the answer to question 16(d) may be say Cotton Textile manufacture and the answer to question 16(e) may be Chemical Engineer in that industry or a clerk or an accountant in that industry or a labourer in that industry or a truck driver or the managing director of that industry and so on. Similarly in question 16(d) the nature of service may be some department of the State Government Service and in question 16(e) the description of work may be a clerk or an accountant, a Director of the Deptt., jeep driver in the Deptt. etc., etc. Again say, against question 16(d) the answer may be private medical practice and in 16(e) may cover orthopaedic surgeon, or nurse or a sweeper etc., working in that private medical practitioner's nursing home. The instructions given by your superior Census Officers may help you to clear any doubts you may have in your mind regarding the scope of questions relating to Nature of Industry, Trade, Profession or Service covered by question 16(d) and the description of actual work of the individual enumerated covered by question 16(e).

Q. 16(f) : Class of Worker

40. For a person who is ;

(i) an Employer, that is, who hires one or more persons in his work described in question 16 (e), write... ... ... ER

(ii) an Employee, that is, who does his work described in question 16(e) under others for wages or salary in cash or kind, write... ... ... EE

(iii) a Single Worker, that is, who is doing his work described in question 16 (e) without employing others except casually, and without the help of other members of the family except casually and a participant in work as members of cooperatives, write ... SW

(iv) a Family Worker, that is, who is doing his work described in question 16(e) in a family enterprise alongwith other members of the family without wages or salary in cash or kind, write... ... ... F.W.

For a person for whom an 'X' is put in questions 16(d) and 16(e) put an 'X' in this question also.

Explanation :

41. An Employer is a person who has to employ other persons in order to perform the work entered in question 16(e). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in business mentioned in question 16(e). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

41.1 An Employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

41.2 A Single Worker for the purpose of question 16(f) is a person who works by himself. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producer's co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

41.3 A family Worker is a member who works without receiving wages in cash or kind, in an industry, business, trade or service. For example, the working members in a family of *Dhobies* where they all participate and each does not receive wages separately will be family workers. There may be family workers

in industry, trade or professions as well. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative.

41.4 Members of the household who help solely in household duties should not be treated as family workers.

41.5 In the case of persons engaged in household industry *i.e.*, in the case of persons for whom the answer to question 16 (a) (i) is 'HHI', there will be three classes of workers *viz.*, Family Worker, Single Worker and Employee. There will be no Employer. Household industry by its very definition is conducted by the head of the household himself or/and other members of the household, the role of hired workers being secondary. If the head alongwith the members of the household is working in a household industry employing hired workers, the head and other members who are working should be treated as Family workers'. If the head alone is working with the assistance of hired worker(s) whose role would be secondary as indicated above, he would be treated as a 'single worker'.

POPULATION RECORD

42. Soon after you complete the enumeration of all the persons in the household you are expected to transfer certain items of information of all the individual members of each household to the Population Record. Population Record form is reproduced on page 4. If you feel that the filling of the Population Record in the field is likely to take considerable time there is no objection to the details being posted by you later at home at the end of the day. However, soon after you complete the enumeration of all the persons in a household you must note down the Location Code No. and the Household No. on the Population Record and also copy out in Col. 2 all the names of the persons enumerated in the household. This will help you to check with the members of the household and verify if all the persons qualified to be enumerated in the household have been fully enumerated.

42.1 The Population Record forms would have been supplied to you in convenient books and each page will normally take the entries of one household. However, if in a large household there are more number of persons than what a single Population Record form can accommodate, you may continue the entries on the next form but note boldly on the top of the continued Population Record as "Continued".

42.2 The Population Record hardly calls for any detailed explanation. On the top of each form please note correctly the Location Code No. and the Household No. It is important that you note the Household No. correctly. Do not fail to note boldly "INST" in respect of institutional households and "O" in respect of houseless households.

42.3 You will be required to furnish information in the Enumerator's Abstract on the total number of occupied residential houses, the census households, the institutional households and houseless households in your block with reference to the entries made in this Population Record. So please make sure that you have entered the Household No. correctly as this will guide you in posting the required particulars in the Enumerator's Abstract. At the right hand side below the Household No., you will have to record information if the household belongs to S.C./S.T. You would have already ascertained if the head of the household belongs to a Scheduled Caste/Scheduled Tribe with reference to Question 11 of the Individual Slip. If the head belongs to any S.C./S.T., write S.C./S.T. as the case may be and also the name of S.C./S.T. to which the head of the household belongs.

42.4 The columns in the main body of the Population Record are self-explanatory. You have to post them with reference to the information you have collected of each member of the household in the Individual Slip against the relevant questions. However, column 9 of the Population Record may require some explanation. For those who have returned themselves as workers for their main activity against Question 16 (a) (i) of the Individual Slip, while you may note 'C', 'AL' as the case may be, as recorded in the box against Question 16 (a) (i), in respect of those other than cultivators and agricultural labourers, you may please indicate briefly the description of work as recorded in Question 16(c) of the Individual Slip. For those who have returned themselves as non-workers for their main activity you may note the same abbreviation as recorded against Question 16 (a) (ii).

43. The filled-in individual slips and population record schedules were edited for missing entries and inconsistent entries in the tabulation offices. Coding was also done for industry and occupation according to National Industrial Classification, 1970 and National Classification of Occupations, 1968 respectively. Thereafter individual slip pads were broken and data was processed for general population tables, general economic tables, religion, scheduled castes and scheduled tribes and mother tongue on full count. After completion of tabulation required on full count 10 per cent sample was drawn from rural slips and 20 per cent from urban slips for processing remaining Economic, Social & Cultural, Migration and Fertility tables. Procedure followed for drawing this sample is reproduced below :—

Sample size :

44. A ten per cent sample of the slips was selected linear systematically with a random start from the individual slips relating to the rural parts of a tahsil. In the urban part of the district, a twenty per cent systematic sample of the individual slips was selected with a separate random start. The sample sizes were adopted on consideration of required precision, available resources and operational convenience.

Selection procedure

45. The sample design adopted in the 1971 census was a statified systematic sample of individual slips. For the purpose of sample selection, each district was divided into three sub-regions : (1) Tahsil (rural) ; (2) Non-city urban district ; and (3) City (urban unit with 100,000 and more population)

46. These sub-regions were termed as operational units. (If, however, any of the operational unit was unduly large, it was split into sub-operational units of at least 20,000 persons. Similarly, small-sized operational units were either clubbed together or tagged on to a contiguous larger unit so as to form an "effective operational unit" of the required minimum size.) Adoption of these operational units ensured accuracy in sample selection, maintaining at the same time stability in the sampling fraction within the sampled areas. This procedure has ensured effective control over sample selection within each block, as also in the entire operational unit.

47. For the purpose of the Primary Census Abstract (PCA) the individual slips were sorted into ten broad industrial categories and nine broad age groups for each of the sexes. The ten industrial categories of workers and non-workers were as follows : (I) Cultivators ; (II) Agricultural labourers ; (III) Livestock, forestry, fishing, hunting and plantation ; orchards & allied activities ; (IV) Mining & quarrying ; (Va) Manufacturing, processing, servicing & repairs in *household industry ;* (Vb) Manufacturing, processing, servicing & repairs in *other than household industry ;* (VI) Construction ; (VII) Trade & Commerce ; (VIII) Transport, storage & communications ; (IX) Other services; and (X) Non-workers.

48. The nine age groups into which the slips belonging to each industrial category were sorted, were 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, 60 and 'age not stated'. Thus the individual slips of a particular operational unit were sorted into $11 \times 9 = 99$ cells, separately for males and females. Sampling was done in each of the operational units independently by taking separate random starts. The slips were then distributed into 10 (or 5) pigeon-holes for rural/urban samples and one pigeon-hole was selected at random. The slips falling in the selected pigeon-hole constituted the sample. For operational details of the sampling procedure and instructions, the 'Manual of instructions on sorting, compilation (manual processing) & sampling procedures' may be consulted.

Estimation procedure for C-series tables (except Table C-I all parts and Table C-V).

49. The tables prepared for each of the districts/states from the ten per cent rural and twenty per cent urban sample slips have been inflated to give the final estimated tables. Estimates have been obtained by making use of the cell frequencies (usually labelled as 'controls') available from the tables prepared on full count basis, namely, PCA and B-I Part A. In order to ensure the maximum possible inter-table consistency, it became necessary to use the estimated frequencies of a few of the final tables as controls for estimating some cell frequencies of other tables.

50. This way of estimating the cell frequencies ensured that marginal totals of estimated tables tallied with that of the full-count tables. This is convenient to the user because after adjustment, the identical marginal totals are found in tables having the same marginal specification. "The adjustment diminishes the sampling variance to some extent ; the more the controls, the smaller the sampling variance of the adjusted frequencies[1]". Further, adjustment to known control totals has at the same time the effect of eliminating biases in the nature of inherent differences between the sample and complete count.

51. For the purpose of estimation of final tables, a set of multipliers was prepared for each table. A multiplier is the ratio of full-count frequency of some characteristics from PCA or Table B-I Part A and the corresponding sample frequency of the same characteristics from the sample table. The following statement gives the level of presentation of the tables and the related controls on which the multipliers are based. The details will be presented in the report on sampling procedures to be published later :—

Table	Level of presentation	Control based from tables
C II . .	District	B I Pt. A & PCA
C III A . .	do	,, ,,
C III B . .	do	,, ,,
C IV. . .	State	,, ,,
C IV App . .	District	,, ,,

As no such control was readily available for C VI (bilingualism), these were estimated by multiplying the sample values by 10 and 5 in rural and urban areas respectively.

Estimation procedure for Fertility tables

52. All the tables F I to F V are presented at state level. The sample table F I to F V have been multiplied by '10' in case of rural area and by '5' in case of urban area to estimate the final tables.

Reliability of estimates :

53. No exact formula can be given for the precision of the estimates in view of the systematic sampling design adopted. The relative standard error can be estimated roughly on the basis of simple random sampling, as $\sqrt{(1-f)\frac{1-p}{np}}$ where 'f' is the proportion samples, (0.10 in case of rural areas and 0.20 in case of urban areas) ; 'p' is the estimated proportion in any cell and 'n' the sample size being equal to ten per cent of individual slips in rural areas and twenty per cent in urban areas. In the present census, slips were sorted by sex, industrial category and age-group before sampling. It is expected that the efficiency must be considerably higher than a simple random sample of identical size. Extensive studies conducted have indicated that systematic sampling of individuals is more efficient than random sampling especially when the slips were pre-sorted for most of the socio-economic characteristics covered in a Census[2]. Thus the estimates prepared on the basis of the systematic sampling in the present census can be expected to be quite reliable.

1 Deming, W.E. Statistical adjustment of data Ch. VII.

2. Lahiri, D.B. "An experimental approach on the basis of census enumeration slips". Studies in population sampling, Vol. I.

54. Household composition tables were prepared from a two stage systematic sample drawn from population record schedules. Procedure adopted for drawing sample is reproduced below precisely :—

Sample size :

55. For the preparation of tables C-I Part A, C-I Part B(i) and C-I Part B (ii) on household composition, a sample of residential households was drawn in two stages. In the first stage, a twenty per cent systematic sample of effective enumeration blocks (defined later) was selected systematically. In the second stage, a twenty per cent sample of population records relating to residential households was selected from each of the sample block, again systematically.

Selection procedure :

56. For the purpose of sample selection, the rural and urban parts of each district were treated as separate strata. Within each stratum, a list of blocks was prepared by merging those containing less than 50 households with the neighbouring blocks. Blocks formed in this way were called 'effective enumeration blocks' or simply 'effective blocks'. The list of effective blocks so formed served as a frame for the selection of the first stage unit. A twenty per cent sample of effective blocks was then selected systematically. Having identified the first stage units, the population record books for the selected effective blocks were assembled. Within each selected effective block, the population records relating to residential households were serially numbered. To do this effectively, instructions were issued to hold the population record relating to 'houseless households or institutional households'. Care has also taken to see that only one serial number was assigned to a population record, whenever the record relating to a household covered more than one page. In cases where 'effective blocks' were formed by merging two or more blocks, the population record books corresponding to all the census enumeration blocks constituting the effective block, were assembled together and then the households were selected. Fresh random numbers were selected for each effective block. The population records corresponding to the selected households were marked 'S' at the right hand top corner with a stamp provided.

Estimation procedure :

57. The tables prepared for each of the stratum were multiplied uniformally by 25 to give the final estimated table.

57.1 Detailed discussion on data presented in these tables will appear in General Census Reports. However, an analysis of some important items is attempted briefly in the preceding pages.

Size of Household and Household Composition

58. From statement I we observe that the size of the Households varies from 5 to 7 in various districts of the State in urban and rural areas. Urban area has a small household as compared with household in rural area.

59. From statement II we observe that more than 90 per cent of the households have male heads in the State and its districts except Mahendragarh district where male heads have formed 87.9 per cent only. Jind district has the least number of female heads where the percentage of male heads is 96.1 per cent and that of female heads is 3.9 per cent.

60. From statement III we observe that most of the heads are living with their spouses and off-springs i.e. sons and daughters both unmarried and married. Other important relations i.e. father, mother, brothers and sisters have a lesser proportion as compared with sons and daughters. The proportion of married relations living in the household is considerably lower than unmarried relations and it has a steep fall for daughters, sisters and other male and female relations.

Distribution of population by age groups

61. From Statement IV given below and image diagram appearing in this volume we observe a very broad base in age group 0--14 for both the sexes (males 46.01 per cent and females 46.48 per cent) which shows quite high natural growth rate. From age group 0—14 as we go to higher age groups we find a regular fall in percentage in both the sexes which is natural. The lower age groups continue to flow to higher age groups and during this process they continue to lose through normal mortality. There is, however, abrupt rise in percentage of males in age groups 50—54 and 60—64 and in age group 60—64 amongst females. These may be due to preference to 50 and 60 digits or higher mortality in preceding age groups during the last decade.

STATEMENT IV

Percentage of males and females amongst total male and female population by age groups

Age-group	Males	Females
Total	**100.00**	**100.00**
0—9	31.30	32.05
10--14	14.71	14.43
15- 19	9.93	9.55
2.--24	7.46	7.94
25- 29	6.14	6 6

45—49	3.63	3.58
50—54	3.89	3.28
55—59	2.12	1.88
60—64	2.85	2.26
65—69	1.28	0.98
70+	2.37	1.72
Age not stated	0.01	0.01

Marital Status

62. Statement V appearing below gives us percentage of each sex by marital status in Haryana state and its districts. It is observed from this statement that a bulk of males and females fall in "Never Married" category. There are as many as 57.5 per cent "Never Married" males and 48.9 per cent "Never Married" females in all areas. There are 57.3 per cent males and 48.4 per cent females in rural areas in this category Figures for urban areas are slightly higher as a number of unmarried persons specially students are attracted for higher education. Percentage of "Never Married" males varies from 54.7 per cent to 58.6 per cent in districts of the State amongst males and between 46.4 per cent to 51.3 per cent amongst females. Percentage of married males, varies from 37.8 per cent to 41.8 per cent in districts of the state while the State average is 39.2 per cent. Percentage of married females is comparatively higher which forms 45.7 per cent of female population in the State. Percentage of married females varies from 45.0 per cent to 48.4 per cent in the districts. Percentage of married females as compared with married males is higher due to low sex ratio in the State. Percentage of widowed females is quite high i.e. 5.4 per cent in the State as compared with widowed males which form only 3.3 per cent. It can be attributed to two factors i.e. widow marriage amongst males and comparatively higher longevity amongst females after crossing forties. Percentages of divorced and separated persons is negligible throughout the state.

STATEMENT V

Percentage of persons of each sex by marital status

Literacy and educational standards

63. Percentage of literates in the state is quite low in all age groups but is very low in higher age groups. Lower literacy rates amongst higher age groups is due to backwardness of the State in the past. A glance of percentages given in Statement VI shows that the percentages of illiterates is high for males in age group 5—9 and for females in age groups 35 +. The lowest percentage of illiterates is found in age groups 10- 14 both amongst males and females followed by age group 15—19 which shows better facilities for education during the last decade and higher age of children for getting admission in educational institutions. From this statement we observe that 44 per cent males are literate excluding age group 0—4 as against 17.8 per cent females. Most of the literates have attained primary educational level (15.2 per cent males and 6.6 per cent females). Percentage of males having higher educational level of Matriculation or higher is only 6.8 per cent while that of females is just 1.9 per cent.

64. From table C-IV we observe that the oldest man living in Haryana is of 131 years and the oldest woman 125 years of age. A glance at the figures given in this table also reveals quite high concentration against quinquennial ages and some concentration against even age years. This is due to preference to numbers five and ten.

65. Statement VII gives us number of speakers in different languages included in the schedule eighth of constitution of India and their percentage to total population in the State. It is observed from this statement that Hindi speakers form 89.42 per cent, Punjabi speakers 8.34 per cent, Urdu speakers 1.95 per cent and speakers of other languages 0 29 per cent of the total population of Haryana State. Speakers of 15 languages (inclusive of languages/mother tongues grouped under each) form 99.71 per cent of the state population.

66. From bilingual table C-VI we observe 10 per cent can speak and understand another language in addition to their own mother tongue. Out of these, 770,008 persons—212,760 persons and 15,490 persons can speak Hindi, Punjabi and Urdu respectively as second language.

67. From fertility table appearing in this volume we observe crude fertility rate of 187 per thousand women in rural areas and 162 in urban areas. These crude fertility rates work out as 186 in rural areas and 163 in urban areas amongst Hindus which is quite close to the General fertility rate.

68. From Statement VIII we observe that all religions in rural and urban areas have the least crude fertility rates. Crude fertility rate in rural areas returned by muslims is highest in the State, while that in urban areas Buddhist women have returned the highest crude fertility rate. Crude fertility rates returned by Scheduled castes is very high viz., 203 in rural areas and 192 in urban areas as compared with general population. From Statement IX we observe that the crude fertility rate in the State is higher amongst educated women both in rural and urban areas as compared with illiterate women. It may be due to better economic position amongst females of the educated families as compared with females of illiterate families.

A fly leaf giving extent and limitations of data given in each table preface the table. During 1951 and 1961 Censuses somewhat similar social and cultural tables were presented mention of which has been made in the relevant fly-leaf.

69. Information on fertility was collected in 1941 and 1971 Censuses only. In 1931 a special enquiry was conducted for collection of information on fertility. The information collected during 1941 on fertility could unfortunately not be processed on account of World War II and it went waste. Tables generated from data collected in 1931 are listed below for benefit of some readers who may be interested :—

1. Sex of first born.
2. Proportion of fertile and sterile marriages.
3. Average of size family correlated with age of wife at marriage.
4. Size of families by occupation of husband.
5. Size of families by caste or religion and age of wife at marriage.
6. Duration of marriage correlated with caste or religion.

TABLE C-I PART A

Members of Household by relationship to head of household classified by age-groups

This table has been prepared for total, rural and urban population of the State and each district and is based on two stages of 20 per cent sample. The results obtained from sample have been inflated to obtain estimates for full count. Details of sampling and estimation procedure have been discussed on page 14 in the introduction. The data in this table furnishes information about the composition of households by relationship to the head of the household classified by three broad age-groups viz., less than 30, 30—49 and 50+. The figures for age not stated have been included in all ages. Data have been presented separately for related and unrelated members of the households and single member households. The relationship to the head of the household has been shown for son, brother, father, mother and other male or female members separately for married relations and for relations other than married relations (never married, widowed and divorced or separated persons). For later relations in addition to above mentioned relations information for daughter and sister has also been furnished. Unrelated persons and single member households have not been classified according to marital status. Among the married relations, the data for the spouses of the heads of the households have been given separately.

2. The table also presents total number of households and total household population by sex which is less than appearing in General population tables as this is based on estimation obtained from a sample of population records and excludes institutional and houseless households while general population tables have been generated from individual slip on full count.

3. This table broadly corresponds to table C-I of 1901-Census which had been prepared on 20 per cent sample basis for total, rural and urban population separately. The members of the households were grouped under (a) family members; heads of households who could be either male or female; their spouses; married sons and other male and female married relations and relations other than married persons, and (b) non family members. No information by relationship was given for relations other than married persons nor any information was given for single member households. Classification by broad age-groups was also not attempted. The information for rural areas was then classified by households (i) engaged neither in cultivation nor in household industry (ii) engaged in household industry and (iii) engaged in cultivation by size of holding group while combined figures were given for urban and total areas. This additional information was processed from household schedule canvassed in 1961 Census only.

4. This table indicates the extent of the joint family system which is a topic of sociological interest. The age distribution of the heads of the households and their relations classified by marital status will further help study the future trend of the joint family system.

C-I PART A MEMBERS OF HOUSEHOLD BY RELATIONSHIP TO HEAD OF HOUSEHOLD CLASSIFIED BY AGE GROUPS TOTAL/RURAL/URBAN

TABLE C-I PART B(i) and (ii)

Households where the head is a male/female by relationship of members with the head

This table has been prepared in two parts. Part B(i) presents data on the composition of households in the State and its Districts as a whole by relationship of members with the head of the household where the head is a male and Part B(ii) provides similar information for households where the head is a female. The relationship of members with the head have been elaborated in much more detail in this table as compared to those given in Table C-I Part A. The relations included in this table are son, brother, son's wife, brother's wife, daughter, sister, sister's son, daughter's husband, sister's husband, father, mother, and mother's brother. The households have been further grouped under single member households (Col. 4), households with spouses of head (Col. 5), households with married relations Col. (6-19), households with relations other than married persons (Col. 20-33) and households having unrelated persons (Cols. 34-35). This table will provide interesting material to sociologists as it reveals composition of households having married relations also. The comparative study of household composition having male or female head will be of significant interest.

2. This table has also been prepared on the basis of two stage 20 per cent sample of households and the data obtained from the tabulation of these households have been inflated to give estimates for full count.

3. This table taken together corresponds largely to table C-I of 1961.

C-I PART B(i) HOUSEHOLDS WHERE THE HEAD IS A MALE BY RELATIONSHIP OF MEMBERS WITH THE HEAD

TABLE C-II

Age and Marital Status

This table presents data relating to marital status of the population by sex and age-groups and has been prepared for total, rural and urban areas separately for the State and each district. Total population of each sex has been distributed into quinquennial age-groups: 0-9, 10-14, 15-19, 20-24, 25-29, 30-34, 35-39, 40-44, 45-49, 50-54, 55-59, 60-64, 65-69, 70 + and age not stated. The population under each age-group has been cross tabulated by marital status i.e. Never married, Married, Widowed and Divorced or separated. The persons who did not return their marital status have been grouped under "Unspecified Status".

2. This is an important demographic table. Exactly identical table was prepared in 1961-Census on full count basis and in 1951 on 10 per cent sample. This time it has been prepared on 10 per cent sample of rural slips and 20 per cent sample of urban slips and then inflated to give full count estimates.

3. This table is useful in studying the trends of changes in the proportions in different marital status and gives the extent of mortality in various marital status and age-groups. The data on married females by age-groups can also be used for forecasting the future births from age-specific birth rates.

4. It may be mentioned here that no person in the age-group 0-9 has been treated as married even if reported as such in the 'Individual slip'. This has been done to relate marriage closely with 'effective marriage' rather than 'ritual marriage'.

C-II AGE AND MARITAL STATUS

TABLE C-III

Age, Sex and Education

This table has been prepared in two parts. Part A relates to all areas and Part B to urban areas.

2. The table corresponds to table C-III Part A and B of last Census with slightly different educational levels and age-groups. In 1961 it was prepared on full count basis and in 1951 on 10 per cent sample basis. This time it has been prepared on 10 per cent sample for rural areas and 20 per cent sample for urban areas. Thereafter the sample has been raised to full count.

3. The test adopted for literacy in 1971-Census was the ability to read and write with understanding. If a person fulfilled this test, then he was treated as literate otherwise illiterate. In case of literate persons, the highest examination passed or the highest educational level attained, if any, was also recorded.

4. The educational levels adopted for Part A i.e. all areas of this table are as follows :—

1. Primary;
2. Middle;
3. Matriculation or Higher Secondary;
4. Non-technical diploma or certificate not equal to degree;
5. Technical diploma or certificate not equal to degree; and
6. Graduate and above.

5. The educational levels of Part B i.e. urban areas are as follows :—

1. Primary;
2. Middle;
3. Matriculation or Higher Secondary;
4. Non-technical diploma or certificate not equal to degree;
5. Technical diploma or certificate not equal to degree;
6. Graduate degree other than technical degree;
7. Post-graduate degree other than technical degree; and
8. Technical degree or diploma equal to degree or post-graduate degree :—
   (i) Engineering and Technology;
   (ii) Medicine;
   (iii) Agriculture, Veterinary and dairying ;
   (iv) Teaching; and
   (v) Others.

6. This table enables us to assess progress in literacy in different age groups and educational levels.

TABLE C-IV

Single Year Age Returns

This table has been prepared for the entire population according to single year age returns at the state level only and for total, rural and urban areas separately. Similar table was prepared in 1961-Census on full count basis and in 1951 on 10 per cent sample whereas this time it has been prepared on 10 per cent sample for rural areas and 20 per cent sample for urban areas and then estimated to full count.

2. This is a very useful table for the Census Actuary for computing mortality rates of earlier censuses and for preparing Life tables.

Appendix to Table C-IV

3. This table is supplemented with an appendix which has been prepared at the district level giving five year age-groups viz., 0—4, 5—9, 10—14 etc.

TABLE C-V

Mother-tongues of the 1971 Census

Part A : Distribution of languages (inclusive of mother-tongues grouped under each) specified in Schedule VIII to the Constitution of India.

Part B : Speakers of languages/mother-tongues (inclusive of mother-tongues where grouped) other than those specified in Schedule VIII to the Constitution of India.

FLYLEAF

These tables correspond to the all-India language tables of the Census of India 1951 published in Census of India Paper I of 1954 and the language tables C-V of the Census of India 1961 published in volume I Part II-C (ii)-Language tables and volume XIII Punjab Part II-C Social and Cultural Tables.

2. The question on mother-tongues at the 1971-Census and instructions to enumerators were as follows :—

Question 14 : Mother-tongue

3. Definition.—Mother-tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother shall be recorded.

4. Record mother-tongue in full whatever be the name of the language as returned and avoid use of abbreviations. You are not expected to determine if the language returned by a person is the dialect of another major language and so on. You should not try to establish any relationship between religion and mother-tongue. You are bound to record the language as returned by the person as his mother-tongue and you should not enter into any argument with him and try to record anything other than what is returned. If you have reason to suspect that in any area due to any organised movement, mother-tongue was not being truthfully returned, you should record the mother-tongue as actually returned by the respondent and make a report to your superior Census Officer for verification. You are not authorised to make any correction on your own.

Table C-V Part A is in two sections : (i) showing the distribution of speakers of languages (inclusive of mother-tongues grouped under each) specified in Schedule VIII to the Constitution of India for the state and its **seven** districts separately for total, rural and urban areas cross-classified by sex and (ii)showing the distribution of speakers of these languages for **seven** districts, **thirty two** tahsils and **sixty five** towns in the state for total areas only cross-classified by sex. The data for the rural areas of the tahsil are not presented but they can be derived by substracting data in respect of towns within the tahsil from the total tahsil figures.

Table C-V Part B presents speakers of languages/mother-tongues (inclusive of mother-tongues where grouped) other than those shown under Part A for the state, districts, tahsils and towns. This table is also being presented in two sections(i) showing the speakers of these languages/mother-tongues for the state and its districts for total, rural and urban areas cross-classified by sex and (ii) showing the distribution of these languages/mother-tongues for total areas of districts, tahsils and towns cross-classified by sex.

5. In both parts A and B mother-tongues have been grouped in some cases under the relevant language (s). This has been done on the basis of information readily available or in the light of studies already made. Those 'identifiable' mother-tongues which returned 10,000 or more speakers each at the all-India level have been grouped in parts A and B as shown below.

Part A

HINDI	— Banjari; Bhadrawahi; Bhojpuri; Braj Bhasha Bundelkhandi; Chhattisgarhi; Garhwali; Haryanvi; Kangri; Kumauni; Magdahi; Magahi; Maithili; Malvi; Mandeali; Marwari; Mewati; Nimadi; Pahari; Rajasthani.
PUNJABI	— Bagri

Part B

BHILI/BHILODI	— Bhilali; Kokna; Kokni/Kukna
LAHNDA	— Multani

6. All other mother-tongues falling under part B and which returned less than 10,000 speakers each at the all-India level or were not 'identifiable' on the basis of information available as of date, are included in the category 'Others' occurring as the last entry in part B.

*PAHARI is combination of various speeches spoken over long stretches of areas where the speakers preferred to give a general name as Pahari.

Bilingualism
Flyleaf

This table corresponds to table D-I Part II of the 1951 and C-VI of the 1961 censuses.

2. The question on bilingualism at the 1971 census was :

Question 15 : Other languages

"After recording the mother-tongue in question 14, enquire whether the person knows any other language (s), Indian or foreign, and record language (s) returned by him against this question. In case he does not know any language apart from his mother-tongue, put 'X' against this question.

3. The number of languages recorded under this question need not be more than two. These languages should be other than his mother-tongue and they should be recorded in the order in which he speaks and understands best and can use with understanding in communicating with others. He need not necessarily be able to read and write these languages. It is enough if he has a working knowledge of these subsidiary languages to enable him to converse in that language with understanding".

4. In this table, data on bilingualism are presented only for selected languages/mother-tongues (L/MTs). The selection of these L/MTs has been done on the basis of all India table C-VI-Bilingualism of 1961 and a list of L/MTs was devised for all India. This list formed the basis for preparing the table on bilingualism as estimated from the processing of 10 per cent rural and 20 per cent urban sample slips. The rural table was processed manually and the urban table on the computer. The estimated tables for rural and urban areas as pooled are presented here.

5. Columns 2, 3 and 4 of the table give the total number of speakers of L/MT inclusive of MTs grouped under it. Columns 5, 6 and 7 give figures of such of the speakers who returned a second language, that is to say, any other L/MT not accounted for in columns 2, 3 and 4. Column 8 contains in 'run on' fashion the names of subsidiary L/MTs inclusive of L/MTs wherever grouped by number of male and female speakers within brackets.

DISTRIBUTION OF CURRENTLY MARRIED WOMEN ACCORDING TO THEIR AGE AT MARRIAGE 1971

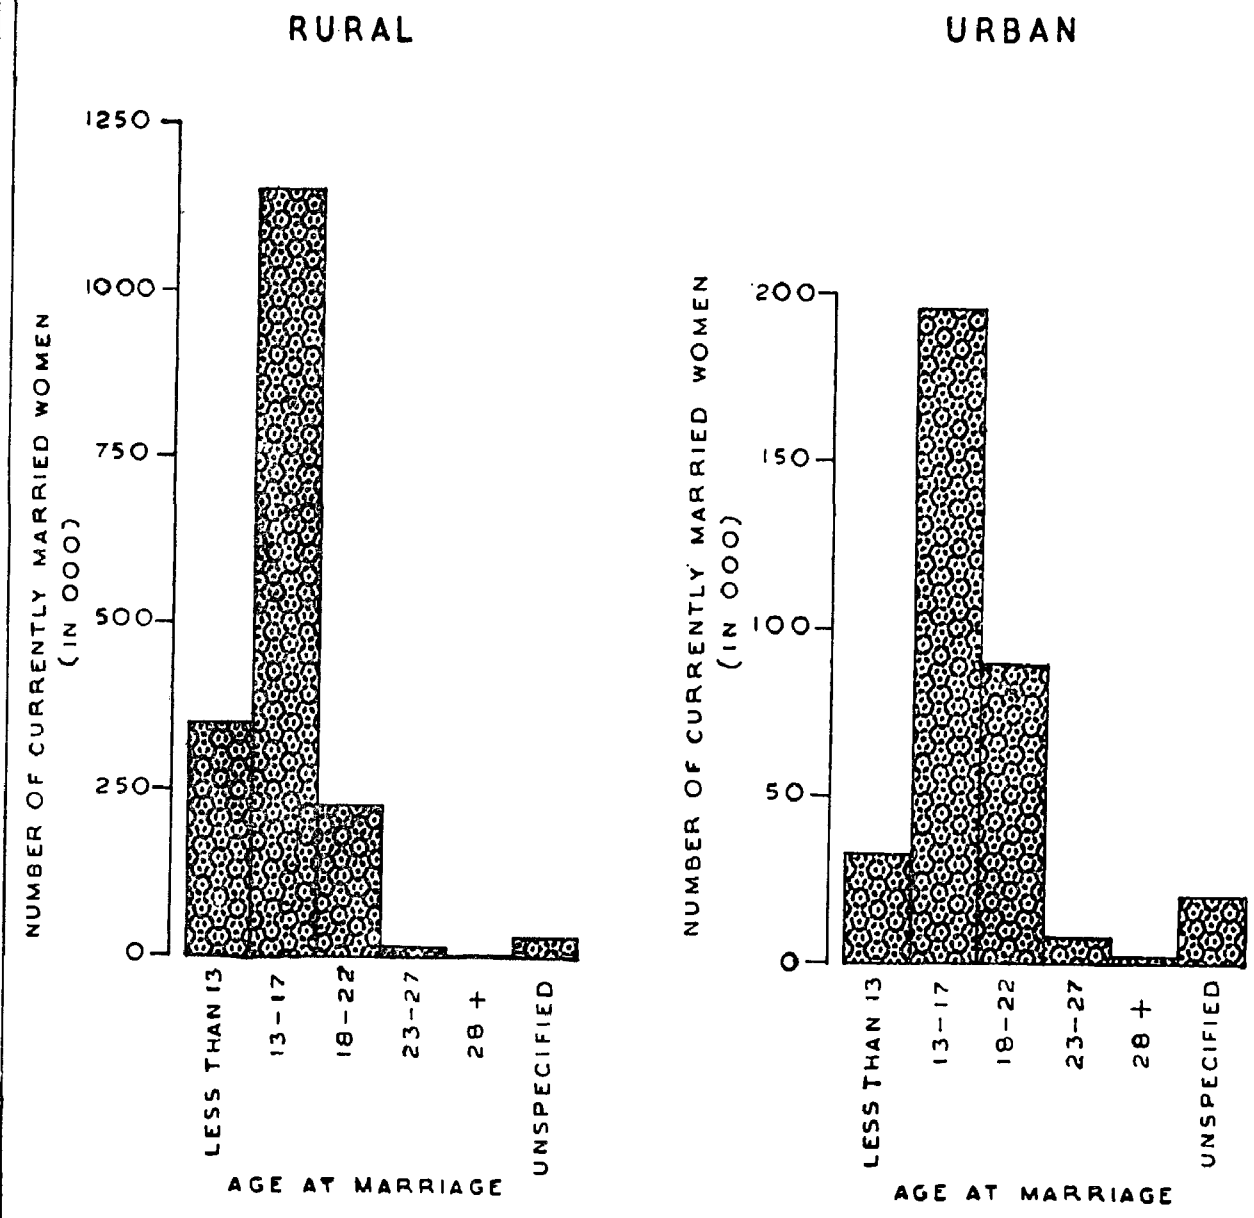

TABLE F-I

Distribution of currently married women and the related births during the last year by religion, present age and age at marriage

This table has been prepared in two parts. Part A relates to rural areas and Part B to urban areas. Data in this table has been presented at State level only and is based on 10% sample for rural areas and 20% sample for urban areas. This table shows the distribution of currently married women and the related births during the last one year by six main religions *i.e.* Buddhist, Christian, Hindu, Jain, Muslim, Sikh and other religions and religion not stated, present age and age at marriage of the mother.

2. The data are very useful for deriving differentials by religion in median age at marriage and in age specific fertility rates, total fertility rate and general fertility rate for various age groups at marriage.

Appendix to Table F-I

3. This table is supplemented with an appendix which gives information similar to Table F-I separately for scheduled castes. There being no Scheduled Tribes in Haryana no information for Appendix for Scheduled Tribes appears.

TABLE F-II

Distribution of currently married women and the related birhts during the last year by education, present age and age at marriage (Rural/Urban)

The data in this table have been presented in two parts : Part A furnishes information for rural areas and Part B for urban areas. This table has been prepared only at State level and is based on 10% sample for rural areas and 20% sample for urban areas. Thereafter the sample has been raised to full count. This table gives the distribution of currently married women and the related births during the last one year by illiterate and three educational levels viz., (i) Literate but less than Matriculate (ii) Matriculate and above but less than graduate and (iii) Graduate and above, further classified by present age and age at marriage.

2. The data is of great help in deriving differentials by broad educational levels in median age at marriage and in age specific fertility rate, total fertility rate and general fertility rate for various age groups at marriage.

TABLE F-III

Distribution of currently married women and the related births during the last year by religion, duration of marriage and age at marriage (Rural/Urban)

This table presents data in two parts. Part A of this table relates to rural areas and Part B to urban areas and has been prepared only at State level. This table has been processed on 10% sample for rural areas and 20% sample for urban areas and the sample results have been raised to full count. This table gives the distribution of currently married women and the related births during the last year by six main religions *i.e.* Buddhist, Christian, Hindu, Jain, Muslim, Sikh, other religions and religion not stated further classified by duration of marriage and age at marriage.

2. The data given in this table is very helpful in deriving differentials by religion in duration specific fertility rates for various ages at marriage groups.

Appendix to Table F-III

3. This table is supplemented by an Appendix which gives similar information separately for Scheduled Castes/Scheduled Tribes only. This Appendix will help us to derive differentials for Scheduled Castes/Scheduled Tribes in duration specific fertility rates for various age groups of age at marriage. There being no Scheduled Tribe in Haryana no information for Appendix for Scheduled Tribes appears.

TABLE F-IV

Distribution of currently married women and the related births during the last year by education, duration of marriage and age at marriage (Rural/Urban)

This table has two parts. Part A deals with rural areas and Part B with urban areas. It presents data only at State level. The distribution of currently married women and the related births during the last year by illiterates and three educational levels, duration of marriage and age at marriage has been provided in this table. The data given in this table is very helpful for deriving differentials by education in duration specific fertility rates for various ages at marriage groups.

2. This table has been processed on 10% sample for rural areas and 20 per cent sample for urban areas. Thereafter the sample has been raised to full count.

TABLE F-V

Distribution of currently married women and the related births during the last year by religion, education groups, present age and age at marriage (Rural/Urban)

This table shows the distribution of currently married women and the related birth during the last year by religion-cum-education, present age and age at marriage. It has been prepared only at State level and is based on 10% sample for rural areas and 20% sample for urban areas. Thereafter the sample has been raised to full count. The data is helpful in deriving differentials by Religion-cum-Education in median age at marriage and in age specific fertility rates, total fertility rate and general fertility rate for various age groups at marriage.
